Errata: National Income and Product Accounts, 1929–76

The tables below provide corrections to estimates published in *The National Income and Products of the United States, 1929–76: Statistical Tables.*

The corrections are grouped into four tables: Table 1 shows all series with corrected estimates for 1929–72; table 2 shows corrections for 1973–76 for series with only annual estimates; table 3 shows corrections for 1973–76 for series with both annual and quarterly estimates; and table 4 shows corrections for 1973–76 for series with both annual and monthly estimates. Each corrected series is identified by its table and line number and an abbreviated title and is shown in the same units as in the original publication.

Table 1.—Corrections for NIPA Tables, 1929–72

1. For "Gross domestic business product less housing" series (current dollars, constant dollars, and implicit price deflators), there are also corrections for all earlier years. See subsequent table for corrected historical data. In the corrected series for these items, there are only annual totals. Quarterly estimates are not feasible because of the unavailability of farm housing data on a quarterly basis.

See note at end of table 1.
