Such deduction items are reflected under trust account receipts as net appropriations to the Federal Old-Age and Survivors Insurance Trust Fund. In the above statement, similar treatment has been accorded net transfers to the Federal Old-Age and Survivors Insurance Trust Fund (formerly Old-Age Reserve Account) made during the fiscal years 1936 to 1940, in order to facilitate comparison with later periods.

12/ Receipts from capital stock and paid-in surplus reductions that are available to be released under existing law are not reflected under receipts, but rather are included as negative items under expenditures. During the fiscal year 1941, reductions in capital in this manner were as follows: Under general expenditures: Banks for cooperatives - $60 millions, and Federal land banks - $100 millions; under revolving funds: Federal Farm Mortgage Corporation - $100 millions, Federal intermediate credit banks - $40 millions, and production credit corporations - $15 millions; a total of $315 millions.

13/ Effective September 1, 1941, the expenditures for commodity food stamps of the Surplus Marketing Administration were reflected as Transfers to trust accounts, etc., rather than General, as was the practice prior to that date. Classifications have not been adjusted prior to September 1, 1941.

1/ Beginning July 1940, amounts representing appropriations equal to collections of Social Security taxes under the Federal Insurance Contributions Act for old-age insurance (less reimbursements to the General Fund of the Treasury for administrative expenses) have been deducted from total budget receipts in the Daily Treasury Statement to arrive at a figure called net receipts. Such deduction items are reflected under trust account receipts as net appropriations to the Federal Old-Age and Survivors Insurance Trust Fund. In the above statement, similar treatment has been accorded net transfers to the Federal Old-Age and Survivors Insurance Trust Fund (formerly Old-Age Reserve Account) made during the fiscal years 1936 to 1940, in order to facilitate comparison with later period.

2/ Excludes public debt retirements.

3/ Total expenditures less net receipts.

r Revised. In the fiscal years 1935 and 1936, $91 millions and $554 millions, respectively, were transferred from increment on gold to the working balance for retirement of national bank notes. In this statement, however, charges for retirement of national bank notes are reflected directly against increment on gold in the years during which the retirements were actually made. Inactive gold in the amount of $1,087 millions for the fiscal year 1937 is considered as a part of the working balance.

Basis of Computation: (1) Treasury bond yields are computed on the basis of the mean of bid and ask quotations in the over-the-counter market, beginning September 2, 1941; previously, closing prices on the New York Stock Exchange were used on days when sales took place on the Exchange in a particular issue and the mean of closing bid and ask quotations on the New York Stock Exchange on days when no sales took place. (2) Corporate bond yields are computed on the basis of closing prices on the New York Stock Exchange and the New York Curb Exchange; on days when an issue does not sell, the price of the last preceding sale is used.

Study of Individual Income Tax Returns Concerning Differences Between State of Residence and State of Filing

A recent study of all Federal individual income tax returns for 1936 shows that while ordinarily a taxpayer's place of residence and his filing district are located in the same State, some taxpayers living in one State file their income tax returns in another State. The present tabulation represents part of an extensive study of Federal tax returns recently completed under the sponsorship of the Treasury Department, Division of Tax Research, with funds allocated to the Department by the Commissioner of Work Projects under authorization of the President. It supplements material published in "Statistics of Income for 1936 , Part 1," and in "Statistics of Income Supplement Compiled from Income Tax Returns for 1936".

The Revenue Act of 1936 and accompanying Regulations governing the filing of the 1936 returns provided that a return should be filed in the district of the taxpayer's legal residence or that of the principal place of his own business, and that returns of individuals with no legal residence or place of business in the United States should be filed at Baltimore, Maryland. (Revenue Act of 1936, Section 53 (b)(1), and Regulations 94, Article 53-5.) A number of taxpayers who obviously failed to follow the filing requirements were mainly salaried workers and wage earners who filed in the district in which they were employed, and taxpayers required to file in Baltimore who erroneously filed in other districts. In a few cases it was not possible to determine the residence of a taxpayer since residential address was not given as required when the return was filed at the business address. Returns that gave no address, numbering less than 1,600, were excluded from the study.

Of the total of 5,367,580 individual returns tabulated, including 57,429 returns of estates and trusts filed by fiduciaries, 5,191,223 returns showed residence of taxpayers to be within State of filing. The remaining 176,357 returns, or 3.3 percent of the total, reported residence outside State of filing. (See Table I.) However, included in the latter total are the returns of 104,497 residents of the District of Columbia and 4,554 "foreign" residents who filed in Maryland, and 4,350 returns of residents of Alaska who filed in Washington according to filing requirements. (See Tables III and IV.) Excluding this group of returns, the number of returns filed outside of State of filing is reduced to 62,956, or 1.2 percent of all returns tabulated. Explanation of the minor variations existing between the two classifications for these returns can be found to a large extent in the proximity of State of residence to that of filing, notably in the case of New Jersey and Connecticut residents who filed in New York.

As in the case of number of returns, the amount of statutory net income 1/ reported on returns showing residence outside of State of filing represented only a small proportion (3.4 percent) of all such income reported. Comparison by individual States of the income reported on a residence basis as against a filing basis of classification shows essentially the same relationship as is shown for number of returns. (See Table II.) 2/

The practice of classifying individual income tax returns on the basis of the filing districts of the taxpayers has long been followed in compiling State data in "Statistics of Income" and other official statistics. The data presented here show that classification of returns on the basis of reported residence does not result in substantial differences between the two methods. The items reported by nonresidents in each State offset to a considerable extent the items reported on returns of residents filing in other States.

1/ Statutory net income (or deficit) represents the amount of gross income reported on Forms 1040 and 1040A minus deductions claimed by the taxpayer. Credits against net income allowed for tax computation are not included in deductions.

2/ Tables similar to Tables I and II for the items total income, total deductions, and salaries and wages, are available in source books on file with the Treasury Department. Also available is a more detailed table from which Tables III and IV were derived and a similar table relating to statutory net income.

1/ Returns from Alaska are filed in the collection district of the State of Washington, and returns from the District of Columbia are filed in the collection district of Maryland. Returns of individuals with no legal residence or place of business in the United States are required by income tax regulations to be filed in Maryland, although in fact such returns are not exclusively filed there.

1/ Comprises criminal cases of the Alcohol Tax Unit of the Bureau of Internal Revenue, the Bureau of Customs, the Bureau of Narcotics, the Secret Service Division, and the income tax and miscellaneous tax cases referred by the Penal Division of the Bureau of Internal Revenue to the Department of Justice with recommendation for criminal prosecution.

2/ Comprises cases transferred to state, local, or other authorities for prosecution and cases closed because of duplicate prosecutions.

3/ Cases "otherwise disposed of" consist of Customs and Narcotics cases in which no arrests were made and Secret Service cases which were disposed of by lunacy hearings.

4/ Percentages do not add to 100 because a single conviction may involve more than one type of sentence.

5/ Alcohol Tax Unit figures are based on cases in which a suspended or probationary sentence only was imposed.
