# SURVEY OF CURRENT BUSINESS

January 2007 Volume 87 • Number 1

1 **GDP and the Economy: Final Estimates for the Third Quarter of 2006**
Real GDP increased 2.0 percent after increasing 2.6 percent, reflecting an acceleration in imports, a larger decrease in residential investment, and decelerations in consumer spending for services, inventory investment, and state and local government spending. Corporate profits picked up.
6 Corporate Profits and the Economy

7 **Real Inventories, Sales, and Inventory-Sales Ratios for Manufacturing and Trade for the Third Quarter of 2006**
The estimates, including the estimates of inventories for manufacturing by stage of fabrication, have been updated.

10 **U.S. International Transactions: Third Quarter of 2006**
The U.S. current-account deficit increased $8.4 billion to $225.6 billion as a result of increases in the deficits on goods and income. In the financial account, net financial inflows increased $23.2 billion to $176.4 billion.

44 **An Ownership-Based Framework of the U.S. Current Account, 1995–2005**
The updated supplement to the international transactions accounts highlights the participation of multinational companies in the international markets for goods and services through both cross-border trade and sales by local affiliates.

# Director's Message

The start of a new year is always an exciting time, and in 2007, we intend to build on the progress made in previous years.

During 2006, in keeping with goals identified in our strategic plan, numerous improvements to our economic accounts were delivered. One highlight was the release of the first preliminary research and development (R&D) satellite account estimates, which detail the economic effects of treating R&D as an investment. We also accelerated the release of metropolitan area personal income, enhanced the integration of our accounts with other statistical agencies, incorporated real-time data into our estimates of consumer spending and investment, expanded quarterly balance-of-payments detail from 10 countries and regions to 37, and completed all annual accounts revisions.

In 2007, we look forward to once again implementing improvements that further our goal of providing the highest quality economic data on a timely basis. Our updated strategic plan will soon be available on the BEA Web site.

This month, the SURVEY includes an easy-to-read presentation of the most recent estimates of gross domestic product (GDP)—in this case, the "final" estimates of GDP for the third quarter of 2006. Please note the accompanying one-page box article, "Corporate Profits and the Economy," which discusses some relevant aspects of BEA's widely watched measure of corporate profits and recent trends.

Other articles present state personal income estimates, balance-of-payments estimates, and real inventory estimates, all for the third quarter of 2006. Another article presents an ownership-based view of the U.S. current account for 1995–2005.

# Taking Account...

## Reconciling State-Level Personal Income Measures

In a recent working paper, BEA economists Robert L. Brown, Ann E. Dunbar, and Adrienne T. Pilot evaluated the feasibility of reconciling BEA state personal income and Internal Revenue Service adjusted gross income (AGI). BEA publishes a national reconciliation of personal income and AGI annually. For research purposes, state-level reconciliations would be comparably useful to analysts examining economic, fiscal, and other issues. The paper looked at two main areas: (1) Wages and salaries and (2) nonwage components of income.

The study found that it is feasible to prepare an accurate reconciliation for wages and salaries and included reconciliations of state wages and salaries for 2000. However, additional research is required to determine the feasibility and value of reconciling state personal income and AGI for nonwage components—such as proprietors' income, personal current transfer receipts, and dividends, interest, and rent. The working paper discussed several methods and data sources that could be used to prepare a reconciliation of nonwage items. A critical issue is that many nonwage components of state personal income are derived from IRS data, making reconciliation of these components of limited use.

The paper is available on the BEA Web site at <www.bea.gov/bea/papers/PI-AGI.pdf>. State-level wage reconciliations are available at <www.bea.gov/bea/papers/IRSAGI.xls>.

## County Estimates of Compensation by Industry

BEA has released county estimates of compensation by industry for 2003–2005. The estimates for 2005 are new; the estimates for 2003–2004 have been revised to incorporate newly available source data.

Compensation—the sum of wage and salary disbursements and supplements to wages and salaries—is a key statistic in the personal income account. The estimates of compensation by industry cover 114 industries and aggregates for 3,111 counties. Also, BEA released compensation by industry for metropolitan areas, metropolitan divisions, micropolitan areas, combined statistical areas, and BEA economic areas.

Compensation estimates for all areas for 1998–2005 are available at <www.bea.gov/bea/regional/sqpi/>.

Local area personal income estimates for 2005 are scheduled to be released in April.

## BEA Digital Library Enhancements Unveiled

BEA has expanded its Digital Library, adding 60 articles that were published in the SURVEY OF CURRENT BUSINESS during the 1930s and 1940s.

The additions include a 1939 paper by Robert Nathan about national income by state, entitled "Some Problems Involved in Allocating Incomes by State."

These documents will allow users to more deeply explore the early motivations behind key economic policies brought about by the Great Depression, World War II mobilization, and the transition back to a peacetime economy after the war.

The BEA Digital Library, which was launched in June 2006, provides a host of other historical articles about a range of topics, such as the reestablishment of the alcoholic beverage industry after the end of Prohibition and the state of important industries, such as the railroad and electric power industries.

In addition, the Digital Library now features a new history page and a redesigned home page. The library can be accessed at <library.bea.gov/>.

# GDP and the Economy

## Final Estimates for the Third Quarter of 2006

ECONOMIC growth slowed in the third quarter of 2006, according to the "final" estimates of the national income and product accounts (NIPAs).[1] Real gross domestic product (GDP) increased 2.0 percent, revised down 0.2 percentage point from the "preliminary" estimate. In the second quarter, GDP increased 2.6 percent (chart 1 and table 1).[2]

The slowdown reflected an acceleration in imports (a subtraction in the GDP calculation), a larger decrease in residential investment, and decelerations in consumer spending for services, in inventory investment, and in state and local government spending.[3] The slowdown was moderated by upturns in equipment and software investment, consumer spending for durable goods, and Federal Government spending.

- Prices of goods and services purchased by U.S. residents increased 2.2 percent, 0.1 percentage point more than the "preliminary" estimate, following a 4.0-percent increase. Energy prices decelerated sharply, while food prices accelerated.
- Real disposable personal income (DPI) increased 4.1 percent, 0.4 percentage point more than the "preliminary" estimate; it decreased 1.5 percent in the second quarter.
- Corporate profits increased $61.5 billion (3.9 percent at a quarterly rate) after increasing $22.7 billion (1.4 percent) in the second quarter. See the box "Corporate Profits and the Economy" (page 6).
- The personal saving rate, personal saving as a percentage of current-dollar DPI, was −1.2 percent; in the second quarter, it was −1.4 percent.
- Real gross national product (GNP) increased 1.8 percent, compared with a 2.3-percent increase.

1. Each GDP estimate for a quarter (advance, preliminary, and final) incorporates increasingly comprehensive and improved source data. More information can be found at <www.bea.gov/bea/about/infoqual.htm> and <www.bea.gov/bea/faq/national/gdp_accuracy.htm>. Quarterly estimates are expressed at seasonally adjusted annual rates, which show the value of an activity if the quarterly rate were maintained for a year.

2. "Real" estimates are in chained (2000) dollars, and price indexes are chain-type measures.

3. In this article, "consumer spending" refers to the NIPA series "personal consumption expenditures," "inventory investment" refers to "change in private inventories," "Federal Government spending" refers to "Federal Government consumption expenditures and gross investment," and "state and local government spending" refers to "state and local government consumption expenditures and gross investment."

*Christopher Swann prepared this article.*

| Nondefense | 2.3 | 7.1 | 8.5 | –9.3 | 6.5 | 0.16 | 0.20 | –0.23 | 0.15 |
| State and local | 12.1 | 1.0 | 2.7 | 4.0 | 1.9 | 0.13 | 0.33 | 0.48 | 0.23 |
| **Addenda:** | | | | | | | | | |
| Final sales of domestic product | ..... | –0.3 | 5.6 | 2.1 | 1.9 | –0.28 | 5.61 | 2.11 | 1.90 |
| Gross domestic purchases price index | ..... | 3.5 | 2.7 | 4.0 | 2.2 | ..... | ..... | ..... | ..... |
| GDP price index | ..... | 3.3 | 3.3 | 3.3 | 1.9 | ..... | ..... | ..... | ..... |

1. The estimates of GDP under the contribution columns are also percent changes.

NOTE. Percent changes are from NIPA table 1.1.1, contributions are from NIPA table 1.1.2, and shares are from NIPA table 1.1.10.

Consumer spending accelerated slightly in the third quarter, contributing 1.96 percentage points to real GDP growth. Durable-goods spending turned up, reflecting an upturn in motor vehicles and parts, especially light trucks. Nondurable-goods spending accelerated, as clothing and shoes turned up.

Nonresidential fixed investment picked; equipment and software spending turned up.

The decrease in residential investment was larger than in the previous quarter for the second straight quarter and was the largest since the first quarter of 1991. The larger third-quarter decrease reflected a larger decrease in single-family structures and a downturn in "other" structures.

Inventory investment slowed, reflecting downturns in mining, utilities, and construction, in manufacturing, and in "other" industries.

Exports stepped up. Goods exports accelerated, as automotive vehicles, engines, and parts turned up. Service exports decelerated.

Imports accelerated. Petroleum and products and "nonpetroleum industrial supplies and materials" turned up; nonautomotive consumer goods accelerated. Imports of services turned down.

Federal Government spending turned up, primarily reflecting an upturn in nondefense spending.

Real final sales of domestic product (real GDP less inventory investment) slowed, increasing 1.9 percent after increasing 2.1 percent.

### GDP and Gross Domestic Purchases

In addition to gross domestic product (GDP), another related measure of economic growth—gross domestic purchases—is included in the national income and product accounts (NIPAs).

*GDP* measures the market value of final goods and services produced by labor and property in the United States, including the goods that are added to, or subtracted from, inventories. GDP is defined as the sum of consumer spending, business and residential investment, inventory investment, government spending, and exports less imports.

*Gross domestic purchases* is defined as GDP less exports plus imports. It measures domestic demand for goods and services regardless of their origin. Exports represent foreign demand for U.S. goods and services. Subtracting exports from GDP yields a measure of expenditures that focuses on domestic buyers. Imports can be viewed as the value of goods and services that exceed the domestic supply and that expand the consumption and investment alternatives for domestic purchasers.

Differences between GDP and gross domestic purchases reflect patterns in imports less exports: As imports exceed exports, gross domestic purchases exceeds GDP.

For annual and quarterly estimates of these measures, see NIPA tables 1.4.1 and 1.4.3–1.4.6.

For more information on GDP and gross domestic purchases, see also "A Guide to the National Income and Product Accounts of the United States" on BEA's Web site at <www.bea.gov/bea/an/nipaguid.pdf>.

## Revisions to GDP

**Table 2. Preliminary and Final Estimates for the Third Quarter of 2006**

[Seasonally adjusted at annual rates]

| | Change from preceding quarter (percent) | | | Contribution to percent change in real GDP (percentage points) | | |
|---|---|---|---|---|---|---|
| | Preliminary | Final | Final minus preliminary | Preliminary | Final | Final minus preliminary |
| **Gross domestic product (GDP)**[1] | **2.2** | **2.0** | **–0.2** | **2.2** | **2.0** | **–0.2** |
| **Personal consumption expenditures** | **2.9** | **2.8** | **–0.1** | **1.99** | **1.96** | **–0.03** |
| Durable goods | 6.0 | 6.4 | 0.4 | 0.47 | 0.50 | 0.03 |
| Nondurable goods | 1.1 | 1.5 | 0.4 | 0.23 | 0.32 | 0.09 |
| Services | 3.1 | 2.8 | –0.3 | 1.29 | 1.14 | –0.15 |
| **Gross private domestic investment** | **0.0** | **–0.8** | **–0.8** | **0.01** | **–0.13** | **–0.14** |
| Fixed investment | –0.9 | –1.2 | –0.3 | –0.15 | –0.19 | –0.04 |
| Nonresidential | 10.0 | 10.0 | 0.0 | 1.01 | 1.01 | 0.00 |
| Structures | 16.7 | 15.7 | –1.0 | 0.49 | 0.46 | –0.03 |
| Equipment and software | 7.2 | 7.7 | 0.5 | 0.52 | 0.55 | 0.03 |
| Residential | –18.0 | –18.7 | –0.7 | –1.16 | –1.20 | –0.04 |
| Change in private inventories | ..... | ..... | ..... | 0.16 | 0.06 | –0.10 |
| **Net exports of goods and services** | ..... | ..... | ..... | **–0.21** | **–0.19** | **0.02** |
| Exports | 6.3 | 6.8 | 0.5 | 0.68 | 0.73 | 0.05 |
| Goods | 9.4 | 9.4 | 0.0 | 0.71 | 0.71 | 0.00 |
| Services | –1.0 | 0.8 | 1.8 | –0.03 | 0.03 | 0.06 |
| Imports | 5.3 | 5.6 | 0.3 | –0.89 | –0.93 | –0.04 |
| Goods | 6.9 | 7.1 | 0.2 | –0.96 | –1.00 | –0.04 |
| Services | –2.7 | –2.6 | 0.1 | 0.07 | 0.07 | 0.00 |
| **Government consumption expenditures and gross investment** | **2.2** | **1.7** | **–0.5** | **0.42** | **0.32** | **–0.10** |
| Federal | 1.5 | 1.3 | –0.2 | 0.10 | 0.09 | –0.01 |
| National defense | –1.1 | –1.2 | –0.1 | –0.05 | –0.06 | –0.01 |
| Nondefense | 6.8 | 6.5 | –0.3 | 0.15 | 0.15 | 0.00 |
| State and local | 2.6 | 1.9 | –0.7 | 0.32 | 0.23 | –0.09 |
| **Addenda:** | | | | | | |
| Final sales of domestic product | 2.1 | 1.9 | –0.2 | 2.06 | 1.90 | –0.16 |
| Gross domestic purchases price index | 2.1 | 2.2 | 0.1 | ..... | ..... | ..... |
| GDP price index | 1.8 | 1.9 | 0.1 | ..... | ..... | ..... |

1. The estimates of GDP under the contribution columns are also percent changes.

The final estimate of a 2.0-percent increase in real GDP growth is 0.2 percentage point less than the preliminary estimate. The revised growth rate reflects a downward revision to consumer spending for services, which contributed 0.15 percentage point less to GDP growth than previously estimated. For 1978–2005, the revisions to GDP growth, without regard to sign, averaged 0.3 percentage point from the preliminary to the final estimates.

The downward revision to consumer spending for services primarily reflected revisions to medical care services, specifically hospitals and nursing homes.

Inventory investment was also revised down, reflecting revisions to wholesale trade and manufacturing.

State and local government spending was revised down, primarily reflecting a revision to structures investment.

### Source Data for the Final Estimates

The final estimates of gross domestic product for the third quarter of 2006 incorporated the following source data.

*Personal consumption expenditures:* Retail sales for August and September (revised). Quarterly services survey for the third quarter (new).

*Nonresidential fixed investment:* Construction put in place for August and September (revised).

*Residential fixed investment:* Construction put in place for August and September (revised).

*Change in private inventories:* Manufacturers' and trade inventories for September (revised).

*Exports and imports of goods and services:* International transactions accounts data for the second and third quarters (revised) and goods data for September (revised).

*Government consumption expenditures and gross investment:* State and local government construction put in place for August and September (revised).

*GDP prices:* Export and import prices for July, August, and September (revised), unit value index for petroleum imports for June (revised), and prices of single-family houses under construction for the third quarter (revised).

| Undistributed profits from current production | 512.4 | 64.4 | 128.5 | –11.8 | 27.8 | 21.2 | 34.9 | –2.4 | 5.7 |
| Net cash flow | 1,380.5 | –6.8 | 125.3 | 1.1 | 30.2 | –0.5 | 10.2 | 0.1 | 2.2 |

NOTE. Levels of these and other profits series are shown in NIPA tables 1.12, 1.14, 1.15, and 6.16D.

Corporate profits from current production increased $61.5 billion, or 3.9 percent at a quarterly rate, after increasing $22.7 billion, or 1.4 percent.

Profits of financial corporations decreased $9.1 billion, or 1.9 percent, following an increase of $41.7 billion, or 9.4 percent, in the second quarter.

Profits of nonfinancial corporations increased $75.8 billion, or 8.7 percent, after decreasing $32.8 billion, or 3.6 percent.

Taxes on corporate income increased $14.5 billion, or 3.0 percent.

After-tax profits increased $47.0 billion, or 4.2 percent.

Undistributed corporate profits (a measure of net saving that equals after-tax profits less dividends) increased $27.8 billion, or 5.7 percent.

Net cash flow with inventory valuation and capital consumption adjustments (a profits-related measure of internally generated funds available for investment) increased $30.2 billion, or 2.2 percent.

NOTE. Levels of these and other profits series are shown in NIPA tables 1.12, 1.14, 1.15, and 6.16D.
IVA Inventory valuation adjustment CCAdj Capital consumption adjustment

Industry profits with inventory valuation adjustment increased $63.2 billion, or 3.6 percent at a quarterly rate. This increase is larger than the increase in profits from current production ($61.5 billion) because it excludes the capital consumption adjustment, which decreased $1.6 billion.

Profits of domestic financial industries turned down, decreasing $8.1 billion, or 1.6 percent.

Profits of domestic nonfinancial industries turned up, increasing $76.5 billion, or 7.6 percent.

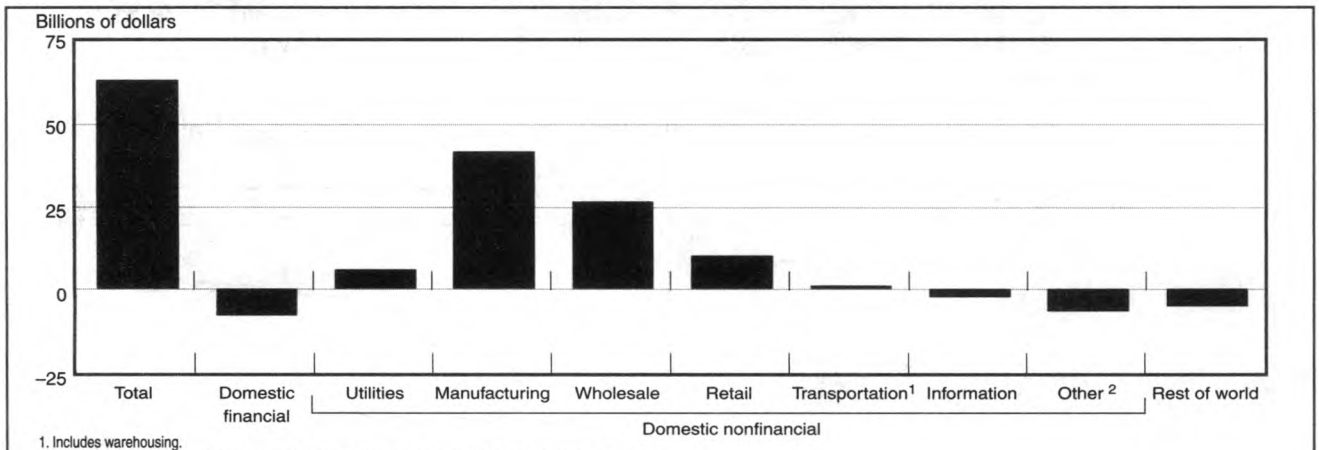
Profits of manufacturing industries turned up, increasing $42.0 billion, or 14.5 percent, reflecting an upturn in durable-goods manufacturing.

Profits of wholesale trade industries turned up, increasing $26.8 billion, or 27.2 percent.

Profits of retail trade industries turned up, increasing $10.1 billion, or 8.3 percent.

Profits from the rest of the world turned down, decreasing $5.3 billion, or 2.2 percent.

**Chart 2. Corporate Profits With Inventory Valuation Adjustment: Change From the Preceding Quarter, 2006:III**



1. Includes warehousing.
2. "Other" nonfinancial corporations include the agriculture, mining, construction, and services industries.
NOTE. Based on seasonally adjusted estimates.

U.S. Bureau of Economic Analysis

### Corporate Profits by Industry

Industry profits are corporate profits by industry with inventory valuation adjustment (IVA). The IVA removes the effect of prices on inventories. The IVA is the difference between the cost of inventory withdrawals at acquisition cost and replacement cost. Ideally, BEA would also add the capital consumption adjustment (CCAdj) for each industry. However, estimates of the CCAdj are only available for two broad categories: Total financial industries and total nonfinancial industries. For more information about BEA's methodology, see "Corporate Profits: Profits Before Tax, Profits Tax Liability, and Dividends" at <www.bea.gov/bea/mp_national.htm>.

## Corporate Profits and the Economy

Corporate profits gauge the general strength of the business sector. This widely followed statistic provides, among other things, an indication of future capital investment, a means to measure rates of return on investment, and a barometer that gauges the effect of policy changes on corporations.

Corporate profits in the national income and product accounts (NIPAs) measure profits earned by corporations from current production only. They do not include profits earned by corporations in other ways, such as profits associated with means of financing. The primary source data are data from the Internal Revenue Service. BEA also uses profits data based on company financial reports when tax-based data are not available.

BEA reports corporate profits on a current-dollar, seasonally adjusted, annualized basis. To ensure consistency with the NIPAs, BEA makes two adjustments. First, to remove the effects of price changes on inventories valued at historical cost and of tax accounting for inventory withdrawals, BEA adds an inventory valuation adjustment that values inventories at current cost. Second, to remove the effects of tax accounting rules on measured depreciation, BEA adds a capital consumption adjustment (CCAdj). CCAdj is defined as the difference between consumption of fixed capital (the decline in the value of assets due to wear and tear, obsolescence, accidental damage, and aging) and tax return depreciation.

Unlike other NIPA measures, changes in quarterly profits are reported at quarterly rates, not annual rates. Percent changes are reported in two ways: The change from the previous quarter and the change from the year-ago quarter.

Quarter-to-quarter changes in profits are relatively volatile, and comparisons to year-ago quarters can be skewed by nonrecurring events. For example, profits in the third quarter of 2006 were 31 percent higher than in the third quarter of 2005; however, profits in the third quarter of 2005 were restrained by Hurricanes Katrina and Rita.

In the current economic expansion, profit growth has been strong:

- **Profits as a share of GDP.** Profits as a share of current-dollar GDP clearly shows the growth in profits over the current expansion. Profits as a share of GDP was 12.4 percent in the third quarter of 2006, up 5.4 percentage points from a trough in the third quarter of 2001 (chart 1).
- **Cash flow to fixed investment.** The ratio of cash flow to current-dollar nonresidential fixed investment is considered an indicator of businesses' ability to finance investment internally. The ratio has steadily increased to 0.97 in the third quarter of 2006 from a trough of 0.69 in the third quarter of 2000.
- **Profit per unit of real gross value added.** BEA estimates the price, costs, and residual profit per unit of real gross value added in the nonfinancial corporate sector (NIPA table 1.15). These data indicate how price changes flow to profits through unit labor and nonlabor costs (chart 2). Since 2000, unit prices have risen 13.4 percent, from just under $1 per unit to $1.12. Unit labor costs have risen mildly, about 5 cents, and unit nonlabor costs have been relatively flat, reflecting lower interest rate costs. Since 2003, profit per unit of sales has grown from about 10 cents, and an 8-percent share of the per unit price, to 15 cents and a 14-percent share.
- **Financial and nonfinancial corporate profits.** BEA reports profits for domestic financial and nonfinancial industries. Profit levels in the nonfinancial industries have nearly tripled since the previous low in the fourth quarter of 2001. Profits in the financial industries have turned up from levels affected by the hurricanes in the second and third quarters of 2005.

# Real Inventories, Sales, and Inventory-Sales Ratios for Manufacturing and Trade for the Third Quarter of 2006

The quarterly estimates for the second and third quarters of 2006 and monthly estimates for May to October 2006 are presented in this report.

Tables 1B, 2B, 3B, and 4B present chain-weighted estimates. Table 1B presents inventories, and table 2B presents sales. Table 3B presents the inventory-sales ratios that can be used to assess the likelihood that businesses will add to, or reduce, inventories in response to changes in demand; these ratios supplement the quarterly current-dollar and real estimates of ratios of inventories to final sales of domestic business, of nonfarm business, and of goods and structures that are presented in NIPA tables 5.7.5B and 5.7.6B. Table 4B presents estimates of manufacturing inventories by stage of fabrication.

The estimates for 1967 forward are available in interactive tables on BEA's Web site at <www.bea.gov>. Click on "Gross Domestic Product," and under "Supplemental Estimates," click on "Underlying detail tables" and then on "List of Underlying Detail Tables."

p Preliminary
r Revised
Note. Estimates in this table are based on the North American Industry Classification System (NAICS). Chained (2000) dollar inventory series are calculated to ensure that the chained (2000) dollar change in inventories for 2000 equals the current-dollar change in inventories for 2000 and that the average of the 1999 and 2000 end-of-year chain-weighted and fixed-weighted inventories are equal. Because the formula for the chain-type quantity indexes uses weights of more than one period, the corresponding chained-dollar estimates are usually not additive.

p Preliminary.
r Revised.
NOTE. Estimates in this table are based on the North American Industry Classification System (NAICS). Chained (2000) dollar inventory series are calculated to ensure that the chained (2000) dollar change in inventories for 2000 equals the current-dollar change in inventories for 2000 and that the average of the 1999 and 2000 end-of-year chain-weighted and fixed-weighted inventories are equal. Because the formula for the chain-type quantity indexes uses weights of more than one period, the corresponding chained-dollar esmates are usually not additive.

# U.S. International Transactions

## Third Quarter of 2006

*By Matthew J. Argersinger and Erin M. Whitaker*

THE U.S. current-account deficit—the combined balances on trade in goods and services, income, and net unilateral current transfers—increased to $225.6 billion (preliminary) in the third quarter of 2006 from $217.1 billion (revised) in the second quarter (table A, chart 1).[1] The increase resulted from increases in the deficits on goods and on income. These increases were partly offset by an increase in the surplus on services and a decrease in net unilateral current transfers to foreigners.

In the financial account, net financial inflows—net acquisitions by foreign residents of assets in the United States less net acquisitions by U.S. residents of assets abroad—increased to $176.4 billion in the third quarter from $153.2 billion in the second quarter. Net acquisitions by foreign residents strengthened more than net acquisitions by U.S. residents.

The statistical discrepancy—errors and omissions in recorded transactions—was a positive $49.7 billion in the third quarter, compared with a positive $64.9 billion in the second quarter.

The following are highlights for the third quarter:

- Goods exports increased at a substantial rate for the fourth consecutive quarter. Goods imports accelerated as a result of a sizable pickup in nonpetroleum products.
- Both receipts and payments of income on financial assets other than direct investment increased much less than in recent quarters.
- Net U.S. purchases of foreign bonds increased to a record level, and net U.S. purchases of foreign stocks slowed.

1. Quarterly estimates of U.S. current-account and financial-account components are seasonally adjusted when series demonstrate statistically significant seasonal patterns. The accompanying tables present both adjusted and unadjusted estimates.

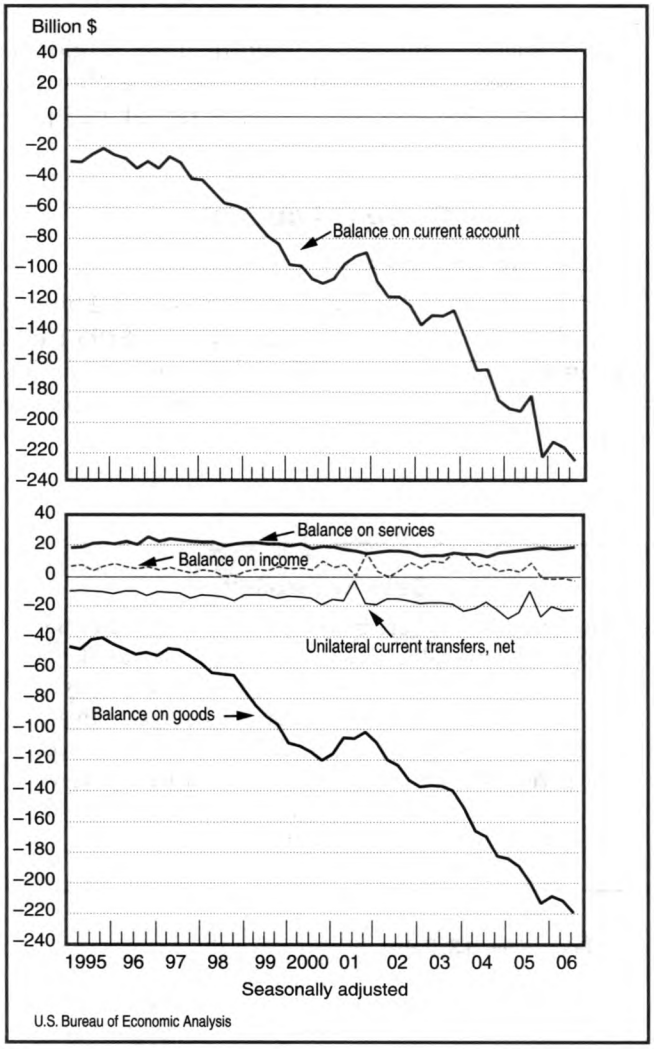
- Net foreign purchases of U.S. securities other than U.S. Treasury securities picked up as a result of a shift to net foreign purchases of U.S. stocks.

**Chart 1. U.S. Current-Account Balance and Its Components**



### Revisions to the Estimates

The preliminary estimates of U.S. international transactions for the second quarter that were published in the October 2006 SURVEY OF CURRENT BUSINESS have been revised.

The current-account deficit was revised to $217.1 billion from $218.4 billion. The goods deficit was unrevised at $210.6 billion; the services surplus was revised to $17.5 billion from $16.8 billion; the deficit on income was revised to $2.2 billion from $4.1 billion; and net unilateral current transfers to foreigners were revised to $21.9 billion from $20.4 billion. Net financial inflows were revised to $153.2 billion from $154.1 billion.

## Selected economic and financial market developments

In the third quarter, the U.S. dollar depreciated 1 percent on a nominal, trade-weighted, quarterly average basis against a group of seven major currencies that are widely traded in international markets (table B, chart 2). The U.S. dollar depreciated 1 percent against the euro; it changed little against the Canadian dollar; and it appreciated 2 percent against the Japanese yen.

In the United States, data releases in the third quarter indicated that U.S. economic growth in the second quarter slowed substantially. Releases indicated that the U.S. deficit on trade in goods and services on a 3-month moving-average basis was again increasing after decreasing for a brief period. U.S. monetary authorities left the target level for the Federal funds rate at 5.25 percent after steadily raising it over the last 2 years; other U.S. short-term interest rates leveled off or eased slightly (chart 3). U.S. long-term interest rates decreased, and U.S. and foreign stock markets rebounded.

In Europe, data releases indicated that euro area economic growth remained moderately strong in the second quarter. Among countries with the largest economies, economic activity in Germany and France strengthened further, and activity in Spain remained

**Chart 2. Nominal Indexes of Foreign Currency Price of the U.S. Dollar**

http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

relatively strong. Euro area monetary authorities raised the minimum bid rate on main refinancing operations, a key policy-controlled interest rate, to 3 percent from 2.75 percent.

In Japan, reports showed that economic growth in the second quarter slowed. Japanese monetary authorities increased their key overnight lending rate to 0.25 percent from zero, which it had been since early in 2001.

In Canada, reported second-quarter economic growth slowed, and Canadian monetary authorities left the target level for the overnight rate at 4.25 percent.

## Chart 3. U.S. and Foreign Interest Rates

## Current Account

### Goods and services

The deficit on goods and services increased $7.2 billion to $200.3 billion in the third quarter from $193.1 billion in the second quarter. The deficit on goods increased $8.0 billion, and the surplus on services increased $0.8 billion.

### Data Availability

The estimates that are presented in tables 1–11 of the U.S. international transactions accounts are available interactively on BEA's Web site at <www.bea.gov>. Users may view and download the most recent quarterly estimates for an entire table, or they may select the period, frequency, and lines that they wish to view. The estimates are available in an HTML table, in an Excel file, or as comma-separated values.

1. For more information on the nominal and real indexes of the foreign exchange value of the U.S. dollar, see *Federal Reserve Bulletin*, vol. 84 (October 1998): 811–18.

2. Weighted average of the foreign exchange value of the U.S. dollar against the currencies of a broad group of U.S. trading partners, including the currencies of the euro area countries, Australia, Canada, Japan, Sweden, Switzerland, United Kingdom, Argentina, Brazil, Chile, Colombia, Mexico, Venezuela, China, Hong Kong, India, Indonesia, Korea, Malaysia, the Philippines, Singapore, Taiwan, Thailand, Israel, Saudi Arabia, and Russia. Data: Federal Reserve Board. Monthly and quarterly average rates. Index rebased by BEA.

3. Weighted average of the foreign exchange value of the U.S. dollar against broad-index currencies that circulate widely outside the country of issue, including the currencies of the euro area countries, Australia, Canada, Japan, Sweden, Switzerland, and the United Kingdom. The weight for each currency is its broad-index weight divided by the sum of the broad-index weights for all of the currencies included in the major currency index. Data: Federal Reserve Board. Monthly and quarterly average rates. Index rebased by BEA.

4. Weighted average of the foreign exchange value of the U.S. dollar against broad-index currencies that do not circulate widely outside the country of issue, including the currencies of Argentina, Brazil, Chile, Colombia, Mexico, Venezuela, China, Hong Kong, India, Indonesia, Korea, Malaysia, the Philippines, Singapore, Taiwan, Thailand, Israel, Saudi Arabia, and Russia. The weight for each currency is its broad-index weight divided by the sum of the broad-index weights for all of the currencies included in the other important trading partners index. Data: Federal Reserve Board. Monthly and quarterly average rates. Index rebased by BEA.

5. Data: Federal Reserve Board. Monthly and quarterly average rates. Indexes prepared by BEA.

6. The euro area includes Austria, Belgium, Finland, France, Germany, Greece, Ireland, Italy, Luxembourg, Netherlands, Portugal, and Spain.

## Goods

The deficit on goods increased to $218.6 billion in the third quarter from $210.6 billion in the second quarter. Exports continued to increase substantially, but imports increased more than exports as a result of a sizable pickup in imports of nonpetroleum products (chart 4).

**Exports.** Exports increased $9.2 billion, or 3.6 percent, to $262.1 billion (table C). The increase resulted from increases in all the major commodity categories (chart 5). Real exports increased 2.3 percent, and

Federal Reserve Bank of St. Louis

export prices increased 1.3 percent.[2]

Exports increased substantially for the fourth consecutive quarter, partly as a result of strengthened economic growth in many foreign countries and the lagged effect of the substantial depreciation of the U.S. dollar against many foreign currencies since early 2002.

In the third quarter, nonagricultural industrial supplies and materials increased $3.0 billion, considerably less than in the previous two quarters. The slowdown largely resulted from slowdowns in nonferrous metals and in energy products. Prices of nonferrous metals increased much less than in the previous two quarters, and prices of energy products also moderated (chart 6). Exports of chemicals increased considerably for the third consecutive quarter; the third-quarter rise was mostly in plastic and organic chemicals.

Capital goods increased $1.9 billion. Among high-technology products, telecommunications equipment increased strongly for the second consecutive quarter; in contrast, semiconductors and computers, peripherals, and parts decreased. Oil drilling, mining, and construction machinery increased substantially for the second consecutive quarter; most other types of machinery also increased.

Automotive vehicles, parts, and engines jumped $1.7 billion after a second-quarter decrease. The rebound resulted largely from a strong increase in passenger cars, mostly to Canada and Germany.

Consumer goods increased $1.4 billion. The rise was attributable to increases in durable goods—mainly artwork, antiques, stamps, and collectibles—and in nondurable goods—mainly medical, dental, and pharmaceutical preparations.

Agricultural products increased $0.7 billion. A record increase in soybeans and smaller increases in several other agricultural commodities were partly offset by a substantial decrease in raw cotton, which may have partly reflected the termination of certain U.S. agricultural trade subsidies on August 1.

**Imports.** Imports increased $17.2 billion, or 3.7 percent, to $480.7 billion in the third quarter (table C). The increase largely resulted from a substantial pickup in nonpetroleum products, which had slowed in the previous two quarters. Petroleum and products also increased. Real imports increased 2.3 percent, and import prices increased 1.4 percent.

Petroleum and products increased $4.9 billion, continuing their strong growth in recent years (charts 5 and 7). In the last 3 years, these products

2. Quantity (real) estimates are calculated using a chain-type Fisher formula with annual weights for all years and quarterly weights for all quarters. Real estimates are expressed as chained (2000) dollars. Price indexes (2000 = 100) are also calculated using a chain-type Fisher formula.

**Chart 6. Export and Import Prices of Selected Industrial Supplies and Materials**

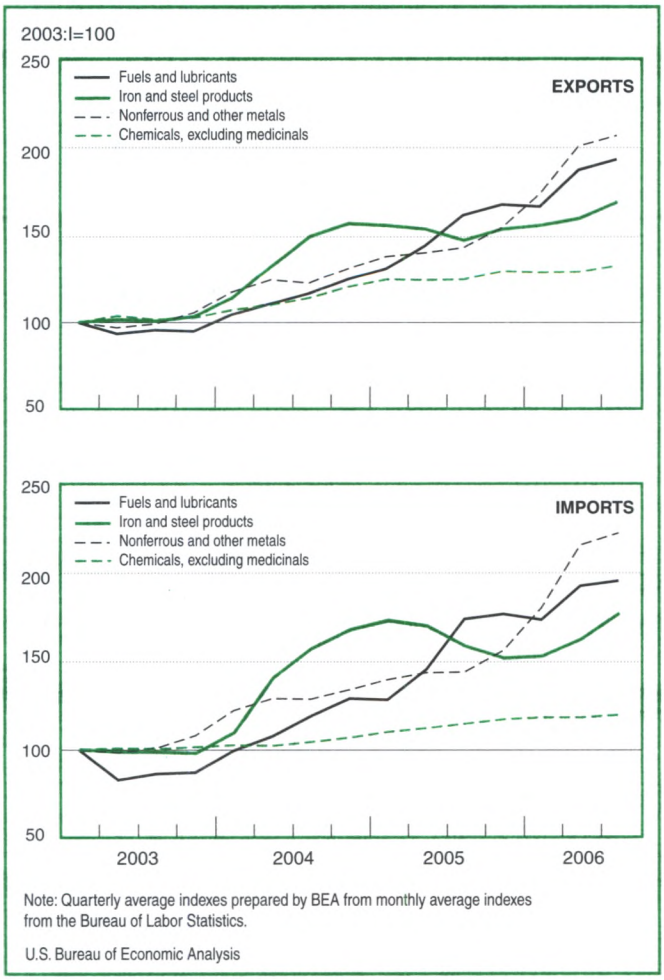

**Chart 7. Imports of Petroleum and Products: Indexes of Value, Price per Barrel, and Barrels Imported per Day**

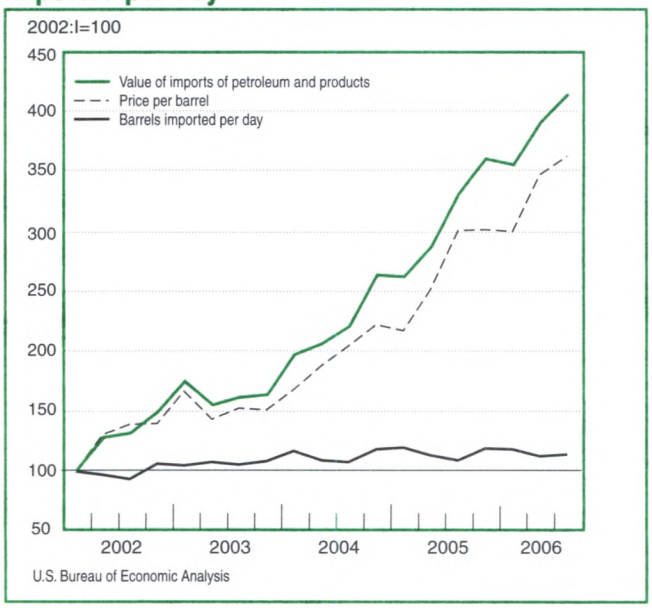

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

have increased 157 percent, mostly as a result of rising prices; quantity increased only 8 percent. In the third quarter, the average price per barrel increased 4 percent, to $66.54, and the average number of barrels imported daily increased 2 percent, to 13.86 million. The largest increases in petroleum imports were from members of OPEC, particularly Algeria and Venezuela, from Angola, and from Canada. U.S. domestic petroleum production increased for the third consecutive quarter, but it remained below the level attained before Hurricanes Katrina and Rita.

Consumer goods increased $4.6 billion, considerably more than in recent quarters. The pickup was attributable to a strong upturn in durable goods, largely resulting from increases in household and kitchen appliances from China and in television and video receivers from Mexico. Nondurable goods also increased, mostly because of increases in medical, dental, and pharmaceutical products from Ireland and the United Kingdom and in textile apparel from China.

Nonpetroleum industrial supplies and materials also picked up, increasing $3.8 billion. The rise was mostly attributable to strong rebounds in iron and steel products and in chemicals and to continued substantial growth in nonferrous metals.

Capital goods increased $3.6 billion. About half of the increase was accounted for by increases in computers, peripherals, and parts, in telecommunications equipment, and in semiconductors. A sharp rise in electric generating machinery, apparatus, and parts, mainly from China, also contributed to the gain in capital goods.

Foods, feeds, and beverages increased $0.8 billion. The largest increases were in vegetables, fruits, nuts, and preparations and in coffee, cocoa, and sugar products.

In contrast, automotive vehicles, parts, and engines decreased $1.1 billion, the largest decline in 3 years. The decrease resulted from a downturn in imports from Canada, particularly of passenger cars.

**Balances by area.** The goods deficit with Asia and Pacific increased strongly, and the goods deficit with Africa also increased; the goods deficits with most other major areas decreased.[3] The deficit with Asia and Pacific increased $11.7 billion, mostly as a result of a surge in imports from China, which was the top quarterly provider of foreign goods to the United States for the first time, surpassing Canada. The deficit with Africa increased $1.3 billion, mostly as a result of higher imports of petroleum products from Algeria.

## Services

The surplus on services increased to $18.3 billion in the third quarter from $17.5 billion in the second quarter, as services receipts increased more than services payments. The services surplus has increased considerably since falling to a 13-year low in the third quarter of 2004.

In the third quarter, travel receipts were virtually unchanged at $21.5 billion. An increase in receipts from overseas travelers to the United States was almost completely offset by a decrease in receipts from travelers from Mexico. Travel payments decreased $0.5 billion to $18.1 billion. The decline mostly resulted from decreases in payments to countries overseas and to Canada as result of a drop in the number of U.S. travelers. Passenger fare receipts increased $0.1 billion to $5.3 billion, and passenger fare payments decreased $0.4 billion to $6.6 billion.

"Other" transportation receipts were virtually unchanged at $12.2 billion. Increases in receipts for air and ocean freight services were mostly offset by a decrease in receipts for air port services. "Other" transportation payments increased $0.2 billion to $16.6 billion. The increase resulted from a rise in payments for ocean freight services, partly reflecting an increase in the volume of U.S. goods imports.

"Other" private services receipts increased $1.0 billion to $45.1 billion. The rise was attributable to increases in receipts for unaffiliated services—mostly for financial services and business, professional, and technical services—and for affiliated services. "Other" private services payments increased $0.7 billion to $29.1 billion. The rise mostly resulted from an increase in payments for unaffiliated services—mainly for insurance services and business, professional, and technical services.

## Income

The deficit on income increased to $3.8 billion in the third quarter from $2.2 billion in the second quarter. In the last 3 years, the balance on income has declined and has been negative in recent quarters because of a strong increase in the deficit on income on financial assets other than direct investment. In contrast, the surplus on direct investment income has increased moderately.

In the third quarter, receipts of income on U.S. direct investment abroad increased $1.0 billion to $75.9

3. Seasonally adjusted estimates of exports for areas and countries are derived by applying seasonal factors for total U.S. agricultural and nonagricultural exports to the unadjusted agricultural and nonagricultural exports for areas and countries and then summing the seasonally adjusted estimates. Seasonally adjusted estimates of imports for areas and countries are derived by applying seasonal factors for total petroleum and nonpetroleum imports to the unadjusted petroleum and nonpetroleum imports for areas and countries and then summing the seasonally adjusted estimates. (The seasonal factors are derived from the seasonal adjustment of U.S. exports and U.S. imports by five-digit end-use commodity categories.)

billion. An increase in the earnings of manufacturing affiliates was partly offset by a decrease in the earnings of holding company affiliates. Manufacturing companies' earnings were boosted by higher earnings of affiliates in computers and electronic products and in chemicals.

Payments of income on foreign direct investment in the United States increased $3.2 billion to $40.1 billion. The increase was mostly attributable to increases in U.S. affiliates' earnings in finance and insurance, mostly depository institutions, and in "other" industries. Finance and insurance earnings have increased strongly for several quarters, but no single subindustry has been responsible for most of the growth.

Both receipts and payments of income on financial assets other than direct investment increased much less than in recent quarters. Receipts of "other" private income increased $3.8 billion to $83.5 billion. The increase reflected increases in interest receipts on bank and nonbank claims, mostly due to higher average yields. U.S. Government income receipts were virtually unchanged.

Payments of "other" private income increased $2.3 billion to $84.8 billion. Increases in interest payments on bank and nonbank liabilities were partly offset by a decrease in interest and dividends paid on foreign holdings of U.S. bonds and stocks. Payments of income on U.S. Government liabilities increased $0.9 billion to $37.3 billion as a result of an increase in average foreign holdings of U.S. Treasury and agency securities.

### Unilateral current transfers

Net unilateral current transfers to foreigners were $21.5 billion in the third quarter, down from $21.9 billion in the second quarter. The decrease was mostly attributable to a decrease in private remittances and other transfers.

## Capital Account

Net capital account payments (outflows) were $0.6 billion in the third quarter, down from $1.0 billion in the second quarter.

## Financial Account

Net financial inflows—net acquisitions by foreign residents of assets in the United States less net acquisitions by U.S. residents of assets abroad—were $176.4 billion in the third quarter, up from $153.2 billion in the second quarter. Net acquisitions by foreign residents strengthened more than net acquisitions by U.S. residents.

### U.S.-owned assets abroad

Net U.S.-owned assets abroad increased $223.8 billion in the third quarter after increasing $211.4 billion in the second quarter. The pickup was attributable to a step-up in U.S. direct investment abroad and to a larger increase in U.S. claims reported by U.S. banks in the third quarter than in the second quarter.

**U.S. official reserve assets.** U.S. official reserve assets decreased $1.0 billion in the third quarter after an increase of $0.6 billion in the second quarter. The decrease resulted from a decrease in the U.S. reserve position in the International Monetary Fund (IMF), reflecting the net repayment of U.S. dollars to the IMF by several countries.

**Claims reported by banks and by nonbanks.** U.S. claims on foreigners reported by U.S. banks and securities brokers increased $85.7 billion in the third quarter after an increase of $80.7 billion in the second quarter.

Banks' own claims denominated in dollars increased $46.2 billion after an increase of $28.0 billion. In recent quarters, interbank lending has been boosted by heightened global merger and acquisition activity. In the third quarter, interbank lending to Asia, mostly by foreign-owned banks in the United States to their parent offices in Japan, was substantial. In contrast, U.S.-owned banks cut back their lending abroad, partly as a result of a drop in the funds available from U.S. domestic deposits. U.S. brokers and dealers lent funds abroad, mainly in the form of resale agreements.

Banks' domestic customers' claims denominated in dollars increased $49.3 billion after an increase of $36.7 billion. Negotiable certificates of deposit, commercial paper, and "other" short-term instruments all increased substantially. In contrast, deposits decreased substantially.

Claims reported by U.S. nonbanking concerns increased $23.3 billion after an increase of $31.2 billion. The third-quarter increase was largely accounted for by increases in resale agreements and in "other" short-term instruments.

**Foreign securities.** Net U.S. purchases of foreign securities were $53.0 billion in the third quarter, down slightly from $53.9 billion in the second quarter. A decrease in net U.S. purchases of foreign stocks was mostly offset by an increase in net U.S. purchases of foreign bonds.

Net U.S. purchases of foreign stocks were $8.0 billion, down from $17.0 billion. Net U.S. purchases have slowed considerably in the last two quarters after strong net purchases throughout 2005 and in the first quarter of 2006. Foreign stock markets underperformed the U.S. stock market in the last two quarters after outperforming the U.S. market in earlier quarters. In the third quarter, net U.S. purchases of stocks from Europe decreased as a result of shifts to net U.S.

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

sales to the Netherlands, Switzerland, and France, and transactions with Latin America shifted to net U.S. sales from net U.S. purchases.

Net U.S. purchases of foreign bonds were a record $45.1 billion, up from the previous record of $36.9 billion in the second quarter. Global bond markets rallied in the third quarter after falling in the second quarter. Net U.S. purchases of bonds from Europe, mostly from the United Kingdom where the bonds of many foreign countries are traded, were very strong for the second consecutive quarter. In addition, net U.S. purchases from Canada increased, and transactions with Latin America shifted to net U.S. purchases from net U.S. sales.

**Direct investment.** U.S. direct investment abroad increased $63.1 billion in the third quarter after an increase of $46.8 billion in the second quarter. The pickup was mostly attributable to a shift from a decrease to an increase in net intercompany debt investment abroad. In addition, net equity capital investment abroad picked up. In contrast, reinvested earnings decreased.

## Foreign-owned assets in the United States

Net foreign-owned assets in the United States increased $400.2 billion in the third quarter after an increase of $364.6 billion in the second quarter. The pickup was mostly attributable to larger increases in U.S. liabilities reported by U.S. nonbanking concerns and U.S. banks in the third quarter than in the second quarter and to an increase in net foreign purchases of U.S. securities other than U.S. Treasury securities.

**Foreign official assets.** Foreign official assets in the United States increased $80.8 billion in the third quarter after increasing $75.9 billion in the second quarter. Assets of Asian countries increased much more strongly in the third quarter than in the second quarter. In contrast, assets of European countries decreased in the third quarter after an increase in the second quarter.

**Liabilities reported by banks and by nonbanks.** U.S. liabilities reported by U.S. banks and securities brokers, excluding U.S. Treasury securities, increased $89.1 billion in the third quarter after an increase of $79.6 billion in the second quarter.

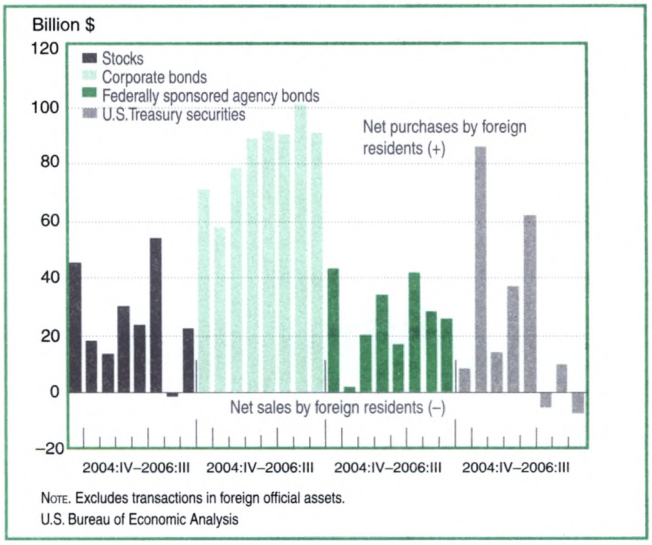
Banks' own liabilities denominated in dollars increased $43.9 billion after a decrease of $3.4 billion. The increase mainly resulted from substantial borrowing by U.S. brokers and dealers in the form of repurchase agreements, mostly with foreign banks in the United Kingdom. In contrast, U.S.-owned banks' borrowing decreased after increasing for several quarters. The decrease may have been partly related to a cutback in lending to foreigners by these banks.

Banks' customers' liabilities denominated in dollars increased $41.4 billion after a particularly large increase of $84.9 billion. The sizable increases in both quarters were mostly in the form of "other" liabilities.

U.S. liabilities reported by U.S. nonbanking concerns increased $53.5 billion after an increase of $25.1 billion. The third-quarter increase was largely accounted for by an increase in financial liabilities to the United Kingdom.

**U.S. Treasury securities.** Transactions in U.S. Treasury securities shifted to net sales by foreigners of $7.2 billion in the third quarter from net purchases by foreigners of $9.8 billion in the second quarter (chart 8). Prices of U.S. Treasury securities increased in the third quarter after decreasing in the previous two quarters. In the third quarter, net sales of U.S. Treasury securities by the United Kingdom and Caribbean financial centers, where many international investment funds are located, increased and net purchases by Asia slowed.

**Chart 8. Transactions in U.S. Securities, 2004:IV–2006:III**



NOTE. Excludes transactions in foreign official assets.
U.S. Bureau of Economic Analysis

**Other U.S. securities.** Net foreign purchases of U.S. securities other than U.S. Treasury securities were $138.8 billion in the third quarter, up from $127.3 billion in the second quarter. The increase resulted from a shift to net purchases of U.S. stocks by foreigners from net sales. In contrast, net purchases of U.S. corporate bonds and of federally sponsored agency bonds by foreigners decreased.

Transactions in U.S. stocks by foreigners shifted to net purchases of $22.4 billion from net sales of $1.4 billion. The U.S. stock market strengthened in the third quarter as concerns about inflation may have eased and as U.S. monetary authorities left monetary policy unchanged after a period of tightening. The shift to net

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

purchases by foreigners was more than accounted for by a step-up in net purchases from Europe and a shift to net purchases from net sales from Caribbean financial centers.

Net purchases by foreigners of U.S. corporate bonds remained strong at $90.7 billion, but they were down from a record $100.6 billion. Conditions that have encouraged foreigners to invest heavily in U.S. corporate bonds in recent quarters remained in place. These conditions include the higher yields available on U.S. corporate bonds than on foreign bonds, healthy U.S. corporate balance sheets, and low U.S. bond default rates. In addition, U.S. corporate bond prices increased in the third quarter. The decrease in net purchases by foreigners of U.S. corporate bonds was mostly attributable to a decrease in net purchases from Europe.

Net purchases by foreigners of U.S. federally sponsored agency bonds were $25.7 billion, down from $28.0 billion. Decreases in net purchases from Asia and from Europe were largely offset by a shift to net purchases from net sales from Caribbean financial centers.

**Direct investment.** Foreign direct investment in the United States increased $44.1 billion in the third quarter after increasing $45.8 billion in the second quarter. The small slowdown was mainly attributable to a slowdown in net intercompany debt investment in the United States. Net equity capital investment in the United States and reinvested earnings both changed little.

# Footnotes to U.S. International Transactions Tables 1–11

**General notes for all tables:** [P] Preliminary. [r] Revised. [*] Less than $500,000 (+/–). [D] Suppressed to avoid disclosure of data of individual companies. Quarterly estimates are not annualized and are expressed at quarterly rates.

**Table 1:**

1. Credits, +: Exports of goods and services and income receipts; unilateral current transfers to the United States; capital account transactions receipts; financial inflows—increase in foreign-owned assets (U.S. liabilities) or decrease in U.S.-owned assets (U.S. claims).

Debits, –: Imports of goods and services and income payments; unilateral current transfers to foreigners; capital account transactions payments; financial outflows—decrease in foreign-owned assets (U.S. liabilities) or increase in U.S.-owned assets (U.S. claims).

2. Excludes exports of goods under U.S. military agency sales contracts identified in Census export documents, excludes imports of goods under direct defense expenditures identified in Census import documents, and reflects various other adjustments (for valuation, coverage, and timing) of Census statistics to balance-of-payments basis; see table 2a.

3. Includes some goods: Mainly military equipment in line 5; major equipment, other materials, supplies, and petroleum products purchased abroad by U.S. military agencies in line 22; and fuels purchased by airline and steamship operators in lines 8 and 25.

4. Includes transfers of goods and services under U.S. military grant programs.

5. Beginning in 1982, these lines are presented on a gross basis. The definition of exports is revised to exclude U.S. parents' payments to foreign affiliates and to include U.S. affiliates' receipts from foreign parents. The definition of imports is revised to include U.S. parents' payments to foreign affiliates and to exclude U.S. affiliates' receipts from foreign parents.

6. Beginning in 1982, the "other transfers" component includes taxes paid by U.S. private residents to foreign governments and taxes paid by private nonresidents to the U.S. Government.

7. At the present time, all U.S. Treasury-owned gold is held in the United States.

8. Includes sales of foreign obligations to foreigners.

9. Consists of bills, certificates, marketable bonds and notes, and nonmarketable convertible and nonconvertible bonds and notes.

10. Consists of U.S. Treasury and Export-Import Bank obligations, not included elsewhere, and of debt securities of U.S. Government corporations and agencies.

11. Includes, primarily, U.S. Government liabilities associated with military agency sales contracts and other transactions arranged with or through foreign official agencies; see table 5.

12. Consists of investments in U.S. corporate stocks and in debt securities of private corporations and state and local governments.

13. Conceptually, the sum of line 76 and line 39 is equal to "net lending or net borrowing" in the national income and product accounts (NIPAs). However, the foreign transactions account in the NIPAs (a) includes adjustments to the international transactions accounts for the treatment of gold, (b) includes adjustments for the different geographical treatment of transactions with U.S. territories and Puerto Rico, and (c) includes services furnished without payment by financial pension plans except life insurance carriers and private noninsured pension plans. A reconciliation of the balance on goods and services from the international accounts and the NIPA net exports appears in reconciliation table 2 in appendix A in this issue of the SURVEY OF CURRENT BUSINESS. A reconciliation of the other foreign transactions in the two sets of accounts appears in table 4.3B of the full set of NIPA tables.

Additional footnotes for historical data in July issues of the SURVEY:

14. For 1974, includes extraordinary U.S. Government transactions with India. See "Special U.S. Government Transactions," June 1974 SURVEY, p. 27.

15. For 1978–83, includes foreign currency-denominated notes sold to private residents abroad.

16. Break in series. See Technical Notes in the June 1989–90, 1992–95, and July 1996–2006 issues of the SURVEY.

**Table 2a:**

1. Exports, Census basis, represent transactions values, f.a.s. U.S. port of exportation, for all years; imports, Census basis, represent Customs values (see Technical Notes in the June 1982 SURVEY), except for 1974–81, when they represent transactions values, f.a.s. foreign port of exportation (see July issues of the SURVEY for historical data). From 1983 forward, both unadjusted and seasonally adjusted data have been prepared by BEA from "actual" and "revised statistical" monthly data supplied by the Census Bureau (see Technical Notes in the December 1985 SURVEY). Seasonally adjusted data reflect the application of seasonal factors developed jointly by Census and BEA. The seasonally adjusted data are the sum of seasonally adjusted five-digit end-use categories (see technical Notes in the June 1980 SURVEY, in the June 1988 SURVEY, and in the June 1991 SURVEY). Prior to 1983, annual data are as published by the Census Bureau, except that for 1975–80 published Census data are adjusted to include trade between the U.S. Virgin Islands and foreign countries.

2. Adjustments in lines A5 and A13, B20, B75, and B130 reflect the Census Bureau's reconciliation of discrepancies between the goods statistics published by the United States and the counterpart statistics published in Canada. These adjustments are distributed to the affected end-use categories in section C. Beginning in 1986, estimates for undocumented exports to Canada, the largest item in the U.S.-Canadian reconciliation, are included in Census basis data shown in line A1.

3. Exports of military equipment under U.S. military agency sales contracts with foreign governments (line A6), and direct imports by the Department of Defense and the Coast Guard (line A14), to the extent such trade is identifiable from Customs declarations. The exports are included in tables 1 and 11, line 5 (transfers under U.S. military agency sales contracts); the imports are included in tables 1 and 11, line 22 (direct defense expenditures).

4. Addition of electric energy; deduction of exposed motion picture film for rental rather than sale; net change in stock of U.S.-owned grains in storage in Canada; coverage adjustments for special situations in which shipments were omitted from Census data; deduction of the value of repairs and alterations to foreign-owned equipment shipped to the United States for repair; and the inclusion of fish exported outside of U.S. customs area. Also includes deduction of exports to the Panama Canal Zone before October 1, 1979, and for 1975–82, net timing adjustments for goods recorded in Census data in one period but found to have been shipped in another (see July issues of the SURVEY for historical data).

5. Coverage adjustments for special situations in which shipments were omitted from Census data; the deduction of the value of repairs and alterations to U.S.-owned equipment shipped abroad for repair; and the adjustment of software imports to market value. Also includes addition of understatement of inland freight in f.a.s. values of U.S. imports of goods from Canada in 1974–81; deduction of imports from the Panama Canal Zone before October 1, 1979; and for 1975–82, net timing adjustments for goods recorded in Census data in one period but found to have been shipped in another (see July issues of the SURVEY for historical data).

6. For 1988–89, correction for the understatement of crude petroleum imports from Canada.

7. Annual and unadjusted quarterly data shown in this table correspond to country and area data in table 11, lines 3 and 20. Trade with international organizations includes purchases of nonmonetary gold from the International Monetary Fund, transfers of tin to the International Tin Council (ITC), and sales of satellites to Intelsat. The memoranda are defined as follows: Members of OPEC: Venezuela, Ecuador, Iraq, Iran, Kuwait, Saudi Arabia, Qatar, United Arab Emirates, Indonesia, Algeria, Libya, Nigeria, and Gabon (excludes Ecuador beginning in January 1993 and Gabon beginning in January 1995). Before 1984, complete geographic area detail was not available for some balance-of-payments adjustments. Therefore, the detail shown does not always sum to the values shown for the area aggregates.

**Table 3:**

1. Includes royalties, license fees, and other fees associated with the use of intangible assets, including patents, trade secrets, and other proprietary rights, that are used in connection with the production of goods.

2. Includes royalties, license fees, and other fees associated with the use of copyrights, trademarks, franchises, rights to broadcast live events, software licensing fees, and other intangible property rights.

3. Other unaffiliated services receipts (exports) include mainly film and television tape rentals and expenditures of foreign residents temporarily working in the United States. Payments (imports) include mainly expenditures of U.S. residents temporarily working abroad and film and television tape rentals.

4. These reflect the amount of premiums explicitly charged by, or paid to, insurers and reinsurers.

**Table 4:**

1. Complete instrument detail is only available beginning with 2003.

2. Prior to 2003, includes only demand deposits and nonnegotiable time and savings deposits.

**Table 5:**

1. Expenditures to release foreign governments from their contractual liabilities to pay for military goods and services purchased through military sales contracts—first authorized (for Israel) under Public Law 93–199, section 4,

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

and subsequently authorized (for many recipients) under similar legislation—are included in line A4. Deliveries against these military sales contracts are included in line C10; see footnote 2. Of the line A4 items, part of these military expenditures is applied in lines A43 and A46 to reduce short-term assets previously recorded in lines A41 and C8; this application of funds is excluded from lines C3 and C4. A second part of line A4 expenditures finances future deliveries under military sales contracts for the recipient countries and is applied directly to lines A42 and C9. A third part of line A4, disbursed directly to finance purchases by recipient countries from commercial suppliers in the United States, is included in line A37. A fourth part of line A4, representing dollars paid to the recipient countries to finance purchases from countries other than the United States, is included in line A48.

2. Transactions under military sales contracts are those in which the Department of Defense sells and transfers military goods and services to a foreign purchaser, on a cash or credit basis. Purchases by foreigners directly from commercial suppliers are *not* included as transactions under military sales contracts. The entries for the several categories of transactions related to military sales contracts in this and other tables are partly estimated from incomplete data.

3. The identification of transactions involving direct dollar outflows from the United States is made in reports by each operating agency.

4. Line A38 includes foreign currency collected as interest and line A43 includes foreign currency collected as principal, as recorded in lines A16 and A17, respectively.

5. Includes (a) advance payments to the Department of Defense (on military sales contracts) financed by loans extended to foreigners by U.S. Government agencies and (b) the contra-entry for the part of line C10 that was delivered without prepayment by the foreign purchaser. Also includes expenditures of appropriations available to release foreign purchasers from liability to make repayment.

6. Includes purchases of loans from U.S. banks and exporters and payments by the U.S. Government under commercial export credit and investment guarantee programs.

7. Excludes liabilities associated with military sales contracts financed by U.S. Government grants and credits and included in line C2.

8. Excludes transactions of the U.S. Enrichment Corporation since it became a non-government entity in July 1998.

**Table 6a:**

1. For bank affiliates, includes only interest on permanent debt investment by their parent companies. Excludes interest between financial parent companies and nonbank financial affiliates.

2. For bank affiliates, includes only permanent debt investment by their parent companies. Excludes intercompany debt between financial parent companies and nonbank financial affiliates.

**Table 7a:**

1. Beginning with 2005, source data for new issue estimates are no longer separately available. New issues continue to be included in net purchases.

2. Bahamas, Bermuda, British West Indies (Cayman Islands), and Netherlands Antilles.

**Table 8a:**

1. Prior to 2003, securities brokers' claims on and liabilities to their foreign affiliates are included in the estimates. They are excluded beginning in 2003.

2. Complete instrument detail is only available beginning with 2003.

3. Financial intermediaries' accounts are shown under "other claims (liabilities)" because the majority of these claims (liabilities) are in the form of intercompany balances. Financial intermediaries' accounts represent transactions between firms in a direct investment relationship (that is, between U.S. parents and their foreign affiliates or between U.S. affiliates and their foreign parent groups), where both the U.S. and foreign firms are classified in a finance industry, but the firms are neither banks nor securities brokers.

4. Bahamas, Bermuda, British West Indies (Cayman Islands), and Netherlands Antilles.

**Table 9a:**

1. Beginning with 2003, includes securities brokers' claims on their foreign affiliates.

2. Complete instrument detail is only available beginning with 2003.

3. Includes foreign official agencies and international and regional organizations. Prior to 2003, also includes government-owned corporations and state, provincial, and local governments and their agencies.

4. U.S.-owned banks include U.S.-chartered banks, Edge Act subsidiaries, and U.S. bank holding companies. Foreign-owned banks include U.S. branches and agencies of foreign banks and majority-owned bank subsidiaries in the United States. Brokers and dealers may be U.S.-owned or foreign-owned.

5. Commercial paper issued in the U.S. market by foreign incorporated entities and held in U.S. customers' accounts. Excludes commercial paper issued through foreign direct investment affiliates in the United States.

6. Prior to 2003, includes negotiable certificates of deposit and other negotiable and transferable instruments.

7. Prior to 2003, includes only deposits.

8. Bahamas, Bermuda, British West Indies (Cayman Islands), and Netherlands Antilles.

**Table 10a:**

1. Beginning with 2003, includes securities brokers' liabilities to their foreign affiliates.

2. Complete instrument detail is only available beginning with 2003.

3. U.S.-owned banks include U.S.-chartered banks, Edge Act subsidiaries, and U.S. bank holding companies. Foreign-owned banks include U.S. branches and agencies of foreign banks and majority-owned bank subsidiaries in the United States. Brokers and dealers may be U.S.-owned or foreign-owned.

4. Bahamas, Bermuda, British West Indies (Cayman Islands), and Netherlands Antilles.

**Table 11:**

For footnotes 1–13, see table 1.

14. The "European Union" includes Belgium, Denmark, France, Germany (includes the former German Democratic Republic (East Germany) beginning in the fourth quarter of 1990), Greece, Ireland, Italy, Luxembourg, Netherlands, Portugal, Spain, United Kingdom; beginning with the first quarter of 1995, also includes Austria, Finland, and Sweden; and beginning with the second quarter of 2004, also includes Cyprus, Czech Republic, Estonia, Hungary, Latvia, Lithuania, Malta, Poland, Slovakia, and Slovenia. The "European Union" also includes the European Atomic Energy Community, the European Coal and Steel Community (through the third quarter of 2002), and the European Investment Bank.

15. Quarterly estimates for Mexico are available beginning with 2004.

16. Includes, as part of international and unallocated, taxes withheld; current-cost adjustments associated with U.S. and foreign direct investment; and net U.S. currency flows. Before 1999, also includes the estimated direct investment in foreign affiliates engaged in international shipping, in operating oil and gas drilling equipment internationally, and in petroleum trading. Before 1996, also includes small transactions in business services that are not reported by country.

17. Details are not shown separately; see totals in lines 56 and 63.

18. Details not shown separately are included in line 69.

19. At the global level, the statistical discrepancy represents net errors and omissions in recorded transactions. For individual countries and regions, it may also reflect discrepancies that arise when transactions with one country or region are settled through transactions with another country or region.

NOTE. Country data are based on information available from U.S. reporting sources. In some instances the statistics may not necessarily reflect the ultimate foreign transactor. For instance: U.S. goods export statistics reflect country of reported destination; in many cases the goods may be transshipped to third countries (especially true for the Netherlands and Germany). The geographic breakdown of securities transactions reflects the country with which transactions occurred but may not necessarily reflect the ultimate sources of foreign funds or ultimate destination of U.S. funds.

# An Ownership-Based Framework of the U.S. Current Account, 1995–2005

The Bureau of Economic Analysis (BEA) annually updates its supplemental, ownership-based framework of the current-account portion of the U.S. international transactions accounts. This report presents new summary estimates of the major current-account aggregates for 2005, more detailed estimates for 2004, and revised estimates for 1995–2004.[1] A technical note that presents information on the conceptual basis of the ownership-based framework follows the highlights of this presentation.[2]

The following are highlights of the updated estimates:

- Net receipts by U.S. parents of direct investment income from the sales by their foreign affiliates were $251.4 billion in 2005, up from $226.2 billion in 2004 (table 1). Net payments to foreign parents of direct investment income from the sales by their U.S. affiliates were $117.0 billion in 2005, up from $102.4 billion in 2004.
- In 2004 (the latest year for which the detailed estimates are available), the net receipts of $226.2 billion consisted of $223.6 billion from nonbank foreign affiliates and $2.7 billion from bank foreign affiliates. For the parents of nonbank affiliates, the net receipts resulted from sales by foreign affiliates of $3,768.7 billion less deductions of $3,545.1 billion (such as for labor, capital, and purchased inputs).[3] The net payments of $102.4 billion consisted of $97.7 billion by nonbank U.S. affiliates and $4.7 billion by bank U.S. affiliates. For nonbank U.S. affiliates, the net payments resulted from sales of $2,521.4 billion less deductions of $2,423.7 billion.
- In 2005, the total value of foreign sales accruing to the U.S. economy was $1,526.6 billion, which consisted of U.S. exports of goods and services of $1,275.2 billion and net income receipts of U.S. parents from the sales by their foreign affiliates of $251.4 billion. The total value of U.S. sales accruing to foreign economies was $2,108.9 billion, which consisted of U.S. imports of goods and services of $1,992.0 billion and net income payments to foreign parents from the sales by their U.S. affiliates of $117.0 billion.
- The resulting U.S. deficit on goods, services, and net receipts from sales by affiliates was $582.3 billion in 2005 ($1,526.6 billion minus $2,108.9 billion). This deficit was $134.4 billion less than the $716.7 billion deficit on trade in goods and services in the conventional international accounts framework. The ownership-based deficit was smaller because the receipts of income by U.S. parents from sales by their foreign affiliates exceeded the payments of income to foreign parents from sales by their U.S. affiliates.
- The $582.3 billion deficit on goods, services, and net receipts from sales by affiliates in 2005 was $94.9 billion more than the deficit in 2004. The increase was more than accounted for by a $105.4 billion increase in the deficit on trade in goods and services.

The estimates incorporate the results of the 2006 annual revision of the U.S. international transactions accounts that features improved estimating methodologies, the incorporation of newly available source data, and the substantial expansion of geographic detail.[4] As part of the annual revision, the 2002–2005 estimates of foreign direct investment income, financial flows, royalties and license fees, and "other" private services were improved as a result of the incorporation of the results of BEA's 2002 benchmark survey of foreign direct investment in the United States; the 2004–2005 estimates of "other" private services were improved as a result of the incorporation of the results of BEA's 2004 benchmark survey of financial services transactions with unaffiliated foreigners; the 2003–2005 estimates of foreign holdings and transactions in U.S. securities and related dividend and interest payments were improved as a result of the incorporation of the results of the U.S. Treasury Department's annual survey of securities liabilities for June 2005 and revisions to its benchmark survey of securities liabilities for June 2004; and the 2003–2005 estimates of U.S. holdings of foreign securities and related dividend and interest receipts were improved as a result of the incorporation of the results of the U.S. Treasury Department's annual survey of securities claims for December 2004. In addition, the estimates also incorporate the preliminary results from the 2004 benchmark survey of U.S. direct investment abroad and the 2004 annual survey of foreign direct investment in the United States and the final results from the 2003 annual surveys of U.S. direct investment abroad and foreign direct investment in the United States.

1. The estimates for 1982–2005 are available on BEA's Web site at <www.bea.gov>. Under "International," click on "More," then look under "Supplemental Estimates" for "Ownership-Based Framework of the U.S. Current Account."

2. For additional information on the sources and methods used to prepare the supplemental estimates, see Obie G. Whichard and Jeffrey H. Lowe, "An Ownership-Based Disaggregation of the U.S. Current Account, 1982–93," Survey of Current Business 75 (October 1995): 52–61. For a general review of the issues relating to ownership relationships in international transactions, see J. Steven Landefeld, Obie G. Whichard, and Jeffrey H. Lowe, "Alternative Frameworks for U.S. International Transactions," Survey 73 (December 1993): 50–61.

3. These detailed estimates can only be provided for nonbank affiliates.

4. See Christopher L. Bach, "Annual Revision of the U.S. International Accounts, 1995–2005," Survey 86 (July 2006): 36–48.

## Technical Note

The ownership-based framework was developed in the early 1990s in response to interest in examining international transactions in a way that would reflect the increasing importance of multinational companies in world economies and, particularly, the growing tendency of these companies to use locally established affiliates to deliver goods and services to international markets.[5]

In the conventionally constructed current account, the trade balance reflects only the goods and services that are delivered to international markets through cross-border exports and imports. This balance is an important indicator of U.S. performance in foreign markets; it reflects the net value of the transactions in goods and services between U.S. residents (including companies) and foreign residents. Because in the international accounts, affiliates are treated as resident in their respective countries of location rather than in the countries of their owners, the sales of goods and services by foreign affiliates of U.S. companies to other foreign persons and by U.S. affiliates of foreign companies to other U.S. persons are not regarded as exports and imports and are therefore excluded from the trade balance.

In the ownership-based framework, a balance is introduced in which net receipts resulting from sales by affiliates are combined with cross-border exports and imports. Specifically, the net receipts that accrue to U.S. parent companies from the sales by their foreign affiliates are combined with cross-border sales to foreigners by U.S. companies (U.S. exports of goods and services), and the net payments that accrue to foreign parent companies from the sales by their U.S. affiliates are combined with cross-border sales to the United States by foreign companies (U.S. imports of goods and services). The difference between these receipts and payments is an indicator of the net effect of United States-foreign commerce on the U.S. economy, and it reflects the perspective that both cross-border trade and sales through affiliates represent methods of active participation in the international markets for goods and services.

Only the net receipts that accrue to the U.S. parent companies, not the gross value of sales by their foreign affiliates, are included in these calculations, because only for sales originating in the United States are most of the costs—such as for labor, capital, and purchased inputs—incurred domestically and accrued to the benefit of the U.S. economy. Similarly, only the net payments that accrue to foreign parent companies, not the gross value of sales by their U.S. affiliates, are included, because only for sales originating abroad are most of the costs incurred abroad and accrued to the benefit of foreign economies. This methodology also eliminates the double-counting that would occur if both the total value of the sales by parents to their affiliates and the subsequent sales by the affiliates to others were included.

Conceptually, the ownership-based framework is fully consistent with the current account in the conventional international transactions accounts, and it can be viewed as a "satellite" of those accounts.[6] (The current-account balance is the same in both sets of accounts.) The grouping of the income from affiliates with cross-border trade in goods and services recognizes the active role of parent companies in managing and coordinating their affiliates' operations. This direct investment income from affiliates differs fundamentally from income on other types of investments. For example, for U.S. direct investment abroad, direct investment income represents U.S. companies' returns on sales that for reasons such as efficiency, transport costs, or the avoidance of trade barriers are made by affiliates in foreign countries rather than by U.S. parent companies; other investment income represents returns on passive investments, such as on foreign stocks and bonds.[7] Indeed, in many cases, a portion of the income from affiliates may be regarded as a kind of implicit management fee that compensates parent companies for undertaking active roles in the operations of their affiliates.

In addition, the most detailed presentation of the framework provides information on ownership relationships by disaggregating the trade in goods and in services into trade between affiliated parties (that is, trade within multinational corporations) and trade between unaffiliated parties. It also shows how receipts and payments of direct investment income are derived from the production and sales by affiliates. To highlight the links between the income and the activities that produce it, the income is designated "net receipts" or "net payments" of direct investment income resulting from sales by affiliates. In the addenda to table 1, the framework also provides information on the U.S. content and the foreign content of affiliates' sales and on the extent to which such content results from the affiliates' own value added.

5. Among those calling for more information on ownership was a National Academy of Sciences study panel. See Anne Y. Kester, ed., *Behind the Numbers: U.S. Trade in the World Economy,* National Research Council, Panel on Foreign Trade Statistics (Washington, D.C: National Academy Press, 1992).

6. According to the international *System of National Accounts,* satellite accounts augment the central national accounts by "expanding the analytical capacity of national accounting for selected areas...in a flexible manner, without overburdening or disrupting the central system"; they may introduce additional information, alternative accounting frameworks, or "complementary or alternative concepts," while maintaining links to the central accounts. See Commission of the European Communities, International Monetary Fund, Organisation for Economic Co-operation and Development, United Nations, and World Bank, *System of National Accounts, 1993* (Brussels/Luxembourg, New York, Paris, and Washington, DC, 1993): 489.

7. Direct investment income consists of net receipts of earnings and of interest by parents from their affiliates.

n.a. Not available

1. The estimates in this column are from the international transactions accounts, which are published quarterly. Estimates are not yet available for the items from BEA's 2005 annual surveys of U.S. direct investment abroad and of foreign direct investment in the United States, which are processed in the 2 years following the year of coverage. The detailed preliminary estimates for 2005 will be published in the second half of 2007.

2. Conceptually, sales by U.S. affiliates to other U.S. affiliates of the same foreign parent should be subtracted, but data on these sales are unavailable. However, because U.S. affiliates are generally required to report to BEA on a fully consolidated basis, most of these sales are eliminated through consolidation, and the remaining amount is thought to be immaterial.

3. Line 48, other foreign content—which equals purchases from foreign persons by foreign affiliates—is overstated to the extent that it includes U.S. exports that are embodied in purchases of goods and services from foreign suppliers.

4. In principle, the sales exclude the affiliates' sales to other affiliates of their parent. For U.S. affiliates, data on sales to other affiliates are unavailable, but these sales are thought to be immaterial. (See footnote 2.)

5. Line 53, other U.S. content—which equals purchases from U.S. persons by U.S. affiliates—is overstated to the extent that it includes U.S. imports that are embodied in purchases of goods and services from U.S. suppliers.

NOTE. Details may not add to totals because of rounding.

# State Personal Income

## Third Quarter of 2006

*By David G. Lenze*

PERSONAL income growth accelerated in all regions of the United States in the third quarter, with growth in the Far West and Mideast regions accelerating the most, according to preliminary estimates released by the Bureau of Economic Analysis (BEA). Growth in all regions exceeded inflation. The national price index for personal consumption expenditures rose 0.6 percent in the third quarter, compared with 1.0 percent in the second quarter.

For the United States, personal income grew 1.4 percent, following a 0.8-percent gain.[1]

The Southwest region grew 1.6 percent, making it the fastest growing of the eight BEA regions in the third quarter. It has been the fastest growing region in five of the last seven quarters. Since the fourth quarter of 2005, the Southwest region has grown almost 5 percentage points faster than the Nation. The Far West grew 1.5 percent in the third quarter. The Great Lakes, Plains, Southeast, and Rocky Mountain regions each grew 1.4 percent. The Mideast region grew 1.3 percent, and the New England region grew 1.1 percent (chart 1).

### State growth and earnings

In the third quarter, the economies of seven of the fastest growing states—Arizona, Louisiana, Nevada, New Mexico, Texas, Utah, and Wyoming—supported continued earnings growth in the construction sector. However, in almost all other states, construction earnings declined. The largest decline was in Washington,

1. Personal income is the income received by all persons from all sources; it is defined as the sum of net earnings by place of residence, rental income of persons, personal dividend income, personal interest income, and personal current transfer receipts. Personal income for the Nation is the sum of personal income estimates for all states and the District of Columbia.

**Chart 1. Personal Income: Percent Change, 2006:II–2006:III**

DC, because of an unusually large lump-sum payment in the second quarter. Earnings typically account for the majority of personal income.[2]

2. Total earnings, or earnings by place of work, is calculated as the sum of wages and salaries, supplements to wages and salaries, and proprietors' income.

In four of the fastest growing states—Louisiana, New Mexico, Texas, and Wyoming—large contributions to earnings growth were made by mining (including oil and gas extraction), a small industry that has expanded rapidly in the past 4 years (table A).

Mining also made a relatively large contribution to

third-quarter earnings growth in Oklahoma, Alaska, and West Virginia.

Personal income growth in the state of Washington (2.6 percent) was the fastest. The growth reflected huge gains from the exercise of stock options by employees in the information industry. The gains are counted as part of earnings, which grew 47 percent in the information industry in the third quarter. The exercise of stock options in this industry has frequently propelled Washington to first place in the growth rankings and then dropped the state into last place the following quarter.

1. Earnings by place of work is the sum of wage and salary disbursements (payrolls), supplements to wages and salaries, and proprietors' income.
2. "Other" consists of the wage and salary disbursements to U.S. residents employed by international organizations and foreign embassies and consulates in the United States.
3. Data are suppressed to avoid disclosure of confidential information.
4. Not meaningful.

Louisiana's personal income growth (1.7 percent) exceeded national growth, the first time this year that its recovery from Hurricane Katrina had such a strong effect. The recovery shows up more clearly in earnings, which have grown twice as fast in Louisiana as in the United States over the last 6 months. The strong earnings rebound was offset by weak transfer receipts as disaster assistance and unemployment compensation tapered off.

Michigan's personal income growth (1.5 percent) reflected strong growth in earnings in durable-goods manufacturing. In fact, the state accounted for almost half of the national gain in earnings in durable-goods manufacturing, $1.2 billion out of $2.6 billion, despite a job loss of 3.1 percent. The opposite movements in earnings and jobs primarily reflected the GM and Delphi employee buyouts.

The employee buyouts were also apparent in the earnings of other Great Lakes states, such as Indiana and Ohio, and in Louisiana and Delaware. Excluding the buyouts, earnings growth in the durable-goods industry was anemic across the country.

## Property income and transfers

Property income (dividends, interest, and rent) grew 2.3 percent in the third quarter, compared with 2.4-percent growth in the second quarter. Rental income of persons grew 2.9 percent in the third quarter; in the second quarter, it had fallen to its lowest level since the early 1990s (excluding the third quarter of 2005, which was abnormal because of Hurricane Katrina).

Transfers grew 1.8 percent after growing 1.2 percent in the second quarter. The incorporation of new 2006 data for the Alaska Permanent Fund benefits, a component of personal current transfer receipts, raised Alaska's transfer growth rate to 7.4 percent in the first quarter, compared with the previously estimated 2.8-percent growth rate.

## Revised second-quarter growth

Revised second-quarter data revealed weaker personal income growth, particularly in two regions. Growth in the Mideast was revised to 0.5 percent from 1.7 percent, reflecting declines in Delaware and New York, and growth in New England was revised to 0.7 percent from 1.7 percent, reflecting declines in Connecticut and Vermont. The slower second-quarter growth rates stemmed from declining earnings in the finance industry mainly because of unusually large wage payments in the first quarter.

p Preliminary
r Revised
1. Percent change was calculated from unrounded data.

NOTE. The personal income level shown for the United States is derived as the sum of the state estimates. It differs from the estimate of personal income in the national income and product accounts because of differences in coverage, in the methodologies used to prepare the estimates, and in the timing of the availability of source data.

p Preliminary.
r Revised.
D Not shown to avoid disclosure of confidential information, but the estimates for this item are included in the total.
1. The estimates of earnings are based on the 2002 North American Industry Classification System (NAICS).
2. Contributions for government social insurance are included in earnings by type and industry, but they are excluded from personal income.
3. The adjustment for residence is the net inflow of the earnings of interarea commuters. For the United States, it consists of adjustments for border workers: Wage and salary disbursements to U.S. residents commuting to Canada less wage and salary disbursements to Canadian and Mexican residents commuting into the United States.
4. Rental income of persons includes the capital consumption adjustment.
5. Proprietors' income includes the inventory valuation adjustment and the capital consumption adjustment.
6. "Other" consists of the wage and salary disbursements of U.S. residents employed by international organizations and foreign embassies and consulates in the United States.

NOTE. The personal income level shown for the United States is derived as the sum of the state estimates. It differs from the estimate of personal income in the national income and product accounts because of differences in coverage, in the methodologies used to prepare the estimates, and in the timing of the availability of source data.

# BEA Current and Historical Data

A selection of estimates from the national, industry, international, and regional accounts of the Bureau of Economic Analysis (BEA) are presented in this section. BEA's estimates are not copyrighted and may be reprinted without BEA's permission. Citing the SURVEY OF CURRENT BUSINESS and BEA as the source is appreciated.

More detailed estimates from BEA's accounts are available on BEA's Web site at <www.bea.gov>. These estimates are available in a variety of formats. In addition, news releases, articles, and other information, including methodologies and working papers, are available.

The tables present annual [A], quarterly [Q], and monthly [M] data.

## National Data

### A. Selected NIPA tables [A,Q]

1. Domestic product and income ..... D–2
2. Personal income and outlays ..... D–18
3. Government current receipts and expenditures .. D–21
4. Foreign transactions ..... D–33
5. Saving and investment ..... D–37
6. Income and employment by industry ..... D–42
7. Supplemental tables ..... D–43

### B. NIPA-related table

B.1 Personal income and its disposition [A, M] ..... D–46

### C. Historical measures [A, Q]

C.1 GDP and other major NIPA aggregates ..... D–47

### D. Charts

Selected NIPA series ..... D–51

## Industry Data

### E. Industry table

E.1 Value added by industry [A] ..... D–57

## International Data

### F. Transactions tables

F.1 U.S. international transactions in goods and services [A, M] ..... D–58
F.2 U.S. international transactions [A, Q] ..... D–59
F.3 U.S. international transactions by area [Q] ..... D–60
F.4 Private services transactions [A] ..... D–63

### G. Investment tables [A]

G.1 U.S. international investment position ..... D–64
G.2 USDIA: Selected items ..... D–65
G.3 Selected financial and operating data of foreign affiliates of U.S. companies ..... D–66
G.4 FDIUS: Selected items ..... D–67
G.5 Selected financial and operating data of U.S. affiliates of foreign companies ..... D–68

### H. Charts

The United States in the international economy ..... D–69

## Regional Data

### I. State and regional tables

I.1 Personal income [Q] ..... D–70
I.2 Personal income and per capita personal income [A] ..... D–71
I.3 Disposable personal income and per capita disposable personal income [A] ..... D–72
I.4 Gross domestic product by state [A] ..... D–73

### J. Local area table

J.1 Personal income and per capita personal income by metropolitan area [A] ..... D–74

### K. Charts

Selected regional estimates ..... D–79

## Appendixes

### A. Additional information about the NIPA estimates

Statistical conventions ..... D–81
Reconciliation table [A, Q] ..... D–82

### B. Suggested reading ..... D–83

# National Data

## A. Selected NIPA Tables

The selected set of NIPA tables presents the most recent estimates of gross domestic product (GDP) and its components that were released on December 21, 2006. These estimates include the "final" estimates for the third quarter of 2006.

The selected set presents quarterly estimates that are updated monthly. Annual estimates are presented in most of the tables.

The GDP news release is available on BEA's Web site within minutes after the release. To receive an e-mail notification of the release, go to <www.bea.gov> and subscribe. The "Selected NIPA Tables" are available later that day.

| Residual | 25 | 0.4 | –10.5 | –17.0 | –8.8 | –23.7 | –20.8 | –28.7 |

NOTE. Chained (2000) dollar series are calculated as the product of the chain-type quantity index and the 2000 current-dollar value of the corresponding series, divided by 100. *Because the formula for the chain-type quantity indexes uses weights of more than one period, the corresponding chained-dollar estimates are usually not additive.* The residual line is the difference between the first line and the sum of the most detailed lines.

| Residual | 16 | 1.7 | −9.4 | −16.4 | −9.9 | −20.0 | −19.2 | −28.5 |
| **Addenda:** | | | | | | | | |
| Motor vehicle output | 17 | 406.6 | 430.7 | 447.4 | 424.3 | 428.3 | 417.8 | 443.9 |
| Gross domestic product excluding motor vehicle output | 18 | 10,297.7 | 10,620.2 | 10,672.0 | 10,739.9 | 10,888.4 | 10,968.4 | 11,001.9 |
| Final sales of computers [3] | 19 | 168.3 | 209.5 | 211.7 | 227.7 | 233.0 | 236.8 | 243.5 |
| Gross domestic product excluding final sales of computers | 20 | 10,551.4 | 10,877.0 | 10,942.0 | 10,984.7 | 11,134.3 | 11,204.0 | 11,256.9 |

1. Estimates for durable goods and nondurable goods for 1996 and earlier periods are based on the 1987 Standard Industrial Classification (SIC); later estimates for these industries are based on the North American Industry Classification System (NAICS).
2. Includes government consumption expenditures, which are for services (such as education and national defense) produced by government. In current dollars, these services are valued at their cost of production.
3. Some components of final sales of computers include computer parts.

NOTE. Chained (2000) dollar series are calculated as the product of the chain-type quantity index and the 2000 current-dollar value of the corresponding series, divided by 100. Because the formula for the chain-type quantity indexes uses weights of more than one period, the corresponding chained-dollar estimates are usually not additive. The residual line following change in private inventories is the difference between gross domestic product and the sum of final sales of domestic product and of change in private inventories; the residual line following structures is the difference between gross domestic product and the sum of the detailed lines of goods, of services, and of structures.

| **Addendum:** | | | | | | | | |
| Gross housing value added | 11 | 5.6 | 2.7 | 1.9 | 2.8 | 7.1 | 4.0 | 2.8 |

1. Equals gross domestic product excluding gross value added of households and institutions and of general government.
2. Equals gross domestic business value added excluding gross farm value added.
3. Equals compensation of employees of nonprofit institutions, the rental value of nonresidential fixed assets owned and used by nonprofit institutions serving households, and rental income of persons for tenant-occupied housing owned by nonprofit institutions.
4. Equals compensation of general government employees plus general government consumption of fixed capital.

| Farm | 4 | 81.6 | 82.4 | 81.7 | 83.3 | 86.1 | 86.9 | 86.4 |
| **Households and institutions** | 5 | **1,176.1** | **1,200.5** | **1,203.4** | **1,210.1** | **1,223.1** | **1,232.3** | **1,238.8** |
| Households | 6 | 672.6 | 693.2 | 693.6 | 700.6 | 713.2 | 720.2 | 725.2 |
| Nonprofit institutions serving households [3] | 7 | 504.1 | 508.3 | 510.7 | 510.7 | 511.5 | 513.8 | 515.5 |
| **General government** [4] | 8 | **1,130.9** | **1,140.9** | **1,141.6** | **1,144.3** | **1,142.3** | **1,144.6** | **1,151.5** |
| Federal | 9 | 335.1 | 337.3 | 336.6 | 337.8 | 334.8 | 334.8 | 337.4 |
| State and local | 10 | 795.6 | 803.5 | 805.0 | 806.4 | 807.5 | 810.0 | 814.1 |
| Residual | 11 | –5.8 | –11.0 | –12.4 | –12.8 | –16.3 | –17.1 | –16.9 |
| **Addendum:** | | | | | | | | |
| Gross housing value added | 12 | 833.8 | 856.7 | 857.2 | 863.2 | 878.2 | 886.8 | 892.9 |

1. Equals gross domestic product excluding gross value added of households and institutions and of general government.
2. Equals gross domestic business value added excluding gross farm value added.
3. Equals compensation of employees of nonprofit institutions, the rental value of nonresidential fixed assets owned and used by nonprofit institutions serving households, and rental income of persons for tenant-occupied housing owned by nonprofit institutions.
4. Equals compensation of general government employees plus general government consumption of fixed capital.

NOTE. Chained (2000) dollar series are calculated as the product of the chain-type quantity index and the 2000 current-dollar value of the corresponding series, divided by 100. Because the formula for the chain-type quantity indexes uses weights of more than one period, the corresponding chained-dollar estimates are usually not additive. The residual line is the difference between the first line and the sum of the most detailed lines.

## Table 1.4.6. Relation of Real Gross Domestic Product, Real Gross Domestic Purchases, and Real Final Sales to Domestic Purchasers, Chained Dollars

[Billions of chained (2000) dollars]

| | Line | 2004 | 2005 | Seasonally adjusted at annual rates | | | | |
|---|---|---|---|---|---|---|---|---|
| | | | | 2005 | | 2006 | | |
| | | | | III | IV | I | II | III |
| **Gross domestic product** | 1 | **10,703.5** | **11,048.6** | **11,115.1** | **11,163.8** | **11,316.4** | **11,388.1** | **11,443.5** |
| Less: Exports of goods and services | 2 | 1,120.4 | 1,196.1 | 1,200.5 | 1,228.4 | 1,269.3 | 1,288.5 | 1,310.0 |
| Plus: Imports of goods and services | 3 | 1,711.3 | 1,815.3 | 1,808.1 | 1,865.0 | 1,905.9 | 1,912.7 | 1,938.8 |
| **Equals: Gross domestic purchases** | 4 | **11,286.5** | **11,659.7** | **11,714.6** | **11,792.9** | **11,946.3** | **12,005.9** | **12,066.6** |
| Less: Change in private inventories | 5 | 53.4 | 19.6 | −12.7 | 43.5 | 41.2 | 53.7 | 55.4 |
| **Equals: Final sales to domestic purchasers** | 6 | **11,231.1** | **11,636.1** | **11,722.8** | **11,744.6** | **11,898.7** | **11,945.9** | **12,004.7** |
| **Addendum:** | | | | | | | | |
| Final sales of domestic product | 7 | 10,648.3 | 11,025.2 | 11,123.5 | 11,115.5 | 11,269.0 | 11,328.0 | 11,381.6 |

NOTE. Chained (2000) dollar series are calculated as the product of the chain-type quantity index and the 2000 current-dollar value of the corresponding series, divided by 100. Because the formula for the chain-type quantity indexes uses weights of more than one period, the corresponding chained-dollar estimates are usually not additive.

| Residual | 55 | –17.6 | –42.6 | –47.1 | –53.7 | –78.7 | –77.6 | –88.3 |

1. The quantity index for computers can be used to accurately measure the real growth of this component. However, because computers exhibit rapid changes in prices relative to other prices in the economy, the chained-dollar estimates should not be used to measure the component's relative importance or its contribution to the growth rate of more aggregate series; accurate estimates of these contributions are shown in table 1.5.2 and real growth rates are shown in table 1.5.1.

2. Excludes software "embedded," or bundled, in computers and other equipment.

NOTE. The residual line is the difference between the first line and the sum of the most detailed lines.

1. Gross domestic income deflated by the implicit price deflator for gross domestic product.
2. Gross national income deflated by the implicit price deflator for gross national product.
3. Net domestic income deflated by the implicit price deflator for net domestic product.

NOTE. Except as noted in footnotes 1, 2 and 3, chained (2000) dollar series are calculated as the product of the chain-type quantity index and the 2000 current-dollar value of the corresponding series, divided by 100. Because the formula for the chain-type quantity indexes uses weights of more than one period, the corresponding chained-dollar estimates are usually not additive.

| Terms of trade [2] | 5 | 100.531 | 98.406 | 97.552 | 97.286 | 97.872 | 97.183 | 96.975 |

1. Exports of goods and services and income receipts deflated by the implicit price deflator for imports of goods and services and income payments.
2. Ratio of the implicit price deflator for exports of goods and services and income receipts to the corresponding implicit price deflator for imports divided by 100.

NOTE. Chained (2000) dollar series are calculated as the product of the chain-type quantity index and the 2000 current-dollar value of the corresponding series, divided by 100. Because the formula for the chain-type quantity indexes uses weights of more than one period, the corresponding chained-dollar estimates are usually not additive.

| Profits after tax (without IVA and CCAdj) | 37 | 438.6 | 681.3 | 679.2 | 722.3 | 769.7 | 780.2 | 819.6 |
| Inventory valuation adjustment | 38 | –39.8 | –32.6 | –30.9 | –39.2 | –22.9 | –58.9 | –38.2 |
| Capital consumption adjustment | 39 | 68.6 | –135.8 | –157.3 | –143.0 | –126.8 | –136.5 | –137.1 |
| | Value added, in billions of chained (2000) dollars | | | | | | | |
| **Gross value added of nonfinancial corporate business** [2] | 40 | **5,630.0** | **5,852.9** | **5,875.8** | **5,927.8** | **6,111.2** | **6,069.0** | **6,177.3** |
| Consumption of fixed capital [3] | 41 | 650.9 | 681.6 | 738.9 | 670.5 | 666.1 | 669.2 | 672.0 |
| Net value added [4] | 42 | 4,979.2 | 5,171.2 | 5,136.9 | 5,257.3 | 5,445.0 | 5,399.8 | 5,505.3 |

1. Estimates for financial corporate business and nonfinancial corporate business for 2000 and earlier periods are based on the 1987 Standard Industrial Classification (SIC); later estimates for these industries are based on the North American Industry Classification System (NAICS).
2. The current-dollar gross value added is deflated using the gross value added chain-type price index for nonfinancial industries from the GDP-by-industry accounts. For periods when this price index is not available, the chain-type price index for GDP goods and structures is used.
3. Chained-dollar consumption of fixed capital of nonfinancial corporate business is calculated as the product of the chain-type quantity index and the 2000 current-dollar value of the corresponding series, divided by 100.
4. Chained-dollar net value added of nonfinancial corporate business is the difference between the gross product and the consumption of fixed capital.

1. Consists of gasoline, fuel oil, and other energy goods and of electricity and gas.

NOTE. Chained (2000) dollar series are calculated as the product of the chain-type quantity index and the 2000 current-dollar value of the corresponding series, divided by 100. Because the formula for the chain-type quantity indexes uses weights of more than one period, the corresponding chained-dollar estimates are usually not additive. The residual line is the difference between the first line and the sum of the most detailed lines.

1. Government consumption expenditures are services (such as education and national defense) produced by government that are valued at their cost of production. Excludes government sales to other sectors and government own-account investment (construction and software).

2. Gross government investment consists of general government and government enterprise expenditures for fixed assets; inventory investment is included in government consumption expenditures.

NOTE. Chained (2000) dollar series are calculated as the product of the chain-type quantity index and the 2000 current-dollar value of the corresponding series, divided by 100. Because the formula for the chain-type quantity indexes uses weights of more than one period, the corresponding chained-dollar estimates are usually not additive. The residual line is the difference between the first line and the sum of the most detailed lines.

| Other sales | 60 | 3.5 | 4.0 | 2.8 | 3.8 | 2.4 | 2.5 | 2.4 |

1. Government consumption expenditures are services (such as education and national defense) produced by government that are valued at their cost of production. Excludes government sales to other sectors and government own-account investment (construction and software).
2. Consumption of fixed capital, or depreciation, is included in government gross output as a partial measure of the services of general government fixed assets; the use of depreciation assumes a zero net return on these assets.
3. Includes general government intermediate inputs for goods and services sold to other sectors and for own-account investment.
4. Own-account investment is measured in current dollars by compensation of general government employees and related expenditures for goods and services and is classified as investment in structures and in software in table 3.9.5.

1. Government consumption expenditures are services (such as education and national defense) produced by government that are valued at their cost of production. Excludes government sales to other sectors and government own-account investment (construction and software).
2. Consumption of fixed capital, or depreciation, is included in government gross output as a partial measure of the services of general government fixed assets; the use of depreciation assumes a zero net return on these assets.
3. Includes general government intermediate inputs for goods and services sold to other sectors and for own-account investment.
4. Own-account investment is measured in current dollars by compensation of general government employees and related expenditures for goods and services and is classified as investment in structures and in software in table 3.9.5.

1. Government consumption expenditures are services (such as education and national defense) produced by government that are valued at their cost of production. Excludes government sales to other sectors and government own-account investment (construction and software).
2. Consumption of fixed capital, or depreciation, is included in government gross output as a partial measure of the services of general government fixed assets; the use of depreciation assumes a zero net return on these assets.
3. Includes general government intermediate inputs for goods and services sold to other sectors and for own-account investment.
4. Own-account investment is measured in current dollars by compensation of general government employees and related expenditures for goods and services and is classified as investment in structures and in software in table 3.9.5.

| Residual | 61 | –1.6 | –2.1 | –2.8 | –2.3 | –4.1 | –4.0 | –4.0 |

1. Government consumption expenditures are services (such as education and national defense) produced by government that are valued at their cost of production. Excludes government sales to other sectors and government own-account investment (construction and software).

2. Consumption of fixed capital, or depreciation, is included in government gross output as a partial measure of the services of general government fixed assets; the use of depreciation assumes a zero net return on these assets.

3. Includes general government intermediate inputs for goods and services sold to other sectors and for own-account investment.

4. Own-account investment is measured in current dollars by compensation of general government employees and related expenditures for goods and services and is classified as investment in structures and in software in table 3.9.5.

NOTE. Chained (2000) dollar series are calculated as the product of the chain-type quantity index and the 2000 current-dollar value of the corresponding series, divided by 100. Because the formula for the chain-type quantity indexes uses weights of more than one period, the corresponding chained-dollar estimates are usually not additive. The residual line is the difference between the first line and the sum of the most detailed lines.

1. National defense consumption expenditures are defense services produced by government that are valued at their cost of production. Excludes government sales to other sectors and government own-account investment (construction and software).
2. Consumption of fixed capital, or depreciation, is included in government gross output as a partial measure of the services of general government fixed assets; the use of depreciation assumes a zero net return on these assets.
3. Includes general government intermediate inputs for goods and services sold to other sectors and for own-account investment.
4. Own-account investment is measured in current dollars by compensation of general government employees and related expenditures for goods and services and is classified as investment in structures and in software.
5. Gross government investment consists of general government and government enterprise expenditures for fixed assets; inventory investment is included in government consumption expenditures.

1. National defense consumption expenditures are defense services produced by government that are valued at their cost of production. Excludes government sales to other sectors and government own-account investment (construction and software).
2. Consumption of fixed capital, or depreciation, is included in government gross output as a partial measure of the services of general government fixed assets; the use of depreciation assumes a zero net return on these assets.
3. Includes general government intermediate inputs for goods and services sold to other sectors and for own-account investment.
4. Own-account investment is measured in current dollars by compensation of general government employees and related expenditures for goods and services and is classified as investment in structures and in software.
5. Gross government investment consists of general government and government enterprise expenditures for fixed assets; inventory investment is included in government consumption expenditures.

1. National defense consumption expenditures are defense services produced by government that are valued at their cost of production. Excludes government sales to other sectors and government own-account investment (construction and software).
2. Consumption of fixed capital, or depreciation, is included in government gross output as a partial measure of the services of general government fixed assets; the use of depreciation assumes a zero net return on these assets.
3. Includes general government intermediate inputs for goods and services sold to other sectors and for own-account investment.
4. Own-account investment is measured in current dollars by compensation of general government employees and related expenditures for goods and services and is classified as investment in structures and in software.
5. Gross government investment consists of general government and government enterprise expenditures for fixed assets; inventory investment is included in government consumption expenditures.

NOTE. Chained (2000) dollar series are calculated as the product of the chain-type quantity index and the 2000 current-dollar value of the corresponding series, divided by 100. Because the formula for the chain-type quantity indexes uses weights of more than one period, the corresponding chained-dollar estimates are usually not additive. The residual line is the difference between the first line and the sum of the most detailed lines.

1. Exports and imports of certain goods, primarily military equipment purchased and sold by the Federal Government, are included in services. Beginning with 1986, repairs and alterations of equipment are reclassified from goods to services.
2. Consists of capital transfers and the acquisition and disposal of nonproduced nonfinancial assets.

1. Exports and imports of certain goods, primarily military equipment purchased and sold by the Federal Government, are included in services. Beginning with 1986, repairs and alterations of equipment are reclassified from goods to services.
2. The quantity index for computers can be used to accurately measure the real growth of this component. However, because computers exhibit rapid changes in prices relative to other prices in the economy, the chained-dollar estimates should not be used to measure the component's relative importance or its contribution to the growth rate of more aggregate series; accurate estimates of these contributions are shown in table 4.2.2, and real growth rates are shown in table 4.2.1.
3. Includes parts of foods, feeds, and beverages, of nondurable industrial supplies and materials, and of nondurable nonautomotive consumer goods.

NOTE. Chained (2000) dollar series are calculated as the product of the chain-type quantity index and the 2000 current-dollar value of the corresponding series, divided by 100. Because the formula for the chain-type quantity indexes uses weights of more than one period, the corresponding chained-dollar estimates are usually not additive. For exports and for imports, the residual line is the difference between the aggregate line and the sum of the most detailed lines.

1. Consists primarily of religious, educational, vocational, lodging, railroads, farm, and amusement and recreational structures, net purchases of used structures, and brokers' commissions on the sale of structures.
2. Excludes software "embedded," or bundled, in computers and other equipment.
3. Includes communication equipment, nonmedical instruments, medical equipment and instruments, photocopy and related equipment, and office and accounting equipment.
4. Consists primarily of furniture and fixtures, agricultural machinery, construction machinery, mining and oilfield machinery, service industry machinery, and electrical equipment not elsewhere classified.
5. Consists primarily of manufactured homes, improvements, dormitories, net purchases of used structures, and brokers' commissions on the sale of residential structures.
6. Excludes net purchases of used structures and brokers' commissions on the sale of structures.

| **Addenda:** | | | | | | | | |
| Private fixed investment in structures | 25 | 798.4 | 848.4 | 856.0 | 861.9 | 866.9 | 863.0 | 845.2 |
| Private fixed investment in equipment and software | 26 | 913.2 | 994.3 | 1,010.0 | 1,017.3 | 1,054.8 | 1,051.2 | 1,070.6 |
| Private fixed investment in new structures [7] | 27 | 718.8 | 762.9 | 765.7 | 780.4 | 788.0 | 784.6 | 772.1 |
| Nonresidential structures | 28 | 248.1 | 250.6 | 246.2 | 253.3 | 258.6 | 270.7 | 280.7 |
| Residential structures | 29 | 471.8 | 513.9 | 521.3 | 528.8 | 530.8 | 513.7 | 489.3 |

1. Consists primarily of religious, educational, vocational, lodging, railroads, farm, and amusement and recreational structures, net purchases of used structures, and brokers' commissions on the sale of structures.
2. The quantity index for computers can be used to accurately measure the real growth rate of this component. However, because computers exhibit rapid changes in prices relative to other prices in the economy, the chained-dollar estimates should not be used to measure the component's relative importance or its contribution to the growth rate of more aggregate series; accurate estimates of these contributions are shown in table 5.3.2 and real growth rates are shown in table 5.3.1.
3. Excludes software "embedded," or bundled, in computers and other equipment.
4. Includes communication equipment, nonmedical instruments, medical equipment and instruments, photocopy and related equipment, and office and accounting equipment.
5. Consists primarily of furniture and fixtures, agricultural machinery, construction machinery, mining and oilfield machinery, service industry machinery, and electrical equipment not elsewhere classified.
6. Consists primarily of manufactured homes, improvements, dormitories, net purchases of used structures, and brokers' commissions on the sale of residential structures.
7. Excludes net purchases of used structures and brokers' commissions on the sale of structures.

Note. Chained (2000) dollar series are calculated as the product of the chain-type quantity index and the 2000 current-dollar value of the corresponding series, divided by 100. Because the formula for the chain-type quantity indexes uses weights of more than one period, the corresponding chained-dollar estimates are usually not additive. The residual line is the difference between the first line and the sum of the most detailed lines.

## Table 5.6.5B. Change in Private Inventories by Industry

| Nonmerchant wholesale trade | 26 | 0.7 | 0.4 | –1.9 | –1.7 | 2.8 | –0.5 | 5.6 |

1. This series is derived from the Census Bureau series "current cost inventories."
2. The inventory valuation adjustment (IVA) shown in this table differs from the IVA that adjusts business incomes. The IVA in this table reflects the mix of methods (such as first-in, first-out and last-in, first-out) underlying inventories derived primarily from Census Bureau statistics (see footnote 1). This mix differs from that underlying business income derived primarily from Internal Revenue Service statistics.

Note. Estimates in this table are based on the North American Industry Classification System (NAICS).

| Nonmerchant wholesale trade | 25 | 0.7 | 0.5 | –1.5 | –1.4 | 2.3 | –0.4 | 4.4 |

Note. Estimates in this table are based on the North American Industry Classification System (NAICS).

Chained (2000) dollar series for real change in private inventories are calculated as the period-to-period change in chained-dollar end-of-period inventories. Quarterly changes in end-of-period inventories are stated at annual rates. Because the formula for the chain-type quantity indexes uses weights of more than one period, the corresponding chained-dollar estimates are usually not additive. The residual line is the difference between the first line and the sum of the most detailed lines.

| Private inventories to final sales | 27 | 2.47 | 2.51 | 2.48 | 2.53 | 2.54 |
| Nonfarm inventories to final sales | 28 | 2.25 | 2.28 | 2.25 | 2.29 | 2.29 |
| Nonfarm inventories to final sales of goods and structures | 29 | 3.66 | 3.74 | 3.66 | 3.74 | 3.75 |

1. Inventories are as of the end of the quarter. The quarter-to-quarter change in inventories calculated from current-dollar inventories in this table is not the current-dollar change in private inventories component of GDP. The former is the difference between two inventory stocks, each valued at its respective end-of-quarter prices. The latter is the change in the physical volume of inventories valued at average prices of the quarter. In addition, changes calculated from this table are at quarterly rates, whereas, the change in private inventories is stated at annual rates.

2. Quarterly totals at monthly rates. Final sales of domestic business equals final sales of domestic product less gross output of general government, gross value added of nonprofit institutions, compensation paid to domestic workers, and space rent for owner-occupied housing. It includes a small amount of final sales by farm and by government enterprises.

NOTE. Estimates in this table are based on the North American Industry Classification System (NAICS).

| **Ratios of private inventories to final sales of domestic business:** | | | | | | |
| Private inventories to final sales | 28 | 2.40 | 2.42 | 2.40 | 2.40 | 2.41 |
| Nonfarm inventories to final sales | 29 | 2.20 | 2.22 | 2.20 | 2.20 | 2.21 |
| Nonfarm inventories to final sales of goods and structures | 30 | 3.51 | 3.55 | 3.48 | 3.50 | 3.52 |

1. Inventories are as of the end of the quarter. The quarter-to-quarter changes calculated from this table are at quarterly rates, whereas the change in private inventories component of GDP is stated at annual rates.

2. Quarterly totals at monthly rates. Final sales of domestic business equals final sales of domestic product less gross output of general government, gross value added of nonprofit institutions, compensation paid to domestic workers, and space rent for owner-occupied housing. It includes a small amount of final sales by farm and by government enterprises.

NOTE. Estimates in this table are based on the North American Industry Classification System (NAICS).

Chained (2000) dollar inventory series are calculated to ensure that the chained (2000) dollar change in inventories for 2000 equals the current-dollar change in inventories for 2000 and that the average of the 1999 and 2000 end-of-year chain-weighted and fixed-weighted inventories are equal.

## Table 5.7.9B. Implicit Price Deflators for Private Inventories by Industry

[Index numbers, 2000=100]

| | Line | Seasonally adjusted | | | | |
|---|---|---|---|---|---|---|
| | | 2005 | | 2006 | | |
| | | III | IV | I | II | III |
| **Private inventories** [1] | 1 | **112.835** | **114.369** | **115.022** | **117.640** | **118.005** |
| Farm | 2 | 123.857 | 126.709 | 131.303 | 132.816 | 140.014 |
| Mining, utilities, and construction | 3 | 144.613 | 162.533 | 150.009 | 143.636 | 143.332 |
| Manufacturing | 4 | 117.161 | 118.596 | 119.993 | 125.162 | 124.982 |
| Durable goods industries | 5 | 110.501 | 111.721 | 113.688 | 118.579 | 119.635 |
| Nondurable goods industries | 6 | 127.422 | 129.193 | 129.701 | 135.299 | 133.205 |
| Wholesale trade | 7 | 111.427 | 112.278 | 113.052 | 116.485 | 115.751 |
| Durable goods industries | 8 | 105.078 | 105.825 | 106.870 | 109.330 | 109.560 |
| Nondurable goods industries | 9 | 121.113 | 122.137 | 122.471 | 127.453 | 125.155 |
| Retail trade | 10 | 104.745 | 104.909 | 105.399 | 106.496 | 106.323 |
| Motor vehicle and parts dealers | 11 | 98.748 | 97.666 | 98.143 | 98.522 | 97.509 |
| Food and beverage stores | 12 | 113.448 | 114.670 | 113.712 | 114.876 | 116.498 |
| General merchandise stores | 13 | 105.236 | 105.842 | 106.366 | 107.262 | 107.817 |
| Other retail stores | 14 | 107.836 | 108.676 | 109.397 | 111.133 | 111.084 |
| Other industries | 15 | 106.060 | 106.444 | 106.386 | 108.340 | 109.188 |
| **Addenda:** | | | | | | |
| Private inventories | 16 | 112.835 | 114.369 | 115.022 | 117.640 | 118.005 |
| Durable goods industries | 17 | 105.881 | 106.541 | 107.808 | 110.493 | 110.862 |
| Nondurable goods industries | 18 | 119.046 | 121.377 | 121.467 | 124.020 | 124.381 |
| Nonfarm industries | 19 | 111.833 | 113.248 | 113.548 | 116.264 | 116.020 |
| Wholesale trade | 20 | 111.427 | 112.278 | 113.052 | 116.485 | 115.751 |
| Merchant wholesale trade | 21 | 109.814 | 110.761 | 111.585 | 114.482 | 114.332 |
| Durable goods industries | 22 | 105.297 | 106.067 | 107.126 | 109.629 | 109.863 |
| Nondurable goods industries | 23 | 116.886 | 118.131 | 118.562 | 122.103 | 121.304 |
| Nonmerchant wholesale trade | 24 | 122.160 | 122.378 | 122.809 | 129.926 | 125.140 |

1. Implicit price deflators are as of the end of the quarter and are consistent with inventory stocks.

NOTE. Estimates in this table are based on the North American Industry Classification System (NAICS).

| Residual | 42 | 1.0 | 1.3 | –0.2 | 3.3 | 2.0 | 3.6 | 4.1 |
| **Addenda:** | | | | | | | | |
| Final sales of motor vehicles to domestic purchasers | 43 | 505.7 | 528.4 | 558.5 | 504.5 | 528.0 | 522.9 | 540.3 |
| Private fixed investment in new autos and new light trucks | 44 | 154.2 | 171.1 | 180.7 | 176.1 | 188.3 | 173.0 | 179.1 |
| Domestic output of new autos [2] | 45 | 91.1 | 102.5 | 102.2 | 108.3 | 107.9 | 101.4 | 103.3 |
| Sales of imported new autos [3] | 46 | 90.9 | 93.6 | 98.1 | 94.9 | 93.4 | 97.3 | 100.6 |

1. Consists of used light trucks only.
2. Consists of final sales and change in private inventories of new autos assembled in the United States.
3. Consists of personal consumption expenditures, private fixed investment, and gross government investment.

NOTE. Chained (2000) dollar series are calculated as the product of the chain-type quantity index and the 2000 current-dollar value of the corresponding series, divided by 100. Because the formula for the chain-type quantity indexes uses weights of more than one period, the corresponding chained-dollar estimates are usually not additive. The residual line is the difference between the first line and the sum of the most detailed lines, excluding the lines in the addenda.

CCAdj Capital consumption adjustment
IVA Inventory valuation adjustment
1. Consists of nonmortgage interest paid by households.
2. Equals disposable personal income deflated by the implicit price deflator for personal consumption expenditures.
3. Population is the total population of the United States, including the Armed Forces overseas and the institutionalized population. The monthly estimate is the average of estimates for the first of the month and the first of the following month; the annual estimate is the average of the monthly estimates.

## C. Historical Measures

This table is derived from the "Selected NIPA Tables" that are published in this issue and from the "GDP and Other Major NIPA Series" tables that were published in the August 2006 issue. (The changes in prices are calculated from indexes expressed to three decimal places.)

**Table C.1. GDP and Other Major NIPA Aggregates**—Continues

[Quarterly estimates are seasonally adjusted at annual rates]

# Industry Data

## E. Industry Table

The estimates in this table were published in tables 1 and 4 in "Annual Industry Accounts: Revised Estimates for 2003–2005" in the December 2006 SURVEY.

### Table E.1. Current-Dollar and Real Value Added by Industry for 2003–2005

| | Billions of dollars | | | Billions of chained (2000) dollars | | |
|---|---|---|---|---|---|---|
| | 2003 | 2004 | 2005 | 2003 | 2004 | 2005 |
| **Gross domestic product** | **10,960.8** | **11,712.5** | **12,455.8** | **10,301.0** | **10,703.5** | **11,048.6** |
| **Private industries** | **9,542.3** | **10,221.5** | **10,892.2** | **9,050.9** | **9,434.5** | **9,748.8** |
| **Agriculture, forestry, fishing, and hunting** | **114.4** | **142.0** | **123.1** | **104.1** | **110.5** | **110.6** |
| Farms | 88.3 | 114.6 | 95.9 | 76.0 | 81.6 | 82.4 |
| Forestry, fishing, and related activities | 26.1 | 27.4 | 27.2 | 28.0 | 28.4 | 27.5 |
| **Mining** | **143.3** | **172.1** | **233.3** | **106.7** | **107.6** | **104.8** |
| Oil and gas extraction | 93.8 | 116.4 | 159.6 | 78.1 | 77.2 | 73.6 |
| Mining, except oil and gas | 27.2 | 29.3 | 31.5 | 24.0 | 23.5 | 22.7 |
| Support activities for mining | 22.3 | 26.5 | 42.2 | 8.0 | 9.1 | 9.7 |
| **Utilities** | **220.0** | **235.2** | **248.0** | **200.6** | **205.5** | **207.9** |
| **Construction** | **496.2** | **541.0** | **611.1** | **419.3** | **425.6** | **442.3** |
| **Manufacturing** | **1,359.3** | **1,434.8** | **1,512.5** | **1,400.1** | **1,490.7** | **1,523.1** |
| Durable goods | 771.8 | 819.6 | 854.3 | 849.4 | 914.4 | 959.0 |
| Wood products | 32.1 | 38.3 | 39.0 | 30.4 | 31.4 | 32.4 |
| Nonmetallic mineral products | 45.1 | 49.5 | 53.3 | 45.2 | 48.6 | 48.4 |
| Primary metals | 38.4 | 54.3 | 61.1 | 42.3 | 48.7 | 48.3 |
| Fabricated metal products | 106.3 | 118.4 | 130.5 | 104.6 | 113.6 | 119.1 |
| Machinery | 94.3 | 104.4 | 111.1 | 91.6 | 104.7 | 109.0 |
| Computer and electronic products | 124.0 | 129.5 | 135.3 | 214.6 | 258.5 | 309.9 |
| Electrical equipment, appliances, and components | 48.8 | 45.7 | 47.8 | 50.1 | 46.7 | 47.5 |
| Motor vehicles, bodies and trailers, and parts | 124.1 | 109.8 | 95.4 | 137.0 | 128.8 | 125.1 |
| Other transportation equipment | 62.4 | 65.7 | 71.1 | 55.5 | 57.0 | 59.2 |
| Furniture and related products | 33.4 | 36.7 | 37.1 | 31.4 | 35.6 | 34.8 |
| Miscellaneous manufacturing | 62.9 | 67.4 | 72.6 | 59.1 | 64.7 | 70.1 |
| Nondurable goods | 587.5 | 615.2 | 658.2 | 551.2 | 578.4 | 571.1 |
| Food and beverage and tobacco products | 167.9 | 156.2 | 175.7 | 151.4 | 145.9 | 152.9 |
| Textile mills and textile product mills | 23.1 | 23.4 | 23.8 | 23.6 | 23.5 | 24.0 |
| Apparel and leather and allied products | 18.3 | 17.1 | 16.8 | 18.5 | 17.7 | 17.7 |
| Paper products | 50.3 | 52.8 | 54.6 | 52.1 | 56.3 | 57.5 |
| Printing and related support activities | 45.2 | 46.4 | 46.9 | 43.5 | 45.3 | 45.9 |
| Petroleum and coal products | 39.1 | 53.8 | 63.5 | 30.7 | 38.1 | 30.0 |
| Chemical products | 179.5 | 198.4 | 209.2 | 169.6 | 183.6 | 180.5 |
| Plastics and rubber products | 64.0 | 67.1 | 67.7 | 63.0 | 68.1 | 67.1 |
| **Wholesale trade** | **637.0** | **688.2** | **743.2** | **653.1** | **660.5** | **670.2** |
| **Retail trade** | **751.5** | **781.2** | **823.5** | **752.2** | **771.3** | **810.0** |
| **Transportation and warehousing** | **316.6** | **330.1** | **344.6** | **306.2** | **322.3** | **335.2** |
| Air transportation | 51.7 | 44.9 | 41.0 | 67.2 | 71.1 | 75.6 |
| Rail transportation | 28.1 | 30.2 | 32.3 | 25.7 | 26.9 | 26.0 |
| Water transportation | 8.7 | 9.0 | 9.0 | 5.4 | 5.9 | 6.6 |
| Truck transportation | 98.4 | 108.0 | 114.1 | 88.9 | 95.8 | 100.1 |

1. Chained (2000) dollar series are calculated as the product of the chain-type quantity index and the 2000 current-dollar value of the corresponding series, divided by 100. Because the formula for the chain-type quantity indexes uses weights of more than one period, the corresponding chained-dollar estimates are usually not additive. The value of not allocated by industry reflects the difference between the first line and the sum of the most detailed lines, as well as the differences in source data used to estimate GDP by industry and the expenditures measure of real GDP

2. Consists of agriculture, forestry, fishing, and hunting; mining; construction; and manufacturing.

3. Consists of utilities; wholesale trade; retail trade; transportation and warehousing; information; finance, insurance, real estate, rental, and leasing; professional and business services; educational services, health care, and social assistance; arts, entertainment, recreation, accommodation, and food services; and other services, except government.

4. Consists of computer and electronic products; publishing industries (includes software); information and data processing services; and computer systems design and related services.

NOTE. Estimates in this table are based on the 1997 North American Industry Classification System (NAICS).

# International Data

## F. Transactions Tables

Table F.1 presents estimates of U.S. international trade in goods and services that were released on January 10, 2007. It includes preliminary estimates for November 2006 and revised estimates for October 2006.

The sources for the other tables in this section are noted.

For BEA's full set of detailed estimates of U.S. international transactions, visit BEA's Web site at <www.bea.gov>.

p Preliminary
r Revised
1. Reflects adjustments necessary to bring the Census Bureau's component data in line with the concepts and definitions used to prepare BEA's international and national accounts.
2. Contains goods that cannot be separately identified.

p Preliminary
r Revised

1. Includes royalties, license fees, and other fees associated with the use of intangible assets, including patents, trade secrets, and other proprietary rights, that are used in connection with the production of goods.
2. Includes royalties, license fees, and other fees associated with the use of copyrights, trademarks, franchises, rights to broadcast live events, software licensing fees, and other intangible property rights.
3. Other unaffiliated services receipts (exports) include mainly film and television tape rentals and expenditures of foreign residents temporarily working in the United States. Payments (imports) include mainly expenditures of U.S. residents temporarily working abroad and film and television tape rentals.
4. These reflect the amount of premiums explicitly charged by, or paid to, insurers and reinsurers.

Source: Table 3 in "U.S. International Transactions: Third Quarter of 2006" in the January 2007 SURVEY OF CURRENT BUSINESS.

### Footnotes to Tables F.2. and F.3.

1. Credits, +: Exports of goods and services and income receipts; unilateral current transfers to the United States; capital account transactions receipts; financial inflows—increase in foreign-owned assets (U.S. liabilities) or decrease in U.S.-owned assets (U.S. claims).

Debits, –: Imports of goods and services and income payments; unilateral current transfers to foreigners; capital account transactions payments; financial outflows—decrease in foreign-owned assets (U.S. liabilities) or increase in U.S.-owned assets (U.S. claims).

2. Excludes exports of goods under U.S. military agency sales contracts identified in Census export documents, excludes imports of goods under direct defense expenditures identified in Census import documents, and reflects various other adjustments (for valuation, coverage, and timing) of Census statistics to balance of payments basis; see table 2a in "U.S. International Transactions: Third Quarter of 2006" in the January 2007 SURVEY OF CURRENT BUSINESS.
3. Includes some goods: Mainly military equipment in line 5; major equipment, other materials, supplies, and petroleum products purchased abroad by U.S. military agencies in line 22; and fuels purchased by airline and steamship operators in lines 8 and 25.
4. Includes transfers of goods and services under U.S. military grant programs.
5. Beginning in 1982, these lines are presented on a gross basis. The definition of exports is revised to exclude U.S. parents' payments to foreign affiliates and to include U.S. affiliates' receipts from foreign parents. The definition of imports is revised to include U.S. parents' payments to foreign affiliates and to exclude U.S. affiliates' receipts from foreign parents.
6. Beginning in 1982, the "other transfers" component includes taxes paid by U.S. private residents to foreign governments and taxes paid by private nonresidents to the U.S. Government.
7. At the present time, all U.S. Treasury-owned gold is held in the United States.
8. Includes sales of foreign obligations to foreigners.
9. Consists of bills, certificates, marketable bonds and notes, and nonmarketable convertible and nonconvertible bonds and notes.
10. Consists of U.S. Treasury and Export-Import Bank obligations, not included elsewhere, and of debt securities of U.S. Government corporations and agencies.
11. Includes, primarily, U.S. Government liabilities associated with military agency sales contracts and other transactions arranged with or through foreign official agencies; see table 5 in "U.S. International Transactions: Third Quarter of 2006" in the January 2007 SURVEY OF CURRENT BUSINESS.
12. Consists of investments in U.S. corporate stocks and in debt securities of private corporations and state and local governments.
13. Conceptually, the sum of line 76 and line 39 is equal to "net lending or net borrowing" in the national income and product accounts (NIPAs). However, the foreign transactions account in the NIPAs (a) includes adjustments to the international transactions accounts for the treatment of gold, (b) includes adjustments for the different geographical treatment of transactions with U.S. territories and Puerto Rico, and (c) includes services furnished without payment by financial pension plans except life insurance carriers and private noninsured pension plans. A reconciliation of the balance on goods and services from the international accounts and the NIPA net exports appears in reconciliation table 2 in appendix A in the SURVEY. A reconciliation of the other foreign transactions in the two sets of accounts appears in table 4.3B of the full set of NIPA tables.

**Additional footnotes to Table E.3:**

14. The "European Union" includes Belgium, Denmark, France, Germany (includes the former German Democratic Republic (East Germany) beginning in the fourth quarter of 1990), Greece, Ireland, Italy, Luxembourg, Netherlands, Portugal, Spain, United Kingdom; beginning with the first quarter of 1995, also includes Austria, Finland, and Sweden; and beginning with the second quarter of 2004, also includes Cyprus, Czech Republic, Estonia, Hungary, Latvia, Lithuania, Malta, Poland, Slovakia, and Slovenia. The "European Union" also includes the European Atomic Energy Community, the European Coal and Steel Community (through the third quarter of 2002), and the European Investment Bank.
15. Quarterly estimates for Mexico are available, beginning with 2004.
16. Includes, as part of international and unallocated (not shown here), taxes withheld; current-cost adjustments associated with U.S. and foreign direct investment; and net U.S. currency flows. Before 1999, also includes the estimated direct investment in foreign affiliates engaged in international shipping, in operating oil and gas drilling equipment internationally, and in petroleum trading. Before 1996, also includes small transactions in business services that are not reported by country.
17. Details are not shown separately; see totals in lines 56 and 63.
18. Details not shown separately are included in line 69.
19. At the global level, the statistical discrepancy represents net errors and omissions in recorded transactions. For individual countries and regions, it may also reflect discrepancies that arise when transactions with one country or region are settled through transactions with another country or region.

p Preliminary
r Revised

1. Represents gains or losses on foreign-currency-denominated assets and liabilities due to their revaluation at current exchange rates.
2. Includes changes in coverage, capital gains and losses of direct investment affiliates, and other adjustments to the value of assets and liabilities.
3. Reflects changes in the value of the official gold stock due to fluctuations in the market price of gold.
4. Reflects changes in gold stock from U.S. Treasury sales of gold medallions and commemorative and bullion coins; also reflects replenishment through open market purchases. These demonetizations/monetizations are not included in international transactions financial flows.
5. Also includes paid-in capital subscriptions to international financial institutions and resources provided to foreigners under foreign assistance programs requiring repayment over several years. Excludes World War I debts that are not being serviced.
6. Includes indebtedness that the borrower may contractually, or at its option, repay with its currency, with a third country's currency, or by delivery of materials or transfer of services.
7. Primarily U.S. Government liabilities associated with military sales contracts and other transactions arranged with or through foreign official agencies.

## I. State and Regional Tables

The tables in this section include the most recent estimates of state personal income and gross domestic product by state. The sources of these estimates are noted.

The quarterly and annual estimates of state personal income and the estimates of gross domestic product by state are available on CD–ROM. For information on state personal income, e-mail reis.remd@bea.gov; write to the Regional Economic Information System, BE–55, Bureau of Economic Analysis, U.S. Department of Commerce, Washington, DC 20230; or call 202–606–5360. For information on gross domestic product by state, e-mail gspread@bea.gov; write to the Regional Economic Analysis Division, BE–61, Bureau of Economic Analysis, U.S. Department of Commerce, Washington, DC 20230; or call 202–606–5340.

1. Percent change was calculated from unrounded data.

NOTE. The personal income level shown for the United States is derived as the sum of the state estimates. It differs from the estimate of personal income in the national income and product accounts because of differences in coverage, in the methodologies used to prepare the estimates, and in the timing of the availability of source data.

Source: Table 1 in "State Personal Income: Third Quarter of 2006" in the January 2007 SURVEY OF CURRENT BUSINESS.

1. Per capita personal income was computed using midyear population estimates of the Bureau of the Census. The population estimates were released by the Bureau of the Census in December 2005.
2. Percent change was calculated from unrounded data.
NOTE. The personal income level shown for the United States is derived as the sum of the state estimates. It differs from the estimate of personal income in the national income and product accounts because of differences in coverage, in the methodologies used to prepare the estimates, and in the timing of the availability of source data.

1. Per capita disposable personal income was computed using midyear population estimates of the Bureau of the Census. The population estimates were released by the Bureau of the Census in December 2005.
2. Percent change was calculated from unrounded data.
NOTE. The personal income level shown for the United States is derived as the sum of the state estimates. It differs from the estimate of personal income in the national income and product accounts because of differences in coverage, in the methodologies used to prepare the estimates, and in the timing of the availability of source data.
Source: Table 3 in "State Personal Income: Second Quarter of 2006 and Revised Estimates for 2003–2006:I" in the October 2006 SURVEY OF CURRENT BUSINESS.

D Suppressed to avoid disclosure of data of individual companies.

NOTE. Totals shown for the United States differ from the national income and product account estimates of gross domestic product (GDP) because GDP by state excludes, and national GDP includes, the compensation of Federal civilian and military personnel stationed abroad and government consumption of fixed capital for military structures located abroad and for military equipment, except office equipment. GDP by state and national GDP also have different revision schedules.

SOURCE: This table reflects the GDP-by-state estimates for 2005 that were released on October 26, 2006. Detailed estimates are available on BEA's Web site at <www.bea.gov>.

p Preliminary
1. Per capita personal income was computed using Census Bureau midyear population estimates.
2. Percent change calculated from unrounded data.
3. The metropolitan area definitions used by BEA for its personal income estimates are the new county-based definitions issued by the Office of Mangagement and Budget in June 2003 (with revisions released February 2004, March 2005, and December 2005) for federal statistical purposes.

## A. Additional Information About the NIPA Estimates

### Statistical Conventions

Current-dollar GDP is a measure of the market value of goods, services, and structures that are produced in the economy in a particular period. The changes in current-dollar GDP can be decomposed into quantity and price components. Quantities, or "real" measures, and prices are expressed as index numbers with the reference year—at present, the year 2000—equal to 100.[1]

The annual changes in quantities and prices are calculated using a Fisher formula that incorporates weights from 2 adjacent years. For example, the annual percent change in real GDP for 2001–2002 uses prices for 2001 and 2002 as weights, and the 2001–2002 annual percent change in the GDP price index uses quantities for 2001 and 2002 as weights. Because the Fisher formula allows for the effects of changes in relative prices and in the composition of output over time, the resulting quantity or price changes are not affected by the substitution bias that is associated with changes in quantities and prices calculated using a fixed-weighted formula. These annual changes are "chained" (multiplied) together to form time series of quantity and price indexes. The percent changes in the Fisher indexes are not affected by the choice of the reference year.

BEA also publishes implicit price deflators (IPDs), which are calculated as the ratio of the current-dollar value of a component to the chained-dollar value of the component, multiplied by 100. The values of an IPD are very close to the values of the corresponding "chain-type" price index.

The measures of real GDP and its major components are also presented in dollar-denominated form, designated "chained (2000) dollar estimates." For most series, these estimates are computed by multiplying the current-dollar value in 2000 by a corresponding quantity index number and then dividing by 100. For example, if a current-dollar GDP component equaled $100 in 2000 and if real output for this component increased by 10 percent in 2001, then the chained (2000) dollar value of this component in 2001 would be $110 ($100 × 1.10). The percent changes calculated from the chained (2000) dollar estimates and from the quantity indexes are the same; any differences will be small and due to rounding.

The chained-dollar values for the detailed GDP components will not necessarily sum to the chained-dollar estimate of GDP (or to any intermediate aggregate) in a table, because the relative prices that are used as weights for any period other than the reference year differ from those of the reference year. A measure of the effect of such differences is provided by a "residual" line—the difference between the chained-dollar value of the main aggregate in the table and the sum of the most detailed components in the table. For periods close to the reference year, when the relative prices that are used as weights have usually not changed much, the residuals tend to be small, and the chained-dollar estimates can be used to approximate the contributions to growth and to aggregate the detailed estimates. For periods further from the reference year, the residuals tend to be larger, and the chained-dollar estimates are less useful for analyses of contributions to growth. In particular, for components for which relative prices are changing rapidly, the calculation of contributions based on chained-dollar estimates may be misleading even just a few years from the reference year. Thus, contributions derived from quantity indexes provide a better measure than contributions derived from chained-dollar estimates; contributions based on quantity indexes are shown in selected NIPA tables 1.1.2, 1.2.2, 1.5.2, 2.3.2, 3.9.2, 4.2.2, and 5.3.2.

For quarters and months, NIPA estimates are presented at annual rates, which show the value that would be registered if the rate of activity that is measured for a quarter or for a month were maintained for a full year. Annual rates are used so that periods of different lengths—for example, quarters and years—may be more easily compared. These annual rates are determined simply by multiplying the estimated rate of activity by 4 (for quarterly data) or by 12 (for monthly data).

For most quarterly NIPA estimates, *percent changes* in the estimates are also expressed at annual rates. Calculating these *changes* requires a variant of the compound interest formula:

$$r = \left[\left(\frac{x_t}{x_o}\right)^{m/n} - 1\right] \times 100$$

where $r$ is the percent change at an annual rate; $x_t$ is the level of activity in the later period; $x_o$ is the level of activity in the earlier period; $m$ is the periodicity of the data (for example, 1 for annual data, 4 for quarterly data, or 12 for monthly data); and $n$ is the number of periods between the earlier periods and the later periods (that is, $t–0$).

Quarterly and monthly NIPA estimates are seasonally adjusted if necessary. Seasonal adjustment removes from the time series the average effects of variations that normally occur at about the same time and in about the same magnitude each year—for example, weather, holidays, and tax payment dates. After seasonal adjustment, cyclical and other short-term changes in the economy stand out more clearly.

## B. Suggested Reading

The Bureau of Economic Analysis (BEA) has published a wealth of information about the methodologies that are used to prepare its national, industry, international, and regional accounts. Most of this information is available on BEA's Web site at <www.bea.gov>; see "Methodology Papers" and the SURVEY OF CURRENT BUSINESS under "Publications."

### National accounts

The national accounts encompass the detailed estimates in the national income and product accounts (including gross domestic product) and the estimates of fixed assets and consumer durable goods.

**National income and product accounts (NIPAs).** This series of papers documents the conceptual framework of the NIPAs and the methodologies that have been used to prepare the estimates.

*An Introduction to National Economic Accounting* (1985) [also in the March 1985 SURVEY]

*Corporate Profits: Profits Before Tax, Profits Tax Liability, and Dividends* (2002)

*Government Transactions* (1988)

*Personal Consumption Expenditures* (1990)

The methodologies described in these papers have been updated and improved, typically as part of the comprehensive and annual revisions of the NIPAs.

The following SURVEY articles describe the most recent comprehensive revision of the NIPAs.

"Improved Estimates of the National Income and Product Accounts for 1929–2002: Results of the Comprehensive Revision" (February 2004)

"Preview of the Revised NIPA Estimates for 1997 Effects of Incorporating the 1997 Benchmark I-O Accounts and Proposed Definitional and Statistical Changes" (January 2003)

"Preview of the 2003 Comprehensive Revision of the National Income and Product Accounts"

Changes in Definitions and Classifications (June 2003)

New and Redesigned Tables (August 2003)

Statistical Changes (September 2003)

"Measuring the Services of Commercial Banks in the NIPAs: Changes in Concepts and Methods" (September 2003)

"Measuring the Services of Property-Casualty Insurance in the NIPAs: Changes in Concepts and Methods" (October 2003)

In addition, see the following articles.

"Annual Revision of the National Income and Product Accounts" (August 2006) presents revisions and describes any changes in the data and the methods that are used to prepare the estimates.

"Updated Summary NIPA Methodologies" (November 2006) describes the source data and the methods that are used to prepare the current-dollar and real estimates of GDP.

"Chained-Dollar Indexes: Issues, Tips on Their Use, and Upcoming Changes" (November 2003) discusses the advantages of using chain-weighted indexes and the challenges of using chained dollars.

"Reliability of the NIPA Estimates of U.S. Economic Activity" (February 2005) evaluates the principal NIPA estimates by examining the record of revisions to them.

"Gross Domestic Product: Revisions and Source Data" (February 2006) describes the categories of data that are used for the advance, preliminary, and final quarterly estimates of GDP.

**Fixed assets and consumer durable goods.** *Fixed Assets and Consumer Durable Goods in the United States, 1925–97* (2003) discusses the concepts and statistical considerations that underlie the estimates and their derivation.

"Fixed Assets and Consumer Durable Goods for 1925–2002" (May 2004) describes the improvements that were incorporated into these estimates as part of the most recent comprehensive NIPA revision.

"Fixed Assets and Consumer Durable Goods for 1995–2005" (September 2006) provides estimates that reflect the incorporation of the most recent annual NIPA revision.

**Mission Statement and Strategic Plan**

The mission statement of the Bureau of Economic Analysis and its most recently updated strategic plan for improving the accuracy, reliability, and relevance of the national, industry, regional, and international accounts are available on BEA's Web site at <www.bea.gov> under "About BEA."

Federal Reserve Bank of St. Louis

## Industry accounts

The industry accounts consist of the annual industry accounts (the input-output accounts and the gross-domestic-product-by-industry accounts) and one satellite account.

**Annual industry accounts.** "Improved Annual Industry Accounts for 1998–2003" (June 2004) describes the comprehensive revision of the annual input-output accounts and the GDP-by-industry accounts that features the integration of the two sets of accounts.

"Annual Industry Accounts" (December 2006) presents the annual revision of these accounts and describes the source data and any changes in the methods that are used to prepare the estimates.

In addition, see the following articles.

"Preview of the Benchmark Input-Output Accounts for 2002" (September 2005) includes the proposed new sectors that are based on the 2002 North American Industry Classification System.

"Preview of the Comprehensive Revision of the Annual Industry Accounts: Integrating the Annual Input-Output Accounts and the Gross-Domestic-Product-by-Industry Accounts" (March 2004) provides the details about the comprehensive revision.

"Benchmark Input-Output Accounts for the U.S. Economy, 1997" (December 2002)

**Satellite accounts.** These accounts extend the analytical capacity of the input-output accounts by focusing on a particular aspect of economic activity.

"Research and Development Satellite Account"
For 1959–2002 (December 2006)

"U.S. Travel and Tourism Satellite Accounts"
For 1996 and 1997 (July 2000)
For 1998–2003 (September 2004)
For 2001–2004 (June 2005)
For 2002–2005 (June 2006)

## International accounts

The international accounts encompass the international transactions accounts, direct investment, and international transactions in services.

**International transactions accounts (ITAs).** *The Balance of Payments of the United States: Concepts, Data Sources, and Estimating Procedures* (1990) describes the methodologies used to prepare the estimates in the ITAs and the international investment position of the United States. These methodologies are usually updated and improved as part of the annual revisions of the ITAs.

The annual revisions of the ITAs are described in a series of articles, the latest of which was published in the July 2006 SURVEY.

**Direct investment.** *International Direct Investment: Studies by the Bureau of Economic Analysis* (1999) is a collection of previously published articles on U.S. direct investment abroad and foreign direct investment in the United States. It includes "A Guide to BEA Statistics on U.S. Multinational Companies," which is also available in the March 1995 SURVEY, and "A Guide to BEA Statistics on Foreign Direct Investment in the United States," which is also available in the February 1990 SURVEY

In addition, the updated methodologies are available in *U.S. Direct Investment Abroad: Final Results From the 1999 Benchmark Survey* (2004), and in *Foreign Direct Investment in the United States: Final Results From the 2002Benchmark Survey* (2006).

**International services.** *U.S. International Transactions in Private Services: A Guide to the Surveys Conducted by the Bureau of Economic Analysis* (1998) describes 11 surveys. It includes classifications, definitions, release schedules, the methods used to prepare the estimates, and samples of the survey forms.

"Selected Issues in the Measurement of U.S. International Services" (June 2002) describes key issues in defining and measuring insurance, wholesale and retail trade, finance, construction, and utilities services and explores possible actions to address these issues.

## Regional accounts

The regional accounts include estimates of personal income and gross state product.

**Personal income.** Estimates of personal income are prepared for states and for local areas.

"Comprehensive Revision of State Personal Income for 1969–2003" (May 2004) describes the improvements in the methodology that are used to prepare the estimates and that are part of a comprehensive revision.

"The Reliability of the State Personal Income Estimates" (December 2003) evaluates the estimates of state personal income and of selected components by examining the revisions of these estimates.

"Comprehensive Revision of Local Area Personal Income for 1969–2002" (June 2004) summarizes the improvements in the methodology that is used to prepare the estimates for counties and metropolitan areas. The detailed methodology is available on the DVD–ROM *Regional Economic Information System, 1969–2004.*

**Gross state product.** "Comprehensive Revision of Gross State Product" (January 2005) summarizes the sources and the methods that are used to prepare the estimates.

"Gross State Product by Industry for 1998–2005" (July 2006) presents the most recent annual revision.
