MORE ABOUT

EMPLOYMENT AND EARNINGS

IS AVAILABLE FROM:

STATE AND AREA NEWS RELEASES by cooperating State Agencies, presenting current employment, hours, earnings, and in many instances unemployment and labor turnover data for States and areas.

Available free—see addresses on inside back cover.

EMPLOYMENT AND EARNINGS AND MONTHLY REPORT ON THE LABOR FORCE, a monthly report by the Bureau of Labor Statistics, features national, State, and area statistics on employment, unemployment, hours, earnings, and labor turnover rates, plus timely analyses of current developments.

Annual subscription: $7.00 ($1.25 additional for foreign mailing).
Price per copy: .65.

EMPLOYMENT AND EARNINGS STATISTICS FOR THE UNITED STATES, 1909-68 (BLS Bulletin 1312-6), covers historical national statistics for individual nonagricultural industries, including monthly and annual data from the beginning date of each series through February 1968. (Release date and price to be announced.)

HOW TO ORDER:
The monthly report *Employment and Earnings and Monthly Report on the Labor Force* and *Employment and Earnings Statistics for the United States, 1909-68 (BLS Bulletin* 1312-6), may be ordered through the Superintendent of Documents, U.S. Government Printing Office, Washington, D. C. 20402, or any of the BLS Regional Offices listed on the inside back cover.

INTRODUCTION

This bulletin is the sixth comprehensive historical reference volume of State and area employment and earnings statistics released by the Bureau of Labor Statistics, and replaces Employment and Earnings Statistics for States and Areas, 1939-66 (BLS Bulletin 1370-4).

Consistent with previous editions, this volume is directed toward grouping together information available under the Current Employment Statistics Program for a single State or area. A special section, containing analytical and summary data, precedes the main body of statistics.

Employment data relate to the nonfarm sector of the economy, and exclude proprietors, the self-employed, domestic workers in private homes, and unpaid family workers. Hours and earnings for manufacturing and mining relate to production workers, for contract construction to construction workers, and for the remaining nonagricultural components to nonsupervisory workers.

Area Coverage

This edition presents detailed industry data on 204 major labor areas--most are Standard Metropolitan Statistical Areas. The following four areas are included for the first time: Macon, Georgia; Lincoln, Nebraska; Salem, Oregon; and Greensboro—Winston-Salem—High Point, North Carolina. Data are no longer shown separately on the Greensboro-High Point area (Guilford County) and the Winston-Salem area (Forsyth County). The newly defined area includes Guilford, Forsyth, Randolph, and Yadkin Counties. Definitions of all the areas shown in this bulletin may be found at the back of the book.

Sources of Data

The Current Employment Statistics Program is a Federal-State undertaking conducted jointly by State employment security agencies, the Bureau of Labor Statistics, and the Bureau of Employment Security in 44 States and the District of Columbia; in the remaining States, the program is a cooperative endeavor by State Departments of Labor and the Bureau of Labor Statistics.

Data are based on information from payroll records submitted voluntarily to State agencies by a representative sample of industrial, commercial, and government establishments, employing collectively about 25 million workers. The Technical Note following the statistical tables describes the major characteristics of the program, such as scope, concepts, survey methods, estimating techniques, benchmark adjustments, and limitations.

Industrial Classification

The industrial classification system used for these data is described in the 1957 Standard Industrial Classification Manual as amended by the 1963 Supplement. Data cover the available industrial detail, except for "residual" groups (e.g., "other durable goods"). Industry titles conform to the Bureau of the Budget's standard list of short titles and may differ somewhat from those published in last year's edition (BLS Bulletin 1370-4). All titles are further identified by the appropriate SIC code (s). The specific industries selected for publication by the State agencies are generally those which best reflect the currently significant economic activities in the State or area. New series or industry combinations are introduced as shifts occur in the economy.

Publication of Current Data

Current State and area statistics are published monthly by State agencies and may be secured upon request to the appropriate agency listed on the inside back cover of this bulletin. Timely statistics are also published by the Bureau of Labor Statistics in Employment and Earnings and Monthly Report on the Labor Force, which provides employment data for the major nonfarm industry divisions, and hours and earnings in manufacturing, for all States and areas shown in this bulletin.

Related National Employment Statistics

A companion volume, Employment and Earnings Statistics for the United States, 1909-68 (BLS Bulletin 1312-6), containing national data, will be released late this summer. All data in Bulletin 1312-6 will be adjusted to March 1967 benchmarks.

* * * * * *

This bulletin was prepared in the Division of Industry Employment Statistics, Robert O. Dorman, Chief. Data systems were developed under the direction of William Mead, Office of Data Collection and Survey Operations.

CAUTION

Each year the industry employment series for States and areas are adjusted to more recent benchmarks. These adjustments may also affect the hours and earnings series since employment levels are used as weights. Although each of the cooperating State agencies adjusts series to benchmark data for the first quarter of the preceding year, the length of time required to accomplish this task varies among the agencies. Except as noted, all series in this volume have been adjusted to March 1967 benchmarks. Monthly data subsequent to the benchmark period, as well as the resultant annual averages, are subject to future revision.

Footnotes

a/ Data beginning with year noted are not comparable with prior years.

b/ Due to change in area definition, data are not necessarily continuous. See below for effective year of current definition as it applies to employment, and to hours and earnings. Area definitions are shown in back of book.

Area	Employment	Hours and Earnings
Akron, Ohio	1964	1964
Atlanta, Georgia	1956	—
Birmingham, Alabama	1967	See individual series
Bridgeport, Connecticut	1959	1959
Charleston, South Carolina	1963	1964
Charlotte, North Carolina	1964	1964
Cincinnati, Ohio	1964	1964
Cleveland, Ohio	1964	1964
Columbus, Ohio	1964	1964
Dayton, Ohio	1964	1964
Duluth-Superior, Minnesota	1960	1961
Fargo-Moorhead, North Dakota	1961	1961
Flint, Michigan	—	1965
Fort Smith, Arkansas	1963	1964
Grand Rapids, Michigan	—	1965
Greenville, South Carolina	1963	—
Hartford, Connecticut	1959	1959
Jackson, Mississippi	1960	—
Kansas City, Missouri	1962	—
La Crosse, Wisconsin	—	1966
Little Rock-North Little Rock, Arkansas	1967	See individual series
Memphis, Tennessee	1963	1963
Milwaukee, Wisconsin	1963, 1967	1963, 1967
Minneapolis-St. Paul, Minnesota	1958	—
Mobile, Alabama	1957	See individual series
Nashville, Tennessee	1963	See individual series
New Orleans, Louisiana	1964	1964
Oklahoma City, Oklahoma	1958	—
Portland, Maine	1958	—
Richmond, Virginia	1963	—
Sacramento, California	—	1958
St. Louis, Missouri	1963	—
San Antonio, Texas	1964	—
Seattle-Everett, Washington	1959	1959
Stamford, Connecticut	1959	—
Toledo, Ohio	1964	1964
Tulsa, Oklahoma	1958	—
Washington SMSA, District of Columbia	1966	1967
Wichita, Kansas	1963	1963

c/ Effective 1964, data exclude earnings of nonoffice salesmen and are not necessarily comparable with series for prior years.

d/ Effective 1964, data relate to nonsupervisory workers. Data for prior years relate to production workers.

e/ Federal employment in the Maryland and Virginia sectors of the Washington Standard Metropolitan Statistical Area is included in data for the District of Columbia.

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

f/ Initial inclusion in this publication. (See INTRODUCTION in front of book.)

g/ Area included in Chicago-Northwestern Indiana Standard Consolidated Area.

h/ Series adjusted to 1966 benchmark levels.

i/ Series adjusted to 1965 benchmark levels.

j/ Series not necessarily comparable prior to 1958 due to adoption of the 1957 Standard Industrial Classification system and/or introduction of improved benchmark data. The following estimates for 1958 are comparable with data for prior years:

MICHIGAN–Employment (in thousands):
Total, 2,119.7; mining, 14.1; contract construction, 89.6; manufacturing, 838.3; transportation and public utilities, 138.8; wholesale and retail trade, 438.5; finance, insurance and real estate, 76.5; services, 243.7; and government, 280.1.

VERMONT–Hours and Earnings:
Manufacturing, weekly earnings, $68.17; weekly hours, 40.1; hourly earnings, $1.70.

k/ Area included in New York-Northeastern New Jersey Standard Consolidated Area.

l/ Subarea of Rochester Standard Metropolitan Statistical Area.

m/ Subarea of New York Standard Metropolitan Statistical Area.

n/ This continuous series includes ordnance prior to 1967.

NOTE: Miscellaneous manufacturing (SIC 39) is included as a part of nondurable goods in State and area data for the following: Maine, Massachusetts, Rhode Island, Vermont, and New York, except the New York-Northeastern New Jersey Standard Consolidated Area. All other States and areas include this industry as a part of durable goods.

Area Definitions

ALABAMA
- Birmingham — Jefferson, Shelby, and Walker Counties (formerly limited to Jefferson County)
- Huntsville — Limestone and Madison Counties
- Mobile — Baldwin and Mobile Counties (formerly excluded Baldwin County)
- Montgomery — Elmore and Montgomery Counties
- Tuscaloosa — Tuscaloosa County

ARIZONA
- Phoenix — Maricopa County
- Tucson — Pima County

ARKANSAS
- Fayetteville — Washington County
- Fort Smith — Crawford and Sebastian Counties, Ark.; LeFlore and Sequoyah Counties, Okla. (formerly limited to Sebastian County, Ark.)
- Little Rock-N. Little Rock — Pulaski and Saline Counties (formerly excluded Saline County)
- Pine Bluff — Jefferson County

CALIFORNIA
- Anaheim-Santa Ana-Garden Grove — Orange County (formerly a part of Los Angeles-Long Beach area)
- Bakersfield — Kern County
- Fresno — Fresno County
- Los Angeles-Long Beach — Los Angeles County (formerly included Orange County)
- Oxnard-Ventura — Ventura County
- Sacramento — Placer, Sacramento, and Yolo Counties (formerly limited to Sacramento County)
- San Bernardino-Riverside-Ontario — San Bernardino and Riverside Counties
- San Diego — San Diego County
- San Francisco-Oakland — Alameda, Contra Costa, Marin, San Francisco, and San Mateo Counties (formerly included Solano County)
- San Jose — Santa Clara County
- Santa Barbara — Santa Barbara County
- Santa Rosa — Sonoma County
- Stockton — San Joaquin County
- Vallejo-Napa — Napa and Solano Counties (the latter formerly a part of San Francisco-Oakland area)

COLORADO
- Denver — Adams, Arapahoe, Boulder, Denver, and Jefferson Counties

CONNECTICUT
- Bridgeport — Bridgeport and Shelton cities, and Easton, Fairfield, Monroe, Stratford, and Trumbull towns in Fairfield County; Milford town in New Haven County (formerly excluded Shelton city in Fairfield County)
- Hartford — Hartford city, and Avon, Bloomfield, Canton, East Granby, East Hartford, East Windsor, Enfield, Farmington, Glastonbury, Granby, Manchester, Newington, Rocky Hill, Simsbury, South Windsor, Suffield, West Hartford, Wethersfield, Windsor, and Windsor Locks towns in Hartford County; Bolton, Ellington, Somers, Stafford, Tolland, and Vernon towns in Tolland County (formerly excluded East Windsor, Enfield, Suffield, and Windsor Locks towns in Hartford County; Ellington, Somers, Stafford, Tolland, and Vernon towns in Tolland County)
- New Britain — New Britain city, and Berlin and Plainville towns in Hartford County
- New Haven — New Haven city, and Bethany, Branford, East Haven, Guilford, Hamden, Madison, North Branford, North Haven, Orange, West Haven, and Woodbridge towns in New Haven County

CONNECTICUT--Continued
- Stamford — Stamford city, and Darien, Greenwich, and New Canaan towns in Fairfield County (formerly excluded New Canaan town in Fairfield County)
- Waterbury — Waterbury city, Naugatuck borough, and Beacon Falls, Cheshire, Middlebury, Prospect, Southbury, and Wolcott towns in New Haven County; Bethlehem, Thomaston, Watertown, and Woodbury towns in Litchfield County

DELAWARE
- Wilmington — New Castle County, Del.; Cecil County, Md.; Salem County, N.J.

DISTRICT OF COLUMBIA
- Washington SMSA — District of Columbia; Alexandria, Fairfax, and Falls Church cities, and Arlington, Fairfax, Loudoun, and Prince William Counties, Va.; Montgomery and Prince Georges Counties, Md. (formerly excluded Loudoun and Prince William Counties, Va.)

FLORIDA
- Fort Lauderdale-Hollywood — Broward County
- Jacksonville — Duval County
- Miami — Dade County
- Orlando — Orange and Seminole Counties
- Pensacola — Escambia and Santa Rosa Counties
- Tampa-St. Petersburg — Hillsborough and Pinellas Counties
- West Palm Beach — Palm Beach County

GEORGIA
- Atlanta — Clayton, Cobb, DeKalb, Fulton, and Gwinnett Counties (formerly excluded Gwinnett County)
- Augusta — Richmond County, Ga.; Aiken County, S. C.
- Columbus — Chattahoochee and Muscogee Counties, Ga.; Russell County, Ala.
- Macon — Bibb and Houston Counties
- Savannah — Chatham County

HAWAII
- Honolulu — Honolulu County

IDAHO
- Boise — Ada County

ILLINOIS
- Chicago — Cook, Du Page, Kane, Lake, McHenry, and Will Counties
- Chicago-Northwestern Indiana — A Standard Consolidated Area comprised of Chicago, Ill. SMSA and Gary-Hammond-East Chicago, Ind. SMSA
- Davenport-Rock Island-Moline — Henry and Rock Island Counties, Ill.; Scott County, Iowa
- Peoria — Peoria, Tazewell, and Woodford Counties
- Rockford — Boone and Winnebago Counties

INDIANA
- Evansville — Vanderburgh and Warrick Counties Ind.; Henderson County, Ky.
- Fort Wayne — Allen County
- Gary-Hammond-East Chicago — Lake and Porter Counties
- Indianapolis — Boone, Hamilton, Hancock, Hendricks, Johnson, Marion, Morgan, and Shelby Counties (hours and earnings do not include Boone County)
- Muncie — Delaware County
- South Bend — Marshall and St. Joseph Counties
- Terre Haute — Clay, Sullivan, Vermillion, and Vigo Counties

IOWA
- Cedar Rapids — Linn County
- Des Moines — Polk County
- Sioux City — Woodbury County, Iowa; Dakota County, Neb.
- Waterloo — Black Hawk County

KANSAS
- Topeka — Shawnee County
- Wichita — Butler and Sedgwick Counties (formerly excluded Butler County)

KENTUCKY
- Lexington: Fayette County
- Louisville: Jefferson County, Ky.; Clark and Floyd Counties, Ind.

LOUISIANA
- Baton Rouge: East Baton Rouge Parish
- Lake Charles: Calcasieu Parish
- Monroe: Ouachita Parish
- New Orleans: Jefferson, Orleans, St. Bernard, and St. Tammany Parishes (formerly excluded St. Tammany Parish)
- Shreveport: Bossier and Caddo Parishes

MAINE
- Lewiston-Auburn: Auburn and Lewiston cities, and Lisbon town in Androscoggin County
- Portland: Portland, South Portland, and Westbrook cities, and Cape Elizabeth, Cumberland, Falmouth, Gorham, Scarborough, and Yarmouth towns in Cumberland County (formerly excluded Cumberland, Gorham, Scarborough, and Yarmouth towns)

MARYLAND
- Baltimore: Baltimore city, and Anne Arundel, Baltimore, Carroll, Harford, and Howard Counties

MASSACHUSETTS
- Boston: Suffolk County; Cambridge, Everett, Malden, Medford, Melrose, Newton, Somerville, Waltham, and Woburn cities, and Arlington, Ashland, Bedford, Belmont, Burlington, Concord, Framingham, Lexington, Lincoln, Natick, North Reading, Reading, Sherborn, Stoneham, Sudbury, Wakefield, Watertown, Wayland, Weston, Wilmington, and Winchester towns in Middlesex County; Beverly, Lynn, Peabody, and Salem cities, and Danvers, Hamilton, Lynnfield, Manchester, Marblehead, Middleton, Nahant, Saugus, Swampscott, Topsfield, and Wenham towns in Essex County; Quincy city, and Braintree, Brookline, Canton, Cohasset, Dedham, Dover, Holbrook, Medfield, Millis, Milton, Needham, Norfolk, Norwood, Randolph, Sharon, Walpole, Wellesley, Westwood, and Weymouth towns in Norfolk County; Duxbury, Hanover, Hingham, Hull, Marshfield, Norwell, Pembroke, Rockland, and Scituate towns in Plymouth County
- Brockton: Easton town in Bristol County; Avon and Stoughton towns in Norfolk County; Brockton city, and Abington, Bridgewater, East Bridgewater, Hanson, West Bridgewater, and Whitman towns in Plymouth County
- Fall River: Fall River city, and Somerset, Swansea, and Westport towns in Bristol County, Mass.; Tiverton town in Newport County, R.I.
- Lawrence-Haverhill: Lawrence and Haverhill cities, and Andover, Georgetown, Groveland, Merrimac, Methuen, North Andover, and West Newbury towns in Essex County, Mass.; Newton, Plaistow, and Salem towns in Rockingham County, N.H.
- Lowell: Lowell city, and Billerica, Chelmsford, Dracut, Tewksbury, Tyngsborough, and Westford towns in Middlesex County
- New Bedford: New Bedford city, and Acushnet, Dartmouth, and Fairhaven towns in Bristol County; Marion and Mattapoisett towns in Plymouth County
- Springfield-Chicopee-Holyoke: Chicopee, Holyoke, Springfield, and Westfield cities, and Agawam, East Longmeadow, Hampden, Longmeadow, Ludlow, Monson, Palmer, Southwick, West Springfield, and Wilbraham towns in Hampden County; Northampton city, and Easthampton, Granby, Hadley, and South Hadley towns in Hampshire County; Warren town in Worcester County
- Worcester: Worcester city, and Auburn, Berlin, Boylston, Brookfield, East Brookfield, Grafton, Holden, Leicester, Millbury, Northborough, Northbridge, North Brookfield, Oxford, Paxton, Shrewsbury, Spencer, Sterling, Sutton, Upton, Westborough, and West Boylston towns in Worcester County

MICHIGAN
- Ann Arbor: Washtenaw County
- Battle Creek: Calhoun County
- Bay City: Bay County
- Detroit: Macomb, Oakland, and Wayne Counties
- Flint: Genesee and Lapeer Counties (formerly excluded Lapeer County)
- Grand Rapids: Kent and Ottawa Counties (formerly excluded Ottawa County)
- Jackson: Jackson County
- Kalamazoo: Kalamazoo County
- Lansing: Clinton, Eaton, and Ingham Counties
- Muskegon-Muskegon Heights: Muskegon County
- Saginaw: Saginaw County

MINNESOTA
- Duluth-Superior: Duluth city, Minn.; Douglas County, Wis. (formerly excluded Douglas County, Wis.)
- Minneapolis-St. Paul: Anoka, Dakota, Hennepin, Ramsey, and Washington Counties (formerly excluded Washington County)

MISSISSIPPI
- Jackson: Hinds and Rankin Counties (formerly limited to Hinds County and Beats 1 and 2 of Rankin County)

MISSOURI
- Kansas City: Johnson and Wyandotte Counties Kans.; Cass, Clay, Jackson, and Platte Counties, Mo. (formerly excluded Cass and Platte Counties, Mo.)
- St. Joseph: Buchanan County
- St. Louis: St. Louis city, and Franklin, Jefferson, St. Charles, and St. Louis Counties, Mo.; Madison and St. Clair Counties, Ill.; (formerly excluded Franklin County, Mo.)
- Springfield: Greene County

MONTANA
- Billings: Yellowstone County
- Great Falls: Cascade County

NEBRASKA
- Lincoln: Lancaster County
- Omaha: Douglas and Sarpy Counties, Nebr.; Pottawattamie County, Iowa

NEVADA
- Las Vegas: Clark County; Beatty Township in Nye County
- Reno: Washoe County

NEW HAMPSHIRE
- Manchester: Manchester city, and Bedford and Goffstown towns in Hillsborough County; Hooksett town in Merrimack County (formerly excluded Bedford town in Hillsborough County and Hooksett town in Merrimack County)

NEW JERSEY
- Atlantic City: Atlantic County
- Jersey City: Hudson County
- Newark: Essex, Morris, and Union Counties
- Paterson-Clifton-Passaic: Bergen and Passaic Counties
- Perth Amboy: Middlesex and Somerset Counties
- Trenton: Mercer County

NEW MEXICO
- Albuquerque: Bernalillo County

Technical Note

Measuring Employment, Hours, and Earnings in States and Areas

INTRODUCTION

The Current Employment Statistics Program is an integrated Federal-State undertaking, designed to produce estimates of nonfarm employment, hours, and earnings at the national, State, and area levels. It is conducted jointly by State employment security agencies, the Bureau of Labor Statistics, and the Bureau of Employment Security in 44 States and the District of Columbia; in the remaining States, the program is a cooperative endeavor by State Departments of Labor and the BLS. The Bureau of Labor Statistics has contracted with these State agencies for collecting the data from establishments. Estimates are prepared and published monthly for each State and for major areas.

COLLECTION

Federal-State Cooperation. Under cooperative arrangements with State agencies, the respondent fills out only one reporting form, which is used for national, State, and area estimates. This eliminates duplicate reporting on the part of respondents, and together with the use of identical techniques at the national and State levels, insures maximum geographic comparability of estimate.

State agencies mail the forms to the establishments and examine the returns for consistency, accuracy, and completeness. After the States use the information to prepare State and area series, the source materials are sent to the BLS for use in developing estimates at the national level.

Shuttle Schedules. Form BLS 790--Monthly Report on Employment, Payroll, and Hours --is used to collect employment, payroll, and man-hours data. This schedule is of the "shuttle" type, with space for each month of the calendar year. The schedule is returned to the respondent each month by the State agency so that the next month's data can be entered. This procedure promotes maximum comparability and accuracy of reporting, since the respondent can see the figures he has reported for previous months.

The BLS 790 provides for entry of data on the number of full- and part-time workers on the payrolls of nonagricultural establishments, and, for most industries, payroll and man-hours of production and related workers, construction workers, or nonsupervisory workers for the pay period which includes the 12th of the month.

CONCEPTS

Industrial Classification. Establishments are classified into industries on the basis of their principal product or activity, in accordance with the 1957 Standard Industrial Classification Manual as amended by the 1963 Supplement. The classification is determined from information on annual sales volume collected each year on a supplement to the monthly report. If an establishment makes more than one product or engages in more than one activity, the entire employment of the establishment is included under the industry indicated by the most important product or activity.

Industry Employment. Employment data, except for the Department of Defense, refer to persons on establishment payrolls who received pay for any part of the pay period which includes the 12th of the month. For civilian employees of the Department of Defense establishments, the figures represent the number of persons who occupied positions on the last day of the calendar month; intermittent workers are counted if they performed any service during the month.

The data exclude proprietors, the self-employed, unpaid family workers, farm workers, and domestic workers in households. Salaried officers of corporations are included. Government employment covers only civilian employees; Federal military personnel are excluded from the estimates of total nonagricultural employment.

Persons on an establishment payroll who are on paid sick leave (when pay is received

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

directly from the firm), on paid holiday or paid vacation, or who work during any part of the pay period and are unemployed or on strike during the rest of the period, are counted as employed. Not counted as employed are persons who are laid off, on leave without pay or on strike for the entire period, or who are hired but do not report to work during the period.

Industry Hours and Earnings. Hours and earnings data are derived from reports of payroll and man-hours for production and related workers in mining and manufacturing, construction workers in contract construction, and nonsupervisory employees in all other industries. When the reported pay period exceeds one week, the payroll and man-hour figures are reduced to a weekly basis. The above items are further defined as follows:

Production and related workers include working foremen and all nonsupervisory workers (including leadmen and trainees) engaged in fabricating, processing, assembling, inspection, receiving, storage, handling, packing, warehousing, shipping, maintenance, repair, janitorial and watchman services, product development, auxiliary production for plant's own use(e.g., power plant), and recordkeeping and other services closely associated with the above production operations.

Construction workers include the following employees in the contract construction division: Working foremen, journeymen, mechanics, apprentices, laborers, etc., whether working at the site of construction or in shops or yards at jobs (such as precutting and preassembling) ordinarily performed by members of the construction trades.

Nonsupervisory employees include employees (not above the working supervisory level) such as office and clerical workers, repairmen, salespersons, operators, drivers, attendants, service employees, linemen, laborers, janitors, watchmen, and similar occupational levels, and other employees whose services are closely associated with those of the employees listed.

Payroll covers the payroll for full- and part-time production, construction, or nonsupervisory workers who received pay for any part of the pay period which includes the 12th of the month. The payroll is reported before deductions of any kind, e.g., for old-age and unemployment insurance, group insurance, withholding tax, bonds, or union dues; also included is pay for overtime, holidays, vacations, and sick leave paid directly by the firms. Bonuses (unless earned and paid regularly each pay period), other pay not earned in pay period reported (e.g., retroactive pay), and the value of free rent, fuel, meals, or other payment in kind are excluded.

Man-hours cover man-hours worked or paid for, during the pay period which includes the 12th of the month, for production, construction, or nonsupervisory workers. The man-hours include hours paid for holidays and vacations, and for sick leave when pay is received directly from the firm.

Gross Average Hourly and Weekly Earnings. Average hourly earnings for manufacturing and nonmanufacturing industries are on a "gross" basis, reflecting not only changes in basic hourly and incentive wage rates, but also such variable factors as premium pay for overtime and late-shift work, and changes in output of workers paid on an incentive plan. Shifts in total volume of employment between relatively high-paid and low-paid work and changes in workers' earnings in individual establishments also affect the general earnings averages. Averages for groups and divisions further reflect changes in average hourly earnings for individual industries.

Averages of hourly earnings differ from wage rates. Earnings are the actual return to the worker, while rates are the amounts stipulated for a given unit of work or time. The earnings series do not measure the level of total labor costs to the employer since the following are excluded: Irregular bonuses, retroactive items, payments of various welfare benefits, payroll taxes paid by employers, and earnings by employees not covered under the production-worker, or construction-worker, or nonsupervisory-employee definitions.

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

Gross average weekly earnings in most cases are derived by multiplying average weekly hours by average hourly earnings. Therefore, weekly earnings are affected not only by changes in gross average hourly earnings, but also by changes in the length of the workweek, part-time work, stoppages for varying causes, labor turnover, and absenteeism.

Average Weekly Hours. The workweek information relates to the average hours for which pay was received, and differs from standard or scheduled hours. Such factors as absenteeism, labor turnover, part-time work, and stoppages cause average weekly hours to be lower than scheduled hours of work for an establishment. Group averages further reflect differences in the workweek of component industries.

ESTIMATING METHODS

EMPLOYMENT. The principal features of the procedure used to estimate employment for the industry statistics are (1) the use of the "link relative" technique, which is a form of ratio estimation, and (2) periodic adjustment of employment levels to new benchmarks.

The "Link Relative" Technique. From a sample of establishments, which reported for both the previous and current months, the ratio of current month employment to that of the previous month is computed. The estimates of employment (all employees, including both production and nonproduction workers) for the current month are obtained by multiplying the estimates for the previous month by these "link relatives."

At the aggregate industry level, i.e., divisions and groups, employment is the sum of the employment estimates for component industries. Annual average employment is the sum of the monthly estimates divided by 12.

Benchmark Adjustment. Each year employment estimates are compared with comprehensive counts of employment, which provide "benchmarks" for the various industries defined as nonagricultural, and appropriate adjustments are made as indicated. Normally, benchmark adjustments are made annually.

The primary source of benchmark information is the employment data, by industry, compiled quarterly by State agencies from reports of establishments covered under State unemployment insurance laws. These reports, covering about three-fourths of the total nonfarm employment in the United States, are collected and tabulated by State employment security agencies under the direction of the Bureau of Employment Security. Benchmark data for the residual are obtained from the records of the Social Security Administration, the Interstate Commerce Commission, and a number of other agencies in private industry or government.

The estimates relating to the benchmark month are compared with the new benchmark levels, industry by industry. If revisions are necessary, the monthly series of estimates are adjusted between the new benchmark and the preceding one and the new benchmark for each industry is then carried forward progressively to the current month on the basis of trends shown in the sample. Under this procedure, the benchmark is used to establish the level of employment, while the sample is used to measure the month-to-month changes in the level.

Data for the periods subsequent to the last benchmark are subject to revision.

HOURS AND EARNINGS. These estimates are based on the sample that reported on employment. Estimates of average weekly hours and average hourly and weekly earnings apply only to production, construction, or nonsupervisory workers as distinguished from all employees.

For individual industries, monthly estimates of average weekly hours are obtained by dividing man-hours by production workers (or construction, or nonsupervisory workers). Average hourly earnings are computed by dividing payrolls by man-hours. Industry group and division averages are obtained by weighting the averages for

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

individual industries by production-worker employment or production-worker man-hour aggregates in the particular groups or divisions.

To obtain annual averages of average weekly hours, the 12-month total of aggregate man-hours (average weekly hours multiplied by production-worker employment) is divided by the 12-month total of employment. The 12-month total of aggregate payrolls (weekly earnings multiplied by employment weights or hourly earnings multiplied by aggregate man-hours) is divided by the 12-month total of aggregate man-hours to yield average hourly earnings.

Average weekly earnings, except for industries where man-hours data are not collected, are the product of average weekly hours and average hourly earnings.

THE SAMPLE

Design. The sampling plan used in the survey is particularly well suited for a sample of establishments. It is an optimum allocation design known as "sampling proportionate to average size of establishment." The universe of establishments is stratified first by industry and then within each industry by size of establishment in terms of employment. For each industry the total size of sample is distributed among the size class cells on the basis of the ratio of employment in each cell to total employment in the industry. Within each stratum, the sample members are selected at random.

Under this design, large establishments fall into the sample with certainty. However, the proportion of total employment covered varies considerably from industry to industry. For example, sample coverage is high (65 percent on the average) in manufacturing industries in which a high proportion of total employment is concentrated in relatively few establishments. On the other hand, coverage is much lower (20 percent) in wholesale and retail trade industries which are made up of many small establishments. The large sample in manufacturing is also desirable because manufacturing industries have a greater tendency to fluctuate from regular cyclical or seasonal patterns than nonmanufacturing industries.

Reliability of the Employment Estimates. The estimates derived from the employment and payroll survey may differ from the figures that would have been obtained if it were possible to take a complete census using the same schedules and procedures. However, the relatively large size of the samples maintained by the State agencies and the annual adjustment of employment estimates to more recent benchmark levels assure a very high degree of accuracy. One measure of the reliability of an estimate projected from a benchmark is the amount by which it differs from the new benchmark at the next adjustment period. The BLS uses this criterion rather than the standard error of the estimates. Average benchmark revisions to State and area estimates for recent years are presented in Table 1. As indicated by Table 2, differences between estimates and benchmarks are concentrated in the ranges of less than 1.0 percent.

Differences between the benchmarks and the estimates, result from not only sampling and response errors but also from changes in the industrial classification of individual establishments (resulting from changes in their product), which are not reflected in the estimate levels until the data are adjusted to new benchmarks. At the more detailed industry levels, particularly within manufacturing, changes in classification are often the major causes of benchmark adjustments. Another cause of differences, generally minor, between the estimates and the benchmark arises from improvements in the quality of the benchmark data.

For employment, the sum of the State figures may differ slightly from the equivalent official U.S. totals on a national basis, because some States have more recent benchmarks than others and because of the effects of differing industrial and geographic stratification.

COMPARABILITY WITH OTHER SERIES

County Business Patterns. Data in this joint publication by the U.S. Departments of Commerce and Health, Education, and Welfare, differ from BLS establishment statistics in

http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

the treatment of central administrative offices and auxiliary units, in industrial classification, and reporting differences. In addition, CBP coverage is incomplete for some nonprofit activities, and interstate railroads and government are excluded.

Employment Covered by State Unemployment Insurance Programs. Not all nonfarm wage and salary workers are covered by the unemployment insurance programs. All workers in certain activities, such as interstate railroads, are excluded. Also small firms in covered industries are excluded in many States. In general, these are establishments with fewer than four employees.

Statistics on Manufactures and Business, Bureau of the Census. BLS establishment statistics on employment differ from employment counts derived by the Bureau of the Census from its censuses or annual sample surveys of manufacturing establishments and the censuses of business establishments. The major reasons for some noncomparability are different treatment of business units considered parts of an establishment, such as central administrative offices and auxiliary units, the industrial classification of establishments, and different reporting patterns of multiunit companies. There are also differences in the scope of the industries covered, e.g., the Census of Business excludes contract construction, professional services, public utilities, and financial establishments, whereas these are included in BLS statistics.

Statistics on State and Local Government, Bureau of the Census. BLS statistics on State and local government employment differ slightly from the employment counts of the Bureau of the Census in its censuses and annual sample surveys. BLS excludes and Census includes certain nominal employment (such as paid elected officials of small cities) and Federal-State cooperative extension personnel serving under a Federal appointment. BLS classifies employees of local government libraries in education whereas Census includes them under other local functions. BLS counts employees in the State of the physical location of the job, but Census includes them in the State where the official personnel records are kept.

Federal Employment Statistical Bulletin, U.S. Civil Service Commission. The BLS Federal employment series by State are derived from statistics based on coverage under Unemployment Compensation for Federal Employees. The Civil Service Commission Bulletin data, published for one month of each quarter, are based on reports collected by CSC. The BLS data include and CSC data exclude Defense Department workers paid from nonappropriated funds, employees of certain local agricultural committees of the Department of Agriculture, certain civilian employees of National and Air Guards, and Federal-State cooperative employees serving under a Federal appointment. The BLS data exclude and CSC date include a count of employees paid on a contract or fee basis, and certain interns, student nurses, and other student employees of Federal hospitals. BLS employment (except for Defense Department units) is for the pay period including the 12th of the month whereas the CSC count represents the number of persons employed on the last work day of the month plus all intermittent employees during the month.
