BUREAU OF LABOR STATISTICS
Janet L. Norwood, Commissioner

OFFICE OF PRICES AND LIVING CONDITIONS
W. John Layng, Assistant Commissioner

The CPI Detailed Report is a monthly report on consumer price movements, including statistical tables and technical notes. The report covers two indexes, the Consumer Price Index for All Urban Consumers (CPI-U) and the Consumer Price Index for Wage Earners and Clerical Workers (CPI-W). The indexes reflect data for the U.S. city average and selected areas.

This publication may be ordered from the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402. Subscription price per year $15 domestic, and $18.75 foreign. Single copy $2.25. Send correspondence on circulation and subscription matters (including address changes) to the Superintendent of Documents.

Material in this publication is in the public domain and may be reproduced without permission of the Federal Government. Please credit the Bureau of Labor Statistics. Controlled circulation postage paid at Riverdale, Md.

Price Movements

The Consumer Price Index for All Urban Consumers (CPI-U) rose 1.1 percent before seasonal adjustment in April to 242.5 (1967=100). The Consumer Price Index for Urban Wage Earners and Clerical Workers (CPI-W) also increased 1.1 percent before seasonal adjustment in April to 242.6 (1967=100). The CPI-U was 14.7 percent higher and the CPI-W was 14.5 percent higher than in April 1979.

CPI for All Urban Consumers (CPI-U)—seasonally adjusted changes

On a seasonally adjusted basis, the CPI for All Urban Consumers rose 0.9 percent in April. This compares with increases of 1.4 percent in each of the first three months of 1980 and an average monthly increase of slightly more than 1.0 percent during 1979. Much of the slowdown in April was due to smaller price increases for energy items, particularly gasoline. Smaller increases for food, clothing, and home financing costs also contributed to the slowdown.

The transportation index rose 0.6 percent in April, the smallest increase in almost two years. Gasoline prices were unchanged in April following a 3.9 percent rise in the previous month. Used car prices declined 1.8 percent. On the other hand new car prices rose 1.4 percent and automobile finance charges increased 8.2 percent in April. The index for public transportation increased 1.6 percent largely reflecting a 4.4 percent increase in taxi fares.

The sharp upward trend evident in the housing index since early 1979 continued in April, but the 1.3 percent increase was less than in March. In April, home financing costs rose 3.6 percent, following a 4.5 percent increase in March. Mortgage interest rates rose less than in March but house prices rose more. The index for household maintenance and repairs increased 1.4 percent and the index for household furnishings and operations rose 0.7 percent in April. (The 12-month percent changes for five experimental measures of housing costs can be found in tables C and D.) In April, prices for household fuels rose 1.2 percent. Fuel oil prices rose 0.5 percent, the smallest increase since the summer of 1978, and the index for gas and electricity rose 1.4 percent.

The index for food and beverages rose 0.5 percent in April. Prices for grocery store food increased 0.4 percent following a rise of 1.1 percent in March. A 1.3 percent decline in the index for meats, poultry, fish, and eggs, following a 1.0 percent increase in March, was largely responsible for the deceleration. The indexes for fruits and vegetables, cereal and bakery products, and dairy products registered larger increases in April than in March. Prices of the other two components of the food and beverage index—restaurant meals and alcoholic beverages—rose 0.7 and 1.1 percent, respectively in April.

The index for apparel and upkeep rose 0.3 percent in April, following an increase of 2.0 percent in March. Prices

Food and beverages	.8	.6	1.4	.2	0	0.9	.7	6.3	7.3
Housing	1.4	1.2	1.3	1.5	1.4	1.6	1.4	18.8	17.3
Apparel and upkeep	.5	.1	.5	.8	.9	1.7	.3	12.4	6.5
Transportation	.7	1.3	1.5	3.1	2.8	1.7	.6	22.7	21.6
Medical care	1.0	.8	1.1	1.3	1.5	.9	.8	13.2	11.9
Entertainment	.7	.5	–.1	.8	1.2	1.6	.8	15.0	8.5
Other goods and services	.2	.3	.6	1.4	.9	.4	.5	7.6	8.3

for most clothing items declined or registered substantially smaller increases in April than in March. The index for apparel services, however, rose 1.8 percent in April compared with 1.3 percent in March.

The index for medical care rose 0.7 percent in April compared with 0.9 percent in March. Charges for professional services rose 1.2 percent as fees for physicians' services rose 1.0 percent and dental services advanced 1.3 percent. Charges for hospital rooms rose 1.0 percent in April. The index for entertainment rose 0.8 percent in April, compared with an increase of 1.3 percent in March. The indexes for entertainment commodities—reading materials, sporting foods and equipment, and toys and hobbies—and for entertainment services both registered increases of 0.8 percent. The other goods and services component rose 0.6 percent in April, following an increase of 0.5 percent in March and increases of about 1.0 percent in both January and February.

CPI for Urban Wage Earners and Clerical Workers (CPI-W)—seasonally adjusted changes

On a seasonally adjusted basis, the CPI for Urban Wage Earners and Clerical Workers rose 1.0 percent in April. This compares with increases of 1.4 percent in each of the first three months of 1980 and an average monthly increase of slightly more than 1.0 percent during 1979. Much of the slowdown in April was due to smaller price increases for energy items. Smaller increases in food, clothing, and home financing costs also contributed to the slowdown.

The transportation index rose 0.6 percent in April, the smallest increase in almost two years. Gasoline prices declined 0.1 percent in April, following a 4.0 percent increase in the previous month. Used car priced declined 1.7 percent. On the other hand, new car prices rose 1.6 percent and automobile finance changes increased 9.3 percent in April. The index for public transportation increased 1.6 percent largely reflecting a 4.1 percent increase in taxi fares.

The sharp uptrend evident in the housing index since early 1979 continued in April, but the 1.4 percent increase was less than in March. In April, home financing costs rose 3.7 percent, following a 4.5 percent rise in March. Mortgage interest rates rose less than in March but house prices rose more. The index for household maintenance and repairs increased 1.2 percent, and the index for household furnishings and operations rose 0.7 percent in April. In April, prices for household fuels rose 1.1 percent. Fuel oil prices rose 0.5 percent, the smallest increase since the summer of 1978 and the index for gas and electricity rose 1.3 percent.

The index for food and beverages rose 0.7 percent in April. Prices for grocery store food increased 0.5 percent following a rise of 1.0 percent in March. A 1.2 percent decline in the index for meats, poultry, fish, and eggs, following a 0.5 percent increase in March, was largely responsible for the deceleration. The indexes for fruits and vegetables and cereal and bakery products registered larger increases in April than in March. Prices of the other two components of the food and beverage index—restaurant meals and alcoholic beverages—rose 0.8 and 1.1 percent, respectively in April.

The index for apparel and upkeep rose 0.3 percent in April, following an increase of 1.7 percent in March. Prices for most clothing items declined or registered substantially smaller increases in April than in March. The index for apparel services, however, rose 1.1 percent in April, following an increase of 1.7 percent in March.

The index for medical care rose 0.8 percent in April compared with 0.9 percent in March. Charges for professional services rose 1.4 percent as fees for physicians'

West/D	2	12/77	-	127.1	-	130.4	15.7	2.6	-	-	-	-

[1] Foods, fuels, and several other items priced every month in all areas; most other goods and services priced as indicated:

M - Every month.

1 - January, March, May, July, September, and November.

2 - February, April, June, August, October, and December.

[2] Area is generally the Standard Metropolitan Statistical Area (SMSA), exclusive of farms. L.A.-Long Beach, Anaheim, Calif. is a combination of two SMSA's, and N.Y., N.Y.-Northeastern N.J. and Chicago, Ill.-Northwestern Ind. are the more extensive Standard Consolidated Areas. Area definitions are those established by the Office of Management and Budget in 1973, except for Denver-Boulder, Colo. which does not include Douglas County. Definitions do not include revisions made since 1973.

[3] Regions are defined as the four Census regions.

The population size classes are aggregations of areas which have urban population as defined:

A-1 - More than 4,000,000.

A-2 - 1,250,000 to 4,000,000.

B - 385,000 to 1,250,000.

C - 75,000 to 385,000.

D - Less than 75,000.

Population size class A is the aggregation of population size classes A-1 and A-2.

NOTE: Price changes within areas are found in the Consumer Price Index; differences in living costs among areas are found in Family Budgets.

West/D	1.1	2.4	-.7	.6	5.6	.4

[1] Index is on an April 1967=100 base in Northeastern Pennsylvania and Portland, Oreg.-Wash.

[2] Area is generally the Standard Metropolitan Statistical Area (SMSA), exclusive of farms. L.A.-Long Beach, Anaheim, Calif. is a combination of two SMSA's, and N.Y., N.Y.-Northeastern N.J. and Chicago, Ill.-Northwestern Ind. are the more extensive Standard Consolidated Areas. Area definitions are those established by the Office of Management and Budget in 1973, except for Denver-Boulder, Colo. which does not include Douglas County. Definitions do not include revisions made since 1973.

[3] Regions are defined as the four Census regions.

The population size classes are aggregations of areas which have urban population as defined:

A-1 - More than 4,000,000.
A-2 - 1,250,000 to 4,000,000.
B - 385,000 to 1,250,000.
C - 75,000 to 385,000.
D - Less than 75,000.

Population size class A is the aggregation of population size classes A-1 and A-2.

Services less medical care	288.1	2.3	260.3	3.5	269.9	3.9	270.5	3.4	270.4	1.5

[1] Areas on pricing schedule 1 (See table 13) will appear next month.

[2] For the following areas the 1957-59=100 base is not available; indexes are on the bases listed:

Buffalo, N. Y.....November 1963=100.
Dallas-Fort Worth, Tex.....November 1963=100.
Honolulu, Hawaii.....December 1963=100.

[3] Indexes on a June 1978=100 base; formerly on the bases listed in footnote 4, except in Buffalo, N.Y. where 1967=100.

[4] Indexes are on the bases listed:

Atlanta, Ga.....December 1977=100.
Buffalo, N. Y.....February 1978=100.
Cleveland, Ohio.....February 1978=100.
Dallas-Fort Worth, Tex.....February 1978=100.
Honolulu, Hawaii.....December 1977=100.
Houston, Tex.....April 1978=100.
Kansas City, Mo.-Kans.....December 1977=100.
Minneapolis-St. Paul, Minn.-Wis..April 1978=100.
Pittsburgh, Pa.....April 1978=100.
San Francisco-Oakland, Calif.....December 1977=100.

[5] Indexes on a June 1978=100 base; formerly on the bases listed in Footnote 4.

[6] Indexes on a June 1978=100 base; formerly on the bases listed in footnote 4, except in Minneapolis-St. Paul, Minn.-Wis. where 1967=100.

[NA] Data not adequate for publication.

West/D	2	12/77	-	127.3	-	130.1	14.8	2.2	-	-	-	-

[1] Foods, fuels, and several other items priced every month in all areas; most other goods and services priced as indicated:

M - Every month.

1 - January, March, May, July, September, and November.

2 - February, April, June, August, October, and December.

[2] Area is generally the Standard Metropolitan Statistical Area (SMSA), exclusive of farms. L.A.-Long Beach, Anaheim, Calif. is a combination of two SMSA's, and N.Y., N.Y.-Northeastern N.J. and Chicago, Ill.-Northwestern Ind. are the more extensive Standard Consolidated Areas. Area definitions are those established by the Office of Management and Budget in 1973, except for Denver-Boulder, Colo. which does not include Douglas County. Definitions do not include revisions made since 1973.

[3] Regions are defined as the four Census regions.

The population size classes are aggregations of areas which have urban population as defined:

A-1 - More than 4,000,000.

A-2 - 1,250,000 to 4,000,000.

B - 385,000 to 1,250,000.

C - 75,000 to 385,000.

D - Less than 75,000.

Population size class A is the aggregation of population size classes A-1 and A-2.

NOTE: Price changes within areas are found in the Consumer Price Index; differences in living costs among areas are found in Family Budgets.

[1] Index is on an April 1967=100 base in Northeastern Pennsylvania and Portland, Oreg.-Wash.

[2] Area is generally the Standard Metropolitan Statistical Area (SMSA), exclusive of farms. L.A.-Long Beach, Anaheim, Calif. is a combination of two SMSA's, and N.Y., N.Y.-Northeastern N.J. and Chicago, Ill.-Northwestern Ind. are the more extensive Standard Consolidated Areas. Area definitions are those established by the Office of Management and Budget in 1973, except for Denver-Boulder, Colo. which does not include Douglas County. Definitions do not include revisions made since 1973.

[3] Regions are defined as the four Census regions.

The population size classes are aggregations of areas which have urban population as defined:

A-1 - More than 4,000,000.
A-2 - 1,250,000 to 4,000,000.
B - 385,000 to 1,250,000.
C - 75,000 to 385,000.
D - Less than 75,000.

Population size class A is the aggregation of population size classes A-1 and A-2.

[1] Regions are defined as the four Census regions.

The population size classes are aggregations of areas which have urban population as defined:

A-1 - More than 4,000,000.
A-2 - 1,250,000 to 4,000,000.
B - 385,000 to 1,250,000.
C - 75,000 to 385,000.
D - Less than 75,000.

Population size class A is the aggregation of population size classes A-1 and A-2.

[2] Indexes on a June 1978=100 base; formerly on a December 1977=100 base.

[1] The population size classes are aggregations of areas which have urban population as defined:

A-1 - More than 4,000,000.
A-2 - 1,250,000 to 4,000,000.
B - 385,000 to 1,250,000.
C - 75,000 to 385,000.
D - Less than 75,000.

Population size class A is the aggregation of population size classes A-1 and A-2.

[2] Indexes on a June 1978=100 base; formerly on a December 1977=100 base.

[1] Regions are defined as the four Census regions.

The population size classes are aggregations of areas which have urban population as defined:

A-1 - More than 4,000,000.
A-2 - 1,250,000 to 4,000,000.
B - 385,000 to 1,250,000.
C - 75,000 to 365,000.
D - Less than 75,000.

Population size class A is the aggregation of population size classes A-1 and A-2.

[2] Indexes on a June 1978=100 base; formerly on a December 1977=100 base.

[1] Regions are defined as the four Census regions.

The population size classes are aggregations of areas which have urban population as defined:

A-1 - More than 4,000,000.
A-2 - 1,250,000 to 4,000,000.
B - 385,000 to 1,250,000.
C - 75,000 to 385,000.
D - Less than 75,000.

Population size class A is the aggregation of population size classes A-1 and A-2.

[2] Indexes on a June 1978 = 100 base; formerly on a December 1977 = 100 base.

[1] The population size classes are aggregations of areas which have urban population as defined:

A-1 - More than 4,000,000.
A-2 - 1,250,000 to 4,000,000.
B - 385,000 to 1,250,000.
C 75,000 to 385,000.
D - Less than 75,000.

Population size class A is the aggregation of population size classes A-1 and A-2.

[2] Indexes on a June 1978=100 base; formerly on a December 1977=100 base.

[1] Regions are defined as the four Census regions.

The population size classes are aggregations of areas which have urban population as defined:

A-1 - More than 4,000,000.
A-2 - 1,250,000 to 4,000,000.
B - 385,000 to 1,250,000.
C - 75,000 to 385,000.
D - Less than 75,000.

Population size class A is the aggregation of population size classes A-1 and A-2.

[2] Indexes on a June 1978 = 100 base; formerly on a December 1977 = 100 base.

Technical Notes

Brief Explanation of the CPI

The Consumer Price Index (CPI) is a measure of the average change in prices over time in a fixed market basket of goods and services. Effective with the January 1978 index, the Bureau of Labor Statistics began publishing CPI's for two population groups: (1) a new CPI for All Urban Consumers (CPI-U) which covers approximately 80 percent of the total noninstitutional civilian population; and (2) a revised CPI for Urban Wage Earners and Clerical Workers (CPI-W) which represents about half the population covered by the CPI-U. The CPI-U includes, in addition to wage earners and clerical workers, groups which historically have been excluded from CPI coverage, such as professional, managerial, and technical workers, the self-employed, short-term workers, the unemployed, and retirees and others not in the labor force.

The CPI is based on prices of food, clothing, shelter, and fuels, transportation fares, charges for doctors' and dentists' services, drugs, and the other goods and services that people buy for day-to-day living. Prices are collected in 85 urban areas across the country from over 18,000 tenants, 18,000 housing units for property taxes, and about 24,000 establishments—grocery and department stores, hospitals, filling stations, and other types of stores and service establishments. All taxes directly associated with the purchase and use of items are included in the index. Prices of food, fuels, and a few other items are obtained every month in all 85 locations. Prices of most other commodities and services are collected every month in the five largest geographic areas and every other month in other areas. Prices of most goods and services are obtained by personal visits of the Bureau's trained representatives. Mail questionnaires are used to obtain public utility rates, some fuel prices, and certain other items.

In calculating the index, price changes for the various items in each location are averaged together with weights which represent their importance in the spending of the appropriate population group. Local data are then combined to obtain a U.S. city average. Separate indexes are also published for 28 local areas. Area indexes do not measure differences in the level of prices among cities; they only measure the average change in prices for each area since the base period.

The index measures price changes from a designated reference date—1967—which equals 100.0. An increase of 22 percent, for example, is shown as 122.0. This change can also be expressed in dollars as follows: The price of a base period "market basket" of goods and services in the CPI has risen from $10 in 1967 to $12.20.

For further details see the following: *The Consumer Price Index: Concepts and Content Over the Years,* Report 517, revised edition (Bureau of Labor Statistics, May 1978); *The Revision of the Consumer Price Index,* by W. John Layng, reprinted from the *Statistical Reporter,* February 1978, No. 78-5 (U.S. Dept. of Commerce), and *Revisions in the Medical Care Service component of the Consumer Price Index,* by Daniel H. Ginsburg, *Monthly Labor Review,* August 1978.

Calculating Index Changes

Movements of the indexes from one month to another are usually expressed as percent changes rather than changes in index points because index point changes are affected by the level of the index in relation to its base period while percent changes are not. The example in the accompanying box illustrates the computation of index point and percent changes.

Percent changes for 3-month and 6-month periods are expressed as annual rates and are computed according to the standard formula for compound growth rates. These data indicate what the percent change would be if the current rate were maintained for a 12-month period.

Index Point Change	
CPI	236.4
Less previous index	233.2
Equals index point change:	3.2
Percent Change	
Index point difference	3.2
Divided by the previous index	233.2
Equals:	0.014
Results multiplied by one hundred	0.014x100
Equals percent change:	1.4

Seasonally Adjusted and Unadjusted Data

Because price data are used for different purposes by different groups, the Bureau of Labor Statistics publishes seasonally adjusted as well as unadjusted changes each month.

For analyzing general price trends in the economy, seasonally adjusted changes are usually preferred since they eliminate the effect of changes that normally occur at the same time and in about the same magnitude every year—such as price movements resulting from changing climatic conditions, production cycles, model changeovers, holidays, and sales.

The unadjusted data are of primary interest to consumers concerned about the prices they actually pay. Unadjusted data are also used extensively for escalation purposes. Many collective bargaining contract agreements and pension plans, for example, tie compensation changes to the Consumer Price Index unadjusted for seasonal variation.

Seasonal factors used to compute the seasonally adjusted indexes are derived by the X-11 Variant of the Census Method II Seasonal Adjustment Program. Annual updates replace 5 years of seasonal data, e.g., data from 1976 through 1980 will be replaced at the end of 1980. The seasonal movement of all items and 35 other aggregations is derived by combining the seasonal movement of 45 selected components.

Explanation of Homeownership Measures

Official CPI-U includes five components.(1) The weights for property taxes, property insurance, and home maintenance and repairs represent expenditures of all homeowners in the base period. The weights for house prices and contracted mortgage interest cost represent only those homeowners who actually purchased a home in the base period. Included are the total price paid for the home, and the total amount of interest expected to be paid over half the stated life of the mortgage. (2) Current monthly prices are used for each of these components.

Experimental Measure X-1: (1) The weight for this rental equivalence measure is the estimate of the rental value of all owner-occupied homes in the base period compiled from a specific question asked on the 1972-73 Consumer Expenditure Survey. This covers the entire stock of owned homes. (2) Prices used are the current rents collected for the residential rent component of the CPI. The CPI rent component is designed to represent changes in residential rents for all types of housing units, not just changes in rents for units that are typically owner occupied. The CPI rent component is, therefore, not appropriate for this measure.

Experimental Measure X-2: (1) The weight for this user cost method includes expenditures for mortgage interest, property taxes, property insurance, maintenance and repairs, the estimated base-period cost of homeowners' equity in their houses, and the offset to shelter costs resulting from the estimated appreciation of house values in the base period. This measure covers the entire stock of owned houses. To derive the weights for mortgage interest costs and equity costs, the total value of the housing stock in the base period was apportioned into its debt and equity components. The debt component equals the amount owned and the equity component is the amount owed, i.e., payments on principal plus appreciation from the time of purchase to the base period. Each component was subsequently multiplied by the average mortgage interest rate in the base period to determine its cost. (2) Prices used are current ones except for the appreciation term which uses a 5-year moving average of the changes in appreciation rates.

Experimental Measure X-3: (1) The weights are the same as in Experimental Measure X-2, except that mortgage interest costs are calculated as the total interest amount *paid out* by homeowners in the base period. As in X-1 and in X-2, this measure covers the entire homeowners population. (2) The prices for all components except mortgage interest costs and appreciation are current monthly prices. As in X-2, appreciation is represented by a 5-year moving average of the changes in house prices. However, X-3, uses past and current mortgage interest costs in a 15-year weighted moving average, which reflects the base period age distribution of mortgage loans.

Experimental Measure X-4: The weights for this outlays approach include expenditures actually made in the base period for property taxes, property insurance, maintenance, and repairs. The weight for the mortgage interest term is calculated in the same manner as in X-2. However, no appreciation or equity terms are included. Not all homeowners are represented in this measure because those who made no mortgage debt payment in the base period are excluded. (2) The prices used for each of these items are current ones.

Experimental Measure X-5: (1) The weights for this outlays approach include, as in X-4, expenditures actually made in the base period for property taxes, property insurance, maintenance, and repairs. The weight for the mortgage interest cost term is the same as for the X-3. No appreciation or equity elements are used. As in X-4, not all homeowners are represented in this measure because those who made no mortgage debt payment in the base period are excluded. (2) Current prices are used in X-5 except for mortgage interest which uses the 15-year moving average also used in the X-3.
