Gerald F. Donahoe, Chief of the National Income and Wealth Division, supervised the preparation of this comprehensive revision of the national income and product accounts of the United States. Richard C. Ziemer, Chief of the Government Division, and Joseph C. Wakefield, former Chief, directed major parts of the revision. Robert P. Parker, Associate Director for National Economic Accounts, provided overall supervision. Norman E. Bakka developed the major computer systems used in the revision. Shelby W. Herman and Christian Ehemann assisted in the review of the estimates. Eugene P. Seskin updated the text for this volume. M. Gretchen Gibson, under the guidance of Leland L. Scott, Chief of the Publication Services Branch, coordinated the preparation of the publication for printing; Eric B. Manning typeset the text and the tables, and Wm. Ronnie Foster designed the cover.

Other staff who made significant contributions to the revision are listed below.

Personal consumption expenditures—***Clinton P. McCully***, M. Greg Key, Everette P. Johnson, William T. Bannister, Myung G. Han, Moses J. Branch, Ellen B. Arroyo.

Investment—***David W. Cartwright***, Gregory Y. Won, David B. Wasshausen. *Structures*—Brooks B. Robinson. *Producers' durable equipment*—Jeffrey W. Crawford. *Inventories*—Stephen P. Baldwin, Jean M. Stiller, Felicia V. Candela, Michael D. Glenn.

Net exports—Corinne E. Krincek, Leo M. Bernstein, Phyllistine M. Barnes.

Federal Government receipts and expenditures—***David T. Dobbs***. *Receipts and expenditures*—Hermione A. Anglin, Gary W. Davis, Ann M. Groszkiewicz, Benyam Tsehaye, Michael W. Webb.

Federal Government purchases—***Karl D. Galbraith***, Peter G. Beall, James E. Boucher, Florence H. Campi, Chon A. Ficklin, Doris N. Johnson, Pamela A. Kelly, Raymen G. Labella, Robert T. Mangan, Tamara M. Mast, Michael D. McConathy, Keith E. McKenzie, Matthew P. McNeil, Claire G. Pitzer, Abner Sachs.

State and local government transactions—***David F. Sullivan***, Steven J. Andrews, Richard D. Melchionno, Donald L. Peters.

Measures of price change—***Shelby W. Herman.***

Income—***Eugene P. Seskin.***

Personal income—***Arthur L. Sensenig***. *Wages and salaries*—Pauline M. Cypert, Toui C. Pomsouvan. *Other labor income*—James E. Rankin. Other contributors to the personal income estimates include Thae S. Park and Mary V. Pitts.

Business income—***Kenneth A. Petrick***. *Corporate profits*—Kenneth A. Petrick, Craig A. Hargenrader, Dorothy G. Collins, Jerry L. Stone. *Nonfarm proprietors' income*—Willie J. Abney.

Farm output and income—***George M. Smith.***

Interest income—***Teresa L. Weadock.***

Rental income of persons—George M. Smith, Denise A. McBride.

Consumption of fixed capital—***John C. Musgrave***, Heather L. Quick.

Measures of output–***Christian Ehemann***, Mary W. Hook, Jennifer M. Wu.

Computer services—***Norman E. Bakka***, Mary Carol Barron, Phyllistine M. Barnes.

Table preparation and review—Virginia H. Mannering, Norman E. Bakka, Jeanette M. Honsa, Phyllistine M. Barnes.

Secretarial—***Eunice V. Blue***, Gail P. Jones, Mary B. Perkins, Lynda A. Swanson, Dorothy A. Wilson.

1.5 Relation of Gross Domestic Product, Gross Domestic Purchases, and Final Sales to Domestic Purchasers (A, 1929–58; Q, 1946–58)
1.6 Relation of Gross Domestic Product, Gross Domestic Purchases, and Final Sales to Domestic Purchasers in Constant Dollars (A, 1929–58; Q, 1947–58)
1.7 Gross Domestic Product by Sector (A, 1929–58; Q, 1946–58)
1.8 Gross Domestic Product by Sector in Constant Dollars (A, 1929–58; Q, 1947–58)
1.9 Relation of Gross Domestic Product, Gross National Product, Net National Product, National Income, and Personal Income (A, 1929–58; Q, 1946–58)
1.10 Relation of Gross Domestic Product, Gross National Product, Net National Product, and National Income in Constant Dollars (A, 1929–58; Q, 1947–58)
1.11 Command-Basis Gross National Product in Constant Dollars (A, 1929–58; Q, 1947–58)
1.12 Net Domestic Product and Domestic Income by Sector (A, 1929–58)
1.13 Net Domestic Product and Domestic Income by Sector in Constant Dollars (A, 1929–58)
1.14 National Income by Type of Income (A, 1929–58; Q, 1946–58)
1.15 National Income by Sector, Legal Form of Organization, and Type of Income (A, 1929–58)
1.16 Gross Domestic Product of Corporate Business in Current Dollars and Gross Domestic Product of Nonfinancial Corporate Business in Current and Constant Dollars (A, 1929–58; Q, 1946–58)

2. Personal Income and Outlays

2.1 Personal Income and Its Disposition (A, 1929–58; Q, 1946–58)
2.2 Personal Consumption Expenditures by Major Type of Product (AQ, 1946–58)
2.3 Personal Consumption Expenditures by Major Type of Product in Constant Dollars (AQ, 1947–58)
2.4 Personal Consumption Expenditures by Type of Expenditure (A, 1929–58)
2.5 Personal Consumption Expenditures by Type of Expenditure in Constant Dollars (A, 1929–58)
2.6 Personal Consumption Expenditures by Type of Product (A, 1929–58)
2.7 Personal Consumption Expenditures by Type of Product in Constant Dollars (A, 1929–58)
2.8 Personal Income by Type of Income (AM)
2.9 Personal Income and Its Disposition (AM)
2.10 Personal Consumption Expenditures by Major Type of Product (AM)
2.11 Personal Consumption Expenditures by Major Type of Product in Constant Dollars (AM)

3. Government Receipts and Expenditures

3.1 Government Receipts and Expenditures (A, 1929–58)
3.2 Federal Government Receipts and Expenditures (A, 1929–58; Q, 1946–58)
3.3 State and Local Government Receipts and Expenditures (A, 1929–58; Q, 1946–58)
3.4 Personal Tax and Nontax Receipts (A, 1929–58)
3.5 Indirect Business Tax and Nontax Accruals (A, 1929–58)
3.6 Contributions for Social Insurance (A, 1929–58)
3.7A Government Purchases by Type (A, 1929–58; Q, 1947–58)
3.8A Government Purchases by Type in Constant Dollars (A, 1929–58; Q, 1947–58)
3.9A Government Purchases Gross and Net of Sales by Type (A, 1929–58)
3.10 National Defense Purchases (AQ)
3.11 National Defense Purchases in Constant Dollars (AQ)
3.12 Government Transfer Payments to Persons (A, 1929–58)
3.13 Subsidies Less Current Surplus of Government Enterprises (A)
3.14 Social Insurance Funds Receipts and Expenditures (A, 1929–58)
3.15 Government Expenditures by Function (A, 1952–58)
3.16 Federal Government Expenditures by Type and Function (A, 1952–58)
3.17 State and Local Government Expenditures by Type and Function (A, 1952–58)
3.18A Relation of Federal Government Receipts and Expenditures in the National Income and Product Accounts to the Consolidated Cash Statement, Fiscal Years (A, 1952–58)
3.19 Relation of State and Local Government Receipts and Expenditures in the National Income and Product Accounts to Bureau of the Census Government Finances Data, Fiscal Years (A)
3.20 Relation of Commodity Credit Corporation Expenditures in the National Income and Product Accounts to Commodity Credit Corporation Outlays in the Unified Budget (A)

4. Foreign Transactions **80**

4.1 Foreign Transactions in the National Income and Product Accounts (A, 1929–58; Q, 1946–58) 80
4.2 Exports and Imports of Goods and Services and Receipts and Payments of Factor Income in Constant Dollars (A, 1929–58; Q, 1947–58) 82
4.3 Exports and Imports of Merchandise by End-Use Category (AQ) ..... (*)
4.4 Exports and Imports of Merchandise by End-Use Category in Constant Dollars (AQ) ..... (*)
4.5 Relation of Foreign Transactions in the National Income and Product Accounts to the Corresponding Items in the Balance of Payments Accounts (A, 1946–58) 83

5. Saving and Investment **84**

5.1 Gross Saving and Investment (A, 1929–58; Q, 1946–58) 84
5.2 Gross Private Domestic Investment, Consumption of Fixed Capital, and Net Private Domestic Investment by Major Type of Investment (A, 1929–58) 86
5.3 Gross Private Domestic Investment, Consumption of Fixed Capital, and Net Private Domestic Investment by Major Type of Investment in Constant Dollars (A, 1929–58) 87
5.4 Fixed Investment by Type (AQ, 1946–58) 88
5.5 Fixed Investment by Type in Constant Dollars (AQ, 1947–58) 89
5.6 Purchases of Structures by Type (A, 1929–58) 91
5.7 Purchases of Structures by Type in Constant Dollars (A, 1929–58) 93
5.8 Private Purchases of Producers' Durable Equipment by Type (A, 1929–58) 95
5.9 Private Purchases of Producers' Durable Equipment by Type in Constant Dollars (A, 1929–58) 96
5.10 Change in Business Inventories by Industry (A, 1929–58; Q, 1946–58) 97
5.11 Change in Business Inventories by Industry in Constant Dollars (A, 1929–58; Q, 1947–58) 99
5.12 Inventories and Final Sales of Domestic Business by Industry (Q, 1946–58) 101
5.13 Inventories and Final Sales of Domestic Business by Industry in Constant Dollars (Q, 1947–58) 102

6. Income, Employment, and Product by Industry **104**

6.1A National Income Without Capital Consumption Adjustment by Industry (A, 1929–45) 104
6.1B National Income Without Capital Consumption Adjustment by Industry (A, 1946–58; Q, 1948–58) 104
6.2A Compensation of Employees by Industry (A, 1929–48) 106

Introduction

This is the first of two volumes that present the revised national income and product accounts (NIPA) estimates resulting from the most recent comprehensive, that is, benchmark, revision. This volume presents the set of NIPA tables for 1929–58; summary information on the comprehensive revision was released in December 1991. Volume 2, which was published in September 1992, presents the NIPA tables for 1959–88.

The 1991 comprehensive revision was the ninth of its kind since the Commerce Department first published national income statistics in 1942. Comprehensive revisions, which usually occur at about 5-year intervals, are so termed because of the scope of the changes incorporated and because of the number of years subject to revision. These revisions involve three kinds of changes: Definitional and classificational changes, which update the accounts to reflect the evolving U.S. economy; statistical changes, which update the estimates to reflect shifts in the base period, to incorporate newly available and revised source data, and to introduce new and improved estimating procedures; and new and redesigned tables, which update the presentation of the NIPA's to reflect the definitional, classificational, and statistical changes and to make the tables more informative. (For specific information about the 1991 comprehensive revision, see the SURVEY OF CURRENT BUSINESS articles listed in the box on page M–3.)

This volume also presents definitions of the NIPA entries, definitions of real output and related measures, and classifications of production found in the NIPA tables. These definitions and classifications reflect changes that were introduced with the comprehensive revision in December 1991. Thus, they supersede definitions provided in earlier publications.

Additional information on the conceptual framework of the NIPA's and the methodologies used to prepare the estimates is available in a series of methodology papers (MP's). MP-4 also contains an extensive annotated list of publications going back to the mid-1970's. It should be noted, however, that these publications do not reflect the definitional and classificational changes or the methodology changes introduced in the most recent comprehensive revision. The list of the six MP's that have been published is shown in the box on page M–3.

Presentation of the NIPA's

Organization of the NIPA tables

The NIPA tables are grouped into nine categories:

1. National Product and Income
2. Personal Income and Outlays
3. Government Receipts and Expenditures
4. Foreign Transactions
5. Saving and Investment
6. Income, Employment, and Product by Industry
7. Quantity and Price Indexes
8. Supplementary Tables
9. Seasonally Unadjusted Estimates

The "Supplementary Tables" category consists of tables showing percentage changes in the major NIPA aggregates; selected per capita series; auto, truck, farm sector, and housing sector output; detail on several components of gross national income—consumption of fixed capital, capital consumption adjustment, business transfer payments, supplements to wages and salaries, rental income of persons, dividends, and interest; imputations; and reconciliations of several NIPA measures to the source data (for example, tax return tabulations) from which they are derived or to which they are closely related.

Tables are individually numbered both by category and within categories. The first digit indicates the category, and

Cycle of the NIPA Estimates

Quarterly estimates of gross domestic product (GDP) are released on the following schedule: "Advance" estimates are released near the end of the first month after the end of the quarter; as more detailed and comprehensive data become available, "preliminary" and "final" estimates are released near the end of the second and third months, respectively. Quarterly estimates of gross national product, national income, corporate profits, and net interest lag the GDP estimates by 1 month: The first estimates of these items are released with the preliminary GDP estimates, and the revised estimates are released with the final GDP estimates. (The fourth-quarter estimates of these items lag by an additional month.) Monthly estimates of personal income and outlays are released near the end of the month following the reference month; estimates for the 2 to 4 most recent months are revised at that time. Ordinarily, annual revisions are carried out each July and cover the months and quarters of the most recent calendar year and the 2 preceding years. (For example, the July 1992 revision covers 1989, 1990, and 1991.) These revisions are timed to incorporate newly available major annual source data. Comprehensive revisions are carried out at about 5-year intervals.

Federal Reserve Bank of St. Louis

subsequent digits indicate the table number within that category. A letter suffix is used to represent major discontinuities in coverage, for example, the edition of the Standard Industrial Classification (SIC) underlying the estimates (see the section "Industry" on page M–12).

From time to time, changes in the coverage or in the quality of the statistics result in discontinuities in NIPA time series. For example, beginning with 1960, the estimates cover the 50 States and the District of Columbia; before 1960, Alaska and Hawaii were partly omitted. While it is not possible to identify all discontinuities, major discontinuities are indicated in the tables. In addition to the use of letter suffixes to indicate major discontinuities in coverage, other types of discontinuities are referenced in the footnotes.

The full set of NIPA tables, which consists of 132 tables and about 5,100 line items, contains annual, quarterly, and monthly estimates. (The box "Cycle of the NIPA Estimates" describes the schedule of release for the estimates.) The complete list of NIPA tables is shown on pages v–ix. For each of the tables included in this volume, the frequency of the estimates and the time period covered is given. The remaining tables listed show the frequency of the estimates, but the asterisk (*) indicates that the estimates are not available for the 1929–58 period. Annual estimates are based on source data that are typically not available quarterly or monthly. Quarterly estimates in current dollars begin with those for 1946, and quarterly estimates in constant dollars begin with those for 1947. Many of the tables with only annual estimates show detailed breakdowns of components; for example, tables 5.6 and 5.7 show purchases of structures by type (in current and constant dollars, respectively).

The index beginning on page 217 identifies the NIPA table (or tables) containing that line item. Commonly used terms that differ from the NIPA wording are included, with a reference to the appropriate NIPA item.

Publication of the NIPA's

The section "National Income and Product Accounts" in the SURVEY OF CURRENT BUSINESS is the primary vehicle for the publication of the NIPA's. Except for years in which comprehensive revisions are released, July SURVEY issues contain a full set of NIPA tables for the annual revisions. In months other than July, a set of "Selected NIPA Tables" presents the quarterly estimates that are released each month (and the corresponding annual estimates). The selected set comprises 53 tables from the first eight categories listed above. (Seasonally unadjusted estimates are compiled only once a year and thus are not included in the selected set of tables.) For users' convenience in tracking specific estimates, the numbering system established for the full set of tables is retained in the selected set; as a result, gaps in table numbering occur in the presentation of the selected tables.

The SURVEY issue for a particular month presents the estimates released during that month; for example, advance first-quarter estimates are released during the month of April and appear in the April SURVEY. A note preceding the NIPA tables indicates whether the estimates are advance, preliminary, or final.

Certain NIPA estimates also appear in other parts of the SURVEY. The additional presentations described below show estimates or analyses that do not fit neatly into the system or publication schedule for the standard presentation.

"Reconciliation and Other Special Tables" regularly shows tables that reconcile NIPA estimates to related series and tables that present analytically useful extensions of NIPA estimates. At present, tables in this section show the reconciliation of relevant NIPA series to those in the balance of payments accounts and the reconciliation of BEA compensation to Bureau of Labor Statistics earnings.

"Constant-Dollar Inventories, Sales, and Inventory-Sales Ratios for Manufacturing and Trade" (in March, June, September, and December) shows quarterly and monthly estimates for the series indicated. Also shown are quarterly fixed-weighted inventory-sales ratios (using sales as weights) and quarterly and monthly inventories for manufacturing by stage of fabrication. The current-dollar sales figures are from the Census Bureau and are deflated by BEA; the inventory estimates are from the NIPA's.

Statistical conventions used for NIPA estimates

Most of the estimates are presented in billions of dollars. The major exceptions are certain current-dollar annual estimates, which are presented in millions of dollars, and estimates presented as index numbers. Current-dollar estimates are valued in the prices of the period in which the transaction takes

Alternative Media

Within minutes of their official release, BEA makes the NIPA estimates available electronically through the Economic Bulletin Board maintained by the U.S. Department of Commerce's Office of Business Analysis (OBA). In addition, BEA provides annual and quarterly NIPA estimates to the National Trade Data Bank (NTDB) and the National Economic, Social, and Environmental Data Bank (NESE•DB). The NTDB and the NESE•DB are produced by OBA on Compact Disc Read-Only Memory. For information, call OBA at (202) 482–1986.

BEA also prepares recorded telephone messages summarizing key estimates immediately after their release: For gross domestic product, call (202) 898–2451; for personal income and outlays, call (202) 898–2452.

Many of the NIPA estimates are available on computer tape and on diskettes. For a list of NIPA information products, write the National Income and Wealth Division, BE-54, Bureau of Economic Analysis, U.S. Department of Commerce, Washington, DC 20230, or call (202) 523–0669.

Federal Reserve Bank of St. Louis

place. Constant-dollar estimates (see the section on real output and related measures, page M–10) are valued in the prices of a period designated the base period (at present, 1987), thus removing price change from any period-to-period movement in the series. The designation of 1987 as the base period also means that levels in 1987 are set equal to 100 in calculating quantity and price indexes and implicit price deflators.

For quarters and months, the estimates (except indexes) are presented at annual rates. Annual rates show values for a quarter or a month at their annual equivalent (that is, the value that would be registered if the rate of activity measured for a month or a quarter were maintained for a full year). Annual rates make it easier to compare values for time periods of different lengths—for example, quarters and years.

The percent changes shown in table 8.1 are also expressed at annual rates and are calculated from the published quarterly estimates, which are rounded to the nearest one-tenth of a billion dollars. The annual rates for quarterly percent changes are calculated with a variant of the compound interest rate formula:

$$r = \left[\left(\frac{Q_t}{Q_{t-1}} \right)^4 - 1 \right] \times 100$$

where r is the percent change at an annual rate and Q_t and Q_{t-1} are the quarterly estimates for a quarter and for the preceding quarter, respectively.

Quarterly and monthly NIPA estimates are seasonally adjusted, if necessary. Seasonal adjustment removes from the time series the average impact of variations that normally occur at about the same time and in about the same magnitude each year—for example, weather, holidays, and tax payment dates. In most cases, BEA uses source data that are seasonally adjusted by the source agency; in others, the statistical procedures used by BEA—for example, the X-11 variant of the Census Method II seasonal adjustment program—are based on historical experience. After seasonal adjustment, cyclical and other short-term changes in the economy stand out more clearly.

Definitions and Classifications Underlying the National Income and Product Accounts

National income and product accounts entries

Income and product aggregates are defined below, and their definitions are amplified by definitions of their major components. The aggregates differ from each other because of distinctions that are made between domestic measures and national measures, between gross and net concepts, and between market-value and factor-cost concepts.

The remaining definitions are presented in the framework of the five-account summary of the national income and product accounts (NIPA's) (shown in table A, page M–14). Each entry has a counterentry, generally in another account. The parenthetical numbers that follow an entry in table A identify the counterentry by account and line number. With the exception of major income and product aggregates, entries are usually defined in the sequence in which they appear in the five-account summary. The definition is not repeated where the counterentry appears, but a cross-reference is made to the place of its first appearance. Following the five-account summary discussion, definitions for several additional items are presented: Gross domestic purchases, final sales to domestic purchasers, final sales of domestic product, population, personal saving as a percentage of disposable personal income, U.S. residents, and the rest of the world.

Major aggregates

Effective with the 1991 comprehensive revision, BEA began featuring gross domestic product (GDP), rather than gross national product (GNP), as the primary measure of U.S. production. *GDP* is the market value of the goods and services *produced by labor and property located in the United States.* As long as the labor and property are located in the United States, the suppliers (that is, the workers and, for property, the owners) may be either U.S. residents or residents of the rest of the world. *GNP* (1–28) covers the goods and services *produced by labor and property supplied by U.S. residents.* As long as the labor and property are supplied by U.S. residents, they may be located either in the United States or abroad. ("U.S. residents" is defined on page M–10.)

To move from GDP to GNP, one must add receipts of factor income from the rest of the world, which represent the goods and services produced abroad using the labor and property supplied by U.S. residents, and subtract payments of factor income to the rest of the world, which represent the goods and services produced in the United States using the labor and property supplied by foreign residents. Factor incomes are measured as compensation of employees, corporate profits (dividends, earnings of unincorporated affiliates, and reinvested earnings of incorporated affiliates), and interest.

Net domestic product (NDP) is the net market value of the goods and services attributable to labor and property located in the United States and is equal to GDP less consumption of fixed capital. It is U.S. production net of the fixed capital "used up" in the production process during the accounting period. *Net national product* (NNP) is the net market value of goods and services attributable to the labor and property supplied by the residents of the United States and is equal to GNP less consumption of fixed capital. The measure of consumption of fixed capital used for both NDP and NNP relates only to fixed capital located in the United States.

Gross national income (1–26) is the costs incurred and the profits earned in the production of GNP. Accordingly, it equals GNP, except for the statistical discrepancy. Gross national income is the sum of (1) factor incomes—compensation of employees, proprietors' income, rental income of persons, corporate profits, and net interest; (2) three nonfactor incomes—business transfer payments, indirect business taxes, and the current surplus of government enterprises less government subsidy payments; and (3) consumption of fixed capital.

National income (1–19) is the sum of the factor incomes. It is a net factor cost measure equal to the income that originates in the production of goods and services supplied by the residents of the United States. *Domestic income,* also a net factor cost measure, is the income that originates in the production of goods and services attributable to labor and property located in the United States.

To summarize, GDP is a gross market value measure, net domestic product is a net market value measure, and domestic income is a net factor cost measure. The corresponding national measures are GNP (gross market value), net national product (net market value), and national income (net factor cost).

Personal income is the income received by persons from all sources—that is, from participation in production, from both government and business transfer payments, and from government interest (which is treated like a transfer payment). "Persons" consists of individuals, nonprofit institutions that primarily serve individuals, private noninsured welfare funds, and private trust funds. Personal income is calculated as the sum of wage and salary disbursements, other labor income, proprietors' income with inventory valuation and capital consumption adjustments, rental income of persons

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

with capital consumption adjustment, personal dividend income, personal interest income, and transfer payments to persons, less personal contributions for social insurance.

Disposable personal income is personal income less personal tax and nontax payments. It is the income available to persons for spending or saving.

National income and product account

GDP (defined above) is the sum of personal consumption expenditures, gross private domestic investment (including change in business inventories and before deduction of charges for consumption of fixed capital), net exports of goods and services (exports less imports), and government purchases. GDP excludes business purchases of goods and services on current account.

Personal consumption expenditures (1–31) is goods and services purchased by persons resident in the United States. Most of personal consumption expenditures (PCE) consists of purchases of new goods and of services by individuals from business. In addition, PCE includes purchases of new goods and of services by nonprofit institutions, net purchases of used goods by individuals and nonprofit institutions, and purchases abroad of goods and services by U.S. residents traveling or working in foreign countries.[1] PCE also includes purchases for certain services provided by the government—primarily tuition payments for higher education and charges for medical care. Finally, PCE includes imputed purchases that keep PCE invariant to changes in the way that certain activities are carried out—for example, whether housing is rented or owned or whether employees are paid in cash or in kind.

The following conventions are used to classify each PCE commodity: *Durable goods* (1–32) are commodities that can be stored or inventoried and that have an average life of at least 3 years; *nondurable goods* (1–33) are all other commodities that can be stored or inventoried; and *services* (1–34) are commodities that cannot be stored and that are consumed at the place and time of purchase.

Gross private domestic investment (1–35) consists of *fixed investment* (1–36) and *change in business inventories* (1–41). Fixed investment consists of both *nonresidential* (1–37) fixed investment and *residential* (1–40) fixed investment. It is measured without a deduction for consumption of fixed capital and includes replacements and additions to the capital stock. It covers all investment by business and nonprofit institutions in the United States, regardless of whether the investment is owned by U.S. residents. (Public purchases of equipment and structures is in the government purchases account.) It excludes investment by U.S. residents in other countries. Nonresidential fixed investment consists of both *structures* (1–38) and *producers' durable equipment* (PDE) (1–39).

Nonresidential structures consists of new construction, brokers' commissions on sale of structures, and net purchases of used structures by business and nonprofit institutions from governments. New construction also includes hotels and motels, and mining exploration, shafts, and wells.

1. Purchases of residential structures by individuals and nonprofit institutions that primarily serve individuals are classified as gross private domestic investment.

Nonresidential PDE consists of private business purchases on capital account of new machinery, equipment, furniture, and vehicles (except for personal-use portions of equipment purchased for both business and personal use, which are included in PCE), plus dealers' margins on sales of used equipment, and net purchases of used equipment from government, from persons, and from the rest of the world.

Residential fixed investment consists of both structures and residential PDE—equipment owned by landlords and rented to tenants. Investment in structures consists of new units, improvements to existing units, mobile homes, brokers' commissions on the sale of residential property, and net purchases of used structures from government.

Change in business inventories (1–41) is the change in the physical volume of inventories held by business, valued in average prices of the period. It differs from the change in the book value of inventories reported by business; an inventory valuation adjustment converts inventories valued at historical cost to replacement cost. (The inventory valuation adjustment is described below.)

Net exports of goods and services (1–42) is exports (1–43) less imports (1–44) of goods and services. Receipts of factor income are excluded from exports, and payments of factor income are excluded from imports.

Government purchases (1–45) is purchases from business (including net purchases of used goods), compensation of government employees, and purchases from the rest of the world. Receipts of certain services provided by government—primarily tuition payments for higher education and charges for medical care—are defined as government sales, which are treated as deductions from government purchases. The change in inventories and purchases of structures and equipment by government enterprises are included, but their current-account purchases are not. Purchases does not include transfer payments, interest paid by government, and subsidies. Transactions in financial assets and land also are excluded.

Compensation of employees (1–1) is the income accruing to employees as remuneration for their work. It is the sum of wages and salaries and of supplements to wages and salaries.

Wages and salaries (1–2) consists of the monetary remuneration of employees, including the compensation of corporate officers; commissions, tips, and bonuses; voluntary employee contributions to certain deferred compensation plans such as 401(k) plans; and receipts in kind that represent income. Wages and salaries consists of *disbursements* (1–3) and *wage accruals less disbursements* (1–4). Disbursements is wages and salaries as just defined except that retroactive wages are counted when paid rather than when earned.

Supplements to wages and salaries (1–5) consists of employer contributions for social insurance and other labor income. *Employer contributions for social insurance* (1–6) consists of employer payments under the following programs: Old-age, survivors, and disability insurance (social security); hospital insurance; unemployment insurance; railroad retirement; government employee retirement; pension benefit guaranty; veterans life insurance; publicly administered workers' compensation; military medical insurance: and temporary disability insurance. *Other labor income* (1–7) consists of employer payments to private pension and profit-

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

sharing plans, private group health and life insurance plans, privately administered workers' compensation plans, supplemental unemployment benefit plans, corporate directors' fees, and several minor categories of employee compensation, including judicial fees to jurors and witnesses, compensation of prison inmates, and marriage fees to justices of the peace.

Proprietors' income with inventory valuation and capital consumption adjustments (1–8) is the current-production income (including income in kind) of sole proprietorships and partnerships and of tax-exempt cooperatives. The imputed net rental income of owner-occupants of farm dwellings is included. Dividends and monetary interest received by nonfinancial business and rental incomes received by persons not primarily engaged in the real estate business are excluded; these incomes are included in dividends, net interest, and rental income of persons. (The inventory valuation and capital consumption adjustments are described below.)

Rental income of persons with capital consumption adjustment (1–9) is the net current-production income of persons from the rental of real property, except income of persons primarily engaged in the real estate business; the imputed net rental income of owner-occupants of nonfarm dwellings; and the royalties received by persons from patents, copyrights, and rights to natural resources. (The capital consumption adjustment is described below.)

Corporate profits with inventory valuation and capital consumption adjustments (1–10) is the income of organizations treated as corporations in the NIPA's. These organizations consist of all entities required to file Federal corporate tax returns, including mutual financial institutions and cooperatives subject to Federal income tax; private noninsured pension funds; nonprofit institutions that primarily serve business; Federal Reserve banks; and federally sponsored credit agencies. The income is that arising from current production. With several differences, this income is measured as receipts less expenses as defined in Federal tax law. Among these differences are the following: Receipts exclude capital gains and dividends received, expenses exclude depletion and capital losses and losses resulting from bad debts, inventory withdrawals are valued at replacement cost, and depreciation is on a consistent accounting basis and valued at replacement cost. Because national income is defined as the income of U.S. residents, its profits component includes income earned abroad by U.S. corporations and excludes income earned in the United States by the rest of the world. (The inventory valuation and capital consumption adjustments are described below.)

Profits before tax (1–11) is the income of organizations treated as corporations in the NIPA's, as described above, except that it reflects the inventory and depreciation accounting practices used for Federal income tax returns. It consists of profits tax liability, dividends, and undistributed corporate profits.

Profits tax liability (1–12) is the sum of Federal, State, and local income taxes on all income subject to taxes; this income includes capital gains and other income excluded from profits before tax. The taxes are measured on an accrual basis, net of applicable tax credits.

Profits after tax (1–13) is profits before tax less profits tax liability. It consists of dividends and undistributed corporate profits. *Dividends* (1–14) is payments in cash or other assets, excluding the corporations' own stock, made by corporations located in the United States and abroad to stockholders who are U.S. residents. The payments are measured net of dividends received by U.S. corporations. Dividends paid to State and local government social insurance funds and general government are included. *Undistributed profits* (1–15) is corporate profits after tax less dividends.

Inventory valuation adjustment (1–16) for corporations is the difference between the cost of inventory withdrawals as valued in determining profits before tax and the cost of withdrawals valued at replacement cost. It is needed because, under the accounting practices used by businesses to determine income as reported in the source data, inventories are often charged to cost of sales (that is, withdrawn) at their acquisition (historical) cost rather than at their replacement cost (the concept underlying the NIPA's). In periods of changing prices, this practice results in profits (or losses) on inventoried goods. The inventory valuation adjustment (IVA) is an estimate of inventory profits, but with the sign reversed. Thus, adding the IVA to income removes the inventory profits, as is appropriate for a measure of current production. As noted above, a similar adjustment is applied to change in business inventories and nonfarm proprietors' income. No adjustment is needed to farm proprietors' income because farm inventories are measured on a current-market-cost basis.

Net interest (1–18) is the interest paid by business less interest received by business, plus interest received from the rest of the world less interest paid to the rest of the world. Interest payments on mortgage and home improvement loans are counted as interest paid by business because home ownership is treated as a business in the NIPA's. In addition to monetary interest, net interest includes imputed interest, which is paid by corporate financial business. The imputed interest paid by life insurance carriers and noninsured pension plans credits their investment income to persons in the year it is earned. The imputed interest payments by financial intermediaries other than life insurance carriers and private noninsured pension plans to persons, governments, and to the rest of the world have imputed service charges as counterentries in GNP; they are included in personal consumption expenditures, in government purchases, and in exports, respectively.

Business transfer payments (1–20) consists of payments *to persons* (1–21) and *to the rest of the world* (1–22) for which no current services are performed. Business transfer payments to persons consists primarily of liability payments for personal injury and of corporate gifts to nonprofit institutions. Business transfer payments to the rest of the world is nonresident taxes—taxes paid by domestic corporations to foreign governments.

Indirect business tax and nontax liability (1–23) consists of tax liabilities that are chargeable to business expense in the calculation of profit-type incomes and of certain other business liabilities to government agencies (except government enterprises) that are treated like taxes. Indirect business taxes includes taxes on sales, property, and production. Employer contributions for social insurance are not included. Taxes on

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

corporate incomes are not included; these taxes cannot be calculated until profits are known, and in that sense they are not a business expense. Nontaxes includes regulatory and inspection fees, special assessments, fines and forfeitures, rents and royalties, and donations. Nontaxes generally excludes business purchases from government of goods and services that are similar to those provided by the private sector. Government receipts from the sales of such products are netted against government purchases so that they do not appear in GDP.

Subsidies less current surplus of government enterprises (1–24). *Subsidies* is the monetary grants paid by government to business, including government enterprises at another level of government. The *current surplus of government enterprises* is their current operating revenue and subsidies received from other levels of government less their current expenses. In the calculation of their current surplus, no deduction is made for depreciation charges and net interest paid. The current surplus of government enterprises is not counted as a profit-type income, and therefore, it is not counted as a factor charge. Subsidies and current surplus are shown as a combined entry because deficits incurred by government enterprises may result from selling goods to business at below-market prices in lieu of giving them subsidies.

Consumption of fixed capital (1–25) is a charge for the using up of fixed capital owned by entities defined as private business in the NIPA's and located in the United States.[2] It is based on the use of uniform service lives, straight-line depreciation, and replacement cost. For nonprofit institutions that primarily serve individuals, it is an imputation in personal consumption expenditures for the value of the current services of the fixed capital assets owned and used by these institutions. *Capital consumption allowances* consists of depreciation charges and accidental damage to fixed capital. For corporate business and nonfarm proprietors, it is based on depreciation as reported on Federal income tax returns. For noncorporate farms and other private business, it is calculated by BEA based on expenditures for fixed capital, uniform service lives, straight-line depreciation, and historical cost. *Capital consumption adjustment* (1–17) for corporations is the difference between depreciation as valued in determining the income reported in the source data and what is referred to as "economic depreciation"—depreciation as valued on the basis of consistent accounting (economic service lives and straight-line depreciation) and at replacement cost. It is equal to the tax-return-based capital consumption allowances less the estimate of consumption of fixed capital. Similar adjustments are calculated for proprietors' income, rental income of persons, and nonprofit institutions that primarily serve individuals.

Statistical discrepancy (1–27) is GNP less gross national income. It arises because GNP and gross national income are estimated independently. (The statistical discrepancy is also equal to GDP less gross domestic income.)

Receipts of factor income from the rest of the world (1–29) consists of receipts by U.S. residents of interest and dividends, of reinvested earnings of foreign affiliates of U.S. corporations, and of compensation paid to U.S. residents by foreigners.

Payments of factor income to the rest of the world (1–30) consists of payments to foreign residents of interest and dividends, of reinvested earnings of U.S. affiliates of foreign corporations, and of compensation paid to foreigners by U.S. residents.

Personal income and outlay account

Wage and salary disbursements (see 1–3).

Other labor income (see 1–7).

Proprietors' income with inventory valuation and capital consumption adjustments (see 1–8).

Rental income of persons with capital consumption adjustment (see 1–9).

Personal dividend income (2–11) is the dividend income of persons from all sources. It equals net dividends paid by corporations (see 1–14) less *dividends received by government* (2–13). Dividends received by government consists of dividends received by State and local governments, primarily by their retirement systems.

Personal interest income (2–14) is the interest income (monetary and imputed) of persons from all sources. It equals net interest (see 1–18) plus *interest paid by government* (2–16) less *interest received by government* (2–17) plus *interest paid by persons* (2–18). The last item consists of all interest paid by individuals except mortgage interest.

Transfer payments to persons is income payments to persons for which no current services are performed. It consists of business transfer payments to persons (see 1–21) and *government transfer payments* (2–21). Government transfer payments consists of benefits from the following social insurance funds: Old-age, survivors, and disability insurance (social security); hospital insurance; supplementary medical insurance; unemployment insurance; government employee retirement; railroad retirement; pension benefit guaranty; veterans life insurance; workers' compensation; military medical insurance; and temporary disability insurance. Government transfer payments also includes benefits from certain other programs: Veterans benefits, in addition to veterans life insurance; food stamps; black lung; supplemental security income; and public assistance (including medicaid). Government payments to nonprofit institutions, other than for work under research and development contracts, are also included.

Personal contributions for social insurance (2–22) includes payments by employees, by the self-employed, and by other individuals who participate in the following programs: Old-age, survivors, and disability insurance (social security); hospital insurance; supplementary medical insurance; unemployment insurance; government employee retirement; railroad retirement; veterans life insurance; and temporary disability insurance.

Personal tax and nontax payments (2–1) is tax payments (net of refunds) by persons resident in the United States that are not chargeable to business expense and certain other personal payments to government agencies (except government enterprises) that are treated like taxes. Personal taxes includes taxes on income, including realized net capital gains

2. Prior to the 1991 comprehensive revision, this item was called "capital consumption allowances with capital consumption adjustment."

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

on transfers of estates and gifts; and on personal property. Nontaxes includes donations and fees, fines, and forfeitures. Personal contributions for social insurance is not included. Taxes paid by U.S. residents to foreign governments and taxes paid by foreigners to the U.S. Government are both included in transfer payments.

Personal outlays (2–2) is the sum of personal consumption expenditures (see 1–31), interest paid by persons (see 2–18), and *personal transfer payments to rest of the world (net)* (2–5). The last item is personal remittances in cash and in kind to the rest of the world less such remittances from the rest of the world.

Personal saving (2–6) is personal income less the sum of personal outlays and personal tax and nontax payments. It is the current saving of individuals (including proprietors), nonprofit institutions that primarily serve individuals, life insurance carriers, private noninsured welfare funds, and private trust funds. Personal saving may also be viewed as the sum of the net acquisition of financial assets (such as cash and deposits, securities, and the change in the net equity of individuals in life insurance and in private noninsured pension plans) and the change in physical assets less the sum of net borrowing and of consumption of fixed capital.

Government receipts and expenditures account

Personal tax and nontax payments (see 2–1).

Corporate profits tax liability (see 1–12).

Indirect business tax and nontax liability (see 1–23).

Contributions for social insurance (see 1–6 and 2–22).

Purchases (see 1–45).

Transfer payments (3–2) is transfer payments to persons (see 2–21) and *transfer payments to rest of the world (net)* (3–4). The latter consists of U.S. Government military and nonmilitary grants in cash and nonmilitary grants in kind to foreign governments and of U.S. Government transfers, mainly retirement benefits, to former residents of the United States.

Net interest paid (3–5) by government is interest paid by government (see 2–16) less interest received by government (see 2–17). Interest paid by government is interest paid by government to persons and business and interest paid by government to the rest of the world, that is, to foreign businesses, governments, and persons. Interest received by government is interest received from business and from the rest of the world. Interest paid consists of monetary interest paid on public debt and other financial obligations. Interest received consists of monetary and imputed interest received on loans and investments, including on the balances of State and local government social insurance funds.

Dividends received by government (see 2–13).

Subsidies less current surplus of government enterprises (see 1–24).

Wage accruals less disbursements (see 1–4).

Surplus or deficit (-), national income and product accounts (3–9) is the sum of government receipts (lines 12, 13, 14, and 15 of account 3) less the sum of government expenditures (lines 1, 2, 5, 6, 7, and 8 of account 3). It may also be viewed as the sum of the net acquisition of financial assets by government and government enterprises and net government purchases of land and of rights to government-owned land including oil resources, less net borrowing.

Foreign transactions account

Imports of goods and services (see 1–44).

Payments of factor income (see 1–30).

Transfer payments to rest of the world (see 1–22, 2–5, and 3–4).

Net foreign investment (4–10) is U.S. exports of goods and services, receipts of factor income, and capital grants received by the United States (net) (see below), less imports of goods and services by the United States, payments of factor income, and transfer payments to the rest of the world (net). It may also be viewed as the acquisition of foreign assets by U.S. residents less the acquisition of U.S. assets by foreign residents. It includes the statistical discrepancy in the balance of payments accounts.

Exports of goods and services (see 1–43).

Receipts of factor income (see 1–29).

Capital grants received by the United States (net) (4–3) is mainly the allocation of Special Drawing Rights to the United States.

Gross saving and investment account

Personal saving (see 2–6).

Wage accruals less disbursements (see 1–4).

Undistributed corporate profits with inventory valuation and capital consumption adjustments (see 1–15, 1–16, and 1–17).

Consumption of fixed capital (see 1–25).

Government surplus or deficit (-), national income and product accounts (see 3–9).

Capital grants received by the United States (net) (see 4–3).

Statistical discrepancy (see 1–27).

Gross private domestic investment (see 1–35).

Net foreign investment (see 4–10).

Other definitions

Gross domestic purchases is the market value of goods and services purchased by U.S. residents, regardless of where those goods and services were produced. It may be calculated as GDP minus net exports of goods and services; equivalently, it is the sum of personal consumption expenditures, gross private domestic investment, and government purchases. *Final sales to domestic purchasers* is gross domestic purchases minus change in business inventories; equivalently, it is the sum of personal consumption expenditures, gross private domestic fixed investment, and government purchases. *Final sales of domestic product* is GDP minus change in business inventories; equivalently, it is final sales to domestic purchasers plus net exports.

Population is the total population of the United States, including Armed Forces overseas and the institutionalized population. The monthly estimate is the average of Census

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

Bureau survey estimates for the first of the month and the first of the following month; the quarterly and annual estimates are the averages of the relevant monthly estimates.

Personal saving as a percentage of disposable personal income (DPI), frequently referred to as "the personal saving rate," is calculated on a quarterly and an annual basis as the ratio of personal saving to DPI. Monthly, the saving rate is calculated as the ratio of an unweighted, centered 3-month moving average of personal saving to a similarly calculated average of DPI.

U.S. residents consists of individuals, governments, business enterprises, trusts, associations, and similar institutions that have the center of their economic interest in the United States and that reside or expect to reside in the United States for 1 year or more. (For example, business enterprises resident in the United States include U.S. affiliates of foreign companies.) In addition, U.S. residents includes all U.S. citizens who reside outside the United States for less than 1 year and U.S. citizens residing abroad for 1 year or more who meet one of the following criteria: Owners or employees of U.S. business enterprises who reside abroad to further the enterprises' business and who intend to return within a reasonable period; U.S. Government civilian and military employees and members of their immediate families; and students who attend foreign educational institutions. U.S residents excludes residents of commonwealths associated with the United States (Puerto Rico and the Northern Mariana Islands) and residents of U.S. territories (for example, Guam).

Rest of the world consists of foreign residents who are transactors with U.S. residents. Foreign residents include international institutions located in the United States, foreign nationals employed by their home Governments in the United States, and foreign affiliates of U.S. companies. Rest-of-the-world production is production abroad that is attributable to factors of production supplied by U.S. residents less the production in the United States attributable to factors of production supplied by foreign residents. Production is measured by the net inflow of labor and property incomes.

Real output and related measures

Real output

The tables in this volume contain, in addition to estimates in current dollars, estimates in "real," or physical quantity, terms—that is, estimates from which price change has been removed. The featured measure of real GDP is a fixed-weighted quantity series in which the weights are 1987 prices. This series is expressed in constant dollars and as an index with 1987 equal to 100.

The constant-dollar estimates of GDP are prepared at a detailed level using one of three methods. The method used for most GDP components is deflation; that is, constant-dollar estimates are obtained by dividing the most detailed current-dollar components by appropriate price indexes, with the base period—at present, the year 1987—equal to 100. The other two methods, quantity extrapolation and direct base-year valuation, are similar to each other in that they both use quantity data. For quantity extrapolation, constant-dollar estimates are obtained by extrapolating the base-year current-dollar estimates in both directions from the base period (1987) by quantity indicators. For direct base-year valuation, constant-dollar estimates are obtained by multiplying base-year prices by actual quantity data for each period.

Two alternatives to constant-dollar real output measures are based on the price weights for more than a single year. These alternative indexes use the Fisher Ideal index formula to provide a measure of change between two, not necessarily adjacent, periods.[3] In one alternative, the weights change each year; in the other, the weights change each benchmark year—that is, at about 5-year intervals. Annual estimates of these alternative indexes for 1929–58 and quarterly estimates for 1947–58 are not yet available; annual and quarterly estimates for 1959–88 were published in volume 2.

The first alternative index is referred to as the *chain-type annual-weighted quantity index.* For this alternative, a Fisher Ideal quantity index is used to calculate the change from year $t-1$ to year t. Thus, the annual change is provided by the geometric mean of the year t values of two fixed-weighted quantity indexes, one of which uses prices of year $t-1$ as weights and the other, prices of year t as weights. Annual changes computed in this manner are "chained" (multiplied) together to form a time series.

The second alternative index is referred to as the *benchmark-years-weighted quantity index.* For this alternative, the Fisher Ideal index formula is adapted to use weights from two adjacent benchmark years, which are customarily 5 years apart. For each pair of adjacent benchmark years and the interval between them, two fixed-weighted quantity indexes are computed: One with the prices of the first benchmark year as weights, and the other with the prices of the second benchmark year. The geometric mean of these indexes is the benchmark-years-weighted quantity index. Cumulation of the annual changes in the benchmark-years-weighted index is equal to the Fisher Ideal change calculated directly from one benchmark to the next. Benchmark years are used as weighting periods because, for components of GDP that incorporate information from the quinquennial economic censuses, the benchmark-year price and quantity estimates are considered to be more accurate than those for other years.

Price indexes

The fixed-weighted price indexes in this volume are weighted averages of detailed price indexes for the goods and services that make up GDP using weights that reflect the composition of GDP in 1987. Because the same weights are used for each period, changes in this index measure changes in prices over any period.

The fixed-weighted price indexes for several components of GDP—producers' durable equipment, exports, and imports—and for total GDP and the investment aggregates are not shown for periods prior to 1982. For those periods, the combination of the high level and very rapid decline of the price index for computers and the large 1987 quantity weights for

3. For more detail, see Allan H. Young, "Alternative Measures of Change in Real Output and Prices," SURVEY OF CURRENT BUSINESS 72 (April 1992): 32–48.

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

computers results in misleading measures of price change (see page 39 of the article cited in footnote 3).

Two alternatives to the fixed-weighted price index are also calculated. They use the Fisher Ideal index formula and are analogues to the two alternative quantity measures discussed above. One alternative is referred to as the *chain-type annual-weighted price index;* the other, as the *benchmark-years-weighted price index.* Annual estimates of these indexes for 1929–58 and quarterly estimates for 1947–58 are not yet available; annual and quarterly estimates for 1959–88 were published in volume 2.

Implicit price deflators

The implicit price deflator is a byproduct of the estimation of constant-dollar GDP. It is derived as the ratio of current- to constant-dollar GDP (multiplied by 100). It is also a weighted average of the detailed price indexes used in estimating constant-dollar GDP, but the indexes are combined using weights that reflect the composition of GDP in each period. Consequently, changes in the implicit price deflator reflect not only changes in prices, but also changes in the composition of GDP, and its use as a measure of price change should be avoided.

Command-basis GNP and terms of trade

Another measure of constant-dollar product—*command-basis GNP*—also is included in this volume. Command-basis GNP measures the amount of the goods and services over which a country has "command" as a result of current production; that is, it measures U.S. production in terms of its purchasing power. GNP and command-basis GNP differ in how constant-dollar estimates are prepared: In estimating constant-dollar GNP, the current-dollar value of exports of goods and services is deflated by export prices, the current-dollar value of imports of goods and services is deflated by import prices, and the current-dollar value of most factor income is deflated by the implicit price deflator for net domestic product. In estimating the constant-dollar measure of command-basis GNP, exports of goods and services and receipts of factor income are deflated by the implicit price deflator for imports of goods and services and payments of factor income.

The *terms of trade* measures the claim of a given level of U.S. production on foreign production. It is calculated as the ratio (with the decimal point shifted two places to the right) of the implicit price deflator for the sum of exports of goods and services and receipts of factor income to the implicit price deflator for the sum of imports of goods and services and payments of factor income.

Classifications of production

Type of product

Type of product classifications—goods (durable and nondurable), services, and structures—are presented in this volume for GDP and for final sales of domestic product. Goods are products that can be stored or inventoried, services are products that cannot be stored and are consumed at the place and time of purchase, and structures are products that are generally constructed at the location where they will be used and that typically have long economic lives.

If a product has characteristics of more than one of the above classifications, it is classified on the basis of the dominant characteristic. Accordingly, the following products are included in goods: Restaurant meals; expenditures abroad by U.S. residents other than for travel; replacement parts whose installation cost is minimal; dealers' margins on used equipment; and movable household appliances, such as refrigerators, even when they are included in the purchase price of a new home. The following products are included in services: Airline transportation and hospital charges, which include food; natural gas and electricity; current operating expense of nonprofit institutions, foreign travel by U.S. residents; expenditures in the United States by foreigners; repair services, which include the cost of parts (except for replacement parts whose installation cost is minimal); defense research and development; and exports and imports of certain goods, primarily military equipment purchased and sold by the Federal Government. The following products are included in structures: Mobile homes; certain types of installed equipment, such as elevators and heating and air conditioning systems; brokers' commissions on sale of structures; architectural and engineering fees included in the value of structures; land development costs; and mining exploration, shafts, and wells.[4]

In personal consumption expenditures, exports, imports, and government purchases, durable goods have an average life of at least 3 years. In fixed investment, producers' durable equipment is goods, other than structures, with an average life of at least 1 year. In change in business inventories, goods held by manufacturing and trade establishments are classified as durables or nondurables in accordance with the classification of the industry holding the inventories. Inventories held by construction establishments are classified as durables; inventories held by all other industries are classified as nondurables.

Sector

In addition to the breakdowns of GDP that appear in the five-account summary of the NIPA's (table A), this measure of production also is shown in the tables of this volume for each of the three sectors of the economy—business, households and institutions, and general government. The production of each of these sectors is defined below.

Business: Production by all entities that produce goods and services for sale at a price intended at least to approximate the costs of production (including profits) plus production by certain other entities treated as business in the NIPA's. It mainly covers the production of corporate and noncorporate private entities organized for profit. Also included is production associated with mutual financial institutions.

4. In the purchases of structures tables, compensation of government employees engaged in new construction projects is included in purchases of structures.

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

private noninsured pension funds, cooperatives, nonprofit organizations (that is, entities determined to be nonprofit by the Internal Revenue Service (IRS) for purposes of determining income tax liability) that primarily serve business, Federal Reserve banks, federally sponsored credit agencies, and government enterprises.[5] Owner-occupied housing as well as buildings and equipment owned and used by nonprofit institutions that primarily serve individuals are treated as business entities selling their current services to their owners, and thus are included in business product. Production of the business sector can be measured either in terms of the net value of the goods and services business produces or in terms of the costs incurred and profits earned by business from production.

Households and institutions: Production by households, consisting of families and unrelated individuals, and by nonprofit institutions that primarily serve individuals. Production is measured by the compensation of the employees of these entities.

General government: Production by all Federal Government and State and local government agencies except government enterprises. Production is measured by the compensation of the employees of these agencies.

Legal form of organization

For the domestic business sector, income and its components are shown in the tables of this volume for four legal forms of organizations—corporate business, sole proprietorships and partnerships, other private business, and government enterprises (employee compensation only). The entities whose production is included in each of these legal forms are specified below.

Corporate business: All entities required to file Federal corporate tax returns (IRS Form 1120 series), including mutual financial institutions and cooperatives subject to Federal income tax, private noninsured pension funds, nonprofit institutions that primarily serve business, Federal Reserve banks, and Federally sponsored credit agencies.

Sole proprietorships: All entities that would be required to file IRS Schedule C (Profits or Loss from Business) or Schedule F (Farm Income and Expenses) if the proprietor met the filing requirements, together with owner-occupied farm housing.

Partnerships: All entities required to file Federal partnership income tax returns, IRS Form 1065 (U.S. Partnership Return of Income).

Other private business: All entities that would be required to report rental and royalty income on the individual income tax return in IRS Schedule E (Supplemental Income and Loss) if the individual met the filing requirements, tax-exempt cooperatives, owner-occupied nonfarm housing, and buildings and equipment owned and used by nonprofit institutions that primarily serve individuals.

Government enterprises: Government agencies that cover a substantial proportion of their operating costs by selling goods and services to the public and that maintain their own separate accounts. A "mixed" treatment of government enterprises is used in the NIPA's, in which some types of transactions are recorded as if they were part of the general government sector and others as if they were part of the business sector.

Government enterprises are treated like other businesses and included in the NIPA business sector in that (1) their sales to final users are recorded in the business production account; (2) their outlays for materials and business services are considered intermediate rather than final and therefore are eliminated in the consolidation of the business sector production account; and (3) both their wage, salary, and other compensation payments and their income are considered charges against business product rather than charges against government product. Within the business sector, government enterprises are classified as noncorporate businesses. The profit-like income of these businesses accrues to general government and is called the current surplus of government enterprises (see definition on page M–8).

Government enterprises are treated like other government agencies and included in the NIPA government sector in that (1) their interest payments are combined with those of general government rather than those of business; (2) their purchases of equipment and structures and their inventory change are combined with general government purchases rather than with business purchases in gross private domestic investment; and (3) as a consequence of (2), no entries are recorded for consumption of fixed capital.

Industry

Industrial distributions are presented in this volume for national income and its components, capital consumption allowances, employment and hours, and the change in business inventories and the stock of business inventories.[6] The classification underlying the distributions of private activities is based on the Standard Industrial Classification (SIC).[7]

The industry distributions in most of the tables in category 6 "Income, Employment, and Product by Industry" are designated as follows: In this volume, estimates for 1929 to 1948, based on the 1942 SIC, are shown in tables designated as part A, and estimates for 1948 to 1958, based on the 1972 SIC, are shown as part B. In volume 2, estimates for 1959–87, based on the 1972 SIC, are shown as part B, and estimates for 1987–88, based on the 1987 SIC, are shown as part C. The industry distributions based on the 1987 SIC reflect the corresponding shift of most of the NIPA source data. Estimates for earlier years, which are now based on either the 1942 or the 1972 SIC, have not been adjusted to the 1987 SIC because of a lack of adequate source data. Instead, the estimates for 1987 are shown in volume 2 on the basis of both the 1972

5. For more detail on government enterprises, see the next section on legal form of organization.

6. An industrial distribution of fixed investment is also prepared as part of the procedure used to estimate capital stock. This distribution is based on data collected from establishments. For further information, write to the National Income and Wealth Division (BE-54), Bureau of Economic Analysis, U.S. Department of Commerce, Washington, DC 20230.

7. See *Standard Industrial Classification Manual, 1987*. Executive Office of the President, Office of Management and Budget (Washington, DC: U.S. Government Printing Office, 1988); *Standard Industrial Classification Manual, 1972*. Executive Office of the President, Office of Management and Budget (Washington, DC: U.S. Government Printing Office, 1972); and *Standard Industrial Classification Manual, 1942*. Executive Office of the President, Bureau of the Budget (Washington, D.C.: U.S. Government Printing Office, 1942).

Federal Reserve Bank of St. Louis

and the 1987 SIC. In this volume, the estimates for 1948 are shown on the basis of both the 1942 and the 1972 SIC.

Industrial distributions of government activities are not provided; instead, they are combined into a single category. For most series, separate estimates are shown for the activities of the Federal Government, of State and local governments, and of government enterprises. Expenditures by the Federal Government and State and local governments are also shown by type and function.

The industrial distributions for private activities are based on data collected either from "establishments" or from "companies" (also called enterprises or firms). Establishments, as defined for purposes of the SIC, are economic units, generally at a single physical location, where business is conducted or where services or industrial operations are performed. Companies consist of one or more establishments owned by the same legal entity or group of affiliated entities. Establishments are classified into an SIC industry on the basis of their principal product or service, and companies are classified into an SIC industry on the basis of the principal SIC industry of all their establishments. Because large multiestablishment companies typically own establishments that are classified in different SIC industries, industrial distributions of the same economic activity for establishments and companies can be significantly different. For example, employment by steel-manufacturing companies differs from employment by steel-manufacturing establishments because the former includes employment by establishments that are not classified as steel manufacturing and excludes employment by establishments that manufacture steel but are not owned by steel-manufacturing companies.

For the NIPA series, industrial distributions on a consistent establishment or company basis are not available. For the following series, the industrial distributions are based on establishment data: Compensation of employees, employment, hours, inventories, rental income of persons, farm proprietors' income, farm net interest, and farm noncorporate capital consumption allowances. For nonfarm proprietors, industrial distributions of proprietors' income, net interest, and capital consumption allowances are based on company data. These data are regarded as being substantially the same as if they were based on establishment data because nearly all unincorporated companies own only a single establishment (and the few multiestablishment companies usually own establishments in the same SIC industry). For corporations, industrial distributions of profits, nonfarm net interest, and capital consumption allowances are based on company data. As a result, the industrial distribution of national income presented in this volume reflects a mix of establishment and company data.

In addition to the establishment-company data problem, individual industry series presented in this volume are not fully comparable over time. Historical comparability is affected primarily by two factors. First, in some instances, the composition of industries may change due to SIC changes, and as noted above, information was lacking to permit BEA to conform the estimates for 1986 and earlier years to the 1987 SIC. This factor affects estimates based on establishment data as well as those based on company data.

Second, historical comparability is affected because the industrial classification of the same establishment or company may change over time. This factor affects company-based estimates much more than establishment-based estimates. The classification of a company is subject to change due to the following: Shifts in the level of consolidation of entities for which company reports are filed; mergers and acquisitions; and other shifts in principal activities, especially for large diversified firms. For example, the level of consolidation used by corporations in filing their Federal income tax returns was significantly altered in the 1930's and 1940's. Affiliated corporations were not allowed to file consolidated returns from 1934 to 1941; as a result, the company consisted only of individual corporations. In other years, the company consisted of either an individual corporation or a grouping of affiliated corporations. Changes in the level of consolidation used by corporations in filing these returns affected the industrial distribution of corporate profits, net interest, and capital consumption allowances, which are derived primarily from tabulations of corporate tax returns.

In addition to the SIC industrial distributions of private activities, some NIPA tables show the following special SIC groupings, the titles of which correspond to the 1987 SIC:

Financial industries consists of the following SIC industries: Depository institutions; nondepository institutions; security and commodity brokers; insurance carriers; regulated investment companies; small business investment companies; and real estate investment trusts.[8]

Nonfinancial industries consists of all other private industries.

Commodity-producing industries consists of the following SIC divisions: Agriculture, forestry, and fishing; mining; construction; and manufacturing.

Distributive industries consists of the following SIC divisions: Transportation (excluding the U.S. Postal Service); communications; electric, gas, and sanitary services; wholesale trade; and retail trade.

Service industries consists of the rest-of-the-world sector and the following SIC divisions: Finance, insurance, and real estate; and services.

8. Regulated investment companies, small business investment companies, and real estate investment trusts are included in the SIC classification "holding and other investment offices" and are not shown separately in the NIPA tables.

NOTE.—Numbers in parentheses indicate accounts and items of counterentry in the accounts. For example, line 3 of account 1 is shown as "wage and salary disbursements, (2–7)"; the counterentry is shown in account 2, line 7.

Most of the estimates corresponding to the entries on the left-hand side of account 1 are shown in table 1.14 and table 1.9. Estimates corresponding to the entries on the right-hand side of account 1 are shown in table 1.1.

Most of the estimates corresponding to the entries in account 2 are shown in table 2.1.

Most of the estimates corresponding to the entries in account 3 are shown in table 3.1 (annual only). Estimates for Federal Government receipts and expenditures are shown in table 3.2 and for State and local government, in table 3.3 (quarterly and annual).

Estimates corresponding to the entries in account 4 are shown in table 4.1.

Estimates corresponding to the entries in account 5 are shown in table 5.1.

1. Exports of goods and services and receipts of factor income deflated by the implicit price deflator for imports of goods and services and payments of factor income.
2. Ratio of the implicit price deflator for exports of goods and services and receipts of factor income to the corresponding implicit price deflator for imports with the decimal point shifted two places to the right.

NOTE.—Percent changes from preceding period for selected items in this table are shown in table 8.1.

Less: Personal remittances in kind to nonresidents (n.d.).	111	0	0	.3	.3	.3	.2	.1	.1	.1	.1	.1	.1	.1	.1	.1

NOTE.—Consumer durable goods are designated (d.), nondurable goods (n.d.), and services (s.).

1. Consists of purchases (including tips) of meals and beverages from retail, service, and amusement establishments, hotels, dining and buffet cars, schools, school fraternities, institutions, clubs, and industrial lunchrooms. Includes meals and beverages consumed both on and off-premise.
2. Includes luggage.
3. Consists of watch, clock, and jewelry repairs, costume and dress suit rental, and miscellaneous personal services.
4. Consists of rent for space and for heating and plumbing facilities, water heaters, lighting fixtures, kitchen cabinets, linoleum, storm windows and doors, window screens, and screen doors, but excludes rent for appliances and furniture and purchases of fuel and electricity.
5. Consists of space rent (see footnote 4) and rent for appliances, furnishings, and furniture.
6. Consists of transient hotels, motels, clubs, schools, and other group housing.
7. Consists of refrigerators and freezers, cooking ranges, dishwashers, laundry equipment, stoves, room air conditioners, sewing machines, vacuum cleaners, and other appliances.
8. Includes such house furnishings as floor coverings, comforters, quilts, blankets, pillows, picture frames, mirrors, art products, portable lamps, and clocks. Also includes writing equipment and hand, power, and garden tools.
9. Consists largely of textile house furnishings including piece goods allocated to house furnishing use. Also includes lamp shades, brooms, and brushes.
10. Consists of maintenance services for appliances and house furnishings, moving and warehouse expenses, postage and express charges, premiums for fire and theft insurance on personal property less benefits and dividends, and miscellaneous household operation services.
11. Excludes drug preparations and related products dispensed by physicians, hospitals, and other medical services.
12. Consists of osteopathic physicians, chiropractors, private duty nurses, chiropodists, podiatrists, and others providing health and allied services, not elsewhere classified.
13. Consists of (1) current expenditures (including consumption of fixed capital) of nonprofit hospitals and nursing homes, and (2) payments by patients to proprietary and government hospitals and nursing homes.
14. Consists of (1) premiums, less benefits and dividends, for health, hospitalization, and accidental death and dismemberment insurance provided by commercial insurance carriers, and (2) administrative expenses (including consumption of fixed capital) of Blue Cross and Blue Shield plans and of other independent prepaid and self-insured health plans.
15. Consists of premiums, less benefits and dividends, for income loss insurance.
16. Consists of premiums, less benefits and dividends, for privately administered workers' compensation.
17. Consists of (1)operating expenses of life insurance carriers and private noninsured pension plans, and (2)premiums, less benefits and dividends, of fraternal benefit societies. Excludes expenses allocated by commercial carriers to accident and health insurance.
18. Consists of current expenditures (including consumption of fixed capital) of trade unions and professional associations, employment agency fees, money order fees, spending for classified advertisements, tax return preparation services, and other personal business services.
19. Consists of premiums, less benefits and dividends, for motor vehicle insurance.
20. Consists of baggage charges, coastal and inland waterway fares, travel agents' fees, and airport bus fares.
21. Consists of admissions to professional and amateur athletic events and to racetracks.
22. Consists of dues and fees excluding insurance premiums.
23. Consists of billiard parlors; bowling alleys; dancing, riding, shooting, skating, and swimming places; amusement devices and parks; golf courses; sightseeing buses and guides; private flying operations; casino gambling; and other commercial participant amusements.
24. Consists of net receipts of lotteries and expenditures for purchases of pets and pet care services, cable TV, film processing, photographic studios, sporting and recreation camps, video cassette rentals, and recreational services, not elsewhere classified.
25. For private institutions, equals current expenditures (including consumption of fixed capital) less receipts—such as those from meals, rooms, and entertainments—accounted for separately in consumer expenditures, and less expenditures for research and development financed under contracts or grants. For government institutions, equals student payments of tuition.
26. For private institutions, equals current expenditures (including consumption of fixed capital) less receipts—such as those from meals, rooms, and entertainments—accounted for separately in consumer expenditures. For government institutions, equals student payments of tuition. Excludes child day care services, which are included in religious and welfare activities.
27. Consists of (1)fees paid to commercial, business, trade, and correspondence schools and for educational services, not elsewhere classified, and (2)current expenditures (including consumption of fixed capital) by research organizations and foundations for education and research.
28. For nonprofit institutions, equals current expenditures (including consumption of fixed capital) of religious, social welfare, foreign relief, and political organizations, museums, libraries, and foundations. The expenditures are net of receipts—such as those from meals, rooms, and entertainments—accounted for separately in consumer expenditures, and excludes relief payments within the United States and expenditures by foundations for education and research. For proprietary and government institutions, equals receipts from users.

1. Includes capital stock tax (in millions of dollars) not shown separately: 1933, 80; 1934, 92; 1935, 95; 1936, 138; 1937, 139; 1938, 127; 1939, 133; 1940, 167; 1941, 282; 1942, 329; 1943, 381; 1944, 372; and 1945, 353.
2. Consists largely of fines, fees, and royalties other than Outer Continental Shelf.
3. For 1929 and 1930, included in line 30.
4. Prior to 1958, included in line 30.
5. Prior to 1959, included in line 30.
6. Consists largely of business licenses and documentary and stamp taxes. Also, see footnotes 3, 4, and 5.
7. Consists largely of donations.

1. Consists of civil service, foreign service, Public Health Service officers, Tennessee Valley Authority, and several small retirement programs.
2. Includes the Coast Guard.
3. Consists of payments for medical services for dependents of active duty military personnel at nonmilitary facilities.
4. Consists of mustering out pay, terminal leave pay, and adjusted compensation benefits.
5. Consists largely of payments to nonprofit institutions and aid to students.
6. Prior to 1974, consists of old-age assistance, aid to the blind, and aid to the permanently and totally disabled, which were partly federally funded.
7. Consists of emergency assistance and medical insurance premium payments paid on behalf of indigents.
8. Consists largely of foster care, veterans benefits, Alaska dividends, and crime victim payments.

1. Equals Federal Government expenditures less grants-in-aid to State and local governments plus State and local government expenditures. Total expenditures include employee compensation on a disbursement basis. The estimates by function include employee compensation on an accrual basis. Wage accruals less disbursements (in millions of dollars) is zero except as follows: 1952, 32; and 1953, –76.

2. Excludes interest received by State and local social insurance funds, which is netted against expenditures for the appropriate functions.

1. Total expenditures include employee compensation on a disbursement basis. Expenditures by type and function include employee compensation on an accrual basis. Wage accruals less disbursements (in millions of dollars) is zero prior to 1971.

2. Prior to 1959, other education is included in libraries (line 12).

3. Excludes interest received by social insurance funds, which is netted against expenditures for the appropriate functions.

1. Consists largely of contributions for social insurance by residents of U.S. territories, Puerto Rico, and the Northern Mariana Islands.
2. Consists largely of sales of land, receipts from offshore oil leases, and Treasury receipts from sales of foreign currencies to government agencies.
3. Taxes received from rest of the world are included in receipts in the cash budget and netted against expenditures (transfer payments) in the national income and product accounts.
4. Consists largely of sales of goods and services and interest receipts, which are recorded as receipts in the cash budget and netted against expenditures in the national income and product accounts.
5. Consists of transfer payments, subsidies, and grants-in-aid to residents of U.S. territories, Puerto Rico, and the Northern Mariana Islands.
6. Includes the financial transactions of deposit insurance funds.
7. Consists largely of offshore oil leases and purchases of land and certain purchases of foreign currency from the Treasury by Government agencies.
8. Consists largely of real estate transactions, sales of military equipment to foreign countries, purchases of farm commodities, and purchases of defense equipment and supplies.
9. Consists largely of net expenditures of foreign currencies, grants to the District of Columbia, and net purchases of silver and minor coin metal.

1. Beginning in 1960, the treatment of net exports of gold in the NIPA's differs from that in the BPA's. BPA gold exports (line 2) and imports (line 13) are excluded from the NIPA's. Imports of gold in the NIPA's (line 16) is the excess of the value of gold in final sales of domestic product plus the change in business inventories over the value of U.S. production of gold. Prior to 1967, the treatment of net exports of gold in the NIPA's and BPA's is identical and is the same as the present NIPA treatment.

2. BPA capital gains and losses included in U.S. direct investment income abroad (line 3) and in foreign direct investment income in the United States (line 14) are removed from the NIPA's beginning in 1974 for imports and in 1977 for exports. Beginning in 1982, U.S. direct investment income abroad in the BPA's excludes capital gains and losses associated with currency translation adjustments.

3. Transfers of goods and services under military grant programs, net, are classified as exports in the BPA's. In the NIPA's, these transactions are excluded from exports and included in Federal Government purchases.

4. Consists of statistical revisions in the BPA's that have not yet been incorporated in the NIPA's.

5. Consists of arms shipments to Israel financed under the Emergency Security Act of 1973. In the NIPA's, these arms shipments are classified as military grants, which are included in the defense purchases component of GDP at the time they are acquired by the U.S. Government. Their transfer abroad is not reflected in the NIPA's.

6. Consists of transactions between the United States and its territories, Puerto Rico, and the Northern Mariana Islands. The treatment of U.S. territories, Puerto Rico, and the Northern Mariana Islands in the NIPA's differs from that in the BPA's. In the NIPA's they are included in the rest of the world; in the BPA's, they are treated as part of the United States. The adjustments to exports and imports of goods and services and to receipts and payments of factor income are shown in lines 7 and 17, respectively. The adjustment to unilateral transfers, net (line 35) consists only of transfer payments from persons because transfer payments, subsidies, and grants-in-aid from the Federal Government to residents of U.S. territories, Puerto Rico, and the Northern Mariana Islands are excluded from NIPA transfer payments to rest of the world.

7. In the BPA's, services and income transactions between parents and affiliates are recorded on a net basis. In BPA exports, U.S. parents' receipts from foreign affiliates for interest, royalties, license fees, and other services are net of such payments by U.S. parents to foreign affiliates. In BPA imports, U.S. affiliates' payments to foreign parents for interest, royalties, license fees, and other services are net of such receipts by U.S. affiliates from foreign parents. In the NIPA's, these transactions are recorded on a gross basis beginning with 1974. The amount of adjustment is identical in exports and imports and, thus, does not affect NIPA net exports of goods and services, net receipts of factor income, or net foreign investment.

8. Consists of foreign taxes withheld on direct investment income receipts of U.S. parents from their foreign affiliates and on income receipts by U.S. affiliates from their foreign parents. (Other factor income receipts in the BPA's are recorded gross of foreign taxes withheld).

9. Consists of shipments to the United States from Alaska and Hawaii. These are added to imports in 1946 to adjust to geographic coverage of imports to the 48-State coverage used in the NIPA's prior to 1960. From 1947 through 1959, such shipments are negligible. Beginning with 1960, the adjustment is not required because Alaska and Hawaii gained statehood in late 1959. Also includes U.S. taxes withheld on factor income earned in the United States by rest of the world that are not included in these income payments in the BPA's.

10. Consists of financing provided to Israel in accordance with the Emergency Security Act of 1973; a U.S. Government payment to India under the Agricultural Trade Development and Assistance Act; write- offs of loan principal owed to the U.S. Government, which are a type of financial transaction that is excluded from the NIPA's; and taxes paid to (or withheld by) foreign governments by U.S. residents net of taxes paid by rest of the world to the U.S. Government.

1. In this table, purchases of structures includes compensation of government employees engaged in new force-account construction. In tables 1.3, 3.1, and 3.7, this compensation is classified as a service and is included as part of government compensation of employees.

2. Consists of hotels and motels, buildings used primarily for social and recreational activities, and buildings not elsewhere classified, such as passenger terminals, greenhouses, and animal hospitals.

3. Consists of streets, dams and reservoirs, sewer and water facilities, parks, airfields, etc. Also includes buildings of private local transit systems from 1929 to 1958; beginning in 1959, these buildings are included in other nonresidential buildings.

4. Consists of dormitories, fraternity and sorority houses, nurses' homes, etc.

5. Consists of general office buildings, police and fire stations, courthouses, auditoriums, garages, passenger terminals, etc.

6. Consists of electric and gas facilities, transit systems, airfields, etc.

1. In this table, purchases of structures includes compensation of government employees engaged in new force-account construction. In tables 1.4 and 3.8, this compensation is classified as a service and is included as part of government compensation of employees.

2. Consists of hotels and motels, buildings used primarily for social and recreational activities, and buildings not elsewhere classified, such as passenger terminals, greenhouses, and animal hospitals.

3. Consists of streets, dams and reservoirs, sewer and water facilities, parks, airfields, etc. Also includes buildings of private local transit systems from 1929 to 1958; beginning in 1959, these buildings are included in other nonresidential buildings.

4. Consists of dormitories, fraternity and sorority houses, nurses' homes, etc.

5. Consists of general office buildings, police and fire stations, courthouses, auditoriums, garages, passenger terminals, etc.

6. Consists of electric and gas facilities, transit systems, airfields, etc.

n.e.c. Not elsewhere classified.

1. Line 5 includes new computers and peripheral equipment only. Prior to 1982, all computers and peripheral equipment are included in other office, computing, and accounting machinery (line 6).

2. For 1929–45, includes electrical transmission, distribution, and industrial apparatus (line 16) and electrical equipment n.e.c (line 30).

1. Beginning in 1982, this series is derived primarily from the Census Bureau series "current cost inventories." For earlier periods, it is derived from the Census Bureau "book value inventories" series. The series differ in the treatment of inventories reported on a last-in, first-out (LIFO) basis: The series prior to 1982 is a mix of LIFO and non-LIFO inventories; the series beginning in 1982 is entirely on a non-LIFO basis.

2. Beginning with 1973, the inventory valuation adjustment (IVA) shown in this table differs from the IVA that adjusts business incomes. The IVA in this table reflects the mix of methods (first-in, first-out; last-in, first-out; etc.) underlying inventories derived primarily from Census Bureau statistics (see Footnote 1). This mix differs from that underlying business income derived primarily from Internal Revenue Service statistics. Prior to 1973, the two IVA's are the same because information required for separate estimates is not available.

3. Prior to 1959, inventories held by construction establishments are included in line 25.

NOTE.—Estimates for 1966 and earlier periods are based on the 1972 Standard Industrial Classification (SIC). Beginning in 1987, estimates are based on the 1987 SIC. This discontinuity is small and affects only the manufacturing durable and manufacturing nondurable goods estimates.

1. Prior to 1959, inventories held by construction establishments are included in line 23.

NOTE.—Estimates for 1986 and earlier periods are based on the 1972 Standard Industrial Classification (SIC). Beginning in 1987, estimates are based on the 1987 SIC. This discontinuity is small and affects only the manufacturing durable and manufacturing nondurable goods estimates.

1. Inventories are as of the end of the quarter. The quarter-to-quarter change in inventories calculated from current-dollar inventories in this table is not the current-dollar change in business inventories (CBI) component of GNP. The former is the difference between two inventory stocks, each valued at their respective end-of-quarter prices. The latter is the change in the physical volume of inventories valued at average prices of the quarter. In addition, changes calculated from this table are at quarterly rates, whereas CBI is stated at annual rates.

2. Prior to 1959, inventories held by construction establishments are included in line 5.

3. Quarterly totals at monthly rates. Final sales of domestic business equals final sales of domestic product less gross product of households and institutions and general government and includes a small amount of final sales by farm.

NOTE.—Estimates for 1986 and earlier periods are based on the 1972 Standard Industrial Classification (SIC). Beginning in 1987, estimates are based on the 1987 SIC. This discontinuity is small and affects only the manufacturing durable and manufacturing nondurable goods estimates.

Nonfarm inventories to final sales of goods and structures.	28	3.27	3.25	3.26	3.32	3.39	3.41	3.44	3.47	3.45	3.49	3.49	3.49	3.53	3.48	3.44	3.38

1. Inventories are as of the end of the quarter. Quarter-to-quarter changes calculated from this table are at quarterly rates, whereas the constant-dollar change in business inventories component of GNP is stated at annual rates.
2. Prior to 1959, inventories held by construction establishments are included in line 5.
3. Quarterly totals at monthly rates. Final sales of domestic business equals final sales of domestic product less gross product of households and institutions and general government and includes a small amount of final sales by farm.

NOTE.—Estimates for 1986 and earlier periods are based on the 1972 Standard Industrial Classification (SIC). Beginning in 1987, estimates are based on the 1987 SIC. This discontinuity is small and affects only the manufacturing durable and manufacturing nondurable goods estimates.

n.e.c. Not elsewhere classified.
1. Included in anthracite mining (line 9).
2. Included in lumber and basic timber products (line 16).
3. Included with iron and steel and their products, including ordnance (line 19).
4. Included with educational services, n.e.c. (line 71).

NOTE.—Estimates in part A of this table are based on the 1942 Standard Industrial Classification (SIC); and estimates in part B, including 1948, are based on the 1972 SIC.

n.e.c. Not elsewhere classified.
1. Includes Coast Guard.
2. Included in anthracite mining (line 9).
3. Included in lumber and basic timber products (line 16).
4. Included with iron and steel and their products, including ordnance (line 19).
5. Included with educational services, n.e.c. (line 71).

NOTE.—Estimates in part A of this table are based on the 1942 Standard Industrial Classification (SIC); and estimates in part B, including 1948, are based on the 1972 SIC.

n.e.c. Not elsewhere classified.

1. Includes Coast Guard.
2. Included in anthracite mining (line 9).
3. Included in lumber and basic timber products (line 16).
4. Included with iron and steel and their products, including ordnance (line 19).
5. Included with educational services, n.e.c. (line 71).

NOTE.—Estimates in part A of this table are based on the 1942 Standard Industrial Classification (SIC); and estimates in part B, including 1948, are based on the 1972 SIC.

n.e.c. Not elsewhere classified.

1. Full-time equivalent employees equals the number of employees on full-time schedules plus the number of employees on part-time schedules converted to a full-time basis. The number of full-time equivalent employees in each industry is the product of the total number of employees and the ratio of average weekly hours per employee for all employees to the average weekly hours per employee on full-time schedules.

2. Includes Coast Guard.

3. Included in anthracite mining (line 9).

4. Included in lumber and basic timber products (line 16).

5. Included with iron and steel and their products, including ordnance (line 19).

6. Included with educational services, n.e.c. (line 71).

NOTE.—Estimates in part A of this table are based on the 1942 Standard Industrial Classification (SIC): and estimates in part B, including 1948, are based on the 1972 SIC.

1. Full-time equivalent employees equals the number of employees on full-time schedules plus the number of employees on part-time schedules converted to a full-time basis. The number of full-time equivalent employees in each industry is the product of the total number of employees and the ratio of average weekly hours per employee for all employees to average weekly hours per employee on full-time schedules.

2. Includes Coast Guard.

NOTE.—Estimates in part A of this table are based on the 1942 Standard Industrial Classification (SIC); and estimates in part B, including 1948, are based on the 1972 SIC.

n.e.c. Not elsewhere classified.
1. Includes Coast Guard.
2. Included in anthracite mining (line 9).
3. Included in lumber and basic timber products (line 16).
4. Included with iron and steel and their products, including ordnance (line 19).
5. Included with educational services, n.e.c. (line 71).

NOTE.—Estimates in part A of this table are based on the 1942 Standard Industrial Classification (SIC); and estimates in part B, including 1948, are based on the 1972 SIC.

n.e.c. Not elsewhere classified.

1. Equals the number of full-time equivalent employees (table 6.5) plus the number of self-employed persons (table 6.7). Unpaid family workers are not included.

2. Includes Coast Guard.

3. Included in anthracite mining (line 9).

4. Included in lumber and basic timber products (line 16).

5. Included with iron and steel and their products, including ordnance (line 19).

6. Included with educational services, n.e.c. (line 71).

NOTE.—Estimates in part A of this table are based on the 1942 Standard Industrial Classification (SIC): and estimates in part B, including 1948, are based on the 1972 SIC.

1. Equals the number of full-time equivalent employees (table 6.5) plus the number of self-employed persons (table 6.7). Unpaid family workers are not included.
2. Includes Coast Guard.

NOTE.—Estimates in part A of this table are based on the 1942 Standard Industrial Classification (SIC): and estimates in part B, including 1948, are based on the 1972 SIC.

n.e.c. Not elsewhere classified.

1. Consists of receipts by all U.S. residents, including both corporations and persons, of dividends from their incorporated foreign affiliates, their share of reinvested earnings of their incorporated foreign affiliates, and earnings of unincorporated foreign affiliates, net of corresponding payments. Receipts by U.S. residents of their share of reinvested earnings of their incorporated foreign affiliates are not included from 1930 to 1936; corresponding payments are not included from 1930 to 1939.

2. Included in anthracite mining (line 8).

3. Included in lumber and basic timber products (line 15).

4. Included with iron and steel and their products, including ordnance (line 18).

NOTE.—Estimates in part A of this table are based on the 1942 Standard Industrial Classification (SIC); and estimates in part B are based on the 1972 SIC.

1. Consists of social services, membership organizations, and miscellaneous professional services.
2. Consists of receipts by all U.S. residents, including both corporations and persons, of dividends from their incorporated foreign affiliates, their share of reinvested earnings of their incorporated foreign affiliates, and earnings of unincorporated foreign affiliates, net of corresponding payments.

NOTE.—Estimates in part A of this table are based on the 1942 Standard Industrial Classification (SIC); and estimates in part B are based on the 1972 SIC.

n.e.c. Not elsewhere classified.

1. Consists of receipts by all U.S. residents, including both corporations and persons, of dividends from their incorporated foreign affiliates, their share of reinvested earnings of their incorporated for affiliates, and earnings of unincorporated foreign affiliates, net of corresponding payments. Receipts by U.S. residents of their share of reinvested earnings of their incorporated foreign affiliates are not included from 1930 to 1936; corresponding payments are not included from 1930 to 1939.

NOTE.—Estimates in part A of this table are based on the 1942 Standard Industrial Classification (SIC); and estimates in part B are based on the 1972 SIC.

n.e.c. Not elsewhere classified.

1. Consists of receipts by all U.S. residents of dividends from their incorporated foreign affiliates, their share of reinvested earnings of their incorporated foreign affiliates, and earnings of unincorporated foreign affiliates, net of corresponding payments. Receipts by U.S. residents of their share of reinvested earnings of their incorporated foreign affiliates are not included from 1930 to 1936; corresponding payments are not included from 1930 to 1939.

NOTE.—Estimates in part A of this table are based on the 1942 Standard Industrial Classification (SIC); and estimates in part B are based on the 1972 SIC.

n.e.c. Not elsewhere classified.

1. Consists of receipts by all U.S. residents of dividends paid by the incorporated foreign affiliates and of earnings of their unincorporated foreign affiliates, net of the corresponding payments. Estimates for 1929 include reinvested earnings of incorporated affiliates. For other years, reinvested earnings are included in undistributed profits in table 6.21.

NOTE.—Estimates in part A of this table are based on the 1942 Standard Industrial Classification (SIC); and estimates in part B are based on the 1972 SIC.

n.e.c. Not elsewhere classified.

1. Consists of receipts by all U.S. residents of their share of the reinvested earnings of their incorporated foreign affiliates, net of the corresponding payments to foreign residents for their share of the reinvested earnings of their incorporated U.S. affiliates. Receipts are not included from 1930 to 1936; payments are not included from 1930 to 1939. Estimates for 1929 are included in dividends paid in table 6.20.

NOTE.—Estimates in part A of this table are based on the 1942 Standard Industrial Classification (SIC); and estimates in part B are based on the 1972 SIC.

1. Consists of social services, membership organizations, and miscellaneous professional services.
2. Consists of receipts by all U.S. residents of their share of the reinvested earnings of their incorporated foreign affiliates and reinvested earnings of their unincorporated foreign affiliates. Prior to 1982, reinvested earnings of unincorporated foreign affiliates were treated as dividends.
3. Consists of payments to foreign residents of their share of the reinvested earnings of their incorporated U.S. affiliates and reinvested vested earnings of their unincorporated U.S. affiliates. Prior to 1980, reinvested earnings of unincorporated U.S. affiliates were treated as dividends.

NOTE.—Estimates in part A of this table are based on the 1942 Standard Industrial Classification (SIC); and estimates in part B are based on the 1972 SIC.

NOTE.—The fixed-weighted measures use as weights the composition of output in 1987. The alternative quantity and price indexes are not included in this volume. However, annual estimates of these alternative indexes for 1929 forward and quarterly estimates for 1947 forward are available upon request. Percent changes from preceding period for selected items in this table are shown in table 8.1.

Capital consumption adjustment for national income (4+13+19+26).	27	−1.5	−1.4	−4.6	−5.7	−6.3	−5.9	−5.9	−6.8	−6.6	−5.8	−5.0	−3.7	−4.6	−4.8	−4.7

1. Except for farm proprietorships and partnerships (line 14) and other private business (line 18), the capital consumption adjustment is calculated in two parts. The adjustment for consistent accounting at historical cost converts depreciation based on the service lives and depreciation schedules employed by firms when filing their income tax returns to consistent service lives and straight-line depreciation schedules. The adjustment for current replacement cost converts the historical cost series with consistent accounting to a current replacement cost series. For farm proprietorships and partnerships and other private business, the historical cost series is based on consistent service lives and straight-line depreciation schedules so that the adjustment reflects only a conversion to current replacement cost.

2. Fixed capital assets owned and used by these entities are considered to be business activities selling their current services to their owners. The value of these services is included in personal consumption expenditures and is equal to their current-account purchases including consumption of fixed capital.

NOTE.—The numbers in parentheses indicate the tables and line numbers from which the entries in this table are derived.

1. Employer contributions to publicly administered programs are classified as employer contributions for social insurance. Employer contributions to privately administered programs are classified as other labor income. Consequently, government contributions to privately administered health and life insurance and worker's compensation plans for government employees are classified as other labor income.

2. Consists largely of directors' fees.

1. Remitted earnings to foreign residents from their unincorporated U.S. affiliates are treated as dividends paid by domestic corporate business (line 2) and as dividends received by the rest of the world (line 10). Prior to 1980, reinvested earnings of unincorporated U.S. affiliates were also treated as dividends.

2. Earnings of U.S. residents remitted by their unincorporated foreign affiliates are treated as dividends paid by the rest of the world (line 5) and as dividends received by domestic corporate business (line 7). Prior to 1982, reinvested earnings of unincorporated foreign affiliates were also treated as dividends.

1. Excludes interest paid or received by government enterprises, whose interest is included in the government sector.

2. Consists of interest paid on the deposit liabilities of commercial and mutual savings banks, savings and loan associations, and credit unions.

3. Interest received by nonfinancial sole proprietorships and partnerships is considered interest received by persons and is included in line 28.

NOTE.—In table 8.17, imputed interest paid (line 36) is the difference between the property income received by financial intermediaries from the investment of depositors' or beneficiaries' funds and the interest paid by them to business, persons, governments, and rest of the world. In table 8.18, imputed interest (line 55)—the interest component of imputations that affect GNP—consists of the imputed interest paid by financial intermediaries other than life insurance carriers and private noninsured pension plans to persons and government, and the interest paid on owner-occupied housing and on buildings and equipment owned and used by nonprofit institutions serving individuals.

1. Contributions for these programs, for which a social insurance fund is imputed, are set equal to benefits paid. These payments are funded directly out of current budget.

2. Consists largely of retirement programs for Public Health Service officers and employees of the judiciary.

3. Consists of payments for medical services for dependents of active duty military personnel at nonmilitary facilities. Notes.—(1) Only national income and product items for which there are imputations are shown in this table. (2) In table 8.17, imputed interest paid (line 36) is the difference between the property income received by financial intermediaries from the investment of depositors' or beneficiaries' funds and the interest paid by them to business, persons, governments, and rest of the world. In table 8.18, imputed interest (line 55)—the interest component of imputations that affect GNP—consists of the imputed interest paid by financial intermediaries other than life insurance carriers and private noninsured pension plans to persons and government, and the interest paid on owner-occupied housing and on buildings and equipment owned and used by nonprofit institutions serving individuals.

1. Consists of interest paid by nonprofit organizations serving business and by credit unions.
2. Consists of posttabulation amendments, construction interest capitalized on tax returns, interest reported on tax returns in cost of goods sold, and interest passed through to shareholders by small business corporations.
3. Consists of private noninsured pension plans, nonprofit organizations serving business, credit unions, and other tax-exempt interest received by commercial banks and nonlife insurance carriers.
4. Consists of posttabulation amendments, interest received by credit agencies and finance companies reported as business receipts on tax returns, and interest passed through to shareholders by small business corporations.

1. Equals imputed interest received by persons from life insurance carriers and private noninsured pension plans as shown in table 8.17 (line 51).
2. Consists of income earned by low-income individuals who are not required to file income tax returns, unreported income that is included in the NIPA measure, and gross errors and omissions in lines 2 through 15. Also includes the net effect of errors in the IRS adjusted gross income (line 17) and NIPA personal income (line 1) measures. Such errors can arise from the sample used by IRS to estimate line 17 and from the data sources used by BEA to estimate line 1.

Index to the NIPA Tables

The entries in this index refer to national income and product accounts (NIPA) table numbers. The 53 quarterly tables that appear each month in the SURVEY OF CURRENT BUSINESS are identified by bold italic type in the index; other tables are printed in regular type.

The first character of the NIPA table number (the number preceding the decimal point) identifies the table as belonging to one of the following subject areas:

1. Product and Income
2. Personal Income and Outlays
3. Government Receipts and Expenditures
4. Foreign Transactions
5. Saving and Investment
6. Income, Employment, and Product by Industry
7. Quantity and Price Indexes
8. Supplementary Tables
9. Seasonally Unadjusted Estimates

For most of the NIPA tables showing the industry distributions of gross domestic product, national income, and their components, a suffix is used to represent the year of the Standard Industrial Classification (SIC) underlying the estimates. Estimates for 1929–48, based on the 1942 SIC, are shown in tables designated with an "A" suffix; estimates for 1948–87, based on the 1972 SIC, are shown in tables with a "B" suffix; and estimates for 1987 forward, based on the 1987 SIC, are shown in tables with a "C" suffix.

For several tables in the "Government Receipts and Expenditures" section, a suffix is used to indicate that more detail is available for recent time periods than for earlier periods. Specifically, tables 3.7, 3.8, and 3.9 show more detail beginning with estimates for 1972, and table 3.18 shows more detail beginning with estimates for 1968. In each case, the corresponding tables for the earlier period are designated with an "A" suffix, and the tables for the later period are designated with a "B" suffix.

A

Accidental damage 8.19

Accounting machinery 5.8, 5.9, 7.8

Accruals See corporate profits tax accruals; indirect business tax and nontax accruals; wage accruals less disbursements.

Additions and alterations, structures: Included in improvements to residential structures.

Adjusted gross income 8.24

Adjustment See capital consumption adjustment; inventory valuation adjustment; not seasonally adjusted tables; seasonally adjusted.

Administrative expenses of social insurance funds 3.14

Administrative, legislative, and judicial activities 3.17

After-tax income See corporate profits after tax; disposable personal income.

Agricultural services, forestry, and fisheries (industry tables) 6.2A, 6.2B, 6.2C, 6.3A, 6.3B, 6.3C, 6.4A, 6.4B, 6.4C, 6.5A, 6.5B, 6.5C, 6.6A, 6.6B, 6.6C, 6.7A, 6.7B, 6.7C, 6.8A, 6.8B, 6.8C, 6.9B, 6.9C, 6.12A, 6.12B, 6.12C, 6.13A, 6.13B, 6.13C, 6.17A, 6.17B, 6.17C, 6.18A, 6.18B, 6.18C, 6.19A, 6.19B, 6.19C, 6.20A, 6.20B, 6.20C, 6.21A, 6.21B, 6.21C, 6.22A, 6.22B, 6.22C

Agriculture:
- Forestry, and fisheries (industry tables) 6.1A, ***6.1B***, ***6.1C***, 6.2A, 6.2B, 6.2C, 6.3A, 6.3B, 6.3C, 6.4A, 6.4B, 6.4C, 6.5A, 6.5B, 6.5C, 6.6A, 6.6B, 6.6C, 6.7A, 6.7B, 6.7C, 6.8A, 6.8B, 6.8C, 6.9B, 6.9C, 6.10B, 6.10C, 6.11B, 6.11C, 6.13A, 6.13B, 6.13C, 6.15A, 6.15B, 6.15C, 6.17A, 6.17B, 6.17C, 6.18A, 6.18B, 6.18C, 6.19A, 6.19B, 6.19C, 6.20A, 6.20B, 6.20C, 6.21A, 6.21B, 6.21C, 6.22A, 6.22B, 6.22C
- Government expenditures 3.15, 3.16, 3.17
- Machinery 5.8, 5.9, 7.8
- Products, exports ***4.3***, ***4.4***, ***7.10***
- Subsidies 3.13
- *See also* farm.

Aid to families with dependent children ***2.1***, 3.12

Air transportation:
- Current surplus of government enterprises 3.13
- Government expenditures 3.16, 3.17
- Industry tables 6.2A, 6.2B, 6.2C, 6.3A, 6.3B, 6.3C, 6.4A, 6.4B, 6.4C, 6.5A, 6.5B, 6.5C, 6.6A, 6.6B, 6.6C, 6.8A, 6.8B, 6.8C, 6.17A, 6.17B, 6.17C, 6.18A, 6.18B, 6.18C, 6.19A, 6.19B, 6.19C, 6.20A, 6.20B, 6.20C, 6.21A, 6.21B, 6.21C, 6.22A, 6.22B, 6.22C
- Personal consumption expenditures 2.4, 2.5, 2.6, 2.7, 7.5
- Subsidies 3.13

Sports, spectator 2.4, 2.5

Standard Industrial Classification (SIC): The system of defining industries that is used in many government and private applications, including the industry tables in the NIPA's.

State and local government:
- Capital gains 3.19
- Compensation of employees *3.3*, 3.7A, *3.7B*, 3.8A, *3.8B*, *7.11*
- Corporate profits tax accruals *3.3*, 9.4
- Deficit See surplus or deficit, NIPA's.
- Dividends received *3.3*, 3.14, 3.17, 3.19, 8.16, 9.4
- Donations received 3.4, 3.5
- Enterprises:
  - Current surplus *3.3*, 3.13, 3.17, 3.19, 9.4
  - Industry tables 6.2A, 6.2B, 6.2C, 6.3A, 6.3B, 6.3C, 6.4A, 6.4B, 6.4C, 6.5A, 6.5B, 6.5C, 6.6A, 6.6B, 6.6C, 6.8A, 6.8B, 6.8C
- Expenditures *3.3*, 3.17, 3.19, 9.4
- Federal grants-in-aid *3.2*, *3.3*, 3.15, 3.20, 9.3, 9.4
- General (industry tables) 6.2A, 6.2B, 6.3A, 6.3B, 6.3C, 6.4A, 6.4B, 6.4C, 6.5A, 6.5B, 6.5C, 6.6A, 6.6B, 6.6C, 6.8A, 6.8B, 6.8C
- Indirect business tax and nontax accruals *3.3*, 3.5, 9.4
- Industry tables 6.2A, 6.2B, 6.2C, 6.3A, 6.3B, 6.3C, 6.4A, 6.4B, 6.4C, 6.5A, 6.5B, 6.5C, 6.6A, 6.6B, 6.6C, 6.8A, 6.8B, 6.8C
- Interest paid and received *3.3*, 3.17, 3.19, 8.17, 9.4
- Personal tax and nontax receipts *3.3*, 3.4, 9.4
- Product and income *1.7*, *1.8*, *7.14*
- Purchases *1.1*, *1.2*, *3.3*, 3.7A, *3.7B*, 3.8A, *3.8B*, 3.9A, 3.9B, 3.14, 3.17, *7.1*, *7.11*, *8.1*, 9.1, 9.4
- Receipts *3.3*, 3.19, 9.4
- Relation to other measures 3.19
- Sales 3.9A, 3.9B
- Social insurance funds:
  - Benefits (transfer payments) 3.12, 3.14
  - Contributions *3.3*, 3.6, 3.14, 3.19, 8.14, 9.4
  - Surplus or deficit *3.3*, 3.14
- Subsidies *3.3*, 3.13, 3.17, 9.4
- Surplus or deficit, NIPA's *3.3*, 3.14, *5.1*, 9.1, 9.4
  - *See also* State and local government enterprises, current surplus.
- Transfer payments to persons *3.3*, 3.12, 3.17, 9.4
- Wage accruals less disbursements *3.3*, 9.1, 9.4

Stationery and writing supplies 2.4, 2.5, 2.6, 2.7, 7.5

Statistical discrepancy *1.7*, *1.8*, *1.9*, *1.10*, 1.12, 1.13, *5.1*, *7.14*, *7.13*, 8.18

Stocks See inventories.
