INTRODUCTION

This Appendix to the Budget contains two types of statements in accordance with the provisions of section 204 of the Budget and Accounting Act as amended: (*a*) Information as to obligations, classified according to the uniform object categories, and (*b*) information as to the personal services by grade and title.

Schedules are shown in this Appendix in the same order as in the Budget. The object schedules are identical with those printed in the Budget.

The detail of personal services breaks down the employment in "permanent" positions between departmental (central office) and field, with a further analysis by classification grade and in the higher grades by title. A "lapse" line provides a deduction for savings due to vacancies, leave without pay, etc. Another line is used to indicate the part-year savings which are due to the fact that the general change in pay scales in fiscal year 1950 was effective for only a part of the year (approximately 8 months in most cases). The money required for temporary positions and special categories of personnel, and additional compensation for overtime, night work, etc., are added to arrive at a grand total of personal services. (As in the case of the 1950 Budget, the detail of personal services is omitted in the case of those accounts where there is no appropriation requested at this time and where no obligations are projected in the Budget for the fiscal year 1952.)

[1] These figures were derived by applying the percentage of the total applicable to this appropriation on the basis of an analysis of specific activities. Since the Southwestern Power Administration realizes definite economies from conducting the operation and maintenance program and the construction program on an integrated staff basis, it is not possible in many cases to assign individual positions to a specific program.

[1] These figures were derived by applying the percentage of the total applicable to this appropriation on the basis of an analysis of specific activities. Since the Bonneville Power Administration realizes definite economies from conducting the construction program and the operation and maintenance program on an integrated staff basis, it is not possible in many cases to assign individual positions to a specific program. This method of prosecuting the Administration's programs is reflected in administrative provisions contained in appropriation language for the Bonneville Power Administration.
