Under existing legislation, 1964.—Part B of Public Law 88–210, approved December 18, 1963, amended the National Defense Education Act of 1958 so as to authorize additional funds for loans to college students, refilling of vacated graduate fellowships, and additional grants to States for guidance and counseling programs. The supplemental will provide for initiating these programs in 1964.

[EXPANSION OF TEACHING IN EDUCATION OF THE MENTALLY RETARDED]

[For grants to public or other nonprofit institutions of higher learning and to State educational agencies, pursuant to the Act of September 6, 1958, as amended (20 U.S.C. 611–617), $1,000,000.] (*Department of Health, Education, and Welfare Appropriation Act, 1964.*)

Note.—Estimate for 1965 for activities previously carried under this title has been transferred in the estimates to "Educational improvement for the handicapped." The amount obligated for 1963 is shown in the schedule as a comparative transfer.

EDUCATIONAL IMPROVEMENT FOR THE HANDICAPPED

For grants for training and research and demonstrations with respect to handicapped children pursuant to the Act of September 6, 1958, as amended (20 U.S.C. 611–617), and section 302 of the Mental Retardation Facilities and Community Mental Health Centers Construction Act of 1963 (Public Law 88–164), $16,500,000.

Note.—Includes estimate for 1965 for activities previously carried under the following titles:
"Expansion of teaching in education of the mentally retarded."
"Expansion of teaching in education of the deaf."
The amount obligated in 1963 is shown in the schedule as a comparative transfer.

Program and Financing (in thousands of dollars)

New obligational authority (appropriation)			**16,500**

1. *Training grants.*—Grants are made to support training of teachers, supervisors, speech correctionists, research and other professional personnel in fields related to education of the handicapped children. Prior to 1964, these grants supported trainees for education of the mentally retarded and deaf. Public Law 88–164, approved October 13, 1963, broadened this authority to include trainees preparing for employment in education of the hard of hearing, speech impaired, visually handicapped, seriously emotionally disturbed, crippled, and other health impaired children. A supplemental appropriation has been requested for 1964.

OFFICE OF EDUCATION—Continued

General and special funds—Continued

COOPERATIVE RESEARCH—Continued

Research, demonstrations, course content improvement and related programs are carried out in cooperation with colleges, universities and State education agencies. Research projects have been supported in such areas as improvement of reading, early identification of mentally retarded children, more effective teaching, means of identifying and developing talented youth, and the role of the school in combating juvenile delinquency. Curriculum improvement projects have been directed principally to the fields of English and social studies. Demonstrations have been conducted to introduce school personnel to new materials and techniques for teaching mathematics and for education of the gifted. Course content and demonstration programs will be broadened and expanded in 1965 to assist in introducing the results of proven research into the schools. In addition, particular emphasis will be placed on projects to strengthen teacher training programs, to improve teaching of the arts, and to help smaller universities and colleges develop educational research programs.

	1962 actual	*1963 actual*	*1964 estimate*	*1965 estimate*
Number of research projects approved	113	107	170	114
Number of course content, demonstration and other projects approved	17	31	123	183

EDUCATIONAL RESEARCH (SPECIAL FOREIGN CURRENCY PROGRAM)

For [purchase of] *payments in* foreign currencies which the Treasury Department determines to be excess to the normal requirements of the United States, for necessary expenses of the Office of Education, as authorized by law, $500,000, to remain available until expended: *Provided,* That this appropriation shall be available, in addition to other appropriations to such agency, for [the purchase of] *payments in* the foregoing currencies. (*Department of Health, Education, and Welfare Appropriation Act, 1964.*)

Program and Financing (in thousands of dollars)

	1963 actual	1964 estimate	1965 estimate
Program by activities:			
Research in foreign education (dollar equivalents) (costs—obligations)	34	514	865

Unobligated balance carried forward	380	365	
New obligational authority (appropriation)	**400**	**500**	**500**

Foreign currencies which are excess to the normal requirements of the United States are used to support research projects abroad which will add to educational and scientific knowledge in the United States. Areas of study in which research is supported include the identification of talented youth and the teaching of basic academic subjects. In addition, comparative education studies on educational systems of other countries are made.

Study and research grants are made and seminars are held for teachers and prospective teachers to improve teaching of modern foreign language and area studies in schools, colleges, and universities in the United States. About 285 grants will be awarded in 1964 and 1965, a majority of which are concerned with the studies of modern languages and cultures of the non-Western world.

SALARIES AND EXPENSES

For expenses necessary for the Office of Education, including surveys, studies, investigations, and reports regarding libraries; coordination of library service on the national level with other forms of adult education; development of library service throughout the country; purchase, distribution, and exchange of education documents, motion-picture films, and lantern slides; [$14,761,000] *$19,699,000.* (*Department of Health, Education, and Welfare Appropriation Act, 1964.*)

[1] Selected resources as of June 30 are as follows: Unpaid undelivered orders, 1962, $477 thousand; 1963, $839 thousand; 1964, $1,236 thousand; 1965, $1,305 thousand.

1. *Educational research and development.*—Research and surveys, including basic educational statistics studies, are conducted and publications are issued on the condition and progress of education at all levels. Consultative services are provided to Federal, State, and local agencies, institutions of higher education, professional groups, and to the public.

The Bureau of Educational Research and Development administers programs of cooperative research in education and grants for educational media research, for improving statistical services authorized by the National Defense Education Act, for rural library services, and for training and research programs for the handicapped. In addition, the Bureau carries out Office of Education responsibilities for encouraging and assisting in the establishment of science clubs, and also for captioning and distributing motion picture films for the deaf and supporting research and training programs in this area.

2. *International education.*—Information is developed and disseminated on education in other countries. The Bureau administers programs relating to teacher development in language and area studies and educational exchange programs in cooperation with the Department of State and the Agency for International Development.

3. *Educational assistance programs.*—The Bureau of Educational Assistance administers financial aid programs including construction grants and loans under the Higher Education Facilities Act of 1963; construction and operation grants to school districts in federally affected areas; support of land-grant colleges and universities under the Morrill-Nelson and Bankhead-Jones Acts; vocational education programs under the George-Barden and Smith-Hughes Acts, and the Vocational Education Act of 1963; and programs authorized by the National Defense Education Act for: (a) strengthening science, mathematics, and foreign language instruction; (b) guidance, counseling, and testing; (c) vocational education; (d) student loans; (e) foreign language development; and (f) graduate fellowships. Vocational training programs are administered under the Area Redevelopment and Manpower Development and Training Acts in cooperation with the Department of Labor. A supplemental appropriation for 1964 is anticipated for separate transmittal.

4. *Program direction and services.*—Central management and other services to the various programs of the Office are provided; program plans, legislative programs and studies and reports on Federal and State educational legislation are developed; and information services are made available to the public. A program of regional representation is provided. Civil defense education activities are carried out in cooperation with the Department of Defense.

PROPOSED EDUCATION LEGISLATION—Continued

Under proposed legislation, 1964 and 1965.—Legislative proposals included in the Administration's National Education Improvement Act of 1963 together with other measures which would facilitate public school desegregation and assist in education of agricultural migrants are included in the budget. These proposals will increase educational opportunities for individuals in higher education, upgrade and strengthen training of teachers, expand library services and facilities, stimulate basic education and extension programs for adults, improve teachers' salaries and aid in construction of public school classrooms. In addition, an enlarged program of project grants is recommended to assist in meeting special educational needs and to provide special services for schoolchildren—including the handicapped, the illiterate, the culturally disadvantaged, slow learners, and the gifted and talented as well—particularly for use in connection with community action programs to combat poverty.

[OFFICE OF] VOCATIONAL REHABILITATION *ADMINISTRATION*

General and special funds:

Grants to States

For grants to States in accordance with the Vocational Rehabilitation Act, as amended, [$88,700,000] *$100,100,000*, of which [$85,700,000] *$97,100,000* is for vocational rehabilitation services under section 2 of said Act; and $3,000,000 is for extension and improvement projects under section 3 of said Act: *Provided*, That allotments under section 2 of said Act to the States for the current fiscal year shall be made on the basis of [$140,000,000] *$175,000,000*, and this amount shall be considered the sum available for allotments under such section for such fiscal year: *Provided further*, That additional allotments, not exceeding [$550,000] *$900,000* in the aggregate, for grants under section 2 of said Act may be made, in accordance with regulations of the Secretary, to States in which the Federal share of the costs of rehabilitation services under such section exceeds their respective allotments from such [$140,000,000] *$175,000,000*: *Provided further*, That the allotment to any State under section 3(a)(1) of said Act shall be not less than $15,000.

Grants to States, next succeeding fiscal year: For making, after May 31, of the current fiscal year, grants to States under sections 2 and 3 of the Vocational Rehabilitation Act, as amended, for the first quarter of the next succeeding fiscal year such sums as may be necessary, the obligations incurred and the expenditures made thereunder to be charged to the appropriation therefor for that fiscal year: *Provided*, That the payments made pursuant to this paragraph shall not exceed the amount paid to the States for the first quarter of the current fiscal year. (*29 U.S.C. 31–42; 68 Stat. 652; Department of Health, Education, and Welfare Appropriation Act, 1964.*)

New obligational authority (appropriation)	**72,940**	**88,700**	**100,100**

1. *Vocational rehabilitation services.*—Federal matching grants are made to assist the States in rehabilitating handicapped individuals so that they may prepare for and engage in remunerative employment to the extent of their capabilities. The rehabilitation services provided by the States include medical restoration, training, guidance and placement services. The requisite State matching rate varies between States according to per capita income, and averages approximately 38% of the total program.

2. *Extension and improvement projects.*—Federal grants are made to the States to assist them in initiating projects for new or improved vocational rehabilitation services. The more favorable matching rate of 25% is designed to encourage development of new methods and techniques.

[OFFICE OF] VOCATIONAL REHABILITATION *ADMINISTRATION*—Continued

General and special funds—Continued

RESEARCH AND TRAINING—Continued

3. *Special centers.*—For the support of special rehabilitation research and training centers with the necessary resources for continuing comprehensive programs of clinical research and training to advance the rehabilitation of the disabled. In 1965, two new centers will be added to the six in operation in 1964.

4. *International research; (domestic support).*—For maintenance in the United States of foreign scientists concerned with rehabilitation research projects support by excess foreign currencies and for the purchase in the United States of equipment for such projects unobtainable with excess foreign currencies. This program will be supported in 1965 at the current level.

The Agricultural Trade Development and Assistance Act of 1954, and the International Health Research Act of 1960 authorize the conduct of research and related activities abroad. The estimate for 1965 proposes an appropriation of $2 million for payments in foreign currencies in six excess-currency countries.

Rehabilitation research and related activities.—Research, demonstration, and research training programs are supported primarily with foreign currencies accruing to the United States through the sale of surplus agricultural commodities and through other sources. The research and demonstration programs are directed to the solution of problems which hold promise of contributing knowledge to the advancement of rehabilitation both in the United States and in other countries.

Research training and fellowships are provided and exchanges of rehabilitation experts are arranged between the United States and cooperating foreign countries to increase the rehabilitation research resources both here and abroad.

Facilities Survey and Construction Act as it pertains to rehabilitation facilities, and national and international program plans are developed.

1. *State program operations.*—State plans are approved and allotments and grants are made; administration of regional office activities and field relationships with States are coordinated; overall program plans are developed; old-age and survivors insurance referrals are coordinated; and Federal-State programs for rehabilitating blind persons are developed.

2. *Research and training.*—A program of research projects to develop and demonstrate new rehabilitation methods and techniques and a program of training and traineeships to provide additional personnel to work in rehabilitation are administered by grants and contracts; specialists in various rehabilitation fields provide technical advice and assistance to rehabilitation agencies in developing rehabilitation facilities, workshops, programs and goals and in developing and promoting ways of rehabilitating the more severely disabled.

3. *Executive direction and program coordination.*—Direction and administration are provided for programs under the Vocational Rehabilitation Act, the Randolph-Sheppard Act, and the Medical Facilities Survey and Construction Act as it pertains to rehabilitation facilities; nationwide leadership is provided in the development of policies and programs in the health and medical areas of rehabilitation; national and international program plans are developed; legislative proposals concerning the program are analyzed; and publications are prepared and distributed to assist the States in interpreting their programs to the public.

4. *Management services.*—General administrative and management services are provided the several program areas; statistical measurement and analysis of programs is undertaken including the development of special studies.

PUBLIC HEALTH SERVICE

The Service has responsibilities for safeguarding and improving the health of the people of the Nation. The major functions of the Service are: To conduct and support research in the medical, environmental, and related sciences and in health status, needs, and the resources and requirements for meeting these needs; to provide medical and hospital services to persons authorized to receive such care; to prevent the introduction and spread of disease; to aid in the development of health facilities and services throughout the Nation; to further the application of new knowledge in the prevention and control of disease; and to promote the maintenance of a healthy environment. To perform these functions, the Service is organized as follows:

(a) The Bureau of State Services is organized into the two separate functional areas of community health and environmental health. Programs are operated principally in the fields of Federal-State and interstate public health programs, through research, training, and construction grants; direct operations involving research, development, demonstrations, consultative services, training; and enforcement actions particularly to abate water pollution.

(b) The Bureau of Medical Services administers the medical care programs for merchant seamen, coastguardsmen, Indians, Alaska natives, and other beneficiaries designated by the Congress; provides for the construction of medical facilities for Indians both through grants and direct construction; and through the foreign quarantine program performs examinations of aliens at U.S. ports and of visa applicants in foreign countries.

(c) The National Institutes of Health constitute the primary research arm of the Service and are further described in a subsequent statement.

(d) The National Library of Medicine collects and disseminates medical literature.

(e) The Office of the Surgeon General formulates general policy, furnishes central administrative services, and operates special programs such as international health activities, the National Center for Health Statistics, and emergency health preparedness activities.

General and special funds:

For necessary expenses in carrying out the Public Health Service Act, as amended (42 U.S.C., ch. 6A) (hereinafter referred to as the Act), and other Acts, including expenses for active commissioned officers in the Reserve Corps and for not to exceed two thousand eight hundred commissioned officers in the Regular Corps; expenses incident to the dissemination of health information in foreign countries through exhibits and other appropriate means; expenses of primary and secondary schooling of dependents, in foreign countries, of Public Health Service commissioned officers stationed in foreign countries, in amounts not to exceed an average of $285 per student, when it is determined by the Secretary that the schools available in the locality are unable to provide adequately for the education of such dependents, and for the transportation of such dependents between such schools and their places of residence when the schools are not accessible to such dependents by regular means of transportation; not to exceed $1,000 for entertainment of visiting scientists when specifically approved by the Surgeon General; purchase, erection, and maintenance of temporary or portable structures; and for the payment of compensation to consultants or individual scientists appointed for limited periods of time pursuant to section 207(f) or section 207(g) of the Act at rates established by the Surgeon General not to exceed $19,000 per annum; as follows: (*Department of Health, Education, and Welfare Appropriation Act, 1964.*)

BUILDINGS AND FACILITIES

For construction, major repair, improvement, extension, and equipment of Public Health Service facilities, not otherwise provided, including plans and specifications and acquisition of sites, [$16,311,000] *$21,512,000,* to remain available until expended. (*42 U.S.C. 248; Department of Health, Education, and Welfare Appropriation Act, 1964.*)

New obligational authority (appropriation)			**33,200**	**16,311**	**21,512**				

[1] Selected resources as of June 30 are as follows: Unpaid undelivered orders, 1962, $1,757 thousand (1963 adjustments, $41 thousand); 1963, $6,689 thousand (1964 adjustments, −$400 thousand); 1964, $25,412 thousand; 1965, $27,507 thousand.

This appropriation includes all proposed direct construction items of the Public Health Service except construction of Indian health facilities, and all continuing projects except construction of shellfish laboratories (appropriated under Milk, food, interstate, and community sanitation in 1962), and the following facilities of the National Institutes of Health:

1. Mental health-neurology research facility—appropriated under Mental health activities and Neurology and blindness activities, 1961.

2. Rocky Mountain Laboratory construction—appropriated under Allergy and infectious disease activities, 1962.

3. Cancer research facility (planning funds)—appropriated under National Cancer Institute, 1961.

4. Gerontology research facility (planning funds)—appropriated under National Heart Institute, 1962.

A distribution of appropriations for construction of buildings and procurement of facilities ancillary to various programs of the Public Health Service follows (in thousands of dollars):

	1962 actual	*1963 actual*	*1964 estimate*	*1965 estimate*
Bureau of State Services	13,600	13,400	7,205	6,019

Total	18,230	33,200	16,311	21,512

Digitized for FRASER
https://fraser.stlouisfed.org
Federal Reserve Bank of St. Louis

The following construction projects will necessitate the provision of additional funds in 1965:

1. *Environmental health facilities, plans and specifications.*—The 1961 appropriation act included an amount of $785 thousand for planning additional environmental health facilities. This request for $1,500 thousand for 1965, plus the $785 thousand already appropriated, will provide for the preparation of plans and specifications for urgently needed facilities to house the expanding staffs of the environmental health programs.

2. *Water quality standards laboratories.*—Funds for construction of two water quality standards laboratories were appropriated in 1963. Sites have been selected at Kingston, R.I., and at Duluth, Minn., for the salt water and fresh water laboratories, respectively. The architect's contract has been awarded for the laboratory at Kingston, R.I., and it is expected that the contract for the fresh water laboratory will be awarded in 1964. Funds requested in 1965 are for portable equipment for these two installations.

3. *Arctic health research center.*—Planning funds were provided in the 1964 appropriation for a building at the University of Alaska for the Arctic Health Research Center. This facility will replace the 4 rented buildings and 17 additional structures in which the Center is now housed. Medical, biological, and environmental research on the problems and conditions in low temperature areas will be continued in the new facilities. Funds requested in 1965 are for construction of this building.

4. *General office building extension, NIH.*—Funds were provided in 1962 for planning an addition to the general office building which will provide offices and conference rooms to house 1,100 office personnel now located in rental quarters. The funds requested in 1965 will provide for the construction of this addition.

5. *Gerontology research facility, NIH.*—In 1962, funds were appropriated for planning a facility for basic research in gerontology. Funds requested in 1965 will provide for the construction of this facility. This building, to be located in Baltimore, Md. will be used in collaboration with the Baltimore City hospitals to increase the amount and quality of research on all aspects of aging, to provide for adequate laboratory facilities and animal and patient resources which can be utilized on a regional basis, and to develop an environment where associations between scientists and clinical investigators can be maintained on a daily basis to encourage interdisciplinary collaboration in research.

6. *NIH animal center (farm).*—Funds provided through 1962 for the NIH Animal Center permitted acquisition of a site, alterations, minor construction, planning and construction of Phase I, including a farm animal building, two residences and powerplant and utilities. Funds appropriated in 1963 provided for construction of a primate wing, an animal behavior building and planning for future construction. Funds requested in 1965 will provide planning funds which, in addition to funds available, will permit planning of Phases II and III. Included in these phases are an animal production building, agricultural management building, a third wing for the kennel, a third residence, a records storage building, a building for hazardous operations, animal virus isolation facility, waste chemical disposal area and cages for the primate wing.

7. *Repairs and improvements.*—In 1964 the Public Health Service inaugurated a continuing program of major alterations, repairs and improvements for maintenance of buildings and facilities of the Service. Funds were provided for the National Institutes of Health, Community Health, and Environmental Health. The 1965 request provides funds for additional projects, including the National Library of Medicine. It also proposes funds for the Bureau of Medical Services for hospitals and foreign quarantine activities, funds for which have heretofore been included in appropriations to the General Services Administration.

8. *Water pollution control laboratories.*—The Federal Water Pollution Control Act Amendments of 1961 (Public Law 87–88) provides for establishment of at least seven water pollution control laboratories in different regions of the Nation. These new facilities will give technical support to the various elements of the Federal water pollution control programs. Personnel housed in these facilities will conduct applied research, investigations, field demonstrations, and studies, and provide training for Federal, State, and local personnel. To date locations have been selected for all laboratories except the Middle Atlantic region. Funds have been appropriated for planning all seven laboratories, and funds for construction and equipment have been provided for five of these.

9. *Extension to Clinical Center cafeteria, NIH.*—This facility will include a kitchen separate from the facility used for patient feeding and an increase of 5,000 square feet in the seating capacity to accommodate employees of this and nearby buildings.

10. *Library relocation, NIH.*—Funds were provided in 1964 to relocate the NIH library and provide more adequate library services for the research program in new buildings, including space for study cubicles, reading and reference areas and additional storage stacks.

11. *Warehouse extension (building 13), NIH.*—Funds were provided in 1964 for planning and construction of an additional floor on building 13 which will provide an additional 43,000 gross square feet of warehouse space. This will replace rental space now utilized off the reservation.

12. *Mental health-neurology-cancer cafeteria, NIH.*—The 1964 appropriation included funds for planning and construction of a separate cafeteria to serve the new cancer and mental health-neurology building complex as well as other nearby facilities.

13. *Biologics standards laboratory annex, NIH.*—The 1964 appropriation provided construction funds to build an annex to the Biologics Standards Laboratory building, including equipment, access roads, parking facilities, and utility connections.

14. *Communicable disease center.*—Construction of the new expanded Communicable Disease Center facilities located on Clifton Road in Atlanta, Ga., is scheduled to start in January 1964 with a completion date of December 1965. Construction of the off-site animal breeding and holding facilities near Lawrenceville, Ga., was begun March 25, 1963, with a completion date estimated at September 1964.

15. *Cancer research facility, NIH.*—The new cancer research facility, scheduled to be completed in May 1967, will serve to consolidate the intramural and extramural components of collaborative research programs in cancer chemotherapy.

16. *Service building (building 12), NIH.*—Central service activities, now dispersed throughout the reservation, will be consolidated by extension and modification of building 12. Construction is scheduled for completion in March 1965.

17. *Master utilities extension, NIH.*—The extension to the master utilities will provide a system adequate to

PUBLIC HEALTH SERVICE—Continued

General and special funds—Continued

BUILDINGS AND FACILITIES—Continued

service additional planned structures and will also alleviate an already serious overload on present utility resources.

18. *Laboratory facilities, Puerto Rico, NIH.*—Funds were provided in 1963 for planning and construction of a laboratory facility on the grounds of the Puerto Rico Medical Center. This facility will provide for laboratories, some central services, offices, and for caged animal space for the collaborative project in cerebral palsy and mental retardation.

19. *Research facilities, Lexington, Ky., NIH.*—The redesign of the research facility at the Addiction Research Center, Lexington, Ky., will be completed by December 1963, with construction scheduled for completion by January 1965.

20. *Animal quarters, NIH.*—The conversion of wings F and G from office space to the originally intended purpose of animal production was completed in 1963. Minor reservation items will be finished in 1964.

21. *Library facilities.*—This facility is complete except for contractor's claims, engineering service charges, and minor reservation items.

22. *Dental research building, NIH.*—This building is complete. Minor reservation items will be finished in 1964.

23. *Surgical facilities, NIH.*—The new surgical facilities for heart and neuro-surgery were completed during 1963 and are in operational use. Minor reservation items will be finished in 1964.

24. *General office building, NIH.*—The general office building was accepted for operational use in 1962. Several minor items remain for completion in 1964.

New obligational authority:			
Appropriation	3,668	4,163	3,823
Transferred to "Operating expenses, Public Buildings Service," General Services Administration (76 Stat. 728)	−4		
Appropriation (adjusted)	**3,664**	**4,163**	**3,823**
Proposed transfer from "National Heart Institute" due to Uniformed Services Pay Act of 1963		18	

[1] Includes capital outlay as follows: 1963, $29 thousand; 1964, $30 thousand; 1965, $41 thousand.

[2] Selected resources as of June 30 are as follows: Unpaid undelivered orders, 1962, $214 thousand (1963 adjustments, −$3 thousand); 1963, $409 thousand; 1964, $409 thousand; 1965, $409 thousand.

1. *Research grants.*—By providing support for independent but relevant research, the research grants program makes possible the tapping of scientific manpower resources not otherwise available to the mission of the Division of Accident Prevention. Approximately 35 research projects will be supported in 1965 as compared with 45 in 1964.

2. *Research, training, and technical services.*—A directed program of research and investigations to determine the cause of accidental deaths and injuries, and to develop techniques for their reduction, will be continued. Through demonstrations, consultation, and technical assistance, State and local agencies will be encouraged to adopt proven safety techniques. In 1965 the increase will be used to help reduce traffic injuries. This increase will be partially offset by a reduction in the home injuries program.

CHRONIC DISEASES AND HEALTH OF THE AGED

To carry out sections 301, 311, 314(e), and 316 of the Act, and for expenses necessary for demonstrations and training personnel for State and local health work under section 314(c) of the Act, with respect to chronic diseases and health problems of the aged, for allotments and payments to States under section 314(c) of the Act for establishing and maintaining adequate public health services for the chronically ill and the aged, and for cooperating with State health agencies, and other public and private nonprofit institutions, in the prevention, control, and eradication of cancer, neurological and sensory diseases, and blindness by providing for consultative services, training, demonstrations, and other control activities, directly and through grants-in-aid, [$53,377,000] *$53,769,000*, of which [$13,000,000] *$11,750,000* shall be available only for such allotments and payments to States under section 314(c) of the Act. (*Department of Health, Education, and Welfare Appropriation Act, 1964.*)

Note.—Includes $49 thousand for activities previously carried under "Salaries and expenses, Office of the Surgeon General." The amount obligated in 1964 is shown in the schedule as a comparative transfer.

Appropriation (adjusted)	**22,936**	**53,372**	**53,769**
Proposed transfer from "National Heart Institute" due to Uniformed Services Pay Act of 1963		**252**	

[1] Includes capital outlay as follows: 1963, $78 thousand; 1964, $271 thousand; 1965, $271 thousand.

[2] Selected resources as of June 30 are as follows: Unpaid undelivered orders, 1962, $2,901 thousand (1963 adjustment, −$1,526 thousand); 1963, $1,956 thousand; 1964, $3,356 thousand; 1965, $3,356 thousand.

The mission of the chronic diseases and health of the aged program is to encourage and assist States and communities in developing, operating, and improving programs for preventing the occurrence and the increase of disability and dependency. This is accomplished through a coordinated program of intramural and extramural research, training, and technical services.

1. *Grants*—(a) *Research.*—Grants are awarded to organizations, institutions, and individuals for research into methods of planning, conducting, and evaluating community programs and techniques to overcome barriers to the application of new-found knowledge in the prevention of chronic diseases and disability and in the care of the chronically ill and aged.

(b) *Formula grants to States.*—Grants are made on a formula basis to assist States in developing and improving cancer and heart disease control programs, including the support of activities such as casefinding, rehabilitation, education, community services, and training. Grants are also made on a formula basis to assist States in expanding and improving programs for the development of community facilities and out-of-hospital services for the care of the aged and chronically ill, including the support of home health services, programs to improve the quality of care in nursing homes and homes for the aged, and training of health personnel.

(c) *Project.*—Grants are awarded to institutions, organizations, and individuals for surveying, developing, and improving community services, for applying and evaluating control methods and techniques, and for expanding professional and supporting competencies in cancer and neurological and sensory disease control. Grants are also awarded to States or other public or nonprofit agencies for studies and demonstrations which look toward the development of new or improved methods of providing health services outside the hospital, particularly for chronically ill and aged persons. The increase of $923 thousand in 1965 would enable support of new projects for cancer detection and training activities, and improved community detection, control, and training programs for neurological and sensory diseases including mental retardation.

PUBLIC HEALTH SERVICE—Continued

General and special funds—Continued

COMMUNITY HEALTH—Continued

CHRONIC DISEASES AND HEALTH OF THE AGED—continued

(d) *Training.*—Grants will be awarded to organizations and institutions for increasing the number of trained research investigators capable of performing research into the community aspects of chronic diseases and chronic disease control.

2. *Research, training, and technical services.*—This activity provides for the development and improvement of techniques and methods for the identification and prevention of chronic illness, for the care and restoration of the chronically ill and aged, and for meeting special health problems of older people. Assistance is given to State and local health departments and to other interested agencies through consultation, epidemiological investigations, demonstrations, loan of professional personnel and equipment, and training. Major emphasis is given to control programs in cancer, diabetes, arthritis, heart disease, neurological and sensory disorders, and for improving health services available to the long term ill and aged. The increase requested in 1965 will be used for improving preventive efforts in arthritis and mental retardation, raising the standard of patient care in nursing homes, and improving the health services available to the aged.

A supplemental appropriation for 1964 is pending before Congress to provide financial support to States in planning comprehensive action to combat mental retardation.

Federal Reserve Bank of St. Louis

This program provides facilities and services for the investigation, prevention, and suppression of communicable diseases other than tuberculosis and venereal diseases by the direct development, advancement, and demonstration of knowledge and techniques, and for research through grants for all communicable diseases.

1. *Grants*—(a) *Research.*—Research grants are awarded to organizations, institutions, and individuals for research concerned with epidemiology, prevention, laboratory diagnosis, and treatment of communicable diseases at the community level.

(b) *Community immunization.*—Grants are made to States, and with the approval of the States, to political subdivisions and instrumentalities of the States for intensive immunization programs against poliomyelitis, diphtheria, whooping cough, and tetanus. The grants are made on a project basis to cover the costs of community campaigns attributable to (1) the purchase of vaccines needed to protect children under 5 years of age, and (2) the planning, organization, promotional, epidemiologic, and surveillance activities of such campaigns. In 1965, the goal is to vaccinate the remaining unimmunized children under age 5, plus all newborn babies.

2. *Research, training, and technical services.*—Scientific and technical skills in the fields of epidemiological medicine and microbiology, including reference diagnostic laboratory services, are provided to State and local health departments through investigations, consultations, and demonstrations. Important disease control programs include hepatitis, aseptic meningitis, poliomyelitis, viral encephalitis, the enteric diseases, staphylococcal and other institutionally acquired infections, the acute fungal diseases, diseases of animals transmissible to man, and the vector borne diseases. Professional competence in the investigation of epidemic outbreaks is afforded to the States through the staff of the Epidemic Intelligence Service which is constantly alert to the epidemic situation in the country. These officers provide a wide range of service, including epidemic aid, epidemiological field investigations, consultations in communicable disease control, surveillance of infectious diseases and collaborative field and laboratory research. The 1965 increase provides for the expansion of research on hepatitis; expansion of epidemic services; and expansion of medical audiovisual services.

The expanded research on hepatitis will provide for intensified clinical and epidemiological studies. Attempts will be made to isolate and characterize the causative agent(s) through methods and techniques not previously attempted. Expanded surveillance activities will be provided by the addition of epidemiologists to State and local health departments. Medical audiovisual services will be expanded by increasing the international exchange of medical motion pictures.

3. *Aedes aegypti eradication.*—A program for the eradication of the *Aedes aegypti* mosquito in nine States, Puerto Rico, and the Virgin Islands is being initiated in 1964. The increase for 1965 will permit expansion in cooperation with State and local authorities, to meet the international commitment of the United States for the eradication of this species of mosquito, the vector of yellow fever.

PUBLIC HEALTH SERVICE—Continued

General and special funds—Continued

COMMUNITY HEALTH—Continued

COMMUNITY HEALTH PRACTICE AND RESEARCH—continued

Program and Financing (in thousands of dollars)—**Continued**

	1963 actual	1964 estimate	1965 estimate
New obligational authority:			
Appropriation	26,526	29,608	22,644
Transferred from "Salaries and expenses, Office of the Surgeon General" (42 U.S.C. 226)	187		
Transferred to—			
"Salaries and expenses, Office of the Surgeon General" (42 U.S.C. 226)		−3	
"Operating expenses, Public Buildings Service," General Services Administration (76 Stat. 728)	−6		
Appropriation (adjusted)	**26,706**	**29,605**	**22,644**
Proposed transfer from "National Heart Institute" due to Uniformed Services Act of 1963		**67**	

[1] Includes capital outlay as follows: 1963, $41 thousand; 1964, $23 thousand; 1965, $24 thousand.

[2] Selected resources as of June 30 are as follows: Unpaid undelivered orders, 1962, $34 thousand (1963 adjustments, −$3 thousand); 1963, $287 thousand; 1964, $287 thousand; 1965, $287 thousand.

1. *Grants*—(a) *Research.*—Grants provide support for the development of research to produce new knowledge regarding more effective and acceptable methods of providing and financing a full range of preventive, curative, and restorative health services to all segments of the population. The grants are aimed at finding better ways to provide comprehensive community health services; to broaden the scope and improve the quality of these services; and to devise the techniques for assessing and evaluating these services. Approximately 47 grants will be financed in 1965, the same as in 1964.

(b) *Formula grants to States (general health).*—Grants are made to assist States and local communities in providing and improving basic public health services such as public health nursing, laboratory services, communicable disease control, and sanitation activities.

(c) *Training.*—Grants are made to provide basic support for the public health training program of the 12 schools of public health. In addition, project grants are made to schools of nursing, engineering, and public health to strengthen and expand graduate public health training in such schools. Continuation of the program for grants and awards for traineeships for graduate or specialized public health training of professional health personnel authorized under section 306 of the Public Health Service Act is the subject of a legislative proposal in 1965 as this section expires on June 30, 1964. A program of training grants will be initiated in 1965 with a request of $100 thousand which will provide 2 or 3 grants to train highly qualified persons in research methodology.

(d) *Migrant health services.*—Grants will be made to pay part of the cost of establishing and operating family health service clinics and other special projects to improve health services and health conditions of domestic-agricultural migrant workers and their families. An increase of $1 million is proposed to support approximately 20–25 additional projects. Approximately 40 projects will be supported with 1964 funds.

2. *Research, training, and technical services.*—Funds are included to conduct activities directed toward achieving more effective organization, administration, and implementation of community health services programs. An increase of $84 thousand will provide for expansion of activities in health communications.

CONTROL OF TUBERCULOSIS

To carry out the purposes of section 314(b) of the Act, [$6,828,000] *$6,864,000*, of which [$1,606,000] *$4,000,000* shall be available for grants of money, services, supplies and equipment to States, and with the approval of the respective State health authority, to counties, health districts and other political subdivisions of the States for the control of tuberculosis in such amounts and upon such terms and conditions as the Surgeon General may determine, and [of which not less than $2,900,000 shall be available only for grants to States, to be matched by an equal amount of State and local funds expended for the same purpose,] for direct expenses of prevention and case-finding projects, including salaries, fees, and travel of personnel directly engaged in prevention and case finding and the necessary equipment and supplies used directly in prevention and case-finding operations, but excluding the purchase of care in hospitals and sanatoriums. (*Department of Health, Education, and Welfare Appropriation Act, 1964.*)

Note.—Includes $1 thousand for activities previously carried under "Salaries and expenses, Office of the Surgeon General." The amount obligated in 1964 is shown in the schedule as a comparative transfer.

1. *Project grants.*—This program entails the application of epidemiologic techniques of interview, reinterview, contact investigations, and cluster testing of every infectious syphilis case reported.

2. *Research, training, and technical services.*—Research and evaluation activities are directed toward maintenance of uniformly satisfactory nationwide serologic services; development and introduction of new syphilis diagnostic tests; development of an immunizing agent for syphilis; improvement of diagnostic techniques for gonorrhea; evaluation of more effective methods of therapy; and the improvement of control procedures.

Epidemiologic services are directed toward maintaining national and international intelligence and controlling venereal disease in areas of particular concentrations of agricultural, industrial and military personnel and in numerous small high-prevalence areas that might become the foci for spread of infection. Consultation is furnished to States through the regional offices in determining problem areas, infection sources, and control techniques

Appropriation (adjusted)	**2,999**	**6,194**	**6,671**
Proposed transfer from "National Heart Institute" due to Uniformed Services Pay Act of 1963		**60**	

[1] Includes capital outlay as follows: 1963, $139 thousand; 1964, $154 thousand; 1965, $77 thousand.

[2] Selected resources as of June 30 are as follows: Unpaid undelivered orders, 1962, $256 thousand (1963 adjustment, $3 thousand); 1963, $571 thousand; 1964, $571 thousand; 1965, $571 thousand.

1. *Grants*—(a) *Research.*—Grants are made to health agencies, educational institutions, and other research organizations to support investigations in dental health. Foremost among the research areas in community dental health which will be emphasized in 1965 are therapeutic and preventive dental services, and the organization, economics and administration of dental care programs. Grants are also available for supporting research into more effective methods of utilizing dental and auxiliary personnel, in the newer methods of communicating knowledge to health practitioners and the public, in the characteristics of dental diseases and conditions in populations and into the social and interpersonal aspects of health behavior. Approximately 34 research projects will be supported in 1965 as compared to 25 in 1964.

(b) *Training.*—Grants and awards will be made to 45 schools of dentistry in 1965 for training dental students in the effective use of dental assistants and other auxiliaries. The $108 thousand increase will permit expansion of the scope and depth of the training programs now in existence.

2. *Research, training, and technical services.*—Funds are provided to study the status of the Nation's dental health and of its dental manpower supply, to conduct studies and demonstrations relating to the development and application of methods for preventing and controlling dental diseases and disorders which can be applied on a community basis, to investigate and develop methods for extending the availability of dental care to the American people, and to provide professional and technical assistance relating to these activities. The increase in 1965 will be used primarily to initiate or expand programs in the areas of manpower supply and utilization (expansion of the duties of dental auxiliaries), in the development of the epidemiological and training programs at the Dental Health Center, and in research and development in dental technology.

The division of nursing is concerned with improvement of nursing practices of all kinds in hospitals, in the home, in health agencies, and in other allied medical care facilities. Problems related to the quality of nursing service and education, nurse supply, distribution of nursing services, and nurse-patient relationships are dealt with by means of a balanced program of intramural research, consultation, research grants, fellowships, and research training grants.

1. *Grants*—(a) *Research.*—Grants are made to institutions and to individuals to undertake projects in the area of nursing research. Approximately 62 research projects will be supported in 1964 and 1965, compared with 65 in 1963.

(b) *Fellowships.*—Grants are awarded to individuals in order to increase the research manpower in the field of nursing. An estimated 60 fellowships will be supported in 1965, compared with an estimated 63 in 1964 and 62 in 1963.

(c) *Training.*—Research training grants are made to institutions to establish and expand training programs and to individuals for specialized training. Approximately 5 grants will be awarded in 1965, compared with 5 grants in 1964 and 1963.

Grants are provided for traineeships to prepare nurses to be teachers, supervisors, and administrators under section 307 of the Public Health Service Act, as amended. The estimated number of trainees in 1964 are 2,000 in the long-term program and 5,000 in the short-term program for a total of 7,000 trainees. The current authorization for this program expires June 30, 1964. Continuation of this program is the subject of a legislative proposal for 1965.

2. *Research, training, and technical services.*—By means of research, consultation, and application of research findings, professional guidance and leadership are provided in the improvement of nursing practices.

Under proposed legislation, 1965.—Legislation is recommended to authorize a program of grant and loan support for nursing students and the institutions providing their education. The proposed legislation will include an extension of existing authority for graduate nurse traineeships contained in section 307 of the Public Health Service Act, merit traineeships for highly qualified high school students, a long-term loan program for the financial support of undergraduate students, and project grants to improve the programs of nursing education, utilization, and recruitment.

The legislation provides for construction grant support beginning in 1966 preceded by comprehensive planning grants.

HOSPITAL CONSTRUCTION ACTIVITIES

To carry out the provisions of title VI of the Act, as amended, *and parts B and C of the Mental Retardation Facilities Construction Act (77 Stat. 284–290),* [$226,220,000] *$23,346,000,* of which [$150,000,000 shall be for grants or loans for hospitals, and related facilities pursuant to part C, $4,200,000] *$3,012,000* shall be for the purposes authorized in section 636 *of the Public Health Service Act,* [and $70,000,000 shall be for grants or loans for facilities pursuant to part G] *$7,500,000 shall remain available until expended for grants for facilities pursuant to part B of the Mental Retardation Facilities Construction Act, and $10,000,000 shall be for grants for facilities pursuant to part C of the Mental Retardation Facilities Construction Act: Provided,* That funds made available under section 636 *of the Public Health Service Act* for experimental or demonstration construction or equipment projects shall not be used to pay in excess of two-thirds of the cost of such projects as determined by the Surgeon General*: Provided further, That there may be transferred to this appropriation from "Grants for construction of community mental health centers" an amount not to exceed the sum of the allotment adjustments made by the Secretary pursuant to section 202(c) of the Community Mental Health Centers Act. (Department of Health, Education, and Welfare Appropriation Act, 1964.)*

Note.—Includes $12 thousand for activities previously carried under "Salaries and expenses, Office of the Surgeon General." The amount obligated in 1964 is shown in the schedule as a comparative transfer.

Federal funds are provided on a grant or loan basis to assist States, other public agencies, and nonprofit organizations in the construction of hospitals, rehabilitation facilities, diagnostic or diagnostic and treatment centers, nursing homes, public health centers, and related health facilities. Second, funds are provided to permit the Surgeon General to conduct research, experiments, and demonstrations relating to the effective development and utilization of hospital services, and resources, and to make grants-in-aid to States, political subdivisions, universities, hospitals, and other public and private nonprofit institutions or organizations for such projects. Funds are also provided for grants to public and nonprofit agencies for the construction of experimental units of hospital and other health facilities. Third, State agencies are provided technical assistance in making inventories of their hospitals, public health centers, and other classes of facilities, in determining the type, size, and location of additional facilities required, and in developing coordinated programs, to meet the indicated needs. Technical assistance is also provided to States and upon request to communities regarding the planning, programing, and design of hospital and medical facilities. Fourth, proposed hospital and other health facility projects are reviewed to determine eligibility and compliance with the law and regulations. State plans and their annual revisions are reviewed and approved. Project applications, plans and specifications, wage rates, contracts, and payment requests are reviewed for compliance with standards.

Funds for construction purposes are allocated to the States on the basis of a formula which takes into account population and per capita income. Payments are computed and made as construction progresses.

As of November 30, 1963, a total of 6,975 construction projects had been approved, of which 5,648 were completed and in operation, 1,069 under construction, and 258 in preconstruction stages. Upon completion, these projects will provide 296,735 hospital beds, and 1,968 public health and other medical facilities. Of the approved projects 59% were for general hospitals, 2% for mental hospitals, 1% for tuberculosis hospitals, 4% for chronic disease hospitals, 7% for nursing homes, 14% for public health centers and State health department laboratories, 8% for diagnostic centers, and 4% for rehabilitation centers.

Funds are included for grants to assist in the construction of mental retardation facilities associated with a college or a university as well as other community based nonprofit facilities for the mentally retarded. A supplemental appropriation for 1964 is pending before Congress.

PUBLIC HEALTH SERVICE—Continued

General and special funds—Continued

COMMUNITY HEALTH—Continued

Proposed for separate transmittal—Continued

HOSPITAL CONSTRUCTION ACTIVITIES—continued

Under proposed legislation, 1965.—Legislation is recommended to provide a 5-year extension of grant support for construction of public and nonprofit hospitals and other types of medical facilities authorized in title VI of the Public Health Service Act. The legislation will also provide for initiation of a program for the modernization and replacement of obsolete facilities, a system of project grants to support public and nonprofit groups in the development of comprehensive area plans for constructing medical facilities, and for authority to guarantee private loans for the construction of nonprofit health facilities and proprietary nursing homes.

HEALTH PROFESSIONS EDUCATIONAL ASSISTANCE

To carry out parts B and C of title VII of the Public Health Service Act, $85,782,000, of which $45,000,000 is for grants to assist in construction of new teaching facilities pursuant to paragraph (1) of section 720 of the Act, $15,000,000 is for grants to assist in construction of new teaching facilities for dentists pursuant to paragraph (2) of section 720, $15,000,000 is for grants for replacement or rehabilitation of existing teaching facilities pursuant to paragraph (3) of section 720, and $10,200,000 is for loans and for assisting in the establishment and operation of student loan funds pursuant to such part C: Provided, That amounts appropriated herein for grants and loans shall remain available until expended.

LOANS AND PAYMENTS FOR THE NEXT SUCCEEDING FISCAL YEAR

For making, after March 31 of the current fiscal year, loans and payment to schools under part C of title VII of the Public Health Service Act for the first quarter of the next succeeding fiscal year such sums as may be necessary, and the obligations incurred and expenditures made hereunder shall be charged to the appropriation for that purpose for such fiscal year: Provided, That such payments to schools pursuant to this paragraph may not exceed 50 percent of the amount authorized in such part C for this purpose for the next succeeding fiscal year.

Program and Financing (in thousands of dollars)

	1963 actual	1964 estimate	1965 estimate
Program by activities:			
1. Grants for construction of teaching facilities for medical, dental, and other health personnel			75,000
2. Student loans			10,200
3. Operations and technical services			582
Total obligations			85,782
Financing:			
New obligational authority: Appropriation			**85,782**

1. *Grants.*—This program for 1964 and 1965 provides grants for construction and expansion of medical and other health profession schools, and for remodeling, modernization and replacing of existing schools.

2. *Student loans.*—Under this program student loan funds are to be established by participating universities from which low interest loans will be made to medical, dental, and osteopathic students who need such financial assistance in order to pursue their courses of study.

3. *Operations and technical services.*—Technical assistance and consultation services are provided for the planning and construction of facilities and for the administration of the student loan program.

A supplemental appropriation for 1964 is pending before Congress.

New obligational authority:			
Appropriation	0	4,224	10,890
Transferred to "Operating expenses, Public Buildings Service," General Services Administration (77 Stat. 436)		−4	
Appropriation (adjusted)	**0**	**4,220**	**10,890**
Proposed transfer from "National Heart Institute" due to Uniformed Services Pay Act of 1963		**15**	

[1] Includes capital outlay as follows: 1963, $58 thousand; 1964, $237 thousand; 1965, $459 thousand.
[2] Selected resources as of June 30 are as follows: Unpaid undelivered orders, 1964, $24 thousand; 1965, $24 thousand.

This appropriation finances extramural and intramural research and training activities which are basic to all environmental health programs. These activities, together with those funded by the categorical appropriations, make possible a unified approach to study of the health of man in his total environment.

1. *Grants*—(a) *Research.*—Research grants are made to investigators at universities and other research institutions which are multi-categorical in purpose or scope and which cannot appropriately be funded in a categorical appropriation. Approximately 65 projects will be supported in 1965 as compared to 31 in 1964.

(b) *Training.*—Grants are made to colleges and universities to provide support for the development and improvement of broad-based engineering and scientific competencies required for environmental health research. Approximately 65 grants will be supported in 1965 as compared to 35 in 1964.

2. *Arctic Health Research Center.*—At the Arctic Health Research Center in Alaska, studies are made on problems of environmental sanitation, endemic and epidemic communicable diseases, including diseases transmissible from animals to man, and the nutritional and physiologic problems of arctic life. The program will continue at the 1964 level.

3. *Research, training, and technical services.*—Research on problems of common interest to all the environmental health programs is undertaken in the areas of toxicology, pharmacology, and physiology; applied mathematics and statistics; and pesticides. The increase in 1965 will be used primarily to expand basic toxicological studies and to increase the number and scope of research studies and investigations on the health hazards of pesticides. A supplemental appropriation request for 1964 has been submitted to the Congress in order to initiate an expanded pesticides research program.

ENVIRONMENTAL HEALTH—Continued

Appropriation pending before Congress:

ENVIRONMENTAL HEALTH SCIENCES

Program and Financing (in thousands of dollars)

	1963 actual	1964 estimate	1965 estimate
Program by activities:			
Research, training, and technical services (costs—obligations)		1,200	
Financing:			
New obligational authority (pending appropriation)		**1,200**	

Under existing legislation, 1964.—A supplemental appropriation has been requested to initiate certain activities recommended in the report of the President's Science Advisory Committee on the "Use of Pesticides." The funds will be used to study (1) the means and level of exposure to pesticides of persons in several selected communities, (2) the health effect on people of relatively intensive exposure to pesticides by reason of their occupation, and (3) the toxicity of pesticides on living systems.

AIR POLLUTION

To carry out the [Act of July 14, 1955, as amended (42 U.S.C. 1857–1857f), and for expenses necessary to carry out the purposes of sections 301 and 311 of the Act relating to air pollution] *Clean Air Act*, including purchase of not to exceed three passenger motor vehicles, and hire, maintenance, and operation of aircraft; [$12,954,000] *$22,030,000*, to remain available only until June 30, [1964] *1965*. (*Department of Health, Education, and Welfare Appropriation Act, 1964.*)

Note.—Includes $11 thousand for activities previously carried under "Salaries and expenses, Office of the Surgeon General." The amount obligated in 1964 is shown in the schedule as a comparative transfer.

Excludes $20 thousand for activities transferred in the estimates to "Environmental health sciences." The amounts obligated in 1963 and 1964 are shown in the schedule as a comparative transfer.

New obligational authority:			
Appropriation	11,069	12,954	22,030
Transferred to "Operating expenses, Public Buildings Service," General Services Administration (76 Stat. 728 and 77 Stat. 436)	−4	−21	
Appropriation (adjusted)	**11,065**	**12,933**	**22,030**
Proposed transfer from "National Heart Institute," due to Uniformed Services Pay Act of 1963		**59**	

[1] Includes capital outlay as follows: 1963, $339 thousand; 1964, $400 thousand; 1965, $642 thousand.

[2] Selected resources as of June 30 are as follows: Unpaid undelivered orders, 1962, $409 thousand (1963 adjustments, −$61 thousand); 1963, $993 thousand; 1964, $993 thousand; 1965, $993 thousand.

This appropriation finances all activities related to the investigation of the causes of air pollution, the determination of the effects of air pollution upon life and property, and the development of effective means of prevention and control of air pollution.

1. *Grants*—(a) *Research.*—Research grants are made to investigators at universities and other research institutions to conduct research into air pollution problems. Approximately 178 grants will be supported in 1965 as compared to 142 in 1964 and 97 in 1963.

(b) *Fellowships.*—Fellowship awards support postgraduate training of individual scientists and engineers in air pollution research and control activities. It is estimated that in 1965, 38 fellowships will be awarded as compared with 19 in 1964 and 9 in 1963.

(c) *Training.*—Grants are awarded to universities to support the development and improvement of graduate level curricula dealing with air pollution problems and to provide student stipends. Approximately 19 grants will be awarded in 1965 as compared to 17 in 1964 and 10 in 1963.

(d) *Control programs.*—Grants will be made to air pollution control agencies to establish, develop, and improve programs for the prevention and control of air pollution.

(e) *Survey and demonstration.*—Grants will be made to States and communities to assess their air pollution problems. In 1965, it is estimated that from 25 to 35 grants will be awarded. States and communities will be required to match Federal funds on a ratio of 1 to 2.

2. *Research, training, technical services, and enforcement.*—This program is devoted to research designed to determine the nature, the effects, and the means for control and prevention of air pollution. Technical services are rendered to State and local health and air pollution control agencies, universities, and industry through consultations, collaborative surveys, and dissemination of technical information. In addition, a committee will be established for review of automotive pollution control measures. Short-term technical training on all aspects of air pollution is provided by the Public Health Service to State and local agency personnel and to industry personnel responsible for industrial plant air pollution control. In 1965 increases are provided for research into the control and extraction of sulfur from fuels; mesoscale meteorological studies concerned with the intra- and interurban transport of air pollutants; and assessment of automotive emission control through design and modification

of engines and related equipment; development of air quality criteria; and development of control devices. Enforcement activities and permits to Federal installations will also be emphasized.

A supplemental appropriation for 1964 is anticipated for separate transmittal to initiate the new and expanded programs authorized by the Clean Air Act of 1963.

Under existing legislation, 1964.—A supplemental appropriation is anticipated for 1964 to carry out the purposes of the Clean Air Act. Grants will be made to air pollution control agencies for the development, establishment, or improvement of programs for the prevention and control of air pollution. Other areas of principal emphasis will be extraction of sulfur from fuels; development of new devices for pollution abatement; development of air quality criteria; initiation of an abatement program; establishment of a committee on automotive and fuel pollution; and development of a permit system to control pollution from Federal installations.

[MILK, FOOD, INTERSTATE, AND COMMUNITY SANITATION]

ENVIRONMENTAL ENGINEERING AND SANITATION

To carry out sections 301, 311, and 361 of the Act, and for expenses necessary for demonstrations and training personnel for State and local health work under section 314(c) of the Act, with respect to milk, food, and community sanitation, and interstate quarantine activities, [including purchase of not to exceed two passenger motor vehicles, $9,009,000] *$9,215,000. (Department of Health, Education, and Welfare Appropriation Act, 1964.)*

Note.—Includes $18 thousand for activities previously carried under "Salaries and expenses, Office of the Surgeon General." The amount obligated in 1964 is shown in the schedule as a comparative transfer.

Excludes $12 thousand for activities transferred in the estimates to "Environmental health sciences." The amounts obligated in 1963 and 1964 are shown in the schedule as comparative transfers.

[1] Includes capital outlay as follows: 1963, $1,537 thousand; 1964, $690 thousand; 1965, $105 thousand.

[2] Selected resources as of June 30 are as follows: Unpaid undelivered orders, 1962, $1,646 thousand (1963 adjustments, −$17 thousand); 1963, $813 thousand; 1964, $813 thousand; 1965, $813 thousand.

This program provides national leadership for improving public health protection through research and technical assistance to States, municipalities, and industry to assist them in coping with health problems of the environment. Attention is given to assure that only safe water, milk, shellfish, and food supplies are served to the public and to the 2 million travelers carried per day on interstate conveyances, and to stimulate creation and maintenance of healthful environments.

1. *Research grants.*—Research grants are made to investigators at universities and other research institutions to conduct research in milk, food, and shellfish sanitation and technology, solid wastes disposal, indi-

Average salary of ungraded positions	$5,297	$5,297	$5,297

OCCUPATIONAL HEALTH

To carry out sections 301 and 311 of the Act, and for expenses necessary for demonstrations and training personnel for State and local health work under section 314(c) of the Act, with respect to occupational health, [$4,990,000, of which $500,000 shall be available for the continuation of the study of pulmonary diseases of coal miners] *$5,215,000.* (*Department of Health, Education, and Welfare Appropriation Act, 1964.*)

Note.—Includes $7 thousand for activities previously carried under "Salaries and expenses, Office of the Surgeon General." The amount obligated in 1964 is shown in the schedule as a comparative transfer.
Excludes $7 thousand for activities transferred in the estimates to "Environmental health sciences." The amounts obligated in 1963 and 1964 are shown in the schedules as comparative transfers.

Program and Financing (in thousands of dollars)

	1963 actual	1964 estimate	1965 estimate
Program by activities:			
1. Research grants	1,747	2,197	2,337
2. Research, training, and technical services	2,357	2,845	2,878
Total program costs, funded [1]	4,104	5,042	5,215
Change in selected resources [2]	−9

Transferred to "Operating expenses, Public Buildings Service," General Services Administration (76 Stat. 728)	−1		
Appropriation (adjusted)	**4,121**	**4,990**	**5,215**
Proposed transfer from "National Heart Institute" due to Uniformed Services Pay Act of 1963		49	

[1] Includes capital outlay as follows: 1963, $60 thousand; 1964, $116 thousand; 1965, $60 thousand.
[2] Selected resources as of June 30 are as follows: Unpaid undelivered orders, 1962, $290 thousand (1963 adjustments, −$27 thousand); 1963, $255 thousand; 1964, $255 thousand; 1965, $255 thousand.

1. *Research grants.*—Grants are made to individuals, organizations, and institutions for research studies of hazards and diseases related to the occupational environment. Approximately 66 research projects will be supported in 1965, as compared to 72 in 1964, and 61 in 1963.

2. *Research, training, and technical services.*—Research on occupational hazards and diseases is conducted and assistance provided to Federal, State, and local agencies and to industry in preventing and controlling occupational hazards and diseases. In 1965 the program will be continued at the 1964 level of operations.

RADIOLOGICAL HEALTH

To carry out sections 301, 311, and 314(c) of the Act, with respect to radiological health, including grants for training of radiological health specialists; purchase of not to exceed [three] *two* passenger motor vehicles of which one shall be for replacement only; and hire, maintenance, and operation of aircraft; [$19,145,000] *$19,640,000*, of which [$2,000,000] *$2,500,000* shall be available only for allotments and payments to States pursuant to such section 314(c) for the establishment and maintenance of adequate radiological public health services. (*Department of Health, Education, and Welfare Appropriation Act, 1964.*)

Note.—Includes $49 thousand for activities previously carried under "Salaries and expenses, Office of the Surgeon General." The amount obligated in 1964 is shown in the schedule as a comparative transfer.

Excludes $33 thousand for activities transferred in the estimates to "Environmental health sciences." The amounts obligated in 1963 and 1964 are shown in the schedule as a comparative transfer.

New obligational authority:			
Appropriation	15,875	19,145	19,640
Transferred to "Operating expenses, Public Buildings Service," General Services Administration (76 Stat. 728 and 77 Stat. 436)	−50	−25	
Appropriation (adjusted)	**15,825**	**19,120**	**19,640**
Proposed transfer from "National Heart Institute" due to Uniformed Services Pay Act of 1963		245	

[1] Includes capital outlay as follows: 1963, $576 thousand; 1964, $1,289 thousand; 1965, $895 thousand.

[2] Selected resources as of June 30 are as follows: Unpaid undelivered orders, 1962, $1,598 thousand (1963 adjustments, −$173 thousand); 1963, $2,131 thousand; 1964, $2,131 thousand; 1965, $2,131 thousand.

The Public Health Service conducts a national program for the prevention and control of radiological hazards to public health. The Service assesses the levels and effects of radiation exposure and, in cooperation with other agencies at Federal, State, and local levels, conducts programs to minimize such dangers. Such a program involves both basic and applied research on the sources, levels, effects of radiation, and means of protecting the public; the provision of technical information and assistance to State and local agencies in developing their own radiation protection programs; and a training program to provide the competencies needed in this new and expanding area of radiation protection and control.

1. *Grants*—(a) *Research.*—Research grants are administered to complement intramural research as an integral part of the overall research effort and to capitalize on the talents of nongovernmental scientists. Approximately 89 research projects will be supported in 1965 as compared to 91 in 1964 and 67 in 1963.

(b) *Training.*—Grants are made to institutions to provide support of new or expanded programs for training of radiological health specialists. Support of approximately 45 training projects will be provided in 1965. This is a continuation of the number expected to be supported during 1964 and compared to 32 in 1963.

(c) *State program development.*—Grants are made to States to provide financial assistance in the development of comprehensive State radiological health programs. Funds are allotted in accordance with a formula based on population, financial need, and the extent of the problem, with the requirement that they be matched by State funds on a 1-to-1 basis.

2. *Research, training, and technical services.*—Research is performed to determine the levels of radiation exposure of man from various sources and the precise biological effects, somatic and genetic, of such exposure, as well as means by which exposures can be reduced or prevented. Laboratory and surveillance activities are conducted to provide basic data needed for research and control work. Technical services are supplied to other Federal agencies, States, and local authorities. Training courses for State, local, and industry personnel are conducted through the training facilities in Rockville, Md., and Cincinnati, Ohio, as well as at various field locations such as Montgomery, Ala., Las Vegas, Nev., and Winchester, Mass.

In 1965 the training program will be expanded in order to help provide an adequate supply of qualified personnel to meet the manpower needs of a comprehensive national radiological health effort.

[1] Includes capital outlay as follows: 1963, $1,414 thousand; 1964, $1,189 thousand; 1965, $1,200 thousand.

[2] Selected resources as of June 30 are as follows: Unpaid undelivered orders, 1962, $869 thousand (1963 adjustments, −$81 thousand); 1963, $1,767 thousand; 1964, $891 thousand; 1965, $1,454 thousand.

1. *Grants*—(a) *Research.*—Grants are made to public or private agencies, institutions, and to individuals for research into problems related to water supply and pollution control. Approximately 264 projects will be supported in 1965 as compared to 215 in 1964 and 183 in 1963.

(b) *Fellowships.*—These awards support the graduate and postgraduate training of individual scientists and engineers in water pollution control research. It is estimated that in 1965, 87 fellowships will be awarded to outstanding scientists as compared with 68 in 1964 and 45 in 1963.

(c) *Training.*—Grants are awarded to colleges and universities to help expand training of the scientific and engineering manpower required for research and technical operations in water pollution control. It is estimated that 57 training projects will be supported in 1965, the same as in 1964.

(d) *Control programs.*—Grants are made to States and interstate water pollution control agencies to assist them in establishing and maintaining adequate programs for the prevention and control of water pollution.

(e) *Demonstration.*—Grants are awarded to public and private institutions and agencies to support field investigations and studies of an applied nature which will test and illustrate the applicability of research findings and newly developed techniques to problems of water supply and pollution control. It is anticipated that 20 grants will be supported in 1965 as compared to 18 in 1964 and 14 in 1963.

2. *Direct operations*—(a) *Comprehensive planning.*—Develop comprehensive river basin water pollution control programs to conserve the waters of the Nation for public water supplies, propagation of fish and aquatic life and

Federal Reserve Bank of St. Louis

wildlife, recreational purposes, and agricultural, industrial, and other legitimate uses. The 1965 funds will permit expanding six existing studies and allow the initiation of one new study.

(b) *Enforcement.*—Investigate, document, and carry out water pollution control enforcement actions. Expansion for 1965 is designed to meet additional needs on existing studies and activate as necessary other new field studies and enforcement actions.

(c) *Research, training, and technical services.*—Conduct research, field studies and demonstrations of water pollution problems, provides technical assistance and training to Federal, State, and local agencies and their personnel; collect and disseminate basic data; and service the extramural grant program and the waste treatment works construction grants to meet the responsibilities placed upon the Secretary by the Federal Water Pollution Control Act.

The 1965 increase is principally to expand special field studies and plan for the activities to be located in the new regional water and the national water quality standards laboratories. Funds are included to initiate two projects on developing efficient methods for preventing pollution from acid mine drainage. These projects will be conducted jointly with the Department of Interior.

New obligational authority (appropriation)	**90,000**	**90,000**	**90,000**

Grants are made to State, municipal and intermunicipal agencies, and interstate agencies to stimulate and assist in the construction of sewage treatment works. Funds are allocated to States and other jurisdictions on the basis of population and relative per capita income. State water pollution control agencies certify individual project priorities on the basis of the extent of water pollution and financial need. The Federal Government makes grant offers directly to the municipal or other sponsor of certified projects and administers the grants.

A grant may not exceed $600 thousand or 30% of the cost of the project for which it was awarded, whichever is smaller. Where a project serves more than 1 municipality, the grant is computed on the basis of each community's share of the project cost, under the 30% or $600 thousand limitations, but the aggregate amount of the grant may not exceed $2.4 million.

The 1961 amendments to the Federal Water Pollution Control Act authorized an annual level of Federal grant money of $90 million for 1963 and $100 million for the years 1964–67. However, in 1964 Congress appropriated $90 million on the basis of a $100 million allocation.

New obligational authority	48,820	51,189	52,710
New obligational authority:			
Appropriation	48,820	49,962	52,710
Transferred to "Operating expenses, Public Buildings Service," General Services Administration (77 Stat. 436)		−5	
Appropriation (adjusted)	48,820	49,957	52,710
Proposed transfer from "National Heart Institute" due to Uniformed Services Pay Act of 1963		1,232	

[1] Includes capital outlay as follows: 1963, $787 thousand; 1964, $438 thousand; 1965, $1,065 thousand.

[2] Selected resources as of June 30 are as follows:

	1962	1963 adjustments	1963	1964	1965
Stores	723		750	750	750
Unpaid undelivered orders	2,119	−1,217	770	770	770
Total selected resources	2,842	−1,217	1,520	1,520	1,520

[3] Reimbursements from non-Federal sources represent collections from pay patients (42 U.S.C. 221).

A total of 15 hospitals and 141 outpatient facilities are operated to furnish medical and dental care to legal beneficiaries of the Service. The major beneficiary groups are American seamen, coast guardsmen and their dependents, Bureau of Employees' Compensation cases, persons afflicted with leprosy, and narcotic addicts. Among these, the largest single category are American seamen, who receive free, comprehensive medical care for all conditions. Medical care is provided to foreign seamen and beneficiaries of other Federal agencies on a reimbursable basis and in 1965 it is proposed to have all nonbeneficiaries admitted for research and training purposes handled on the same basis.

Increases in 1965 are for (a) the full year cost of salary increases resulting from the Federal Salary Reform Act of 1962 and the Uniformed Services Pay Act of 1963, (b) within-grade salary increases, (c) increased staffing commensurate with increased patient workloads, (d) partial elimination of the backlog of equipment requirements, and (e) transfer of funding from General Services Administration appropriations to permit the Public Health Service to finance its own maintenance and repair requirements.

1. *Inpatient and outpatient care.*—Under this activity are operated 12 general hospitals, 2 neuropsychiatric hospitals specializing in the treatment of narcotic addiction, and the National Leprosarium at Carville, La. Inpatient loads and outpatient visits are expected to be as follows:

AVERAGE DAILY PATIENT LOAD AND ANNUAL TOTAL OUTPATIENT VISITS

	1963 actual	*1964 estimate*	*1965 estimate*
Hospital patients, by type of hospital:			
General hospitals	2,521	2,559	2,580
Neuropsychiatric hospitals	1,864	1,829	1,794
Leprosarium	308	310	310
Total	4,693	4,698	4,684
Hospital patients, by type of beneficiary:			
American seamen	1,761	1,756	1,756
Narcotic addicts	1,318	1,310	1,316
Patients with leprosy	312	312	312
Coast Guard	263	280	290
Bureau of Employees' Compensation	160	159	159
Veterans	254	235	195
Uniformed service dependents	269	292	304
All other	356	354	352
Total	4,693	4,698	4,684
Hospital outpatient visits	738,743	777,500	802,600
Clinics and offices	603,560	622,400	644,500

2. *Coast Guard medical services.*—Medical services are provided for Coast Guard personnel at shore stations and on vessels.

3. *Operation of health units.*—The Service operates health programs for Federal agencies on a reimbursable basis. Consultative and related services are performed for Federal agencies relative to their employee health programs.

4. *Personnel detailed to other agencies.*—Medical, dental, and other professional personnel are detailed to certain other Federal agencies on a reimbursable basis.

5. *Payments to Hawaii.*—Grants are made to Hawaii to defray the cost of care and treatment of persons afflicted with leprosy. Average daily patient load is expected to be 263 in 1965, compared with 269 in 1963 and 266 in 1964.

A supplemental appropriation for 1964 is anticipated for separate transmittal to be derived by transfer from the National Heart Institute.

Quarantine and visa medical examination activities.—Aliens and visa applicants are examined in order to exclude those who are physically or mentally defective and to prevent issuance of visas to persons medically excludable from the United States. Other inspections are made to prevent the introduction into the United States of quarantinable and other communicable diseases.

Increases in 1965 are for (a) the full-year cost of salary increases resulting from the Federal Salary Reform Act of 1962 and the Uniformed Services Pay Act of 1963; (b) within-grade salary increases; (c) transfer of funding from General Services Administration appropriations to permit the Public Health Service to finance its own maintenance and repair requirements; and (d) extending to six additional locations in foreign countries the physical examination of visa applicants by personnel employed by, or under contract with, the Public Health Service.

Basic workload data are:

[1] Includes capital outlay as follows: 1963, $875 thousand; 1964, $764 thousand; 1965, $782 thousand.

[2] Selected resources as of June 30 are as follows: Unpaid undelivered orders, 1962, $1,486 thousand (1963 adjustments, −$170 thousand); 1963, $1,613 thousand; 1964, $1,613 thousand; 1965, $1,613 thousand.

[3] Reimbursements from non-Federal sources represent collections from pay patients (42 U.S.C. 221).

This program provides medical care and public health services for Indians and Alaska native beneficiaries.

Increases in 1965 are for (a) the full-year cost of salary increases resulting from the Federal Salary Reform Act of 1962 and the Uniformed Services Pay Act of 1963, (b) within-grade salary increases, (c) increased staffing commensurate with increased patient workloads, (d) increased costs for contract hospital care, and (e) extension of field health services to additional Indian communities.

1. *Hospital health services.*—This activity consists of 47 general hospitals and their outpatient clinics and 3 tuberculosis sanitoria, 43 in the "lower 48" States and 7 in Alaska.

During 1965 a new replacement hospital will be opened at Fort Yates, N. Dak., and the modernization of the Crow, Mont., hospital will be completed.

Workloads for the total program are expected to be as follows:

Digitized for FRASER

ADMINISTRATIVE PROVISIONS, PUBLIC HEALTH SERVICE

Appropriations contained in this Act, available for salaries and expenses, shall be available for services as authorized by section 15 of the Act of August 2, 1946 (5 U.S.C. 55a).

Digitized for FRASER
https://fraser.stlouisfed.org
Federal Reserve Bank of St. Louis

Appropriations contained in this Act available for salaries and expenses shall be available for uniforms or allowances therefor as authorized by the Act of September 1, 1954, as amended (5 U.S.C. 2131).

Appropriations contained in this Act available for salaries and expenses shall be available for expenses of attendance at meetings which are concerned with the functions or activities for which the appropriation is made or which will contribute to improved conduct, supervision, or management of those functions or activities. (*Department of the Interior and Related Agencies Appropriation Act, 1964.*)

National Institutes of Health

The National Institutes of Health constitutes the primary research arm of the Public Health Service. It is made up of the following nine individual institutes: National Institute of General Medical Sciences, National Institute of Child Health and Human Development, National Cancer Institute, National Institute of Mental Health, National Heart Institute, National Institute of Dental Research, National Institute of Arthritis and Metabolic Diseases, National Institute of Allergy and Infectious Diseases, and the National Institute of Neurological Diseases and Blindness. There are also two program divisions, the Division of Biologics Standards, and the Division of Research Facilities and Resources.

Operations of the Institutes and divisions are divided between grant programs largely for support of research and for training of individuals and activities performed directly or through contracts. A portion of the funds from each of the operating appropriations is pooled through a management fund to provide central services for all institutes.

A distribution of obligations for the National Institutes of Health by major activity follows (in thousands of dollars):

	1963 actual	*1964 estimate*	*1965 estimate*
Grants:			
Research	425,261	502,004	552,153
Fellowships	35,559	44,914	45,649
Training	135,502	168,737	180,047
State control programs	10,814	10,950	6,750
Total grants	607,136	726,605	784,599
Direct operations:			
Research	67,101	73,412	76,148
Collaborative studies	52,279	61,457	64,376
Professional and technical assistance	2,603	3,982	4,224
Review and approval of grants	12,815	14,866	15,563
Other	9,131	11,841	12,457
Total, direct operations	143,929	165,558	172,768
Total, operating appropriations	751,065	892,163	957,367
Health research facilities construction grants	50,002	50,003	58,000
Construction of community mental health centers	-------	-------	35,000
Grand total	801,067	942,166	1,050,367

The major activities shown in the table above are common to all institutes and are described below. The workload, where applicable, is shown under the appropriate institute together with an explanation of any unique activities.

Grants—Research.—Grants are made to institutions and to individuals to undertake research projects in the medical and biological sciences. Grants are awarded by the Surgeon General on the basis of merit after review and recommendation by scientifically competent study groups and the appropriate national advisory council.

Fellowships.—Grants are made to individuals in order to increase the research manpower in the medical sciences. There are several different types of awards such as predoctoral, postdoctoral, special, research career awards, and foreign research fellowships, each designed to develop research talent. Fellowships are reviewed by specialty boards and advisory councils and are awarded on the basis of merit.

Training.—Grants are made to institutions to develop or support training programs in the medical sciences and to individual trainees to enable them to undertake special training at an institution of their choice. Awards are made to both graduates and undergraduates. Both institutional and individual grants are awarded by the Surgeon General on the basis of merit after review by an appropriate advisory council.

State control programs.—Funds are provided to States and territories on a formula basis for strengthening State and local clinical and educational services in mental health areas.

Direct operations—Research.—The National Institutes of Health conduct research activities largely within the framework of the various specific Institutes, directed to the disease categories represented thereby.

Collaborative studies.—Categorical research programs are conducted by investigators in collaboration with other Federal institutions and non-Federal institutions through contracts or direct operations in Bethesda and in dispersed geographical locations.

Professional and technical assistance.—Professional guidance and leadership in mental health activities are provided to States and other interested organizations in the knowledge and application of research findings through the provision of consultative services, demonstrations, training, field studies and investigations of improved methodology.

Review and approval of grants.—Applications for research grants, fellowships, and training grants are reviewed for merit by panels of private professional and lay persons distinguished in the field of medical science. Staff of the National Institutes of Health provide the administrative support and executive direction for the national advisory councils and study sections.

The Division of Research Facilities and Resources and the National Institute of General Medical Sciences are financed from the appropriation for general research and services.

There is an appropriation for each of the other eight Institutes and for the Division of Biologics Standards, which is responsible for the Public Health regulations pertaining to control and preparation of biological products and conduct of related research.

General research and services, National Institutes of Health

For the activities of the National Institutes of Health, not otherwise provided for, including research fellowships and grants for research projects and training grants pursuant to section 301 of the Act; and grants of therapeutic and chemical substances for demonstrations and research; [$163,869,000] *$163,745,000*: *Provided,* That funds advanced to the National Institutes of Health management fund from appropriations included in this Act shall be available for purchase of not to exceed [eighteen] *twelve* passenger motor vehicles[, of which thirteen shall be] for replacement only; and not to exceed $2,500 for entertainment of visiting scientists when specifically approved by the Surgeon General: *Provided further,* That all appropriations made to the Public Health Service in this Act, and available for research or training projects, may be expended pursuant to contracts made on a cost or other basis for supplies and services, including indemnification of contractors to the extent and subject to the limitations provided in title 10, United States Code, section 2354, except that approval and certification required thereby shall be by the Surgeon General. (*Department of Health, Education, and Welfare Appropriation Act, 1964.*)

Change in selected resources [2]	3,392		
Total obligations	136,003	153,210	163,745
Financing:			
Comparative transfers to other accounts	3,434		
Unobligated balance lapsing	20,267	996	
New obligational authority	**159,703**	**154,206**	**163,745**
New obligational authority:			
Appropriation	159,826	163,869	163,745
Transferred to—			
"Operating expenses, Public Buildings Service," General Services Administration (76 Stat. 728)	−123		
"Salaries and expenses, Office of the Surgeon General" (42 U.S.C. 226)		−17	
"National Institute of Child Health and Human Development" (76 Stat. 1072–1074)		−9,646	
Appropriation (adjusted)	**159,703**	**154,206**	**163,745**

[1] Includes capital outlay as follows: 1963, $76 thousand; 1964, $119 thousand; 1965, $116 thousand.

[2] Selected resources as of June 30 are as follows: Unpaid undelivered orders, 1962, $639 thousand (1963 adjustments, −$35 thousand); 1963, $3,997 thousand; 1964, $3,997 thousand; 1965, $3,997 thousand.

This appropriation finances the Division of Research Facilities and Resources which is responsible for administering general research support grants, research and resource centers, and health research facilities; and the National Institute of General Medical Sciences which administers research and training activities relating to basic problems in public health, medical, biological, and chemical fields. It also finances the Office of International Research which administers the international centers for medical research and training, the NIH special foreign currency program, the visiting scientists program, the international postdoctoral fellowships program, and the international research associate program.

1. *Grants*—(a) *Research.*—Funds will support approximately 2,307 grants in 1965 as compared to 2,197 in 1964 and 2,088 in 1963. In addition, funds are provided for general research support grants, general clinical research centers, special resource centers and international centers for medical research and training.

(b) *Fellowships.*—Approximately 1,731 fellowships will be supported in 1965 as compared to 1,726 in 1964 and 1,816 in 1963.

(c) *Training.*—Approximately 681 graduate training grants will be supported in 1965 as compared to 708 in 1964 and 719 in 1963.

2. *Direct operations*—(a) *Collaborative studies.*—Contracts are made with industrial firms to test new drugs and chemicals.

(b) *International research.*—Provides for the executive direction, planning, and coordinating of all international activities of the National Institutes of Health.

(c) *Training activities.*—Provides for investigators with research interests in laboratories operated by U.S. institutions in other countries.

Appropriation (adjusted)		**34,000**	**43,169**

1. *Grants*—(a) *Research.*—Approximately 1,150 grants will be supported in 1965 as compared to 820 in 1964. In addition, funds are provided for general research support grants.

(b) *Fellowships.*—Approximately 135 postdoctoral and special fellowships will be supported in 1964 and 1965. Also, 93 career awards and career development awards will be supported in 1964 and 90 in 1965.

(c) *Training.*—It is estimated that 92 undergraduate and graduate training grants will be awarded in 1965, as compared to 90 in 1964. These grants will be awarded to qualified institutions to inaugurate new programs which already have qualified training personnel, to expand existing programs and to establish new training activity in scientific areas where fully trained personnel are in short supply.

2. *Direct operations*—(a) *Research.*—To initiate a direct research program utilizing the facilities of the Perinatal Physiology Laboratory in Puerto Rico.

(b) *Collaborative studies.*—Contracts are negotiated with public and private organizations for research to complement the grants and intramural research programs.

[1] Includes capital outlay as follows: 1963, $1,177 thousand; 1964, $929 thousand; 1965, $830 thousand.

[2] Selected resources as of June 30 are as follows: Unpaid undelivered orders, 1962, $22,186 thousand (1963 adjustments, −$36 thousand); 1963, $28,602 thousand; 1964, $28,602 thousand; 1965, $28,602 thousand.

1. *Grants*—(a) *Research.*—Approximately 1,992 grants will be supported in 1965 as compared to 1,950 in 1964 and 1,873 in 1963. In addition, funds are provided for general research support grants and clinical research centers.

(b) *Fellowships.*—Approximately 276 postdoctoral and special fellowships will be supported in 1964 and 1965 as compared to 173 in 1963. Also some 90 career awards and career development fellowships will be supported in 1965 and 1964 as compared to 56 in 1963.

(c) *Training.*—Grants are awarded to accredited schools for the improvement of instruction in the curriculum; clinical training grants are awarded for postgraduate training in such fields as surgery, pathology, radiobiology, radiotherapy, and internal medicine; and grants are awarded to research training centers for individual traineeships. The following table summarizes those grants.

	1963 actual	*1964 estimate*	*1965 estimate*
Graduate training:			
Research (clinical and nonclinical)	135	112	84
Improvement of teaching methods and techniques	2	2	2
Undergraduate training	140	140	140

2. *Direct operations*—(a) *Research.*—Research is conducted in biochemistry, biology, biometry, epidemiology, chemotherapy, endocrinology, environmental cancer, pathology, physiology, radiation, and surgery.

NATIONAL INSTITUTES OF HEALTH—Continued

NATIONAL INSTITUTE OF MENTAL HEALTH [ACTIVITIES]—con.

plan, establish, and improve statewide mental health and mental retardation programs.

2. *Direct operations*—(a) *Research.*—Laboratory and clinical research is conducted in neurobiology, neurochemistry, neurophysiology, psychology, neuropsychiatric studies, socioenvironmental studies, and neuropharmacology (including narcotics and barbiturate addiction).

(b) *Collaborative studies.*—The programs in this activity are concerned with biometry, psychopharmacology, special program development, and a community demonstration unit. These programs collaborate in research efforts with State and local mental health programs, and extend communication of research knowledge to the States.

(c) *Training activities.*—This activity supports a program to train psychiatrists for careers in the Public Health Service.

(d) *Professional and technical assistance.*—The programs in this activity assist States in developing and expanding State and local mental health programs through consultation and field studies and demonstrations. This activity also supports the effort to collect and disseminate information on mental health and mental retardation research.

[1] Includes capital outlay as follows: 1963, $313 thousand; 1964, $368 thousand; 1965, $371 thousand.

[2] Selected resources as of June 30 are as follows: Unpaid undelivered orders, 1962, $2,851 thousand (1963 adjustments, −$7 thousand); 1963, $2,884 thousand; 1964, $2,884 thousand; 1965, $2,884 thousand.

1. *Grants*—(a) *Research.*—Approximately 2,700 grants will be supported in 1965 as compared to 2,589 in 1964, and 2,555 in 1963. In addition, funds are provided for general research support grants, and clinical research centers.

(b) *Fellowships.*—Approximately 575 awards will be supported in 1964 and 1965 as compared to 471 in 1963.

(c) *Training.*—Funds for 1965 will provide assistance to 106 schools of medicine, osteopathy, and public health for support of undergraduate training. Funds will also provide for 350 grants for graduate research and clinical training including 1,360 traineeships. Comparable schools, grants, and traineeships were 105, 350, and 1,360 in 1964 and 104, 289, and 1,099 in 1963.

2. *Direct operations*—(a) *Research.*—Laboratory and clinical research is conducted to aid in the understanding of the cardiovascular system and its diseases, with emphasis on therapeutic agents, diagnostic instrumentation, surgery, and clinical medicine.

(b) *Collaborative studies.*—This activity conducts and supports epidemiological, geographical pathology, biometrics research, and clinical trial studies to seek knowledge of the causes and prevention of cardiovascular disease. Causal factors are sought both by intensive study of "natural experiments" in population groups and by experimental modification of suspected factors by dietary, drug, or other measures.

(c) *Training activities.*—Inservice training is provided for positions requiring unique combinations of cardiovascular training and experience.

(f) *Gerontology building.*—A new research center will be constructed in Baltimore, Md.

New obligational authority:			
Appropriation	103,388	113,679	113,176
Transferred to "National Institute of Child Health and Human Development" (76 Stat. 1072–1074)		−5,980	
Appropriation (adjusted)	**103,388**	**107,699**	**113,176**

[1] Includes capital outlay as follows: 1963, $482 thousand; 1964, $708 thousand; 1965, $700 thousand.
[2] Selected resources as of June 30 are as follows: Unpaid undelivered orders, 1962, $542 thousand (1963 adjustments, −$10 thousand); 1963, $744 thousand; 1964, $744 thousand; 1965, $744 thousand.

1. *Grants*—(a) *Research.*—Approximately 3,270 grants will be supported in 1965 as compared to 3,140 in 1964, and 2,840 in 1963. In addition, funds are provided for general research support grants and clinical research centers.

(b) *Fellowships.*—Approximately 314 fellowships will be supported in 1965 as compared to 319 in 1964, and 344 in 1963.

(c) *Training.*—During 1965 it is estimated that 329 grants will be awarded to accredited schools for the improvement of instruction. This compares to 320 and 314 grants in 1964 and 1963 respectively.

2. *Direct operations*—(a) *Research.*—Clinical and laboratory research is conducted in the fields of arthritis, rheumatism, diabetes, and other metabolic disorders, as well as studies in the major disciplines including pharmacology, toxicology, physiology, biochemistry, nutrition, chemistry, pathology, endocrinology, physical biology, molecular biology, and chemical biology.

(b) *Collaborative studies.*—Direct domestic and collaborative international nutrition research studies are conducted and domestic and international programs in epidemiology, biometry, and geographic medicine and genetics provide epidemiologic and biomathematic consultation and assistance to the intramural and extramural programs of this Institute.

PUBLIC HEALTH SERVICE—Continued

General and special funds—Continued

NATIONAL INSTITUTES OF HEALTH—Continued

NATIONAL INSTITUTE OF ALLERGY AND INFECTIOUS [DISEASE ACTIVITIES] *DISEASES*—continued

1. *Grants*—(a) *Research.*—Funds will support approximately 1,711 grants in 1964 and 1965, compared to 1,778 in 1963. In addition, funds are provided for general research support grants, clinical research centers, and the Gorgas Memorial Laboratory.

(b) *Fellowships.*—An estimated 208 awards will be made in 1965 for postdoctoral, special, and research career fellowships. This compares to 240 awards in 1964 and 222 in 1963.

(c) *Training.*—Funds for 1965 will provide approximately 186 grants to train individuals in allergy and immunology, tropical medicine, infectious diseases, parasitology, mycology, and rickettsiology. This compares to 180 grants in 1964 and 169 in 1963.

2. *Direct operations*—(a) *Research.*—Laboratory, field, and clinical research is conducted in the broad fields of allergic, infectious, and parasitic diseases. The increase in 1965 will provide for the expansion of studies in allergy and immunology and infectious diseases.

[1] Includes capital outlay as follows: 1963, $329 thousand; 1964, $528 thousand; 1965, $542 thousand.

[2] Selected resources as of June 30 are as follows: Unpaid undelivered orders, 1962, $1,353 thousand (1963 adjustments, −$2 thousand), 1963, $1,291 thousand; 1964, $1,291 thousand; 1965, $1,291 thousand.

1. *Grants*—(a) *Research.*—Approximately 1,713 grants will be supported in 1965 as compared to 1,708 in 1964 and 1,695 in 1963. In addition, funds are provided for general research support grants and clinical research center grants.

(b) *Fellowships.*—Approximately 164 fellowships will be supported in 1964 and 1965 as compared to 152 in 1963.

(c) *Training.*—Approximately 277 graduate training grants will be supported in 1965 as compared to 270 in 1964 and 210 in 1963. These grants are made to training institutions to establish and improve programs to train teachers and clinical investigators in neurology, ophthalmology, and otology. Approximately 293 traineeships will be awarded to individuals for specialized postgraduate training in 1965 as compared to 282 in 1964 and 244 in 1963.

2. *Direct operations*—(a) *Research.*—Research is being conducted on disorders of the brain, and spinal cord and peripheral nerves, such as epilepsy, multiple sclerosis, apoplexy, and Parkinson's disease; on neuromuscular disorders, such as muscular dystrophy; and on visual and other sensory disorders, such as glaucoma, uveitis, cataract, and hearing impairments.

(b) *Collaborative studies.*—These studies include the coordination and central service activities for the collaborative project on cerebral palsy, mental retardation, and other neurological and sensory disorders of childhood; the perinatal physiology studies using primates; and

PUBLIC HEALTH SERVICE—Continued

General and special funds—Continued

NATIONAL INSTITUTES OF HEALTH—Continued

CONSTRUCTION OF MENTAL HEALTH-NEUROLOGY RESEARCH FACILITY—continued

Funds were appropriated in 1961 for the construction of a combined basic and collaborative research facility for the National Institutes of Mental Health and Neurological Diseases and Blindness, including a physical biology component, and including plans and specifications, fixed and semifixed equipment, access roads, extension of and tie-in with existing power, refrigeration, and other utility systems of the National Institutes of Health.

During 1963, the tentative drawings were completed and the architect/engineer was instructed to proceed with the working drawings. Design of this facility will be completed and the construction contract awarded early in 1965.

The research efforts supported with foreign currencies derived through the sale abroad of surplus agricultural commodities authorized by the Agricultural Trade Development and Assistance Act of 1954, are directed toward the solution of disease and health problems which hold promise of contributing knowledge of value and significance to the advancement of medical research in the United States and other countries. The program for translation of research publications is designed to continue to encourage and support international communication in the sciences relating to health. Research projects on collection and analysis of morbidity and mortality data are also supported.

New obligational authority (appropriation)	**3,335**	**4,074**	**3,633**

[1] Includes capital outlay as follows: 1963, $204 thousand; 1964, $981 thousand; 1965, $133 thousand.

[2] Selected resources as of June 30 are as follows: Unpaid undelivered orders, 1962, $1,227 thousand (1963 adjustments, −$1,020 thousand); 1963, $977 thousand; 1964, $500 thousand; 1965, $600 thousand.

The National Library of Medicine collects, organizes, and services the worldwide literature of medicine. It disseminates the literature through an extensive interlibrary loan program; it publishes basic medical bibliographic guides in the form of indexes and catalogs; and it provides reference and research assistance. The National Library of Medicine conducts an extramural program to improve communication of published information in the biomedical sciences on an international basis by supporting the translation, abstraction, and publication of medical research literature. It also provides support for critical reviews in selected areas of current medical research.

The 1965 program includes funds for expanding the Library's bibliographic services through the Medical Literature Analysis and Retrieval System (MEDLARS) by indexing, and thus providing references to more of the world's medical literature than ever before. It also includes funds for establishing a search center project, where the concept of decentralized utilization of MEDLARS products can be tested and evaluated.

RETIRED PAY OF COMMISSIONED OFFICERS

(Indefinite)

For retired pay of commissioned officers, as authorized by law, and for payments under the [Uniformed Services Contingency Option Act of 1953] *Retired Serviceman's Family Protection Plan* and payments for medical care of dependents and retired personnel under the Dependents' Medical Care Act (10 U.S.C., ch. 55), such amount as may be required during the current fiscal year. (*42 U.S.C. 212, 213a; Department of Health, Education, and Welfare Appropriation Act, 1964.*)

Financing:			
New obligational authority (appropriation)	**5,526**	**6,517**	**7,272**

1. *Retirement payments.*—Provision is made for the pay of officers retired for age, disability, or length of service. There were 416 retired officers on the rolls on June 30, 1963, and it is anticipated that there will be 468 in 1964 and 521 in 1965.

2. *Survivors' benefits.*—Under the provisions of the retired serviceman's family protection plan, retired commissioned officers who elect to receive reduced retirement payments may provide for monthly payments to their survivors. There were survivors of 39 deceased officers on the rolls as of June 30, 1963, and it is anticipated that there will be survivors of 44 officers in 1964 and 49 officers in 1965.

3. *Dependents' medical care.*—This activity provides funds for care in non-Public Health Service facilities for dependents of Public Health Service beneficiary members of the uniformed services and retired personnel in accordance with the Dependents' Medical Care Act, approved December 7, 1956. Care provided directly in Public Health Service facilities is financed under the appropriation Hospitals and medical care.

[1] Selected resources as of June 30 are as follows: Unpaid undelivered orders 1962, $21,034 thousand (1963 adjustments, −$97 thousand); 1963, $15,049 thousand; 1964, $16,260 thousand; 1965, $6,260 thousand.

1. *Medical stockpile.*—The goal of this activity is to insure to the greatest extent possible the availability of adequate and usable medical supplies and equipment for civilian needs in time of disaster. Medical supplies and equipment are assembled into civil defense emergency hospitals that are prepositioned in strategic locations under written agreement between the Federal Government and the custodial State. Funds previously appropriated provided for 2,820 such hospitals. The estimate for 1965 provides for maintaining the present stockpile of medical supplies and emergency hospitals; increased activities of stock surveillance and quality control measures; and for placement of reserve bulk stocks in secured underground storage facilities.

2. *Emergency health training and community preparedness.*—This program is concerned with the preparation of the Nation to meet its health needs in emergency situations through the development of plans and programs covering health services, civilian health manpower, and health resources; implementation of emergency plans and programs in every State and community; development and initiation of training, research and health resources programs at the national and regional levels, and provision of assistance to States and communities toward achievement of emergency capabilities; and through development of health rehabilitation and restoration plans to be utilized during the recovery period following a civil defense emergency.

[1] Includes capital outlay as follows: 1963, $90 thousand; 1964, $125 thousand; 1965, $92 thousand.
[2] Selected resources as of June 30 are as follows: Unpaid undelivered orders, 1962, $61 thousand; 1963, $199 thousand; 1964, $199 thousand; 1965, $199 thousand.

The Bureau of State Services management fund finances the research services, business operations, program direction, and program services provided by the staffs of the Office of the Bureau Chief for the community health and the environmental health programs, and the Sanitary Engineering Center in Cincinnati, Ohio. Formulas for determining the contribution from each appropriation are designed to reflect utilization of services performed by the management fund.

The centralized staffs of the environmental health and community health offices of the bureau chief, and the Sanitary Engineering Center provide supporting services to program activities as follows:

Research services provides the central administration and operations of services required for the conduct of research activities in environmental health programs at the Sanitary Engineering Center. Included are such services as technical reporting, library and reference services, biometric services, laboratory equipment design and construction, and the operation and maintenance of buildings.

Business operations provides the centralized business management services for the community health and the environmental health programs of the Bureau of State Services and the business management services furnished by the central staff at the Sanitary Engineering Center. The activity includes such services as financial management, personnel management, information activities, grants management, procurement, supply and property management, forms management, messenger, file, and mail services.

Program direction provides for the executive direction and supervision of the environmental health and the community health activities of the Bureau of State Services.

Program services provides for overall program planning, review and development activities, environmental health facilities planning, and coordinates community health research grants programs. It also provides for the associate regional health directors for environmental health and their staffs, located in the nine regional offices of the Department. These directors represent the bureau chief and the regional health director in planning, coordinating,

Non-Federal sources [3]	388	400	400
Unobligated balance lapsing	−1,037		
Total financing	38,010	42,150	43,807

[1] Includes capital outlay as follows: 1963, $1,454 thousand; 1964, $1,757 thousand; 1965, $1,814 thousand.

[2] Selected resources as of June 30 are as follows: Unpaid undelivered orders, 1962, $1,959 thousand (1963 adjustments, −$17 thousand); 1963, $2,439 thousand; 1964, $2,439 thousand; 1965, $2,439 thousand.

[3] Reimbursements from non-Federal sources are derived from the sale of meals to employees and others (42 U.S.C. 290).

The National Institutes of Health management fund was established to facilitate the conduct of operations of the National Institutes of Health which are financed by two or more appropriations. The activities of the fund are financed primarily from advances and reimbursements from the several Institutes. Formulas for determining the contribution from each institute are designed to reflect utilization of services performed by the management fund. Taken into consideration are such factors as the number of activated beds in the Clinical Center, number of laboratory workers, total personnel, and dollar level of grant, direct research, and direct operations funds obligated by the Institutes. A small portion of the funds comes from reimbursements from outside sources, principally cafeteria receipts, and from other Government agencies.

The centralized organizations of the National Institutes of Health provide supporting services to all programs as follows:

1. *Research supporting services* provide the central administration and operation of services for the conduct of research activities such as the care and breeding of experimental animals, laboratory equipment design and manufacture, and the operation and maintenance of utility services.

2. *Clinical supporting services* consist of the operation of the 516-bed Clinical Center together with the laboratory space required for the treatment of research patients.

3. *Administrative management* includes personnel, supply, financial management, management audit, office services, plant safety, management analysis, audit of activated grants, and printing and reproduction.

4. *Program direction* provides for the executive direction and planning of intramural and extramural research.

5. *Review and approval of grants* provides procedures and policies governing the review of applications for research project grant programs, program project grants, fellowships, and training grants. Performs application processing services, program reporting and analytical services, overall program coordination, central records, and administration.

6. The *cafeteria* of the Clinical Center is operated by the nutrition department and furnishes meals for sale to the employees and visitors at rates sufficient to cover the reasonable value of the meals served.

Service and Supply Fund

This fund finances the providing of certain supplies, services, and equipment to programs of the Service. It is reimbursed from the appropriations supporting the programs benefited (42 U.S.C. 231).

Budget program.—The principal operations under the fund are carried out at (a) the medical supply depot at Perry Point, Md., which maintains stock of drugs and other medical supplies to meet in part the requirements of the Service and requisitions of other Government organizations; and (b) the activity at the National Institutes of Health which maintains a central supply of scientific and general-use materials, supplies, and special equipment and also provides services such as animal production, statistical processing, and instrumentation for the laboratories and offices at Bethesda, Md. In contrast to the operations under this revolving fund, the National Institutes of Health management fund is an annual account to which appropriated funds are advanced to facilitate the financing of clinical research, research services, administration, and other activities where the costs of operation are not readily susceptible of distribution.

Operating results.—Retained earnings amounted to $310 thousand as of June 30, 1963, and are being retained in the fund against the possibility of future losses.

Budget program.—Farms and other industries operated at the Fort Worth, Tex., and Lexington, Ky., narcotic hospitals provide patients with occupational outlets as a part of their therapeutic rehabilitation. Useful products are made for sale to the hospitals and other Government institutions (42 U.S.C. 258). The investment of the U.S. Government at the end of 1965 is estimated at $646 thousand including $134 thousand in appropriation and $90 thousand in donated assets. Earnings are retained to meet possible future losses.

Public Law 86–798 (42 U.S.C. 241(d)) amends the Public Health Service Act to provide for grants-in-aid to universities, hospitals, laboratories, and other public or nonprofit institutions for the general support of research and research training in sciences related to health. The act specifies that this program will be supported with funds provided for research grants through the appropriations for the National Institutes of Health.

SAINT ELIZABETHS HOSPITAL

General and special funds:

SALARIES AND EXPENSES

For expenses necessary for the maintenance and operation of the hospital, including purchase of one passenger motor vehicle, clothing for patients, and cooperation with organizations or individuals in the scientific research into the nature, causes, prevention, and treatment of mental illness, such amount as may be equal to the difference between the amount of the reimbursements received during the current fiscal year on account of patient care provided by the hospital during such year and [$27,413,000] *$28,330,000.* (*24 U.S.C. 161–221; Department of Health, Education, and Welfare Appropriation Act, 1964.*)

Saint Elizabeths Hospital provides treatment and care for the mentally ill who are either residents of the District of Columbia or beneficiaries of the Federal Government; trains persons in the medical, nursing and associated disciplines concerned with the treatment of psychiatric patients; and conducts or cooperates with others in scientific research activities dealing with mental illness.

Programs of the hospital are financed by this appropriation and by reimbursements for the care and treatment of sponsored patients, principally residents of the District of Columbia. The appropriations to the hospital are indefinite ones under which the hospital receives in appropriated funds the difference between the amount of reimbursements actually received during the year and the total program costs approved by the Congress. Reimbursement rates for reimbursable patient groups other than the District of Columbia are based on a pro-rata share of the total program costs. Charges to the District of Columbia for 1965 are based on the estimated 1965 mean cost per patient-day of the upper 10% of State hospitals—a cost of $9.49 in 1964 and $9.74 in 1965. The total cost of this hospital's operations, including research and training, is estimated at $12.30 per day.

Hospital patient-staffing ratios per 100 patients will increase from 60 in 1964 to 63 in 1965 as a result of the proposed increase in the hospital's average employment and the anticipated decline in patient load. This increase of 33 positions is provided to tighten prisoner patient security and reduce the number of escapees from the hospital. The proposed 1965 staffing ratio is approximately the staffing ratio which it is estimated will be attained in 1965 by the median of the upper 10% of the State mental hospitals if the upward staffing trend experienced from 1959 through 1962 continues into 1965.

Other increases in the 1965 appropriation are primarily the result of (a) the full-year cost of salary increases resulting from the Federal Salary Reform Act of 1962, and (b) the full-year cost in 1965 of the increased staff provided on a part-year basis in 1964.

1. *Operation and maintenance.*—This activity covers the protective, therapeutic, and rehabilitative programs of the hospital, maintenance of hospital buildings, operation of a farm and an employees cafeteria, procurement of supplies and materials, and the provision of necessary administrative services. Actual and estimated average daily patient load is as follows:

	1962 actual	*1963 actual*	*1964 estimate*	*1965 estimate*
Federal beneficiaries [1]	1,976	1,925	1,283	1,220
District of Columbia residents	4,863	4,743	5,210	5,090
Total	6,839	6,668	6,493	6,310

[1] Includes 692 District of Columbia prisoners in 1962 and 667 District of Columbia prisoners in 1963 who, until 1964, were counted as Federal beneficiaries.

2. *Training and education.*—The training and education program of Saint Elizabeths Hospital provides multidisciplinary clinical training for professional and ancillary personnel engaged in or interested in mental health activities. The numbers of trainees under this program are as follows:

	1962 actual	*1963 actual*	*1964 estimate*	*1965 estimate*
Interns and other postgraduates	91	124	124	124
Student nurses	84	90	90	90
Total	175	214	214	214

3. *Research.*—The hospital plans, develops, and carries out coordinated research programs and projects for the purpose of obtaining a better understanding of the causes of mental disorders, and of the factors bearing upon their development, treatment, and possible prevention. A close working relationship with the National Institute of Mental Health is maintained and the resources of both institutions are often combined in unified endeavors.

A supplemental appropriation for 1964 is anticipated for separate transmittal.

Federal Reserve Bank of St. Louis

This appropriation account covers all construction and facility improvement items of Saint Elizabeths Hospital.

1. *Construction and equipment, continued treatment building (rehabilitation center).*—Plans and specifications for this 450-bed patients' treatment facility have been completed. Construction will commence in the latter part of the current fiscal year with funds provided in the 1963 appropriation. The facility will replace three smaller buildings constructed during the period 1853–72.

2. *Miscellaneous improvements of existing facilities.*—Provision is made for (a) rewiring and extension of electrical facilities in hospital buildings, (b) replacement of insect screens in patient buildings, (c) modernization of dishwashing facilities, (d) replacement of an elevator in the Administration Building, (e) conversion of space in a patient treatment building for use as a gymnasium, (f) improvement of certain facilities in the hospital powerplant, (g) replacement of steam and water lines in a patient building and one of the kitchens, (h) replacement of convectors with radiators in selected patient buildings, and (i) replacement of sections of the hot water generation system for the purpose of increasing its capacity and output.

3. *Air conditioning geriatric building.*—Provision is made for air conditioning this 500-bed building which was constructed in 1952 for the care of aged and infirm patients.

4. *Construction and equipment, treatment and cafeteria building.*—This treatment facility, which replaces an antiquated structure built in 1871, will house 250 patients and provide food service for these plus 400 other patients from 2 adjacent buildings. Construction is practically complete, with only final installations of equipment and landscaping remaining. The building is partially occupied, with full occupancy and use expected in the latter part of the current fiscal year.

5. *Extension and modernization of administration building.*—The Hospital's Administration Building has been remodeled to provide more adequate space and facilities. All of the remodeled areas are now in use and final outside work will be completed early in the current fiscal year.

6. *Construction and equipment of maximum security building.*—Construction of a 396-bed maximum security building has been completed and it is now in use. Minor finishing-up projects will be completed during the current fiscal year.

The old-age survivors and disability insurance program protects over 90 percent of the workers in the United States and their families against loss of earnings due to old-age, disability, or death. People covered under this program contribute a portion of their earnings during their work years to pay for this protection. Employers match the contributions made by their employees. These contributions are deposited in the Federal Old-Age and Survivors Insurance trust fund and the Federal Disability Insurance trust fund, from which benefit payments and administrative costs are paid.

Major amendments to the Social Security Act have been enacted during the period 1950–63. These have increased both coverage and benefits under the retirement and survivors insurance phase of the program, and have added a disability program which provides monthly benefits for disabled workers of any age and their dependents.

1. *Maintenance of earnings accounts.*—Both eligibility for benefits and the amount of benefits paid are based on lifetime earnings records maintained by the Social Security Administration. The volume of work is dependent upon the level of employment and the rate of labor turnover. A continuing increase in covered employment in 1964 and 1965 as the total labor force grows and unemployment declines will result in a greater number of earnings items to be posted to the workers' accounts.

	1963 actual	*1964 estimate*	*1965 estimate*
Earnings items:			
Received	271,135,350	285,000,000	295,000,000
Processed	270,743,740	285,232,645	293,600,000

2. *Processing OASI claims.*—Prospective beneficiaries file claims in more than 600 district offices located throughout the country. Claims received should increase in 1964 and 1965 because of expected increase in the number of aged persons in the population, in the size of the total population insured for survivor benefits, and in the proportion of persons reaching retirement age who are insured.

	1963 actual	*1964 estimate*	*1965 estimate*
OASI claims applications:			
Received	2,981,348	3,018,000	3,113,000
Processed	3,062,273	3,018,324	3,108,800

3. *Maintenance of OASI beneficiary rolls.*—When claims are approved, the Treasury Department is authorized to issue benefit checks. The beneficiary rolls require continuous revision to insure the prompt mailing of benefit checks each month to beneficiaries entitled to them, and to discontinue checks when eligibility for benefits is interrupted. The number of OASI beneficiaries in current pay status and consequently the amount of OASI benefit payments will continue to rise each year.

	1963 actual	*1964 estimate*	*1965 estimate*
OASI beneficiaries in current pay status at end of year	17,225,957	18,288,000	19,149,000
OASI benefit payments (in millions)	$13,845	$14,629	$15,376

4. *Processing disability claims and maintaining beneficiary rolls.*—Claims for disability insurance benefits are filed in the Administration's district offices. In most cases, State agencies, under contractual arrangements, determine the existence of a disability. These determinations are reviewed in the central office of the Social Security Administration to assure uniformity among States. Higher estimates result from an expected increase in the insured population for 1964 and 1965 and a continuation of the same rate of disability among this population as experienced in recent periods.

Benefit payments will continue to rise with the increase in the disability claims load and increasing number of disability beneficiaries.

	1963 actual	*1964 estimate*	*1965 estimate*
Claims from disabled workers:			
Received	452,867	487,000	516,000
Processed	461,636	488,430	516,800
Disability beneficiaries in current pay status at end of year	1,382,311	1,564,000	1,729,000
Disability benefit payments (in millions)	$1,171	$1,255	$1,324

5. *Hearings and appeals.*—Individuals whose claims are disallowed have a right to appeal to the Bureau of Hearings and Appeals. The increased number of hearings requests anticipated in 1964 and 1965 is related principally to the increase in disability claims projected for this period. Processed work will exceed the amount of new cases received in 1964 as the Administration continues its intensive effort to reduce pending work so that appeals will be handled on a more current basis.

	1963 actual	*1964 estimate*	*1965 estimate*
Requests for hearings:			
Received	17,635	20,900	22,500
Processed	20,749	24,731	22,500

6. *Administration.*—This activity includes direction and management of the Social Security Administration, program planning and evaluation, actuarial and statistical services, and general management service functions.

7. *Internal Revenue Service enumeration project.*—This project consists of work being done by the Social Security Administration for the Internal Revenue Service and involves the use of the social security account number cards for taxpayer identification purposes. The work performed in 1963 and 1964 will be financed initially from the Federal Old-Age and Survivors Insurance trust fund with reimbursement expected to be made after the completion of the project when actual cost data become available. Project will be completed in 1964.

8. *Contingency reserve.*—This reserve ($10 million) represents funds to be made available only to the extent necessary to process workloads not anticipated in the budget estimates.

Unobligated balance carried forward			1,061		768				
Unobligated balance lapsing				600					
Limitation					5,750				

[1] Selected resources as of June 30 are as follows: Unpaid undelivered orders, 1962, $275 thousand; 1963, $2,351 thousand; 1964, $40 thousand; 1965, $2,244 thousand.

Funds requested for expenditure from the Federal Old-Age and Survivors Insurance trust fund and the Federal Disability Insurance trust fund will provide for (1) construction of 25 buildings to house district offices of the Social Security Administration, and (2) planning for 2 additional buildings to provide needed office and warehouse space at headquarters in Woodlawn, Md.

1. *Headquarters construction.*—Appropriations in prior years, amounting to $36,290 thousand, provided for the acquisition of land, construction of the Social Security Administration building in Woodlawn, Md., and construction of an annex and an extension to the annex. Currently obligations for these projects will total $35,690 thousand.

Continued growth of the social security program has rendered existing facilities at headquarters inadequate. It is proposed that an additional office building and a warehouse be constructed on land presently owned by the Social Security Administration. This would permit the Administration to release all space currently leased in the Baltimore area with the exception of district offices.

Authority to obligate $450 thousand for the planning phase of this project is requested in 1965. The total cost of the project is an estimated $9,179 thousand.

2. *District office construction.*—Funds requested in 1965 will permit the construction of 25 buildings for social security district offices, at a cost of $5,300 thousand, including $90 thousand for fallout shelters. Construction is planned in areas where improvement in district office space is needed and construction is both advantageous and feasible. Funds for additional district office construction will be requested in fiscal years 1966 to 1968.

The International Social Security Association is composed of national social security institutions, organizations, and Government departments administering social insurance. The Association acts as a clearinghouse on information with respect to the experience of the various countries in the social security field. The 190 member institutions of 82 countries hold a general meeting every 3 years. The United States will act as host for the next meeting to be held in calendar year 1964 in the District of Columbia. The 1964 appropriation is available for obligation through 1965 and covers all expenses to be incurred in 1964 and 1965 for planning and conduct of the conference.

Federal credit unions are privately owned, cooperative associations organized for the purpose of promoting thrift among their members and creating a source of credit for provident or productive purposes, authorized by the Federal Credit Union Act (act of June 26, 1934), as amended.

The Bureau finances its activities out of fees for services performed.

The Bureau's activities consist of (a) chartering new Federal credit unions, (b) supervising established Federal credit unions, (c) making periodic examinations of their financial condition and operating practices, and (d) administrative services. Data relating to activities are shown below:

	1963 actual	*1964 estimate*	*1965 estimate*
Number of Federal credit unions chartered	587	600	600

Grants to States for old-age assistance, medical assistance for the aged, aid to families with dependent children, aid to the blind, and aid to the permanently and totally disabled are made to States that have plans for these programs approved by the Department of Health, Education, and Welfare. Effective October 1, 1962, as an alternative to separate plans for each program, States may receive grants under a combined single plan for the adult assistance programs, that is old-age assistance, medical assistance for the aged, aid to the blind, and aid to the permanently and totally disabled. As of September 30, 1963, 17 jurisdictions had a combined single plan for the adult assistance programs. Fifty-four jurisdictions including all the States, the District of Columbia, Guam, Puerto Rico, and the Virgin Islands have approved plans for aid to families with dependent children; 37 jurisdictions, separate plans for old-age assistance and for aid to the blind; and 36 separate plans for aid to the permanently and totally disabled. Under the Social Security Amendments of 1960, Federal participation in programs for medical assistance for the aged became effective on October 1, 1960. State legislation was necessary in most States before they could initiate programs for medical assistance for the aged. The number of jurisdictions expected to have approved plans for this program is 38 in 1964 and 41 in 1965, including the 14 jurisdictions that will administer this program in each year under a combined single plan for the adult assistance programs.

1. *Provisions applicable under separate plans for programs of old-age assistance, aid to the blind, and aid to the permanently and totally disabled.*—The amount of assistance payments subject to Federal participation is limited to a monthly average expenditure of $70 per recipient. (In addition under old-age assistance the Federal Government participates in up to an additional $15 per month

Digitized for FRASER
https://fraser.stlouisfed.org
Federal Reserve Bank of St. Louis

in the form of payments for medical or remedial care, as described under item 3.) The average monthly amount is based on expenditures for money payments to recipients and direct agency payments to vendors for medical or remedial care. Within this maximum, the Federal share is twenty-nine thirty-fifths of the first $35 per recipient plus a proportion of the balance, which varies among States from 50 to 65% depending upon the per capita income of the State.

The foregoing provisions apply in all jurisdictions except Guam, Puerto Rico, and the Virgin Islands; for these jurisdictions the Federal share is one-half of total expenditures within a maximum monthly average of $37.50 per recipient subject to an overall limitation on the total annual Federal funds for assistance and administration for all programs combined for each jurisdiction.

2. *Provisions applicable under a single plan for the adult assistance programs.*—Except for recipients of medical assistance for the aged, the provisions are the same as those applicable under the separate plans, as described in item 1. (Provisions for additional Federal participation in assistance payments, based on the amount of direct agency payments to vendors for medical or remedial care, known as vendor medical payments, are described under item 3.)

3. *Provisions applicable under separate plans for old-age assistance and under a single plan for the adult assistance programs.*—Additional Federal participation in assistance payments, beyond that described in items 1 and 2, is based on the amount of direct agency payments to vendors for medical or remedial care (vendor medical payments).

For States with average monthly payments over $70, the Federal Government participates in the expenditures in excess of that amount except that such participation is limited to the amount of the average vendor medical payment, with a maximum of $15. The Federal share in the excess expenditure consists of the Federal medical percentage for the State, which ranges from 50 to 80% under a formula based on per capita income.

For States with average monthly payments of $70 or less, the additional Federal share in average vendor medical payments up to $15 is an additional 15% over the usual Federal percentage (based on per capita income) applicable to the amount of payments falling between $35 and $70.

This percentage, when added to the usual Federal percentage for the second part of the payment, results in a total Federal share of from 65 to 80%. The additional Federal share of 15% also is available to States with average monthly payments over $70 when it is advantageous to them as an alternative to the method described in the preceding paragraph. For Guam, Puerto Rico, and the Virgin Islands, comparable provisions for direct agency payments to vendors for medical or remedial care are in effect.

4. *Provisions applicable in medical assistance for the aged.*—For all 54 jurisdictions the Federal share of expenditures for the program of medical assistance for the aged is the Federal medical percentage of the amounts expended by the State for such assistance. The Federal medical percentages for the individual States range from 50 to 80% under a formula based on per capita income. The Federal share is the same regardless of whether the program is administered under a separate plan or under a single plan for the adult assistance programs.

5. *Provisions applicable in aid to families with dependent children.*—For the 50 States and the District of Columbia, the amount of assistance payments subject to Federal participation is limited to a monthly average expenditure of $30 per child or adult recipient in the family. The average monthly amount is based on expenditures for money payments to recipients and payments to vendors for medical or remedial care. Within this maximum, the Federal share is fourteen-seventeenths of the first $17 per recipient plus a proportion of the balance, which varies among States from 50 to 65%, depending upon the per capita income of the States. For Guam, Puerto Rico, and the Virgin Islands the Federal share is one-half of total expenditures within a maximum monthly average of $18 per recipient and within an overall limitation on total annual Federal funds for assistance and administration for all programs combined for each jurisdiction. For purposes of determining the amount of payments subject to Federal participation, the count of recipients in all jurisdictions includes dependent children under 18 years of age, one relative caring for the children (usually the mother), and a second parent living in the home, if incapacitated or unemployed.

Provisions for determining the Federal share of administration, services, and training.—The Federal share is 75% of: (1) The cost of providing preventive and rehabilitative services that are specified by the Secretary of Health, Education, and Welfare as (a) services that will help dependent persons to develop their capacities for self-care and self-support and to achieve greater family stability and (b) services that may be provided, at their request, to persons likely to become dependent; and (2) the cost of staff training, including educational leave, and agency training sessions.

The Federal share of costs, other than those specified above is 50%.

These provisions are applicable in all programs and all jurisdictions.

Provisions for demonstration projects.—For fiscal years 1963–67 up to $2 million of the amount appropriated for any year may be used to help meet the State share of costs of demonstration projects that could be expected to contribute significantly to existing knowledge about the kinds and scope of services or methods of work which enhance the agency's capacity to assist needy persons in solving problems that threaten the stability of family life and prevent persons from attaining self-support or self-care.

Amount of request.—For 1965, the total amount of Federal, State, and local expenditures for assistance, for administration, services, and training, and for demonstration projects is estimated at $5,043.9 million of which $3,002 million represents the Federal share. The appropriation request of $2,980 million is $22 million less than the estimated Federal share, because the States will have available for expenditures $22 million representing the Federal share of collections and adjustments for prior years. Of the total Federal share, $1,385.9 million is for old-age assistance; $249.4 million for medical assistance for the aged; $1,016.8 million for aid to families with dependent children; $50.2 million for aid to the blind; $297.7 million for aid to the permanently and totally disabled; and $2 million is for demonstration projects. Of the total amount of $1,985.2 million for the adult categories, about $493.6 million, represents the amount that will be spent in the States claiming Federal funds under title XVI, which permits States to have a combined single plan for the adult assistance programs.

It is estimated that a supplemental appropriation of $159.6 million will be required for 1964 in addition to the $2,725 million already appropriated. The supplemental

WELFARE ADMINISTRATION—Continued

General and special funds—Continued

GRANTS TO STATES FOR PUBLIC ASSISTANCE—Continued

is needed to finance costs beyond the amount appropriated under each of the public assistance programs.

The appropriation request of $2,980 million for 1965 is $95.4 million more than the appropriation of $2,725 million plus the supplemental request of $159.6 million for 1964. Excluding the amount of $2.2 million used from the 1964 appropriation to complete requirements for 1963, and allowing for a drop of $211 thousand in the estimated amount of collections in 1965, the amount of the increase from 1964 to 1965 is $97.4 million. All programs except old-age assistance and aid to the blind contribute to the increase for 1965 over 1964, with the largest increases, $36.5 million and $42.5 million, occurring in the programs of medical assistance for the aged and aid to families with dependent children, respectively.

The figures for 1964 used in the tables appearing under the activities below include the supplemental request of $159.6 million; the figures shown in the program and financing schedule include only the $2,725 million already appropriated.

1. *Payments to or on behalf of recipients* [1]—(a) *Old-age assistance.*—The average number of recipients per month for 1965 is estimated to be 30,000 smaller than in 1964. The estimated average monthly payment is $1 more than the estimate for 1964.

	1963 actual	*1964 estimate*	*1965 estimate*
Average number of recipients per month	2,219,700	2,177,000	2,147,000
Average monthly payment	$75.20	$77.35	$78.35
Total expenditures for assistance (Federal, State, and local) (millions)	$2,003.3	$2,020.1	$2,018.1
Federal share (millions)	$1,297.2	$1,316.9	$1,311.8

(b) *Medical assistance for the aged.*—The total number of recipients on whose behalf vendor medical payments will be made in 1965 is estimated at 15.6% more than was estimated for 1964. The estimated average annual amount per recipient is the same for 1965 as for 1964.

	1963 actual	*1964 estimate*	*1965 estimate*
Number of different recipients during year	338,200	452,600	523,100
Average annual payment per recipient on whose behalf payments were made	$855	$863	$863
Total expenditures for assistance (Federal, State, and local) (millions)	$289.2	$390.6	$451.4
Federal share (millions)	$147.4	$201.1	$235.2

(c) *Aid to families with dependent children.*—The average monthly number of persons estimated to receive assistance per month for 1965 is 1.8% greater than that estimated for 1964. The estimated average monthly payment per person is $0.60 more than the estimate for 1964.

	1963 actual	*1964 estimate*	*1965 estimate*
Average number of recipients per month:			
Families	950,000	967,500	984,500
Children	2,895,700	2,960,600	3,012,600
Persons	3,834,300	3,957,000	4,026,600
Average monthly payment per person	$31.00	$31.55	$32.15
Total expenditures for assistance (Federal, State, and local) (millions)	$1,425.9	$1,497.6	$1,552.7
Federal share (millions)	$827.0	$858.5	$880.5

[1] These tables do not present separate data on the single combined plan for the adult categories. The number of recipients and the Federal costs under the single plans are estimated as follows:

	Number of recipients		*Federal share of assistance (in millions)*	
	1964	*1965*	*1964*	*1965*
OAA	472,200	465,700	$285.8	$284.8
MAA	130,600	139,300	72.6	77.3
AB	17,700	17,300	9.8	9.6
APTD	156,600	166,400	78.6	84.0
Total	777,100	788,700	446.8	455.7

(d) *Aid to the blind.*—The average number of recipients per month for 1965 is estimated at 2.1% less than was estimated for 1964. The estimated average monthly payment is $1.05 more than the estimate for 1964.

	1963 actual	*1964 estimate*	*1965 estimate*
Average number of recipients per month	99,400	97,000	95,000
Average monthly payment	$79.65	$82.55	$83.60
Total expenditures for assistance (Federal, State, and local) (millions)	$95.0	$96.1	$95.3
Federal share (millions)	$45.5	$46.8	$46.2

(e) *Aid to the permanently and totally disabled.*—The average monthly number of recipients is estimated to be 6.3% more than for 1964. The estimated average payment for 1965 is $1 more than for 1964.

	1963 actual	*1964 estimate*	*1965 estimate*
Average number of recipients per month	438,300	476,000	506,000
Average monthly payment	$73.60	$76.05	$77.05
Total expenditures for assistance (Federal, State, and local) (millions)	$387.1	$434.3	$467.7
Federal share (millions)	$217.5	$248.1	$265.7

2. *State and local administration, services, and training.*—The Federal share is 75% of State and local costs of providing preventive and rehabilitative services, as defined by the Secretary of Health, Education, and Welfare; and of the costs of training State and local personnel for more effective performance in administering the public assistance programs; and 50% of the other costs of State and local administration that are found by the Department of Health, Education, and Welfare to be necessary for the proper and efficient administration of the State public assistance programs. The Federal share contributes toward the salaries and expenses of about 66,400 (including 3,000 additional staff to be hired in 1965 to give preventive and rehabilitative services) State and local personnel.

Total costs in 1965 are estimated at $36.9 million more than in 1964; $29.4 million of this increase will come from Federal funds. The increase in costs is attributable primarily to: (1) Staff increases to handle a larger number of recipients including those who are to receive medical assistance for the aged and to provide social services to recipients directed toward self-care, self-support, and strengthened family life; and (2) salary increases given to keep pace with rising living costs and to compete successfully with other professions and agencies for staff.

[In millions of dollars]

	1963 actual	*1964 estimate*	*1965 estimate*
(a) Old-age assistance	$124.9	$132.7	$133.2

Add:			
Amount from 1964 appropriation used to complete 1963 requirements		2,211	
Increase in collections and adjustments		−1,211	
Financing:			
New obligational authority (proposed supplemental appropriation)		**159,600**	

Under existing legislation, 1964.—In connection with its consideration of the regular Labor-HEW appropriation bill for 1964, Congress approved an appropriation of $2,725 million for grants to States for old-age assistance, medical assistance for the aged, aid to families with dependent children, aid to the blind, and aid to the permanently and totally disabled under titles I, IV, X, XIV, respectively, of the Social Security Act, as amended; or for assistance payments made under title XVI of the act, as amended.

Recent program trends and estimates submitted by the States indicate that the appropriation for 1964 will fall short of meeting the Federal share of State expenditures by an estimated $159.6 million.

ASSISTANCE FOR REPATRIATED UNITED STATES NATIONALS

For necessary expenses [of carrying out section 1113 of the Social Security Act, as amended (42 U.S.C. 1313), and] of carrying out the provisions of the Act of July 5, 1960 (74 Stat. 308), and for care and treatment in accordance with the Acts of March 2, 1929, and October 29, 1941, as amended (24 U.S.C. 191a, 196a), [$467,000] *$310,000. (Department of Health, Education, and Welfare Appropriation Act, 1964.)*

Program and Financing (in thousands of dollars)

	1963 actual	1964 estimate	1965 estimate
Program by activities:			
1. Mentally ill	232	273	310
2. Others (repatriates other than the mentally ill)	155	165	
Total program costs, funded	387	438	310
Adjustments between State expenditures and Federal funds advanced to States	6		
Total obligations	393	438	310
Financing:			
Comparative transfer to other accounts	54		
Unobligated balance lapsing	20	29	
New obligational authority (appropriation)	**467**	**467**	**310**

Public Law 86–571, approved July 5, 1960, provides for hospitalization and services to repatriated mentally ill U.S. nationals until arrangements can be made for assumption of responsibility by States of residence or family. This estimate assumes that a total of 112 mentally ill repatriates will require hospitalization in 1965. This compares with 100 requiring hospital care in 1964 and 88 who required hospital care in 1963.

Public Law 87–64, approved June 30, 1961, as amended by Public Law 87–543 on July 25, 1962, authorized, under a new section 1113 of the Social Security Act, temporary assistance to U.S. citizens and their dependents who return to this country because of destitution, illness, or international crises and who are without available resources; this legislation, however, includes the following limitation: No temporary assistance may be provided under this section after June 30, 1964. Legislation will be proposed to the 2d session of the 88th Congress to remove this limitation.

[1] Selected resources as of June 30 are as follows: Unpaid undelivered orders, 1962, $13 thousand (1963 adjustments, −$3 thousand); 1963, $25 thousand; 1964, $25 thousand; 1965, $25 thousand.

The Bureau is responsible for the administration of grant-in-aid programs for Old-Age Assistance, Medical Assistance for the Aged, Aid to Families with Dependent Children, Aid to the Blind, and Aid to the Permanently and Totally Disabled. Approximately 7.5 million individuals are expected to receive aid under these programs in 1965, involving more than $5 billion in Federal, State, and local funds—of which about $3 billion will be Federal. These programs are intended to provide financial assistance, medical care, and other social services to assure the minimum essentials of living for specified groups: needy aged, blind, disabled, and children in families broken by death, incapacity, or absence of a parent, and for some families hard pressed because of unemployment.

The Bureau also administers a program of assistance for repatriated U.S. nationals who are returned from abroad because of mental or other kinds of illness, destitution, or international crises and who are without available resources.

1. *Program policies and standards.*—Requirements of the Social Security Act are interpreted and specialized technical assistance is provided to State agencies. There is special emphasis to assure that problems of public welfare, including methods of administration, are dealt with constructively. Considerable emphasis is being placed on alleviating and preventing dependency to the maximum extent possible through methods such as: Increased development and utilization of social services, including community resources; demonstration projects; community work and training programs; and better trained public welfare personnel.

2. *Review State plans and grants, evaluate State operations.*—Action is taken on new State plans and on amendments thereto to assure conformity to the act; reviews are made of operations and findings are used to assist States in administering their programs; consultation and advice are provided on problems arising in day-to-day operations; grants are processed; information is provided to the public.

3. *Research and statistics.*—Information is collected in cooperation with State agencies. Special analyses are undertaken to provide national statistics and other information on public assistance which are used by the Bureau and the States in formulating policies, planning program content, setting standards, making legislative recommendations, justifying appropriation requests, answering requests, and guiding administrative action.

New obligational authority (appropriation)	**76,795**	**82,943**	**131,830**

The States are required to match one-half of the amounts appropriated for maternal and child health and crippled children's services. The remainder is distributed to the States in proportion to their financial need, except that not to exceed 12½% of the appropriations for the above programs is available for special project grants to State agencies and to public or nonprofit institutions of higher learning. The States are required to match all appropriated funds for child welfare services but the percent of matching required varies from 33⅓ to 66⅔. No matching funds are required for the program of grants for research, training, or demonstration projects in child welfare. A supplemental appropriation for 1964 is pending before the Congress.

1. *Maternal and child health services.*—Grants are provided to States for the extension and improvement of health services for mothers and children, especially in rural areas. It is proposed that $3.5 million of these grants be earmarked for special projects for mentally retarded children.

2. *Crippled children's services.*—Grants are made to States to extend and improve services for crippled children including medical, surgical, corrective, and other care, especially in rural areas. It is proposed that $2.5 million of these grants be earmarked for special projects for crippled children who are mentally retarded.

3. *Child welfare services.*—Grants aid States to establish, extend, and strengthen child welfare services for the protection and care of homeless, dependent, and neglected children, and children in danger of becoming delinquent, and for the return of runaway children to their own homes in other States. It is proposed that of the amount requested for child welfare grants, $8 million will be earmarked for day care services.

4. *Research, training, or demonstration projects in child welfare.*—Grants are made to public or nonprofit institutions of higher learning or agencies and organizations engaged in research or child welfare activities for projects of regional or national significance or for those which demonstrate new facilities or methods which contribute to the advancement of child welfare, and to public or nonprofit institutions of higher learning for special projects for training personnel for work in the field of child welfare.

5. *Special project grants for maternity care.*—Grants are made to State or local health agencies for special projects for maternity and infant care to help reduce the incidence of mental retardation caused by complications associated with childbearing. The Federal grant cannot exceed 75% of the cost of a project.

6. *Research projects relating to maternal and child health services and crippled children's services.*—Grants, contracts, or jointly financed cooperative arrangements are made for research projects relating to maternal and child health and crippled children's services that show promise of substantial contribution to the advancement of these programs.

Appropriation pending before Congress:

GRANTS FOR MATERNAL AND CHILD WELFARE, CHILDREN'S BUREAU

Program and Financing (in thousands of dollars)

	1963 actual	1964 estimate	1965 estimate
Program by activities:			
1. Maternal and child health services		5,000	
2. Crippled children's services		5,000	
5. Special project grants for maternity care		5,000	
6. Research projects relating to maternal and child health services and crippled children's services		1,500	
Total obligations		16,500	
Financing:			
New obligational authority (pending appropriation)		**16,500**	

A $16.5 million supplemental appropriation pending before the Congress is required for the implementation of recently enacted legislation (Public Law 88–156), which provides assistance to the States for improvement and expansion of services for mentally retarded children. In 1964 the new legislation increases authorizations for maternal and child health and crippled children's services each by $5 million; authorizes project grants for research related to these programs; and, to help reduce the incidence of mental retardation due to inadequate maternity care, provides for a new project grant program for comprehensive care to pregnant women and their infants who otherwise could not afford such care.

SALARIES AND EXPENSES, CHILDREN'S BUREAU

For necessary expenses in carrying out the Act of April 9, 1912, as amended (42 U.S.C., ch. 6), and title V of the Social Security Act, as amended (42 U.S.C., ch. 7, subch. V), including purchase of reports and material for the publications of the Children's Bureau and of reprints for distribution, [$3,401,000] *$4,315,000*: *Provided*, That no part of any appropriation contained in this title shall be used to promulgate or carry out any instructions, order, or regulation relating to the care of obstetrical cases which discriminate between persons licensed under State law to practice obstetrics: *Provided further*, That the foregoing proviso shall not be so construed as to prevent any patient from having the services of any practitioner of her own choice, paid for out of this fund, so long as State laws are complied with: *Provided further*, That any State plan which provides standards for professional obstetrical services in accordance with the laws of the State shall be approved. (*Department of Health, Education, and Welfare Appropriation Act, 1964.*)

Financing:			
Unobligated balance lapsing	55		
New obligational authority (appropriation)	**2,943**	**3,401**	**4,315**

[1] Selected resources as of June 30 are as follows: Unpaid undelivered orders, 1962, $17 thousand; 1963, $25 thousand; 1964, $24 thousand; 1965, $19 thousand.

The Bureau investigates and reports on the health and welfare of children and administers grants for: maternal and child health services; crippled children's services; child welfare services; research, training, or demonstration projects relating to child welfare, maternal and child health, and crippled children's services; and special projects for maternity and infant care.

1. *State and local health services for children.*—Policies and requirements for State maternal and child health and crippled children's programs are developed; State plans are reviewed and approved; consultative services are given to State agencies, other public and voluntary agencies and organizations, and educational institutions engaged in training professional personnel; and guides and recommendations are prepared on the provision of child health services.

2. *State and local social services for children.*—The same approach is used for the child welfare services as for the child health services.

3. *Technical assistance to States and communities for juvenile delinquency programs.*—Consultation is given to States, communities and organizations, both public and voluntary, on standards and methods for care and treatment of juvenile delinquents, on content of State or local programs, and on problems of organization and coordination on a statewide or local basis; assistance is given to State agencies and educational institutions in planning for training of professional and nonprofessional personnel in the field of juvenile delinquency.

4. *Research in child life and services for children.*—Studies on child health and welfare, particularly social and economic problems are conducted and the programs and services for children are evaluated. The results are interpreted to the lay and professional public through pamphlets and bulletins.

5. *Information for parents and others working with children.*—Publications are prepared and distributed on child health and welfare services. Upon request, assistance is given to States in interpreting their child health and welfare programs.

6. *Mental retardation services for children.*—Policies and guides are developed, and applications are reviewed for special maternity and infant care project grants designed to help reduce the incidence of mental retardation caused by complications of child bearing; and for research projects relating to maternal and child health and crippled children's services. Consultative services are given to State and local agencies, both public and voluntary, with emphasis on expansion of services for mentally retarded children; program interpretive materials are prepared and distributed. A supplemental appropriation for 1964 is pending before the Congress.

New obligational authority (appropriation)	**5,810**	**6,950**	

[1] Includes capital outlay as follows: 1963, $2 thousand.
[2] Selected resources as of June 30 are as follows: Unpaid undelivered orders, 1963, $122 thousand; 1964, $122 thousand; 1965 adjusted, −$122 thousand.

This program was authorized for 3 years ending June 30, 1964, under Public Law 87–274. A 1965 supplemental appropriation will be proposed for separate transmittal under the proposed program extension currently pending before the Congress.

1. *Grants and contracts for demonstration and evaluation projects.*—Funds will be used for demonstrating improved methods in the prevention and control of juvenile delinquency with emphasis placed on supporting programs of education, vocational training, and development of job opportunities especially suited to the needs of young people. In 1962 and 1963, three major demonstration projects were initiated. It is estimated that at least six more will be initiated in 1964.

2. *Grants and contracts for training personnel.*—Funds are for the purpose of training personnel already employed or preparing for employment in programs for the prevention and control of juvenile delinquency. This training will be accomplished through university-based training centers and workshops and short-term traineeships. Twelve such centers have been established. It is estimated that over 12,500 personnel who work or are preparing to work in the prevention and control of juvenile delinquency will have been trained by the end of 1964.

3. *Technical assistance services and administration.*—This activity provides for coordination of specialized services in juvenile delinquency and control both at the Federal and local levels; for project and training application review and approval; collection and dissemination of information; and direct services and technical assistance to local communities and training institutions in the field.

The Social Security Act authorizes grants to States, grants to public and nonprofit organizations and contracts or jointly financed cooperative arrangements for the conduct of research or demonstration projects relating to programs carried on or existing under the Social Security Act and programs related thereto.

Funds appropriated support cooperative research or demonstration projects in areas such as (1) those relating to the prevention and reduction of dependency, (2) those which will aid in effecting coordination of planning between private and public welfare agencies, and (3) those which will help improve the administration and effectiveness of programs carried on or existing under the Social Security Act and programs related thereto.

The $1.8 million requested in 1965 will provide $1 million to support approximately 22 new projects in 1965 and $800 thousand for the continuation in 1965 of projects initiated in prior years.

The Agricultural Trade Development and Assistance Act of 1954 authorizes the conduct of studies and research abroad in program matters for which the Welfare Administration has statutory responsibility in the United States.

1. *Maternal and child health.*—Studies, research, research planning, and research training in maternal and child health and handicapping conditions are proposed for six countries selected because of research opportunities in special health fields to gain knowledge of value to the United States, to the country involved, and internationally.

2. *Social welfare.*—Studies of urban social welfare and specialized social services are proposed in seven countries selected because of country experiences and research facilities in programs such as urban social services, community development, methods to strengthen family life, improve child care and prevent juvenile delinquency, and services for the aging. Cooperative projects are undertaken to contribute new knowledge valuable to social welfare programs in the United States, the country concerned, and internationally.

The Office of the Commissioner directs and coordinates the programs of the Welfare Administration and performs basic research covering the broader phases of social welfare.

1. *Direction and coordination of the welfare program.*—This consists of (a) formulation of administrative policies; (b) certification of compliance of State laws, plans, and operations with Federal requirements and approval of grants to States; (c) coordinating interprogram activities; and (d) review of administrative management throughout the Welfare Administration.

2. *Appraisal and development of the welfare program.*—Provision is made for (a) basic studies beyond the immediate scope of any bureau or office; (b) review and coordination of research and statistics work in the administration; (c) studying the causes, prevention, and reduction of dependency, matters pertaining to child life, the welfare needs of children, the aging and other groups, and for making studies and recommendations as to the most effective method of providing social and economic security through social welfare programs; and (d) long-range research to study personal, familial, and social factors related to an urban society.

3. *Administration of cooperative research program.*—Provision is made for administering a program of cooperative research or demonstration projects in social welfare and social insurance.

Appropriation	**70,110**	**39,717**	**45,400**
Reappropriation		**14,083**	

As of June 30, 1963, 166,300 refugees had registered at the Cuban refugee center in Miami and 62,400 had been resettled under Government auspices to other locations in the United States. It is estimated that about 100,000 Cuban refugees remained, as of that date, in the Miami area. The program provides the following services for Cuban refugees in the United States:

1. *Direction and coordination of program including reception, registration, and classification of refugees.*—Provides Federal direction of the program and includes work with the refugees to prepare them for resettlement and employment. New registrations are estimated to decline from 8,000 in 1964 to 6,500 in 1965.

2. *Welfare assistance and services.*—State and private welfare agencies provide, on a reimbursable basis, to needy refugees financial assistance, hospitalization, surplus food as well as care for unaccompanied child refugees. 56,900 persons were receiving financial assistance in Florida at the end of 1963. Primarily through resettlements the number is expected to decline to 42,000 at the end of 1964 and to 28,000 at the end of 1965.

3. *Resettlement and employment opportunities.*—By working with various agencies refugees are provided homes and jobs in areas other than Miami. During 1963, 30,233 persons were resettled. It is estimated that 22,000 and 18,000 will be resettled in 1964 and 1965.

4. *Education.*—Selected training is provided to equip the refugees for employment and resettlement. Payments are made to meet part of the added cost to the Miami public schools resulting from the influx of refugee children. The average daily child population is expected to decline from 17,800 in 1963 to about 17,000 and 16,500 in 1964 and 1965. Loans made to needy college students are expected to rise from 1,600 in 1963 to 2,500 and 3,000 in 1964 and 1965.

5. *Health services.*—These services are provided to new arrivals and to needy refugees in Miami and include medical screening, outpatient clinic services and care of patients with tuberculosis and mental illness.

SPECIAL INSTITUTIONS

American Printing House for the Blind

General and special funds:

EDUCATION OF THE BLIND

For carrying out the Act of March 3, 1879, as amended (20 U.S.C. 101–105), [$775,000] *$865,000*. (*Department of Health, Education, and Welfare Appropriation Act, 1964.*)

Program and Financing (in thousands of dollars)

	1963 actual	1964 estimate	1965 estimate
Program by activities:			
Grants for education of the blind:			
(a) Educational materials	698	734	790
(b) Expenses related to advisory committees	41	41	75
Total obligations (object class 41)	739	775	865
Financing:			
New obligational authority (appropriation)	**739**	**775**	**865**

Grants are made to this nonprofit institution in Louisville, Ky., to (1) support the manufacture of special books and teaching materials which are distributed to all public educational institutions for the blind, as well as to regular public schools in which blind children are enrolled; and (2) provide for staff and other expenses of committees which advise the Printing House relative to administration of the Federal funds.

Numbers of blind children served by the program are as follows: 1963 actual, 16,841; 1964 estimate, 17,330; 1965 estimate, 17,730.

The Printing House also receives $10 thousand annually from a $250 thousand permanent trust fund on deposit with the Treasury.

Freedmen's Hospital

General and special funds:

SALARIES AND EXPENSES

For expenses necessary for operation and maintenance, including repairs; furnishing, repairing, and cleaning of wearing apparel used by employees in the performance of their official duties; transfer of funds to the appropriation "Salaries and expenses, Howard University" for salaries of technical and professional personnel detailed to the hospital; payments to the appropriations of Howard University for actual cost of heat, light, and power furnished by such university; [$3,880,000] *$3,873,000*: *Provided*, That no intern or resident physician receiving compensation from this appropriation on a full-time basis shall receive compensation in the form of wages or salary from any other appropriation in this title: *Provided further*, That the District of Columbia shall pay by check to Freedmen's Hospital, upon the Surgeon General's request, in advance at the beginning of each quarter, such amount as the Surgeon General calculates will be earned on the basis of rates approved by the Bureau of the Budget for the care of patients certified by the District of Columbia. Bills rendered by the Surgeon General on the basis of such calculations shall not be subject to audit or certification in advance of payment; but proper adjustment of amounts which have been paid in advance on the basis of such calculations shall be made at the end of each quarter: *Provided further*, That the Surgeon General may delegate the responsibilities imposed upon him by the foregoing proviso. (*32 D.C. Code 317–320; Department of Health, Education, and Welfare Appropriation Act, 1964.*)

Gallaudet College is a private, nonprofit institution, providing advanced education for the deaf, a graduate department to train teachers, and a research program to provide information about the deaf. It operates the Kendall elementary and secondary school for deaf children (primarily from the District of Columbia) which serves as a laboratory school for the college education department. The institution also operates a preschool program for very young deaf children, and provides special counseling services for deaf students.

A construction program designed to replace aging buildings and provide modern facilities to accommodate increased enrollments was initiated in 1956. Full financial support for the erection of a number of new buildings and alterations and repairs to the existing physical plant has been provided by the Federal Government. The estimates for 1964 and 1965 provide for a continuance of this support to meet current needs and afford adequate facilities for the expansion of the college to meet steadily increasing enrollment.

The university is a private nonprofit institution consisting of an undergraduate college, a graduate school offering the master's degree and the degree of doctor of philosophy (in English, history, chemistry, physics, zoology, government, pharmacology and physiology), and eight professional schools. Federal funds provide approximately 56.8% of the operating costs.

In 1963, 154 research projects were supported by outside organizations, and an estimated 170 projects will be undertaken in 1964 and 1965. The operation and maintenance staff services 45 buildings located on the University's 60-acre campus. The dormitories, food service, book stores, and athletic program are self-supporting.

[1] Selected resources as of June 30, are as follows: Unpaid undelivered orders, 1962, $3 thousand (1963 adjustments, $10 thousand); 1963, $36 thousand; 1964, $13 thousand; 1965, $13 thousand.

1. *Executive direction and coordination.*—Overall direction and coordination are given to all activities of the Department. Staff assistance is provided to develop the Department's legislative programs; to analyze the Department's programs and goals, including identification of current and emerging problems; to appraise Federal-State relationships; and to aid the Secretary in carrying out the Department's responsibilities with respect to international activities and the special institutions. Services are also provided for internal security functions.

2. *Office of Public Information.*—The Office of Public Information directs the Department's public information activities, providing services to press, radio, and other media, and specific information to those interested.

3. *Administrative and financial management.*—Staff advice is provided to the Secretary and guidance is furnished to the operating agencies with regard to administrative and financial management, personnel, property and records management, office services, organization, staffing, and control problems. This activity includes the Department library which supplies headquarters staff with library materials and related services. Financial management services including analyses of the Department's program budgets, development of fiscal policies and procedures, and conduct of internal audits is provided. In addition, certain direct administrative and financial services are furnished the operating agencies as well as to the Office of the Secretary.

Appropriation (adjusted)	**3,418**	**3,675**	**3,848**

[1] Selected resources as of June 30 are as follows: Unpaid undelivered orders, 1962, $39 thousand; 1963, $39 thousand; 1964, $18 thousand; 1965, $18 thousand.

The Secretary is represented in each of the Department's nine regions by a regional director who is responsible for carrying out departmental policies and for leadership, coordination, evaluation, and administrative supervision of all operating agencies' program representatives located in the regional offices.

1. *Field administration.*—This activity includes review, evaluation, and coordination of Department program operations conducted through the regional offices as well as the providing of personnel, fiscal, and office services for approximately 23,500 regional employees.

2. *Grant-in-aid audits.*—The division audits 43 grant-in-aid programs to determine whether these grants were expended by the States, local subdivisions, and nonprofit organizations for the purposes for which they were appropriated. In addition, it audits State activities in the utilization of Federal surplus property. There will be an incoming workload of about 2,975 audits in 1964, and 3,300 in 1965.

3. *State merit systems.*—For 24 grant-in-aid programs, grants to States are contingent upon compliance with Federal regulations and standards relating to State personnel administration. The division reviews State plans and personnel practices in 300 State agencies administering grant programs and 70 merit systems applicable to them. On State request, it provides technical services for increased efficiency of personnel administration.

[1] Selected resources as of June 30 are as follows: Unpaid undelivered orders, 1962, $10 thousand; 1963, $9 thousand; 1964, $10 thousand; 1965, $10 thousand.

Under the Federal Property and Administrative Services Act of 1949, as amended, the Secretary: (a) allocates needed surplus personal property to State Agencies for educational, public health, and civil defense purposes; (b) transfers surplus real property for educational and public health purposes, including research, subject to disapproval by the Administrator of the General Services Administration; (c) administers the rights of the United States under the terms and conditions of transfer; and (d) promulgates regulations governing the operation of the program and enforces such regulations.

The following table shows actual and anticipated property allocations to schools, hospitals, and civil defense agencies through operation of the program (in millions of dollars):

	1963 actual	*1964 estimate*	*1965 estimate*
Personal property allocations	366	345	345
Real property transfers	38	40	45

Collections from sales, abrogations, and penalties on compliance cases are estimated at $1 million in 1964 and $750 thousand in 1965 compared to $970 thousand in 1963.

Summary of Sources and Application of Funds (in thousands of dollars)

	1963 actual	1964 estimate	1965 estimate
Obligations (from program and financing)	2,994	3,371	3,692
Increase (−) or decrease in gross unpaid obligations	−186	92	70
Gross expenditures	2,808	3,463	3,762
Revenues and other receipts (from program and financing)	2,666	3,516	3,783
Increase (−) or decrease in accounts receivable, net	58	−23	−15
Applicable receipts	2,724	3,492	3,768
Budget expenditures	84	−29	−6

The fund is authorized to provide the following services on a centralized basis for Department activities: (1) reproduction, (2) visual exhibits, (3) supply services, (4) tabulating, (5) communications, (6) accounting and payrolling, and (7) laborers' services. Presently, communications and accounting services are not being provided by the fund.

Budget program—1. *Reproduction.*—Consists of offset printing, photographic, visual exhibits, microfilming, and addressograph services for the Department's headquarters and for other Government agencies as required. This activity also includes procurement of printing from the Government Printing Office and other sources, and procurement and distribution of congressional materials.

2. *Tabulating.*—Provides tabulating services for all headquarters units of the Department. Services include fiscal, payroll and statistical data processing.

3. *Supply services.*—Includes purchasing, supply, and laborers' services on a centralized basis for headquarters units.

4. *Payrolling.*—Provides centralized payrolling services to the Department through use of electronic equipment.

Operating results and financial conditions.—Government investment at end of 1965 is expected to consist of donated assets and retained earnings. The earnings are retained to meet future needs.

2. *President's Council on Aging.*—The Council was established by Executive Order 11022 of May 14, 1962, to advise the President regarding programs and developments in the field of aging, to assist in the coordination of Federal aging programs, and to promote the sharing and dissemination of information on the many aspects of aging among Federal agencies and between them and State, local, or private groups. The heads of the following agencies were named as Council members: Health, Education, and Welfare (chairman), Agriculture, Commerce, Labor, Treasury, Civil Service Commission, Housing and Home Finance Agency, and Veterans Administration. The activities of the Council are supported by financial contributions from the member agencies.

3. *President's Council on Physical Fitness.*—The Council was established by Executive Order 11074 of January 8, 1963, to foster improvements in existing programs and promote additional efforts to enhance the physical fitness of Americans. Members of the Council are the following agency heads: Secretaries of Health, Education, and Welfare (chairman), Defense, Interior, Agriculture, Commerce, Labor; the Attorney General, and the Administrator of the Housing and Home Finance Agency. The Council's activities are supported by financial contributions of the member agencies.

GENERAL PROVISIONS—HEALTH, EDUCATION, AND WELFARE

SEC. 201. None of the funds appropriated by this title to the [Social Security Administration] *Welfare Administration* for grants-in-aid of State agencies to cover, in whole or in part, the cost of operation of said agencies, including the salaries and expenses of officers and employees of said agencies, shall be withheld from the said agencies of any States which have established by legislative enactment and have in operation a merit system and classification and compensation plan covering the selection, tenure in office, and compensation of their employees, because of any disapproval of their personnel or the manner of their selection by the agencies of the said States, or the rates of pay of said officers or employees.

SEC. 202. The Secretary is authorized to make such transfers of motor vehicles, between bureaus and offices, without transfer of

Digitized for FRASER
https://fraser.stlouisfed.org
Federal Reserve Bank of St. Louis

funds, as may be required in carrying out the operations of the Department.

[SEC. 203. None of the funds provided herein shall be used to pay any recipient of a grant for the conduct of a research project an amount for indirect expenses in connection with such project in excess of 20 per centum of the direct costs.]

SEC. [204]. *203.* Appropriations to the Public Health Service available for research grants pursuant to the Public Health Service Act shall also be available, on the same terms and conditions as apply to non-Federal institutions, for research grants to hospitals of the Service, the Bureau of Prisons, Department of Justice, and to Saint Elizabeths Hospital. (*Department of Health, Education, and Welfare Appropriation Act, 1964.*)

GENERAL PROVISIONS

SEC. 901. Appropriations contained in this Act, available for salaries and expenses, shall be available for services as authorized by section 15 of the Act of August 2, 1946 (5 U.S.C. 55a) but at rates not to exceed $75 per diem for individuals.

SEC. 902. Appropriations contained in this Act available for salaries and expenses shall be available for uniforms or allowances therefor as authorized by the Act of September 1, 1954, as amended (5 U.S.C. 2131).

SEC. 903. Appropriations contained in this Act available for salaries and expenses shall be available for expenses of attendance at meetings which are concerned with the functions or activities for which the appropriation is made or which will contribute to improved conduct, supervision, or management of those functions or activities.

SEC. 904. None of the funds contained in this Act for "Juvenile delinquency and youth offenses" shall be paid, for the purpose of conducting or assisting in conducting a research or demonstration project, to any person or organization registered with the Clerk of the House and the Secretary of the Senate under the Regulation of Lobbying Act.

SEC. 905. The Secretary of Labor and the Secretary of Health, Education, and Welfare, are each authorized to make available not to exceed $5,000 from funds available for salaries and expenses under titles I and II, respectively, for official reception and representation expenses, not otherwise provided for.

[SEC. 906. None of the funds appropriated in this Act shall be used to conduct or assist in conducting any program (including but not limited to the payment of salaries, administrative expenses, and the conduct of research activities) related directly or indirectly to the establishment of a national service corps or similar domestic peace corps type of program.] (*Departments of Labor, and Health, Education, and Welfare Appropriation Act, 1964.*)

DEPARTMENT OF THE INTERIOR

PUBLIC LAND MANAGEMENT

Bureau of Land Management

The Bureau of Land Management is responsible for the conservation, management, and development of some 465 million acres of the Nation's public lands. This includes some 289 million acres of federally owned lands located in Alaska.

In addition, the Bureau administers mining and mineral leasing on other federally owned lands, on former Federal lands where minerals have been reserved in public ownership, and on the submerged lands of the Outer Continental Shelf.

The work of the Bureau produces revenue from various sources which is distributed as follows (in millions of dollars):

	1962 actual	*1963 actual*	*1964 estimate*	*1965 estimate*
Total receipts	174	531	322	348
Payments to States and counties	−54	−64	−65	−69
Deposited in the Treasury	120	467	257	279

General and special funds:

MANAGEMENT OF LANDS AND RESOURCES

For expenses necessary for protection, use, improvement, development, disposal, cadastral surveying, classification, and performance of other functions, as authorized by law, in the management of lands and their resources under the jurisdiction of the Bureau of Land Management, [$44,152,500] *$45,447,000. (5 U.S.C. 133a, 133y, 485; 16 U.S.C. 583, 594; 43 U.S.C. 1, 2, 54, 72, 129, 315; 50 Stat. 874; Department of the Interior and Related Agencies Appropriation Act, 1964.)*

Appropriation (adjusted)	**44,062**	**44,066**	**45,447**

[1] Includes capital outlay as follows: 1963, $1,990 thousand; 1964, $1,800 thousand; 1965, $1,650 thousand.

[2] Selected resources as of June 30 are as follows:

	1962	*1963 adjustments*	*1963*	*1964*	*1965*
Stores	429		450	450	450
Unpaid undelivered orders	2,031	−79	4,142	4,142	4,142
Total selected resources	2,460	−79	4,592	4,592	4,592

1. *Lease and disposal of land and mineral resources.*—Applications are acted upon for all types of land use and for lease of mineral resources, principally oil and gas. The Bureau conducts comprehensive inventory of land resources and field investigations to determine the best use of the resources and classify the lands accordingly. General information is disseminated to the public, including information contained in the land records now being modernized.

2. *Management of grazing lands.*—The 178 million acres of public lands available for grazing which are used by approximately 29,000 stockmen are managed and protected. Proper management of these lands provides protection from fire, erosion, overuse, unseasonal use and trespass, thereby perpetuating forage resources. The increase in 1965 provides for continuing resource inventories and the adjudication of grazing privileges and will give increased attention to multiple-use management of the public lands, including the management of wildlife habitat.

3. *Forestry.*—A total of 46 million acres of commercial forest lands and 111 million acres of woodland-type lands are managed. The 1965 program includes the sale of 1.355 billion board feet of timber for anticipated receipts of $36.4 million. The increase in 1965 will provide for increased sales, improved management, and additional reforestation.

4. *Cadastral surveys.*—Surveys are performed to: Locate and identify legal boundaries of lands under application for lease or disposal, including submerged lands on the Outer Continental Shelf; assist in the management of forest and range lands; provide legal descriptions needed by other Federal agencies; and to permit States to obtain title to lands granted them by law.

5. *Soil and moisture conservation.*—Public lands in critical condition from erosion are conserved and rehabilitated and restored to productivity. Areas infested by halogeton, medusahead and other noxious weeds are treated. Cooperative programs will continue with other agencies in river basin areas. The increase in 1965 provides additional funds to rehabilitate burned-over areas.

6. *Fire suppression.*—Fires are fought which are on or threatening lands under the jurisdiction of the Bureau of Land Management. During the first 3 months of the current fiscal year, over 124,000 acres were burned and

PUBLIC LAND MANAGEMENT—Continued

BUREAU OF LAND MANAGEMENT—Continued

General and special funds—Continued

MANAGEMENT OF LANDS AND RESOURCES—continued

costs of suppression approximated $2.1 million. A supplemental appropriation for 1964 is anticipated for separate transmittal.

7. *Maintenance of physical facilities.*—Physical maintenance is provided for about 500 structures used as storehouses, equipment shelters, fire crew barracks, and similar purposes. The increase in 1965 will provide for increasing costs of current and deferred maintenance, and for maintenance requirements resulting from construction of additional facilities, including sanitation and protection facilities.

8. *Maintenance of access roads.*—Maintenance is provided for access roads on Coos Bay Wagon Road grant lands and on the public lands. The increase in 1965 will provide for the acceleration of repair work to restore roads to usable condition. Preventive as well as corrective maintenance will be performed.

9. *General administration.*—Executive direction is provided and services such as accounting, personnel administration, procurement, budgeting, management analysis, and internal auditing are performed in support of the programs of the Bureau.

Unobligated balance carried forward	2,547		
New obligational authority (appropriation)	**7,703**	**9,000**	**8,250**

[1] Selected resources as of June 30 are as follows: Unpaid undelivered orders, 1962, $2,811 thousand; 1963, $3,921 thousand; 1964, $3,921 thousand; 1965, $3,921 thousand.

Twenty-five percent of the revenue from the revested Oregon and California grant lands is made available for the following activities on the revested lands and on other Federal lands in the Oregon and California land-grant counties of Oregon:

1. *Construction and acquisition.*—Provision is made for construction of roads, acquisition of existing connecting roads and rights-of-way for roads into stands of high-value timber, and development of recreational facilities.

2. *Forest development and protection.*—Provision is made for development and protection of Oregon and California timberlands.

3. *Operation and maintenance.*—Provision is made for maintenance of recreational facilities and of access roads to highly valuable stands of timber.

ADMINISTRATIVE PROVISIONS

Appropriations for the Bureau of Land Management shall be available for purchase of seven passenger motor vehicles for replacement only; purchase of one aircraft [for replacement only]; purchase, erection, and dismantlement of temporary structures; and alteration and maintenance of necessary buildings and appurtenant facilities to which the United States has title: *Provided,* That of appropriations herein made for the Bureau of Land Management expenditures in connection with the revested Oregon and California Railroad and reconveyed Coos Bay Wagon Road grant lands (other than expenditures made under the appropriation "Oregon and California grant lands") shall be reimbursed from the 25 per centum referred to in subsection (c), title II, of the Act approved August 28, 1937 (50 Stat. 876), of the special fund designated the "Oregon and California land-grant fund" and section 4 of the Act approved May 24, 1939 (53 Stat. 754), of the special fund designated the "Coos Bay Wagon Road grant fund": *Provided further,* That appropriations herein made may be expended on a reimbursable basis for (1) surveys of lands other than those under the jurisdiction of the Bureau of Land Management and (2) protection and leasing of lands and mineral resources for the State of Alaska. (*Department of the Interior and Related Agencies Appropriation Act, 1964.*)

ALLOCATIONS RECEIVED FROM OTHER ACCOUNTS

Note.—Obligations incurred under allocations from other accounts are included in the schedules of the parent appropriation "Construction and rehabilitation," Bureau of Reclamation.

RANGE IMPROVEMENTS

(Receipt limitation) (indefinite)

For construction, purchase, and maintenance of range improvements pursuant to the provisions of sections 3 and 10 of the Act of June 28, 1934, as amended (43 U.S.C. 315), sums equal to the aggregate of all moneys received, during the current fiscal year, as range improvements fees under section 3 of said Act, 25 per centum of all moneys received, during the current fiscal year, under section 15 of said Act, and the amount designated for range improvements from grazing fees from Bankhead-Jones lands transferred to the Department of the Interior by Executive Order 10787, dated November 6, 1958, to remain available until expended. (*Department of the Interior and Related Agencies Appropriation Act, 1964.*)

Program and Financing (in thousands of dollars)

Unobligated balance carried forward	241	223	196
New obligational authority (appropriation)	**697**	**1,248**	**1,523**

[1] Includes capital outlay as follows: 1963, $30 thousand; 1964, $77 thousand; 1965, $85 thousand.
[2] Selected resources as of June 30 are as follows: Unpaid undelivered orders, 1962, $126 thousand; 1963, $122 thousand; 1964, $122 thousand; 1965, $122 thousand.

This appropriation is derived from receipts from grazing of livestock on public lands and on Bankhead-Jones Farm Tenant Act lands transferred from the Department of Agriculture by Executive Order 10787. On public lands, the fee from grazing includes a range improvement fee, which is available for range improvements when appropriated (43 U.S.C. 315i). On Bankhead-Jones lands, 25% of the fees from grazing are designated as available for range improvements.

Appropriation	**64,727**	**65,553**	**69,992**

[1] Selected resources as of June 30 are as follows: Unpaid undelivered orders, 1962, $228 thousand; 1963, $213 thousand; 1964, $213 thousand; 1965, $213 thousand.

1. *Expenses, sale of timber, etc., on reclamation lands.*—A portion of the receipts from timber sales on public lands set aside for relamation purposes is used to cover the cost of sales (41 Stat. 202; 53 Stat. 1196).

2. *Leasing of grazing lands.*—State, county, and privately owned grazing lands that are intermingled with public grazing lands are managed on a leased basis within the limits of receipts from such arrangements (43 U.S.C. 315m).

3. *Payments to Oklahoma (royalties).*—The State of Oklahoma is paid 37½% of the Red River oil and gas royalties in lieu of State and local taxes on Kiowa, Comanche, and Apache tribal funds (42 Stat. 1448), to be used for construction and maintenance of public roads and support of public schools (44 Stat. 740).

4. *Payments to Coos and Douglas Counties, Oreg., from receipts, Coos Bay Wagon Road grant lands.*—Out of receipts from the Coos Bay Wagon Road grant lands in Oregon, payments in lieu of taxes are made to Coos and Douglas Counties for schools, roads, highways, bridges, and port districts (53 Stat. 753–754).

5. *Payments to counties, Oregon and California grant lands.*—Fifty percent of the receipts of Oregon and California land-grant funds is paid the counties in which the lands are situated, to be used as other county funds (39 Stat. 218; 50 Stat. 876).

6. *Payments to States (grazing fees).*—The States are paid 33⅓% of the fees from each grazing district on Indian lands ceded to the United States within the State's boundaries (43 U.S.C. 315j).

7. *Payments to States (proceeds of sales).*—The States are paid 5% of the net proceeds from sale of public land and public land products (31 U.S.C. 711).

8. *Payments to States from grazing receipts, etc., public lands outside grazing districts.*—The States are paid 50% of the grazing fee receipts from public domain lands outside grazing districts (43 U.S.C. 315i, 315m).

9. *Payments to States from grazing receipts, etc., public lands within grazing districts.*—The States are paid 12½% of grazing fee receipts from grazing district lands within their boundaries (43 U.S.C. 315b, 315i).

10. *Payments to States from grazing receipts, etc., public lands within grazing districts, miscellaneous.*—The States are paid specifically determined amounts from grazing fee receipts from miscellaneous lands within grazing districts

Digitized for FRASER
https://fraser.stlouisfed.org
Federal Reserve Bank of St. Louis

when payment is not feasible on a percentage basis (43 U.S.C. 315).

11. *Payments to States from receipts under Mineral Leasing Act.*—Alaska is paid 90% and other States 37½% of the receipts from bonuses, royalties, and rentals resulting from development of mineral resources under the Mineral Leasing Act (30 U.S.C. 191), and from leases of potash deposits (30 U.S.C. 285), on public lands.

12. *Payments to counties, national grasslands.*—Of the revenues received from the use of submarginal lands, 25% is paid to the counties in which such land is situated, for school and road purposes (7 U.S.C. 1012).

13. *Expenses, Public Land Administration Act.*—Public Law 86–649, approved July 14, 1960, permanently appropriated certain moneys to the Secretary of the Interior. Timber purchasers or permittees provide bond or deposit to assure fulfillment of contracts. Users of roads under jurisdiction of the Bureau of Land Management may make deposits for maintenance purposes. Moneys received in forfeiture of such bonds or for road maintenance are available for necessary forest improvement, protection, and rehabilitation, and for road maintenance. Moneys collected on Oregon and California grant lands are available for those lands only and amounts in excess of the cost of doing the work are transferred to miscellaneous receipts (74 Stat. 507–08).

BUREAU OF INDIAN AFFAIRS

The Federal Government has assumed responsibility for the protection and development of Indian trust property and it furnishes services, which are normally provided other citizens through non-Federal Government and private agencies, when they are not available to Indians. Programs carried on by the Bureau of Indian Affairs are aimed toward increased Indian participation in the management of Indian-owned resources and full Indian participation in American life. States and counties are participating at an increasing rate in the service programs. The ultimate goal of the entire program is to have Indian people take a place in the social and economic life of the Nation on the same basis as other citizens.

General and special funds:

EDUCATION AND WELFARE SERVICES

For expenses necessary to provide education and welfare services for Indians, either directly or in cooperation with States and other organizations, including payment (in advance or from date of admission), of care, tuition, assistance, and other expenses of Indians in boarding homes, institutions, or schools; grants and other assistance to needy Indians; maintenance of law and order, and payment of rewards for information or evidence concerning violations of law on Indian reservations or lands; and operation of Indian arts and crafts shops and museums; [$89,235,250] *$96,970,000. (25 U.S.C. 13, 631–640; 48 U.S.C. 169, 250a, 250f; Department of the Interior and Related Agencies Appropriation Act, 1964.)*

Advances	18				
Total selected resources	3,653	−277	5,577	5,577	5,577

1. *Educational assistance, facilities, and services.*—The Bureau operates Federal school facilities where public schools are not available or cannot meet the special needs of Indian children. Financial assistance is extended to public schools enrolling Indian children where tax-free Indian lands result in financial problems for the local districts and where other special problems exist that are not covered by Federal impact legislation, administered by the Department of Health, Education, and Welfare. Grants are made to Indians to attend schools beyond the secondary level and assistance is given to adult Indians through an education and training program.

In 1963 there were 125,000 Indian children in school. Of these 60% attended public schools, 33% attended Federal schools, and 7% attended mission and other schools. Indian children enrolled in Federal facilities and those receiving higher education grants are as follows :

NUMBER OF PUPILS

	1963 actual	*1964 estimate*	*1965 estimate*
Boarding schools	27,851	31,569	33,694
Dormitories (pupils attend public school but live in federally operated dormitories)	4,082	3,858	3,986
Day schools	15,584	18,030	18,270
Higher education	963	1,326	1,300
Total	48,480	54,783	57,250

2. *Welfare and guidance services.*—Welfare services including direct relief and foster home care are provided for needy adults and children.

CASELOADS

	1963 actual	*1964 estimate*	*1965 estimate*
Aid to individuals:			
General assistance	15,660	17,000	17,000
Child welfare	2,420	2,620	2,820
Total	18,080	19,620	19,820

3. *Relocation and adult vocational training.*—Through these programs Indians are aided in securing employment or enrolling in training which will qualify them for employment either locally or in industrial areas away from

Total selected resources	2,093	−65	3,169	3,169	3,169

This program promotes the economic advancement of the Indian people through the utilization of their resources.

1. *Forest and range lands.*—This activity covers management, protection, and utilization of the forest, range, and wildlife resources on nearly 50 million acres of Indian-owned lands.

	1963 actual	1964 estimate	1965 estimate
Timber cut:			
Million board-feet	546	754	770
Dollar value (in thousands)	8,564	11,000	11,200

2. *Fire suppression.*—This provides for the cost of suppression and prevention of fires on or threatening Indian reservations. Approximately 60 million acres require protection. A supplemental appropriation for 1964 is anticipated for separate transmittal.

3. *Agricultural and industrial assistance.*—Funds under this activity provide for improved methods in farming, homemaking, the management of a loan program for small business enterprises, and formulation of plans and programs for the economic development of the Indian people.

4. *Soil and moisture conservation.*—Land-use practices based on land inventories and soil conservation plans are introduced to control erosion and promote more effective utilization of soil and water resources.

PUBLIC LAND MANAGEMENT—Continued

BUREAU OF INDIAN AFFAIRS—Continued

General and special funds—Continued

RESOURCES MANAGEMENT—continued

5. *Maintenance of roads.*—The Bureau maintains 16,958 miles of roads on Indian reservations.

6. *Development of Indian arts and crafts.*—Production and marketing of the products of Indian crafts are fostered through formation of production groups; establishing of standards; and improving of markets, design, and production methods.

7. *Management of Indian trust property.*—Banking services are provided for Indians; land is purchased, sold, exchanged, and leased; and Indian property and money rights are safeguarded. Work is continuing on consolidation or disposal of fractionated land holdings, especially in those areas affected by readjustment legislation.

8. *Repair and maintenance of buildings and utilities.*—Federal buildings and their related utility and communication systems are maintained.

	1963 actual	*1964 estimate*	*1965 estimate*
Square foot of buildings maintained	25,949,000	28,449,000	31,070,133
Average amount available per square foot for maintaining buildings	$0.189	$0.20	$0.20

9. *Operation, repair, and maintenance of Indian irrigation systems.*—Approximately 300 irrigation systems serving about 864,000 acres of Indian and mixed-ownership lands are operated and maintained. About 65% of the cost is financed from collections from water users, leaving approximately 35% to be met from funds appropriated under this activity.

TRIBAL FUNDS

(Trust fund)

In addition to the tribal funds authorized to be expended by existing law, there is hereby appropriated $3,000,000 from tribal funds not otherwise available for expenditure for the benefit of Indians and Indian tribes, including pay and travel expenses of employees; care, tuition, and other assistance to Indian children attending public and private schools (which may be paid in advance or from date of admission); purchase of land and improvements on land, title to which shall be taken in the name of the United States in trust for the tribe for which purchased; lease of lands and water rights; compensation and expenses of attorneys and other persons employed by Indian tribes under approved contracts; pay, travel, and other expenses of tribal officers, councils, and committees thereof, or other tribal organizations, including mileage for use of privately owned automobiles and per diem in lieu of subsistence at rates established administratively but not to exceed those applicable to civilian employees of the Government; relief of Indians, without regard to section 7 of the Act of May 27, 1930 (46 Stat. 391), including cash grants; and employment of a curator for the Osage Museum, who shall be appointed with the approval of the Osage Tribal Council and without regard to the classification laws: *Provided,* That in addition to the amount appropriated herein, tribal funds may be advanced to Indian tribes during the current fiscal year for such purposes as may be designated by the governing body of the particular tribe involved and approved by the Secretary, except that tribal funds derived from appropriations in satisfaction

Revenue and other receipts (from program and financing) applicable receipts	1,147	1,142	1,283
Budget expenditures	4,861	7,385	

This fund and miscellaneous tribal funds provide the only source of loans for the great majority of Indians who cannot borrow from ordinary commercial credit sources because of their low economic status and lack of bankable security (25 U.S.C. 470, 471, 631). Loans are made to tribes for relending to individuals, to tribal business enterprises, and to individual Indians for farming and business purposes.

A supplemental appropriation for 1964 is anticipated for separate transmittal.

LIQUIDATION OF HOONAH HOUSING PROJECT REVOLVING FUND—CON.

Summary of Sources and Application of Funds (in thousands of dollars)

	1963 actual	1964 estimate	1965 estimate
Obligations (from program and financing) (gross expenditures)	4	109	6
Revenues and other receipts (from program and financing) (applicable receipts)	2	3	3
Budget expenditures	2	106	3

This fund was transferred from the Housing and Home Finance Agency to the Secretary of the Interior under the provisions of Public Law 85–806, enacted August 28, 1958 (72 Stat. 974). The Secretary will use the funds transferred from the Housing and Home Finance Agency, along with any other revenues that may be received from the Hoonah housing project for the purpose of liquidating said project in accordance with the provisions of law. The deficit is expected to increase as funds are used for the liquidation of the project.

National Park Service

The Service administers national parks and other areas of unusual historic, scenic, scientific, or recreational character so that they may be preserved for public use and enjoyment.

1965 will be the 9th year of the 10-year Mission 66 program to provide adequate personnel and facilities needed to serve the ever-increasing number of visitors to park areas, and at the same time preserve park values. Visitation to parks is expected to increase from an estimated 93 million in 1963 to 108 million in 1966.

General and special funds:

MANAGEMENT AND PROTECTION

For expenses necessary for the management and protection of the areas and facilities administered by the National Park Service, including protection of lands in process of condemnation; and for plans, investigations, and studies of the recreational resources (exclusive of preparation of detail plans and working drawings) and archeological values in river basins of the United States (except the Missouri River Basin); [$27,124,000, including not to exceed $650,000 for travel and transportation of persons] *$29,712,000. (5 U.S.C. 124–132; 16 U.S.C. 1, 1b, 1c, 1d, 3, 17k–2, 17k, n, 81c, 431–433, 459r, 460, 460a–2, 461–467, 590a, 590f, 594; 40 U.S.C. 484(k); 43 U.S.C. 620(g); 50 U.S.C. 1622h (1); E.O. 6228 of July 28, 1933; Act of May 29, 1930 (46 Stat. 482, 483); Act of August 17, 1949 (63 Stat. 612); Department of the Interior and Related Agencies Appropriation Act, 1964.)*

New obligational authority	**25,383**	**27,077**	**29,712**
New obligational authority:			
Appropriation	26,485	27,124	29,712
Transferred to—			
"Operating expenses, Public Buildings Service," General Services Administration (76 Stat. 728) and Reorganization Plan No. 1 of 1963	−1	−47	
"Salaries and expenses, Bureau of Outdoor Recreation," Interior, pursuant to Reorganization Plan No. 3 of 1950	−1,101		
Appropriation (adjusted)	**25,383**	**27,077**	**29,712**

[1] Selected resources as of June 30 are as follows: Unpaid undelivered orders, 1962, $1,239 thousand (1963 adjustments, −$26 thousand); 1963, $1,906 thousand: 1964, $1,906 thousand; 1965, $1,906 thousand.

1. *Management of park and other areas.*—The estimate contemplates the administration of 207 parks comprising about 26 million acres located in 42 States, the District of Columbia, Puerto Rico, and the Virgin Islands. The program increase proposed is to provide for (a) administration of two new park areas for which funds are not now provided; (b) new parks activated since the beginning of Mission 66 now partially financed; (c) operation of newly constructed facilities and to meet requirements generated by increased visitor use and general park program expansion in pre-Mission 66 areas; (d) conversion of park radio systems to narrow-band frequencies; (e) commercial power and telephone service connection charges; (f) natural science and wildlife management studies; (g) 10 additional U.S. Park Police and supporting expenses; and additional staffing and general expense funds for management, protection, and interpretation functions for the National Capital Region; (h) production of additional free informational and sales publications; and (i) payment to the Bureau of Employees' Compensation, Department of Labor, as required by Public Law 86–767, approved September 13, 1960.

The following tabulation shows the actual and estimated visitor and revenue receipts (in thousands):

	Calendar year visitors	*Fiscal year receipts*
1962 actual	88,457	$5,842
1963 actual		6,451
1963 estimated	93,000	
1964 estimated	96,000	6,873
1965 estimated	102,000	7,093

2. *Forestry and fire control.*—Forests, brushland, or grassland of over 11 million acres are protected from fire, destructive insects, diseases, and other preventable damage. The program increase proposed is to provide for operating requirements generated by increased visitor use and general program expansion. A supplemental appropriation for 1964 is anticipated for separate transmittal.

3. *Soil and moisture conservation.*—The program will permit corrective measures in 43 parks in accordance with the Service's long-range soil and moisture conservation program.

4. *Park and recreation programs.*—Studies are conducted to determine areas that qualify for inclusion in the National Park System; and to determine the boundaries of proposed areas and changes that should be made in boundaries of existing areas; plans are formulated for development and use of recreation facilities and resources on properties of other Federal agencies and assistance is rendered in negotiating agreements with State and local agencies for maintaining and operating such facilities and resources; and technical and scientific services and guidance essential to management, protection, and public use of the park areas are provided in the fields of biology, geology, history, and archeology. Surveys are made of historic American buildings and sites for the purpose of acquiring and preserving data relative thereto. Studies and investigations are carried out leading to establishment and acquisition of rights to sources of water supply; and technical assistance is provided in acquiring lands and in solving problems relating to both normal and adverse uses made of some of the park lands.

5. *Concessions management.*—There are over 190 concessioners operating in the parks and other areas. Services to be rendered are determined; contracts are negotiated or permits issued; rates are established; and records are audited.

PUBLIC LAND MANAGEMENT—Continued

NATIONAL PARK SERVICE—Continued

General and special funds—Continued

CONSTRUCTION—continued

1. *Buildings, utilities, and other facilities.*—The 1965 program is the ninth year of a 10-year program to provide essential facilities to meet visitor requirements by 1966. A summary of the 1965 program by major type of construction follows (in thousands of dollars):

Camping and picnicking facilities	2,203
Public service and administrative units	8,971
Utilities	8,889
Employee housing	2,266
Miscellaneous	2,597
Total	24,926

2. *Acquisition of lands and water rights.*—At the end of 1964 approximately 495,000 acres of privately owned lands will remain within the areas administered. Acquisition of these remaining inholdings will be financed from the land and water conservation fund now under consideration by the Congress and assumed to be enacted prior to 1965. Status of the land acquisition program is as follows (in acres):

	1963 actual	*1964 estimate*
Private lands, beginning of year	508,900	645,000
New areas and boundary adjustments authorized	190,000	-------
Acquired during year	53,900	150,000
Private lands, end of year	645,000	495,000

A supplemental appropriation for 1964 is anticipated for separate transmittal.

Rights to water must be obtained, frequently by purchase in many of the areas, for use of visitors and employees, and for fire protection.

4. *Parkways.*—The costs scheduled under this activity are against carryover balance of prior appropriations authorized by the Federal-Aid Highway Act of 1952. The program authorized by title 23, U.S. Code is obligated against the contract authority provided by that title and is shown under the appropriation Construction (liquidation of contract authorization), National Park Service.

5. *Roads and trails.*—Costs scheduled for 1964 include the amount appropriated in 1964 as a contribution to the State of North Carolina for the Oregon Inlet Bridge at Cape Hatteras National Seashore, amounts to complete storm damage projects commenced under supplemental appropriations in 1961 and 1962, the balance provided during 1960 for construction of parking areas for the District of Columbia Stadium, and a small amount against the program authorized by the Federal-Aid Highway Act of 1952. The program authorized by title 23, U.S. Code is obligated against the contract authority provided by that title and is shown under the appropriation Construction (liquidation of contract authorization), National Park Service.

6. *Undistributed costs.*—These costs represent end-of-year variations in clearing accounts involving operations such as automotive shops, corrals, and facilitating services. The costs are distributed to the various activities served based on predetermined rates. Such rates are studied and adjusted at least once annually to provide for adequate operations.

ADMINISTRATIVE PROVISIONS

Appropriations for the National Park Service shall be available for the purchase of not to exceed one hundred and [twenty] *eighteen* passenger motor vehicles of which [one hundred and fourteen] *ninety-four* shall be for replacement only, including not to exceed [sixty-two] *fifty* for police-type use which may exceed by $300 each the general purchase price limitation for the current fiscal year[; and purchase of not to exceed one aircraft]. *(Department of the Interior and Related Agencies Appropriation Act, 1964.)*

ALLOCATIONS RECEIVED FROM OTHER ACCOUNTS

Note.—Obligations incurred under allocations from other accounts are included in the schedules of the parent appropriations as follows:

Executive, "Public works acceleration."
Agriculture, Forest Service, "Forest protection and utilization."
Commerce, Area Redevelopment Administration.
Health, Education, and Welfare, Office of Education, "Payments to school districts."
Interior:
  Geological Survey:
    "Public works acceleration."
    "Surveys, investigations, and research."
  Bureau of Reclamation:
    "Construction and rehabilitation."
    "Construction of recreational and fish and wildlife facilities."
District of Columbia:
  "Operating expenses, parks and recreation."
  "Capital outlay."

[1] Selected resources as of June 30 are as follows: Unpaid undelivered orders, 1962, $8 thousand; 1963, $125 thousand; 1964, $11 thousand; 1965, $15 thousand.

1. *Educational expenses, children of employees, Yellowstone National Park.*—Revenues received from the collection of park visitor fees are used to provide educational facilities to dependents of park personnel (62 Stat. 338).

2. *Payment for tax losses on land acquired for Grand Teton National Park.*—Park visitor fee revenues are used to compensate the State of Wyoming for tax losses on Grand Teton National Park lands (64 Stat. 849).

3. *Operation, management, maintenance, and demolition of federally acquired properties, Independence National Historical Park.*—Some of the buildings on lands acquired for establishment of Independence National Historical Park, Philadelphia, Pa., were rented pending their conversion to park purposes or demolition. Some of the cleared sites are being used temporarily as parking lots from which income is also realized. The income is used for management and maintenance of the rental properties and for demolition of buildings (65 Stat. 644). There will be no income from this source in 1965 as the properties will be landscaped during 1964.

OFFICE OF TERRITORIES

The Office promotes economic and political development in territorial and trusteeship areas under U.S. jurisdiction. It originates and implements Federal policy, guides and coordinates certain operating programs, provides information and advice, and participates in foreign policy matters concerning the territories. In addition, the Office represents the Governors of the Virgin Islands, Guam, and American Samoa in Washington; and assists the Virgin Islands Corporation.

General and special funds:

ADMINISTRATION OF TERRITORIES

For expenses necessary for the administration of Territories and for the departmental administration of the Trust Territory of the Pacific Islands, under the jurisdiction of the Department of the Interior, including expenses of the offices of the Governors of Guam and American Samoa, as authorized by law (48 U.S.C., secs. 1422, 1431a(c)); salaries of the Governor of the Virgin Islands, the Government Secretary, the Government Comptroller, and the members of their immediate staffs as authorized by law (48 U.S.C. 1591, 72 Stat. 1095); compensation and mileage of members of the legislatures in Guam, American Samoa, and the Virgin Islands as authorized by law (48 U.S.C. secs. 1421d(e), 1431a(c), and 1572e); compensation and expenses of the judiciary in American Samoa as authorized by law (48 U.S.C. 1431a(c)); grants to American Samoa, in addition to current local revenues, for support of governmental functions; *loans and grants to Guam, as authorized by law (Public Law 88–170)*; and personal services, household equipment and furnishings, and utilities necessary in the operation of the houses of the Governors of Guam and American Samoa; [$13,000,000] *$18,814,000*: *Provided*, That the Territorial and local governments herein provided for are authorized to make purchases through the General Services Administration: *Provided further*, That appropriations available for the administration of Territories may be expended for the purchase, charter, maintenance, and operation of aircraft and surface vessels for official purposes and for commercial transportation purposes found by the Secretary to be necessary. (*Executive Orders 6726, 10077, 10137; 48 U.S.C., 1391, 1421–1426b; Department of the Interior and Related Agencies Appropriation Act, 1964.*)

LOANS TO PRIVATE TRADING ENTERPRISES, TRUST TERRITORY OF THE PACIFIC ISLANDS—continued

Loans are made to local trading companies for purchase of Micronesian products for resale in the world market, purchase of trade goods for resale in Micronesia, and purchase of vessels (55 Stat. 151).

The 1956 appropriation language for the Trust Territory of the Pacific Islands made available for 1 year $500 thousand of the proceeds from liquidation of the Island Trading Company of Micronesia for establishment of this fund. This amount was later reduced to $300 thousand. The availability has been continued since 1956 and it is proposed to extend it again for 1965.

Interest charged is 4% per annum on the unpaid balance.

[1] Balances of selected resources are identified on the statement of financial condition.

The Alaska Railroad is authorized to perform generally all the usual duties of a common carrier railroad in aiding the development of agricultural, mineral, and other resources of Alaska, the settlement of public lands, and in the national defense effort. The railroad's main line extends 470.3 miles from Seward to Fairbanks, and 12.4 miles from Whittier to Portage Junction. There are also 194.8 miles of branch lines, passing and spur tracks, and yards. Finances are obtained through the Alaska Railroad revolving fund from revenues of the transportation service and other receipts (48 U.S.C. 301–308).

Budget program.—The budget program for 1965 contemplates a continuation of the major activities at about the same level as in recent years; no significant change in traffic volume is expected. About 40% of the proposed capital outlay of $2,343 thousand for 1965 represents improvements to the roadway and track consisting principally of replacing untreated ties with treated ties and applying crushed ballast. The balance is mainly for replacement, improvement, and modification of equipment.

Operating results.—A slight increase in freight revenues is expected in 1964. This is based upon experience in the past year with sea-train operations and the increasing use of cargo containers in freight movements; a related moderate increase in operating costs, principally in transportation service, is expected.

MINERAL RESOURCES

GEOLOGICAL SURVEY

General and special funds:

SURVEYS, INVESTIGATIONS, AND RESEARCH

For expenses necessary for the Geological Survey to perform surveys, investigations, and research covering topography, geology, and the mineral and water resources of the United States, its Territories and possessions, and other areas as authorized by law (72 Stat. 837 and 76 Stat. 427); classify lands as to mineral character and water and power resources; give engineering supervision to power permits and Federal Power Commission licenses; enforce departmental regulations applicable to oil, gas, and other mining leases, permits, licenses, and operating contracts; control the interstate shipment of contraband oil as required by law (15 U.S.C. 715); and publish and disseminate data relative to the foregoing activities; [$63,700,000] *$69,223,000*, of which [$10,150,000] *$10,800,000* shall be available only for cooperation with States or municipalities for water resources investigations: *Provided*, That no part of this appropriation shall be used to pay more than one-half the cost of any topographic mapping or water resources investigations carried on in cooperation with any State or municipality. (*43 U.S.C. 31; Department of the Interior and Related Agencies Appropriation Act, 1964.*)

The Geological Survey provides basic scientific data concerning water, land, and mineral resources, supervises the development and production of minerals and mineral fuels on leased Federal and Indian lands, and enforces the provisions of the Connally Hot Oil Act.

1. *Topographic surveys and mapping.*—Topographic maps portray the elevation, shape, and position of the natural and manmade features of the earth's surface. They provide information for highway construction, engineering and industrial development, military and civil defense, teaching, outdoor recreation, and for water, land, and other natural resource development programs. Topographic maps for about 100,000 square miles of previously unsurveyed or inadequately surveyed areas in the United States will be prepared during 1965. This mapping, added to areas already surveyed, will result in a total of about 2,500,000 square miles of coverage. In addition, about 15,000 square miles of mapping will be revised and about 150 special maps at various scales will be published.

2. *Geologic and mineral resource surveys and mapping.*—Geologic investigations in the field and laboratory produces: New or improved techniques and instruments for mineral exploration; geologic and geophysical maps that show the distribution, age, composition, structure, and physical properties of the rocks and mineral deposits at and beneath the surface of the earth; and information on the chemistry and physics of the earth and the geologic processes by which it was formed and is being continually modified. Increases for 1965 will permit expansion of studies aimed at providing increased knowledge of the composition and physical properties of the earth's crust and upper mantle—information necessary for the intelligent exploration for and utilization of our natural resources.

3. *Marine geology and hydrology.*—This program, begun in 1963, includes geological and geophysical mapping and

Digitized for FRASER
https://fraser.stlouisfed.org
Federal Reserve Bank of St. Louis

investigation of the Nation's continental shelves, research on geologic and hydrologic processes, techniques, and instruments, and on the hydrology of river mouths, estuaries, and lagoons to provide data for understanding conditions involved in the use of resources.

4. *Water resources investigations.*—This program includes determinations of the flow, stage, and sediment discharge of rivers; location and safe yields of underground waters; the temperature and chemical quality of waters and the availability of water supplies as related to present and future demands. Funds requested for 1965 will be directed toward strengthening the network of primary (long-term) streamflow stations and converting streamflow stations to digital-recorder operation for automated processing of flow data, describing ground-water systems and strengthening the nationwide network of ground-water observation wells, extending the network of benchmark hydrologic-data-collection areas, and conducting additional basinwide water-resource studies.

5. *Soil and moisture conservation.*—This program provides land management agencies of the Department of the Interior with basic hydrologic and geologic data needed for maintaining and improving the productive value of public lands.

6. *Conservation of lands and minerals.*—This program supervises development and production of minerals and mineral fuels on leased Federal, Indian, and Outer Continental Shelf lands. Federally owned and controlled lands are classified for their mineral and water power values. Investigations are conducted in support of State conservation laws to prevent the interstate shipment of contraband oil. The supervised leases during 1964 are expected to produce minerals valued at $1.45 billion, and render royalty returns of about $184 million. The States which produce the minerals receive 37½% of the royalties; the Reclamation fund, 52½%; and 10% is retained in the U.S. Treasury. In 1965, production and royalty values are expected to reach $1.58 billion and $197 million, respectively. Increased demands are being made for mineral classification services and for the accelerated classification and restoration of lands previously withdrawn. In 1965 it is expected that some 111,000 technical classification reports will be completed, as compared with 101,000 in 1964 and 91,200 in 1963.

8. *Special-purpose buildings.*—The 1965 program provides for construction of the Nuclear Research Laboratory at the Denver field center for which design will be completed in 1964.

Reimbursable obligations.—Reimbursements from non-Federal sources are from States and municipalities for making cooperative topographic and geologic surveys and water resources investigations (44 Stat. 963), proceeds from sale to the public of copies of photographs and records (43 U.S.C. 45), proceeds from sale of personal property (40 U.S.C. 481(c)), reimbursements from permittees and licensees of the Federal Power Commission (16 U.S.C. 797), and reimbursements from friendly countries and international organizations for technical assistance (22 U.S.C. 2357). Reimbursements from other Federal agencies (31 U.S.C. 686) are for special purpose mapping and investigations performed at the request of the financing agency, much of which contributes to the basic objectives of the Geological Survey.

The unobligated balance of $400 thousand is carried orward each year to pay the expenses of reimbursable work pending collection from cooperating agencies. This advance is not available for obligation.

MINERAL RESOURCES—Continued

GEOLOGICAL SURVEY—Continued

General and special funds—Continued

ADMINISTRATIVE PROVISIONS

The amount appropriated for the Geological Survey shall be available for purchase of not to exceed [sixty-eight] *fifty* passenger motor vehicles, for replacement only; reimbursement of the General Services Administration for security guard service for protection of confidential files; contracting for the furnishing of topographic maps and for the making of geophysical or other specialized surveys when it is administratively determined that such procedures are in the public interest; construction and maintenance of necessary buildings and appurtenant facilities; acquisition of lands for gaging stations and observation wells; expenses of U.S. National Committee on Geology; and payment of compensation and expenses of persons on the rolls of the Geological Survey appointed, as authorized by law, to represent the United States in the negotiation and administration of interstate compacts. (*Department of the Interior and Related Agencies Appropriation Act, 1964.*)

ALLOCATIONS RECEIVED FROM OTHER ACCOUNTS

Note.—Obligations incurred under allocations from other accounts are included in the schedules of the parent appropriations as follows:
Agriculture, Soil Conservation Service, "Watershed protection."
Defense—Civil, Army, Corps of Engineers "General investigations."
Interior:
Bureau of Indian Affairs, "Construction."
Bureau of Reclamation, "Construction and rehabilitation."
State:
"American sections, international commissions."
"United States dollars advanced from foreign governments, United States educational exchange program."

PAYMENT FROM PROCEEDS, SALE OF WATER, MINERAL LEASING ACT OF 1920, SEC. 40(d)

Total selected resources	2,034	−127	1,966	1,966	1,966

Provision is made for conserving, evaluating, and developing mineral resources.

1. *Bituminous coal.*—Scientific research and engineering investigations are carried out on the chemical and physical properties of coal and its mining, preparation, combustion, carbonization, and gasification. Research is continuing on the development of a stationary coal-burning gas turbine to provide a method of increasing the efficiency of steam-generating equipment. Coal samples are analyzed; efficiency of coal-mining methods is evaluated; and economic studies are performed. Research is conducted to discover causes of explosions in coal mines and to improve methods of preventing explosions. Tests are conducted on explosives and blasting devices to determine their permissibility for use in mining operations.

2. *Anthracite coal.*—Research is conducted to develop new and improve present uses for anthracite; improved mining and preparation methods are developed; and basic economic data are prepared.

3. *Petroleum, natural gas, and oil shale.*—Research is conducted to conserve these resources by improving the processes of recovery and utilization. Research is coordinated with work done by other Government agencies, educational institutions, and industry. Economic information is analyzed to provide a factual basis for industry operations and Government policy. Research on oil shale to determine the composition of the various products, to test the applicability of those products to different uses, and to determine the basic chemistry and physics of the refining processes will be continued.

https://fraser.stlouisfed.org
Federal Reserve Bank of St. Louis

4. *Minerals and metals.*—Research is conducted for the conservation, development, and utilization of minerals other than fuels.

Resources investigations are made of mineral deposits to gain better knowledge of the location, quantity, quality, and recoverability of specific mineral resources. Mineral production and mineral industry economic surveys are made of the industry.

Metallurgy research seeks improved processes for extracting metals and nonmetals from their ores, and adapting them for efficient use. Multidiscipline investigations develop better methods to recover metals by physical, chemical, and electrical techniques and find means to produce superpure materials. A parallel effort integrates the structure of metals, alloys, and ceramic compounds with optimum preparation and utilization. Basic to all investigations is fundamental research to delineate the physical and thermodynamic properties of materials and to analyze the rates and mechanics of high-temperature chemical and metallurgical reactions.

In mining research, much effort is devoted to applying physics as a scientific discipline in concert with mining engineering principles to all phases of mineral mining. These fundamental studies begin with determination of the physical nature of rock structures and continue through the application of rock mechanics to exploration, development, and operational problems of mining. Highly specialized research is conducted on the mechanisms of penetrating and breaking rock. One of the most important problems of mining is that of ground control which is attacked by developing methods of stabilizing underground openings and techniques for designing efficient open-pit slopes.

5. *Oceanographic research.*—The research will be a forward step in establishing a program to determine the significance of marine mineral resources. The extent and grade of oceanic deposits will be investigated and research will be initiated on mining and processing materials found at sea.

6. *Foreign mineral activities.*—The Bureau analyzes technical and economic data on foreign mineral resources, production, consumption, and international trade for Government use in coping with problems of mineral supply and to assist industry in planning domestic and foreign minerals ventures.

industries. The Bureau encourages accident-prevention education through safety organizations, exhibits, safety film production, demonstrations, instruction by Bureau personnel in accident prevention, and first aid and mine-rescue methods.

SUMMARY OF COAL-MINE INSPECTIONS

[Calendar years]

	1962 actual	*1963 estimate*	*1964 estimate*
Number of active mines	9,704	9,500	9,600
Individual mines inspected	8,039	8,000	8,500
Total inspections	12,810	13,000	14,000

2. *Control of fires in coal deposits.*—Fires in inactive or abandoned coal deposits on public lands or private property are controlled or extinguished. Expenditures in connection with fires in active coal mines are limited to investigations and research.

3. *Health and safety research.*—Research is conducted on the support of mine roof and control of overburden, ventilation of mines, methods of allaying harmful and combustible airborne dusts, preventing accumulations of combustible dusts, preventing underground fires, safe blasting practices, and safe electrical installations. Other research is directed toward developing mining procedures and devices to avoid, detect, or control those aspects of mining and the working environment which involve potential personal hazards to mine workmen and physical hazards to mine operations. Various machines and devices are tested for use in mines and plants where explosive or harmful gas or dust may be liberated or encountered.

MINERAL RESOURCES—Continued

BUREAU OF MINES—Continued

General and special funds—Continued

ADMINISTRATIVE PROVISIONS

Appropriations and funds available to the Bureau of Mines may be expended for purchase of not to exceed [seventy-six] *seventy-five* passenger motor vehicles for replacement only; providing transportation services in isolated areas for employees, student dependents of employees, and other pupils, and such activities may be financed under cooperative [arrangements,] *arrangements*; purchase and bestowal of certificates and trophies in connection with mine rescue and first-aid work: *Provided*, That the Secretary is authorized to accept lands, buildings, equipment, and other contributions from public and private sources and to prosecute projects in cooperation with other agencies, Federal, State, or private: *Provided further*, That the Bureau of Mines is authorized, during the current fiscal year, to sell directly or through any Government agency, including corporations, any metal or mineral product that may be manufactured in pilot plants operated by the Bureau of Mines, and the proceeds of such sales shall be covered into the Treasury as miscellaneous receipts.

ALLOCATIONS RECEIVED FROM OTHER ACCOUNTS

Note.—Obligations incurred under allocations from other accounts are included in the schedules of parent appropriations as follows:
Defense:
Military, Army, "Military construction."
Civil, Army, "General investigations."
Interior:
Bureau of Reclamation, "Construction and rehabilitation."
Office of the Secretary, "Advances and reimbursements."
Atomic Energy Commission, "Operating expenses."

Public enterprise funds:

[DEVELOPMENT AND OPERATION OF] HELIUM [PROPERTIES] *FUND*

The Secretary is authorized to borrow from the Treasury for payment to the helium production fund pursuant to section 12(a) of the Helium Act Amendments of 1960 to carry out the provisions of the Act and contractual obligations thereunder, including helium purchases, to remain available without fiscal year limitation, [$6,000,000] *$20,000,000*, in addition to amounts heretofore authorized to be borrowed. (*50 U.S.C. 167; 74 Stat. 918; Department of the Interior and Related Agencies Appropriation Act, 1964.*)

[1] Balances of selected resources are identified on the statement of financial condition.

This fund is used for the production, conservation, purchase, and sale of helium; location and development of helium properties and reserves; and research on the properties and uses of helium to promote its wise and effective use. Production is primarily for the Department of Defense, Atomic Energy Commission, and the National Aeronautics and Space Administration, which reimburse the fund for products received. Other Federal agencies and non-Federal consumers also buy helium for medical, scientific, and commercial uses.

Budget program.—The Helium Act Amendments of 1960 (74 Stat. 918) provide for the conservation of helium now going to fuel markets as a non-combustible component of some natural gases. This conservation program is being accomplished through long-term negotiated contracts with private companies to finance, construct, and operate helium extraction plants for sale of helium to the Government.

Deliveries of helium began during 1963 under four contracts, which obligated the initial contracting authority of $47.5 million a year. Helium recovered from fuel gases by the 5 private industry plants will be transported in a 425-mile Government pipeline system to the Cliffside field near Amarillo, Tex., for storage until needed in the future. These plants will produce an estimated 3.7 billion cubic feet of helium in 1965. Over the 22-year life of the

Digitized for FRASER
https://fraser.stlouisfed.org
Federal Reserve Bank of St. Louis

four contracts, the five plants are expected to deliver about 62.5 billion cubic feet of helium to the Bureau of Mines.

The five Government-owned and operated helium plants at Amarillo, Tex.; Exell, Tex.; Shiprock, N. Mex.; Otis, Kans.; and Keyes, Okla., will produce about 790 million cubic feet of helium and sell more than 550 million cubic feet in fiscal year 1965.

Research into the properties of helium will be extended to provide missing information and show how these properties can be utilized advantageously in industrial, defense, and space programs. A survey of the occurrences of helium will continue throughout the budget year to increase the knowledge of helium resources in the United States.

Financing the budget program.—Funds borrowed from the Treasury will be used to supplement the revenue received from sales of helium. Additional borrowing authority of $20 million is requested for 1965. The sales price of helium is established at a rate sufficient to cover costs of operations and to provide for future repayment of debt, including accrued interest.

Operating results and financial condition.—Government equity is estimated to be $134.3 million at the end of 1965, an increase of $82.4 million from 1962. This increase is due mainly to an increase in retained earnings, estimated at $33.3 million, which will accrue during 1963, 1964, and 1965, and to the estimated borrowings during these years of $42 million. The retained earnings are building up as a result of the favorable cost-sales price relationship existing during the early years of the conservation program. Essentially, all retained earnings are reinvested for the purchase of helium and other capital assets to minimize borrowing requirements from the Treasury.

New obligational authority (appropriation)	**3,450**	**5,075**	**6,836**

[1] Selected resources as of June 30 are as follows: Unpaid undelivered orders, 1962, $1,339 thousand; 1963, $1,413 thousand; 1964, $2,900 thousand; 1965, $2,900 thousand.

This program provides for research to develop new methods of mining, preparing, and utilizing coal, with the objective of expanding markets and increasing coal consumption.

1. *Administration and contract supervision.*—This activity covers administration, supervision of federally sponsored contract research, and coordination and stimulation of private and public coal research.

2. *Contract research.*—Research is accomplished through contracts with recognized organizations—both public and private—possessing a research and development capability.

Office of Minerals Exploration

General and special funds

SALARIES AND EXPENSES

For expenses necessary to provide a program for the discovery of the minerals reserves of the United States, its territories and possessions, by encouraging exploration for minerals, including administration of contracts entered into prior to June 30, 1958, under section 303 of the Defense Production Act of 1950, as amended, [$850,000] *$900,000*, including not to exceed [$234,000] *$234,000* for administrative and technical services, to remain available until expended. (*Department of the Interior and Related Agencies Appropriation Act, 1964.*)

Program and Financing (in thousands of dollars)

	1963 actual	1964 estimate	1965 estimate
Program by activities:			
1. Financial assistance to participants in exploration projects	524	731	666
2. Administrative and technical services	212	234	234
Total program costs, funded	736	965	900
Change in selected resources [1]	66	30	
Total obligations	802	995	900
Financing:			
Unobligated balance brought forward	−197	−145	
Unobligated balance carried forward	145		
New obligational authority (appropriation)	**750**	**850**	**900**

[1] Selected resources as of June 30 are as follows: Unpaid undelivered orders, 1962, $730 thousand; 1963, $796 thousand; 1964, $826 thousand; 1965, $826 thousand.

This program provides for the discovery of the minerals reserves of the United States, its Territories and possessions, by encouraging exploration for minerals, excluding organic fuels, by private industry.

1. *Financial assistance to participants in exploration projects.*—This is the Government's share of the cost of exploration for minerals. The Government contributes up to 50% of the cost of work authorized by the contract. If the operation is successful, the contribution is subject to repayment with interest. The 80 applications expected in 1965 are estimated to produce 22 contracts having an average Government participation of $34,600. Royalties to be received during 1965 are estimated at $20,000, and will be paid into the general fund of the Treasury.

2. *Administrative and technical services.*—This activity finances the Office of Minerals Exploration, both in the field and in Washington, D.C. In the 3 years covered by this schedule, net contract obligations for financial assistance are expected to increase 17%, from $591 thousand to $666 thousand, while the cost of administrative and technical services is expected to increase only 11%, from $212 thousand to $234 thousand.

Object Classification (in thousands of dollars)

LEAD AND ZINC STABILIZATION PROGRAM

Program and Financing (in thousands of dollars)

	1963 actual	1964 estimate	1965 estimate
Program by activities:			
1. Stabilization payments	1,620	1,915	1,589
2. Administration	75	61	61
Total program costs, funded—obligations	1,695	1,976	1,650
Financing:			
Unobligated balance brought forward	−4,690	−3,626	−1,650
Unobligated balance carried forward	3,626	1,650	
Unobligated balance lapsing	1,819		
New obligational authority (appropriation)	**2,450**		

This program provides for stabilization payments for lead and zinc ores and concentrates in order to stabilize the mining of lead and zinc by small domestic producers.

1. *Stabilization payments.*—Payments are computed for lead at 75% of the difference between 14½ cents per pound and the average market price for the month in which the sale occurred, and for zinc at 55% of the difference between 14½ cents per pound and the average market price for the month. The total amount of payments which may be made in each calendar year of the program is limited, as are the tons of lead and zinc on which payments may be made.

2. *Administration.*—This activity finances the processing and certification of applications from small domestic producers, the establishment of quotas and allocations, and the processing of claims for payment.

MINERAL RESOURCES—Continued

OFFICE OF OIL AND GAS

General and special funds:

SALARIES AND EXPENSES

For necessary expenses to enable the Secretary to discharge his responsibilities with respect to oil and gas, including cooperation with the petroleum industry and State authorities in the production, processing, and utilization of petroleum and its products, and natural gas, [$615,500] *$660,000.* (*Department of the Interior and Related Agencies Appropriation Act, 1964.*)

Program and Financing (in thousands of dollars)

	1963 actual	1964 estimate	1965 estimate
Program by activities:			
1. Coordination of oil and gas activities	444	556	700
2. Administration of oil import program	104	142	146
3. Oil Import Appeals Board	11	14	14
Total program costs, funded	559	712	860
Change in selected resources [1]	−5

Financing:			
Unobligated balance lapsing	3		
Reimbursements for emergency preparedness functions		−96	−200
New obligational authority (appropriation)	**558**	**616**	**660**

[1] Selected resources as of June 30 are as follows: Unpaid undelivered orders, 1962, $4 thousand (1963 adjustments, $2 thousand); 1963, $1 thousand; 1964, $1 thousand; 1965, $1 thousand.

1. *Coordination of oil and gas activities.*—This office coordinates Federal oil and gas policies, provides advice and assistance to Federal agencies and international organizations on all phases of petroleum and gas, and serves as the principal channel of communication between the Federal Government and the petroleum, gas, petrochemical and allied industries. Studies, domestic and worldwide, are made to maintain data on adequacy of petroleum and gas supplies, to define deficient areas or elements, and to develop ways to alleviate actual or potential deficiencies.

2. *Administration of oil import program.*—This appropriation finances the Oil Import Administration, established March 13, 1959, pursuant to Presidential Proclamation No. 3279, as amended. The Administration sets quotas for importers of crude oil and oil products under the mandatory quota system.

3. *Oil Import Appeals Board.*—The Oil Import Appeals Board has been created to conduct hearings on appeals from importers who request a change in their quota or who do not qualify for a quota.

1. Management	384	391	400
2. Marketing and technology	3,249	4,096	4,602
3. Research	8,503	9,709	11,969
4. Research on fish migration over dams	1,667	1,497	1,407
5. Fishing vessel mortgage insurance	48	42	43
6. Columbia River fishery facilities	1,955	2,090	2,260
Total program costs, funded	15,806	17,824	20,681
Change in selected resources [1]	16		
Total obligations	15,822	17,824	20,681
Financing:			
Unobligated balance lapsing	32		
New obligational authority	**15,854**	**17,824**	**20,681**
New obligational authority:			
Appropriation	15,883	17,833	20,681
Transferred to "Operating expenses, Public Buildings Service," General Services Administration (76 Stat. 728 and 77 Stat. 436)	−29	−9	
Appropriation (adjusted)	**15,854**	**17,824**	**20,681**

[1] Selected resources as of June 30 are as follows: Unpaid undelivered orders, 1962, $2,944 thousand (1963 adjustments, −$64 thousand); 1963, $2,896 thousand; 1964, $2,896 thousand; 1965, $2,896 thousand.

1. *Management.*—This activity covers administration and enforcement of international agreements pertaining to fish and whales.

2. *Marketing and technology.*—This includes (a) collecting and disseminating economic data on the fishing industry, including business trends and foreign trade; (b) exploring for fish and improving fishing gear and methods; (c) operation of market news offices; (d) compiling and publishing commercial fishery statistics; and (e) developing and demonstrating more efficient means of handling, processing, storing, and marketing of fishery products.

3. *Research.*—Research is conducted (a) on variations in abundance of important commercial food fishes and other aquatic animals; (b) on declining species and fishery resources; (c) on cultivation of aquatic animals, including shellfish; and (d) in the design of fish protective devices. A total of $685 thousand is included for pesticides studies in 1965.

A supplemental appropriation for 1964 is pending in Congress for acceleration of studies on the toxicological effects of pesticides on marine animals.

4. *Research on fish migration over dams.*—Investigations are conducted to determine factors influencing direction and rate of movement of anadromous fish over dams, for consideration in designing future dams.

5. *Fishing vessel mortgage insurance.*—This activity provides for administration of the fishing vessel mortgage insurance program, which aids financing of construction of fishing vessels.

6. *Columbia River fishery facilities.*—This activity covers costs of operation, maintenance, and alteration of hatcheries, fish screens, and fishways under the Columbia River fishery development program.

Funds for three of the above activities are supplemented from the permanent appropriation, Promote and develop fishery products and research pertaining to American fisheries, and from the special foreign currency appropriation. These supplementary amounts are as follows (in thousands of dollars):

	1963 actual	*1964 estimate*	*1965 estimate*
Marketing and technology	2,092	2,136	2,136
Research	2,516	2,686	2,686
Research on fish migration over dams	237	250	250

Many of the programs in the marketing and technology and research activities are included in the national oceanography program. Total Bureau of Commercial Fisheries annual and permanent appropriations applied to this program are as follows: 1963, $10,019 thousand; 1964, $12,142 thousand; 1965, $14,010 thousand.

Appropriation pending before Congress:

MANAGEMENT AND INVESTIGATIONS OF RESOURCES

Program and Financing (in thousands of dollars)

	1963 actual	1964 estimate	1965 estimate
Program by activities:			
Research (costs—obligations)		100	
Financing:			
New obligational authority (pending appropriation)		**100**	

Under existing legislation, 1964.—A supplemental appropriation for 1964 is pending in Congress for research on the effects of pesticides on marine animals.

MANAGEMENT AND INVESTIGATIONS OF RESOURCES (SPECIAL FOREIGN CURRENCY PROGRAM)

For [purchase of] *payments in* foreign currencies which [accrue under title I of the Agricultural Trade Development and Assistance Act of 1954, as amended (7 U.S.C. 1704), for the purposes authorized by section 104(k) of that Act, $300,000, which shall be available to purchase only those currencies which] the Treasury Department shall determine to be excess to the normal requirements of the United States, *for necessary expenses of the Bureau of Commercial Fisheries, as authorized by law, $300,000, to remain available until expended: Provided, That this appropriation shall be available, in addition to other appropriations to such agency, for payments in the foregoing currencies. (7 U.S.C. 1704; Department of the Interior and Related Agencies Appropriation Act, 1964.)*

Program and Financing (in thousands of dollars)

Program by activities:			
1. Marketing and technology	49	125	125
2. Research	51	175	175
Total program costs, funded	100	300	300
Change in selected resources [1]	200		
Total obligations	300	300	300

Program and Financing (in thousands of dollars)—**Continued**

	1963 actual	1964 estimate	1965 estimate
Financing:			
New obligational authority (appropriation)	**300**	**300**	**300**

[1] Selected resources as of June 30 are as follows: Unpaid undelivered orders, 1962, $296 thousand (1963 adjustments, −$145 thousand); 1963, $351 thousand; 1964, $351 thousand; 1965, $351 thousand.

Activities in foreign countries under this appropriation complement domestic programs financed by the regular appropriation for management and investigations of resources.

1. *Marketing and technology.*—These funds finance technological research involving protein, nutritional, and fish preservation studies.

2. *Research.*—These funds finance biological research conducted on (a) variations in the abundance of important commercial food fishes and other aquatic animals; (b) discovery and conservation of declining species; and (c) cultivation of fishery resources.

FISH AND WILDLIFE SERVICE—Continued

BUREAU OF COMMERCIAL FISHERIES—Continued

General and special funds—Continued

CONSTRUCTION—continued

1. *Fishery facilities.*—Construction projects proposed for 1965 include a shellfisheries research center at Milford, Conn.; a biological research laboratory in Florida for the tropical Atlantic oceanography program; and a replacement for the exploratory fishing vessel *Oregon* for use in the Gulf of Mexico, Caribbean, and tropical Atlantic. Also proposed is purchase of equipment for a new research vessel being constructed for use in the North Pacific and Bering Sea. All are included in the national oceanography program.

2. *Columbia River fishery facilities.*—This is for continuation of the program in Oregon, Washington, and Idaho to provide production and migration aids for salmon and steelhead.

ADMINISTRATION OF PRIBILOF ISLANDS

(Indefinite, special fund)

For carrying out the provisions of the Act of February 26, 1944, as amended (16 U.S.C. 631a–631q), there are appropriated amounts not to exceed [$2,468,000] *$2,442,000*, to be derived from Pribilof Islands fund. *(5 U.S.C. 133t; Act of Aug. 8, 1956, 70 Stat. 1119; Act of July 7, 1958, 72 Stat. 339; Act of June 25, 1959, 73 Stat. 141; Department of the Interior and Related Agencies Appropriation Act, 1964.)*

Budget expenditures	—20	—29	—30

Premiums and fees collected under the fishing vessel mortgage insurance program are deposited in this fund for use in cases of default (46 U.S.C. 1271–1279; 70 Stat. 1119; 23 F.R. 2304). Additional funding, if required, will be provided pursuant to authority vested in the Secretary by the Act of July 5, 1960 (74 Stat. 314). As of September 30, 1963, 28 loans totaling $2.3 million were insured on 40 vessels valued at $3.1 million.

Budget expenditures	—1,382	—1,000	—1,000

[1] Balances of selected resources are identified on the statement of financial condition.

This fund is used for making loans to segments of the fishing industry unable to obtain commercial loans on reasonable terms for financing operations, maintenance, replacement, repair, and equipment of fishing gear and vessels, and for research into basic problems of fisheries. Loans bear interest at 5% annually and mature in not more than 10 years. Loan commitments against the fund are made on approval of the Secretary of the Interior, and referred to the Bureau of Commercial Fisheries for closing in the field and rendering loan servicing functions required (70 Stat. 1119).

Budget program—Loans made.—As of September 30, 1963, a total of 1,296 applications amounting to $35 million had been received. Of these, 677 loans totaling $15.6 million had been approved and 340 applications amounting to $8.5 million had been declined.

Administrative expenses.—These expenses include processing of loan applications, closing of loans, and collection of repayments and interest.

Financing.—Appropriations of $13 million provide capital for the fund. It is estimated that this program can be carried through 1965 without additional financing. Additional financing is provided from interest on outstanding loans.

Operating results.—The existing deficit is expected to be eliminated by future interest earnings.

[1] Selected resources as of June 30 are as follows:

	1962	1963	1964	1965
Stores	389	438	438	438
Unpaid undelivered orders	1,843	2,283	2,283	2,283
Total selected resources	2,232	2,721	2,721	2,721

1. *Management of fishery resources.*—One hundred fish-cultural stations are operated for propagation of food and game fishes. The Black Bass Act regulating shipment of fish across State boundaries is administered, and administrative staffing for the development of a National Fisheries Center and Aquarium is provided.

2. *Extension and training.*—Technical assistance is provided to Federal, State, Indian, and other public or private entities in management of sport fishing and fish propagation; cooperative development of fish-stocking programs is carried on with the States; and 12 cooperative fishery units are operated at universities.

3. *Fishery research.*—These research studies include nutrition, genetics, and diseases of fish; improved methods of fish husbandry and management of public water areas for fishing; and conservation of marine sport fishes. A total of $952 thousand is provided for fish-pesticide studies in 1965.

4. *Administration of wildlife resources.*—The Bureau operates and maintains 298 wildlife refuges, consisting of 6.8 million acres for conservation of migratory waterfowl, and 22 million acres for preservation and propagation of rare birds and mammals. In addition, the Bureau enforces the Migratory Bird Treaty and Lacey Acts for protection of migratory birds and regulation of interstate and foreign shipments of game and conducts migratory game bird surveys.

5. *Control of predatory animals and injurious rodents.*—Predatory animals and injurious rodents are controlled on public lands. Technical assistance and supervision are provided to State and local cooperative control programs for protection against harmful animals and nuisance birds. State and local cooperator funds are expected to total $4.1 million in 1965.

6. *Wildlife research.*—Research is conducted on migratory birds and on wildlife management and conservation practices. A total of $1.9 million is provided for pesticide-wildlife studies in 1965. Wildlife units are also maintained in cooperation with the Wildlife Management Institute and land-grant colleges at 19 locations to give technical training in wildlife management, conduct research, and demonstrate improved management practices.

7. *Soil and moisture conservation.*—This activity covers work on 118 national wildlife refuges in combating erosion and depletion on 10 million acres of soil.

8. *River basin studies.*—This activity covers studies of the effects on fish and wildlife resources of water-use projects of Federal agencies and licensees. Recommendations are made for measures to protect and improve these resources. Additional funds, totaling $1.4 million in 1965, are provided for this activity from the Bureau of Reclamation and the Corps of Engineers.

Funds for four of the above activities are supplemented by moneys appropriated under the permanent accounts, Federal aid in fish restoration and management, Federal aid in wildlife restoration, and appropriations from national wildlife refuge receipts, as follows (in thousands of dollars):

	1963 actual	1964 estimate	1965 estimate
Fishery research	49	24	24
Administration of wildlife resources	1,510	2,030	1,997
Wildlife research	50	280	280
River basin studies	30	-----	-----

A supplemental appropriation for 1964 is pending in Congress for acceleration of studies on the toxicological effects of pesticides on fish and wildlife.

Federal Reserve Bank of St. Louis

Receipts from the sale of Federal hunting stamps are set aside in the migratory bird conservation fund (16 U.S.C. 718).

1. *Printing and sale of hunting stamps.*—The Post Office Department is paid the cost of printing, sale, and accounting for migratory bird hunting stamps.

2. *Acquisition of refuges and other areas.*—Receipts in excess of Post Office Department expenses are available for costs of location and acquisition of migratory bird refuges and waterfowl production areas.

In addition to receipts from the sale of Federal hunting stamps, the "wetlands" legislation of October 4, 1961 (16 U.S.C. 715k–3, 5) authorizes advances for acquisition of refuges, to be repaid beginning in 1969. The third such advance, $8 million, is proposed for 1965.

ADMINISTRATIVE PROVISIONS

Appropriations and funds available to the Fish and Wildlife Service shall be available for purchase of not to exceed one hundred and [three] *forty-seven* passenger motor vehicles of which [ninety-eight] *one hundred and twenty-four* shall be for replacement only (including [fifty-three] *sixty-eight* for police-type use which may exceed by $300 each the general purchase price limitation for the current fiscal year); purchase of not to exceed [three] *six* aircraft, for replacement only; not to exceed $50,000 for payment, in the discretion of the Secretary, for information or evidence concerning violations of laws administered by the Fish and Wildlife Service; publication and distribution of bulletins as authorized by law (7 U.S.C. 417); rations or commutation of rations for officers and crews of vessels at rates not to exceed $3 per man per day; repair of damage to public roads within and adjacent to reservation areas caused by operations of the Fish and Wildlife Service; options for the purchase of land at not to exceed $1 for each option; facilities incident to such public recreational uses on conservation areas as are not inconsistent with their primary purposes; and the maintenance and improvement of aquaria, buildings, and other facilities under the jurisdiction of the Fish and Wildlife Service and to which the United States has title, and which are utilized pursuant to law in connection with management and investigation of fish and wildlife resources. (*Department of the Interior and Related Agencies Appropriation Act, 1964.*)

ALLOCATIONS RECEIVED FROM OTHER ACCOUNTS

Note.—Obligations incurred under allocations from other accounts are included in the schedules of the parent appropriations as follows:

Defense—Civil, Army:
"General investigations."
"Construction, general."

Interior:
Bureau of Indian Affairs, "Resources management."
Bureau of Reclamation:
"General investigations."
"Construction and rehabilitation."
"Construction of recreational and fish and wildlife facilities."

FEDERAL AID IN FISH RESTORATION AND MANAGEMENT

(Receipt limitation) (Permanent, indefinite)

Program and Financing (in thousands of dollars)

	1963 actual	1964 estimate	1965 estimate
Program by activities:			
1. Payments to States	4,665	5,938	5,531
2. Administration	393	437	444
3. Research	54	25	25
Total program costs, funded	5,112	6,400	6,000
Change in selected resources [1]	821

WATER AND POWER DEVELOPMENT

Bureau of Reclamation

The Bureau plans, constructs, and operates facilities to irrigate lands, furnish municipal or miscellaneous water supplies, and develop related hydroelectric power and flood control in the 17 western States and Alaska.

Appropriations to the Bureau are made from the general fund and special funds. The special funds are (a) the Reclamation fund, largely derived from certain irrigation and power revenues; receipts from the sale, lease, and rental of public lands; and certain oil and mineral revenue; (b) the Colorado River Dam fund, derived from the revenue of the Boulder Canyon project; and (c) the Colorado River development fund, derived from transfers of money from the Colorado River Dam fund. The estimates of appropriation for the budget year are summarized by source, as follows (in thousands of dollars):

Appropriation title	*Estimate of appropriation*	*General fund*	*Reclamation fund*	*Colorado River Dam fund*	*Colorado River development fund*	*Other*
General investigations	10,500	946	9,054	------	500	----
Construction and rehabilitation	182,730	102,730	80,000	------	-----	----
Operation and maintenance	40,300	7,937	30,758	1,605	-----	----
Loan program	13,570	13,570	-------	------	-----	----
General administrative expenses	10,400	-------	10,400	------	-----	----
Construction of recreational and fish and wildlife facilities	4,500	4,500	-------	------	-----	----
Upper Colorado River Basin fund	57,800	57,800	-------	------	-----	----
Permanent authorizations	3,812	-------	108	3,700	-----	4
Total	323,612	187,483	130,320	5,305	500	4

The total appropriation request of $323.6 million represents a decrease of $34.4 million compared with current year appropriations and a decrease of $22.8 million compared with the preceding year.

General and special funds:

For carrying out the functions of the Bureau of Reclamation as provided in the Federal reclamation laws (Act of June 17, 1902, 32 Stat. 388, and Acts amendatory thereof or supplementary thereto) and other Acts applicable to that Bureau, as follows:

GENERAL INVESTIGATIONS

For engineering and economic investigations of proposed Federal reclamation projects and studies of water conservation and development plans and activities preliminary to the reconstruction, rehabilitation and betterment, financial adjustment, or extension of existing projects, including not to exceed [$400,000] *$544,000* for investigations of projects in Alaska, to remain available until expended, [$10,294,000] *$10,500,000*, of which [$8,902,000] *$9,054,000* shall be derived from the reclamation fund and $500,000 shall be derived from the Colorado River development fund: *Provided*, That none of this appropriation shall be used for more than one-half of the cost of an investigation requested by a State, municipality, or other interest: *Provided further*, That [$340,000] *$370,000* of this appropriation shall be transferred to the United States Fish and Wildlife Service for studies, investigations, and reports thereon as required by the Fish and Wildlife Coordination Act of 1958 (72 Stat. 563–565) to provide that wildlife conservation shall receive equal consideration and be coordinated with other features of water-resource development programs of the Bureau of Reclamation. (*Public Works Appropriation Act, 1964.*)

[1] Selected resources as of June 30 are as follows:

	1962	*1963*	*1964*	*1965*
Stores	24	26	23	18
Unpaid undelivered orders	230	470	11	14
Equipment and service facilities	275	410	453	438
Total selected resources	529	906	486	470

Investigations and surveys are made to determine the feasibility of potential reclamation projects and the need for rehabilitation of existing Federal reclamation projects. Studies scheduled from this appropriation, excluding those investigations involving only stream gaging or studies by the Fish and Wildlife Service are as follows:

Status	*1963 actual*	*1964 estimate*	*1965 estimate*
Prior year studies continuing	71	67	56
Prior year studies completed	20	24	21
Initiated or resumed and completed during the year	2	--	1
Initiated or resumed but not completed	20	10	10

1. *Engineering and economic investigations.*—These are made to plan the development of river basins and to determine the feasibility of potential projects prior to authorization. Also financed from this appropriation are studies relating to weather modification and studies to

improve planning procedures, engineering methods, and means of reservoir evaporation control.

2. *Investigations of existing projects.*—These are made to determine the need and to plan for rehabilitation, financial adjustments, or water conservation on existing Federal reclamation projects.

3. *Alaskan investigations.*—These engineering and economic investigations relate to projects for the development and utilization of the water resources of Alaska (48 U.S.C. 487–487b).

4. *Fish and wildlife studies.*—These funds are transferred to the Fish and Wildlife Service for studies of the fish and wildlife aspects of reclamation projects in the planning stage, authorized for construction or under construction, exclusive of the Missouri River basin.

The program consists of advance planning, preconstruction activities, and construction of authorized projects; operation and maintenance of completed facilities prior to project completion; and rehabilitation of existing facilities. Investigations and advance planning for units of the Missouri River Basin are included under that project.

Work will be underway in 1965 on 29 projects and 18 units and divisions of the Missouri River Basin project. This includes initiation of construction on six projects and features with estimated costs totaling $113 million. Funds for the Riverton, Wyo., project will be requested when authorizing legislation is passed. Five projects and two units of the Missouri River Basin project will be completed in 1965. The program also includes rehabilitation and betterment work on 11 projects. During the year facilities will be completed to supply water to 134,800 acres of land and to provide 100,900 acre-feet of water annually for municipal and industrial use.

Funds appropriated in 1964 are available to begin construction of the Pacific Northwest-Southwest interconnection after enactment of Pacific Northwest marketing area legislation, if such construction proves in the national interest after the Secretary of the Interior has negotiated with various non-Federal entities offering to build all or portions of the facilities. No specific estimate for 1965 construction of the interconnection is included in this budget pending final determinations as required by the 1964 appropriations action.

The following workload table summarizes the program goals and accomplishments.

Appropriation (adjusted)	**35,835**	**37,781**	**40,300**

[1] Selected resources as of June 30 are as follows:

	1962	*1963 adjustments*	*1963*	*1964*	*1965*
Stores	3,622	−1	3,626	3,652	3,689
Unpaid undelivered orders	1,971	116	2,362	505	83
Total selected resources	5,593	115	5,988	4,157	3,772

The Bureau operates and maintains the power-generation and transmission facilities, and generally the storage dams and reservoirs, of completed projects. Where necessary, irrigation works are operated and maintained until the water users are able to undertake the responsibilities. In 1965, a total of 42 projects will be operated and maintained for irrigation, power, municipal and industrial water supplies, and other benefits with funds made available under this appropriation. Other operation and maintenance activities of the Bureau of Reclamation are financed from the Fort Peck project and Upper Colorado River Basin revolving funds.

Energy sales from all Bureau power operations are as follows:

	Kilowatt-hours of energy (millions)	*Gross energy sales (thousands)*
1963 (actual)	28,165	$74,386
1964 (estimate)	32,015	90,201
1965 (estimate)	36,837	107,834

Commercial power is sold to wholesale customers such as municipalities, Rural Electrification Administration-financed cooperatives, private utilities, and other Government agencies. These revenues are deposited in the reclamation fund, the Colorado River Dam fund, the general fund and revolving funds.

The programs include $3,736 thousand in 1965 for the purchase of power and wheeling. The establishment in 1961 of a net billing procedure for certain of these power transactions between the Federal Government and non-Federal utilities precludes the need for an additional $3,555 thousand for this purpose in 1965.

Provision is also made for flood control operations on certain projects, soil and moisture conservation operations, halogeton control on public lands under jurisdiction of the Bureau, and the Colorado River front work and levee system program.

Transferred to "Operating expenses, Public Buildings Service," General Services Administration (76 Stat. 728)	−1		
Appropriation (adjusted)	**9,665**	**10,000**	**10,400**

[1] Selected resources as of June 30 are as follows: Unpaid undelivered orders 1962, $164 thousand (1963 adjustments, $14 thousand); 1963, $162 thousand; 1964, $83 thousand; 1965, $83 thousand.

This appropriation finances the general administrative and technical direction of the Reclamation program as performed by the departmental, Denver, regional, and other offices in the seven regions. Administrative costs incurred for the direct benefit of specific projects or activities are covered under other appropriations. The Denver and regional offices charge projects or activities for direct beneficial services.

LOAN PROGRAM

For loans to irrigation districts and other public agencies for construction of distribution systems on authorized Federal reclamation projects, and for loans and grants to non-Federal agencies for construction of projects, as authorized by the Acts of July 4, 1955, as amended (43 U.S.C. 421a–421d), and August 6, 1956 (43 U.S.C. 422a–422k), as amended (71 Stat. 48), including expenses necessary for carrying out the program, [$12,367,000] *$13,570,000* to remain available until expended: *Provided,* That any contract under the Act of July 4, 1955 (69 Stat. 244), as amended, not yet executed by the Secretary, which calls for the making of loans beyond the fiscal year in which the contract is entered into shall be made only on the same conditions as those prescribed in section 12 of the Act of August 4, 1939 (53 Stat. 1187, 1197). (*Public Works Appropriation Act, 1964.*)

Program and Financing (in thousands of dollars)

	1963 actual	1964 estimate	1965 estimate
Program by activities:			
1. Distribution systems	3,823	7,821	9,309
2. Small projects:			
Loans	10,547	16,900	6,218
Grants	94	130	
3. Administration	88	152	132
4. Adjustment in cost advance to chief engineer, Denver, Colo	3	16	
Total program costs, funded	14,556	25,019	15,659
Change in selected resources [1]	914	−12,233	−1,106
Total obligations	15,470	12,786	14,553
Financing:			
Unobligated balance brought forward	−4,432	−1,402	−983
Recovery of prior year obligations	−223		
Unobligated balance carried forward	1,402	983	
New obligational authority (appropriation)	**12,217**	**12,367**	**13,570**

[1] Selected resources as of June 30 are as follows: 1962, $12,648 thousand (1963 adjustments, $223 thousand); 1963, $13,340 thousand; 1964, $1,106 thousand; 1965, $0.

This appropriation from the general fund provides for loans to non-Federal organizations for construction and rehabilitation of distribution systems and for loans and grants to enable non-Federal organizations to construct small irrigation projects. Repayments of these loans will be deposited in the reclamation fund.

1. *Distribution systems.*—Loans are made to irrigation districts for construction of distribution systems on authorized Federal reclamation projects. Work will start on one project and continue on two projects in 1965. Two are scheduled to be completed.

2. *Small projects.*—Loans and grants of not more than $5 million are made to non-Federal agencies for construction of small projects. Funds will be provided for two new loans in 1965 and work will continue on six projects. Four projects are scheduled to be completed.

[1] Selected resources as of June 30 are as follows: Unpaid undelivered orders, 1962, $979 thousand; 1963, $1,186 thousand; 1964, $1,186 thousand; 1965, $1,186 thousand.

This appropriation is available for transfer to the National Park Service and the Bureau of Sport Fisheries and Wildlife for construction of recreational and fish and wildlife facilities at projects constructed under the Upper Colorado River Basin fund.

1. *Construction of recreational facilities.*—The program continues the work in progress in 1964 to develop public recreational facilities at reservoirs of the Colorado River storage project. Work at four reservoirs will continue in 1965 and one reservoir will be operated on an interim management basis. Work at one additional reservoir will be started in 1965.

2. *Construction of fish and wildlife facilities.*—The program for 1965 continues the work in progress in 1964 to develop fish and wildlife facilities as part of the Colorado River storage project. Work at nine sites, including two national fish hatcheries and a national wildlife refuge, will continue in 1965. Development of three sites will begin in 1965 and continue at two sites.

Program by activities:			
Expenses of disposal (costs—obligations) (object class 25)	3	2	2
Financing:			
Unobligated balance brought forward	−29	−26	−24
Unobligated balance carried forward	26	24	22
New obligational authority			

This fund is derived from the sale of Federal property in or near the cities of Coulee Dam and Grand Coulee, Wash., and is available for certain purposes in connection with the disposal of the Federal interest in the communities.

Funds will be used in 1965 for administration of sales contracts retained by the United States and for other incidental expenses (71 Stat. 530).

SPECIAL FUNDS

Sums herein referred to as being derived from the reclamation fund, the Colorado River Dam fund, or the Colorado River development fund, are appropriated from the special funds in the Treasury created by the Act of June 17, 1902 (43 U.S.C. 391), the Act of December 21, 1928 (43 U.S.C. 617a), and the Act of July 19, 1940 (43 U.S.C. 618a), respectively. Such sums shall be transferred, upon request of the Secretary, to be merged with and expended under the heads herein specified; and the unexpended balances of sums transferred for expenditure under the heads "Operation and Maintenance" and "General Administrative Expenses" shall revert and be credited to the special fund from which derived. (*Public Works Appropriation Act, 1964.*)

ADMINISTRATIVE PROVISIONS

Appropriations to the Bureau of Reclamation shall be available for purchase of not to exceed [eighty-five] *sixty-seven* passenger motor vehicles for replacement only; [purchase of one aircraft;] payment of claims for damage to or loss of property, personal injury, or death arising out of activities of the Bureau of Reclamation; payment, except as otherwise provided for, of compensation and expense of persons on the rolls of the Bureau of Reclamation appointed as authorized by law to represent the United States in the negotiation and administration of interstate compacts without reimbursement or return under the reclamation laws; rewards for information or evidence concerning violations of law involving property under the jurisdiction of the Bureau of Reclamation; performance of the functions specified under the head "Operation and Maintenance Administration", Bureau of Reclamation, in the Interior Department Appropriation Act, 1945; preparation and dissemination of useful information including recordings, photographs, and photographic prints; and studies of recreational uses of reservoir areas, and investigation and recovery of archeological and paleontological remains in such areas in the same manner as provided for in the Act of August 21, 1935 (16 U.S.C. 461–467): *Provided,* That no part of any appropriation made herein shall be available pursuant to the Act of April 19, 1945 (43 U.S.C. 377), for expenses other than those incurred on behalf of specific reclamation projects except "General Administrative Expenses" and amounts provided for reconnaissance, basin surveys, and general engineering and research under the head "General Investigations".

Allotments to the Missouri River Basin project from the appropriation under the head "Construction and Rehabilitation" shall be available additionally for said project for those functions of the Bureau of Reclamation provided for under the head "General Investigations" (but this authorization shall not preclude use of the appropriation under said head within that area), and for the continuation of investigations by agencies of the Department on a general plan for the development of the Missouri River Basin. Such allotments may be expended through or in cooperation with State and other Federal agencies, and advances to such agencies are hereby authorized.

Sums appropriated herein which are expended in the performance of reimbursable functions of the Bureau of Reclamation shall be returnable to the extent and in the manner provided by law[: *Provided,* That net revenues not to exceed $140,000 arising from the lease of grazing and agricultural lands within the Tule Lake and Lower Klamath Lake Divisions as determined by the Secretary may be credited to the cost heretofore and hereafter incurred for the Klamath project water rights program, notwithstanding the provisions of section 2(c) of the Act of June 17, 1944 and sections 2(a), 2(b), 2(c) of the Act of August 1, 1956].

No part of any appropriation for the Bureau of Reclamation, contained in this Act or in any prior Act, which represents amounts earned under the terms of a contract but remaining unpaid, shall be obligated for any other purpose, regardless of when such amounts are to be paid: *Provided,* That the incurring of any obligation prohibited by this paragraph shall be deemed a violation of section 3679 of the Revised Statutes, as amended (31 U.S.C. 665).

No funds appropriated to the Bureau of Reclamation for operation and maintenance, except those derived from advances by water users, shall be used for the particular benefits of lands (a) within the boundaries of an irrigation district, (b) of any member of a water users' organization, or (c) of any individual when such district, organization, or individual is in arrears for more than twelve months in the payment of charges due under a contract entered into with the United States pursuant to laws administered by the Bureau of Reclamation.

Not to exceed $225,000 may be expended from the appropriation "Construction and rehabilitation" for work by force account on any one project or Missouri Basin unit and then only when such work is unsuitable for contract or no acceptable bid has been received and, other than otherwise provided in this paragraph or as may be necessary to meet local emergencies, not to exceed 12 per centum of the construction allotment for any project from the appropriation "Construction and rehabilitation" contained in this Act shall be available for construction work by force account: *Provided,* That this paragraph shall not apply to work performed under the Rehabilitation and Betterment Act of 1949 (63 Stat. 724).

[The amount of $241,160 shall be available from "Refunds and returns" for transfer to the Yuma County Water Users Association, representing the amount of credits accumulated as a reserve for depreciation and/or replacement of Siphon Drop powerplant, Yuma project, Arizona-California; this sum to be transferred to the Yuma County Water Users Association only after a contract providing for the custody, use, or expenditure of said money and containing terms satisfactory to the Secretary has been entered into with said association.] (*Public Works Appropriation Act, 1964.*)

ALLOCATIONS RECEIVED FROM OTHER ACCOUNTS

Note.—Obligations incurred under allocations from other accounts are included in the schedules of the parent appropriations, as follows:
"Educational exchange trust funds," Department of State.
"Construction," Bureau of Indian Affairs.
"Construction, general," Corps of Engineers—Civil.

Annual appropriations:			
"General investigations"	7,010	8,902	9,054
"Construction and rehabilitation"	75,000	75,000	80,000
"Operation and maintenance"	31,319	31,408	30,758
"General administrative expenses"	9,300	10,000	10,400
"Emergency fund"	1,000		
Permanent appropriations:			
"Payments to Farmers' irrigation district (North Platte project, Nebraska-Wyoming)"	8	8	8
"Refunds and returns"	100	242	100
Total appropriations	123,737	125,560	130,320
Unappropriated balance carried forward	141,482	154,517	166,745

This fund is derived from repayments and other revenue from irrigation and power facilities, together with certain receipts from sales, leases, and rentals of Federal lands in the 17 Western States, and is available for expenditure pursuant to authorization contained in appropriation acts (43 U.S.C. 391).

COLORADO RIVER DAM FUND, ALL-AMERICAN CANAL

(Permanent, indefinite, special fund)

Amount Available for Appropriation (in thousands of dollars)

	1963 actual	1964 estimate	1965 estimate
Unappropriated balance brought forward	38	5	5
Receipts	−33		
Unappropriated balance carried forward	5	5	5

Revenue from water rental, as well as other minor operations of the All-American Canal, is available for appropriation for payment of expense of operation and maintenance of the project, and for repayment of amounts advanced by the Treasury for construction or other purposes (43 U.S.C. 617a). Current operations are financed by water users' advances and are included in the Yuma area projects under the Operation and maintenance account.

COLORADO RIVER DAM FUND, BOULDER CANYON PROJECT

(Permanent, indefinite, special fund)

Amount Available for Appropriation (in thousands of dollars)

	1963 actual	1964 estimate	1965 estimate
Unappropriated balance brought forward	1,627	1,639	1,594
Receipts	5,101	5,300	5,300
Unobligated balance returned to unappropriated receipts	22		
Total available for appropriation	6,750	6,939	6,894
Deduct:			
Annual appropriation: "Operation and maintenance"	1,481	1,645	1,605
Permanent appropriations:

WATER AND POWER DEVELOPMENT—Con.

BUREAU OF RECLAMATION—Continued

Public enterprise funds—Continued

CONTINUING FUND FOR EMERGENCY EXPENSES, FORT PECK PROJECT, MONTANA—continued

This fund defrays the expense of operating the power-generation and transmission facilities of the Fort Peck project, Corps of Engineers—Civil, and emergency expenses to insure continuous operation (16 U.S.C. 833).

Budget program.—Funded operating costs in 1965 are substantially the same as in 1964, and the capital outlay program is scheduled for completion in 1964 except for minor continuing capital expenditures from Operation and maintenance appropriation.

Financing.—The operation of the Fort Peck project power and transmission facilities is financed by this fund and capital outlays for transmission facilities by advances from the appropriation Construction and rehabilitation. The accompanying statements consolidate the financing from the Continuing fund for emergency expenses, Fort Peck project, Montana; Construction and rehabilitation; and Operation and maintenance.

Operating results.—Net income is estimated at $652 thousand for 1965, an increase of $91 thousand over the 1964 estimates. Earnings in excess of current operating needs are retained so as to maintain a continuing emergency fund of $500 thousand. The balance is paid into the Treasury as miscellaneous receipts toward amortizing with interest that part of the Government investment allocated to power generation and transmission. Such payments totaled $860 thousand in 1963 and are estimated at $1.2 million in 1964 and $1.3 million in 1965.

[1] Carried as Treasury cash under the Construction and rehabilitation appropriation.

[2] The Fort Peck project and the Missouri River Basin project interchange power in their marketing operations. Rather than exchange funds for settlement on the balance of the interchange, the revenues of each project are covered into deposit funds pending distribution to the appropriate fund or receipt account.

[3] The changes in these items are reflected on the program and financing schedule.

[4] The method used to compute the interest payment due the United States is 3% of the balance to be repaid at the end of the previous year of the interest-bearing allocation to commercial electric plant. This allocation is based on the cost of project works constructed by the Bureau of Reclamation and Corps of Engineers—Civil.

UPPER COLORADO RIVER STORAGE PROJECT

For the Upper Colorado River Storage Project, as authorized by the Act of April 11, 1956 (43 U.S.C. 620d), to remain available until expended, [$97,989,200] *$62,300,000,* of which [$94,036,700] *$57,800,000* shall be available for the "Upper Colorado River Basin Fund" authorized by section 5 of said Act of April 11, 1956, and [$3,952,500] *$4,500,000* shall be available for construction of recreational and fish and wildlife facilities authorized by section 8 thereof, and may be expended by bureaus of the Department through or in cooperation with State or other Federal agencies, and advances to such Federal agencies are hereby authorized: *Provided,* That no part of the funds herein appropriated shall be available for construction or operation of facilities to prevent waters of Lake Powell from entering any National Monument. (*Public Works Appropriation Act, 1964.*)

Appropriations made for the Upper Colorado River storage project include amounts for the Upper Colorado River Basin fund which are reimbursable, except for costs allocated to nonreimbursable purposes, and for the recreational and fish and wildlife facilities, which are not reimbursable under the terms of the law.

Applicable receipts	225	1,763	11,347
Budget expenditures	106,529	90,741	57,501

The fund defrays the cost of advance planning, construction, operation, and maintenance of the Colorado River storage project and participating projects, a comprehensive basinwide development which will make possible the control and utilization of the water resources of the Upper Colorado River Basin. The storage project will regulate and conserve the flows of the Colorado River and its major tributaries through holdover storage in large reservoirs, permitting increased consumptive use of water in the upper basin as well as production of hydroelectric power. Excess revenue from the sale of power will be applied to repayment of costs allocated to irrigation which are beyond the ability of the water users to repay. The participating projects consist of power, irrigation, and municipal and industrial water supply developments.

Construction costs of the storage project and participating projects are financed through appropriations advanced to the fund. Project revenue will be credited to the fund and will cover costs of reimbursable operation and maintenance. Revenue in excess of these costs will be utilized to repay project costs allocated to power, municipal and industrial water supply, and irrigation. Nonreimbursable operation and maintenance expenses of facilities operated and maintained by the United States are defrayed from appropriated funds.

Budget program—1. *Advance planning.*—Funds for this activity in 1965 will provide for the continuation of studies on the Central Utah participating project, and for quality of water studies.

2. *Colorado River storage project.*—Construction will be underway on two units and on the Transmission division. Construction is scheduled to be initiated on the Crystal facilities of the Curecanti unit.

3. *Participating projects.*—Work will continue in 1965 on five participating projects.

4. *Drainage and minor construction.*—This activity will fund work in 1965 on three participating projects which have been substantially completed, but which require additional funds for miscellaneous finishing activities and drainage construction.

Operation and maintenance program.—The Bureau of Reclamation operates and maintains three units of the Colorado River storage project and the power generation and transmission facilities with revenues from the sale of energy and water. Three participating projects (Central Utah, Vernal Unit; Florida; Seedskadee), exclusive of power facilities, are operated and maintained with funds advanced by the water users. Nonreimbursable costs allocated to flood control and fish and wildlife purposes will be financed from appropriated funds.

Financing.—The 1965 programs for advance planning and construction will be financed principally by appropriations to the fund and to a minor degree from construction revenues. The operation and maintenance program in 1965 will be financed by funds advanced by the water users, from project revenues, and from appropriations for nonreimbursable operation and maintenance work.

Operating results and financial condition.—During the construction period, only minor revenue is realized and expense is capitalized.

Budget expenditures will decrease to $57.5 million in 1965 from $90.7 million in 1964 due to a reduction in capital outlay.

Other accounts	−2,060	−1,862	−2,160
Non-Federal sources [1]	−110	−40	−40
Unobligated balance carried forward	9,339		
New obligational authority	**29,800**	**36,174**	**43,820**
New obligational authority:			
Appropriation	29,800	36,204	43,820
Transferred to "Operating expenses, Public Buildings Service," General Services Administration (77 Stat. 436)		−30	
Appropriation (adjusted)	**29,800**	**36,174**	**43,820**

[1] Reimbursements from non-Federal sources are derived from the installation of facilities not provided for under the Administration's customer service policy (16 U.S.C. 832 (a), (h)).

The Administration is responsible for the marketing of electric power produced at 27 Federal hydroelectric generating plants in service or under construction, and wheels and exchanges power for certain non-Federal utilities in the Pacific Northwest.

A schedule of Federal generation through 1972 of plants in operation or under construction follows:

	First generation (fiscal year)	*Installed capacity (kilowatts, nameplate rating)*
Projects in operation		6,653,150
Projects under construction:		
Cougar	1964	25,000
Green Peter	1967	80,000
Foster	1968	20,000
John Day	1968	1,350,000
Lower Monumental	1968	405,000
Little Goose	1969	405,000
Dworshak	1972	300,000
Total		9,238,150

The transmission facilities program also will enable the Administration to wheel and exchange power over the Federal grid from the non-Federal Carmen-Smith, Wanapum, Packwood Lake, Boundary, Wells and Mossy Rock Dams, and the Hanford reactor.

The estimated amounts of peak generating capacity on the Federal system are as follows (in thousands of kilowatts):

	July 1, 1964	*July 1, 1972*
Federal projects	7,681	10,625
Power wheeled and exchanged for non-Federal utilities	2,870	5,450
Total	10,551	16,075

1. *Construction in progress.*—Includes amounts needed to carry forward work on transmission facilities started in prior years. Funds appropriated in 1964 are available to begin construction of the Pacific Northwest-Southwest interconnection after enactment of Pacific Northwest marketing area legislation, if such construction proves in the national interest after the Secretary of the Interior has negotiated with various non-Federal entities offering to build all or portions of the facilities. No specific estimate for 1965 construction of the interconnection is included in this budget pending final determinations as required by the 1964 appropriations action.

2. *New construction.*—Includes amounts needed in 1965 to start construction of new transmission and substation capacity to carry to load centers the power production of generating installations scheduled to be in operation by November 1968 and to meet service requirements of power customers.

3. *General plant.*—Provision is made for acquisition of items such as tools; office, shop, laboratory, and transportation equipment; and portable communication equipment used in the construction and operation of the Federal power system.

Program costs to this appropriation are presented in the following table (in thousands of dollars):

[1] Selected resources as of June 30 are as follows: Unpaid undelivered orders, 1962, $342 thousand; 1963, $279 thousand; 1964, $279 thousand; 1965, $279 thousand.

This program provides for operation and maintenance of the Administration's high-voltage electric grid system; for commercial and administrative expenses in marketing wholesale electric power from Federal dams; for wheeling power; and for the interchange, purchase, and sale of energy.

1. *System operation and maintenance.*—This activity consists of scheduling and dispatching power; operation and maintenance of substations, transmission lines, and other facilities; studies of requirements and marketing of power; planning and integration of power resources; and system engineering.

The following table shows the rising trend in several of the more important indexes of the operation and maintenance activity:

	1963 actual	*1964 estimate* [4]	*1965 estimate* [4]
Transmission plant in service (millions) [1]	$513	$534	$563
Transmission lines (circuit miles) [2]	8,672	8,984	9,422
Number of substations [2]	224	259	262
Transformer capacity (kilovolt-amperes) [2]	14,671,000	15,020,000	16,373,000
Energy sales (millions of kilowatt-hours)	30,200	[3] 32,800	[3] 35,400
Points of delivery [2]	405	446	448
Wheeling and exchange for non-Federal utilities (kilowatts)	2,244,000	2,870,000	3,202,000
Federal generation peaking capacity (kilowatts)	7,459,000	7,681,000	7,681,000

[1] Average over year.
[2] End of year.
[3] Average water year.
[4] Reflects Administration's assumption of power marketing responsibilities—effective Sept. 1, 1963—in southern Idaho.

2. *Purchase of energy and wheeling charges.*—Provision is made for the payment of wheeling fees and for the purchase of energy in connection with the Administration's power marketing responsibilities in southern Idaho (transferred on September 1, 1963, from Bureau of Reclamation).

3. *Power contracts and rates.*—This activity provides for the negotiation, billing, and servicing of power sales and wheeling contracts, and for development of service plans and establishment of wholesale rate schedules. Receipts which are deposited in the Treasury amounted to $77.1 million in 1963, and are estimated at $83.4 million and $90.9 million in 1964 and 1965, respectively. With the transfer of the power marketing function in southern Idaho from the U.S. Bureau of Reclamation to the Bonneville Power Administration, receipts from this area are carried in the Bonneville Power Administration accounts beginning with 1964.

ADMINISTRATIVE PROVISIONS

Appropriations of the Bonneville Power Administration shall be available to carry out all the duties imposed upon the Administrator pursuant to law. Appropriations made herein to the Bonneville Power Administration shall be available in one fund, except that the appropriation herein made for operation and maintenance shall be available only for the service of the current fiscal year.

Other than as may be necessary to meet local emergencies, not to exceed 12 per centum of the appropriation for construction herein made for the Bonneville Power Administration shall be available for construction work by force account or on a hired-labor basis.

[1] Includes capital outlay as follows: 1963, $7 thousand; 1964, $9 thousand; 1965, $9 thousand.

[2] Selected resources as of June 30 are as follows:

	1962	*1963 adjustments*	*1963*	*1964*	*1965*
Unpaid undelivered orders	2	−1	3	3	3
Accrued annual leave	−36		−38	−41	−44
Total selected resources	−34	−1	−35	−38	−41

[3] Reimbursements from non-Federal sources result from sale of power and are applied against charges for purchase of energy and wheeling by customers of the Administration.

The Administration markets power generated at Corps of Engineers—Civil hydroelectric generating plants in a 10-State area of the Southeast. Deliveries are made by means of transmission facilities owned by others. There are 12 projects now in full operation and 1 additional project in partial operation. A schedule of generation of projects in operation or under construction follows:

	First generation (fiscal year)	*Installed capacity (kilowatts-nameplate rating)*
Projects in operation	----	1,547,600
Projects under construction:		
Walter F. George	1963	130,000
Barkley	1965	130,000
Millers Ferry	1968	75,000
Carters	1969	100,000
Cordell Hull	1969	100,020
J. Percy Priest	1969	28,000
Total	----	2,110,620

1. *System operation and maintenance.*—Provision is made for investigation of proposed water resources projects; scheduling and dispatching power generation; scheduling storage and release of water; administering contractual operation requirements; and determining methods of operating generating plants individually and in coordination with others to obtain maximum utilization of resources.

2. *Purchase of energy and wheeling charges.*—Provision is made for the payment of wheeling fees and for the purchase of firming energy in connection with disposal of power from the Kerr and Jim Woodruff projects under contracts with utility companies.

3. *Power contracts and rates.*—Provision is made for negotiation and administration of power contracts, collection of revenue, development of wholesale power rates, and determination of adequate provisions for the amortization of the power investment. Receipts which were deposited in the Treasury amounted to $21,432 thousand in 1963 and are estimated at $23,500 thousand and $24,500 thousand for 1964 and 1965.

Appropriation (adjusted)	**7,193**	**2,999**	**2,770**

The Administration is responsible for marketing of power produced at 15 Corps of Engineers—Civil hydroelectric generating plants in the Southwest. A schedule of Federal generation through 1968 of plants in operation and under construction in this area follows:

Project	*First generation (fiscal year)*	*Installed capacity (kilowatts—nameplate rating)*
Projects in operation	----	881,000
Project additions: Narrows	1968	8,500
Projects under construction:		
Greers Ferry	1965	96,000
Eufaula	1965	90,000
Beaver	1965	112,000
Dardanelle	1965	124,000
Sam Rayburn	1965	52,000
Keystone	1968	70,000
Total		1,433,500

1. *Construction in progress.*—Construction of facilities started in 1963 and 1964 will be completed during the budget year.

2. *New construction and additions.*—The 1965 construction program provides for preliminary construction and engineering rights-of-way for approximately 205 miles of transmission lines, additional substation capacity, additional metering, relay and communications equipment and general plant equipment.

[1] Selected resources as of June 30 are as follows: Unpaid undelivered orders, 1962, $63 thousand (1963 adjustments, −$37 thousand); 1963, $27 thousand; 1964, $29 thousand; 1965, $33 thousand.

Power developed at Corps of Engineers—Civil hydroelectric generating plants in four Southwestern States is marketed by the Administration through transmission facilities owned by others and through its own system. The Administration also contracts for the sale, purchase and interchange of power with other systems.

1. *System operation and maintenance.*—The Administration operates and maintains a transmission system as follows (dollars in thousands):

	1963 actual	*1964 estimate*	*1965 estimate*
Transmission system in service	$27,938	$29,000	$34,000
Transmission lines, miles	1,061	1,353	1,438
Number of substations	10	10	11

2. *Power contracts and rates.*—This includes (a) negotiation of power contracts, (b) billing and servicing contracts, (c) development of wholesale power rates, and (d) participation in determination of the cost of amortizing the Federal Government's investment in power facilities.

Receipts which are deposited in the Treasury amounted to $10.9 million in 1963, and are estimated at $10.8 and $12.9 million for 1964 and 1965, respectively.

[1] Selected resources as of June 30 are as follows: Unpaid undelivered orders, 1962, $3,421 thousand (1963 adjustments, −$72 thousand); 1963, $2,512 thousand; 1964, $5,000 thousand; 1965, $6,000 thousand.

This program finances basic research on and development of low-cost processes for converting saline water to fresh water in quantities sufficient for municipal, industrial, and agricultural use.

1. *Administration and coordination.*—This activity provides for administration of federally sponsored research, coordination of Federal and non-Federal research projects, and stimulation of private and public saline water research including participation in activities of scientific and technical organizations.

2. *Research and development.*—Both basic and applied research, development, and evaluation work are accomplished by means of contracts or grants to other Federal or non-Federal agencies, institutions, commercial organizations, and consultants.

This appropriation provides for the practical application of research in the conversion of saline water to fresh water. Completed demonstration plants are operated by the Federal Government for a limited time to obtain operational data for research purposes. In 1965, 4 plants will be operated for a full year. Funds received from the sale of product water will be returned directly to the U.S. Treasury.

OFFICE OF THE SECRETARY

SALARIES AND EXPENSES

For necessary expenses of the Office of the Secretary of the Interior, including teletype rentals and service, and not to exceed $2,000 for official reception and representation expenses, [$3,858,400] *$4,125,000.* (*5 U.S.C. 481–502; Department of the Interior and Related Agencies Appropriation Act, 1964.*)

Program and Financing (in thousands of dollars)

	1963 actual	1964 estimate	1965 estimate
Program by activities:			
1. Departmental direction	679	610	643
2. Program direction and coordination	1,085	1,375	1,483
3. Administrative management services	1,484	1,780	1,954
4. General services	135	130	147
5. Natural resources studies	60	71	
Total program costs, funded	3,443	3,966	4,227
Change in selected resources [1]	−45	−71	
Total obligations	3,398	3,895	4,227
Financing:			
Unobligated balance lapsing	82		
Reimbursements for emergency preparedness functions		−40	−102
New obligational authority	**3,480**	**3,855**	**4,125**
New obligational authority:			
Appropriation	3,482	3,858	4,125
Transferred to "Operating expenses, Public Buildings Service," General Services Administration (76 Stat. 728 and 77 Stat. 436)	−2	−3	
Appropriation (adjusted)	**3,480**	**3,855**	**4,125**

[1] Selected resources as of June 30 are as follows: Unpaid undelivered orders, 1962, $162 thousand (1963 adjustments, −$6 thousand); 1963, $110 thousand; 1964, $39 thousand; 1965, $39 thousand.

1. *Departmental direction.*—The Office of the Secretary, Under Secretary, and the Division of Information provide top departmental direction and contact with the public.

2. *Program direction and coordination.*—Four assistant secretaries and the resources program staff assist the Secretary on matters of policy for promoting the domestic welfare and the conservation and development of the country's resources.

3. *Administrative management services.*—Under the direction of the administrative assistant secretary, financial management, budget, management improvement, property management, personnel, administrative services, inspection, investigation, internal audit, and security operations are carried on.

4. *General services.*—Printing and binding, telephone, health and library services are provided under this activity.

Increase (−) or decrease in accounts receivable, net	−1,110	−23	980
Applicable receipts	4,515	6,205	3,789
Budget expenditures	554	249	−1,186

[1] Balances of selected resources are identified on the statement of financial condition.

The Virgin Islands Corporation promotes the economic development of the United States Virgin Islands. Appropriations of $15 million are authorized to be made to a revolving fund based on annual budgets submitted by the Corporation (48 U.S.C. 1407).

1. *Loan program.*—Loans are made to aid farmers in agricultural diversification and to improve livestock production, provided that such loans are not available from other Federal or private sources.

2. *Sugar program.*—The principal business of the Corporation is the growing of sugarcane, and the production and sale of raw sugar. Statistics for production and manufacture are as follows:

	1963 actual	*1964 estimate*	*1965 estimate*
Sugarcane production:			
Acres harvested	2,594.5	2,951	1,696.5
Sugar manufacture:			
Tons of cane ground:			
Corporation cane	107,136	120,300	57,400
Purchase cane	44,064	38,700	35,800
Total	151,200	159,000	93,200

3. *Power program.*—Electric generating plants are operated by the Corporation to supply the islands of St. Croix, St. Thomas, and St. John with electric power. In 1964 these plants had a total generating capacity of 21,462 kilowatts. The Corporation plans to dispose of its power generating plants in 1964.

4. *Water distillation.*—Construction of a modern salt water distillation plant with 28 flash stages was completed and placed in operation on February 1, 1962. This plant, with a capacity of 310,000 gallons per day, provides the major portion of the fresh water requirements for the residents of St. Thomas. Plans are to dispose of the distillation plant along with the electric power facilities in 1964.

5. *Miscellaneous revenue-producing activities.*—These consist of: (a) certain Navy properties held by the Department of the Interior under a revocable permit and managed by the Corporation; (b) leases and rentals of property; and (c) miscellaneous sales of supplies and materials.

The Corporation made a profit of $247 thousand in 1963. This consisted of a profit of $98 thousand on sugarcane and sugar; $198 thousand on electric power; $27 thousand on water and $1 thousand on the loan program. These profits were offset by a loss of $77 thousands on other activities.

An analysis of the deficit account is as follows (in thousands of dollars):

	1963 actual	*1964 estimate*	*1965 estimate*
Accumulated deficit, net	4,391	3,922	4,221
Accumulated contribution for impairment of capital	4,427	4,427	4,427
Retained earnings or deficit, end of year	36	505	206

Grants of $480 thousand were made in 1963 to restore impairment of the Corporation's capital. The estimated earnings for 1964 and 1965 are retained to meet possible losses on the sugar program.

GENERAL PROVISIONS, DEPARTMENT OF THE INTERIOR

Sec. 101. Appropriations made in this title shall be available for expenditure or transfer (within each bureau or office), with the approval of the Secretary, for the emergency reconstruction, replacement, or repair of aircraft, buildings, utilities, or other facilities or equipment damaged or destroyed by fire, flood, storm, or other unavoidable causes: *Provided,* That no funds shall be made available under this authority until funds specifically made available to the Department of the Interior for emergencies shall have been exhausted.

Sec. 102. The Secretary may authorize the expenditure or transfer (within each bureau or office) of any appropriation in this title, in addition to the amounts included in the budget programs of the several agencies, for the suppression or emergency prevention of forest or range fires on or threatening lands under jurisdiction of the Department of the Interior: *Provided,* That appropriations made in this title for fire suppression purposes shall be available for the payment of obligations incurred during the preceding fiscal year, and for reimbursement to other Federal agencies for destruction of vehicles, aircraft or other equipment in connection with their use for fire suppression purposes, such reimbursement to be credited to appropriations currently available at the time of receipt thereof.

Sec. 103. Appropriations made in this title shall be available for operation of warehouses, garages, shops, and similar facilities, wherever consolidation of activities will contribute to efficiency or economy, and said appropriations shall be reimbursed for services rendered to any other activity in the same manner as authorized by the Act of June 30, 1932 (31 U.S.C. 686): *Provided,* That reimbursements for costs of supplies, materials and equipment, and for services rendered may be credited to the appropriation current at the time such reimbursements are received.

Sec. 104. Appropriations made to the Department of the Interior in this title or in the Public Works Appropriations Act, [1964] *1965* shall be available for services as authorized by section 15 of the Act of August 2, 1946 (5 U.S.C. 55a), when authorized by the Secretary, at rates not to exceed $75 per diem for individuals, and in total amount not to exceed $175,000; maintenance and operation of aircraft; hire of passenger motor vehicles; purchase of reprints; payment for telephone service in private residences in the field, when authorized under regulations approved by the Secretary; and the payment of dues, when authorized by the Secretary, for library membership in societies or associations which issue publications to members only or at a price to members lower than to subscribers who are not members.

Sec. 105. Appropriations available to the Department of the Interior for salaries and expenses shall be available for uniforms or allowances therefor, as authorized by law (5 U.S.C. 2131 and D.C. Code 4–204). (*Department of the Interior and Related Agencies Appropriation Act, 1964.*)

Sec. 201. Appropriations in this title shall be available for expenditure or transfer (within each bureau or office), with the approval of the Secretary, for the emergency reconstruction, replacement or repair of aircraft, buildings, utilities, or other facilities or equipment damaged or destroyed by fire, flood, storm, or other unavoidable causes: *Provided,* That no funds shall be made available under this authority until funds specifically made available to the Department of the Interior for emergencies shall have been exhausted.

Sec. 202. The Secretary may authorize the expenditure or transfer (within each bureau or office) of any appropriation in this title, in addition to the amounts included in the budget programs of the several agencies, for the suppression or emergency prevention of forest or range fires on or threatening lands under jurisdiction of the Department of the Interior.

Sec. 203. Appropriations in this title shall be available for operation of warehouses, garages, shops, and similar facilities, wherever consolidation of activities will contribute to efficiency or economy, and said appropriations shall be reimbursed for services rendered to any other activity in the same manner as authorized by the Act of June 30, 1932 (31 U.S.C. 686): *Provided,* That reimbursements for costs of supplies, materials and equipment, and for services rendered may be credited to the appropriation current at the time such reimbursements are received.

Sec. 204. No part of any funds made available by this Act to the Southwestern Power Administration may be made available to any other agency, bureau, or office for any purposes other than for services rendered pursuant to law to the Southwestern Power Administration. (*Public Works Appropriation Act, 1964.*)

General Provisions, Related Agencies

The per diem rate paid from appropriations made available under this title for services as authorized by section 15 of the Act of August 2, 1946 (5 U.S.C. 55a) or other law, shall not exceed $75. (*Department of the Interior and Related Agencies Appropriation Act, 1964.*)

DEPARTMENT OF JUSTICE

LEGAL ACTIVITIES AND GENERAL ADMINISTRATION

General and special funds:

SALARIES AND EXPENSES, GENERAL ADMINISTRATION

For expenses necessary for the administration of the Department of Justice and for examination of judicial offices, including purchase ([two] *one* for replacement only[, including one heavy sedan at not to exceed $5,000]) and hire of passenger motor vehicles; and miscellaneous and emergency expenses authorized or approved by the Attorney General or the Administrative Assistant Attorney General; [$4,660,000] *$4,871,000. (5 U.S.C.A. 291, note, 294, 310, 341; 8 U.S.C. 1103; 18 U.S.C. 4201–9; 13 Stat. 516; Department of Justice Appropriation Act, 1964.)*

Program and Financing (in thousands of dollars)

	1963 actual	1964 estimate	1965 estimate
Program by activities:			
Direct program:			
1. Executive direction	843	898	937
2. Administrative reviews and appeals	839	904	953
3. Administrative services	2,718	2,858	2,981
Total direct program costs, funded	4,400	4,660	4,871
Reimbursable program:			
3. Administrative services	50	50	50
Total program costs, funded	4,450	4,710	4,921
Change in selected resources [1]	11		
Total obligations	4,461	4,710	4,921
Financing:			
Advances and reimbursements from non-Federal sources [2]	−50	−50	−50
Unobligated balance lapsing	17		
New obligational authority (appropriation)	**4,428**	**4,660**	**4,871**

[1] Selected resources as of June 30 are as follows: Unpaid undelivered orders, 1962, $13 thousand (1963 adjustments, −$2 thousand); 1963, $22 thousand; 1964, $22 thousand; 1965, $22 thousand.

[2] Reimbursements from non-Federal sources are derived from receipts from alien property operations.

1. *Executive direction.*—The Attorney General, aided by the Deputy Attorney General and other immediate assistants, directs and supervises the programs and activities of the Department.

2. *Administrative reviews and appeals.*—In addition to reviews of requests for pardon, these include the work of the Board of Parole and of the Board of Immigration Appeals. The following tables show the workloads of these Boards:

BOARD OF PAROLE

	1962 actual	*1963 actual*	*1964 estimate*	*1965 estimate*
Parole decisions:				
Hearings	16,999	17,645	18,300	18,600
Reviews	3,667	4,917	4,900	4,900
Paroles denied	5,967	5,859	5,900	5,900
Paroles granted	5,157	5,131	5,200	5,250
Juvenile and youth offender considerations	3,118	3,441	3,500	3,550
Determinations of eligibility for parole	953	1,441	1,900	2,000

BOARD OF IMMIGRATION APPEALS

Cases pending, beginning of year	148	140	121	96
Cases received	1,194	1,380	1,350	1,250
Cases closed	1,202	1,399	1,375	1,275
Cases pending, end of year	140	121	96	71

3. *Administrative services.*—The administrative division serves as the focal point for departmentwide management and administration. This division also furnishes administrative services to the smaller offices and divisions, and for the larger divisions and bureaus when such functions can be more effectively and economically performed centrally. The Department's library containing over 250,000 volumes of legal and related reference material is included within this activity.

Appropriation	17,096	18,573	19,590
Transferred to "Operating expenses, Public Buildings Service," General Services Administration (77 Stat. 436)		−47	
Appropriation (adjusted)	**17,096**	**18,526**	**19,590**

[1] Selected resources as of June 30 are as follows: Unpaid undelivered orders, 1962, $447 thousand (1963 adjustments, −$143 thousand); 1963, $544 thousand; 1964, $544 thousand; 1965, $544 thousand.

The following legal activities of the Department are financed from this appropriation:

1. *Conduct of Supreme Court proceedings and coordination of appellate matters.*—All appellate matters are supervised and controlled, and the Government is represented before the Supreme Court.

2. *General tax matters.*—Cases arising under the internal revenue laws and other tax statutes are prosecuted or defended under this activity.

Alien Property Activities

LIMITATION ON GENERAL ADMINISTRATIVE EXPENSES

(Trust fund)

The Attorney General, or such officer as he may designate, is hereby authorized to pay out of any funds or other property or interest vested in him or transferred to him pursuant to or with respect to the Trading With the Enemy Act of October 6, 1917, as amended (50 U.S.C. App.), and the International Claims Settlement Act, as amended (22 U.S.C. 1631), necessary expenses incurred in carrying out the powers and duties conferred on the Attorney General pursuant to said Acts: *Provided,* That not to exceed $690,000 shall be available in the current fiscal year for the general administrative expenses of alien property activities, including rent of private or Government-owned space in the District of Columbia: *Provided further,* That on or before November 1 of the current fiscal year the Attorney General shall make a report to the Appropriations Committees of the Senate and the House of Representatives giving detailed information on all administrative and nonadministrative expenses incurred during the next preceding fiscal year in connection with the alien property activities: *Provided further,* That of the total amount herein authorized the amount of $50,000 is to be transferred to the appropriation for "Salaries and expenses, general administration", Justice. (*5 U.S.C. 295, 310, 312, 314, 341, 341e; 50 U.S.C., App. 6; Executive Order 9788, Oct. 14, 1946, 11 F.R. 11981; Department of Justice Appropriation Act, 1964.*)

Limitation	**690**	**690**	**690**

The Office of Alien Property takes care of the Government's interests in wartime measures against alien property. On September 1, 1961, the Attorney General delegated to the Assistant Attorney General in charge of the Civil Division, as Director of the Office of Alien Property, all of the functions previously performed by the Assistant Attorney General, Office of Alien Property, or the Director, Office of Alien Property. This Office operates as a section of the Civil Division under the management of the Deputy Director. Legislation will be sought in 1965 to authorize the financing of the few activities remaining as of June 30, 1965, from appropriations for General legal activities. The expense of handling litigation, claims, property liquidation and accounting and auditing functions pertaining to vested property are not financed from appropriated funds, but will continue to be financed from the alien property fund. Collections from property being liquidated (World War II) totaled $1,748 thousand in 1963 and are expected to total $2,780 thousand and $101,104 thousand, respectively, in 1964 and 1965. Actual and predicted workloads are reflected by the following tables:

Studies to improve administrative procedures.—The Conference was established to assist the President, the Congress, and the administrative agencies and executive departments in improving existing administrative procedures. It was responsible for conducting studies of the efficiency, adequacy and fairness of present procedures by which Federal executive departments and administrative agencies determine the rights, privileges, and obligations of private persons.

The Conference was required to report to the President from time to time and made a final report on December 15, 1962.

FEDERAL BUREAU OF INVESTIGATION

General and special funds:

SALARIES AND EXPENSES

For expenses necessary for the detection and prosecution of crimes against the United States; protection of the person of the President of the United States; acquisition, collection, classification and preservation of identification and other records and their exchange with, and for the official use of, the duly authorized officials of the Federal Government, of States, cities, and other institutions, such exchange to be subject to cancellation if dissemination is made outside the receiving departments or related agencies; and such other investigations regarding official matters under the control of the Department of Justice and the Department of State as may be directed by the Attorney General, including purchase for police-type use without regard to the general purchase price limitation for the current fiscal year (not to exceed five hundred and one, including one armored vehicle, [of which three hundred and one shall be] for replacement only) and hire of passenger motor vehicles; firearms and ammunition; not to exceed $10,000 for taxicab hire to be used exclusively for the purposes set forth in this paragraph; payment of rewards; and not to exceed $70,000 to meet unforeseen emergencies of a confidential character, to be expended under the direction of the Attorney General, and to be accounted for solely on his certificate; [$146,900,000] *$150,445,000*: *Provided*, That the compensation of the Director of the Bureau shall be $22,000 per annum so long as the position is held by the present incumbent.

None of the funds appropriated for the Federal Bureau of Investigation shall be used to pay the compensation of any civil-service employee. (*5 U.S.C. 300, 340, 341, 341c, 341e; Department of Justice Appropriation Act, 1964.*)

	1962	*1963*	*1964*	*1965*
Stores	185	153	175	175
Unpaid undelivered orders	327	399	250	250
Total selected resources	512	552	425	425

The Federal Bureau of Investigation is the investigative branch of the Department of Justice and obtains evidence for use in civil litigation and prosecution of criminal violations of Federal law. It has primary responsibility for the internal security of the Nation. It assists all law enforcement agencies in identification and technical matters.

The appropriation request for 1965 totals $150.4 million. This will provide the same staff as that allowed for the current year.

1. *Security and criminal investigations.*—This activity includes the Bureau's investigative responsibilities, the coordination and maintenance of the data gathered, and the maintenance of the Bureau's communications system. Data are disseminated to other Government agencies having an official interest in it. During 1963, the Bureau received 1,823,184 names for search through its files, a continuation of the volume experienced during the prior year. An increase in name check work is anticipated.

WORKLOAD VOLUME—CRIMINAL, SECURITY, AND CIVIL CLASSIFICATIONS

	1962 actual	*1963 actual*	*1964 estimate*	*1965 estimate*
Investigative matters received	637,090	636,371	665,000	665,000

2. *Identification by fingerprints.*—The identification division is the national repository of identification data based on fingerprint records. Fingerprints are acquired, classified, preserved, and exchanged with other duly authorized law enforcement agencies and 5,720,537 sets of fingerprints were received for handling during 1963. The volume of fingerprint work is expected to increase. Sets of fingerprints on file on July 1, 1963, totaled 167,397,932.

3. *Criminal and scientific laboratory.*—The laboratory provides technical and scientific assistance to the Federal Bureau of Investigation and all duly constituted law enforcement agencies and other Federal agencies which desire to avail themselves of the service. During 1963, scientific examinations totaled 247,894, a new alltime high. The upward trend is expected to continue.

4. *Training schools and inspectional services.*—A bureau-wide inspectional service and a personnel training program are provided. The Bureau assists, upon request, in providing various types of training to local law enforcement agencies.

Appropriation (adjusted)	**66,241**	**69,000**	**71,800**

[1] Includes capital outlay as follows: 1963, $1,843 thousand; 1964, $2,591 thousand; 1965, $2,293 thousand.

[2] Selected resources as of June 30 are as follows: Unpaid undelivered orders, 1962, $1,556 thousand (1963 adjustments, −$55 thousand); 1963, $1,323 thousand; 1964, $600 thousand; 1965, $600 thousand.

The Service administers and enforces the laws relating to immigration and naturalization. Rising volumes of international traffic will increase workloads.

1. *Inspection for admission into the United States.*—Control is maintained at border points, seaports, and airports over the entry of persons into the United States. Provision is made for the construction of seven border station projects under the joint Immigration and Naturalization Service—Bureau of Customs construction program.

This appropriation will provide for the custody and care of an average of 24 thousand prisoners and the maintenance and operation of 36 institutions and the central office. An average of 5,322 employees will be employed with the funds in this appropriation. The medical care of prisoners is provided by the U.S. Public Health Service.

1. *Custody, care, and treatment of prisoners in Federal institutions.*—This activity covers the direct care costs of all prisoners in the Federal prison system. These include the costs of all food, clothing, education, custodial requirements, welfare services, release transportation, and related personal services. The funds required, exclusive of salary costs, are in direct relation to the estimated number of prisoners expected to be maintained in 1965 which is 24 thousand at an estimated cost per man per day of $0.86. The average daily population for 1963 was 23,796 as compared to 23,838 in 1962.

2. *Maintenance and operation of institutions.*—This activity includes administrative expenses, all utility services, operation of motor vehicles, the repair and maintenance of all buildings and facilities, and equipment replacements. The cost of personal services attributable to these activities is also included.

3. *Medical services.*—Funds are allocated to the Public Health Service for the cost of medical, psychiatric, and technical services.

A supplemental appropriation for 1964 is anticipated for separate transmittal.

The Bureau of Prisons contracts with some 749 approved State and local jails for boarding Federal prisoners for short periods of time. Such periods occur before and during trial, while prisoners await transfer to Federal institutions after conviction, and during commitments for short sentences. An average of 3,299 prisoners was boarded at a cost of $3.39 per man per day in 1963.

A supplemental appropriation for 1964 is anticipated for separate transmittal.

[1] Balances of selected resources are identified on the statement of financial condition.

This is a wholly owned Government Corporation. A board of six directors appointed by the President controls its policies. Supervision is by the Director of the Bureau of Prisons who has jurisdiction over all industrial enterprises and vocational training programs in all Federal penal and correctional institutions. Products manufactured by inmates are sold only to the penal institutions and to other Government agencies. Earnings, in excess of operating requirements, are paid as dividends into the U.S. Treasury.

The Corporation is authorized, under the Attorney General, to establish and operate industries in Federal penal and correctional institutions and disciplinary barracks (18 U.S.C. 4121–4128). Its objectives are to provide employment for physically fit inmates; to provide maximum vocational training for qualified inmates in connection with regular institutional and industrial activities; and to operate a placement service to assist released inmates to secure jobs. Earnings from the sale of these products pay expenses of the Corporation and have permitted payment of $51 million in dividends into the Treasury since January 1, 1935. It is anticipated that dividends of $3.5 million will be paid in both 1964 and 1965.

Budget program.—During 1963 the Corporation operated 52 shops and factories at 23 locations. The typewriter repair shops at McNeil Island, Wash., and Danbury, Conn., were discontinued during 1963. With the closing of Alcatraz, the brush factory was moved to Florence, Ariz., and the clothing and glove factories were moved to Terminal Island, Calif. During 1964 a new electronic shop will start operations at Danbury, Conn., a canvas specialty shop will start operations at Sandstone, Minn. The rubber products shop at Texarkana, Tex., has been divided into two shops for efficiency of operations. During 1965, a new enterprise will start operations at Marion, Ill., and a tire reconditioning shop will open at Lompoc, Calif. This will bring the number of shops and factories to 57 at 24 locations. The following table indicates the scope of employment and training effort in the total prison program:

	1962 actual	*1963 actual*	*1964 estimate*	*1965 estimate*
Average number of prison inmates	23,838	23,796	23,500	24,000
Number of inmates employed full time in industries	5,168	5,256	5,420	5,500
Number of inmates for whom vocational training is provided	11,944	12,044	12,100	12,150
Number of inmates assisted in job placement	590	771	1,000	1,500
Number of shops and factories	53	52	55	57

The trend of expenditures for capital improvements is reflected in the following summary (in thousands of dollars):

Total capital expenditures	3,053	2,095	2,829	2,706

Operating results.—The Corporation has always operated at a profit and is expected to continue to do so. Earnings of the fund pay expenses of the Corporation, which include general administration and vocational rehabilitation. These two activities, although financed from fund receipts are subject to annual appropriation limitations. Earnings in excess of operating requirements are paid into the U.S. Treasury. As of June 30, 1963, the cumulative earnings amounted to $79.1 million, of which $28.1 million had been retained as working capital and $51 million had been paid into the Treasury. Earnings are estimated to be $5.2 million in 1964 and $5.1 million in 1965.

GENERAL PROVISIONS—DEPARTMENT OF JUSTICE

SEC. 202. None of the funds appropriated by this title may be used to pay the compensation of any person hereafter employed as an attorney (except foreign counsel employed in special cases) unless such person shall be duly licensed and authorized to practice as an attorney under the laws of a State, territory, or the District of Columbia.

SEC. 203. Seventy-five per centum of the expenditures for the offices of the United States attorney and the United States marshal for the District of Columbia from all appropriations in this title shall be reimbursed to the United States from any funds in the Treasury of the United States to the credit of the District of Columbia.

SEC. 204. Appropriations and authorizations made in this title which are available for expenses of attendance at meetings shall be expended for such purposes in accordance with regulations prescribed by the Attorney General.

SEC. 205. Appropriations and authorizations made in this title for salaries and expenses shall be available for services as authorized by section 15 of the Act of August 2, 1946 (5 U.S.C. 55a), at rates not to exceed $75 per diem for individuals.

SEC. 206. Appropriations for the current fiscal year for "Salaries and expenses, general administration", "Salaries and expenses, United States Attorneys and Marshals", "Salaries and expenses, Federal Bureau of Investigation", "Salaries and expenses, Immigration and Naturalization Service", and "Salaries and expenses,

DEPARTMENT OF LABOR

BUREAU OF LABOR STATISTICS

General and special funds:

SALARIES AND EXPENSES

For expenses, not otherwise provided for, necessary for the work of the Bureau of Labor Statistics, including advances or reimbursement to State, Federal, and local agencies and their employees for services rendered, [$16,345,000] *$18,388,000.* (*29 U.S.C. 2, 7, 181; Department of Labor Appropriation Act, 1964.*)

Program and Financing (in thousands of dollars)

	1963 actual	1964 estimate	1965 estimate
Program by activities:			
1. Manpower and employment	5,327	6,282	7,577
2. Prices and cost of living	2,226	2,424	2,804
3. Wages and industrial relations	2,632	2,913	2,956
4. Measurement of productivity	625	695	711
5. Industrial hazards	300	327	332
6. Foreign labor conditions	328	392	392
7. Program staff services	1,525	1,556	1,591
8. Administration and management services	1,803	1,816	2,105
Total program costs, funded	14,766	16,405	18,468
Change in selected resources [1]	−177	−45	
Total obligations	14,589	16,360	18,468
Financing:			
Comparative transfers to other accounts		52	
Reimbursements for emergency preparedness functions		−67	−80
Unobligated balance lapsing	1		
New obligational authority (appropriation)	**14,590**	**16,345**	**18,388**

[1] Selected resources as of June 30 are as follows: Unpaid undelivered orders, 1962, $250 thousand; 1963, $73 thousand; 1964, $28 thousand; 1965, $28 thousand.

1. *Manpower and employment.*—The Bureau analyzes the level and trend of nonagricultural employment, hours, earnings, and labor turnover. It publishes monthly estimates of the labor force, employment and unemployment, as well as special studies of various labor force characteristics. Estimates of manpower requirements and supply, and reviews of long-range labor force and employment trends are prepared. Detailed studies of the outlook for specific occupations are carried out. In 1965 new programs will provide for: (a) expansion of the labor force survey sample and improved measures of employment and unemployment; (b) study of labor force turnover and growth; (c) statistics on employment, hours, and earnings for additional industries and areas; and (d) current employment statistics by occupation.

2. *Prices and cost of living.*—The Consumer Price Index is published covering urban wage earners and clerical families for the Nation as a whole, for selected large cities, and for selected cities in Alaska. The Wholesale Price Index is issued covering more than 2,000 industrial and agricultural products in primary markets. Special analytical studies in the movement of wholesale and retail prices and comparative studies of living costs are undertaken. In 1965 it is proposed: (a) to consolidate the improvements that have been made through the comprehensive revision of the Consumer Price Index, which is now nearing completion; (b) to prepare additional city consumer price indexes; and (c) to undertake construction of wholesale price indexes on an industry basis.

3. *Wages and industrial relations.*—Information is compiled on wages and related benefits in nonsupervisory employment for 80 major labor markets and for selected major industries; and on salaries in selected professional, administrative, and technical occupations. Monthly information is prepared on industrial relations developments, and annual reports on employer expenditures on fringe benefits are issued. Studies of collective bargaining agreement provisions and of trade union organization and studies of private welfare and pension plans are made. It is proposed in 1965 to improve the national salary estimates for professional and administrative occupational categories by the addition of 7 areas to the present 80-area sample.

4. *Measurement of productivity.*—Annual indexes of output per man-hour and analyses of productivity trends are provided. Studies are conducted on developments in automation and other technology with analysis of personnel adjustment to technological change. Studies are made of labor requirements for selected types of construction.

5. *Industrial hazards.*—The Bureau provides quarterly and annual information on industrial injuries, and detailed analyses of the causes of injuries for selected industries.

6. *Foreign labor conditions.*—Information, reports, and advisory services for policy and program work are provided on labor in foreign countries, including price levels, wages, employment, unemployment, unit labor costs, labor law, and labor standards.

7. *Program staff services.*—The Bureau establishes policies for the maintenance of statistical standards and improvement of statistical methodology. Special economic reports are prepared for the Commissioner, the Secretary, the Council of Economic Advisers, and other Government agencies, and research is conducted into problems of economic growth. This activity coordinates the Bureau's research and reports activities; plans and edits all publications and releases; and maintains central inquiry service.

[1] Selected resources as of June 30 are as follows: Unpaid undelivered orders, 1962, $16 thousand; 1963, $26 thousand; 1964, $26 [thousand; 1965, $26 thousand.

1. *International organizations affairs.*—This activity concerns U.S. participation in the International Labor Organization, the labor and manpower programs of the United Nations and subsidiary organizations, the Organization for Economic Cooperation and Development and activities of other international organizations; and the Department's work in the field of foreign economic policy.

2. *Foreign labor policy development.*—This activity concerns the development and implementation, with the Department of State, of country labor programs and related activities to assist the attainment of U.S. foreign policy objectives; and the coordination and administration of exchange programs and related activities.

3. *Labor and manpower technical services.*—This activity provides for accumulation for use in economic development programs of labor and manpower technical knowledge and for providing labor and manpower technical services for agencies and other organizations concerned with foreign affairs.

[1] Selected resources as of June 30 are as follows: Unpaid undelivered orders, 1962, $0; 1963, $4,827 thousand; 1964, $4,827 thousand; 1965, $4,827 thousand.

1. *Manpower and automation research.*—This activity includes functions performed under title I of Public Law 87–415; it also includes research in automation and technological change provided under Public Law 88–136. The research program includes, among others, studies of current and prospective manpower requirements and resources, skill requirements and supply, job opportunities and occupational outlook, factors which tend to impede labor mobility, manpower utilization, and occupational training problems of youth. It also will support manpower research in the Department of Labor, in other Government agencies and in academic and other private institutions, and will provide periodic reports of the Nation's manpower posture for use in manpower policy formulation.

2. *Training and skill development programs.*—This activity will provide for occupational and basic education training programs to equip the Nation's unemployed and underemployed workers with skills that will enable them to participate in productive employment. This objective will be achieved by identifying occupations in which shortages or potential demand exist, selecting workers for training in these occupations, developing and providing training programs, and placing trainees in jobs. Trainee allowances will be paid to certain unemployed heads of families or households who are selected for vocational education or on-the-job training. A limited number of unemployed youth will receive allowances, but at a lower rate than adult unemployed workers. In addition, this activity provides special programs of testing, counseling, guidance, job development and placement for disadvantaged workers. This activity also will provide for program development and operation of the manpower program activities assigned to the Secretaries of Labor and Health, Education, and Welfare under the Manpower Development and Training Act.

3. *Executive direction and administration.*—This activity provides for the overall executive direction and supervision of the programs, for the National Advisory Committee, and for administrative support and services.

A supplemental appropriation estimate for 1964 is proposed for separate transmittal.

[1] Selected resources as of June 30 are as follows: Unpaid undelivered orders, 1962, $0; 1963, $53 thousand; 1964, $53 thousand; 1965, $53 thousand.

1. *Occupational training.*—Section 16 of the Area Redevelopment Act approved May 1, 1961, authorizes the Secretary of Labor to assess the labor force in redevelopment areas; to determine the occupational training or retraining needs of unemployed or underemployed individuals; to advise the Secretary of Health, Education, and Welfare of needed additional facilities and services for occupational training; to assist in setting up apprenticeship programs and other on-the-job training.

2. *Retraining subsistence payments.*—Section 17 of the act authorizes the Secretary of Labor to enter into agreements with States having redevelopment areas to enable such States as agents of the United States to make weekly payments to individuals under the act. Subject to conditions and standards established in the act, the Secretaries of Labor and Commerce jointly prescribe regulations.

[OFFICE OF MANPOWER, AUTOMATION AND TRAINING] *MANPOWER ADMINISTRATION*—Continued

General and special funds—Continued

TRADE ADJUSTMENT ACTIVITIES—Continued

1. *Assistance in tariff negotiations.*—The Trade Expansion Act of 1962 provides that the Secretary of Labor will furnish labor market and employment information and advice regarding the negotiation of trade agreements; will make determination of industrial injury resulting from increased imports due to tariff concessions; and will determine the nature of adjustment assistance to remedy such injuries. The Secretary is a member of the Interagency Trade Organization which assists the President in the trade agreements program.

2. *Assistance to workers.*—The Secretary is responsible for the administration of the provisions of the act for assistance to workers in industries in which an affirmative determination of injury due to tariff concessions has been made. This involves certification of the eligibility of groups of workers to apply for adjustment assistance and advising the President on termination of eligibility; administering adjustment assistance through State employment security agencies; and providing training and relocation for eligible workers.

[1] Selected resources as of June 30 are as follows: Unpaid undelivered orders, 1962, $96 thousand (1963 adjustments, −$82 thousand); 1963, $14 thousand; 1964, $14 thousand; 1965, $14 thousand.

1. *Training promotion and service to industry.*—Industrial management and labor organizations are encouraged and aided to conduct apprenticeship, training and retraining programs which will help individual workers attain and improve skill, competence, and adaptability. Apprenticeship and training programs are promoted and established by direct contact at national and local levels with employers and unions, by use of informational media and by cooperation with State and community agencies. About 2,700 improvements are obtained annually in existing programs. About 1,900 apprenticeship and other training programs are initiated annually to provide, on a nondiscriminatory basis, employee development opportunities for new labor market entrants and workers who need greater skills. Technical assistance is provided annually to about 185,000 employers directly or through labor-management committees. More than 230,000 apprentices, journeymen, and other workers receive training annually.

Digitized for FRASER
https://fraser.stlouisfed.org
Federal Reserve Bank of St. Louis

2. *Training research and technical services.*—Skill requirements and training needs within particular industries are identified. Information is provided on training methods, apprenticeship labor standards and basic principles applicable to training in the apprenticeable and nonapprenticeable occupations. Promotional aids are developed to increase effectiveness of service to industry and efficiency of training by industry. Training research is conducted and about 70 pamphlets, articles, and reprints are published annually to call attention to skill needs, to indicate trends, and to describe superior apprenticeship and training programs.

[1] Selected resources as of June 30 are as follows: Unpaid undelivered orders, 1962, $98 thousand; 1963,$526 thousand; 1964, $526 thousand; 1965, $526 thousand.

The Bureau of Employment Security administers the Federal-State employment security system which consists of 54 State agencies and about 1,900 full-time local offices. Workers are assisted in finding jobs, employers in recruiting workers, and unemployment benefits are paid.

1. *Unemployment insurance service.*—The service's overall responsibility is to insure adequate and prompt payment of unemployment insurance benefits, and to oversee continued efforts toward improvement of State agency unemployment insurance operations. State laws and interpretations are reviewed to assure conformity with the Federal law and surveys are made to assist States in improving administrative procedures. The service also directs State and Federal agencies in the administration of Federal benefit programs for unemployed Federal employees and ex-servicemen. In 1965 emphasis will be placed on obtaining increased productivity of State unemployment insurance personnel and better safeguards of the benefit payment process by developing and assisting States in installing (a) more effective use of modern equipment and related methods of operations and (b) improved systems of supervisory control of local claims offices.

2. *U.S. Employment Service.*—This Service provides assistance to State employment service offices in providing (a) an efficient placement service in all occupations for all workers and employers; (b) counseling and testing services to assist both workers and employers in meeting their individual employment needs; (c) specialized services for job seekers requiring particular attention in order to facilitate their employment; (d) for improved mobility of labor by guiding necessary shifts of workers between geographical areas and across occupational and industrial lines; (e) labor market information analysis; (f) occupational analysis and industrial services to employers and unions; (g) stimulation and support for community action to develop expanded job opportunities and to stabilize employment; (h) suitable counseling and placement services to veterans and promoting the interest of employers in employing veterans; (i) special recruitment and farm placement programs to help farm workers, including rural youth, achieve maximum employment; and to meet agriculture's needs for year-round and seasonal workers; (j) maintenance of our interstate migratory routes to afford greater job continuity; (k) assistance to local migrant committees in providing services to migratory farm workers and their families; (l) investigation of employment offered aliens seeking permanent entry into the United States under the Immigration and Nationality Act of 1952. In 1965 the U.S. Employment Service will give emphasis to management and program improvement; installation of the new *Dictionary of Occupational Titles;* broadening and perfecting area, industry, and occupational information for

improving counseling, placement, skill development and training, and community manpower planning; intensifying the youth employment program and services to special applicant groups; and carrying out the recommendations of the President's Committee To Appraise Employment and Unemployment Statistics.

3. *Administration and management.*—This activity provides leadership to State employment security agencies and executive direction and business management services to all functions of the Bureau; performs economic research and analysis; maintains a Federal-State statistical reporting system; assures sound budget and fiscal management throughout the employment security system; conducts financial and management audits of State agencies; administers State merit system standards and improves State personnel administration; and promotes improved management of State agencies. Additional administration and management resources are requested in 1965 to improve financial management procedures to assure sound and systematic budgeting and accounting for granted funds; and to bring about maximum application of technological advances in the field of automatic data processing to administrative and management functions of the Bureau.

LIMITATION ON GRANTS TO STATES FOR UNEMPLOYMENT COMPENSATION AND EMPLOYMENT SERVICE ADMINISTRATION

(Trust fund)

For grants in accordance with the provisions of the Act of June 6, 1933, as amended (29 U.S.C. 49–49n), for carrying into effect section 602 of the Servicemen's Readjustment Act of 1944, for grants to the States as authorized in title III of the Social Security Act, as amended (42 U.S.C. 501–503), including, upon the request of any State, the purchase of equipment, and the payment of rental for space made available to such State in lieu of grants for such purpose, for necessary expenses including purchasing and installing of air-conditioning equipment in connection with the operation of employment office facilities and services in the District of Columbia, and for the acquisition of a building through such arrangements as may be required to provide quarters for such offices and facilities in the District of Columbia and for the District of Columbia Unemployment Compensation Board, subject to the same conditions with respect to the use of these funds for such purposes as are applicable to the procurement of buildings for other State employment security agencies, and for expenses not otherwise provided for, necessary for carrying out title XV of the Social Security Act, as amended (68 Stat. 1130), [$425,000,000] *$455,076,000* may be expended from the employment security administration account in the Unemployment trust fund, and of which $15,000,000 shall be available only to the extent necessary to meet increased costs of administration resulting from changes in a State law or increases in the number of claims filed and claims paid or increased salary costs resulting from changes in State salary compensation plans embracing employees of the State generally over those upon which the State's basic grant (or the allocation for the District of Columbia) was based, which increased costs of administration cannot be provided for by normal budgetary adjustments: *Provided,* That notwithstanding any provision to the contrary in section 302(a) of the Social Security Act, as amended, the Secretary of Labor shall from time to time certify to the Secretary of the Treasury for payment to each State found to be in compliance with the requirements of the Act of June 6, 1933, and, except in the case of Guam and the Virgin Islands, with the provisions of section 303 of the Social Security Act, as amended, such amounts as he determines to be necessary for the proper and efficient administration of its unemployment compensation law and of its public employment offices during fiscal year [1964] *1965* and that any portion thereof not obligated by the State in that year shall be returned to the Treasury and credited to the account from which derived: [*Provided further,* That not to exceed $1,100,000 of the funds made available by this paragraph may be used for payment of obligations incurred during fiscal year 1963:] *Provided further,* That such amounts as may be agreed upon by the Department of Labor and the Post Office Department shall be used for the payment, in such manner as said parties may jointly determine, of postage for the transmission of official mail matter in connection with the administration of unployment compensation systems and employment services by States receiving grants herefrom.

In carrying out the provisions of said Act of June 6, 1933, the provisions of section 303(a)(1) of the Social Security Act, as amended, relating to the establishment and maintenance of personnel standards on the merit basis, shall apply.

None of the funds appropriated by this title to the Bureau of Employment Security for grants-in-aid of State agencies to cover, in whole or in part, the cost of operation of said agencies, including the salaries and expenses of officers and employees of said agencies, shall be withheld from the said agencies of any States which have established by legislative enactment and have in operation a merit system and classification and compensation plan covering the selection, tenure in office, and compensation of their employees, because of any disapproval of their personnel or the manner of their selection by the agencies of the said States, or the rates of pay of said officers or employees.

Grants to States, next succeeding fiscal year: For making, after May 31 of the current fiscal year, payments to States under title III of the Social Security Act, as amended, and under the Act of June 6, 1933, as amended, for the first quarter of the next succeeding fiscal year, such sums as may be necessary, the obligations incurred and the expenditures made thereunder for payments under such title and under such Act of June 6, 1933, to be charged to the appropriation therefor for that fiscal year: *Provided,* That the payments made pursuant to this paragraph shall not exceed the amount

Federal Reserve Bank of St. Louis

paid to the States for the first quarter of the current fiscal year. *(29 U.S.C. 49–49n; 38 U.S.C. 2001–2014; 42 U.S.C. 501–503, 1101–1105, 1361–1371; 77 Stat. 225; Department of Labor Appropriation Act, 1964.)*

Program and Financing (in thousands of dollars)

	1963 actual	1964 estimate	1965 estimate
Program by activities:			
1. Unemployment insurance service	226,045	225,116	237,412
2. Employment service	155,456	165,173	181,470
3. Administration and management	18,499	20,000	21,612
4. Contingency fund		15,000	15,000
5. Obligations incurred for above programs in subsequent years	7,000		
Total program costs, funded—obligations (object class 41)	407,000	425,289	455,494
Financing:			
Limitation available from subsequent year	−97,500	−97,500	−97,500
Limitation available in prior year	90,500	97,500	97,500
Reimbursements for emergency preparedness functions		−289	−418
Limitation	**400,000**	**425,000**	**455,076**

Grants are made to the States for administration of the Unemployment Insurance Service and the Employment Service programs. Requirements for 1965 are estimated at $455,076 thousand, an increase of $30,076 thousand over the 1964 limitation. These increases will provide for continued improvement of the Employment Service as part of the program to develop a fully operative manpower agency; increased tax workloads; and improved supervision and operating methods of the Unemployment Insurance System. The increased costs in 1965 will also result from an increased average annual salary rate within the States which is expected to rise from $5,347 in 1964 to $5,560 in 1965.

1. *Unemployment insurance service.*—State employment security agencies pay unemployment compensation to unemployed workers eligible under State unemployment insurance laws and collect unemployment taxes from employers who are subject to State unemployment insurance laws. Unemployment benefits are also paid to unemployed Federal workers and ex-servicemen from funds provided under Federal appropriation. Federal grants in 1963 provided State administrative costs to collect $3 billion in taxes and pay $2.8 billion in State benefits to unemployed workers. It is assumed that insured unemployment will be at the same level as estimated in the 1964 budget, 1.6 million per week; and the numbers of subject employers and covered workers will increase. In 1965 administration of the unemployment insurance program will be improved by continuing progress in modernizing methods of operation and by correcting more serious deficiencies in supervision of local claims offices.

UNEMPLOYMENT INSURANCE SERVICE WORKLOADS

[In thousands]

Basic workload	*1962 actual*	*1963 actual*	*Percent change from 1962*	*1964 estimate*	*1965 estimate*
Employer tax returns processed	9,634	9,765	1	9,943	10,200
Employee wage items recorded	126,565	131,922	4	136,300	138,000
Initial claims taken	15,907	15,720	−1	14,600	14,600
Continued claims taken	92,193	89,584	−3	78,400	78,200

Appeals	376	384	2	298	345
Contested claims	5,810	5,976	3	4,640	5,300

2. *Employment service.*—Under the Federal-State employment service system, Federal grants finance a nationwide network of 1,900 local employment offices administered by State employment security agencies. The local offices function as the manpower service centers for their communities.

In fulfilling this responsibility, the local offices find jobs for persons seeking employment, provide workers for employers, develop and carry out programs designed to resolve the manpower problems of their areas, and provide special services to workers, employers, and community development agencies and groups. Local office activities include counseling and testing services to guide applicants seeking employment to find suitable jobs, helping them upgrade their skills through further training, analyzing skill requirements to assist employers in meeting their manpower needs and in solving their problems of turnover and recruitment. Specialized services also are given to young inexperienced applicants, displaced older workers, handicapped and minority group workers, and to veterans with employment problems. These services are provided to both farm and nonfarm workers and employers. To cope with the growing labor force and increasingly complex labor market problems, improvement of the employment service was begun in 1962. Continued emphasis is needed on the employment problems of youth, persistent unemployment, employers and workers affected by automation and rural communities with high unemployment, to deal with them more effectively.

EMPLOYMENT SERVICE WORKLOADS

[In thousands]

Basic workload	*1962 actual*	*1963 actual*	*Percent change from 1962*	*1964 estimate*	*1965 estimate*
Applications for work taken	10,414	10,971	5	11,018	11,828

Individuals tested	2,176	2,158	−1	2,348	2,650
Placements, nonagricultural	6,760	6,867	2	6,955	7,171

3. *Administration and management.*—State agency headquarters' personnel provide executive leadership in planning, organizing, directing, coordinating and controlling activities related to the utilization of manpower resources and income maintenance programs which are carried out in the States' central and local offices. The headquarters' personnel develop the overall planning of programs, operations and procedures, with the guidance and technical assistance of the Bureau of Employment Security. They establish and implement policies; prepare and administer the budget; administer certain State laws and act as the agent of the Federal Government in the administration of certain Federal laws; provide administrative direction to the agency's staff; maintain the accounts and records of the agency; negotiate and participate in interstate programs involving manpower programs and income maintenance payment; evaluate accomplishments to determine the effectiveness and efficiency of operations; and carry out similar types of administrative management. They also provide centralized staff services, including procurement and supply; reproduction and duplicating; training, legal, economic, statistical, and fiscal analyses; and similar types of supporting services. Deficiencies in financial and personnel management operations require additional resources in the administrative management area. In addition, increased attention is required of State agencies in the validation of reports submitted to the Federal Government.

LIMITATION ON GRANTS TO STATES FOR UNEMPLOYMENT COMPENSATION AND EMPLOYMENT SERVICE ADMINISTRATION—CON.

(Trust fund)—Continued

4. *Contingency fund.*—This fund is provided to meet increases in administration costs due to unforeseen increases in the number of claims filed for unemployment compensation, changes in State unemployment compensation laws, and for additional costs due to changes in State employee salary rates brought about by changes in State compensation plans embracing employees of the State generally that cannot be offset by normal budgetary adjustments.

UNEMPLOYMENT COMPENSATION FOR FEDERAL EMPLOYEES AND EX-SERVICEMEN

For payments to unemployed Federal employees and ex-servicemen, either directly or through payments to States, as authorized by title XV of the Social Security Act, as amended, [$110,000,000] *$126,000,000.*

Unemployment compensation for Federal employees and ex-servicemen, next succeeding fiscal year: For making, after May 31 of the current fiscal year, payments to States, as authorized by title XV of the Social Security Act, as amended, such amounts as may be required for payment to unemployed Federal employees and ex-servicemen for the first quarter of the next succeeding fiscal year, and the obligations and expenditures thereunder shall be charged to the appropriation therefor for that fiscal year: *Provided,* That the payments made pursuant to this paragraph shall not exceed the amount paid to the States for the first quarter of the current fiscal year. (*38 U.S.C. 2001–2009; 42 U.S.C. 1361–1371; 77 Stat. 226; Department of Labor Appropriation Act, 1964.*)

Program and Financing (in thousands of dollars)

	1963 actual	1964 estimate	1965 estimate
Program by activities:			
1. Payments to Federal employees	55,300	45,135	50,335
2. Payments to ex-servicemen	94,160	65,707	76,507
3. Obligations incurred for above program in subsequent year	1,533	537	----------

Unobligated balance lapsing	3,744	----------	----------
New obligational authority (appropriation)	**151,000**	**110,000**	**126,000**

Funds are allocated to the States for payment of unemployment compensation to eligible Federal employees and ex-servicemen.

1. Payments to Federal employees are made in accordance with the State unemployment compensation laws. The cost of the program will decrease by $2 million in 1965 due to the decrease in weeks compensated because of an expected improvement in the economy in 1965.

WORKLOAD STATISTICS

	1963 actual	*1964 estimate*	*1965 estimate*
Weeks compensated	1,474,028	1,300,000	1,230,000
Weekly average insured unemployment	29,810	26,000	24,000
Average weekly benefits	$36.75	$38.15	$39.55

2. Payments to ex-servicemen are made in accordance with the State unemployment compensation laws. The cost of the program will decrease by $12 million in 1965 due to the decrease in weeks compensated because of an expected improvement in the economy in 1964.

WORKLOAD STATISTICS

	1963 actual	*1964 estimate*	*1965 estimate*
Weeks compensated	2,855,230	2,427,000	2,010,000
Weekly average insured unemployment	57,881	48,600	41,000
Average weekly benefits	$32.67	$35.00	$36.83

A supplemental appropriation for 1964 is proposed for separate transmittal.

Proposed for separate transmittal:

UNEMPLOYMENT COMPENSATION FOR FEDERAL EMPLOYEES AND EX-SERVICEMEN

Current receipts	−1,785	−1,135	−520
Contingent receipts			−330
New obligational authority			

[1] Selected resources as of June 30 are as follows: Unpaid undelivered orders, 1962, $5 thousand; 1963, $0; 1964, $0; 1965, $0.

Mexican agricultural labor is imported for use in areas having a shortage of domestic agricultural workers. All costs, except for Compliance activities, are paid from the Farm labor supply revolving fund. Authorization for this program was extended to December 31, 1964. If the revenue from the Farm labor supply revolving fund is insufficient to finance the administrative costs, it will be necessary to stop contracting workers and liquidate the program prior to the expiration date.

1. *Determining Mexican labor requirements.*—The agricultural areas needing Mexican workers and the number of workers required are determined. Farm labor reports are developed, controlled, and analyzed to evaluate the Mexican labor program. Technical assistance is provided the States in preparation of these reports.

2. *Supplying Mexican labor.*—Workers are recruited in Mexico and transported to centers in the United States where employers contract for their use. In 1963, 195,525 workers were contracted. An estimated 188,300 workers will be contracted in 1964 and 93,400 in 1965.

A supplemental authorization for 1964 is proposed for separate transmittal.

[1] Balances of selected resources are identified on the statement of financial condition.

This fund covers transportation and other costs directly involved in importing Mexican farmworkers (7 U.S.C. 1461–1468). Public Law 87–345 dated October 3, 1961, extends the authority until December 31, 1964.

Budget program.—The program involves the recruitment, selection, and importation of Mexican workers for agricultural work on farms in the continental United States. Mexican workers recruited and selected by the Mexican Government are sent to three migratory stations in Mexico where they are examined for ability to do farmwork, screened for subversive activities, vaccinated, and transported to three reception centers in the United States where they are X-rayed, examined and treated for disease, and contracted to employers. This requires the establishment and operation of reception centers to provide housing, subsistence, and medical care. An estimated 191,000 Mexican farmworkers will be imported in 1964 and 95,000 in 1965 during the period July 1 through November 15, 1964, when contracting will cease.

Financing.—The costs of operation of this program are met by fees charged the employer for each worker contracted. The fees of $10 per worker initially contracted and $5 per worker recontracted were established January 1, 1960. The fee for recontracting was raised to $10 per worker effective February 1, 1962. These rates were increased to $15 per worker for both contracting and recontracting on July 1, 1962. The fees provide for the cost of importing workers and for State activities and for the serological testing administered by the Public Health Service.

Operating results and financial conditions.—The availability of funds in excess of direct charges for importing Mexican nationals will allow a net transfer of $520 thousand to Salaries and expenses, Mexican farm labor program. The lack of sufficient funds to finance the entire administrative costs may necessitate the liquidation of the program prior to December 31, 1964.

This fund, established by the Employment Security Act of 1960 (74 Stat. 970), makes advances without fiscal year limitation to the employment security administration account in the Unemployment trust fund. The purpose of this fund is to finance the Federal and State administrative costs of the employment security programs on a repayable basis from the beginning of the fiscal year until the Federal unemployment tax receipts become available in February of the same fiscal year.

During 1963, the third year of operations, $173.5 million was advanced to the employment security administration account of which $169 million was repaid. The balance of $4.5 million will be repaid from tax receipts in 1964. In addition, the balance of the fund will be used to finance the program in 1964 until the Federal unemployment tax receipts are received in February 1964. During 1964 about $257 million of the fund will be used to finance the program until the Federal unemployment tax receipts are received during February 1964.

This fund will be needed until the employment security administration account accumulates a carryover balance of $250 million. Earnings are retained to meet future requirements.

amended, and to other functions required to sustain and carry out responsibilities of the Secretary of Labor in labor-management relations matters. The limited funds available in 1964—mainly savings resulting from merging administration of the regulatory statutes cited above—permit only a small staff for planning and developmental work in the new labor-management relations activities. The statements that follow for these new activities reflect current views of the functions in these areas in 1965 when implementing staff, as proposed in this budget, will become available.

1. *Employee-management relations services.*—Assistance is provided to unions, employers, groups of employees, and Federal agencies, in meeting long-range, complex, and critical labor problems that arise from major changes in patterns of collective bargaining, technology, and other economic adjustments. Included are arrangements for special studies and analysis, guidance in identifying and utilizing available public and private services, and technical assistance in estimating and planning for economic adjustments as they will affect labor-management relations. Department of Labor interagency activities on labor-management relations matters are coordinated and, as requested, Federal action with regard to particular disputes is coordinated. Inquiries concerning collective bargaining and other aspects of the labor-management relations area are answered. The functions vested in the Secretary of Labor under Executive Order 10988 are performed, including the development and issuance of appropriate interpretations, policies, and procedures. Recommendations for issuance, rescission or amendment of rules and regulations are made to the Administrator. Advice and assistance are provided with respect to Executive Order 10988, the Standards of Conduct, the Code of Fair Labor Practices, and advisory decisions and determinations. Requests of agencies and employee organizations for nominations of arbitrators are processed and appropriate actions are taken. Cooperative advice and assistance are provided the Civil Service Commission in carrying out the latter's responsibilities under Executive Order 10988.

2. *Labor-management policy development.*—Recommendations are developed for the Administrator and the Secretary with respect to policy for labor-management relations legislation, Executive orders, objectives for Federal programs affecting collective bargaining, and matters before the President's Advisory Committee on Labor-Management Policy. Studies are made of private policies affecting collective bargaining and of the performance of collective bargaining in relation to meeting current and prospective economic and social needs; labor-management relations research functions in the Department of Labor are coordinated and special studies are made of particular situations. Research programs pertaining to the LMRDA and the WPPDA are developed and executed.

3. *Administration of reporting and disclosure laws.*—This activity covers the administration and enforcement of the LMRDA and WPPDA. Approximately 79% of the obligations are devoted to LMRDA activities and approximately 21% to WPPDA activities. Reporting forms and instructions are devised and reports from labor organizations, union officers and employees, employers and labor relations consultants and welfare and pension plan administrators are examined for compliance with the acts (approximately 230,000 reports will be received in 1965) with comprehensive analysis made of selected reports. Reports are made available for disclosure to the public. Interpretations and regulations pertaining to the acts are developed and promulgated, as are policies and standards for the conduct of elections. Technical assistance to further voluntary compliance, including clinics and workshops (225 in 1965), publications and visual aids, is provided to those affected by the acts. Under the provisions of the acts, complaints alleging violations of the law are investigated and special investigations are conducted in areas where evidence exists of persistent or willful violations. A total of 4,100 investigations is estimated for 1965. Supervision is provided for the conduct of rerun elections held under court order or waiver. The programs related to disclosure under the LMRDA, and to technical assistance, investigation and enforcement under both acts are conducted primarily through 24 area offices and 9 resident offices, under the direction of 5 regional offices.

[1] Selected resources as of June 30 are as follows: Unpaid undelivered orders, 1962, $12 thousand; 1963, $15 thousand; 1964, $15 thousand; 1965, $15 thousand.
[2] Reimbursements from non-Federal sources are derived from payments for reproduction of pension plans and financial reports (29 U.S.C. 9–9(a)).

1. *Improving State labor legislation.*—This is accomplished by assisting States in administration of labor laws and enactment of labor legislation and by negotiating Federal-State agreements to eliminate duplication in inspection. Assistance was provided to 50 States and the District of Columbia in 1963 in response to 2,100 requests.

2. *Improving conditions of migratory workers.*—Cooperation is maintained with Federal and State agencies and voluntary organizations to improve the working and living conditions of migratory workers. Secretariat is provided for the President's Committee on Migratory Labor. Services were provided to 49 States on migratory labor matters and assistance to 27 State committees in 1963.

3. *Reducing industrial accidents.*—This involves providing engineering consultation, technical advice, educational and promotional assistance in all phases of occupational accident prevention to States, labor unions, maritime and special industries, and Federal agencies. During 1963, 1,126 training courses were conducted for 28,258 trainees.

4. *Protecting young workers and advancing their employment opportunities.*—Research activities are carried out, information and advisory services are provided, annual back-to-school campaigns are promoted, and standards for child-labor regulations under the Fair Labor Standards Act are developed.

5. *Promoting employment of the handicapped.*—A continuing program of public information and education is conducted through the President's Committee to advance employment of the handicapped citizens. Cooperation is maintained with other groups interested in the field, including the Governors' committees in the States and 1,500 local committees.

many areas affecting women, including civil and political rights and labor legislation.

2. *President's Commission on the Status of Women.*—The Commission completed its report, *American Women,* in October 1963.

3. *Interdepartmental Committee and Citizens' Advisory Council on the Status of Women.*—Under Executive Order 11126, the Interdepartmental Committee and Citizens' Advisory Council on the Status of Women were established on November 1, 1963, to assure effective and continuing leadership in advancing the status of women.

The Committee is directed to maintain a continuing review and evaluation of the progress of Federal departments and agencies in advancing the status of women; stimulate cooperation among Federal agencies, State and local governments, State commissions on the status of women, and public and private organizations with programs in areas of special concern to women; encourage research on factors affecting the status of women in education, home and community activities, employment, social insurance, taxes, civil and political rights, labor legislation, and related matters; and report annually on activities of the Committee and Council to the President.

The Council is to serve as a primary means for suggesting and stimulating action with private institutions, organizations, and individuals working for improvement of conditions of special concern to women.

[1] Selected resources as of June 30 are as follows: Unpaid undelivered orders, 1962, $122 thousand; 1963, $69 thousand; 1964, $45 thousand; 1965, $45 thousand.

The Division obtains compliance with minimum standards respecting wages, hours, and other employment conditions in industries engaged in interstate commerce and in certain establishments furnishing goods to the Government.

1. *Enforcement.*—Information media are used to inform employers and employees of their rights and responsibilities under the law. Investigations are made to correct violations and to assist employers in meeting legal requirements and workers in recovering wages due. During 1963 a total of 54,331 establishments were investigated and 312,428 employees were found to be due wages in the amount of $49.1 million of which employers agreed to pay $20.2 million. In 1964, it is anticipated that investigation findings will increase as a result of the greater productivity of trained investigators. An increase of 27 investigators is provided for 1965 to carry out the Division's new responsibilities resulting from the Equal Pay Act.

2. *Wage determinations and regulations.*—During 1964 the minimum wage rates under the Fair Labor Standards Act for 21 industries in Puerto Rico, the Virgin Islands, and American Samoa will be reviewed. In 1965, industry committees will review the minimum wage rates of 22 industries in Puerto Rico. Regulations governing special minimum wages for learners, apprentices, messengers, and handicapped workers are being constantly reexamined. It is estimated that applications for special minimum wage certificates will be received at an annual rate of 2,900 during 1964 and 1965. The wage determinations program under the Walsh-Healey Act will be conducted at a level of six determinations in 1964 and 1965. Regulations and interpretations are prepared to give effect to the Fair Labor Standards Act. Emphasis will be directed to development and revision of issuances affected by amendments to the Act and changes in industry practices.

3. *Research and legislative analysis.*—Economic research and analysis and development of statistical data are pro-

Federal Reserve Bank of St. Louis

appropriated Fund Instrumentalities Act. The increases for 1965 are due primarily to mandatory salary reform costs.

1. *Disposition of compensation claims.*—Workloads are related to volume of new work related injury and death cases in covered employment and the servicing cases originating in prior years.

(a) *Federal employees.*—On June 30, 1963, cases from prior years requiring further action numbered 43,834; the backlog in investigations was 119 cases.

WORKLOAD

	1963 actual	*1964 estimate*	*1965 estimate*
New injuries reported	109,213	110,000	110,000
Reopened cases	25,264	25,000	25,000
Total	134,477	135,000	135,000
Investigations made	1,631	1,800	1,800
Open cases, end of year:			
Receiving payment	20,225	20,300	20,500
Needing further development	23,609	23,700	23,000

(b) *Longshoremen and harbor workers.*—In addition to adjudication of claims presented to employers or to their insurance carriers, and hearings and conferences are held for the purpose of determining the rights of interested parties.

WORKLOAD

	1963 actual	*1964 estimate*	*1965 estimate*
New injuries reported	80,074	85,000	90,000
Formal hearings completed	370	400	430
Informal conferences	33,344	36,000	37,500

(d) *Administration of War Claims Act.*—Claims are adjudicated and payments are made to wartime employees of U.S. Government contractors and to certain American citizens who were captured by the Japanese. In 1957, funds for the payment of all future benefits were transferred from the war claims fund to the general fund of the Treasury.

2. *Appeals from determination of Federal employee claims.*—The Employees' Compensation Appeals Board hears and decides appeals from decisions of the Director of the Bureau.

WORKLOAD

	1963 actual	*1964 estimate*	*1965 estimate*

Appropriation	4,362	4,420	4,857
Transferred to "Operating expenses, Public Buildings Service," General Services Administration (76 Stat. 728)	−64		
Appropriation (adjusted)	**4,298**	**4,420**	**4,857**

[1] Selected resources as of June 30 are as follows: 1962, $23 thousand; 1963, $52. thousand; 1964, $52 thousand; 1965, $52 thousand.

1. *Departmental program activities*—(a) *Litigation.*—This activity includes supervision of enforcement of Federal labor standards statutes; litigation and legal services in the administration of several workmen's compensation laws including the Federal Employees' Compensation Act, the Longshoremen's and Harborworkers' Compensation Act, the Defense Bases Act, and the District of Columbia Act; and subrogation and third-party cases involving death or injury claims of Federal employees.

CASES CLOSED

	1962 actual	*1963 actual*	*1964 estimate*	*1965 estimate*
Criminal cases	99	70	70	70
Civil cases	1,354	1,408	1,470	1,470
Administrative hearings	40	37	60	60
Total cases closed	1,493	1,515	1,600	1,600
Back wage recoveries attributable to litigation (in thousands of dollars)	$2,050	$2,015	$2,400	$2,600
Fines in criminal cases (in thousands of dollars)	$114	$137	$140	$145

(b) *Interpretations and opinions.*—The Office of the Solicitor provides legal interpretations to the various

Digitized for FRASER
https://fraser.stlouisfed.org
Federal Reserve Bank of St. Louis

departmental officials on all labor laws administered by the Department, and necessary direction of the legal advisory work performed in the Solicitor regional offices. During 1963, a total of 41,812 interpretations, opinions and legal advices were rendered.

(c) *Wage determinations.*—Prevailing wage rates to be paid laborers and mechanics on construction contracts involving the use of Federal funds are predetermined under this activity. Coordination of enforcement by Federal contracting agencies of labor standards provisions relating to public construction is provided. The workload statistics are:

	1962 actual	*1963 actual*	*1964 estimate*	*1965 estimate*
Wage determinations issued	44,558	46,397	48,500	50,000

(d) *Legislation.*—This activity provides analysis and reports on legislation and drafts of proposed legislation for the Department. It also engages in decision writing and in research, analysis, and reference activities in connection with the Department's programs.

(e) *Labor-management laws.*—This activity provides legal advisory and litigation services for the Department under the Labor-Management Reporting and Disclosure Act and the Welfare and Pension Plans Disclosure Act.

2. *Field legal services.*—At the regional level opinions and interpretations are provided to field officials of the Department, employers, employees, employer associations, labor organizations, attorneys and the general public. Enforcement, including several types of civil litigation in the Federal courts and proceedings under the Administrative Procedures Act, of the various statutes administered by the Department is carried on both in the field and by the Washington office of the Solicitor of Labor. Field litigation is supervised by the Washington staff.

Attorneys representing the Solicitor assist the Department of Justice and the various U.S. attorneys in the preparation and conduct of criminal prosecution and in defending declaratory judgment, Court of Claims, and other actions brought against departmental officials and/or the United States.

Budget expenditures	−54	28	−30

[1] Balances of selected resources are identified on the statement of financial condition.

This fund is available without fiscal year limitation and provides services on a centralized basis for the following Department activities (5 U.S.C. 622a): (1) Communications, (2) supply service, (3) duplicating service, (4) visual exhibits, (5) accounting and payrolling, and (6) tabulating.

Budget program—1. *Communication services.*—Consists of switchboard and telecommunications, mail and messenger, and office space services.

2. *Central supply.*—Consists of purchasing and distributing supplies including blank forms, equipment and laboring service as required.

3. *Duplicating services.*—Consists of offset printing including composing and layout, mimeographing, collating and addressograph service. This activity also includes procurement of printing from the Government Printing Office and the procurement and distribution of congressional material.

4. *Visual exhibits.*—Consists of preparing displays for public information and furnishing photographic services to the various bureaus.

5. *Accounts and payroll.*—Consists of centralized payrolling, accounting and financial reporting for the Department.

6. *Central tabulating services.*—Provides tabulating service for payroll and accounting functions, personnel and other statistical operations.

Operating results and financial condition.—Services rendered are charged for at rates which return in full all expenses of operation, including a normal reserve for accrued annual leave and depreciation of equipment. The fund is reimbursed in advance by bureaus, offices, and agencies served.

POST OFFICE DEPARTMENT

Mail volume.—The budget estimates for 1965 are based on expected volume of 72.2 billion pieces of mail, compared to 70.2 billion anticipated for 1964 and 67.9 billion in 1963.

The 1965 forecast includes 38 billion first-class letters and cards; 1.7 billion airmail items; 8.4 billion magazines, newspapers, and other publications; 20 billion pieces of printed matter and small parcels; and 1.1 billion zone-rate parcels, catalogs, and other fourth-class matter. Comparisons of these and other items of postal workload and related 1965 revenues with corresponding 1964 estimates and 1963 results appear in the table on page 610.

Financing.—Six separate limitations are enacted for the Post Office Department for operation of the postal service and other assigned responsibilities. The limitations apply to the postal fund which is financed by the deposit therein of postal revenues and other receipts and by an appropriation from the general fund of the Treasury for the balance. The Postal Policy Act of 1958 (Public Law 85–426), as amended by the Postal Service and Federal Employees Salary Act of 1962 (Public Law 87–793), provides that postal rates and fees be adjusted as required to produce the amount of revenue approximately equal to the total cost of operating the Postal Establishment less the amount determined to be attributable to the performance of public services.

Only the appropriation from the general fund to the postal fund (being equal to the excess of obligational authority over revenues) is considered new obligational authority for purposes of the Federal budget. Further, only the excess of the Department's disbursements over its receipts (exclusive of the general fund appropriation) are considered as budget expenditures.

The six individual limitations control obligations incurred by the Department and are therefore requested and accounted for in terms of obligations. However, the program and financing schedules show funded accrued costs for each principal activity, reconciled in total to obligations.

The schedule of revenue and expense shows operating costs on a full accrual basis, including provision for employees' accrued annual leave and costs funded by other agencies. Costs attributable to public services are shown in total on the revenue and expense statement.

Following is a summary of financial transactions and estimated revenue deficiency (in millions of dollars):

	1963 actual	*1964 estimate*	*1965 estimate*
Obligations under limitation	4,617	4,922	5,031
Net revenues	3,809	4,271	4,480
New obligational authority used or requested	808	651	551
Net change in selected working capital and prior year adjustments	−38	−105	− 76
Budget expenditures	770	546	475
Conversion to accrued cost	49	83	77
Net operating loss	819	629	552
Attributable to public services	[1] −412	−446	−463
Deficiency in postal rates and fees	407	183	89

[1] Preliminary.

Transactions outside the postal fund.—Postal money orders issued and cashed, postal savings system, and deposits resulting from U.S. savings bond sales are excluded from the tables of this chapter. The postal money orders outstanding are included in the figure for checks outstanding for the Government in table 2 of the Budget, and a corresponding sum is included in Treasury cash. Balances for the Postal Savings System and savings bond sales are included in part II of this document.

CURRENT AUTHORIZATIONS OUT OF GENERAL FUND

Public enterprise funds:

CONTRIBUTION TO THE POSTAL FUND

(Indefinite)

For administration and operation of the Post Office Department and the postal service, there is hereby appropriated the aggregate amount of postal revenues for the current fiscal year, as authorized by law (39 U.S.C. 2201–2202), together with an amount equal to the difference between such revenues and the total of the appropriations hereinafter specified and the sum needed may be advanced to the Post Office Department upon requisition of the Postmaster General, for the following purposes, namely: (*Post Office Department Appropriation Act, 1964.*)

CURRENT AUTHORIZATIONS OUT OF GENERAL FUND—Continued

Public enterprise funds—Continued

POSTAL FUND—Continued

addition to the obligations and expenditures under limitations enacted in annual appropriation acts, the fund is also used without annual action by Congress for the purchase of stamp-embossed envelopes and for payment of certain indemnities, claims, and judgments.

Postal revenue comes primarily from private postal patrons. It also includes receipts from various Federal agencies for the handling of official mail and the payment by the Congress for franked mail. Reimbursements received for nonpostal services and other recoveries are likewise deposited in the postal fund.

The aggregate of postal revenues is less than the obligations authorized for payment from the postal fund. An indefinite appropriation is made from the general fund of the Treasury to make up the difference. After taking into account anticipated changes in funded working capital, the net budget expenditures for the postal service for 1965 are estimated to be $474.7 million, compared to $546 million for 1964, and $770.3 million for 1963.

Statement of Revenue and Expense (in thousands of dollars)

	1963 actual	1964 estimate	1965 estimate
Revenue:			
Mail and services revenue	3,826,663	4,287,870	4,497,000

[1] Does not include contingent receivables based on contested CAB orders in the amount of $2.8 million and $7.8 million at June 30, 1963 and 1962 respectively.

[2] The changes in these items are reflected on the program and financing schedule.

[3] Liabilities do not include: (1) Undetermined amounts of postage in the hands of the public which, for practical considerations, have been accounted for as revenue when sold, and (2) the following contingent and future obligations which by law the Department may not fund or account for as obligations until payments are due: contingent liabilities for pending suits and damage claims of $37.1 million and $41.4 million at June 30, 1963 and 1962 respectively, a substantial portion of which are expected either to be settled at less than the amount claimed or disallowed; and undetermined amounts for long-term leases.

CURRENT AUTHORIZATIONS OUT OF POSTAL FUND

Administration and Regional Operation

For expenses necessary for administration of the postal service, operation of the inspection service and regional offices, uniforms or allowances therefor, as authorized by the Act of September 1, 1954, as amended (5 U.S.C. 2131), including services as authorized by section 15 of the Act of August 2, 1946 (5 U.S.C. 55a); management studies; not to exceed $25,000 for miscellaneous and emergency expenses (including not to exceed $6,000 for official reception and representation expenses upon approval by the Postmaster General); rewards for information and services concerning violations of postal laws and regulations, current and prior fiscal years, in accordance with regulations of the Postmaster General in effect at the time the services are rendered or information furnished; expenses of delegates designated by the Postmaster General to attend meetings and congresses for the purpose of making postal arrangements with foreign governments pursuant to law, and not to exceed $20,000 of such expenses to be accounted for solely on the certificate of the Postmaster General; [not to exceed $75,000 for expenses (including expenses of official reception) incidental to meetings in the United States of the Management Council of the Universal Postal Union's Consultative Committee on Postal Studies;] and not to exceed $25,000 for rewards for information and services as provided for herein, shall be paid in the discretion of the Postmaster General and accounted for solely on his certificate; and settlement of claims, pursuant to law, current and prior fiscal years, for damages, and for losses resulting from unavoidable casualty; [$83,500,000] *$86,455,000. (5 U.S.C. 22, 22a, 30q, 43, 61g, 73b–3, 87c, 150, 785, 836–840, 901, 911–913, 921, 922, 926, 943, 944, 1003, 1006, 1010, 1011, 1111–1114, 1124, 2061–2066, 2091–2103, 2121–2123, 2131–2133, 2201, 2203, 2205, 2301–2319, 3001–3014; 28 U.S.C. 1346, 2671–2672, 2677; 31 U.S.C. 22a, 82a–1, 82a–2, 695, 725a; 39 U.S.C. 302, 304–309, 501, 502, 509, 701, 702, 903, 905, 2001–2006, 2202, 2204, 2206–2208, 2211, 2302, 2304, 2331, 2401, 2403, 2409, 2411, 2501–2508, 3105, 3301, 3311, 3335, 3511–3542, 5001, 5005–5007, 5011, 5101–5103, 5208; Post Office Department Appropriation Act, 1964.)*

Total selected resources	−6,628	−7,369	−149	−7,938	−8,182

This appropriation provides for the direction and control of the Postal Establishment. The budget estimate for 1965 is $86.5 million, an increase of $3.4 million over 1964 and $9.6 million over 1963.

1. *Executive direction and administration.*—This activity provides for all offices and bureaus at Washington headquarters except the research and engineering staff, and including the money order audit activity which in 1964 is being moved from Kansas City, Mo., to Washington, D.C.

This activity also includes claims settled administratively under the Federal Tort Claims Act, the payment of compromise settlements of damage suits, and the reimbursement to Treasury Department for processing of paid money orders. For 1964, the biennial fidelity bond premium of all employees is also included.

CURRENT AUTHORIZATIONS OUT OF POSTAL FUND—Continued

ADMINISTRATION AND REGIONAL OPERATION—Continued

2. *Field inspection service.*—This activity provides for the postal inspection and internal audit services. Postal inspection includes all field investigation and inspection functions pertaining to violation of the postal laws, prevention and detection of mail loss and mistreatment and losses of Government funds and property, field audit of postmasters' accounts, personnel security and suitability investigations, and special surveys and investigations. The internal audit program includes comprehensive reviews and financial audits of activities at the departmental level, regional offices, and other selected field installations.

3 and 4. *Regional operation.*—This activity provides for direction and administration of postal field activities by 15 regional administration offices under authority delegated from Washington headquarters, and the performance of regional finance functions. This does not include the inspection service or field installations of the Bureau of Facilities.

Total selected resources	11,854	309	7,362	9,321	9,296

This no-year appropriation provides for a research, development, and engineering program estimated for 1965 at $13 million, a decrease of $5 million from 1964 and an increase of $7 million over 1963.

1. *Direct operations.*—This activity provides for the administration of all research, development, and engineering programs of the Postal Establishment and the conduct of all research, development, and engineering activities not performed under contract.

2. *Contract engineering.*—This activity provides for contract procurement of engineering services used primarily in the replacement and modernization of facilities and equipment. The replacement of a portion of the contract engineers with permanent civil service personnel is planned in 1965.

3. *Contract research and development.*—This activity includes (a) the design, development, and testing of new postal equipment and materials; (b) development of better work methods, production measurement standards, and manpower utilization systems; and (c) recommendation of general location, functional design, building modifications, layouts, and mechanization requirements of facilities.

Work performed under most research and development contracts runs over a period of more than 1 year and, because of its nature, is generally done on cost-plus-a-fixed-fee basis. At times the scope is of such magnitude as to require several years for completion. Therefore

obligations incurred in any one year are not necessarily indicative of the level of work actually performed. In order to provide flexibility required in programing research projects, funds in this appropriation are available until expended and authority to modify cost-type prior year contracts from current funds is provided to the extent of $2 million.

Funds provided in this appropriation pay the personal services and related expenses required to perform the primary function of the Post Office Department—collecting, sorting, and delivering mail.

Funds requested for 1965 total $4,034.9 million, an increase of $109.9 million over the estimate for 1964. The additional funds will provide the manpower and cover the related expenses necessary to handle the estimated increase of 2 billion pieces of mail in 1965, service additional delivery areas, improve existing services, and cover the full year cost of the second step of pay increases granted under Public Law 87–793, effective January 4, 1964.

1. *Administration of postal installations.*—Services are performed under this activity by postmasters, assistant postmasters, supervisors, and technical personnel. These employees are engaged in the local management and supervision of all postal units. Technical personnel under this activity include accounting, station examiner, medical, safety, and personnel employees.

CURRENT AUTHORIZATIONS OUT OF POSTAL FUND—Continued

OPERATIONS—Continued

2. *Mail handling and window service.*—This activity provides for the separation and distribution of all mail received in the postal units, including highway and railway post offices. It also covers the rendering of window service to patrons, payment for the operation of contract stations, dispatch control of trucks, and reimbursements to Federal Reserve banks for handling deposits made by postmasters.

It is expected that continued benefits from the efforts to improve operating procedures and cooperation of the mailing public in the pre-preparation of its mailings along with continued mechanization and other programs directed toward a more efficient postal service will enable the estimated increase of 2.8% in mail volume to be handled with an increase of 0.7% in clerical manpower in this activity. This compares with a 1.2% increase in manpower to handle a 2% increase in mail volume experienced in 1963, and a 1.7% increase in manpower to handle a 3.5% increase in mail volume expected in 1964.

The following table shows a comparison of employment and workload:

CLERKS AND MAIL HANDLERS

	Man-years	*Mail volume (millions)*	*Average pieces per man-year*
1961	267,029	64,933	243,168
1962	269,521	66,493	246,708
1963	272,689	67,853	248,829
1964 (estimate)	277,325	70,231	253,244
1965 (estimate)	279,133	72,200	258,658

3. *Collection and delivery service.*—This service provides for delivery of mail to residences and business places in cities and their suburbs, collection of mail from over 309,000 street letter boxes and 13,900 building mail chutes in these areas, delivery of mail on rural routes, and delivery of special delivery articles. It also includes the local pickup and delivery of mail between stations and the general post office and other installations. In some instances drivers transport mail between cities. Possible city delivery stops per man-year worked in 1965 are estimated to increase approximately 1.7% on a comparable basis after considering the effect of the two extra workdays in 1964. The increase in number of possible stops is estimated to result from the continuous growth in housing. Due to conversion of rural delivery service to city delivery service and consolidation of rural routes for economic reasons, the number of rural routes and comparable man-years of employment is declining, while the average length of routes is increasing.

CITY DELIVERY CARRIERS

[Includes motor vehicle drivers]

	Man-years worked	*Number of possible stops (thousands)*	*Possible stops per man-year worked*
1961	148,561	36,116	243.1

1961	35,676	31,341	57.2
1962	35,701	31,323	57.9
1963	35,580	31,299	58.7
1964 (estimate)	36,107	31,274	59.5
1965 (estimate)	36,037	31,249	60.2

4. *Maintenance service.*—These services relate to the maintenance of equipment and the protection and cleaning of buildings used by the postal service.

5. *Vehicle service.*—This activity provides for maintenance and operating cost of vehicles for local collection and delivery of mail and in some instances for transport of mail between cities. This includes employment of vehicle mechanics; the purchase of parts, gasoline, oil, tires, and contract maintenance; and the cost of hired vehicles used in lieu of Government-owned vehicles when economically advantageous.

Average postal field service salary	$5,947	$6,135	$6,176
Average salary of ungraded positions	$5,312	$5,583	$5,638

[1] This figure includes (a) career-regular personnel, and (b) career-substitute personnel who temporarily replace postmasters and rural carriers. It does not include other career-substitute personnel who temporarily fill additional permanent positions. Such personnel totaled 12,618 in 1963 and are estimated at 12,495 in 1964 and 12,635 in 1965.

TRANSPORTATION

For payments for transportation of domestic and foreign mails by air, land, and water transportation facilities, including current and prior fiscal years settlements with foreign countries for handling of mail, [$611,000,000] *$601,000,000.* (*31 U.S.C. 22a; 39 U.S.C. 309, 501, 706, 2006, 2202, 2402, 6101–6103, 6105, 6106, 6201–6215, 6301–6304, 6351-6355, 6401–6410, 6414–6416, 6422–6425, 6431, 6434, 6435, 6439, 6440; 49 U.S.C. 1371–1376; Post Office Department Appropriation Act, 1964.*)

1. *Surface transportation*—(a) *Water.*—Domestic water transportation service is utilized for the transportation of mail on the inland and coastal waterways at per annum contract rates ($.8 million in 1965) and at pound rates ($3.7 million in 1965). Pound rate service is utilized for Alaska, Hawaii, and Puerto Rico, where there is a substantial increase in mail volume, offsetting the decrease that occurred in 1962 and 1963 because of the diversion of Alaskan mail to highway.

DATA RELATING TO DOMESTIC WATER TRANSPORTATION

	Pounds (thousands)	*Payments to carriers (thousands)*	*Average cost per pound (cents)*
1961	73,126	$4,011	5.49
1962	69,518	3,663	5.27
1963	63,078	3,067	4.86
1964 (estimate)	69,413	3,391	4.89
1965 (estimate)	76,383	3,749	4.91

Foreign water transportation covers carriage of mails by steamship to foreign countries at per pound rates. It also includes terminal charges by foreign countries for handling such mail at the port of entry and charges for mails transiting such countries. The advantages offered by fast air service between the United States and foreign countries is the apparent reason for the steady decline in the utilization of foreign water transportation.

DATA RELATING TO FOREIGN WATER TRANSPORTATION

	Pounds (thousands)	*Payments to carriers (thousands)*	*Average cost per pound (cents)*
1961	192,253	$11,194	5.82
1962	177,435	10,477	5.90
1963	175,307	10,457	5.96
1964 (estimate)	175,000	10,436	5.96
1965 (estimate)	174,380	10,400	5.96

(b) *Highway.*—This includes transportation of mail by star routes, mail messenger service, and highway post offices. Star route service, which includes short-haul truck service, is provided between post offices where other means of mail transportation are not available or are inadequate. The uptrend in the average cost per mile of highway transportation is caused by the use of larger and more expensive equipment where mail volume is steadily increasing, and the general growth in the national economy.

DATA RELATING TO TRANSPORTATION BY STAR ROUTES

	Number of routes (end of year)	*Scheduled miles of travel (thousands)*	*Annual obligations (thousands)*	*Average rate per mile (cents)*
1961	11,149	398,506	$76,178	19.12
1962	11,279	404,438	77,748	19.22
1963	11,418	425,725	80,708	18.96
1964 (estimate)	11,578	437,826	84,019	19.19
1965 (estimate)	11,742	450,536	87,449	19.41

Mobile highway post offices provide mail distribution en route in contract highway vehicles where adequate train service of this nature does not exist. General price increases have resulted in higher costs to the performing contractors and subsequent adjustment in contract rates is the reason for the increase in the average cost per mile.

DATA RELATING TO CONTRACT HIGHWAY POST OFFICES

	Number of routes (end of year)	*Scheduled miles of travel (thousands)*	*Annual obligations (thousands)*	*Average rate per mile (cents)*
1961	164	18,352	$5,879	32.03
1962	161	18,029	5,995	33.25
1963	154	17,724	5,949	33.56
1964 (estimate)	154	17,724	5,949	33.56
1965 (estimate)	154	17,724	5,949	33.56

(c) *Rail.*—This covers transportation by railroad in the United States and Puerto Rico. The estimate provides for increased mail volume offset in part by necessary diversions of railroad short hauls to highway service.

DATA RELATING TO TRANSPORTATION BY RAILROAD

	Car-foot miles (thousands)	*Railway post office and line haul obligations (thousands)*	*Average cost per thousand car-foot miles*
1961	16,066,000	$270,950	$16.86
1962	16,405,000	276,122	16.83
1963	16,342,000	274,568	16.80
1964 (estimate)	16,451,000	276,195	16.79
1965 (estimate)	16,222,000	272,800	16.82

2. *Air transportation.*—This covers the transportation of mail by air between points within the United States, to U.S. possessions and to foreign countries. There has been no change in the average ton-mile rate for individual carriers for several years and none is contemplated in these estimates. Disproportionate volume changes among the carriers with varied average rates results in inconsistent overall average costs from year to year in both domestic and foreign airmail transportation.

DATA RELATING TO DOMESTIC AIRMAIL TRANSPORTATION [1]

	Ton-miles (thousands)	*Payments to carriers (thousands)*	*Average cost per ton-mile (cents)*
1961	151,591	$55,769	36.79
1962	170,282	62,626	36.78
1963	181,703	67,318	37.05
1964 (estimate)	206,027	76,495	37.13
1965 (estimate)	210,914	78,993	37.45

[1] Includes airlift of nonpriority mail.

DATA RELATING TO FOREIGN AIRMAIL TRANSPORTATION [1]

	Ton-miles (thousands)	*Payments to carriers (thousands)*	*Average cost per ton-mile (cents)*
1961	35,768	$21,497	60.10
1962	40,101	23,885	59.56
1963	44,343	25,648	57.84
1964 (estimate) [2]	41,788	25,452	60.91
1965 (estimate)	47,239	28,075	59.43

[1] Excludes military mail for which the Department is reimbursed.
[2] Reduction in 1964 reflects transfer of Hawaii and Puerto Rico routes to domestic service.

Facilities

For expenses necessary for the operation of postal facilities, buildings, and field postal communication service; uniforms or allowances therefor, as authorized by the Act of September 1, 1954, as amended (5 U.S.C. 2131); procurement of stamps and accountable paper, and postal supplies; and storage of vehicles owned by, or under control of, units of the National Guard and departments and agencies of the Federal Government; [$190,000,000] *$205,069,000.* (*5 U.S.C.*

Total selected resources	9,599	1,214	11,917	11,525	13,828

This appropriation provides for expenses of occupying postal facilities, for supplies and certain types of contractual services required by the postal service, and for field service organizations operated by the Bureau of Facilities.

1. *Building occupancy.*—This activity provides for rental of postal facilities; costs of communications, fuel, and utilities; one-time payments for improvements to leased buildings; installments on lease-purchase contracts; and the acquisition and resale of sites to lessors under the commercial leasing program. The recoveries from the resale of such land shown under Advances and reimbursements are applied to the purchase of additional sites for resale. Increased rental costs result from (a) the acquisition of additional postal space, (b) increased rental rates, and (c) replacement of inadequate or substandard space in Government buildings.

LEASED AND RENTED BUILDINGS

Appropriation (adjusted)	**96,584**	**104,075**	**90,276**

[1] Selected resources as of June 30 are as follows: Unpaid undelivered orders, 1962, $175,702 thousand (1963 adjustments, $5,557 thousand); 1963, $200,587 thousand (1964 adjustments, $149 thousand); 1964, $220,296 thousand; 1965, $242,196 thousand.

This appropriation provides funds to alter and improve Federal buildings used for postal purposes; for procurement of equipment, including installation of major mail-processing machines; and for procurement of vehicles and garage equipment for the Post Office Department vehicle fleet. The program and financing schedule shows, in addition to obligations, the extent to which yearly costs are expected to be incurred with the corresponding increase or decrease in the amount of assets on order, as indicated by changes in selected resources applied to the program.

1. *Federal buildings improvement.*—This activity provides for modernizing and extending Government-owned buildings to make them adequate and efficient for postal purposes. Air-conditioning projects, heating plant improvements, and the purchase of additional land adjacent to Federal buildings are included in this activity.

2. *Major mechanization projects.*—This activity provides for the installation of major mailing process machinery and equipment in large postal facilities designed for such installation. It also provides for modification of existing installations to adapt to changing concepts of mail handling. This mechanization consists of bulk transport conveyors, tray transport conveyors, parcel sorting machines, and sack sorting machines. Since 1957 such mechanization has been installed in 30 facilities. By the end of 1964, 14 installations will be on order or in the process of completion, and 13 installations will be ordered in 1965.

3. *Vehicle program.*—This activity provides for replacement of wornout vehicles, for additions to the fleet required by the growth of the service, for vehicles to augment the carrier mechanization program, and for the purchase of garage equipment. The estimate provides for the purchase of 5,833 vehicles of ½-ton capacity and over for local transportation and special delivery, and 3,796 small vehicles for the carrier mechanization program. Of the larger vehicles, 3,204 will be for replacement and 2,629 for new service. For the carrier mechanization program, 331 vehicles will be for replacement and 3,465 for new service.

VEHICLE INVENTORY BASED ON ESTIMATED DELIVERIES

	Actual June 21, 1963	*Estimate June 19, 1964*	*Estimate June 18, 1965*
Vehicles for local transportation and special delivery	34,286	34,964	35,963
Vehicles for carrier mechanization program	11,440	13,289	17,647
Total	45,726	48,253	53,610

4. *Other equipment.*—This activity provides for building maintenance equipment, mail and material handling equipment, and for furniture and office equipment. It also includes movable mechanized equipment. The rise in 1965 provides for increased procurement of such items as letter-sorting machines, facing and canceling machines, data-processing equipment, and high speed electronic machines for printing labels and facing slips.

Capital outlay:			
6. Building occupancy: Sale of sites and related costs to prospective lessors	2,436	3,930	22,445
7. Supplies and services: Sale of scrap by mail equipment shop	44	31	31
10. Vehicle program: Sale of vehicles and other equipment	489	1,100	1,200
Total capital outlay obligations	2,969	5,061	23,676
Total program costs, funded—obligations	55,434	62,630	86,276
Financing:			
Advances and reimbursements from—			
Other accounts	50,083	55,325	60,590
Non-Federal sources [1]	5,351	7,305	25,686
Total financing	55,434	62,630	86,276

[1] Reimbursements from non-Federal sources consist of receipts from the sale of postal vehicles and other equipment (40 U.S.C. 481(c)); from damage to postal vehicles and other personal property (39 U.S.C. 2203(a)); the sale of scrap material from mail bag repair units and equipment shops (39 U.S.C. 2203(b)); rent paid by private concerns for space in buildings acquired under 39 U.S.C. 2102 and 2103; payments made by contractors for services performed by postal personnel (39 U.S.C. 2203(c)(3)); and fines, penalties, and refunds resulting from nonperformance or inadequate performance of carriers and contractors (39 U.S.C. 2203(c)(4)); from the sale and lease of real estate (39 U.S.C. 2113); and from the refund of annual leave payments (5 U.S.C. 61(b)).

The following two items of reimbursement amount to 93.8% of the total reimbursements estimated to be received in 1965.

5. *Foreign air transportation: Transportation of military mail (Department of Defense).*—The Department of Defense pays for the overseas portion of the transportation of mail moving to and from military post offices in foreign countries. Because it is set up to do so, the Post Office Department makes the arrangements with, and pays the bills of, commercial air carriers who haul this mail overseas. The Department of Defense makes a reimbursement to the Transportation appropriation for the costs thus incurred by the Post Office Department. The trend in volume growth experienced during the past several years is expected to continue through 1965.

6. *Building occupancy: Sale of sites and related costs to prospective lessors.*—This program provides for purchase of sites for construction of leased postal facilities and payments of architect-engineering fees for the design of such buildings. The sites are resold to successful bidders upon award of the agreement to lease, and the proceeds reimbursed to the Facilities appropriation. The amount estimated for 1965 results from the larger value of awards which will be made in 1965 as compared with 1964.

DEPARTMENT OF STATE

ADMINISTRATION OF FOREIGN AFFAIRS

General and special funds:

SALARIES AND EXPENSES

For necessary expenses of the Department of State, not otherwise provided for, including expenses authorized by the Foreign Service Act of 1946, as amended (22 U.S.C. 801–1158), [not otherwise provided for;] *and allowances as authorized by the Overseas Differentials and Allowances Act (5 U.S.C. 3031–3039);* expenses necessary to meet the responsibilities and obligations of the United States in Germany (including those arising under the supreme authority assumed by the United States on June 5, 1945, and under contractual arrangements with the Federal Republic of Germany); [salary of the United States member of the Board for the Validation of German Bonds in the United States at the rate of $17,100 per annum; purchase (not to exceed twelve, of which four are for replacement only) or] hire of passenger motor vehicles; [printing and binding outside the continental United States without regard to section 11 of the Act of March 1, 1919 (44 U.S.C. 111);] services as authorized by section 15 of the Act of August 2, 1946 (5 U.S.C. 55a); [purchase of uniforms; payment of tort claims, in the manner authorized in the first paragraph of section 2672, as amended, of title 28 of the United States Code when such claims arise in foreign countries and payment of meritorious claims as authorized by section 2(b) of the Act of August 1, 1956, as amended (5 U.S.C. 170g);] dues for library membership in organizations which issue publications to members only, or to members at a price lower than to others; [employment of aliens by contract for services abroad;] *expenses authorized by section 2 of the Act of August 1, 1956 (5 U.S.C. 170g);* refund of fees erroneously charged and paid for passports; radio communications; payment in advance for subscriptions to commercial information, telephone and similar services abroad; care and transportation of prisoners and persons declared insane; expenses, as authorized by law (18 U.S.C. 3192), of bringing to the United States from foreign countries persons charged with crime; and procurement by contract or otherwise, of services, supplies, and facilities, as follows: (1) translating, (2) analysis and tabulation of technical information, and (3) preparation of special maps, globes, and geographic aids; [$153,000,000] *$166,000,000,* of which not less than $12,000,000 shall be used [to purchase] *for payments in* foreign currencies or credits owed to or owned by the Treasury of the United States: *Provided,* That passenger motor vehicles in possession of the Foreign Service abroad may be replaced in accordance with section 7 of the Act of August 1, 1956 (70 Stat. 891), and the cost, including the exchange allowance, of each such replacement shall not exceed $3,800 in the case of the chief of mission automobile at each diplomatic mission (except that five such vehicles may be purchased at not to exceed $7,800 each) and $1,500 in the case of all other such vehicles except station wagons. (*Department of State Appropriation Act, 1964.*)

Note.—Excludes $515 thousand for activities transferred in the estimates to "Missions to international organizations." The amounts obligated in 1963 and 1964 are shown in the schedule as a comparative transfer.

ADMINISTRATION OF FOREIGN AFFAIRS—Con.

General and special funds—Continued

SALARIES AND EXPENSES—Continued

expenses, including a communications modernization and improvement program. A continued rise in travel of U.S. citizens abroad is anticipated in 1965 as reflected in the following annual number of passports applied for in the United States:

1962 actual	*1963 actual*	*1964 estimate*	*1965 estimate*
866,112	1,026,027	1,135,000	1,250,000

3. *Conduct of diplomatic relations with international organizations.*—In collaboration with other Government agencies, U.S. policy is developed and coordinated on political and security issues and in such specialized fields as world health, education, labor, and refugee activities.

4. *Domestic public information and liaison.*—This program provides for informing the American public on international policies and also keeping the Department informed on American attitudes relative to foreign policy and issues.

5. *Central program services.*—These provide personnel and physical security measures, translating and interpreting services, direction and administration of the Foreign Service Institute, and coordination of governmental foreign reporting requirements. The increase is mainly for equipment.

6. *Administrative and staff activities.*—This includes normal domestic administrative activities and the administration of a global communications system for all civilian activities of the Government, including services for other agencies on a reimbursable basis.

No increase in employment is anticipated in 1965 over the total level estimated for 1964, including personnel to be financed from an anticipated supplemental appropriation.

The foreign buildings program provides consolidated office space for the Foreign Service and other Government agencies abroad, and living quarters for American employees. This program also finances real property leases of 10 years or more (shorter term leases are included in Salaries and expenses, above), procurement of initial furniture and furnishings and repair, maintenance, and operating costs of these facilities.

The following table shows present and estimated property holdings by type of structure and geographic area (dollars in thousands):

ADMINISTRATION OF FOREIGN AFFAIRS—Con.

General and special funds—Continued

ACQUISITION, OPERATION, AND MAINTENANCE OF BUILDINGS ABROAD—Continued

The program has been financed primarily through the purchase of foreign currencies held by the Treasury Department resulting from lend-lease settlements, sale of surplus war property, and other sources. Starting in 1961, a separate appropriation for the purchase of foreign currencies under Public Law 480 increased the resources available to the building program. These supplemental funds are being used principally to acquire capital assets in the form of real property, thereby accelerating the foreign buildings program.

Outmoded or otherwise unsatisfactory Government-owned or leased office space is replaced with structures designed specifically to meet the particular needs of the Foreign Service or other oversea Government operations. Housing is provided American employees in localities where suitable housing is otherwise unavailable.

Appropriations are made pursuant to periodic congressional authorizations. Authority for appropriations of $90 million, enacted in 1952, was exhausted with the appropriation of $10.7 million for 1961. Interim authorities provided appropriations of $10 million each for 1962 and 1963. These amounts were required almost entirely for the expenses of operating present property holdings, leaving no significant balance for capital projects.

Public Law 88–94, approved August 12, 1963, authorized appropriations of $26.3 million for capital facilities and $23.5 million for operations. Appropriations requested under this authorization will finance the most urgent of a backlog of needed office buildings and housing in 1964 and 1965. Emphasis has been placed on acquiring offices and housing in Africa at posts which have been recently established or elevated to embassy status.

ACQUISITION, OPERATION, AND MAINTENANCE OF BUILDINGS ABROAD (SPECIAL FOREIGN CURRENCY PROGRAM)

For [purchase of] *payments in* foreign currencies which accrue under title I of the Agricultural Trade Development and Assistance Act of 1954, as amended (7 U.S.C. 1704), for the purposes authorized by section 104(l) of that Act, to be credited to and expended under the appropriation account for "Acquisition, operation, and maintenance of buildings abroad", to remain available until expended, [$2,750,000] *$6,143,000*: *Provided,* That this appropriation shall not be used for [the purchase of] *payments in* currencies available in the Treasury for the purposes of section 104(f) of such Act, unless such currencies are excess to the normal requirements of the United States. (*Department of State Appropriation Act, 1964.*)

Program and Financing (in thousands of dollars)

	1963 actual	1964 estimate	1965 estimate
Program by activities:			
Payment to "Acquisition, operation, and maintenance of buildings abroad" (obligations) (object class 25)	2,758	2,750	6,143
Financing:			
Unobligated balance brought forward	−553	-----	-----
Unobligated balance carried forward	-----	-----	-----
New obligational authority (appropriation)	**2,205**	**2,750**	**6,143**

Available excess foreign currencies, generated from sales abroad of U.S. surplus agricultural commodities, are used to accelerate the foreign buildings program in Burma, India, Israel, Nepal (through use of Indian rupees), Pakistan, Poland, United Arab Republic and Yugoslavia. These funds will be credited to and expended under the regular appropriation.

EMERGENCIES IN THE DIPLOMATIC AND CONSULAR SERVICE

For expenses necessary to enable the Secretary of State to meet unforeseen emergencies arising in the Diplomatic and Consular Service, to be expended pursuant to the requirement of section 291 of the Revised Statutes (31 U.S.C. 107), [$1,500,000] *$1,600,000.* (*Department of State Appropriation Act, 1964.*)

The United States contributes its share of the expenses of the United Nations and 8 of its specialized agencies, 6 inter-American organizations, 6 regional organizations, and 10 other organizations.

The decrease for the United Nations is attributable to the elimination of a requirement for the United Nations Operation in the Congo, elimination of a non-recurring requirement for an advance to the Working Capital Fund and the fact that the offset against the United States assessment for the second repayment on the U.S. loan to the United Nations is larger than the first repayment. These decreases are offset, in part, by a higher requirement for Middle East peace and security costs, because the estimate covers a full year as compared to six months in the previous year, and by an increase in the United Nations budget mainly attributable to a higher bond repayment and alterations to the headquarters building.

Major contribution increases are for (1) the International Coffee Organization included for the first time; (2) the Organization for Economic Cooperation and Development mainly attributable to increased activity in the fields of development assistance, trade problems and science, and construction of a new building; (3) the World Health Organization due to inclusion of malaria eradication costs in the regular budget and additional project activities; (4) the Organization of American States mainly to finance the staff for the Inter-American Committee of Alliance for Progress and the "Panel of Nine"; and (5) the International Civil Aviation Organization due to a change in the method of financing the annual U.S. contribution.

Missions to International Organizations

For expenses necessary for permanent representation to certain international organizations in which the United States participates pursuant to treaties, conventions, or specific Acts of Congress, including expenses authorized by the pertinent Acts and conventions providing for such representation; salaries [,] *and* expenses [, and allowances] of personnel and dependents as authorized by the Foreign Service Act of 1946, as amended (22 U.S.C. 801–1158); *allowances as authorized by the Overseas Differentials and Allowances Act (5 U.S.C. 3031–3039);* purchase (not to exceed [one] *five*) and hire of passenger motor vehicles; [printing and binding, without regard to section 11 of the Act of March 1, 1919 (44 U.S.C. 111); and purchase of uniforms for guards and chauffeurs] *and expenses authorized by section 2 (a) and (e) of the Act of August 1, 1956 (5 U.S.C. 170g);* [$2,500,000] *$3,238,000. (Department of State Appropriation Act, 1964.)*

Note.—Includes $515 thousand for activities previously carried under "Salaries and expenses, Department of State." The amounts obligated in 1963 and 1964 are shown in the schedule as comparative transfers.

Total obligations	3,117	1,943	2,778
Financing:			
New obligational authority (appropriation)	**3,117**	**1,943**	**2,778**

This appropriation is largely for official United States participation in multilateral international conferences and meetings and for contributions to new or provisional organizations.

This appropriation request provides only for regularly planned conferences and for predictable United States contributions to provisional organizations. The 1965 estimate does not provide for unforeseen contingencies or for unscheduled conferences.

The requested 1965 increase of $835 thousand is required primarily for participation in several extraordinary conferences requiring large U.S. delegations and for funding all participation considered necessary by the Secretary to carry out U.S. objectives at international conferences. In previous years some delegates have been financed by other Government agencies.

INTERNATIONAL TARIFF NEGOTIATIONS

For necessary expenses of participation by the United States in the sixth round of tariff negotiations, [$365,000] *including not to exceed $20,000 for representation allowances as authorized by section 901 of the Foreign Service Act of 1946, as amended (22 U.S.C. 1131), and for official entertainment, $1,500,000: Provided,* That this appropriation shall be available in accordance with authority specified in the current appropriation for "International conferences and contingencies." (*Department of State Appropriation Act, 1964.*)

Program and Financing (in thousands of dollars)

	1963 actual	1964 estimate	1965 estimate
Program by activities:			
Participation in international conferences (obligations)	----------	365	1,500
Financing:			
New obligational authority (appropriation)	----------	**365**	**1,500**

This appropriation provides for continuation of U.S. participation in multilateral tariff negotiations within the framework of the General Agreement on Tariffs and Trade (GATT). It is expected that the GATT contracting parties will convene the sixth round of tariff negotiations at Geneva in May 1964 and continue through 1965.

The request will provide for preparatory work involved in the tariff negotiations and will support the U.S. delegation at the negotiations.

This appropriation is largely to help finance peace-keeping operations in the Middle East and in the Congo. Loan authority is limited to matching bond purchases up to $100 million by other countries on a dollar for dollar basis.

INTERNATIONAL COMMISSIONS

General and special funds:

INTERNATIONAL BOUNDARY AND WATER COMMISSION, UNITED STATES AND MEXICO

The Commission consists of a U.S. section, with headquarters at El Paso, Tex., and a Mexican section, with headquarters at Ciudad Juarez, Chihuahua, and has the status of an international body. It was created in 1889 by the United States and Mexico to provide a practical means for solving mutual boundary problems.

For expenses necessary to enable the United States to meet its obligations under the treaties of 1884, 1889, 1905, 1906, 1933, and 1944 between the United States and Mexico, and to comply with the other laws applicable to the United States Section, International Boundary and Water Commission, United States and Mexico, including operation and maintenance of the Rio Grande rectification, canalization, flood control, bank protection, water supply, power, irrigation, boundary demarcation, and sanitation projects; detailed plan preparation and construction (including surveys and operation and maintenance and protection during construction); Rio Grande emergency flood protection; expenditures for the purposes set forth in sections 101 through 104 of the Act of September 13, 1950 (22 U.S.C. 277d–1—277d–4); purchase of four passenger motor vehicles for replacement only; purchase of planographs and lithographs; uniforms or allowances therefor, as authorized by the Act of September 1, 1954, as amended (5 U.S.C. 2131); and leasing of private property to remove therefrom sand, gravel, stone, and other materials, without regard to section 3709 of the Revised Statutes, as amended (41 U.S.C. 5); as follows: (*Department of State Appropriation Act, 1964.*)

SALARIES AND EXPENSES

For salaries and expenses not otherwise provided for, including examinations, preliminary surveys, and investigations, [$715,000] *$785,000. (Treaties of Feb. 2, 1848, Dec. 30, 1853, Nov. 12, 1884, Mar. 20, 1905, May 21, 1906, Feb. 1, 1933, Feb. 3, 1944; U.S.C. 277–277e; Act of Sept. 13, 1950, Public Law 786; Department of State Appropriation Act, 1964.*)

1. *General administration.*—Activities include negotiations and supervision of joint projects with Mexico to solve international problems, overall control of the operations of the U.S. section of the Commission, formulation of operating policies and procedures, and financial management to carry out international obligations of the United States, pursuant to treaty and congressional authorization.

2. *General engineering.*—This provides for (a) supervision of measurement and determination of the national ownership of boundary waters; (b) technical engineering guidance and supervision of the planning, construction, and operation of international projects; and (c) studies relating to international problems of a continuing nature.

3. *Project investigations.*—Preliminary investigations are made to determine the need for and feasibility of joint projects for the solution of international problems arising along the boundary. The proposed program for 1965 includes investigations of the following projects: (a) Settlement of boundary disputes, (b) Tijuana River development, (c) Santa Cruz River development, (d) Lower Rio Grande salt water problem, (e) Lower Colorado River flood control, and (f) review of proposed solutions to the Colorado River salinity problem.

This appropriation finances the U.S. part of operation and maintenance of flood control works and other structures, a powerplant, and stream gaging stations on the international and related sections of the Rio Grande and Colorado Rivers.

The following table summarizes the major maintenance workload:

PROGRAM WORKLOAD SUMMARY

Item	Unit	Quantities performed, 1963	Quantities proposed, 1964	Quantities proposed, 1965
1. River channel:				
(a) Clearing	Acre	778	1,550	1,800
(b) Excavation	Cubic yard	774,481	700,000	700,000
2. Levees:				
(a) Clearing	Acre	5,960	5,960	5,960
(b) Surfacing	Mile	18.51	12.5	10
(c) Road maintenance	Mile	490	490	490
(d) Embankment	Cubic yard	10,987	13,750	13,750
(e) Rodent control	Acre	1,006	1,200	1,200
(f) Reconditioning	Mile	50.4	47	47
(g) Road surfacing	Mile	1.8	-------	--------
3. Floodways:				
(a) Clearing	Acre	15,160	15,160	15,160
(b) Leveling	Acre	335	700	700
(c) Rodent control	Acre	5,599	9,200	9,200
4. Pilot channel:				
(a) Excavation	Cubic yard	8,750	15,000	15,000
(b) Earthwork	Cubic yard	5,990	5,000	5,000
(c) Road maintenance	Mile	40	40	40
(d) Rock riprap	Cubic yard	486	250	250
5. Canal: Maintenance	Mile	15	15	15
6. Arroyo control: Earthwork	Cubic yard	170,578	150,000	150,000

7. Replacement of equipment—Provides for necessary replacement of heavy duty maintenance equipment.

In addition to the above maintenance items, the program workload includes operation of about 800 drainage and related structures, 3 diversion dams, and the U.S. portion of Falcon storage dam, reservoir, and powerplant.

Unpaid undelivered orders	3,126	6,556	6,587	7,887
Equipment	124	159	159	144
Total selected resources	3,372	6,724	6,755	8,040

1. *Rio Grande international dams program.*—Construction of Amistad Dam, the second major international storage structure on the Rio Grande contemplated by the 1944 Water Treaty, will be continued in 1965.

2. *Lower Rio Grande flood control.*—Mexico is continuing to investigate the feasibility of control structures on certain of its tributaries to the Lower Rio Grande. Pending completion of these studies, which could permit rectification of the main channel of the Lower Rio Grande and abandonment of interior floodways and levee works, all except certain minor but urgently needed works are being deferred. No funds are requested for 1965, as work will be financed with the unobligated balance of prior year funds.

4. *Douglas-Agua Prieta sanitation project.*—Funds are provided to complete improvements to the Douglas-Agua Prieta international sewage treatment plant in 1965.

5. *Nogales sanitation project.*—Funds are provided to complete expansion of the Nogales international disposal works in 1965.

A supplemental appropriation for 1964 is anticipated or separate transmittal.

Under proposed legislation, 1964.—Following approval of legislation to implement the Chamizal settlement reached with Mexico, an additional appropriation will be requested to provide full financing of works necessary to carry out the Chamizal program. The above estimate pertains only to land and property acquisition, and to river and inspection facilities relocation; it is subject to revision following completion of detailed project studies and review of the potential domestic program to complement the international project.

Supplemental funds are also required for certain emergency flood control work in the lower reaches of the Colorado River.

AMERICAN SECTIONS, INTERNATIONAL COMMISSIONS

For expenses necessary to enable the President to perform the obligations of the United States pursuant to treaties between the United States and Great Britain, in respect to Canada, signed January 11, 1909 (36 Stat. 2448), and February 24, 1925 (44 Stat. 2102), the treaty between the United States and Canada, signed February 27, 1950, including services as authorized by section 15 of the Act of August 2, 1946 (5 U.S.C. 55a); hire of passenger motor vehicles; [$430,000] *$474,000*, to be disbursed under the direction of the Secretary of State, and to be available also for additional expenses of the American Sections, International Commissions, as hereinafter set forth:

International Joint Commission, United States and Canada, the salary of one Commissioner on the part of the United States who shall serve at the pleasure of the President (the other Commissioners to serve in that capacity without compensation therefor); salaries of clerks and other employees appointed by the Commissioners on the part of the United States with the approval solely of the Secretary of State; travel expenses and compensation of witnesses in attending hearings of the Commission at such places in the United States and Canada as the Commission or the American Commissioners shall determine to be necessary; and special and technical investigations in connection with matters falling within the Commission's jurisdiction: *Provided*, That transfers of funds may be made to other agencies of the Government for the performance of work for which this appropriation is made.

International Boundary Commission, United States and Canada, the completion of such remaining work as may be required under the award of the Alaskan Boundary Tribunal and the existing treaties between the United States and Great Britain; commutation of subsistence to employees while on field duty, not to exceed $8 per day each (but not to exceed $5 per day each when a member of a field party and subsisting in camp); hire of freight and passenger motor vehicles from temporary field employees; and payment for timber necessarily cut in keeping the boundary line clear. (*Department of State Appropriation Act, 1964.*)

These funds are used for payment of the U.S. share of the expenses of eight international fisheries commissions. The commissions either conduct, or plan and coordinate, studies to determine measures necessary for the preservation and expansion of the productivity of fishery stocks. In addition, the Halibut and Salmon Commissions regulate the fisheries under their jurisdiction; the Great Lakes Commission carries on a program of lamprey control; and all the commissions are authorized to recommend conservation measures to the several member governments.

A survey has been conducted for Canada and the United States by the International Joint Commission to determine the economic feasibility of a tidal power project at Passamaquoddy Bay, situated on the Atlantic coast between the State of Maine and the Province of New Brunswick. The Commission reported to the Governments in 1961. The Department of the Interior is currently conducting a detailed review of the report and recommendations. The results of this review may require further consideration by the Commission prior to submission of a final report to the Congress.

EDUCATIONAL EXCHANGE

General and special funds:

MUTUAL EDUCATIONAL AND CULTURAL EXCHANGE ACTIVITIES

For expenses, not otherwise provided for, necessary to enable the Secretary of State to carry out the functions of the Department of State under the provisions of the Mutual Educational and Cultural Exchange Act of 1961 (75 Stat. 527) and the Act of August 9,1939 (22 U.S.C. 501), including expenses authorized by the Foreign Service Act of 1946, as amended (22 U.S.C. 801–1158); expenses of the National Commission on Educational, Scientific, and Cultural Cooperation as authorized by sections 3, 5, and 6 of the Act of July 30, 1946 (22 U.S.C. 287o, 287q, 287r); hire of passenger motor vehicles; not to exceed $18,000 for representation expenses; not to exceed $1,000 for official entertainment within the United States; services as authorized by section 15 of the Act of August 2, 1946 (5 U.S.C. 55a); and advance of funds notwithstanding section 3648 of the Revised Statutes, as amended; [$42,625,000] *$47,679,000,* of which not less than [$15,000,000] *$18,500,000* shall be used [to purchase] *for payments in* foreign currencies or credits owed to or owned by the Treasury of the United States: *Provided,* That not to exceed [$2,150,000] *$2,310,000* may be used for administrative expenses during the current fiscal year. (*Department of State Appropriation Act, 1964.*)

Transfer to "Operating expenses, Public Buildings Service," General Services Administration (76 Stat. 728)	2		
Appropriation (adjusted)	41,948	42,625	47,679

This appropriation provides for the educational and cultural exchange program of the Department of State and for expenses of the National Commission on Educational, Scientific, and Cultural Cooperation.

In 1965, the Department plans to (1) strengthen exchange of persons programs by providing for travel of dependents of certain American grantees and by providing assistance to foreign students not sponsored by the U.S. Government; (2) provide support for educational and cultural projects, including the promotion of American studies abroad; (3) continue assistance to American-sponsored schools abroad; and (4) assist U.S. cultural presentations abroad. A large proportion of the total funds expended are in foreign currencies owed to or owned by the U.S. Government. Total obligations and funds for these activities, including those from Special Foreign Currency programs and from other sources, such as contributions from foreign governments, are as follows (in thousands of dollars):

Recovery of prior year obligations	−149	−620	----------
Unobligated balance carried forward	14,643	6,630	----------
New obligational authority	----------	----------	----------

This appropriation finances certain local currency expenses of American-sponsored schools abroad, exchange of persons programs, special educational development programs between American and foreign universities, and the establishment and support of workshops (seminars) and university chairs of American studies abroad. Beginning in 1963, new obligational authority needs for these programs were financed from the Mutual educational and cultural exchange activities appropriation. This appropriation will continue to finance these activities until the unexpended balances have been used.

CENTER FOR CULTURAL AND TECHNICAL INTERCHANGE BETWEEN EAST AND WEST

To enable the Secretary of State to provide for carrying out the provisions of the Center for Cultural and Technical Interchange Between East and West Act of 1960, by grant to any appropriate agency of the State of Hawaii, [$5,100,000] *$5,932,000*: *Provided*, That none of the funds appropriated herein shall be used to pay any part of the salary, or to enter into any contract providing for the payment thereof, to any individual whose aggregate salary from any and all sources is in excess of $20,000 per annum. (*Department of State Appropriation Act, 1964.*)

The establishment and operation of a Center for Cultural and Technical Interchange Between East and West to promote better relations and understanding between the United States and the nations of Asia and the Pacific is being carried out through a grant to the University of Hawaii. The University operates the Center, and provides grants, fellowships, and scholarships to qualified persons to engage in study or training at the center.

1. *Educational exchange fund, payments by Finland, World War I debt.*—Any sums paid by the Republic of Finland to the United States under the act of February 25, 1919, are used to finance exchange of persons, and book and equipment programs with Finland. During 1963 the exchange of 22 Finns and 9 Americans was financed in full from this fund and 62 grants to Finns under the Fulbright program were supplemented. The amount of $40 thousand was used to purchase books and equipment (75 Stat. 532).

2. *Educational fund, interest payments by the Government of India.*—Interest payments up to a cumulative total of $5 million on loans made to India are available for exchange of persons and educational materials. As of June 30, 1963, a total of $4,969 thousand had been obligated for this purpose (65 Stat. 71).

New obligational authority (appropriation)	**14,947**	**10,550**	**8,200**

The Migration and Refugee Assistance Act of 1962, Public Law 87–510, provides legislative authority for assistance to migrants and refugees. This request makes funds available for contributions to the Intergovernmental Committee for European Migration, activities of the United Nations High Commissioner for Refugees and assistance to those refugees determined by the President to be in the national interest. This latter category includes refugees from Communist countries in Europe (assisted since 1952 under the U.S. escapee program), Communist China (assisted since 1954 under the Far East refugee program), and Tibet. The request also provides for necessary administrative expenses required to implement the refugee assistance programs.

GENERAL PROVISIONS—DEPARTMENT OF STATE

Sec. 102. Appropriations under this title for "Salaries and expenses", "International conferences and contingencies", and "Missions to international organizations" are available for reimbursement of the General Services Administration for security guard services for protection of confidential files.

Sec. 103. No part of any appropriation contained in this title shall be used to pay the salary or expenses of any person assigned to or serving in any office of any of the several States of the United States or any political subdivision thereof.

Sec. 104. None of the funds appropriated in this title shall be used (1) to pay the United States contribution to any international organization which engages in the direct or indirect promotion of the principle or doctrine of one world government or one world citizenship; (2) for the promotion, direct or indirect, of the principle or doctrine of one world government or one world citizenship.

Sec. 105. It is the sense of the Congress that the Communist Chinese Government should not be admitted to membership in the United Nations as the representative of China. (*Department of State Appropriation Act, 1964.*)

GENERAL PROVISIONS

Sec. 701. No part of any appropriation contained in this Act shall be used for publicity or propaganda purposes not authorized by the Congress.

Sec. 702. No part of any appropriation contained in this Act shall be used to administer any program which is funded in whole or in part from foreign currencies or credits for which a specific dollar appropriation therefor has not been made.

[Sec. 703. No part of any appropriation contained in this Act shall be used to conduct or assist in conducting any program (including but not limited to the payment of salaries, administrative expenses, and the conduct of research activities) related directly or indirectly to the establishment of a national service corps or similar domestic peace corps type of program.]

(*Departments of State, Justice, and Commerce, the Judiciary, and Related Agencies Appropriation Act, 1964.*)

Budget expenditures	−3,127	−924	−538

Under the provisions of Reorganization Plan No. 1 of 1957, the Reconstruction Finance Corporation was abolished as a corporate entity, and its remaining assets, liabilities, and obligations were transferred to the Secretary of the Treasury, the Administrator of Small Business, the Housing and Home Finance Administrator, and the Administrator of General Services. The Secretary of the Treasury is responsible for completing the liquidation of business loans and securities with individual balances of $250 thousand or more as of June 30, 1957, securities of and loans to railroads, and securities of financial institutions, and for the windup of corporate affairs.

Budget program.—Liquidation transactions in 1963 produced net budget receipts of $3.1 million and it is estimated that transactions in 1964 and 1965 will produce net budget receipts of $0.9 and $0.5 million, respectively.

The progress made and anticipated in the liquidation of the assets transferred to the Secretary of the Treasury is summarized in the following table (in millions of dollars):

	July 1, 1957	*1963 actual*	*1964 estimate*	*1965 estimate*
Outstanding at end of year:				
Financial institutions	4.8	---	---	---
Railroads	8.5	5.2	4.7	4.6

Deferred participation commitments	4.5	---	---	---
Assets acquired in liquidation of loan indebtedness	.1	.2	.2	.2
Other assets	.6	.1	---	---
Total	56.2	7.6	6.8	6.5

Digitized for FRASER
https://fraser.stlouisfed.org
Federal Reserve Bank of St. Louis

No funds have been requested for administrative expense for 1964 and 1965.

Operating results.—Excess proceeds of liquidation are paid into the Treasury as miscellaneous receipts. During 1963 these receipts amounted to $3.6 million, and it is estimated that $1 million and $0.6 million will be paid in 1964 and 1965, respectively.

The Secretary of the Treasury is authorized to purchase securities or make loans (including participations therein and guarantees thereof) to aid in financing projects for civil-defense purposes upon certification by the Secretary of Defense (50 U.S.C. App. 2261, Sec. 104, Reconstruction Finance Corporation Liquidation Act and Executive Order 10952 of July 20, 1961). Investments under the program are limited to a total of $250 million outstanding at any one time.

Budget program.—The sole program cost continues to be the payment of interest on borrowings from Treasury. As of June 30, 1963, there were outstanding $583 thousand in loans and $477 thousand in commitments to participate in loans made by banks wherein disbursement of Treasury funds is deferred. It is estimated by the close of 1965 that the loans will be reduced to $510 thousand and the deferred participation commitments to $124 thousand.

No new loans were authorized in 1963 and it is anticipated that there will be no additional loans authorized during 1964 and 1965.

Financing.—Program activities are financed from borrowings from Treasury. The unobligated balance of such authority at the end of 1965 is estimated to increase slightly to $249.8 million.

This corporation was abolished October 4, 1961, by Public Law 87–353 (75 Stat. 773), and its remaining assets were transferred to the Secretary of the Treasury.

The corporation has been in liquidation for several years, its only remaining activities being the collection of non-interest-bearing notes sold to the Federal land banks on June 30, 1955, paying the proceeds as dividends to the Treasury, and the payment of outstanding bonds payable upon presentation by rightful owners.

The Bureau maintains the central revenue, appropriation, and expenditure accounts; disburses for virtually all civilian Federal agencies; prepares the central financial reports of the Government; and performs other fiscal functions.

1. *Processing payments.*—Payments are made, through 11 regional offices, for civilian Federal agencies, except the Post Office Department, the U.S. Marshals, and certain Government corporations.

2. *Issuing savings bonds.*—This activity covers the issuance of savings bonds for Federal employees under the payroll savings plan.

The work volume and productivity relating to the above two activities carried out by the Division of Disbursement follow:

[In thousands]

	1962 actual	*1963 actual*	*1964 estimate*	*1965 estimate*
Volume of checks and bonds	318,522	337,183	350,172	366,674
Productivity per man-year	197	241	248	264

3. *Processing deposits of withheld tax payments.*—Employers and certain business enterprises deposit monthly, with designated banks, excise, withheld income, railroad retirement, and withheld social security taxes, to the credit of the Treasurer of the United States. The Federal Reserve banks, acting as fiscal agents of the Treasury, issue depositary receipts which the employers attach to their returns as evidence of payment of taxes. The work volume is estimated at 12,557,000 depositary receipts in 1964 and 13,373,000 in 1965 as compared with 11,791,353 in 1963. The increase in obligations estimated for 1965 of $93 thousand over 1964 is due to the increase in the estimated volume of receipts, offset by a decrease in the purchase of depositary receipts and envelopes.

4. *Financial reporting and maintenance of the Government's central accounts.*—This activity includes the maintenance of central accounts of appropriations, receipts and expenditures which provide data for financial statements.

Federal Reserve Bank of St. Louis

BUREAU OF ACCOUNTS—Continued

General and special funds—Continued

SALARIES AND EXPENSES—Continued

It also includes the preparation and publication of financial reports on the Government's fiscal operations, such as the annual Combined Statement of Receipts, Expenditures, and Balances; the Monthly Treasury Statement; the Secretary's Annual Report; the Treasury Bulletin; and reports on foreign currencies acquired without payment of dollars.

5. *Accounting and reporting development and internal audit.*—This activity includes furnishing technical accounting advice and assistance to other agencies in relation to central accounting, reporting, disbursing and depositary matters; participation in the Government-wide financial management improvement program; performing systems work within the Fiscal Service and the Bureau of Accounts; performing internal audit in the Bureau, and other audits of a departmental character.

6. *Processing investments, loans, claims, collections and surety bonds.*—Investments in interest-bearing securities are processed for certain funds, such as the Federal old-age and survivors insurance trust fund, the unemployment trust fund, the veterans insurance trust fund, and various Government retirement funds. The work includes accounting for purchases, sales and redemptions of securities, processing of capital stock subscriptions of Government corporations, payment of international and other claims and examination of the financial condition of companies issuing surety bonds in favor of the United States.

7. *Supervision of the Federal depositary system.*—Banking facilities are provided for all agencies of the Government through the designation of selected institutions to act as official depositaries of the Government's funds.

8. *Executive direction.*—This provides for the overall management of the Bureau of Accounts.

Appropriations are made for payment of claims and interest for damages not chargeable to appropriations of individual agencies and for payment of private and public relief acts. Appropriations are made individually for judgments over $100 thousand while 31 U.S.C. 724a authorizes a permanent indefinite appropriation to pay judgments of $100 thousand or less from the general funds of the Treasury.

Statutory awards in the amount of $1,620 are paid annually to Herman F. Krafft and Sara E. Edge (46 Stat. 1921; 52 Stat. 1334).

Revenue and other receipts (from program and financing): Applicable receipts		1	1
Budget expenditures	537	363	113

This revolving fund was created as self-insurance to cover losses in shipment of Government property such as coin, currency, securities, certain losses incurred by the Post Office Department, and losses in connection with the redemption of savings bonds (5 U.S.C. 134). Since these claims are only partially offset by recoveries, the net losses have gradually increased to $1,556 thousand as of June 30, 1963, and are expected to increase to $1,919 thousand by June 30, 1964. It is estimated that the creation of this fund has resulted in a savings of over $111 million of insurance premiums on shipments of Government property.

3. *General banking services.*—General banking services are provided for Government accountable officers and for banks in the District of Columbia.

WORKLOAD OF MEASURABLE OPERATIONS

[In thousands]

	1962 actual	*1963 actual*	*1964 estimate*	*1965 estimate*
Treasury checks and other obligations paid in cash	1,250	1,156	1,200	1,300
Commercial checks, drafts and money orders processed for collection	6,760	7,075	7,100	7,200

4. *Retirement of currency.*—U.S. currency unfit for further circulation is verified and destroyed by the Federal Reserve Banks on a reimbursable basis. Unfit currency received from local sources as well as all mutilated currency is processed for retirement in Washington. The pieces of currency to be destroyed are estimated to be 1.1 billion in 1964 and 1965.

5. *Maintenance of Treasurer's accounts.*—Controlling accounts covering receipts and disbursements are maintained for all funds placed in the custody of the Treasurer, and reports are prepared, including the Daily Statement of the U.S. Treasury and a monthly statement of money held in the Treasury and paper currency in circulation.

6. *Payment and custody of securities.*—This consists of payment of principal and interest on public debt obligations, including those of Government corporations, and provision of safekeeping facilities for securities, trust funds, and savings bonds.

7. *Procurement and transportation of U.S. currency.*—All U.S. paper currency is procured by the Treasurer from the Bureau of Engraving and Printing on a reimbursable basis. The Treasurer is also charged with the cost of transportation of this new currency to the Federal Reserve banks and depositaries.

The Check Forgery Insurance Fund was established in the amount of $50,000 by the act approved November 21, 1941 (31 U.S.C. 561) for use by the Treasurer in making settlement with the payees or special endorsees in cases of checks drawn on the Treasurer which have been paid on forged endorsements and in which it appears that recovery from those liable may be delayed or be unsuccessful. As a result of continuing increases in volume of claims paid each year, the capital was increased to $100 thousand by an appropriation of an additional $50 thousand to this fund by the Treasury Department Appropriation Act, 1964.

BUREAU OF CUSTOMS—Continued

General and special funds—Continued

SALARIES AND EXPENSES—Continued

The Bureau of Customs collects the duties and taxes on imported merchandise, inspects all international traffic, regulates certain marine and aircraft activities, combats smuggling, undervaluation, and frauds on the customs revenue, and performs related functions in connection with the importation and exportation of merchandise.

Direct obligations are estimated to be $78,200 thousand for 1965, an increase of $5,830 thousand over the amount now appropriated for 1964.

The unobligated balance of $300 thousand is a special fund available to this account when necessary to help pay the expenses of reimbursable customs work pending the collection of receivables from private interests.

A supplemental appropriation is anticipated for separate transmittal.

1. *Assessment and collection of duties, taxes, and fees.*—The collectors of customs assess and collect the duties and taxes on imported merchandise, inspect international traffic, combat smuggling, perform certain marine activities relating to ownership and documentation of vessels of the United States and the movement of vessels in the foreign trade, and enforce the laws of other Government agencies affecting imports and exports.

SELECTED WORKLOAD DATA

[In thousands]

	1962 actual	1963 actual	1964 estimate	1965 estimate
Formal entries accepted	1,548	1,629	1,740	1,825
Carriers of persons and merchandise arriving from foreign countries	45,371	47,888	49,000	50,000
Persons arriving from foreign countries	157,703	164,109	168,000	171,000

2. *Appraisal of imported merchandise.*—The customs appraisers examine and ascertain the value of imported merchandise, and perform other functions in support of the collectors' determinations of rates of duty to be assessed and the admissibility of merchandise into the United States.

SELECTED WORKLOAD DATA

[In thousands]

	1962 actual	1963 actual	1964 estimate	1965 estimate
Packages examined	1,505	1,546	1,600	1,650
Packages sampled	470	387	406	426
Invoices received	2,367	2,492	2,666	2,800

3. *Investigations of violations of customs and related laws and regulations.*—The customs agents in the United States and abroad make investigations in the enforcement of the Tariff Act of 1930, the Narcotics Drug Act of 1934, the Gold Reserve Act of 1934, the Export Control Act, and other laws affecting the movement of merchandise into and out of the United States. They also secure market value information for customs appraisers. In fiscal year 1963, a total of 22,077 investigations were made. The estimates for 1964 and 1965 are 22,000 and 23,000, respectively.

4. *Audit of collection and merchandise accounts.*—The comptrollers of customs examine and certify collectors' accounts of receipts and disbursements of money and receipts and disposition of merchandise, and verify collectors' final assessments of duties and taxes, as well as allowances of drawback.

SELECTED WORKLOAD DATA

	1962 actual	1963 actual	1964 estimate	1965 estimate
Liquidations verified	97,482	97,100	98,000	106,000
Comptrollers' verifications pending at close of year	3,373	5,129	6,000	5,000
Audit reports made	129	128	128	128

5. *Analysis and identification of merchandise for tariff purposes.*—The customs laboratories perform scientific analysis and identification of merchandise for tariff and enforcement purposes. In 1963, 135,925 samples were tested, and it is estimated that 140,000 and 148,000 will be tested in 1964 and 1965, respectively.

6. *Executive direction.*—The Washington office of the Bureau of Customs directs, unifies and controls the functioning of the Customs Service.

INTERNAL REVENUE SERVICE—Continued

General and special funds—Continued

SALARIES AND EXPENSES—Continued

The growing taxpayer population and national economy are reflected in the following figures:

Year	*Tax returns filed* [*in millions*]	*Gross revenue collections* [*in billions of dollars*]
1962 actual	96.4	99.4
1963 actual	97.8	105.9
1964 estimate	99.3	110.9
1965 estimate	101.5	113.6

In addition to processing these tax returns and dollars and making some 38 to 40 million refunds a year, the Service receives several hundred million information documents pertaining to the returns. These documents are matched against the returns through a single central tax account for each taxpayer in the central master file which is being established at the National Computer Center at Martinsburg, W. Va. This central file is based on regional master files being established at seven regional service centers. The 1965 budget request includes funds to continue the gradual conversion of returns processing to this master file system, including the purchase of automatic data processing equipment.

Despite increases in employee productivity, additional manpower is required in enforcement because of the additional work involved in keeping up with the growing taxpayer population. The 1965 budget request contains funds to provide for this additional staff, including costs involved in the taxpayer compliance measurement program which seeks to identify, systematically, the extent of noncompliance and its causes so that the Service can devise more effective ways to improve compliance.

1. *Revenue accounting and returns processing.*—This activity receives and accounts for all tax returns, information documents, and payments; deposits moneys received; verifies the mathematical accuracy of returns; maintains an account for each taxpayer; pays refunds; issues notices of accounts receivable; relates information documents to tax returns and provides investigation leads to activity 2; and manages the internal reporting system.

This activity is also responsible for preparing annual reports from information on tax returns for use by the Treasury Department, the Joint Committee on Internal Revenue Taxation, and others. It also prepares other studies of specific features of the tax system; prepares forecasts of tax returns to be filed for several years in advance and makes other forecasts for long range plan purposes; and is involved in the taxpayer compliance measurement program.

SELECTED WORKLOAD DATA

[In thousands]

	1962 actual	*1963 actual*	*1964 estimate*	*1965 estimate*
Tax returns filed—all types	96,435	97,833	99,280	101,514
Individual income tax verifications	58,787	57,492	58,824	60,198
Individual income tax refunds scheduled	37,883	38,080	38,687	39,590
Notices issued for accounts receivable	6,465	6,532	6,547	6,700
Returns edited for statistical data	895	787	987	957

2. *Securing and maintaining compliance with tax laws.*—The primary purposes of this activity are:

(1) *To assist taxpayers to comply with the tax laws* by assisting the Treasury Department and congressional committees to draft tax laws that are more easily understood and which eliminate inequities and loopholes; by preparing comprehensible tax forms and instructions so that taxpayers will know how to compute their tax liability and file their tax returns; by holding taxpayer conferences and issuing rulings to resolve taxpayer problems; and by providing general educational material and individual assistance to taxpayers who need help in understanding and applying the tax laws.

(2) *To correct instances of noncompliance* to the extent that the additional revenue produced will exceed the cost sufficiently to justify the effort. This purpose is accomplished by auditing returns to make sure that tax payments are correct; by collecting from those who fail to make required returns or payments; by investigating and preparing for prosecution cases where willful evasion of tax laws is suspected; by detecting criminal violations of the statutes governing alcohol and tobacco products; by hearing administrative appeals by taxpayers protesting correction of their tax assessments; and by providing, through the chief counsel, for representation of the Government in litigation necessary in collection of taxes.

SELECTED WORKLOAD DATA

[In thousands]

	1962 actual	*1963 actual*	*1964 estimate*	*1965 estimate*
Income, estate, and gift tax returns audited	3,278	3,667	3,352	3,326
Taxpayer delinquent accounts closed	3,091	2,967	3,054	3,020
Delinquent accounts outstanding, close of year	1,056	968	850	850
Delinquent returns secured	1,008	1,042	1,113	1,222
Fraud and wagering tax investigations	13.7	14.5	15.9	16.4
Mash seized (wine gallons)	3,424	3,093	2,750	2,750
Alcohol and tobacco tax regulatory inspections	32.3	29.0	27.4	27.4
Appellate cases closed	22.4	23.6	24.0	25.4
Tax rulings (including related taxpayer conferences)	50.1	53.3	53.4	53.9
Civil and criminal court cases disposed of	13.4	14.3	14.5	15.1
Collection litigation cases	10.9	10.9	10.6	10.8

Included in these two activities are their proportionate shares of the requirements for Executive direction and Internal audit and security. Executive direction provides the overall direction and advance planning for the Service. Internal audit and security provides for independent review and appraisal of the effectiveness of the various Service operations and assures maintenance of the highest standards of employee integrity.

Object Classification (in thousand of dollars)

Total financing	398	1,790	2,100

The substantial increases in 1964 and 1965 over 1963 result from participation in programs of tax administration assistance with the Agency for International Development, particularly Alliance for Progress programs in Latin America. Other Federal programs consist of furnishing statistical data and ADP services to interested agencies on request. Reimbursement from non-Federal sources in 1965 include funds for tax advisory services to Ecuador ($215,000), statistical data services to States ($10,000), and from sale of personal property ($75,000) where funds will be applied against purchase cost of replacement property.

[2] Reimbursements from non-Federal sources above are receipts from foreign coinage (31 U.S.C. 367 (Jan. 29, 1874, 18 Stat. 6)); and proceeds from sale of medals and proof coins, and uncirculated coins (31 U.S.C. 369 (as amended September 5, 1962, 76 Stat. 440)).

The Bureau of the Mint manufactures coins, receives deposits of gold and silver bullion, safeguards the Government's holdings of monetary metals, and refines gold and silver bullion (see miscellaneous permanent appropriations).

1. *Manufacture of coins (domestic).*—Production of coins is the major Mint activity. Funds requested for 1965 will permit production of approximately 4,700 million coins. In addition, Mint facilities are utilized from time to time for production of foreign coins on a reimbursable basis. A proposed transfer of $675 thousand for production of 50 million silver dollars in 1964 is pending before Congress.

Uncurrent coins received (pieces)	22,137	18,812	19,000	19,000

3. *Protection of monetary metals and coins.*—Protection of the Government's holdings of gold and silver bullion and coin is maintained by armed guards and modern protective devices.

4. *Refining gold and silver bullion.*—Gold and silver bullion are refined in order to facilitate accountability, protection, and storage, and to bring the bullion up to a degree of purity suitable for use in the world markets. Charges are made against depositors of gold and silver for refinery services, but receipts are not available for payment of refining costs. During 1963, $280,447 were deposited to miscellaneous receipts.

Federal Reserve Bank of St. Louis

The Bureau of Engraving and Printing designs, manufactures and supplies all major evidences of a financial character issued by the United States. It is the sole source of U.S. currency and Federal Reserve notes, various public debt instruments, and most of the minor evidences of a financial character issued by the United States, such as postage, internal revenue, customs and savings stamps. In addition, the Bureau prints a wide variety of miscellaneous commissions, certificates, etc., as well as postage and revenue stamps for the various territories administered by the United States.

The Bureau finances its operations out of reimbursements received from other agencies for all direct and indirect costs, including administrative expenses (31 U.S.C. 181–181e).

DELIVERIES AND COSTS

[Units and costs in thousands]

	1963 actual	*1964 estimate*	*1965 estimate*
1. Engraving and printing:

Cost	$7,184	$10,604	$16,071
Rate per thousand	$9.47	$9.20	$9.18
Average production per man-year	919	984	1,026
(b) Stamps:			
U.S. postage	32,207,312	23,999,000	24,244,200
Cost	$9,519	$8,700	$8,699
Rate per thousand	$0.296	$0.363	$0.359
Internal revenue	1,938,787	2,073,881	2,101,706
Cost	$889	$983	$980
Rate per thousand	$0.458	$0.474	$0.466
Other	387,353	396,805	404,299
Cost	$499	$802	$787
Rate per thousand	$1.287	$2.022	$1.947
Average production per man-year	27,908	22,779	23,517
(c) Securities	6,321	6,477	6,779
Cost	$1,123	$1,289	$1,343
Rate per thousand	$177.68	$198.98	$198.18
Average production per man-year	48	45	46
(d) Commissions, certificates, etc	9,424	57,550	6,146
Cost	$403	$572	$318
Rate per thousand	$42.76	$9.95	$51.74
2. Cost of operation and maintenance of incinerator and space utilized by other agencies	$398	$402	$405
3. Other direct charges for miscellaneous services	$110	$41	$40
Total	$28,945	$28,581	$28,643

The anticipated work volume is based on estimates of requirements submitted by agencies served. The program comprises the following activities:

1. *Engraving and printing*—(a) *Currency.*—The anticipated deliveries reflect an overall increase of 0.7% in 1964 and 2.3% in 1965 as compared with deliveries made in 1963. An analysis of the program discloses a substantial reduction in the requirements for U.S. currency with commensurate increases in the requirements for Federal Reserve notes due primarily to the replacing of $1 silver certificates with the issuance of $1 Federal Reserve notes in compliance with the provision of Public Law 88–36, approved June 4, 1963.

(b) *Stamps.*—Estimated requirements for this class of work which comprises primarily postage and internal revenue stamps reflect a decrease of 23.4% in 1964 and 22.5% in 1965 from 1963. The decrease in the requirements for the current and budget year is due to changes in the demand for U.S. postage stamps in those years. Deliveries of postage stamps were abnormally high in fiscal year 1963 to meet the needs of the Post Office Department as a result of the increase in postal rates which became effective January 7, 1963. The large decrease in requirements for the current and budget year is due to a return to normal demand.

(c) *Securities.*—This program encompasses the production of a wide variety of bonds, notes, and debentures for the Bureau of the Public Debt and certain other agencies of the Government. The anticipated requirements of the agencies reflect an increase of 2.5% in 1964 and 7.3% in 1965 over 1963.

(d) *Commissions, certificates, etc.*—The anticipated normal requirements of most of the agencies who requisition this type work reflect very little change in 1964 and 1965 as compared with 1963. The large increase in the unit deliveries for 1964 is due to a special project to be performed for the Department of Defense. However, the production costs associated with all of this miscellaneous work represents a very small percentage of the overall engraving and printing program of the Bureau.

2. *Operation and maintenance of the incinerator and space utilized by other agencies.*—Charges are made to other agencies on an actual cost basis for use of the incinerator and maintenance services provided for the space they occupy in the Bureau's buildings.

3. *Other direct charges for miscellaneous services.*—Charges for a wide variety of miscellaneous services performed by Bureau personnel are made to the agencies concerned on an actual cost basis.

Operating results and financial condition.—Bureau operations during 1963 resulted in a profit of $28 thousand. This amount will be retained to partially offset an accumulative loss of $64 thousand incurred in prior years. The remaining deficit of $36 thousand will be recovered from any profits accruing in subsequent years, in accordance with provisions of 31 U.S.C. 181–181e. Budget expenditures are expected to be in excess of receipts in the amount of $886 thousand in 1964 and $2,477 thousand in 1965.

The capital of the fund is expected to remain at $25.3 million represented by an appropriation of $3.3 million and donated assets of $22 million.

The Coast Guard enforces maritime law, provides limited security of ports and waterfront facilities, saves life and property, provides navigational aids to maritime commerce in navigable waters, promotes the safety of the American merchant marine and maintains a state of military readiness to serve as a part of the Navy in time of war or national emergency.

Direct program—1. *Vessel operations.*—Multifunctional vessels are strategically stationed along the coast and inland waterways to perform search and rescue; tend aids to navigation; operate an international ice observation and patrol service in the North Atlantic Ocean; perform limited ice breaking in navigable lakes, rivers, canals, and harbors; to enforce laws; and, beginning in 1964, to operate the ocean station program.

WORKLOAD DATA

	1962 actual	1963 actual	1964 estimate	1965 estimate
Vessel operations:				
Lives saved or persons rescued	707	616	750	760
Vessels towed to port	2,385	2,662	2,900	3,400
Search and rescue missions	5,675	6,084	6,500	6,900
Law enforcement and port security missions	2,440	2,040	2,100	2,050
Aids to navigation missions	7,095	7,061	7,025	7,025
Vessels boarded and papers examined	31,022	22,717	30,000	32,000

2. *Aviation operations.*—Aircraft are maintained at air stations and detachments for search and rescue; Federal law enforcement; aerial reconnaissance for the International Ice Patrol; and logistic support in isolated areas.

WORKLOAD DATA

	1962 actual	1963 actual	1964 estimate	1965 estimate
Aviation operations:				
Lives saved or persons rescued	300	220	350	355
Search and rescue missions	8,877	9,416	11,000	11,200
Law enforcement and port security missions	1,006	1,214	1,050	1,000
Logistics missions, Coast Guard	9,509	9,839	10,000	10,000

3. *Shore stations and aids operations.*—Bases, moorings, and lifeboat stations are strategically situated for search, rescue, and law enforcement, and for maintaining aids to navigation. Port security units control anchorage areas, supervise the loading and unloading of dangerous cargoes, and screen merchant seamen and longshoremen to bar subversive elements from merchant vessels and critical waterfront areas.

Buoys, lightships, lighthouses, fog signal stations, light attendant stations, radiobeacons, and loran stations are maintained as navigational aids in the waters of the United States, its possessions, and military bases overseas. Radio stations provide rapid communication essential for Coast Guard operations and maintain a guard on the international maritime distress frequencies. Marine inspection offices and detachments administer laws and issue regulations on safety equipment and inspection of merchant vessels, and on licensing and certification of merchant marine officers and crews. They review plans for construction or alteration of merchant vessels, investigate marine accidents, and handle disciplinary cases. These offices also administer the small-boat safety program.

WORKLOAD DATA

Structures inspected (Outer Continental Shelf Lands Act)	394	304	400	450

[1] Includes the past 5-year average of 7,208 maximum buoy stations in the 2d Coast Guard District. The number of buoys required to properly mark the rivers is directly related to their water levels.

4. *Repair and supply facilities.*—Ten repair and eleven supply facilities are maintained at strategic points for support of Coast Guard operating units. Also, two facilities are maintained for testing, developing, and adapting material for safer and more effective Coast Guard use.

5. *Training and recruiting facilities.*—This activity includes the Coast Guard Academy for the training of cadets, recruiting stations, training units for recruits and petty officers, and outside training programs.

WORKLOAD DATA

	1962 actual	1963 actual	1964 estimate	1965 estimate
Training and recruiting facilities:				
Cadets	524	522	567	567
Recruits trained	6,077	7,479	7,000	7,000
Other personnel in training	4,686	4,356	4,908	5,036

6. *Administration and operational control.*—This activity provides for administrative services performed by Headquarters at Washington, D.C., district and area offices, regional inspection offices and liaison activities with other agencies.

7. *Other military personnel expense.*—This activity provides for certain military personnel expenses such as social security; the pay of personnel in hospitals and in transit; expense of permanent changes of stations, including travel of dependents and transportation of household goods; and expenses of military separation, training, and recreation.

8. *Supporting programs.*—This activity consists of procurement of ammunition and small arms; replacement of vehicles, boats, and electronic equipment; transportation of materials; and printing. These programs have such general applicability that they cannot be charged properly to specific units.

Reimbursable program—9. *Operation of ocean stations (Navy).*—The operation of 6 ocean stations (four in the Atlantic and two in the Pacific), on the basis of three cutters per station, was financed by the Department of Defense as defense requirement. These vessels perform the dual function of ocean station duty and search and rescue. This item was discontinued in 1964 as a reimbursable program and is now a direct charge to this appropriation.

10. *Miscellaneous services to other accounts.*—Various activities of the Coast Guard are financed by other agencies.

ACQUISITION, CONSTRUCTION, AND IMPROVEMENTS

For necessary expenses of acquisition, construction, rebuilding, and improvement of aids to navigation, shore facilities, vessels, and aircraft, including equipment related thereto; and services as authorized by section 15 of the Act of August 2, 1946 (5 U.S.C. 55a); [$51,000,000] *$90,000,000,* to remain available until expended: *Provided,* That repayment may be made to other Coast Guard appropriations for expenses incurred in support of activities carried out under this appropriation. (*14 U.S.C.; Treasury Department Appropriation Act, 1964.*)

This appropriation provides for the acquisition, construction, rebuilding, and improvement of vessels, aircraft, shore facilities, and aids to navigation.

Direct program—1. *Vessels.*—A program to replace overage, obsolete, and deteriorated vessels of the Coast Guard was begun in 1960. The program will be continued in 1965 with the construction of replacements for one high endurance cutter, five medium endurance cutters, one coastal tender, three inland tenders, and five small tugs. Two lightships will be replaced by offshore platforms. A design study for icebreakers will be completed in 1965. The program also provides for one additional river tender with associated facilities for servicing aids to navigation on the Missouri River and one medium patrol cutter and seven patrol boats for search, rescue and law enforcement. Modernization and improvement of existing facilities in 1965 includes: rehabilitation of one 327-foot cutter, improvements on icebreakers, including the installation of a helicopter hangar on one and installation of an aviation fueling system on another assigned to the Great Lakes, installation of bow thrusters on two 180-foot buoy tenders, and improved buoy handling gear on three 133-foot coastal tenders. To improve the operating capability of the ocean station vessels, secure communications and oceanographic equipment will be installed and balloon tracking radar equipment will be procured for

installation beginning in 1966. Space on four 255-foot cutters will be modified to accommodate electronic equipment.

2. *Aviation facilities.*—The program provides for the acquisition of nine replacement helicopters, five additional helicopters, and for additional ground support equipment at existing Coast Guard aviation units. Funds are also requested for establishment of an air detachment at Detroit, Mich. with three helicopters. The program also provides for improvements which include the construction of a paint and dope shop at the aircraft repair and supply base, rebuilding a runway at air station, Elizabeth City, N.C., and miscellaneous improvements at air detachment, San Juan, P.R. Twenty-four additional units of public housing will also be constructed at air detachment, Annette Island, Alaska.

3. *Shore stations and navigational aids.*—The program provides for the establishment of and changes to aids to navigation to mark river and harbor improvements effected by the U.S. Corps of Engineers, and other urgent needs. Other projects are included to: (a) improve facilities at one loran station; (b) automate one light station; (c) reconstruct facilities at Guam which were severely damaged by typhoon Karen; (d) complete mooring facilities at Mayport, Fla., and establish a mooring at Wilmington, N.C.; and (e) perform preliminary survey and design for future projects. In addition, 120 units of public housing will be constructed on Government property at San Juan, P.R.

4. *Repair and supply facilities.*—Improvements at two bases will be continued in 1965, and a new gantry crane will be procured for the Coast Guard yard.

5. *Training and recruiting facilities.*—The program of extension and improvement of facilities at the Coast Guard Academy provides for the completion of the field house in 1965.

Reimbursable program—6. Loran to meet Department of Defense requirements.—This program is accomplished by the Coast Guard with reimbursement from the Department of Defense. The 1965 program contemplates reimbursement of $5 million for the construction of two new stations, two monitor stations, and support facilities.

New obligational authority:			
Appropriation	**32,350**	**33,600**	**37,900**
Proposed supplemental due to Uniformed Services Pay Act of 1963		**1,125**	

This appropriation provides for retired pay of military personnel of the Coast Guard and Coast Guard Reserve, members of the former Lighthouse and Lifesaving Services, and for annuities payable to beneficiaries of retired military personnel under the Retired Serviceman's Family Protection Plan (10 U.S.C. 1431–1446).

Members are added to and removed from the rolls each month. The average numbers on the rolls will rise in 1965 and will continue to rise in future years. The actual number on the rolls at the end of 1963 was 10,236 and the number estimated to be on the rolls at the end of 1964 and 1965 is 10,713 and 11,368, respectively. The following tabulation shows the average number of personnel on the rolls during 1963 compared with estimated numbers for 1964 and 1965.

AVERAGE NUMBER

Category	*1963 actual*	*1964 estimate*	*1965 estimate*
Enlisted men	5,722	5,998	6,473
Commissioned officers	2,423	2,451	2,576
Warrant officers	1,294	1,348	1,400
Former Lighthouse and Lifesaving Services	620	600	580
Reserve personnel	72	90	117
Total	10,131	10,487	11,146

Under the provisions of the Retired Serviceman's Family Protection Plan, retired Coast Guard military personnel who elect to receive reduced amounts of retired pay may provide for monthly payments to their survivors. Appropriation requirements are reduced by the difference between the amount deducted from retired pay and the amount paid as survivors' benefits. The liability for future payments is not funded. The analysis of the accumulated deductions is as follows (in thousands of dollars):

	1963 actual	*1964 estimate*	*1965 estimate*
Accumulated deductions, net, start of year	1,395	1,575	1,755
Current deductions during the year	291	310	330
Payment of survivors' benefits	−111	−130	−150
Accumulated deductions, net, end of year	1,575	1,755	1,935

RESERVE TRAINING

For all necessary expenses for the Coast Guard Reserve, as authorized by law [(14 U.S.C. 751–762; 37 U.S.C. 231–319)], including repayment to other Coast Guard appropriations for indirect expenses, for regular personnel, or reserve personnel while on active duty, engaged primarily in administration and operation of the reserve program; for maintenance and operation of facilities; for supplies, equipment, and services; [purchase of not to exceed two passenger motor vehicles;] and the maintenance, operation, and repair of aircraft; [$18,800,000] *$21,000,000*: *Provided*, That amounts equal to the obligated balances against the appropriations for "Reserve training" for the two preceding years shall be transferred to and merged with this appropriation, and such merged appropriation shall be available as one fund, except for accounting purposes of the Coast Guard, for the payment of obligations properly incurred against such prior year appropriations and against this appropriation. (*14 U.S.C.; 5 U.S.C. 2254; 10 U.S.C. 262, 1475; 26 U.S.C. 3111; 37 U.S.C. 206, 301(f), 309, 402(b), 415–418, 1002, 1004; Treasury Department Appropriation Act, 1964.*)

[1] Selected resources as of June 30 are as follows: Unpaid undelivered orders, 1962, $180 thousand (1963 adjustments, −$61 thousand); 1963, $338 thousand; 1964, $338 thousand; 1965, $338 thousand.

Purpose.—The Coast Guard Reserve is designed to provide a trained implementing force of 39,600 officers and enlisted personnel in the Ready Reserve, available for active duty in time of war or national emergency and at such times as the national security requires, to fill the needs of the Coast Guard.

Training.—The Coast Guard Reserve training program is organized into categories compatible with the required phases of mobilization. The first or primary category is organized to provide trained units and personnel for specific assignments or tasks within 15 days of the outset of mobilization. This program provides 48 paid drills of at least 2 hours duration, and 2 weeks active duty for training for personnel who are assigned to organized training units and who occupy positions that require continued training in critical specialties, in order to maintain a high standard of proficiency for unit or specific mobilization assignments. The second category is designed to provide specialized training to additional individuals, scheduled for early mobilization, in nonpay units and/or 15 to 30 days periodic active duty for training. The third category is comprised of personnel scheduled for mobilization within 6 months of the outset of mobiliza-

COAST GUARD—Continued

General and special funds—Continued

RESERVE TRAINING—Continued

tion who, due to previous training either in units or on active duty, and in some cases whose civilian occupations are closely allied to their military specialties, do not require frequent training.

Program.—The proposed program for 1965 will provide a total of 28,275 officers and enlisted personnel in all categories of the Ready Reserve by the end of the fiscal year.

Direct program by activities—1. *Trainee expense.*—The program for 1964 provides for an increase from 18,603 to 19,115 in the number of reservists to receive training of the types required for mobilization purposes. The program for 1965 provides for an increase in the number of trainees to receive training from 19,115 to 20,241. However, the man-days will increase from 1,342,004 to 1,522,450 with the adoption of a sustaining program which requires a greater percentage of personnel to participate in active duty for training. The increase by category allows for additional active duty for training from 212,265 man days in 1964 to 228,000 in 1965.

Applicable receipts	15,823	17,957	18,861
Budget expenditures	−513	900	

[1] Balances of selected resources are identified on the statement of financial condition.

The Coast Guard supply fund, in accordance with 14 U.S.C. 650, finances the procurement of uniform clothing, commissary provisions, general stores, and technical materials. The fund is financed by reimbursements from sale of goods.

Costs of approximately $19 million to be incurred under this fund in 1965 are divided 12% for uniform clothing, 58% for commissary provisions, 30% for general stores and technical materials, including electronics.

Sales are expected to be $2,108 thousand more in 1964 than in 1963 and $3,112 thousand more in 1965 than in 1963. These increases are attributable to the rise in number of personnel to be maintained and the increase in types and numbers of items stocked.

Under this fund, purchases and sales are generally equal with no change in the level of inventories. However, in 1964 the general stores inventory will rise by $2.8 million as the result of donations of inventories to the fund of $2 million as authorized by 14 U.S.C. 650 and the purchase of additional inventories of $800 thousand. These inventories, previously carried under Operating expenses are composed of the following material: (1) $1,900 thousand electronics; (2) $100 thousand ordnance; and (3) $800 thousand aids to navigation and general stores. The total inventory maintained by the Coast Guard will not be affected by the transfer.

The cash balance will decrease by approximately $900 thousand in 1964 due to purchase of the additional inventory items. The assimilation of these additional items of inventory by the fund will result in better management of resources by eliminating parallel stocking of similar items in two different accounts. Financing of these common use maintenance and housekeeping inventory items from this revolving fund, rather than under an annual appropriation account, will simplify accounting and budgeting procedures and provides for more efficient utilization of the fund.

INTEREST ON THE PUBLIC DEBT

(Permanent, indefinite)

Program and Financing (in thousands of dollars)

	1963 actual	1964 estimate	1965 estimate
Program by activities			
Payment of interest (cost—obligations) (object class 43)	9,895,304	10,600,000	11,000,000
Financing:			
New obligational authority (appropriation)	**9,895,304**	**10,600,000**	**11,000,000**

Such amounts are appropriated as may be necessary to pay the interest each year on the public debt (31 U.S.C. 711(2) and 732). With the exception of savings bonds and bonds of investment series A of 1965, interest is computed on an accrual basis. Interest on savings bonds and the 1965 investment series is computed on a due and payable basis.

Payment of interest during 1963 was distributed among the following categories (in thousands of dollars):

Marketable	6,756,307
Savings bonds	1,702,595
Special issues	1,291,032
Other nonmarketable issues	145,369

GENERAL PROVISIONS—TREASURY DEPARTMENT

Not to exceed 5 per centum of any appropriation herein made to the Treasury Department for the current fiscal year may be transferred, with the approval of the Bureau of the Budget, to any other appropriation of the Treasury Department, but no appropriation shall be thereby increased by more than 5 per centum, and such transfers shall be reported promptly to the Committees on Appropriations of the Senate and of the House of Representatives.

ATOMIC ENERGY COMMISSION

General and special funds:

OPERATING EXPENSES

For necessary operating expenses of the Commission in carrying out the purposes of the Atomic Energy Act of 1954, as amended, including the employment of aliens; services authorized by section 15 of the Act of August 2, 1946 (5 U.S.C. 55a); hire, maintenance and operation of aircraft; publication and dissemination of atomic information; purchase, repair and cleaning of uniforms; official entertainment expenses (not to exceed $30,000); reimbursement of the General Services Administration for security guard services; hire of passenger motor vehicles; [$2,342,669,000] *$2,323,000,000*, and any moneys (except sums received from disposal of property under the Atomic Energy Community Act of 1955 (42 U.S.C. 2301)) received by the Commission, notwithstanding the provisions of section 3617 of the Revised Statutes (31 U.S.C. 484), to remain available until expended: *Provided*, That of such amount $100,000 may be expended for objects of a confidential nature and in any such case the certificate of the Commission as to the amount of the expenditure and that it is deemed inadvisable to specify the nature thereof shall be deemed a sufficient voucher for the sum therein expressed to have been expended: *Provided further*, That from this appropriation transfers of sums may be made to other agencies of the Government for the performance of the work for which this appropriation is made, and in such cases the sums so transferred may be merged with the appropriation to which transferred: *Provided further*, That no part of this appropriation shall be used in connection with the payment of a fixed fee to any contractor or firm of contractors engaged under a cost-plus-a-fixed-fee contract or contracts at any installation of the Commission, where that fee for community management is at a rate in excess of $90,000 per annum, or for the operation of a transportation system where that fee is at a rate in excess of $45,000 per annum. (*42 U.S.C. 2011, 2017, 2291; Public Works Appropriation Act, 1964; additional authorizing legislation to be proposed.*)

The Atomic Energy Commission procures raw materials; manufactures special nuclear materials and atomic weapons; develops improved weapons; conducts research and development aimed at generation of atomic power; conducts research concerning protection of health against possible hazards arising from atomic energy operations; conducts investigations in the physical and biomedical sciences related to atomic energy, including investigation of controlled thermonuclear reactions; conducts research and development in civilian applications of isotopes and nuclear explosives; establishes and enforces regulations for civilian uses of atomic energy; promotes industrial participation in atomic energy development for peaceful purposes; encourages scientific and industrial progress through the dissemination of atomic energy information; and participates in programs of international cooperation in peaceful applications of atomic energy.

The program is administered through field offices. Most of the AEC activities are carried on in Government-owned facilities by industrial concerns and educational institutions operating under contracts. Coordination with the armed services is achieved through the Military Liaison Committee of the Department of Defense.

Total program costs in 1965 are estimated at $2,377.5 million or $110.9 million less than the estimated 1964 costs of $2,488.4 million, and $51.9 million less than actual costs of $2,429.4 million for 1963. In 1965, increases are provided for: research in the physical and biomedical sciences, the use of isotopes, and for broadening the base of nuclear technology. These increases are more than offset by a reduction in costs for the procurement of uranium concentrates due to the scheduled decline in procurement and anticipated deferrals in domestic procurement deliveries of 4,000 tons until 1967 and 1968 and a reduction in the production of special nuclear materials.

In 1965, total program obligations will be less than program costs, the difference being costs against obligations incurred in prior years. Total program obligations

Digitized for FRASER
https://fraser.stlouisfed.org
Federal Reserve Bank of St. Louis

General and special funds—Continued

OPERATING EXPENSES—Continued

for operating expenses in 1965 are estimated to be $2,359.1 million compared to $2,524.7 million in 1964 and $2,549.4 million in 1963.

The schedule of costs by activity does not include nonbudgetary costs such as depreciation charges, accrued annual leave earned but not taken by AEC employees, the cost of source and special material consumed and sold, etc.; in total, these are as follows: 1963, $313 million; 1964 estimate, $330 million; 1965 estimate, $335 million.

1. *Raw materials.*—Uranium concentrates are procured for processing in the AEC production facilities. In accordance with existing contractual commitments and the anticipated stretchout of deliveries from domestic sources currently being negotiated, 1965 procurement is estimated at 15,677 tons of concentrates, of which 11,625 tons will come from domestic sources. This is a decrease of 2,560 tons from the 18,237 tons estimated to be procured in 1964. Procurement in 1963 was 26,982 tons.

2. *Special nuclear materials.*—Special nuclear materials are produced to meet weapons production schedules and requirements for other programs. Uranium concentrates are processed into feed materials from which plutonium and other products are produced in the reactors at Richland, Wash., and Savannah River, S.C., and the isotope uranium 235 is extracted in plants at Oak Ridge, Tenn., Paducah, Ky., and Portsmouth, Ohio. Production of special nuclear materials will decline in 1965. Work will continue on process improvements to assure continuity and safety of operation and more economical methods of production.

3. *Weapons.*—The weapons program encompasses the production of weapons; the maintenance of stockpiled weapons in a state of constant readiness; the design, development and underground testing of new weapons types; preparation for and maintenance of a short-term readiness capability to resume atmospheric testing; and participation with the Department of Defense in the development of test detection methods.

4. *Reactor development.*—This program includes the development of civilian power reactors leading to reliable and economic power, power and propulsion reactors for a variety of military and space applications, together with research and development on advanced reactor systems, nuclear safety, and general reactor technology. The costs by major category are (in thousands of dollars):

Category:	*1963 actual*	*1964 estimate*	*1965 estimate*
1. Civilian power reactors	77,577	80,000	79,400
2. Cooperative power reactor demonstration program	3,361	14,305	16,000
3. Cooperative program with Euratom	3,686	7,000	5,500
4. Merchant ship reactors	6,398	5,400	2,500
5. Army power reactors	10,687	10,295	9,000
6. Naval propulsion reactors	96,375	96,000	94,700
7. Rocket propulsion reactors (Project Rover)	65,465	90,000	84,000
8. Missile propulsion reactors (Project Pluto)	22,968	14,000	8,000
9. Satellite and small power sources (Project SNAP)	71,117	77,500	73,000
10. General reactor technology	55,561	56,800	60,000
11. Advanced systems research and development	24,515	26,500	29,000
12. Nuclear safety	23,871	28,000	32,000
13. Airplane propulsion reactors	−610	-------	-------
14. Operational services	1,456	2,500	4,800
Total reactor development	462,427	508,300	497,900

The civilian power reactor program establishes a foundation of technical knowledge through a program of research and development on promising reactor concepts; design, fabrication, and operation of power reactor experiments; the development of experimental reactors; and development of conceptual designs for prototype powerplants.

Costs of $16 million will be incurred for the cooperative power reactor demonstration program in which AEC provides financial aid in development of full-scale power reactors built by private utilities and public power bodies. This aid provides a basis for a privately financed nuclear power industry.

The Euratom program provides for research and development under a joint program with the European Atomic Energy Community, for which costs of $5.5 million will be incurred in 1965.

The merchant ship program is carried out in cooperation with the Maritime Administration. In 1965 the experimental operation of the NS *Savannah* will be completed, and this nuclear ship will be turned over to the Maritime Administration for commercial operation.

The Army power reactors program, carried out with the Department of Defense, provides for the development of transportable power reactors for the generation of electric power and heat at remote installations. Effort will continue in 1965 on the development of mobile reactors for field use and reactors for central power use at remote locations.

The naval propulsion reactors program, carried out with the Department of Defense, will be continued in 1965 to provide for the development of propulsion reactors for submarine and surface combatant ships.

The rocket propulsion reactors program (Project Rover) is carried out in cooperation with the National Aeronautics and Space Administration to develop nuclear rocket engines for space application. The program will be reoriented to ground-based research and engineering with deferral of flight objectives.

The missile propulsion reactors program (Project Pluto) is carried out with the Department of Defense to develop nuclear rockets for missile application. Work on developing an experimental reactor for possible application to ramjet propulsion will be essentially completed during 1965, and research and development on higher temperature reactor components will be conducted.

The satellite and small power sources program (Project SNAP) is carried out in cooperation with the Department of Defense, the National Aeronautics and Space Administration, and other Government agencies, to develop nuclear reactors and small power sources for satellites and other special purpose applications. Development of reactor power systems for possible application to large communication satellites, reconnaissance systems, and space probes will be continued.

To provide broad support for developmental reactor projects, AEC conducts research in general reactor technology, which includes general research and development on materials, components, moderators, control techniques, fuel elements, spent fuels reprocessing and waste processing.

The advanced reactor systems research and development program is devoted to the development of experimental reactors and research and development on promising advanced reactor concepts.

In its nuclear safety program, AEC conducts investigations related to nuclear safety problems which have general application. The 1965 estimate provides for

Digitized for FRASER
https://fraser.stlouisfed.org
Federal Reserve Bank of St. Louis

additional work on related engineering field tests on postulated safety problems and on aerospace safety.

The AEC also operates the National Reactor Testing Station in Idaho, including two test reactors which provide irradiation services for the AEC programs. The Advanced Test Reactor (ATR), when completed at Idaho during 1965, will contribute to these irradiation services.

The cost categories in the table above may be recapitulated to indicate approximately the relative efforts placed on central station civilian atomic power applications, outer space applications, military program applications, and all other applications. This comparison is as follows (in thousands of dollars):

	1963 actual	*1964 estimate*	*1965 estimate*
Development and support related primarily to civilian nuclear power	154,964	174,578	172,850
Development and support related primarily to outer space	159,529	192,327	190,050
Development and support related primarily to military program applications	129,420	120,295	111,700
Other reactor development programs	18,514	21,100	23,300
Total reactor development	462,427	508,300	497,900

5. *Physical research.*—This program is directed toward basic and applied research relevant to the Commission's responsibilities for the development, use, and control of nuclear energy. Within this framework investigations are undertaken in the fields of physics, mathematics, chemistry, metallurgy and materials, and controlled thermonuclear research. By major category, the costs are (in thousands of dollars):

Category	*1963 actual*	*1964 estimate*	*1965 estimate*
High energy physics	65,981	81,849	94,500
Low energy physics	26,204	25,373	28,200
Mathematics and computer research	4,417	4,603	5,800
Chemistry research	41,919	43,686	48,300
Metallurgy and materials research	20,146	20,826	23,500
Controlled thermonuclear research (Project Sherwood)	24,166	21,000	21,500
Basic nuclear engineering	-------	-------	200
Total physical research	182,833	197,337	222,000

Research in high energy physics continues to expand as new accelerators, on which construction was initiated in prior years, phase into operation. The increase in low-energy physics is primarily due to the operation of research tools acquired in prior years. Increased work is planned in mathematics and computer-related techniques. Chemistry and metallurgical research are aimed at advancing basic knowledge in these fields of science and developing such knowledge for practical operations of the atomic energy program. Controlled thermonuclear research is directed toward ultimate production of power from the controlled fusion of heavy hydrogen nuclei. Basic nuclear engineering is intended to fill an existing gap between basic scientific research and classical engineering. The work will be done largely in areas which are traditionally treated as engineering problems.

Approximately 75% of the physical research program is conducted at 15 laboratories and installations owned by or operated for the Commission, and the remainder, comprising approximately 600 research projects, is supported in more than 150 universities, colleges, institutes, and independent laboratories.

6. *Biology and medicine.*—Research is conducted on the effects of radiation on living things. It includes investigations of the biological effects of radioactivity in the body and the development of methods for minimizing exposure to radioactive materials of all kinds and for minimizing and protecting against the injurious effects of radiation. Support is given to the development of methods of utilizing radioactive materials for human welfare and for the diagnosis, treatment, and understanding of human diseases, such as cancer. Evaluation of the significance of human exposure to radioactivity from all sources is given special emphasis. Studies being carried out include the measurement of radioactive by-products (including fallout) in the atmosphere, soils, fresh waters, oceans, and biosphere proper. Research provides the basis for establishment of standards to insure that AEC activities are conducted with safety.

The major portion of the research is carried on at 18 laboratories which are owned by or operated for the Commission, and the remainder, comprising approximately 700 off-site research projects, is supported in more than 230 universities, colleges, hospitals and independent laboratories. The program includes the operation of several facilities in the United States devoted to cancer research and, through the National Academy of Sciences, in Japan for the determination of long-term effects of atomic bomb radiation on the affected population.

7. *Training, education and information.*—This activity includes conduct of specialized courses; granting of graduate and postdoctoral fellowships; assistance to colleges and universities, operation of the Puerto Rico Nuclear Center; and dissemination of technical information, including participation in international conferences and exhibits on nuclear science and technology.

Under the fellowship program in 1965, approximately 287 college fellowships, compared to 239 in 1964 and 190 in 1963, will be offered for graduate studies in nuclear science and engineering. In 1965, 116 fellowships will be offered in the fields of radiological physics, industrial hygiene and industrial medicine, which compares to 95 fellowships in these fields in 1964 and 88 in 1963. A proposed program of nuclear traineeships is expected to include 100 participants in fiscal year 1965. Assistance to schools to provide for educational programs in nuclear science and engineering will be continued. Grants are made to universities to help them acquire nuclear training equipment, teaching aids, demonstration apparatus, and special laboratory equipment. University summer and academic year courses in radiobiology are made available to high school and university science teachers. Special training in the nuclear aspects of the engineering, life, and physical sciences for university faculty members is provided.

In order to assist the States in the implementation of Public Law 86–373 (which authorizes the Commission to transfer certain regulatory functions to the States and also authorizes related training activities), training courses and on the job orientation are conducted in radiation safety, radiological health protection, waste disposal, etc., for State and local and government employees. No tuition charges are made for these courses.

To broaden the dissemination of information on matters relating to atomic energy, AEC provides technical information services, maintains libraries, performs translation services, and operates traveling atomic energy exhibits.

Federal Reserve Bank of St. Louis

General and special funds—Continued

OPERATING EXPENSES—Continued

AEC arranges for nuclear exhibits at selected foreign conferences and exhibitions in order to demonstrate U.S. technology. The program includes funds for AEC participation in the third international (Geneva) conference on peaceful uses of atomic energy scheduled in September 1964.

8. *Civilian applications of isotopes and nuclear explosives—Isotopes.*—This program provides the new technology necessary for developing uses of radioisotopes and high level radiation. Continuing research is done to develop economic uses of fission product wastes arising from nuclear reactor operation. Effort is also directed to development of nuclear technology for solution of problems in meteorology, seismology, control of environmental pollution, water resources development, and food pasteurization. An increasingly important area is the development of isotopic power and heat sources for space and terrestrial needs.

Nuclear explosives.—This program (Plowshare) provides for the investigation and development of peaceful uses for nuclear explosives. Current emphasis is on the development and testing of "clean" devices for use in large scale earth moving projects and of high flux devices for future use in scientific experiments.

9. *Communities.*—Although legislation has been enacted to terminate Government ownership of the town of Los Alamos, N. Mex., over a period of the next few years, the program estimate of $9 million includes $6.7 million for the Los Alamos community of which $200 thousand is for assistance to the hospital and $6.5 million is for operation of the town because the Atomic Energy Commission will continue to operate the community through 1965. The remaining $2.3 million is for assistance payments to the former Atomic Energy Commission communities of Oak Ridge, Tenn., and Richland, Wash., in accordance with the Atomic Energy Community Act of 1955, as amended. Operating revenues at Los Alamos (budgeted under revenues applied) are estimated at $5.2 million.

10. *Program direction and administration.*—This program includes the salaries and other costs for employees of the Federal Government engaged in executive direction, general management, and technical supervision of the atomic energy program; the negotiation and administration of contracts; establishment and enforcement of regulations for civilian uses of atomic energy; and other related administrative activities. Employees under this program are located in the Washington headquarters and in field offices. The 1965 increase of $4.2 million is related principally to costs for the increase in average employment, which provides for full-year employment at the June 30, 1964, level; for scientific and management training programs; and for the provisions of the Postal Service and Federal Employees Salary Act of 1962, Public Law 87–793. No increase in staff is provided in 1965.

11. *Security investigations.*—The Atomic Energy Act of 1954 requires background investigations of those persons proposed for access to restricted data of the atomic energy program. The number of full background investigations to be requested in 1965 is estimated at 19,353 compared with 19,750 for 1964 and 19,753 for 1963.

12. *Cost of work for others.*—In furthering the objectives of the Atomic Energy Act of 1954 concerning utilization of atomic energy for peaceful purposes, AEC furnishes materials and services, apart from those which it provides normally for its own basic programs, to industrial organizations and other private parties. Costs for these are incurred only upon the request of others. Charges made for such products and services are reflected in the budget under advances and reimbursements from non-Federal sources (revenues applied) and are applied as a source of funds, thereby reducing the amount of appropriations required. The items included are (in thousands of dollars):

	1963 actual	*1964 estimate*	*1965 estimate*
Cost of products sold	3,498	4,480	3,850
Cost of services performed	2,074	1,320	1,250
Total costs (excluding depreciation)	5,572	5,800	5,100
Related revenue	7,314	7,760	6,700
Excess of revenue over related funded costs	1,742	1,960	1,600

Advances and reimbursements from non-Federal sources (revenues applied).—This item, shown as a source of financing on the program and financing schedule, reduces appropriation requirements and is obtained from services performed; the sale and lease of products, including sale and lease of nuclear materials produced as a part of the Commission's own basic program; the operation of AEC-owned communities and housing; the sale of special reactor materials; and products and services for which costs are incurred only upon the request of others and are included under Cost of work for others. The items included are (in thousands of dollars):

	1963 actual	*1964 estimate*	*1965 estimate*
Income from products sold and services performed the costs of which are included in program costs of current or prior years:			
Sale of source and special nuclear materials and related products	4,298	4,250	3,500
Income from lease of materials, consumption charges for special nuclear materials and interest on deferred sale of materials	9,824	10,299	13,885
Income from recovery of irradiated source and special material	604	670	1,600
Income from sale of steam	2,635	1,040	2,900
Income from research hospitals	427	400	400
Income from training, education, and information	207	190	220
Income from communities	5,973	5,595	5,201
Miscellaneous income	1,353	1,370	1,660
Subtotal	25,321	23,814	29,366
Income from other products sold and services performed, cost of which are incurred at request of others and included under Cost of work for others:			
Products sold	4,760	6,090	5,090
Services performed	2,554	1,670	1,610
Subtotal	7,314	7,760	6,700
Total, Advances and reimbursements from non-Federal sources (revenues applied)	32,635	31,574	36,066

New obligational authority (appropriation)	**262,745**	**400,000**	**370,000**

This appropriation provides for the construction of plants and facilities and for the acquisition of capital equipment, all required for the production, research and development, and supporting programs of the Atomic Energy Commission. Of the new obligational authority of $370 million being requested for 1965, $151.3 million applies to new construction projects; $28.9 million is applicable to construction projects previously authorized by the Congress; and $189.8 million is required for the acquisition of capital equipment not related to construction.

1. *Raw materials.*—This activity provides for minor construction to support the Government-owned procure-

General and special funds—Continued

PLANT AND CAPITAL EQUIPMENT—Continued

ment installations and for procurement of capital equipment necessary to support the operating program. Obligational requirements of $70 thousand in 1965 includes $45 thousand for new construction projects and $25 thousand for capital equipment not related to construction.

2. *Special nuclear materials.*—This activity provides for additions, modifications, and improvements to the feed materials plants, the gaseous diffusion plants, and the production reactor installations, and for procurement of capital equipment necessary to support the operating program. Obligational requirements of $41.9 million in 1965 include $19.9 million for new construction projects and $22 million for capital equipment not related to construction.

3. *Weapons.*—This activity provides for construction and modification of weapons production, development and testing facilities and for procurement of capital equipment to support the operating program. Obligational requirements of $118.8 million in 1965 include $46.1 million for new construction projects and $72.7 million for capital equipment not related to construction.

4. *Reactor development.*—This activity provides for the construction of laboratory buildings for fundamental engineering work on reactor concepts and materials; facilities for the housing of reactor experiments; civilian power experimental reactors generating electrical energy or producing over 10,000 kilowatts of heat; and development and test installations. It also provides for procurement of capital equipment necessary to support the operating program. Obligational requirements of $78 million in 1965 include $30.6 million for construction projects and $47.4 million for capital equipment not related to construction. Major construction projects include a power burst facility for the nuclear safety program, a zero power plutonium reactor for the civilian power program, and test facilities for Project Rover.

5. *Physical research.*—This activity provides for construction of large research machines, laboratory buildings and associated support facilities, and for procurement of capital equipment necessary to support the operating program. It includes modification and improvement of ultra-high-energy particle accelerators in the multibillion electron-volt range, which will assist in obtaining new knowledge about the atomic nucleus and the elementary particles. Obligational requirements of $107.7 million in 1965 include $43.9 million for new construction projects, principally for a large research reactor at Argonne National Laboratory, other laboratory facilities to house various research efforts, and for accelerator improvements. The estimate includes $24 million for the previously authorized Stanford linear electron accelerator and $400 thousand for the University of Chicago physics building authorized in 1962. Also included is $39.4 million for capital equipment not related to construction.

6. *Biology and medicine.*—This activity provides for construction of facilities for biomedical research in atomic energy and for procurement of capital equipment to support the operating program. Obligational requirements of $11.5 million in 1965 include $6.9 million for new construction projects, principally for a co-carcinogenesis research laboratory at Oak Ridge National Laboratory and a biomedical and animal laboratory at Lawrence Radiation Laboratory, and $4.6 million for capital equipment not related to construction.

7. *Training, education, and information.*—This activity provides for construction in connection with the AEC training program, and for procurement of capital equipment to support the operating program. Obligational requirements of $750 thousand in 1965 include $90 thousand for new construction and $660 thousand for capital equipment not related to construction.

8. *Civilian applications of isotopes and nuclear explosives—Isotopes.*—This activity provides for the procurement of capital equipment not related to construction required for research and development directed toward beneficial utilization of isotopes. Obligational requirements in 1965 total $1.9 million.

Nuclear explosives.—This activity provides for procurement of capital equipment not related to construction for use in the investigation and development of peaceful uses for nuclear explosives. Obligational requirements in 1965 total $400 thousand.

9. *Communities.*—This activity provides for improvements and additions to community facilities at Los Alamos, N. Mex., and for procurement of capital equipment to support the operating program. Obligational requirements of $5.3 million in 1965 include $2.2 million for new construction projects, $3 million for construction previously authorized in connection with disposal of the Los Alamos, N. Mex. community, and $90 thousand for capital equipment not related to construction.

10. *Administrative.*—This activity provides for improvements and modifications of administrative facilities at the Commission headquarters in Germantown, Md., and for procurement of capital equipment to support the operating program. Obligational requirements of $757 thousand in 1965 include $90 thousand for new construction projects and $667 thousand for capital equipment not related to construction.

11. *Construction planning and design.*—This activity provides for advance architect-engineer work to develop precise information on the characteristics of proposed projects and the development of sound and reliable estimates of cost prior to proposing such projects for authorization.

The costs to this appropriation and the financing of these projects are analyzed in the following table.

GENERAL PROVISIONS

Any appropriation available under this or any other Act to the Atomic Energy Commission may initially be used subject to limitations in this Act during the fiscal year [1964] *1965* to finance the procurement of materials, services, or other costs which are a part of work or activities for which funds have been provided in any other appropriation available to the Commission: *Provided*, That appropriate transfers or adjustments between such appropriations shall subsequently be made for such costs on the basis of actual application determined in accordance with generally accepted accounting principles.

Not to exceed 5 per centum of appropriations made available for the fiscal year [1964] *1965* for "Operating expenses" and "Plant and capital equipment" may be transferred between such appropriations, but neither such appropriation, except as otherwise provided herein, shall be increased by more than 5 per centum by any such transfers, and any such transfers shall be reported promptly to the Appropriations Committees of the House and Senate.

No part of any appropriation herein shall be used to confer a fellowship on any person who advocates or who is a member of an organization or party that advocates the overthrow of the Government of the United States by force or violence or with respect to whom the Commission finds, upon investigation and report by the Civil Service Commission on the character, associations, and loyalty of whom, that reasonable grounds exist for belief that such person is disloyal to the Government of the United States: *Provided*, That any person who advocates or who is a member of an organization or party that advocates the overthrow of the Government of the United States by force or violence and accepts employment or a fellowship the salary, wages, stipend, grant, or expenses for which are paid from any appropriation contained herein shall be guilty of a felony and, upon conviction, shall be fined not more than $1,000 or imprisoned for not more than one year, or both: *Provided further*, That the above penal clause shall be in addition to, and not in substitution for, any other provisions of existing law. (*42 U.S.C. 2011, Public Works Appropriation Act, 1964.*)

FEDERAL AVIATION AGENCY

The functions of the Federal Aviation Agency include (a) encouraging and fostering the development of civil aeronautics and air commerce in the United States and abroad; (b) managing the use of navigable airspace and regulating both civil and military air operations; (c) installing and operating aids to air navigation and traffic control for civil and military aircraft; (d) conducting research to develop new and improved facilities and techniques to modernize the airways systems; (e) conducting medical research on human factors which directly affect safety in civil aviation; (f) certifying the competency of airmen and the airworthiness of aircraft; (g) developing standards and rules designed to promote safety; and (h) administering grants for airport construction.

General and special funds:

OPERATIONS

For necessary expenses of the Federal Aviation Agency, not otherwise provided for, including administrative expenses for research and development and for establishment of air navigation facilities, and carrying out the provisions of the Federal Airport Act; not to exceed $10,000 for representation allowances and for official entertainment; purchase of [ten] *twenty-three* passenger motor vehicles, including [nine] *sixteen* for replacement only [and one at a cost not to exceed $6,100]; and purchase and repair of skis and snowshoes; [$528,000,000:] *$549,000,000: Provided,* That total costs of aviation medicine, including equipment, for the Federal Aviation Agency, whether provided in the foregoing appropriation or elsewhere in this Act, shall not exceed [$6,073,600] *$6,344,000* or include in excess of 406 positions: *Provided further,* That there may be credited to this appropriation, funds received from States, counties, municipalities, other public authorities, and private sources, for expenses incurred in the maintenance and operation of air navigation facilities. (*49 U.S.C. 1301 et seq.; 49 U.S.C. 1151–1160; 50 U.S.C. a–c and App. 1622(g); Convention on International Civil Aviation, 61 Stat. 1180; Convention on International Recognition of Rights in Aircraft, 4 U.S.T. 1830, 1953; Executive Order 11,048 and related regulations (27 F.R. 8887; 8855), and 10 U.S.C. 4655; Independent Offices Appropriation Act, 1964.*)

Program and Financing (in thousands of dollars)

Appropriation (adjusted)	488,187	527,864	549,000

1. *Operation of traffic control system.*—This activity covers the operation on a daily 24-hour basis of a national system of air traffic management in the United States and its possessions. With the aid of radar, communications, and other facilities, traffic management personnel at 31 centers monitor and control en route flights of civil and military aircraft conducted under instrument conditions to assure safety and to expedite the flow of traffic. Control towers are operated at 276 major civil airports to guide traffic movements on and in the vicinity of the airports. Some 349 domestic and international flight service stations transmit weather and other information to pilots and relay traffic control data between ground controllers and pilots. Increases in 1965 are for operating newly commissioned air traffic control facilities procured and installed with funds appropriated under Facilities and equipment and for authorized civilian pay increases.

TRENDS IN VOLUME OF AIR TRAFFIC

	Landings and takeoffs at airports with FAA towers (in millions)	*Instrument operations at airports with FAA traffic control service* (in millions)	*General aviation hours flown* (in millions)	*Revenue passenger miles* (in billions)
1959	26.8	6.3	11.9	33.3
1960	26.4	6.4	12.1	38.1
1961	25.6	6.2	12.6	38.8
1962	27.4	6.8	13.3	42.5
1963	29.2	7.0	13.9	45.9
1964 estimate	29.9	7.3	14.7	49.1
1965 estimate	31.0	7.6	15.4	52.4

2. *Facility installation and technical support.*—This activity covers the direction and engineering services related to the establishment and improvement of facilities in the traffic control system; procurement, contracting, and materiel management programs; supply support and leased communications services for the traffic control system; and supply support for Agency aircraft except for aircraft used in research and development programs. Major increases in 1965 are to provide supply support and leased communications services for new air traffic control and navigation facilities.

3. *Maintenance of traffic control system.*—This activity covers the technical operation and maintenance of a national network of air navigation and traffic control aids in the United States and its possessions. Major increases in 1965 are for maintenance of newly commissioned air traffic control and navigation aids, assumption of maintenance responsibility of certain joint use military radar facilities used in the control of civil air traffic, and for authorized civilian pay increases.

4. *Administration of flight standards.*—This activity covers establishment and enforcement of civil air regulations which are designed to assure the high standards of safety in aviation. Inspections are made and certificates issued for aircraft, airmen, aircraft operators, and air agencies that meet safety or competency requirements. Facility flight inspection functions and management and maintenance of Agency aircraft are also included in this activity.

5. *Administration of medical standards.*—This activity covers development of regulations governing the physical and mental fitness of airmen and other persons whose health affects safety in flight, health and medical pro-

OPERATIONS—Continued

grams for Agency personnel, administration of an aviation medical research program, the project costs of which are financed under Research and development; and the operation of the Civil Aeromedical Research Institute building.

6. *Research direction.*—This activity covers direction and administrative costs of the research and development program, the direct project costs of which are financed under the Research and development appropriation; and administrative support for the operation of the National Facilities Experimental Center at Atlantic City, N.J.

7. *Administration of airport program.*—This activity includes costs of preparing the annual National airport plan; development of airport planning, design and construction standards; planning and engineering advisory services; administration of the Federal-aid airport program; assuring compliance of public agencies with the provisions of agreements relating to airports; and promoting airport safety.

Program and Financing (in thousands of dollars)—**Continued**

	1963 actual	1964 estimate	1965 estimate
Financing:			
Unobligated balance brought forward	−144,024	−182,808	−126,248
Unobligated balance carried forward	182,808	126,248	74,072
New obligational authority (appropriation)	**125,000**	**100,250**	**75,000**

Under this appropriation, the Federal airways system is being improved by the installation of new equipment and the construction and modernization of facilities. The appropriation also finances major capital items required by other agency programs such as aircraft for facility flight inspection and experimental facilities for the research and development program. The 1965 estimate will carry forward the program to increase the capacity of the airways system and to make its operations more efficient and safe. Operating costs of facilities procured under this appropriation are financed by the appropriation entitled Operations.

1. *Air traffic control centers.*—(a) *Long-range radar* aids en route air traffic control by displaying aircraft positions at distances up to 185 miles. (b) *Automation equipment* covers computers and other devices which aid controllers in handling air traffic. (c) *Other center facilities* cover the installation of equipment to provide the required communications and additional services.

2. *Airport traffic control towers.*—(a) *Terminal area radar* aids traffic control in the vicinity of airports by displaying aircraft positions at distances up to 60 miles. (b) *Other tower facilities* cover the establishment, improvement, and relocation of airport traffic control tower facilities.

3. *Flight service stations.*—*Domestic* and *international* flight service stations include the structures, communications, and other equipment used to relay traffic control information and to provide other flight assistance to pilots.

4. *Air navigation facilities.*—(a) *VORTAC* covers the installation of standard short-range navigation aids which define airways and routes and provide pilots distance and direction. (b) *Low/medium frequency facilities* include radio beacons and ranges which provide pilots with direction information and define certain airways. (c) *Instrument landing systems* cover the installation of electronic devices which provide pilots with direction, distance, and glide slope information for making approaches to runways under poor visibility conditions. (d) *Approach lighting systems* cover the installation of lighting to assist the pilot making final approaches to airport runways. (e) *Intermediate fields* are emergency landing areas provided on certain air routes in areas where public airports are not available.

5. *Aircraft and related equipment.*—(a) *Facility flight inspection* covers aircraft and avionics equipment to flight inspect the accuracy and other characteristics of navigation and traffic control aids.

(b) *Training* covers aircraft used to provide flight training and to maintain the proficiency of operations inspectors. (c) *Research support* covers aircraft used in research, experimentation, development and test of navigation aids and other airways equipment. (d) *Other* aircraft are used to provide logistic support for remote facilities, for use by Agency officials, and for other Agency functions.

6. *Research, test, and evaluation facilities.*—This activity supports the acquisition of equipment for general purpose use in the research and development program, construction and improvement of facilities at the National Aviation Facilities Experimental Center (NAFEC) and purchase of pre-production prototype models of equipment for operational evaluation. These facilities will be installed at a field site for operational evaluation and will remain as a capital investment in the operating system.

7. *Housing, utilities, and miscellaneous facilities.*—This includes support facilities and items not covered elsewhere.

The following table lists the major facilities already funded and those budgeted in 1965:

	Funded			
	Through 1963	*In 1964*	*Proposed 1965*	*Total through 1965*
Alpha-numeric displays on radar scopes (centers)	0	0	10	10
Alpha-numeric displays on radar scopes (towers)	0	0	3	3
Air traffic control towers	296	7	8	311
Terminal VOR facilities	91	30	0	121

GRANTS-IN-AID FOR AIRPORTS (PERMANENT)

Program and Financing (in thousands of dollars)

	1963 actual	1964 estimate	1965 estimate
Program by activities:			
Grants for construction of airports (total obligations) (object class 41)	65,182	82,004	30,000
Financing:			
Unobligated balance brought forward	−33,186	−43,004	−36,000
Unobligated balance carried forward	43,004	36,000	6,000
New obligational authority (appropriation, permanent)	**75,000**	**75,000**	

Under the Federal Airport Act, grants are made to public agencies to aid the development and improvement of public airports. These grants generally cover 50% of project costs and are limited to facilities deemed essential under the criteria of safety, convenience, and efficiency. Contract authorizations were provided for this program through 1961. These authorizations together with the appropriations to liquidate obligations incurred under the authorizations are reflected in the schedules for Grants-in-aid for airports (liquidation of contract authorization).

Public Law 87–255 amended the Federal Airport Act to provide additional appropriation authorizations of $75 million for each of the years 1962, 1963 and 1964. This account covers appropriations authorized under that act as well as appropriations of prior years, beginning with fiscal year 1962.

A proposed supplemental appropriation of $75 million for 1965 will be separately transmitted.

The following table summarizes activity under both the contract authority and the new program which is funded by direct appropriations (dollars in millions):

	1947 through 1963 actual	*1964 estimate*	*1965 estimate*
Airports having projects in program	1,766	452	455
Total projects in program	5,385	452	455
Projects financially completed	3,999	250	300
Grant funds	$740.1	$75.0	$75.0
Grant obligations	$693.6	$85.3	$80.0
Federal expenditures	$552.6	$75.3	$75.7

Proposed for separate transmittal:

GRANTS-IN-AID FOR AIRPORTS

Program and Financing (in thousands of dollars)

	1963 actual	1964 estimate	1965 estimate
Program by activities:			
Grants for construction of airports (total obligations) (object class 41)	----------	----------	50,000
Financing:			
Unobligated balance carried forward	----------	----------	25,000
New obligational authority (proposed supplemental appropriation)	----------	----------	**75,000**

Under proposed legislation.—Legislation has been submitted to Congress to continue the program of grants-in-aid for the construction and improvement of public airports. The legislation would provide appropriation authorizations of $75 million for each of the years 1965, 1966, and 1967. In line with the procedures contemplated by the 1961 Federal Airport Act amendments, the proposed authorization of $75 million for 1965 will be separately transmitted for inclusion in a 1964 supplemental appropriation act. In addition, an appropriation estimate for the proposed 1966 authorization of $75 million will be separately transmitted.

GRANTS-IN-AID FOR AIRPORTS (LIQUIDATION OF CONTRACT AUTHORIZATION)

For liquidation of obligations incurred under authority granted in the Act of August 3, 1955 (69 Stat. 441), to enter into contracts, [$20,000,000,] *$7,000,000,* to remain available until expended. (*49 U.S.C. 1101–1106; 1108–1119; Independent Offices Appropriation Act, 1964.*)

Program and Financing (in thousands of dollars)

	1963 actual	1964 estimate	1965 estimate
Program by activities:			
Grants for construction of airports (total obligations) (object class 41)	10,098	3,272	----------
Financing:			
Unobligated balance brought forward (contract authorization)	−13,370	−3,272	----------
Unobligated balance carried forward (contract authorization)	3,272	----------	----------
New obligational authority (contract authorization)	----------	----------	----------

Status of Unfunded Contract Authorization (in thousands of dollars)

Unfunded balance brought forward	47,000	27,000	7,000
Unfunded balance carried forward	−27,000	−7,000	----------
Appropriation to liquidate contract authorization	**20,000**	**20,000**	**7,000**

The Federal Airport Act, as amended in 1955, provided for contract authorization of $42.5 million for 1956 and $63 million for each of the succeeding years 1957 through 1961. These authorizations continued a program of grants to public agencies to assist them in the development and improvement of a national system of airports to serve civil aviation. It is estimated that an appropriation of $7 million will be required for 1965 to liquidate obligations incurred under these contract authorizations.

Public Law 87–255, approved September 20, 1961, and subsequent authorizations provide for funding of grants through direct appropriations rather than contract authority. Appropriations proposed pursuant to these authorizations are shown under heading Grants-in-aid for airports. The narrative statement for that account includes data on the total airport grant program financed by both contract authorization and direct appropriations.

RESEARCH AND DEVELOPMENT

For expenses, not otherwise provided for, necessary for research, development, and service testing in accordance with the provisions of the Federal Aviation Act (49 U.S.C. 1301–1542), including con-

The Federal Aviation Agency carries out a program to improve and modernize the national system of aviation facilities through the development of new systems, procedures, and devices. The Agency also carries out a program of medical research to aid in the development of rules and regulations governing the certification of airmen and to assure aviation safety.

Research and development is conducted through contracts with private firms, universities, and individuals, or by Agency staff or by other Government agencies and data, procedures, or equipment resulting from this program are tested and evaluated to determine their potential value in meeting air traffic control and navigation needs.

1. *Air traffic control.*—This provides for improving the airways system by applying existing technology to air traffic control problems and by long-range research and development to meet future needs. Studies of present airways system operations and future requirements and work in the fields of data processing and display, data acquisition, and communications are included.

2. *Navigation.*—This provides for modernization, expansion, and improvements of the common system navigation facilities in the United States and in overseas areas where international agreements require U.S. participation. Work in the fields of landing systems, short- and long-distance navigation, and flight inspection are included.

3. *Aviation weather.*—This provides for a program, coordinated with the Departments of Defense and Commerce, to develop devices and improve techniques for the communication and display of weather information to aviation users. The effects of weather on air traffic management techniques and systems are also analyzed.

4. *Aircraft safety.*—This activity provides for a program, coordinated with the Department of Defense and the National Aeronautics and Space Administration, to study, research, develop, and evaluate devices to enhance the safety of aircraft by providing a sound basis for airworthiness standards and safety regulations.

5. *Airports.*—This provides for research and experimentation in airport design, and the development and test of airport equipment.

6. *Aviation medicine.*—This provides for aeromedical research directed toward identification and elimination of physical, physiological, and psychological factors which affect safety in flight.

New obligational authority (appropriation)	**3,475**	**3,582**	**3,631**

[1] Selected resources as of June 30 are as follows:

	1962	*1963*	*1964*	*1965*
Stores	119	118	100	100
Unpaid undelivered orders	592	535	320	292
Accrued annual leave	−63	−51	−50	−50
Total selected resources	648	602	370	342

This appropriation finances management, operations, protection and capital outlay costs for equipment and maintenance projects for the Washington National Airport. Major construction projects are financed under the appropriation Construction, Washington National Airport. The 1965 estimate provides for slightly increased levels of facility maintenance and servicing.

Direct operating costs and capital outlays of the Airport are financed by direct appropriations. Revenues for services to tenants and other users are deposited in the U.S. Treasury.

The following statements reflect financial results of the total operations including computation of unfunded depreciation and interest on a basis comparable to that used by other major commercial airports, and total actual revenue together with amounts representing the value of services furnished other Government agencies for which no collections are made. This unrealized revenue includes landing fees for Government aircraft and rental charges for office and hangar space used by Government agencies.

Operations at Washington National Airport reflect a profitable position despite increased costs resulting from the expansion and modernization program commenced in 1961. This is largely due to the adoption of new schedules of rates and charges commensurate with additional services and improved facilities.

This appropriation finances management, operation, and protection expenses together with capital costs for equipment and minor maintenance projects at the federally owned Dulles International Airport. Major construction projects are financed under the appropriation Construction, Dulles International Airport.

Direct operating costs and capital outlays for the airport are financed by direct appropriations, with revenues received for services to tenants and other users deposited in the U.S. Treasury. The following statement reflects the anticipated result of operations, including the computation of unfunded depreciation and interest on all assets on a basis comparable to that used by other major commercial airports.

Although the financial statements reflect deficits during the next few years, the rate structure at the airport is on a basis that will assure the recovery of operating costs, interest expenses, and an appropriate return on the Government's investment during the airport's useful life.

Federal Reserve Bank of St. Louis

economically feasible. Late in 1963 the President recommended to the Congress that development of the aircraft be undertaken. The Federal Aviation Agency was designated to supervise the development program. The program was presented to Congress early in 1964 and an initial design competition is now underway among airframe and engine manufacturers.

GENERAL PROVISIONS

During the current fiscal year applicable appropriations to the Federal Aviation Agency shall be available for the Federal Aviation Agency to conduct the activities specified in the Act of October 26, 1949, as amended (5 U.S.C. 596a), under determinations and regulations by the Administrator of the Federal Aviation Agency; maintenance and operation of aircraft; hire of passenger motor vehicles and aircraft; and uniforms, or allowances therefor, as authorized by the Act of September 1, 1954, as amended (5 U.S.C. 2131).

Money *hereafter* recovered from the pool and fountain at Dulles International Airport shall not be subject to the Act of June 30, 1949, as amended (40 U.S.C. 484m, 485a), and may be given to a nonprofit organization which, in the determination of the Administrator of the Federal Aviation Agency, promotes and provides for the welfare of travelers in air commerce. (*5 U.S.C. 596a; 5 U.S.C. 2131; Independent Offices Appropriation Act, 1964.*)

ALLOCATIONS RECEIVED FROM OTHER ACCOUNTS

Note.—Obligations incurred under allocations from other accounts are included in the schedules of the parent appropriations as follows:
Office of Emergency Planning, "Civil defense and defense mobilization functions of Federal agencies."
Office of Education, "Payments to school districts."
Funds appropriated to the President, "Transitional grants to Alaska."
National Park Service:
"Construction."
"Construction, Liquidation of Contract Authorization."

Intragovernmental funds:

"Payments, public buildings purchase contracts"	290		
"Allowances and office facilities for former Presidents"	10		
Transferred (5 U.S.C. 630d) from—			
"Contribution to the postal fund," Post Office	72		
"Management and protection," National Park Service		47	
"Maintenance and rehabilitation of physical facilities," National Park Service		25	
Appropriation (adjusted)	**193,786**	**219,122**	**224,895**

[1] Includes capital outlay as follows: 1963, $608 thousand; 1964, $550 thousand; 1965, $550 thousand. Excludes adjustment of prior year costs—$5 thousand.

[2] Selected resources as of June 30 are as follows: Unpaid undelivered orders 1962, $514 thousand (1963 adjustments, −$81 thousand); 1963, $589 thousand; 1964, $648 thousand; 1965, $648 thousand.

This appropriation provides for the basic real property operations of General Services Administration, including acquisition, operation, maintenance, protection and utilization of general-purpose buildings and space; and for overall direction of buildings design, construction, repair and modernization.

The appropriation request for 1965 of $224,895 thousand is a net increase of $2,451 thousand above a comparable amount of $222,444 thousand for 1964. The 1964 amount includes proposed transfers of $7,175 thousand for costs of expansion space acquired in 1963 and 1964, not provided for in GSA's 1964 budget, $1,984 thousand to finance existing leases of other agencies transferred to GSA in 1964, and $72 thousand for operation of the Roosevelt Library, Hyde Park, N.Y. Also included is an estimate of $2,338 thousand proposed for separate transmittal for full-year costs of 1963 wage board rate increases effected between September 16, 1962, and June 30, 1963. The request for 1965 includes $105 thousand for full-year costs of wage board increases effected July 1 through September 14, 1963, but does not include increases effected subsequent to September 14, 1963.

The net increase of $2,451 thousand provides primarily for management and operation of new Federal buildings scheduled for occupancy in 1964 and 1965; increased rental rates and utility costs; full-year costs of rent and operation of additional leased space acquired during 1964 for other agencies with funds transferred from those agencies to cover the part-year costs; increase in space management to carry out objectives of Executive Order 11035; offset by credits for space released due to new construction.

Continuing the policy established in 1962, fund requirements are not included in this estimate for the rental and operation of additional leased space to be acquired during 1965 to support expanding programs of Federal agencies of the executive branch, but are included in estimates of the other agencies.

Fair value of property received from other appropriations or funds without cost for use by GSA (in thousands of dollars):

	1963 actual	*1964 estimate*	*1965 estimate*
Real property	15,459	30,571	6,534
Personal property	304	163	168

1. *Buildings management.*—This activity provides for rental, operation, protection, and utilization of Government-owned and leased space, as indicated in the following table (in thousands):

AVERAGE NET SQUARE FEET

	1962 actual	*1963 actual*	*1964 estimate*	*1965 estimate*
Government-owned space	69,247	71,768	77,467	81,815
Leased space	24,018	26,365	30,321	29,637

The net increase for 1965 of $1,859 thousand over the comparable amount for 1964 is composed generally of increases in Government-owned space and increased cost of leased space, offset by decreases in operation of communication facilities, moving, etc. This net increase is composed of the following: Operation and protection of Government-owned space, $7,224 thousand; rental, operation and protection of leased space, $528 thousand; offset by decreases in moving, alterations and furniture, $120

OPERATING EXPENSES, PUBLIC BUILDINGS SERVICE—Continued

thousand; temporary space and moving costs incident to new buildings, $310 thousand; and operation of communications facilities, $5,463 thousand.

2. *Space management.*—This activity provides for (a) acquisition of real property by lease, purchase, exchange, or donation, and management of building sites pending construction; (b) assignment and reassignment of Government-owned and leased space; and (c) determination of Federal space requirements and the development of programs and projects.

3. *Design and construction.*—This activity provides for a small staff responsible for overall direction of programs involving design, construction, and remodeling of Federal buildings.

4. *Program planning.*—This activity provides technical guidance for Public Buildings Service real property programs in program planning, management, information systems, analysis and evaluation, and policy development.

[1] Selected resources as of June 30 are as follows: Unpaid undelivered orders, 1962, $30,256 thousand (1963 adjustments, −$239 thousand); 1963, $31,470 thousand; 1964, $34,778 thousand; 1965, $41,228 thousand.

This appropriation provides for maintaining, repairing, remodeling, improving and other alterations in federally owned buildings under the jurisdiction of the General Services Administration for these purposes, except extensions and conversions estimated to cost $200 thousand or more. The budget for 1965 provides for continuation of the long-range program initiated in 1957 to alleviate deterioration and obsolescence of buildings which adversely affect efficient operations of occupying agencies.

Fair value of personal property received from other appropriations or funds without cost for use by GSA is as follows: 1963, $24 thousand; 1964, $26 thousand; 1965, $26 thousand.

Federal Reserve Bank of St. Louis

1. *Maintenance repair and small improvements.*—Normal needs for day-to-day repairs and minor improvements and renovations to buildings and equipment are programed at a rate of about $0.22 per net square foot for general purpose and $0.08 per net square foot for warehouse-type space.

2. *Major repairs and improvements.*—Elimination of major obsolescence and deterioration of buildings is provided by bringing the properties up to modern standards of usefulness. It is estimated that about 26% of this work will be capital improvements.

3. *Air conditioning.*—Improvements in working conditions are provided for occupants of buildings located in areas of high temperature and humidity. Since only new installations are included under this activity all costs are considered capital improvements.

4. *Program direction.*—Overall direction and program development are provided under this activity. Except for a nominal sum required for purchases of office equipment and furniture the total amount is considered to be operating costs.

REAL PROPERTY ACTIVITIES—Continued

General and special funds—Continued

CONSTRUCTION, PUBLIC BUILDINGS PROJECTS—Continued

The recommended appropriation for 1965 of $169,613 thousand provides for 151 new projects and one increase and reflects a credit of $840 thousand for three projects which have been otherwise provided for or abandoned.

1. *Construction.*—The estimate provides for 149 new projects and one increase in the net amount of $163,393 thousand.

2. *Extension and conversion.*—The estimate includes $420 thousand for the conversion and remodeling of a post office and Federal office building at Provo, Utah.

3. *Acquisition of buildings.*—The estimate includes $5,800 thousand for the purchase of a warehouse facility at Franconia, Va., now under lease.

New obligational authority (appropriation)			**30,500**	**40,000**	**29,500**				

[1] Selected resources as of June 30 are as follows: Unpaid undelivered orders, 1962, $12,851 thousand; 1963, $21,185 thousand; 1964, $28,685 thousand; 1965, $30,685 thousand.

This appropriation provides for preliminary planning of public buildings, acquisition of sites, preparation of drawings and specifications, supervision of construction, and related costs incident to projects approved under the Public Buildings Act of 1959. Costs for improvements are financed from Construction, public buildings projects.

The estimate of $29.5 million for 1965 provides $16.1 million for the acquisition of sites, $11.8 million for design and supervision, and $1.6 million for program development and administrative operations support.

1. *Site acquisition.*—Acquisition of sites, including cost of appraisals.

2. *Design and supervision.*—Preparation of drawings and specifications, by contract or otherwise; technical services; soil surveys and tests; reproduction of plans and specifications; and supervision of construction, by contract or otherwise.

4. *Program development.*—Preliminary planning and development of projects, by contract or otherwise, and program direction, not distributed to specific projects.

Improvements of private hospital facilities in the District of Columbia are made under legislation authorizing appropriation of $41,105 thousand.

1. *Construction.*—Under appropriations of $23,410 thousand a new hospital center was physically completed and occupied during 1958.

2. *Grants.*—Under appropriations of $17,695 thousand, grants totaling $17,369 thousand will have been approved for private agencies in the District of Columbia for improving existing hospital facilities on which building costs are estimated at $43,388 thousand. A contract for construction of the Greater Southeast Community Hospital was awarded in August 1963 at a total estimated cost of $9,188 thousand, of which $3,375 thousand will be financed from appropriations under this head. This will complete the present grant program.

Approximately $7,800 thousand is to be reimbursed by the District of Columbia over a period of years.

ALLOCATIONS RECEIVED FROM OTHER ACCOUNTS

Note.—Obligations incurred under allocations from other appropriations are shown in the schedules of the parent appropriations, as follows:

Legislative: Library of Congress, "Salaries and expenses," "Government Printing Office revolving fund."
Executive Office of the President: "Public works acceleration."
Funds appropriated to the President: Agency for International Development: "Foreign currency surplus agriculture commodities, Section 402, Mutual Security Act of 1954."
Agriculture:
  Agriculture Research Service:
    "Animal disease laboratory facilities."
    "Construction of facilities."
    "Establishment of an entomology research laboratory."
    "Salaries and expenses."
  Agricultural Marketing Service: "Marketing research and service."
Forest Service:
  "Forest protection and utilization."
  "Forest roads and trails, liquidation of contract authorization."
Commerce:
  "Gifts and donations, general administration."
  "Participation in Century 21 Exposition."
  "Participation in New York World's Fair."
  National Bureau of Standards:
    "Plant and facilities."
    "Construction of facilities."
Defense—Military:
  "Military construction, Army."
  "Construction of facilities, Civil Defense."
  "Navy management fund."
Health, Education, and Welfare:
  Food and Drug Administration: "Pharmacological-animal laboratory building.
  Public Health Service:
    "Buildings and facilities."
    "Milk, food, interstate, and community sanitation."
    "National Cancer Institute."
    "National Health Institute."

[1] Balances of selected resources are identified on the statement of financial condition.

Summary of Sources and Application of Funds (in thousands of dollars)

	1963 actual	1964 estimate	1965 estimate
Obligations (from program and financing)	359,457	347,401	379,824
Increase (−) or decrease in gross unpaid obligations	−45,377	5,094	46
Gross expenditures	314,080	352,495	379,870
Revenues and other receipts (from program and financing)	309,814	351,330	381,024
Decrease in accounts receivable, net	−1,725	3,982	---------
Applicable receipts	308,089	355,312	381,024
Budget expenditures	5,991	−2,817	−1,154

This fund finances, on a reimbursable basis, building management activities consisting of: Management, rental, operation, and protection of Government-owned and leased space in and outside the District of Columbia for housing Federal agencies; modernization and recurring repairs to Government-owned space under jurisdiction of General Services Administration; protection and maintenance of excess and surplus properties; and maintenance of sites and improvements thereon reserved for future construction of Federal buildings; and other related buildings services (66 Stat. 594). Retained earnings resulting from operations, after making provision for prior year losses, if any, are paid into the Treasury as miscellaneous receipts.

Operating costs for 1965 are estimated at $379.8 million, a net increase of $29.9 million over 1964, mainly due to work which will be performed for the Post Office Department in connection with its modernization program.

1. *Buildings management*—(a) *Operation and protection of Government-owned space.*—Provides for operation and protection of an average of 133.3 million square feet of space in 1965 compared to an average of 125.8 million square feet in 1964 and an average of 113.6 million square feet in 1963. The change from 1964 reflects net additional space to be serviced due to construction of new buildings, and buildings being vacated by the Post Office Department.

(b) *Rental, operation, and protection of leased space.*—Provides for an average of 43.1 million square feet in 1965 compared to an average of 43.7 million square feet in 1964 and an average of 40.3 million square feet in 1963, based on currently projected programs of Federal agencies.

2. *Moving and space alterations.*—Provides for moving and related alterations based on experience factors derived from buildings management operations.

3. *Temporary space and moving costs incident to new buildings.*—Provides for cost of moving and space adjustments incident to the new construction program.

REAL PROPERTY ACTIVITIES—Continued

Intragovernmental funds—Continued

BUILDINGS MANAGEMENT FUND—Continued

4. *Operation of communication facilities.*—Provides for operation of telecommunication services and facilities for use of Federal agencies which has been transferred effective July 1, 1963, to the new Federal Telecommunications Fund established by Public Law 87–847, approved October 23, 1962.

5. *Protection and maintenance, surplus properties.*—Provides for protection and maintenance of excess and surplus properties.

6. *Maintenance repairs.*—Provides for day-to-day maintenance to GSA operated buildings, and other Government buildings under jurisdiction of General Services Administration.

7. *Security guarding.*—Provides extra guarding service for other agencies where specifically authorized by law.

8. *Operation and maintenance of sites held for future construction.*—Provides for maintenance and repairs of sites or improvements thereon reserved for future construction of Federal buildings, and operation of space occupied by commercial tenants.

9. *Job order work.*—Provides for special services and improvements to buildings for General Services Administration and other agencies. Increases in 1964 and 1965 are primarily for work which will be performed for the Post Office Department in connection with its modernization program.

10. *Other.*—Provides for program supervision of repair and improvement operations as distinguished from architectural and design activities initially financed from the Construction services fund, utility services furnished in the District of Columbia to buildings operated by other agencies and utilities to concessionaires.

Operating results and financial condition.—At the end of 1963 the net investment in the fund was $2.3 million, composed of $3.5 million appropriated, $4.4 million capitalized assets, $3.0 million retained earnings, less $8.6 million provision for unfunded leave liability.

Applicable receipts	11,300	13,739	15,468
Budget expenditures	−256	194	

Construction service activities consisting of preparation of drawings and specifications for the construction or alteration of public buildings; supervision of construction and alteration activities; and surveys and test borings performed in connection with the acquisition of Federal building sites; and other related services are financed by this fund on a reimbursable basis from funds appropriated, transferred, or advanced to General Services Administration (40 U.S.C. 296).

Operations.—Initial financing of salaries and related expenses of all personnel engaged in architectural and engineering services in connection with buildings design and construction, both departmental and field, is provided. Increases for 1964 and 1965 are required for the GSA public building construction program, expansion of the repair and improvement program, and additional workload in connection with projects assigned to GSA by other Federal agencies.

Operating results.—Retained earnings will be reduced in 1964 to approximately $100 thousand and maintained at that level.

Appropriation (adjusted)	**41,522**	**48,280**	**54,800**

[1] Includes capital outlay as follows: 1963, $184 thousand; 1964, $191 thousand; 1965, $116 thousand. Excludes adjustments of prior year costs of $27 thousand.

[2] Selected resources as of June 30 are as follows: Unpaid undelivered orders, 1962, $942 thousand (1963 adjustments, −$138 thousand); 1963, $745 thousand; 1964, $893 thousand; 1965, $893 thousand.

[3] $1,500 thousand of this amount was placed in reserve by reapportionment approved by Bureau of the Budget, June 26, 1963.

This appropriation provides for (1) establishment of efficient supply property management practices throughout the Federal Government; and (2) expenses of operating the worldwide supply system through which common-use commodities are sold to Government agencies and cost-type contractors from depot stocks, or by direct delivery from suppliers, whichever is more economical. Except for customer orders placed directly with suppliers under Federal supply schedule contracts, most of the purchases of commodities are financed initially from the General supply fund, subject to reimbursement by ordering agencies. Wherever economical and feasible, costs of commodities furnished directly from suppliers are paid directly from funds of the requisitioning agency without involving the General supply fund. During 1964, GSA assumed procurement, distribution, and related supply responsibilities for certain paint and hand tool items previously managed by the Department of Defense.

Digitized for FRASER

Federal Reserve Bank of St. Louis

Fair value of personal property received from other appropriations or funds without cost for use by GSA is as follows: 1963, $17 thousand; 1964, $14 thousand; 1965, $15 thousand.

1. *Supply distribution*—(a) *Depot operations.*—Stocks of common-use commodities are received, warehoused, and issued to Federal agencies through a nationwide system of supply depots.

Stores stock sales, including cost of transportation, reflect a continuous increase as follows (in millions): 1960, $160.5; 1961, $190.5; 1962, $238.8; 1963, $259.7; 1964, $310; and 1965, $375.

(b) *Space and related costs.*—Provides for housing inventories for sale of $92.3 million in 1963; and 1964 and 1965 estimated at $158.6 million and $175.1 million, respectively.

2. *Procurement.*—Commodities are procured to maintain inventories at stores depots to insure availability in advance of sales orders and for direct delivery to agencies. Term contracts for common-use commodities and services are established for large aggregate volume requirements against which agencies place individual orders at uniform price advantages.

Volume of total procurement is as follows (in millions): 1960, $862.4; 1961, $1,014.4; 1962, $1,187.9; 1963, $1,256.7; 1964, $1,439.3; and 1965, $1,578.6.

3. *Quality control and standards*—(a) *Inspection.*—Timely delivery of commodities of specified quality is assured by inspection at contractors' plants or supply depots, by laboratory tests and analyses of samples prior to acceptance, and by contract administration assistance.

(b) *Supply standards.*—Standards of quality and other characteristics of common-use commodities are established by specifications, qualified products lists, and uniform item identifications for mandatory use by Government agencies. The current workload is increasing due to the expanded supply support program of GSA. The cataloging program results in establishing a uniform identification for each item of supply and establishes a basis for expanding supply support by the GSA once the commonality of the items is determined.

4. *Supply management.*—Policies and procedures for improving supply operations in Government agencies are developed with due consideration for the potential of automatic data processing. Installation of supply system improvements are coordinated through the conduct of training programs and supply conferences, continuous onsite technical assistance, and by special surveys as required.

Revenues and other receipts (from program and financing)	494,335	585,030	692,984
Increase (−) or decrease in accounts receivable, net	10,009	−12,509	−3,700
Applicable receipts	504,344	572,521	689,284
Budget expenditures	−18,531	25,335	−8,595

[1] Balances of selected resources are identified on the statement of financial condition.

This fund finances, on a reimbursable basis, a national supply depot system and a system of ordering supplies for direct delivery to agencies. Supplies or services are sold from the fund at cost to other agencies and the District of Columbia. Related operating expenses are provided for under the appropriation Operating expenses, Federal Supply Service.

Also financed by the fund and reimbursed by the using agencies are operations of interagency motor vehicle pools established in areas of high vehicle density.

Budget program.—The estimate provides for continued increases in sales to the military under the program for progressively expanding use of these supply facilities by Department of Defense, and a slight increase in sales to civilian agencies. Activations of additional interagency motor vehicle pools are also reflected.

1. *Supply operations*—(a) *Stores, regular.*—Stocks of common-use commodities are purchased in volume and stored in supply depots for issue to Government agencies. Sales reached an alltime high of $259.7 million in 1963 and are estimated to increase to $310 million in 1964 and $375 million in 1965.

(b) *Stores, direct delivery.*—Stores orders, if sufficiently large and delivery time is not a factor, are placed with the commercial source of supply and delivered directly to the customer. Sales were $32.4 million in 1963, and are estimated to increase to $44 million in 1964 and $58.1 million in 1965.

(c) *Nonstores items.*—Definite quantity requirements of commodities which are not susceptible to economical stocking in supply depots are purchased for direct shipment to customer agencies. Sales through the fund are estimated to increase from $154.8 million in 1963 to $166 million in 1964 and $183.4 million in 1965.

2. *Export operations.*—Stores and nonstores items are shipped to oversea destinations. Receipts to this operation covering packing, transportation cost and other reimbursable services are expected to increase from $14.4 million in 1963 to $22 million in 1964 and $27 million in 1965.

Equipment rental.—Operating equipment necessary to carry out the supply operation activity is acquired and charged on an accrual basis to the using activities. Collections from using activities are expected to increase slightly through 1965.

3. *Rehabilitation and repair of furniture and equipment.*—Furniture and equipment repair services, provided through commercial sources wherever feasible and economical, are estimated to increase from $4.3 million in 1963 to $9.3 million in 1964 and $11.9 million in 1965

4. *Motor pools.*—Services are supplied to agencies through a system of interagency motor pools, still under development, to serve areas of high vehicle density. Sales are estimated to increase from $24.5 million in 1963 to $28 million in 1964 and $31.1 million in 1965 due to activation of additional motor pools and increased service requested by customer agencies. The number of pools in operation is estimated to increase from 75 in 1963 to 88 in 1964 and to 100 in 1965.

Other revenue and expense.—Gain or losses on equipment disposals, adjustments between fiscal years, inventory writeoffs, and discounts are applied against operating costs.

Operating results and financial condition.—Investment of the U.S. Government at the end of 1965 is estimated at $286.9 million, consisting of $197.7 million in direct appropriations, $85.7 million donated assets (motor vehicles $14.3 million, inventory items $71.4 million), $0.6 million capitalized surplus, and retained earnings of $3 million with $0.1 million deducted for long-term leave liability.

Upon establishment of interagency motor pools additional donated assets arising from transfers of motor vehicles from other agencies will be capitalized in the fund.

At the end of 1964, $47.5 million of paint and hand tool inventories transferred from the Department of Defense and not required for normal sales will be on hand. This inventory will be reduced by $11 million in 1965, leaving a balance of $36.5 million excess on hand at the end of 1965.

Any operating surplus, as determined by General Accounting Office audit, must be returned to Treasury as miscellaneous receipts. Payments so made in 1964 were $6,862 thousand and it is estimated that $3 million will be returned in 1965.

Appropriation (adjusted)	**9,126**	**9,388**	**10,150**
General fund	370		
Special fund	8,756	9,388	10,150

[1] Includes capital outlay as follows: 1963, $233 thousand; 1964, $165 thousand; 1965, $33 thousand. (Excludes adjustment of prior year costs of −$67 thousand).
[2] Selected resources as of June 30 are as follows: Unpaid undelivered orders 1962, $37 thousand (1963 adjustments, −$2 thousand); 1963, $175 thousand; 1964, $70 thousand; 1965, $70 thousand.

This appropriation, derived from proceeds from the transfer of excess property and the disposal of surplus property, provides for all utilization and disposal functions of the General Services Administration with respect to excess and surplus real and personal property and the rehabilitation of personal property to be performed by the Utilization and Disposal Service, except fees of auctioneers, brokers, etc., which are financed through a special account.

Increases for 1965 provide for further emphasis on reuse of existing property to obviate new capital and procurement outlays, or prompt disposal. The selling price of real and personal property sold and rental income from real property in 1963 was $87.6 million, and is estimated to increase to $112.1 million in 1964, and $127.6 million in 1965.

Fair value of personal property received from other appropriations or funds without cost for use by GSA is as follows: 1963, $8 thousand; 1964, $8 thousand; and 1965, $9 thousand.

1. *Real property.*—This activity provides for (a) utilization of excess and disposal of surplus real property, including national industrial reserve properties; (b) protection and maintenance of excess, surplus, and national industrial reserve properties; and (c) payments in lieu of taxes on certain properties as required by law. The increase for 1965 is directly related to the current program of phasing out various military installations over a period of years and provides for utilization transfers of 150 properties with an acquisition cost of $155 million in 1965 as compared to 145 costing $140 million in 1964 and sale of 295 surplus properties with an acquisition cost of $530 million in 1965 as compared to 285 costing $480 million in 1964.

2. *Personal property.*—This activity provides for (a) utilization of excess personal property, thereby obviating new purchases; (b) disposal of surplus and exchange/sale of personal property; and (c) rehabilitation of personal property. The increase for 1965 provides for the continued screening of excess property, including inventories held by contractors with the Department of Defense, the assumption of civil agency sales responsibility for a full year, and increased rehabilitation of personal property. Utilization transfers and donations were $818.9 million at acquisition cost in 1963, are programed at $900 million in 1964, and are estimated at $970 million in 1965. Proceeds from sale of surplus and exchange/sale of personal property were $8.2 million in 1963, are programed at $10.1 million in 1964, and estimated at $11 million in 1965. Property rehabilitated amounted to $22.9 million at acquisition cost in 1963, is programed for $51 million in 1964, and estimated at $58 million in 1965.

New obligational authority (appropriation)	**1,047**	**1,200**	**1,200**

[1] Excludes adjustment of prior year costs, $31 thousand.
[2] Selected resources as of June 30 are as follows: Unpaid undelivered orders, 1962, $428 thousand (1963 adjustment, −$79 thousand); 1963, $345 thousand; 1964, $345 thousand; 1965, $345 thousand.

Appraisers, auctioneers, and brokers familiar with local markets are used to accelerate the disposal of surplus real and related personal property. Fees of appraisers, auctioneers, and brokers and costs of advertising and surveying are paid out of receipts from disposals within each year in accordance with 40 U.S.C.A. 485(b). Also paid from such proceeds is the direct expense in connection with utilization of excess real and related personal property (68 Stat. 1051). Properties sold by auctioneers and brokers totaled 20 in 1963 and are estimated at 35 in 1964 and 1965.

RECORDS ACTIVITIES

General and special funds:

OPERATING EXPENSES, NATIONAL ARCHIVES AND RECORDS SERVICE

For necessary expenses in connection with Federal records management and related activities as provided by law, including reimbursement for security guard services, and contractual services incident to movement or disposal of records, [$14,730,000] *$15,500,000. (Independent Offices Appropriation Act, 1964.)*

Program and Financing (in thousands of dollars)

	1963 actual	1964 estimate	1965 estimate
Program by activities:			
1. Records management and centers	9,571	9,660	10,070
2. Archives and related services	3,581	3,786	4,090
3. Service direction	565	624	640
4. Administrative operations	694	660	700
Total program costs, funded [1]	14,410	14,730	15,500
Change in selected resources [2]	−22		
Total obligations	14,388	14,730	15,500
Financing:			
Unobligated balance lapsing	29		
New obligational authority (appropriation)	**14,416**	**14,730**	**15,500**

[1] Includes capital outlay as follows: June 30, 1963, $232 thousand; 1964, $187 thousand; 1965, $267 thousand. Excludes adjustment of prior year costs of $14 thousand.

[2] Selected resources as of June 30 are as follows: Unpaid undelivered orders 1962, $220 thousand (1963 adjustments, −$3 thousand); 1963, $195 thousand; 1964, $195 thousand; 1965, $195 thousand.

This appropriation provides for basic operations dealing with management of the Government's archives and records and for operation of presidential libraries. The estimate for 1965 is $770 thousand more than 1964 financing, $410 thousand of which is for increased workload in records management assistance and records center activities.

Fair value of personal property received from other appropriations or funds without cost for use by GSA is as follows: 1963, $32 thousand; 1964, $36 thousand; 1965, $35 thousand.

1. *Records management and centers.*—Records of Federal agencies which must be retained for a period of time, but are not needed for frequent reference, are brought into and administered in regional Federal records centers serving specified geographical areas. National centers at St. Louis administer records of veterans of the armed services and records of former civilian employees of the Government and maintain a locator file for civilians currently employed. In addition to civilian agencies, records center facilities are now furnished to the entire Naval Establishment, the Army and Air Force at the seat of government, and for selected Army records throughout the world.

In 1965 records in custody of the National Archives and Federal records centers will total 8.9 million cubic feet. Reference services will total 5.4 million.

The workload in Federal records centers is shown in the following table:

	1963 actual	*1964 estimate*	*1965 estimate*
Regional centers:			
Records administered (millions of cubic feet)	6.99	7.10	7.33
Unit cost per cubic foot of records administered	$0.547	$0.562	$0.562
Reference services (millions)	3.13	3.15	3.20
National personnel centers:			
Reference services (millions)	1.69	1.62	1.62
Number of items processed (millions)	6.42	6.60	6.65

2. *Archives and related services.*—The permanently valuable records of the Government are selected, arranged, cataloged, preserved, and serviced in the Archives of the United States. Related services consist of (a) publication of the Federal Register and related compilations and the United States Statutes at Large, (b) preservation and servicing of historical materials in presidential libraries, and (c) servicing the National Historical Publications Commission.

Operations and maintenance, Defense agencies (5 U.S.C. 630e)		100	
Appropriation (adjusted)	**4,607**	**4,950**	**6,000**

[1] Includes capital outlay as follows: 1963, $268 thousand; 1964, $97 thousand; 1965, $25 thousand. Excludes adjustment of prior year costs, −$7 thousand.

[2] Selected resources as of June 30 are as follows: Unpaid undelivered orders 1962, $261 thousand (1963 adjustments, −$5 thousand); 1963, $131 thousand; 1964, $181 thousand; 1965, $181 thousand.

This appropriation provides for improving management of transportation, communication, and public utility services in all civilian agencies, and for providing specialized services to civilian agencies in each of these fields.

Fair value of personal property received from other appropriations or funds without cost for use by GSA is as follows: 1963, $11 thousand; 1964, $8 thousand; and 1965, $9 thousand.

1. *Transportation services.*—Guides and procedures and educational programs for improving transportation practices and operations in civilian agencies are developed; reasonable rates are negotiated with carriers; and procurement assistance, rates, routing, and related services are supplied to executive agencies.

2. *Communication services.*—Networks are designed and engineered for a Federal communications system for general and national defense use, compatible with the National Communications System. Studies of equipment utilization, service, rates and economic factors are made, contracts negotiated, and management and control of operations are provided.

3. *Motor vehicle management.*—Government-wide policies and procedures are developed to improve the overall efficiency of the operation of the Government-owned motor vehicle fleet, and to assist the various Federal agencies with motor equipment management.

4. *Public utilities services.*—Negotiations are conducted with public utilities companies on behalf of executive agencies and technical assistance is rendered in connection with regulatory proceedings.

Representation services are provided the Department of Defense in public utility cases generally and in proceed ings relating to the semiautomatic ground environment system (SAGE).

Revenue		46,900	55,100
Expense		46,900	55,100
Net operating income (retained earnings, end of year)			

This fund, authorized by Public Law 87–847, approved October 23, 1962, finances, on a reimbursable basis, a telecommunications system for the Federal Government operationally compatible with military communications systems. The system provides local and long distance voice, teletype, data, facsimile and other communications services.

Expenses payable from the fund include personal services, procurement by lease or purchase of equipment and operating facilities (including cryptographic devices), and other costs necessary to operate the system. These expenses are reimbursed from available appropriations and funds of any agency, organization, or persons for telecommunications services and facilities made available to them.

Initial capital of $9 million was appropriated by Public Law 88–25, approved May 17, 1963. This sum may be increased by donations of supplies and equipment.

Budget program.—The estimate provides for a continued increase in volume and quality of communications services provided to executive agencies of the Government. Total sales are estimated at $46.9 million in 1964 and $55.1 million in 1965.

1. *Voice.*—This provides for a telephonic system which will enable personnel in each Federal agency office to communicate directly on a machine-to-machine or station-to-station basis with any other agency office in the Nation. The system will provide day-to-day service as well as incorporate features which would be necessary in emergency situations.

2. *Record.*—A common unified system to satisfy record communications requirements of all Federal civil agencies, provides machine-to-machine service for transmission of information by data, teletypewriter facsimile, and other transmission media while at the same time providing message processing capability required for peak-period traffic loads, time zone differences, machine code and language translation, and processing of multiple address messages.

3. *Circuit management.*—Centralized procurement of circuits while at the same time permitting each agency to maintain operational control over its own circuits, thereby obtaining benefit of multiple tariff offerings of the commercial carriers.

4. *Special programs.*—Provides for an effective communications security program for civil agencies in keeping with objectives of the U.S. communications security plan, and for a consolidated program of procurement and maintenance of equipment to implement such security plans. These programs insure that the Federal Telecommunications System will remain operational in the event any portion of the normal system is disabled or destroyed.

Operating results and financial conditions.—At the end of 1965 the net investment in the fund is estimated to be $8.4 million, composed of $9 million appropriated, less $0.6 million unfunded leave liability. Following the close of each fiscal year any surplus earnings, after making provision for prior year losses, if any, are to be deposited in miscellaneous receipts of the Treasury.

STRATEGIC AND CRITICAL MATERIALS—Continued

Program and Financing (in thousands of dollars)

	1963 actual	1964 estimate	1965 estimate
Program by activities:			
1. Acquisition of materials:			
(a) New materials	1,245	1,500	727
(b) Upgrading materials	664	250	500
Total, acquisition of materials	1,909	1,750	1,227
2. Inventory management:			
(a) Rotation of materials	4,191	----------	----------
(b) Storage of materials	11,390	12,236	11,626
(c) Disposal of materials	686	1,000	1,000
Total, inventory management	16,267	13,236	12,626
3. National industrial equipment reserve:			
Transportation, processing, and storage	1,366	1,483	1,379
4. Operating expenses:			
(a) Service direction	377	464	485
(b) Materials management	1,005	1,050	1,077
(c) Storage management	563	614	638
(d) Administrative operations	932	700	800
Total, operating expenses	2,877	2,828	3,000
Total program costs, funded [1]	22,420	19,297	18,232
Change in selected resources [2]	−4,728	−902	−2
Total obligations	17,692	18,395	18,230
Financing:			
Unobligated balance brought forward	−260	−113	----------
Unobligated balance carried forward	113	----------	----------
Unobligated balance lapsing	550	5,643	----------
New obligational authority (appropriation)	**18,095**	**23,925**	**18,230**

[1] Includes capital outlay as follows: June 30, 1963, $240 thousand; 1964, $39 thousand; 1965, $26 thousand. Excludes adjustment of prior year costs, $68 thousand.

[2] Selected resources as of June 30 are as follows: Unpaid undelivered orders, 1962, $7,303 thousand (1963 adjustments, $39 thousand); 1963, $2,614 thousand; 1964, $1,712 thousand; 1965, $1,710 thousand.

The Defense Materials Service acquires and administers national stockpile inventories pursuant to the Strategic and Critical Materials Stock Piling Act, and has custody of the supplemental stockpile established by the Agricultural Trade Development and Assistance Act of 1954. Programs are administered in accordance with guidelines established by the Office of Emergency Planning. This Service also administers the inventory of machine tools and industrial manufacturing equipment established under the National Industrial Reserve Act of 1948. The Department of Defense makes selections for the reserve and provides program guidance.

The 1965 obligational program of $18.2 million is to provide $1.2 million for new material acquisition and handling costs involved in upgrading stockpiled materials required to meet objectives, $12.6 million for inventory management and disposal of material excess to stockpile needs, $1.4 million for national industrial equipment reserve activities, and $3 million operating expenses.

In arriving at requirements to meet stockpile objectives, all U.S. Government inventories of strategic materials in GSA custody are taken into account. Data below reflect in composite the extent to which current national stockpile objectives are provided for: (a) from financing under the Strategic and Critical Materials Stock Piling Act, and (b) under all U.S. Government programs involving strategic materials.

Total commodities within objectives are valued at $3,498.1 million. June 30, 1963, prices have been used.

STATUS OF ACQUISITION WITHIN OBJECTIVES—MATERIAL IN INVENTORY AND ON ORDER

[In millions of dollars]

	1963 actual		*1964 estimate*		*1965 estimate*	
	National stockpile	*All Government programs*	*National stockpile*	*All Government programs*	*National stockpile*	*All Government programs*
In inventory	3,138.2	3,459.3	3,139.5	3,468.3	3,140.2	3,473.9
On order	.6	8.3	-------	4.8	-------	4.3
Total	3,138.8	3,467.6	3,139.5	3,473.1	3,140.2	3,478.2
Balance to be acquired	359.3	30.5	358.6	25.0	357.9	19.9

Fair value of personal property received from other appropriations or funds without cost for use by GSA is as follows: 1963, $268 thousand; 1964, $397 thousand; 1965, $398 thousand.

1. *Acquisition of materials*—(a) *New materials.*—Costs of direct acquisition of materials, including transportation and handling expenses, are as follows (in thousands of dollars):

	1963 actual	*1964 estimate*	*1965 estimate*
New materials	684	750	725

Based on national stockpile objectives and the proposed budget, the status of the 76 materials now on the stockpiling list is as follows:

MATERIALS ON HAND AND ON ORDER

	National stockpile		*All Government programs*	
Percent completed:	*Actual June 30, 1963*	*Estimated June 30, 1965*	*Actual June 30, 1963*	*Estimated June 30, 1965*
100	46	46	64	66
90 to 99	7	7	6	5
75 to 89	4	4	1	1
50 to 74	8	8	3	2
25 to 49	6	6	0	0
Under 25	3	3	0	0
Total [1]	74	74	74	74

[1] Two materials (lead and zinc) have "zero" objectives.

(b) *Upgrading materials.*—Stockpile materials are upgraded to more usable forms in order to provide a minimum readiness inventory of materials in forms suitable for immediate use to meet the initial requirements of intensive mobilization. Payment for upgrading costs to extent possible will be made by transfer of excess materials to contractors. The 1965 estimate covers handling, transportation and other incidental costs involved in upgrading for which payment in excess materials cannot be arranged.

2. *Inventory management.*—Covers cost of maintaining materials in the national and supplemental stockpiles, including storage, special preservation, and disposal of materials no longer required for stockpile objectives. The acquisition costs of these inventories as of June 30, 1963, was $7,092.6 million.

(a) *Rotation of materials.*—No rotation is planned for 1964 and 1965 because of pending review of cordage fiber objectives and determination as to whether these fibers should continue to be stockpiled. In the event objectives

Digitized for FRASER
https://fraser.stlouisfed.org
Federal Reserve Bank of St. Louis

are reduced, over-age material would be disposed of rather than rotated.

(b) *Storage of materials.*—Strategic and critical materials were stored at 165 locations as of June 30, 1963, utilizing approximately 96 million square feet of storage space. Materials in the national and supplemental stockpiles totaled approximately 44 million tons on June 30, 1963, and it is expected that approximately 2 million tons a year will be added to the supplemental stockpile in 1964 and 1965. Distribution of storage costs is as follows (in thousands of dollars):

	1963 actual	*1964 estimate*	*1965 estimate*
Recurring storage costs	9,265	9,031	8,912
Nonrecurring storage costs	1,577	2,000	2,000
Relocation transportation and handling	778	1,071	714
Total cost or estimate	11,620	12,102	11,626

(c) *Disposal of materials.*—Covers handling, transportation, and other incidental expenses incurred in connection with the disposal of materials no longer required for stockpile objectives (in thousands of dollars):

	1963 actual	*1964 estimate*	*1965 estimate*
Total cost or estimate	680	1,000	1,000

Disposals on a commitment basis from the national stockpile in 1963 totaled approximately $80.5 million for about 161 thousand short tons of materials, including rubber, coconut oil, castor oil, molybdenum, cordage fibers, and tin.

As of June 30, 1963, a total of over 565 thousand short tons of excess materials in the national stockpile were available for disposal under approved disposal plans. The estimates for transportation, handling and other incidental expenses incurred in effecting disposals, are based upon projected disposals of $114.1 million in 1964 and $155.1 million in 1965.

3. *National industrial equipment reserve.*—The reserve of Government-owned machine tools and other industrial manufacturing equipment authorized by the National Industrial Reserve Act of 1948 consists entirely of items selected by the Secretary of Defense from lists of such property declared excess to the needs of the three military departments and other executive agencies.

Items in the national industrial equipment reserve are intended primarily for expansion in an emergency of defense-supporting industries such as manufacturers of ball bearings, gears, tools, and dies, and machine tools. Each of the military departments also maintains a reserve of production equipment for current and mobilization requirements of direct military contractors and producers specifically designated as mobilization suppliers.

In accordance with Department of Defense estimates of equipment selections, budget estimates are based on selection rates of 800 items in 1964 and 800 items in 1965.

During 1962, as authorized by the Department of Defense, GSA entered into 38 loan agreements with vocational schools whereby equipment maintained in the national industrial equipment reserve was made available for training activities considered in the interest of national defense. During 1963, 23 such loan agreements were made.

4. *Operating expenses.*—Covers all expenses at the central and regional office levels for administering programs financed under this appropriation including the Defense Materials Service and the integrated staff offices of General Services Administration. The change in total workload in 1965 from 1964 will be limited, with staffing and related expenses holding at minimum requirements.

Financing applied to program			

The Central American abaca production program authorized by U.S.C. 541 has been administered by General Services Administration since July 1, 1954. The program was completed in 1960 and all assets sold. Final liquidation has been delayed due to a contingent liability of approximately $94 thousand pending in the U.S. Court of Claims. The program had $99 thousand in cash as of June 30, 1963. Final remittance to the Treasury will be made after settlement of this claim.

Financing applied to program			

Guarantees are given on loans made by public or private financing institutions, including Federal Reserve banks, to facilitate performance of defense production contracts. Upon demand of lending institutions the Government is required to purchase the guaranteed percentage of the loan or the Government may elect to make a voluntary purchase of the guaranteed percentage. Advances from appropriations available for procurement may be made to this fund for its temporary use, although such action has not been necessary to date. Net earnings have been retained to meet possible future losses (50 U.S.C. App. 2091).

As of June 30, 1962, there were no General Services Administration loan guarantees outstanding and none are contemplated in the future. Cumulative net earnings of $6.3 million were returned to the Treasury on March 22, 1963.

Decrease in accounts receivable, net	47	14	14
Applicable receipts	198	153	89
Budget expenditures	−168	−147	−89

Under the provisions of Reorganization Plan No. 1 of 1957, the Reconstruction Finance Corporation was abolished as a corporate entity and the remaining functions of the Smaller War Plants Corporation and the World War II assets program were transferred to the General Services Administration for final liquidation.

Operations.—It is anticipated that there will continue during 1965 the servicing of leases and conditional sales agreements covering 7 facilities, plus servicing of 14 other miscellaneous assets. Financial and legal servicing will also be required on approximately 25 cases in the hands of the Department of Justice under the complex food subsidy program. In 1965, administrative expenses in connection with financial and legal services will be absorbed in funds available from regular GSA programs.

Operating results.—Proceeds from liquidation will be paid into miscellaneous receipts of the Treasury.

GENERAL ACTIVITIES—Continued

Intragovernmental funds—Continued

ADMINISTRATIVE OPERATIONS FUND—Continued

This management fund provides services on a centralized and integrated basis for all General Services Administration programs:

1. *Finance and administration*—(a) *Data and financial management* consisting of unified automatic data processing services, accounting, budget, audit, credit, insurance, and related financial services. (b) *Manpower and administration* consisting of personnel, fair employment, compliance, educational institutes, and office services. (c) *Management staff* provides for the staff of manpower utilization, program review and analysis, organization and management policy and Government-wide data processing coordination. (d) *Direction and supervision.*

2. *Legal services* are performed for all programs of GSA in the fields of real property, personal property, archives and records, transportation and communications, strategic and critical materials stockpiling, and finance and administration.

Fair value of personal property received from other appropriations or funds without cost for use by General Services Administration is as follows: 1963, $25 thousand; 1964, $27 thousand; 1965, $28 thousand.

Estimated amounts available for 1965 from the various sources and comparable data for 1963 and 1964 are (in thousands of dollars):

Retained earnings, start of year	45	115	125
Payment of earnings	−45	−115	−125
Retained earnings, end of year	115	125	110

Central blueprinting, photostating, duplicating, and distribution services are financed by a working capital fund pending reimbursements (40 U.S.C. 293). The Joint Committee on Printing, U.S. Congress, authorized the establishment of four field printing plants in GSA regional offices on August 21, 1959 and October 28, 1959, in addition to the plant in Washington, D.C., to meet the needs of the GSA and other Federal agencies. Subsequently the committee authorized the establishment of a printing plant in Atlanta, Ga., on August 29, 1961, for servicing the Federal Aviation Agency's southeast regional offices and a second printing plant in Kansas City, Mo., on September 5, 1961, to provide services to 19 Federal agencies in the new Federal Office Building. These plants were activated in September 1961 and November 1961, respectively. In addition, eight duplicating plants are now in operation, and it is anticipated that GSA will establish approximately five new centralized duplicating plants each year for the next 5 years.

Operating results.—Surplus earnings are deposited into miscellaneous receipts of the Treasury. Through June 30, 1963, a total of $131 thousand has been deposited.

Federal Reserve Bank of St. Louis

GENERAL PROVISIONS—Continued

to law (40 U.S.C. 129); (2) reimbursements for services performed in respect to bonds and other obligations under the jurisdiction of the General Services Administration, issued by public authorities, States, or other public bodies, and such services in respect to such bonds or obligations as the Administrator deems necessary and in the public interest may, upon the request and at the expense of the issuing agencies, be provided from the appropriate foregoing appropriation; and (3) appropriations or funds available to other agencies, and transferred to the General Services Administration, in connection with property transferred to the General Services Administration pursuant to the Act of July 2, 1948 (50 U.S.C. 451ff), and such appropriations or funds may be so transferred, with the approval of the Bureau of the Budget.

Appropriations to the General Services Administration under the heading "Construction, Public Buildings Projects" made in this Act shall be available, subject to the provisions of the Public Buildings Act of 1959 for (1) acquisition of buildings and sites thereof by purchase, condemnation, or otherwise, including prepayment of purchase contracts, (2) extension or conversion of Government-owned buildings, and (3) construction of new buildings, in addition to those set forth under that appropriation: *Provided,* That nothing herein shall authorize an expenditure of funds for acquisition, extension or conversion, or construction without the approval of the Committees on Appropriations of the Senate and House of Representatives.

Funds available to the General Services Administration shall be available for the hire of passenger motor vehicles.

No part of any money appropriated by this or any other Act for any agency of the executive branch of the Government shall be used during the current fiscal year for the purchase within the continental limits of the United States of any typewriting machines except in accordance with regulations issued pursuant to the provisions of the Federal Property and Administrative Services Act of 1949, as amended.

Not to exceed 2 per centum of any appropriation made available to the General Services Administration for the current fiscal year by this Act may be transferred to any other such appropriation, but no such appropriation shall be increased thereby more than 2 per centum: *Provided,* That such transfers shall apply only to operating expenses, and shall not exceed in the aggregate the amount of $2,000,000.

Appropriations available to any department or agency during the current fiscal year for necessary expenses, including maintenance or operating expenses, shall also be available for (a) reimbursement to the General Services Administration for those expenses of renovation and alteration of buildings and facilities which constitute public improvements, performed in accordance with the Public Buildings Act of 1959 (73 Stat. 479) or other applicable law, and (b) transfer or reimbursement to applicable appropriations to said Administration for rents and related expenses, not otherwise provided for, of providing subject to Executive Order 11035, dated July 9, 1962, directly or indirectly, suitable general purpose space for any such department or agency, in the District of Columbia or elsewhere.

No part of any appropriation contained in this Act shall be used for the payment of rental on lease agreements for the accommodation of Federal agencies in buildings and improvements which are to be erected by the lessor for such agencies at an estimated cost of construction in excess of $200,000 or for the payment of the salary of any person who executes such a lease agreement; *Provided,* That the foregoing proviso shall not be applicable to projects for which a prospectus for the lease construction of space has been submitted to and approved by the appropriate Committees of the Congress in the same manner as for public buildings construction projects pursuant to the Public Buildings Act of 1959. (*Independent Offices Appropriation Act, 1964.*)

HOUSING AND HOME FINANCE AGENCY

OFFICE OF THE ADMINISTRATOR

General and special funds:

SALARIES AND EXPENSES

For necessary expenses of the Office of the Administrator, including services as authorized by section 15 of the Act of August 2, 1946 (5 U.S.C. 55a), at rates not to exceed $75 per diem for individuals; and purchase of two passenger motor vehicles for replacement only; [$15,525,000] *$16,915,000: Provided,* That [hereafter necessary expenses of inspections and of providing representatives at the site of projects being planned or undertaken by local public agencies pursuant to title I of the Housing Act of 1949, as amended, projects financed through loans to educational institutions authorized by title IV of the Housing Act of 1950, as amended, projects and facilities financed by loans to public agencies pursuant to title II of the Housing Amendments of 1955, as amended, urban planning financed through grants to State and local government agencies pursuant to title VII of the Housing Act of 1954, as amended, and reserves of planned public works financed through advances to municipalities and other public agencies pursuant to title VII of the Housing Act of 1954, as amended, shall be compensated by such agencies or institutions by the payment of fixed fees which in the aggregate will cover the costs of rendering such services, and expenses for such purpose shall be considered nonadministrative; and for the purpose of providing such inspections, the Administrator may utilize any agency and such agency may accept reimbursement or payment for such services from such institutions, or the Administrator, and shall credit such amounts to the appropriations or funds against which such charges have been made; but such nonadministrative expenses] during the current fiscal year *nonadministrative expenses, as defined by law (77 Stat. 437),* shall not exceed [$3,250,000] *$3,700,000. (Independent Offices Appropriation Act, 1964.)*

Appropriation (adjusted)	**14,565**	**15,322**	**16,915**

[1] Includes capital outlay as follows: 1963, $230 thousand; 1964, $140 thousand; 1965, $230 thousand.

[2] Selected resources as of June 30 are as follows: Unpaid undelivered orders, 1962, $143 thousand (1963 adjustments, −$44 thousand); 1963, $200 thousand; 1964, $200 thousand; 1965, $200 thousand.

1. *General agency supervision.*—The Administrator of the Agency is responsible for the general supervision and coordination of all Agency activities and is directly responsible for several programs administered by constituents of the Agency under delegation of authority by the Administrator. These include: urban renewal, urban planning assistance, and open-space land programs administered by the Urban Renewal Commissioner; and the programs of college housing loans, public facility loans, public works planning advances, housing for the elderly loans, and certain liquidating activities administered by the Community Facilities Commissioner. The Administrator serves as chairman of the board of directors of the Federal National Mortgage Association and as chairman of the National Voluntary Mortgage Credit Extension Committee.

2. *Directly administered programs.*—These consist of (a) a consolidated investigation and compliance staff serving the entire Agency, (b) staff assistance to the national and regional committees engaged in the program to stimulate the use of private funds for Federal Housing Administration insured and Veterans Administration guaranteed mortgage loans, (c) community disposition activities which are explained in detail under public enterprise funds, and (d) staff expenses in connection with urban studies and housing research and the low-income housing demonstration program provided in the Housing Act of 1961 (42 U.S.C. 1436). The research and demonstration programs are described on succeeding pages.

3. *Community facilities programs.*—This includes staff expenses for (a) college housing loans, (b) public facility loans, (c) public works planning advances, (d) housing for the elderly loans, and (e) liquidating activities described under public enterprise funds. Also included are staff expenses, financed from fees, for (f) financial audits and construction inspections of college housing and public facility projects.

4. *Urban renewal programs.*—This includes staff expenses for (a) urban planning assistance, (b) urban renewal activities, and (c) the open-space land program, all of which are described on succeeding pages. Also included are costs, financed from fees, of (d) site representation and inspection of urban renewal projects and financial audits of urban renewal and urban planning assistance projects.

5. *Urban transportation programs.*—This includes staff expenses for the program of demonstration grants and public facility loans in support of urban transportation authorized by the Housing Act of 1961, as amended (42 U.S.C. 1453 and 1492). These activities are described in connection with the urban renewal fund and public facility loans set forth under public enterprise funds.

All funds available to the Administrator for operating or staff expenses are consolidated in a single operating expense fund managed under this appropriation title as authorized by 12 U.S.C. 1701(c)(3).

[1] Selected resources as of June 30 are as follows: Undisbursed obligations, 1962, $16,237 thousand; 1963, $21,748 thousand; 1964, $24,898 thousand; 1965, $29,898 thousand.

Planning grants are made to State and local governments and to official metropolitan area planning bodies for two-thirds of the estimated cost of urban planning, or three-fourths of such cost in those cities, municipalities, or counties located in redevelopment areas designated pursuant to the Area Redevelopment Act of 1961 (75 Stat. 47). The program is designed to assist such jurisdictions in solving the planning problems resulting from the increasing concentration of population, to encourage them to establish and improve planning staffs, and to facilitate comprehensive planning for urban development on a continuing basis, including open-space land and urban transportation planning.

Grants are increasingly being made to State, metropolitan, and regional planning agencies to meet the complex problems caused by greater urbanization. Although grants continue to be made to State planning agencies for the provision of planning assistance to communities under 50,000 population, such assistance no longer constitutes the bulk of the program as in prior years. Grants are authorized also to be made directly to cities, other municipalities, and counties in redevelopment areas regardless of community size.

The budget program for 1965 assumes enactment of additional authorization for appropriation.

URBAN STUDIES AND HOUSING RESEARCH

For urban studies and housing research as authorized by the Housing Acts of 1948 and 1956, as amended, including administrative expenses in connection therewith, [$387,400] *$1,500,000. (Independent Offices Appropriation Act, 1964.)*

This program includes both statistical data collection and special studies of housing and urban development for use in the preparation and administration of complex Federal programs; for program management and use in the formulation and execution of community development programs at State and local government levels; and for market guidance to homebuilders and producers of building materials.

The program for such studies and research is carried out primarily through contracts with other Federal agencies, educational institutions, and nonprofit private research organizations.

Administrative Expenses, Mass Transportation [Demonstration Grants] *Demonstrations*

For necessary expenses in connection with [grants in connection with] mass transportation demonstration projects, as authorized by section 103(b) of the Housing Act of 1949, as amended, [including not to exceed $195,000 for administrative expenses, $5,000,000: *Provided,* That no part of this appropriation shall be used for administrative expenses in connection with grants to be made requiring payments in excess of the amount herein appropriated therefor] *$200,000.* (*Independent Offices Appropriation Act, 1964.*)

Program and Financing (in thousands of dollars)

	1963 actual	1964 estimate	1965 estimate
Program by activities:			
Payment to "Salaries and expenses" (costs—obligations) (object class 25)	190	195	200
Financing:

Transferred to—			
"Urban renewal fund" for liquidation of contract authorization (42 U.S.C. 1453)	−19,766	−4,805	
"Operations, public facility loans" (42 U.S.C. 1492)	−12,534		
Appropriation (adjusted)	**200**	**195**	**200**

The budget request for 1965 is for $200 thousand for the administration of demonstration grant projects authorized by the Housing Act of 1961 (42 U.S.C. 1453). The program is designed to demonstrate new ideas and methods so as to find ways to meet the growing urban transportation problem. Sixteen projects have been approved as of June 30, 1963, and 12 additional project approvals are expected in the current year. Staff time will be utilized to review and evaluate demonstration projects in execution and final project reports.

The budget anticipates extension of the mass transportation loan program authorized by the Housing Act of 1961 (42 U.S.C. 1492) which expired at the end of 1963. Also anticipated is the enactment of a more extensive program of urban transportation assistance which is described below.

Proposed for separate transmittal:

Urban Transportation Assistance

[1] Selected resources as of June 30 are as follows: Undisbursed obligations, 1964, $0; 1965, $65,000 thousand.

Under proposed legislation, 1965.—Legislation is pending in Congress to initiate a long-range program of Federal assistance for the construction, modernization, and equipping of systems for urban transportation. In addition, a program of $10 million in transportation facility loans is proposed for 1965 under Public facility loans, below.

Open Space Land Grants

For expenses in connection with grants to aid in the acquisition of open-space land or interests therein, and with the provision of technical assistance to State and local public bodies (including the undertaking of studies and publication of information), [$15,000,000] *$30,000,000*: *Provided,* That not to exceed [$262,000] *$400,000* may be used for administrative expenses and technical assistance, and no part of this appropriation shall be used for administrative expenses in connection with grants requiring payments in excess of the amount herein appropriated therefor. (*Independent Offices Appropriation Act, 1964; $12,294,000 of the above estimate will require legislative authorization.*)

[1] Selected resources as of June 30 are as follows: Undisbursed obligations, 1962; $3,229 thousand; 1963 adjustments, −$4 thousand; 1963, $17,941 thousand, 1964, $23,941 thousand; 1965, $38,941 thousand.

Grants to State and local public bodies to help finance acquisition or permanent interest in undeveloped or predominantly undeveloped land in urban areas useful for park, recreation, conservation, historic, or scenic purposes are authorized by title VII of the Housing Act of 1961 (42 U.S.C. 1500). The program is designed to assist public bodies in taking prompt action to preserve as open space that land essential to economic and otherwise desirable long-range urban development, which will also curb urban sprawl and prevent the spread of urban blight and deterioration.

Grants up to 20% of the land cost may be provided or up to 30% if the public body exercises or participates in the exercise of open-space responsibility for all or a substantial portion of an urban area. Safeguards are provided to prohibit subsequent conversion of open-space land to other uses.

The budget estimate for administrative expenses includes funds for technical assistance and studies as authorized by section 705 of the Housing Act of 1961.

The budget program for 1965 assumes enactment of additional authorization for appropriation.

OPERATIONS, COLLEGE HOUSING LOANS FUND—continued

Summary of Sources and Application of Funds (in thousands of dollars)

	1963 actual	1964 estimate	1965 estimate
Obligations (from program and financing)	292,262	302,453	333,207
Decrease in gross unpaid obligations	46,868	39,488	6,722
Gross expenditures	339,130	341,941	339,929
Revenues and other receipts (from program and financing)	58,736	122,160	134,430
Increase (−) in accounts receivable, net	−3,180	−2,854	−2,529
Applicable receipts	55,556	119,306	131,901
Budget expenditures	283,574	222,635	208,028

Direct long-term loans to assist institutions of higher education in providing housing and related facilities for students and faculty, and to hospitals for housing facilities for nurses and interns, are authorized by the Housing Act of 1950, as amended (12 U.S.C. 1749). The program is funded by a Treasury borrowing authorization. Under the Housing Act of 1961, the authorization, currently $2,575 million, will increase by $300 million in 1965. Interest rates are based on a statutory formula and are limited to the higher of either 2.75% or 0.25% above the average interest rate on all interest bearing obligations forming part of the Federal debt. The 1964 rate is 3⅝%.

Budget program.—Net loan reservations are estimated at $300 million for the current year and for the budget year. A loan reservation is made after preliminary review of an application filed to determine the general eligibility and feasibility of a project. The reservation assures availability of loan funds to the applicant at the completion of Agency review of the loan application. The following table shows funds available and net reservations issued (in thousands of dollars):

	1963 actual	*1964 estimate*	*1965 estimate*
Unreserved balance, start	30,823	61,424	135,131
New authorization	300,000	300,000	300,000
Bond sales	-------	50,000	50,000
Repayments and net income	19,065	23,707	28,223
Total funds available	349,888	435,131	513,354
Net loan reservations	288,464	300,000	300,000
Unreserved funds, end	61,424	135,131	213,354

Reservations are converted into loan contracts after detailed planning, filing of a full application, and comprehensive Agency review of engineering, architectural, financing, and legal aspects of proposed projects. After execution of the loan contracts, the institutions proceed with preparation of final plans and specifications, award of construction contracts, construction, and preparation of indentures and marketing of bonds in the private market or sale to the Government. Principal workload items are set forth in the following table:

	1963 actual	*1964 estimate*	*1965 estimate*
Preliminary applications:			
Received	304	340	350
Disapproved or withdrawn	20	20	25
Gross loan reservations	300	315	325
Full applications:			
Received	285	270	310
Disapproved or withdrawn	25	10	15
Gross loan approvals	319	270	295

Financing.—Bond purchases are estimated at $300 million in the current year and $289 million in the budget year. Purchase of bonds ordinarily occurs when construction is well advanced. Disbursements are based on the following projected construction schedule:

	1963 actual	*1964 estimate*	*1965 estimate*
Construction starts	277	270	320
Completions	339	285	300

Operating results and financial condition.—Net earnings of $1,957 thousand are estimated for the budget year. The cumulative deficit is estimated to be eliminated by the end of 1964 which means that all operating costs, including staff expenses and allowances for losses, incurred since the inception of the program will have been entirely recovered by the Government.

Revenue, Expense, and Retained Earnings (in thousands of dollars)

OFFICE OF THE ADMINISTRATOR—Continued

Public enterprise funds—Continued

PUBLIC FACILITY LOANS—Continued

OPERATIONS, PUBLIC FACILITY LOANS—continued

Summary of Sources and Application of Funds (in thousands of dollars)

	1963 actual	1964 estimate	1965 estimate
Obligations (from program and financing)	64,089	80,591	117,314
Increase (−) in gross unpaid obligations	−20,081	−30,823	−53,051
Adjustment in prior year obligations	−7,564		
Gross expenditures	36,444	49,768	64,263
Revenues and other receipts (from program and financing)	6,723	16,228	33,686
Increase (−) in accounts receivable, net	−327	−375	−697
Applicable receipts	6,396	15,853	32,989
Budget expenditures	30,048	33,915	31,274

Direct long-term loans for financing construction of essential public works are authorized to be extended to municipalities and other subdivisions and instrumentalities of States and to Indian tribes by the Housing Amendments of 1955, as amended (42 U.S.C. 1492). In addition, loans for provision of mass transportation facilities were authorized through fiscal 1963 by the Housing Act of 1963; reactivation of this authority by the urban transit legislation now before the Congress is assumed for the budget year. Loans are made only when credit is not otherwise available on reasonable terms and conditions.

The loan program is funded by a Treasury borrowing authorization aggregating $650 million, of which $50 million is available solely for mass transportation facilities. The basic program for public facilities extends priority in processing to small municipalities under 10,000 population for water, sewage, and gas distribution systems. Loans may be provided also to larger communities up to 50,000; the limit is 150,000 in redevelopment areas as designated by the Area Redevelopment Administration and in areas where the National Aeronautics and Space Administration maintains research or development installations. Public facility loans may run for as long as 40 years and must be of sound value or so secured as reasonably to assure repayment. Interest rates are based on a statutory formula and are limited to the higher of either 3% or 0.50% above the average interest rate on all interest-bearing obligations forming part of the Federal debt. The fiscal 1964 rate is 3⅞% for regular public facility loan projects and 3⅝% for projects in redevelopment areas.

Budget program.—Net loan approvals are estimated at $75 million for the current year and $110 million for the budget year; sales of bonds from portfolio and repayments are estimated at $11.3 and $26.9 million, respectively. The following table shows the relationship of this program to available funds (in thousands of dollars):

	1963 actual	*1964 estimate*	*1965 estimate*
Unreserved balance, start	465,934	407,764	343,401
Repayment and sales of bonds	2,827	11,300	26,900
Net expenses	−596	−663	−528
Total funds available	468,165	418,401	369,773
Net loan approvals	60,400	75,000	110,000
Unreserved balance, end	407,764	343,401	259,773

Loan approvals are made after Agency review of engineering, financial, and legal aspects of proposed projects. After loan approval, the locality proceeds with preparation of final plans and specifications, award of construction contracts, construction, and preparation of indentures and marketing of bonds in the private market or sale to the Government. Principal workload items are set forth in the following table:

	1963 actual	*1964 estimate*	*1965 estimate*
Applications:			
Received	476	425	500
Disapproved or withdrawn	111	105	125
Gross loan approvals	282	350	380
Construction:			
Starts	144	205	310
Completions	79	125	175

Financing.—Budgetary expenditures for the program total $33.9 and $31.3 million for 1964 and 1965, respectively. At the end of the budget year, outstanding Treasury notes are estimated at $182.7 million.

Operating results.—Cumulative deficit at the end of 1965 totals $9.1 million of which $2.6 million represents an increase in allowance for losses for the current and budget years.

OFFICE OF THE ADMINISTRATOR—Continued

Public enterprise funds—Continued

PUBLIC WORKS PLANNING FUND—Continued

Summary of Sources and Application of Funds (in thousands of dollars)

	1963 actual	1964 estimate	1965 estimate
Obligations (from program and financing)	15,879	14,950	24,050
Increase (−) in gross unpaid obligations	−3,384	−2,300	−9,575
Gross expenditures	12,495	12,650	14,475
Revenues and other receipts (from program and financing)	7,052	8,705	9,307
Increase (−) or decrease in accounts receivable, net	−421	417	−2
Applicable receipts	6,631	9,122	9,305
Budget expenditures	5,864	3,528	5,170

Interest-free advances to States, municipalities, local public agencies, and metropolitan areas and regions for the planning of local public works are authorized by the Housing Act of 1954 (40 U.S.C. 462), as amended. The program is designed to (1) encourage the preparation and maintenance of a current and adequate reserve of planned public works which can readily be placed under construction, and (2) promote economy and efficiency in planning and building public works.

Advances are made only if the project is planned to be constructed within a reasonable period of time—considering the nature of the project. Projects must be in conformity with applicable State, regional, and local development plans. The following table shows funds available for approval of advances during the budget period (in thousands of dollars):

	1963 actual	*1964 estimate*	*1965 estimate*
Appropriations	12,000	6,000	12,000
Repayments and net expense	7,002	8,655	9,257
Funds available from prior years	1,704	3,241	3,021
Available for approvals	20,707	17,896	24,278
Net advances approved	17,466	14,875	24,000
Available, end of year	3,241	3,021	278

Advances are repayable when construction commences on the project, except that such repayment is waived when construction is initiated as a result of a grant made in accordance with the Public Works Acceleration Act (40 U.S.C. 462g). Capital lost to the revolving fund as a result of forgiveness of advances pursuant to that Act will be recovered, as required, from a proposed 1964 supplemental appropriation, as authorized by section 702 of the Housing Act of 1954.

Budget program.—Actual and estimated program activity is shown in the following tabulation (dollars in thousands):

	1963 actual	*1964 estimate*	*1965 estimate*
Applications received	1,279	1,200	1,200
Net approvals:			
Number	639	600	685
Amount	$17,466	$14,875	$24,000

Financing.—The program is financed by an authorized revolving fund of $58 million. The budget program anticipates legislation to authorize additional appropriations.

Operating results.—The cumulative deficit at the end of 1965 is estimated at $10.5 million of which $10.3 million represents an allowance for losses.

Revenue, Expense, and Retained Earnings (in thousands of dollars)

	1963 actual	1964 estimate	1965 estimate

The Independent Offices Appropriation Act, 1955, established a single revolving fund for the more efficient liquidation of a number of Housing and Home Finance Agency programs as well as any other programs that might be transferred by legislation. The remainder of the RFC public agency loan program was transferred to this fund in 1958.

The $21 million of net assets remaining on June 30, 1963 was largely bonds of local governments. The budget program consists of the accounting, servicing, and collection activities related to these assets. By the end of 1965, cumulative repayments to Treasury will total $893 million. The following schedule shows the Government's investment at the end of each year (in thousands of dollars):

URBAN RENEWAL

Federal assistance to local governments for acquisition, clearance, redevelopment, and rehabilitation of slums and blighted areas was authorized by the Housing Act of 1949, as amended (42 U.S.C. 1453). Federal grants may defray two-thirds of the net project cost, except in cities with a population of less than 50,000 (or 150,000 if located in a redevelopment area as designated by the Area Redevelopment Administration) where the Federal share is three-fourths for projects approved after June 30, 1961.

The authorization to make contracts for urban renewal grants now totals $4 billion, of which $25 million has been available for mass transportation grants. Temporary project financing and long-term financing of land disposed of under lease agreements through direct or guaranteed loans are provided from a Treasury borrowing authorization of $1 billion.

Before Federal assistance is extended, a community is required to develop a workable program for community improvement, which is a communitywide plan of action utilizing local resources, both public and private, to eliminate and prevent slums and blight and to foster local development. Acceptable programs are certified by the Administrator for 1 year. Annual recertification, based on demonstrated satisfactory progress, is required for continued eligibility for additional Federal assistance. The budget is based on the following volume of workable program activity:

Contract authorization	----------	1,400,000	----------
Unfunded balance carried forward	−3,015,555	−4,310,750	−4,045,750
Appropriation to liquidate contract authorization:			
Direct appropriation	300,000	100,000	265,000
Transferred from "Mass transportation loans and grants," Office of the Administrator (42 U.S.C. 1453)	19,766	4,805	----------
Appropriation to liquidate contract authorization (adjusted)	**319,766**	**104,805**	**265,000**
Applied to liquidation of contract authorization	**319,710**	**104,805**	**265,000**
Lapsing	**56**	----------	----------

Budget program.—New reservations and adjustments in existing reservations will total $700 million net in 1965. This assumes the enactment of additional authorization in the amount of $1.4 billion, making the total authorization $5.4 billion. An administrative reservation of contract authority for grants is made at the time of approval of each urban renewal project (including the estimated cost of relocation payments), community renewal program, and urban renewal or mass transportation demonstration.

1. *Projects.*—Urban renewal projects are usually approved for grant reservation at the beginning of the planning period. In the case of general neighborhood renewal plans, which cover a larger or more complex area from which more than one project is expected to develop, reservations are made for the first project when approval is initially given for preparation of the overall plan. The reservation assures the availability of grant assistance when it is needed after the substantial community activity required for planning an urban renewal project. The following table reflects planning activity for urban renewal projects, including general neighborhood renewal plans:

	Cumulative as of June 30, 1962	*1963 actual*	*1964 estimate*	*1965 estimate*
Net new approvals	1,069	226	245	260
Planning completed	614	103	165	200
Planning in process, end of year	455	578	658	718

When a project is ready to enter the execution phase, a loan and grant contract is drawn between the community and the Housing and Home Finance Agency. In addition to a statement of the community's responsibility for carrying out the project in accordance with the general plan, the contract provides for progress grant payments based on extent of performance and for Federal or federally guaranteed lending for working capital. The number of projects in execution is shown in the following table:

	Cumulative as of June 30, 1962	*1963 actual*	*1964 estimate*	*1965 estimate*
Projects approved for loan and grant	629	103	165	200
Projects completed (Federal closeout)	81	25	51	65
Projects active, end of year	548	626	740	875

2. *Relocation.*—Grants also are provided to reimburse the community for relocation payments made to families and businesses displaced from urban renewal areas, including actual direct losses of property not otherwise compensated for. A maximum of $200 per family and the actual certified costs, not in excess of $25 thousand per business, are allowable. The payments estimated for 1965 assume enactment of legislation to be proposed to provide additional relocation payments under certain circumstances.

3. *Urban renewal demonstration.*—Grants up to two-thirds of the total cost of demonstration projects are available to public bodies. A demonstration project may involve the development and testing of new or improved methods of blight prevention and elimination, together with an analysis and report of the demonstration. These reports are published to help guide renewal programs in other cities.

4. *Community renewal.*—Federal grants are available to pay up to two-thirds of the cost incurred in preparing a local community renewal program covering the full range of urban renewal action required to meet needs on a city-wide basis. All the deteriorated and deteriorating areas of the city can be identified and classified as to the relative urgency and degree of urban renewal action needed. The locality's resources for taking urban renewal action can be established and the community can develop a long-range program for urban renewal, including provision of related public improvements. The following table shows estimated community renewal program activity (dollars in millions):

	Cumulative as of June 30, 1962	*1963 actua*	*1964 estimate*	*1965 estimate*
Net approvals	57	40	50	55
Community renewal programs completed	----	1	20	35
Active, end of year	57	96	126	146
Grants approved in year	$8.0	$4.3	$5.5	$6.5

Progress and final grant payments for urban renewal activities are expected to reach a cumulative total of $1,320.3 million by the end of 1965, requiring a grant appropriation of $265 million in the budget year.

6. *Mass transportation demonstration.*—Grants to assist mass transportation demonstration projects, which are aimed at demonstrating methods of reducing urban transportation needs and providing improved mass transportation services, are authorized by the Housing Act of 1961 in an amount limited to $25 million of the contract authority provided in title I of the Housing Act of 1949, as amended. This program is described under General and special funds.

Budget expenditures	173,208	251,567	329,700

Budget program.—The Treasury borrowing authority of $1 billion is available for loan assistance to finance the planning and execution of urban renewal projects through the following types of commitments:

1. *Planning advances.*—Advances provide for costs directly associated with project planning. They are repayable, with interest, from funds made available to the projects during execution.

2. *Temporary loans.*—These are short-term direct Federal loans to provide initial financing for projects under contract. Thereafter, the local public agency generally relies upon private borrowings secured by pledge of the Federal loan commitment. Temporary loans are repaid from the proceeds of land sales and from local and Federal cash grants.

3. *Definitive loans.*—Definitive loans permit the disposition of project land through long-term leases in lieu of sale, at the option of the community. In such cases, commitments are issued to secure private financing for the net value of redeveloped land.

The loan commitments cover total expenditures by the local public agency in carrying out the project. Both the statute and experience recognize that only a minor portion of the Federal loan commitment is outstanding at any one time as direct Federal loans, and demand on Federal funds will not equal or even approach commitments made because: (a) project expenditures take place over several years; (b) early borrowings are progressively retired with funds provided from local and Federal grants and from the sale of land; and (c) private financing (guaranteed with a pledge of the Federal loan commitment) is relied upon as the major source of funds for temporary loans and definitive loans. Cumulative loan commitments will be $4,250.7 million by the end of 1965 but this amount will be reduced by $1,390 million in repayments and commitment waivers resulting in a net outstanding commitment of

Digitized for FRASER
https://fraser.stlouisfed.org
Federal Reserve Bank of St. Louis

$2,860.7 million. The maximum Federal exposure (i.e., maximum demand for Federal loans at any one time) is estimated at $650 million on June 30, 1965.

The following table shows the status of loan commitments outstanding at the end of each of the years covered by the budget (in thousands of dollars):

	1963 actual	*1964 estimate*	*1965 estimate*
Total outstanding Federal loans and loan commitments, end of year	1,838,182	2,312,472	2,860,722
Federal loans and advances outstanding	129,471	147,471	165,471
Guaranteed non-Federal loans outstanding	1,038,410	1,286,710	1,632,260
Unutilized undisbursed commitments	670,301	878,291	1,062,991

Financing.—Borrowing authority previously committed is replenished by means of: (a) Repayment of planning advances; (b) repayment of temporary loans from project settlement funds (which include proceeds from the sale of land and Federal and local grants); (c) cancellation of temporary loan commitments; and (d) retirement of commitments due to the repayment of guaranteed non-Federal loans from project settlement funds.

The ratio of Federal exposure to temporary loan commitments set by the Administrator is estimated at 20% in 1964 and 1965. Planning advance commitments are included at 100%. Repayments of Federal temporary loans from the proceeds of non-Federal guaranteed loans are not reflected on the program and financing statement because the reduction in Federal loan balances is offset by an increase in undisbursed commitments. Such repayments are shown in the statement of sources and application of funds.

Operating results.—The use of grant appropriations is authorized to repay Treasury borrowing, in order to avoid the creation of a deficit through a disparity between interest earnings and the losses on planning advances and interest for terminated projects. The deficit resulting from capital grant payments and from uncollectible planning advances for terminated projects has been offset by the appropriation of funds for such purpose as shown in the following table (in thousands of dollars):

	1963 actual	*1964 estimate*	*1965 estimate*

The Atomic Energy Community Act of 1955 (42 U.S.C. 2301), providing for the disposition of Government-owned properties at Oak Ridge, Tenn., and Richland, Wash., was amended early in 1963 (76 Stat. 664) to provide for the disposal of federally owned properties at Los Alamos, N. Mex. Sales and financing functions are delegated to the Housing and Home Finance Administrator.

Budget program.—At the beginning of the current year, only 19 properties with an appraised value of $660 thousand remained out of the 12 thousand properties appraised at $80 million in the Oak Ridge and Richland disposal programs. There also remained $3.7 million in purchase-money mortgages out of the $33 million written in the course of sales. These assets will have been disposed of by June 30, 1965.

Predisposition work is underway at Los Alamos, covering the planning, zoning, platting, and property classification which precede appraisal and sales efforts. Current costs of this work—estimated at $543 thousand in 1964 and $230 thousand in 1965—add to the operating deficit, but will be recovered after the first offerings of residential properties occur in the fourth quarter of 1965.

Operating results.—An adjustment of retained earnings, as previously recorded, was made at the beginning of 1963 to reflect a shift in the valuation base from appraised value to book value as carried on the books of the Atomic Energy Commission and to include statutory allowances to priority purchasers as part of the accumulated deficit. Cumulative program results at the close of the years covered by this budget are as follows (in thousands of dollars):

	1963 actual	*1964 estimate*	*1965 estimate*
Assets transferred from AEC at book value	75,773	76,024	76,094
Excess of appraised value over book value	4,557	5,194	5,234

Direct long-term loans at low interest rates to assist in financing the new construction of rental housing and related facilities for the elderly are authorized by the Housing Act of 1959, as amended (12 U.S.C. 1701q et seq.). Loans may be extended to private nonprofit corporate sponsors, cooperatives, and those public bodies and agencies which certify they are not receiving Federal financial assistance exclusively for public housing. The program is intended to provide housing for those elderly persons and families whose incomes are too high for public housing but not sufficient to meet the cost of private rental housing.

Loans may be made for the total development cost and may run for as long as 50 years. Interest rates are based on a statutory formula and are limited to the higher of either 2.75% or 0.25% above the average interest rate on all interest bearing obligations forming part of the Federal debt. The 1964 rate is 3⅝%.

Budget program.—Net loan reservations are estimated at $75 million for the current year and $100 million for the budget year. A loan reservation is made after preliminary review of an application filed to determine the general eligibility and feasibility of a project. The reservation assures availability of loan funds to the applicant at the completion of Agency review of the loan application. Reservations are converted into loan contracts after comprehensive Agency review of engineering, architectural, financing, and legal aspects of proposed projects. Principal workload items are set forth in the following table:

	1963 actual	*1964 estimate*	*1965 estimate*
Applications:			
Received	65	65	95
Disapproved or withdrawn	42	10	10
Gross reservations	70	57	75
Preconstruction:			
Loan agreements executed	31	65	70
Contract awards approved	22	55	70
Construction:			
Starts	22	55	70
Completions	11	25	55

Financing.—The program is financed by a revolving fund which is initially supported by direct appropriations. Appropriations of $275 million have been authorized. The budget assumes legislation to further increase this authorization. To date, $250 million has been appropriated. The budget year estimate for appropriation is $75 million of which $50 million would be provided under proposed legislation. The following table shows the relationship of this program to available funds (in thousands of dollars):

	1963 actual	*1964 estimate*	*1965 estimate*
Balance available, start	13,006	405	25,472
Appropriations	70,000	100,000	75,000
Net expense or income	−326	67	1,823
Total funds available	82,680	100,472	102,295
Net loan reservations	82,275	75,000	100,000
Balance available, end	405	25,472	2,295

Operating results.—Interest income during the budget year is expected to be sufficient to cover administrative costs of operating the program and provision for losses and to eliminate the cumulative deficit.

The Administrator is authorized to borrow up to $500 million, plus such additional amounts as the President shall approve, from the Secretary of the Treasury in the furtherance of the programs enacted in the Federal Flood Insurance Act of 1956. No borrowings have been made and none are proposed.

FEDERAL NATIONAL MORTGAGE ASSOCIATION

The Association, operating under the Federal National Mortgage Association Charter Act (12 U.S.C. 1716, et seq.) purchases, manages, and sells residential mortgages that are insured by the Federal Housing Administration or guaranteed by the Veterans Administration and makes short-term bank-type loans that are secured by those types of mortgages; it also manages and sells certain noninsured or nonguaranteed mortgages that have been or may be acquired from authorized sources. The Association's functions are carried out through three programs for which separate accountability is required by statute. These programs—secondary market operations, special assistance functions, and management and liquidating functions—are described in the following sections:

Note.—Expenditures from the following funds for 1964 are subject to the first paragraph of title II of the Independent Offices Appropriation Act, 1964. For 1965, this paragraph is shown in the Independent Agencies chapter, p. 822.

The secondary market operations of the Federal National Mortgage Association were authorized by the Housing Act of 1954 to provide limited liquidity for Government insured and guaranteed mortgages and to improve the distribution of investment capital available for home mortgage financing. This assistance to the secondary market for home mortgages is provided by the purchase and sale of mortgages insured by the Federal Housing Administration or guaranteed by the Veterans Administration on or after August 2, 1954, that are of such

quality, type, and class as meet, generally, the purchase standards imposed by private institutional mortgage investors. Purchases and sales may be made only at such prices and on such terms as will reasonably prevent excessive use of the Association's facilities and will permit the Association to operate on a fully self-supporting basis.

The Association, under its secondary market operations, was authorized by the Housing Act of 1961 (Public Law 87–70, approved June 30, 1961) to make short-term loans secured by FHA-insured or VA-guaranteed mortgages. Such loans are intended to further home construction by providing a degree of liquidity for mortgage investments and, generally, to provide supplementary assistance to the general secondary market.

The secondary market operations were initially capitalized by the issuance of $92.8 million of Federal National Mortgage Association preferred stock to the Secretary of the Treasury. Subsequently, additional preferred stock subscriptions by the Secretary of the Treasury, amounting to $50 million (Public Law 85–10, approved Mar. 27, 1957) and $65 million (Public Law 85–104, approved July 12, 1957) were authorized. Authorized preferred stock has actually been issued only as needed to support the Association's borrowings. At the end of 1963, authorized unissued stock amounted to $49 million. These estimates contemplate that no additional preferred stock will be issued in either 1964 or 1965.

The authorizing statute contemplates that the secondary market operations will ultimately be completely owned and financed by private participants. To that end, the preferred stock will be retired as rapidly as feasible and, in the meantime, the Association will pay dividends on the utilized portion to the Treasury at rates which will not be less than those determined by the Secretary of the Treasury. These estimates contemplate that no preferred stock will be retired in either 1964 or 1965. However, under arrangements entered into between the Secretary of the Treasury and the Federal National Mortgage Association, FNMA will purchase from the Secretary that portion of the Association's outstanding preferred stock which is not deemed to be required in the financing of the secondary market operations and will hold such stock as FNMA treasury stock, subject to subsequent repurchase by the Secretary as may be required for these operations. Under these arrangements, $100.8 million of preferred stock will be purchased from the Secretary during 1964.

Private capitalization for these operations is accumulated pursuant to a statutory requirement which provides that sellers of mortgages to the Association must make payments into capital incident to subscriptions for common stock in an amount equal to not more than 2% nor less than 1% of the unpaid principal amounts of the mortgages involved, as determined from time to time by the Association, taking into consideration conditions in the mortgage market and the general economy. Borrowers from the Association are required to make capital contributions in an amount equal to not more than one-half of 1% of the amounts borrowed.

Recommendations for legislation to transfer ownership of the Association to private owners of the capital stock must be submitted to the Congress as promptly as practicable after all the Treasury-held preferred stock has been retired. Meanwhile, the present interim program, financed by private as well as by Government investment funds, is treated in the budget as a trust enterprise and the financial statements related thereto appear in part III of this document.

The Association is authorized to finance its secondary market operations through borrowing from the public on the security of nonguaranteed debentures and short-term discount notes. Such obligations may not exceed the lesser of: (a) ten times the sum of the capital and surplus applicable to these operations, or (b) the sum of assets free from any liens or encumbrances, of cash, mortgages, or other security holdings and obligations of the United States or guaranteed thereby, or obligations which are lawful investments for fiduciary, trust, or public funds. The Secretary of the Treasury, so long as the preferred stock is outstanding, is authorized to purchase such obligations in an amount not exceeding $2.25 billion outstanding at any one time.

Budget program.—The secondary market operations established in 1955, are now fully recognized by the home mortgage market and have reached significant levels. As a result of the abundant supply of funds available for long-term investment in residential mortgages during 1963, mortgage sales far exceeded the sales volume of any previous year, and purchases declined. Purchases in 1964 are estimated at about the level of 1963, but are expected to increase materially in 1965. Sales in both 1964 and 1965 are estimated to be substantially less than those of 1963. The excess of mortgage purchases over sales and other liquidations in 1965 will result in a net increase of portfolio during that year as compared with 1964 and 1963.

In addition to the mortgages which it purchases in the regular manner, the Association also acquires, from the Federal Housing Administration, Commissioner-owned mortgages in exchange at par (100) for FNMA-held FHA debentures. The volume of mortgages so acquired was $85.5 million in 1963, and is estimated to amount to $120 million in 1964 and $40 million in 1965.

Financing.—Funds required to finance the secondary market operations during 1964 and 1965 will be obtained from (1) redemptions of investments in Treasury bills and securities of other Government agencies acquired in 1963 and 1964, (2) proceeds from the sale of mortgages to the investing public, (3) capital contributions by program participants, (4) sales of debentures to private investors, (5) repayments and prepayments of mortgage principal, and (6) earnings. Such interim Treasury borrowings as will be necessary during 1964 and 1965, will be repaid during each of those years.

Operating results.—Operations are reflected in budget expenditures only to the extent of Treasury financing.

The Federal National Mortgage Association is authorized to provide special assistance to the extent that the President has determined that it is in the public interest for the financing of (1) selected types of home mortgages pending establishment of their marketability and (2) home mortgages generally as a means of retarding or stopping a decline in mortgage-lending and homebuilding activities which threatens materially the stability of a high level national economy.

The Association is authorized under the Presidential authority to make commitments to purchase and to purchase Federal Housing insured and Veterans Administration guaranteed mortgages totaling $2,363 million, outstanding at any one time. At the end of 1963, the amount of special assistance authority for these purposes aggregated $2,217 million. The increase resulted from the transfer at the beginning of 1964, pursuant to the provisions of Public Law 87–70, of $146 million of authority

FEDERAL NATIONAL MORTGAGE ASSOCIATION—Continued

Public enterprise funds—Continued

SPECIAL ASSISTANCE FUNCTIONS—Continued

SPECIAL ASSISTANCE FUNCTIONS FUND—continued

from the management and liquidating functions, representing the net amount by which that portfolio was decreased during 1963. The special assistance authority will be further increased by $115 million to $2,478 million at the beginning of 1965, such increase being the net amount by which the portfolio of the management and liquidating functions will be reduced during 1964.

In addition to the Association's authority to conduct special assistance programs by direction of the President, the Congress has expressly authorized FNMA under its special assistance functions, to issue commitments to purchase and to purchase (1) cooperative housing mortgages insured under section 213 of the National Housing Act, as amended, up to a limit of $225 million outstanding at any one time; (2) armed services housing mortgages for military personnel and civilian employees under title VIII of that act, up to a limit of $500 million outstanding at any one time; and (3) Federal Housing Administration insured and Veterans Administration guaranteed mortgages of $13,500 or less covering low- and moderate-priced housing on which construction had not commenced at the time application was made for Federal National Mortgage Association's commitments. This program, for which commitment and purchasing authority was limited to $1 billion outstanding at any one time, was terminated by Public Law 87–70 on June 30, 1961.

The $1,725 million of special assistance authority provided by the three described congressional programs has been reduced by $490.4 million to $1,234.6 million as of June 30, 1963, pursuant to the provisions of Public Law 87–70. The decrease is represented by the cancellation of the commitment and purchasing authority remaining unused at June 30, 1961, under the program for low- and moderate-priced housing mortgages ($207.2 million) and an amount equal to the principal reduction since June 1961 of the mortgages owned by the Association under the terminated program ($283.2 million).

The prices paid for mortgages under these functions are established by the Association at the time of the announcement of each individual program, but they may be adjusted thereafter from time to time. Purchase prices have also at times been fixed by statute. The prices that FNMA will currently pay for mortgages or home improvement loans offered pursuant to immediate purchase contracts or commitment contracts range from 99½ to 100.

Federal National Mortgage Association's special assistance functions are financed principally by Treasury borrowings, and all the benefits and burdens of the program inure solely to the Secretary of the Treasury.

Budget program.—During 1965, commitments to purchase mortgages are estimated to increase over the 1964 level by $155 million, to $500 million. Purchases, which lag well behind commitments, will increase by $30 million, to $100 million, primarily for below-market-interest-rate mortgages on rental and cooperative housing for moderate income families.

In addition to the mortgages which it regularly purchased under specified special programs in 1963, the Association also acquired from the Federal Housing Administration, $26.3 million of Commissioner-owned mortgages in exchange at par (100) for Federal National Mortgage Association-held Federal Housing Administration debentures. No such transactions are projected for 1964 and 1965.

Sales from portfolio, which amounted to $293.9 million in 1963, are estimated at $350 million during 1964 and $350 million in 1965.

Financing.—Net repayments to the Treasury were $299 million in 1963 and are estimated at $375 million in 1964 and $313 million in 1965, thereby decreasing the interest-bearing investment of the Government to an estimated $857 million at the end of 1965.

Operating results.—Previously, earnings were retained and paid into miscellaneous receipts of the Treasury following the year earned. A payment of $189 thousand was made in 1957, and another payment of $2,445 thousand was made in 1958. In order to protect the Association against losses inherent in a portfolio of this size, earnings will be retained and accumulated for so long as may be warranted. The following table shows the cumulative amounts at the end of each year covered by these estimates (in thousands of dollars):

[1] Balances of selected resources are identified on the statement of financial condition.

The Association, in its management and liquidating functions, is required by law to manage and liquidate its portfolio of mortgages acquired under contracts made before November 1, 1954, and those other mortgages that have been or may be acquired from authorized sources (Public Law 86–372). Such liquidation is to be conducted in an orderly manner, with a minimum of adverse effect upon the home mortgage market and minimum loss to the Federal Government. Liquidation of the portfolio is accomplished through regular principal repayments according to their amortization schedules, sales of mortgages as rapidly as they can be absorbed by private investors without serious disruption of normal market conditions, and as the result of other principal credits arising from prepayments and foreclosures.

The initial mortgage purchasing phase of this activity has been completed and normally only the management and ultimate liquidation of the portfolio would need to be completed. However, additional mortgages will be acquired from the constituent units or agencies of HHFA for this portfolio from time to time pursuant to the provisions of Public Law 86–372. Under this authority the Administrator must determine that such acquisitions are in the interest of efficient management and liquidation of the mortgages.

Under the provisions of Public Law 87–70, approved June 30, 1961, an amount equal to the net decrease for the preceding fiscal year in the aggregate principal amount of all mortgages owned by the Association under its management and liquidating functions will as of July 1 of each of the years 1961 through 1964, be transferred to and merged with the Presidential authority provided for the Association's special assistance functions. The amounts transferred on July 1, 1961, 1962, and 1963 were $140 million; $170 million and $146 million, respectively; the amount estimated to be transferred on July 1, 1964 is $115 million.

Budget program.—There will be no mortgages purchased under commitments made prior to November 1, 1954 for this portfolio during the period covered by these estimates. That purchasing program was completed during 1958.

During 1963, acquisitions under Public Law 86–372 were $36 thousand, and these acquisitions are estimated at $150 thousand for 1964. However, it is estimated that during 1965 FNMA will acquire $210 million of Commissioner-owned mortgages from the Federal Housing Administration for resale under the management and liquidating functions; and that $150 million of such mortgages will be resold during 1965.

During 1963, the Association also acquired $9.9 million of Commissioner-owned mortgages from the Federal Housing Administration in exchange at par (100) for FNMA-held FHA debentures. During 1964, it is estimated that approximately $55 million of mortgages will be acquired in exchange for FHA debentures in this manner. No such transactions are projected for 1965.

Mortgages in the amount of $14.3 million were sold during 1963. Sales are estimated to increase to $50 million in 1964, and to $170 million in 1965. As noted above, $150 million of the 1965 sales are expected to involve mortgages that were acquired from FHA during that year.

During the period covered by these budget estimates there will be only interim Treasury borrowings; net repayments of Treasury borrowings which were $151.8 million in 1963, are estimated at $147.0 million and $74.5 million in 1964 and 1965, respectively.

Operating results.—Due principally to the increase in income anticipated from the estimated sharp increase in sales of mortgages from the management and liquidating functions portfolio during 1965, estimated net income in 1965 ($4.2 million) will increase over the amount estimated for 1964 ($3.3 million); the decline from 1963 ($5.1 million) to 1964 ($3.3 million) will be due primarily to the net reduction in the outstanding portfolio of the management and liquidating functions during this period.

All benefits and burdens of the management and liquidating functions inure solely to the Secretary of the Treasury. Retained earnings reserved for losses and contingencies at the end of 1963 amounted to $119.7 million and are estimated at $108 million and $104

million, respectively, for 1964 and 1965. The reduction in the amount outstanding at the end of 1962 and 1963 resulted from payments of $40 million and $25 million, respectively, during these years from earnings to the U.S. Treasury, an amount which was considered to be in excess of the Association's needs for losses and contingencies. Similarly, it is estimated that the Association will pay $15 million to the U.S. Treasury in 1964, and $8 million in 1965.

POSITION WITH RESPECT TO MORTGAGE PURCHASE AUTHORITY

[In thousands of dollars]

	1963 actual	*1964 estimate*	*1965 estimate*
Mortgage purchase authority: Mortgages outstanding at beginning of year	1,416,646	1,270,618	1,155,618
Charges against authority: Mortgages outstanding at end of year	1,270,618	1,155,618	1,075,618
Authority available for transfer to the special assistance functions [1]	146,028	115,000	----------
Authority lapsing [2]	----------	----------	80,000

[1] The Housing Act of 1961, 75 Stat. 176, requires that, as of July 1 of each of the years 1961 through 1964, the amount of the net decrease for the preceding year in the aggregate principal amount of all mortgages owned by the Association in its management and liquidating functions be transferred to and merged with the mortgage purchase authority provided under the Association's special assistance functions, and that the mortgage purchase authority in those functions be increased by the amounts so transferred.

[2] On and after Nov. 1, 1954, pursuant to Public Law 560, the Federal National Mortgage Association's mortgage purchase authority is the total of its mortgage portfolio and its outstanding commitment contracts in the management and liquidating functions.

Under proposed legislation.—Legislation will be proposed to authorize the sale of certificates of participation in pools of mortgages held by the Federal National Mortgage Association and the Veterans Administration. Such sales will have the effect of reducing budget expenditures. In 1965, it is estimated that $200 million of sales will be made against FNMA mortgage holdings.

[1] Balances of selected resources are identified on the statement of financial condition.

The Federal Housing Administration, created by the National Housing Act of 1934, is a noncorporate business-type agency, which was brought under the Government Corporation Control Act by the Housing Act of 1948. The principal purposes of FHA are to improve home financing practices, to improve housing standards and conditions, and to further home ownership. These objectives are achieved through the insurance of loans for financing the production, purchase, repair, and improvement of residential properties. At the end of 1963, nearly $85 billion of insurance had been written, with $42 billion of insured loans in force. During 1963 more than $7 billion of insurance was written, covering 480,576 units of housing and 782,018 title I home improvement loans. An estimated $8 billion of insurance will be written each year during 1964 and 1965.

FHA loan insurance is now administered through 24 different active programs. In addition, maintenance and settlement work continues under eight programs for which the authority to insure additional loans has expired. The various programs are identified in the table below, which also shows the amount of insurance written under the individual programs and the amount in force at the end of 1963.

FEDERAL HOUSING ADMINISTRATION—Con.

Public enterprise funds—Continued

FEDERAL HOUSING ADMINISTRATION FUND—Continued

For financial purposes, the agency's programs are grouped under 15 separate insurance funds and accounts established by statute. Income from fees, premiums, and investments are credited to the funds; operating expenses and expenses and losses connected with foreclosed property and defaulted notes and mortgages are charged to the funds. Through June 30, 1963, income had amounted to $2.7 billion, and expenses and losses had totaled $1.6 billion, leaving a reserve of $1.1 billion for the payment of future expenses and losses. The largest insurance fund is the mutual mortgage fund for the insurance of mortgage loans on homes under section 203. Other insurance funds cover the insurance of loans on home repairs and improvements; on basic and special-purpose multifamily housing, including cooperatives, housing for the elderly, and nursing homes; on urban renewal and middle-income housing; on armed services housing; and on war and defense housing. The mutual mortgage insurance fund differs from the other funds in that mortgagors at termination of their mortgages, as authorized by statute, may share in the rebate of premiums paid into the fund which are not required for expenses or losses. Through June 30, 1963, such participation payments to home owners had amounted to $158 million with $163 million reserved for future payments or losses.

Budget program.—The FHA budget request for 1965 is embodied in an administrative limitation covering those expenses of the central office related to (1) the general direction of operations, (2) the establishment of policies and procedures, and (3) the provision of housekeeping services for the entire agency, and a nonadministrative limitation covering the operating activities carried on in both the central office and the field relating to (1) the initiation of insurance, (2) the maintenance of insurance on the books, and (3) the settlement activities associated with (a) the payment of claims, (b) the acquisition, management, and disposition of mortgages and properties acquired under insurance contracts, and (c) with the liquidation of home improvement notes. Anticipated program developments for 1965 are summarized in the table below, which also includes estimates for 1964 and actual data for 1963.

PROGRAM HIGHLIGHTS

[Dollars in millions]

	1963 actual	*1964 estimate*	*1965 estimate*
Insurance initiation:			
Mortgage insurance applications:			
Applications received (units)	926,229	950,000	990,000

Amount	$899	$1,095	$1,138
Defaulted title I home improvement loans:			
Number	80,355	84,485	87,558
Amount	$52	$55	$57
Income, costs, and reserves:			
Income, recoveries, and increase in net asset value of security acquired:			
Fee and premium income	$246	$273	$290
Other income	$43	$39	$41
Cash recoveries	$212	$402	$634
Increase in net asset value of acquired security (properties, mortgages, and title I notes and sales contracts)	$169	$101	−$107
Total	$670	$815	$858
Operating costs and capital outlay:			
Operating costs	$100	$105	$112
Capital outlay	$515	$649	$666
Total program costs	$615	$754	$778
Excess of income, recoveries and asset value over costs	$55	$61	$80
Insurance reserves, end of year	$1,144	$1,205	$1,285
Obligations under limitation:			
Administrative	$10.7	$9.5	$10.4
Nonadministrative	$69.1	$76.6	$79.8
Total obligations under limitation	$79.8	$86.1	$90.1

The major activities of the agency are grouped under the categories of insurance initiation, insurance maintenance, insurance settlement, and financial operations.

Insurance initiation.—The major initiation activities, which currently account for about three-fourths of the total expense under the nonadministrative limitation, are the examination of applications for insurance, the inspection of properties under construction, and the recording of new insurance contracts—including home improvement loans—in the agency records. The number of applications for loan insurance received under the various agency programs is a reflection of the initiation work of the agency as a whole and the number received under each program is a reflection of the current status of individual programs. The total number of applications for mortgage insurance is expected to increase from 926,229 in 1963, to 950,000 in 1964, and to 990,000 in 1965. The estimated increase from 1964 to 1965 is accounted for largely by section 203, which continues as the single most

https://fraser.stlouisfed.org
Federal Reserve Bank of St. Louis

important FHA program, and the section 221(d)(3) below-market rate program of middle-income rental housing introduced by the Housing Act of 1961.

Insurance maintenance.—Maintenance activities, which currently account for about 6 percent of all expenses under the nonadministrative limitation, relate generally to the servicing of insurance on the books, such as billing mortgagees for premiums due, recording changes in mortgagees, making participation payments from the mutual mortgage insurance fund, terminating insurance contracts, inspecting insured rental projects, and analyzing annual financial reports on such projects. These are cumulative workloads increasing each year with the growth of insurance in force. At the end of 1963 insurance in force had reached the total of $42 billion. The table above shows the distribution by program of insurance in force at that time. Section 203 accounted for 71% of the total, with the expired programs, under which additional insurance contracts are no longer written, still accounting for 11% of the total in force.

Insurance settlement.—Settlement activities, which currently account for about one-fifth of the total expense under the nonadministrative limitation, include the acquisition of properties, mortgages, and home improvement notes under insurance contracts; the repair, management, and sale of acquired properties; the payment, largely in debentures, of claims under insurance contracts; the servicing and sale of mortgages acquired as a part of some sales transactions; and the accounting work arising out of the other settlement activities. The number of properties and mortgages acquired in any year, the number on hand, and the number sold during the year constitute a suitable index of the settlement workload. The total number of properties acquired under insurance contracts, expressed in dwelling units, is estimated to increase from 38,000 units in 1963 to 48,700 in 1964 and to 50,700 in 1965. With property acquisitions exceeding sales, property on hand would increase from 67,400 units at the end of 1963 to an estimated 80,900 units at the end of 1964 and to an estimated 83,800 units at the end of 1965. The total of assigned mortgages, also expressed in dwelling units, is expected to increase from 31,700 units at the end of 1963 to 34,700 at the end of 1964 and to 37,000 at the end of 1965.

Financing.—Mortgage insurance claims are met by the issuance of debentures which are subsequently redeemed out of income and proceeds from the sale of acquired properties and mortgages. In 1963, $433 million of debentures were issued. Debentures to be issued in 1964 are estimated at $546 million, and in 1965 at $556 million. Debentures were retired in 1963 in the amount of $270 million. Retirement of debentures in 1964 and 1965 are estimated at $404 million and $600 million, respectively.

Retained earnings.—Operations in 1963 resulted in earnings of $75 million, of which $71 million was distributed to the general surplus account and $4 million to the general insurance reserves under various insurance funds. Insurance reserves increased to $1.1 billion during 1963 and are expected to reach $1.2 billion during 1964 and $1.3 billion during 1965.

Insurance authority.—The general mortgage insurance authorization, section 217, which applies to all mortgage insurance programs except section 221 and title VIII, expires October 1, 1965. The housing repair and improvement insurance authorization, title I, section 2, expires at the same time.

The authority to insure sales or rental housing, with respect to the moderate-income housing program under section 221, expires July 1, 1965, except that there is no time limitation for families displaced from urban renewal areas or as a result of other governmental action.

The armed services housing insurance authorization, covering sections 809 and 810, also expires October 1, 1965. A further limitation of $2.3 billion in insurance issued covers sections 803, 809, and 810, effective from the date of Public Law 84–345, August 11, 1955.

[1] Balances of selected resources are identified on the statement of financial condition.

The United States Housing Act of 1937, as amended (42 U.S.C. 1401 et seq.), provides for a low rent public housing program comprising decent, safe, and sanitary dwellings within the financial reach of families of low income. Such housing is locally owned and operated by local housing authorities created under State law. The Public Housing Administration is responsible for administering this program. The Administration makes loans and annual contributions to local housing authorities to assist in financing the construction of low rent housing projects and in maintaining their low rent character after completion and occupancy.

Recent modifications of the United States Housing Act of 1937 were made in the Housing Act of 1961 (Public Law 87–70), which among other things (1) made available the remaining balance of the $336 million annual contribution authorization contained in the Housing Act of 1949; (2) authorized increased contributions, within the $336 million limitation, with respect to certain dwelling units occupied by elderly tenants of particularly low income; and (3)

gave localities greater flexibility in shaping admission policies in such a way as to best meet their own particular local problems.

Budget program—Development.—While not explicitly related to any specific number of dwelling units, the Housing Act of 1961 provides for approximately 100,000 additional units. Under this authorization 61,570 units had been placed under annual contribution contracts at June 30, 1963. The budget plans contemplate that the remaining units under this authorization will be placed under annual contributions contracts during 1964.

The 1965 budget assumes that new legislation will be enacted in 1964 increasing the authorization for annual contributions to continue the current low-rent program at the annual level of 35,000 dwellings.

A 3-year comparison of the workload accomplishments and of the status of the program by stage are presented in the following tabulations:

WORKLOAD ACCOMPLISHMENTS

[Dwelling units]

	1963 actual	*1964 estimate*	*1965 estimate*
Program reservations issued	48,554	10,000	40,000
Preliminary loan contracts executed	28,420	30,000	40,000
Annual contributions contracts executed	38,648	38,500	35,000
Construction started	20,927	35,000	45,000
Made available for occupancy	26,368	35,000	45,000

STATUS BY STAGE

[Dwelling units]

Stage	*1963 actual*	*1964 estimate*	*1965 estimate*
Program reservation	22,066	2,066	2,066
Preliminary loan contract	21,192	12,692	17,692
Annual contributions contract	98,551	102,051	92,051
Construction	40,399	40,399	40,399
Occupancy	538,316	573,316	618,316

Management.—The following table summarizes the annual contributions required to ensure the low rent character of locally owned projects assisted by this program:

[Dollars in thousands]

	1963 actual	*1964 estimate*	*1965 estimate*
Number of projects	3,099	3,330	3,691
Number of units	511,047	536,573	563,563
Fixed annual contributions	$192,859	$210,355	$228,626
Deduct amounts available to reduce fixed annual contributions:			
Accrued interest	2,571	2,788	2,960
Capitalized interest	4,442	3,356	3,354
Residual receipts, end of initial operating period	382	381	448
Residual receipts, current period	13,440	12,328	13,816
Other	88	-------	-------
Total amount available to reduce fixed annual contributions	20,923	18,853	20,578
Annual contributions requirements	171,936	191,502	208,048
Add: Subsidy for elderly	4,549	5,513	6,000
Total requirements	176,485	197,015	214,048
Adjusted	-------	197,000	214,000

Increased annual contributions requirements in 1964 and 1965, are attributed largely (1) to an increased number of units eligible for annual contributions resulting from the completion and permanent financing of new projects, and (2) to the increased contributions authorized in the Housing Act of 1961 with respect to dwelling units occupied by elderly families and persons. The Public Housing Administration may make payments up to $336 million per annum. The maximum amount of annual contributions which the Administration will be committed to pay with respect to contracts executed as of June 30, 1963, is estimated at $296.5 million, leaving $39.5 million of uncommitted authority to pay annual contributions, including the increased payments for the elderly, which are estimated at $5.5 million in 1964 and $6 million in 1965.

Administrative expenses.—Administrative expenses for the low rent public housing program are financed by appropriation. The obligations incurred for these expenses amounted to $14,826 thousand in 1963. For 1964 the amount of $15,484 thousand has been appropriated. The estimate for 1965 is $16,670 thousand.

Administrative expenses are related primarily to the provision of technical advice and assistance to local housing authorities in the development and management of low rent housing projects and to the auditing of local housing authority operations to ensure compliance with the social purposes of relevant Federal legislation and to protect the Federal investment.

The increasing number of dwelling units entering all stages of the program during 1964 and 1965 is the principal reason for the rise in administrative expenses. Increased employment is required for 1965 to permit satisfactory performance of this increased workload.

Nonadministrative expenses.—The Public Housing Administration utilizes program receipts to meet certain expenses of the low rent public housing program. The use of these funds correspondingly reduces the requirements for appropriated funds. The Congress has established a nonadministrative expense limitation which applies (1) to expenses for the operation and maintenance of federally owned, directly operated projects; and (2) to expenses for technical services provided by the Administration during construction.

As of June 30, 1963, 3 *federally owned, directly operated projects*, containing 1,182 units remained in the program. These projects have not been sold or leased to local housing authorities for various reasons, such as absence of State enabling legislation, local conditions, and the lack of congressional authority to dispose of the projects for other than low rent use. Estimated program receipts and expenses for 1964 and 1965 are based upon the continued operation of these projects by the Administration throughout both years.

Technical services are provided during the development stage by having representatives of the Administration visit the sites of projects under construction to ensure that projects will be built in accordance with specified and acceptable standards. The local housing authorities pay a fixed fee for this service based upon a percentage of the total development cost, and the receipts are used to pay the cost of the service. The estimated cost for 1965 is based upon the number of projects in the construction stage.

Financing.—The Public Housing Administration makes loans to local housing authorities to finance the early costs of project development. These loans are made with funds borrowed by the Administration from the Treasury for this purpose and with certain available working funds. The outstanding amount of Treasury borrowings, which may not exceed $1.5 billion at any one time, was $25 million at the end of fiscal year 1963. No outstanding borrowings are estimated for June 30, 1964, and June 30, 1965.

When the Federal development loans to a local housing authority accumulate to an amount which is attractive to private investors, the local authority sells short-term

temporary notes to the public and utilizes the proceeds to repay the Federal loans and to meet current needs for additional working capital. These notes are secured by the Federal Government's pledge to make development loans, if necessary, covering up to 90% of the development cost of the project. This arrangement has established an excellent security rating for the notes, which sold at an average interest rate of 1.615% in 1963.

In 1963 direct loans by the Administration were refunded through secured loans by private investors in the amount of $103 million. This refunding is estimated at $178 million in 1964 (of which $53 million represents refunding of the remaining long-term bonds of local housing authorities held by the Administration) and $131 million in 1965. The temporary notes sold to private investors are issued for short periods, an average of 5 months, and may be reissued several times, and in increasing amounts, before the project is permanently financed. As a result, a considerable turnover of short-term notes takes place and the volume of loan activity managed by the Administration during any fiscal year greatly exceeds the amount of loans outstanding at the end of that fiscal year. The following table shows the actual financing and refinancing of development loans during 1963 and estimated transactions during 1964 and 1965 (in millions of dollars):

	1963 actual	*1964 estimate*	*1965 estimate*
Public Housing Administration development loans:			
Balance at start of year	96	92	36
Loans made during year	378	384	399
Loans repaid during year	382	440	399
Balance at end of year	92	36	36
Loans by private investors:			
Balance at start of year	942	942	1,038
Loans made during year	1,653	1,653	1,771
Loans repaid during year	1,653	1,557	1,657
Balance at end of year	942	1,038	1,152

Normally, project development costs are permanently financed toward the end of the construction period through the sale of long-term bonds to the public. These are usually 40-year serial bonds and are secured by the Federal Government's pledge to pay annual contributions. In 1963 they sold at an average interest rate of 3.111%. As of June 30, 1963, there were approximately 630,989 units potentially eligible for permanent financing. Of these, 492,484 units had been permanently financed, leaving a potential permanent financing workload of 138,505 units. The estimates for permanent financing based on program status as of June 30, 1963, are shown below (dollars in thousands):

	1963 actual	*1964 estimate*	*1965 estimate*
Units	23,821	27,888	29,119
Permanent financing	$351,251	$419,055	$440,805
Average per unit	$14	$15	$15

The amount of permanent financing for 1963 includes development cost of $17 million for projects refinanced for which the number of units are not shown above.

Operating results.—Operating income is not intended to be sufficient to cover all program expense. Net costs, in the budget year, are approximately equal to the appropriations for administrative expenses and annual contributions payments. The magnitude of such costs and appropriations used on a cumulative basis are as follows (in thousands of dollars):

	1963 actual	*1964 estimate*	*1965 estimate*
Cumulative net costs	−1,541,959	−1,752,967	−1,981,884

Total obligations	2,515,384	3,940,422	4,436,100

The National Aeronautics and Space Administration was established October 1, 1958, pursuant to Public Law 85–568 (72 Stat. 426; 42 U.S.C. 2451) approved July 29, 1958, for the conduct of the nonmilitary space programs of the United States, including the exploration of space and its utilization for peaceful purposes, and to conduct and support advanced research and development related to space and aeronautics in support of both civilian and military requirements. This appropriation provides for research and development activities of the National Aeronautics and Space Administration as follows:

1. *Manned space flight.*—The estimates for this activity include funds for all NASA manned space flight missions and the development of the large launch vehicles and propulsion systems required for these missions. The objective of the manned space flight program is to provide the capability for manned operations in space which will achieve and maintain a position of leadership for the United States, and to demonstrate this capability by landing a man on the moon and returning him safely to earth in this decade. A supplemental estimate of $141 million is required in 1964 to maintain this schedule.

(a) *Spacecraft development and operations.*—Project Mercury has been successfully completed with six manned flights, including two suborbital flights, two flights of three orbits, a six orbit flight, and one flight of twenty-two orbits.

Effort on the Gemini two-man spacecraft, directed toward long-duration orbital flight and the development of orbital rendezvous techniques, will continue in 1964 and 1965. The first unmanned flight test is scheduled for 1964 with the first manned flights to take place during 1965.

An increased effort on the Apollo three-man spacecraft system will be conducted in 1964 and 1965 leading, in later years, to missions ranging from extended earth orbital flights and rendezvous tests to lunar landing. The Apollo spacecraft consists of a command module, a service module, and a lunar excursion module. The command module is designed to accommodate three astronauts during extended flights and to reenter the atmosphere upon return to earth. The service module contains propulsion, life support and other systems required for the flight missions. The lunar excursion module will be incorporated for the lunar landing mission. It will descend with two astronauts from lunar orbit to the surface of the moon and return to a lunar orbit rendezvous with the command and service modules. The astronauts will then transfer to the command module for the return flight to earth.

The Manned Spacecraft Center, Houston, Tex., has primary responsibility for the spacecraft project management and flight operations. The development effort is provided by industrial contractors.

(b) *Launch vehicle development.*—The major launch vehicles for Apollo are the Saturn series. The Saturn I launch vehicle will be used for unmanned flight tests of the Apollo command module. The first stage of Saturn I, flown successfully four times, is powered by eight H–1 engines which develop a total of 1.5 million pounds of thrust. The first two-stage flight, incorporating the S–IV liquid-hydrogen fueled upper stage, is scheduled for launch early this year.

The Saturn IB vehicle consists of a modified Saturn I first stage and an advanced liquid-hydrogen fueled upper stage (the S–IVB) powered by a single J–2 engine. This launch vehicle will enable manned earth orbital flight test of the complete Apollo spacecraft including the lunar excursion module. In 1964 and 1965 design, development and ground test of Saturn IB will be emphasized, with initial flight scheduled for 1966.

Also in 1964 and 1965, design and development will continue on the Saturn V launch vehicle. The Saturn V will be capable of accelerating the 90,000 pound Apollo spacecraft to the velocity required for lunar flights. The five F–1 engines of the first (S–IC) stage of this vehicle will provide a total thrust of 7.5 million pounds. The second (S–II) stage will be powered by five J–2 liquid-hydrogen fueled engines, and will have a total thrust capability of one million pounds. The third stage will be essentially the same as the S–IVB stage used on the Saturn IB.

In 1965 development work will continue on engines for the Saturn class vehicles. Funds are also included for launch operations and other supporting activities associated with this program at the John F. Kennedy Space Center, NASA, Cocoa Beach, Fla.

Most of the development work on NASA launch vehicles is performed by industrial contractors. NASA effort in this field is concentrated at the Marshall Space

Federal Reserve Bank of St. Louis

Flight Center, Huntsville, Ala.; the Michoud Plant, New Orleans, La.; the Mississippi Test Facility, Pearl River, Miss.; the Lewis Research Center, Cleveland, Ohio; and the Kennedy Space Center.

(c) *Supporting programs.*—Estimates are included in this activity for effort in several supporting areas required by manned space flight missions. Engineering analysis and evaluation of mission requirements and objectives, integration of major hardware components into complete systems, and the development and evaluation of methods and equipment to check out manned space vehicle systems are included. Funds are also provided for work in physiological, psychological, and health requirement areas, thereby adding necessary assurance of flight and ground crew safety and effective performance during missions.

Studies of future possible manned space exploration projects, such as an earth orbiting laboratory and a lunar support base are also funded in this activity.

The NASA elements primarily involved in this activity are the Office of the Associate Administrator for Manned Space Flight, Washington, D.C., the Manned Spacecraft Center, the Marshall Space Flight Center, and the Kennedy Space Center, with additional support provided by industrial contractors.

2. *Space applications.*—NASA programs in this activity include communications satellites, meteorological satellites, advanced technology satellites, and the application of developed technology to industry. Both contractor and NASA efforts are involved, the latter located primarily at the Goddard Space Flight Center, Greenbelt, Md.

(a) *Meteorology.*—Tiros satellite flights will continue in 1964 and 1965 for testing sensors and spacecraft modifications. The U.S. Weather Bureau is providing for the establishment of an operational meteorological system using the Tiros satellite which has had a highly successful record of research and development flights to date. Spacecraft and vehicle procurement, launching, and other services for the operational system are being performed by NASA for the Weather Bureau on a reimbursable basis. NASA's meteorological satellite program also supports the development of techniques and components for possible use in future systems, some of which will be tested on the Nimbus satellite, to be launched early this year.

(b) *Communications.*—The national research and development program in the communications satellite field is a cooperative effort of NASA, the Department of Defense, and industry. Responsibility for development and establishment of an operational, worldwide, commercial communications satellite system is vested in the Communications Satellite Corporation. NASA's role is the continued development of applicable technology.

NASA will complete work in 1964 and 1965 on the present Relay low altitude satellites and the Syncom 24-hour orbit satellite system being developed in cooperation with the Department of Defense.

(c) *Other applications.*—This activity includes the NASA effort on technology required for satellites for future applications with improved performance and reliability. A multipurpose satellite will be used to develop the techniques for placing satellites in orbits synchronized with the earth's rotation and to conduct experiments related to a variety of space applications. The program for disseminating to industry and other Government agencies technological advances resulting from NASA's research and development effort is also included.

3. *Unmanned investigations in space.*—Estimates in this activity include space flight missions for the acquisition of basic scientific data in the near earth space environment, in interplanetary space and from the moon and nearby planets. Development of related launch vehicles is also included. NASA effort in this area is carried out by the Goddard Space Flight Center; the Jet Propulsion Laboratory, Pasadena, Calif.; and the Lewis Research Center, with support from other NASA centers. The major development activity is provided by contractors.

(a) *Spacecraft development and operations.*—Acquisition of scientific data on the upper atmosphere and near space by means of sounding rocket probes will be continued in 1965. Development of earth-orbiting observatories carrying multiple experiments for measurement and investigation of space phenomena will continue. The major projects include astronomical, geophysical, and solar observatories. In addition, work will be conducted on smaller scientific satellites and probes, including international satellite projects.

In 1965, the unmanned lunar exploration program, designed to land instruments on the lunar surface and to collect data from lunar-orbiting spacecraft, will be continued at an increased pace. This program will help meet urgent data requirements of the manned lunar landing program.

In the unmanned interplanetary program, work will proceed on the Pioneer interplanetary probe. The Mariner series of spacecraft, one of which successfully relayed the first close-up observations of Venus in December of 1962, will be employed for investigations of the planet Mars in fiscal 1965.

The bioscience program will continue in 1965 investigating, with flight projects and laboratory research, the effects of the space environment on living organisms and evidence of extraterrestrial life.

(b) *Launch vehicle development.*—The only launch vehicle under active development for unmanned missions in 1965 will be the Centaur, which will serve as the launch vehicle for the unmanned lunar landing spacecraft, Surveyor. The Centaur was successfully launched on November 27, 1963, and represents the first known successful ignition in space of a liquid hydrogen-oxygen fueled engine. Also encompassed in this activity are improvements to the present family of small and medium launch vehicles, including experiments with fluorine additives which show promise of significantly improving performance of existing launch vehicles.

4. *Space research and technology.*—NASA programs for the advancement of the technology required for space vehicle systems and related equipment and components are funded in this activity.

(a) *Launch vehicles and spacecraft.*—The estimates provide for a program of flight projects and research and development in areas such as space environment effects, aerothermodynamics, structures and materials, vehicle concepts, and the role and support of man as a functioning element in aerospace operations. In addition, effort will be continued on electronic measurements; recording and transmission of operational, technical, and scientific data; guidance and control systems; and reentry phenomena. The objective of all the effort in this activity is to advance technological developments by ground research and flight experiments to the point of practical application in flight missions. The work is conducted primarily at the Ames Research Center, Mountain View, Calif.; the Langley Research Center, Hampton, Va.; and the Lewis Research

Federal Reserve Bank of St. Louis

NATIONAL AERONAUTICS AND SPACE ADMINISTRATION—Continued

General and special funds—Continued

RESEARCH AND DEVELOPMENT—Continued

Center, with support from other NASA centers and contractors.

(b) *Propulsion and space power.*—The estimates provide for continuation of effort in research and development on chemical, nuclear and electric propulsion and solar, chemical and nuclear-electric power generation techniques. In 1965 continuing work will be done on the joint programs with the Atomic Energy Commission for development of components of both nuclear-electric power generation systems and nuclear rockets. NASA work will also be conducted on development and test of electric propulsion systems; the development of small solid rockets for space vehicle use; and on battery, solar, and other electrical power units for spacecraft. The agency will also support the development of large solid rocket motors, an advanced liquid hydrogen-oxygen engine of about 1.5 million pounds thrust (the M–1 engine), and related propulsion technology. Effort on these programs is located primarily at the Lewis Research Center, the Marshall Space Flight Center, and plants of industrial contractors.

5. *Aircraft technology.*—This program fosters the technological growth required for continued advancement of the national capability in aeronautics, and supports other Government agencies in research and development on specific aircraft.

In 1965 various cooperative projects with the Federal Aviation Agency and the Department of Defense will be continued, including research efforts in support of the supersonic transport, the X–15 aircraft, and short and vertical takeoff and landing aircraft.

Research in the areas of aerodynamics, structures and loads, propulsion, and aircraft operations will be supported, with a view toward advancing the technology required for advanced aircraft developments anticipated in the latter portion of this decade. NASA installations primarily involved in these projects are the Flight Research Center, Edwards, Calif., the Langley Research Center, the Ames Research Center, and the Lewis Research Center.

6. *Supporting operations.*—NASA program elements grouped in this activity provide general support for the accomplishment of NASA research, development, and flight programs.

(a) *Tracking and data acquisition.*—The estimates in this activity provide for the procurement, installation, and operation of equipment at stations of the NASA tracking and data acquisition networks, and for continued research and development on specialized ground equipment to improve the network capability. NASA installations primarily involved in these activities include the Goddard Space Flight Center and the Jet Propulsion Laboratory.

(b) *Facility, training, and research grants.*—This program was initiated in 1962 to enlarge university participation in space science and engineering, to supplement NASA research activity, to broaden the base of university conceived and constructed experiments for future space missions, and to provide an interdisciplinary framework for the assimilation into the body of scientific thought of the new data and insight being acquired through the space program. The program is composed of training grants for graduate science and engineering students, research grants for projects which are of interest to NASA, and facility grants to universities. The program also provides liaison and direct communication between NASA and university scientists and engineers.

RESEARCH AND DEVELOPMENT

Program and Financing (in thousands of dollars)

	1963 actual	1964 estimate	1965 estimate
Program by activities:			
1. Manned space flight:			
(a) Spacecraft development and operations	----------	31,000	----------
(b) Launch vehicle development	----------	110,000	----------
Total	----------	141,000	----------
Financing:			
New obligational authority (proposed supplemental appropriation)	----------	**141,000**	----------

Under existing legislation, 1964.—A supplemental appropriation for 1964 in the amount of $141.0 million is anticipated to regain in part the delay in the development schedule for the Saturn V and the Apollo spacecraft resulting from reductions in the 1964 appropriations requested.

CONSTRUCTION OF FACILITIES

For advance planning, design and construction of facilities for the National Aeronautics and Space Administration and for the acquisition or condemnation of real property, as authorized by law, [$680,000,000] *$281,000,000,* to remain available until expended. (*42 U.S.C. 2451, et seq., 50 U.S.C. 151–160, 511–515; Independent Offices Appropriation Act, 1964; additional authorizing legislation to be proposed.*)

This appropriation provides contractual services for the design, construction, and modernization of facilities; the purchase of items of equipment related to construction and modernization; and advance design of facilities planned for future authorization. The projects in the 1965 program are described below:

1. *Manned space flight.*—This activity includes estimates for facilities required in 1965 for the manned lunar landing program, which includes both the Apollo spacecraft program and the Saturn V launch vehicle program. Launch and launch support facilities are included for both the Saturn V launch vehicle and the Apollo spacecraft at the John F. Kennedy Space Center, NASA, Cocoa Beach, Fla. In addition, the Saturn V program will require, in 1965, development, ground test, and support facilities at the Marshall Space Flight Center, Huntsville, Ala.; ground test and support facilities at the Mississippi test facility, Pearl River, Miss.; manufacturing facilities at the Michoud Plant, New Orleans, La.; and additional development, ground testing, and manufacturing facilities at contractors' plants. Development, ground testing, and operational facilities for the Apollo spacecraft program are provided for at the Manned Spacecraft Center, Houston, Tex.

2. *Space applications.*—No new projects are included in 1965.

3. *Unmanned investigations in space.*—The estimates for this activity provide for modification of facilities to improve spacecraft testing capability at the Goddard Space Flight Center, Greenbelt, Md.; engineering and support facilities for the unmanned lunar and planetary exploration program at the Jet Propulsion Laboratory, Pasadena, Calif.; and modifications and improvements in facilities required for unmanned spacecraft missions at the Kennedy Space Center, and modifications to launch areas at Wallops Station, Wallops Island, Va.

4. *Space research and technology.*—Projects included in this category provide for research and supporting facilities at the Ames Research Center, Mountain View, Calif.; the Langley Research Center, Hampton, Va.; and the Lewis Research Center, Cleveland, Ohio. Also proposed is construction of various laboratories and other facilities for the Electronics Research Center and technical facilities for contractors engaged in development of the M–1 engine.

5. *Aircraft technology.*—These estimates include an advanced aircraft research facility at the Ames Research Center and a facility at Langley Research Center to house fatigue research equipment.

[1] Reimbursements from non-Federal sources are derived from the sale of personal property (40 U.S.C. 481).

This appropriation was established in fiscal year 1964 pursuant to Public Law 88–113 (77 Stat. 142) approved September 6, 1963, to provide a separate account for the expenses of personnel and travel, and for supporting costs of NASA installations previously included in the research and development appropriation. For comparative purposes the 1963 amount is shown as a comparative transfer.

Primary responsibility for the manned space flight program is located at the John F. Kennedy Space Center, NASA, Cocoa Beach, Fla.; Manned Spacecraft Center, Houston, Tex.; and the Marshall Space Flight Center, Huntsville, Ala. Effort in space applications and unmanned investigations in space is concentrated primarily at the Goddard Space Flight Center, Greenbelt, Md.; Pacific Launch Operations Office, Lompoc, Calif.; and at Wallops Station, Wallops Island, Va.

The space research and technology activity is conducted at virtually all NASA field installations. Locations not listed above to which work is assigned include Ames Research Center, Mountain View, Calif.; Electronics Research Center (location undetermined); Flight Research Center, Edwards, Calif.; Langley Research Center, Hampton, Va.; Lewis Research Center, Cleveland, Ohio; and Space Nuclear Propulsion Office, Germantown, Md. Activity in aircraft technology is concentrated at Ames Research Center, Flight Research Center, Lewis Research Center, and Langley Research Center. Programwide management is exercised from NASA Headquarters, Washington, D.C.; programwide support is provided by two regional business offices: North Eastern Office, Cambridge, Mass., and Western Operations Office, Santa Monica, Calif.

The following table shows the distribution of the direct budget plan by installation.

GENERAL PROVISIONS

[No part of any appropriation made available to the National Aeronautics and Space Administration by this Act for "Research and Development" may be used for the construction of any major facility, the estimated cost of which, including collateral equipment, exceeds $250,000, unless (1) a period of thirty days has passed after the receipt by the Committee on Science and Astronautics of the House of Representatives and the Committee on Aeronautical and Space Sciences of the Senate of notice of the nature, location, and estimated cost of such facility, or (2) each such committee before the expiration of such period has transmitted to the Administrator written notice to the effect that such committee has no objection to the construction of such facility.]

Not to exceed 5 per centum of any appropriation made available to the National Aeronautics and Space Administration by this Act may be transferred to any other such appropriation.

Not to exceed $35,000 of the appropriation "Administrative Operations" in this Act for the National Aeronautics and Space Administration shall be available for scientific consultations and emergency or extraordinary expense, to be expended upon the approval or authority of the Administrator and his determination shall be final and conclusive.

[No part of any appropriation made available to the National Aeronautics and Space Administration by this Act shall be used for expenses of participating in a manned lunar landing to be carried out jointly by the United States and any other country without consent of the Congress.]

Transferred from "Grants to the Republic of the Philippines for care and treatment of veterans" (77 Stat. 39)	150		
Transferred to "Operating expenses, Public Buildings Service," General Services Administration (76 Stat. 728 and 77 Stat. 436)	−35	−40	
Appropriation (adjusted)	**161,245**	**159,710**	**156,524**

[1] Includes capital outlay as follows: 1963, $3,956 thousand; 1964, $2,429 thousand; 1965, $1,008 thousand.

[2] Selected resources as of June 30 are as follows:

	1962	*1963 adjustments*	*1963*	*1964*	*1965*
Unpaid undelivered orders	227	−15	2,155	565	565
Advances	36	------	4	4	4
Total selected resources	263	−15	2,159	569	569

This appropriation provides for all administrative expenses of the agency with the exception of those applicable to the Department of Medicine and Surgery.

During the latter half of 1963 the former Department of Insurance was merged with the Department of Veterans Benefits and a new Department of Data Management was established, consolidating certain data processing operations. Data processing functions previously financed under other appropriations are shown by comparative transfers.

A net decrease of $3.2 million is forecast for 1965. The total reduction has been offset by $2.5 million in salary rate increases authorized by recent legislation. Excluding this item, a decrease of $5.7 million would have been projected resulting from increased productivity and declining workloads. Estimates for 1965 are further reduced by transfer of costs of payment of compromise settlements resulting from tort claims (38 U.S.C. 351) and burial flags to the Compensation and pension appropriation.

1. *General administration.*—In addition to the executive direction of the agency, this activity covers the Board of Veterans Appeals, which decides all cases (other than insurance cases) of appeals to the Administrator on claims involving benefits under veterans legislation.

2. *Data management.*—This activity is responsible for managing all automatic data processing operations. Further development of ADP operations will improve service to veterans, provide better information for management and research, and reduce operating costs.

3. *Veterans benefits.*—Veterans' and dependents' claims for compensation, pensions, or other benefits are adjudicated as indicated by the following workloads (in thousands):

	1962 actual	*1963 actual*	*1964 estimate*	*1965 estimate*
New claims (disability and death)	328	311	312	301
Reopened claims (disability and death)	410	318	283	280
Dependency and income claims (disability and death)	521	612	711	775

Eligibility of trainees for vocational rehabilitation and education or educational assistance is determined and

[1] Selected resources as of June 30 are as follows: Unpaid undelivered orders, 1962, $780 thousand (1963 adjustments, −$27 thousand); 1963, $1,286 thousand; 1964, $1,286 thousand; 1965, $1,286 thousand.

1. *Medical research.*—Medical research projects are conducted in Veterans Administration laboratories or in universities or other institutions on a contract basis, whichever is more advantageous or economical.

In addition to amounts provided for the medical research program by direct appropriation, an amount of $7,971 thousand was available in 1963 in grants from the National Institutes of Health and from other organizations sponsoring research. Of this amount, $1,635 thousand represents grants made directly to the Veterans Administration, and grants totaling $6,336 thousand were made to various medical schools with which VA hospitals are affiliated. It is anticipated that approximately the same level of funding from these outside sources will be available in 1964 and 1965. An indeterminate amount of support is also furnished from funds budgeted for hospital operations for other services including housekeeping, personnel, supply, fiscal and engineering at the hospital level. This estimate does not include funding of research construction projects which are a part of the Construction of hospitals and domiciliaries facilities appropriation.

2. *Prosthetic research.*—This is a research program to develop and test prosthetic, orthopedic, and sensory aids for the purpose of improving the care and rehabilitation of disabled eligible veterans, including amputees, paraplegics, and the blind.

[1] Selected resources as of June 30 are as follows: Unpaid undelivered orders, 1962, $1,561 thousand (1963 adjustments, −$34 thousand); 1963, $8,758 thousand; 1964, $8,758 thousand; 1965, $8,758 thousand.

This appropriation provides for the cost of care and treatment of eligible beneficiaries at Veterans Administration hospitals, domiciliary homes, and outpatient clinics, contract hospitals, and State homes.

To be eligible for inpatient care and treatment, a beneficiary must be a veteran of any war with a service-connected disability incurred or aggravated during a period of war, or, within the limits of Veterans Administration facilities, for any other disability if the veteran is unable to defray the expenses of necessary hospital or domiciliary care. Outpatient medical and dental treatment is provided to veterans with service-connected disabilities by staffs of Veterans Administration outpatient clinics and by physicians and dentists participating in the hometown medical care program. It is also provided to veterans receiving vocational rehabilitation who require treatment to avoid interruption of training, pensioners of nations allied with the United States in World War I and in World War II, and veterans of the Spanish-American War, Indian wars, Boxer Rebellion, and Philippine Insurrection. Veterans are also provided examinations in outpatient clinics for purposes of rating for compensation and pension, insurance, and determining their need for hospitalization or domiciliary care.

Medical services may be furnished on an outpatient basis for non-service-connected disabilities to veterans who have been determined to need hospital care and whose admission to a hospital has been scheduled, or who require post-hospital treatment to complete hospital care.

Digitized for FRASER
https://fraser.stlouisfed.org
Federal Reserve Bank of St. Louis

Increases in 1964 are for (a) the full year cost of salary increases resulting from the Federal Salary Reform Act of 1962, (b) within-grade salary increases, (c) initial activation of the replacement general hospital of 710 beds at Washington, D.C., (d) completing activation of the 200-bed restoration center at East Orange, N.J., (e) increase in staffing levels for improved quality of medical care, (f) increased utilization of utilities, communications, drugs, linens and medical supplies, (g) increased maintenance and repair requirements, (h) activation of five new day care centers, and (i) a general rate increase in medical and dental fees for hometown care.

1. *Maintenance and operation of hospitals.*—This covers the operation of Veterans Administration hospitals. In 1965, 2,000 nursing home beds are to be provided by conversion of existing facilities. The estimated costs for 1965 exceed 1964 by $33,699 thousand.

	1963 actual	1964 estimate	1965 estimate
Veterans Administration hospitals:			
Neuropsychiatric hospitals:			
Average number of operating beds	57,601	57,590	57,445
Average daily patient load	54,386	54,297	54,196
General hospitals:			
Average number of operating beds	62,703	62,781	62,804
Average daily patient load	55,808	55,972	56,122
Total, Veterans Administration hospitals:			
Average number of operating beds	120,304	120,371	120,249
Average daily patient load	110,194	110,269	110,318

2. *Contract hospitalization.*—This covers hospitalization in other Federal hospitals for service and non-service-connected disabilities where Veterans Administration facilities are not available. It also covers the use of non-Federal hospitals which are limited to treatment of service-connected disabilities, except that female veterans, veterans in training under the provisions of 38 U.S.C. 1506, and veterans in United States Territorities and possessions may also receive treatment of non-service-connected disabilities. The net decrease of $72 thousand in estimated costs under 1964 is due to a decrease of 88 in the average daily patient load partly offset by an increase in contract rates.

	1963 actual	1964 estimate	1965 estimate
Average daily patient load:			
Civil hospitals	948	947	947
Municipal and State hospitals	394	385	386
Other Federal hospitals	1,480	1,512	1,423
Total	2,822	2,844	2,756

3. *Maintenance and operation of domiciliary facilities.*—This covers the cost of domiciliary care in Veterans Administration facilities and in State institutions. The increase in the estimated cost over 1964 is approximately $1,084 thousand.

	1963 actual	1964 estimate	1965 estimate
Average number of operating beds	16,770	16,669	16,679
Average daily member load:			
Veterans Administration domiciliaries	15,690	15,451	15,448
State homes	9,161	9,100	9,100

4. *Outpatient care.*—This covers the expense of outpatient medical and dental care provided by Veterans Administration staff and by physicians and dentists participating in the hometown medical care program. The increase in the estimated cost over 1963 is $1,403 thousand.

NUMBER OF MEDICAL VISITS AND DENTAL CASES

[In thousands]

Examinations, dental cases completed	4	4	4
Treatments, dental cases completed	7	7	7
Total	1,239	1,243	1,238

The requirements presented in this budget submission take into consideration the receipt in 1963 of property and supplies from other Federal agencies or from the General post fund, national homes, Veterans Administration, having an acquisition value of $2,673 thousand. This does not, however, represent the value of the items when transferred.

A supplemental appropriation for 1964 is anticipated under Proposed for separate transmittal.

[1] Selected resources as of June 30 are as follows: Accounts receivable (benefit overpayments collectible from beneficiaries) 1962, $14,251 thousand (1963 adjustments, −$5 thousand); 1963, $13,852 thousand; 1964, $13,852 thousand; 1965, $13,852 thousand.

This appropriation provides for compensation, pensions and other related benefits and allowanees that are authorized veterans and their survivors. As of June 1963 there were an estimated 22,166 thousand living veterans of all wars and peacetime service of which 14.3 percent, or 3,180,723 were receiving benefits under this appropriation.

Federal Reserve Bank of St. Louis

In addition, 1,706,714 dependents of 1,182,987 deceased veterans were receiving benefits. The increased cost in the current and budget years is primarily attributable to the pension program (where accretions to the rolls continue as a result of the aging of veterans and the continuing effect of certain liberalizations provided under the Veterans' Pension Act of 1959, particularly in the deceased beneficiary categories). Public Law 88–21 approved May 15, 1963 increased rates of dependency and indemnity compensation payable for parents and children effective July 1, 1963 and is estimated to cost approximately $5,000 thousand in each of the fiscal years 1964 and 1965. Public Law 88–132 approved October 2, 1963 (Military Pay Bill) resulted in an increase in dependency and indemnity compensation payable to most widows in addition to that provided by Public Law 88–134 approved October 5, 1963 which increased the basic rate of dependency and indemnity compensation payable for all widows from $112 to $120 monthly; each of these laws was effective October 1, 1963 and are estimated to cost approximately $13,000 thousand in 1964 and $17,000 thousand in 1965. Four other new laws will result in minor increases.

1. *Compensation.*—Compensation is payable to living veterans for a disability connected with military service. Payments are also made to eligible dependents of deceased veterans for death connected with military service.

(a) *Living veterans.*—The basic rates of disability compensation provided in wartime cases range from $20 for 10% disability to $250 per month for total disability. Certain cases are compensated for specific disabilities as prescribed by law, to a maximum of $725 a month per case. An additional allowance is payable for dependents of veterans rated 50% or more disabled to a maximum of $100 a month per case, plus $12 monthly for each child in excess of three.

Generally all rates of peacetime disability compensation are 80% of wartime rates. The increasing proportion of peacetime cases and changing family composition result in a slight decline in average annual payments.

AVERAGE NUMBER OF VETERANS AND COSTS

	1962 actual	*1963 actual*	*1964 estimate*	*1965 estimate*
Spanish-American War	157	134	110	95
World War I	151,450	141,804	132,700	124,000
World War II	1,512,731	1,503,156	1,501,300	1,491,500
Korean conflict	210,025	214,031	218,000	221,000
Peacetime service	118,045	127,712	139,300	151,200
Total	1,992,408	1,986,837	1,991,410	1,987,795
Average payment per case per year	$784	$838	$836	$834
Total cost (in thousands)	$1,561,141	$1,665,898	$1,665,076	$1,658,142

(b) *Deceased veterans.*—While the caseload continues to decline, the average payment per case rises, reflecting increased rates provided by new legislation.

AVERAGE NUMBER OF CASES AND COSTS

	1962 actual	*1963 actual*	*1964 estimate*	*1965 estimate*
Spanish-American War	863	790	740	690
World War I	43,479	42,568	41,600	40,800
World War II	261,499	252,927	245,000	238,000
Korean conflict	38,618	39,309	40,000	40,700
Peacetime service	35,816	39,165	42,500	46,200
Total	380,275	374,759	369,840	366,390
Average payment per case per year	$1,200	$1,196	$1,211	$1,218
Total cost (in thousands)	$456,341	$448,281	$447,915	$463,346

2. *Pensions.*—Benefits are payable to wartime veterans and dependents of deceased veterans for non-service-connected disability and death.

(a) *Living veterans.*—In general, pensions are payable to wartime veterans who are unable to secure substantially gainful employment as a result of a permanent and totally disabling non-service-connected disability. The standards for determining eligibility are especially liberal for veterans who have attained 65 years of age.

The caseload continues to increase but less significantly as the major World War I category appears to have reached a peak in 1963.

AVERAGE NUMBER OF VETERANS AND COSTS

	1962 actual	*1963 actual*	*1964 estimate*	*1965 estimate*
Prior to Spanish-American War	29	27	20	15
Spanish-American War	26,570	22,356	18,600	15,500
World War I	988,685	1,016,003	1,013,000	1,010,000
World War II	114,585	133,650	157,000	185,000
Korean conflict	8,354	9,735	11,200	12,900
Peacetime service	225	189	175	160
Total	1,138,448	1,181,960	1,199,995	1,223,575
Average payment per case per year	$987	$974	$968	$953
Total cost (in thousands)	$1,123,963	$1,151,123	$1,162,112	$1,165,742

(b) *Deceased veterans.*—Under current legislation pensions are payable to widows and children of World War I, World War II, and Korean conflict veterans.

The caseload projected for 1964 and 1965 reflects the trend experienced in prior years. The average payment is projected to decrease slightly in 1964. A greater decrease is projected in 1965 because it is believed that more children will be discontinued from the World War II rolls upon attaining age 18, with corresponding decreases in average payment per case.

AVERAGE NUMBER OF CASES AND COSTS

	1962 actual	*1963 actual*	*1964 estimate*	*1965 estimate*
Prior to Spanish-American War	3,753	3,175	2,730	2,470
Spanish-American War	73,415	70,005	67,700	66,200
World War I	455,173	475,730	493,000	514,300
World War II	172,029	214,190	244,200	274,200
Korean conflict	12,001	16,601	21,000	25,500
Peacetime service	62	42	35	30
Total	716,433	779,743	828,665	882,700
Average payment per case per year	$710	$701	$700	$694
Total cost (in thousands)	$508,425	$546,690	$580,473	$612,418

3. *Other*—(a) *Retired officers.*—Emergency officers (World War I) and certain officers (Regular Establishment) retired for service-connected disability are entitled to special retirement benefits at rates substantially higher than the normal compensation payments. Such rates were increased by 5% effective October 1, 1963, by the Military Pay Bill (Public Law 88–132).

(b) *Subsistence allowance.*—Subsistence allowance payments to disabled veterans enrolled in vocational rehabilitation and education programs are made from this appropriation. Costs for peacetime ex-servicemen (Public Law 87–815) amounts to $345 thousand in 1963, $4,110 thousand in 1964, and $6,850 thousand in 1965.

(c) *Burial allowance.*—Under present statutes the Administrator is authorized to provide an allowance of $250 (plus transportation charges where death occurs under VA care) for the funeral expenses of a deceased veteran.

General and special funds—Continued

COMPENSATION AND PENSIONS—Continued

(d) *Special allowance, dependents.*—Under certain conditions a special allowance (38 U.S.C. 412) is payable to dependents of certain veterans who died after December 31, 1956, but who were not fully and currently insured under the Social Security Act. The award is based upon a certification to VA by the Social Security Administration.

(e) *Invalid lifts.*—The Administrator may furnish an invalid lift, if medically indicated, to any veteran in receipt of pension under (38 U.S.C. 617) based on the need of regular aid and attendance.

(f) *Burial flags.*—A burial flag is furnished upon request to the next of kin or to a close friend of any deceased veteran (38 U.S.C. 901). This activity was programed under the General operating expenses appropriation in 1963 and 1964.

(g) *Tort claim settlements.*—Provides for payment of amounts of compromises or settlements under 28 U.S.C. 2677 of those tort claims which are potentially subject to offset against benefits under the provisions of 38 U.S.C. 351. Regular benefit payments under law are suspended until the total amount of the settlement is recouped. This activity was programed under the General operating expenses appropriation in 1963 and 1964.
