[1] Selected resources as of June 30 are as follows:

	1962 actual	*1963 actual*	*1964 estimate*	*1965 estimate*
Accounts receivable (benefit overpayments collectible from beneficiaries)	936	518	518	518
Unpaid authorizations (approved authorizations for paraplegic housing and automobiles or other conveyances)	399	566	566	566
Total selected resources	1,335	1,085	1,085	1,085

This appropriation provides education and training allowances for veterans of the Korean conflict; educational assistance allowances for eligibles under the War Orphans' Educational Assistance Act of 1956, as amended, and special assistance to disabled veterans in the form of vocational rehabilitation, housing grants and automobiles or other conveyances.

1. *Education and training.*—It is estimated that the number of Korean conflict veterans receiving benefits will decline sharply. Although the training program terminates before the end of 1965, the average number of trainees shown for 1965 represents trainee years. Orphan trainees will remain at the same level in 1964, and then gradually decline. A trend analysis of workloads by major training category, and average costs per trainee follows:

	1962 actual	*1963 actual*	*1964 estimate*	*1965 estimate*
Korean conflict veterans:				
Higher learning	60,332	32,476	16,640	4,890
Below college	25,655	12,203	5,550	1,710
Correspondence	7,371	4,333	2,460	620
Institutional-on-farm	1,641	520	130	30
Job training	1,450	480	220	50
Total	96,449	50,012	25,000	7,300
Average cost per trainee	$1,255	$1,248	$1,183	$1,182
Orphans:				
Average number of trainees	12,863	15,573	15,500	15,000
Average cost per trainee	$1,661	$1,651	$1,640	$1,633

2. *Special assistance to disabled veterans.*—Disabled veterans requiring vocational rehabilitation are provided educational assistance for tuition, supplies, and equipment. Costs for peacetime ex-servicemen (Public Law 87–815) amount to $197 thousand in 1963, $2,503 thousand in 1964, and $4,202 thousand in 1965. Assistance also is available to provide grants for specially adapted housing to veterans having suffered the loss of both feet, and to paraplegic veterans. As disabled veterans grow older

Digitized for FRASER
https://fraser.stlouisfed.org
Federal Reserve Bank of St. Louis

and their disability worsens, a new group becomes eligible each year. The number of grants made in a year fluctuates, usually between 350 and 450, with no set trend pattern. An average over the past several years is approximately 400. In addition, up to $1,600 is allowed certain disabled veterans toward the purchase of automobiles or other conveyances. Based on an analysis of load forecasts and average costs, total costs are projected as follows:

	1962 actual	*1963 actual*	*1964 estimate*	*1965 estimate*
Tuition:				
Average number of trainees paid tuition (job training excluded)	4,182	3,720	5,590	6,550

1. *Military and naval insurance.*—Payments are made for claims on war-risk insurance issued to servicemen and veterans of World War I. Although no policies of this insurance remain in force, payments for death and disability claims continue. Payments are made also to the U.S. Government life insurance fund for claims (1) traceable to extra hazards of military service, and (2) for claims while insured was under premium waiver provisions in active military service.

(a) *Payment to U.S. Government life insurance fund.*—Transfers are made to reimburse the fund for the above purposes.

Description	*1963 actual*	*1964 estimate*	*1965 estimate*
Death and permanent total disability awards	−86	17	17

General and special funds—Continued

VETERANS INSURANCE AND INDEMNITIES—Continued

nonparticipating insurance policies issued to certain disabled veterans of World War II. The permanent indefinite appropriation of premium receipts is authorized (38 U.S.C. 719(b)).

(a) *Payment to National service life insurance fund.*—(1) For death claims traceable to extra hazards of service an amount is transferred from this appropriation, which, when added to the reserve of the policy, is equal to the actuarial value of the claim. In the event of total disability traceable to the extra hazards of service, an amount is transferred from this appropriation sufficient to meet the current payments from the fund. (2) Gratuitous insurance was issued to aviation cadets and to certain persons who were unable to make application for National service life insurance. Gratuitous insurance payments will be made in 1964 and 1965 to otherwise qualified illegitimate children. (3) The fund is reimbursed when recovery of erroneous payments or overpayments is waived. (4) The fund is reimbursed for death claims on policies under waiver of premiums while the insured is on active military duty.

Description	Average payment per case 1963	Caseload 1963 actual	Caseload 1964 estimate	Caseload 1965 estimate
(1) Claims for extra hazards of service:				
(a) Death awards	$6,664	267	246	185
(b) Disability awards	160	14,400	15,300	15,000
(2) Gratuitous insurance	3,372	105	270	155
(3) Waiver of overpayments	2,464	14	16	16
(4) Death while under waiver of premiums	8,416	180	172	136

(b) *Direct payments to policyholders and beneficiaries.*—(1) Claims are paid on nonparticipating National service life insurance policies issued to World War II veterans with service-connected disabilities. (2) Claims may be paid in certain instances in which applicants for insurance were rejected for medical reasons and subsequently died in line of duty. (3) Claims are paid on death which occurred after application but before effective date of a National service life insurance policy. (4) Claims may be paid in certain cases in which insurance was discontinued because the insured was discharged to accept a commission, was absent without leave, or was court-martialed.

Description	Average payment per case 1963	Caseload 1963 actual	Caseload 1964 estimate	Caseload 1965 estimate
(1) Claims on nonparticipating National service life insurance:				
(a) Death awards	$4,045	102	111	120
(b) Disability awards	463	180	194	215
(2) Claims from applicants rejected for medical reasons who died in line of duty	300	189	187	184
(3) Claims where applicant died between date of application and effective date	514	250	233	214
(4) Claims on discontinued insurance	493	279	274	266

3. *Service-disabled veterans insurance.*—Payments are made to the Service-disabled veterans insurance fund to supplement the premium and other receipts of the fund in amounts necessary to pay claims on insurance policies issued to veterans whose service-connected disabilities made them ineligible for commercial insurance. The amount estimated for this program in 1965 is $3,200 thousand.

4. *Servicemen's indemnities.*—Beneficiaries of servicemen who died prior to January 1, 1957, while in active service or within a period of 120 days after separation from active service are entitled to receive an indemnity in the amount of $10 thousand less any National service life insurance and/or U.S. Government life insurance carried by the deceased. Payments are made to beneficiaries in 120 equal installments, plus interest at the rate of 2.25% per year. The payments on awards were $22,034 thousand in 1963. Payments will decrease annually, as installments are completed.

Grants-in-aid are made to the Republic of the Philippines for the medical care and treatment of eligible Philippine Commonwealth Army veterans. Section 632 of title 38, United States Code, as amended by Public Law 88–40, approved June 13, 1963, provides for reimbursement at agreed upon patient per diem rates up to a maximum annual amount of $500 thousand. Medical care and treatment is provided by the Philippine Veterans Memorial Hospital in Manila, which was constructed from U.S. grants-in-aid totaling approximately $9,400 thousand.

These funds provide for the construction of new hospital and domiciliary facilities, replacement of existing hospitals and domiciliaries, acquisition of sites, modernization and other improvements, including regional offices and supply depots, and alterations and additions for medical research facilities. This estimate is for the fifth increment for financing a 15-year program to modernize the hospital system. While this program will be primarily for improvements to the older (pre-World War II) hospitals, it will also provide for replacement of 12 hospitals acquired from military surplus, for air conditioning where indicated, and for the correction of deficiencies in post-World War II hospitals as necessary to bring them up to modern medical standards.

A construction program of $102,010 thousand is recommended for 1965 to be financed with new obligational authority of $102,000 thousand and $10 thousand from savings on prior-year programs. The amount for construction of replacement hospitals includes $20,310 thousand for the first phase of the replacement and modernization at Hines, Ill.; $22,628 thousand for a 1,040-bed hospital at Los Angeles, Calif.; $21,271 thousand for a 720-bed general hospital at San Juan, P.R.; $1,800 thousand for a site and planning a 760-bed hospital at Chicago, Ill.; and $524 thousand to complete financing for a 1,068-bed hospital at Miami, Fla. The amount for modernization and other improvements projects includes $13,349 thousand to continue projects for which planning is in process and $11,783 thousand for new projects which will ultimately cost $44,486 thousand. Also included is $6,414 thousand for construction and planning of additional research facilities.

In accordance with the Government's policy to provide fallout shelter facilities in new construction, funds are included in this estimate for fallout shelters as follows: For construction only, $200 thousand each for Los Angeles, Calif.; San Juan, P.R.; and Hines, Ill. (Phase I); for planning only—Chicago, Ill., $20 thousand; and Northport, N.Y., $10 thousand.

1. *Hospitals*—(a) *New.*—This activity covers the new hospitals and bed-addition projects authorized in 1947 and subsequent years. It provides for 77 projects to add 38,240 beds and 12 projects for conversion of beds at existing hospitals. This activity is scheduled for completion with the construction of the Cleveland, Ohio, 800-bed hospital in 1964 and Washington, D.C., 710-bed hospital in 1965.

(b) *Replacement.*—This activity provides for replacement of beds which are housed in temporary, obsolete, or hazardous structures. The program, initiated in 1955,

Federal Reserve Bank of St. Louis

General and special funds—Continued

CONSTRUCTION OF HOSPITAL AND DOMICILIARY FACILITIES—Con.

currently includes 22 projects for approximately 17,781 beds. Status of beds to be provided under this title follows:

	1963 actual	*1964 estimate*	*1965 estimate*
Under construction beginning of year	2,250	2,337	6,905
Put under construction during year	1,087	4,568	2,980
Completed during year	1,000	-----	1,250
Total completed at end of year since initiation of the program	2,876	2,876	4,126
Under construction at end of year	2,337	6,905	8,635
Not under construction at end of year	12,568	8,000	5,020

(c) *Modernization.*—This activity provides for needed modernization of pre-World War II hospitals to bring them, insofar as practicable, up to the standards of the new hospitals. The status of projects in this program, excluding those which were financially completed as of June 30, 1962, follows (dollars in thousands):

	Number of projects	*Total estimated cost of projects*
Completed as of June 30, 1963	22	$40,831
Under construction June 30, 1963	40	66,864
Scheduled to be placed under construction, 1964	13	24,454
Scheduled to be placed under construction, 1965	3	5,397
To be placed under construction, after 1965	14	88,770

(d) *Other improvements.*—This activity provides for needed improvements, other than modernization, at hospitals. The status of the projects in this program, excluding those which were financially completed as of June 30, 1962 follows (dollars in thousands):

	Number of projects	*Total estimated cost of projects*
Completed as of June 30, 1963	50	$3,003
Under construction June 30, 1963	81	47,677
Scheduled to be placed under construction, 1964	80	11,526
Scheduled to be placed under construction, 1965	45	7,341
To be placed under construction, after 1965	12	24,212

2. *Domiciliaries.*—This activity provides for construction at domiciliary facilities, including restoration centers. The status of the projects in this program, excluding those which were financially completed as of June 30, 1962, follows (dollars in thousands):

	Number of projects	*Total estimated cost of projects*
Completed as of June 30, 1963	1	$163
Under construction June 30, 1963	1	1,800
To be placed under construction, after 1965	1	5,500

3. *Regional offices and supply depots.*—This activity provides for necessary construction at regional offices and supply depots. No new projects are proposed in 1965. The status of the projects in this program, excluding those which were financially completed as of June 30, 1962, follows (dollars in thousands):

	Number of projects	*Total estimated cost of projects*
Completed as of June 30, 1963	4	$60
Under construction June 30, 1963	1	48
Scheduled to be placed under construction, 1964	1	8

4. *Research facilities.*—This activity provides for construction of medical research facilities. The status of the projects in this program, excluding those which were financially completed as of June 30, 1962, follows (dollars in thousands):

	Number of projects	*Total estimated cost of projects*
Completed as of June 30, 1963	5	$916
Under construction June 30, 1963	11	3,914
Scheduled to be placed under construction, 1964	20	3,861
Scheduled to be placed under construction, 1965	16	6,732
To be placed under construction, after 1965	6	4,167

5. *Experimental hospital facilities.*—This program was initiated in 1963 to provide experimental facilities to help determine the most advantageous functional arrangements for hospital nursing units and supporting facilities. The only project currently authorized under this title is estimated to cost $500 thousand and was placed under construction in 1963. No new projects are proposed in 1965.

A supplemental appropriation for 1964 is anticipated under proposed for separate transmittal.

Program by activities:			
Nursing home facilities (costs—obligations)	----------	5,000	---------
Financing:			
New obligational authority (proposed supplemental appropriation)	----------	**5,000**	---------

Under existing legislation, 1964.—Alteration to existing VA hospitals to provide nursing home facilities authorized by the President are provided under this activity.

This program was initiated in 1964 to provide, in existing facilities, 2,000 nursing home beds. It provides for alteration projects estimated to cost $5,000 thousand. Status of beds to be provided under this title follows:

	1964 estimate	*1965 estimate*
Put under construction during year	2,000	-----
Completed during year	2,000	-----
Total completed at end of year since initiation of the program	2,000	2,000

CONSTRUCTION, CORREGIDOR-BATAAN MEMORIAL

Program and Financing (in thousands of dollars)

	1963 actual	1964 estimate	1965 estimate
Construction of memorial	----------	1,500	---------

Under existing legislation, the 1964 supplemental will finance the construction of the Corregidor-Bataan memorial battlefield park authorized in Public Law 88–240 under the supervision of the Veterans Administration.

ADMINISTRATIVE PROVISIONS

Not to exceed 5 percentum of any appropriation for the current fiscal year for "Compensation and pensions", "Readjustment benefits", and "Veterans insurance and indemnities" may be transferred to any other of the mentioned appropriations, but not to exceed 10 per centum of the appropriations so augumented.

Appropriations available to the Veterans Administration for the current fiscal year for salaries and expenses shall be available for services as authorized by section 15 of the Act of August 2, 1946 (5 U.S.C. 55a).

The appropriation available to the Veterans Administration for the current fiscal year for "Medical care" shall be available for funeral, burial, and other expenses incidental thereto (except burial awards authorized by section 902 of title 38, United States Code), for beneficiaries of the Veterans Administration receiving care under such appropriations.

No part of the appropriations in this Act for the Veterans Administration (except the appropriation for "Construction of hospital and domiciliary facilities") shall be available for the purchase of any site for or toward the construction of any new hospital or home.

No part of the foregoing appropriations shall be available for hospitalization or examination of any persons except beneficiaries entitled under the laws bestowing such benefits to veterans, unless reimbursement of cost is made to the appropriation at such rates as may be fixed by the Administrator of Veterans Affairs. (*Independent Offices Appropriation Act, 1964.*)

The Veterans Canteen Service was established by Congress in 1946 to furnish at reasonable prices merchandise and services necessary to the comfort and well-being of veterans in hospitals and domiciliaries operated by the Veterans Administration (38 U.S.C. 4201–08).

Budget program.—Sales are expected to be $48,067 thousand in fiscal year 1964 and $48,888 thousand during fiscal year 1965. Operating costs will increase primarily as a result of Federal minimum wage legislation and the Federal Salary Reform Act of 1962.

Financing.—Operations are financed from current revenues. The Congress originally appropriated a total of $4,965 thousand to establish and operate the Service. Funds in excess of the needs of the Service totaling $8,400

Public enterprise funds—Continued

CANTEEN SERVICE REVOLVING FUND—Continued

thousand have been paid to the Treasury as of June 30, 1963.

Operating results and financial condition.—Operating revenue is expected to be sufficient to cover operating expenses. Funds at the close of the fiscal year in excess of the needs of the Service for the ensuing fiscal year will be paid to the Treasury.

Budget expenditures	−86,187	−69,000	−171,000

Loans are made to veterans for the purchase, construction, or improvement of homes, including farm residences in specified areas where mortgage loans made by private lenders and guaranteed by the Veterans' Administration cannot be secured. (38 U.S.C. 1811 as amended.)

Budget program—1. *Direct loans to veterans.*—Under existing legislation, authority to make or to enter into commitments to make loans expires July 25, 1967, for World War II veterans, and January 31, 1975, for Korean conflict veterans. The amount of loans outstanding will be reduced to $1 billion in 1965. A summary of loan activity follows (dollars in thousands):

	1963 actual	*1964 estimate*	*1965 estimate*
Number of loan commitments	20,101	14,933	9,770
Number of loan disbursements and in process	18,488	15,000	10,000
Amount of loan commitments (obligated)	$213,239	$161,278	$107,475
Disbursements on loans closed and in process	$196,061	$162,000	$110,000
Average per loan closed and in process	$10,605	$10,800	$11,000
Repayment of loans (includes exchange of noncash assets)	$87,317	$77,560	$74,473
Sale of loans	$181,140	$150,000	$200,000
Losses on loans	$174	$165	$160
Net loan disbursements	−$72,571	−$65,725	−$164,633
Loans outstanding end of year:			
Number	172,099	166,004	156,879
Amount	$1,261,041	$1,195,316	$1,030,683

2. *Vendee loans made.*—Resale of real property acquired through foreclosure or voluntary conveyance normally involves a cash down payment by the purchaser and the creation of a new mortgage loan to be held by the Veterans Administration. The noncash portions of these transactions are excluded from the program and financing schedule above; but they are included in the following activity summary (in thousands of dollars):

	1963 actual	*1964 estimate*	*1965 estimate*
Amount of properties sold	6,381	7,405	7,749
Amount of vendee loans established	5,659	6,675	6,849
Amount of vendee loans repaid	815	847	965

3. *Real property acquired.*—Properties are acquired through foreclosures and voluntary conveyance in defaulted loans. This involves primarily an exchange of noncash assets, with relatively small cash outlay. The noncash portion of these transactions are excluded from the program and financing schedules above and the statement of sources and application of funds; but they are included in the following activity summary (in thousands of dollars):

	1963 actual	*1964 estimate*	*1965 estimate*
Amount of properties acquired	7,547	7,062	7,865

4. *Interest on borrowings.*—Payments to the Treasury will remain about the same since there will be no change in the principal amount of notes held by the Treasury. Out of the total earned revenue through June 30, 1963, approximately 65% was used to pay interest expense on borrowings. Legislation (S. 2064) is now pending in the Congress to relieve the Veterans Administration from paying interest on the amount of borrowings transferred in 1962 from the Direct loan revolving fund to the Loan guaranty revolving fund.

5. *Operating expenses, general.*—Includes a variety of miscellaneous expenses incident to closing and servicing loans. Costs will change in proportion to the change in the number of loans outstanding.

6. *Property management and selling expenses.*—The costs of maintaining and selling properties acquired through foreclosure is expected to increase slightly with the increase in number of loans outstanding.

Financing.—Prior to June 30, 1963, loans were made primarily with funds borrowed from the Treasury. Present plans are that the program will generate most of

Public enterprise funds—Continued

DIRECT LOANS TO VETERANS AND RESERVES REVOLVING FUND—Continued

the funds needed for operations from loan repayments and the proceeds of loan sales, thereby reducing the dependence on Treasury borrowings. The Administration has presented legislation (H.R. 6652) to Congress to permit the sale of direct loans at such prices as the Administrator of Veterans Affairs determines to be reasonable. This additional authority will increase the proceeds of loan sales by $50 million in 1965. Borrowing authority in the amount of $2,033 million was authorized through June 30, 1963. Additional borrowing authority of $150 million in 1964 has been authorized (72 Stat. 1214). New authorization of $150 million in 1965 is to be rescinded as unnecessary to the program. These authorizations will be reduced by the proceeds of loan sales in the preceding fiscal year. Of the total funds to be made available from program operations, it is expected that $162 million will be disbursed in the current year and $110 million in 1965. Expenses incident to closing loans are paid by the veteran, foreclosure expenses are met from interest income, and administrative expenses are borne by the appropriation General operating expenses, Veterans Administration.

Operating results and financial condition.—Interest revenue from loans outstanding exceeds interest expense on borrowings from the Treasury and property liquidation expenses, thereby providing a modest reserve for losses on the $1 billion loans outstanding.

Financing applied to program	309,520	292,000	257,000

Note.—The above statement excludes the following exchanges of nonworking capital assets: The settlement of VA-guaranteed or insured loans by the acquisition of real property (1963, $230,426 thousand; 1964, $201,940 thousand; 1965, $182,940 thousand). The settlement of defaulted VA-owned loans by acquisition of real property (1963, $21,738 thousand; 1964, $21,830 thousand; 1965, $22,390 thousand): The acquisition of vendee loans in exchange for real property (1963, $204,046 thousand; 1964, $266,000 thousand; 1965, $261,000 thousand).

Summary of Source and Application of Funds (in thousands of dollars)

	1963 actual	1964 estimate	1965 estimate
Obligations (from program and financing)	309,520	292,000	257,000
Increase (−) or decrease in gross unpaid obligations	1,339	−216	−668
Gross expenditures	310,859	291,784	256,332
Revenues and other receipts (from program and financing)	335,137	280,514	319,632
Increase (−) or decrease in accounts receivable, net	−1,356	1,270	−300
Applicable receipts	333,781	281,784	319,332
Budget expenditures	−22,922	10,000	−63,000

The Loan guaranty revolving fund was established at the beginning of 1962 by 74 Stat. 533, in order that the revenues obtained from principal payments and proceeds of sales of vendee accounts, principal payments on acquired loans, income from interest payments on such assets, and miscellaneous income such as from rental of properties, could be used to defray part of the expenses for paying claims, acquiring properties, managing and selling properties.

Budget program.—The activities indicated in tables 1 and 2 below represent the numbers of each asset acquired on a check-issued basis.

1. *Real property acquired.*—Private lenders who have acquired property as a result of foreclosure on defaulted guaranteed or insured loans may elect to convey that property to the Veterans Administration. The table below reflects this activity and excludes the amount of indebtedness established against the veteran:

	1963 actual	*1964 estimate*	*1965 estimate*
Number of properties acquired	22,894	20,535	17,860
Average cost per acquisition	$11,052	$11,200	$11,200
Total cost (in thousands)	$253,023	$230,000	$200,000

2. *Claims paid.*—These payments result from veteran borrowers failing to keep up their payments on VA guaranteed or insured loans, thus requiring the Government to assume the responsibility. The table below reflects this activity and it only represents the amount of indebtedness established against the veteran after the claim has been settled:

	1963 actual	*1964 estimate*	*1965 estimate*
Number of claims	23,375	19,000	15,000
Average cost per payment	$965	$1,000	$1,000
Total cost (in thousands)	$22,562	$19,000	$15,000

The total expenditures in terms of claim payments and additional acquisition costs to acquire the property, averaged $12,017 per case in 1963, against an asset value averaging $11,052 per property acquired. The difference of $965, represented as a net claim payment, is established as an indebtedness due the Government by the veteran.

3. *Loans acquired.*—Guaranteed or insured loans in a default status may be purchased by the Administrator to avoid foreclosure when it is felt that temporary forebearance will allow the veteran borrowers to cure the default:

	1963 actual	*1964 estimate*	*1965 estimate*
Number of loans acquired	99	77	77
Average cost per acquisition	$12,545	$13,000	$13,000
Total cost (in thousands)	$1,242	$1,000	$1,000

4. *Repurchase of loans sold.*—Pursuant to VA Regulation 4600, dated March 22, 1962, the Administrator may sell mortgage loans, which have been created incident to the sale of VA acquired properties, with full recourse:

	1963 actual	*1964 estimate*	*1965 estimate*
Number of loans repurchased	303	495	495
Average cost per repurchase	$10,108	$10,100	$10,100
Total cost (in thousands)	$3,063	$5,000	$5,000

5. *Property management expense.*—The cost of ownership of acquired properties is financed from this fund. These costs include local real estate taxes, services performed by management brokers and maintenance of the property in a salable condition:

	1963 actual	*1964 estimate*	*1965 estimate*
Average number of properties	20,364	22,900	21,900
Average cost per property	$971	$1,050	$1,050
Total cost (in thousands)	$19,764	$24,000	$23,000

6. *Sales expense.*—This item consists principally of brokers fees and advertising costs incident to the sale of acquired properties:

	1963 actual	*1964 estimate*	*1965 estimate*
Number of sales	18,605	24,150	23,750
Average cost per sale	$530	$540	$550
Total cost (in thousands)	$9,866	$13,000	$13,000

Financing.—Normal revenue and receipts consist principally of interest income and repayments on mortgage loans made incident to the sale of real property acquired as a result of foreclosure on guaranteed loans. Also, an estimated $222 million and $263 million vendee loans will be sold in 1964 and 1965, respectively.

Under proposed legislation.—Legislation will be proposed to authorize the sale of participations in pooled mortgage loans held by the Veterans Administration and the Federal National Mortgage Association. The effect will be to reduce expenditures by $100 million in 1965 and to increase the balances available for new loans and payment of claims against the Loan guaranty revolving fund. The mortgage pool may include both direct loans and vendee accounts.

There are available for leasing to Federal employees 128 housekeeping units located at the Veterans Administration Hospital, Perry Point, Md. These units were constructed prior to World War I and consequently are in need of considerable repair.

Revenue derived from rental of these quarters is used for the extensive backlog of modernization, maintenance, and repair (38 U.S.C. 5012a).

Public enterprise funds—Continued

SERVICE-DISABLED VETERANS INSURANCE FUND—Continued

This fund finances the payment of claims on nonparticipating insurance policies issued to veterans with service-connected lisabilities which makes them ineligible for commercial insurance (38 U.S.C. 722). Administrative expenses are paid from the General operating expenses appropriation.

Budget program—1. *Death claims.*—Payments to surviving beneficiaries continue to increase as new deaths occur among the increasing number of policyholders.

3. *Cash surrenders.*—A policyholder may terminate his insurance by cashing in his policy for its cash value.

4. *Policy loans and liens.*—A policyholder may borrow up to 94% of the cash value of his policy. This activity increases with the increased number of policyholders.

The general increase in the activity of this fund is indicated in the following table (dollars in thousands):

	June 30, 1962	*June 30, 1963*	*June 30, 1964*	*June 30, 1965*
Number of policies	49,577	52,790	55,800	58,600
Insurance in force	$432,896	$460,174	$487,000	$511,000

Financing.—Operations are financed from premiums and other receipts. Additional funds are derived from the Veterans insurance and indemnities appropriation, instead of direct appropriations to this fund. It is estimated that the payment will be $2.7 million in 1964 and $3.2 million in 1965.

Operating results and financial condition.—Because premium and other receipts continue to be insufficient to cover operations, the deficit is expected to continue to increase with capital impairment reaching an estimated $33.8 million by June 30, 1965.

The capital of the fund consists of $4.5 million—$3.5 million appropriated directly in 1952, 1956–58 and $1 million transferred from Readjustment benefits appropriation in 1954.

Summary of Sources and Application of Funds (in thousands of dollars)—**Continued**

	1963 actual	1964 estimate	1965 estimate
Revenue and other receipts (from program and financing): Applicable receipts	6	6	6
Budget expenditures	23	37	16

The fund finances claims arising from the guarantees of premiums due on commercial life insurance policies held by servicemen while they are in service and for 2 years after discharge (72 Stat. 487). The Government guarantees the repayment of any indebtedness not liquidated by the insured himself. Any payment by the Government on cases approved subsequent to October 6, 1942, creates a debt owed the Government by the insured.

Budget program—Insurance program.—Claims paid on guaranteed premiums are made to commercial insurance companies in cases where the servicemen failed to make premium payments which were guaranteed by the Government.

The activity of the fund is indicated in the following table:

	1963 actual	*1964 estimate*	*1965 estimate*
Number of settlements	39	40	35
Average cost per settlement	$710	$975	$630

Financing.—Payment of claims against this fund are financed from collection of claims receivable, revenue, and appropriations as needed.

Operating results and financial condition.—The payment of refund claims has created expenses substantially in excess of the small revenue of the fund, thereby increasing the deficit to $1.9 million in 1963 with nominal losses continuing through 1965.

The fund finances the payment of claims on nonparticipating insurance policies issued before January 1, 1957, to veterans who served in the Armed Forces subsequent to April 1951 (38 U.S.C., section 723). Policyholders were given the right (72 Stat. 1716) to convert to a perma-

Public enterprise funds—Continued

VETERANS SPECIAL TERM INSURANCE FUND—Continued

nent plan of insurance or to a new form of term insurance which may not be renewed beyond age 50 but which costs less than the unlimited term insurance. Those who converted to a permanent plan also acquired the right to purchase total disability income coverage with an additional premium.

The fund has an accumulated surplus in excess of its anticipated liabilities. Provision was made (75 Stat. 495) for a onetime distribution of surplus by payment of a special dividend to policyholders whose insurance was in force during November or December 1960 or January 1961 if they had a permanent or limited term plan or converted from unlimited term to permanent or limited term before September 14, 1963. The dividend was also paid on unlimited term policies which matured by death on or after the November 1960 premium due date and before September 1963.

Budget program—1. *Death claims.*—Payments to surviving beneficiaries continue to increase as new deaths occur among policyholders.

2. *Disability claims.*—Payments to individuals who have purchased total disability coverage and who subsequently become totally disabled began in 1960.

4. *Dividends.*—Payments began in 1962 and were completed in 1964.

6. *Policy loans made.*—The policyholders who converted their insurance from term to permanent plan were subsequently entitled to borrow up to 94% of the cash value of the new policy. Disbursement of such loans from this fund increased from $703 thousand in 1962 to $1,129 thousand in 1963.

The general decrease in the activity of this fund is indicated in the following table (dollars in thousands):

	June 30, 1962	*June 30, 1963*	*June 30, 1964*	*June 30, 1965*
Number of policies	649,973	645,195	637,000	629,000
Insurance in force	$5,758,099	$5,700,395	$5,628,000	$5,557,000

Financing.—Payments from this fund are financed primarily from premium receipts and interest on investments.

Operating results and financial condition.—Favorable mortality experience on insurance written against this fund has kept death claims payments well below the amount of premium and interest receipts, thereby producing an annual increase in the retained earnings of the fund. The retained earnings have been reduced by the special dividend and any further excess will be transferred to the general fund of the Treasury.

Federal Reserve Bank of St. Louis

Intragovernmental funds—Continued

SUPPLY FUND—Continued

Budget program.—The fund provides for the procurement of supplies and equipment, the maintenance and operation of supply depots, the operation of service and reclamations shops at each supply depot, a centralized periodical procurement activity, and printing service to VA installations on a centralized basis. Printed matter is acquired in accordance with the rules of the Joint Committee on Printing from the Government Printing Office, the General Services Administration, a VA-operated plant in Arlington, Va., and from commercial sources.

The Veterans Administration has been designated as the Government's purchasing and distribution agent for nonperishable subsistence and drugs required by the civilian agencies. Contracting and purchasing of these commodities began in the latter part of 1961. The VA is currently collaborating with the GSA in a study of distribution methods for nonperishable subsistence items; it is anticipated that this joint study will be completed in the early part of 1964.

Expenditures and revenue for the fund are estimated at $183,724 thousand in 1965. An increase in procurement and sales volume in 1964 and 1965 over 1963 is anticipated due to increased sales at VA field stations and to other government agencies.

Financing.—Consuming appropriations reimburse the fund for the cost of supplies and equipment provided and services rendered by the above specified activities including related expense such as transportation, inspection, and testing. Supply depot operating costs are recovered from the appropriations and funds receiving supplies and equipment from the depots.

Operating results and financial condition.—The fund operated at a profit of $298 thousand in 1963. It is anticipated that the fund will break even in 1964 and 1965.

OTHER INDEPENDENT AGENCIES

ADVISORY COMMISSION ON INTERGOVERNMENTAL RELATIONS

General and special funds:

SALARIES AND EXPENSES

For expenses necessary to carry out the provisions of the Act of September 24, 1959 (73 Stat. 703–706), [$385,000] *$395,000*. (*Treasury, Post Office, and Executive Office Appropriation Act, 1964.*)

Program and Financing (in thousands of dollars)

	1963 actual	1964 estimate	1965 estimate
Program by activities:			
Advisory Commission on Intergovernmental Relations (program costs, funded)[1]	421	407	410
Change in selected resources [2]	−37	−20	−15
Total obligations	384	387	395
Financing:			
Advances and reimbursements from non-Federal sources [3]	−14	−2	
Unobligated balance lapsing	5		
New obligational authority (appropriation)	**375**	**385**	**395**

[1] Includes capital outlay as follows: 1963, $11 thousand; 1964, $3 thousand; 1965 $1 thousand. (Excludes adjustment of prior year costs $2 thousand.)
[2] Selected resources as of June 30 are as follows: Unpaid undelivered orders, 1962, $85 thousand (1963 adjustments, −$4 thousand); 1963, $44 thousand; 1964, $24 thousand; 1965, $9 thousand.
[3] Reimbursements from non-Federal sources are derived from employee detail (5 U.S.C. 2332(c)(2)).

This appropriation provides for continued attention by the Commission to interrelations of Federal, State, and local governments.

Representatives of Federal, State, and local governments are brought together for consideration of common problems. The administration and coordination of Federal grant and other programs requiring intergovernmental cooperation are examined and emerging problems of Federal-State-local relations are identified and explored.

Proposed Federal and State legislative and administrative programs are developed to coordinate taxes at all levels in order to reduce tax overlapping and simplify the tax structure, and to reduce taxpayer-compliance costs and costs of tax administration.

Technical assistance is provided in the review of proposed legislation to determine its overall effect in the Federal system, and the most desirable allocations of governmental functions, responsibilities, and revenue among the several levels of government are recommended.

Recommendations growing out of the Commission's work are submitted, as appropriate, to the executive or legislative branches of Federal, State, and local governments.

The American Battle Monuments Commission maintains the World War I and World War II American military cemeteries in foreign countries and the memorials in the war areas commemorating the participation of the American Armed Forces. There are 11 memorials and 8 cemeteries, each with a memorial chapel, at World War I sites, and 14 cemeteries and memorials at World War II sites. Interred in these cemeteries are the remains of 124,079 service men and women, and an additional 91,419 missing and unidentified are commemorated by the inscribing of their names upon the walls of these and other memorials erected by the Commission in the United States and at Honolulu. In addition, the Commission maintains the U.S. National Cemetery, Mexico City, Mexico. Each year large numbers of American tourists and local citizens visit the cemeteries and memorials to pay homage and to view these points of historic, as well as artistic, interest.

The Commission is responsible also for the planning and construction of all military memorials.

The Board regulates the economic aspects of air carrier operations, both domestic and international; investigates aircraft accidents; participates in the development of international air transportation; and participates in the development of safety rules and standards. The increase proposed for 1965 is primarily for work in the safety area.

1. *Economic regulation.*—This includes granting certificates of public convenience and necessity, prescribing or approving rates and rate practices of air carriers, fixing mail rate compensation, prevention of unfair competition, and approval of business relationships between air carriers, and adjudication of complaints alleging violations of civil air regulations.

2. *Safety activities.*—These consist of investigating and determining the probable cause of civil aircraft accidents, investigating potential hazards, and recommending preventive measures to avoid accidents in the future.

3. *Board adjudication, executive and legal staff activities.*—This includes the adjudicatory, program planning, and top policy and decision making functions of the Board; legal advice and assistance on all aspects of economic, regulatory, and safety activities; preparation of opinions; and the handling of litigation.

[1] Adjustment of obligations of prior years.

The Board fixes rates for transportation of airmail to promote the development of air transportation required for the commerce of the United States, the postal service, and the national defense. Many of these rates include an element of subsidy. The subsidy portion is paid by the Civil Aeronautics Board, and the service portion is paid by the Post Office Department.

The following table reflects the estimated amounts becoming due finally for each year, together with the adjustments between years:

ESTIMATED SUBSIDY EARNINGS AND OBLIGATIONS RELATED TO APPROPRIATIONS

[In thousands of dollars]

	1963 actual	*1964 estimate*	*1965 estimate*

The following analysis shows the subsidy outlook for 1965 under final Board actions:

CERTIFICATED CARRIER UNITS

	Non-subsidized	*Subsidized*	
Domestic:			
Domestic trunklines	10	1	Northeast Airlines returned to subsidy status in fiscal 1964. All others remain subsidy-free.
Local service operations	--	13	Local service carriers need for subsidy will continue at approximately the same level as in prior years.
Helicopter operations	--	3	Subsidy will continue to support helicopter operations.
Alaskan operations	1	8	Subsidy will continue to support routes between continental United States and Alaska and to remote localities.
Hawaiian operations	--	2	Subsidy will be required to support Hawaiian operations.
U.S.-flag operations	4	--	The U.S. flag operations which represent the all international operations, the all cargo operations, and all other operations are in a non-subsidized status.
All cargo operations	5	--	
Other operations	4	--

CIVIL SERVICE COMMISSION—Continued

General and special funds—Continued

SALARIES AND EXPENSES—Continued

Program and Financing (in thousands of dollars)—**Continued**

	1963 actual	1964 estimate	1965 estimate
Financing:			
Unobligated balance lapsing	8		
New obligational authority	**22,141**	**21,805**	**22,187**
New obligational authority:			
Appropriation	22,161	21,805	22,187
Transferred to "Operating Expenses, Public Buildings Service," General Services Administration (76 Stat. 728 and 77 Stat. 436)	−20		
Appropriation (adjusted)	**22,141**	**21,805**	**22,187**

[1] Selected resources as of June 30 are as follows: Unpaid, undelivered orders, 1962, $365 thousand (1963 adjustments, −$40 thousand); 1963, $523 thousand; 1964, $162 thousand; 1965, $162 thousand.

1. *Recruiting and examining.*—Most appointments in the competitive civil service are made under the open competitive merit system through examinations held by the offices of the Commission and its boards of examiners, made up of agency personnel operating under the supervision of the Commission. Appointments through such competitive examinations will accord career or career-conditional status. Physically handicapped persons are given special placement attention. Veterans are aided in securing the benefits to which they are entitled.

PRODUCTION COUNT

	1963 actual	*1964 estimate*	*1965 estimate*
Examinations announced by—			
The Commission	2,378	2,600	2,600
Boards of examiners	5,259	5,500	5,500
Total	7,637	8,100	8,100
Applications processed by—			
The Commission	464,382	500,000	519,700
Boards of examiners	1,496,409	1,524,900	1,553,200
Total	1,960,791	2,024,900	2,072,900

2. *Investigation of character and fitness for employment.*—The Commission conducts most of the investigations required for security determinations of persons being employed in sensitive positions, and fitness investigations of all persons entering nonsensitive positions. The Commission also conducts other investigations connected with appeals and the merit system.

PRODUCTION COUNT

	1963 actual	*1964 estimate*	*1965 estimate*
National agency check and inquiry cases	275,877	258,600	244,000
Suitability cases	2,646	2,730	2,580
Other personnel investigations	5,099	4,500	4,260

3. *Inspections.*—The Commission inspects agency personnel operations to insure compliance with civil service laws and regulations and to stimulate improvement in personnel practices. The Commission also conducts classification reviews to insure compliance with classification standards.

4. *Administration of the retirement systems.*—Administering the Civil Service Retirement Act and other benefit acts involves adjudicating annuity, death, benefit, refund, and deposit claims as well as maintaining the control accounts for the fund and making payments to annuitants and other claimants.

PRODUCTION COUNT

	1963 actual	*1964 estimate*	*1965 estimate*
Annuity and death claims	96,166	98,800	102,100
Refund claims	137,005	140,600	140,800
Claims for deposit	25,634	24,200	24,200
Inquiries	238,796	236,200	236,400

5. *Developing programs and standards.*—The Commission develops programs, devises tests, issues standards and regulations, and proposes legislation to improve the Federal personnel system for both competitive and noncompetitive positions.

6. *Appellate functions.*—These consist of hearing and taking action on appeals; administering the political activities statutes; and providing advice to agencies and individuals regarding rights of appeal.

7. *Career development and training.*—The Commission coordinates interagency training programs to achieve full utilization and to avoid duplication and, where it is more economical to do so, conducts training programs for agency personnel on a reimbursable basis. Also, it promotes and coordinates the incentive awards program authorized by Public Law 83–763.

Investigations.—This appropriation is used primarily to pay the Civil Service Commission and Federal Bureau of Investigation for conducting investigations of U.S. citizens considered for employment in international organizations of which the U.S. Government is a member. The reports of these investigations are forwarded to the International Organizations Employees Loyalty Board of the Civil Service Commission which makes advisory determinations under the loyalty standard. The advisory determinations are transmitted, through the Secretary of State, to the Secretary General of the United Nations, or the executive heads of other international organizations.

Unobligated balance lapsing	7		
Limitation	**264**	**270**	**277**

The Federal Employees' Group Life Insurance Act (5 U.S.C. 2091–2103) provides that the Employees' life insurance fund is available for any expenses incurred by the Civil Service Commission in the administration of the act within such limitation as may be specified annually in the appropriation acts. The use of these funds is reflected in the schedule for advances and reimbursements.

1. *Administration of the basic insurance program.*—Expenses are incurred for functions pertaining to employees and annuitants covered under the basic provisions of the act.

2. *Beneficial association work.*—Expenses are incurred for functions pertaining to maintenance by the fund of life insurance agreements of employee beneficial associations.

Summary of Sources and Application of Funds (in thousands of dollars)

Obligations (from program and financing)	14,120	14,824	14,447
Increase (−) or decrease in gross unpaid obligations	−242	288	−50
Gross expenditures	13,878	15,112	14,397
Revenues and other receipts (from program and financing)	15,015	14,480	14,740
Increase (−) in accounts receivable, net	−438		
Applicable receipts	14,577	14,480	14,740
Budget expenditures	−699	632	−343

[1] Balances of selected resources are identified on the statement of financial condition.

This fund finances on a reimbursable basis, full field security investigations performed at the request of other departments and agencies of the Government (66 Stat. 107).

Budget program.—Because work on some investigations will be started in one year and completed in another, work-in-process is recognized as an asset of the fund. Agency estimates of investigations to be requested in 1964 and 1965 as compared to 1963 experience, are presented below. In addition, the table relates estimated workload receipts to estimates of production, average positions, and unit costs.

CASELOAD, AVERAGE POSITIONS, AND UNIT COSTS

	1963 actual	*1964 estimate*	*1965 estimate*
On hand, beginning of year	15,303	10,483	8,483
Received	40,937	42,000	42,000
Total workload	56,240	52,483	50,483
Processed	45,757	44,000	44,000
On hand, end of year	10,483	8,483	6,483
Average positions	1,329	1,395	1,395
Unit cost	$350	$329	$335

The costs for 1964 and 1965 were predicated on past experience adjusted for the effect of the second phase of the pay increase provided by Public Law 87–793. A significant reduction in unit cost was achieved in this program during 1963.

Operating results and financial condition.—The capital of the fund consists of $4 million appropriated in 1952. Excess earnings are paid into miscellaneous receipts of the Treasury.

Revenue, Expense, and Retained Earnings (in thousands of dollars)

COMMISSION ON INTERNATIONAL RULES OF JUDICIAL PROCEDURE—Continued

General and special funds—Continued

SALARIES AND EXPENSES—Continued

The Commission was established to investigate and study existing practices of judicial assistance and cooperation between the United States and foreign countries and to draft agreements to be negotiated by the Secretary of State and recommend legislation or other action to the President with a view to achieving improvements. An advisory committee, composed of persons active in public life, particularly in the legal profession, was created to advise and consult with the Commission.

The life of the Commission expired December 31, 1963.

Budget expenditures	−391,547	−648,981	−855,914

Since its organization in 1934, the Export-Import Bank of Washington has assisted in financing the sale of American exports. The major programs of the Bank include long-term project and equipment loans to borrowers in foreign countries for the purchase of U.S. exports, emergency foreign trade loans to governments, and insurance of short- and medium-term credit extended by private lenders to purchasers of U.S. exports.

Public Law 88–101, approved August 20, 1963, extended the life of the Bank to June 30, 1968; increased from $7 billion to $9 billion the total amount of loans, guarantees and insurance which the Bank may have outstanding at any one time; and increased from $1 billion to $2 billion the amount of guarantees and insurance which may be issued on a fractional reserve basis within the $9 billion total lending authority. Although Congress enacted an increase of $2 billion in lending authority, it did not increase the Bank's authority to expend from public debt receipts.

The Bank's policy is to extend credit only when in its judgment private capital is unavailable, and to encourage private participation in the credits extended. When making loans, the directors are required to find reasonable assurance of repayment.

In 1963 the Bank's receipts exceeded expenditures by $392 million, and in 1964 and 1965 the excess of receipts

EXPORT-IMPORT BANK OF WASHINGTON—Con.

Public enterprise funds—Continued

EXPORT-IMPORT BANK OF WASHINGTON FUND—Continued

over expenditures is expected to be even larger. Three factors are primarily responsible. First, a growing volume of short- and medium-term loans akin to those made directly by the Bank in previous years is now being made by private credit sources under the Bank's guarantee or the joint insurance of the Bank and the Foreign Credit Insurance Association. Second, the Bank has been highly successful in selling its portfolio securities to commercial banks, thereby enlisting their participation in the financing of U.S. exports. Finally, the Bank is receiving sizable prepayments from European governments on loans made for purposes of reconstruction shortly after World War II.

The overall volume of the Bank's new program activity was about the same in 1963 as in 1962, except for a special $400 million credit to Canada in 1962. As in past years, the largest segment of the Bank's lending was in the form of long-term project and equipment credits, entailing sizable purchases of U.S. equipment and services for large developments which materially benefit the borrowing country. Literally thousands of U.S. manufacturers and exporters of industrial, agricultural, and other equipment receive orders as a result of Eximbank's long-term project and equipment loans.

The following tables show the contemplated 1965 new program activity of the Bank, compared with the 1963 actual and the estimate for 1964. New program authorizations (not including administrative expenses) provided for in the appropriation bill for 1963 totaled $1,295 million; $1,218,235 thousand is estimated for 1964 against a limitation of $1,314,366 thousand, and $1,350,060 thousand is estimated for 1965.

Long-term project and equipment loans.—Long-term project and equipment loans are made in all major geographical areas of the free world. In 1963 approximately $290 million in these loans were made to private borrowers and $235 million to government borrowers. These loans help to stimulate the economic development of the recipient countries by financing the acquisition of U.S. equipment and services required for the establishment of new industries, the expansion and modernization of existing manufacturing enterprises, electrical power facilities, highway construction, rehabilitation of railroads, agricultural production, development of natural resources, and the improvement of water and sewer systems. Such projects financed in Latin America are regarded as part of the Bank's contribution to the Alliance for Progress.

Exporter loans.—These are medium-term credits (1–5 years) which have served to finance exports of capital equipment, consumer goods, aircraft, and semifinished products. The sharp decline in this lending results from its transfer to private financing sources under the guarantee of the Foreign Credit Insurance Association and/or Eximbank.

Sale of loans without recourse	33.0	----	----
Loans outstanding, June 30	110.7	66.0	19.3

Commodity loans.—Credits for periods up to 18 months are sometimes extended by the Bank to finance the sale abroad of U.S. commodities such as cotton and tobacco in those cases where credit is not available from private sources. For the most part these loans are being transferred to commercial banks under Eximbank's guarantee.

Emergency foreign trade loans.—The Bank extends emergency foreign trade loans to other governments in countries experiencing shortages of foreign exchange to assist such countries to maintain their level of imports from the United States. These loans may take the form of a line of credit to a foreign central bank or another financial institution to provide dollar exchange for a wide range of U.S. exports, or credits to fund arrearages resulting from dollar exchange difficulties, or credits to assist in financing purchases in the United States required for reconstruction abroad following a major disaster. Of the $455 million in cancellations in 1963, $450 million was for a credit to the Canadian Government which that Government found it did not have to draw as a result of improvement in its balance of payments position.

DATA ON EMERGENCY LOANS

[In millions of dollars]

	1963 actual	1964 estimate	1965 estimate
Undisbursed loan authorizations, June 30	233.3	242.8	297.8

Loan principal repayments	225.8	271.0	278.1
Loans outstanding, June 30	1,289.1	1,089.5	932.4

Delinquent loans.—As of June 30, 1963, there were protracted loan defaults aggregating $28.4 million ($16.2 million principal plus $12.2 million interest), involving three loans to Cuba and four to Bolivia. On these loans the total outstanding principal was $70.1 million. Of the Bank's $200 million of loans to mainland China, all but $28.6 million has been repaid, and the Republic of China has resumed payment on $2.3 million of loans within this outstanding total.

In addition, there are other delinquencies which, in the opinion of the Bank's Board of Directors, are attributable to routine delays or transitory exchange difficulties. On June 30, 1963, these delinquencies totaled $3.4 million, of which $2.5 million was principal and $0.9 million was interest.

Guarantees and insurance.—In addition to making direct loans to finance export transactions, the Bank guarantees and participates in insuring short- and medium-term export loans made by commercial banks and exporters. Guarantees issued by Eximbank to commercial banks enable U.S. exporters to obtain nonrecourse financing directly from their banks. Similarly, through an arrangement with Eximbank the Foreign Credit Insurance Association (FCIA) issues insurance policies directly to U.S. exporters through its more than 70 affiliated insurance companies and their agents throughout the country. These guarantee and insurance programs permit an exporter to: (1) extend credit to his customers in other countries without fear that unforeseen adverse developments abroad will expose him to large losses; and (2) obtain credit more readily from commercial banks.

Under these programs the exporter is required to carry 5–15% of the political risk and 15% of the credit risk involved in export transactions. Through the insurance program Eximbank assumes 100% of the remaining political risk and half of the remaining credit risk, with FCIA carrying the other half. Under the guarantee program Eximbank provides commercial banks a political risk guarantee on the early maturities of medium-term loans and both political and credit risk guarantees on the later maturities; the commercial bank assumes the credit risk on the earlier maturities. Premium rates charged for this insurance vary according to the country of the importer and the term of the credit.

Because of the uncertain fiscal and political situations in many countries which import from the United States, the Bank requires that all applications to FCIA for medium-term insurance and for short-term insurance in excess of $200 thousand must receive the prior approval of the Bank before the policy may be written.

It is estimated that in 1965 the FCIA will issue insurance policies totaling $1,060 million. While total new authorizations by Eximbank for insurance and guarantees are estimated to be $1,324 million, the charge against program activity and lending authority is now computed at 25% of the increase in outstanding balances during the year, after allowing for cancellations, expirations, etc. Thus the charge is expected to be $104,650 thousand in 1965.

Also included in the Bank's activity is insurance against war and expropriation risks on commodities which U.S. exporters hold abroad on consignment awaiting sale, such as cotton and tobacco.

Net change from previous year	29,703	78,305	104,650
Less prior year authorizations (obligated) transferred from loan program at 25%	−2,500	----------	----------
New program activity	27,203	78,305	104,650
Limitation	1,000,000	2,000,000	2,000,000
Charge at end of year [2]	884,092	1,203,000	1,622,000
Balance	115,908	797,000	378,000

[1] Guarantees and insurance issued prior to Oct. 4, 1961, are charged at 100%, and those issued after Oct. 4, 1961, are charged at 25%.
[2] Excludes medium-term guarantees outstanding and issued prior to Oct. 4, 1961, which are not subject to limitation.

Private capital participation.—In 1963 the Bank continued to encourage further participation of U.S. commercial banks in its lending abroad. Following the pattern initiated by the establishment of the Series A Eximbank Portfolio Fund in 1962, the Bank established a second fund, series B (1963), consisting of a pool of export paper held by it with maturities falling due over a 7-year period. Portfolio certificates representing participations in the Fund were sold with recourse to domestic commercial banks and to foreign financial institutions in the amount of $250 million; of this total, foreign institutions purchased $19.2 million. The participants and Eximbank have "put" and "call" options, respectively, exercisable after 2½ years and each 6 months thereafter. As in 1962, the domestic offering was heavily oversubscribed.

In addition to the Portfolio fund sales in 1963, there were sales of individual loan maturities of $80.8 million without recourse and $5 million with recourse, totaling $85.8 million, of which $73.1 million was sold abroad. In 1964 and 1965 the Bank expects to sell additional portfolio certificates, amounting to $500 million and $700 million, respectively, and to continue selling individual loan maturities as well. The Bank also continues to enlist the participation of commercial banks in its new loans.

Administrative expenses.—It is estimated that a limitation of $3.8 million for administrative expenses will permit the Bank to carry out its programs in 1965.

Operating results and financial condition.—The Bank is a Government-owned corporation in which the Treasury has invested $1 billion in capital stock. In addition, the Bank is authorized to borrow from the Treasury up to $6 billion as necessary to carry on its programs. The Bank pays interest on these borrowings, which is expected to amount to $21 million in 1965.

For 1965 the Bank's net income is estimated to be $122 million. Of this sum, $50 million is expected to be paid as a dividend to reimburse the Treasury for its investment in the capital stock and retained earnings of the Bank. It is planned to add the remaining $72 million to the Bank's retained earnings to provide for future contingencies. Total equity of the Government in the corporation is expected to be $2,275 million on June 30, 1965, consisting of $1 billion in capital stock, $267 million in borrowings from the Treasury, and $1,008 million of retained earnings.

POSITION WITH RESPECT TO LENDING, GUARANTEE, AND INSURANCE AUTHORITY

LIMITATION ON ADMINISTRATIVE EXPENSES

Not to exceed [$3,500,000] *$3,825,000* (to be computed on an accrual basis) shall be available during the current fiscal year for administrative expenses, including services as authorized by section 15 of the Act of August 2, 1946 (5 U.S.C. 55a), at rates not to exceed [$75] *$100* per diem for individuals, [purchase of one passenger motor vehicle (for replacement only) at not to exceed $3,000,] and not to exceed $9,000 for entertainment allowances for members of the Board of Directors: *Provided*, That (1) fees or dues to international organizations of credit institutions engaged in financing foreign trade, (2) necessary expenses (including special services performed on a contract or fee basis, but not including other personal services) in connection with the acquisition, operation, maintenance, improvement, or disposition of any real or personal property belonging to the Bank or in which it has an interest, including expenses of collections of pledged collateral, or the investigation or appraisal of any property in respect to which an application for a loan has been made, and (3) expenses (other than internal expenses of the Bank) incurred in connection with the issuance and servicing of guarantees, insurance, and reinsurance, shall be considered as nonadministrative expenses for the purposes hereof.

[None of the funds made available because of the provisions of this Title shall be used by the Export-Import Bank to either guarantee the payment of any obligation hereafter incurred by any Communist country (as defined in section 620(f) of the Foreign Assistance Act of 1961, as amended) or any agency or national thereof, or in any other way to participate in the extension of credit to any such country, agency, or national, in connection with the purchase of any product by such country, agency, or national, except when the President determines that such guarantees would be in the national interest and reports each such determination to the House of Representatives and the Senate within 30 days after such determination.] (*Foreign Aid and Related Agencies Appropriation Act, 1964.*)

Reorganization Plan No. 2 of 1954 relating to the liquidation of the Reconstruction Finance Corporation transferring certain foreign bonds, notes, and securities to the Export-Import Bank became effective as of close of business, June 30, 1954.

Liquidating proceeds of these assets are paid to the Treasury and are not available for future borrowing. Revenue and receipts are estimated to amount to $1,250 thousand in 1964, thereby eliminating the investment of the U.S. Government.

FARM CREDIT ADMINISTRATION—Continued

(Permanent, indefinite, special fund)—Continued

LIMITATION ON ADMINISTRATIVE EXPENSES—Continued

The Administration supervises a coordinated agricultural credit system of farm credit banks and associations which make credit available to farmers and their cooperatives.

Supervision and examination of farm credit banks and associations.—Provision is made for supervision and examination of: 12 Federal land banks (wholly farmer-owned), 13 banks for cooperatives (mixed ownership), 12 Federal intermediate credit banks (mixed ownership), 763 Federal land bank associations, and 487 production credit associations. Also, these credit agencies are furnished such services as assistance in financing and investments, custody of collateral for bonds and debentures, credit analysis, development of appraisal standards and policies, preparation of reports and budgets, and development and distribution of information on farm credit.

Financing applied to program	13,600	10,000	10,000

Summary of Sources and Application of Funds (in thousands of dollars)

Obligations (from program and financing):			
Gross expenditures	13,600	10,000	10,000
Revenues and other receipts (from program and financing):			
Applicable receipts	290	80	100
Budget expenditures	13,310	9,920	9,900

This fund is available to the Governor of the Farm Credit Administration as a revolving fund for investment in capital stock of the Federal intermediate credit banks and the production credit associations. Originally there were separate investment funds for the Federal intermediate credit banks and the production credit associations; however, these funds were combined into a single revolving fund as provided in subsection (f) which was added to section 5 of the Farm Credit Act of 1933 (12 U.S.C., Supp. IV, 1131i) by section 2(l) of Public Law 87–343, approved October 3, 1961.

Budget program—1. *Federal intermediate credit banks.*—Funds will be required in 1964 and 1965 for investment in class A stock of the banks. An estimate of $9 million net investment is made for 1964 and $8.4 million for 1965. The estimate of requirements is based on recent projections made by the 12 intermediate credit banks which indicate that several of the banks will need additional capital in order to keep their debt-to-capital ratios within the 10 to 1 maximum permitted by law.

2. *Production credit associations.*—An estimate for purchase of stock in production credit associations of $1 million is made for 1964 and $1.6 million for 1965. The need arises primarily because the volume of business of associations is increasing more rapidly than necessary net worth can be accumulated from local sources.

Financing.—At the end of 1964 it is estimated that $1,095 thousand will be invested in the production credit associations and $50,150 thousand in the Federal intermediate credit banks. An additional $1.5 million net investment in the associations and $8.4 million in the banks is expected in 1965.

The provisions of section 105(d)(3) of the Farm Credit Act of 1956, which heretofore applied to the Federal intermediate credit banks investment fund is applicable to the combined fund. This section provides that of the $87,405 thousand class A stock of the credit banks outstanding on January 1, 1957, $57,405 thousand must be retired by payments into the Treasury as miscellaneous receipts. When the balance is reduced to $30 million, the remaining proceeds from retirement of such stock will be credited to the combined revolving fund.

Revenues and other receipts (from program and financing): Applicable receipts	11,980	13,927	11,750
Budget expenditures	−11,980	−13,927	−11,750

This fund is available to the Governor of the Farm Credit Administration for investments in class A capital stock of the banks for cooperatives (12 U.S.C. 1134).

The fund was created with $500 million capital in 1929; however, it was reduced to $150 million by legislation approved June 25, 1962 (76 Stat. 109).

Budget program.—No new subscriptions of capital stock are anticipated and stock will be retired by the banks for cooperatives in accordance with section 42(a)(1) of the Farm Credit Act of 1933, as amended.

Operating results and financial condition.—Investment in capital stock will continue to be reduced through 1965, thereby increasing the cash of the fund. The cash balance in the fund at June 30, 1964, is estimated at $69,089 thousand.

New obligational authority (appropriation)	**70**	**65**	**70**

Coal-mine operators, affected by orders issued by Federal coal-mine inspectors may appeal to the Board for annulment or revision of, and temporary relief from, such orders. During 1963, a total of 107 orders were issued. When operators appeal, hearings are held, and the Board rules upon the applications. It is estimated that there will be 100 to 125 orders subject to appeal to the Board in 1965. The recommended appropriation includes an amount estimated to be sufficient to cover necessary administrative expenses and to handle an expected caseload estimated on the basis of the average actual annual caseload for the past 10 years.

The Federal Communications Commission regulates interstate and foreign commerce in communications by wire and radio. The Communications Act requires the Commission to (1) attain and maintain maximum benefits for the people of the United States in the use of the radio spectrum and (2) regulate the rates and services of communications common carriers.

1. *Applied technical research and frequency allocation.*—The Commission undertakes broad research designed to improve the utilization of the radio spectrum, approves certain equipment for public use, and licenses experimental radio stations.

INVESTMENT IN FEDERAL DEPOSIT INSURANCE CORPORATION

Program and Financing (in thousands of dollars)

	1963 actual	1964 estimate	1965 estimate
Financing:			
Unobligated balance brought forward (authorization to expend from public debt receipts)	−3,000,000	−3,000,000	−3,000,000
Unobligated balance carried forward (authorization to expend from public debt receipts)	3,000,000	3,000,000	3,000,000
New obligational authority			

The Corporation insures accounts of depositors in insured banks up to $10 thousand for each depositor. As of June 30, 1963, the deposit insurance fund for the protection of depositors and payment of expenses amounted to $2.58 billion, or approximately 1.4% of all insured deposits and about eighty-five one hundredths of 1% of all deposits, both insured and uninsured, in insured banks on that date. Total insured deposits at the end of 1962 and 1963, estimated on the basis of information furnished as of June 30, 1962, and June 29, 1963, amounted to $167 billion and $184 billion, respectively. It is estimated that total insured deposits as of June 30, 1964 and 1965, will amount to $197 billion and $211 billion, respectively. No tax funds are used in its operations. Its expenses are paid and the fund is accumulated from assessments paid by insured banks and from income from investments in obligations of the Treasury. However, the Corporation is authorized to borrow from the Treasury and the Secretary of the Treasury is authorized and directed to loan to the Corporation on such terms as may be fixed by the Corporation and the Secretary, not to exceed $3 billion outstanding at any one time, as required for insurance purposes. No borrowings under this authorization have been made to date and none are anticipated in 1964 or 1965.

CORPORATIONS

The following corporations and agencies, respectively, are hereby authorized to make such expenditures, within the limits of funds and borrowing authority available to each such corporation or agency and in accord with law, and to make such contracts and commitments without regard to fiscal year limitations as provided by section 104 of the Government Corporation Control Act, as amended, as may be necessary in carrying out the programs set forth in the Budget for the current year for each such corporation or agency, except as hereinafter provided: (*Independent Offices Appropriation Act, 1964.*)

FEDERAL HOME LOAN BANK BOARD

The Federal Home Loan Bank Board formulates policies and supervises the operations of the 11 Federal home-loan banks, the system of Federal savings and loan associations and the Federal Savings and Loan Insurance Corporation; it is also responsible for the examination and supervision of all State-chartered institutions insured by the Federal Savings and Loan Insurance Corporation.

The expenditure programs of the Federal Home Loan Bank Board and the Federal Savings and Loan Insurance Corporation are presented as business-type budgets. Section 2 of Public Law 895, approved July 3, 1948, provides that all expenses of the division of examinations, Federal Home Loan Bank Board, shall be considered nonadministrative; all of its expenses are defrayed from fees charged against and collected from the institutions examined.

Public Law 87–141, approved August 17, 1961, provides that expenses of any functions of supervision (except of Federal home-loan banks) vested in or exercisable by the Board shall be considered as nonadministrative expenses.

The administrative expenses of the Federal Home Loan Bank Board are paid from assessments against the 11 Federal home-loan banks, the division of examinations and the Federal Savings and Loan Insurance Corporation.

The expenses of the division of supervision are paid from assessments against the 11 Federal home-loan banks and the Federal Savings and Loan Insurance Corporation.

Federal Reserve Bank of St. Louis

The three-member Board supervises the Federal home loan bank system, the system of Federal savings and loan associations and the Federal Savings and Loan Insurance Corporation (12 U.S.C. 1421 et seq., 1461 et seq., and 1464 et seq.). Net administrative expenses of the Federal Home Loan Bank Board are paid from assessments against the 11 Federal home loan banks, the Office of Examinations and Supervision, and the Federal Savings and Loan Insurance Corporation.

[Dollars in millions]

	1963 actual	*1964 estimate*	*1965 estimate*
Number of members	4,971	5,090	5,225
Total assets of members	$100,795	$117,665	$133,583
Savings invested in members	$86,767	$101,250	$114,850
Mortgage loans of members	$84,708	$98,655	$112,053
Number of insured institutions examined and supervised	4,386	4,512	4,645
Federal home loan bank advances outstanding	$3,270	$4,100	$4,600

Budget program.—The Board's budget is based on seven activities.

1. *Examination and supervision of Federal home loan banks.*—The Board examines and supervises the operations of the Federal home loan banks.

2. *Supervision of Federal and State-chartered institutions.*—The financial condition and operations of each insured institution is analyzed and corrective action is instituted when warranted. Supervision of insured institutions operating under State charter is carried on, cooperatively, under arrangements made with the respective State authorities.

3. *Chartering Federal and insuring savings and loan associations.*—Federal savings and loan associations are chartered and regulated. Applications of State-chartered associations for conversion into Federal savings and loan associations and applications of Federal savings and loan associations for establishment of branch offices are also examined. In addition, an analysis and evaluation is made of the insurance risk in connection with applications submitted by savings and loan associations for insurance of share accounts.

4. *Examining savings and loan associations.*—Supervisory examinations are made of Federal savings and loan associations, State-chartered associations insured by the Federal Savings and Loan Insurance Corporation, and such uninsured member institutions of the Federal home loan bank system as are not examined by State examiners. Audits are also made of approximately 58% of all insured institutions in conjunction with supervisory examinations. Examinations are also made of institutions applying for insurance of accounts and for conversion from a State to a Federal charter when required by the Board. The costs of examinations and audits are assessed against the institutions examined.

5. *Executive direction and staff services.*—This includes formulation of basic policy and the furnishing of staff services common to the Board and the Insurance Corporation.

6. *Analysis of operations.*—An analysis is made of the financial condition of member institutions, the flow of savings, the character and volume of mortgage lending, as well as selective review of geographical or community areas and phases of operations and certain analyses of trends in the field of thrift and home mortgage finance including volume of activity and interest rates of all major types of mortgage lenders.

7. *Administrative services.*—These consist of auditing; accounting; budgetary and financial reporting; internal budget control; fiscal organization and management; these services also include general housekeeping and operating services, including printing and reproduction work.

The amounts shown in the schedules for the above activities include administrative expenses under annual limitation; nonadministrative expenses under a separate limitation; and certain additional expenses not under limitation. Administrative expenses are estimated to increase from $2,430 thousand to $3,890 thousand. Nonadministrative expenses covering the expenses of examining and supervising savings and loan associations are discussed separately below.

The division of examinations conducts regular periodic and special supervisory examinations of all Federal savings and loan associations, of insured State-chartered savings and loan associations, other institutions of the savings and loan type which are insured by the Federal Savings and Loan Insurance Corporation, and of noninsured member institutions of the Federal home loan bank system not subject to State supervision. The division also examines and analyzes the financial condition of institutions which apply for membership in the system, for insurance of accounts, or for conversion from a State to a Federal charter. The institutions examined bear the costs of examination, and the fees charged therefor are calculated to defray all of the operating expenses of the division.

The division of supervision is responsible for the supervision of institutions insured by the Federal Savings and Loan Insurance Corporation. The purpose of such supervision is to prevent the development and continuance of unsafe and unsound financial practices in these institutions and the correction of such practices where found. In carrying out the supervisory function, the division reviews and analyzes the examination reports prepared by the division of examinations.

The following table reflects the work of the office:

[Dollars in millions]

Financing applied to program			

The Federal home loan banks, together with the building and loan associations and similar institutions which are members of the banks, constitute the Federal home loan bank system and are designed to stabilize and strengthen institutions promoting private thrift and individual home ownership.

The 11 Federal home loan banks obtain their funds from capital stock, issuance of their own obligations, and deposits of member institutions. The capital stock of the banks consists entirely of subscriptions of member institutions. Authority to borrow from the Treasury in the amount of $1 billion is provided in 12 U.S.C. 1431 (64 Stat. 257). No borrowings have been made to date and none is anticipated in 1965.

The Federal Savings and Loan Insurance Corporation is authorized under title IV of the National Housing Act (12 U.S.C. 1724 et seq.) to insure savings in all Federal savings and loan associations and in State-chartered institutions of the savings and loan type which apply and qualify for insurance. The protection thus afforded, which insures savers in member associations against financial loss up to a statutory limit of $10 thousand, may be provided through the prevention of default or the payment of insurance to savings account holders in the event of liquidation. The former course of action, which results in complete protection to each investor regardless of the amount in his account, is accomplished by making cash grants or by purchasing all or a part of the association's assets. Also, the Corporation is authorized to make loans to institutions in financial difficulty. Wherever possible, preventive measures are taken to eliminate the necessity of liquidation. However, in the event liquidation is necessary, the Corporation acts as receiver or coreceiver upon request of State authority in cases involving State-chartered institutions.

The Corporation functions under direction of the Federal Home Loan Bank Board, which provides certain administrative services and conducts the examination and supervision of insured institutions. The expenses of the Board and its staff offices are paid from assessments made on the Corporation, the Federal home loan banks, and the Office of Examinations and Supervision.

[Dollars in millions]

	1963 actual	*1964 estimate*	*1965 estimate*
Number of insured member institutions	4,386	4,512	4,645
Number of insured savers	33,338,000	35,600,000	37,900,000
Potential liability	$82,993,000	$94,700,000	$107,100,000
Assets of insured member institutions	$96,248,000	$109,800,000	$124,200,000
Reserves and undivided profits of insured member institutions	$6,440,000	$7,320,000	$8,300,000
Corporation's reserve for insurance losses	$902,000	$1,208,000	$1,549,000

1. *Administrative expenses: Insurable interests and insurance settlement operations.*—In carrying out its role of protecting savings in insured savings and loan associations, the Corporation has settled 43 cases since its creation 29 years ago. Total losses (including provision for losses) to June 30, 1963, have amounted to $11.5 million representing approximately 1.2% of cumulative gross income. Detailed information with respect to all of the insurance cases is summarized in the following table (dollars in thousands):

Method of settlement	*Number of cases*	*Share accounts*		*Net insurance losses*
		Number	*Amount*	
Contribution	31	59,722	$60,435	$5,256
Receivership	7	7,705	7,557	309
Acquisition of assets	5	47,717	82,138	2,957
Loan	(1)	(1)	(1)	3,000
Total	43	115,144	150,130	11,522

[1] Involves one loan included under "Acquisition of Assets" since assets were acquired in settlement of the loan.

2. *Payments to Federal Home Loan Bank Board: Services and facilities.*—The Corporation will pay 25% of the administrative expenses of the Board as a direct charge and 42% of the remaining administrative expenses of the Federal Home Loan Bank Board in 1965 in return for services and facilities by the Board and staff offices and 47% of the supervisory expenses of the Office of Examinations and Supervision.

Federal Reserve Bank of St. Louis

Other expenses.—Provides for liquidation and other expenses of the Corporation in connection with the disposition of assets purchased from and loans to insured institutions to prevent default.

Financing.—The original capital of $100 million has been completely repaid to the Treasury, together with an additional $43 million for the use of the funds.

The Corporation has continuing authority to borrow from the Treasury for insurance purposes, with a limitation of $750 million outstanding at any one time. No borrowings under this authorization have ever been made.

The Corporation is further authorized to assess against each insured institution additional premiums for insurance until the amount of such premiums equals the amount of all losses and expenses of the Corporation; except that the total amount so assessed in any one year against any such institution shall not exceed one-eighth of 1% of the total amount of the accounts of its insured members and its creditor obligations.

Operating results and financial condition.—The Corporation is entirely self-supporting and in no one year have its operating expenses amounted to more than 5.3% of total income; in 1963 it amounted to 3%. Revenues and other receipts have been sufficient to meet all insurance losses, operating expenses, return on capital stock, and to establish a reserve for contingencies of $902.4 million as of June 30, 1963. Total revenues and other receipts since 1934, of $978.6 million, have been applied as follows (dollars in millions):

	Amount	*Percent*
Expense	$21.7	2.2
Net insurance losses and provision for losses	11.5	1.2
Return on capital stock to U.S. Treasury	43.0	4.4
Reserve for contingencies	902.4	92.2
Total	978.6	100.0

Operating expenses (funded) for 1965 are estimated at $3,230 thousand consisting of administrative expenses of the Corporation of $225 thousand, $2,595 thousand for services rendered by the Federal Home Loan Bank Board, and $410 thousand for other expenses.

Since the time and size of expenditures for the prevention of default and payment of insurance are unpredictable, estimates of these expenditures are omitted from the financial statements.

Net operating income for 1965, which is expected to be increased by $27.6 million or 38.2% above the net operating income for 1963, will be retained by the Corporation to meet future contingencies.

Public Law 87–210, which became effective January 1, 1962, requires each insured savings and loan association to pay annually to the Corporation an additional premium in the nature of a prepayment at a rate equal to 2% of the increase in savings for the previous calendar year less an amount equal to any requirement for the purchase of Federal Home Loan Bank stock during such period. The law also provides for the crediting of a return on the accumulated prepayments of each insured association at a rate equal to the average realized by the Corporation on its own investment portfolio. It is estimated that prepayments will total $221 million in 1965 compared to $185 million in 1963.

Public Law 87–210 further provides for the establishment of a primary reserve which shall be the general reserve of the Corporation and a secondary reserve to which shall be credited additional premiums. When the sum of these two reserves equals 2% of total savings plus creditor obligations, the cash payment of the regular premiums and the prepayments will cease and the Corporation will commence transferring the secondary reserve to the primary reserve by crediting each insured association's accumulated prepayments to its regular premium liability. If the aggregate of the two reserves drops to below 1.75%, the prepayments and the cash payment of the regular premium will be resumed and continued until the 2% ratio is again reached. It is estimated that the aggregate of the primary and secondary reserves will reach $1.6 billion by June 30, 1965, or 1.4% of estimated savings and creditor obligations totaling $112.1 billion.

The Corporation is required by law to accumulate a primary reserve (as of the close of any December 31) equal to 2% of the total amount of all accounts of insured members and creditor obligations of all insured institutions before collection of regular premiums may be discontinued; provided, however, that each insured institution has paid regular premiums for at least twenty years. It is estimated that the primary reserve will reach $730.2 million by June 30, 1965, or .65% of estimated savings and creditor obligations totaling $112.1 billion.

HOME OWNERS' LOAN CORPORATION FUND

The Corporation was created to provide credit facilities to refinance the mortgages of destitute urban homeowners. Its lending authority expired on June 12, 1936, and since that time the Corporation has been dissolved. Liabilities, representing matured bonds held by the public together with accrued interest thereon, totaled $376 thousand at the end of 1963 and are estimated to be reduced to $346 thousand by the end of 1965.

The Federal Maritime Commission, established on August 12, 1961, administers the shipping statutes which require the regulation of the domestic off-shore and international waterborne commerce of the United States. An increase is requested for a more intensive effort with primary emphasis on (a) the effect of freight rate levels and disparities on U.S. commodity exports to world markets; (b) the study of the structure and practices of international steamship conferences to determine the adequacy in the public interest of conference ratemaking processes and shipping practices; (c) improving the review and decision-making processes of the Commission by inaugurating a program for the receipt and evaluation of basic economic data; (d) the removal of foreign discriminations against U.S. shipping; (e) effective regulation of carriers in the offshore trades with particular emphasis on the shipping service requirements of Alaska, Hawaii, and Puerto Rico; and (f) determining the influence of independent freight forwarders and terminals on international commodity movements and freight rates and removing impediments to the free flow of the international commerce of the United States.

[1] Selected resources as of June 30 are as follows:

	1962	1963	1964	1965
Stores	27	42	42	42
Unpaid undelivered orders	72	265	265	265
Total selected resources	99	307	307	307

The Federal Power Commission administers the Federal Power Act and Natural Gas Act, and has additional duties under other acts and Executive orders relating to Federal power developments.

1. *Natural gas industry.*—Regulation covers the transmission and sale of natural gas sold in interstate commerce for resale, both by producers and by pipeline companies. Certificates of public convenience and necessity are issued to natural gas companies subject to the jurisdiction of the Commission. In January 1964 there were approximately 27,000 independent producers who, individually or associated with others, had over 15,000 rate schedules on file. There were also 110 regulated natural gas pipeline companies with annual operating revenues of $5.2 billion. It is expected that the number of independent producers and pipeline companies will remain substantially unchanged through 1965, but that volume of gas sales and related operating revenues of both producers and pipeline companies will increase. Other pertinent data are:

Description	*1963 actual*	*1964 estimate*	*1965 estimate*
Certificate applications filed:			
(a) Pipeline companies	360	360	360
(b) Independent producers	1,654	1,713	1,720
Pipeline gas rate cases handled	95	64	45
Independent producer rate cases handled	3,440	3,509	3,722
Rate cases on hand end of year	3,021	3,210	2,893
Total rate filings received	7,418	8,245	8,245

The workload of pipeline rate cases is on a current basis. The Commission is proceeding with an area rate approach for determining just and reasonable rates to be charged by gas producers. The Commission will establish rate ceilings for jurisdictional producers in geographically defined production areas instead of determining rates on a company-by-company basis. Completion of the first series of area hearings is expected in a 5-year period.

2. *Electric power industry.*—This activity includes the Commission's responsibility for the regulation of the electric power companies that are interstate public utilities. Specifically, the Commission regulates wholesale rates and service, accounts, depreciation practices, certain security issues, disposition of properties and mergers. The Commission encourages voluntary interconnection and coordination of the Nation's power systems. Statistics about the entire electric utility industry are gathered and published. Pertinent data on a calendar-year basis are:

Description	*1962 actual*	*1963 estimate*	*1964 estimate*
Number of public utilities regulated	190	225	225
Operating revenues of regulated utilities (in millions)	$9,200	$11,900	$12,500
Number of utilities reporting for statistical purposes	775	775	775
Operating revenues of all reporting utilities (in millions)	$13,400	$14,100	$14,800

The National Power Survey will be completed in the current year. The Commission will draw on the experience gained in this effort and continue to work with all segments of the industry in exploring the most efficient and economical means of supplying the Nation's electric power loads.

3. *Non-Federal hydroelectric projects.*—Licenses are issued for hydroelectric projects affecting lands of the United States and streams subject to Federal jurisdiction. Construction and operation of projects are inspected and the cost of construction is determined for projects under private license. Pertinent data are:

Description	*1963 actual*	*1964 estimate*	*1965 estimate*
Licensed projects—more than 2,000 h.p.	211	247	295
Applications completed during year	108	146	151
Applications pending (end of year)	219	241	260
Total claimed cost of major projects (in millions)	$5,777	$6,000	$6,300
Annual receipts from licenses (in thousands)	$2,287	$2,553	$2,837

The Commission is continuing its efforts to bring unlicensed projects under license and is carrying out a water resources appraisal program to provide an appropriate inventory of river basin plans for the Commission's use in evaluating license applications for hydroelectric projects.

The non-Federal licensing activity is self-supporting except for the statutory exemption of public bodies from payment of fees.

4. *Federal river development projects.*—Of a potential 154 million kilowatts of hydroelectric power in the United States, 38 million kilowatts had been developed as of January 1963. Of this total, 16 million kilowatts had been developed by Federal agencies and 22 million kilowatts by non-Federal interests.

Studies are made of proposed Federal river development projects by the Commission to determine possibilities for conservation, development, and utilization of potential power resources. Recommendations based on these studies become a part of water resource project reports prepared by the construction agencies and reviewed by interested Federal and State agencies and the Congress. In 1963, 124 studies were carried on and it is estimated that there will be 132 in 1964 and 135 in 1965.

The Commission has the duty of preserving free competitive enterprise through prevention of monopolistic and unfair trade.

1. *Antimonopoly.*—All types of monopolistic restrictions, including price-fixing conspiracies, boycotting, price discriminations, and illegal mergers and acquisitions are corrected; economic data and criteria are brought to bear on monopoly and related problems; supervision is provided over the registration and operations of associations of American exporters engaged solely in export trade; and at the request of the Attorney General, investigations are made as to whether or not defendant corporations are complying with final decrees of U.S. courts in antitrust violations. In 1965, investigation and trial of merger and other antimonopoly cases will be expedited.

2. *Deceptive practices.*—False and misleading advertising and other unfair or deceptive practices are prevented by corrective action, including the affirmative aid of voluntary trade-practice conferences and advertising guides; business and the public are protected from the evils of misbranding and nondisclosure of fiber content of manufactured wool products and household textile articles; consumers and merchants are protected from unfair practices with respect to furs and fur products; and the public is protected from dangers inherent in flammable fabrics. In 1965, investigation and trial of deceptive practice cases will be expedited.

3. *Executive direction and management.*—These also include the adjudicatory functions of the Commission.

The Foreign Claims Settlement Commission is responsible for the settlement of claims of U.S. nationals against foreign nations and other claims programs as authorized by law.

1. *Administration and adjudication of claims.*—The Commission will administer 5 claims programs during the year: (a) Pursuant to an agreement between Poland and the United States, the Commission is responsible for the adjudication from funds provided by Poland of approximately 10,000 property claims of U.S. citizens against Poland; (b) under the General War Claims Act (Public Law 87–846), the Commission must investigate an estimated 35,000 claims to determine compensation to be made to U.S. nationals from vested German and Japanese assets for certain damages sustained during World War II; (c) the Philippine War Damage Act (Public Law 87–616) as amended by Public Law 88–94 authorizes payments up to $25 thousand to approximately 100,000 payees of balances on awards previously made by the Philippine War Damage Commission; (d) under the Lake Ontario claims program, the Commission will investigate the validity of 539 claims of U.S. citizens resulting from the artificial raising of the water level of Lake Ontario; and (e) as its final activity the Commission continues to administer a small World War II prisoner of war claims program.

2. *Review of claims programs.*—This activity includes research, reports, documentation, and similar functions to meet the needs of Congress, Federal agencies, and the public on past and pending claims programs and on legislative matters.

PAYMENT OF PHILIPPINE WAR DAMAGE CLAIMS

Program and Financing (in thousands of dollars)

	1963 actual	1964 estimate	1965 estimate
Program by activities:			
1. Payment of Philippine war damage claims	----	21,225	17,275
2. Administrative expenses	290	607	230
Total program costs, funded—obligations	290	21,832	17,505
Financing:			
Unobligated balance brought forward	----	−72,710	−50,878
Unobligated balance transferred to Funds appropriated to the President, Philippine education program (77 Stat. 123)	----	----	20,000
Unobligated balance carried forward	72,710	50,878	13,373
New obligational authority (appropriation)	**73,000**	----	----

Funds were appropriated in 1963 pursuant to Public Law 87–616 to cover the balance of payments to be made on awards previously determined by the Philippine War Damage Commission. Amending legislation (Public Law 88–94), enacted August 12, 1963, provides for a $25 thousand limitation on payments of any individual claim. The balances of the amounts payable beyond the $25 thousand limitation will be transferred into a new appropriation account to be used for educational programs in the Philippines.

The General Accounting Office is responsible directly to the Congress for conducting independent reviews, audits, and investigations of programs, activities, and financial transactions of Federal agencies; for the rendition of legal decisions relating to Government fiscal matters; for developing, reviewing, and evaluating Federal agency accounting systems; for the settlement of certain claims for and against the Government; and, for advising and assisting the Congress and Government agencies on matters relating to public funds.

1–2. *Office of the Comptroller General.*—Executive management of the General Accounting Office is carried out by the Comptroller General, who is assisted by the Assistant Comptroller General and staff assistants.

4. *Claims division.*—All claims by or against the United States are settled in this division except those for transportation items and claims wherein exclusive jurisdiction is conferred by law upon another agency or the courts.

5. *Transportation division.*—This division audits freight and passenger transportation payments for the account of the United States and settles claims involving transportation charges.

7. *Office of the General Counsel.*—In addition to preparing decisions and reports on the legality or propriety of proposed obligations and expenditures of the Government, the General Counsel and his staff assist the Comptroller General in coordinating the various activities of the General Accounting Office with the Congress, its committees, and individual members, participate in conferences with legislative and administrative officials of the Government on legal matters of a fiscal nature, the sufficiency of proposed legislation, the desirability of new legislation for particular purposes, and render all other required legal services.

8. *Accounting and auditing policy staff.*—This staff develops accounting policies and related requirements for observance by each agency; auditing policies for the guidance of audit work performed by General Accounting

Office auditors; and internal auditing objectives, principles, and standards for guidance of the executive agencies. In cooperation with the Treasury Department and the Bureau of the Budget, it participates in development and reviews of central accounting processes and financial reporting. It also participates in the review of agency accounting systems; in governmentwide studies of the management of automatic data processing systems; and in providing advice and assistance to the Congress on accounting and auditing policy matters.

9. *Civil accounting and auditing division*—10. *Defense accounting and auditing division*—11. *International operations division.*—These divisions, located in Washington, D.C., are responsible for the performance of the accounting, auditing, and investigative functions of the General Accounting Office in the Federal departments and agencies and the District of Columbia, as assigned by the Comptroller General. These functions include the development, review, and evaluation of accounting systems; the review and evaluation of the performance of Federal agencies, and contractors where appropriate, in discharging their financial responsibilities, including the audit and settlement of accounts; and the making of investigations into matters relating to the receipt, disbursement, and application of public funds.

The International operations division includes:

European branch, with headquarters in Paris, France, responsible for performing assigned General Accounting Office functions in the European area, including North Africa and the Near East. A suboffice is located in Frankfurt, Germany.

Far East branch, with headquarters in Tokyo, Japan, responsible for performing assigned General Accounting Office functions in the Far East area.

12. *Field operations division.*—This division, composed of a central office and regional offices in principal cities in the United States, performs assigned accounting, auditing, and investigative work outside the metropolitan area of Washington, D.C.

13. *Office of staff management.*—This office performs staff management functions for the accounting and auditing divisions, including (a) formulating and executing recruiting programs, (b) developing and carrying out training and professional career development programs, (c) participating in general control over the assignment of staff, and (d) obtaining appropriate recognition of the professional character of the accounting and auditing work of the General Accounting Office.

Planning the memorial (costs—obligations)			25
Financing:			
New obligational authority (appropriation)			**25**

The Corregidor-Bataan Memorial Commission was created by an act of Congress in 1953 (Public Law 193, 83d Congress, approved August 5, 1953). Its mission is to plan a memorial to be erected on Corregidor Island to commemorate veterans who fought under the American flag in the Pacific area during World War II. Public Law 88–240, an amendment to the basic legislation, authorizes an appropriation of $1.5 million to the Veterans Administration for construction of the memorial. The $25 thousand requested under this heading will provide for necessary administrative expenses of the Commission in 1965.

Total selected resources	14	18	10	10

This independent Commission of three members was created to hear and adjudicate claims, existing before August 13, 1946, of American Indian tribes, bands, or other identifiable groups of Indians residing within the territorial limits of the United States. Of the 596 claims filed 157 have been completed. Final awards through November 1963 total $89,737 thousand.

A greater number of cases are expected to be completed through compromise settlement in the future because of newly established policy of the Department of Justice on settlements.

It is also anticipated that cases going on to trial will be disposed of at a greater speed since the enactment of legislation providing loans to Indian tribes to finance expert witness fees.

The Commission regulates carriers engaged in transportation in interstate commerce and foreign commerce to the extent that it takes place within the United States. These carriers are common carriers—railroads, express companies, sleeping car companies, motor carriers, water carriers, pipelines (except for water and gas), and freight forwarders—and motor and water contract carriers.

The increase of $1,181 thousand is requested in order to handle the continually increasing number of applications for motor carrier permanent and temporary operating authorities and applications for mergers and consolidations of motor carriers and railroads, to improve the economic and cost data necessary to regulatory activities, and to provide a more adequate level of compliance with the provisions of the Interstate Commerce Act and related acts.

1. *Regulation of carrier rates, practices, operating authorities, and finance.*—This activity of the Commission consists of preparing studies and analyses of operating costs for use in rate proceedings; regulating rates; granting operating authorities; approving applications for abandonments and extensions of railroad lines, financial reorganizations, and rate agreements between carriers; reviewing proposed discontinuances of or change in the operation or service of trains and ferries and formally issuing orders, rules, and regulations.

Investigations instituted	1,435	1,440	1,500
Investigations concluded	1,447	1,470	1,550
Court proceedings instituted	886	919	950
Court proceedings concluded	933	925	950

3. *Supervision and analysis of carrier accounting and statistics.*—The Commission is responsible for the formulation and policing of uniform systems of accounts; the maintenance of current inventory and cost records; the development of elements of value used in regulating carriers; the compiling of statistics from carrier reports; and the preparation of studies of operating, financial, and related transportation problems.

SELECTED WORKLOAD DATA

	1963 actual	*1964 estimate*	*1965 estimate*
Field audits of carrier accounts	1,193	1,250	1,300

4. *Supervision and interpretation of tariffs.*—Carrier tariffs, or rate schedules, are examined for compliance with the Commission's tariff rules; authority to publish rates on less-than-statutory notice is, under certain conditions, granted; and informal complaints and carrier requests to pay reparations are processed.

SELECTED WORKLOAD DATA

	1963 actual	*1964 estimate*	*1965 estimate*
Number of freight tariffs filed during year	174,940	175,000	175,000

5. *Railroad safety and car service.*—Commission field personnel work with carriers and shippers in handling problems of safety and efficient use of equipment in the transportation of passengers and property by railroad. This work includes inspection of safety appliances and signal installations, inspection of locomotives, and enforcement of car-service regulations designed to increase the utilization of railroad rolling stock.

[2] Selected resources as of June 30 are as follows: Unpaid undelivered orders, 1962, $73 thousand (1963 adjustments, −$3 thousand); 1963, $49 thousand; 1964, $20 thousand; 1965, $20 thousand.

1. *Planning development of the National Capital.*—The Commission is charged with planning the orderly development and redevelopment of the National Capital and the conservation of the important natural and historic features thereof. Its membership consists of five private citizens, six ex officio members who are officials having responsibility in the development of the Nation's Capital, and two Members of Congress. Through monthly Commission and committee meetings, various coordinating committees, and participation in special programs, it reviews and coordinates numerous programs and projects in relation to the comprehensive plan and desirable planning practices. It retains a staff of qualified urban planners and related specialists to carry out its policies and programs and to maintain close working relationships with many Federal and District agencies and citizens organizations. It contracts with District agencies to carry out

urban renewal studies, and provides planning services as requested by the Executive Office and the Congress.

2. *Coordinating metropolitan area planning.*—The National Capital Regional Planning Council, in addition to being charged with the development of an overall comprehensive regional plan, coordinates planning in/for the counties and cities of the metropolitan area together with that of the Federal establishment in the suburbs. Its membership is composed of the Chairman of the Planning Commission, the Engineer Commissioner of the District of Columbia, and four representatives each from Maryland and Virginia, who are nominated from the subregional planning agencies in each State. The Council retains a professional staff, meets monthly, and is composed of several committees specializing in various regional planning spheres and aspects. Its Director chairs a committee composed of the directors of all local and subregional planning agencies of the region to effect greater coordination and liaison. Within the limits imposed by budget, staff, facilities, and legislation, the Council attempts to function as a regional coordinator and catalyst serving as a central intelligence organization and clearing house on all planning and development matters having regional significance.

The National Capital Planning Commission acquires land for the comprehensive development of the park, parkway, and playground system in the District of Columbia and its environs.

1. *George Washington Memorial Parkway.*—Land is acquired along both shores of the Potomac River, above and below Washington, from Great Falls to Mount Vernon. One-half the cost is borne by the local jurisdictions.

2. *Stream valley parks.*—Land is acquired by public bodies with the aid of a one-third contribution from the National Capital Planning Commission.

3. *Park, parkway, and playground system in the District of Columbia.*—Land is also acquired in the District of Columbia, with all expenditures being repaid over a period of years to the United States by the District of Columbia. Acquisitions are part of the Commission's comprehensive plan for the park, parkway, and playground system of the National Capital. Funds appropriated during 1960 completed the amount authorized by law.

No additional funds are requested for 1965.

[1] Includes capital outlay as follows: 1963, $18 thousand; 1964, $3 thousand; 1965, $3 thousand. Excludes adjustments of prior year costs of $8 thousand.

[2] Selected resources as of June 30 are as follows: Unpaid undelivered orders, 1962, $111 thousand (1963 adjustments, −$15 thousand); 1963, $368 thousand; 1964, $243 thousand; 1965, $165 thousand.

The Agency is responsible for preparing a comprehensive transit development program for the National Capital region. A report containing recommendations on finance and organization was submitted to the President in 1962, and congressional review is underway. The Agency proposes a continuing program for the construction of a regional highway system and a phased program for the construction of a modern high-speed rapid transit system. Alternative plans and proposals are being examined in order to develop a completely viable system.

The Agency is working with planning bodies in the District of Columbia and other jurisdictions in an effort to finalize transit routes and to reserve rights-of-way and station sites. Limited work is being done on more refined cost and traffic estimates and detailed construction scheduling. The Agency coordinates its programs with area governing and planning bodies.

New obligational authority:			
Appropriation	21,029	22,460	25,250
Transfer to "Operating expenses, Public Buildings Service," General Services Administration (76 Stat. 728 and 77 Stat. 436)	−63	−38	
Appropriation (adjusted)	**20,966**	**22,422**	**25,250**

[1] Selected resources as of June 30 are as follows: Unpaid undelivered orders, 1962, $203 thousand (1963 adjustments, −$7 thousand); 1963, $119 thousand; 1964, $145 thousand; 1965, $138 thousand.

The Board resolves representation disputes in industry and remedies and prevents specified unfair labor practices by employers or labor organizations. Additional funds are provided to enable the agency to cope effectively with a steadily rising caseload in both unfair labor practice and representation cases.

1. *Field investigation.*—Charges of unfair labor practices and petitions for elections to resolve representation disputes are investigated by regional office personnel. About 88% of the unfair labor practice cases and about 79% of the representation cases are closed by settlement, dismissal, or withdrawal. The remainder are prepared for public hearing. The agency strives for the voluntary settlement of disputes, and the high incidence of informal settlements achieved thus far is expected to continue in 1965.

2. *Trial examiner hearing.*—Trial examiners conduct public hearings in unfair labor practice cases. Their findings and recommendations are set forth in trial examiner decisions. In 1963 there were 758 hearings held, 78 proceedings adjusted and 674 decisions issued. The estimate for 1964 is for 895 hearings, 125 adjusted proceedings and 770 decisions. The 1965 estimate is for 985 hearings, 138 adjusted proceedings and 847 decisions.

3. *Board adjudication.*—In an unfair labor practice case a trial examiner's decision becomes a Board order if no exceptions are filed. About 25% of these trial examiner decisions become automatic Board orders. The remainder are referred to the Board for decision, of which the Board issued 611 in 1963. The estimate for 1964 is 630 and the estimate for 1965 is 700. The Board issued 703 decisions in contested representation proceedings in 1962 and 266 in 1963; it is estimated that issuances will be 245 and 260 in 1964 and 1965, respectively. These decisions are inclusive of those cases in which a request for review of regional director's decisions has been granted. Regional directors issued 1,924 such decisions in 1962, and 2,034 in 1963. The estimates are 2,235 in 1964 and 2,385 in 1965.

4. *Securing compliance with Board orders.*—If the parties do not voluntarily comply with the Board's order involving unfair labor practices, the Board must request the courts to enforce its decisions. In 1963 a total of 222 Board decisions of all kinds required litigation; the estimate for 1964 is 285; the estimate for 1965 is 317.

NATIONAL MEDIATION BOARD

General and special funds:

SALARIES AND EXPENSES

For expenses necessary for carrying out the provisions of the Railway Labor Act, as amended (45 U.S.C. 151–188), including temporary employment of referees under section 3 of the Railway Labor Act, as amended, at rates not in excess of $100 per diem; and emergency boards appointed by the President pursuant to section 10 of said Act (45 U.S.C. 160); [$1,950,000] *$1,970,000.* (*45 U.S.C. 154; Departments of Labor, and Health, Education, and Welfare Appropriation Act, 1964.*)

Program and Financing (in thousands of dollars)

	1963 actual	1964 estimate	1965 estimate
Program by activities:			
1. Mediation	610	688	691
2. Voluntary arbitration and emergency disputes	438	460	460
3. Adjustment of railroad grievances	840	802	819
Total program costs, funded—obligations [1]	1,888	1,950	1,970
Financing:			
Unobligated balance lapsing	51		
New obligational authority (appropriation)	**1,939**	**1,950**	**1,970**

[1] Selected resources as of June 30 are as follows: Unpaid undelivered orders, 1962, $14 thousand (1963 adjustments, $16 thousand); 1963, $30 thousand; 1964, $30 thousand; 1965, $30 thousand.

1. *Mediation.*—The Board mediates labor disputes and determines collective-bargaining representatives for the 700 carriers and 1.25 million employees in the railroad and airline industries.

MEDIATION CASES

	1962 actual	*1963 actual*	*1964 estimate*	*1965 estimate*
Pending, start of year	271	281	310	300
Received during year	295	301	350	350
Closed during year	285	272	360	360
Pending, end of year	281	310	300	290

2. *Voluntary arbitration and emergency disputes.*—When mediation fails, the parties are urged to submit their differences to arbitration or special adjustment boards, including neutral members paid from this account. If neither mediation nor voluntary arbitration is successful, the President, when notified of disputes which threaten seriously to interrupt service, may appoint an emergency board to investigate and report on the dispute as a basis for agreement.

The Foundation supports basic research, national research programs and centers, basic research facilities, the development and improvement of institutional science programs, education in the sciences and the dissemination of scientific information. It is also responsible for recommending to the President policies which would strengthen basic research and education in the sciences. Major emphasis in the 1965 budget is on increased support for science education and for the development and improvement of institutional science programs particularly to expand graduate enrollment in the engineering, mathematical and physical sciences.

1. *Basic research project support.*—The Foundation's support of basic research in the sciences is principally through colleges and universities.

GRANTS FOR SUPPORT OF RESEARCH PROJECTS

	1962 actual	*1963 actual*	*1964 estimate*	*1965 estimate*
Number of grants awarded	2,366	2,709	2,725	2,800

2. *Development and improvement of institutional science programs.*—The Foundation provides matching grants, principally to colleges and universities, for the construction, renovation and equipping of research laboratories and makes grants for the general strengthening of science activities.

Digitized for FRASER
https://fraser.stlouisfed.org
Federal Reserve Bank of St. Louis

3. *Specialized research facilities support.*—The Foundation provides support for major items of research equipment and specialized scientific facilities particularly at colleges and universities.

4. *National research centers.*—The Foundation supports the development and operation of national research centers for optical and radio astronomy and atmospheric sciences.

5. *National research programs.*—The Foundation supports broad national programs of scientific research, including the Antarctic research program, the international Indian Ocean expedition and deep crustal studies of the earth (Project Mohole.)

6. *Science information services.*—The Foundation supports the collection, translation, and dissemination of information on the results of research, and the development of improved methods for the exchange of scientific data. Provision is made for funding the Science Information Exchange, formerly financed on an interagency basis as indicated by the reimbursable activity shown above.

7. *Science education programs.*—The Foundation awards fellowships for summer or academic year study to graduate science students, college science faculty, foreign senior scientists, and high school science and mathematics teachers and supports summer study programs for graduate teaching assistants. The Foundation also awards traineeships for graduate education in engineering, mathematics and the physical sciences.

FELLOWSHIPS AND TRAINEESHIPS FOR ADVANCED STUDY IN SCIENCE AND MATHEMATICS

	1962 actual	*1963 actual*	*1964 estimate*	*1965 estimate*
Number of fellowships and traineeships	4,430	4,720	5,887	10,535

Funds are provided for summer, in-service and academic-year institutes for the training of elementary, secondary school, and college teachers of science and mathematics.

INSTITUTES FOR SCIENCE AND MATHEMATICS TEACHERS

	1962 actual	*1963 actual*	*1964 estimate*	*1965 estimate*
Number of participants	38,278	41,847	41,585	42,513

The Foundation also supports (a) projects directed toward the improvement of elementary, secondary school, and college science and mathematics course content; (b) supplementary programs to stimulate interest in and secure improvement of teaching and training in the sciences at secondary school and college levels.

8. *Science resources planning.*—The Foundation supports economic, science resources, scientific personnel and education studies to assist in the formulation of long-range national science policies.

New obligational authority (appropriation)	**80**	**117**	**92**

This appropriation provides for the Federal share of the annual expenses of the Commission. The compact provides that the amount required to balance the Commission's current expense budget shall be apportioned equitably among the signatory parties by unanimous vote of the Commission. The amount recommended for the Federal contribution is 24.2% of the Commission's net annual expense budget for 1965.

INTERSTATE COMMISSION ON THE POTOMAC RIVER BASIN

General and special funds:

CONTRIBUTION TO INTERSTATE COMMISSION ON THE POTOMAC RIVER BASIN

To enable the Secretary of the Treasury to pay in advance to the Interstate Commission on the Potomac River Basin the Federal contribution toward the expenses of the Commission during the current fiscal year in the administration of its business in the conservancy district established pursuant to the Act of July 11, 1940 (54 Stat. 748), $5,000. (*Departments of Labor, and Health, Education, and Welfare Appropriation Act, 1964.*)

Program and Financing (in thousands of dollars)

New obligational authority (appropriation)	**5**	**5**	**5**

Contribution to the Commission.—The Interstate Commission on the Potomac River Basin was created by compact among the four States in the basin, the District of Columbia, and the Federal Government to abate water pollution.

This appropriation represents the Federal Government's pro rata share of the general expenses of the Commission. The Commission also receives financial assistance from the Public Health Service under the program of grants for water pollution control activities.

PRESIDENT'S ADVISORY COMMITTEE ON LABOR-MANAGEMENT POLICY

General and special funds:

PRESIDENT'S ADVISORY COMMITTEE ON LABOR-MANAGEMENT POLICY

For necessary expenses of the President's Advisory Committee on Labor-Management Policy, established by Executive Order 10918 of February 16, 1961, including services as authorized by section 15 of the Act of August 2, 1946 (5 U.S.C. 55a), but at rates for individuals not to exceed $100 per diem, and $30 per diem in lieu of subsistence for members of the Committee while away from their homes or regular places of business, $200,000. (*Treasury, Post Office, and Executive Office Appropriation Act, 1964.*)

Program and Financing (in thousands of dollars)

New obligational authority (appropriation)	**300**	**200**	**200**

The committee is charged with the responsibility for studying and advising the President on policies that may be followed by labor, management, and the public, which will promote free and responsible collective bargaining, industrial peace, sound wage and price policies, higher standards of living, and increased productivity. Within this broad framework, Executive Order 10918 requests the committee to study and make recommendations on policies designed to insure that American products are competitive in world markets, and to study the benefits and problems created by automation and other technological advances.

Unobligated balance lapsing	10,601	----------	----------
New obligational authority (appropriation)	----------	----------	----------

The amount of $20 million was appropriated in 1961 and $10 million in 1962 for payment to the Railroad unemployment insurance account as repayable advances, to make benefit payments for unemployed railroad workers under the Temporary Extended Railroad Unemployment Insurance Benefits Act of 1961. An unobligated balance of $10.6 million lapsed upon termination of the program.

LIMITATION ON SALARIES AND EXPENSES

(Trust fund)

For expenses necessary for the Railroad Retirement Board, [$11,065,000] *$10,560,000*, to be derived from the railroad retirement account. (*45 U.S.C. 228a–r; Departments of Labor, and Health, Education, and Welfare Appropriation Act, 1964.*)

Limitation	**9,906**	**11,065**	**10,560**

[1] Selected resources as of June 30 are as follows: Unpaid undelivered orders, 1962, $30 thousand; 1963, $11 thousand; 1964, $11 thousand; 1965, $11 thousand.

The Board provides to eligible railroad workers annuities for age and disability and benefits for survivors financed jointly by employee-employer taxes. The administrative expenses of the Board in the operation of this program are financed from a portion of these taxes.

1. *Maintenance of earnings accounts.*—Eligibility for retirement and the amount of benefits paid are based on individual records of earnings. This workload fluctuates with the level of employment in the railroad industry, rates of turnover, and similar factors. Accounts posted were 1,028,000 in 1963 and are estimated at 1,000,000 in 1964 and 970,000 in 1965. The costs are shared on a measured basis with the railroad unemployment insurance program.

2. *Processing claims.*—Applications for annuities and benefits are adjudicated and certified for initial payment. Claims processed were 178,000 in 1963 and are estimated at 179,000 in 1964 and 179,800 in 1965.

3. *Maintenance of beneficiary rolls.*—Benefit payments must be authorized each month for those persons on the rolls who continue to remain eligible. The number of monthly benefit payments will increase from 10,205,000 in 1963 to an estimated 10,489,000 and 10,684,000 in 1964 and 1965. The number of persons on the rolls receiving monthly benefit payments will increase from 867,000 at the end of 1963 to an estimated 891,000 and 913,000 at the end of 1964 and 1965.

4. *Hearings and appeals.*—Individuals whose claims for annuities or benefits are disallowed or who dispute the award have the right of appeal. Appeals dispositions were 313 in 1963 and are estimated at 365 in 1964 and 1965.

5. *Actuarial services.*—Actuarial studies and estimates of the assets and liabilities of the Railroad retirement account are required by law.

6. *Administration.*—The cost of administration is shared between the retirement and the railroad unemployment insurance programs on a measured basis.

[1] Selected resources as of June 30 are as follows: Unpaid undelivered orders, 1962, $24 thousand; 1963, $7 thousand; 1964, $7 thousand; 1965, $7 thousand.

The Board conducts renegotiation with contractors to eliminate excessive profits in connection with procurement under the national defense program. All contractors and subcontractors who have business subject to the act, which presently extends through June 30, 1964, are required to file with the Board if such business exceeds $1 million in a year. The Board has determined or recovered $871.6 million in excessive profits from the date of its establishment through June 30, 1963. Of this total, $10.1 million was determined during 1963.

1. *Executive direction.*—The Board is responsible for final action in all cases. This includes screening all filings involving renegotiable business over $1 million and requests for exemption.

2. *Staff operations.*—The headquarters staff furnishes technical advice and assistance to the Board and regional organization.

3. *Renegotiation operations (field).*—The two regional boards conduct renegotiation proceedings and make determinations and recommendations. They are authorized to conclude cases involving $800 thousand or less of renegotiable profits; however, their determinations in such cases may be appealed to the statutory Board. All determinations in cases involving more than $800 thousand renegotiable profits are subject to approval by the statutory Board.

The Saint Lawrence Seaway Development Corporation, a wholly Government-owned enterprise, is responsible for the construction, operation and maintenance of that part of the Saint Lawrence Seaway within the territorial limits of the United States (33 U.S.C. 981). A 27-foot navigational channel from Lake Erie to Montreal was officially opened for the 1959 navigational season. The Seaway has been constructed and is being operated and maintained jointly by the Saint Lawrence Seaway Development Corporation and the Saint Lawrence Seaway Authority of Canada, in conjunction with the related power development works provided by the Power Authority of the State of New York and the Hydro-Electric Power Commission of Ontario. The Seaway has been operating on a toll basis since the 1959 shipping season.

Operating costs and interest.—These costs consist of interest, administrative expenses, operations of locks and canals, control of traffic and the related maintenance of the plant, navigation aids and other equipment. The estimate for administrative expenses for 1965 is $450 thousand.

Capital outlay.—The Corporation's construction program consists of a 10-mile canal, two locks and navigation channels in the 46-mile International Rapids section of the St. Lawrence River between Ogdensburg and Massena, and certain channel and related navigation works in the 68-mile Thousand Islands section between Lake Ontario and Ogdensburg.

Total construction cost of the United States share of the Seaway is estimated at $131.3 million. Work in place at the end of the current year 1964 is estimated at $129.8 million, and the budget year 1965 program to complete the project is estimated at $1.5 million, consisting principally of completing the extension of downstream guide wall at Snell Lock, completion of access road and foot bridge to mooring cells, commissioning of additional aids to navigation, modifications to floating gatelifter crane and other minor improvements.

Operating results.—Estimated gross revenues for the budget year 1965 are $4.5 million and operating expenses are $1.7 million. Net operating income of $2.8 million will be returned to the Treasury in payment for interest. During the developmental period, all interest expenses not earned will continue to be deferred. Provision for reserve for depreciation amounting to $3,418 thousand was reinstated in 1963.

The cumulative deficit at the end of 1965 is $20.5 million, and includes $13.5 million in unearned interest and $7.3 million depreciation, as well as approximately $0.3 million bond and interest debt repayments. All operating expenses will have been earned, and in addition an estimated $14.3 million in interest payments will have been returned to the U.S. Treasury at the end of 1965.

Digitized for FRASER
https://fraser.stlouisfed.org
Federal Reserve Bank of St. Louis

Financing.—The Corporation is authorized to borrow $140 million from the Treasury to finance the costs of the Seaway and to provide for working capital and claims. Borrowings through 1964 are estimated at $123.6 million, and an additional $1.5 million is required for 1965 to complete the construction program. Capitalized interest amounting to $6.7 million has not been charged against the borrowing authority.

In accordance with an international agreement the Canadian Seaway Authority and this Corporation will report to their respective Governments after five complete seasons of navigation, and not later than July 1, 1964, as to the sufficiency of the authorized tolls to meet the statutory requirements, and to cause the tariff to be reviewed accordingly.

Review of changes in the rules and procedures of exchanges	52	50	100	110

4. *Regulation of investment and public utility holding companies.*—Financing and other corporate matters of interstate public utility holding companies engaged in the electric utility business or in the retail distribution of gas are regulated. A total of 24 holding company systems of which 16 are active, comprising 144 separate companies with assets of $12.5 billion, are registered under the Public Utility Holding Company Act of 1935. Foreign and domestic investment companies are registered also and their activities supervised. The assets of these companies have increased from $2.5 billion in 1941 to an estimate of $35 billion on June 30, 1963. In 1965, the investment company inspection program will be advanced to a 2-year cycle.

SELECTED WORKLOAD DATA

Total selected resources	252	248	239	229

The primary purpose of the Selective Service System is effective manpower utilization through classification under the Universal Military Training and Service Act. The System is responsible for supplying men to keep the Armed Forces at their authorized strength and to the extent that their needs are not met by voluntary enlistment. It will be required to supply an estimated 100,000 men for this purpose in 1965 as compared to approximately 147,000 in 1964 and 75,000 in 1963.

1. *National administration, planning, training, and records management.*—The overall administration of the act including planning, training, and records management is accomplished by the national headquarters and six regional field offices.

2. *State administration, planning, training, and records servicing.*—Administration of the act within the several States is the responsibility of the 56 State headquarters operating under the policies determined by national headquarters.

3. *Registration, classification, and induction.*—These functions affecting over 27,500,000 registrants are accomplished by the over 48,000 uncompensated citizens assisted by about 6,000 clerks at over 4,000 boards. These citizens determine who shall be deferred and for how long in the national interest in agriculture, industry, or other pursuits. They also determine the availability for military service of members of the Standby Reserve.

4. *National Advisory Committee on the Selection of Doctors, Dentists, and Allied Specialists.*—This Committee acts in an advisory capacity to the Selective Service System. It is separately administered, but funds are furnished by the Selective Service System from its appropriation.

5. *National Selective-Service Appeal Board.*—This Board acts on the classification of registrants which have been appealed to the President. It is under separate administration but the Selective Service System provides funds for its operation.

[2] Does not include $2,869 thousand contingency amount not anticipated to be transferred from the revolving fund.

The Small Business Administration counsels, assists, and protects the interest of small business; provides aid to business firms and homeowners who have suffered losses through disasters; and makes loans to assist firms to adjust to changed economic conditions resulting from increased competition from imported articles.

1. *Procurement assistance.*—The objectives of this activity are to insure that a fair proportion of Government contracts for purchases of supplies and services, and for the sale and disposal of property, be placed with small business enterprises.

2. *Management assistance.*—Assistance is provided to small business through (a) advising and counseling on modern management techniques, methods engineering, new and improved products and processes and similar technical problems; (b) developing and distributing management aids and bulletins; and (c) establishing administrative management courses.

3. *Research contracts.*—Research studies designed to aid in developing new or better management techniques for small business, and to reveal matters materially affecting the competitive strength of small business, are financed under this activity.

4. *Investment and development company assistance and supervision.*—In order to stimulate and supplement the flow of private capital to small business concerns this agency is authorized to (a) license, regulate, and supervise small business investment companies; (b) provide capital to these companies; (c) lend funds to such companies; and (d) lend funds to State and local development companies. Funds for administrative expenses are transferred from the revolving fund.

5. *Financial assistance.*—Small business concerns, victims of disasters, and businesses displaced because of Federal construction, are aided through loans, which are administered so as to assure return of the Government investment. In addition, financial counseling is provided to small businessmen requesting assistance. Funds for administrative expenses are transferred from the revolving fund. Financial statements covering these programs and the investment and development company assistance program may be found under the revolving fund section.

6. *Trade adjustment loan assistance.*—Following certification of proposals by the Secretary of Commerce, the Small Business Administration may make loans to assist firms to adjust to changed economic conditions resulting from increased competition from imported articles. Funds for administrative expenses will be transferred from the appropriation Trade adjustment loan assistance.

[1] Selected resources as of June 30 are as follows: Undisbursed loan obligations, 1964, $0; 1965, $500 thousand.

Public Law 87–550, approved July 25, 1962, authorizes appropriations, without fiscal year limitation, to permit the Small Business Administration to make loans to eligible firms under the provisions of the Trade Expansion Act of 1962 (Public Law 87–794, approved Oct. 11, 1962).

The Trade Expansion Act of 1962 provides for certification by the Secretary of Commerce of proposals for economic adjustment submitted by eligible firms. The Secretary is required to refer proposals to an appropriate Federal agency having lending authority. Such agency would then determine whether and to what extent it will provide financial assistance under its own legislation. With respect to firms that have been certified eligible for trade adjustment assistance, Public Law 87–550 permits Small Business Administration to make loans to any size firm, in any dollar amount for a period not to exceed 25 years. These loans may be made on a direct or participation basis. In making such loans, Small Business Administration must apply applicable sections of the Trade Expansion Act.

This fund finances business and disaster loans and prime contracting activities as authorized by the Small Business Act, as amended (15 U.S.C. 631 et seq.), and investment and development company assistance activities, as authorized by the Small Business Investment Act, as amended (15 U.S.C. 661 et seq.). The Congress has authorized appropriations to the fund of $1,666 million. Of this amount, not to exceed $1,325 million may be outstanding for the authorized activities under the Small Business Act and not to exceed $341 million may be outstanding for investment and development company assistance. It is estimated that the limitation on investment and development company assistance will be reached in 1965. Thus, legislation will be proposed to increase the limitation.

Outstanding loans and reservations at the end of each year for the programs financed by the fund are as follows (in millions of dollars):

1. *Financial assistance program—Business loans.*—Business loans may be made directly or in participation with banks or other lending institutions, and shall be of such sound value or so secured as reasonably to assure repayment. No loan may be made unless the financial assistance is not otherwise available on reasonable terms. No direct loan may be made unless it is shown that a bank participation loan is not available and no loan on an immediate participation basis may be made unless it is shown that a guaranteed loan is not available. Effective July 1, 1963, the guaranty loan plan replaced the former deferred participation loan plan. Under the old plan, Small Business Administration agreed to purchase its share of the loan at any time upon request of the participating bank. Under the new plan, Small Business Administration agrees to purchase the guaranteed portion of the loan only upon default.

The Agency's share of an immediate participation or guaranteed loan is limited to 90% and its maximum outstanding loan and/or commitment to any one borrower is limited to $350 thousand, except for a loan to a corporation formed and capitalized by a group of small business concerns for purposes authorized in the Small Business Act. With respect to such "pool" loans, the limitation is $250 thousand multiplied by the number of separate small businesses participating in the corporation. Business loans, except for the purpose of constructing facilities, are limited to a maturity of 10 years and except for "pool" loans and loans in "redevelopment areas" under the Area Redevelopment Act, bear interest at a maximum rate of 5½% per annum on the agency's share thereof. For "pool" loans, the rate of interest on the Small Business Administration's share is no less than 3% nor more than 5% per annum. For loans in ARA designated areas, the rate of interest on the Small Business Administration's share is 4% per annum.

It is the policy to assist businessmen operating small firms to secure credit for constructive purposes on terms that will meet the borrower's individual requirements. Assistance includes counseling as well as the lending of funds. From the beginning of the lending program on September 29, 1953, through June 30, 1963, 37,627 loans had been approved in a total amount of $1,880.3 million (including participating banks' share of $315.3 million). Sixty-four percent of these loans have been on a participation basis. The average size of loans approved to date has been $49,972. In 1965, it is estimated that 5,937 loans will be approved, compared to an estimate of 5,175

Digitized for FRASER

Federal Reserve Bank of St. Louis

in 1964. It is further estimated that 11% of the loans in 1965 will be approved under the guaranty loan plan, compared with an estimate of 10% in 1964. These compare with a deferred participation rate of 10% in 1963.

The following tabulation reflects certain data on business loans and includes funds disbursed or collected by banks on participation loans. Accordingly, the Small Business Administration's share of disbursements and repayments will not agree with related data in the financial statements, which reflect transactions on the basis of only the Small Business Administration cash funds involved.

DATA ON BUSINESS LOANS

[In millions of dollars]

	1963 actual	*1964 estimate*	*1965 estimate*
Loan reservations during the year:			
Total amount	313.9	273.0	310.2
Small Business Administration share	244.4	227.2	258.2
Loans outstanding on June 30 held by banks and Small Business Administration:			
Total amount	762.3	809.1	848.7
Small Business Administration share	636.0	675.0	708.0
Loans disbursements by banks and Small Business Administration:			
Total amount	272.8	257.7	265.4
Small Business Administration share	214.5	214.5	220.9
Loan repayments to banks and Small Business Administration:			
Total amount	194.3	210.9	225.8
Small Business Administration share	160.6	175.5	187.9

Disaster loans.—No restrictions exist on the amount which may be loaned to an individual or business firm suffering loss from a disaster. The maximum term for disaster loans is 20 years and the interest rate for other than "displaced business" disaster loans may not exceed 3% on the Small Business Administration's share of the loan. For "displaced business" disaster loans, authorized by the Housing Act of 1961, the rate on the Small Business Administration share of the loan is determined pursuant to a formula prescribed by legislation. For 1963 the rate was 3½% per annum, while in 1964 the rate will be 3⅝% per annum. Through June 30, 1963, a total of 20,430 regular disaster loans for $182.7 million had been approved, including 2,305 loans for $20.2 million in 1963. In 1962, the first year such loans were authorized, 90 "displaced business" disaster loans for $5 million were approved while in 1963, 93 loans for $5.7 million were approved. New commitments of $7 million for "displaced business" loans and $20 million for all other disaster loans are estimated for 1965.

2. *Investment and development company assistance—Purchase of debentures of small business investment companies.*—A primary function of these companies is to provide a source of needed equity capital for small business concerns. To facilitate the formation and growth of such companies with capital adequate to meet the demands from small business firms, the Small Business Investment Act, as amended, authorizes the Small Business Administration, with certain limitations, to purchase subordinated debentures of any such company in an amount not to exceed the lesser of $400 thousand or the amount of the paid-in capital and surplus of the company from other sources. It is estimated that the Small Business Administration will approve purchase of debentures in the amount of $53.3 million in 1965, compared with $47.1 million in 1964.

Loans to small business investment companies.—To further encourage the formation and growth of such companies, the Small Business Administration is also authorized under certain circumstances to lend funds to them in amounts which may not exceed 50% of the paid-in capital and surplus of a company, or $4 million, whichever is less. In addition to $31.2 million estimated to be loaned directly to such companies by Small Business Administration in 1965, $11 million of loans is anticipated to be made to these companies by commercial banks under the "standby" program inaugurated in 1962. Under this plan, a bank makes a loan to a small business investment company on the basis of a note drawn to Small Business Administration but assigned to the bank. The bank has the right to reassign it at any time to the Small Business Administration and receive payment of the principal then due. A fund reservation of 50% is held against such loans. The estimates for 1964 are $24.5 million in direct loans and $9.2 million in "standby" loans.

Loans to State and local development companies.—The Small Business Administration is authorized to lend funds to State development companies for general use purposes; and to State and local development companies for plant construction, conversion, or expansion, including the acquisition of land. The latter type loans shall be so secured as reasonably to assure repayment, may be made directly or in participation with banks or other lending institutions, may be made only when the proceeds are for use solely to assist an identifiable small business concern and for a sound business purpose approved by the Agency, and are limited to a maximum of $350 thousand for each such identifiable small business concern. A combined total of $31 million is estimated to be approved in 1965, compared with an estimate of $26 million in 1964.

Operating costs—1. *Interest expense.*—As required by the Small Business Act, interest is payable into miscellaneous receipts of the Treasury on outstanding disbursements from the fund, at rates determined by the Secretary of the Treasury, taking into consideration the current average yields on outstanding interest-bearing marketable public debt obligations of the United States of comparable maturities. With respect to disbursements made in 1964, the Secretary of the Treasury has set rates of 3¾% per annum for small business investment company loans, 3⅞% per annum for business loans, disaster loans, and State development company loans, and 4% per annum for local development company loans and small business investment company debentures. The rates stated above for 1964 have also been used in computing interest expense for 1965. Of the estimated $36.7 million interest expense in 1965, $26.1 million is applicable to the Financial assistance program and $10.6 million is applicable to the Investment and Development

SMALL BUSINESS ADMINISTRATION—Continued

Public enterprise funds—Continued

[REVOLVING FUND]—Continued

Company assistance program. The comparable figures for 1964 are $24.9 million and $7.2 million, respectively.

2. *Administrative expenses.*—These expenses for the two programs are financed by transfer of funds from the revolving fund to the appropriation for Salaries and expenses. The distribution of the amounts by program for each of the years is accordingly shown on the program and financing schedule for that appropriation account.

Financing.—The capital of the revolving fund is provided by direct appropriations. Appropriations made to date, including $90 million for 1964, total $1,350 million. It is anticipated that repayments and revenue to be received in 1965, together with a balance of $160.4 million available from 1964, will be sufficient to finance the estimated volume of loans and debenture purchases (and related interest, administrative, and other expenses). Thus, no additional appropriations for capital funds will be required.

Operating results.—The deficit is estimated to continue to increase, although at a slower rate as the interest-earning amount of loans and investments increases. Interest and fee income will not be sufficient to cover interest and administrative expense and a provision for estimated losses, primarily because of the cost of processing an increasing number of applications of which only about one-half result in interest-earning loans, and the cost of servicing the expanding number of widely scattered loans which are relatively small in size.

[1] Balances of selected resources are identified on statement of financial condition.

This fund has financed the liquidation of business and disaster loans of the former Reconstruction Finance Corporation which were transferred to the Small Business Administration for administration and liquidation. Under Reorganization Plan No. 2 of 1954, disaster loans in an amount of $14.7 million were transferred; and pursuant to Reorganization Plan No. 1 of 1957, business loans and other assets of the Reconstruction Finance Corporation liquidation fund, Treasury Department, in excess of $14 million were transferred.

Budget program.—In the fall of 1960 it was evident that as a result of the progress being made, loans and other assets in the fund would be substantially liquidated by the end of 1962. Accordingly, in order to eliminate separate accounting records and budget schedules otherwise required for a relatively nominal amount of assets involved, the 1962 budget proposed the transfer of the remaining assets and liabilities of this fund to the Small Business Administration revolving fund as of the beginning of 1963. The proposal was repeated in the 1963 budget. The current schedules reflect the transfer of net assets of $2.7 million as of July 1, 1962, in accordance with the budget proposal, and the transfer of an additional $543 thousand to the Treasury in payment of the remaining balance of the Government's equity in the fund.

The Smithsonian Institution maintains public exhibits representative of the arts, American history, aeronautics, anthropology, geology, technology, and biology; preserves for reference and study purposes millions of valuable items of scientific, cultural, and historical interest; conducts research in the natural sciences and in the history of cultures, technology, and the arts, particularly those indigenous to North America; and participates in the international exchange of scientific literature. The areas of research in the natural sciences include anthropology, biology, geology, solar radiation, and astrophysics. The Smithsonian is also undertaking an intensive program of classification and study of marine organisms collected in connection with the Government's expanded oceanographic program. The Institution operates 2 museums, 3 scientific bureaus, 3 art galleries, the Armed Forces Museum Advisory Board, and the International Exchange Service. It is responsible also for the operation and maintenance of 7 main exhibition buildings, a facility at Silver Hill, Md., and an exhibits laboratory.

During the budget year the move of the collections and staff to the Museum of History and Technology Building will be completed. The addition of the west wing to the Natural History Building is expected to be nearly completed. The museum staff will be preparing for the move into the new wing early in 1966. The Air and Space Building will be air-conditioned to protect the museum objects and provide greater comfort for the thousands of visitors and the employees located in this building. The National Collection of Fine Arts and the National Portrait Gallery will continue the preparation of exhibition plans and will improve the condition of their collections in preparation for the move into the existing Civil Service Commission Building scheduled to be substantially completed in April 1966; the National Air Museum will continue its program of restoring and preserving aircraft engines and accessories; one new exhibit renovation project and eight building rehabilitation projects will be undertaken; and the Institution will continue to expand its scientific programs.

Public interest continues to grow, as evidenced by the number of visitors: 1961, 7,103,000; 1962, 8,923,000; 1963, 10,310,000.

A supplemental appropriation for 1964 is anticipated for separate transmittal.

SUBVERSIVE ACTIVITIES CONTROL BOARD

General and special funds:

SALARIES AND EXPENSES

For necessary expenses of the Subversive Activities Control Board, including services as authorized by section 15 of the Act of August 2, 1946 (5 U.S.C. 55a), not to exceed $30,000 for expenses of travel, and not to exceed $500 for the purchase of newspapers and periodicals, [$425,000] *$475,000. (Section 12, Title I of the Internal Security Act of 1950, 50 U.S.C. 791 as amended; Departments of State, Justice, and Commerce, the Judiciary, and Related Agencies Appropriation Act, 1964.)*

[1] Selected resources as of June 30 are as follows: Unpaid undelivered orders, 1962, $26 thousand; 1963, $20 thousand; 1964, $2 thousand; 1965, $2 thousand.

Adjudication of cases and legal activities.—Upon petitions being filed, the Board holds formal hearings and determines whether: (a) organizations are Communist-action organizations, Communist-front organizations, or Communist-infiltrated organizations; (b) individuals are officers or members of a Communist-action organization or officers of a Communist-front organization and required to register as such; (c) the registration of particular Communist-action organizations or Communist-front organizations or of particular individuals should be canceled; and (d) a particular Communist-infiltrated organization has ceased to be a Communist-infiltrated organization. The Board's determinations involve the consideration of petitions, motions, answers, and evidence adduced at the hearings. In the individual registration proceedings as well as in proceedings involving organizations, the Board is empowered to hold hearings—which shall be public—to examine witnesses and receive evidence, and to compel the attendance and testimony of witnesses and the production of documents relevant to the matter under inquiry. In each case the Board issues a report in writing setting forth its rulings and findings as to the facts, and issues an appropriate order.

Total selected resources	46	−14	52	52	52

It is the responsibility of the Commission to assess the impact of United States and foreign trade policies on domestic industries and to provide reports to the President, the Congress, and the public on these matters. The increase in our foreign trade in recent years and the greatly changing patterns of world trade have created a greater need for research, investigations, and reports on tariff and trade activities.

The Trade Expansion Act of 1962 has further increased the need for the Commission to assemble information enabling it to make determinations on petitions for adjustment assistance.

The Tax Court hears and decides cases involving income tax deficiencies and claims for refunds of excess profits taxes under the special relief sections of the Internal Revenue Code, and cases involving determinations of excessive profits on contracts renegotiated by the Federal Government.

For 1965 the Court proposes a trial program of 160 weeks to be held in approximately 50 cities. This program should result in closing approximately 6,000 cases.

The actual and estimated work volume of the Court is presented in the following tabulation:

Budget expenditures	14,943	10,000	17,500	38,506	47,000	50,000	53,449	57,000	67,500

The Congress created the Tennessee Valley Authority in 1933 for the unified development of a river basin comprising parts of seven States. Engineering works improve and regulate the Tennessee River and its tributaries for navigation, flood control, and the generation of electric power, and contribute in other ways to development of valley resources. Fertilizer research and agricultural activities promote conservation and improved use of land and water resources. Special attention is given to economic development problems in selected subregions. Forestry activities stress maximum use of forest resources consistent with watershed protection. All these activities are interrelated. Their common purpose is to help develop the valley's agricultural and industrial potential for the benefit of both the region and the Nation.

Other national interests are directly served. The Tennessee waterway, a part of the United States inland waterway system, is an interregional artery for commerce moving to and from ports in 20 States. In 1963 Federal agencies used 38% of the electric energy generated by the TVA system. In national emergencies, defense needs have first call on the Muscle Shoals chemical facilities for munitions research and production; in peacetime, they serve as the country's only public research center equipped for complete development of fertilizers from laboratory to demonstration-scale production.

Federal Reserve Bank of St. Louis

TVA is a corporation wholly owned by the Federal Government. Its program in 1965 will be financed from three sources: (1) appropriations by the Congress; (2) proceeds available from current power operations and borrowings against future power revenues; and (3) proceeds available from nonpower activities.

Budget program—1. *River and power development.*—A major objective of the TVA Act is full development and use of the water resources of the Tennessee River and its tributaries. The development of these natural resources is reflected in regional and national gains in the fields of navigation, flood control, power, light and heavy industry, and recreation. System facilities to be operated in 1965 consist of 29 dams with hydroelectric generating stations, 13 navigation locks at 10 dams, 11 steam-electric generating stations, a power transmission network of about 13,818 circuit miles, and reservoir shorelines totaling 10,000 miles.

NAVIGATION—SUMMARY OF ESTIMATED OPERATING COSTS

[In thousands of dollars]

	1963 actual	*1964 estimate*	*1965 estimate*
Receipts	132	1	1
Operating costs:			
Operating expense	507	529	533
Distribution of administrative and general expense	35	38	40
Allocation of multipurpose reservoir operations expense	1,590	1,741	1,791
Total operating costs, funded	2,132	2,308	2,364
Provision for depreciation	1,872	2,042	2,200
Total operating costs	4,004	4,350	4,564
Net expense	3,872	4,349	4,563

(a) *Navigation operations* of the multipurpose river development system include maintenance of adequate depths for the all-year 9-foot channel from the mouth of the river at Paducah, Ky., to Knoxville, Tenn., a distance of 650 miles. Traffic on the Tennessee waterway in calendar year 1962 was 13.1 million tons and 2.3 billion ton-miles. Transportation savings to shippers on this volume of traffic are estimated at $25.2 million, the difference between freight charges actually paid and those which would have been paid if the river had not been improved for navigation. More than 96% of these savings applied on freight originating outside the valley or moving from the valley to outside destinations. Engineering work assures that physical facilities are operated, maintained, and modified or improved to meet the needs of modern waterborne commerce. Technical studies appraise the opportunities for use of the waterway and the barriers inhibiting its use. Data supplied to shippers and carriers help solve transportation problems, looking to full utilization of the Federal investment in the navigation channel. Advisory work with State and local agencies leads to new or improved public programs by those agencies to help assure full utilization of the waterway.

Capital outlay costs for navigation facilities in 1965 are estimated at $6,458 thousand and provide for continuing construction of a new larger lock at Guntersville Dam, Ala., which is scheduled to be in service in June 1965, and for other navigation facility improvements.

FLOOD CONTROL—SUMMARY OF ESTIMATED OPERATING COSTS

[In thousands of dollars]

	1963 actual	*1964 estimate*	*1965 estimate*
Operating expense	441	472	504
Distribution of administrative and general expense	23	24	26
Allocation of multipurpose reservoir operations expense	1,599	1,758	1,801
Total operating costs, funded	2,063	2,254	2,331
Expenses financed from public works acceleration funds	145		
Provision for depreciation	1,236	1,236	1,258
Total operating costs	3,444	3,490	3,589

(b) *Flood control operations* of the Tennessee River system maintain and use storage space in upstream reservoirs for seasonal retention of excessive runoff and regulate discharges to rates of flow which can be handled safely by downstream channels and reservoirs. Dams on the Tennessee River and its tributaries provide 11.8 million acre-feet of storage for flood control at the beginning of the flood season. Cities and agricultural lands in the Tennessee Valley are protected and flood crests are reduced on the lower Ohio and Mississippi Rivers. Since the first project in the TVA system was placed in operation in 1936, regulation of TVA reservoirs to reduce flood crests has averted damages of about $276 million in the Tennessee Valley and about $35 million on the lower Ohio and Mississippi Rivers. As a supplement to operating its reservoir system for flood control, TVA collects and analyzes flood data and studies potential flood control projects and ways to improve operations of the existing system. Technical advice and assistance given to State and local agencies in finding solutions to local urban and rural flood control problems will be intensified in 1965. A frequent and valuable byproduct of these efforts is the establishment or revitalization of local planning agencies.

Capital outlay costs for flood control facilities in 1965 are estimated at $1,724 thousand for continuing construction of two small water control reservoirs near Bristol, Tenn.-Va., required for a cooperative flood protection project for those cities.

POWER—SUMMARY OF ESTIMATED REVENUE AND RECEIPTS AND OPERATING COSTS

[In thousands of dollars]

	1963 actual	*1964 estimate*	*1965 estimate*
Revenue and receipts:			
Sales of electric energy (outside):			
Federal agencies	100,171	101,530	91,390
Others	164,250	175,350	198,920
Other income	4,272	4,804	4,418
Total revenue and receipts	268,693	281,684	294,728
Operating costs:			
Production and transmission (including allocation of multipurpose reservoir operations expense)	143,738	144,925	153,407
Payment in lieu of taxes	7,323	8,215	8,765
Other operating expense (less interdivisional sales and rents)	9,452	10,719	11,045
Interest charges	330	4,100	6,400
Total operating costs, funded	160,843	167,959	179,617
Provision for depreciation	52,747	59,000	62,000
Total operating costs	213,590	226,959	241,617

TENNESSEE VALLEY AUTHORITY—Continued

Public enterprise funds—Continued

TENNESSEE VALLEY AUTHORITY FUND—Continued

(c) *Power operations* involve generation and transmission of power and sale of energy at wholesale to local distribution systems and to a small number of industries and Government agencies requiring large amounts of power. As of September 1, 1963, power was purchased and distributed by 156 local public agencies and 2 small privately owned utility companies. Total energy to be supplied to the power system from generating facilities of TVA, the Department of the Army on the Cumberland River, and the Aluminum Company of America on the Little Tennessee River is estimated to be 73.7 billion kilowatt-hours in 1965. This is about 5.1 billion kilowatt-hours greater than the energy supplied to the system in 1963 and about 2.3 billion kilowatt-hours above that estimated to be supplied in 1964. Net income from power operations, after depreciation, is estimated to be $53.1 million for 1965, as compared with $55.1 million in 1963 and an estimate of $54.7 million in 1964. The estimates assume average streamflow conditions. Better than average streamflows could produce some increase in net income over the estimates; with subnormal streamflows, the net income would be reduced by increases in production expenses.

POWER—SUMMARY OF ESTIMATED CAPITAL OUTLAY FROM POWER PROCEEDS AND BORROWINGS

[In thousands of dollars]

	1965 estimate
Multipurpose dam: Melton Hill hydro units 1–2	320
Other power supply facilities:	
Continuing construction:	
Widows Creek steam unit 8	2,977
Bull Run steam unit 1	37,943
Additional steam unit	23,448
Paradise steam units 1–2	2,609
Total power supply facilities (including Melton Hill)	67,297
Transmission system facilities	65,900
Coal land and rights	1,005
Additions and improvements at existing power facilities	2,069
Investigations for future facilities	379
Total power system facilities	136,650

Of the $67,297 thousand estimate for power supply facilities, $43,849 thousand is for continuing construction of a generating unit in the Bull Run steam plant, for completion of a generating unit (No. 8) at the Widows Creek steam plant, and for cleanup work on two units which recently went into operation at the Paradise steam plant and two generating units at Melton Hill Dam. Bull Run unit 1 and Widows Creek unit 8 are scheduled for service in November 1965 and October 1964, respectively. The two hydro units at Melton Hill are scheduled for service in June and September 1964.

Completion of these units on schedule will bring the estimated dependable capacity of the system by the winter of 1965–66 to 17.03 million kilowatts, including the Army plants on the Cumberland River and other plants operated as a part of the TVA system. This will provide a reserve of 22.1% over estimated demands of 13.95 million kilowatts to allow for loss of capacity because of breakdown of generating equipment and needs for its maintenance, failure of substation equipment and transmission lines, and drawdown of reservoirs during dry periods. In the winter of 1966–67 it is estimated that total demands will increase to 15 million kilowatts, demands served by TVA capacity will be 14.5 million kilowatts, the dependable TVA system capacity will increase to 17.07 million kilowatts, and the reserve will decrease to 17.7%. By the winter of 1967–68 it is estimated that total demands will increase to 16.15 million kilowatts, demands served by TVA capacity will be 15.15 million kilowatts, the dependable TVA system capacity will be 17.06 million kilowatts, and the reserve will decrease to 12.6%.

TVA and the Mississippi Power and Light Company and the companies associated with it have completed an agreement to provide for the seasonal exchange of large blocks of capacity, which results in savings in installed capacity needs by each system. This arrangement has made it possible to postpone proceeding with a large steam-electric generating unit formerly scheduled for use by the winter of 1966–67. TVA has on order a large turbogenerator for future delivery. The tentative capacity of this unit is 900,000 kilowatts, but TVA has an option to increase its capacity to 1,100,000 kilowatts. During fiscal year 1964 TVA will continue studies to determine whether the larger capacity will be desirable and the most advantageous location for this unit. This additional unit is scheduled to be placed in service in the spring of 1968 to supply loads in the summer of 1968 and the following fall and winter. The 1965 budget includes $23,448 thousand for construction work on this unit.

(d) *Multipurpose reservoir operations* relate to the management, operation, and maintenance of 20 multipurpose reservoirs created by TVA dams. This involves water dispatching operations, water control investigations, investigations and control of reservoir ecology, plant protection and services to visitors, and operation of reservoir lands. Operating costs, funded, are estimated at $6,402 thousand for 1965, of which $1,791 thousand is allocated to navigation operations, $1,801 thousand to flood control operations, and $2,406 thousand to power operations. The remaining $404 thousand is offset by nonpower proceeds derived principally from operation of reservoir lands.

(e) *Surveys and studies for river development* consist of surveys and general studies for potential future river control developments in tributary drainage areas which look beyond the purposes of navigation, flood control, and power. This new category represents a consolidation of types of work which have been conducted for a number of years. The 1965 estimate for this work is $267 thousand. (Costs in 1963 cannot be separated but are included in the cooperative valley development category.)

MULTIPURPOSE RIVER DEVELOPMENT—SUMMARY OF ESTIMATED CAPITAL OUTLAY

[In thousands of dollars]

	1965 estimate
Nickajack dam and reservoir	9,300
Bear Creek multipurpose water control system	215
Beech River multipurpose water control system	2,735
Melton Hill dam and reservoir	11
Total multipurpose projects	12,261
Additions and improvements, multiple-use facilities	346
Investigations for future facilities	715
Total multipurpose river development	13,322

Nickajack dam and reservoir, with provision at this time for a single navigation lock, was started in fiscal year 1964 to replace the Hales Bar project and is scheduled for completion in April 1969. Design work will be started in fiscal year 1965 on the Bear Creek multipurpose water

Digitized for FRASER

Federal Reserve Bank of St. Louis

control system, the estimated cost of which is about $15 million. The 1965 estimate provides for substantial completion of the Beech River multipurpose water control system. Begun in fiscal year 1963, the estimated cost is $9,400 thousand, of which $2 million is to be reimbursed, with interest, by the Beech River Watershed Development Authority.

2. *Fertilizer, agricultural, and munitions development.*—Chemical facilities at Wilson Dam, Ala., are maintained and operated as a national fertilizer development center but, by statute, they must also be available for munitions purposes. These facilities are important in the national defense program.

FERTILIZER, AGRICULTURAL, AND MUNITIONS DEVELOPMENT—SUMMARY OF ESTIMATED OPERATING COSTS

[In thousands of dollars]

	1963 actual	1964 estimate	1965 estimate
Receipts:			
Distributor payments for fertilizer materials	16,431	15,834	15,113
Sale of byproducts, farmer payments for fertilizer, and other income	1,352	2,291	2,562
Total receipts	17,783	18,125	17,675
Operating costs:			
Research on fertilizer products, processes, and uses	2,699	3,274	3,377
Developmental fertilizer and munitions production:			
Production expenses	19,500	20,283	20,048
Less products used in demonstration activities	−18,500	−18,088	−17,516
Fertilizer distributor demonstrations	17,740	17,458	16,823
Farm test demonstrations	1,866	2,456	2,544
Fertilizer and agricultural development investigations	150	387	421
Total operating costs, funded:			
Appropriated funds	3,979	7,030	7,301
Nonpower proceeds	19,476	18,740	18,396
Total	23,455	25,770	25,697
Provision for depreciation	1,482	1,559	1,724
Total operating costs	24,937	27,329	27,421
Net expense	7,154	9,204	9,746

Fertilizer, agricultural, and munitions development activities are of three general types: research on fertilizer products, processes, and uses; developmental production of fertilizer materials; and demonstration and educational introduction of new materials to the American farmer.

(a) *Research on fertilizer products, processes, and uses* consists of fundamental research, applied research, process engineering, technical studies of full-scale plant operations, and research on the agronomic requirements and effects of fertilizer materials. TVA works cooperatively with the Department of Agriculture, the land-grant colleges, and with industry to avoid duplication. Research results on technological developments and new and improved processes are made available to industry. Knowledge gained in fertilizer research is valuable also in the related field of munitions. In 1965 research will be continued on the reactions of fertilizer in the soil, on the uptake of nutrients by plants, on new nitrogen fertilizers of improved quality, and on incorporation of micronutrients in fertilizers. Work on finding improved methods for the production of wet process phosphoric acid will be intensified. The development of improved liquid fertilizers and fertilizers in fluid suspension will be continued. Studies will be made to develop materials designed specifically for bulk blending and work will be continued on the development of various fertilizer coating materials and coating techniques. Agronomic research will include use of the stable isotope nitrogen-15 in studying behavior of nitrogen in the soil.

(b) *Developmental fertilizer production* has these objectives: to demonstrate the technical and commercial feasibility of new or improved processes, thereby encouraging their adoption by industry; to supply materials for widespread educational introduction among farmers; and to supply munitions materials or render other services for national defense.

(c) *Demonstration and educational introduction* of TVA fertilizers is carried on cooperatively with the land-grant colleges and includes carefully controlled small plot demonstrations, tests and demonstrations of fertilizer materials and practices on selected operating farms, and widespread educational introduction of fertilizers also is conducted in cooperation with commercial fertilizer manufacturers, distributors, and dealers. Farmers and the fertilizer industry pay for the fertilizers used. The price is dependent upon the novelty of the material or practice, the nature of the demonstration, and the prices of similar commercial materials. Agricultural extension services of the land-grant colleges give educational and technical guidance in demonstrating and introducing new fertilizers and fertilizer practices in the participating States. Studies and investigations are conducted to provide information for planning, conducting, and appraising agricultural development activities in the Tennessee Valley.

Capital outlay costs for chemical facilities are estimated at $7,465 thousand in 1965. Most of this is for continuation or completion of projects begun in prior years as part of a rehabilitation program which was started in 1960. Facilities to be completed in 1965 include an integrated unit for production of granular nitrogen and compound fertilizers and facilities for storing phosphoric acid and ammonia. During 1965 work will be continued on modernization of TVA's phosphate facilities, including facilities for recovering phosphorus from waste waters and for disposal of fluorine wastes. Plans for 1965 also include completion of construction of a fully automatic water supply system to replace the present water supply facilities at Wilson Dam, Alabama, and improvements to the plant sewer system and other sanitary facilities.

3. *Cooperative valley development.*—Special attention to selected areas of the Tennessee Valley region, in particularly close cooperation with State and local agencies and with tributary area associations, constitutes an additional phase of TVA's program for the proper use, conservation, and development of the region's natural resources. Investigations identify current problems and opportunities for development under conditions of optimum use. Research helps develop and test corrective measures. Cooperative projects with State and local groups apply these measures to regional and special problems.

TENNESSEE VALLEY AUTHORITY—Continued

Public enterprise funds—Continued

TENNESSEE VALLEY AUTHORITY FUND—Continued

COOPERATIVE VALLEY DEVELOPMENT—SUMMARY OF ESTIMATED OPERATING COSTS

[In thousands of dollars]

	1963 actual	1964 estimate	1965 estimate
Receipts	256	17	1
Operating costs:			
Forestry projects	709	1,032	1,071
Mineral resources investigations	67	111	124
Tributary area development	1,664	933	1,018
Total operating costs, funded:			
Appropriated funds	2,187	2,076	2,213
Nonpower proceeds	253	-----	-----
Total	2,440	2,076	2,213
Expenses financed from Public Works Acceleration funds	52	-----	-----
Provision for depreciation	8	5	5
Total operating costs	2,500	2,081	2,218
Net expense	2,244	2,064	2,217

Cooperative valley development activities are of three types: forestry projects, mineral resources investigations, and tributary area development.

(a) *Forestry projects* aid the States, counties, landowners, and the timber industry in making full use of the existing forest resource of the valley and of developing it for maximum long-term production of quality timber, consistent with the needs of watershed protection. Forestry projects include appraisals of the quality and quantity of the forest resource and research and demonstrations in forest management, reforestation, industrial wood use, forest tree improvement, forest fertilizer tests, and strip mine reclamation.

(b) *Mineral resources investigations* will continue in 1965 in cooperation with State agencies, with emphasis on economic geology and the preparation in cooperation with State agencies of geologic maps essential to the development of regional minerals.

(c) *Tributary area development* is a comprehensive and concentrated approach to resource development in areas of the Tennessee Valley where special problems inhibit economic growth, where specific opportunities exist for further development of the resource base, and where local groups have organized to deal with problems of economic advancement and area improvement. In fiscal year 1965 TVA will work closely with organized groups in 13 tributary areas.

4. *Outdoor recreation demonstration—Land Between the Lakes.*—The budget program for 1964 provides for starting development as a public outdoor recreation demonstration of an area in western Kentucky and Tennessee of approximately 170,000 acres, situated between TVA's Kentucky reservoir and the Corps of Engineers' Barkley Lake. Offering the innumerable recreational advantages associated with 300 miles of cove-studded shoreline, Land Between the Lakes is within sunrise-to-sunset driving distance of 50 million of the Nation's people. This area is presently one of the most sparsely settled sections in the Tennessee and Cumberland valleys and has limited agricultural or industrial potential. Development of this area as a recreation demonstration will be a wise use of the land which will serve as a stimulus to the economy of the surrounding area by encouraging further private development and as a guide to possible public development of other areas for recreation in the Tennessee Valley region and the Nation. All planned recreation facilities, including campgrounds, picnic areas, boat launching ramps, associated roads and parking sites, and areas for hiking, fishing, and game management will be developed in consultation with governmental agencies and other organizations who use outdoor recreation resources in their programs. In 1965, $6 million will be used to continue land acquisition and construction activities, and $209 thousand will be used in preliminary operations. The preliminary estimate for total capital outlays for the Land Between the Lakes demonstration is $33 million.

5. *General service activities.*—Operating costs for general service activities cover primarily topographic mapping and reimbursable services furnished at the request and expense of other agencies.

GENERAL SERVICE ACTIVITIES—SUMMARY OF ESTIMATED OPERATING COSTS

[In thousands of dollars]

	1963 actual	1964 estimate	1965 estimate
Receipts:			
Reimbursements	8,789	8,728	6,584
Other	43	34	30
Total receipts	8,832	8,762	6,614
Operating costs:			
Appropriated funds:			
Topographic mapping	96	96	174
Other	75	119	41
Total appropriated funds	171	215	215
Nonpower proceeds:			
Reimbursable services	8,789	8,728	6,584
Total operating costs, funded	8,960	8,943	6,799
Provision for depreciation	1	1	1
Total operating costs	8,961	8,944	6,800
Net income or expense	129	182	186

Topographic maps of the Tennessee Valley are vital to TVA's planning, construction, and operations needs. In order to be of practical utility, these maps, recently completed for the entire Tennessee Valley, must be revised periodically. The estimate for 1965 includes $174 thousand for those maps which most urgently need revision and which are most necessary for regional development purposes at this time.

The 1965 estimate of $6,584 thousand for reimbursable services includes $1,961 thousand for services for the Department of Defense in connection with operating the rehabilitated and modified Muscle Shoals Phosphate Development Works; $2,582 thousand covers construction and operating activities on an experimental gas-cooled reactor project for the Atomic Energy Commission at Oak Ridge, Tenn.; $853 thousand for mapping services for the Department of the Army and other agencies; $243 thousand for technical advisory assistance to power distributors; and $200 thousand for backcharges to vendors and for repairs to damaged structures or equipment. The balance is for loans of personnel and services to other agencies and miscellaneous recoveries of TVA expenditures.

Capital outlay costs are estimated at $3,393 thousand for general facilities in 1965. This covers additions and replacements of office, transportation, and electronic computing equipment and facilities used jointly in conducting all TVA programs. The 1965 estimate includes $700 thousand for planning and design work for a power dispatching center and general office building to be located in the vicinity of Chattanooga, Tenn., for occupancy by TVA personnel stationed in the Chattanooga area.

Financing.—Amounts estimated to become available in 1965 would be derived from (1) the requested appropriation of $50,915 thousand; (2) nonpower revenues and receipts of $25,035 thousand; and (3) power revenues and receipts of $295,714 thousand. In addition, the budget program anticipates financing from borrowings of $75 million backed by future power revenues. A summary of the application of appropriations follows:

[1] Included in cooperative valley development program in 1963.

Operating results and financial condition.—Retained earnings from power operations at the end of 1965 are estimated at $641,805 thousand. Net income from power operations in 1965 is estimated at $53,111 thousand. The accumulated net expense of nonpower programs at the end of 1965 is estimated at $302,796 thousand, of which $20,752 thousand is from 1965 operations. Only the power program is intended to be self-supporting; the net expense of nonpower programs is covered largely by appropriations from the Treasury. Payments to the Treasury in 1965 are estimated at $52.2 million—$42.2 million as a dividend (return on the appropriation investment in the power program) and $10 million as a reduction in the appropriation investment in the power program.

Total assets are estimated at $2,713,417 thousand at the end of 1965 as compared with an estimate of $2,597,509 thousand at the end of 1964—an increase of $115,908 thousand during 1965. The increase is mainly in fixed assets, reflecting expenditures for construction of facilities; $82,279 thousand of the increase in assets is in the power program and $33,629 thousand is in nonpower programs. The estimate of current liabilities of $89,534 thousand at June 30, 1965, is $9,834 thousand greater than the estimate of $79,700 thousand at June 30, 1964. The increase reflects liabilities mainly related to construction. Borrowings from the public for the power program are expected to increase by $75 million during 1965—from an estimate of $220 million at June 30, 1964, to an estimate of $295 million at June 30, 1965. The estimated total Government equity of $2,328,272 thousand at June 30, 1965, is $31,074 thousand more than the estimate of $2,297,198 thousand at June 30, 1964. The change represents a major part of the increase in investments in assets financed from sources other than borrowings—$1,056 thousand in the power program and $30,018 thousand in nonpower programs.

UNITED STATES INFORMATION AGENCY

General and special funds:

SALARIES AND EXPENSES

For expenses necessary to enable the United States Information Agency, as authorized by Reorganization Plan No. 8 of 1953, the Mutual Educational and Cultural Exchange Act (75 Stat. 527), and the United States Information and Educational Exchange Act, as amended (22 U.S.C. 1431 et seq.), to carry out international information activities, including employment, without regard to the civil service and classification laws, of (1) persons on a temporary basis (not to exceed $120,000), (2) aliens within the United States, and (3) aliens abroad for service in the United States relating to the translation or narration of colloquial speech in foreign languages (such aliens to be investigated for such employment in accordance with procedures established by the Secretary of State and the Attorney General); travel expenses of aliens employed abroad for service in the United States and their dependents to and from the United States; salaries, expenses, and allowances of personnel and dependents as authorized by the Foreign Service Act of 1946, as amended (22 U.S.C. 801–1158); entertainment within the United States not to exceed [$500] *$3,000*; hire of passenger motor vehicles; insurance on official motor vehicles in foreign countries; services as authorized by section 15 of the Act of August 2, 1946 (5 U.S.C. 55a); payment of tort claims, in the manner authorized in the first paragraph of section 2672, as amended, of title 28 of the United States Code when such claims arise in foreign countries; advance of funds notwithstanding section 3648 of the Revised Statutes, as amended; dues for library membership in organizations which issue publications to members only, or to members at a price lower than to others; employment of aliens, by contract, for service abroad; purchase of ice and drinking water abroad; payment of excise taxes on negotiable instruments abroad; *purchase of uniforms;* actual expenses of preparing and transporting to their former homes the remains of persons, not United States Government employees, who may die away from their homes while participating in activities authorized under this appropriation; radio activities and acquisition and production of motion pictures and visual materials and purchase or rental of technical equipment and facilities therefor, narration, script-writing, translation, and engineering services, by contract or otherwise; maintenance, improvement, and repair of properties used for information activities in foreign countries; fuel and utilities for Government-owned or leased property abroad; rental or lease for periods not exceeding five years of offices, buildings, grounds, and living quarters for officers and employees engaged in informational activities abroad; travel expenses for employees attending official international conferences, without regard to the Standardized Government Travel Regulations and to the rates of per diem allowances in lieu of subsistence expenses under the Travel Expense Act of 1949, but at rates not in excess of comparable allowances approved for such conferences by the Secretary of State; and purchase of objects for presentation to foreign governments, schools, or organizations; [$134,000,000] *$143,800,000*, of which not less than $11,000,000 shall be used [to purchase] *for payments in* foreign currencies or credits owed to or owned by the Treasury of the United States: *Provided,* That not to exceed [$110,000] *$140,000* may be used for representation abroad: *Provided further,* That this appropriation shall be available for expenses in connection with travel of personnel outside the continental United States, including travel of dependents and transportation of personal effects, household goods, or automobiles of such personnel, when any part of such travel or transportation begins in the current fiscal year pursuant to travel orders issued in that year, notwithstanding the fact that such travel or transportation may not be completed during the current year: *Provided further,* That passenger motor vehicles used abroad exclusively for the purposes of this appropriation may be exchanged or sold, pursuant to section 201(c) of the Act of June 30, 1949 (40 U.S.C. 481(c)), and the exchange allowances or proceeds of such sales shall be available for replacement of an equal number of such vehicles and the cost, including the exchange allowance of each such replacement, except buses and station wagons, shall not exceed $1,500: *Provided further,* That, notwithstanding the provisions of section 3679 of the Revised Statutes, as amended (31 U.S.C. 665), the United States Information Agency is authorized, in making contracts for the use of international short-wave radio stations and facilities, to agree on behalf of the United States to indemnify the owners and operators of said radio stations and facilities from such funds as may be hereafter appropriated for the purpose against loss or damage on account of injury to persons or property arising from such use of said radio stations and facilities: *Provided further,* That existing appointments and assignments to the Foreign Service Reserve for the purposes of foreign information and educational activities which expire during the current fiscal year may be extended for a period of one year in addition to the period of appointment or assignment otherwise authorized. (*Departments of State, Justice, and Commerce, the Judiciary, and Related Agencies Appropriation Act, 1964.*)

Note.—Estimates for 1965 include $654 thousand for activities transferred from United States Information Agency, Salaries and expenses, special foreign currency program. The amounts obligated in 1963 and 1964 are shown in the schedules as comparative transfers.

The United States Information Agency seeks to influence public attitudes abroad, by means of communication techniques, to achieve U.S. foreign policy objectives. The Agency also advises those responsible for formulating and implementing foreign policies and programs on the implications of foreign opinion for these policies.

Agency operations are largely financed from this appropriation covering dollar and certain foreign currency costs and from the special foreign currency appropriation covering payments in U.S.-owned currencies in excess of the normal requirements of the United States.

The increase of about $8.9 million in obligations funded from the Salaries and expenses appropriation will provide for (a) an additional $5.1 million for overseas program expenses plus related media and other support services to meet increased cost and to allow some expansion in programs; (b) $1.7 million for expansion of worldwide motion picture, television, press and publications, and information center activities; (c) $1.3 million for radio programing and facilities operations; and (d) an increase of $0.8 million for domestic support activities related to the overall program.

1. *Overseas missions.*—The program is conducted through 232 posts in 106 countries. The overseas missions carry out country programs designed to influence local attitudes and actions in support of U.S. foreign policy. Overseas missions prepare materials using local facilities and utilize materials provided by the media services in Washington. The following table summarizes the total cost of dollar and foreign currency financed mission operations, including the cost of materials supplied by the media services (in thousands of dollars):

Area	*1963 actual*	*1964 estimate*	*1965 estimate*
Far East	12,085	13,538	13,976
Africa	7,537	8,383	9,686
Near East	14,783	16,757	17,061
Latin America	12,635	14,043	16,566
West Europe	8,672	8,676	8,676
Special European programs	3,893	4,445	4,744
Soviet and East Europe	659	1,140	1,312
Worldwide missions	6,489	6,875	6,930
Total, mission costs	66,753	73,857	78,951

2. *Media services.*—These services provide support for overseas country programs.

(a) *Press and publications service* maintains communications facilities for the transmission of editorial and feature materials for adaptation by overseas missions. It produces two monthly magazines titled America Illustrated, one for distribution in the Soviet Union and the other in Poland; and one Arabic language magazine, Life in America, sold on newsstands throughout the Arab world. The service also operates three regional printing centers and provides overseas missions with printing supplies and equipment.

(b) *Motion picture service* produces and acquires films which are then translated into as many as 58 foreign languages. It adapts films for specific country or area use, and directs the foreign production, use, and distribution of films. Substantially increased production of high-quality films is planned in 1965. The service also supplies the missions with mobile film units and equipment for showing motion pictures.

(c) *Information center service* supports U.S.-operated libraries, reading rooms, and binational centers, providing them with collections of American publications, both in English and in translations, and with English teaching materials. It assists American publishers in distributing selected products overseas and supports the publication of low-priced books for sale abroad. The service also provides exhibits and visual materials to overseas missions for local display and provides books and periodicals for presentation to selected individuals and groups. Program increases contemplate a buildup of book programs, especially foreign language editions in Africa and Latin America.

(d) *Broadcasting service* in 1965 will produce radio broadcasts in English and in 36 foreign languages, with increased programing to Africa and the Soviet bloc. Programs will be broadcast from transmitters at 7 domestic and 9 overseas locations. The service will continue to supply the overseas missions with recorded radio programs and scripts for placement on foreign stations and with radio supplies and equipment.

(e) *Television service* acquires and produces television programs for placement on outlets overseas. It also provides assistance to the overseas missions in the production and use of television programs. A significant increase in program production is planned in 1965.

3. *Research and reference service* acquires and prepares reports for use by domestic and overseas establishments in formulating and implementing Agency policies and programs.

4. *Cooperative programs with private organizations.*—The Agency encourages and coordinates the efforts of private

Digitized for FRASER
https://fraser.stlouisfed.org
Federal Reserve Bank of St. Louis

organizations in building an information exchange program between the people of the United States and the peoples of foreign countries.

6. *Administration and staff support* includes physical and personnel security functions, legal counsel, central administrative services, and emergency planning.

7. *Administrative support.*—Administrative services for the Agency's overseas operations, and certain special support services at headquarters, are obtained through reimbursable arrangements with the Department of State.

Unobligated balance carried forward	3,063	1,293	300
New obligational authority (appropriation)	**7,600**	**7,200**	**7,200**

The purpose of this program, except for trade missions, is to increase mutual understanding between the people of the United States and those of other lands through suitable U.S. exhibitions in international fairs and other demonstrations of American economic, social, industrial, scientific, and cultural attainments.

1. *International fairs and exhibitions.*—Exhibits are mounted at important international fairs and other strategic locations overseas. In calendar year 1963, 16 exhibits were mounted. The same number is planned for 1964 and 1965.

2. *Trade missions* are sent abroad to further the development of American export markets. There were 14 trade missions in 1963, 17 in 1964, and 18 are proposed for 1965.

3. *Labor missions* are sent to selected fairs and exhibitions abroad. There were 8 labor missions in 1963; 10 are provided in 1964; and 11 are requested for 1965.

4. *Special purpose exhibitions.*—In 1963 and 1964 a second series of three exhibits is being undertaken under the U.S.-U.S.S.R. exchange agreement, each to be shown in three locations in the Soviet Union. As these showings are completed, these exhibits together with the first series of three, will be displayed in other countries of East Europe. The estimate for 1965 completes a third series of three exhibits for showing in the Soviet Union, and provides for American fine arts exhibits at special expositions in São Paulo and Venice.

ACQUISITION AND CONSTRUCTION OF RADIO FACILITIES

For an additional amount for the purchase, rent, construction, and improvement of facilities for radio transmission and reception, purchase and installation of necessary equipment for radio transmission and reception, without regard to the provisions of the Act of June 30, 1932 (40 U.S.C. 278a), and acquisition of land and interests in land by purchase, lease, rental, or otherwise, [$12,070,000] *$15,116,000,* to remain available until expended: *Provided,* That this appropriation shall be available for acquisition of land outside the continental United States without regard to section 355 of the Revised Statutes (40 U.S.C. 255), and title to any land so acquired shall be approved by the Director of the United States Information Agency. (*Departments of State, Justice, and Commerce, the Judiciary, and Related Agencies Appropriation Act, 1964.*)

Program and Financing (in thousands of dollars)

	1963 actual	1964 estimate	1965 estimate
Program by activities:			
1. Acquisition and construction of facilities	8,632	18,056	5,408
2. Maintenance and improvement of existing facilities	784	1,447	1,500
3. Research and development	669	563	500

Financing:			
Unobligated balance brought forward	−7,387	−13,489	−5,493
Recovery of prior year obligations	−37		
Unobligated balance carried forward	13,489	5,493	13,201
New obligational authority (appropriation)	**16,150**	**12,070**	**15,116**

These funds, which will remain available until expended, will provide for—

1. *Acquisition and construction of facilities.*—The 1964 program includes obligations for the completion of: the Liberia relay station, the Rhodes relay station, the expansion of a leased facility in the United Kingdom, and the Rhodes program center. It also covers substantial completion of the modernization of existing domestic transmitting facilities. The 1964 program also provides initial financing for two new relay stations—Project Bamboo in the Philippines, and Project Gamma—and for the Monrovia program center. Funds are requested in 1965 to complete Project Gamma. Funds for the completion of Project Bamboo will be requested once the construction site is acquired.

2. *Maintenance and improvement of existing facilities.*—Replacement of obsolete facilities at one oversea relay station will begin in 1965.

3. *Research and development.*—Research will continue in engineering development, equipment design, and radio propagation techniques with special emphasis on problems applying to the Voice of America.

[1] Balances of selected resources are identified on the statement of financial condition.

This program enables certain foreign countries which have a shortage of U.S. dollar exchange to import books, periodicals, films, and other U.S. informational media through regular commercial channels. Under the program, foreign importers make payments to American exporters in foreign currency. The exporters then exchange their foreign currency for U.S. dollars through application to the United States Information Agency, in accordance with the terms of each exporter's informational media guarantee contract.

New legislation will be submitted to the Congress to broaden the scope of Agency activities in aiding the export of U.S. informational materials. This legislation will also change the financing of the program by eliminating the present revolving fund and substituting direct appropriations.

Program.—The 1965 estimate continues the program at the 1964 level in the eight countries where the informational media guarantee program currently operates.

Financing.—The 1965 appropriation request provides $330 thousand for repayment of Treasury notes and $670 thousand for the payment of interest to the Treasury. This will make possible the issuance of $3,800 thousand in guarantee contracts and will reduce impairment to the fund by $210 thousand, leaving an estimated total unrestored impairment of $18,015 thousand on June 30, 1965. Of the total borrowing authority of $28 million, $21,860 thousand in unpaid notes will be outstanding on June 30, 1965; this represents a net increase of $75 thousand from the estimated amount outstanding on June 30, 1964.

New obligational authority (appropriation)	**552**		

This Commission was created to formulate a comprehensive and integrated plan for development of land and water resources in certain major river basins in the Southeastern part of the country. In February 1963, a proposed report of the Commission was issued for review by the States and interested Federal agencies. At the June 1963 meeting, the Commission approved its final report for printing and submission to the President. The Commission transmitted its report to the President on September 24, 1963 and ceased to exist on December 23, 1963, in accordance with the provisions of the authorizing legislation.

This Commission was created to formulate a comprehensive and integrated plan of development for land and water resources in eight major river basins within the State of Texas. The final report was submitted to the President on May 28, 1962. As provided by law, the Commission ceased to exist on August 28, 1962, and its property, assets, and records were transferred to the Secretary of the Treasury and the Administrator of General Services.

INDEPENDENT OFFICES—GENERAL PROVISIONS

SEC. 102. Where appropriations in this title are expendable for travel expenses of employees and no specific limitation has been placed thereon, the expenditures for such travel expenses may not exceed the amounts set forth therefor in the budget estimates submitted for the appropriations: *Provided*, That this section shall not apply to travel performed by uncompensated officials of local boards and appeal boards of the Selective Service System, to travel performed in connection with the investigation of aircraft accidents by the Civil Aeronautics Board, to travel performed directly in connection with care and treatment of medical beneficiaries of the Veterans Administration, or to payments to interagency motor pools where separately set forth in the budget schedules.

SEC. 103. No part of any appropriation contained in this title shall be available to pay the salary of any person filling a position, other than a temporary position, formerly held by an employee who has left to enter the Armed Forces of the United States and has satisfactorily completed his period of active military or naval service and has within ninety days after his release from such service or from hospitalization continuing after discharge for a period of not more than one year made application for restoration to his former position and has been certified by the Civil Service Commission as still qualified to perform the duties of his former position and has not been restored thereto.

SEC. 104. No part of any appropriation made available by the provisions of this title shall be used for the purchase or sale of real estate or for the purpose of establishing new offices outside the District of Columbia: *Provided*, That this limitation shall not apply to programs which have been approved by the Congress and appropriations made therefor.

GENERAL PROVISIONS

SEC. 301. No part of any appropriation contained in this Act, or of the funds available for expenditure by any corporation or agency included in this Act, shall be used for publicity or propaganda purposes designed to support or defeat legislation pending before the Congress.

SEC. 302. No part of any appropriation contained in this Act, or of the funds available for expenditure by any corporation or agency included in this Act, shall be used to pay the compensation of any employee engaged in personnel work in excess of the number that would be provided by a ratio of one such employee to one hundred and thirty-five, or a part thereof, full-time, part-time, and intermittent employees of the corporation or agency concerned: *Provided*, That for purposes of this section employees shall be considered as engaged in personnel work if they spend half time or more in personnel administration consisting of direction and administration of the personnel program; employment, placement, and separation; job evaluation and classification; employee relations and services; wage administration; and processing, recording, and reporting.

[SEC. 303. None of the funds provided herein shall be used to pay any recipient of a grant for the conduct of a research project an amount for indirect expenses in connection with such project in excess of 20 per centum of the direct costs.]

[SEC. 304. None of the funds appropriated in this Act shall be used to conduct or assist in conducting any program (including but not limited to the payment of salaries, administrative expenses, and the conduct of research activities) related directly or indirectly to the establishment of a national service corps or similar domestic peace corps type of program.] (*Independent Offices Appropriation Act, 1964.*)

DISTRICT OF COLUMBIA

General and special funds:

FEDERAL PAYMENT TO DISTRICT OF COLUMBIA

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That there are appropriated for the District of Columbia for the fiscal year ending June 30, [1964] *1965,* out of (1) the general fund of the District of Columbia (unless otherwise herein specifically provided), hereinafter known as the general fund, such fund being composed of the revenues of the District of Columbia other than those applied by law to special funds, and [$37,500,000] *$50,000,000,* which is hereby appropriated for the purpose out of any money in the Treasury not otherwise appropriated (to be advanced July 1, [1963] *1964*), (2) the highway fund (when designated as payable therefrom), established by law (D.C. Code, title 47, ch. 19), including the motor vehicle parking account (when designated as payable therefrom), established by law (Public Law 87-408), (3) the water fund (when designated as payable therefrom), established by law (D.C. Code, title 43, ch. 15), and [$1,924,000] *$2,047,000,* which is hereby appropriated for the purpose out of any money in the Treasury not otherwise appropriated (to be advanced July 1, [1963] *1964*), (4) the sanitary sewage works fund (when designated as payable therefrom), established by law (Public Law 364, 83d Congress), and [$944,000] *$1,173,000,* which is hereby appropriated for the purpose out of any money in the Treasury not otherwise appropriated (to be advanced July 1, [1963] *1964*), and (5) the metropolitan area sanitary sewage works fund (when designated as payable therefrom), established by law (Public Law 85-515); and there is hereby appropriated, out of any money in the Treasury not otherwise appropriated, [$19,300,000] *$14,400,000,* which, together with balances of previous appropriations for this purpose, shall remain available until expended, for loans authorized by the Act of May 18, 1954 (68 Stat. 101), the Act of June 6, 1958 (72 Stat. 183), and the Act of August 27, 1963 (77 Stat. 130), to be advanced upon request of the Commissioners to the following funds: general fund, [$11,300,000] *$8,600,000, highway fund, $800,000* and sanitary sewage works fund, [$8,000,000] *$5,000,000.* (*District of Columbia Appropriation Act, 1964.*)

Program and Financing (in thousands of dollars)

	1963 actual	1964 estimate	1965 estimate
Program by activities:			
1. Payment to District of Columbia	30,000	37,500	50,000
2. Payments for water and sewer service	2,899	2,868	3,220
Total program costs, funded—obligations	32,899	40,368	53,220
Financing:			
New obligational authority (appropriation)	**32,899**	**40,368**	**53,220**

The Federal payment includes $50 million as the authorized annual payment by the United States toward defraying expenses of the government of the District of Columbia and $3,220 thousand as payment for water and sewer services (61 Stat. 361; 68 Stat. 113; 70 Stat. 83; 72 Stat. 183). A supplemental appropriation for 1965 is anticipated for separate transmittal.

Financing:			
Repayment of advances	----------	−832	−656
Unobligated balance lapsing	----------	832	656
New obligational authority (authorization to expend from public debt receipts)	**416**	**656**	---------

An advance of $416 thousand was made in 1962 and an advance of $416 thousand was made in 1963 to the stadium sinking fund to meet interest payments on stadium bonds since such payment could not be financed from receipts (2 D.C. Code 1727). Repayment of these advances, with interest, will be made in 1964. It is estimated that $656 thousand will be advanced in 1964 to meet interest payments accruing on December 1, 1963 and June 1, 1964. Repayment, with interest, will be made in 1965.

REPAYABLE ADVANCES TO THE DISTRICT OF COLUMBIA GENERAL FUND

(Permanent)

Program and Financing (in thousands of dollars)

PART II

DETAILED ESTIMATES FOR TRUST FUNDS

700-100—64——57

Digitized for FRASER
https://fraser.stlouisfed.org
Federal Reserve Bank of St. Louis

EXPLANATION OF ESTIMATES FOR TRUST FUNDS

Part II contains detailed schedules and explanatory statements on the various trust funds, together with a summary table covering the trust funds, the deposit funds, and certain Government-sponsored enterprises. It excludes the detail on trust fund programs which require annual action by Congress (shown in part I) and the detail on the District of Columbia municipal government funds (contained in a separate budget volume).

TRUST AND DEPOSIT FUNDS DISTINGUISHED

The funds which are covered in this part of the budget are of two types as follows:

Trust funds are those funds established to account for receipts which are held in a fiduciary capacity by the Government for use in carrying out specific purposes and programs in accordance with a trust agreement or a statute. Within the category of trust funds, there is a subcategory of *trust revolving* funds, which are trust funds used to carry on a cycle of business-type operations, including certain corporations which are partly owned by the Government and partly by private interests.

Deposit funds are those funds established to account for collections that are either (a) held in suspense temporarily and later refunded or paid into some other fund of the Government, or (b) held by the Government as banker or agent for others, being paid out in lump sums at the direction of the owner. Such funds are not available for paying salaries, expenses, grants, or other expenditures of the Government.

Five *Government-sponsored enterprises* are also covered in the summary table. While their money on deposit with the U.S. Treasurer is technically handled as a deposit fund in each case, the enterprises are set forth under a heading separate from the deposit funds generally.

While the transactions in these groups of funds are a part of the financial program of the Government, trust and deposit funds are reserved for the purposes of the trust or the terms of the deposit; hence these transactions are excluded from the administrative budget totals.

TRUST FUND RECEIPTS AND EXPENDITURES

Receipts.—Like budget receipts, trust fund receipts are based upon collections received and deposited, including U.S. Government securities received in lieu of cash and contributions to the trust funds from the general fund. Reported receipts exclude borrowing and the sale or redemptions of U.S. Government securities.

Expenditures.—Like budget expenditures, trust fund expenditures are stated on a checks-issued basis, less refunds collected. The repayment of borrowing and the purchase of U.S. Government securities are excluded from the expenditure figures.

Trust revolving funds.—The small group of funds which constitute trust revolving funds are reported on a *net* expenditure basis. The collections of trust revolving funds, instead of being taken into the tables as receipts, are deducted from expenditures.

OBLIGATIONAL AUTHORITY FOR TRUST FUNDS

Most trust fund receipts are made available for use by permanent law, without requiring further action by Congress. In a few cases receipts of trust funds can be obligated and expended only in accordance with appropriations enacted by Congress from year to year. Examples are the funds of the United States Soldiers Home and the general municipal revenues of the District of Columbia. In the case of the Highway trust fund, Congress controls expenditures by appropriations annually, but it grants contract authorizations in advance thereof. In a few other cases, the trust receipts are permanently available for program purposes, but Congress imposes annual limitations on administrative expenses.

DEPOSIT FUND EXPENDITURES

Deposit fund expenditures are shown in the summary table for this part of the appendix, but are not shown in the details. These expenditures are on a net basis; that is, the collections are deducted from checks issued, and the resulting figure is shown as an expenditure. *Checks issued* include transactions to move money into other funds, as well as refunds and the return of money to depositors. When the collections are larger than the gross expenditures, the amount shown as an expenditure is a negative item.

GOVERNMENT-SPONSORED ENTERPRISES

Expenditures of Government-sponsored enterprises appear in the summary table for this part of the appendix. These expenditures are on a net basis, and are equal in amount to the borrowing by such enterprises through issuance of their own debt, and to their disinvestments in the U.S. securities. A negative expenditure for one of these enterprises indicates either the deposit of moneys used for the repayment of debt or for investment in U.S. securities. The financial transactions of Government-sponsored enterprises which are handled outside the accounts of the U.S. Treasurer are not included in the summary table. (A new part IV on annexed budgets includes detailed budget schedules with respect to seven self-supporting activities, including three of the Government-sponsored enterprises and four other activities.)

DETAIL OF TRUST FUND ESTIMATES

The detailed material in part II covers the trust funds which do not require annual action by Congress. Consolidated schedules are used for the smaller trust funds of each bureau or independent agency.

The material here follows the general format of the similar material in part I, with the principal exception that these schedules show receipts in place of showing appropriations. In cases where the receipts are not permanently appropriated as the money is collected, the schedules identify the portion of the unobligated balances on hand which is appropriated and the portion which is unappropriated. Also, no appropriation language appears here, and the narrative statement of program and performance usually consists only of an explanation of the sources of money for the fund, the purposes for which it is authorized to be spent, and the legal citations.

LEGISLATIVE BRANCH

LIBRARY OF CONGRESS

LIBRARY OF CONGRESS GIFT AND TRUST FUND INCOME ACCOUNTS

Program and Financing (in thousands of dollars)

	1963 actual	1964 estimate	1965 estimate
Program by activities:			
1. Acquisition of library materials	34	36	38
2. Reader and reference service	1,318	1,340	1,360
3. Organization of the collections	376	385	402
4. Information service on copyright materials	4	1	
Total obligations	1,732	1,762	1,800
Financing:			
Unobligated balance brought forward	1,249	1,140	1,003
Receipts from—			
Library of Congress gift fund	507	500	525
Income from investment account	19	19	19
Interest on bequest of Gertrude M. Hubbard	1	1	1
Interest on permanent loan	179	180	180
Service fees	918	925	935
Unobligated balance carried forward	−1,140	−1,003	−863
Total financing	1,732	1,762	1,800

This schedule covers (1) funds received as gifts for immediate expenditure and receipts from the sale of recordings and photoduplication materials financed from capital originally received as gifts, (2) income from investments held by the Library of Congress Trust Fund Board, and (3) interest at the rate of 4 percent per annum paid by the Treasury on the principal funds deposited therewith as described under "Library of Congress trust fund, principal accounts." (2 U.S.C. 156–160; 31 U.S.C. 725s; 37 Stat. 319.)

1. *Acquisition of library materials.*—During 1963, this included the procurement of manuscripts, Hispanic materials, fine prints, books and other library materials from certain foreign areas for the Library of Congress, and the acquisition and distribution of Government documents for the Library of Congress and cooperating libraries.

2. *Reader and reference services.*—These services during 1963 included the preparation of bibliographies, indexes, digests, and check lists; lectures; surveys of bibliographic services; poetry readings; musical concerts; furtherance of musical research, composition, performance and appreciation; and providing photostats, photographs, microfilm, and other forms of photoduplication, and sound recordings of folksongs and poetry to other Government agencies, libraries, and other institutions, and to the general public.

3. *Organization and control of the collections.*—During 1963, work was completed on the National Union Catalog, 1958–1962. This quinquennial cumulation totals 54 volumes. Work continued on the Dewey Decimal Classification, 17th edition and the Union List of Serials, 3rd edition, the former scheduled for publication in calendar year 1964 and the latter, in calendar year 1965. The preparation of the index to Dissertations Abstracts and the preparation of printed catalog cards for additional manuscript collections located in the Library of Congress and other institutions was continued, and the National Union Catalog of Manuscript Collections, 1962, was prepared for publication.

4. *Information service on copyright materials.*—Depositors were supplied with preliminary information relating to copyright materials in selected subject fields.

Obligations by major source of funds for 1963 and estimated for 1964 and 1965 are as follows (in thousands of dollars):

	1963 actual	*1964 estimate*	*1965 estimate*
Library of Congress gift fund	455	470	482
Service fees, Library of Congress	1,075	1,090	1,115
Cataloging project, Copyright Office, Library of Congress	4	1	
Library of Congress trust fund, income from investment account	19	20	20
Payment of interest on permanent loan account, Library of Congress	178	180	182
Payment of interest on bequest of Gertrude M. Hubbard, Library of Congress	1	1	1
Total obligations	1,732	1,762	1,800

LEGISLATIVE BRANCH—Continued

LIBRARY OF CONGRESS—Continued

LIBRARY OF CONGRESS TRUST FUND PRINCIPAL ACCOUNTS—Con.

This schedule covers two principal accounts—permanent loan and bequest of Gertrude M. Hubbard.

Both funds represent gifts or bequests in cash, which have been deposited with the Treasurer of the United States as permanent loans to the United States, the interest upon which, at 4% per annum, payable semiannually, is available to the Librarian for the purposes specified in each case.

As of June 30, 1963, the principal in the permanent loan account, which shall not exceed the sum of $10 million (2 U.S.C. 158; 31 U.S.C. 725s, Public Law 87-522), was distributed as follows (in thousands of dollars):

Music activities	2,267
Fine arts	397
American history	307
Hispanic activities	211
Poetry and literature	694
Miscellaneous purposes	595
Total principal	4,471

The additional principal sum of $20 thousand, representing the bequest of Gertrude M. Hubbard, is for the purchase of engravings and etchings (37 Stat. 319).

The use of the income from these accounts is described under Library of Congress gift and trust fund income accounts.

THE JUDICIARY

JUDICIAL SURVIVORS ANNUITY FUND

Program and Financing (in thousands of dollars)

	1963 actual	1964 estimate	1965 estimate
Program by activities:			
1. Annuities	407	430	430
2. Death claims	18	15	15
Total obligations (object class 42)	425	445	445
Financing:			
Unobligated balance brought forward:			
Cash	1	1	3
U.S. securities (par)	1,772	2,012	2,250
Receipts:			
Deductions from salaries	290	300	300
Agency contributions	290	300	300
Service credit payments	15	10	10
Interest and profits on investments	63	70	80
Gain from premium or discount on investments	8	5	5
Unobligated balance carried forward:			
Cash	−1	−3	−3
U.S. securities (par)	−2,012	−2,250	−2,500
Total financing	425	445	445

This fund is used to pay annuities to eligible widows and dependent children of deceased judges of the United States, to make refunds to former judges who elected to come under the Judicial Survivors Annuity System but who have left the service, and to pay claims of survivors of member judges for any unpaid amounts credited to the individual accounts of such judges (28 U.S.C. 376).

During 1963 the number of judges participating in the system increased from 409 to 419 and the number of nonparticipants decreased from 50 to 44. There were 463 judges on the roll at the end of the year as compared with 459 at the beginning of the year.

On June 30, 1963, there were 139 survivor annuitants on the roll which is exactly the same number on the roll on June 30, 1962. However, during the year, the average annuity increased $86, from $2,860 to $2,946. This increase is due to the fact that the current awards to annuitants are somewhat higher than the annuities granted to existing widows when the system was established.

FUNDS APPROPRIATED TO THE PRESIDENT

ECONOMIC ASSISTANCE TRUST FUNDS

Program and Financing (in thousands of dollars)

	1963 actual	1964 estimate	1965 estimate
Program by activities:			
1. Advances for economic assistance	108	110	110
2. Philippine assistance	11	10	----------
3. Technical assistance, U.S. dollars advanced from foreign governments	2,672	3,000	3,000
Total obligations	2,791	3,120	3,110
Financing:			
Unobligated balance brought forward	1,559	2,392	2,272
Receipts from technical assistance, U.S. dollar advances from foreign governments	3,624	3,000	3,000
Unobligated balance carried forward	−2,392	−2,272	−2,162
Total financing	2,791	3,120	3,110

1. *Advances for economic assistance.*—By agreement with certain governments, the Agency for International Development acts as agent, utilizing dollar advances by them to arrange transportation services for commodities purchased by those countries (22 U.S.C. 2151).

2. *Philippine assistance.*—By agreement with the Philippine Government, the Agency for International Development acts as its agent, utilizing dollars advanced by the Philippines to procure commodities for them (22 U.S.C. 2151).

3. *Technical assistance, U.S. dollars advanced from foreign governments.*—Funds advanced by foreign countries are used to pay some local costs of development grant programs in those countries in accordance with bilateral agreements (22 U.S.C. 2151).

Unobligated balance carried forward	−191	−145	−130
Total financing	2,013	2,602	2,127

[1] Includes capital outlay as follows: 1963, $10 thousand; 1964, $34 thousand; 1965, $7 thousand.

[2] Selected resources as of June 30 are as follows: Unpaid undelivered orders, 1962, $34 thousand; 1963, $5 thousand; 1964, $5 thousand; 1965, $5 thousand.

The following services are financed by fees and miscellaneous contributions advanced by importers, manufacturers, States, organizations, individuals, and others.

1. *Expenses and refunds, inspection and grading of farm products* provide for (a) inspection and certification of animal foods and inedible agricultural products in interstate and foreign commerce; (b) identification and marking of divided portions of meat, meat byproducts, and meat food products for human consumption, which have been previously federally inspected and so marked, in order that divided portions will bear Federal marks; (c) examination of meat and meat food products in federally inspected meatpacking plants for compliance with contract specifications; and (d) a food inspection service covering any article of human food derived wholly or in part from meat, meat byproducts or meat food products not subject to the Federal meat inspection laws but for which the mark of Federal meat inspection is requested (7 U.S.C. 1622h, 1624).

2. *Expenses, feed and attendants for animals in quarantine* are paid from fees advanced by importers (21 U.S.C. 102).

3. *Miscellaneous contributed funds* received from States, local organizations, individuals, and others are available for work under cooperative agreements on miscellaneous farm and utilization research activities, plant quarantine inspection, and cooperative plant pest control activities (5 U.S.C. 67, 563).

Applicable receipts	3,787	2,709	3,221
Trust expenditures	−518	1,056	577

These funds are administered by the Farmers Home Administration, under agreements with 39 individual States, for use in carrying out subtitles A and B of the Consolidated Farmers Home Administration Act of 1961. In these States, real estate type loans are made from these funds and insured under the regular Farmers Home Administration insured loan program at 5% of which not less than one-half of 1% represents an insurance charge that is retained by the Government. In some States, operating type loans are made at 5% interest. The entire assets of the 39 State corporations are being administered by the Farmers Home Administration, with the exception of $14.6 million representing the partial return of cash and other assets at face value to 18 of these States for rural rehabilitation purposes agreed upon between each corporation and the Federal Government. The entire assets of four other State rural rehabilitation corporations have been returned to those States.

Actual and estimated loan operations for 1962, 1963, 1964, and 1965 are as follows (in thousands of dollars):

	Operating loans	*Real estate loans*

In connection with the insurance of loans and mortgages which are for construction, reconstruction, or reconditioning of vessels, and which are financed by sale of bonds to the general public, section 1111, Merchant Marine Act, 1936, as amended (73 Stat. 272, 273), authorizes the Secretary of Commerce to accept deposits in escrow of proceeds from the sale of such bonds, together with interest due the bondholders.

Funds so deposited are to be used for (a) payments becoming due on the construction, reconstruction, or reconditioning of the vessels, (b) interest on the loan or mortgage, or (c) payments on account of principal in cases of default. Investments of the fund may be made in obligations of the United States, with any income realized paid to the borrower or mortgagor.

Establishment of the fund was authorized by Public Law 86–127, enacted July 31, 1959. Through September 30, 1963, $98,805 thousand had been deposited therein covering construction of 21 vessels. As of September 30, 1963, a balance of $33,927 thousand remained in the account. No additional deposits into the fund are projected in this estimate.

Federal Reserve Bank of St. Louis

62 Stat. 172), which was completed on October 21, 1960. Funds presently available will permit additional furnishings as required.

In accordance with Public Law 87–208, the Secretary of Commerce administers a trust fund for gifts and bequests given for the benefit of the U.S. Merchant Marine Academy. This fund is used to defray expenses for maintenance and upkeep of the sailing craft "ICE-FIRE" and "MARINER," which were donated to the U.S. Government and are in the custody of the U.S. Merchant Marine Academy, Kings Point, N.Y.

Cash	281	190	
Contract authorization	2,704	5,760	
Receipts:			
Cooperative work, forest highways	224	1,230	1,200
Equipment, supplies, etc., for cooperating countries	2,116	1,969	3,500
Technical assistance, U.S. dollars advanced from foreign governments	2,881	4,070	1,894
Advances from Alaska	1,567	130	
Contributions for highway research program	12		
Advances from State cooperating agencies	95		
Contract authority (23 U.S.C. 308)	7,269	9,561	7,272
Liquidation of contract authorization	−6,281	−7,399	−7,078
Unobligated balance carried forward:			
Cash	−190		
Contract authorization	−5,760		
Total financing	4,916	15,511	6,788

[1] Selected resources as of June 30 are as follows: Unpaid undelivered orders, 1962, $6,710 thousand; 1963, $4,689 thousand; 1964, $4,689 thousand; 1965, $4,689 thousand.

1. *Cooperative work, forest highways.*—Contributions are received from States and counties in connection with cooperative engineering, survey, maintenance, and construction projects for forest highways (23 U.S.C. 204).

2. *Equipment, supplies, etc., for cooperating countries.*—In connection with the construction of the Inter-American Highway, the Bureau acts as agent for the cooperating Central American Republics in purchase of equipment, supplies, and services (23 U.S.C. 212, 308).

3. *Technical assistance, U.S. dollars advanced from foreign governments.*—Under the Foreign Economic Assistance Act and under agreement with the International Bank for Reconstruction and Development and the Export-Import Bank of Washington, the Bureau of Public Roads renders technical assistance and acts as agent for the purchase of equipment and materials for carrying out highway programs in foreign countries. During the current year, these services are being rendered for Costa Rica, Ethiopia, Iran, Nicaragua, and the Philippines (64 Stat. 204–209).

4. *Advances from Alaska.*—Pursuant to the agreement between the Federal Government and the State of Alaska, the Bureau of Public Roads performs State highway functions on the Federal-aid systems for Alaska with funds contributed by the State (23 U.S.C. 120(8), 308).

5. *Contributions for highway research program.*—In association with the General Services Administration and the Department of Defense, tests of highway equipment are conducted for the purpose of establishing performance standards upon which to base specifications for use by the Government in purchasing such equipment (23 U.S.C. 307).

6. *Advances from State cooperating agencies.*—Funds are contributed by the State highway departments or local subdivisions for construction and/or maintenance of roads or bridges. The work is performed under the supervision of the Bureau of Public Roads (23 U.S.C. 308).

1. *Bequest of Maj. Gen. Fred C. Ainsworth, Library.*—This fund, derived from earnings of the bequest, provides for purchase of supplies and equipment for the library at Walter Reed Army Medical Center, Washington, D.C. (31 U.S.C. 725s).

2. *Kermit Roosevelt fund, Army.*—Proceeds of this fund are used for fostering better understanding and a closer relationship between the military forces of the United States and the United Kingdom through an exchange of eminent lecturers selected by the Chiefs of Staffs of the United States and United Kingdom (5 U.S.C. 224–228).

3. *General gift fund, Army.*—Donations which may be limited to specific use by the donor, such as, the Evangeline G. Bovard Award, Carmack Medal Fund, Fairbanks Medal Fund, the Raymond Franklin Metcalfe Memorial Fund, ETO Quartermaster Foundation, Inc., Fund and Henry C. McLean bequest, are included in this fund. In addition, donations which are not limited to specific use by the donor are used for Army institutions as determined by the Secretary of the Army (5 U.S.C. 150 q–t).

This trust fund is used for military assistance cash sales transactions currently authorized by section 507 of the Foreign Assistance Act of 1961, as amended. In 1965 these sales will be authorized by the new military assistance authorization act.

The proposed act authorizes the furnishing of defense articles from the stocks of the Department of Defense and defense services to eligible countries and international organizations if they agree to pay the value thereof in U.S. dollars in advance or within 120 days after delivery. Defense articles sold consist largely of aircraft, ships, combat and other vehicles, missiles and electronic equipment. Generally sales of unclassified defense articles are made to the government of any economically developed country under the provisions of this section only if such articles are not generally available for purchase by such countries from commercial sources in the United States.

The proposed act provides also that contracts may be entered into for new procurement without charge to any appropriation or contract authorization if the foreign government will provide the United States with a dependable undertaking (1) to pay the full amount of the contract which will assure the U.S. Government against any loss on the contract, and (2) to make funds available when required to meet the payments under the contract.

The full amount of the orders received from eligible foreign governments, whether requiring cash in advance, payment within 120 days after delivery, or based on a dependable undertaking, constitutes the contract authority under the proposed legislation. Sales mostly to European countries under the dependable undertaking procedure will constitute the major portion of this program.

Under the Federal old-age and survivors insurance system, workers, employers, and self-employed individuals make annual contributions in the form of taxes on earnings toward the benefits which will be payable when the worker retires or when he dies. An amount equal to the annual contributions is deposited in this trust fund for benefit payments and administrative expenses. Any excess of income over outgo together with annual interest is invested in Government securities (42 U.S.C. 401).

Annual payments are made between this trust fund and the Railroad retirement account so as to place this fund in the same position in which it would have been if railroad employment after 1936 had been included in social security coverage (45 U.S.C. 228E).

1. *Benefit payments.*—The Social Security Act provides disability insurance benefits for certain disabled individuals and their dependents. An amount equal to one-half of 1% of wages paid and three-eighths of 1% of self-employment income is deposited to this fund for benefit payments and administrative expenses. The excess of income over outgo and annual interest are invested in Government securities.

2. *Administration.*—The Secretary of Health, Education, and Welfare determines, at the end of each year, that portion of the administrative expenses of the Department of Health, Education, and Welfare which is a proper charge to this fund. The amount shown herein for the administrative expenses includes interest on the unpaid charges and is subject to further refinement of the processes for allocating costs between the Federal old-age and survivors insurance trust fund and the Federal disability insurance trust fund (42 U.S.C. 401).

Annual payments are made between this account and the Railroad retirement account so as to place these funds in the same position in which they would have been if railroad employment had been included under social security coverage.

Total financing	1,446	1,150	655

[1] Selected resources as of June 30 are as follows: Unpaid undelivered orders, 1962, $2,116 thousand; 1963, $1,773 thousand; 1964, $133 thousand; 1965, $83 thousand.

1. *National Park Service, donations.*—The Secretary of the Interior accepts and uses donated moneys for purposes of the National Park and Monument System (16 U.S.C. 6). Donations amounting to $1.2 million were received from 130 contributors during 1963. It is estimated that $500 thousand will be received during 1964 and $500 thousand during 1965.

2. *National Park trust fund.*—The National Park Trust Fund Board holds and administers gifts of personal property for the benefit of, or in connection with, the National Park Service. Interest accruals or donations to the fund are used for current needs, or invested in United States Treasury bonds (16 U.S.C. 6a, 19). The amount of $11.2 thousand was appropriated in 1963.

3. *Preservation, birthplace of Abraham Lincoln.*—This fund consists of an endowment given by the Lincoln Farm Association, and the interest thereon is available for preservation of the Abraham Lincoln Birthplace National Historic Site, Kentucky (16 U.S.C. 211, 212). The amount of $2.5 thousand was appropriated in 1963.

4. *Jefferson National Expansion Memorial, contributions.*—Pursuant to the Act of May 17, 1954 (68 Stat. 98–100), as amended, the Secretary of the Interior is authorized to construct upon the Jefferson National Expansion Memorial National Historic Site, St. Louis, Mo., an appropriate national memorial to those persons who made possible the territorial expansion of the United States. Contributions are accepted from the city of St. Louis or other non-Federal sources in the ratio of $1 to each $3 of Federal appropriations.

[1] Selected resources as of June 30 are as follows: Unpaid undelivered orders, 1962, $29 thousand; 1963, $6 thousand; 1964, $0; 1965, $0.

1. *Construction.*—Various public and private utilities advance funds to provide facilities which are not provided by the Administration under its customer service policy. These facilities are of benefit to the Government as well as to the customers and serve to promote greater efficiency on the system, reduce loads on existing facilities, and improve service to customers. Also, non-Federal groups advance funds for relocating facilities of the Administration as required for highway construction and other purposes (50 Stat. 736).

Decrease in deferred charges	2		
Applicable receipts	8,791	6,565	109,710
Trust expenditures	30,617	50,781	22,290

Seized property in the United States, of the governments or nationals of Germany and Japan, vested in the name of the Attorney General, is prepared for liquidation as soon as practicable (50 U.S.C. App.). At June 30, 1963, there had been transferred to the War claims fund $254.2 million. In 1963, a total of $5.3 million in claims and settlements was made from such property operations and it is anticipated that $2 million will be paid in 1964 and $1 million in 1965. Interest in vested property is estimated to be $97 million at June 30, 1964, decreasing $54 million from 1963 and $87 million from 1962.

Enemy-owned property in the Philippines is administered for the Philippine Government by the Office of Alien Property in the same manner as funds for World War II properties (Executive Order 10254). During 1963 $1,000 thousand, was transferred to the Philippine Government; it is anticipated that all remaining funds in the approximate amount of $1,147 thousand will be transferred in 1964. The following statements include the U.S. dollar equivalent of currencies of the Philippines which become available without dollar purchase.

Property in the United States of the governments or nationals of Bulgaria, Hungary, and Rumania, seized pursuant to title II of the International Claims Settlement Act of 1949 (22 U.S.C. 1621), has been vested in the name of the Attorney General as has property seized from the governments and nationals of Germany and Japan. As of June 30, 1963, a total of $26.6 million had been vested and liquidated. Funds thus realized are earmarked for payment of war damages and nationalization claims assertable by U.S. nationals against Bulgaria, Hungary, and Rumania. A total of $24.9 million already has been covered into the Treasury.

The financial transactions of the Federal-State and Railroad unemployment insurance systems are made through the Unemployment trust fund. In the Federal-State system, benefit payments are made by each State, financed by special State payroll taxes. These tax receipts are deposited in the Unemployment trust fund and are invested in Government securities until needed for benefit payments. The expenses of State and Federal administration (including those of the Federal-State employment service), are paid from the fund out of revenue from the Federal unemployment tax, assessed on employers, of 0.4% of the first $3 thousand of wages.

Both the benefit payments and administrative expenses of the separate unemployment insurance program for railroad employees are paid from the Unemployment trust fund and receipts from the tax on wages of railroad employees are deposited in the fund to meet these expenses.

On June 30, 1963, the cash balance of $6,276,762 thousand was distributed as follows among the various accounts maintained in the fund (in thousands of dollars):

State unemployment trust accounts	6,177,905
Railroad unemployment insurance account:	
Benefits and refunds	13,741
Administrative expense account	3,246
Federal extended compensation account	17,053
Employment Security Administration account	41,712

Cash	—24	—14	—15
U.S. securities (par)	—591	—541	—481
Total financing	97	98	98

Note.—On June 30, 1962, U.S. securities were obligated in the amount of $39 thousand.

These trust funds consist of amounts received from employers for the death of an employee where no person is entitled to compensation for such death and for fines and penalty payments. In 1963 receipts were $15 thousand and interest was $24 thousand (33 U.S.C. 908; 31 U.S.C. 725; 33 U.S.C. 944).

Receipts are used to pay compensation in cases where judgment against employers cannot be satisfied by reason of insolvency or other circumstances precluding payment, to provide necessary medical, surgical, and other treatment in disability cases where there has been default in furnishing such medical treatment by reason of the insolvency of the employers; for payment of additional compensation for second injuries resulting in permanent total disability and to provide maintenance for employees undergoing vocational rehabilitation. In addition, under the subactivity Administration of rehabilitation, provision is made for the cost of necessary rehabilitation services not otherwise available to disabled longshoremen and harbor workers.

DEPARTMENT OF STATE

ADMINISTRATION OF FOREIGN AFFAIRS

FOREIGN SERVICE RETIREMENT AND DISABILITY FUND

Program and Financing (in thousands of dollars)

	1963 actual	1964 estimate	1965 estimate
Program by activities:			
1. Payment to beneficiaries	6,724	7,228	8,011
2. Refunds and gratuities	361	350	400
3. Medical examinations for disabled annuitants		2	2
Total obligations (cash outgo)	7,085	7,580	8,413
Financing:			
Unobligated balance brought forward:			
Cash	490	457	420
U.S. securities (par)	36,710	37,891	38,897
Receipts:			
Employees' contribution	3,635	3,630	3,784
Employer's contribution	3,136	3,370	3,519
Interest on investments	1,461	1,550	1,600
Unobligated balance carried forward:			
Cash	−457	−420	−400
U.S. securities (par)	−37,891	−38,897	−39,407
Total financing	7,085	7,580	8,413

The fund is maintained through (a) contributions by participants, including all Foreign Service officers and eligible Foreign Service staff officers and employees of 6.5% of their basic annual salaries; (b) matching Government (employer) contributions from the appropriations from which salaries are paid; and (c) interest on investments.

It is estimated that approximately 1,261 annuitants will be paid retirement benefits from this fund at the end of 1965 compared with 1,049 at the end of 1963 and 1,159 at the end of 1964. Gratuities represent payments made to Foreign Service officers in classes 4, 5, 6 and 7 who are selected out of the Service.

While income still exceeds outgo, the long-range projections for this fund indicate that payments will exceed income in the near future and the Government will need to supplement its current practice of only matching employee deductions.

Total financing	6,410	2,086	1,301

1–4. *Foreign claims settlement.*—The Foreign Claims Settlement Commission is authorized to adjudicate claims of American nationals against Bulgaria, Czechoslovakia, Hungary, Italy, Mexico, Panama, Poland, Rumania, Soviet Union, and Yugoslavia. Upon certification by the Commission, the Secretary of the Treasury is authorized to make payments on awards.

5. *Losses in melting gold.*—Out of the receipts to be covered into the Treasury under section 7 of the Gold Reserve Act of 1934, an amount is made available sufficient to cover the difference between the value of gold as carried in the general account of the Treasurer of the United States and the value of such gold after melting and refining (48 Stat. 1061).

6. *National defense conditional gift fund.*—The Secretary of the Treasury accepts on behalf of the United States, conditional gifts of money or other intangible property to be used for a particular defense purpose. Intangibles other than money, are converted at the best terms available. The moneys held in trust are paid to those appropriation accounts which best effectuate the intent of the donors (68 Stat. 566).

7. *Payment of pre-1934 bonds of the Government of the Philippines.*—This trust account provides for payment of principal and interest on outstanding bonds of the Philippines, provinces, cities, and municipalities issued prior to May 1, 1934, under authority of acts of Congress. The value of unmatured outstanding bonds is $639 thousand (22 U.S.C. 1393(g)(5)). These outstanding bonds matured on July 1, 1963.

8. *Payment of unclaimed moneys.*—Payments are made to individuals who establish their right to moneys held in trust pending claims of owners.

Unclaimed moneys of individuals whose whereabouts are known.—Amounts are held in trust awaiting settlement of allowances of claims (31 U.S.C. 725).

Matured obligations of the District of Columbia.—Funds from inactive accounts are transferred to this account to meet matured obligations of the District of Columbia when and if presented (31 U.S.C. 725s). As of June 30, 1963, there was a balance of $8 thousand in the fund.

To promote the education of the blind.—The $250 thousand uninvested credit, on the books of the Treasury, is an unexpendable endowment fund established to promote the education of the blind in the United States. A permanent annual appropriation of $10 thousand being equivalent to 4% on the principal, is paid to the American Printing House for the Blind (20 U.S.C. 101).

FEDERAL AVIATION AGENCY

GIFTS AND DONATIONS

Program and Financing (in thousands of dollars)

	1963 actual	1964 estimate	1965 estimate
Program by activities:			
Installation, operation, and maintenance of air navigation facilities (obligations)	13	30	
Financing:			
Unobligated balance brought forward	39	30	
Receipts	4		
Unobligated balance carried forward	−30		
Total financing	13	30	

This fund includes advance payments from States, counties, and municipalities for installing and operating air navigation and related facilities (49 U.S.C. 452). In addition, funds from private sources for maintenance and operation of such facilities are credited to this fund. These funds are expended through the pertinent appropriations.

The National Archives Trust Fund Board receives and administers donations for the benefit of the National Archives (44 U.S.C. 300cc). Historical research is conducted in accordance with grants from private institutions. Current historical projects include preparation of a documentary history of the ratification of the Constitution and the first 10 amendments, and restoration and cataloging of a motion picture collection received from the Ford Motor Company.

Applicable receipts	1,123,561	448,667	457,200
Trust expenditures	−730,222	29,872	138,000

The secondary market operations of the Federal National Mortgage Association were authorized by the Housing Act of 1954 to provide limited liquidity for Government insured and guaranteed mortgages and to improve the distribution of investment capital available for home mortgage financing. Mortgage purchases and short-term loans secured by FHA insured and VA guaranteed mortgages under these operations are financed by the proceeds from (1) the sale of obligations to private investors, or to the Secretary of the Treasury (the Secretary of the Treasury may not at any one time hold more than $2.25 billion of such obligations), (2) subscriptions by the Secretary of the Treasury to FNMA preferred stock ($92.8 million was authorized in 1955, $50 million in 1957, and $65 million in 1958, making a total of $207.8 million), (3) mandatory contributions into capital incident to subscriptions for the Association's common stock by mortgage sellers and by borrowers, (4) the sale of mortgages to the investing public, (5) repayments and prepayments of mortgage principal, and (6) income from operations. Recommendations for such legislation as may be necessary or desirable to transfer ownership of the Association to the private holders of the common stock must be submitted to the Congress as promptly as practicable after all of the Treasury-held preferred stock has been retired. Meanwhile, the present interim program, financed by private as well as by Government investment funds, is treated as a trust fund. Operations are discussed in part II of this document in connection with the program's general fund financing and effect on administrative budget expenditures.

Revenue, Expense, and Retained Earnings (in thousands of dollars)

International cooperation.—U.S. dollars are advanced from foreign governments to allow the National Aeronautics and Space Administration to procure in the United States nonmilitary, space-oriented, materials and services on their behalf. Authority for this action is granted by the National Aeronautics and Space Act of 1958 (42 U.S.C. 2451 et seq.).

Gifts and donations.—This trust fund accounts for unconditional gifts and donations to the National Aeronautics and Space Administration made pursuant to 42 U.S.C. 2473(b)(4).

Adjusted Service Certificate Fund

Program and Financing (in thousands of dollars)

	1963 actual	1964 estimate	1965 estimate
Program by activities:			
Payment of World War I adjusted service certificates (costs—obligations) (object class 42)	67	65	60
Financing:			
Unobligated balance brought forward	2,867	2,800	2,735
Unobligated balance carried forward	−2,800	−2,735	−2,675
Total financing	67	65	60

This fund is used to pay adjusted service certificates issued to veterans of World War I upon maturity or upon demand. The principal of the fund has not been invested in U.S. securities since January 1, 1957, and all future payments will be made from the principal. Only a few of the certificates remain unpaid (72 Stat. 1264).

General Post Fund, National Homes

Program and Financing (in thousands of dollars)

	1963 actual	1964 estimate	1965 estimate
Program by activities:			
Religious, recreational, and entertainment (obligations)	1,594	1,638	1,655
Financing:			
Unobligated balance brought forward:			
Cash	1,301	1,358	1,350

Total financing	1,594	1,638	1,655

This fund consists of gifts, bequests, and proceeds of sale of property left in the care of the facilities by former beneficiaries; unpaid pension money standing to the credit of beneficiaries who die without pensionable heirs; and proceeds of sale of effects of such beneficiaries who die leaving no heirs or without having otherwise disposed of their estate. Such funds are used to promote the comfort and welfare of veterans at hospitals and homes where no general appropriation is available.

VETERANS ADMINISTRATION—Continued

NATIONAL SERVICE LIFE INSURANCE FUND—Continued

This fund (72 Stat. 1154) was established in 1940 as the financing mechanism for World War II servicemen's and veterans' insurance program authorized by the National Service Life Insurance Act of 1940. Over 22 million policies have been issued under this program. Because issuance of new policies ended in 1951 the insurance in force will continue to decline. The general decline in the activity of the fund is indicated in the following table (dollars in millions):

	June 30, 1962	*June 30, 1963*	*June 30, 1964*	*June 30, 1965*
Number of policies in force	5,001,726	4,954,000	4,896,000	4,818,000
Amount of insurance in force	$32,538	$32,239	$31,850	$31,350

The status of the fund excluding noncash transactions is as follows (in thousands of dollars):

	1962 actual	*1963 actual*	*1964 estimate*	*1965 estimate*
Unexpended balance of fund, beginning of year	5,773,134	5,810,651	5,721,305	5,823,328
Cash income during year:				
Interest on investments	174,202	175,023	174,260	173,300
Payments from general and special funds	6,885	5,993	6,964	5,713
Premiums and other receipts	482,781	476,733	485,866	484,696
Total annual income	663,868	657,749	667,090	663,709
Cash outgo during year	626,351	747,095	565,067	429,892
Unexpended balance of fund, end of year	5,810,651	5,721,305	5,823,328	6,057,145

The assets of the fund, which are largely invested in special Treasury interest-bearing securities and in policy loans, are expected to increase from $6,196 million as of June 30, 1963 to $6,619 million as of June 30, 1965. The actuarial estimate of policy obligations as of June 30, 1963, totals $6,146 million, leaving a balance of $49.8 million for contingency reserves.

The income of the fund derives from premium receipts, interest on investments, and payments which are made to the fund from the Veterans insurance and indemnities appropriation, for claims (1) resulting from extra hazards of the veterans' service, or (2) arising on certain policies held by personnel on active duty. Administrative expenses are charged to the appropriation General operating expenses.

In order to bolster the economy, all dividends are being disbursed in January rather than being spread throughout the calendar year. The accelerated payment of dividends advanced $101 million of dividend expenditures into 1963 from 1964 and an estimated $105 million into 1964 from 1965. The 1963 expenditures also include $89 million for a special dividend payment.

The fund is operated on a commercial basis to the greatest possible extent consistent with law. In the program and financing statement, the noncash transactions, which are offset by other claims of the fund, are excluded from program costs in order to show obligations. The following business-type statements of revenue and expense and financial condition include these noncash transactions relating to the status of insurance policy accounts.

This fund (72 Stat. 1161) was established in 1919 to receive premiums and pay claims on insurance issued under the provisions of the War Risk Insurance Act. The general decline in the activity of the fund is indicated in the following table (dollars in millions):

	June 30, 1962	*June 30, 1963*	*June 30, 1964*	*June 30, 1965*
Number of policies	291,214	277,276	265,000	254,000
Insurance in force	$1,287	$1,220	$1,166	$1,117

The status of the fund excluding noncash transactions is as follows (in thousands of dollars):

	1962 actual	*1963 actual*	*1964 estimate*	*1965 estimate*
Unexpended balance of fund, beginning of year	1,074,058	1,032,123	1,004,791	987,236
Cash income during year:				
Interest on investments	36,044	35,113	34,584	34,091
Payments from general and special fund	166	−240	125	125
Premiums and other receipts	18,098	16,926	15,370	14,058
Total annual income	54,308	51,799	50,079	48,274
Cash outgo during year	96,243	79,131	67,634	56,927
Unexpended balance of fund, end of year	1,032,123	1,004,791	987,236	978,583

Assets of the fund, which are largely invested in interest-bearing securities and policy loans, are estimated to decline from $1,105 million as of June 30, 1963 to $1,072 million as of June 30, 1965, as an increasing number of policies mature through death or disability. The actuarial evaluation of policy obligations as of June 30, 1963, totals $1,076 million, leaving a balance of $29 million for contingency reserves.

The income of the fund derives from premium receipts, interest on investments, and payments which are made to the fund from the Veterans insurance and indemnities appropriation, for claims (a) resulting from the extra hazards of the veteran's service, or (b) arising on certain policies held by personnel on active military duty. Administrative expenses are charged to the General operating expenses appropriation.

In order to bolster the economy, all dividends are being disbursed in January rather than being spread throughout the calendar year. The accelerated payment of dividends advanced $7 million of expenditures into 1963 from 1964 and an estimated $8 million into 1964 from 1965.

The fund is operated on a commercial basis to the greatest possible extent consistent with law. In the program and financing statement, the noncash transactions, which are offset by other claims of the fund, are excluded from program costs in order to show obligations. The following business-type statements of revenue and expense and of financial condition include these noncash transactions relating to the status of insurance policy accounts.

This fund is used to pay annuities to retired employees or their survivors, to make refunds to former employees who have left the service, and to pay claims for employees who have died before retirement, or before their annuities are paid in full (5 U.S.C. ch. 14). It is estimated that as of June 30, 1965, there will be 724,872 persons on the annuity roll, compared with 641,565 as of June 30, 1963, and 682,533 as of June 30, 1964.

The status of the fund is as follows (in thousands of dollars):

This fund finances the payment of subscription charges to approved carriers of the costs of health benefits protection as provided by the Federal Employees Health Benefits Act of 1959 (Public Law 86–382, 5 U.S.C. 3006) together with expenses incurred by the Civil Service Commission in administration of the act.

Budget program.—The act provides that the Employees health benefits fund will be available to pay for administrative expenses incurred by the Commission, within such limitation as may be specified by the Congress. More than 1.9 million employees and approximately 116,000 annuitants are participating in this program. By the end of 1965 it is estimated that an additional 85,000 eligible employee and survivor annuitants will participate in the program. For 1965 it is estimated that $292.3 million will be deposited into the fund from amounts withheld from employees and annuitants and $146.5 million will be contributed by the Government. On the basis of these forecasts, $422.1 million will be paid from the fund in 1965 to approved health benefit plans. An amount equal to 3% of the contribution toward each plan is set aside in the fund to provide a contingency reserve for that plan. The contingency reserve can only be used to defray future increased rates, or to reduce contributions, or to provide increased benefits. Effective with the contract period beginning November 1, 1963, an amendment to the regulations provides for additional payments to experience-rated carriers from the contingency reserve when the reserves held by the carrier are less than a stipulated amount and the plan's contingency reserve held by the fund exceeds 1 month's subscription charges. Community-rated carriers may also receive additional payments from their plan's contingency reserve held by the fund, when properly justified. For 1964 approximately $770 thousand will be paid from the contingency reserve to qualified carriers and an estimated $15.1 million will be paid in 1965. In addition, an amount equal to 1% of all contributions is set aside for adminis-

trative expenses incurred by the Commission in the administration of the act.

Financing.—The fund will be financed by contributions from participants and the Government.

Operating results.—Earnings will be retained to meet the cost of administration and future benefits.

This fund finances the payment of group life insurance premiums to private insurance companies under the Federal Employees' Group Life Insurance Act of 1954 (5 U.S.C. 2091–2103) and any expenses incurred by the Civil Service Commission in administration of this act as annually authorized by Congress.

Budget program.—Through June 30, 1963, with respect to the basic insurance program, a total of $700.3 million was withheld from the salaries of covered employees and $350.2 million was contributed by the Government to the fund. It is estimated that in 1965, $102 million will be

Digitized for FRASER
https://fraser.stlouisfed.org
Federal Reserve Bank of St. Louis

paid into the fund by employees and $51 million by the Government. As of June 30, 1963, a total of $666 million had been paid by the insurer in benefits. It is estimated that over $135 million in benefits will be paid in 1965.

Most of the difference between receipts and benefit payments under the policy is placed in reserves. On June 30, 1963, the end of the last completed policy year, there were total reserves of $399.8 million of which $100 million was held as a special contingency reserve by the insurer at interest, and $299.8 million was held by the fund with the Treasury of the United States. The contingency reserve is limited to a level of $100 million, and all amounts above this figure periodically are returned and deposited in the Treasury of the United States to be invested.

A summary statement of the operations of the contingency reserve for the three most recent policy years, 1961 through 1963, and the total at the end of the ninth policy year follows:

STATEMENT OF ANNUAL ACCOUNTING AND CONTINGENCY RESERVE

[By policy year. In thousands of dollars]

	7th year, Nov. 27, 1960–June 30, 1961 [1]	*8th year, July 1, 1961–June 30, 1962*	*9th year, July 1, 1962–June 30, 1963*	*Totals, end of 9th policy year*
1. Premiums accrued	80,464	138,439	147,757	1,036,461
2. Interest added to contingency reserve	2,580	4,436	4,410	27,572
3. Mortality and other claim charges incurred:				
(a) Life insurance	56,434	95,239	106,309	643,479
(b) Accidental death and dismemberment insurance	3,462	4,890	5,435	40,626
(c) Conversion charges	349	633	508	5,536
Total	60,245	100,762	112,252	689,641
4. Expense and risk charges incurred:				
(a) Premium and other taxes	1,414	2,184	2,432	17,223
(b) Office of Federal Employees Group Life Insurance	185	338	356	2,543
(c) Other expense and risk charges	644	1,108	1,182	8,753
Total	2,242	3,630	3,971	28,519
5. Total addition to contingency reserve	20,557	38,483	35,945	345,873
6. Contingency reserve for the year (before returns)	120,557	138,483	[2] 135,945	
7. Less premiums returned to employees life insurance fund	20,557	38,483	[2] 35,945	245,873
8. Contingency reserve held by insurer at end of year	100,000	100,000	100,000	100,000

[1] By amendment to group policy 17,000G, the 7th policy year ended June 30, 1961. Policy years thereafter will be from July 1 through the subsequent June 30.
[2] The refunds from the contingency reserve were made as follows: $19 million, Dec. 27, 1962; $14 million, July 1, 1963; $2,945 thousand, July 25, 1963.

Through June 30, 1963, individuals whose beneficial life insurance agreements have been assumed by the fund paid $20 million into the fund. It is estimated that in 1965 about $2.8 million will be paid into the fund by this group. Former members of beneficial associations continue to pay premiums according to the rate schedules in effect at the time their life insurance agreements were assumed by the fund, but the Government makes no current contributions to the fund for these individuals as it does for employees covered under the regular program.

A contingency reserve has been established and held by the insurer at interest under the policy covering members of beneficial associations. This reserve, which was estimated to be $3.2 million on June 30, 1963, will accumulate interest consistent with that provided under the regular program. If the Commission determines that the contingency reserve under the beneficial association program has reached a level sufficient to meet adverse fluctuation in future charges, any amounts above this level will be returned to the fund.

Financing.—Premium costs are met by withholding from the salaries of employees 25 cents biweekly for each $1 thousand life insurance, contributions by the Government, and direct premium payments from beneficial association members.

Operating results.—Earnings are retained to meet the cost of future benefits.

[1] Balance of selected resources are identified on the statement of financial condition.

This fund established in accordance with the Retired Federal Employee's Health Benefits Act (Public Law 86–724, 5 U.S.C. 3053) finances (1) the payment of subscription charges to an approved carrier for those qualified employees and survivors who enroll in the uniform Government-wide health benefits plan; (2) the contribution to qualified employees and survivors who retain or purchase non-Government approved health insurance plans; and (3) the payment of expenses incurred by the Civil Service Commission in the administration of the act.

Budget program.—The act authorized the Commission to use money from the Employee's life insurance fund, without regard to limitation on expenditures from that fund, through the year ending June 30, 1962, for administrative expenses. For 1963, however, Congress provided a dollar limitation for the Commission's administrative expenses rather than the 2% limitation of Government contributions as set forth in section 4(b) and section 6(c) of the act. The estimate of administrative expenses for 1965 is based on anticipated needs. During 1965 an estimated $28,310 thousand will be deposited in the fund. Participating retired employees and survivors are expected to pay $13,457 thousand and the Government will pay $14,853 thousand. It is estimated that at least $21,428 thousand in subscription charges will be paid to the carrier of the Government-wide plan, and $6,534 thousand to annuitants for their private health insurance plans.

Financing.—The fund will be financed by contributions from those participants enrolled in the Government-wide plan and by Government contributions for 1965.

Operating results.—There will be a $599 thousand surplus in the fund at the end of 1965 as compared with $400 thousand in 1964. This is interest earned on investments held during the years 1962, 1963, 1964, and 1965, but liquidated periodically to meet obligations.

This fund serves as a clearinghouse for payments by U.S. communications companies and other telecommunications users, including the Federal Government to foreign governments for receiving and relaying radiotelephone and radiotelegraph messages. The charges of foreign governments against U.S. users are received by the Commission and billed to the users. The Commission then consolidates and disburses all telecommunications payments to a particular government.

The War Claims fund consists of funds transferred by the Office of Alien Property, Department of Justice, from the net proceeds derived from the liquidation of former German and Japanese assets vested pursuant to the Trading With the Enemy Act. These funds are used largely to pay claims authorized under the General War Claims Act (Public Law 87–846).

The National Capital Housing Authority operates the low-rent public housing program in the District of Columbia under the authority of the Housing Act of 1937 and title II of the District of Columbia Alley Dwelling Act (48 Stat. 930). The 1965 program consists of the operation of 8,282 dwelling units and the development of 3,011 additional units. Management and development operations are financed through rental income, loans, and annual contributions. There is no debt service on Federal projects conveyed to the Authority for low rent use; all other projects are permanently financed through the sale of Housing Authority bonds which are supported by the pledge of the Public Housing Administration to pay annual contributions equal to the debt service less any excess operating receipts over operating expense.

Under the railroad retirement system, workers and employers pay taxes on wages to finance benefits which will be payable when the worker retires, becomes disabled, or dies. These taxes are deposited in this trust fund and invested in Government securities bearing interest of at least 3%.

The status of the trust fund is as follows (in thousands of dollars):

	1963 actual	*1964 estimate*	*1965 estimate*

Balance of fund at end of year	3,805,314	3,877,964	4,013,598

Income.—The income of the Railroad retirement account consists of taxes paid by railroad employers and employees; interest on investments; appropriations for military service credits; repayments on amounts loaned to the Railroad unemployment insurance account; payments from the Federal old-age and survivors insurance trust fund and Federal disability insurance trust fund. The railroad retirement system has reinsurance arrangement of annual financial interchanges with the social security system so as to place these systems in the same position in which they would have been if railroad employment had been included in social security coverage. To help improve the financial condition of the system, legislation has recently been passed in Congress to increase the limit on compensation subject to railroad retirement taxes from $400 to $450 a month and to enable the account to increase the interest earnings on its investments.

Retirement, disability, and survivor benefit payments.—Payment estimates reflect the continuing growth in the beneficiary rolls.

Administrative expenses.—Such expenses are subject to annual limitations in appropriation acts (see Limitation on salaries and expenses, Railroad Retirement Board in pt. II of the budget).

Loan to Railroad unemployment insurance account.—The Railroad Unemployment Insurance Act provides that when the balance in the Railroad unemployment insurance account is insufficient to pay benefits due under that act, necessary amounts are to be borrowed from the Railroad retirement account. When the balance in the Railroad unemployment insurance account permits, borrowed amounts are to be repaid to the Railroad retirement account, with interest of at least 3% per annum.

Stores	16			
Unpaid undelivered orders	38	16	16	16
Total selected resources	54	16	16	16

The Board administers an unemployment and sickness insurance system and an employment service to find jobs for unemployed railroad workers. The administrative expenses are shown as a separate account in the unemployment trust fund and are financed through a permanent authorization of 0.25% of taxable payroll. As of each June 30, the unobligated balance in this fund in excess of $6 million is available to the Railroad unemployment insurance account in the unemployment trust fund (45 U.S.C. 361).

[In thousands of dollars]

	1963 actual	*1964 estimate*	*1965 estimate*
Permanent limitation (0.25% of taxable payroll)	7,884	13,000	10,200
Interest on investments	96	100	100
Limitation	7,980	13,100	10,300

1. *Maintenance of earnings accounts.*—The amount of insurance payments for unemployment, sickness and maternity benefits is based upon individual records of earnings and daily wage rates. This workload fluctuates with the level of employment in the railroad industry, rates of turnover, and similar factors. The costs are shared on a measured basis with the retirement program. Accounts posted were 1,028,000 in 1963 and are estimated at 1,000,000 in 1964 and 970,000 in 1965.

2. *Processing of unemployment insurance claims.*—Workers' claims for unemployment compensation are filed locally and certified for payment through regional offices. Regular unemployment claims were 1,572,000 in 1963 and are estimated at 1,420,000 in 1964 and 1,320,000 in 1965.

3. *Processing of sickness and maternity claims.*—These claims are filed by mail and certified for payment through the regional offices of the Board. Sickness claims were 751,000 in 1963 and are estimated to be 735,000 in 1964 and 721,000 in 1965.

4. *Claimant placement services.*—The Board conducts an employment service for unemployment benefit claimants. This resulted in savings of benefit payments of approximately $4.6 million in 1963 as 30,700 placements were made. Placements are estimated at 35,000 in 1964 and 40,000 in 1965.

5. *Administration.*—The costs of administration are shared between this and the retirement program on a measured basis.

This fund established under 26 U.S.C. 7448, is used to pay annuities to eligible widows and dependent children of deceased judges of the Tax Court of the United States. Participating judges pay into the fund 3% of their salaries or retired pay to cover creditable service for which payment is required and such additional funds as are needed are provided through the annual appropriation to the Tax Court of the United States.

On June 30, 1963, nine judges of the court were participating in the fund, and one eligible widow was receiving annuity payments.

RELATION OF TOTAL OBLIGATIONS TO NET OBLIGATIONS

The following 3-part tabulation shows, for each of the years covered by the budget schedules, the relationship between the obligations which appear in the program and financing schedules in Part I of the Appendix and the net obligations incurred which are summarized in table 9 of Part 2 of the budget. The total obligations include a number of transactions between accounts which in effect are duplicated when figures for the various accounts are added. These must be deducted in arriving at net obligations to the public. The program and financing schedules show separately, in the case of certain unexpired accounts, the cancellations and recoveries on obligations of prior years; these also are to be deducted in arriving at the net obligations entered into.

Certain receipts from outside the Government, primarily receipts of the public enterprise revolving funds, are regularly netted in the administrative budget expenditures. They must similarly be deducted from total obligations to arrive at a net obligation figure that is consistent with the concepts used in determining administrative budget expenditures.

RELATION OF TOTAL OBLIGATIONS TO NET OBLIGATIONS

NOTES

Col. 1. Total obligations incurred have here been corrected in 1963 and 1964 to remove the special adjustments which are called "comparative transfers," used in the detailed schedules to provide comparability when the financing of an activity has been moved from one appropriation account to another in the estimates.

Col. 2. Reimbursements from other accounts include both advances and reimbursements between accounts, as reflected in the detailed schedules. In the case of intragovernmental revolving funds, they are usually on a "customers' orders received" basis; otherwise they reflect accrual or cash transactions in accordance with the arrangements between the agencies or portions thereof which are involved.

Col. 3. Other intragovernmental transactions include (a) some reimbursements from trust funds which have been included in the line "Reimbursements from non-Federal sources" in the detail, and (b) some public enterprise fund receipts which come from within the Government rather than the public.

Col. 4. Recoveries of prior obligations or cancellations of obligations incurred in prior years in unexpired accounts, which are significant, are shown separately in the individual budget schedules and totaled here. Other adjustments of prior obligations have been merged with new obligations in the schedules in unexpired accounts.

Col. 5. Column 1 minus the next three columns gives a subtotal of obligations to the public.

Col. 6. Revenues from the public consist of the amounts shown in the detailed schedules as "Reimbursements from non-Federal sources" and the amounts shown as revenues and other receipts of public enterprise funds, except for the intragovernmental items which have been shown in col. 3. Entries in col. 6 are generally on an accrual basis and therefore differ from figures used in Special Analysis B which are on a cash basis.

Col. 7. Net obligations incurred equal col. 5 minus col. 6, and is the basis of the figures in table 9, part 2 of the budget.

PART III

PERSONNEL COMPENSATION SCHEDULES

Digitized for FRASER

Federal Reserve Bank of St. Louis

EXPLANATION OF PERSONNEL COMPENSATION SCHEDULES

Part III contains detailed schedules on personnel compensation which are furnished to the Congress pursuant to section 204 of the Budget and Accounting Act, 1921 (31 U.S.C. 581). The number of positions of a permanent or an indefinite duration is shown; amounts are given for these, and for other types of employment and personnel compensation.

For the position figures, any position is counted if it is occupied or will be occupied at any time during the year. Therefore, the number of positions shown may exceed the maximum number of positions at any one time, and nearly always exceeds the maximum number of employees at any one time due to delays in filling vacancies, leave without pay, and similar factors.

Grades and their respective salary ranges are reflected in the stub column; the most commonly used grade series, the general schedule grades, is abbreviated "GS–____." Titles are shown for positions with a base rate of $13,615 or above. Salaries are reported at the rate effective at the end of the year. Since within-grade salary advancements occur at various times during the year, the rates shown will not be exactly equal to the compensation earned, but the difference is taken up in the "Deduct lapses" line. That line also covers savings due to vacancies, etc., and is offset in part by terminal leave payments.

The pay scales which became effective for many employees in October 1962 are used in the 1963 column; and pay scales which became effective in January 1964 are used in the 1964 and 1965 columns. A special deduct entry in the 1963 column accounts for the savings because pay was at the older, lesser rates for the first 3 months of the fiscal year. A similar entry in the 1964 column takes into account the lower pay scales in effect during the first 6 months of that year.

Separate entries cover employment in positions other than permanent (temporary and intermittent employment). Other obligations for personnel compensation are also detailed. Because most annual salaries are by law the rate for 52 weeks, an additional entry covers the extra earnings whenever there are regular workdays above the 52-week base. For employees with a Monday-through-Friday workweek there were no extra days in 1963, but there are two extra in 1964, and one in 1965.

The final amounts in these schedules agree with corresponding entries in the object schedules of parts I and II. In cases where a consolidated schedule in part III contains personnel compensation which is reflected in two or more object schedules, a distribution by account title follows the total line.

The schedules in this part of the appendix, like the object schedules of parts I and II generally, exclude estimates which are proposed for later transmittal. Such exclusions relate to a number of items of proposed legislation affecting 1965 and occasionally 1964, a number of supplemental estimates which are presently forecast under existing legislation, and the use of such amounts as are currently estimated in the special allowances (for contingencies, etc.).

GS-1. $3,305 to $4,250	1	4,190	1	4,220	1	4,250
Ungraded positions at hourly rates equivalent to less than $12,845	47	253,714	47	256,728	48	261,678
Total permanent	1,512	12,505,825	1,513	13,184,783	1,574	13,961,917
Deduct—						
Lapses	15	129,544	25	205,327	28	217,617
Net savings due to lower pay scales for part of year		177,937		222,156		
Net permanent (average number, net salary)	1,497	12,198,344	1,488	12,757,300	1,546	13,744,300
Positions other than permanent: Temporary employment		20,419		29,000		29,000
Other personnel compensation:						
Regular pay above 52-week base				104,000		54,000
Cost of living allowances		50,468		54,000		60,000
Overtime and holiday pay		23,467		11,000		11,000
Night differential		738		700		700
Total personnel compensation		12,293,436		12,956,000		13,899,000
Salaries and wages are distributed as follows:						
Limitation on administrative expenses, Public Housing Administration		11,445,170		12,082,000		12,922,000
Limitation on nonadministrative expenses, Public Housing Administration		710,924		740,000		837,000
Advances and reimbursements		137,342		134,000		140,000

NATIONAL AERONAUTICS AND SPACE ADMINISTRATION

CONSOLIDATED SCHEDULE OF PERSONNEL COMPENSATION PAID FROM FUNDS AVAILABLE TO NATIONAL AERONAUTICS AND SPACE ADMINISTRATION

	1963 actual		1964 estimate		1965 estimate	
	Number	Total salary	Number	Total salary	Number	Total salary
Grades and ranges:						
Special ungraded positions:						
Administrator	1	$22,500	1	$22,500	1	$22,500
Deputy administrator	1	21,507	1	21,507	1	21,507
Special ungraded positions established by the Administrator of the NASA:						
$20,000 to $21,000:						
Associate administrator	1	21,008	1	21,008	1	21,008
Associate administrator for advanced research and technology	1	21,008	1	21,008	1	21,008
Associate administrator for manned space flight	1	21,008	1	21,008	1	21,008
Associate administrator for space science and applications	1	21,008	1	21,008	1	21,008
Assistant administrator for technology utilization and policy planning	1	21,008	1	21,008	1	21,008
Assistant director	8	160,080	14	280,140	14	280,140
Associate deputy director for research and development	1	19,510	1	20,010	1	20,010
Associate director	5	100,050	5	100,050	5	100,050
Deputy associate administrator	8	162,076	9	186,078	9	186,078
Deputy associate director	1	20,010	1	20,010	1	20,010
Deputy director	7	144,062	7	143,064	7	143,064
Director, aeroballistics division	1	19,510	1	20,010	1	20,010
Director, advanced manned missions program			1	20,010	1	20,010
Director, astrionics division	1	19,510	1	20,010	1	20,010
Director, construction			1	20,010	1	20,010
Director, field installation	9	187,076	10	208,084	10	208,084
Director, gemini program			1	20,010	1	20,010
Director, manned space flight field center development			1	20,010	1	20,010
Director, manned space sciences			1	20,010	1	20,010
Director of aeronautical research	1	20,010	1	20,010	1	20,010
Director of applications	1	21,008	1	21,008	1	21,008
Director of bioscience programs	1	20,010	1	20,010	1	20,010
Director of biotechnology and human research	1	$20,010	1	$20,010	1	$20,010
Director, office of plans and program evaluation	1	21,008				
Director of tracking and data acquisition	1	20,010	1	20,010	1	20,010
Director of industrial operations			1	20,010	1	20,010
Director of launch vehicles and propulsion programs	1	20,010	1	20,010	1	20,010
Director of lunar and planetary programs	1	20,010	1	20,010	1	20,010
Director of nuclear systems	1	20,010	1	20,010	1	20,010
Director of procurement	1	20,010	1	20,010	1	20,010
Director of propulsion and power generation	1	20,010	1	20,010	1	20,010
Director of research	1	20,010	1	20,010	1	20,010
Director of sciences	1	20,010	1	20,010	1	20,010
Director of spacecraft and flight missions			1	20,010	1	20,010
Director of space vehicles	1	20,010	1	20,010	1	20,010
Director of systems engineering	1	20,010				
Director of systems integration	1	20,010	1	20,010	1	20,010
Director of technical programs	1	20,010	1	20,010	1	20,010
Director, policy planning staff	1	20,010	1	20,010	1	20,010
Director, propulsion and vehicle engineering division	1	19,510	1	20,010	1	20,010
Director, test division	1	19,510	1	20,010	1	20,010
Executive director, policy planning board			1	20,010	1	20,010
Executive secretary			1	21,008	1	21,008
General counsel	1	21,008	1	21,008	1	21,008
Senior scientist	1	20,010	1	20,010	1	20,010
Special assistant to the administrator	1	21,008	1	21,008	1	21,008
Technical assistant to the director	1	20,010	1	20,010	1	20,010
$18,000 to $19,750:						
Aeronautical research pilot	1	19,011	1	19,011	1	19,011
Assistant administrator for international programs	1	19,011	1	19,011	1	19,011
Assistant administrator for legislative affairs	1	19,510	1	19,510	1	19,510
Assistant administrator for public affairs	1	19,510	1	19,510	1	19,510

PART IV

ANNEXED BUDGETS

Digitized for FRASER
https://fraser.stlouisfed.org
Federal Reserve Bank of St. Louis

EXPLANATION OF ANNEXED BUDGETS

Part IV contains detailed schedules and explanatory statements on seven self-supporting Government agencies and programs which did not submit such schedules for recent budget documents. Like the budgets for the legislative branch and the judiciary, the annexed budgets have not been reviewed by the President but are included in the amounts submitted by the agencies (except for two cases, which are noted, where Bureau of the Budget estimates are used because no agency estimates were submitted).

Three agencies (Banks for Cooperatives, Federal Intermediate Credit Banks, and the Federal Deposit Insurance Corporation) have been included in the Government-sponsored enterprise group in the computation of consolidated cash totals for some years, and, starting with last year's budget the net totals for each have been displayed. However, such data was reported only for certain debt and investment transactions, rather than for all of their activities, and the information was obtained informally. The inclusion of more complete annexed budgets this year does not change their handling in the totals.

The other four agencies and programs (Milk Marketing Administration, Comptroller of the Currency, Exchange Stabilization Fund, and the Board of Governors of the Federal Reserve System) are also not included in the administrative budget or covered specifically in the trust fund totals. They are in part included in the deposit fund group, and in part are outside all traditional figures on Federal finances.

The material in this part is presented in the general format of similar material in part I, with the principal exception that these schedules show receipts in place of showing appropriations. No appropriation language appears in part IV because action by the Congress is not required.

Applicable receipts	12,429	12,954	13,352
Net expenditures (not included under trust fund expenditures)	−41	−6	

The Secretary of Agriculture is authorized by the Agricultural Marketing Agreement Act of 1937, as amended, under certain conditions, to issue Federal milk marketing orders establishing minimum prices which handlers are required to pay for milk purchased from producers.

Market administrators are responsible for carrying out locally the terms of specific marketing orders. Their operating expenses, financed by assessments on regulated handlers, are reflected in these schedules. These funds are collected locally, deposited in banks and disbursed directly by the market administrator.

Each milk order is administered locally by a market administrator who is appointed by the Secretary. His staff is employed directly by the market administrator. There were 39 milk market administrators serving the 83 milk market orders as of July 1, 1963.

The activities conducted in the local office are concerned primarily with monthly computations and public announcement of class and uniform blend prices, associated butterfat differentials and with examination of handlers' records to verify their reports and payments to producers.

The expenses of the local offices are met from an administrative fund and a marketing service fund which are prescribed in each order. The administrative funds are derived from prorated handler assessments. The rate is determined annually on the basis of the budget submitted by the market administrator and approved by Agricultural Marketing Service.

The marketing service fund provides for the expense of providing market information to producers who are not members of a qualified cooperative. It also provides for the verification of weight sampling and testing of milk from these producers. The cost of these services is borne by such producers.

Milk sold by regulated handlers supplied about 97 million persons—two-thirds of the total nonfarm population—during calendar year 1962.

The following table gives an indication of the growing role of Federal orders on the marketing of milk over the past few years.

	Calendar year			
	1959	*1960*	*1961*	*1962*
Number of markets	77	80	81	83
Population of market areas (thousands)	67,700	88,900	93,800	97,400
Number of handlers	2,197	2,259	2,307	2,239
Number of producers	187,576	189,816	194,863	186,477
Producer deliveries (million pounds)	40,149	44,812	48,802	51,592
Producer deliveries used in class I (million pounds)	26,250	28,758	29,859	31,558

The Agricultural Marketing Service has been delegated the responsibility for program development, technical assistance and overall program direction of the operations. These expenses are financed, as authorized by 7 U.S.C. 1392b from the funds appropriated by section 32 of the act of August 24, 1935 (7 U.S.C. 612c), and are reflected in part I of the appendix but not shown here.

The Office of the Comptroller of the Currency was created by act of Congress approved February 25, 1863 (12 Stat. 665), as an integral part of the national banking system. The Office finances its operations primarily by assessments from national banks.

The most important functions of the Comptroller of the Currency relate to the organization, examination, and liquidation of national banks. His approval is required by law in connection with the organization of new national banks, the conversion of State-chartered banks into national banks, and consolidations or mergers of national banks with national banks or of State banks with national banks where the continuing institution is a national bank. The establishment of branches by national banks also requires approval by the Comptroller.

The Office exercises general supervision over the operations of national banks. Each national bank is required to publish and file reports of condition not less than four times a year. National bank examiners examine each bank at least three times each 2 years for the purpose of determining the financial condition of national banks, the soundness of their operations, and their compliance with the requirements of the National Bank Act and other applicable statutes.

For the purpose of stabilizing the exchange value of the dollar, the Secretary of the Treasury is authorized to enter into stabilization agreements, and to deal in gold and foreign exchange and other instruments of credit and securities. An exchange stabilization fund, with a capital of $200 million (derived from the increment resulting from the reduction in the weight of the gold dollar which took place in 1934) is authorized by law for this purpose (31 U.S.C. 822a). All earnings and interest accruing are paid into this fund and are available for the purposes thereof, including expenses.

The estimates shown for 1964 and 1965 for operating expenditures have been prepared by the Bureau of the Budget. Because of the special nature of the Fund's activities, it is not feasible to make estimates for the other items.

The Federal Reserve System operates under the provisions of the act of December 23, 1913, known as the Federal Reserve Act (38 Stat. 251), as amended.

Program.—To carry out its responsibilities under the act, the Board determines general monetary, credit, and operating policies for the System as a whole and formulates the rules and regulations necessary to carry out the purposes of the Federal Reserve Act. The Board's principal duties consist of exerting an influence over credit conditions and supervising the Federal Reserve Banks and member banks.

Financing.—Under the provisions of section 10 of the Federal Reserve Act, the Board of Governors levies upon the Federal Reserve banks, in proportion to their capital

Digitized for FRASER

Federal Reserve Bank of St. Louis

and surplus, an assessment sufficient to pay its estimated expenses. The Board, under the act, determines and prescribes the manner in which its obligations are incurred and its expenses paid. Funds derived from the assessments are deposited in the Federal Reserve Bank of Richmond, and the act provides that such funds "shall not be construed to be Government funds or appropriated moneys." No Government appropriation is required to support operations of the Board.

The banks for cooperatives, of which there are 13, are under the general supervision of the Farm Credit Administration (12 U.S.C. 1134 et seq.). They finance the operations of farmers' cooperatives. During 1963, the banks extended credit totaling $946 million. The funds to finance these loans are obtained from (1) sales of debentures to the public, (2) notes payable, and (3) their own capital. The debentures which the banks issue are not guaranteed by the U.S. Government either as to principal or interest. The banks' capital funds consist of capital stock owned by the U.S. Government; equities of borrowing cooperatives and retained earnings.

The Farm Credit Act of 1955 provides for eventual ownership of the banks by farmers' cooperatives and the retirement of the U.S. Government's investment. At the time the 1955 act was passed the U.S. Government had an investment in the banks of $150 million. By June 30, 1963, this investment had been reduced to $81 million while the equities of borrowing cooperatives had reached nearly $100 million. It is expected that additional repayments of Government capital of $11,750 thousand and $11,500 thousand will be made in 1964 and 1965, respectively.

All expenses, including administrative costs, are paid from the banks' own resources and thus in no way affect the budget of the United States.

[1] Balances of selected resources are identified on the statement of financial condition.

The Federal intermediate credit banks, of which there are 12, are under the general supervision of the Farm Credit Administration (12 U.S.C. 1021 et seq.). They serve as banks of discount for agriculture, discounting agricultural and livestock paper for local financing institutions, such as production credit associations, agricultural credit corporations, livestock loan companies, and commercial banks. They also provide the production credit associations with necessary supervision and services. During 1963, the banks extended credit totaling $4.4 billion.

The banks' lending funds are obtained primarily from the sale of debentures to the public and from their own capital funds. The debentures are not guaranteed by the U.S. Government either as to principal or interest.

The banks were originally wholly owned Government corporations set up exclusively as banks of discount; however, pursuant to the Farm Credit Act of 1956, the banks became mixed-ownership corporations and were made responsible for supervising the production credit associations and assisting them to make sound credit available to farmers.

All of the capital stock of the Federal intermediate credit banks from organization in 1923 to December 31, 1956, was held by the U.S. Government. The 1956 act provided a long-range plan for the eventual ownership of the credit banks by the production credit associations and the gradual retirement of the Government's investment in the banks. However, because of the increased credit demands placed upon the Federal intermediate credit banks, it has been necessary for the Government to invest addi-

tional capital in the banks in order to keep the debt-to-capital ratios within the 10 to 1 maximum permitted by law. At June 30, 1963, the U.S. Government's investment in the capital stock of the banks was $115 million and that of private interests was $50 million.

All expenses, including administrative costs, are paid from the banks' own resources and thus in no way affect the budget of the United States.

For the purposes of protecting depositors of insured banks and to carry out bank supervisory activities the Federal Deposit Insurance Corporation is authorized to insure individual depositors of insured banks up to $10 thousand, participate in regulation of bank mergers, and regularly examine insured State banks other than members of the Federal Reserve System and District of Columbia banks.

Assessments are paid by insured banks, and the Corporation receives income on investments in securities of the Treasury. There is now no capital stock outstanding. The Corporation is also authorized to borrow $3 billion from the Treasury, but this authority has not been used. (See schedule in part I of the Appendix.)

The estimates shown for 1964 and 1965 for costs and personnel have been prepared by the Bureau of the Budget.
