¹Based on land area.

²In comparing this percentage of increase with that shown for the decade 1910-1920, allowance should be made for the fact that the period between the censuses of 1910 and 1920 was less than a full decade, and that between the 1920 and 1930 censuses was more than a full decade. An increase of 16.1 per cent for 123 months (the time between Jan. 1, 1920, and Apr. 1, 1930) is equivalent to 16.7 per cent for exactly 10 years; and the 1920 increase for 110½ months (the time between Apr. 15, 1910, and Jan. 1, 1920) is equivalent to 16.4 per cent for 120 months. Making this adjustment, the rate of increase for the decade ending in 1930 is only slightly higher than that for the preceding decade.

¹Based on land area.

In comparing the increase in population with that shown for the decade 1910-1920, allowance should be made for the fact that the increase in population between 1910 and 1920 was less than a full decade, and that between the 1920 and 1930 censuses was more than a full decade. An increase of 16.1 per cent for 123 months (the time between Jan. 1, 1920, and Apr. 1, 1930) and the 1920 increase for 116 months (the time between Apr. 1, 1920, and Apr. 1, 1930) is 15.4 per cent for 120 months. The increase in population between 1910 and 1920 is only slightly higher than that for the decade 1910-1920.
