**THE BUDGET OF THE
UNITED STATES
GOVERNMENT**

FISCAL YEAR
1979

THE BUDGET DOCUMENTS

Data and analyses relating to the budget for 1979 are published in four documents:

The Budget of the United States Government, 1979 contains the information that most users of the budget would normally need, including the Budget Message of the President. The *Budget* presents an overview of the President's budget proposals and includes explanations of spending programs in terms of national needs, agency missions, and basic programs, an analysis of estimated receipts, and a discussion of the President's tax proposals. This document also contains a description of the budget system and various summary tables on the budget as a whole. (Price \$4.00.)

The Budget of the United States Government, 1979—Appendix contains detailed information on the various appropriations and funds that comprise the budget. The *Appendix* contains more detailed information than any of the other budget documents. It includes for each agency: the proposed text of appropriation language, budget schedules for each account, explanations of the work to be performed and the funds needed, proposed general provisions applicable to the appropriations of entire agencies or groups of agencies, and schedules of permanent positions. Supplementals and rescission pro-

posals for the current year and new legislative proposals are presented separately. Information is also provided on certain activities, whose outlays are not part of the budget totals. (Price \$12.00.)

Special Analyses, Budget of the United States Government, 1979 contains 16 special analyses that are designed to highlight specified program areas or provide other significant presentations of Federal budget data. This document includes analytical information about: alternative views of the budget, i.e., current services and national income accounts; economic and financial analyses of the budget covering Government finances and operations as a whole; Government-wide program and financial information for Federal education, training and employment, health, income security, civil rights, environment, and research and development programs. (Price \$3.25.)

The United States Budget in Brief, 1979 provides a more concise, less technical overview of the 1979 Budget than the above volumes. Summary and historical tables on the Federal budget and debt are also provided, together with graphic displays. (Price \$1.75.)

Each of these documents is for sale by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402. (Paper covers only.)

GENERAL NOTES

1. All years referred to are fiscal years, unless otherwise noted.

EXPLANATION OF ESTIMATES

Part I contains various tables and certain schedules in support of the budget, explanatory statements of the work to be performed and the money needed, and the text of the language proposed for enactment by Congress

on each item for which congressional action in an appropriation bill is required. It also contains the text of general provisions, proposed for enactment by the Congress, that apply to entire agencies or groups of agencies.

ARRANGEMENT

The chapters of Part I reflect the branches of Government, and the major departments and agencies of the executive branch. Most of the smaller agencies are grouped in one chapter—"Other independent agencies."

Within each chapter there are three main sections. The first section covers programs authorized by existing legislation (including items for which extension or renewal of authorizing legislation is requested). This section is organized by major subordinate organizations within the agency (usually bureaus). For each bureau, *Federal funds*, covering the funds that are not set aside in "trust," precede *trust funds*, covering moneys that are held by the Government in accounts established by law or by trust agreement for specific purposes. Generally, accounts with new budget authority in 1979 will precede those without such an entry.

The second major section of each chapter covers the *legislative program*, which reflects the budget estimates for proposed new legislation. Requests for appropriations to finance these legislative proposals will be transmitted later.

This section is also arranged by bureau or other major subordinate organization. The proposals are applicable to Federal funds unless otherwise indicated.

The third section of each chapter includes the *general provisions* of appropriation language that are applicable to the agency in that chapter, and are in addition to the specific language pertaining to individual appropriation items. General provisions that apply to specified groups of agencies are placed in the chapter covering the first agency that appears in the respective appropriation act. The general provisions that are Government-wide in scope (identified "Departments, Agencies, and Corporations"), normally contained in the Treasury, Postal Service, and General Government Appropriation Act, are placed at the end of the Executive Office of the President chapter.

An explanation of the types of funds included in the budget may be found in Part 7 of the compact volume—*The Budget of the United States Government, 1979*.

FORM OF DETAILED MATERIAL

APPROPRIATION LANGUAGE

The language proposed for inclusion in the 1979 appropriation acts is printed following the account title. The language of the 1978 appropriation acts, printed in roman type, is used as a base. Brackets enclose material that is proposed for omission; italic type indicates proposed new language. (When an appropriation has not been enacted at the time the budget is submitted, the language relates only to 1979 and is italicized, with no brackets shown. For the accounts of the agencies named in the conference version of the Departments of Labor, Health, Education, and Welfare Appropriation Act, 1978, language is shown as if the bill had been enacted. A continuing resolution (Pub. L. No. 95-205), which will remain in effect through September 30, 1978, approved the amounts contained in the conference version of that bill.) An illustration of proposed appropriation language for 1979 follows:

SALARIES AND EXPENSES

For necessary expenses of the Bureau of Economic Analysis, **[\$13,475,000]** *the Office of Federal Statistical Policy and Standards, the Office of Industrial Economics, and the Office of Economic Affairs, \$16,875,000. (15 U.S.C. 171, 175, 1512, 1516; 22 U.S.C. 286f, 3101-3108; 31 U.S.C. 13b; Department of Commerce Appropriation Act, 1978.)*

Enacted supplemental appropriations for 1978 are shown as bracketed separate paragraphs following the paragraph of language proposed for 1979.

At the end of the final language paragraph, and printed in italics within parentheses, are citations to any relevant authorizing legislation and to the appropriation act from

which the basic text of the 1979 language is taken. In addition, citations to enacted supplemental appropriations are included.

BASIS FOR SCHEDULES

The 1977 column of this budget generally presents the actual transactions and balances for that year, as recorded in agency accounts.

For 1978, the regular schedules include enacted appropriations and supplemental appropriation requests that are needed to meet the increased costs of statutory and wage-board pay raises. When the annual appropriation has not been enacted, the regular schedules will include the amounts provided under the authority of a continuing resolution. Appropriation requests for supplemental appropriations other than for statutory pay raises are included in Part III, together with brief program and financing schedules. For those 1978 supplemental estimates that are being transmitted for consideration with the 1979 budget (pay supplementals identified in the regular schedules in Part I, and separate schedules in Part III headed: "Supplemental now requested"), the proposed appropriation language is also included in Part III.

The 1979 column of the regular schedules includes proposed appropriations for recommended extension or renewal of expiring laws. However, amounts for proposed new legislation are shown in separate schedules, generally under the legislative program section of each chapter. Appropriation language is included with the regular schedules, but not with the separate schedules for proposed legislation.

Where the required data are available in the agency accounting systems, budgets are presented in terms of costs. Detailed operating cost figures for each activity or object represent value of goods and services consumed in carrying out the program. In the case of capital investment programs, costs shown represent the value of assets acquired.

Total obligations are always shown; activities and objects are reflected on an obligation basis where cost data are not available. Obligations refer to orders placed, contracts awarded, loan agreements made, and recurring services (such as rent, utilities, and personal services) received during the year, regardless of the time of payment.

For a few Government corporations, the detail and the totals of their budget presentations are on the basis of accrued expenditures.

SCHEDULE OF PROGRAM AND FINANCING

This schedule consists of three parts. In the "Program by activities" section, costs or obligations are classified by purpose, program, type of activity, or project for 1977, 1978, and 1979. This classification is developed for each appropriation or fund, and is not uniform on a Government-wide basis. Similarly, the identification of capital investment is not handled uniformly. Where it is of significance, capital investment is shown by activity. Otherwise, the total for each year is disclosed by footnote.

Where budgets are presented in terms of costs, the adjustment from costs to obligations is summarized in an entry "Change in selected resources."

In certain cases, this schedule is expanded to include additional columns that provide a more informative presentation. This is done, for example, in some construction or procurement programs to show related cost data; for certain Defense items, to identify the total obligations programmed; and for programs financed at a pre-obligation stage (such as commitments in some loan programs).

The "Financing" section shows the sources of funds, budget authority, and other means of financing the activities covered by the account, and the disposition of unobligated amounts not used during the year.

The section on "Relation of obligations to outlays" shows obligations net of offsetting collections, obligated

Excludes \$169 thousand in 1978 and in 1979 for activities transferred to General Administration, "Salaries and expenses." Comparable amounts for 1977 (\$168 thousand) are included above.

balances at the start and end of the year, and other items that affect the relation of obligations to outlays.

The account identification code, found at the head of the program and financing schedule, facilitates computer processing of budgetary information. The last three digits of this code represent the functional category to which the account is classified. Functional classification permits presentation of budget authority and outlays according to the major purposes to be served, rather than the organization administering the program or the account under which these funds are made available. For example, the 376 on the above schedule represents Other advancement and regulation of commerce—a subfunction within major function 370; Commerce and Housing Credit. In those few cases where the outlays from an account are split between two or more functions, a functional code of 999 is used. Similarly, when the outlays from an account are split between two or more subfunctions within a single major function, the code of the major function is used. The individual functional categories are identified with each appropriation or fund account in the Budget Accounts Listing in Part 8 of the budget.

NARRATIVE STATEMENT OF PROGRAM AND PERFORMANCE

The work planned and services proposed to be carried out are described briefly in a narrative statement for each appropriation or fund. Where practicable, the narrative statement presents accomplishments in relation to financial requirements, and available measures of program and performance.

SCHEDULE OF OBJECT CLASSIFICATION AND PERSONNEL SUMMARY

There is shown for each account a classification of obligations, costs, or accrued expenditures according to the following uniform list of object classifications:

10 PERSONAL SERVICES AND BENEFITS	26 Supplies and materials
11 Personnel compensation	30 ACQUISITION OF CAPITAL ASSETS
12 Personnel benefits	31 Equipment
13 Benefits for former personnel	32 Lands and structures

23.1 Standard level user charges	42 Insurance claims and indemnities
23.2 Communications, utilities, and other rent	43 Interest and dividends
24 Printing and reproduction	44 Refunds
25 Other services	90 OTHER

These object classes reflect the nature of the things or services purchased, regardless of the purpose of the pro-

gram for which they are used. Data according to this classification are illustrated in the following schedule:

Several of the object classes are divided into subclasses—personnel compensation, for example, is shown separately for permanent positions, for positions other than permanent, and for certain other payments.

Generally, a personnel summary follows the object classification schedule, as illustrated:

Personnel Summary			
Direct:			
Total number of permanent positions.....	441	461	527
Full-time equivalent of other positions.....	21	22	26
Average paid employment.....	440	460	526

Average GS salary.....	\$19,528	\$19,513	\$20,321
Reimbursable:			
Total number of permanent positions.....	83	53	40
Full-time equivalent of other positions.....	17	16	13
Average paid employment.....	80	52	37
Average GS grade.....	9.98	9.97	10.18
Average GS salary.....	\$19,528	\$19,513	\$20,321

Permanent positions are those that are established or occupied for a year or more. The nature of the position governs. Thus, a permanent position may be occupied by an employee whose appointment is either temporary or permanent in nature. These positions may be full-time (full workweek) or part-time (less than a full workweek).

Average grades and salaries are computed arithmetically. Thus, the average salary can fall outside the salary range of the average grade.

STATEMENT OF REVENUE AND EXPENSE

For many revolving funds there is a statement of revenue and expense that shows the resulting net income or loss for the year. This statement is usually on a full accrual basis including provision for depreciation, for losses on receivables, etc. (An example of this type of schedule appears on page 258 under "Federal Ship Financing Fund".)

STATEMENT OF FINANCIAL CONDITION

For each fund displaying a revenue and expense statement there is also presented a statement of financial condition for assets, liabilities, and equity of the Government at the close of each year. This statement excludes balances of appropriations and borrowing authorizations that have not yet been paid into the revolving fund. Because the statement is on an accrual basis, the "Liabilities" section does not reflect obligations incurred for which the liability has not accrued. Nor does the "Assets" section reflect unfilled customer orders received, even though such orders are a basis for obligation in the case of intragovernmental revolving funds. The "Government equity" section therefore, shows obligations that have not yet become accrued liabilities, the unobligated balance, unfilled customer orders on hand (where relevant), and invested capital and earnings.

The last section of the balance sheet is an "Analysis of Changes in Government Equity." This section sets forth for paid-in capital and retained income, as appropriate, the beginning balance, transactions (changes) during the year, and the balance at the end of the year. (An example of this type of schedule appears on page 258 under "Federal Ship Financing Fund.")

BUDGETS NOT SUBJECT TO REVIEW

The presentations for the Legislative Branch, the Judiciary, the Comptroller of the Currency in the Treasury Department, the Federal Deposit Insurance Corporation, the Milk Market Orders Assessment Fund of the Department of Agriculture, the Farm Credit Administration, the Board of Governors of the Federal Reserve System, and the International Trade Commission have been included, without review, in the amounts submitted by the agencies.

The budgets of the privately owned Government-sponsored enterprises, presented in Part VI, are not subject to review, and are included in the amounts submitted by the respective enterprises.

DIFFERENCES BETWEEN BUDGET TABLES AND APPENDIX TABLES

INTRAGOVERNMENTAL TRANSACTIONS

The consolidation of Government-administered funds in the compact budget volume may cause duplication in the totals. This occurs when the payment from one of the fund groups (Federal or trust) is credited to a receipt account in the other fund group, or when a payment from a Government agency excluded from the budget totals (off-budget Federal entities) is credited to a budgetary receipt account and appropriated therefrom. In order to avoid duplication, intragovernmental transactions (i.e., intrabudgetary transactions and receipts from Federal agencies outside the budget totals) are deducted from the aggregates of both budget authority and outlays.

PROPRIETARY RECEIPTS FROM THE PUBLIC

The individual schedules in the Appendix include as offsets only those amounts collected that are earmarked by law for use in revolving funds, or as reimbursements to appropriations or other funds. In addition to showing outlays that are net of collections credited to individual accounts, the compact budget volume generally offsets against budget authority and outlays for each agency and function the collections from the public that are market-oriented or are mainly payments for goods and services, regardless of the fund structure.

[ADMINISTRATIVE PROVISIONS]

[SEC. 101. The unexpended balance of any of the appropriations granted under the heading "Salaries, Officers and Employees" for fiscal year 1977 shall be available to the Secretary of the Senate to pay the increases in the compensation of officers and employees notwithstanding the limitations contained therein.]

[SEC. 102. Amounts required to be deposited in the Treasury of the United States to the credit of the Civil Service Retirement and Disability Fund under section 8344 of title 5, United States Code, with respect to any officer or employee of the Senate, including an employee in the office of a Senator, shall be paid from the contingent fund of the Senate during the fiscal year ending September 30, 1978.]

[SEC. 103. Effective October 1, 1977, the Sergeant at Arms and Doorkeeper of the Senate is authorized to dispose of used or surplus furniture and equipment by trade-in or by sale through the General Services Administration. Receipts from the sale of such furniture and equipment that has been or will be replaced in kind shall be deposited in the United States Treasury for credit to the appropriation for "Miscellaneous Items" under the heading "Contingent Expenses of the Senate". All other receipts from the sale of such furniture and equipment shall be deposited in the United States Treasury as miscellaneous receipts.]

[SEC. 104. The Secretary of the Senate is authorized to convene a Conference on Senate History, to be held in Washington, D.C. during the month of September 1978, and to expend from the contingent fund of the Senate not to exceed \$5,000 for such conference. Such expenditures are authorized for, but not limited to, honorariums (not to exceed \$100 for each speaker), transportation and per diem in lieu of subsistence expenses for guest speakers (other than Members of Congress and officers and employees of the United States), stationery and printing for programs, registration forms and proceedings, luncheon meetings, reception, and refreshments. The Secretary of the Senate is authorized to establish a reasonable registration fee for participants at the conference and all receipts therefrom shall be deposited in the United States Treasury for credit to the appropriation for fiscal year 1978 for "Miscellaneous Items" under the heading "Contingent Expenses of the Senate" to offset the costs of the luncheon meetings, reception, and refreshments.]

[SEC. 105. Effective October 1, 1976, the Secretary of the Senate and the Sergeant at Arms and Doorkeeper of the Senate are authorized to expend from the contingent fund of the Senate such sums as may be necessary, not to exceed \$1,000 during any fiscal year, to conduct orientation seminars for new Senators and members of their staffs and similar meetings. Such expenses shall be paid from the contingent fund of the Senate upon vouchers approved by the Secretary of the Senate or Sergeant at Arms and Doorkeeper of the Senate.]

[SEC. 106. Effective October 1, 1977, the first sentence of section 101 of the Legislative Branch Appropriation Act, 1976 (2 U.S.C. 61a-9a), is amended by striking out "\$5,000" and inserting in lieu thereof "\$5,500".]

[SEC. 107. (a) Effective October 1, 1977, any of the following items shall be furnished to a Senator only if such Senator requests such item and pays or agrees to reimburse the cost thereof, as determined by the Sergeant at Arms and Doorkeeper of the Senate:

- (1) Shaving mugs.
- (2) Hairbrushes and combs.
- (3) Shipping trunks.

This subsection shall not apply to any item furnished before the effective date and shall not affect the practices existing before such date with respect to any item so furnished.

(b) Moneys received in payment or reimbursement for items enumerated in subsection (a) shall be deposited in the Treasury and shall be credited to the appropriation for "Miscellaneous Items" under "Contingent Expenses of the Senate".]

[SEC. 108. (a) Section 202(i) of the Federal Legislative Salary Act of 1964 is amended by striking out the last sentence.

(b) In computing the length of continuous service for purposes of determining the eligibility of an individual under section 106 of the Legislative Branch Appropriation Act, 1963, by reason of the amendment made by subsection (a), service performed prior to the date of the enactment of this Act may be credited, except that no increase in

compensation by reason of such amendment shall take effect for any pay period beginning before October 1, 1977, and no monetary benefit by reason of such amendment shall accrue for any period before such date.]

[Sec. 109. Effective January 3, 1977, the amounts paid to the Vice President, the Majority or Minority Leader of the Senate, or the Majority or Minority Whip of the Senate as reimbursement of actual expenses incurred upon certification and documentation pursuant to the third proviso in the paragraph under the heading "EXPENSE ALLOWANCES OF THE VICE PRESIDENT, MAJORITY AND MINORITY LEADERS AND MAJORITY AND MINORITY WHIPS" in the appropriation for the Senate in the Supplemental Appropriations Act, 1977, shall not be reported as income, and the expenses so reimbursed shall not be allowed as a deduction, under the Internal Revenue Code of 1954.]

[Sec. 110. (a) Section 101 of the Supplemental Appropriations Act, 1977, is amended—

(1) by striking out "Majority Leader of the Senate and the Minority Leader of the Senate" in the first sentence and inserting in lieu thereof "Majority Leader, Minority Leader, and Secretary of the Senate"; and

(2) by striking out "Majority Leader and the Minority Leader" in the last sentence and inserting in lieu thereof "Majority Leader, Minority Leader, and Secretary of the Senate".

(b) The amendments made by subsection (a) shall take effect on August 1, 1977.]

[Sec. 111. (a) Except as provided in subsection (b), the aggregate of the gross compensation which may be paid to employees in the office of a Senator during each fiscal year under section 105(d) of the Legislative Branch Appropriation Act, 1968, as amended and modified (2 U.S.C. 61-1(d)), is increased by an amount equal to three times the amount referred to in section 105(e)(1) of such Act, as amended and modified.

(b)(1) In the case of a Senator who is the chairman or ranking minority member of any committee, or of any subcommittee that receives funding to employ staff assistance separately from the funding authority for staff of the full committee, the amount referred to in subsection (a) shall be reduced by the amount referred to in section 105(e)(1) of the Legislative Branch Appropriation Act, 1968, as amended and modified, for each such committee or subcommittee.

(2) In the case of a Senator who is authorized by a committee, a subcommittee thereof, or the chairman of a committee or subcommittee, as appropriate, to recommend or approve the appointment to the staff of such committee or subcommittee of one or more individuals for the purpose of assisting such Senator solely and directly in his duties as a member of such committee or subcommittee, the amount referred to in subsection (a) shall be reduced, for each such committee or subcommittee, by an amount equal to (A) the aggregate annual gross rates of compensation of all staff employees of that committee or subcommittee (i) whose appointment is made, approved, or recommended and (ii) whose continued employment is not disapproved by such Senator, if such employees are employed for the purpose of assisting such Senator solely and directly in his duties as a member of such committee or subcommittee thereof as the case may be, or (B) the amount referred to in section 105(e)(1) of the Legislative Branch Appropriation Act, 1968, as amended and modified, whichever is less.

(3) In the case of a Senator who is serving on more than three committees, one of the committees on which he is serving, as selected by him, shall not be taken into account for purposes of paragraphs (1) and (2). Any such Senator shall notify the Secretary of the Senate of the committee selected by him under this paragraph.

(c)(1) A Senator may designate employees in his office to assist him in connection with his membership on committees of the Senate. An employee may be designated with respect to only one committee.

(2) An employee designated by a Senator under this subsection shall be certified by him to the chairman and ranking minority member of the committee with respect to which such designation is made. Such employee shall be accorded all privileges of a professional staff member (whether permanent or investigatory) of such committee including access to all committee sessions and files, except that any such committee may restrict access to its sessions to one staff member per Senator at a time and require, if classified material is being handled or discussed, that any staff member possess the appropriate security clearance before being allowed access to such material or to discussion of it. Nothing contained in this paragraph shall be construed to prohibit a committee from adopting policies and practices with respect to the application of this subsection which are similar to the policies and practices adopted with respect to the application of section 705(c)(1) of Senate Resolution 4, 95th Congress, and section 106(c)(1) of the Supplemental Appropriations Act, 1977.

(3) A Senator shall notify the chairman and ranking minority member of a committee whenever a designation of an employee under this subsection with respect to such committee is terminated.

(d) The second sentence of section 105(d)(2) of the Legislative Branch Appropriation Act, 1968, as amended and modified, is amended—

(1) by inserting after "(i)" the following: "the salaries of three employees may be fixed at rates of not more than the rate referred to in subsection (e)(1), (ii)"; and

(2) by striking out "(ii)" and inserting in lieu thereof "(iii)". The amendments made by this subsection shall have no effect on section 6(c) of the Order of the President pro tempore issued on October 8, 1976, under section 4 of the Federal Pay Comparability Act of 1970.

(e)(1) Section 106 of the Supplemental Appropriations Act, 1977 (other than subsection (f) thereof) is repealed.

(2) As an exercise of the rulemaking power of the Senate, section 705 of Senate Resolution 4, 95th Congress (other than subsection (h) thereof) is repealed.

(f) This section, and the amendments made by subsection (d) and the repeals made by subsection (e), shall take effect on October 1, 1977.]

[Sec. 112. (a) Section 506(a) of the Supplemental Appropriations Act, 1973 (2 U.S.C. 58(a)) is amended—

(1) by striking out paragraph (1) and inserting in lieu thereof the following:

"(1) official telegrams and long-distance telephone calls and related services;"

(2) by striking out "and" at the end of paragraph (7) and by striking out paragraph (8) and inserting in lieu thereof the following:

"(8) subject to the provisions of subsection (e), reimbursement of travel expenses incurred by the Senator and employees in his office; and

"(9) reimbursement to each Senator for such other official expenses as the Senator determines are necessary (not including official office expenses incurred in his State, but including actual transportation expenses incurred by the Senator and employees in his office in the performance of official business in the metropolitan area of Washington, District of Columbia, or, in the case of employees assigned to an office of the Senator in his home State, incurred by such employees in the performance of official business in the general vicinity of the office to which assigned), but only to the extent such expenses do not exceed for any calendar year ten percent of the total amount of expenses authorized to be paid to or on behalf of such Senator under this section for such calendar year."; and

(3) by striking out the last sentence thereof and inserting in lieu thereof the following: "Reimbursement to a Senator and his employees under this section shall be made only upon presentation of itemized vouchers for expenses incurred and, in the case of expenses reimbursed under paragraph (9), only upon presentation of detailed itemized vouchers for such expenses. The reports of the Secretary of the Senate under section 105 of the Legislative Branch Appropriation Act, 1965 (2 U.S.C. 104a) shall contain a separate section setting forth, in detail, all expenses reimbursed under paragraph (9) to each Senator. No reimbursement shall be made under paragraph (5) or (9) for any expense incurred for entertainment or meals."

(b) Section 506(b)(1) of such Act is amended to read as follows:

"(1) Except as otherwise provided in paragraph (2) of this subsection, the total amount of expenses authorized to be paid to or on behalf of a Senator under this section shall not exceed for calendar year 1977 or any calendar year thereafter an amount equal to one-half of the sum of the amounts authorized to be paid under this section on the day before the date of the enactment of the Legislative Branch Appropriation Act, 1978, to or on behalf of both of the Senators from the State which he represents, increased by an amount equal to ten percent thereof and rounded to the next higher multiple of \$1,000."

(c) Section 506(e) of such Act is amended to read as follows:

"(e) A Senator and the employees in his office shall be reimbursed under this section only for actual transportation expenses and per diem expenses (but not exceeding actual travel expenses) incurred by the Senator or employee while traveling on official business within the United States. In the case of an employee, reimbursement shall be made only for trips which begin and end in Washington, District of Columbia, or, in the case of an employee assigned to an office of a Senator in the Senator's home State, on trips which begin and end at the place where such office is located. However, a Senator or an employee in the office of a Senator shall not be reimbursed for any per diem expenses or actual travel expenses (other than actual transportation expenses) for any travel occurring during the sixty days immediately before the date of any primary or general election (whether regular, special, or runoff) in which the Senator is a candidate for public office (within the meaning of section 301(b) of the Federal Election Campaign Act of 1971), unless his candidacy in such election is uncontested. Reimbursement of per diem expenses under this subsection shall be at the rates in effect under section

5702 of title 5, United States Code, for employees of agencies. For purposes of this subsection and subsection (a)(8), an employee in the Office of the Majority Leader, Minority Leader, Majority Whip, or Minority Whip shall be considered to be an employee in the office of the Senator holding such Office."

(d) Section 3(c)(2) under the heading "Administrative Provisions" in the appropriation for the Senate in the Legislative Branch Appropriation Act, 1975 (2 U.S.C. 59(c)(2)) is amended by striking out "\$20,500" and inserting in lieu thereof "\$22,550", and by striking out "\$500" and inserting in lieu thereof "\$550".

(e) The seventh paragraph under the heading "Administrative Provisions" in the appropriation for the Senate in the Legislative Branch Appropriation Act, 1957 (2 U.S.C. 68b) is amended by adding at the end thereof the following: "This paragraph shall not apply with respect to per diem or actual travel expenses incurred by Senators and employees in the office of a Senator which are reimbursed under section 506 of the Supplemental Appropriations Act, 1973 (2 U.S.C. 58)."

(f) The amendments made by subsections (a), (c), (d), and (e) shall take effect on the date of the enactment of this Act. The amendment made by subsection (b) shall take effect as of January 1, 1977.

(g) Effective as of January 1, 1977, the Sergeant at Arms and Doorkeeper of the Senate shall, at the request of a Senator, furnish not more than two Wide Area Telephone Service (WATS) lines to that Senator, the cost of which shall be paid out of the contingent fund of the Senate.]

[Sec. 113. (a) The Sergeant at Arms of the Senate shall provide for a one-year trial installation of a telecommunication device for use by Senators and members of their staffs to receive communications from deaf persons and persons with speech impairments through the use of a device with keyboard sending capacity.

(b) The printed copy produced by any communication from a deaf person or a person with a speech impairment which is received by the device installed under this section shall be transmitted to the Senator designated in such communication.

(c) The device installed under this section shall have keyboard sending capacity to permit the Senator who receives a communication under subsection (b) to reply to the person sending such communication through the use of such device.

(d) The Sergeant at Arms of the Senate shall establish such procedures as may be necessary to carry out the provisions of this section.

(e) Expenses incurred in carrying out this section shall be paid out of the contingent fund of the Senate upon vouchers approved by the Sergeant at Arms of the Senate.]

[Sec. 114. Notwithstanding any other provision of law, appropriated funds are available for payment to an individual of pay from more than one position, each of which is in the office of a Senator and the pay for which is disbursed by the Secretary of the Senate, if the aggregate gross pay from those positions does not exceed the amount specified in section 105(d)(2)(ii) of the Legislative Appropriations Act of 1968, as amended and modified.] (Congressional Operations Appropriation Act, 1978.)

WEST CENTRAL FRONT OF THE CAPITOL

The Architect of the Capitol is authorized and directed (1) to conduct a study of the utilization of space in the United States Capitol for the purpose of recommending and reporting to the Speaker of the House of Representatives and the President of the Senate and to the Committees on Appropriations of both Houses, and the Senate Committee on Rules and Administration, those offices which, by virtue of the functions performed therein, should be located in the Capitol and those offices which could be relocated to the House and Senate Office Buildings and Annexes; (2) to prepare drawings and specifications for restoration of the West Central Front of the United States Capitol in accordance with each of the various plans and alternatives proposed to the Committees on Appropriations during hearings on Legislative Branch Appropriations for 1978; and (3) to prepare drawings and specifications for extension of the West Central Front of the United States Capitol in accordance with the modified plan for extension of the West Central Front approved by the Commission for Extension of the United States Capitol on April 7, 1977; the drawings and specifications to be prepared in such detail as will enable the cost of such restoration proposals and extension

proposal to be ascertained. The unexpended balance of appropriations heretofore appropriated under the heading, "EXTENSION OF THE CAPITOL" shall be transferred immediately upon approval of this Act to a Commission on the West Central Front of the United States Capitol which shall be composed of the following: The Vice President of the United States, who shall be the Chairman, the Speaker of the House of Representatives, the Majority and Minority Leaders of the House of Representatives, and the Majority and Minority Leaders of the Senate. Such unexpended balances shall be available for (1) the conduct of such study and (2) the preparation of such drawings and specifications under the direction of the Commission on the West Central Front of the United States Capitol. The drawings and specifications shall be completed by March 1, 1978, and submitted for the approval of the Committees on Appropriations of the Senate and House of Representatives and the Commission on the West Central Front of the United States Capitol prior to the issuance of invitations to bid on the restoration or extension of the West Central Front of the United States Capitol. [Legislative Branch Appropriation Act, 1978.]

LIBRARY OF CONGRESS

The Library of Congress, established in 1800, is not only the library of the Congress itself, but is also the principal general library of the Government of the United States. Its collections are comprehensive and varied, and include outstanding collections of books, periodicals, newspapers, documents of the national governments of the world, literature in the Oriental languages, et cetera, and manuscripts, maps, music, motion picture films, sound recordings, prints, and photographs. In addition to maintenance of the collections and the rendering of the general and basic services connected therewith, including the Congressional Research Service, certain specialized functions are performed: registration of copyrights, catalog card distribution, and the service of the books in raised characters and talking books to the blind and physically handicapped. In terms of these broad fields of activity, comparative obligations (including only those chargeable to annual appropriations) for 1977 and estimated for 1978 and 1979 are, as follows:

The Library's first obligation is to the Congress; the second, to other agencies of the Government; and the third, to other libraries, scholars, investigators, and the general public.

In addition to funds appropriated annually by Congress, there are also available a number of gift and trust funds and working funds.

Estimates for the physical equipment, maintenance, and operation of those Library buildings located on Capitol Hill are carried under the request of the Architect of the Capitol.

1. *Purchase of books and library materials.*—The Library's collections are developed through purchase, gift, exchange, copyright deposit, and transfer and official deposit; and materials are selected for addition to the permanent collections. The objective for 1979 is continued improvement in acquisition coverage and procedures. The collections totaled 73,034,967 items as of September 30, 1977, and consisted of 18,596,294 books and pamphlets; 32,239,109 manuscript pieces and 22,199,564 maps, pieces of music, reels of microfilm, photographs and other miscellaneous items. In 1977, 1,229,470 items were added to the permanent collections and 116,416 items were withdrawn. Pieces received from various sources in 1977 and estimates for 1978 and 1979 are as follows:

¹ WPA collections of papers received—approximately 800,000 pieces.

a. *Purchase of books for the general collections.*—Library materials, both current and noncurrent, in all subject fields except in the fields of law, clinical medicine, or technical agriculture are purchased. Although materials acquired through purchase generally amount to only a limited portion of the total number of pieces received annually, they are materials which are not generally or readily available to the Library of Congress from any other source and thus must be purchased to insure completeness of the collections. The National Program for Acquisitions and Cataloging is designed to acquire, catalog, and disseminate cataloging data on a timely basis for all

current monographic works of research value to meet the needs of American libraries. Purchases of monographs under this program are included under this heading. The objectives for 1979 are to: (1) continue procurement of important research materials to insure the continuous and comprehensive development of the Library's collections thereby maintaining their national preeminence; (2) continue the purchase of important foreign commercial books, newspapers, and periodicals; (3) continue the extensive procurement of essential research materials from areas critical to the U.S. foreign relations, particularly from Eastern Europe, Asia, and Latin America; (4) continue to strengthen the Library's current acquisitions in the rapidly expanding fields of science and technology; (5) acquire highly selective, important, noncurrent materials needed to provide better service to Congress; (6) increase the usefulness to current research of the subject collections; and (7) extend the coverage of European materials and the intensification of coverage in Latin America.

b. *Purchase of books for the Law Library.*—Law books published in the regular domestic trade (except for copyright deposits) and many foreign and international law books published in countries throughout the world are purchased. The legal publications acquired by purchase constitute the most important part of the Law Library's acquisition, although a substantial part of the annual receipts is received by means other than purchase. The special objectives for 1979 are to: (1) continue the procurement of certain current domestic and foreign legal materials where the expeditious receipt and filing of current supplements, revisions, and other upkeep services is essential; (2) improve the current and retrospective coverage of important Hispanic, African, Middle Eastern, and South Asian sources; (3) continue the procurement of both current and noncurrent materials needed to strengthen the Law Library's already comprehensive holdings of critical areas in Eastern Europe, Asia, and Africa; (4) continue the acquisition of reprints, microforms, and photoduplicates of important research items, especially those from critical areas, which are no longer obtainable in the original; and (5) replace hard-bound copies of monographs and serials.

2. *Preparation of books and library materials for use.*—Library materials are cataloged for ready retrieval and are classified for systematic arrangement on the shelves of the collection. Card catalogs are maintained. Issues of serial publications are identified and recorded. Cataloging data is converted to machine-readable form for use by the Library of Congress, other libraries, and cataloging service agencies. Systems of subject headings and classification are continuously developed for the Library's needs and for the nationwide library community. The National Program for Acquisitions and Cataloging is designed to acquire, catalog, and disseminate cataloging data on a timely basis for all current monographic works of research value to meet the needs of American libraries. Preparation of books and library materials for use under this program are included under this heading.

Objectives in these activities for 1979 are to continue reductions in backlogs of cataloging and catalog management operations, to continue the development of the machine-readable cataloging data base, and to extend coverage of NPAC shared cataloging coverage of European materials and the intensification of coverage in Latin America.

Selected performance data for 1977 and estimates for 1978 and 1979 (not including processing activities per-

formed by the Research Department, Reader Services Department and Law Library) are as follows:

Description	1977 actual	1978 estimate	1979 estimate
Titles cataloged for printed cards.....	224,455	245,000	245,000
Titles classified and subject headed.....	231,091	235,000	235,000

Cards received by the National Union Catalog.....	4,999,779	5,000,000	5,000,000

3. *Cataloging distribution service.*—The Cataloging Distribution Service sells copies of the Library's printed catalog cards, cataloging data in machine-readable form, book catalogs, and technical publications. It maintains a stock of over 35,000,000 catalog cards representing approximately 356,300 titles which are frequently ordered. A master file containing a single, reproducible copy of each of the cards representing the approximately 6,000,000 titles which the Library has cataloged since 1898 is also maintained. Requests for cards for any of the 5,643,700 less frequently ordered titles are satisfied by duplicating (through offset, photographic, or electrostatic means) the copy of the card kept in master file. Receipts of \$6,692,768 were deposited in miscellaneous receipts of the Treasury in fiscal 1977. The objectives for 1979 are to: (1) meet the continuing demand for cataloging data and maintaining a reasonable level of service and economy; (2) continue development of the National Union Catalog as the country's major bibliographic and locational tool; (3) develop other technical publications; (4) use new technology to improve service; and (5) increase efficiency and reduce cost.

a. *Catalog services for the Library of Congress.*—The number of cards supplied to the Library of Congress in fiscal 1977 was 25,600,000; estimated for 1978, 25,000,000; and estimated for 1979, 25,000,000.

b. *Sale of catalog services to other institutions.*—The preparation, printing, and distribution of publications related to cataloging are an integral part of the cataloging activities of the Library of Congress and include Classification Schedules, lists of Subject Headings, Catalog Service bulletins, and similar publications. Other publications include the National Union Catalog, a cumulative author list, which is issued monthly and cumulated quarterly and annually; Films and Other Materials for Projection (quarterly with an annual cumulation); Music, Books on Music and Sound Recordings (semiannual with annual cumulation); Register of Additional Locations; Monographic Series; Subject Cataloging; and New Serial Titles.

4. *Research and reader services.*—Books and other library materials are provided internally and outside the Library, reference and bibliographic assistance is rendered, and custody of the collections is maintained. The objective of this activity for 1979 is to continue to organize more material for use, to make it available to readers more readily, and to improve reference, bibliographic, and circulation services. The workload in major activities is expected to increase in 1978 and 1979 as follows:

5. *Automated systems support.*—Planning and implementation of provision of automated data processing on a centralized basis for all departments are provided. Investigations, experiments, and feasibility studies to find suitable solutions are undertaken. Compatibility among individual components of administrative and bibliographic systems in the Library and, as far as practical, throughout the national and international library communities, is sought. Through the Congressional Research Service, information services to the Congress are provided. The Machine-Readable Cataloging Development Office controls the development and implementation of machine systems for creating, organizing, processing, and disseminating machine-readable cataloging data. The Computer Center operates and controls computer and related equipment, including the central computer facility. The objectives for 1979 are to: (1) continue progress toward the goal of a fully automated machine-readable cataloging service; (2) expand automated data processing service to Congress; (3) develop new computer applications while improving reliability and performance of existing programs; and (4) expand computer power to provide additional disk and other mass storage devices, increase the number of terminals, and accommodate the use of outside data bases.

6. *Preservation of library materials.*—Library materials are preserved in their original format by being bound or rebound, or by a variety of conservation/restoration techniques. Materials are also preserved by converting them to a more durable form through such means as the micro-filming of books and newspapers, by conversion of nitrate film to a safety base film, and by the conversion of deteriorating sound recordings to polyester tape. In addition, the Library conducts basic research into the many unsolved preservation problems encountered in dealing with millions of deteriorating books and other materials in the Library of Congress collections as well as in the other research libraries of the Nation.

8. *American Folklife Center.*—This activity was authorized by Public Law 94-201, which established in the Library of Congress an American Folklife Center to preserve and present American folklife. The board of trustees gives policy direction to the Center, which is administered by a director appointed by the Librarian.

The Center serves as a coordinating body with the many existing programs in the public and private sectors, including the granting programs under the National Endowments for the Arts and Humanities, the folklife programming of the Smithsonian Institution, and others. The program of the Center also gives focus to other activities of the Library of Congress in this area.

9. *American Television and Radio Archives.*—Section 113 in the Transitional and Supplementary Provisions of Public Law 94-553 establishes the American Television and Radio Archives Act under 2 U.S.C. 170 which requires that the Librarian establish and maintain within the Library a facility to be known as the American Television and Radio Archives for the purpose of acquiring for its permanent collection American television and radio programs. The objective of this program is to collect unedited American television and radio programming from the national networks and the Public Broadcasting System, and selectively from other producers; make such additions available to the research and scholarly community; and prepare for the use of historians and scholars appropriate bibliographic data, including published catalogs and indexes.

10. *Madison Building occupancy related expenses.*—The James Madison Memorial Building (JMMD) is scheduled for occupancy in fiscal year 1979 with movement of staff and collections into the building according to a sequenced schedule. The protection of the facility and staff assigned to it, the maintenance and cleaning of occupied interior space and the exterior public area, the transfer of staff and collections to the JMMD from other areas, and the communications support including mail, telephone, and messenger services are included in this program.

The Copyright Office is responsible for recording copyright claims, assignments, and renewals, for supplying copyright information to the public, for collecting and accounting for copyright fees, and for printing complete and indexed catalogs for each class of copyright entries. The Office is conducted for the most part on a self-sustaining basis. The amount requested is substantially counterbalanced by fees received for services rendered and the value of books and other library materials deposited in accordance with the Copyright Act and transferred to the Library of Congress. The income and obligations for 1977, and estimates for 1978 and 1979 are as follows:

	1977 actual	1978 estimate	1979 estimate
Income:			
Fees applied.....	\$2,758,256	\$4,558,772	\$5,403,967

Total obligations.....	9,562,336	11,561,000	12,661,000

The effort described under each of the activities are predicated on an estimated 522,668 copyright registrations during 1979, an estimated 488,475 during 1978, and registrations of 437,361 during 1977.

The general revision of the Copyright Law, title 17 of the U.S. Code, was signed by the President in October 1976 to be effective January 1, 1978. The purpose of the legislation is to bring the law into line with the sweeping advances in fields of technology that are closely related to copyright. These include cable television; satellite communications; instructional broadcasting and other automated devices for teaching; public broadcasting; computers and automated information networks; videotapes; tape cassettes, disc recording and cartridges; and the whole range of devices for reprographic reproduction, notably photocopying and microforms. The effects of the new law on Copyright Office policies and procedures will be manifold. Under the royalty provisions the Office will be responsible for the issuance of annual licenses for jukeboxes and the collection of royalties for the performance of copyrighted works on cable television. The legislation also provides for a substantial expansion in the kinds of materials which will be registered, a change in the term of copyright to life of the author plus 50 years and an increase in the fee schedule.

1. *Receiving and accounting for applications, fees, and correspondence.*—Materials received by the Copyright Office are assembled and routed; accounts are maintained for all moneys received; records relating to the registration of copyrights are filed; and materials are deposited in accordance with the Copyright Act. Performance data for 1977 and estimates for 1978 and 1979 are as follows:

	1977 actual	1978 estimate	1979 estimate
Registrations.....	452,707	488,475	522,668
Mail received and dispatched.....	1,264,658	1,353,195	1,447,918

2. *Examining copyright applications.*—All applications and deposits are examined before issuance of registration certificates or recordings of documents to determine whether the provisions of the Copyright Act have been satisfied. Performance data are as follows:

	1977 actual	1978 estimate	1979 estimate
Cases and documents examined.....	472,707	505,796	541,201
Registrations and recordation of documents.....	462,168	494,519	529,135
Letters written.....	78,965	84,492	90,406

3. *Indexing and cataloging materials received.*—The Register of Copyrights is required to print complete and indexed catalogs of all items registered. The catalog entries prepared by the Copyright Office are made available in part to the Library for its general operations. There were 501,072 items on hand and received during 1977, of which 469,000 were cataloged, leaving a balance at the end of the year of 32,072. It is estimated that for 1978 and 1979, the number of items to be cataloged will be 501,830 and 536,950, respectively.

4. *Reference services.*—The Copyright Office makes available to the public information concerning the provisions of the Copyright Act, including procedures, policies, and rulings. Information concerning registrations is furnished on a fee basis. Obtaining compliance with registration requirements is also part of this activity. Performance data are as follows:

	1977 actual	1978 estimate	1979 estimate
Titles searched.....	168,300	185,130	198,089
Letters and search reports written.....	57,160	61,161	65,442

5. *Printing the catalog of copyright entries and bulletins of decisions.*—Catalogs for each class of copyright entries and bulletins of copyright decisions are printed and made available to the public.

7. *General supervision and legal services.*—The work of the Copyright Office includes legal supervision and research into the present copyright law and international copyright relations. It also involves a study of improvement of the domestic law and our international copyright relations.

The National Commission on New Technological Uses of Copyrighted Works was created to compile and study data on (1) the reproduction and use of copyrighted works by various forms of machine reproduction, and (2) the creation of new works by the use of automated systems or machine reproduction. The Commission was charged with making recommendations as to changes in copyright law to further protect the rights of copyright owners and to assure access to copyrighted works. The Commission originally was to submit its final report on December 31, 1977, and to terminate at the end of February 1978. Public Law 95-146, October 28, 1977, extended the due date for the report to July 31, 1978, with a new termination date of September 30, 1978. Its activities in August and September 1978 will be limited to administratively arranging this termination.

1. *Policy analysis and research.*—The Congressional Research Service provides objective, nonpartisan analytical and consultative services to the Members and committees of Congress, assisting them in the analysis, appraisal, and evaluation of any subject matter of legislative concern, including recommendations submitted to the Congress by the executive branch. Research services are also

provided to assist Congress with its oversight, representative, and other responsibilities. Support comes in the form of background studies, in-depth policy analyses, consultations and briefings, legal research, continuous liaison with committees, outside contracts, assistance with committee hearings, public policy seminars for Members and congressional staff, and related data and materials. Lists of subjects and policy areas that a committee might profitably pursue are periodically made available to each congressional committee. These services are directed toward assisting Members and committees in determining the advisability of enacting legislative proposals, in estimating the probable results of such proposals and of alternatives to them, and in evaluating methods for accomplishing the results sought. As provided by statute, the Service prepares decennial revised editions of the Constitution of the United States—Analysis and Interpretation, as well as cumulative supplements at 2-year intervals, prepares compendiums for the annual national high school and college debate topics, and provides assistance to the Congressional Budget Office and the Office of Technology Assessment.

2. *Documentation and status of legislation.*—The Service periodically prepares and publishes for distribution to Members and committees the Digest of Public General Bills and Resolutions, which includes summaries of all public bills and resolutions introduced in Congress, the status of bills receiving action, and various pertinent indexes. The Service compiles factual descriptions of House bills and resolutions which are forwarded for publication in the Congressional Record. The Service also makes available current and periodic reports that provide background and status information on major legislative issues before the Congress. Upon request, the Service provides Members and committees with legislative history memorandums on bills for which hearings have been announced, and compiles and makes available to each committee reports on legislatively authorized programs and activities within that committee's jurisdiction that are scheduled to terminate during the current Congress.

3. *Information and reference services.*—The Congressional Research Service provides extensive information and reference assistance to Members and committees. Reference files containing clippings, pamphlets, and documents and automated information services are maintained for rapid information retrieval. Lists of selected reports, prepared by CRS staff on legislative issues, are regularly distributed to congressional offices. To provide faster responses and in-person services, the Service also maintains reference centers in congressional office buildings and the Congressional Reading Room.

The Division for the Blind and Physically Handicapped is responsible for administering a national program to provide reading material for blind and physically handicapped residents of the United States and its outlying areas and for U.S. citizens residing abroad.

1. *Direct service to users.*—During the past 5-year period, 1973-77, the number of blind and physically handicapped readers throughout the country has grown from over 391,000 to over 642,000, and circulation from approximately 10,997,000 units (volumes, containers, and reels) to about 16,410,000. The number of readers and circulation are expected to continue to increase in 1978 and 1979

at approximately the same rate as in the past 5 years. To serve these users the Division procures books in embossed characters, recorded books with their associated reproducers and catalogs and publications of material available. The books and reproducers are distributed through 56 regional libraries and over 150 other cooperating libraries and agencies which assume responsibility for their custody and circulation. Music materials are circulated directly from the Division. Direct service is also furnished Americans living abroad. Multistate centers function as decentralized materials-support units working under contract with the Division. The scope of the procurement activities is shown in the following table:

2. *Support services.*—A variety of professional, technical, and clerical functions are performed by the Division's staff. A combined total of 35,500 requests for interlibrary loan requests and inquiries concerning library and related services available to the blind and to other physically handicapped persons were received in 1977, and 7,950 copyright permissions were cleared. These levels are expected to increase during 1978 and 1979. Training is provided individuals throughout the nation interested in transcribing or proofreading braille, and during fiscal 1977 over 460 individuals were certified; it is anticipated that this level will continue during 1978 and 1979. The Division maintains the national collections of braille and recorded books to supplement titles deposited in libraries across the country. Books are transcribed in braille and tape recorded by volunteers throughout the country.

Bibliographic records are being recataloged to assure consistency with the National Union Catalog. Efforts to improve the quality of service at a reasonable cost are directed through a research, development, testing, and evaluation program. Trips are made to monitor contracts, provide guidance to the cooperating libraries, interact at professional associations, and respond to other administrative requirements. The following table reflects the scope of some support activities:

Objectives for 1979.—Based on an average growth in readership during the latest 5-year period for which verified statistics are available, a 16% increase in users is anticipated in 1979. To provide for this increase the budget objectives are as follows: to provide sound

reproducer equipment to meet reader requirements; to produce braille and recorded books in a variety to meet minimum reader requirements; to develop and implement appropriate quality control standards for all aspects of material and service provisions; to expand the availability of reading materials and reduce duplication of effort through encouragement of programs in other libraries and agencies and through effective exchange of materials and information; and to provide support to existing network libraries serving blind and physically handicapped readers and to arrange with such other non-profit libraries, agencies, or organizations to serve as local or regional centers in the national network.

Under authority originally granted in section 104(n) of Public Law 85-931 (new section 104(b)(5) of the Food for Peace Act of 1966) the Librarian of Congress may use foreign currencies to provide information of technical, scientific, cultural, or educational significance to the United States through the collection of foreign library materials and the distribution of copies thereof to libraries and research centers in the United States. The program is being carried on in four countries in 1978: Egypt, India, Nepal, and Pakistan. Of the total amount requested in 1979, \$3,603,500 will be paid in foreign currencies, while \$256,600 will provide U.S. dollar support.

1. *Acquisition of books and other library materials.*—Based upon the requirements of other Federal agencies and certain research libraries in the United States, publications and other library materials will be purchased in multiple copies from four countries and distributed to selected libraries and research centers in the United States, including the Library of Congress.

2. *Program support (U.S. dollars).*—U.S. dollars are required to pay certain expenses which cannot be paid by foreign currencies, such as salaries of the coordinating staff at the Library of Congress, shared administrative support provided by the Department of State, travel in some instances, and equipment and supplies which cannot be procured abroad.

The Oliver Wendell Holmes devise fund and the permanent committee for the Oliver Wendell Holmes devise to administer it were created by an act of Congress, approved August 5, 1955 (69 Stat. 533). The Committee consists of four members appointed by the President and the Librarian of Congress, who is chairman. The Committee was (1) to have prepared a history of the Supreme Court of the United States, and, if deemed advisable, (2) to finance an annual lecture or series of lectures, and (3) to publish a memorial volume of Justice Holmes' writings. The principal and interest on the fund are available for these purposes.

The current program is devoted primarily to the preparation of a History of the Supreme Court of the United States, of which the first two volumes were published by the Macmillan Co. in 1972. A third volume was published in August 1974, and additional volumes are nearing completion. The editor-in-chief has now retired from teaching duties at the Harvard Law School and will be able to devote himself to the history. The annual lecture series financed by this fund has been discontinued at least temporarily, because the Committee felt it desirable to conserve remaining funds.

This schedule covers (1) funds received as gifts for immediate expenditure and receipts from the sale of recordings and photoduplication materials financed from capital originally received as gifts, (2) income from investments held by or for the Library of Congress Trust Fund Board, and (3) interest paid by the Treasury on the principal funds deposited therewith as described under "Library of Congress Trust Fund, Principal Accounts," at a rate which is 0.25 percentage points less than a rate determined by the Secretary of the Treasury, taking into consideration the current average market yield on outstanding long-term marketable obligations of the United States, adjusted to the nearest one-eighth of 1% or the rate of 4% per annum, whichever is higher (2 U.S.C. 156-160; 31 U.S.C. 725s; 37 Stat. 319; Public Law 94-289; Public Law 94-290).

1. *Acquisition of library materials.*—During 1977, this included the procurement of manuscripts, Hispanic materials, fine prints, rare books and other library materials for the Library of Congress, and the acquisition and distribution of Government documents for the Library of Congress and cooperating libraries. The Library expects these activities to continue in fiscal years 1978 and 1979.

2. *Reader and reference services.*—These services during 1977 included the preparation of bibliographies, indexes, digests, and checklists; lectures, surveys of bibliographic services; poetry readings; musical concerts; furtherance of musical research, composition, performance and appreciation; and providing photostats, photographs, microfilm, and other forms of photoduplication, and sound recordings of folksongs, and poetry to other Government agencies, libraries and other institutions, and to the general public; and distribution of recordings of the Library's literary programs and concerts to radio stations for public service broadcasts. The Library expects these activities to continue in fiscal years 1978 and 1979.

3. *Organization and control of the collections.*—In February 1967, the Library of Congress began the largest single bibliographical project in its history, the publication of the pre-1956 National Union Catalog. It is expected that the project will be completed in 12 years, and that the published catalog will comprise over 600 volumes. Over 460 volumes have been published. The preparation of the 19th full edition of the Dewey Decimal Classification, begun during 1972, continues.

This schedule includes three principal accounts—permanent loan, public debt securities, and bequest of Gertrude M. Hubbard.

Both the permanent loan and the Hubbard funds represent gifts or bequests in cash, which have been deposited with the Treasurer of the United States, the interest upon which is available to the Librarian for the purposes specified in each case. Public Laws 94-289 and 94-290 (signed May 22, 1976) provide interest at "a rate which is the higher of the rate of 4 per centum per annum or a rate which is 0.25 percentage points less than a rate determined by the Secretary of the Treasury, taking into consideration the current average market yield on outstanding long-term marketable obligations of the United States, adjusted to the nearest one-eighth of 1 per centum". The public debt securities funds represent gifts or bequests in cash which have been invested in public debt securities of the United States in order to obtain a better return on the principal.

As of September 30, 1977, the principal in the permanent loan account, which shall not exceed the sum of \$10 million (2 U.S.C. 158; 31 U.S.C. 725s; Public Law 87-522), was distributed as follows:

Music activities.....	\$2,562,812
American history.....	26,330
Poetry and literature.....	958,167
Miscellaneous purposes.....	319,379
Total permanent loan principal.....	3,866,688

During fiscal year 1975, the Library removed some of the principal from the permanent loan and invested that principal in long-term U.S. public debt securities which mature on May 15, 1999, and are paying interest at a rate of 8.5%. As of September 30, 1977, the principal in the public debt securities was distributed as follows:

Music activities.....	\$148,142
Fine arts.....	396,558
American history.....	307,040
Hispanic activities.....	211,315
Poetry and literature.....	50,073

ADMINISTRATIVE PROVISIONS

In addition to those Administrative Provisions found in Title 2, United States Code, Sections 131-170, there are the following:

SEC. 201. Appropriations in this Act available to the Library of Congress for salaries shall be available for expenses of personnel security and suitability investigations of Library employees; special and temporary services (including employees engaged by day or hour or in piecework); and services as authorized by 5 U.S.C. 3109.

[SEC. 202. Not to exceed fifteen positions in the Library of Congress may be exempt from the provisions of appropriation acts concerning the employment of aliens during the current fiscal year, but the Librarian shall not make any appointment to any such position until he has ascertained that he cannot secure for such appointments a person in any of the categories specified in such provisions who possesses the special qualifications for the particular position and also otherwise meets the general requirements for employment in the Library of Congress.]

SEC. [203] 202. Funds available to the Library of Congress may be expended [to reimburse the Department of State for medical services rendered to employees of the Library of Congress stationed abroad and] for contracting on behalf of and hiring alien employees for the Library of Congress under compensation plans comparable to those authorized by section 444 of the Foreign Service Act of 1946, as amended (22 U.S.C. 889(a)); [for purchase or hire of passenger motor vehicles; for payment of travel, storage and transportation of household goods, and transportation and per diem expenses for families en route (not to exceed twenty-four);] for benefits comparable to those payable under sections 911(9), 911(11), and 941 of the Foreign Service Act of 1946, as amended (22 U.S.C. 1136(9), 1136(11), and 1156, respectively); and travel benefits comparable with those which are now or hereafter may be granted single employees of the Agency for International Development, including single Foreign Service personnel assigned to A.I.D. projects, by the Administrator of the Agency for International Development—or his designee—under the authority of section 636(b) of the Foreign Assistance Act of 1961 (Public Law 87-195, 22 U.S.C. 2396(b)); subject to such rules and regulations as may be issued by the Librarian of Congress.

SEC. [204] 203. Payments in advance for subscriptions or other charges for bibliographical data, publications, materials in any other form, and services may be made by the Librarian of Congress whenever he determines it to be more prompt, efficient, or econom-

ical to do so in the interest of carrying out required Library programs.

SEC. [205] 204. Appropriations in this Act available to the Library of Congress shall be available, in an amount not to exceed [\$99,600,] \$173,300, of which \$86,400 is for the Congressional Research Service, when specifically authorized by the Librarian, for expenses of attendance at meetings concerned with the function or activity for which the appropriation is made.

SEC. [206] 205. Funds available to the Library of Congress may be expended to provide additional parking facilities for Library of Congress employees in an area or areas in the District of Columbia outside the limits of the Library of Congress grounds, and to provide for transportation of such employees to and from such area or areas and the Library of Congress grounds without regard to the limitations imposed by 31 U.S.C. 638a (c) (2).

SEC. [207] 206. The [Disbursing Officer of the Library of Congress is authorized to disburse funds appropriated for the Congressional Budget Office, and the Library of Congress shall provide financial management support to the Congressional Budget Office as may be required and mutually agreed to by the Librarian of Congress and the Director of the Congressional Budget Office. From and after January 1, 1976, the] Library of Congress is authorized to compute and disburse the basic pay of all personnel of the Congressional Budget Office pursuant to the provisions of section 5504 of Title 5 of the United States Code, except the Director, who as head of an agency, shall have pay computed and disbursed pursuant to the provisions of section 5505 of Title 5 of the United States Code.

[All vouchers certified for payment by duly authorized certifying officers of the Library of Congress shall be supported with a certification by an officer or employee of the Congressional Budget Office duly authorized in writing by the Director of the Congressional Budget Office to certify payments from appropriations of the Congressional Budget Office. The Congressional Budget Office certifying officers shall (1) be held responsible for the existence and correctness of the facts recited in the certificate or otherwise stated on the voucher or its supporting paper and the legality of the proposed payment under the appropriation or fund involved, (2) be held responsible and accountable for the correctness of the computations of certifications made, and (3) be held accountable for and required to make good to the United States the amount of any illegal, improper, or incorrect payment resulting from any false, inaccurate, or misleading certificate made by him, as well as for any payment prohibited by law which did not represent a legal obligation under the appropriation or fund involved: *Provided*, That the Comptroller General of the United States may, at his discretion, relieve such certifying officer or employee of liability for any payment otherwise proper whenever he finds (1) that the certification was based on official records and that such certifying officer or employee did not know, and by reasonable diligence and inquiry could not have ascertained the actual facts, or (2) that the obligation was incurred in good faith, that the payment was not contrary to any statutory provision specifically prohibiting payments of the character involved, and the United States has received value for such payment: *Provided further*, That the Comptroller General shall relieve such certifying officer or employee of liability for an overpayment for transportation services made to any common carrier covered by section 66 of Title 49 of the United States Code, whenever he finds that the overpayment occurred solely because the administrative examination made prior to payment of the transportation bill did not include a verification of transportation rates, freight classifications, or land grant deduction.]

[The Disbursing Officer of the Library of Congress shall not be held accountable or responsible for any illegal, improper, or incorrect payment resulting from any false, inaccurate, or misleading certificate, the responsibility for which is imposed upon a certifying officer or employee of the Congressional Budget Office.]

SEC. [208.] 207. The Library of Congress is authorized to compute and disburse basic pay of all personnel of the Copyright Royalty Tribunal pursuant to the provisions of section 5504 of title 5 of the United States Code. (*Legislative Branch Appropriation Act, 1978.*)

The Office of the Superintendent of Documents operates under a separate appropriation which provides funds for: (1) part of the cost of the sale of certain Government publications priced in accordance with various authorities other than section 1708 of title 44 U.S. Code. General sales program costs are funded primarily from sales receipts as provided in section 1708 of title 44 of the U.S. Code; (2) the mailing for Members of Congress and other Government agencies of certain Government publications, as authorized by law; (3) the distribution of Government publications to designated depository libraries; and (4) the compilation of catalogs and indexes of Government publications. These four functions are related to the publication activity of other agencies and to the demands of the public, Members of Congress, and depository libraries. Consequently, Documents can exercise little control over the volume of work which it may be called upon to perform. A description of these four functions follows:

1. *Special sales of publications.*— Certain publications are placed on sale to the public wherein the price of the publication is not established in accordance with section 1708, title 44, but in accordance with various other authorities such as 44 U.S.C.906, 44 U.S.C. 910, and 44 U.S.C. 1504.

2. *Distribution for other Government agencies and Members of Congress.*—The Office of Superintendent of Documents maintains mailing lists and mails, at the request of Government agencies and Members of Congress, certain publications specified by public law.

3. *Depository library distribution.*—As required, Government publications are supplied to libraries which are designated as depositories for Government publications.

4. *Cataloging and indexing.*—The Office of Superintendent of Documents is charged with preparing catalogs and indexes of all publications issued by the Federal Government. The principle publication is the "Monthly Catalog of U.S. Government Publications."

The Government Printing Office executes orders for printing, binding, and blankbook work, placed by Congress and the various agencies of the Federal Government, and furnishes on order, blank paper, inks, and similar supplies. The Government Printing Office also sells publications to the public through its General and Special sales programs.

All such work is financed through the Government Printing Office revolving fund (44 U.S.C. 309). The fund is reimbursed by the customer agencies, receipts from sales of publications to the general public, and, except for the excess of receipts over costs associated with the sale of publications to the public, net operating income is retained for reuse by the fund.

The sale of publications to the public is divided into two programs. One program covers primarily the sale of those publications which by section 1708 of title 44 are offered for sale to the public by the Superintendent of Documents at a price based upon the cost as determined by the Public Printer, plus 50%. Effective in 1978, the funding of all expenses of this program is from the sales receipts. (General and administrative expenses are limited to \$25 million.) The other program covers the sale of the Congressional Record, Federal Register, Presidential Papers, et cetera, at prices which are set in accordance with other sections of the United States Code.

The General Accounting Office is responsible directly to the Congress for conducting independent reviews, audits, and investigations of programs, activities, and financial transactions of Federal agencies; for rendering legal decisions relating to Government fiscal matters; for developing principles, standards, and related requirements for Federal agency accounting systems, cooperating in developing agency systems, and approving them; for the settlement of certain claims for and against the Government; and for advising and assisting the Congress and Government agencies on matters relating to public funds.

General and special funds—Continued

SALARIES AND EXPENSES—Continued

1. *Office of the Comptroller General.*—Executive management of the General Accounting Office is carried out by the Comptroller General, who is assisted by the Deputy Comptroller General and staff.

2. *Special staff services.*—This special staff is composed of the Office of Congressional Relations and the Public Information Office, the responsibilities of which are described in the following paragraph.

The Office of Congressional Relations is the central coordination point within GAO for providing the Congress with prompt and effective assistance. The Office is under the direct supervision of the Deputy Comptroller General and is headed by a Director. The representatives from the Office maintain continuous contact with Members of Congress and committee staffs. The Public Information Office supports, with a variety of services, GAO communications with the Congress, the media, and the public.

3. *Office of the General Counsel.*—The Office of the General Counsel drafts decisions covering all phases of Government activity relating to the expenditure of public funds; provides advice concerning legal matters to executive agencies and to congressional committees and Members of Congress and their staffs; reviews all GAO audit reports for legal sufficiency; drafts legislation; prepares reports on proposed legislation; and provides all other required legal services.

4. *Management services.*—This office is responsible for making independent studies and evaluations of management problems; providing management analysis services; initiating and implementing a vigorous management improvement program within the General Accounting Office; the formulation, preparation and execution of the GAO budget for submission to Congress; establishing a centralized library system; management of space and government fiscal records; coordination, publication and distribution of manuals, reports and other documents; and furnishing general office services. This office also administers personnel management functions, including: (a) formulating and executing recruiting programs, (b) developing and carrying out training and professional career development programs, (c) executing programs for salary and wage administration and employee rights, benefits, and obligations, (d) participating in general control over staff assignments, and (e) obtaining appropriate recognition of the professional character of the accounting and auditing work of the General Accounting Office.

5. *Assistant Comptroller General for Policy, Program Planning.*—This office is responsible to the Comptroller General and Deputy Comptroller General for the operations of the Office of Policy, Office of Program Planning and Office of Internal Review. The responsibilities of each of these offices are described in the following paragraphs.

Office of Policy.—This office advises and assists the Comptroller General in policy formulation, guidance, and review with respect to all GAO functions. Also, this office develops internal auditing principles and standards for the guidance of executive agencies and coordinates the preparation of designated GAO publications.

Office of Program Planning.—This office advises and assists the Comptroller General in establishing the General Accounting Office long-range objectives and in the direction of effort and resource planning for the programs to carry out the objectives.

Office of Internal Review.—This office is responsible for examining the operations and performance of all divisions

and offices of the General Accounting Office and preparing reports for the Comptroller General and recommendations growing out of such examinations.

6. *Logistics and Communications Division.*—

7. *Procurement and Systems Acquisition Division.*—

8. *Federal Personnel and Compensation Division.*—

9. *General Government Division.*—

10. *Community and Economic Development Division.*—

11. *Human Resources Division.*—

12. *International Division.*—

These divisions, located in Washington, D.C., are responsible for the performance of the auditing and investigative functions of the General Accounting Office in the Federal departments and agencies and the District of Columbia, as assigned by the Comptroller General. These functions include the review and analysis of Government programs and activities for the purpose of determining (a) whether the funds and other resources are utilized only for the authorized programs and activities and are properly accounted for and reported, (b) whether agency resources are managed efficiently and economically, and (c) whether programs are achieving the objectives intended by the Congress in enacting legislation.

The International Division includes three overseas branches. The European branch, with headquarters in Frankfurt, Germany, is responsible for performing assigned General Accounting Office functions in the European area, including Africa, the Near East and South Asia through Pakistan. The Far East Branch, with headquarters in Honolulu, Hawaii, is responsible for performing assigned General Accounting Office functions in Hawaii and the Far East area, including Southeast Asia and South Asia through India. The Latin America Branch, with headquarters in Panama City, Panama, is responsible for performing assigned General Accounting Office functions in Central America, South America, the West Indies, the Caribbean area, and Mexico.

13. *Financial and General Management Studies Division.*—This division provides cooperative assistance to departments and agencies in the development of accounting systems and reviews, evaluates, and makes recommendations relating to approval of accounting systems. It conducts special studies or reviews agency studies of programs and activities requiring application of systems analysis, statistical sampling, or actuarial techniques. It conducts Government-wide studies of the management of automatic data processing systems and provides advice and assistance to the Congress in its area of responsibility. It performs audits for the purpose of settling the accounts of accountable officers and provides leadership in carrying out the General Accounting Office's responsibilities under sections 201, 202, and 204 of the Legislative Reorganization Act.

14. *Joint Financial Management Improvement Program.*—This office represents the General Accounting Office in the joint financial management improvement program conducted with the Office of Management and Budget, the Treasury Department, and the Civil Service Commission.

15. *Energy and Minerals Division.*—This division has audit and analysis responsibilities for those Federal agencies most directly and primarily energy and minerals related. It also has audit responsibilities for energy and minerals in related programs of all departments and agencies of the Federal Government.

16. *Program Analysis Division.*—The missions of this division are as follows:

(1) To prepare analyses having a broad perspective, particularly where economic factors are important and major program implications are involved;

(2) To provide leadership and assistance in focusing GAO's analytical resources in support of the congressional decisionmaking processes on major program issues;

(3) To improve the usefulness of and access to Federal fiscal, budgetary and program-related information for the Congress; and related activities to assist in fulfilling GAO's responsibility under title VIII of the Congressional Budget Act; and

(4) To improve the quality of evaluation studies provided to the Congress and to foster improvement in evaluation performed by Federal Departments and agencies as required by title VII of the Congressional Budget Act.

17. *Field Operations Division.*—This division, composed of a central office and regional offices in principal cities in the United States, is responsible for performing accounting, auditing, and investigative work assigned by the Washington operating divisions, and for audits of the four military finance centers and certain Government corporations and revolving funds.

18. *Claims Division.*—This division is responsible for adjudicating and settling claims by and against the United States. In settling general claims, this division also furnishes litigation assistance to the Department of Justice. To further carry out its basic audit responsibility, this division evaluates and reports on the claims settlement and debt collection of Government agencies and assists in improving their effectiveness in these activities.

19. *Assistant Comptroller General for Special Programs.*—This office was responsible to the Comptroller General and Deputy Comptroller General for the operations of the Energy and Minerals Division and the Program Analysis Division. These divisions assumed responsibility for their own missions in 1976.

The U.S. Tax Court hears and decides cases involving Federal income, estate and gift tax deficiencies and renders declaratory judgments regarding the qualification or continuing qualification of retirement plans under the provisions of Public Law 93-406, known as the Employee Retirement Income Security Act of 1974.

The Tax Court has also been given jurisdiction under Public Law 94-455 (Tax Reform Act of 1976) to render declaratory judgments with respect to (1) exempt organization status determinations pursuant to section 501(c)(3), Internal Revenue Code and (2) determinations made pursuant to section 367 (transfers of property from the United States). In addition, the court has jurisdiction over actions to restrain disclosure and to obtain additional disclosure with respect to public inspection of written determinations issued by the Internal Revenue Service,

and actions to compel the disclosure of the identity of third-party contacts relating to written determinations made by the Internal Revenue Service.

For 1979, the court proposes a trial program of 354 weeks consisting of 264 weeks of regular trial sessions and 90 weeks of small tax case sessions. Trials are held in approximately 116 cities throughout the United States.

The actual and estimated work volume of the court is presented in the following tabulation:

For 1972, the U.S. Tax Court received an initial appropriation in the amount of \$18,712 thousand, and for 1973 and 1975 supplemental appropriations in the amounts of \$1,916 thousand and \$2 million respectively, to provide for the construction of a court building to be located within the District of Columbia. The Tax Court is a court of national jurisdiction with headquarters in Washington, D.C., and conducts trial sessions throughout the United States. The new building provides adequate housing and courtroom facilities for the judges, special trial judges, and all support personnel.

Ground was broken on July 31, 1972, and the new quarters were occupied in January 1975. Phase II of the building project, the plaza across Interstate 95, will be completed in 1978.

This fund, established under 26 U.S.C. 7448, is used to pay survivorship benefits to eligible widows and dependent children of deceased judges of the U.S. Tax Court. Participating judges pay 3% of their salaries or retired pay into the fund to cover creditable service for which payment is required. Additional funds as are needed are provided through the annual appropriation to the U.S. Tax Court.

On September 30, 1977, 17 judges of the court were participating in the fund, and four eligible widows were receiving survivorship annuity payments.

The Commission on Security and Cooperation in Europe was created to monitor compliance with that code of conduct, particularly in regard to what is called "Basket Three" of the Final Act, the Provisions on Cooperation in Humanitarian and Other Fields. The law establishing the Commission on Security and Cooperation in Europe also mandated it to monitor and encourage U.S. Government and private activities designed to expand East-West trade and the exchange of people and ideas. The Commission will receive semiannual reports from the President on the signatories' compliance with the Final Act and on U.S. activities in trade and cultural/humanitarian exchange and it will itself make advisory reports to the Congress on the progress of implementation.

The Commission is made up of six Senators, six Members of the House of Representatives and one Commissioner each from the Department of State, Defense, and Commerce.

TITLE IV—GENERAL PROVISIONS

SEC. 401. No part of the funds appropriated in this Act shall be used for the maintenance or care of private vehicles, except for emergency assistance and cleaning as may be provided under regulations relating to parking facilities for the House of Representatives issued by the Committee on House Administration.

SEC. 402. No part of any appropriation contained in this Act shall remain available for obligation beyond the current fiscal year unless expressly so provided herein.

SEC. 403. Notwithstanding any other provision of law, none of the funds in this Act shall be used to pay pages of the House of Representatives at a gross annual maximum rate of compensation in excess of that in effect on June 30, 1975.

SEC. 404. Section 721 of title 44, United States Code, is amended to read as follows:

§ 721. Congressional Directory

(a) There shall be prepared under the direction of the Joint Committee on Printing (1) a Congressional Directory, which shall be printed and distributed as early as practicable during the first session of each Congress and (2) a supplement to each Congressional Directory, which shall be printed and distributed as early as practicable during the second regular session of each Congress. The Joint Committee shall control the number and distribution of the Congressional Directory and each supplement.

(b) One copy of the Congressional Directory delivered to Members of the Senate and the House of Representatives (including Delegates and the Resident Commissioner) shall be bound in cloth and imprinted on the cover with the name of the Member. Copies of the Congressional Directory delivered to depository libraries may be bound in cloth. All other copies of the Congressional Directory shall be bound in paper and names shall not be imprinted thereon, except that copies printed for sale under section 722 may be bound in cloth.

SEC. 405. (a) The paragraph beginning "The Librarian of Congress" under heading "PUBLIC PRINTING AND BINDING" in the Act of June 28, 1902 (32 Stat. 480; 2 U.S.C. 150), is amended by inserting before the period at the end thereof "and shall be credited to the appropriation for necessary expenses for the preparation and distribution of catalog cards and other publications of the Library".

(b) The amendment made by subsection (a) shall take effect on October 1, 1977.

SEC. 406. (a) Effective October 1, 1977, section 203 of title 17, United States Code, is amended by adding at the end thereof the following: "All moneys deposited with the Secretary of the Treasury under this section shall be credited to the appropriation for necessary expenses of the Copyright Office."

(b) Effective January 1, 1978, the first sentence of section 708(c) of title 17, United States Code, is amended to read as follows: "All fees received under this section shall be deposited by the Register of Copyrights in the Treasury of the United States and shall be credited to the appropriation for necessary expenses of the Copyright Office."

【SEC. 407. (a) The first paragraph of section 906 of title 44, United States Code, is amended—

(1) by striking out

“to the Vice President and each Senator, one hundred copies;”

and inserting in lieu thereof

“to the Vice President, one hundred copies;

“to each Senator, fifty copies (which may be transferred only to public agencies and institutions);”

(2) by striking out

“to each Representative, and Resident Commissioner in Congress, sixty-eight copies;”

and inserting in lieu thereof

“to each Member of the House of Representatives, the Resident Commissioner from Puerto Rico, the Delegate from the District of Columbia, the Delegate from Guam, and the Delegate from the Virgin Islands, thirty-four copies (which may be transferred only to public agencies and institutions);”.

(b) The amendment made by subsection (a) shall take effect on October 1, 1977.】

【SEC. 408. (a)(1) Section 1509 of title 44, United States Code, is amended to read as follows:

“§ 1509. Costs of publication, etc.

“(a) The cost of printing, reprinting, wrapping, binding, and distributing the Federal Register and the Code of Federal Regulations, and, except as provided in subsection (b), other expenses incurred by the Government Printing Office in carrying out the duties placed upon it by this chapter shall be charged to the revolving fund provided in section 309. Reimbursements for such costs and

expenses shall be made by the Federal agencies and credited, together with all receipts, as provided in section 309(b).

“(b) The cost of printing, reprinting, wrapping, binding, and distributing all other publications of the Federal Register program, and other expenses incurred by the Government Printing Office in connection with such publications, shall be borne by the appropriations to the Government Printing Office and the appropriations are made available, and are authorized to be increased by additional sums necessary for the purposes, the increases to be based upon estimates submitted by the Public Printer.”.

(2) The table of sections of chapter 15 of title 44, United States Code, is amended by striking out the item relating to section 1509 and inserting in lieu thereof the following:

“1509. Costs of publication, etc.”.

(b) The amendments made by subsection (a) shall take effect on October 1, 1977.】

【SEC. 409. (a) The last sentence of the first paragraph of section 1708 of title 44, United States Code, is amended by striking out “Surplus receipts from sales” and inserting in lieu thereof “Receipts from general sales of publications in excess of the total costs and expenses incurred in connection with the publication and sale thereof, as determined by the Public Printer,”.

(b) The amendment made by subsection (a) shall take effect on October 1, 1977.】

【SEC. 410. Each Senator, Member of the House of Representatives, and other individual who is authorized by law to be issued a congressional tag for his automobile shall, upon application therefor, be entitled to be issued a duplicate tag bearing the same number.】
(Legislative Branch Appropriation Act, 1978.)

The Supreme Court of the United States is the highest court of our country and stands at the apex of the judicial branch of our constitutional form of government. The U.S. Supreme Court is the only constitutionally indispensable court in the Federal court system of the United States. The jurisdiction of the Supreme Court is as spelled out in the Constitution and as allotted by Congress. The funds herein requested are required to enable the U.S. Supreme Court to carry out its constitutional and congressionally allotted responsibilities.

The Court of Customs and Patent Appeals has jurisdiction of appeals from all final judgments or orders of the U.S. Customs Court. The court may, in its discretion, permit an appeal to be taken from an order authorizing an evidentiary hearing in a foreign country, issued by the chief judge of the Customs Court or from an interlocutory order of a judge of the U.S. Customs Court when said judge includes in the order a statement that a controlling question of law is involved as to which there is substantial ground for difference of opinion and an immediate appeal may materially advance the ultimate termination of the litigation.

The court has jurisdiction of appeals from decisions of U.S. Patent and Trademark Office tribunals as to patent applications and interferences and as to trademark applications and interference, cancellation, concurrent use, and opposition proceedings.

The court also has jurisdiction to review, by appeal on question of law only, the findings of the U.S. International Trade Commission as to unfair practices in import trade.

The jurisdiction of the court includes appeals under section 71 of the Plant Variety Protection Act of 1970.

The court has jurisdiction to review, by appeals on questions of law only, findings of the Secretary of Commerce under headnote 6 to schedule 8, part 4, of the "Tariff Schedules of the United States" relating to importation of scientific instruments or apparatus.

A summary of the business of the court for 1976, the transition quarter, and 1977 follows:

The U.S. Customs Court with offices in New York City has exclusive jurisdiction, throughout the United States and its possessions, embracing 46 customs collection districts and 286 ports of entry into which merchandise is imported, over civil actions arising under the tariff laws, the internal revenue law relating to imported merchandise, the several customs simplification acts, the proclamations of the President issued under reciprocal trade agreements, and other proclamations imposing taxes and/or quotas on imported goods, et cetera. Trials may be held at any port or any place within the jurisdiction of the United States, as designated by the chief judge. Cases before the court are tried under the legal procedure provided for in title 28, United States Code, entitled "Judiciary and Judicial Procedure." The court tries cases without a jury, making findings of fact, and applies the law, both statutory and general, including constitutional issues. The Government is represented before the court by an Assistant Attorney General of the United States and a staff of special trial attorneys.

have the right to sue in law or equity if the United States were not immune to such suits. It has jurisdiction in suits against the United States by contractors dissatisfied with the findings and decisions of contracting agencies under terminated war contracts and jurisdiction concurrent with that of the courts of appeals to review district court decisions in cases involving tort actions. It has exclusive jurisdiction to review the decisions of the Indian Claims Commission on appeal from the Commission. It also has jurisdiction in special act cases referred to the court by the Congress, and the commissioners of the court have jurisdiction to render reports to the Congress on claims set forth in bills referred to the chief commissioner by either House of Congress.

The district courts of the United States are constituted courts of bankruptcy, vested with original jurisdiction at law and in equity in proceedings brought under the bankruptcy statutes. This jurisdiction primarily is exercised through referees appointed by the several district courts.

Their salaries and office expenses are paid from this appropriation including compensation and benefits of clerical employees which are payable upon authorization of the Director of the Administrative Office of the U.S. Courts.

This appropriation is derived from a special fund in the Treasury to which are deposited payments of fees and charges by parties to the proceedings.

¹ Includes capital investment as follows: 1977, \$2 thousand; 1978, \$2 thousand; 1979, \$2 thousand.

The Council on Wage and Price Stability, established by the President, was authorized by the Council on Wage and Price Stability Act of 1974 (Public Law 93-378) amended by Public Law 94-78 and Public Law 95-121). The Council reflects the continuing concern of the Federal Government with the rate of inflation in the economy as a whole and the special economic problems of various sectors of the economy. The Council monitors wage and price increases in the private sector, conducts special analyses and holds public hearings on the inflationary problems in various sectors of the economy, reviews and appraises various policies and practices of the Federal Government which may contribute to inflation, makes recommendations for increasing productivity and other actions to reduce inflationary pressures, and reports quarterly to the President and the Congress.

The funding and activity levels for the Council are consistent with the recommendation of the President's reorganization project calling for the continuation of the Council with a reduced staff.

TITLE VI—GENERAL PROVISIONS

DEPARTMENTS, AGENCIES, AND CORPORATIONS

SEC. 601. Unless otherwise specifically provided the maximum allowable during the current fiscal year in accordance with section 16 of the Act of August 2, 1946 (60 Stat. 810), for the pur-

chase of any passenger motor vehicle (exclusive of buses and ambulances), is hereby fixed at \$2,700 except station wagons for which the maximum shall be \$3,100: *Provided*, That these limits may be exceeded by not to exceed \$1,700 for police-type vehicles.

SEC. 602. Unless otherwise specified and during the current fiscal year no part of any appropriation contained in this or any other Act shall be used to pay the compensation of any officer or employee of the Government of the United States (including any agency the majority of the stock of which is owned by the Government of the United States) whose post of duty is in continental United States unless such person (1) is a citizen of the United States, (2) is a person in the service of the United States on the date of enactment of this Act, who, being eligible for citizenship, has filed a declaration of intention to become a citizen of the United States prior to such date and is actually residing in the United States, (3) is a person who owes allegiance to the United States, (4) is an alien from Cuba, Poland, or the Baltic countries lawfully admitted to the United States for permanent residence, or (5) South Vietnamese refugees paroled into the United States between January 1, 1975, and the date of enactment of this Act: *Provided*, That for the purpose of this section, an affidavit signed by any such person shall be considered prima facie evidence that the requirements of this section with respect to his status have been complied with: *Provided further*, That any person making a false affidavit shall be guilty of a felony, and, upon conviction, shall be fined not more than \$4,000 or imprisoned for not more than one year, or both: *Provided further*, That the above penal-clause shall be in addition to, and not in substitution for any other provisions of existing law: *Provided further*, That any payment made to any officer or employee contrary to the provisions of this section shall be recoverable in action by the Federal Government. This section shall not apply to citizens of the Republic of the Philippines or to nationals of those countries allied with the United States in the current defense effort, or to temporary employment of translators, or to temporary employment in the field service (not to exceed sixty days) as a result of emergencies.

SEC. 603. Appropriations of the executive departments and independent establishments for the current fiscal year available for expenses of travel or for the expenses of the activity concerned, are hereby made available for quarters allowances and cost-of-living allowances, in accordance with 5 U.S.C. 5922-5924.

SEC. 604. No part of any appropriation for the current fiscal year contained in this or any other Act shall be paid to any person for the filling of any position for which he or she has been nominated after the Senate has voted not to approve the nomination of said person.

SEC. 605. Funds made available by this or any other Act for administrative expenses in the current fiscal year of the corporations and agencies subject to the Government Corporation Control Act, as amended (31 U.S.C. 841), shall be available, in addition to objects for which such funds are otherwise available, for rent in the District of Columbia; services in accordance with 5 U.S.C. 3109; and the objects specified under this head, all the provisions of which shall be applicable to the expenditure of such funds unless otherwise specified in the Act by which they are made available: *Provided*, That in the event any functions budgeted as administrative expenses are subsequently transferred to or paid from other funds, the limitations on administrative expenses shall be correspondingly reduced.

SEC. 606. Pursuant to section 1415 of the Act of July 15, 1952 (66 Stat. 662), foreign credits (including currencies) owed to or owned by the United States may be used by Federal agencies for any purpose for which appropriations are made for the current fiscal year (including the carrying out of Acts requiring or authorizing the use of such credits), only when reimbursement therefor is made to the Treasury from applicable appropriations of the agency concerned: *Provided*, That such credits received as exchange allowances or proceeds of sales of personal property may be used in whole or part payment for acquisition of similar items, to the extent and in the manner authorized by law, without reimbursement to the Treasury.

SEC. 607. (a) No part of any appropriation contained in this or any other Act, or of the funds available for expenditure by any corporation or agency, shall be used for publicity or propaganda purposes designed to support or defeat legislation pending before Congress.

(b) No part of any appropriation contained in this Act shall be available for the payment of the salary of any officer or employee of the United States Postal Service, who—

(1) prohibits or prevents, or attempts or threatens to prohibit or prevent, any officer or employee of the United States Postal Service from having any direct oral or written communication or contact with any Member or committee of Congress in connection with any matter pertaining to the employment of such officer or employee or pertaining to the United States Postal Service in any way, irrespective of whether such communication or contact is at the initiative of such officer or employee or in response to the request or inquiry of such Member or committee; or

DEPARTMENTS, AGENCIES, AND CORPORATIONS—Con.

(2) removes, suspends from duty without pay, demotes, reduces in rank, seniority, status, pay, or performance or efficiency rating, [denied] *denies* promotion to, relocates, reassigns, transfers, disciplines, or discriminates in regard to any employment right, entitlement, or benefit, or any term or condition of employment of, any officer or employee of the United States Postal Service, or attempts or threatens to commit any of the foregoing actions with respect to such officer or employee, by reason of any communication or contact of such officer or employee with any Member or committee of Congress as described in paragraph (1) of this subsection.

SEC. 608. No part of any appropriation contained in this or any other Act, shall be available to finance interdepartmental boards, commissions, councils, committees, or similar groups under section 214 of the Independent Offices Appropriations Act, 1946 (31 U.S.C. 691) which do not have prior and specific congressional approval of such method of financial support.

SEC. 609. Appropriations available to any department or agency during the current fiscal year for necessary expenses, including maintenance or operating expenses, shall also be available for payment to the General Services Administration for charges for space and services and those expenses of renovation and alteration of buildings and facilities which constitute public improvements, performed in accordance with the Public Buildings Act of 1959 (73 Stat. 749), the Public Buildings Amendments of 1972 (86 Stat. 216), or other applicable law.

SEC. 610. Funds made available by this or any other Act to (1) the General Services Administration, including the fund created by the Public Buildings Amendments of 1972 (86 Stat. 216), and (2) the "Postal Service Fund" (39 U.S.C. 2003), shall be available for employment of guards for all buildings and areas owned or occupied by the United States or the Postal Service and under the charge and control of the General Services Administration or the Postal Service, and such guards shall have, with respect to such property, the powers of special policemen provided by the first section of the

Act of June 1, 1948 (62 Stat. 281; 40 U.S.C. 318), but shall not be restricted to certain Federal property as otherwise required by the proviso contained in said section, and, as to property owned or occupied by the Postal Service, the Postmaster General may take the same actions as the Administrator of General Services may take under the provisions of sections 2 and 3 of the Act of June 1, 1948 (62 Stat. 281; 40 U.S.C. 318a, 318b) attaching thereto penal consequences under the authority and within the limits provided in section 4 of the Act of June 1, 1948 (62 Stat. 281; 40 U.S.C. 318c).

SEC. 611. None of the funds available under this Act shall be available for administrative expenses in connection with the transfer of any functions, personnel, facilities, equipment, or funds out of the United States Customs Service unless such transfers have been specifically authorized by the Congress.

SEC. 612. None of the funds available under this Act shall be available for administrative expenses for the purpose of transferring the border control activities of the United States Customs Service to any other agency of the Federal Government.

SEC. 613. No part of any appropriation contained in, or funds made available by, this or any other Act shall be available for any agency to pay to the Administrator of the General Services Administration a higher rate per square foot for rental of space and services (established pursuant to section 210(j) of the Federal Property and Administrative Services Act of 1949, as amended) [than such agency included in its budget] *than the rate per square foot established for the space and services by the General Services Administration for the current fiscal year and for which appropriations were granted.*

SEC. 614. None of the funds available under this or any other Act shall be available for administrative expenses in connection with the designation for construction, arranging for financing, or execution of contracts or agreements for financing or construction of any additional purchase contract projects pursuant to section 5 of the Public Buildings Amendments of 1972 (Public Law 92-313) during the period beginning October 1, 1976, and ending September 30, 1978. (Treasury, Postal Service, and General Government Appropriation Act, 1978.)

This establishes a framework of joint Federal and State efforts to provide the basic facilities essential to economic growth in Appalachia. Program investments made in the Appalachian region are concentrated in areas with significant potential for future growth. The States, acting through the Appalachian Regional Commission, are responsible for recommending local and State projects within their borders for assistance under this program.

1. *Appalachian Development Highway System.*—Section 201 of the Appalachian Regional Development Act authorizes construction of the Appalachian Development Highway System including local access roads. This system is designed to improve the accessibility of Appalachia; to reduce highway transportation costs to and within Appalachia; and to provide the highway transportation facilities necessary to accelerate the overall development of Appalachia. The budget for 1979 provides \$221 million to fully liquidate obligations through that period, a \$9.7 million increase over 1978.

The cumulative status of the system of roads, including mileage prefinanced by the States, follows:

Development system miles (cumulative):	1977 actual	1978 estimate	1979 estimate
Miles contracted.....	1,594	1,700	1,810
Prefinanced miles.....	(25)	(30)	(30)

Prefinanced by States.....	38,967	50,000	50,000
Total	1,936,848	2,161,000	2,382,000
Annual obligations (thousands).....	195,529	213,119	221,000

2. *Area development programs.*—Funds are provided for a single allocation to each of the Appalachian States for implementing programs of area development. The programs consist of projects aimed primarily at providing the basic facilities essential to the region's growth and economic development, particularly in the areas of health, education, and community development facilities. Appropriations for 1979 are increased by \$10 million for this program.

During 1979 continued emphasis will be placed on conducting area development activities within the several geographic subregions of Appalachia by an allocation system permitting a high degree of State flexibility in the kind of projects undertaken. These projects will be of the following types, with the project mix depending upon the State plans adopted within the context of the subregional development strategies: health and child development;

vocational and other education; community development and housing; natural resources and environment; and other demonstration. Workload data for comparable programs in the previous years follow:

(a) *Health and child development.*—Grants are made for the construction, equipping, and operations of multi-county demonstration health facilities, including hospitals, regional health diagnostic or treatment centers, and other facilities. In addition, grant support is provided for primary care and child development programs throughout the region. Projects approved through September 1977 are:

Health operations, new projects.....	65	721
Construction.....	38	589
Child development, new projects.....	39	361
Obligations (thousands).....	\$35,295	---

(b) *Vocational and other education facilities and operations.*—Grants are made to States and local districts within the Appalachian region for the construction and equipment of vocational education facilities, and in limited cases, for operations and demonstration projects. Supplementary grants are also provided for community colleges, libraries, ETV, and NDEA projects. These facilities are key elements for the training and upgrading of potential and existing labor force entrants in skills required in commercial and other vocations. Grants are administered through the Office of Education. Projects approved through September 1977, including those aided by supplementary grants, are as follows:

	1977 actual	Cumulative
Vocational education construction and equipment....	57	618
Vocational education operation and demonstration, new.....	20	108
Other education facilities and equipment.....	5	466
Other education demonstration.....	8	16
Obligations (thousands).....	\$23,601	---

(c) *Community development and housing facilities.*—Grants are made for the construction and equipping of development facilities such as water and sewer systems, sewage treatment facilities, recreation facilities, industrial sites and housing, et cetera, to meet the basic needs of local areas and assist in providing economic development opportunities. Grants may be supplementary to other Federal grants or when sufficient Federal funds are unavailable be provided entirely by this program. The total Federal contribution may not exceed 80%. Workload data, by type of project, follows (amounts in millions of dollars):

	1977 actual		Cumulative through 1977

(d) *Natural resources and environment.*—This program consists largely of grants for the sealing and filling of voids

in abandoned coal mines, the extinguishment and control of underground and outcrop mine fires, and the reclamation and rehabilitation of strip and surface mine areas, including waste banks, on public land in those areas of Appalachia where the potential for economic growth exists. States or local sponsors must bear 25% of the project cost. Approved projects through September 1977 are:

	1977 actual	Cumulative
Mine fires.....	1	39
Mine subsidence.....	2	19
Surface restoration and well sealing.....	3	29
Obligations (thousands).....	\$26	---

(e) *Other programs.*—Limited programs of grants to stimulate energy related enterprise development and craft centers and assist in meeting rural transportation problems of the region and, beginning in 1978, provide technical assistance to States are provided for the following types of projects:

Rural transportation demonstration.....	3	8
Total.....	20	41
Obligations (thousands).....	\$5,866	---

3. *Research and local development district program.*—Appalachian planning assistance is provided through grants to multicounty local development districts and for research and technical assistance projects. Grants are made for up to 75% of the administrative expenses of local development districts. Other planning and technical assistance is provided for (a) programs which improve the base for economic growth, (b) programs which will attract industrial development within the region, (c) programs which will improve the health, education, and skills of the people, and (d) programs which conserve, maintain, and improve natural resources.

This program provided for several ways of assisting the region in obtaining a larger share of housing for low and moderate income families. The Commission is authorized to make technical assistance grants for the organization of State housing corporations and local non-profit groups to encourage such housing construction; loans for up to 80% of the preliminary cost of planning

housing projects and obtaining Federal or State housing assistance; and grants for site development costs and offsite improvements such as sewer and water line extensions where necessary for economic feasibility of the housing project.

In 1978, most housing program grants will be funded from the Appalachian regional development program appropriations and the housing fund closed out. Funds have been transferred from the Appalachian regional development appropriation to this revolving fund for the following workload:

1. *Administration.*—Funds are provided for the administrative expenses of the Federal Disaster Assistance Administration in coordinating the disaster relief program.

2. *Aid to declared areas.*—Federal disaster assistance is a nationwide program operated pursuant to the Disaster Relief Act of 1974 (Public Law 93-288). Supplementary assistance is provided to individuals, businesses, and State and local governments in the event of a Presidential declared emergency or major disaster. Additionally, funds may be made available directly to a State, or to Federal agencies as reimbursement for expenditures in disaster relief work performed under this authority. Responsibility for administration of the disaster relief program has been delegated to the Secretary of Housing and Urban Development by Executive Order 11795.

This appropriation provides funds to finance credit sales of defense articles and services to foreign countries and international organizations. Two types of financing arrangements are authorized under the Arms Export Control Act: (1) direct U.S. Government loans administered by

the Department of Defense (section 23 of the act), and (2) commercial credit and Federal Financing Bank loan agreements guaranteed by the U.S. Government (section 24). To finance loan guarantees, an appropriation equal to 10% of the principal amount is needed. Direct loans, which require appropriations equal to the face value of the loan, are offered only when there is a legal requirement that repayment be forgiven or special conditions make a guarantee inappropriate.

An appropriation of \$672.5 million is requested for 1979 to finance a credit sales program of \$2,067.5 million; \$1,550 million will be financed by the Federal Financing Bank and \$155 million of this appropriation will be set aside as a guarantee reserve for these loans. The balance of the appropriation, \$517.5 million, will be used for direct loans by the Department of Defense. Administrative expenses related to this program are paid from the grant military assistance account and reimbursed from receipts from foreign governments collected in the foreign military sales trust fund.

This trust fund was established to facilitate government-to-government sales of defense articles and services as authorized by sections 21 and 22 of the Arms Export Control Act, including those sales financed with foreign military sales credits in accordance with section 23 of that act. Orders placed by foreign governments through this trust fund can be combined with procurement for our own military departments. The resultant savings are shared by both the United States and foreign governments.

The net impact of foreign military sales on the budget is reflected below (in billions of dollars):

	1977 actual	1978 estimate	1979 estimate
Obligations of the fund (budget authority).....	8.6	11.1	12.3
Receipts from foreign governments (appropriation).....	-9.4	-8.7	-9.2
Net budget authority.....	-0.8	2.4	3.1

New orders (acceptances) received by the fund are no longer reflected on the program and financing schedule because special reports concerning new acceptances are now being published. These new reports will provide the public much more detailed information than is possible here. In accordance with proper treatment for trust funds, contract authority (budget authority) is recorded in the amount necessary to cover new obligations by the fund. In 1977, unobligated balances of contract authority not conforming to this definition were withdrawn.

Note.—Section 508 of Public Law 95-148, Foreign Assistance and Related Programs Appropriation Act, 1978, reduced the amount appropriated for the Inter-American Development Bank and the International Bank for Reconstruction and Development to \$480,000 thousand and \$380,000 thousand respectively.

The United States is a member of several international development lending institutions.

1. *Investment in International Bank for Reconstruction and Development.*—U.S. membership in the International Bank for Reconstruction and Development (IBRD) was authorized by the Bretton Woods Agreements Act of July 31, 1945.

A selective capital increase of \$8.4 billion, increasing the authorized capital of the IBRD to \$41 billion, was approved by the Board of Governors in 1977. The U.S. share of the selective capital increase of \$1,569 million, of which 10% would be paid-in capital, was authorized in Public Law 95-118, and represents an 18.7% share of the increase, compared with the outstanding 25.3% U.S. share of the IBRD capital stock. Appropriation of a first tranche of \$523 million, was sought in 1978, of which \$380 million (\$38 million paid-in capital and \$342 million callable capital) was appropriated.

Appropriation of the second tranche of \$523 million, will be sought in 1979, together with the \$143 million requested, but not appropriated, in 1978, for a total request of \$666 million (of which \$66.6 million represents paid-in capital).

2. *Investment in International Development Association.*—The International Development Association (IDA) is the member of the World Bank Group which provides development financing on concessionary terms. Pursuant to authorization in the International Development Association Act (Public Law 86-565, as amended), enacted June 30, 1960, the United States joined the Association in August 1960.

Fourth replenishment.—In 1974, a U.S. contribution of \$1,500 million, in four installments of \$375 million, as part of a \$4,500 million multidonor fourth replenishment of IDA resources was authorized by the Congress. Appropriation of the third tranche of \$375 million was requested, but not appropriated, in 1978. Appropriation of both the third and fourth installments of \$375 million each is being sought in 1979, which will complete requests under this replenishment.

Fifth replenishment.—A fifth replenishment of the resources of the IDA of \$7,638 million was approved by the Board of Governors in 1977. Authorization for the U.S. share of \$2,400 million, to be paid in three equal installments beginning in 1978, was obtained in Public Law 95-118. The first installment of \$800 million was appropriated in 1978; the second tranche of \$800 million is being sought in 1979.

The total request for IDA in 1979 is therefore \$1,550 million, of which \$750 million is for the fourth replenishment and \$800 million for the fifth replenishment.

3. *Investment in International Finance Corporation (IFC).*—The International Finance Corporation was established in 1956 to further economic development by encouraging the growth of productive private enterprise through loans and equity investments. It is affiliated with the World Bank. Pursuant to authorization in the Inter-

national Finance Corporation Act (Public Law 84-350, as amended), enacted August 11, 1955, the United States joined the Corporation in July 1956.

Authorization has been obtained in Public Law 95-118 for a \$111.5 million U.S. share of a \$540 million replenishment to the resources of the IFC. Appropriation of \$38 million, out of a \$44.6 million request, was approved in 1978. In 1979 appropriation of \$40 million is being sought, including the \$6.6 million requested, but not appropriated, in 1978.

4. *Investment in Inter-American Development Bank.*—The Inter-American Development Bank (IDB) promotes economic development in Latin America and Caribbean countries through loans and technical assistance. Pursuant to the Inter-American Development Bank Act (Public Law 86-147, as amended), enacted August 7, 1959, the United States joined the Bank in December 1959.

Ordinary capital.—Congressional authorization for the U.S. share of \$1,650 million in a replenishment of the IDB capital resources was received in 1976. Of the total, \$120 million was to be paid-in capital, and \$1,530 million callable capital. In 1978, \$36.7 million paid-in capital, and \$328.5 million callable capital was appropriated.

The amounts requested, but not appropriated, in 1977 and 1978, namely \$27.3 million paid-in interregional capital and, \$111.5 million callable capital are being requested in 1979. In addition, \$450 million callable capital is being requested. If appropriated, such amounts will complete the U.S. subscription to the present replenishment.

Fund for special operations (FSO).—Authorizing legislation was approved in 1976 for a U.S. contribution of \$600 million, to be contributed in three tranches, to the current replenishment of the FSO. In 1977, \$160 million was appropriated and in 1978 \$114.7 million was appropriated from requests totaling \$200 million in each year. In 1979, the third tranche of \$200 million, plus the remaining \$125.3 million authorized, but not appropriated earlier, is being requested.

5. *Investment in Asian Development Bank (ADB).*—The Asian Development Bank was established in 1966 to foster economic growth in Asia by extending loans and technical assistance to the developing member countries of the region. Pursuant to authorization in the Asian Development Bank Act (Public Law 89-369, as amended) enacted March 16, 1966, the United States joined the Bank in August 1966.

Ordinary capital (OC).—A \$4.96 billion replenishment increasing the Bank's resources was approved by the ADB Board of Governors in 1977, and a U.S. contribution of \$814.3 million, of which 10% would be paid-in capital, was authorized in Public Law 95-118. Appropriations of \$203.6 million (with \$20.4 million representing paid-in capital) were sought in 1978, of which \$168 million was appropriated (of the latter amount \$16.8 million represented paid-in capital). In 1979, the second tranche of \$203.6 million is being sought, in addition to the \$35.6 million not appropriated in 1978, for a total request of \$239.2 million, of which 10% represents paid-in capital.

Asian Development Fund (ADF).—The ADF is the concessional lending window of the ADB. Authorization has been obtained for a U.S. contribution of \$180 million to an \$809 million replenishment to the ADF (Public Law 95-118). Appropriation of \$49.5 million was obtained in 1978 from a \$60 million request. In 1979 the second tranche of \$60 million is being sought in addition to the \$10.5 million requested, but not appropriated, in 1978, for a total request of \$70.5 million.

6. *Investment in African Development Bank, African Development Fund.*—The African Development Fund (AFDF), a special fund associated with the African Development Bank (AFDB), was established on June 30, 1973. The purpose of the AFDF is to complement the operations of the AFDB by providing concessional financing for high priority development projects in the poorest African countries.

U.S. membership in the AFDF was approved on May 31, 1976 (Public Law 94-302), with an authorized contribution of \$25 million. The United States formally joined the AFDF in November 1976 with a contribution of \$15 million, and the final \$10 million was appropriated in 1978. In 1979, \$25 million is being sought as an additional U.S. contribution to AFDF resources. Such funds are authorized in Public Law 95-118.

As of September 30, 1977, the current dollar value of the U.S. quota in the IMF of Special Drawing Rights (SDR) 6,700 million was \$7,796 million, reflecting an increase of \$43 million from the comparable 1976 figure arising from the decrease in the value of the dollar in terms of SDR, the IMF's unit of account. In June 1974, the IMF adopted the SDR "currency basket" method of valuation in which the value of the dollar and of other currencies in terms of the SDR varies from day to day as a result of movements in market exchange rates within the group of 16 currencies that comprise the currency basket. Thus, during the past fiscal year, the United States incurred increased obligations to the IMF under the maintenance of value provisions equal to the decreased value of the dollars held by the IMF in terms of the SDR currency basket. As monetary transactions, increases and decreases in the current dollar value of the U.S. quota with the IMF do not have a budgetary impact.

During 1977, the President signed legislation authorizing U.S. acceptance of the second amendment of the IMF Articles of Agreement and consent to an SDR 1,705 million increase in the U.S. quota. The increase in the U.S. quota will not come into effect until the amended Articles of Agreement have entered into force and until a legally specified number of other countries have also consented to increases in their quotas. At the end of the fiscal year, these procedures had not been completed. The increase in the U.S. quota, as a monetary transaction, will not have a budgetary impact.

The General Arrangements to Borrow (GAB) were established in 1962 by 10 industrial member countries of the IMF, including the United States, as a means of supplementing the IMF's resources when needed to cope with an impairment of the international monetary system. Each participant undertakes to provide specific amounts of its currency to help finance drawings from the IMF by another GAB participant. As of September 30, 1977, total commitments amounted to the equivalent of about \$7,760 million. Public Law 87-490, approved June 19, 1962, authorized an appropriation of \$2 billion for U.S. participation in the GAB. The appropriation was obtained on October 24, 1962.

During 1977, calls were made under the GAB amounting to the equivalent of roughly \$1.2 billion, of which the United States provided about \$670 million, to help finance drawings by the United Kingdom and Italy. As such transactions constitute monetary transactions, the appropriation was not charged.

Agreement was reached during the year between the IMF and a number of major industrial and oil exporting

countries, including the United States, to provide additional resources to the IMF on a temporary basis for a new supplementary financing facility. This facility would provide expanded access to IMF resources to those members with especially large balance of payments financing needs and difficult adjustment problems. Commitments were obtained amounting to approximately SDR 8.7 billion (about \$10.5 billion) with a proposed U.S. share of SDR 1,450 million (about \$1,750 million). Congressional consideration of proposed legislation to authorize U.S. participation was in progress as the fiscal year ended.

The Overseas Private Investment Corporation encourages the participation of U.S. private capital and skills in the economic and social development of less developed friendly countries. Its primary programs are (1) political risk insurance against losses due to expropriation, inconvertibility, and war damage; and (2) investment financing through loans and loan guaranties. The Corporation is currently operating on a self-sustaining basis. Pending legislation would remove the requirement that the Corporation transfer its insurance operations to the private insurance industry by certain deadlines.

The Foreign Assistance Act of 1969 established the Inter-American Foundation. Financing was initially provided through the transfer of \$50 million from the Agency for International Development, of which \$3.6 million remains available for 1979. Public Law 95-105 authorized up to \$25 million for each of the years 1979 and 1980. Additional funds, \$16 million equivalent in 1979, are available under an agreement allowing access to the local currencies of the Social progress trust fund administered by the Inter-American Development Bank, and the Foundation is authorized to obtain additional private funding. The administration requests a 20% increase in the combined dollar and local currency program over 1978—consistent with the substantial growth expected during the next few years.

The most important characteristics of the programs include responsiveness to Latin American and Caribbean initiatives and support for social change processes with a direct impact on the lives of people at the lowest economic levels.

Section 608 of the Foreign Assistance Act of 1961 created a revolving fund to provide for more effective use of U.S. Government-owned excess property in foreign assistance programs by authorizing such property to be acquired and rehabilitated in advance of specifically known requirements for country programs.

Many types of excess property which AID needs, such as tractors, construction roadbuilding equipment, machinery, and machine tools, are acquired through this fund. All operating expenses of the program are covered from U.S. dollar fee income.

On May 18, 1977, the Government of Israel prepaid \$30 million in Israeli pounds (I£277,878,000) of outstanding debts under the Public Law 480 program to the U.S. Embassy in Tel Aviv. On the same day, the Embassy, on instructions from the Treasury Department, deposited \$30 million in Israeli pounds with the Bank of Israel in the account of the Israel-United States Binational Industrial Research and Development Foundation. The Bank of Israel converted I£152,919,730.93 of the U.S. contribution into dollars (\$16,509,374.36) on behalf of the Foundation and in accordance with the March 3, 1976, agreement between Israel and the United States, the Government of Israel has matched the U.S. contribution and the two contributions form the endowment of the Foundation.

The interest paid on U.S. and Israeli contributions to the Foundation endowments will support Foundation activities and no further budgetary support from the U.S. Government is foreseen.

Section 201(13) of the Naval Petroleum Reserves Production Act of 1976 (Public Law 94-258) established the naval petroleum reserves special account to be credited with collections arising from the operation of the naval petroleum reserves. Subject to appropriation, these collections were available for three energy-related programs: continued exploration, development, and operation of the naval petroleum reserves (Department of the Navy); exploration of the national petroleum reserve in Alaska (Department of the Interior); and the strategic petroleum reserve (Federal Energy Administration). Accordingly, the amounts appropriated in 1977 were allocated by the President to these agencies as reflected above.

In 1978, the Congress provided general fund appropriations directly to the agencies and directed transfer of the estimated collections to miscellaneous receipts. Consistent with the 1978 appropriations action, legislation has been proposed to amend section 201(13) of the act to provide that all collections in 1979 and future years from the sale of petroleum from the naval petroleum reserve be deposited directly into miscellaneous receipts of the general fund.

The naval petroleum reserves and strategic petroleum storage programs were transferred to the Department of Energy pursuant to the Department of Energy Organization Act (Public Law 95-91) and Executive Order 12009, effective October 1, 1977, and are funded from general fund appropriations in the Energy account. The exploration of the national petroleum reserve in Alaska program is funded as a separate appropriation under Geologic Survey (Department of the Interior).

GENERAL PROVISIONS

SEC. 101. None of the funds herein appropriated (other than funds appropriated for "International organizations and programs") shall be used to finance the construction of any new flood control, reclamation, or other water or related land resource project or program which has not met the standards and criteria used in determining the feasibility of flood control, reclamation, and other water and related land resource programs and projects proposed for construction within the United States of America under the Principles and Standards for Planning Water and Related Land Resources dated October 25, 1973.

SEC. 102. Except for the appropriations entitled "Contingency fund", "International disaster assistance", and "United States emergency refugee and migration assistance fund", not more than 20 per centum of any appropriation item made available by this Act for fiscal year 1978 shall be obligated or reserved during the last month of availability.

【SEC. 103. None of the funds herein appropriated nor any of the counterpart funds generated as a result of assistance hereunder or any prior Act shall be used to pay pensions, annuities, retirement pay, or adjusted service compensation for any persons heretofore or hereafter serving in the armed forces of any recipient country.】

【SEC. 104. None of the funds appropriated or made available pursuant to this Act for carrying out the Foreign Assistance Act of 1961, as amended, may be used for making payments on any contract for procurement to which the United States is a party entered into after the date of enactment of this Act which does not contain a provision authorizing the termination of such contract for the convenience of the United States.】

【SEC. 105. None of the funds appropriated or made available pursuant to this Act for carrying out the Foreign Assistance Act of 1961, as amended, may be used to pay in whole or in part any assessments, arrearages, or dues of any member of the United Nations.】

【SEC. 106. None of the funds contained in title I of this Act may be used to carry out the provisions of sections 209(d) and 251(h) of the Foreign Assistance Act of 1961, as amended.】

【SEC. 107. None of the funds appropriated or otherwise made available pursuant to this Act shall be obligated or expended to finance directly any assistance or reparations to Uganda, Cambodia, Laos, or the Socialist Republic of Vietnam.】

【SEC. 108. Of the funds appropriated or made available pursuant to this Act, not to exceed \$118,000 shall be for official residence expenses of the Agency for International Development during fiscal year 1978: *Provided*, That appropriate steps shall be taken to assure that, to the maximum extent possible, United States-owned foreign currencies are utilized in lieu of dollars.】

【SEC. 109. Of the funds appropriated or made available pursuant to this Act, not to exceed \$15,000 shall be for entertainment expenses of the Agency for International Development during fiscal year 1978.】

【SEC. 110. Of the funds appropriated or made available pursuant to this Act, not to exceed \$96,000 shall be for representation allowances of the Agency for International Development during fiscal year 1978: *Provided*, That appropriate steps shall be taken to assure that, to the maximum extent possible, United States-owned foreign currencies are utilized in lieu of dollars.】

【SEC. 111. Of the funds appropriated or made available pursuant to this Act, not to exceed \$73,900 shall be for entertainment expenses

relating to the Military Assistance Program, International Military Education and Training, and Foreign Military Credit Sales during fiscal year 1978: *Provided*, That appropriate steps shall be taken to assure that, to the maximum extent possible, United States-owned foreign currencies are utilized in lieu of dollars.】

【SEC. 112. None of the funds appropriated or made available (other than funds for "International organizations and programs") pursuant to this Act for carrying out the Foreign Assistance Act of 1961, as amended, may be used to finance the export of nuclear equipment, fuel, or technology or to provide assistance for the training of foreign nationals in nuclear fields.】

【SEC. 113. Funds appropriated by this Act may not be obligated or expended to provide security assistance to any country for the purpose of aiding directly the efforts of the government of such country to repress the legitimate rights of the population of such country contrary to the Universal Declaration of Human Rights.】

【SEC. 114. None of the funds appropriated or made available pursuant to this Act shall be obligated or expended to finance directly any assistance to Mozambique or Angola.】

【SEC. 115. None of the funds made available by this Act may be obligated under an appropriation account to which they were not appropriated without the written prior approval of the Appropriations Committees of both Houses of the Congress.】

TITLE V—GENERAL PROVISIONS

SEC. 501. No part of any appropriation contained in this Act shall be used for publicity or propaganda purposes within the United States not heretofore authorized by the Congress.

SEC. 502. No part of any appropriation contained in this Act shall remain available for obligation beyond the current fiscal year unless expressly so provided herein.

【SEC. 503. No part of any appropriation contained in this Act shall be used to furnish assistance to any country which is in default during a period in excess of one calendar year in payment to the United States of principal or interest on any loan made to such country by the United States pursuant to a program for which funds are appropriated under this Act unless (1) such debt has been disputed by such country prior to the enactment of this Act or (2) such country has either arranged to make payment of the amount in arrears or otherwise taken appropriate steps, which may include renegotiation, to cure the existing default.】

【SEC. 503A. None of the funds appropriated or made available pursuant to this Act shall be used to provide military assistance, international military education and training, or foreign military credit sales to the Governments of Ethiopia and Uruguay.】

【SEC. 503B. None of the funds appropriated or made available pursuant to this Act shall be used to provide foreign military credit sales to the Governments of Argentina, Brazil, El Salvador, and Guatemala.】

【SEC. 503C. Of the funds appropriated or made available pursuant to this Act, not more than \$18,100,000 shall be used for military assistance, not more than \$1,850,000 shall be used for foreign military credit sales, and not more than \$700,000 shall be used for international military education and training to the Government of the Philippines.】

【SEC. 504. None of the funds appropriated by this Act shall be available for the Office of the Inspector General of Foreign Assistance.】

【SEC. 505. None of the funds appropriated or made available pursuant to this Act shall be available to any international financial institution whose United States' representative cannot upon request obtain the amounts and the names of borrowers for all loans of the international financial institution, including loans to employees of the institution, or the compensation and related benefits of employees of the institution.】

【SEC. 506. None of the funds appropriated in this Act shall be used for any form of aid or trade, either by monetary payment or by the sale or transfer of any goods of any nature, directly to Cuba.】

【SEC. 507. It is the sense of the Congress that, where other means have proven ineffective in promoting international human rights, and except where the President determines that the cause of international human rights is served more effectively by actions other than voting against such assistance or where the assistance is directed to programs that serve the basic needs of the impoverished majority of the country in question, United States representatives to the International Bank for Reconstruction and Development, the International Development Association, the African Development Fund, the Asian Development Bank, and the Inter-American Development Bank should oppose loans and other financial or technical assistance to any country that persists in a systematic pattern of gross violations of fundamental human rights.】

【SEC. 508. Notwithstanding the budget authority levels of \$523,000,000 for the Inter-American Development Bank and

\$400,000,000 for the International Bank for Reconstruction and Development provided elsewhere in this Act, not more than \$480,000,000 shall be made available by this Act for obligation or expenditure for a United States contribution to the Inter-American Development Bank and not more than \$380,000,000 shall be made available by this Act for obligation or expenditure for a United States contribution to the International Bank for Reconstruction and Development: *Provided*, That this section shall apply only to the establishment of budget authority levels for the aforementioned Banks and shall not alter limitations, restrictions or other language provisions elsewhere in this Act.】

【**SEC. 509.** None of the funds appropriated or otherwise made available by this Act to the Export-Import Bank and funds appropriated by this Act for direct foreign assistance may be obligated for any government which aids or abets, by granting sanctuary from prosecution to, any individual or group which has committed an act of international terrorism, unless the President of the United States finds that the national security requires otherwise.】

【**SEC. 510.** It is the sense of the Congress that the Secretary of State should prepare and submit to the Speaker of the House of Representatives and to the President of the Senate—

(1) not later than six months after the date of enactment of this section, a report on the adequacy of insurance provided by

the accredited diplomatic missions to the United States to cover loss or injury arising from the wrongful acts or omissions of the employees of such missions in the United States;

(2) not later than one year after the date of enactment of this section, a report on what efforts the President and the Secretary of State have made to encourage the provision of such coverage; and

(3) not later than six months after the date of enactment of this section, a report on what the Secretary of State has done to encourage the Government of Panama to make satisfactory compensation to Dr. Halla Brown for loss or injury arising out of the accident of April 20, 1974.】

SEC. 503. Except for the Contingency Fund, unobligated balances as of September 30, 1978, of funds made available under the authority of the Foreign Assistance Act of 1961, as amended, are continued available for the Fiscal Year 1979 and each such balance (together with amounts certified pursuant to Section 1311 of the Supplemental Appropriation Act, 1955, as having been obligated against appropriations made available for international narcotics control, military assistance, and international military education and training) shall be transferred to and merged with appropriations made available for the same general purposes by this Act. (Foreign Assistance and Related Programs Appropriation Act, 1978.)

¹ Includes capital investment as follows: 1977, \$32,928 thousand; 1978, \$38,000 thousand; 1979, \$34,000 thousand.

Note.—Excludes \$30,000 thousand in 1979 for competitive research grant activities transferred to Cooperative State Research Service: 1977, \$0; 1978, \$15,000 thousand.

The Service conducts research to provide the means for a safer, more economical and more abundant supply of agricultural products for the Nation. In 1979 the Service will move towards increasing the portion of extramural research it funds. The programs financed from this appropriation are described below:

1. *Research on animal production.*—Research is conducted to improve livestock productivity (including poultry) through improved breeding, feeding, and management practices, and to develop methods for controlling diseases, parasites, and insect pests affecting them.

2. *Research on plant production.*—Research is conducted to improve plant productivity through improved varieties of food, feed, fiber, and other plants; develop new crop resources; and improve crop production practices, including methods to control plant diseases, nematodes, insects, and weeds.

3. *Research on the use and improvement of soil, air, and water.*—Research is conducted to improve the management of natural resources, including investigations to improve soil and water management, irrigation, and conservation practices; to protect natural resources from harmful effects of soil, air, and water pollutants and to minimize certain agricultural pollution problems; and to determine the relation of soil types and water to plant, animal, and human nutrition. The increase requested for 1979 will provide for research to increase efficiency of nitrogen fertilizers' use; develop methods to reduce energy used for irrigation; improve methods and equipment to reduce consumption of fossil fuels for tillage; and increase the efficiency of rain-fed agriculture.

4. *Processing, storage, distribution, food safety, and consumer services research.*—Research is conducted to develop new and improved foods, feeds, fabrics, and industrial products and processes for agricultural commodities for domestic and foreign markets, including ways to minimize processing wastes as well as the processing, transportation, storage, wholesaling, and retailing of products.

Research is conducted on problems of human health and safety, including means to insure the safety of food and feed supplies; control insect pests of man and his belongings; reduce the hazards to human life resulting from pesticide residues and other causes; and on consumer services.

5. *Research on human nutrition.*—Research is conducted on human nutritional requirements and the composition and nutritive value of food as needed by consumers and by Federal, State, and local agencies administering food and nutrition programs.

6. *Construction of facilities.*—The 1979 estimate reflects a decrease of \$8,975 thousand in nonrecurring projects provided for in 1978.

7. *Contingencies.*—\$1 million will be available to meet urgent needs that develop unexpectedly during the year when such needs cannot be met by redirection of resources from other projects.

8. *Competitive research grants.*—The costs shown for this program represent the estimated value of expenditures for basic plant and nutrition research grants awarded in 1978. This activity will be funded by the Cooperative State Research Service in 1979.

Foreign currencies which the Treasury Department determines to be excess to the normal requirements of the United States are used for expenses of carrying out programs of the Department of Agriculture under the Agricultural Trade Development and Assistance Act of 1954, as amended. Research which is important to American agriculture and supplements our domestic

programs is carried on through agreements negotiated with institutions and organizations in foreign countries. For example, research is conducted on exotic insect pests and diseases of plants and animals which cannot be done in the United States. Specialized projects provide for the translation and dissemination of foreign language scientific publications. Total estimated cost in U.S. dollars (charged to regular appropriations) for program direction and supervision of projects in 1979 is \$725 thousand.

¹ Includes capital investment as follows: 1977, \$85 thousand; 1978, \$98 thousand; 1979, \$98 thousand.

Note.—Includes \$30,000 thousand in 1979 for competitive research grant activities previously financed by the Agricultural Research Service: 1977, \$0; 1978, \$15,000 thousand.

1. *Payments to agricultural experiment stations under the Hatch Act and for penalty mail.*—Funds under the Hatch Act are allocated to agricultural experiment stations of the land-grant colleges in the 50 States, District of Columbia, Puerto Rico, Guam, and the Virgin Islands, for agricultural research including investigations and experiments to promote a permanent and efficient agricultural industry and improvements in the rural home and rural community. A reduction in Hatch Act payments is requested in 1979 as part of a reorientation of research priorities toward competitive research grants.

2. *Cooperative forestry research.*—These funds are allocated to land-grant colleges or agricultural experiment stations in the 50 States, Puerto Rico, Guam, and the Virgin Islands, and other State-supported colleges and universities offering graduate training in the sciences basic to forestry and having a forestry school. The act requires that the Federal funds paid to each institution be matched by funds from non-Federal sources for forestry research. In 1979, a reduction in funds is requested as part of a reorientation of research priorities toward competitive research grants.

3. *Payments to 1890 colleges and Tuskegee Institute and for penalty mail.*—Funds support planning, coordinating and conducting agricultural research at the 1890 land-grant colleges including Tuskegee Institute. The eligible institutions plan and conduct agricultural research in cooperation with each other and such agencies, institutions, and individuals as may contribute to the solution of agricultural problems. The increase of \$547 thousand proposed for fiscal year 1979 will provide for research to assist small and low-income farmers and disadvantaged rural residents.

4. *Special research grants.*—These funds support basic and applied research at nonprofit institutions of higher education or nonprofit organizations whose primary purpose is the conduct of such research. Areas of research are limited to high priority problems of regional or national scope of joint concern to the USDA and to the States. Areas to be funded are pest management, pesticide clearance, pesticide impact assessment, soil erosion, food and agriculture policies, soybeans, genetic vulnerability, and transportation, marketing and storage.

5. *Competitive research grants.*—These funds support competitive research grants to complement and enrich basic research efforts in USDA agencies, State agricultural experiment stations, universities and private research organizations. This program emphasizes basic research critical to food production and human nutrition by obtaining the participation of the entire U.S. scientific community. The increase requested in 1979 includes \$9 million for grants to study serious problems relating to crop productivity, and \$6 million to expand research in human nutrition. The costs shown for this program represent the estimated value of expenditures for research.

7. *Funds for rural development research.*—Funds appropriated under title V of the Rural Development Act of 1972 are allocated to land-grant colleges and universities of the 50 States and Puerto Rico, to conduct pilot research programs in support of the development of rural areas. As part of a reorientation of research priorities, no funding is requested for this program in 1979. The 1979 costs shown for this program reflect expenditures of previous allocations.

8. *Federal administration.*—A coordinating and review staff is maintained to examine research projects and assist State institutions and Federal agencies.

¹ Includes capital investment as follows: 1977, \$36 thousand; 1978, \$38 thousand; 1979, \$40 thousand.

Note.—Includes \$11,500 thousand in 1978 and 1979 for activities previously financed from the Department of Health, Education, and Welfare, Higher and Continuing Education. Funding level for 1977 was \$11,500 thousand. For 1978, funds are available under a continuing resolution (Public Law 95-205) since the regular appropriation funding this activity had not been enacted at the time this budget was prepared.

The primary function of the nationwide system of cooperative extension work is out-of-school applied education in agriculture, home economics, community development, 4-H youth programs, and related subjects. This educational work takes research results, technological advancements, and program facts of the Department of Agriculture, the State agricultural colleges and experiment stations, and incorporates them into a program for action. Cooperative Extension Service interprets, disseminates, and encourages practical use of knowledge. It transmits information from researchers to people.

1. *Payments to States.*—Funds appropriated under the Smith-Lever Act for payments to States, Puerto Rico, Guam, and the Virgin Islands are distributed primarily on the basis of population and to a degree on basis of special problems and needs. Funds are used primarily for the employment of State, area, and county extension workers who work with individuals, families, community organizations, marketing concerns, and others by providing advice and assistance in the application of improved methods for production, marketing, nutrition, family

living, and community development. Work with youth is accomplished largely through the 4-H program.

Earmarked funds are proposed to expand assistance for current national concerns in the management of agricultural and forestry use pesticides. Currently earmarked funds for the farm safety, rural development, urban gardening, and farmer-to-consumer direct marketing programs will be discontinued in fiscal year 1979.

2. *Aid to land grant colleges.*—Grants are allotted among the States for support of instruction in agriculture, the mechanic arts, and related fields at the land grant colleges. This activity, formerly with the Department of Health, Education, and Welfare, was transferred to the Department of Agriculture under section 1417c, of the National Agricultural Research, Extension, and Teaching Policy Act of 1977 (Public Law 95-113).

3. *Federal administration and coordination.*—The Extension Service provides leadership and assistance to States, Puerto Rico, Guam, the Virgin Islands, and the District of Columbia in developing extension programs, improving teaching methods, efficient use of available resources, evaluation of programs, and administrative services.

The National Agricultural Library, in cooperation with the Library of Congress and the National Library of Medicine, provides coverage and servicing of worldwide publications in the agricultural, chemical, and biological sciences. It serves all of the Department programs in the Washington metropolitan area, as well as the field installations throughout the country. It has the added responsibility of service to the land-grant universities, and the world agricultural science community.

The Library's primary purpose is to acquire, preserve, and disseminate an exhaustive collection of reliable information in all phases of the agricultural and allied sciences. NAL also maintains, in cooperation with the Office of General Counsel, a central law library and 17 field legal libraries.

Information contained in the agricultural literature is disseminated through a variety of methods. These include on-line computer networks, printed bibliographies, personal reference services, loans and photocopies to agricultural colleges, research institutions, Government agencies, agricultural associations, industry, individual scientists, farmers, and the general public in every part of the world.

Demand for the services of the NAL by USDA, Federal, public, private, and international areas continues to grow. The proposed budget increases will be used to maintain the current operating level, combine the Food and Nutrition Information Center with the NAL appropriation, and allow funds for increased copyright costs, an automated circulation control system, and provide for an agricultural information user survey.

Funds were appropriated in fiscal year 1966 for construction of the new library at Beltsville, Md. The new

building was accepted by GSA as completed on October 7, 1971. The balance brought forward into fiscal year 1977 was used to finance the sealing of windows and the brick on the exterior of the building. This was not done at the time the building was constructed. Funds necessary for the completion of these two items were obligated in fiscal year 1977. The obligated balances at the end of fiscal year 1977 will be fully expended by the end of fiscal year 1978 and any remaining funds will be returned to the U.S. Treasury.

Economic Research Service.....	27,395	30,795
Statistical Reporting Service.....	35,819	38,744

The Economics, Statistics, and Cooperatives Service was established by Secretary's Memorandum No. 1927 dated October 5, 1977, and supplement No. 1 to that memorandum dated December 19, 1977, by consolidation of the Economic Research Service, Statistical Reporting

Service, Farmer Cooperative Service and the Economic Management Support Center. The fiscal years 1977 and 1978 for Statistical Reporting Service and Economic Research Service are shown elsewhere in this Appendix. Fiscal years 1977 and 1978 for Farmer Cooperative Service and Economic Management Support Center are shown in the Economics, Statistics, and Cooperatives Service schedules.

The three major missions of the Service are: (1) to formulate, develop, and administer programs of economic research, analysis, and information related to food, agriculture, and rural resources and communities, (2) to formulate, develop and administer programs of collecting and publishing statistics related to food, agriculture, and rural resources and communities, and (3) to formulate, develop and administer research technical assistance programs on financial, organization, management, legal, social, and economic aspects of agriculturally related cooperatives. Data developed by the Service on food and agriculture are essential to farmers, processors, and handlers in making production and marketing decisions and to legislators and other public officials in developing and administering agricultural programs. The activities of the Service comprise four main areas:

1. *Economic analysis and research.*—This activity includes the development of short-term forecasts and long-range projections of resource use, production and distribution of food and fiber for both probable and possible future events. The Service also evaluates the performance of the food and fiber sector in meeting the needs and wants of consumers and overall goals of society concerning such matters as resource ownership and use, income and income distribution, and quality of life. Current information is maintained on the principal social and economic factors affecting life in nonmetropolitan areas and alternative public and private actions which have impact on these areas are identified and evaluated.

The increases under this activity requested in fiscal year 1979 are: (1) for expanded and more accurate analyses of factors underlying rural conditions, particularly rural labor and credit; (2) for economic assessment of energy use, conservation and development in agriculture; (3) for forecasting agricultural production and trade for foreign developed countries and linking these to U.S. forecasts; (4) to assess the economic feasibility of biological and cultural pest control and integrated pest management programs; and, (5) for increased GSA space costs. Program reductions will be made in the research on farm programs and policies including estimates of farm income, and in analyses of market structure and performance.

2. *Crop and livestock estimates.*—The Service provides the official National and State estimates of acreage, yield, and production of crops, stocks and value of farm commodities, and numbers of inventory values of livestock items. Data on approximately 150 crops and livestock products are covered in some 500 reports issued each year. Data collected and published on prices paid and received by farmers are basic to computation of parity prices.

The work under this activity is conducted through 44 State offices serving the 50 States; most of these offices are operated as joint State and Federal services. Cooperative arrangements with State agencies provide much additional State and county data; Federal funds are not available for collection and publication of these data.

A comparison of activities in 1976 and 1977, including work performed under cooperative arrangements, follows:

	1976 actual	1977 actual
Separate mailings of inquiry forms, average per field office.....	348	350
Total questionnaires handled:		
Number distributed.....	7,386,938	7,310,800
Number of returns tabulated.....	3,405,258	3,150,300
Number of official reports issued, all offices.....	9,451	9,140
Copies of reports distributed.....	10,321,493	9,512,000
Copies of publications distributed.....	1,571,750	1,380,000
Special requests for information answered by field offices.....	80,980	75,000

The increases under this activity requested in fiscal year 1979 are for: (1) improvement of price statistics, (2) ownership of off-farm grain stocks statistics, (3) improved weather data, and (4) GSA space costs. A program reduction will be made for data collection of selected commodities which are estimated in three or fewer States.

3. *Statistical research and service.—Departmental clearance and review.*—The work of the Service under this activity is to review, coordinate, and monitor data gathering surveys conducted by the Department. This involves (1) the review of all proposed statistical forms and survey plans requiring Office of Management and Budget clearance in accordance with the Federal Reports Act of 1942, and (2) coordination of all interdepartment and intradepartment programs for the improvement of agricultural statistics and related data.

Improvement of crop and livestock estimates.—This research is devoted primarily to improving statistical methods and techniques for producing agricultural statistics with a high degree of accuracy at a minimum cost. This work is in support of the Service's long-range program for improving crop and livestock estimates, and is directed toward developing better sampling, yield forecasting, and survey techniques for the agency. Current research activities include compiling and maintaining lists of farms; developing new sampling techniques combining list frame(s) with an area sampling frame(s); constructing mathematical models for forecasting crop yields from objective counts and measurements of plant characteristics; and reducing reporting and other nonsampling errors by improving questionnaire design, and by devising better field, editing and processing procedures. These research studies are tested by pilot surveys under actual operating conditions, and then, if proven, placed into operation. A comparison of activities for 1976 and 1977 follows:

Statistical forms—reports (Federal Reports Act):	1976 actual	1977 actual
Departmental clearance and review for submission to Office of Management and Budget.....	332	317
Improvement of crop and livestock estimating methods: Number of research projects.....	8	4

The increase under this activity requested in fiscal year 1979 is for GSA space costs.

4. *Research and technical assistance for agricultural cooperatives.*—Technical assistance is provided in response to problems that may come to the Economics, Statistics, and Cooperatives Service from farmers directly or through the management of boards of directors of cooperatives composed of hundreds and in some instances, thousands of farmers. Help is given on the formation of new cooperatives, the merits of merging cooperative organizations, changes in business organizations and future growth or development, and the development of more viable relationships between cooperatives and other businesses and institutions. The full range of organization and management problems confronting cooperatives is covered by the

Economics, Statistics, and Cooperatives Service technical assistance program.

Applied research is conducted to give farmers relevant and expert assistance pertaining to their cooperatives. Studies concentrate on financial, organizational, legal, social, and economic aspects of cooperative activity.

Statistical data are collected to detect changes in structure, operations, and growth trends. The data helps identify and support applied research and technical assistance activities.

The agency serves as a central source of information of data about farmers' cooperatives in the United States. This information is communicated to the farmer or member through a variety of publications.

The Economics, Statistics, and Cooperatives Service efforts center on providing immediate response and leadership for more effective and efficient cooperative operations in the changing economic environment in which the family farmer operates.

Includes \$948 thousand in 1978 for activities previously financed from (in thousands of dollars): Agricultural Marketing Service, Marketing services, 37; Agricultural Stabilization and Conservation Service, Salaries and expenses, 185; Economic Research Service, 467; Foreign Agricultural Service, 148; and Statistical Reporting Service, 111.

Fiscal year 1978 pay costs for the World Food and Agricultural Outlook and Situation Board are included in the fiscal year 1978 proposed supplemental appropriation request of the following (in thousands of dollars): Agricultural Marketing Service, 2; Agricultural Stabilization and Conservation Service, 11; Foreign Agricultural Service, 9; Economic Research Service, 29; and Statistical Reporting Service, 6.

The World Food and Agricultural Outlook and Situation Board (WFAOSB) was established by Secretary's memorandum No. 1920 dated June 3, 1977, as authorized by

reorganization plan No. 2 of 1953, to provide a single focal point for the Nation's economic intelligence related to domestic and international food and agriculture.

The objectives of the WFAOSB program are to improve the consistency, objectivity, and reliability of outlook and situation material being disseminated to the public and to integrate and coordinate USDA domestic and international economic information assistance.

The WFAOSB plans to carry out these objectives through daily market surveillance and special analyses of international and domestic agricultural developments, direct participation in the planning of research programs supporting outlook and situation activities, and coordination of all departmental activities relating to weather and climate and remote sensing.

Note.—Excludes \$148 thousand in fiscal year 1978 and 1979 for activities transferred to the World Food and Agricultural Outlook and Situation Board. Comparable amount for fiscal year 1977, \$148 thousand, is included above.

The primary mission of the Foreign Agricultural Service is to help American farmers and traders take maximum advantage of the increasing opportunity to sell U.S. agricultural commodities abroad and to help increase U.S. farm income.

Four major functional objectives are pursued by the Foreign Agricultural Service to carry out its missions: (1) To achieve maximum foreign market access for American agriculture, (2) to provide information to assist U.S. agriculture's adjustment to short-term changes in world supply and demand, (3) to expand long-term foreign commercial markets for U.S. agricultural products, and (4) to safeguard American farmers and farm programs against unfair or injurious import competition.

Accordingly, the Service collects, analyzes, and disseminates worldwide agricultural economic intelligence to: (1) Provide American farmers and traders with information on world agricultural production and trade which they can use to adjust to short-term changes in world demand for U.S. agricultural products, (2) permit American farmers to produce at maximum efficiency for both domestic and foreign markets, and (3) provide U.S. Government policy decisionmakers with adequate information to make decisions safeguarding the U.S. agricultural community's interests.

General and special funds—Continued

FOREIGN AGRICULTURAL SERVICE—Continued

The Service also helps to develop long-term foreign commercial markets for U.S. farm products by: (1) Providing information and expertise on foreign markets, (2) achieving and retaining maximum access to foreign markets, (3) stimulating interest in exporting farm-grown products, (4) improving and coordinating promotional techniques, (5) sharing the financial risks inherent in exploring new markets, (6) providing essential trade services that cannot be undertaken by any single trade or produce group, and (7) lending "official" Government representation which is so often essential to conduct business abroad.

The pursuit of the FAS functional objectives is carried out within the framework of four individual program areas:

1. *International trade policy.*—The Service directs and coordinates Department responsibilities in international trade agreement programs and negotiations under the authority of the Trade Expansion Act. It identifies and strives to reduce foreign trade barriers to U.S. agricultural exports. Developments in foreign trade policies are examined and their effect on agricultural trade is reported with recommendations regarding action alternatives.

The Service recommends Department positions and participates in negotiations on trade agreements and international commodity agreements. It reviews and reports trade regulations of countries (primarily those signatory to the General Agreement on Tariffs and Trade) as to how such regulations affect the movement of U.S. agricultural products in world trade.

2. *Foreign market development.*—The Service administers programs concerned with the development of long-term foreign markets for agricultural products of the United States. The Service also coordinates interagency participation and action essential to program administration. These functions involve:

Providing foreign tradesmen with services necessary to build and maintain markets for U.S. agricultural products.

Developing a system of worldwide promotional programs on a commodity-by-commodity basis, in cooperation with national organizations of producers, processors, and exporters, and providing overall guidance to these organizations in carrying out cooperative programs.

Developing, operating, and evaluating a worldwide system of multicommodity promotional programs utilizing product exhibits, trade service and market information programs, and trade referral services to expand overseas markets.

Reviewing foreign marketing plans; providing technical assistance in their design; developing procedures and monitoring funds essential to their implementation; and evaluating program operation.

Cooperating with State and local organizations in programs designed to provide technical assistance to U.S. agricultural export firms and to stimulate participation of new U.S. cooperator groups in promotional projects.

Conducting sustained and systematic review of foreign markets by individual countries to ascertain new market opportunities for U.S. agricultural products and to develop long-range promotional plans for such markets.

3. *Foreign commodity analysis.*—Information essential to foreign marketing of specific U.S. agricultural commodities and to domestic planning is obtained, analyzed, and made available to U.S. farm and trade groups, as well as Govern-

ment. Selected agricultural commodities and foreign geographical areas of key importance are analyzed from a competitive standpoint with the ultimate objective of developing markets for U.S. agricultural products. The program area maintains a supporting role by providing statistical data and analyzed information to other program areas within the Service. Assistance is given to American exporters and foreign importers to bring them together and foster conditions favorable to trade.

The Service administers a program of import controls (in accordance with section 22 of the Agricultural Adjustment Act) on foreign farm products which would render ineffective or materially interfere with Department commodity programs. It is also responsible for administering import controls established under the 1964 Meat Import Act and section 204 of the Trade Expansion Act.

As the lead agency for the Large Area Crop Inventory Experiment (LACIE), the Service works closely with ASCS and ESCS to execute those aspects of the program which devolve upon the Department of Agriculture. The program is conducted under authority of the acts of August 28, 1954 (7 U.S.C. 1761) and March 4, 1909, as amended by the act of March 4, 1917. USDA works with the National Aeronautics and Space Administration (NASA) and the National Oceanographic and Atmospheric Administration (NOAA) in this coordinated technical effort to determine the utility and cost effectiveness of using earth resources satellites, meteorological, and climatological data to establish crop classification, field yields, acreages, and production; the program is oriented toward developing a handling, processing, and analysis file on these data categories.

4. *Agricultural attachés.*—The Service maintains agricultural attachés at 69 foreign posts to assist in the development of markets abroad for U.S. agricultural commodities. They work closely with numerous U.S. agricultural trade groups and maintain significantly placed contacts with foreign governments and traders to promote greater market access for U.S. agricultural products. Attachés carry out a comprehensive schedule of reporting foreign agricultural production, supply, demand, marketing, and trade policy developments to keep U.S. agriculture, industry, and Government currently informed.

Program changes for fiscal year 1979.—An increase of \$4,422 thousand is requested for the Foreign Market Development cooperator and FAS-sponsored promotional programs. The additional funds would be used primarily to develop and expand into new market areas such as East Europe, Middle East, Africa, and Latin America. An increase of \$713 thousand is also sought for the agricultural attaché program to offset continuing overseas inflation and to permit current level operation of existing attaché offices. The remaining increases requested are for higher costs of GSA space reimbursements and departmental working capital fund activities and pay cost annualization. A decrease of \$253 thousand is proposed in the International Trade Policy area resulting from a realignment of priorities.

¹ Includes capital investment as follows: fiscal year 1977, \$1 thousand; fiscal year 1978, \$1 thousand; fiscal year 1979, \$1 thousand.

Market development projects.—Foreign currencies generated by the sale of agricultural commodities under Title 1 of the Agricultural Trade Development and Assistance Act of 1954, as amended, as well as foreign currencies acquired by the United States from other sources, are used by the Foreign Agricultural Service to develop new foreign markets and expand existing markets for U.S. agricultural commodities, including cotton, dairy products and poultry, fruits and vegetables, grain and feed, livestock and livestock products, oilseeds and products, and tobacco.

The type of market development projects being carried out include sales promotion campaigns, trade fairs and exhibits, nutrition demonstrations, and market analyses. In fiscal year 1979 it is planned that the unobligated balance brought forward in this appropriation will be used to purchase those currencies necessary to carry out the program in excess currency countries. Dollar funds for

use in other countries are included in the appropriation Foreign Agricultural Service.

The mission of the International Development Staff (IDS) is to coordinate, plan, and direct the Department's efforts in international development and technical cooperation in food and agriculture. An important dimension of this mission is to coordinate the activities of USDA—in conjunction with other Government agencies, land-grant universities, international organizations, and other institutions. This includes direction of the Department's activities under agreement with the Agency for International Development (AID), Peace Corps, and other development assistance organizations, particularly agricultural technical assistance and training programs. The Staff participates with AID in the planning of agricultural development policy, in formulating technical assistance projects, and in the review and evaluation of agricultural assistance efforts. In performing these functions, the Staff works closely with other U.S. and international organizations to help them utilize the scientific and institutional competence of American agriculture in carrying out development assistance programs.

The Department's foreign technical assistance has heretofore been mainly funded by AID. During the past few years, however, the Department has entered into direct agreements with foreign governments and increasingly with various international organizations.

FOREIGN ASSISTANCE PROGRAMS

Facilities and funds of the Commodity Credit Corporation may by law be used in carrying out programs for exporting agricultural commodities.

Included in this category are the following activities carried out under the Agricultural Trade Development and Assistance Act of 1954, Public Law 480, 83d Congress, as amended: Financing sales of agricultural commodities for dollars or for convertible foreign currency on credit terms (titles I and III); and supplying agricultural commodities for dispositions abroad (Title II).

Factors determining availability of commodities for disposition under Public Law 480 are productive capacity, domestic requirements, farm and consumer price levels, anticipated commercial exports, and adequate carryover. No commodity is available for disposition under the act if the disposition thereof would reduce the domestic supply below that needed to meet domestic requirements, adequate carryover, and anticipated exports for dollars, unless the Secretary determines that some part of the supply should be used for urgent humanitarian purposes. No commodities may be made available except upon a determination that adequate storage facilities are available in the recipient country at the time of exportation, to prevent spoilage or waste and that the distribution will not be a substantial disincentive to the recipient country's domestic production.

In determining the reimbursement due the Corporation, commodities supplied from the Corporation's inventory, which were acquired under a domestic price support program, are to be valued at the export market price at the time of delivery, beginning in fiscal year 1978.

No agreements to finance sales under the authority of title I or programs of assistance under title II shall be entered into after December 31, 1981, and no agreements to finance sales of agricultural commodities under the authority of title I or donations under title II shall be made to North Vietnam, unless by an act of Congress authorizing such assistance, enacted after July 1, 1973.

The laws also authorize appropriations to be made to cover costs of such programs. When funds become available, advances are made to the Corporation for estimated costs. If the amounts appropriated are greater than actual needs, the excess is used to reduce future appropriation requests. If appropriations for title II are less than actual needs, other Corporation funds may be used temporarily to finance the balance of authorized costs.

1. Sale of agricultural commodities for foreign currencies and for dollars on credit terms (title I).—The Corporation finances all sales made pursuant to agreements concluded under title I, and may serve as the purchasing or shipping agent, or both, if the purchaser so requests. Sales are made to friendly countries—as defined in section 103(d) of the act—and must not displace expected commercial sales for cash dollars (secs. 103 (c) and (n)).

No agreement may be made to finance the sale of agricultural commodities to the government of any country which engages in a consistent pattern of gross violations of internationally recognized human rights or other flagrant denial of the right to life, liberty, and personal security unless the use of the commodities themselves or proceeds from their sale will be used for specific projects or programs which the President determines would directly benefit the needy people of that country. The agreement shall require a report of such uses to the President within 6 months after the date of the delivery of the commodities to that country.

The President, in entering into agreements for the financing of sales of high protein, blended, or fortified foods, may waive the repayment of the part of the product value attributable to the costs of processing, enrichment, or fortification. The impact of such action on other commercial and concessional sales of whole grains is required to be minimized and, where feasible, agreements containing this waiver will provide for sales of whole grains. To be entitled to this waiver, countries must give assurance that the benefits of such a waiver are to be passed on to the individuals receiving these foods, and have a reasonable potential for transition to commercial purchases of such foods.

General and special funds—Continued

PUBLIC LAW 480—Continued

Agreements may not be made under title I in any calendar year which call for an appropriation to reimburse the Corporation in excess of \$1.9 billion, plus unused prior years' authorizations.

Whenever practicable, terms of agreements must require payment at time of delivery of not less than 5% of the purchase price in dollars or in currencies convertible to dollars. These initial payments are applied against costs to reduce appropriation requests. Also, payment upon delivery in dollars or foreign currencies, to the extent that such currency is needed for payment of U.S. obligations and certain other purposes, may be required.

In accordance with the act, a progressive shift from foreign currency sales to dollar credit sales was completed by December 31, 1971. As authorized by the act, where the transition from foreign currency sales to dollar credit sales was not possible, convertible foreign currency credit sales are being made on terms which permit conversion to dollars at the exchange rate applicable to the sales agreement.

In the case of agreements to finance sales entered into under title I of the act, the Corporation will finance ocean freight charges only to the extent of the differential between U.S.-flag rates and foreign-flag rates when U.S.-flag vessels are required to be used and will not finance any portion of the ocean freight in any other case.

(a) *Financing sales of agricultural commodities for foreign currencies (title I).*—Agreements for sales of agricultural commodities for foreign currencies were made until December 31, 1971, to countries unable to expand commercial purchases because of a lack of dollar exchange.

Certain U.S. uses of foreign currencies, including foreign currency loan repayments, and certain foreign currency grants, are subject to the appropriation process. The Corporation is reimbursed for the dollar value of currencies so used. Proceeds from sales of foreign currencies and from dollar repayments of foreign currency loans are applied as a reduction in appropriation requests.

Section 509 of Public Law 86-500, approved June 8, 1960 (7 U.S.C. 1704b note) provides that at least 75% of the total cost of foreign military housing projects (unless otherwise specified) shall be paid from foreign currencies acquired under title I. Pursuant to 10 U.S.C. 2681(b), as amended, the estimate reflects transfer to the Corporation of \$6 million each year to liquidate amounts due, estimated at \$7,263 thousand in 1979.

(b) *Financing sales of agricultural commodities for dollars or convertible foreign currencies on credit terms (title I).*—Agreements for the financing of sales of U.S. agricultural commodities for dollars or convertible foreign currencies on credit terms are made with friendly countries and on dollar credit terms are made with United States and foreign private trade. They may provide for delivery in annual installments for not more than 10 years from the date of the agreement subject to the availability of the commodity. However, as a matter of practice, supply periods of agreements rarely extend beyond 2 years.

In negotiating the agreements, emphasis shall be placed on using the proceeds from the sale of commodities for purposes which directly benefit the poorest people of participating countries and which improve their capacity to participate in the development of the countries.

Private trade agreements must provide for projects to establish improved storage or marketing facilities or otherwise encourage private economic enterprise in friendly countries.

Countries meeting the poverty criterion established for International Development Association financing and which are affected by inability to produce or commercially purchase sufficient food for their immediate requirements are to receive not less than 75% of the food aid commodities allocated and agreed to be delivered in each fiscal year under title I financing agreements, unless the President certifies that such food assistance to other countries is required for humanitarian purposes or the required 75% allocation could not be used effectively to carry out humanitarian or development purposes of title I.

Payments are in dollars with interest at rates not less than the minimum required by section 201 of the Foreign Assistance Act of 1961, as amended, for loans made under that section. Payments are made in reasonable annual amounts over periods of not to exceed 20 years from the date of last delivery in each calendar year under the agreement, except that the first annual payment may be deferred for a period of not more than 2 years after such date of last delivery. Interest is computed from the date of such last delivery. As payments are received each year, they are applied against current costs to reduce the appropriation request.

Credit terms for convertible foreign currency credit sales are to be no less favorable to the United States than those for development loans made under section 201 of the Foreign Assistance Act of 1961, as amended. Currently, section 201 loans are made on the basis of payment up to 40 years with grace period of up to 10 years. Dollar payments, when received, are also applied to reduce appropriation requests.

Total agreements made since inception to September 30, 1977, amount to \$7,544 million cost value, including ocean freight for shipment on U.S. ships. Major commodities are wheat, cotton, oils, rice, and feed grains. Payments received during the period amount to \$1,439.5 million, of which \$948.1 million was applied to principal and \$491.4 million to interest.

Food for development program (title III).—The commodity estimates for title I include the cost of financing commodities furnished under food for development programs (title III). Under this title, available commodities may be furnished for periods of from 1 to 5 years, following a Presidential determination of country eligibility, formulation of approved development projects or activities, and subject to an annual review and report of activities and progress under each agreement.

Proceeds obtained from the sale of these commodities shall be held in a special account, where practicable, to be disbursed for such purposes as approved in the agreement with each country, and such disbursements shall be considered as payments for the purposes of section 103(b) of this Act. No other payment shall be required as part of any agreement to finance the sale of agricultural commodities under a food for development program.

Unless a Presidential waiver with an accompanying explanation of such action is reported to Congress, agreements entered into under title III shall have an aggregate value of not less than 5% for fiscal year 1978, 10% for fiscal year 1979, and 15% for fiscal year 1980 and succeeding fiscal years, of the aggregate value of all agreements entered into under title I for the corresponding fiscal year.

2. *Commodities supplied in connection with dispositions abroad (title II).*—Under title II, available Agricultural commodities are furnished to meet famine or other urgent or emergency relief need. Also, commodities are furnished to promote economic and community development in friendly developing countries, to combat malnutrition, and for needy people, and nonprofit school lunch and preschool feeding programs. They are furnished through friendly governments, private voluntary agencies, foreign nonprofit voluntary agencies if no such U.S.

agency is available, and intergovernmental organizations such as the United Nations World Food Program. The Food for Peace Act, in amending title II, expressed the sense of Congress that other advanced nations should be encouraged to make increased contributions for the purpose of combating world hunger and malnutrition, and that to achieve this objective, the United States should work to expand the World Food Program.

A minimum of 1.6 million metric tons of agricultural commodities shall be distributed in each of the fiscal years 1978 through 1980, of which not less than 1.3 million metric tons shall be through nonprofit voluntary agencies and the World Food Program, unless the President determines and so reports to Congress that such quantity cannot be used effectively for intended purposes or that such a quantity is not available. These minimum tonnages increase to 1.65 million and 1.35 million, respectively, in 1981; and 1.7 million and 1.4 million, respectively, in 1982 and each fiscal year thereafter.

Assistance to needy persons shall be directed, where practicable, toward community and other self-help activities designed to alleviate the causes of need for such assistance. To assure effective use of food commodities made available, indigenous workers shall be employed, to the extent feasible, to provide nutritional information and conduct food distribution programs in the most remote villages. To the extent feasible, priority in food distribution shall be given to those suffering malnutrition by giving priority, within food programs for preschool children, to the malnourished children, and to the countries' poorest regions.

The Agency for International Development is responsible for administering title II programs. However, the Corporation makes available the commodities or products requested for disposition under title II. Such commodities or products are made available from the Corporation's stocks of commodities or products acquired under its support program or are purchased from private stocks.

The Corporation is authorized to pay, with respect to commodities made available, the costs of acquisitions, packaging, processing, enrichment, preservation, fortification, transportation, handling, and other incidental costs incurred up to the time of delivery to U.S. ports. The Corporation also pays ocean freight charges, and transportation to points of entry other than ports in the case of landlocked countries, where carriers to a specific country are unavailable, where ports cannot be used effectively, or where a substantial savings in costs or time can be obtained, and ocean freight charges and general average contributions arising from ocean transport.

Approximately \$7.5 million each year may be used to buy foreign currencies accruing under title I of this act to meet costs directed to community and other self-help activities designed to alleviate the causes for the need for such aid. Such costs may not include personnel and administrative costs of cooperating sponsors, distributing agencies and recipient agencies.

Through December 31, 1977, appropriations totaling \$9,850 million were authorized. No programs of assistance shall be undertaken under this title during any calendar year which call for an appropriation of more than \$750 million to reimburse the Corporation. This limitation applies to costs incurred, including its investment in commodities (but only on the basis of export market price of commodities which were acquired under a price support program), plus any amount by which programs of assistance undertaken under this title in the preceding calendar year have called or will call for appropriations in amounts

¹ Includes capital investment as follows: 1977, \$207 thousand; 1978, \$207 thousand; 1979, \$207 thousand.

Note.—Excludes \$130 thousand in 1978 and in 1979 for activities transferred to Statistical Reporting Service. Also excludes \$185 thousand in 1979 for activities transferred to the World Food and Agricultural Outlook and Situation Board. A comparable amount for 1977 (\$176 thousand) is included above.

This account includes funds to cover expenses of programs administered by, and functions assigned to, the Service. The funds consist of direct appropriation, transfers from the Commodity Credit Corporation (CCC), and miscellaneous advances from other sources. This is a consolidated account for administrative expenses of national, commodity, State, and county offices.

The Kansas City Commodity Office and Management Field Office play an important role in administering support programs and the field operations stemming from producer loan and purchase agreements, inventory management, and merchandising activities.

The State committees are in general charge of all programs carried out in their respective States. Within the framework of national policy, they determine the policies to be followed and direct the adaptation of national programs to the State.

The Agricultural Stabilization and Conservation elected county committees are responsible for the local administration of programs. They make local program decisions and policies and appoint a county executive director who directs the office staff in handling the day-to-day detailed administrative work.

The programs and activities carried out by this Service include: Agricultural conservation program; emergency conservation measures; Water Bank Act program; Appalachian region conservation program; feed grain, wheat, and cotton programs; dairy and beekeeper indemnity programs; Wool Act program; and commodity support and related programs including acreage allotment and marketing quota programs.

The activities carried out by the Service fall within three major categories:

1. *Program formulation and appraisal.*—The supply adjustment, conservation, and commodity support programs, and the management and merchandising of commodities acquired under the support program, have a tremendous impact on the national and (to a lesser extent) the international economy. This activity provides for constant review of the effectiveness of these programs. It also provides for the analysis of data to formulate more effective programs.

2. *Operation of supply adjustment, conservation, and price support programs.*—This activity includes all functions dealing with the administration of programs carried out through the farmer committee system, including: (a) developing program regulations and procedures; (b) holding meetings with employees and producers to discuss new programs or changes in existing programs; (c) collecting and compiling basic data for individual farms; (d) establishing individual farm normal crop acreages, allotments, and yields; (e) notifying producers of established normal crop acreages, allotments, and yields; (f) determining farm marketing allocations; (g) handling appeals; (h) conducting referendums and certifying results; (i) accepting farmer certifications and checking compliance; (j) developing pooling agreements under which several farmers work jointly to solve a common conservation problem which cannot be solved by individual action; (k) issuing marketing cards so that production from the allotted acreage can be marketed without penalty; (l) processing producer requests for conservation cost-sharing; (m) processing commodity loan documents and issuing sight drafts; (n) making appraisals for disaster payments; and (o) processing deficiency payments and issuing sight drafts.

3. *Inventory management and merchandising.*—This activity includes: (a) overall management of CCC-owned commodities; (b) selling commodities; (c) donating com-

modities; and (d) accounting for loans and commodities. The total value of all commodities owned by CCC on September 30, 1977, was about \$984.9 million.

The volume of work in fiscal year 1977 under some of the major programs financed from this account is set forth below:

The primary objectives of the program are: (1) to help assure a continued supply of food and fiber necessary for strong and healthy economy and people, (2) to facilitate sound resource management systems through soil and water conservation, (3) to control erosion and sedimentation from agricultural land, (4) to control pollution from animal wastes, (5) to encourage voluntary compliance by agricultural producers with State and Federal requirements to solve point and nonpoint sources of pollution, (6) to improve water quality, and (7) to help achieve national priorities in the National Environmental Policy Act.

Cost sharing is authorized for annual and long-term agreements. Because of a declining interest in long-term agreements, the standard 3-10 year agreement has been modified, and, also, a shorter term agreement of 3-5 years will be offered with renewal benefits to extend the agreement up to 10 years if needed. On the shorter term agreements, the conservation plan of operation (CPO) may apply only to a portion of the farm rather than the entire farm. Since the Great Plains conservation program will be consolidated with the agricultural conservation program in 1979, the same type of long-term agreements available in the rest of the Nation will be available in the Great Plains areas as well.

The program is administered in each county by the ASC county committee, with review and approval by State ASCS committees and in consultation with other agencies. For the 1978 ACP, national practices and practice guidelines were provided to the States and counties for selection. States are to select the needed practices and the counties are to select from the State list. Other practices may be added by the counties if they are needed, but the practices must meet criteria for special practices set up in the national program.

The 1978 program is expected to serve 6.4 million acres and reduce soil loss by approximately 23 million tons. For the 1979 program, at the appropriation level of \$100 million, 3.5 million acres are projected to be served by pollution abatement and water conservation measures with a soil loss reduction through the application of soil conservation measures of approximately 12 million tons.

Loans from the Commodity Credit Corporation (CCC) were used to make advance payments to vendors for conservation materials and services (CMS) furnished to farmers and ranchers in those years in which the program was funded on the contract authority basis. Repayment of loans was made from balances of prior year appropriations or from new funds appropriated.

Since funding of this program in fiscal year 1979 will be on a no-year appropriation basis as authorized in the Food and Agriculture Act of 1977, CCC loans will not be necessary in fiscal year 1979 and future years.

The objectives of the Water Bank Program are to conserve, preserve, maintain, and improve the Nation's wetlands, increase waterfowl habitat in migratory waterfowl nesting and breeding areas in the United States, and secure recreational and environmental benefits for the Nation. The program was authorized by the Water Bank Act, approved December 19, 1970.

The Secretary of Agriculture, through designated ASC county offices, uses program funds to enter into 10-year agreements with landowners and operators for the conservation of specified wetlands. Provisions exist to renew agreements for additional periods. The Secretary, through ASCS county offices, makes annual payments on agreements.

In fiscal year 1979, USDA-ASCS plans to enter into approximately 450 agreements on 65,000 additional acres of wetlands. This is in addition to the 4,600 agreements that will have been signed with farmers and landowners on 503,000 acres designated by September 30, 1978. This would increase the acreage under agreement to approximately 568,000 acres by the end of fiscal year 1979.

The Cropland adjustment program was authorized by the Food and Agriculture Act of 1965 which expired with the 1970 crop year. Under this program, agreements for periods of 5 and up to 10 years were approved only in 1966 and 1967. The last of these agreements expired in fiscal year 1977.

EMERGENCY CONSERVATION MEASURES

For emergency conservation measures, to be used for the same purposes and subject to the same conditions as funds appropriated under this head in the Third Supplemental Appropriations Act, 1957, \$10,000,000, with which shall be merged the unexpended balances of funds heretofore appropriated for emergency conservation measures. (71 Stat. 176; Public Law No. 95-97, making appropriations for Agriculture and related agencies, 1978.)

This appropriation provides special funds for sharing the cost of emergency measures to deal with cases of severe damage to farm and rangelands resulting from natural disasters. The criteria under which assistance may be made available are set forth in the Soil Conservation and Domestic Allotment Act (16 U.S.C. 590(h)).

Assistance is made available to treat new conservation problems which (1) if not treated will impair or endanger the land, (2) materially affect the productive capacity of the land, (3) represent damage which is unusual in character and, except for wind erosion, is not the type which would recur frequently in the same area, and (4) will be so costly to rehabilitate that Federal assistance is or will be required to return the land to productive agricultural use. Also, assistance is available for measures to provide for or conserve water to be used for agricultural purposes during extreme drought conditions or other natural disasters.

Under the fiscal year 1977 program, cost-sharing assistance was provided to treat farmlands damaged by floods, tornadoes, hurricanes, and drought. Assistance was provided in 34 States, Puerto Rico, and Virgin Islands.

DAIRY AND BEEKEEPER INDEMNITY PROGRAMS

For necessary expenses involved in making indemnity payments to dairy farmers for milk or cows producing such milk and manufacturers of dairy products who have been directed to remove their milk or dairy products from commercial markets because it contained residues of chemicals registered and approved for use by the Federal Government, and in making indemnity payments for milk, or cows producing such milk, at a fair market value to any dairy farmer who is directed to remove his milk from commercial markets because of (1) the presence of products of nuclear radiation or fallout if such contamination is not due to the fault of the farmer, or (2) residues of chemicals or toxic substances not included under the first sentence of the Act of August 13, 1968, as amended (7 U.S.C. 450j), if such chemicals or toxic substances were not used in a manner contrary to applicable regulations or labeling instructions provided at the time of use and the contamination is not due to the fault of the farmer, and to beekeepers who through no fault of their own have suffered losses as a result of the use of economic poisons which had been registered and approved for use by the Federal Government, **[\$4,050,000] \$3,240,000: Provided, That none of the funds contained in this Act shall be used to make indemnity payments to any farmer whose milk was removed from commercial markets as a result of his willful failure to follow procedures prescribed by the Federal Government. (7 U.S.C. 135b note, 450 j-l; Public Law No. 95-113; Public Law No. 95-97, making appropriations for Agriculture and related agencies, 1978.)**

Under this program indemnification payments are made to dairy farmers, manufacturers of dairy products, and beekeepers.

The dairy indemnity program was authorized under 78 Stat. 508 in 1964, and has been extended through September 30, 1981, by the Food and Agriculture Act of 1977 (91 Stat. 913). Payments are made to farmers who are directed to remove their milk from commercial markets because the milk contains residues of chemicals which have been registered and approved for use by the Federal Government, of other chemicals, of nuclear radiation, or of nuclear fallout. The authority also provides that indemnification may be paid for cows producing such milk.

The Agricultural Act of 1970 (84 Stat. 1382) broadened the indemnification authority to include manufacturers of dairy products whose products become contaminated with residues of chemicals which have been registered and approved for use by the Federal Government.

Beekeeper indemnity payments were authorized by the Agricultural Act of 1970 (84 Stat. 1382) to beekeepers who, through no fault of their own, suffered loss from economic poisons which had been registered and approved by the Federal Government. This program has been extended through September 30, 1981.

FORESTRY INCENTIVES PROGRAM

For necessary expenses, not otherwise provided for, to carry out the program of forestry incentives, as authorized in sections 1009 and 1010 of the Agricultural Act of 1970, as added by the Agriculture and Consumer Protection Act of 1973 (16 U.S.C. 1509-1510), including technical assistance and related expenses, **[\$15,000,000]** \$10,000,000. This program was authorized by sections 1009 and 1010 of the Agricultural Act of 1970, as added by the Agriculture and Consumer Protection Act of 1973 (16 U.S.C.

1509-1510). The objective is to bring private nonindustrial forest land under intensified management, to increase timber production, and to assure adequate supplies of timber products.

The Forestry incentives program shares from 50 to 75% of the cost of tree planting and timberstand improvement. The percentage cost-shared depends on the rate set in a particular State and county by the Agricultural Stabilization and Conservation (ASC) Committee, after consulting with the State forester. The program is available in designated counties based on a Forest Service survey of total eligible private timber available for production of timber products. The program is administered by ASCS with technical assistance from Forest Service.

The Federal Crop Insurance Corporation, a wholly owned Government corporation, was created on February 16, 1938 (7 U.S.C. 1501-1520), to carry out the provisions of the Federal Crop Insurance Act. The purpose of this act is to promote the national welfare by improving the economic stability of agriculture through a sound system of crop insurance, and to provide the means for the research and experience helpful in devising and establishing such insurance.

Crop insurance offered to agricultural producers by the Corporation provides protection from losses caused by

natural hazards, such as insect and wildlife damage, plant diseases, fire, drought, flood, wind, and other weather conditions. It does not indemnify producers for losses resulting from negligence or failure to observe good farming practices.

The crop insurance programs are developed and analyzed in the Washington headquarters office and are administered in 14 regional offices. Sales and servicing of contracts at the county level is performed by private agents under contractual agreements with the Corporation and by Corporation employees hired on a permanent, part-time or WAE (when actually employed) basis. Detailed administrative and program accounting and statistical functions, as well as the underwriting and actuarial analysis work, are performed in Kansas City, Mo.

Budget program. The program for fiscal year 1979 will provide crop insurance protection to farmers amounting to approximately \$2,288,000 thousand on the following commodities: Apples, barley, beans, citrus, combined crop, corn, cotton, flax, grain sorghum, grapes, oats, peaches, peanuts, peas, raisins, rice, soybeans, sugar beets, sugarcane, sunflowers, tobacco, tomatoes, and wheat.

A review of disaster aid programs for farmers is underway and the administration is considering recommendations for eventually substituting insurance programs to meet needs for protection from natural hazards.

The following table compares the scope of the insurance operations planned for 1978 and 1979, as compared with 1977. Amounts in the 1977 column are actual, and pertain to the 1976 crop year. The 1978 column pertains to the 1977 crop year, and the 1979 column pertains to the 1978 crop year.

Financing.—The Corporation is authorized under the Federal Crop Insurance Act, as amended \$150 million in capital stock which has been totally subscribed and issued. Currently, legislation has been proposed to provide for an additional \$50 million in capital stock which would increase the authorization to \$200 million. The increase in authorization is necessary due to continuing yearly crop losses in the drought-stricken midwestern and southeastern States. Projections made of the preliminary 1977 crop losses show that should no additional losses be incurred, the Corporation will have a loss ratio of about 1.65 for the 1977 crop year.

Funds from the issuance of capital stock provide working capital for the Corporation. Receipts which are for deposit to this fund come mainly from premiums paid by farmers for crop insurance indemnity costs. The principle payments from this fund are for indemnities to insured farmers, the direct cost of adjusting crop losses, and a part of the administrative and operating expenses. However, the direct cost of loss adjustment and the administrative and operating expenses paid from the fund are not provided for in the premium rates (section 508(b) of the Federal Crop Insurance Act, as amended).

FEDERAL CROP INSURANCE CORPORATION FUND—Continued

Because of heavy 1977 crop year losses, and the practice of financing administrative and operating expenses and the direct cost of loss adjusters from premium income, the Corporation's capital has become impaired to the point where additional financing may have to be considered for fiscal year 1979 irrespective of action taken on the Corporation's pending proposed legislation which would provide authorization for additional capital stock.

The annual appropriation for a portion of the administrative and operating expenses of the Corporation is presented earlier in the budget.

Operating results and financial condition.—As of September 30, 1977, the Corporation reflected a deficit of \$85.7 million which is a change of minus \$65.9 million over the deficit of the year before. This resulted from heavy indemnity payments, administrative and operating expenses, loss adjustment costs and other expenses paid from the fund. Crop year 1976 premiums of \$90.9 million were lower than indemnities by \$51.5 million, resulting in a loss ratio of 1.57.

A 1.65 loss ratio is estimated for crop year 1977. Premiums of \$102.0 million are estimated to be lower than indemnities by \$66.2 million. For the crop years 1948 through 1976, premium income (\$962.9 million) exceeded indemnity costs (\$942.8 million) by \$20.1 million; the loss ratio for the period was .98. Premium income exceeded indemnity costs in 16 of the 28 years.

The following table summarizes the insurance operations by commodities for 1977, 1978, and 1979.

Note. Statutory obligations against borrowing authority include only borrowing from, or with the approval of Treasury. A sufficient amount of CCC's borrowing authority is required to be reserved to cover obligations to purchase notes, or other obligations evidencing loans, and accrued interest thereon, made by lending agencies and others. Such obligations, other obligations, contingent liabilities, and commitments do not become charges against the statutory borrowing authority until they result in borrowing from Treasury. Only that portion of borrowing authority is available which has neither been so reserved nor charged by actual borrowing.

The Corporation was created to stabilize, support, and protect farm income and prices, to help maintain balanced and adequate supplies of agricultural commodities, their products, foods, feeds, and fibers, and to help in their orderly distribution (15 U.S.C. 714-714p). It may make available materials and facilities required in connection with the production and marketing of agricultural commodities and may be used to administer and to temporarily finance numerous special activities.

The Corporation's capital stock of \$100 million is held by the United States. Under present law, up to \$14.5 billion may be borrowed from the U.S. Treasury to finance operations.

Budget assumptions.—The following general assumptions form the basis for the Corporation's 1978 and 1979 budget estimates: (a) Production and national income will rise

both in 1978 and 1979 from the present level; (b) generally, exports of agricultural commodities in 1979 will be slightly higher than 1978 levels; (c) yields for the 1978 crops are based on recent averages adjusted for trend; (d) acreage allotments and marketing quotas will be in effect for the 1978 crops of peanuts, ELS cotton, and certain kinds of tobacco; (e) acreage allotments but no marketing quotas will be in effect for rice; and (f) a set-aside program for the 1978 crops of feed grains, and wheat will be in operation. Payments on these commodities will be based on an established or target price if the higher of the market price received by farmers or the loan rate is below such price.

It is difficult to forecast with accuracy requirements for the year ending September 30, 1979, since the projections are subject to complex and unpredictable factors such as weather, other factors which affect the volume of production of crops not yet planted, feed and food needs here and overseas, and available dollar exchange.

A point estimate is required for presentation in the budget; however, due to the significant impact of changes in worldwide weather and production, a range of estimates should be considered when evaluating the commodity program projections. Because of this, the Department has prepared range estimates to reflect the possible effects of changing world-wide conditions affecting commodity programs. These ranges will be released separately by the Department.

PROGRAMS OF THE CORPORATION

The basic functions of the corporation include the following programs for which appropriations are made for net realized losses sustained (in thousands of dollars):

Program	1979 estimate		
	Gross obligations	Outlays	Net realized loss for year
Short-term export credit sales.....	1,500,000	342,964	-----

Total.....	10,980,409	4,275,895	3,172,638

Support and related programs.—The Corporation provides price support to producers for agricultural commodities through loans, purchases, payments, and other means. This is done mainly under the Commodity Credit Corporation Charter Act (15 U.S.C. 714 et seq.) and the Agricultural Act of 1949 (7 U.S.C. 1421 et seq.), as amended by the Agricultural Act of 1970 (84 Stat. 1358), the Agriculture and Consumer Protection Act of 1973 (87 Stat. 221), the Rice Production Act of 1975 (90 Stat. 181), and the Food and Agriculture Act of 1977 (91 Stat. 913), approved September 29, 1977.

Support is mandatory for the basic commodities—corn, cotton, wheat, rice, peanuts, and tobacco. The Agricultural Act of 1949 also requires support of the following nonbasic commodities: honey, milk, barley, oats, rye, and grain sorghum. The National Wool Act of 1954, as amended (7 U.S.C. 1781-87), requires support for wool and mohair. The Food and Agriculture Act of 1977 requires support of the 1977 and 1978 crops of sugar beets and sugarcane and the 1978-81 crops of soybeans. Support for other nonbasic commodities is discretionary. The support program may also include operations to remove

and dispose of surplus agricultural commodities in order to stabilize prices at levels not in excess of those permissible by law.

The principal methods of providing support are loans to and purchases from producers. With limited exceptions, loans made on commodities are nonrecourse. The commodities serve as collateral for the loan and on maturity the producer may deliver or forfeit such collateral to satisfy his obligation without further payment.

Direct purchases are also made from processors as well as producers, depending on the commodity involved. Also, special purchases are made under certain laws for the removal of surpluses; for example, the act of August 19, 1958, as amended (7 U.S.C. 1431 note), and section 416 of the Agricultural Act of 1949, as amended (7 U.S.C. 1431).

For feed grains, rice, wheat, and upland cotton, producers may receive support through Government payments in addition to Commodity Credit Corporation loans and purchases. For extra-long staple cotton, producers may receive payments in addition to loans. Producers of feed grains, rice, wheat, and upland cotton must comply with acreage set-aside provisions (hereinafter described), if, in effect, in order to be eligible for loans, purchases, and payments. Producers with interests in more than one farm must comply with set-aside provisions on all farms to be eligible for program benefits. The total amount of payments which a person is entitled to receive under one or more of the annual programs for feed grains, wheat, and upland cotton for the 1978 crops of these commodities shall not exceed \$40 thousand and for the 1979 crops shall not exceed \$45 thousand. For rice producers, the limitation is \$52,250 for the 1978 crop year and \$50 thousand for the 1979 crop year. The combined payment limitation for feed grains, wheat, upland cotton, and rice for the 1980 and 1981 crops shall be \$50 thousand.

The Agricultural Act of 1949, as amended, and as further amended by the Agriculture and Consumer Protection Act of 1973, and the Food and Agriculture Act of 1977, established target prices for three major commodities—wheat, feed grains, and upland cotton; set minimum loan rates for wheat and feed grains; and established the loan level for upland cotton. Government payments for each of the three commodities are required when the target price for the commodity exceeds the national average market price or the loan rate, whichever is higher. For the 1978 crop, the target price for wheat will be \$3.00 or \$3.05 per bushel depending on the amount of production; the 1978 crop target price for corn will be \$2.10 per bushel, with target prices for grain sorghum and, if designated by the Secretary, barley and oats, to be established at a level which is fair and reasonable in relation to the target established for corn. The 1978 crop target price for upland cotton will be adjusted from the previous year on the basis of the change in the 2-year moving average of variable, machinery ownership, and general farm overhead costs, but shall not be less than 52 cents per pound. The target prices for these commodities will be adjusted annually beyond 1978 to reflect cost of production changes. When necessary to maintain domestic and export markets, loan rates for wheat and feed grains may be adjusted downward depending on the relationship of the market price to the loan rate. If the yearly national average price of wheat and corn is within 105% of the loan rate, the following year's loan rate could be decreased up to 10%, but never below the minimum loan level. If the loan rate is adjusted downward,

the target price shall be adjusted upward to compensate for any farm income loss which could result from the lowered loan level. In addition, the 1949 act, as amended, provides for making disaster payments for 1978 and 1979 crops to producers who are prevented from planting feed grains, wheat, or upland cotton because of a natural disaster or condition beyond the control of the producers or who, because of such a disaster or condition, harvest less than a specified quantity. Disaster payments for these commodities are based on acreage planted for harvest.

The Rice Production Act of 1975 and the 1949 act, as amended, and as further amended by the 1977 act, established a target price for rice. Government payments are required to be made to cooperators when the target price for rice exceeds the national average market price or the loan rate, whichever is higher. For the 1978 crop, the target price for rice will be adjusted from the previous year on the basis of the change in the 2-year moving average of variable, machinery ownership, and general farm overhead costs. The loan rate may be adjusted downward, in order to maintain domestic and export markets, but never below the minimum loan level. In addition, the act provides for making disaster payments for 1978 and 1979 crops to producers who are prevented from planting rice or other nonconserving crop because of a natural disaster or condition beyond the control of the producers or who, because of such a disaster or condition, harvest less than a specified quantity within producer allotments.

Disaster payments for the 1977 crops of wheat, feed grains, rice, and upland cotton are exempt from any payment limitation in accordance with Public Law 95-156, and disaster payments on the 1978 and 1979 crops of these commodities are exempt from any payment limitation under provisions of the 1977 act.

A new peanut program was established for the 1978-81 crops providing for a two-price system for peanuts. For production of peanuts under poundage quotas, minimum support rates are specified, subject to increases on the basis of the index of prices paid by farmers and other factors. For production of additional peanuts up to the acreage allotment, the Secretary may set lower support rates taking into consideration projected crushing and edible peanut export prices.

A loan or purchase program was established under the 1977 act for the 1977 and 1978 crops of sugar beets and sugarcane at a level between 52.5% and 65% of parity. The Secretary announced regulations for a 1977 crop sugar loan program on November 8, 1977. The Secretary may suspend operation of a price support program at such time as he determines there is an international sugar agreement in effect which would maintain a U.S. raw sugar equivalent price of not less than 13.5 cents per pound. An interim price support payment program, which was effective September 15, 1977, was carried out with respect to sugar marketed prior to the implementation of the loan program.

In support operations, normal trade facilities are used to the maximum extent practicable. Cooperatives and financial institutions are used in lending activities.

Besides the charter act and laws mentioned above, many other laws are applicable to the disposition through sales and donations of commodities acquired under the support program.

For accounting purposes, the Corporation credits to the support program proceeds of commodities sold from its stocks, including those disposed of through special activities.

Commodity export.—The Corporation promotes the export of agricultural commodities and products through sales, payments, extension of credit, assumption of certain risks, and conduct of other operations with respect to the exportation of commodities. Such commodities and products may be those held in private trade channels as well as those acquired by the Corporation. These programs are carried out under the authority contained in the Corporation's charter, particularly section 5 (d) and (f), and in accordance with specific statutes where applicable. Export sales on long-term credit are financed by the Corporation under the Agricultural Trade Development and Assistance Act of 1954 (Public Law 480), as amended, although such sales of commodities owned by the Corporation may also be made under its charter authority.

The activities described below are illustrative of those conducted under this program during 1978.

The Corporation conducts an export credit sales program to maximize exports of agricultural commodities and products under which it finances, for a period of not to exceed 3 years, commercial export credit sales by exporters of agricultural commodities obtained either from Corporation inventories or from private stocks. These commercial transactions are financed under the Corporation's charter authority and section 4 of the Food for Peace Act (7 U.S.C. 1707a) and are to be distinguished from the long-term credit contracts involving foreign assistance authorized by the Agricultural Trade Development and Assistance Act of 1954, as amended. Section 4 of the Food for Peace Act authorizes appropriations to reimburse the Corporation annually for its actual costs incurred or to be incurred under this program.

When necessary to encourage export movement from free-market supplies, as well as from its own stocks, the Corporation has made payments on exports of agricultural commodities. The rate of payment generally was the difference between the prevailing world export sales price and the domestic market price. The export payment programs for wheat, rice, and tobacco were discontinued during 1972 and 1973; but final payments on some tobacco export contracts (pre-1972 crop) were not made until 1977. Export payments on these or other commodities could be reinstated if needed to compete in world markets.

CCC guarantees, for a fee, payments due U.S. exporters under deferred payment sales contracts which may extend payments up to 36 months. Under its noncommercial risk assurance program, CCC issues assurance contracts

after receiving written application from the exporter. The risk to CCC extends from date of export to the end of the deferred payment period covered in the export sales contract and covers only that portion of the payments agreed to in the assurance agreements. Rates for such agreements shall be determined by the length of the deferred payment period, the degree of risk assumed by CCC, and other factors which are believed to be pertinent. The assurance proceeds are assignable only to U.S. banks or financial institutions.

To help develop or expand foreign markets, the Corporation may furnish farm commodities and products for samples or exhibits at international trade fairs and for use abroad in testing consumer acceptance and commercial market potentials.

Storage facilities.—The Corporation conducts a program to provide storage adequate to fulfill its program needs. The program is conducted pursuant to sections 4 (h) and (m), and 5 (a) and (b) of the Commodity Credit Corporation Charter Act, as amended by the Food and Agriculture Act of 1977.

Although the Corporation has authority to buy bins (in storage-short areas) and equipment for the care and storage of commodities owned by the Corporation or under its control, this authority to purchase bins has not been exercised since 1956. The Corporation makes secured loans of up to \$50 thousand for the purchase, construction, or remodeling of facilities for storage and care of dry or high moisture commodities on the farm. Such loans are repayable over a period not to exceed 10 years. The Corporation may also guarantee the placement of its inventories to encourage the building of commercial storage, and undertake other operations necessary to provide storage adequate to carry out the Corporation's programs.

Supply and foreign purchase.—The Corporation procures from domestic and foreign sources food, agricultural commodities, and products and related materials to supply the needs of Federal agencies, foreign governments, and private and international relief agencies such as CARE, Church World Services, Catholic Relief, et cetera. It similarly procures or aids in the procurement of such foods, commodities, products, and material for sale to meet domestic requirements during periods of short supply or to stabilize prices or facilitate distribution. Through purchases, loans, sales, or other means the Corporation may also make available materials and facilities needed for the production and marketing of agricultural commodities. This program is conducted under section 5 (b) and (c) of the Commodity Credit Corporation Charter Act.

Purchases for other Federal agencies of commodities not in the Corporation's stocks has been the main activity. Purchases of limited quantities of breeder, foundation, and registered seeds of improved varieties of grasses and legumes are made through production contracts in order to assure supplies thereof for farmers. No foreign purchases have been made in recent years.

Section 4 of the act of July 16, 1943 (15 U.S.C. 713a-9), requires that the Corporation be fully repaid from funds of other agencies for services performed, losses sustained, operating costs incurred, or commodities bought or delivered to or on behalf of any other Federal agency. Operations not subject to section 4 may involve losses if such are necessary to the accomplishment of the objectives of the particular operation.

Set-aside program.—The Agricultural Act of 1970 (as amended by the Agriculture and Consumer Protection Act of 1973) and the Food and Agriculture Act of 1977

tion, set-aside programs on the 1971 through 1981 crops of wheat, feed grains, and upland cotton if he determines that otherwise the total supply of agricultural commodities will likely be excessive. The Rice Production Act of 1975 and the Food and Agriculture Act of 1977 provide authority for a set-aside program for the 1976 through 1981 crops of rice.

There were no set-aside programs for the 1974 through 1977 crops of wheat, feed grains, and upland cotton, nor for the 1977 crop of rice. A 20% set-aside program will be in effect for the 1978 crop of wheat, and a 10% set-aside program will be in effect for the 1978 crops of corn, grain sorghum, and barley.

If a set-aside is in effect for any such commodity, producers must, as a condition of eligibility for loans, purchases, and payments on such commodity, set-aside and devote to approved conservation uses an acreage of cropland equal to a specified percentage and otherwise comply with program requirements. Participants in a set-aside program are eligible for a small additional payment for permitting public access to set-aside acreage.

Land diversion payments.—To assist in adjusting the acreage of commodities to desirable goals, the Secretary is authorized by the Agricultural Act of 1970, as amended, to make land diversion payments, through the Corporation, to producers who devote to approved conservation uses acreages of cropland in addition to those required to be so devoted under the set-aside programs.

Wheat certificate program.—The Food and Agriculture Act of 1977 continues the suspension, through May 31, 1982, of the requirement of section 379d of the Agricultural Adjustment Act of 1938, as amended, for processors to purchase domestic wheat marketing certificates equivalent to the bushel quantity of wheat used to manufacture food products.

Grain reserves.—A producer-held food grain reserve program for wheat which provides 3-year extended loans to producers was announced in April 1977. This program was later expanded to include feed grains. Producers will receive annual storage payments under the contract. Reserve goals are 9 million metric tons of wheat and 17-19 million metric tons of feed grains. Program provisions establish various market price levels when interest is charged, storage payments cease, and loans are called.

The President is encouraged in the Food and Agriculture Act of 1977 to enter into negotiations with other nations to develop an international system of emergency food reserves to provide for humanitarian food relief needs. An international emergency food reserve, if authorized by law, would be expected to contain such quantities of grain as may be specified in the enabling legislation. If an international food reserve agreement is negotiated, the maximum level of reserves would be adjusted to correspond with U.S. obligations under the convention. Stocks for the reserve could be accumulated and replenished either through purchases on the open market or through grain acquired by CCC under its price support operations.

Cotton research and promotion.—Under section 610 of the Agricultural Act of 1970, as amended, the Corporation, through the cotton board, and upon approval of the Secretary, entered into agreements for cotton market development, research, and sales promotion programs, programs to aid in the development of new and additional markets, marketing facilities, and uses for cotton and cotton products. Section 1 of the act of July 14, 1976, repealed section 610 effective October 1, 1977.

Disaster reserve.—Under section 813 of the Agricultural Act of 1970, as amended by the Agriculture and Consumer Act of 1970, as amended by the Agriculture and Consumer Act of 1973, the Secretary is authorized to conduct, through the Corpora-

Protection Act of 1973, and the Food and Agriculture Act of 1977, the Secretary shall establish, maintain, and dispose of a separate reserve of inventories of not to exceed 75 million bushels of wheat, feed grains, and soybeans for the purpose of alleviating distress caused by a natural disaster. The Secretary shall acquire such commodities through the price support program. When no wheat, feed grains, or soybeans are available through the price support program at locations where they may be economically utilized, the Secretary is authorized to purchase such commodities as well as hay or livestock forages through CCC facilities as are needed. In order to rotate, distribute, and locate reserves, such reserves may be sold at equivalent prices. The Secretary may use the Commodity Credit Corporation and shall utilize usual and customary channels, facilities, and arrangements of trade and commerce to the maximum extent possible. Appropriations are authorized for sums necessary to carry out the purposes of this section. Costs for this activity are included in the CCC appropriation reimbursement for net realized losses.

Emergency feed program.—The Secretary is authorized in section 1105 of the Food and Agriculture Act of 1977 to implement a program to assist producers in preserving and maintaining livestock in case of a natural disaster. The eligible livestock owner is reimbursed for up to 50% of the cost of feed purchased.

Special grazing and hay program.—The Food and Agriculture Act of 1977 provides that for the 1978–81 crops, a producer may designate up to 40% or 50 acres of his acreage, whichever is greater, which he intends to plant to wheat, feed grains, or upland cotton for harvest, to be planted to wheat (or another commodity other than corn or grain sorghum) and used for grazing or for hay. The Secretary shall pay the producer for participating in the program but the producer shall not be eligible for any other payment or price support on the designated acreage.

Pilot research funding for industrial hydrocarbons.—The Secretary is directed in section 1420 of the 1977 act to formulate and carry out a research and marketing program for the production of industrial hydrocarbons and alcohol from agricultural commodities and forestry products. Commodity Credit Corporation shall guarantee loans of up to \$15,000 thousand each for not more than four pilot projects, for up to 20 years. In order to insure a dependable supply of agricultural commodities for such pilot projects, the Secretary is authorized to enter into long-term contracts, not to exceed 5 years, to supply agricultural commodities at mutually agreed upon prices, either from Commodity Credit Corporation stocks or through purchases. No loan guarantees are included in the budget for fiscal year 1979.

Administrative expenses.—The Corporation carries out its functions through utilization of employees and facilities of other Government agencies. Administrative expenses are incurred for the services of: the Agricultural Stabilization and Conservation Service, the Agricultural Marketing Service, the Foreign Agricultural Service, Office of the General Sales Manager, and other agencies of the Department engaged in the Corporation's activities; the General Accounting Office for audit; and the General Services Administration for space. Estimates for 1979 include a limitation of \$50.1 million on administrative expenses, including a reserve of not less than 7% for contingencies.

The requested authorization does not include administrative expenses in connection with the wool and mohair program under the National Wool Act of 1954, as amended, because they are included with the cost of this program under special activities.

Nonadministrative expenses.—Expenses for acquisition, operation, maintenance, improvement, or disposition of property which the Corporation owns or in which it has an interest have been treated as program expenses rather than administrative expenses. Such program expenses include inspection, classing, and grading work performed on a fee basis by Federal employees or Federal- or State-licensed inspectors; work relating to CCC programs performed on a contract or fee basis by Agricultural Stabilization and Conservation Service; and special services per-

formed by other Federal agencies within and outside this Department.

Most of these general nonadministrative expenses, including storage and handling, transportation, inspection, classing, and grading and resale payments, are included in program costs. They are shown in the program and financing schedule in the entry entitled "Storage, transportation, and other costs not included above." The item "Nonadministrative expense," in the schedule, covers part of the expenses of ASCS county offices for work related to programs of the Corporation, other Agricultural Stabilization and Conservation Service expenses offset by revenue, custodian, and agency expense of the Federal Reserve banks and lending agencies, and miscellaneous costs.

The Corporation receives reimbursement for grain requisitioned pursuant to Public Law 87-152 (7 U.S.C. 447-449) by the States from Corporation stocks to feed resident wildlife threatened with starvation, through the appropriation reimbursement for net realized losses. The Corporation also obtains recovery through this appropriation for the funds transferred to the Agricultural Research Service pursuant to the Department of Agriculture and Related Agencies Appropriation Act of 1964, for cost of production research and other related research designed to reduce surplus commodities held by the Corporation.

SPECIAL ACTIVITIES

These activities are carried out under authority of section 5(g) of the Corporation's charter act and specific statutory authorizations or directives with respect thereto which are currently in effect or which may subsequently be enacted.

A summary of such current activities not included under other designated activities is as follows (in thousands of dollars):

Item	1979 estimate	
	Gross obligations	Outlays (reimbursable)
(1) Sale of agricultural commodities for foreign currencies.....		-95,000
(2) Sale of agricultural commodities for dollars on credit terms.....	840,273	590,673
(3) Commodities supplied in connection with dispositions abroad.....	573,006	573,006
(4) National Wool Act.....	38,655	38,655
(7) Loans for conservation and insurance purposes.....		-50,000
Total.....	1,451,934	1,057,334

The Corporation receives appropriations or reimbursement for cost of these activities as described under each.

To the extent that sufficient appropriations are not provided in advance, expenditures under the Agricultural Trade Development and Assistance Act of 1954, as amended, are made by the Corporation subject to reimbursement from subsequent appropriations authorized for such purpose.

Activities currently being carried out are as follows (see Foreign Assistance programs for details of items (1)-(3)):

(1) *Sale of agricultural commodities for foreign currencies (title I, Public Law 480).*

(2) *Sale of agricultural commodities for dollars on credit terms (title I, Public Law 480).*

(3) *Commodities supplied in connection with dispositions abroad (title II, Public Law 480).*

(4) *National Wool Act.*—Under the National Wool Act of 1954, as amended and as further amended by the Food and Agriculture Act of 1977, support of prices of wool and

mohair is mandatory. The Corporation makes payments to producers in order to bring the national average price received by all producers up to the support price required under the act.

Total payments made under the National Wool Act cannot at any time exceed an amount equal to 70% of the accumulated totals, as of the same date, of the gross receipts from import duties collected on and after January 1, 1953, on wool and wool manufactures. Actual or estimated payments compared with this limitation are as follows (in thousands of dollars):

Funds of the Corporation are used to carry on this program. For the purpose of reimbursing the Corporation, section 705 of the act appropriates each fiscal year an amount equal to amounts expended by the Corporation during the preceding year and to amounts expended in prior fiscal years not previously reimbursed, but not to exceed an amount equal to 70% of the gross receipts from duties collected on wool and wool manufactures during the calendar year preceding the fiscal year.

(5) *Grain for migratory waterfowl feed.*—To prevent damage of crops by migratory waterfowl, the Corporation is directed to furnish to the Secretary of the Interior (7 U.S.C. 442-445) such grain acquired through support operations and certified by the Corporation as available for such purposes or in such condition as to be undesirable for human consumption, as the Secretary of the Interior shall requisition. When used this appropriation item is included under that department to reimburse CCC.

(6) *Surplus grain for migratory birds.*—Under Public Law 87-152, approved August 17, 1961 (7 U.S.C. 448) the Secretary of the Interior may requisition grain of the Corporation to feed starving migratory birds. When used this appropriation is included under that department to reimburse CCC.

(7) *Loans for conservation and crop insurance purposes.*—Under section 391(c) of the Agricultural Adjustment Act of 1938, as amended (7 U.S.C. 1391(c)), the Corporation may loan to the Secretary not to exceed \$50 million annually to purchase conservation materials and services and to make crop insurance premium advances. Repayments of the loans for conservation materials and services plus interest are made from unobligated balances of prior appropriations or from new funds appropriated for the agricultural conservation program. Funds of the Federal Crop Insurance Corporation would be used in repaying loans made for crop insurance premium advances.

FINANCING

Borrowing authority.—The Corporation has an authorized capital stock of \$100 million held by the United States and authority to borrow up to \$14.5 billion, under present law.

Funds are borrowed from Treasury and may also be borrowed from private lending agencies and others. The Corporation reserves a sufficient amount of its borrowing authority to purchase at any time all notes and other obligations evidencing loans made by such agencies and others. All bonds, notes, debentures, and similar obligations issued by the Corporation are subject to approval by the Secretary of the Treasury as required by the act of March 8, 1938 (15 U.S.C. 713a-4).

Interest on borrowings from the Treasury (and on capital stock) is paid at a rate based upon the average interest rate of all outstanding marketable obligations (of comparable maturity date) of the United States as of the preceding month. Interest is also paid on other notes and obligations at a rate prescribed by the Commodity Credit Corporation and approved by the Secretary of Treasury.

The Department of Agriculture and Related Agencies Appropriation Act, 1966, made provision for terminating interest after June 30, 1964, on the portion of the Corporation's borrowings from the Treasury equal to the unreimbursed realized losses recorded on the books of the Corporation after the end of the fiscal year in which such losses are realized.

The computation of the transfer from interest-bearing to non-interest-bearing capital is (in thousands of dollars):

Item	1977 actual	1978 estimate	1979 estimate
Realized deficit not previously reimbursed, start of year	1,590,046	1,515,242	4,425,834
Less appropriations for year	-899,053	-524,342	-990,900
Total non-interest-bearing, end of year	690,993	990,900	3,434,934

On the basis of the budgetary assumptions, the estimated requirements indicate a need for an increase in statutory borrowing authority in 1979, as shown in the table below. Amending legislation will be proposed to increase the borrowing authority of the Corporation. See "Legislative Program" (end of this Chapter) for additional information.

POSITION WITH RESPECT TO BORROWING AUTHORITY,
END OF YEAR

Item	[In thousands of dollars]		
	1977 actual	1978 estimate	1979 estimate
Statutory borrowing authority	14,500,000	14,500,000	14,500,000
Deduct: Borrowings from Treasury	6,128,457	13,093,961	16,636,838
Total borrowing authority in use	6,128,457	13,093,961	16,636,838
Net statutory borrowing authority available	8,371,543	1,406,039	-2,136,838

Note.—A sufficient amount of the borrowing authority is required to be reserved to cover obligations to purchase notes or other obligations and accrued interest thereon, evidencing loans made by lending agencies and others. Such obligations, however, as well as accounts payable, accrued liabilities and other outstanding obligations not reflected on this table, do not become charges against the statutory borrowing authority until they result in borrowings from the Treasury.

Contract authority.—Support and other programs required by statute may result in the Corporation incurring obligations in excess of available funds and borrowing authority. Such obligations are liquidated from subsequent appropriations and other funds which may become available to the Corporation. Any increase in obligations in excess of available fund resources is reported as contract authority in the year involved; a decrease is reported as the application of appropriations and other funds to liquidate the authority. The budget reflects an increase of \$1,529 million in 1978, and an increase of \$4,031 million in 1979.

Appropriations.—Under section 2 of Public Law 87-155 (15 U.S.C. 713a-11), annual appropriations are authorized for each fiscal year to reimburse the Corporation for net realized losses incurred as of the close of each year.

The realized losses for 1977 subject to reimbursement were \$824.2 million, and the prior cumulative losses not yet appropriated for were \$166.7 million. An appropriation of \$990.9 million in fiscal year 1979 would fully reimburse the Corporation for its unreimbursed realized losses through September 30, 1977.

The special activities are financed as indicated in the program descriptions above. In addition to certain reimbursements from other agencies, appropriations are made for the National Wool Act (see above) and for foreign assistance programs (see p. 131).

Deficit.—The net realized losses of the Corporation have previously been reimbursed as follows (in thousands of dollars):

The Rural Electrification Administration was organized to carry into effect the loan programs authorized by the Rural Electrification Act of 1936, as amended. The Administration conducts two capital investment programs: (1) The rural electrification program to provide electric service to farms and other rural establishments; and (2) the rural telephone program to furnish and improve telephone service in rural areas.

Public Law 93-32, approved May 11, 1973, amended the Rural Electrification Act by establishing the Rural Electrification and Telephone Revolving fund (RETRF), with initial assets amounting to about \$7.8 billion. This act also removed budget authority and outlays of the RETRF from the budget totals of the U.S. Government. Schedules showing the activity of the RETRF are included in part IV, detailed estimates of Off-Budget Federal Entities.

Public Law 94-570, approved October 20, 1976, amended the Rural Electrification Act, changing the statutory criteria used in determining eligibility for 2% insured loans. The change in criteria corrects unintended inequities resulting from Public Law 93-92, which amended the Rural Electrification Act in May 1973, and brings the number of borrowers eligible for the special rate more in line with Congressional intent. The legislation also transferred into the revolving fund in fiscal year 1977 \$455,634,525 in borrowing authority carried over from the fiscal year 1973 authorization.

SALARIES AND EXPENSES

For administrative expenses to carry out the provisions of the Rural Electrification Act of 1936, as amended (7 U.S.C. 901-950(b)), including not to exceed \$500 for financial and credit reports, funds for employment pursuant to the second sentence of section 706(a) of the Organic Act of 1944 (7 U.S.C. 2225), and not to exceed \$150,000 for employment under 5 U.S.C. 3109, **[\$22,567,000]** \$24,833,000. The Rural Electrification Administration, under authority of the Rural Electrification Act of 1936, as amended, makes insured loans and guarantee loans made by other qualified lenders to rural electric and telephone borrowers for the purpose of extending and improving electric and telephone service in rural areas. The Rural electrification and telephone revolving fund, established by Public Law 93-32, approved May 11, 1973, is the source of financing for the insured loans, while the Federal Financing Bank is the primary source for the loan guarantee financing. In the electric program most of the insured loans are made concurrently with supplemental financing provided by the National Rural Utilities Cooperative Finance Corporation (CFC) or some other supplemental financing source. In the telephone program supplemental financing is provided primarily through the Rural Telephone Bank. The Bank utilizes the employees and facilities of REA and the Office of the General Counsel on a part-time basis without cost to the Bank.

In addition, in order to protect the Government's loan security on over \$20 billion of outstanding loans and guarantees made to borrowers, to assure that construction and operation of the electric and telephone systems conform to approved standards, and that the systems continue to provide reliable service at the lowest possible cost to the consumer, REA furnishes business management

and technical assistance on a regular basis, as well as upon special request, to its borrowers. This objective is carried out through regulations, personal visits to the borrowers, and by training. REA has personnel in the Washington office and a field staff who have expertise in the electric or telephone industry and who are available to assist borrowers in specialized areas.

The purpose of the Rural development grant programs is to incorporate the following grant appropriation accounts:

Rural water and waste disposal grants.—The 1979 proposed program level of \$265,000 thousand would help to provide assistance for new and improved rural water and waste disposal systems, with emphasis being placed on existing systems, at a cost that is reasonable to the users and at the same time would promote the orderly growth of rural areas. In carrying out the Rural water and waste disposal grant program at the 1979 proposed program level, the Agency would assign priority to those applications from communities of less than 5,500 population.

Business and industrial development grants.—The 1979 proposed program level is \$10,000 thousand. At this level, the Business and industrial development grant program will assist in the development or improvement of business

and industry in rural areas by stimulating economic growth, creating employment opportunities, and improving the environmental climate.

Rural development planning grants are authorized by section 306(a)(11) of the Consolidated Farm and Rural Development Act. These grants were funded for the first time in fiscal year 1978. They may be made to public bodies or such other agencies as the Secretary may select to prepare comprehensive plans for rural development. There are no planned obligations for fiscal year 1979.

Rural housing grant programs.—Rural housing grant programs provide financial assistance to eligible home-

owners and qualified public and private nonprofit organizations.

Rural housing for domestic farm labor grants may be made to public and private nonprofit organizations and may be used for construction, rehabilitation, site acquisition and development, and other purposes related to the provision of low-rent housing for domestic farm labor.

Mutual and self-help housing grants are made to qualified public and private nonprofit organizations for the purpose of providing technical and supervisory assistance to groups of families to enable them to build homes through the self-help method and mutual exchange of labor.

Very low-income housing repair grants.—This grant program was created to give very low-income homeowners in rural areas the opportunity to make essential, minor repairs to their homes to correct health and safety hazards. A grant or a combination of a grant and a low-interest loan from the Rural housing insurance fund may be made to an eligible recipient for the needed repair work. The total amount of a grant or combination grant and loan may not exceed \$5 thousand and eligibility under the program is limited to the elderly. This program was implemented for the first time since 1965 in fiscal year 1977.

The Self-help housing land development fund was authorized by section 1005 of the Housing and Urban Development Act of 1968 (Public Law 90-448). The fund provides qualified public or private nonprofit organizations financing for the acquisition and development of building sites for homes to be constructed by the self-help method.

In 1977, 4 loans for \$667 thousand were obligated. It is planned that 5 loans for \$1 million will be made in 1978 and that 5 loans for \$1 million will be made in 1979. These loans will provide 250 sites in 1979 for construction of decent, safe, and sanitary housing by the self-help method for low-income rural families.

Rural housing insurance fund.—This fund was established in 1965 (Public Law 89-117) pursuant to section 517 of title V of the Housing Act of 1949, as amended. Initial capitalization of the fund at \$100 million was provided by the Supplemental Appropriations Act of 1966. Public Law 91-152 abolished the rural housing direct loan account and transferred its assets, liabilities and authorizations to the fund.

This fund may be used to insure or guarantee rural housing loans, loans for rural rental and cooperative housing, farm labor housing loans, rural housing site loans, and mobile home park loans. Beginning in fiscal year 1978, rental assistance payments will also be made from the fund. Loan programs are limited to rural areas which include towns, villages, and other places of not more than 10,000 population, which are not part of an urban area, and areas with a population in excess of 10,000 but less than 20,000, if such area is not included in a standard metropolitan statistical area and has a serious lack of mortgage credit for low- and moderate-income borrowers.

The objective of the RHIF housing loan program is to provide necessary housing for low- and moderate-income rural residents if their needs cannot be met with financial assistance from other sources. Under the Housing and Community Development Act of 1977, at least 60% of the amount of loans made for home ownership and rental purposes must be used to benefit persons of low income. With the implementation in 1978 of the rental assistance program and the continued use of HUD section 8 assistance, FmHA will be able to serve lower income families, which conforms to the objective of providing service to those people who have the greatest need.

In fiscal year 1979, the Department plans to implement a targeted housing strategy that will give high priority to providing housing assistance to families with the greatest need. This targeting strategy was a result of a comprehensive study of rural housing program needs, goals, and past accomplishments conducted at the request of the President by a task force under USDA leadership with the Department of Housing and Urban Development and Office of Management and Budget participation.

This proposed budget implements the study's targeting strategy which has a goal of maximizing housing assistance to families with the lowest incomes while holding assistance to other income classes close to recent levels. Priority will be given to assisting low-income families who occupy inadequate housing and/or have excessive rent burdens. The strategy utilizes several new programs, which will require new legislation. A special home ownership assistance program is proposed to serve very low-income families where it is a more cost effective alternative than FmHA's other very low income housing assistance programs (rental assistance, and repair loans and grants). A Federal subsidy recovery program is proposed so that subsidy costs of current and proposed programs may be partially or totally recovered when a family sells its house and the proceeds of the sale

Public enterprise funds—Continued

are large enough to repay the principal and interest on the mortgage, sales commission, borrower relocation costs, and provide an incentive payment to the borrower. The remainder is recovered by the Government to the extent that subsidies have been granted during the life of the loan, with any proceeds above these amounts retained by the borrower.

The proposed legislation required to implement the new programs is being prepared for transmittal to the Congress. The budget schedules associated with these new programs requiring new legislation appear under the proposed legislation section of the Budget Appendix.

Very low-income housing repair loans.—Home repair loans for very low-income owner-occupants are made from amounts available in this fund. These loans, which may not exceed \$5 thousand, are made to families and individuals to repair their dwellings in order to make them safe and sanitary and remove health hazards to the families or the community. The loans are made at 1% interest for a term of not more than 20 years.

Low- to moderate-income housing loans.—Individual home ownership loans are made to low- and moderate-income individuals and families who are unable to obtain home-ownership financing from conventional sources on terms they reasonably can be expected to meet. Loans may be made to eligible applicants to construct, improve, alter, repair, or replace dwellings, and may include funds to purchase a house and building site. These loans currently bear interest at 8% with provision for interest credits which may reduce the effective interest rate to as low as 1% and are repayable in not more than 33 years.

Rural rental housing loans.—Rural rental and cooperative housing loans are made to individuals, corporations, partnerships and public bodies with the objective of providing low-rent housing for low- to moderate-income persons and the elderly. This program is being operated in tandem with the HUD section 8 rental assistance program and FmHA rental assistance program.

Rental assistance.—The objective of the rental assistance program is to reduce rents paid by low-income families living in FmHA financed rental projects and farm labor housing projects. Under this program, low-income tenants pay no more than 25% of their adjusted monthly income for rent. Payments from the fund are made to the project owner to make up the difference between the tenant's payment and the approved rental rate established for the unit.

Rural housing site loans.—Site development loans are made for the purchase and development of land to be subdivided into building sites and sold on a nonprofit basis to low- and moderate-income families or to organizations for rental or cooperative housing.

Mobile home park loans.—Loans under this program may be made to provide for mobile homes and sites to be occupied on a rental basis by low- and moderate-income families.

The following table shows preliminary fiscal year 1977 and estimated fiscal year 1978, and fiscal year 1979 program levels and units. The housing strategy new

subsidized programs are included in the subsidized low-income housing portion of the table for fiscal year 1979.

The Agricultural credit insurance fund is used to insure or guarantee farm ownership, soil and water, recreation, farm operating, and emergency loans to individuals, as well as the following types of loans to associations: irrigation and drainage, grazing, Indian land acquisition, watershed protection, flood prevention, and resource conservation and development.

Loans may be made by the fund from available receipts or Treasury borrowings. Loans made by the fund are held in a pool as security for certificates of beneficial ownership which are sold primarily to the Federal Financing Bank. FmHA is also authorized to provide financial assistance to borrowers by guaranteeing loans made by private lenders having a contract of guarantee from FmHA as approved by the Secretary of Agriculture. With respect to all new loans made from the fund, with the exception of emergency loans, not more than \$500 million may be held in the fund at any one time. Proposed legislation would eliminate this limitation.

Public Law 92-419, approved August 30, 1972, abolished the Farmers Home Administration Direct loan account and the Emergency credit revolving fund and provided for transfer of the assets and liabilities of, and authorizations applicable to, these accounts to the Agricultural credit insurance fund. It also provided for transfer from the Agricultural credit insurance fund to the Rural development insurance fund of the assets and liabilities of the Agricultural credit insurance fund applicable to loans for water systems and waste disposal facilities.

The following loans are financed through this fund.

FARM OWNERSHIP LOANS—OBLIGATIONS

	[Dollars in millions]		
	1977 actual	1978 estimate	1979 estimate
Number of loans	11,122	12,324	11,200
Amount of loans	\$451.2	\$550.0	\$550.0

Farm Ownership loans are made to farmers and ranchers, at a 5% interest rate for 40 years or less, for acquiring, enlarging, or improving farms, including dwellings and farm buildings; for financing land and water development, use, and conservation; for developing recreational and other nonfarm enterprises; for forestry development; for refinancing indebtedness; and for loan closing costs. Loans are confined to farms which are not larger than family farms. The income from the operation gives the family an opportunity to have an adequate living standard.

The unpaid indebtedness against a farm or other security at the time the loan is made may not exceed \$225 thousand or the market value of the farm or other security. The loan may not exceed \$100 thousand or the amount certified by the county committee, whichever is the lesser. The Farmers Home Administration has broadened its farm ownership loan policies so that private or cooperative lenders and the agency can make loans to the same borrowers on the same security.

Legislation is pending that would affect the farm ownership loan program as follows: increase the insured and guaranteed loan limit from \$100 thousand to \$200 thousand, make corporate family farmers and partnerships eligible, remove total indebtedness limitation, and charge the borrower the cost of money interest rate.

Soil and water loans, at a 5% interest rate for 40 years or less, are made to owners or operators of farms and ranches for developing, conserving, and making proper use of their land and water resources. These loans may be made on farms which are larger than family farms.

Legislation is pending that would affect the individual soil and water loan program as follows: increase the insured and guaranteed loan limit from \$100 thousand to \$200 thousand, make corporate family farmers and partnerships eligible, remove total indebtedness limitation, and charge the borrower the cost of money interest rate.

IRRIGATION AND DRAINAGE ASSOCIATION LOANS—OBLIGATIONS

Number of loans.....	13	13	14
Amount of loans.....	\$5.8	\$6.0	\$7.0

Irrigation and drainage loans are made to organizations primarily composed of farmers, ranchers, certain Indian tribes, and other rural residents for projects which include: The application or establishment of soil conservation practices; the construction, improvement, or enlargement of facilities for drainage; and the conservation, development, use, or control of water. The objectives may be met through such assistance as to a group of farmers and other rural residents to develop community irrigation dams and canals; a soil and water conservation district to purchase heavy earth moving equipment; a community for drainage of land; a group of farmers to develop soil conservation measures such as terraces, shelter belts, and similar development. These loans are made at a 5% interest rate for 40 years or less.

Legislation is pending that would charge the associations the cost of money interest rate on insured loans.

Number of loans.....	8	8	8
Amount of loans.....	\$3.5	\$4.0	\$4.4

Grazing loans are made to organizations primarily composed of farmers, ranchers, certain Indian tribes, and other rural residents to provide seasonal grazing for livestock belonging to members of the associations. Membership in an association permits a farmer or rancher to graze his

livestock on association pasture for the grazing season and return them to his base unit for the balance of the year. Such a plan provides a farmer or rancher an opportunity to increase the size of his operations. These loans are made at a 5% interest rate for 40 years or less.

Legislation is pending that would charge the associations the cost of money interest rate on insured loans.

Resource conservation and development (RCD) loans are made to local sponsors of RCD projects approved for operation by the Soil Conservation Service. Loans are made to local organizations and individuals for planned conservation measures and works of improvement specified in approved workplans. These loans are repayable in not more than 30 years, with repayment of principal and interest deferred up to 5 years, if necessary. Loans bear interest at a rate based on the average rate paid by the U.S. Treasury on obligations of similar maturity. The rate for the 1978 fiscal year is 6.063%.

WATERSHED PROTECTION AND FLOOD PREVENTION LOANS—OBLIGATIONS

Watershed protection and flood prevention loans are made to local sponsors of projects approved for operation by the Soil Conservation Service. Loans are made to local organizations for installing, repairing, or improving works of improvement and water storage facilities, purchasing sites or rights-of-way and for related costs. These loans are repayable in not more than 50 years at an interest rate based on the average rate paid by the U.S. Treasury on obligations of similar maturity. The rate for the 1978 fiscal year is 6.063%. Total loans outstanding on any one project may not exceed \$10 million.

Indian tribe land acquisition loans are made to qualified Indian tribes or tribal corporations to acquire land or interest in land within the tribe's reservation or Alaskan Indian community, as determined by the Secretary of the Interior. These loans are made at a 5% interest rate for 40 years or less. Legislation is pending which would charge the borrower the cost of money interest rate.

FARM OPERATING LOANS—OBLIGATIONS

feed, seed, fertilizer, and farm supplies, and other essential operating expenses, including cash rent, and costs incident to the production, and harvesting of forestry products; for financing land and water development, use, and conservation; for developing recreation and other nonfarm enterprises; for other farm and home needs; for refinancing indebtedness; for complying with certain safety standards; for financing modest farm and nonfarm projects for rural youths in connection with their participation in 4-H clubs, Future Farmers of America, and similar organizations; and for loan closing costs.

Operating loans for farming operations are confined to operators of not-larger-than family farms. The outstanding principal loan balance for operating loans to any individual is limited to \$50 thousand. Loans bear interest at a rate based on the average rate paid by the U.S. Treasury on obligations with a similar maturity period. The rate for fiscal year 1978 is 8% effective January 1, 1977. Funds advanced for operating expenses are repaid when the crops, livestock, or other produce are sold. Funds advanced for other purposes may be repaid in from 1 to 7 years; in some cases loans may be renewed for up to 5 years. Loans are secured by crop and chattel liens and, when necessary, by real estate mortgages. It must be clearly established that the loan applicants are unable to obtain sufficient credit elsewhere to finance their needs.

Legislation is pending that would increase the farm operating loan limit to \$100 thousand for insured and guaranteed loans, and remove the prohibition of extending credit to partnerships and corporations operating family-size farms. Guaranteed loans would be made at an interest rate negotiated between the lender and the borrower. The passage of this legislation is required to fully implement the program objective.

RECREATION LOANS TO INDIVIDUALS—OBLIGATIONS

Recreation loans are made to individual farmers and ranchers, at a 5% interest rate for 40 years or less, for converting all or a portion of the farms or ranches they own or operate to outdoor income-producing recreation enterprises which will supplement or supplant farm or ranch income and permit carrying on sound and successful operations. These loans may be made on farms which are larger than family farms and may include funds for operating purposes. Applicant must be engaged in farming, when making application, in order to be eligible for a loan.

Legislation is pending that would affect the individual recreation loan program as follows: increase the insured loan limit from \$100 thousand to \$200 thousand, remove the total indebtedness limitation and charge the borrower the cost of money interest rate.

The Emergency Livestock Credit Act, Public Law 93-357, approved July 25, 1974, authorized the making of guaranteed loans to provide temporary financing to

livestock producers and feeders. The Farmers Home Administration guarantees loans made by banks or other legally organized lenders to farmers and ranchers in order that they may continue their normal farming or ranching operations. The basic law (Public Law 93-357) was amended by enactment of Public Law 94-35 on June 16, 1975. Public Law 94-35 provided for a reduction in the amount of guarantees outstanding to \$1.5 billion (\$2.0 billion under Public Law 93-357) and extended the statutory period for guaranteeing loans to December 31, 1976.

It was further amended by enactment of Public Law 94-517, approved October 15, 1976, which extends the statutory period, before the program expires, to September 30, 1978.

EMERGENCY (DISASTER) LOANS—OBLIGATIONS

[Dollars in millions]

	1977 actual	1978 estimate	1979 estimate

Amount of loans.....	\$1,178.4	\$1,200.0	\$578.0

Emergency loans are made available in designated counties where property damage and/or severe production losses have occurred as a direct result of a natural disaster and where agricultural credit cannot be obtained by private cooperatives or other responsible sources. For non-loss situations, emergency loans are made to established eligible farmers, ranchers, and aquaculture operators at a market rate of interest as established periodically by the Secretary for annual operating expenses, major adjustments and other essential needs arising from natural disasters.

Actual loss loans are made for physical losses to repair, restore, or replace damaged or destroyed farm property and supplies, and for production losses to compensate for loss of income based on reduced production of crops, livestock, and livestock products resulting from the disaster. Repayment terms vary according to the purposes of the loan and the projected reasonable repayment ability of the borrower. Loans for actual losses to crops, livestock, supplies, and equipment may be scheduled for repayment for up to 7 years. These loans may be renewed for up to 5 years. Under some conditions a longer repayment period may be authorized, but not to exceed 20 years. Generally real estate will be needed as security when more than 7 years is authorized. Real estate loans will be scheduled for repayment for up to 40 years. Annual operating expenses usually will be scheduled for repayment each year when the principal income from the year's operations is received. The appropriation language makes funds available in such amounts as may be necessary to meet the needs resulting from natural disasters.

Emergency actual loss loans for disasters occurring on or after July 1, 1976, and prior to October 1, 1978, will have interest rates charged as follows: (a) For repair or replacement of the primary residence and personal property, 1% on the first \$10 thousand, 3% on the balance not to exceed \$40 thousand, and 5% above \$40 thousand; (b) for other actual loss loans, 3% up to \$250 thousand, and 5% above \$250 thousand.

Emergency actual loss loans for disasters occurring before July 1, 1976, will continue to be at 5%.

Estimates for fiscal years 1978 and 1979 are subject to minor shifts among real estate type loans.

The Rural development insurance fund was established on October 1, 1972, pursuant to section 309A of the Rural Development Act of 1972 (Public Law 92-419), approved August 30, 1972, which also provided for transfer of the assets and liabilities of the Agricultural credit insurance fund applicable to loans for water systems and waste disposal facilities to this fund.

The fund is used to insure or guarantee loans for water systems and waste disposal facilities, community facilities, and industrial development in rural areas.

The objective of the water and waste disposal loan program is to assist eligible borrowers (communities and others) to provide assistance for basic human amenities, alleviate health hazards and promote the orderly growth of rural areas by meeting the need for new and improved rural water and waste disposal systems and meet national clean water standards. The objective of the community facilities loan program is to assist rural communities to meet National or State standards for health care and public safety and to encourage business and industrial expansion.

Water and waste disposal development loans and essential community facility loans may be made to organizations including certain Indian tribes and corporations not operated for profit and public and quasi-public agencies. Water and waste disposal development loans are made for the development, storage, treatment, purification, or distribution of water or the collection, treatment, or disposal of waste in rural areas. Community facility loans are made to construct, enlarge, extend, or otherwise improve community facilities providing essential service to rural residents. Such facilities include those providing or supporting overall community development such as fire and rescue services, transportation, traffic control, and community, social, cultural, and recreational benefits. Loans are made for facilities which primarily serve farmers, ranchers, farm tenants, farm laborers, and other rural residents of open country and rural towns and villages of not more than 10,000 population, which are not part of an urban area. These loans are repayable in not more than 40 years and bear interest not in excess of 5%.

The objective of the industrial development loan program is to facilitate the development or improvement of business and industry in rural areas in order to stimulate economic growth, to create employment opportunities, and to improve the environmental climate.

The industrial development loans may be made to a cooperative, corporation, partnership, trust, or other legal entity organized and operated on a profit or nonprofit basis; Indian tribe; a municipality, county or other political subdivision of a State; or an individual. Loans are made for the purposes of financing business and industrial acquisition, construction, conversion, enlargement, repair or modernization; financing the purchase and development of land, easements, rights-of-way, buildings, equipment, facilities, leases, machinery, supplies, and materials; and payment of startup costs and supplying working capital.

Industrial development loans may be made in any area that is not within the outer boundary of any city having

a population of 50,000 or more and its immediately adjacent urbanized and urbanizing areas with a population density of more than 100 persons per square mile. Special consideration for such loans is given to areas other than cities having a population of more than 25,000. These loans are repayable in three separate maturities not exceeding 30 years. The interest rate for guaranteed loans is determined by the lender and the borrower. The interest rate for loans made by Farmers Home Administration is computed on the cost of Treasury borrowing plus an increment to cover administrative costs.

(b) Technical assistance to cooperating land users (primarily farmers and ranchers), groups and units of government and other policy and decisionmakers in the planning of conservation programs and installation of needed conservation treatments;

(c) Technical programing, design, layout, installation services, and consultation on those practices and measures provided for in resource conservation plans;

(d) Technical and other assistance to communities and units of government on land-use planning, mine spoil restoration, control of erosion, sedimentation, agricultural related pollutants, and protection and enhancement of the environment, and other special problems that can best be solved through coordinated local action;

(e) The granting of special equipment to soil conservation districts for use in applying conservation practices;

(f) Water supply forecasts prepared from snow surveys in Western States that are useful in making efficient seasonal use of water for irrigation, flood control, fish and wildlife, recreation, power generation, municipal and industrial water supply, and water quality management;

(g) The selection and evaluation of plant materials to determine their suitability for erosion control, conservation purposes, and other environmental improvements;

(h) Technical assistance to participants in the Agricultural conservation program in establishing specified permanent-type practices;

(i) Technical services to participants in other programs involving land-use adjustments and soil and water conservation;

(j) Technical assistance in the planning and applying of soil and water conservation practices for which loans are made by the Farmers Home Administration;

(k) Technical assistance to rural development committees; and

(l) A program of national land inventory and monitoring.

Conservation operations technical assistance has been redirected for 1979 to provide assistance on Indian tribal lands, agricultural waste management and critically eroded lands.

Combinations of needed soil and water conservation practices are planned together and in relation to each other so as to have well-balanced conservation programs

in each district. The Service aids land users, units of government, and other policy and decisionmakers marshal the facts and consider the potentials and alternatives before they embark on courses of action. Both vegetative and structural measures are installed in accordance with the needs of the land for protection, treatment, and resource improvement. Plans reflect the decisions of the land users, community groups, and units of government as to how they will use and treat the land and water resources.

Technicians of the Soil Conservation Service explain the various soil conditions, develop alternative uses and treatments, help to evaluate the costs and returns of conservation work, and furnish assistance in applying the needed treatments.

The technical services provided through conservation operations are instrumental in encouraging farmers, ranchers, and others to establish conservation practices. For each dollar used to provide technical assistance, the individual land-owner or user invests over \$2 in conservation work.

The national inventory and monitoring program will provide soil, water, and related resource data for land conservation, use, and development, for guidance of community development to achieve a balanced rural-urban growth, for identification of prime agriculture producing areas that should be protected, for evaluating land-use changes and trends, and for use in protecting the quality of the environment. A land resource inventory report reflecting soil, water, and related resource conditions, issued at not less than 5-year intervals, will provide essential planning data for individual land users and community, county, regional, State, and National units and agencies of government.

Section 6 of Public Law 566, 83d Congress, as amended, authorized the Department to cooperate with other Federal, State, and local agencies in making surveys and investigations of the watersheds of rivers and other waterways as a basis for the development of coordinated water and related land resource programs. The Department currently is participating in cooperative surveys and investigations in river basins primarily with capital State water resources agencies, but also with other interested Federal

and local entities. Priority is given to studies which solve nonpoint source pollution problems, including salinity, protecting important farm and wetlands, improving irrigation efficiencies and conservation of water.

The Department also maintains representation on six river basin commissions and three river basin interagency committees. These serve as points of contact in coordination between representatives of this Department and other Federal Departments and agencies and the States in these basin areas. They keep all concerned and mutually informed of the activities of the member agencies and facilitate matters of interagency coordination.

The Department also is represented on the water resources council which was formed in accordance with section 101, Public Law 89-80, Water Resources Planning Act, to coordinate water in related land resource activities of Federal Departments and agencies. USDA inputs to WRC interagency river basin studies (level B) are financed by reimbursable agreement.

The Department cooperates with other agencies and the States in planning works of improvement in small watersheds to reduce damage from floodwater, sediment, and erosion and for the conservation, development, utilization, and disposal of water.

The Department makes surveys of proposed small watershed projects, and work plans are prepared in cooperation with local sponsors. These plans outline the soil and water management problems in the watershed, the steps that have been or are authorized to be taken to alleviate these problems, the proposed works of improvement to be installed, the estimated benefits and costs, cost sharing, and operation and maintenance arrangements, and other facts necessary to justify Federal participation in project development. In order to utilize available resources to complete work in process, no new planning starts will be initiated in 1979.

This program provides for cooperation between the Federal Government and States and their political subdivisions in installing works of improvement to (1) reduce damage from floodwater, sediment, and erosion, (2) for the conservation, development, utilization, and disposal of water, and (3) the conservation and proper utilization of land. Loans are available through the Agriculture credit insurance fund of the Farmers Home Administration to local organizations to help them finance their share of the costs to certain works of improvement.

Watershed operations authorized by Public Law 534.—The Department cooperates with soil conservation districts and other local organizations in planning and installing works of improvement for flood prevention in 11 watersheds authorized by the Flood Control Act of 1944. The Federal Government shares the cost of works of improvement for flood prevention, agricultural water

management, recreation, and fish and wildlife development.

The Department furnishes technical and, in certain instances, financial assistance to landowners to accelerate planning and installation of land treatment measures for runoff retardation, sediment control, and water management. Local sponsoring organizations must furnish all land easements and rights-of-way, water rights, all costs of works of improvement for nonagricultural water management measures (except for those related to fish and wildlife development and recreation) and operate and maintain all completed works of improvement.

Within the 11 authorized projects, 400 subwatershed areas have been identified for planning purposes. Installation progress in these subwatersheds is as follows:

Emergency operations, section 216.—This program authorizes the Secretary of Agriculture to undertake such emergency measures for runoff retardation and soil erosion prevention as may be needed to safeguard life and property from floods and the products of erosion on any watershed whenever natural elements or force causes a sudden impairment of that watershed. An emergency is considered to exist when a watershed is suddenly impaired by flood, fire, wind, earthquake, or other natural cause and consequently life and property are endangered by floodwater, erosion, or sediment discharge. The emergency area need not be declared a national disaster area to be eligible for emergency watershed protection. Emergency watershed protection is applicable to small scale, localized disasters as well as large scale disasters. State environmental, natural resource, fish and game, and other agencies participate in planning and coordinating emergency work.

Emergency operations on non-Federal land are sponsored by State or local organizations. Emergency operations supplement other Federal, State, and local resources committed to alleviate the hazard. Conditions essential to funding assistance are that a watershed impairment must have occurred suddenly as a result of a natural element or force and there exists a threat to life or property from floods or the products of erosion. Sponsoring organization must provide needed land rights, water rights, and permits and accept responsibility for operation and maintenance, if required, all without cost to the emergency operation funds. The Forest Service does this work on lands it administers and on lands adjacent to Forest Service land which they administer under formal agreement. Funds are made available to the Forest Service from this appropriation.

Small watershed operations authorized by Public Law 566.—The Department provides technical and financial assistance to local organizations to install measures for watershed protection, flood prevention, agricultural water management, recreation, and fish and wildlife enhancement.

Watershed work plans are prepared by sponsoring local organizations with the Department's assistance or through state and local resources. After work plans are approved by the Department or Congress (projects where the estimated Federal contribution will exceed \$1 million require congressional approval), technical services and financial assistance are provided for specific works of improvements.

Land treatment and engineering services are provided to approved projects in advance of construction. During the preconstruction state, surveys, and investigations are made and detailed designs, specifications, and engineering cost estimates are prepared for structural measures, land rights areas are identified, and the technical services are furnished for accelerating planning and application of land treatment measures.

On non-Federal lands, local sponsoring organizations must acquire water rights and furnish land, easements, and rights-of-way for all structural measures, except up to 50% of the cost of land rights allocated to public fish and wildlife and recreational developments may be paid from Public Law-566 funds. Local sponsoring organizations have the option of contracting for construction work or may request SCS to do the contracting for them. Local sponsoring organizations must operate and maintain completed works of improvement and in the case of multiple-purpose structures, bear a share of the construction costs. On Federal lands, Federal agencies do this work on lands they administer with appropriate contributions made by local people who receive benefits.

The following tabulation shows the status of Public Law 566 projects.

Loan services.—Loans are made to local sponsoring organizations to finance the local cost of installing works of improvement in Public Law 534 and approved Public Law 566 watershed projects. Repayment with interest is required within 50 years after the principal benefits of improvements first become available. Loans are made from funds available for this purpose from the Agriculture credit insurance fund of the Farmers Home Administration. Loan services related to processing and making loans are financed from this appropriation.

In order to apply all available resources to earlier completion of ongoing construction, new construction starts will not be initiated in 1979. Further budget recommendations may be made upon completion of the administration's water policy.

This program provides cost-sharing assistance and technical services to participating landowners or operators in the Great Plains area in the development and installation of long-term conservation plans and practices for their land. It is a voluntary program which complements other conservation programs of the Department in 469 designated counties of 10 Great Plains States. Contracts with individual landowners range in time from 3 to 10 years.

Plans of conservation operations are made for each farm or ranch as a basis for cost sharing on approved practices. The fundamental purposes of this program are to achieve needed land use adjustments, conservation treatments, and economic stability of each operating unit. The planned work is installed under contract according to specific time schedules.

¹ A new departmental long-term cost-sharing program is proposed in fiscal year 1979 in the budget for the Agricultural Stabilization and Conservation Service. Within that proposal, \$10 million is included for contracts in the Great Plains States.

As of September 30, 1977, there was a backlog of approximately 4,700 unserved applications and about 14,000 active contracts on hand. Cooperating landowners or operators finance the entire cost of installing recurring management-type practices and pay a specified part of the cost-shared practices installed on their land.

Program regulations provide that cost-share rates offered in any contract shall not exceed 80% of the cost of installing eligible practices within the designated county. The rates vary among States and practices due to differences in conservation and program needs. Cost sharing for irrigation practices in any one contract shall not exceed \$7,500 or one-fourth of the total Federal obligation. There is a cost-sharing limitation of \$25 thousand for any contract.

Each participant who signs a Great Plains program contract is responsible for implementing his plan of operations; and the Department is committed to furnish the necessary technical help needed for design, layout, and other services. Cooperating landowners and operators are encouraged to make use of other available assistance under local, State, and Federal programs as a means of further improving their land and water resources.

Since the Department is proposing to consolidate the Great Plains conservation program with the agricultural

conservation program in 1979 to provide the same type of long-term agreements to the Great Plains area as in the rest of the Nation, no new contracts will be entered into in 1979 under this appropriation.

This program provides for the Department's cooperation with other Federal agencies to assist States, local units of government, groups and individuals in developing area plans for resource conservation and development.

Resource conservation and development areas are provided technical and financial assistance to help States and

General and special funds—Continued

RESOURCE CONSERVATION AND DEVELOPMENT—Continued

local units of government prepare plans for resource development and economic improvement and to plan and install community-type conservation projects or measures. Financial contributions, loans, and other Federal assistance are used to help carry out measures specified in R.C. & D. area plans.

No new R.C. & D. area authorizations or measure plans will be initiated in 1979. Funds will be used to complete work in process.

Loans are made to qualified local organizations to help finance their share of the costs of installing the measures. Funds will be available for loans from the Agricultural Credit Insurance Fund of the Farmers Home Administration.

The following tabulation shows the status of R.C. & D. areas authorized to receive technical and financial assistance and loan services:

¹ Includes capital investment as follows: 1977, \$1,139 thousand; 1978, \$8,608 thousand; 1979, \$3,235 thousand.

Note.—Excludes \$255,017 thousand in 1979 and \$241,581 thousand in 1978 for activities transferred to the Food Safety and Quality Service. A comparable amount for 1977 (\$240,557 thousand) is included above.

The major objectives of the Service are to protect the animal and plant resources of the Nation from destructive pests and diseases.

2. *Plant disease and pest control.*—Through inspections at ports of entry, insects, plant diseases, nematodes, and animal pests and diseases harmful to agriculture are prevented from entering this country. Cooperative

programs with the States are conducted to prevent the spread of and/or to eradicate of certain plant pests already established in this country. The 1979 estimates propose increases for golden nematode, tri-fly in Hawaii, and for agricultural quarantine inspection, and a reduction of the imported fire ant and elimination of the range caterpillar programs.

Selected examples of the level of activities for plant pest control programs follow:

3. *Animal disease and pest control.*—Programs are conducted to keep communicable diseases of foreign origin from entering this country and to prevent the spread of diseases through interstate shipments of livestock or distribution of impure or impotent veterinary biologics. In cooperation with States, other programs are directed at the control and eradication of livestock diseases present in this country. Foreign animal diseases, should they enter this country, are rapidly diagnosed and outbreaks which are of economic significance and for which the Secretary of Agriculture declares a national emergency are controlled and eradicated. The animal welfare program regulates the humane care and handling of approximately 40 million warmblooded commercial (pet) and laboratory animals and restricts animal fighting ventures. The 1979 estimates propose increases for brucellosis eradication and import-export inspection and decreases in hog cholera eradication, screwworm, miscellaneous animal diseases, pseudorabies and tuberculosis

programs. These decreases reflect successful eradication efforts and shifts in resources toward eradication of other more costly diseases. Also included is a net increase in funds needed to repay the Commodity Credit Corporation for advances made to combat emergency disease outbreaks.

The level of activities for the major control programs on animal diseases and pests is as follows:

4. *Construction of facilities.*—Construction of a Veterinary Biologics Laboratory at Ames, Iowa, and an international animal quarantine station at Fleming Key, Fla., are expected to be completed in fiscal year 1979. Construction is expected to begin in fiscal year 1978 on the Stewart Animal Import Center which replaces the animal quarantine station at Clifton, N.J. Funds for these projects were appropriated in previous fiscal years.

5. *Contingencies.*—Of the total annual amounts provided under this appropriation, \$2.5 million is apportioned for use pursuant to section 3679 of the Revised Statutes, as amended, for the control of outbreaks of insects, plant diseases, and animal diseases to the extent necessary to meet emergency conditions.

6. *Reimbursement program.*—Reimbursements include amounts for overtime and travel performed in connection with import-export inspection services and cooperative programs with other Federal agencies.

Public Law 85-592, approved September 12, 1964, authorized the sale of the Animal Quarantine Station at Clifton, N.J., to the city of Clifton, and the application of the proceeds of the sale to the planning and construction costs of a new station in the New York-New Jersey port and airport area. A sales contract between the Department and the city of Clifton was executed December 16, 1966, at the appraised value of \$527 thousand. At that time, \$100 thousand was paid to the Department and upon award for the architectural and engineering services for the new quarantine station at Stewart Air-

port, Newburgh, N. Y., the Department received an additional \$100 thousand. The remaining \$327 thousand will be paid to the Department at the time of issuance of invitations to bid on the construction contract in the spring of 1978. In fiscal year 1970, \$1.5 million was appropriated for construction of the new facility and in 1976, the Department received an additional \$3.8 million. These funds were appropriated to the Animal and Plant Health Inspection Service account and are described there.

The following services are financed by fees and miscellaneous contributions advanced by importers, manufacturers, States, organizations, individuals, and others:

1. *Expenses and refunds, inspection, certification, and quarantine of animal products.*—This includes inspection

of products for human consumption and products and by products not intended for human food. Animal products and byproducts moving in interstate and foreign commerce are subject to inspection and quarantine regulations to prevent the introduction and spread of animal diseases. Fees are paid in advance for services to be rendered (7 U.S.C. 1621-1627) (21 U.S.C. 111).

2. *Expenses, feed, and attendants for animals in quarantine.*—Cost associated with the care of animals are paid from fees advanced by importers (21 U.S.C. 102).

3. *Miscellaneous contributed funds.*—Funds are received from States, local organizations, individuals, and others and are available for plant and animal quarantine inspection and cooperative plant and animal disease and pest control activities (7 U.S.C. 450b, 2220).

The Federal Grain Inspection Service (FGIS) was established on November 20, 1976. The mission of the Agency is to carry out and administer the provisions of the U.S. Grain Standards Act (7 U.S.C. 71 et seq.), as amended, provide U.S. grain standards, and provide an improved National grain inspection and weighing system. The law requires obligations associated with the activities of the Washington, D.C.-based office, as well as Federal supervision of the field-based inspection and weighing system, to be financed from appropriated funds.

This authority incorporates the following services: A continuing research and development program for the purpose of developing methods to improve the accuracy and uniformity in grading grain; monitoring, in foreign ports, grain officially inspected and weighed under the act; the development, establishment, and monitoring for adequacy of official grading standards for grain; regulatory activities to include delegation, designation, and licensing of State and private agencies and their employees to perform inspection and weighing services, and investigations of official agency conflicts of interest; Federal program management and administration activities within the Service's Washington office; and Federal supervision of the field-based national grain inspection and weighing system. The agency also has responsibility for standardization of rice and grain-related products which are covered by the Agricultural Marketing Act of 1946 (7 U.S.C. 1621-1627), as amended.

The amounts shown for the fiscal year 1977 provide for the establishment of the Washington organization subsequent to November 20, 1976. The amounts in the fiscal year 1978 and 1979 estimates represent full-year obligations.

The U.S. Grain Standards Act of 1976 (Public Law 94-582), established the "Federal Grain Inspection Service" to provide a revised and expanded national grain inspection system, and to develop a new weighing system. The law provided for all field-based costs associated with this national system to be fee supported except to the extent that financing not available from fees may be derived from appropriations. The Grain Standards Act

was amended in 1977 (7 U.S.C. 71 et seq.) to provide appropriated funds for all Federal supervision of the field-based inspection and weighing system.

The revolving fund activities include: Official grain inspection and weighing at export ports; original inspection and weighing of the U.S. grain exported through Canada; Federal appeals of original grain inspections; and registration of grain firms operating in the grain trade. The agency also has responsibility for grading services for rice and grain-related products which are covered by the Agricultural Marketing Act of 1946, as amended. All field and Washington costs for this AMA grading service are financed from fees.

The amounts shown for fiscal year 1977 reflect the implementation of the revised national grain inspection system subsequent to November 20, 1976. The amounts in the fiscal year 1978 and 1979 estimates represent full-year obligations.

These activities assist producers and handlers of agricultural commodities through various marketing and regulatory services. These services continue to expand and become more complex as the volume of agricultural commodities increases, as a greater number of new processed commodities are developed, and as the market structure undergoes extensive changes. Marketing changes include increased concentration in food retailing, direct buying, decentralization of processing, growth of interregional

MARKETING SERVICES—Continued

competition, vertical integration, and contract farming. The individual activities include:

1. *Market news service.*—This service provides current information on supply, movement, contractual agreements, and prices at specific markets for practically all agricultural commodities. The marketing of agricultural products is characterized by a series of decision points through which product flows concentrate and transactions take place. Market news provides American farmers at these decision points with timely, accurate, and unbiased information pertinent to market conditions. Thus, on a day-to-day basis, the American farmer is in a position to make the critical decisions of where and when to sell, and at what price.

Market news information is collected and disseminated at year-round and seasonal offices maintained in more than 107 cities and towns, often with local and other support and cooperation, generally from State departments of agriculture. Dissemination is primarily by radio, television, and mimeographed reports. The volume of work performed is indicated by examples given in the following table:

Names on mailing list.....	168,208	168,150	167,300

2. *Inspection, grading, classing, and standardization.*—Nationally uniform standards of quality for agricultural products are established and applied to specific lots of products to: Promote confidence between buyers and sellers; reduce hazards in marketing due to misunderstandings and disputes arising from the use of nonstandard descriptions; encourage better preparation of uniform quality products for market; and furnish consumers with more definite information on the quality of products they buy. The standards are applied by or under the supervision of Federal employees at the request of any interested party.

Inspection, grading, and standardization activities for dairy, fruits and vegetables, meat, poultry, egg and egg products previously carried out under this subappropriation item by the Agricultural Marketing Service were transferred to the Food Safety and Quality Service. The transfer was made in accordance with USDA's Secretary's Memorandum No. 1914, dated March 14, 1977, issued pursuant to the Reorganization Plan No. 2 of 1953 (7 U.S.C. 2201) and the agreement to transfer funds from AMS to FSQS effective on June 5, 1977. The level of costs relating to obligations incurred under these activities are included under the Food Safety and Quality Service.

3. *Regulatory activities.*—These include the administration of regulatory laws such as the U.S. Warehouse and Federal Seed Acts to assure fair play in the marketplace, to protect producers and handlers of agricultural commodities from financial loss due to careless or fraudulent marketing practices, and to preserve free and open competition in the marketing of farm products. Assistance is also provided to farmers and others in obtaining and maintaining equitable and reasonable transportation rates and services on farm products and supplies. The Cotton Research and Promotion Act is designed to improve the competitive position and expand markets for cotton through a program of self-assessment by cotton producers. The service also administers the Plant Variety Protection Act, the Export Fruit Acts, and the Wheat Research and Promotion Act.

The volume of work performed is indicated by examples given in the following table:

4. *Market supervision and assistance.*—Market supervision is provided through administration of the Agricultural Fair Practices Act and the Capper-Volstead Act. These acts protect producers against discriminatory practices by handlers and permit producers to engage in cooperative efforts while insuring that such cooperatives do not engage in practices which monopolize or restrain trade. Market assistance is provided by the food marketing alert program which informs the trade when commodities are in short or abundant supply.

5. *Marketing agreements and orders.*—Marketing agreements and orders are requested by producers and handlers. Hearings and investigations are conducted and proposed agreements and orders are voted upon by eligible producers or handlers.

Marketing agreements and orders help to stabilize prices, and benefit producers and consumers by establishing and maintaining orderly marketing conditions. Administration at the local level is financed by assessment upon handlers. On September 30, 1977, there were in effect 47 orders for milk, 46 agreements and orders for tree fruits, nuts, and vegetables, and 1 order for shade-grown tobacco. The expenses of advisory committees established to advise the Secretary, public hearings, referendums to determine producer sentiment, and other developmental work as

authorized by the Agricultural Act of 1961 are also financed under this activity.

For 1977 and 1978 this activity was financed under the section 32 appropriation.

6. *Administration of Packers and Stockyards Act.*—The activities carried out under this subappropriation were transferred from the Packers and Stockyards Administration pursuant to Secretary's Memorandum No. 1927, dated October 5, 1977. The level of costs relating to obligations incurred under this program prior to fiscal year 1979 was previously included in the account of the Packers and Stockyards Administration.

The program is aimed at assuring fair play in the marketing of livestock, meat, and poultry. Its principal purpose is to maintain effective competition for livestock, meat, and poultry, so as to bring to farmers and ranchers the true market value of their livestock and poultry. Consumers and members of the livestock, poultry, and meat industries are also protected against unfair business practices in the marketing of meat and poultry, and from restrictions on competition which would unduly increase meat and poultry prices.

Payments are made on a matching fund basis to State marketing agencies for carrying out specifically approved marketing service programs designed to bring about improved marketing. Under this activity, marketing specialists have worked with farmers, marketing firms, and agencies in solving marketing problems and in utilizing marketing research results.

This program has covered such projects as: Methods of maintaining and improving the quality of products; ways of reducing marketing costs; expanding outlets for surplus products; collecting and disseminating special State and local market information and statistics; and improving the organizational structure of the marketing system.

Federal funds have not been included for this program for fiscal year 1979. It is proposed that State marketing bureaus, or equivalent, and private marketing resources perform this function from fiscal year 1979 onward.

¹ The administrative fund totals are comprised of 47 separate independent order accounts in fiscal year 1977. The Marketing Service fund totals are comprised of 35 separate independent order accounts in fiscal year 1977.

The Secretary of Agriculture is authorized by the Agricultural Marketing Agreement Act of 1937, as amended—under certain conditions—to issue Federal milk marketing orders establishing minimum prices which handlers are required to pay for milk purchased from producers.

Market administrators are responsible for carrying out locally the terms of specific marketing orders. Their operating expenses, partly financed by assessments on regulated handlers and partly by deductions from producers, are reported in these schedules. These funds are collected locally, deposited in local banks, and disbursed directly by the market administrator.

Each milk order is administered locally by a market administrator who is appointed by the Secretary. His staff is employed directly by the market administrator.

The activities conducted in the local office are concerned primarily with monthly computations and public announcement of class and uniform blend prices, associated butterfat differentials, examination of handlers' records and facilities to verify their reports and payments to producers, and in checking weights and tests of producers' milk.

The expenses of each local office are met from an administrative fund and a marketing service fund which are prescribed in each order. The administrative fund is derived from prorated handler assessments. The marketing service fund of the individual order provides for the expense of disseminating market information to producers who are not members of a qualified cooperative. It also provides for the verification of the weights, sampling, and testing of milk from these producers. The cost of these services is borne by such producers.

The maximum rates for administrative assessment and for marketing services are set forth in each order and adjustments below these rates are made from time to time upon recommendations by the market administrator and upon approval of the Agricultural Marketing Service to provide reserves at about a 6-month operating level. Upon termination of any order, the statute provides for distributing the proceeds from net assets pro rata to contributing handlers or producers as the case may be.

Milk sold by regulated handlers supplied over 156 million persons in calendar year 1976.

The Food Safety and Quality Service was established on March 14, 1977, in accordance with Secretary's Memorandum No. 1914, issued pursuant to the Reorganization Plan No. 2 of 1953 (7 U.S.C. 2201). The programs of the Service were formerly performed by the Animal and Plant Health Inspection Service and the Agricultural Marketing Service.

The major objectives of the Service are to insure that the public receives foods that are safe, wholesome, nutritious, and appropriately labeled. This is carried out by inspecting, certifying, standardizing, and grading certain agricultural commodities.

In addition, FSQS assists the consumer in differentiating between products by applying nationally uniform standards of quality in grading agricultural products. FSQS also assists both consumers and producers by purchasing surplus agricultural commodities for use in domestic feeding programs.

Costs, financing, and outlays relating to obligations incurred under the meat and poultry inspection program prior to May 8, 1977, are included in the budget appendix under the Animal and Plant Health Inspection Service. Costs, financing, and outlays relating to obligations incurred under the commodity services programs prior to June 5, 1977, are included in the budget appendix under the Agricultural Marketing Service.

Federal inspection is required for all meat, poultry, and processed products moving in interstate and foreign commerce. All meat and poultry moving in intrastate commerce must be federally inspected or inspected by States with inspection systems meeting Federal standards. Activities include inspection of animals, carcasses, meat, and poultry products at various stages of handling and processing, and regulation of labeling. The Federal program also provides financial and technical assistance to States for maintaining the quality of their inspection programs. Extensive laboratory analyses are conducted for detection of chemical residues, antibiotics, and other additives.

The commodity purchase services covers activity connected with the purchase of commodities for distribution under USDA food distribution programs to eligible outlets. Distribution is conducted by the Food and Nutrition Service and the Agricultural Stabilization and Conservation Service.

The Federal egg products inspection program authorized under the Egg Products Inspection Act cooperates with State and other governmental agencies to insure the consumer of wholesome, unadulterated, properly packaged and labeled eggs and egg products. Activities include continuous inplant inspection of all plants manufacturing liquid, frozen, and dried eggs products, quarterly visita-

tions of shell egg packers and hatcheries to insure the proper disposition of "restricted eggs," and the control of imported egg producing plants to insure that production is under an inspection system equal to the U.S. system.

Nationally uniform standards of quality are established and applied to specific agricultural products to: Reduce hazards and disputes arising from the use of nonstandard descriptions; encourage better production and preparation of uniform quality products for market; and furnish consumers with more definite information on the quality of products they buy. The standards are applied by or under the supervision of Federal or Federal-State employees at the request of any interested party, and generally for a fee.

Note.—Excludes \$4,678 thousand in 1979 for activities transferred to the Agricultural Marketing Service, Marketing Services, Marketing Agreements and Orders. Comparable amounts for 1977, \$3,782 thousand; 1978, \$4,678 thousand are included above.

Under section 32 of the act of August 24, 1935, as amended (7 U.S.C. 612c), 30% of customs receipts collected during each calendar year are automatically appropriated for expanding outlets for nonbasic commodities. An amount equal to 30% of receipts collected on fishery products is transferred to the Department of Commerce to encourage the distribution of such products. Most of the funds are transferred to the Food and Nutrition Service and are dedicated to commodity distribution activities under section 6 of the national school lunch and other authorities specified in the child nutrition appropriation. If surpluses not now foreseen should develop, the \$225 million unused balance is available for surplus removal.

¹ Includes capital investment as follows: 1978, \$170 thousand; 1979, \$185 thousand.

Expenses are associated with the following program activities:

1. *Child nutrition programs.*—Includes (1) overall administration of the child nutrition programs (2) administrative and technical assistance to State agencies and (3) development of policies, procedures, and standards for program administration. The Food and Nutrition Service regional offices administer the program with respect to private schools where State educational agencies are prohibited from disbursing funds and in child care institutions where no State agency has assumed the responsibility for administering the programs.

2. *Special milk program.*—Administrative assistance is provided to State agencies, participating schools and institutions. Policies, procedures, and standards are developed for administering the program. The program is administered directly in outlets where no State agency has assumed responsibility or where the State is prohibited by law from administering the program in private schools.

3. *Special supplemental food programs (WIC).*—The agency develops and promulgates Federal guidelines setting forth policies, procedures, and standards for program operations and monitors State agency operations.

4. *Food stamp program.*—Food and Nutrition Service is responsible for developing policies and procedures for the jurisdictions administering the program. It also provides technical assistance to States, monitors quality control and the effectiveness and efficiency of the State administration of the program, allocates and reviews 50% matching funds to the States and directly supervises the

retail and wholesale firms which are authorized to accept food stamps.

5. *Food donations program.*—The agency determines food required, allocates commodities, designates time and place of shipment, and monitors program operations.

6. *Elderly feeding program.*—Act as purchasing agent of commodities for meals served under the elderly feeding program when States elect commodities rather than cash payments. Funded in the Department of Health, Education, and Welfare.

Staff years allocated to these activities are as follows:

¹ Includes capital investment as follows: 1977, \$72 thousand; excludes downward adjustment of \$50,766 thousand in prior year costs.

The food stamp program helps increase the food purchasing power of eligible households by enabling them to purchase food through regular retail stores with food stamp coupons. Participating households receive food stamps based on household size and income.

Public Law 95-113 provides for the following substantial changes:

Elimination of the purchase requirement so that truly needy households which do not have enough cash to pay for their coupon allotments can participate in the program. Participants will receive coupons equal to the Federal subsidy, which ranges from 100% of the current allotment to a minimum level of \$10 per household;

Replacement of current itemized deductions with a standard deduction of \$60 for each household;

Deduction of 20% of earned income for working families to compensate for mandatory payroll deductions and for work expenses;

Deduction of up to \$75 in the 48 States for, excess shelter or child care costs, or a combination of both. Alaska, Hawaii, Puerto Rico, the Virgin Islands and Guam deductions will be based on prevailing shelter costs;

Eliminates automatic categorical eligibility for recipients of benefits from welfare programs;

Requires tougher enforcement and administration of the program by the States.

Matching for State administration.—State welfare agencies at the county level are responsible for certification of eligible households and for issuing the correct amount of food stamps through suitable issuance outlets. State administrative costs associated with the program are shared by the States and the Federal Government on a 50/50 basis. The new Food Stamp Reform Act provides that the rate for State agencies who reduce quality control error rates below 5% be increased from 50% to 60%, and that State agencies be reimbursed for not less than 75% of the total cost of food stamp investigations and prosecutions.

Other program costs.—Other Federal program costs include printing and transporting coupons to authorized State agencies, processing and destruction of redeemed coupons by Federal Reserve banks and other costs.

The program was originally designed to encourage the consumption of milk by children in non-profit schools of high school grade and under, child care centers, summer camps and similar institutions.

Funds are provided to State agencies to reimburse participating institutions for a part of the cost of milk consumed. Reimbursement may be made for the full cost of milk served free to children qualifying as eligible under the Secretary's guidelines. The rate for milk served to paying children is adjusted each school year to reflect changes in the Consumer Price Index for food away from home.

Under Public Law 95-166, the service of free milk is limited to times and outlets where free milk is not available as part of a federally supported meal.

¹ Includes capital investment as follows: 1977, \$5 thousand; excludes downward adjustment of \$69,479 thousand in prior year costs.

The child nutrition programs are authorized by the National School Lunch Act and the Child Nutrition Act of 1966. The activities include:

1. *Cash payments to States.*—The programs are operated under an agreement entered into by the State agencies and the Department. Funds are advanced to State agencies for reimbursing participating schools and child care institutions. Sponsors make application to the State agencies, and if accepted, are reimbursed on a per-meal basis in accordance with the terms of their agreement and rates prescribed by law.

(a) *School lunch program.*—Federal cash assistance is provided to the States for service of lunches to all school-children, regardless of family income. States must match some of the Federal cash grant from sources within the State.

(b) *Special assistance.*—Additional Federal cash assistance is provided to the States for serving lunches, free or at a reduced price to needy children. In 1977, the program served a total of 1.9 billion lunches to an average of 11.7 million participating children. Reduced-price lunches made up 11% of the total.

(c) *School breakfast program.*—Federal reimbursement to the States is based on the number of breakfasts served free, at a reduced price, or to paying children. Certain schools, designated as especially needy, receive higher rates of reimbursement.

(d) *Equipment assistance program.*—States are provided with grants-in-aid for institutions in low-income areas. Funds, apportioned by formula, are for the purchase of food service equipment. One-third of the amount is reserved for use in institutions which are without food service or the facilities to prepare and cook hot meals or receive hot meals.

(e) *State administrative expenses.*—The funds may be used for State employee salaries, benefits, support services, and office equipment and \$4 million is added for State audits.

(f) *Summer food program.*—Meals served free to children in poor areas during the summer months are supported on a performance basis by Federal cash payments to State agencies. Local administrative expenses are reimbursed at negotiated rates, and State administrative expenses are related to the previous year's cash payments to the State.

(g) *Child care food program.*—Preschool children receive year-round food assistance in child care centers under this program. Food service in family day care homes and Headstart centers is subsidized.

2. *Commodity procurement.*—The program provides commodities to schools for the lunch and breakfast programs, and to institutions in the child care and summer feeding programs. Commodities are also acquired under programs that strengthen markets, income, and supply.

3. *Nutrition studies and education.*—(a) Up to 1% of the total funds available may be used for nutritional training and for studies and surveys.

(b) *Nutrition education projects.*—In fiscal year 1978, \$1 million was appropriated for demonstration projects in nutrition education.

(c) *Nutrition education grants.*—Public Law 95-166 instituted a per capita grant to the States for nutrition education based on the number of children enrolled in the schools in the States times 50 cents.

¹Includes capital investment as follows: 1977, \$1 thousand; excludes downward adjustment of \$15,607 thousand in prior year costs.

The special supplemental food program (WIC) and the commodity supplemental food program will be more closely aligned under legislation to be proposed. Authorization for the WIC program expires September 30, 1978; the commodity supplemental food program is authorized through September 30, 1981. The proposed legislation will extend, modify, and expand the WIC program.

There are three general types of delivery systems for WIC foods: (1) retail purchase (food vouchers), (2) home delivery, and (3) direct distribution by local clinics.

Funds for fiscal year 1978 should provide food to WIC recipients at a monthly average cost of \$22.56, plus a State and local administrative cost of \$5.64, for a total monthly cost of \$28.20 per recipient. An average of 1,150,000 WIC recipients is expected to participate.

Expansion of the WIC program in fiscal year 1979 could reach an average participation of 1,495,000 recipients or more based on the rate of expansion. The total monthly cost per recipient is estimated to be \$29.89, with \$23.91 for the food package and \$5.98 for State and local administrative costs. This increase per person is due to an anticipated increase in the cost of WIC food items.

This program funded commodity support to elderly feeding programs as provided under title VII of the Older Americans Act of 1965, as amended. The foods provided are used in preparing the meals served in senior citizen centers or similar settings thereby helping to promote better health and reduce the isolation of old age. Recent amendments allow elderly feeding projects to elect cash subsidies rather than commodities.

Under Older American Act legislation proposed by the administration, the Department of Agriculture will continue to serve as a purchasing agent for commodities for the Department of Health, Education, and Welfare in order to simplify program administration, reduce paperwork, and insure more efficient program operations.

1. *Forest land management*—(a) *National forest protection and management*.—The 154 national forests and 19 units of national grasslands are managed under multiple use and sustained yield principles. The natural resources of outdoor recreation, range, timber, watershed, and wildlife are utilized in a planned combination that will best meet the needs of the Nation without impairing productivity of the land and that will be environmentally acceptable. The management and utilization principles were recognized in the Multiple Use-Sustained Yield Act of June 12, 1960 (74 Stat. 215). Work programs and budget estimates are related to meeting the increased demands for specific national forest resource needs through 1979 and for long-term objectives to the year 2020. Increases are provided in the budget to further attainment of these program objectives.

(b) *Fighting forest fires.*—Provides for employment of additional manpower and other facilities for forest fire emergencies and emergency rehabilitation of burned areas which cannot be met under national forest protection and management. Costs above estimates for the current and budget years are authorized from advances from other Forest Service appropriations. A supplemental appropriation for fighting forest fires is anticipated for 1978.

(c) *Forest insect and disease management.*—Activities to suppress and control destructive insects, diseases, and air pollutants that threaten all forest and related resource lands. This work is carried on jointly with Federal, State, and private landowners and includes prevention, detection, biological evaluation, and suppression. Sound environmentally acceptable forest pest management practices are used to help fill the needs of an ever-increasing population for fiber, water, recreation, wildlife habitat, esthetics, and a healthful environment.

(d) *Cooperative law enforcement.*—Public Law 92-82 authorizes the cooperation with any State or political subdivision thereof in the enforcement of State or local laws on lands of the National Forest System.

2. *Forest research.*—Research is conducted at eight regional forest experiment stations, the Forest Products Laboratory, and the Institute of Tropical Forestry.

(a) *Forest and range management.*—Research provides land managers and owners with a sound basis for management of timber, forage, wildlife, recreation, and watershed lands. Studies are conducted to maintain a sustained yield of products; improve forage and habitat for livestock and wildlife without damage to soil, watershed, or other values; assure maximum regular flow of usable water, and reduce floods and sedimentation; improve methods for developing and managing recreation resources; provide technology needed to make it possible to surface mine areas as needed to meet mineral and energy needs with minimum impacts on productivity and esthetic value of the lands; and provide management methods for all uses that will insure environmental protection.

(b) *Forest protection.*—Research is conducted to develop measures for the protection of forests from damage by fire, insects, and diseases. Forest fire and atmospheric science research provides improved methods of preventing fires, predicting fire danger, and preparing for and combating fire by combinations of ground and aerial methods. Insect and disease research develops direct controls,

cultural measures, and biological agents to combat forest pests.

(c) *Forest products and engineering.*—Studies are conducted to develop new and improved forest products, to reduce and utilize waste and to use low-quality wood and less desirable species. Research is also conducted to advance the efficiency of forestry operations, and to develop and evaluate equipment for such operations as harvesting, planting, timber stand improvement, and protection of forests.

(d) *Forest resource economics.*—Investigations are conducted to inventory and appraise the condition of forest lands, volume and quality of standing timber, ownership of timber resources, annual growth and depletion, and the potential need for timber products. Economic studies are made of forest crop production, resource productivity, and the marketing potentials of forest products.

3. *State and private forestry cooperation.*—Cooperates and shares responsibilities with State and other public and private agencies in guiding the protection, management, and use of non-Federal forests and related lands and resources. Specific activities include technical and financial assistance, resource protection, resource planning, and other actions designed to optimize a sustained flow of benefits and products from these lands.

(a) *Forest fire control.*—Assistance is furnished all States and Guam in preventing and suppressing forest fires on private and local public lands by financial aid, coordination, training, development, and procurement of equipment, and a nationwide fire prevention campaign. About 91% of the 797 million acres of non-Federal forest ownership planned for protection is now covered. The assistance provided through this program insures reduced losses of forest and related resources from man-caused and natural wildfire occurrences. Of the total expenditures under this program, 93% is contributed by States and counties, 0.6% by private owners, and 6.4% by the Federal Government.

(b) *Forest tree production.*—Financial and technical assistance is provided to the States, Puerto Rico, Virgin Islands and Guam for the production, acquisition, and distribution of over half of the Nation's tree planting stock for forest and windbarrier planting on non-Federal lands. About 45 million acres of nonstocked, poorly stocked, or open lands need to be reforested. Financial and technical assistance to private landowners for tree planting and timber stand improvement practices is also available through the forestry incentives program.

(c) *Forest management and processing.*—In cooperation with all States, Puerto Rico, Virgin Islands, and Guam, technical assistance is given to woodland owners in applying multiple use management to their forest holdings, and to operators of forest products manufacturing plants in improving their manufacturing and processing techniques to extend supplies of timber, range, water, wildlife habitat, recreation, and esthetic values.

(d) *General forestry assistance.*—Technical management assistance is provided usually by Federal personnel and also through other arrangements to State, community, private, and other Federal agencies, forest industries, colleges, and landowners. This program also provides forest products utilization assistance to wood-using industries and loggers, technical assistance for State forest resource planning, nonpoint pollution control, endangered species protection, for wild and scenic river studies on State and private lands, and for the State and private portions of the Oregon range validation project.

1. *Forest land management construction.*—(a) *Recreation facilities.*—To provide facilities necessary to safely meet increased recreation demand without sacrificing environmental values and without unduly impinging upon other resource uses of the national forests.

(b) *Other facilities.*—To provide for construction and acquisition of fire, administrative, and other improvements and related facilities necessary to carry out national forest programs. Includes fire lookouts, offices, dwellings and barracks for employee housing, service and storage buildings, insectories, tree nursery buildings, basic communication systems, and other forest resource management projects. Also includes acquisition of land and interests therein for administrative purposes.

2. *Research construction.*—To provide for construction, alteration, and improvement of research laboratories and related facilities, and for procurement and installation of necessary initial equipment needed to put the facility into operating condition.

3. *Pollution abatement.*—To reduce water and air pollution from existing recreation, research, fire, and administrative facilities consistent with State and Federal air and water quality standards as required by Executive Orders 11507 and 11752 and Public Law 92-500.

4. *Land acquisition, Weeks Act.*—Lands are purchased to protect the watersheds of navigable streams and to increase the production of timber.

5. *Land planning, Alpine Lakes Area Management Act.*—To complete multiple-use planning for the Alpine Lakes Area. Funds for land acquisition are included in the Land and Water Conservation Fund, Department of the Interior.

The Working capital fund was established by the act of August 3, 1956 (16 U.S.C. 579b), as amended by the act of October 23, 1962 (16 U.S.C. 579b). It is a self-sustaining revolving fund which provides services to National Forests, experiment stations, and when necessary, to other Federal agencies, and as provided by law, to State and private agencies and persons who cooperate with the Forest Service in fire control and other authorized programs.

The forestry related supply and support services provided by the Working capital fund in fiscal year 1977 included:

Equipment service which owns, operates, maintains, replaces, and repairs common use motor driven and similar equipment. This equipment is rented to administrative units, i.e., National Forests, experiment stations, and

other units, and in some cases to the other agencies, at rates which recover the cost of operation, repair and maintenance, management, and depreciation. The rates also include an increment which provides additional cash which, when added to depreciation earnings and the residual value of equipment, provides sufficient funds to replace the equipment.

Aircraft service which operates, maintains, and repairs Forest Service owned aircraft used in fire surveillance and suppression and in other Forest Service programs. The aircraft are rented to National Forests, experiment stations, and in some cases to other agencies, at rates which recover the cost of depreciation, operation, maintenance, repair, and improvements in the airworthiness of the aircraft. Aircraft replacement costs are financed from either appropriated funds or the Forest Service working capital fund, or a combination of both.

Supply service which operates the following common services:

Central supply which procures, stores, and issues grass seed to National Forests, experiment stations, and others at prices which recover costs.

Photo reproduction laboratories which store, reproduce, and supply aerial photographs, aerial maps, and other photographs of National Forest lands. The photographic reproductions are sold to National Forests, experiment stations, and others at cost.

Sign shops which manufacture and supply special signs for the National Forests for use in regulating traffic and as information to the public and other users of the National Forests. The signs are sold to National Forests and experiment stations at cost.

Subsistence which prepares and serves meals to Forest Service crews working in areas where adequate public restaurant facilities are not available.

Nurseries which operate forest tree nurseries and cold storage facilities for storage of tree and seed stock and a seed extractory. Tree seed is procured, cleaned, bagged, and stored in refrigerated facilities. Tree and seed stock is sold to National Forests, States, and other Federal agencies at cost.

Legislation is recommended which would provide an increase of \$5.5 billion in the Corporation's borrowing authority. The increase is estimated to be needed to finance the Corporation's projected activities beginning in fiscal year 1979, and continuing in the foreseeable future. The enactment of this proposal would not increase obligations beyond those currently authorized by law. It would permit the Corporation to meet that part of its estimated obligations which would be constrained from payment by the current limitation on borrowings, and would provide a reserve for unknown or unforeseen contingencies. As a consequence of enactment of this proposal, the need to incur contract authority in 1979 would be eliminated. This proposal would result in no additional outlays in 1979.

Legislation is recommended to institute two new authorities associated with the subsidized rural housing programs administered by the Farmers Home Administration. A new home ownership assistance program is proposed to enable FmHA to provide housing assistance to rural families with incomes much lower than those that can currently be accommodated under FmHA's current home ownership program and where it is more cost effective than other FmHA very low income housing assistance programs. In addition, FmHA is proposing a Federal

subsidy recovery procedure that will enable the Federal Government to recover all or part of the interest subsidies and other subsidies granted under FmHA's programs when a subsidy recipient (borrower) sells his home.

Legislation is recommended to place on a self-supporting basis the special benefit portion of cotton classing, tobacco inspection, warehouse inspection and licensing services, and to provide for user charges to offset costs of mailing and printing market news reports. The proposed legislation would permit the assessment and collection of fees to cover the costs of these services which currently are funded by annual appropriation.

Legislation is recommended to concentrate program benefits on those most in need by changing the indexing of mandated commodity support for lunches and suppers served under the child nutrition programs from the consumer price series for food away from home to the wholesale price index best reflecting the value of donated foods. The index now being used has a large labor component which diminishes its accuracy as a commodity adjustor.

Legislation is recommended to concentrate benefits on those most in need, and to improve the cost indexing of the reimbursement system.

Proposed legislation would limit reimbursement for milk to schools, child care institutions or summer camps which do not otherwise receive reimbursement for meals including milk as a required part of the meal. This will encourage children to participate in the lunch, breakfast, child care, and summer programs, which supply a nutritionally complete meal.

The index now used to adjust the Federal reimbursement rate for milk is the Consumer Price Index for food away from home. Because of the large influence of labor costs and restaurant overhead, the index has proven to be inappropriate.

Legislation is recommended to change the index to the Wholesale Price Index for fresh processed milk, which more accurately reflects the price paid by local agencies.

Legislation is recommended to control projected increases in Federal spending and to target increases more on needy children and areas.

1. *Cash payments to States.*—(a) *National school lunch program.*—Proposed legislation would modify procedures for adjusting the rates for cash reimbursements for infla-

CHILD NUTRITION PROGRAMS—Continued

tion to keep rate adjustments more consistent with need. Legislation would also set the reimbursement rate for reduced-price meals 20 cents less than the rate for free meals, so that revenues for the reduced-price meals will equal rather than exceed revenues from free meals.

(c) *School breakfast program.*—There would be similar modifications in procedures for adjusting reimbursement rates, and the breakfast program would be mandated in schools with a substantial percentage of needy children.

(d) *State administrative expenses.*—This formula would be modified to allow a broader distribution of increased support than provided under Public Law 95-166.

(e) *Child care food program.*—Proposed legislation would simplify the program and concentrate assistance on the needy by reimbursing all meals served to children eligible for free or reduced-price meals at the free reimbursement rate, and ending reimbursements for meals served to children from higher income families (above 195% of the poverty guidelines).

2. *Commodity procurement.*—Legislation is recommended to concentrate the benefits of the program on those most in need by changing the indexing of the mandated commodity support for lunches and suppers served under the child nutrition programs from the consumer price series for food away from home to a wholesale price index better reflecting the value of donated foods. The index now being used has a large labor component which diminishes its accuracy as a commodity adjustor.

3. *Nutrition studies and education.*—Nutrition education projects, section 18, and nutrition education and training, section 19, would be replaced by new legislation which would institute nutrition education and training.

TITLE VI—GENERAL PROVISIONS

SEC. 601. Within the unit limit of cost fixed by law, appropriations and authorizations made for the Department of Agriculture for the fiscal year [1978] 1979 under this Act shall be available for the purchase, in addition to those specifically provided for, of not to exceed eight hundred [forty-seven] seventy-eight [(847)] (878) passenger motor vehicles, of which [six] seven hundred thirty- [six] two [(636)] (732) shall be for replacement only, and for the hire of such vehicles.

SEC. 602. Funds available to the Department of Agriculture shall be available for uniforms or allowances therefor as authorized by law (5 U.S.C. 5901-5902).

SEC. 603. Not less than \$1,500,000 of the appropriations of the Department of Agriculture for research and service work authorized by the Acts of August 14, 1946, July 28, 1954, and September 6, 1958

(7 U.S.C. 427, 1621-1629; 42 U.S.C. 1891-1893), shall be available for contracting in accordance with said Acts.

SEC. 604. No part of the funds contained in this Act may be used to make production or other payments to a person, persons, or corporations who harvest or knowingly permit to be harvested for illegal use, marihuana, or other such prohibited drug-producing plants on any part of lands owned or controlled by such persons or corporations.

SEC. 605. Advances of money from any appropriation for the Department of Agriculture may be made by authority of the Secretary of Agriculture to chiefs of field parties.

[SEC. 606. None of the funds provided by this Act shall be used to pay the salaries of any person or persons who carry out the provisions of section 610 of the Agricultural Act of 1970, which provides for the transfer of funds to Cotton Incorporated.]

SEC. [607] 606. Obligations chargeable against the Working Capital Fund during the period October 1, [1977] 1978, through September 30, [1978] 1979, shall not exceed [\$54,000,000] \$58,043,000: *Provided*, That no funds appropriated to an agency of the Department shall be transferred to the Working Capital Fund without the approval of the agency administrator.

SEC. [608] 607. New obligational authority provided for the following appropriation items in this Act shall remain available until expended: Scientific Activities Overseas (Special Foreign Currency Program); Public Law 480; Rural Housing [for Domestic Farm Labor; Mutual and Self-Help Housing] *Grant Programs*; Watershed and Flood Prevention Operations; Resource Conservation and Development; Forestry Incentives Program; Emergency Conservation Measures; Buildings and Facilities, Food and Drug Administration; and the appropriation to liquidate contract authorizations for the Agricultural Conservation Program.

SEC. [609] 608. [(A) None of the funds provided in this Act may be used to reduce programs by establishing an end-of-year employment ceiling on permanent positions below the level set herein for the following agencies: Farmers Home Administration, 7,440; Agricultural Stabilization and Conservation Service, 2,473; and Soil Conservation Service, 13,955.]

[(B) The Secretary of Agriculture is authorized to transfer unexpended balances of prior appropriations to accounts corresponding to current appropriations provided for [“Domestic Food Programs”] *Rural Development Grant Programs, Rural Housing Grant Programs and Special Supplemental Food Programs* in this Act: *Provided*, That such transferred balances shall be available only for the same purposes, and for the same periods of time, for which they were originally appropriated.]

[SEC. 610. None of the funds contained in this Act shall be used by any State Committee to prevent any County Committee from authorizing the use of any funds for any nationally authorized program of the Agricultural Conservation Program.]

SEC. [611] 609. No part of any appropriation contained in this Act shall remain available for obligation beyond the current fiscal year unless expressly so provided herein.

SEC. [612] 610. Not to exceed \$50,000 of the appropriations available to the Department of Agriculture shall be available to provide appropriate orientation and language training pursuant to Public Law 94-449.

SEC. [613] 611. Notwithstanding any other provision of law, employees of the agencies of the Department of Agriculture, including employees of the Agricultural Stabilization and Conservation County Committees, may be utilized to provide part-time and intermittent assistance to other agencies of the Department, without reimbursement, during periods when they are not otherwise fully utilized. (*Public Law No. 95-97, making appropriations for Agriculture and related agencies, 1978.*)

Note.—Excludes \$71 thousand in 1978 and \$195 thousand in 1979 for activities transferred to General Administration, "Salaries and expenses." Comparable amounts for 1977 (\$195 thousand), and 1978 (\$124 thousand) are included above. Includes \$658 thousand in 1979 for activities previously financed from Department of Defense.

The activities of this appropriation provide for the collection, compilation, and publication of a broad range of current statistics dealing with economic, demographic, and social data.

1. *Current economic statistics programs.*—(a) *Business statistics.*—This program provides current information on sales and related measures of retail and wholesale trade and selected service industries.

General and special funds—Continued

SALARIES AND EXPENSES—Continued

The 1979 budget provides for the implementation phase of a monthly survey of inventories, sales, and related information for large, complex companies in the retail, wholesale, and manufacturing sectors. The weekly retail sales estimates program will be discontinued.

(b) *Construction statistics.*—Reports are provided on significant construction activity such as housing permits and starts, value of new construction, residential alterations and repairs, and quarterly price indexes for new, single-family houses.

(c) *Manufacturing statistics.*—Surveys of key industrial commodities and manufacturing activity provide current statistics on the quantity and value of industry output.

The 1979 budget provides for information on major types of capital equipment expenditures by industry of user to improve the estimates of GNP and interindustry capital flows in input-output matrices, and for analyses of capacity expansion and changes in productivity. Additionally, the quarterly sales and inventory expectations survey will be terminated.

(d) *General economic statistics.*—This subactivity provides an industrial directory of all U.S. business firms and their establishments, uniform classification data, and annual county business data.

The 1979 budget provides for the Bureau to assume the function now performed by the Social Security Administration of classifying approximately 250,000 employers annually who either lack industrial classification or whose classification is incomplete. Additionally, resources are included to reimburse the Internal Revenue Service for maintaining an item on tax form 941 relating to quarterly and annual payroll data needed by the industrial directory and county business patterns programs.

(e) *Foreign trade statistics.*—Monthly, cumulative-to-date, and annual reports are published on the quantity, shipping weight, and dollar value of imports and exports, by mode of transportation, detailed commodity category, customs district, and country of origin or destination. Commodity classifications are being improved for comparability and other activities are being conducted in support of the Trade Act of 1974.

(f) *State and local government statistics.*—Reports are published annually regarding the revenue, expenditures, indebtedness and debt transactions, financial assets, employment, and payrolls of State and local governments. Quarterly information on State and local tax revenue is furnished on the national level by type of tax and governmental level.

(g) *Agriculture statistics.*—Information on cotton ginnings and production, as required by statute, is compiled and published. Statistical services are provided regarding the information from the census of agriculture.

2. *Current demographic statistics programs.*—(a) *Population statistics.*—Annual estimates of population are prepared for the United States, each of the States, counties, SMSA's, congressional districts, other governmental units, and some other countries. Current estimates include the number of households, the farm population, school enrollment and educational levels, individual and family income, population mobility, size of families, and voting and registration trends. New approaches and concepts in data collection methodology are being tested to improve the quality and reliability of the current population survey.

The 1979 budget provides for a survey of income and program participation designed to overcome deficiencies recognized in current income and poverty data.

(b) *Housing statistics.*—National and regional estimates of housing vacancy rates and the Nation's housing inventory are developed.

3. *Other programs and publications.*—(a) *Statistical abstract and supplements.*—The Statistical Abstract, issued annually, summarizes Government and private statistics of the industrial, social, political, and economic activities of the United States.

(b) *General research.*—Research is conducted on survey methods and techniques.

Note.—Excludes \$282 thousand in 1978 and \$282 thousand in 1979 for activities transferred to General Administration, "Salaries and expenses." Comparable amounts for 1977 (\$282 thousand) are included above.

This appropriation funds legislatively mandated censuses and surveys of major economic and demographic areas once or twice each decade and other major periodic activities which may be authorized.

1. *Economic statistics programs*—(a) *1977 economic censuses*.—The economic censuses cover manufactures, mineral industries, retail and wholesale trades and service industries, construction, and transportation every 5th year, covering years ending in 2 and 7.

The 1979 budget provides for review of data collected; tabulation and analysis of summary data; continuation of evaluation and reconciliation programs; collection and processing of data for the Survey of Minority-Owned Business Enterprises; and initiation of the publication and dissemination phase of the censuses. Resources are also included for compiling and publishing a report of the characteristics of businesses owned by women.

(b) *1977 census of governments*.—This census collects State and local government data including taxes, tax valuations, governmental receipts, expenditures, indebtedness, and number of employees. This census is taken every 5th year for years ending in 2 and 7.

The 1979 budget provides for the completion of data collection for the finance phase and the publication of survey results for the governmental finance and employment phases of the census.

(d) *1978 census of agriculture*.—This census collects data from the agricultural sector of the economy in 1978 and thereafter in years ending in 2 and 7. In addition to the regular data collected in the census, the censuses of irrigation and drainage will be conducted in 1978, 1987, and every 10 years thereafter.

The 1979 budget provides for the completion of data collection; most of the processing and editing of individual reports; the development of linkages between the agriculture sector data and data for other sectors of the economy; preparation of the sample follow-on surveys and the evaluation program. An area sample and other activities are also included to improve the coverage of the census.

2. *Demographic statistics programs*—(a) *Intercensal demographic estimates*.—This program provides for updated population and per capita income estimates for approximately 38,500 general purpose governmental units for equitable allocation of funds under the General Revenue Sharing Act.

(b) *1980 decennial census*.—The decennial census of population and housing involves the enumeration of the total population of the 50 States, the District of Columbia, Puerto Rico, Virgin Islands, Guam, Canal Zone, and other areas of U.S. sovereignty or jurisdiction.

The 1979 budget provides for continued overall planning, direction and review, testing of certain census elements, final design and printing of questionnaires and associated materials, completion of geographic activities, and completion of procedures for data collection, processing, and sampling and evaluation, including improved procedures to reduce and to adjust for population undercount.

(c) *Registration and voting surveys*.—This survey is required by the Voting Rights Act of 1965 as amended by Public Law 94-73. Biennial surveys are conducted in every State or political subdivision falling under the requirements of the act.

The 1979 budget provides for the data collection, quality control, review, processing, tabulation, and release of the data for the 1978 elections.

(d) *1985 mid-decade census*.—A census of population is required by Public Law 74-521 on April 1, 1985, and every 10 years thereafter.

General and special funds—Continued

PERIODIC CENSUSES AND PROGRAMS—Continued

The 1979 budget provides for the determination of data needs to be covered by the census and for the review of methodological alternatives to meet these needs.

3. *Periodic programs geographic support.*—This program provides for the maintenance of a continuing program to fulfill the geographic requirements of the various periodic censuses and large-scale surveys and involves accurate identification of both political and statistical areas, preparation of maps, and maintenance of geographic base files.

4. *Data processing equipment.*—This program provides for leasing of selected electronic data processing equipment to update existing computer systems.

Capital outlay—1. Large-scale data processing equipment.—The 1979 budget provides for the purchase of additional electronic equipment needed to modernize the data processing installation of the Bureau of the Census.

2. *Other capital investment.*—This provides for the acquisition of office furniture, machines, and other miscellaneous equipment necessary to conduct periodic censuses and surveys.

The Bureau of the Census performs statistical work and analysis, at cost, when it is determined to be in the public interest and the statistics furnished will not identify individuals or particular organizations.

On a continuing basis, Census furnishes age and citizenship data to individuals for their use in qualifying for social security, old-age benefits, retirement, passports, court litigation, insurance settlements, et cetera. Special censuses are conducted for States, counties, cities, towns, or other political divisions requiring an up-to-date count of their population. Census also periodically performs statistical work and data analysis for State and local governments, universities, trade associations, and individuals upon request.

¹ Includes capital investment as follows: 1977, \$50 thousand; 1978, \$50 thousand; 1979, \$56 thousand.

Note.—Includes \$1,742 thousand in 1979 for activities previously financed from "Salaries and expenses", General Administration, Department of Commerce. Excludes \$169 thousand in 1978 and in 1979 for activities transferred to General Administration, "Salaries and expenses." Comparable amounts for 1977 (\$168 thousand) are included above.

With the change from the Bureau of Economic Analysis to Economic and Statistical Analysis, three additional offices, as described below, have been transferred from the General Administration appropriation of the Department of Commerce.

1. *Bureau of Economic Analysis (BEA)*.—The objective of BEA is to provide a clear picture of the state of the economy through the preparation, development, and interpretation of the economic accounts of the United States. The principal programs are:

(a) *National economic accounts*.—The national income and product accounts, summarized by the gross national product (GNP), provide an up-to-date overall view of national production, its distribution, and its use as shown by the interrelated receipts and expenditures of producers, consumers, investors, government, and the foreign customers of the United States. The interindustry accounts consist of the preparation, development, and analysis of input-output tables. The regional accounts provide detail on economic activity by region, State, SMSA, and county. The 1979 request provides \$445 thousand for the preparation on a quarterly basis of estimates of national defense purchases in constant dollars.

(b) *Analysis of business trends*.—This work includes surveys of business investment, econometric models of the U.S. economy, estimates of the costs and unit rates of emission for pollution abatement, GNP-related measures to help evaluate national well-being, a system of business cycle indicators, and analyses of the business situation.

(c) *International economic accounts*.—The balance of payments accounts provide a comprehensive and detailed view of economic transactions between the United States and foreign countries. The international investment accounts consist of the preparation, development, and analysis of estimates of U.S. direct investment abroad and foreign direct investment in the United States.

(d) *General administration*.—General administration provides for the executive direction of BEA to insure the proper performance of its functions. It also includes the administrative management functions, comprised of

budget, management and systems analysis, and other administrative services.

2. *Office of Federal Statistical Policy and Standards*.—The objective of the Office of Federal Statistical Policy and Standards is to assure the integrity, accuracy, and timeliness of Federal statistics. The Office is responsible for the development and coordination of statistical policy and the development and implementation of statistical standards and guidelines. The 1979 request of 10 positions and \$350 thousand would provide for the coordination of new statistical policy efforts, including social indicators, energy statistics, and implementation of the GNP data improvement project.

3. *Office of Industrial Economics*.—The objective of the Office of Industrial Economics is to conduct analyses and research on a broad range of sectoral and industrial economic questions. The Office is responsible for developing the industrial data needed to perform its own analyses and research as required by other agencies in the formulation of their policy decisions.

4. *Office of Economic Affairs*.—The objective of the Office of Economic Affairs is to provide support to the Chief Economist for the Department primarily through the analysis and interpretation of macro or aggregate economic issues. The Office is responsible for (1) monitoring, interpreting, and preparing forecasts of current business conditions; (2) advising the Chief Economist on the economic impact of proposed legislation and proposed Departmental and other Federal agency regulations; and (3) preparing speeches, reports, and articles on a wide range of economic matters.

The programs of the Economic Development Administration (EDA) are designed to reduce substantial and persistent unemployment in economically distressed areas and to react to economic adjustment problems that may arise abruptly. EDA works to accomplish these objectives by investing combinations of public works grants and loans and business development loans and guarantees in particular areas to leverage private sector investments that will create new permanent jobs. EDA also provides grants for economic development planning purposes and for technical assistance with the objective of improving the abilities of State and local officials to resolve economic adjustment and development problems. Finally, EDA supports a range of demonstration, evaluation, and research activities aimed at increasing public understanding of the processes of economic growth and development and of how public agencies and activities at all levels of government may influence those processes.

In 1979, EDA will complete a series of major administrative changes to enhance its ability to achieve these objectives. In recognition of the geographic context of most economic development problems and solutions, EDA will begin to orient its policy development and program administration activities primarily toward specific types of geographic units, such as States, rural development districts and counties, and cities. This approach will enable EDA to coordinate its diverse development tools in comprehensive, customized responses to the structural economic problems of particular areas. EDA will support the development of comprehensive, coordinated investment strategies through capacity-building and technical assistance grants. EDA also will provide investment grants, loans and loan guarantees, as well as special adjustment assistance, to aid in the implementation of these strategies.

Obligations by program initiative are as follows (amounts in thousands):

Total obligations.....	390,100	499,500	627,425

Note.—1978 estimate includes supplemental proposed in Part III.

Within the areas served, EDA strives to meet its program objectives through the use of a broad range of activities.

Public works grants provide funds for the construction or expansion of community facilities conducive to the location of industrial and commercial enterprises and the creation of additional long-term employment opportunities.

Public works loans are made in association with public works grants.

Business development loans and guarantees, including long-term low-interest loans for fixed assets, finance businesses willing to establish or expand operations in the Nation's economically distressed areas. In addition, the act authorizes direct working capital loans, working capital guarantees, interest subsidies, guarantees of fixed asset loans made by private institutions, and guarantee of lease payments for buildings and equipment.

Planning assistance encourages and supports local development organizations by providing professional planning help and related services.

Technical assistance provides appropriate, specific management and operational technical expertise to help assure the success of grant and loan projects; supports institutional and demonstration projects that directly benefit a number of local and regional economic development groups and organizations; and supports feasibility studies and other site-related projects.

Economic research assists in the development of improved EDA programs and also provides research and information useful to others in the economic development field.

Program evaluation assists the agency top staff in making policy and management decisions. Analyses are performed by EDA staff and through contracts.

Grants to States is a program initiated in 1975 by the addition of section 304 of the act; it enables States to supplement grants or to make new grants or loans consistent with titles I, II, III, IV, and IX of the act. Funds approved under this new program are distributed among the States based on the percentage of title I funds received by each State since the beginning of EDA.

Economic adjustment assistance provides grants to helped areas resolve problems related to actual or threatened long-term unemployment or low income. Assistance may be provided to facilitate long-term community adjustments to such situations as the closing of a major employer in the area. A major expansion of assistance will be made available for the growing number of firms and communities adversely impacted by international trade.

Title I of the Public Works Employment Act of 1976, as amended, authorized \$6 billion for grants to State and local governments for public works projects which will stimulate activity in the construction and construction-related industries and thereby contribute to the reduction of unemployment. Eligible projects were those which provided for construction, renovation, repair, or other improvements of a public works nature which have a local orientation. Title I also authorized funding for the completion of plans, specifications, and estimates for local public works projects where either architectural design or preliminary engineering or related planning had already been undertaken and where additional work of this type was needed to permit construction.

Total funds available for program activities were obligated at the close of fiscal year 1977. Additional appropriations are requested in fiscal year 1979 for administrative purposes only.

The drought assistance program, designed to mitigate the impacts of the 1976-1977 drought, was authorized as a temporary measure by the Community Emergency Drought Relief Act of 1977. This act gives temporary authority to the Secretary of Commerce to provide grants and loans to States and political subdivisions of States with populations of 10,000 or more, Indian tribes, public or private nonprofit corporations, and certain water districts. The total 1977 appropriation of \$175,000 thousand was obligated as of September 30, 1977.

Revenue and principal repayments from loans made under the Area Redevelopment Act and the Public Works and Economic Development Act are deposited in this fund. Interest payments are made to the Treasury from this fund on the amount of loans outstanding.

EDA will utilize up to \$100 million of the 1978 revolving fund unobligated balance to guarantee loans made by the private sector to firms suffering economic dislocation. It is anticipated that these guarantees will be provided primarily to firms in the steel industry. These loans will enable the firms to continue operations and to modernize plants in areas of high unemployment or threatened major layoffs. The \$100 million represents a 20% set-aside of funds to cover possible defaults. The \$100 million would leverage \$500 million in loans. The budget proposal anticipates no defaults in either 1978 or 1979; so, there is no outlay projection.

The Regional Action Planning Commissions address problems of economic dislocation or lag on a multistate basis. There are currently eight regional commissions which encompass all or part of 34 States; they are Coastal Plains, Four Corners, New England, Old West, Ozarks, Pacific Northwest, Upper Great Lakes, and Southwest Border, which was established on August 8, 1977. Each Commission is composed of the Governors of member States and a Federal cochairman appointed by the President.

1. *Development programs.*—The 1979 development programs will enable the Commissions to carry out a program of planning, technical assistance, demonstration projects, and supplemental grants-in-aid.

2. *Administrative expenses.*—This activity provides for staff costs for the Commissions, the Federal cochairmen, and the Special Assistant to the Secretary for Regional Economic Coordination. The Federal Government provides 100% of the financing for the administrative staffs of new Commissions, and 50% of the costs of other Commissions, with the States in each region sharing the balance of the costs.

The activities of the Industry and Trade Administration of the Department of Commerce are directed at strengthening the economy of the United States by promoting the growth and competitive position of U.S. industry in domestic and international markets in a manner consistent with national security and economic policy.

1. *Export development.*—Encourages and assists U.S. businesses to export by (1) conducting market research and overseas trade promotion events, (2) assisting U.S. companies to compete for foreign capital projects and product purchases, and (3) providing U.S. industry with overseas sales leads.

2. *East-West trade.*—Expands the United States trade with the U.S.S.R., Eastern Europe, the People's Republic of China, and other countries with centrally planned economies.

3. *Domestic business development.*—Develops and conducts specific business programs for improving economic conditions in selected industries and for improving business retention and development in urban areas. Assists industries in resolving the problems arising from growing

imports and in protecting world trading markets. Assists business and industry in utilizing Government services. Comments on legislation affecting domestic business and conducts studies and analyses on the Nation's environmental problems.

4. *International economic policy and research.*—Provides U.S. Government officials with international economic analyses, policy recommendations, and negotiating strategies and options which are necessary for Commerce to successfully formulate and implement national, multi-lateral, and bilateral programs and negotiations and meet the requirements of various legislation and executive orders.

5. *Trade regulation.*—Assures that export activity is consistent with the national security, foreign policy objectives, and U.S. material and commodity requirements. Enforces the law against participation in foreign boycotts. Facilitates timely availability of industrial resources for selected defense and energy projects. Administers certain statutory functions relating to imports and foreign trade zones.

6. *Field operations.*—Serves as the Department's principal contact with local business communities. Delivers information and services from the Department's programs to business and multiplier agencies. Publishes the Commerce Business Daily.

7. *Administration.*—Provides administrative management services for program units.

¹ Includes capital investment as follows: 1977, \$137 thousand; 1978, \$87 thousand; 1979, \$87 thousand.

Note.—Excludes \$1,303 thousand in 1978 and \$1,354 thousand in 1979 for activities transferred to General Administration, "Salaries and expenses." Comparable amounts for 1977 (\$1,354 thousand) and 1978 (\$51 thousand) are included above.

In its leadership role of coordinating the minority business development program, the Office of Minority Business Enterprise (OMBE) seeks to create improved, national conditions within which the minority people of the United States will have an equal opportunity to participate in the American business system. In 1979, increased emphasis will be placed on expanded private sector and Federal Government involvement in the promotion of minority business development.

1. *Client services.*—Activity provides direct, general business services to minority individuals and firms seeking business information, counseling, financial packaging assistance and assistance in identifying and exploiting business opportunities and new and/or expanded markets. In addition, this activity provides direct, specialized business assistance services to minority firms in selected growth industries, to businesses associated with large-scale, economic development projects, and to firms in need of specialized guidance in such areas as acquisition, mergers, and divestitures. Also, professional consultant services are provided through this activity for firms in need of more sophisticated assistance than that provided by other OMBE-funded organizations or qualified volunteers.

2. *Business development.*—Activity provides for the indirect business assistance programs conducted by OMBE. These programs encourage minority business development in general through support activities aimed at identifying and developing private markets and capital sources; decreasing minority dependence on government

programs; expanding business information and business services through trade associations; promoting and supporting the mobilization of resources of Federal agencies and State and local governments at the local level; and assisting minorities in entering new and growing markets.

3. *Research and development.*—Activity provides for scientific research directed toward the solution of problems affecting minority business enterprise and to the collection of business/economic data needed to facilitate the solution of such problems. In addition, demonstration projects are funded to test new/alternative means of meeting the needs of minority entrepreneurs, test the feasibility of these means through pilot projects, and assess the performance of these projects.

4. *Program development and management.*—Activity finances all salaries and related expenses of OMBE. Included in this activity is the responsibility for the overall development and direction of OMBE programs, provision of administrative support for all daily operating requirements, and the administration of the contract and grant programs. These responsibilities are carried out in the national office and OMBE's six regional offices.

Note.—Excludes \$50 thousand in 1978 and \$100 thousand in 1979 for activities transferred to General Administration, "Salaries and expenses". Comparable amounts for 1977 (\$100 thousand), and 1978 (\$50 thousand) are included above.

1. *Promotion of international travel.*—Promotion of international travel programs will continue to operate in the six major foreign markets and in designated special markets. Marketing strategies will be tailored to the specific needs of the countries served through programs such as tour development, consumer advertising, films and photos, product information and familiarization tours. These programs, together with other factors that persuade the visitor to choose the United States as his or her travel destination, are estimated to produce 22 million arrivals which would generate approximately \$9.9 billion in foreign exchange earnings in 1979. Results relating directly to USTS efforts are projected at 600,000 arrivals and \$296 million in foreign exchange earnings for 1979.

2. *Promotion of domestic travel.*—In 1979, USTS plans to implement domestic tourism programs that would encourage tourism to those areas of the United States that possess viable and competitive tourism attractions and facilities or which are experiencing significant underutilization of existing plants and facilities. USTS programs would also develop tourism outside the traditional peak tourist season by working with regions, States, cities, other Federal agencies, and all segments of the travel industry in the development and implementation of programs which would contribute to the balanced economic growth of the industry and the Nation.

3. *Executive direction.*—Policy guidance, executive management, and administrative support in the areas of fiscal planning, program implementation, and program measurement and evaluation are the objectives of the offices and support groups located under this activity.

Note.—Excludes \$385 thousand in 1978 and \$667 thousand in 1979 for activities transferred to: General Administration "Salaries and expenses". Comparable amounts for 1977 (\$667 thousand) and 1978 (\$282 thousand) are included above.

This appropriation provides for the research, development, and support of operating programs, and acquisition of facilities for fulfilling the basic responsibilities of the National Oceanic and Atmospheric Administration (NOAA).

1. *Mapping, charting, and surveying services.*—Provides for charting the Nation's coastal regions; production of aeronautical charts for safe and efficient commercial and general aviation; and geodetic surveys. The 1979 increase will provide for developing a bathymetric mapping program covering the coastal zone and continental shelf.

2. *Ship support services.*—Provides for operation and logistical support of NOAA ships and marine centers. The 1979 increases primarily will provide for operation of a new research vessel; and for installation of required pollution abatement equipment on NOAA ships.

3. *Ocean fisheries and living marine resources.*—Provides for safe fishery products, viable commercial and marine sports fishing programs, and conservation of endangered species by protecting, developing, and managing U.S. living marine resources, including the seal herd of the Pribilof Islands. The 1979 increases primarily provide for expanded resource surveys and analyses; expanded marine mammal and endangered species conservation efforts and research; construction of pollution abatement facilities for Columbia River hatcheries; expansion and improved coordination of the aquaculture program; administrative and operating requirements of the Regional Fisheries Management Councils; establishment of a nationwide data management capability; and expanded recreational fisheries data collection.

4. *Marine ecosystems analysis and ocean dumping.*—Provides information for management of the marine environment and its resources. The 1979 increases will provide for expanded ocean dumpsite monitoring and research; studies of the long term effects of man on the ocean environment; research to understand and predict environmental threats in the Gulf of Mexico; expanded Puget Sound marine ecosystems analysis; phase two of the deep ocean mining environmental study (DOMES); and a quick response capability to oil spill incidents.

5. *Marine technology.*—Provides for development, testing, and calibration of oceanographic instruments. The 1979 increase will provide for developing water quality sensors and improving NOAA's diving activities.

6. *Sea grant.*—The sea grant program provides matching fund grants to public and private universities, institutes, and industries to seek solutions to problems related to management and use of marine resources, and transfer of new technology to marine users. The 1979 increases provide for aquaculture research and development; study of marine pollution; and expansion of education and training programs.

7. *Basic environmental services.*—Provides the fundamental networks of weather observations, communications systems, weather analyses and predictions, and maintenance that are essential for all forecasts and warnings. The 1979 increases will provide for testing systems to automate marine data acquisition and communication; equipping radar with radar data processing (RADAP) equipment; developing new and improving present, long-range weather prediction capabilities; augmenting available funds to purchase an advanced scientific computer now being leased; and automating the upper air tracking system.

8. *Environmental satellite services.*—Provides for the operation of a national environmental satellite system. In-

creases for 1979 will provide for improved services to users of satellite data; studies to determine the requirement of the next generation of satellites; and reimbursement of the Air Force (NASA), for incremental costs of vehicle preparation and other services connected with satellite launchings. The installation of ground equipment has been completed and a reduction in the costs accrued for GOES-D, E, and F and the TIROS-N spacecraft and instrument procurements will be achieved in 1979.

9. *Public forecast and warning services.*—Provides weather forecast and warning services. The request for 1979 includes funds for the NOAA weather radio network; expanded Great Lakes marine weather observations; development of an ocean climate monitoring system; completion of the community preparedness program; and the establishment of a new river forecast center at Minneapolis. Decreases result from reducing the evaporation gathering data sites by 20%, and closing of 19 weather service offices.

10. *Specialized environmental services.*—Provides environmental services for support of aviation and agricultural operations; fire weather services; and information about the Sun's activities and conditions in near space for use by the Nation's space program, telecommunications agencies and industries, and electric power distributors.

11. *Environmental data and information services.*—Provides basic data and information products on the atmosphere, oceans, solid earth, the Sun, and near space. The 1979 increases provide the Center for Climatic and Environmental Assessment (CCEA) additional support and provide for modernization of data management activities.

12. *Global monitoring of climatic change.*—This activity represents the U.S. part of a U.N.-sponsored, worldwide program to monitor the long-term changes taking place in the Earth's atmosphere and predict the changes that will occur in global weather and climate.

13. *Weather modification.*—This research activity examines the feasibility of modifying hurricanes and other severe storms to reduce their intensity. The 1979 increase will provide for improved aircraft maintenance.

14. *International projects.*—This activity includes two major programs involving international participation: the global atmospheric research program (GARP), and the Great Lakes research program.

15. *Retired pay, commissioned officers.*—Provides for the retirement pay of NOAA commissioned officers and payment of survivors of retired officers under the retired servicemen's family protection plan and the survivor's benefit plan.

16. *Executive direction and administration.*—Provides for overall administrative management of NOAA.

NOTES

Excludes \$42 thousand in 1978 and \$502 thousand in 1979 for activities transferred to:

	1978	1979
General Administration, Salaries and expenses.....	42	42
Coastal energy impact fund.....	-----	460

Comparable amounts for 1977 (\$42 thousand) and 1978 (\$460 thousand) are included above.

This appropriation provides for administration, management, beneficial use, protection, and development of the land and water resources of the Nation's coastal zone, by providing grants to States for the planning and management of their coastal areas consistent with the Coastal Zone Management Act.

1. *Program development grants.*—These grants, made under section 305 of the act, permit correction of existing inadequate arrangements for planning and regulating land and water uses in the coastal zone by developing comprehensive coastal zone management programs. Program development grant funding has been reduced since the number of States in this portion of the program will decrease from 20 to 8.

2. *Program administration grants.*—These grants are for conducting ongoing activities related to carrying out State responsibilities, such as land and water use regulation, monitoring, and enforcement, which are contained in the approved management program.

3. *Energy impact formula grants.*—These grants provide funds to meet the needs of coastal States and local units of government whose coastal zones are affected by the development and production of Outer Continental Shelf oil and gas, and coastal transportation of energy resources.

4. *Estuarine sanctuaries.*—These grants provide for acquisition, development, and operation of estuarine sanctuaries for the purpose of creating natural field laboratories where studies can be made of the processes occurring within coastal estuaries. An increase in 1979 will provide grants to State governments to cover 50% of the costs of acquiring, developing, and operating estuarine sanctuaries.

5. *Marine sanctuaries.*—An increase in 1979 will provide for management of the Monitor and Key Largo marine sanctuaries and the designation of additional sanctuaries in critical marine areas.

6. *Program management.*—Provides assistance to State and territorial governments in developing and implementing coastal zone management programs and coordinates Federal activities that impact coastal zone management programs.

An amount equal to 30% of the gross receipts from customs duties on imported fishery products is appropriated (15 U.S.C. 713c-3) for marine resources research and assessment and use of fishery resources. These funds supplement moneys appropriated to the Operations, research, and facilities appropriation. The funds will be used for promoting, developing, and increasing markets of domestically produced fishery products by conducting a fishery educational program, and technological, biological, and related research programs, including appropriate executive and administrative support costs.

This program provides for loans to vessel operators who, because of the high risk associated with some commercial fishing, cannot obtain commercial loans at reasonable rates for financing or refinancing the cost of purchasing or constructing, equipping, maintaining, repairing, or operating new or used commercial fishing vessels or gear. Funds for new loans are derived from repayment of principal and interest payments on outstanding loans.

A moratorium on applications for this program was declared in February 1973, due to the need to establish new regulations that would restrict loans in overharvested fisheries and to increase the fund balance through repayments.

Under the Offshore Shrimp Fisheries Act of 1973, the United States compensates the Republic of Brazil for enforcement and surveillance services within 200 miles of Brazil's coast. These payments are provided through appropriated funds and receipts from participating fishermen and were \$361 thousand annually for calendar years 1975 and 1976. A new agreement has been negotiated with Brazil which terminates U.S. Federal financial support of this fund and the account was closed in 1977.

This fund provides for payment to vessel owners and crews to compensate for certain financial losses sustained as a result of foreign seizures of American fishing vessels found within 200 miles of their coasts. Seizures in previous

years were 46 in 1973, 1 in 1974, 7 in 1975, 1 in 1976, and 0 in 1977. Funds in this account were derived from Federal appropriations and fees from vessel owners through 1977. Beginning in 1978, the basic annual appropriation was discontinued, although appropriated funds can be requested if the fund's balance is depleted.

¹ Includes \$460 thousand in 1979 for activities previously financed from Coastal zone management.

NATIONAL OCEANIC AND ATMOSPHERIC ADMINISTRATION—CON.

Public enterprise funds—Continued

COASTAL ENERGY IMPACT FUND—Continued

This appropriation provides Federal financial assistance to meet the needs of coastal States and their local governments impacted by Outer Continental Shelf (OCS) and certain other coastal-dependent energy activity in, or in proximity to, the coastal zone of the State.

Loans, guarantees, repayment assistance.—The fund provides loans, guarantees, and repayment assistance. Additional capitalization for loans, guarantees, and repayment assistance is not requested in 1979 pending utilization of resources appropriated through 1978.

1. *Planning grants.*—These grants are for use when the siting, construction or operation of new or expanded energy facilities force affected coastal States to undertake detailed studies and plans for the economic, social, and environmental consequences of such facilities. Grants may not exceed 80% of the cost of such studies.

2. *Environmental grants.*—Section 308(d)(4) authorizes grants to coastal States to enable them to minimize the loss of valuable environmental or recreational resources resulting from coastal energy activity if no other funds for this purpose are available to the State concerned. The primary source of funds for this purpose is the formula grants of 308(b) in the Coastal zone management appropriation. Provision for these environmental grants was specifically established in the Coastal energy impact fund to meet the needs of those States (such as the Great Lakes) which will have no formula grant entitlements because they have no OCS activities. The 1979 request represents a base decrease of \$1,500 thousand. Prior year allocation of funds was a response to OCS energy activities, for which environmental related assistance is granted under other sections of the Coastal Zone Management Act. The requirements of non-OCS States and territories for environmental-related assistance is under review by NOAA. Future year requirements will be based on the results of that review.

3. *Program management.*—This activity provides program direction and administrative support for the Coastal energy impact fund. Funds are being transferred from the Coastal zone management appropriation in 1979 to support this activity.

Note.—Excludes \$1 thousand in 1978 and \$29 thousand in 1979 for activities transferred to General Administration. "Salaries and expenses." Comparable amounts for 1977 (\$29 thousand), and 1978 (\$28 thousand) are included above.

This appropriation provides for the Department's programs in support of the basic responsibilities assigned

to it by the Federal Fire Prevention and Control Act of 1974 (Public Law 93-498).

1. *Education and training*—(a) *National Academy for Fire Prevention and Control*.—This subactivity develops and delivers training and education programs which will improve the ability of fire service personnel and others in reducing fire losses.

(b) *Public education*.—This subactivity seeks to reduce fire deaths, injuries, incidents and property loss through the development and dissemination of effective public fire prevention education programs. Increases in 1979 will support an urban fire loss reduction program.

2. *National fire data center*.—This activity furnishes quantitative and reference information to the fire services and others concerned with fire prevention and control for use in identifying major problem areas, setting priorities, determining possible solutions to problems, and monitoring progress made. Increases in 1979 will provide for upgrading the statewide national fire incident reporting system (NFIRS), improving the preparation of national fire estimates, upgrading data on the rural fire problem, and improving fire dollar loss estimates.

3. *Research and development*—(a) *Fire technology and management research*.—This subactivity provides for improved planning, research, and technology necessary to significantly decrease fire-caused losses and to improve the cost-effectiveness of fire protection. Increases in 1979 will provide for the development of a national fire research policy, conduct of management studies on the delivery of current fire services, and the evaluation of fire codes and standards.

(b) *Fire research center*.—This subactivity, located at the National Bureau of Standards, develops through research, the standards, test methods, criteria, and recommended practices necessary to support the reduction of fire losses.

4. *Administration and operations*.—This activity provides for the executive direction, facility management, and administrative and legal support of the National Fire Prevention and Control Administration. Increases in 1979 will establish an internal planning and evaluation capability and provide for increased legal and administrative support.

The Office administers laws governing the granting of patents for inventions and the registration of trademarks.

Receipts deposited in the general treasury from fees are \$27.9 million in 1977 and are estimated to be \$28 million in 1978 and 1979.

Activities of the Office fall into three areas:

1. *Examination of patent applications.*—Applications are examined to determine whether or not the inventor is entitled to a patent for the claimed invention. Examination of patent applications also includes the performance of quasi-judicial functions in appeal and interference proceedings. Progress is being made toward the long-standing goal of reducing average pendency to 18 months for patent applications (from receipt to issue or abandonment), while improving the quality of patent examination.

The following table summarizes key patent application workload and performance data:

Total pendency in Office, all applications (in months).....	19.5	19.1	18.9	19.4	18.9

2. *Examination of trademark applications.*—Applications are examined to determine whether the statutory criteria for the Federal registration of the trademark or service mark have been met. Where the criteria are met a registration is issued to the applicant. Examination of trademark applications also includes inter partes proceedings involving oppositions, cancellations, and interferences. The goal to lower the average pendency of trademark applications to 3 months, from receipt to first action, has been reached.

Trademark application workload and performance data are summarized below:

3. *Collection, assembly, and dissemination of technical and legal patent and trademark information.*—This activity includes publishing the issued patents and registered trademarks, updating the examiners search files, disseminating patent and trademark information to the public, and maintaining a public search room and a scientific library.

1. *National Bureau of Standards.*—The National Bureau of Standards (NBS) is the Federal Government's lead agency for the development and maintenance of a system of measurements required to support the Nation's economy. In 1979, NBS will improve its competence in technical fields which support its research in applied work and will expand specific programs detailed below.

NBS efforts are organized into the following six program activities:

(a) *Provide a national system for physical measurement.*—This activity provides for a national system of physical measurement standards, such as those for time, length,

SCIENCE AND TECHNICAL RESEARCH—Continued

General and special funds—Continued

SCIENCE AND TECHNICAL RESEARCH AND SERVICES—continued

temperature, and ionizing radiation; and for coordinating that system with other nations.

(b) *Provide services to improve use of materials.*—This activity consists of developing and disseminating information on standard measurements and test methods, and standard specifications for those properties of materials that determine performance in use, such as strength and resistance to corrosion.

In 1979, additional measurements and standards for nondestructive evaluation will be developed. Increased funding will also enable NBS to increase the power and production capability of the nuclear research reactor.

(c) *Provide services to improve the application of technology.*—This activity provides for engineering measurements and standards for the Nation's needs in building research, product performance and safety, weights and measures procedures and regulations, electronic technology, and radiation safety. Increased funding will enable NBS to study the desirability and feasibility of a cooperative technology program, in cooperation with industry, universities, and other Federal agencies, to stimulate the development of industrial technology and remove barriers to the diffusion of existing technology.

(d) *Experimental technology incentives program.*—This program develops methodology by which the Federal Government can stimulate non-Federal investment in technological innovation and can promote improved productivity throughout the economy.

(e) *Improve the application of computer technology.*—This activity develops uniform automatic data processing (ADP) standards for government-wide use, undertakes necessary research in computer sciences and technology, improves management efficiency, and provides computer-related advisory services.

In 1979, ADP standards management efforts will be expanded significantly in order to fully address the responsibilities mandated by the Brooks Act (Public Law 89-306). Also, with 1979 funding, measurement methods and associated computer technology to provide the foundation of new manufacturing machines will be developed.

(f) *Capital investments.*—Capital investments finance the construction or improvement of buildings and special facilities, procurement of large items of equipment, and increases of the NBS Working capital fund for the purchase of general purpose equipment and the production of standard reference materials and for other capital needs. In 1979, NBS will continue the program to modernize its equipment and the budget also includes funds for transfer to the working capital fund to offset increased costs of replacement equipment and standard reference materials produced for sale.

2. *National Technical Information Service.*—The National Technical Information Service collects and distributes scientific, technological, business, and demographic information generated by the Federal Government.

The Working capital fund finances from advances and reimbursements all operations of the National Bureau of Standards except major construction projects and the foreign currency program. Amounts reported include investments in equipment and inventories, and research, development and services performed for other Government agencies and the public. Programs of direct appropriations and trust funds are covered in the schedules for those accounts. The principal of the fund, as of September 30, 1977, consisted of \$21 million in capital provided by appropriations, and \$136 million in net donated assets. Retained earnings at the end of each year are transferred to Treasury the year following.

NOTES

Includes \$7,352 thousand in 1978 and \$9,957 thousand in 1979 for activities previously financed from:

Science and technical research, Scientific and technical research and services	1978	1979
Office of Telecommunications Policy, Salaries and expenses	1,475	1,759
	5,877	8,198

Excludes \$194 thousand in 1978 and \$205 thousand in 1979 for activities transferred to General Administration, "Salaries and expenses." Comparable amounts for 1977 (\$80 thousand) and 1978 (\$11 thousand) are included above.

The National Telecommunications and Information Administration is the administration's lead agency for telecommunication and information policy, technology, and spectrum management.

1. *Develop telecommunications and information policies.*—This activity provides for the adoption of a coherent policy regarding domestic and international telecommunications and information. The current budget will examine common carrier, public broadcasting, computer communications issues, international policy questions, and information related issues. An increase will expand the examination of critical common carrier, broadcasting, cable, and other regulatory issues is also included in the request.

2. *Provide management of Federal telecommunications resources.*—This activity provides for the management of the Government's use of the radio spectrum as it relates to national requirements and coordination with the Federal Communications Commission for long-range improvements; the coordination of a national position and devel-

opment of Government policies for international negotiations on spectrum planning and regulation; the assignment of radio frequencies to Federal agencies and compliance with Federal spectrum use regulations; and analysis and planning for Federal telecommunications systems.

In 1979, 60 Federal telecommunications systems will be evaluated, 6 allocated bands will be assessed, 65,000 Federal applications for frequency assignments will be processed, and recommendations to reduce duplication and maximize sharing and improve effectiveness of Federal navigation and other telecommunications facilities will be made.

3. *Improve application of telecommunications and information technology.*—This activity through engineering methods and research promotes the efficient use of the radio spectrum. In 1979, applied research will be conducted on radio wave propagation; the performance of data communications, fiber optics and satellite communications systems will be examined; and an assessment of the impact of new technology to Government systems will be made. An increase is included to conduct research into the economic of spectrum scarcity as well as the feasibility of providing planning techniques for improved television channel use.

The goal of the ship construction program is to provide a competitive U.S. shipbuilding industry and U.S.-flag fleet which are adequate for the commerce and the national security requirements of the United States. The program enables U.S. shipyards to construct ships for U.S. citizens at prices which are comparable to the prices which would be paid for the same construction in a foreign shipyard.

The program fosters increased productivity in U.S. shipyards by supporting series production of standardized ship types and encourages shipyard investment in capital improvements.

The 1979 program will emphasize the production of ships with national defense utility and will include several ships built as part of subsidized operators' replacement obligations. Although funding will continue for the construction of liquefied natural gas (LNG) carrier ships, this policy will be reviewed when the current interagency study of LNG import policy has been completed.

The Merchant Marine Act, 1936, as amended, provides that operating subsidies shall be paid to qualified operators of U.S.-flag vessels in order to promote the maintenance of a U.S. Merchant Marine capable of providing

essential ocean-shipping services. Subsidies are designed to achieve a parity between certain U.S. and foreign ship operating costs.

A summary of operations under the program is indicated as follows:

	1977 actual	1978 estimate	1979 estimate
Subsidized operators ¹	22	21	21
Liner operators:			
Number of ships.....	166	176	173
Ship-years.....	152.3	159.1	160.4
Bulk carrier operators: ¹			
Number of ships.....	22	21	21
Ship-years.....	18.8	19.5	19.5

¹ Excludes 19 operators with contracts to engage in special bulk commodity carriage of grain purchased by the Soviet Union totaling 15.4 ship-years in 1977; 2.0 ship-years in 1978; and 2.0 ship-years in 1979.

1. *Liner operators.*—Replacement of many older ships with larger, more productive ships has offset the decline in the number of ships in the U.S. fleet. The full impact of newly constructed or converted ships under the Federal ship construction program is taking effect, and U.S.-flag trade penetration is expected to increase further in the years ahead.

2. *Bulk carrier operators.*—As a result of the Merchant Marine Act of 1970, new efforts are being directed toward revitalizing the increasingly important bulk carrying segment of the U.S.-flag fleet. Bulk cargoes represent a substantial portion of total U.S. foreign trade, and emphasis will continue to be placed on assuring that U.S.-flag bulk ship operators will be able to provide essential bulk services.

In addition to aiding the operation of newly constructed bulk ships, subsidy assistance is provided to the bulk fleet employed in the carriage of grain purchased by the Soviet Union. This assistance enabled U.S.-flag ships to achieve a 23% share of all grain shipments to the Soviet Union during the period July 1, 1972, through September 30, 1977. A reduction in the level of subsidies for grain shipments to the Soviet Union is planned in 1978. This results from a forecast of increased demand for U.S.-flag tankers from other sources.

RESEARCH AND DEVELOPMENT

For expenses necessary for research, development, fabrication, and test operation of experimental facilities and equipment; collection and dissemination of maritime technical and engineering information; studies to improve water transportation systems; [\$18,325,000] \$17,500,000, to remain available until expended. (46 U.S.C. 1119, 1121, 1122, 1205; Department of Commerce Appropriation Act, 1978; additional authorizing legislation to be proposed.)

The objective of the research and development program is to develop methods, equipment, and systems to make the U.S. shipbuilding and ship operating industries more efficient, competitive, and productive. The 1979 budget reflects the termination of the satellite related communication and navigation program and the shipping operations information system program.

In 1979, the research and development program will be conducted in four major program areas as follows:

1. *Advanced ship development.*—This program involves projects to achieve greater productivity in the building of ships and projects directed toward the development of new and improved ship machinery. Improved machinery performance is heavily oriented toward energy savings. Shipbuilding productivity improvements and new, less costly machinery benefit the government by reducing ship construction costs and related subsidies.

2. *Advanced ship operations.*—In this program, projects are directed toward improving the efficiency, competitiveness, and safety of U.S.-flag ship operations through the development of advanced management operating techniques using computerized systems, improved fleet control by means of advanced navigation/communication systems, and the development of shipboard automation equipment and systems. This program also includes projects to improve cargo handling methods and equipment, improve port productivity and intermodal cargo movement, and assist port management in coordinated regional planning for better use of their port facilities.

3. *Maritime research.*—This program provides for research facilities operations, and investigation and simulation of new problems related to ship operations, safety, and design.

4. *Advanced maritime technology.*—The aim of this program is to investigate advanced technological concepts and requirements, and formulate and conduct specific systems analysis and systems development projects.

¹ Includes capital investment as follows: 1977, \$2,029 thousand; 1978, \$3,380 thousand; 1979, \$4,978 thousand.

NOTES

Excludes \$206 thousand in 1978 and \$290 thousand in 1979 for activities transferred to: General Administration, "Salaries and expenses." Comparable amounts for 1977 (\$290 thousand), and 1978 (\$84 thousand) are included above.

Obligations incurred under allocations from other accounts are included in the schedules of the parent appropriations as follows: National Oceanic and Atmospheric Administration, Operations, research, and facilities.

1. *Development of waterborne transportation systems.*—This activity provides for direct technical and administrative costs of programs for development and subsidized construction of cost-competitive U.S. merchant ships in sufficient quantity to meet national maritime objectives; programs to achieve stability and improve efficiency in the U.S. shipbuilding industry; and manpower programs related to the maritime industry. The requested program level fully implements an upgraded firefighting training program for merchant seamen and provides for expansion of the regional radar training schools program.

2. *National security support capability.*—This activity provides for maintaining U.S. merchant ships in the National Defense Reserve Fleet for service as naval and military transport auxiliaries in time of war and national emergency and for emergency preparedness activities. The requested program level will provide for a high level of maintenance on ships that have been selectively upgraded to form the Ready Reserve Fleet.

3. *Merchant marine academy.*—This activity provides for operating the Merchant Marine Academy at Kings Point, N.Y., in accordance with the Merchant Marine Act, 1936. The objective of the Academy is to instruct and prepare selected personnel for service as officers in the merchant marine. Approximately 250 officers will graduate in 1979. The requested program level supports continuation of the facilities modernization program including renovation of one of the principal academic buildings.

4. *State marine schools.*—This activity implements the Maritime Academy Act of 1958 (Public Law 85-672) by providing assistance to States in the operation and maintenance of maritime academies or colleges for the training of merchant marine officers. This assistance involves grants to the State schools, subsistence payments in support of cadets, and furnishing vessels to be used as training ships. An estimated 487 officers will graduate from these schools in 1979.

5. *Use of waterborne transportation systems.*—This activity provides for the direct technical and administrative costs of promoting the effective development and use of merchant ships and ship systems to further the foreign and domestic waterborne commerce of the United States. Program objectives involve increasing U.S.-flag participation in U.S. foreign trade and reducing or eliminating operating subsidies when no longer required to sustain a viable shipping operation. The requested program level provides for a small increase in the administration of the current cargo preference program for Government-generated shipments.

For 1979, legislation will be introduced to implement a service requirement for graduates of the Merchant Marine Academy and the State marine schools. In the case of the Academy, graduates would be required to serve in the Merchant Marine or the U.S. Navy. For the State schools, direct assistance payments would be converted to loans, forgivable if graduates meet a similar service requirement.

The Merchant Marine Act, 1936, as amended, established the Federal ship financing fund to assist in the development of the U.S. Merchant Marine by guaranteeing construction loans and mortgages on U.S.-flag vessels built in the United States.

The estimated level of new commitments and guarantee construction loans and mortgages, and the estimated aggregate level of guarantees in force and commitments outstanding is shown in the following table:

Legislation will be proposed that will increase the present \$7 billion guarantee ceiling.

Budget program.—Administrative expenses incurred in the operation of the Federal ship financing fund are paid from income to the fund. Reimbursements to the Operations and training appropriation are anticipated at \$3,700,000 in 1978, and \$4,000,000 in 1979. Advances to operators are estimated at \$3,500 thousand in 1978 and \$3,500 thousand in 1979 in order to forestall possible defaults on insured mortgages.

Financing.—The fund receives income from insurance premiums on construction loans and mortgages, fees, and interest on U.S. Government securities and mortgages held directly. The payment of administrative expenses is

to be made from this income, while payments for advances to operators and redemption of defaulted loans and mortgages are paid from income, equity, and borrowing from the Treasury Department. No borrowings are anticipated in 1979.

The Maritime Administration is authorized to reactivate, operate, deactivate, and charter merchant vessels, and operate experimental vessels under the jurisdiction of the Secretary of Commerce. These operations are financed by the Vessel operations revolving fund. In addition, the fund is available to finance the necessary expenses to protect, maintain, preserve, acquire, and use vessels involved in mortgage foreclosure or forfeiture proceedings instituted by the United States.

Budget program.—As of September 30, 1977, there are four claims in process of settlement which resulted from operation of Government-owned ships and general agency agreements in the Vietnam sealift. The 1979 program anticipates the annual testing of a ship in the Ready Reserve Fleet.

Financing.—Expenses are financed by charter hire revenue, reimbursements from Federal agencies, and insurance underwriters.

The Maritime Administration is authorized to insure against loss or damage by marine war risks when it is found commercial insurance cannot be obtained on reasonable terms and conditions. This insurance includes war risk hull and disbursements interim insurance, war risk protection and indemnity interim insurance, second seamen's war risk interim insurance, and war risk cargo insurance standby program.

Budget program.—It is estimated that during 1979 insurance coverage will be provided for approximately 555 U.S.-flag ships, 1,500 LASH and Seabee barges, as well as a selected number of foreign-flag ships. The program also includes provision for second seamen's war risk insurance covering the crews of 14 vessels under contract to the Military Sealift Command.

Financing.—Under 46 U.S.C. 1288, the Secretary of Commerce established the War risk insurance revolving fund. It receives income from binder fees, insurance premiums, interest from investments and claim reimbursements from other Federal agencies. Underwriting agents' fees and expenses, appraisal contractors' fees, and insurance claims are paid from this income. While additional appropriations for the program are authorized, none are requested for 1979.

GENERAL PROVISIONS—MARITIME ADMINISTRATION

Notwithstanding any other provision of this Act, the Maritime Administration is authorized to furnish utilities and services and make necessary repairs in connection with any lease, contract, or occupancy involving Government property under control of the Maritime Administration and payments received by the Maritime Administration for utilities, services, and repairs so furnished or made shall be credited to the appropriation charged with the cost thereof: *Provided*, That rental payments under any such lease, contract, or occupancy on account of items other than such utilities, services, or repairs shall be covered into the Treasury as miscellaneous receipts.

No obligations shall be incurred during the current fiscal year on the construction fund established by the Merchant Marine Act, 1936, or otherwise, in excess of the appropriations and limitations contained in this Act, or in any prior appropriation Act and all receipts which otherwise would be deposited to the credit of said fund shall be covered into the Treasury as miscellaneous receipts.

GENERAL PROVISIONS—DEPARTMENT OF COMMERCE

SEC. 302. During the current fiscal year applicable appropriations and funds available to the Department of Commerce shall be available for the activities specified in the Act of October 26, 1949 (15 U.S.C. 1514), to the extent and in the manner prescribed by said Act.

SEC. 303. During the current fiscal year appropriations to the Department of Commerce which are available for salaries and expenses shall be available for hire of passenger motor vehicles; services as authorized by 5 U.S.C. 3109; and uniforms or allowances therefor, as authorized by law (5 U.S.C. 5901-5902).

SEC. 304. No part of any appropriation contained in this title shall be used for construction of any ship in any foreign country. (*Department of Commerce Appropriation Act, 1978.*)

DEPARTMENT OF DEFENSE—MILITARY

MILITARY PERSONNEL

Military personnel activities are grouped into major program categories corresponding to the planning, programming, and evaluation system of the Department of Defense.

1. *Strategic forces*.—Consists of offensive and defensive aircraft and missile units.

2. *General purpose forces*.—Consists of unified commands, tactical Army combat and support forces, Navy ship and air forces, the Marine Corps fleet forces, including aviation, and Air Force combat and support aircraft units. It also includes related logistics and support units.

3. *Intelligence and communications*.—Missions and activities related to combat forces and centrally directed activities for intelligence, security, and communications.

4. *Airlift and sealift*.—Airlift, sealift, and other transportation, including logistic and support units.

5. *Guard and reserve*.—Consists of support for National Guard and Reserve training units.

6. *Research and development*.—Support for R. & D. activities and projects not related to items approved for procurement or deployment.

7. *Central supply and maintenance*.—Includes non-deployable supply and maintenance depots, and supply and maintenance activities not organic to mission units.

8. *Training, medical, and other general personnel activities*.—Consists of these activities associated with military personnel.

9. *Administration and associated activities*.—The administrative support of departmental and major administration headquarters, field commands, and administrative activities.

10. *Support of other nations*.—Activities for the support of allies.

ACTIVE FORCES

These appropriations provide for the pay and allowances of officers, enlisted personnel, cadets, and midshipmen; the subsistence of enlisted personnel; permanent change of station travel; and other military personnel costs. Changes in financial requirements are primarily related to military personnel strengths in support of the military programs. The number of active duty military personnel provided for are shown in the following tables:

RESERVE FORCES

The following appropriations are for the Reserve components, which include: Army and Air National Guard; and Army, Navy, Marine Corps, and Air Force Reserves.

National Guard and Reserve personnel.—These programs provide funds for training members of the Ready Reserve as the initial and primary augmentation of the active forces during any future emergency. Most of the paid

National Guard and Reserve personnel perform 48 drills and attend 2 weeks of active duty for training each year. Other personnel not requiring as intensive training receive only a period of active duty for training (usually 2 weeks) during the year. Active duty for basic training is provided for personnel enlisting in the National Guard or Reserve who have not previously received military training. Certain high school senior and graduate enlistees may drill with pay while awaiting active duty for basic training. Service schools and special tours of active duty training provide additional training for limited numbers of the Ready Reserve.

The numbers of National Guard and Reserve personnel estimated to participate in the paid training programs are summarized in the following table:

Reserve officer candidates.—The Reserve Officers' Training Corps program provides training for reserve and regular officer candidates who have enrolled in the course while attending a collegiate institution at which an ROTC

unit has been established. College graduates who satisfactorily complete the advanced course of the program are commissioned and are ordinarily ordered to active duty for a minimum period of 3 years.

The Reserve Officers' Training Corps Vitalization Act of 1964, as amended, authorizes a limited number of scholarships for ROTC students on a competitive basis. Successful candidates for the scholarships are required to serve a minimum period of 4 years on active duty upon graduation and appointment as a commissioned officer. There will be about 6,500 scholarship recipients in the Army, about 6,000 in the Navy, and about 6,500 in the Air Force in 1979.

The Armed Forces health professions scholarship program provides a source of commissioned officers for the various health professions. Student enrollment in 1979 will be about 1,850 in the Army, 1,575 in the Navy, and 1,575 in the Air Force.

The Army, Navy, Marine Corps, and Air Force provide training for students who elect to enroll in Junior ROTC training at the secondary level of education, and are programmed to have 650, 223, 56, and 275 units, respectively, in operation in 1979.

The number of commissioned officers graduated from these programs are summarized below:

This estimate includes funds for the pay of all personnel on the military retired lists for the Department of Defense. The estimate represents the consolidated requirements of the military departments for: (a) payments to retired officers and enlisted personnel of the Army, Navy, Marine Corps, and Air Force; (b) retainer pay of enlisted personnel of the Fleet Reserve of the Navy and Marine Corps; and (c) survivors' benefits. The primary gains to the retired rolls can be attributed to the greater number of individuals attaining eligibility for retirement after 20 or more years of active military service. The following tabulation shows the average number of personnel on the rolls during 1977 compared with estimated numbers for 1978 and 1979.

Budget estimates for the retired pay program reflect anticipated benefit increases due to the Consumer Price Index (CPI) adjustment mechanism embodied in current law.

OPERATION AND MAINTENANCE

The appropriations under this title finance the day-to-day costs, except military personnel costs, of operating and maintaining the Armed Forces, including the Reserve components, and related support activities of the Department of Defense. These funds include amounts for pay of civilians, contract services for maintenance of equipment and facilities, fuel, supplies, and repair parts for weapons and equipment. Financial requirements for these appropriations are influenced by a variety of factors, the principal of which are force levels, such as the number of aircraft squadrons or Army or Marine Corps divisions, military strength and deployments, rates of operational activity, number of installations, and quantity and complexity of major equipment (aircraft, ships, missiles, tanks, et cetera) in operation.

ACTIVE FORCES

Funds to operate the Active Forces and their support are contained in five operation and maintenance appropriations, one for each of the four services and one for Defense agencies. The programs covered under this heading are described below:

1. *Strategic forces.*—Strategic offensive forces include more than 400 manned B-52 and FB-111 bombers and 1,054 ICBM's operated by the Air Force as well as the Navy's submarine missile fleet, which deploys 656 Polaris and Poseidon missiles.

Strategic defensive forces consist of interceptor fighter aircraft of the Air Force, and various warning, command, and control systems also operated by the Air Force.

2. *General purpose forces.*—These forces of the four military services operate under the control of the various unified and specified commands. They consist of the tactical air forces of the Navy, Air Force, and Marine Corps, the ground forces and supporting aircraft elements of the Army and Marine Corps, and Navy combatant and support ships. Among these forces are those deployed to eastern Asia, the western Pacific, and to Europe in support of NATO commitments; the fleets operating in the Atlantic and Pacific Oceans and the Mediterranean; and active forces based in the United States.

Our tactical air forces consist of the Air Force tactical air wings, Navy land and carrier based antisubmarine and attack air wings, and Marine air wings. The missions performed by these forces include maintaining air superiority, interdiction bombing, close air support, antisubmarine patrol, reconnaissance, combat crew, readiness air group, and transition training and special operations. The Navy will continue to deploy the F-14 to partially replace F-4's in the air superiority fleet air defense role; continued production of the F-15, F-16, and A-10 into the Air Force arsenal in 1979 will provide for transfer of F-4 and A-7 weapon systems to the Reserve Forces. The Air Force will continue to fill out their 26-wing structure. Flight training simulator programs will be continued to provide for improved training of aircrews and to reduce energy consumption.

Army land forces consist of infantry, mechanized, armored, airborne, and airmobile divisions as well as force elements needed to support these divisions during the initial stages of combat, along with a limited number of units required for sustained combat support. Emphasis will continue to be placed on increasing combat readiness. Additional combat units will be modernized with the

latest equipments and weapons for the conduct of land warfare.

Marine Corps land forces, composed of marine amphibious forces, including a combination of combat and service support organizations and a variety of supporting units, are designed to conduct amphibious assault operations and other missions with the close support of Marine aviation. The Marine Corps' objective in 1979 will be the maintenance of the Fleet Marine Forces at a high level of combat readiness for service with the fleet, ashore or for other duties as national security may require.

Naval forces include aircraft carriers, submarines, amphibious forces, antisubmarine forces, and antiair warfare forces. Seventeen ships will be introduced into the fleet in 1979: four nuclear submarines, eight 963 class destroyers, one amphibious assault ship, one submarine tender, and three fleet tugs. The addition of these modern vessels will permit continued inactivation of overage and obsolete vessels.

3. *Intelligence and communications.*—This program comprises the centrally directed Defense intelligence and security function, the major portion of the consolidated telecommunications program (CTP), the National Military Command System, and other special activities which are related to and support the missions of the combat forces in the strategic, general purpose, and airlift/sealift programs. Included in the CTP portion are the Defense Communications System (DCS), common user transmission and switching systems, as well as non-DCS communications. Funds to support intelligence, security, and communications activities are contained in the various appropriations of each of the military services, and, in the case of the Defense Communications Agency, Defense Nuclear Agency, Defense Intelligence Agency, Defense Mapping Agency, Defense Investigative Service, and National Security Agency, in the Defense agencies appropriation. Included among the special activities are Navy oceanographic and weather programs and Air Force weather, air rescue and recovery, and air traffic control and landing system programs.

4. *Airlift and sealift.*—This provides air, land, and sea transportation services for all the Armed Forces in peacetime as well as quick reaction strategic mobility and logistical support in wartime. The major commands in this program are the Military Airlift Command of the Air Force, the Military Sealift Command of the Navy, and the Military Traffic Management Command of the Army, all of which are industrially funded operations whose costs are reimbursed by the users. The operation and maintenance appropriations directly provide for certain administrative and base service support expenses for each of these industrially funded activities.

7. *Central supply and maintenance.*—This program includes funds for specialized supply and maintenance activities. It provides resources for the determination of inventory levels, procurement of supplies, distribution, depot-level maintenance, and transportation of military materiel. These functions are managed by the military services and conducted at various locations worldwide.

In addition, the Defense Logistics Agency provides common supply and services support to the military services within the continental United States and manages bulk petroleum worldwide. The Agency also manages Defense-owned standby industrial plant equipment, the Defense surplus property disposal program, and the Defense portion of the Federal catalog program. It is also responsible for providing contract administration services, including enforcement of the equal employment provisions of

Executive Order 11246, as amended, administration and supervision of Department of Defense materiel utilization program, and coordinated procurement programs.

8. *Training, medical, and other general personnel activities.*—In 1979 the military services plan on acquiring approximately 400,000 new accessions into the Active Forces. Continued success of the All-Volunteer Force will necessitate a strong effort by the recruiting organizations of each service to attract the new personnel required. These new accessions must then be trained in basic military skills, in many occupational skills, and in career fields. Training requirements are also influenced by the total strength of the services, and by the introduction of new equipment and weapons. Most training is conducted at service-operated facilities, such as training centers for the training of new recruits, at technical schools which afford training in specific military occupational skills, and at pilot training bases. Education of prospective officers is accomplished primarily by the three service academies and by Reserve Officer Training Corps units at universities and colleges. The services operate 167 hospitals to provide medical care for active and retired military personnel and for dependents. In addition, this program finances a medical program at civilian medical facilities for personnel in areas where service hospitals are not accessible.

9. *Administration and associated activities.*—This program includes the costs of departmental administration, major field command headquarters, and general support activities such as finance and audit. Reimbursement to the General Services Administration for space occupied is also included in this program.

10. *Support of other nations.*—This program includes military assistance missions, advisory groups for foreign nations, and the U.S. share of NATO, SEATO, and CENTO costs, plus support of U.S. organizations related to these international military headquarters.

RESERVE FORCES

The following appropriations are for the Reserve components, which include: Army and Air National Guard, and Army, Navy, Marine Corps, and Air Force Reserves. The military services train Reserve component units and operate and maintain facilities such as training centers, air bases, and field training sites for the use of such units. Changes in financial requirements are primarily related to priorities given to improving mobilization readiness through equipment modernization and intensified training. Appropriations for the Army and Air National Guard display their historic detailed activity structure, while the appropriations for the Army, Navy, Marine Corps, and Air Force Reserves, are structured as follows:

Mission forces.—Includes training, operations, and logistics support.

Depot maintenance.—Provides for depot level maintenance including repair, overhaul, and modification of vehicles, aircraft, and other equipment.

Other support.—Consists primarily of activities related to base operations and maintenance, medical support, and headquarters and command.

PROCUREMENT

The procurement appropriations of the Department of Defense finance the acquisition of combat, combat support, and training equipment; including aircraft, missiles, ships, tanks, and other vehicles; guns of all sizes, torpedoes, and communications equipment; air, ground, and ship munitions; major items for support of equipment when it is in use; industrial facilities necessary to produce that equipment; and major modifications of on-hand equipment where increased capability can be achieved without buying new equipment. The equipment financed by these appropriations is bought primarily from private contractors or, when necessary, produced in Government arsenals, shipyards, and plants. The 1979 program provides for continuing production of current systems and initial procurement of some new systems to maintain the military forces necessary to meet U.S. national security and foreign policy objectives.

Army systems funded in 1979 include advanced procurement funding for the Patriot medium-high altitude air defense missile system, initial production of the XM-1 main battle tank, and Copperhead guided antitank artillery projectile. Continued procurement of improved conventional munitions and artillery fire control systems in 1979 will upgrade the overall combat capability of the Army.

Modernization of our naval forces in 1979 includes initial procurement of the F-18 air combat fighter and additional procurement of the F-14 fleet air defense fighter. Also included is continued procurement of the Trident strategic missile and submarine, a nuclear attack submarine, and eight frigates. The dollar amount for ships in the 1979 estimate includes \$0.6 billion to cover claims and cost increases to 1975 and prior year programs.

Significant Air Force programs include initial procurement of the advanced tanker/cargo aircraft and continued

procurement of F-15 and F-16 air combat fighters, and A-10 close air support aircraft.

Direct budget programs, including pending supplementals as shown in Part III, are estimated as follows (in thousands of dollars):

	1977 actual	1978 estimate	1979 estimate
Aircraft.....	9,106,800	10,487,100	11,994,300

This appropriation finances the acquisition of tactical and utility airplanes and helicopters, including associated electronics and communications equipment and armament; modification of in-service aircraft; ground support equipment; and depot reparable assemblies, components and repair parts such as spare engines, transmissions, and gear boxes. It also funds related first destination transportation and production base support.

The 1979 program accelerates acquisition of the new Blackhawk (formerly known as UTTAS) utility helicopter. It also provides increased heliborne antiarmor firepower through continued acquisition of the AH-1S TOW missile-launching helicopter; and ongoing emphasis in the Special Electronic Mission Aircraft area. In addition, the 1979 program includes procurement of CH-47C medium lift helicopters to replace assets transferred from the Army inventory.

This appropriation finances the acquisition of ammunition, modification of in-service stock, and related production base support including the maintenance, expansion, and modernization of industrial facilities and equipment.

The 1979 program provides for worldwide training consumption and losses from inventory through the 1979 funded delivery period; procurement of modern hardware; and buildup of war reserve stocks to meet authorized acquisition objectives. This year's program includes funds for over 50 different types of ammunition and provides the 11th increment of a multiyear effort to rehabilitate and improve the Army's industrial base.

This appropriation provides funds for the procurement of aircraft and related supporting equipment and programs. Included are funds for flight simulators and equipments to modify inservice aircraft to extend their service life, eliminate safety hazards, and improve their operational effectiveness. Additionally, spares and repair parts and ground support equipment for all end items procured by this appropriation are included. Funds are also provided for procurement of material and effort for planned 1980 programs which must be ordered in 1979 due to leadtime considerations.

The 1979 program continues production of the A-4M and the A-6E attack, F-14A and F-18A fighter, CH-53E heavy transport, P-3C antisubmarine warfare, E-2C early warning, EA-6B electronic, fleet support and the EC-130Q communications aircraft.

WEAPONS PROCUREMENT, NAVY—Continued

This appropriation finances the procurement of strategic and tactical missiles, target drones, torpedoes, guns, associated support equipment and the modification of inservice missiles, torpedoes, and guns.

1. *Ballistic missiles.*—This activity funds the procurement of Trident ballistic missiles, modifications of other ballistic missiles, production and fleet support equipment, and repair parts. Also included are funds for supporting Government-owned missile industrial facilities and for the navigational satellite program.

2. *Other missiles.*—Funds requested in this activity are for the procurement of tactical missiles and support equipment required for fleet air defense, air-to-surface and surface-to-surface attack. This activity also provides funds for aerial targets, missile modifications, repair parts, and Government-owned missile industrial facilities.

3. *Torpedoes and related equipment.*—The 1979 request includes funds for torpedoes, underwater mobile targets, torpedo modifications, repair parts, and special support equipment necessary to sustain fleet exercises and maintain fleet inventories.

4. *Other weapons.*—Included in this activity are funds for ship guns (except those funded under Shipbuilding and Conversion, Navy), machineguns, small arms, and the close-in weapon system. Also included are funds for modification of other weapons and procurement of repair parts and support equipment for maintaining these weapons.

This appropriation finances the construction of new ships and the conversion of existing ships, including all hull, mechanical, and electrical equipment, electronics, guns, torpedo and missile launching systems, and communication systems.

1. *Fleet ballistic missile ships*.—Funds requested in this activity are for one Trident class ballistic missile submarine and for long-leadtime equipment for future Trident submarines.

2. *Other warships*.—The 1979 request includes one high-speed nuclear-powered attack submarine. Advance procurement funds are included for an additional nuclear attack submarine, and for modernization of older guided missile destroyers and carriers, which will be requested in 1980 and 1981, respectively.

3. *Mine warfare and patrol ships*.—This activity requests funds for eight guided missile frigates, continuing a long-range program of procurement of this type of ship.

4. *Auxiliaries, craft, and prior-year program costs*.—Funds in this activity will procure one destroyer tender, one cable layer, and three towed array sonar ships. Funds are also included for landing craft, service craft, outfitting material, and postdelivery costs. About \$0.6 billion is requested in this budget activity for cost growth, escalation, and claims associated with 1975 and prior-year shipbuilding programs.

This appropriation finances the procurement of major equipment and weapons other than ships, aircraft, missiles, torpedoes, and ship guns. Such equipments range from the latest electronic sensors for updating our naval forces to trucks, training equipment, and spare parts.

1. *Ship support equipment.*—This activity finances the procurement of shipboard components, including replacement of nuclear reactor cores, for active fleet ship maintenance and modernization.

2. *Communications and electronics equipment.*—Funds requested in this activity are for the procurement of communications and electronics equipment for ships and shore-based activities.

3. *Aviation support equipment.*—This activity funds the procurement of sonobuoys, air-launched ordnance, and aircraft support equipment.

4. *Ordnance support equipment.*—This activity finances the procurement of ship-launched ordnance, shipboard missile and fire control systems, mine support equipment, and fleet ballistic missile support and training equipment.

5. *Civil engineering support equipment.*—Funds included in this activity are for procurement of construction, weight-handling, and transportation equipment.

6. *Supply support equipment.*—Procurement of self-propelled and automated materials handling equipment to support the Navy supply system is financed within this activity.

7. *Personnel and command support equipment.*—This activity finances the procurement of training, industrial, photographic, printing, and oceanographic equipment for activities supported by the Chief of Naval Operations, the Bureau of Medicine and Surgery, and the fleet headquarters commands.

This appropriation provides the Marine Corps with weapons, ammunition, missiles, combat vehicles, and communications and support equipment for use by the ground element of the Marine general purpose forces, including four divisions and force troop, tank, and amphibious tractor battalions.

The 1979 program continues to increase the Marine Corps antiarmor capability with procurement of M60A1 tanks and antitank ammunition, and will initiate acquisition of a new 155 mm towed howitzer. It also increases the anti-air support with procurement of the Stinger missile system.

This appropriation provides for procurement of aircraft, and for modification of inservice aircraft to improve safety and enhance operational effectiveness. It also provides for investment spare and repair parts including spare engines, replenishment spares, and other support equipment to include aerospace ground equipment and industrial facilities. In addition, funds are provided for the procurement of flight training simulators to increase combat readiness and to provide for more economical training.

1. *Combat aircraft.*—Provides aircraft for continued force modernization. Included are F-15, F-16, A-10, E-3A and the advanced tanker/cargo aircraft.

2. *Airlift aircraft.*—Provides aircraft for airlift forces. None are requested in 1979.

3. *Other aircraft.*—Provides helicopters and other specialized aircraft. Advanced procurement funds for the TR-1 are requested in 1979.

4. *Modification of inservice aircraft.*—Provides for modification of inservice aircraft and associated training equipment for safety of flight and technical changes to improve reliability, improve maintenance, increase capability, or provide for a change in mission.

5. *Aircraft spares and repair parts.*—Provides for investment spares including initial spares for new aircraft and replenishment spares for aircraft in the operational force.

6. *Aircraft support equipment and facilities.*—Provides for common aerospace ground equipment for the operational force, flight simulators for out-of-production air-

craft, industrial facilities, war consumables, and other production charges. Included are electronic countermeasure pods, alternate mission equipment, stock fund fuel, classified projects, and first destination transportation.

MISSILE PROCUREMENT, AIR FORCE—Continued

This appropriation provides for procurement, installation, and checkout of strategic ballistic and other missiles, modification of inservice missiles, and initial and replenishment spare and repair parts for missile systems. It also provides for operational space systems, boosters, payloads, drones, associated ground support equipment, non-recurring maintenance of industrial facilities, machine tool modernization and special programs support.

1. *Ballistic missiles.*—Provides for higher yield re-entry vehicles to retrofit some Minuteman III missiles.

2. *Other missiles.*—Provides for two competing versions of the air-launched cruise missile for B-52 aircraft and for tooling and startup effort for the ground-launched cruise missile for theater nuclear forces. Also provides for the Sparrow and Sidewinder air-to-air missiles, and the Shrike air-to-ground antiradiation missile, as well as for target drones for testing missiles and for training aircrews.

3. *Modification of inservice missiles.*—Provides for updating of Minuteman missiles and modification of missiles to improve reliability and safety, extend service life, and to incorporate operational improvements based on inservice use.

4. *Spare and repair parts.*—Provides for initial and replenishment spare and repair parts for ballistic missiles, other missiles, target drones, aerospace ground equipment, training equipment, replacement depot test equipment, provisioning documentation, and spares for the modification programs.

5. *Other support.*—Provides for special program activities, modernization of Government-owned production facilities, drones for special reconnaissance missions, and for the procurement of launch vehicles, spacecraft, and peculiar ground equipment for operational space systems.

This appropriation provides for the procurement of weapon systems and equipment other than aircraft and missiles. Included are munitions, other weapons, vehicles, electronic and telecommunications systems for command and control of operational forces, and ground support equipment for weapons systems and supporting structure.

1. *Munitions and associated equipment.*—Provides air-to-ground munitions for the tactical forces and other weapons. Included are war reserve stocks and training requirements.

2. *Vehicular equipment.*—Provides vehicles for the operational forces and supporting structure. Included are firefighting equipment, passenger carrying, cargo, utility, and special purpose vehicles for base operations. Also included are self-propelled materials handling equipment for tactical and strategic airlift forces.

3. *Electronic and telecommunications equipment.*—Provides electronic and communication systems for command and control of the operational forces and for the detection of hostile forces. Included are traffic control and landing equipment, tactical air control system components, electronic data processing, warning and communications devices.

4. *Other base maintenance and support equipment.*—Provides ground support equipment, not otherwise provided with the major weapons system, for operational forces and supporting structure. Included are test equipment, personal safety and rescue equipment, medical and dental equipment, and automated materials handling equipment for improving the efficiency of the Air Force supply and logistics system.

RESEARCH, DEVELOPMENT, TEST, AND EVALUATION

Programs in this title support the modernization of the Armed Forces through a broad range of activities. In addition to development and testing of full-scale, pre-

production hardware, these programs insure that the United States and its allies maintain a distinct technological advantage over potential adversaries through development of prototype hardware, fabrication of technology-demonstration devices and support of military research and exploratory development. This work is performed by industrial contractors, Government laboratories, universities and nonprofit organizations.

Research and development programs are funded such that each year's resources normally support a 1-year increment of activity. Requirements for research for civil defense are shown in a separate title, Civil Defense.

For 1979, the budget plan for research, development, test and evaluation totals \$12,468,000 thousand, an increase of \$1,055,438 thousand over the 1978 plan as shown below (in thousands of dollars):

Summary of program by activities:	Budget plan		
	1977 actual	1978 estimate	1979 estimate

3. Strategic programs.....	2,327,887	2,536,426	2,177,916
4. Tactical programs.....	3,872,310	4,382,539	5,051,139
5. Intelligence and communications.....	794,753	828,155	1,095,192
6. Programwide management and support.....	1,387,172	1,381,651	1,550,739
Total direct.....	10,588,078	11,412,562	12,468,000

The 1978 budget plan reflects supplemental requests of \$249,500 thousand (shown in detail in Part III).

1. *Technology base.*—This activity is composed of basic research and exploratory development of technologies which have potential applications for defense, and these efforts involve the physical, mathematical, environmental, engineering, biomedical, and behavioral sciences. The program for 1979 reflects real growth in this activity to maintain the technological lead of the United States relative to nations which could pose a threat to U.S. interests.

2. *Advanced technology development.*—This activity supports more extensive exploration of promising systems alternatives and concepts than is provided by technology-base programs. Efforts for 1979 include programs in aeronautics and propulsion, flight simulation, biomedical sciences, materials and structures, weapons technology, electronics and high-energy lasers.

3. *Strategic programs.*—This activity insures that future strategic systems will continue to deter nuclear attacks (and coercion from the threat of nuclear attacks) against the United States and its allies. The decrease in budget plan from 1978 to 1979 for strategic programs results primarily from decreased funding for development of the B-1 bomber. Nevertheless, all three elements of the

strategic triad—land, sea and air—will be strengthened in 1979 through continued development of the Air Force M-X intercontinental ballistic missile, the Navy Trident submarine and missile, and two competitive air-launched cruise missiles for Air Force strategic aircraft.

Concepts for ballistic-missile defense will be explored, and U.S. space-defense programs will be emphasized.

4. *Tactical programs.*—This activity provides new combat systems for the general-purpose forces of the United States and its allies. A major theme for 1979 is the aggressive development of systems which will improve the early combat capability of forces committed to the defense of Western Europe, and the funding increase for tactical-systems development in 1979, relative to efforts in 1978, reflects the high priority placed on these systems.

In the land-warfare mission area, the XM-1 tank, the advanced attack helicopter and the Patriot air-defense missile system will continue in development by the Army. Major funding increases will be provided to develop a divisional air defense (DIVAD) gun and the general-support rocket system to complement tube artillery.

Continuing in development in the air-warfare mission area are the F-18 and F-16 air-combat fighters for the Navy and the Air Force and the AV-8B, a vertical-takeoff-and-landing attack aircraft for the Marine Corps. To complement these high-technology aerial platforms, the Navy and Air Force will jointly develop two new air-to-air missiles, and the Air Force will emphasize development of a family of area antiarmor munitions.

Navy sea-control programs continuing in development include the LAMPS anti-submarine-warfare helicopter and vertical/short takeoff and landing (V/STOL) aircraft. Major increases in funding for sea-control programs will further development of systems for ocean surveillance, undersea surveillance, antisurface, anti-air, antisubmarine and mine warfare.

The combat-support mission area funds developments in air mobility, logistics, tactical communications, combat integration, electronic warfare, navigation and physical security. Also included are improvements to the Air Force advanced warning and control system (AWACS).

5. *Intelligence and communications.*—This activity supports improvements to Defense-wide capabilities in intelligence and worldwide communications.

6. *Programwide management and support.*—This activity provides funding for support efforts, including Federal contract research centers, ranges and test facilities, and studies and analyses.

MILITARY CONSTRUCTION

The direct military construction programs for the Armed Forces, both Active and Reserve, shown in the individual schedules of this title are summarized in the following table (in thousands of dollars):

MILITARY CONSTRUCTION PROGRAM

	1977 actual	1978 estimate	1979 estimate
Active Forces.....	2,162,059	1,611,447	2,405,300
Reserve Forces.....	191,416	176,762	158,900
Interservice activities.....	38,396	68,747	176,300
Total.....	2,391,871	1,856,956	2,740,500

Most of the appropriations required for the military construction accounts are dependent upon the enactment of authorizing legislation. The details of this legislation have been completed and are being submitted to the Congress for early consideration.

1. *Major construction.*—This category provides for the acquisition of land and for construction of military projects as authorized in currently effective military construction acts and the new authorization referred to above. These authorizations include construction projects as defined in Department of Defense Directive 7040.2 where the estimated cost of such construction generally exceeds \$100 thousand per project. Under this category the major activities proposed for 1979 are as follows:

General and special funds—Continued

MILITARY CONSTRUCTION—Continued

Strategic forces.—Provision has been made to upgrade existing facilities and provide for personnel support for strategic warfare systems. Funds also have been provided to continue to support the Trident weapons system.

General purpose forces.—Projects in this category support general combat forces including their command organizations, the logistics organizations organic to these forces, and the related support units, including medical, which are deployed as constituent parts of military forces and field organizations.

Specialized activities.—Funds are provided for the continued support of the joint defense effort of the North Atlantic Treaty Organization. Funding for abatement of air and water pollution at defense installations is continued to assure that actions to correct violations of Federal, State, and local air and water quality standards have been taken or are underway. Funding is also provided to continue the ongoing energy conservation investment program to assure that energy saving features are included not only in new construction but, where economically practical, are added to existing facilities and utility systems.

Research and development.—The 1979 program includes facilities in support of programs to advance knowledge and technology in such areas as weapons systems, communications, electronics, and medicine. These programs emphasize the search for improved capabilities in the Armed Forces.

Logistics.—Funding for construction of facilities to provide physical security of tactical aircraft and nuclear weapons worldwide is continued at the significant program levels provided in recent years.

Personnel support.—Funds are provided for improved housing, medical, and community support for lower grade enlisted personnel and junior grade officers to encourage their retention in the service and the development of an All-Volunteer Force. Upgrading of existing facilities with the application of improved standards has been provided in addition to new construction.

Reserve components.—The funding levels programmed for facilities required for the training of the National Guard and the other Reserve Forces reflect the importance placed on these activities being identified as the primary

source of augmentation of Active forces in future emergencies.

Interservice activities.—This category includes facilities for the Defense Agencies, which provide common-service support to the military departments in such areas as logistics, intelligence, mapping, nuclear technology, and audit; and commencing in 1978, construction of facilities to support activities which do not fall under the purview of the Defense Agencies, but nonetheless serve requirements of more than one military service, such as the dependent school program and certain command and research functions.

2. *Minor construction.*—Pursuant to authority provided under 10 U.S.C. 2674, as amended by Public Law 95-82 dated August 1, 1977, funding is provided for projects not otherwise authorized by law, and for which the individual project cost does not exceed \$500 thousand. This program includes projects at specified locations for which the need is known, and lump sum amounts for exigent construction to provide for construction needs which may emerge during 1979. Public Law 95-82 amended 10 U.S.C. 2674, with an effective date of October 1, 1978, to delete prior requirements under this authority for a certification of urgency, or alternatively, a determination that a project, within 3 years following completion of construction, would result in savings in maintenance and operations costs in excess of the investment cost. The amendment further increased the individual project cost limitation from \$400 thousand to \$500 thousand.

3. *Planning.*—This provides for necessary planning of military construction projects, including design, standards, criteria, studies, appraisals, and other related activities.

4. *Supporting activities.*—Provision is made for activities such as the defense access road program and minor land acquisition.

FAMILY HOUSING, DEFENSE

The Department of Defense family housing management account finances the expenses of the military family housing program. Funds provided in annual military construction appropriation acts under the title "Family housing, defense" are transferred to this account for obligation and expenditure. This appropriation is dependent on the enactment of authorizing legislation. An appropriation of \$1,690.1 million is requested for 1979 of which \$127.6 million is for construction of new housing, improvement of existing housing and related projects,

and \$1,562.5 million is for the operation and maintenance of family housing and related facilities, for leasing of family housing, for payments required on the indebtedness assumed to acquire Capehart and Wherry housing, and for authorized payments of servicemen's mortgage insurance premiums.

1. *Construction.*—(a) *Construction of new housing.*—For 1979, the construction or acquisition of 1,518 new permanent units and mobile home facilities at an estimated cost of \$65.4 million is proposed in furtherance of the continuing effort to provide adequate family housing. These are distributed by service as follows: Army—905, Navy—534, Air Force—50, and Defense agencies—29.

(b) *Construction improvements.*—For 1979, \$52.8 million is proposed for the continuing program to improve the livability and operating economy of older units, including

\$8.5 million for projects qualifying for the Defense energy conservation investment program and \$6.1 million for projects to be accomplished under minor construction authority.

(c) *Planning.*—Funds are included in the construction of new housing budget activity to design the 1,518 housing units in the 1979 program. Costs to be incurred for planning future year housing projects and for projects which will not go forward to completion are estimated at \$0.8 million for 1979.

2. *Operation, maintenance, and interest payment.*—(a) *Operation.*—For 1979, \$662.8 million is required for the operation of an estimated 392,000 family housing units (excluding leased units); and \$107.4 million is required to lease 21,402 units in the United States and overseas as part of the program to provide adequate family housing for eligible personnel.

(b) *Maintenance of real property.*—The cost of maintenance and repair of the family housing inventory is estimated at \$656.8 million for 1979.

(c) *Interest payments.*—For 1979, \$34.7 million is required to defray interest charges on the indebtedness assumed to acquire Capehart and Wherry housing and for related expenses. In addition, an appropriation of \$119.2 million is required for reduction of agency indebtedness that was assumed with the acquisition of the Capehart, Wherry, and surplus commodity housing.

(d) *Mortgage insurance premiums.*—For 1979, premium payments of \$3.5 million are required on mortgage insurance provided by the Federal Housing Administration; (1) through the general insurance funds on mortgages assumed by Defense to acquire Capehart and Wherry housing; and (2) on mortgages assumed by active military personnel for housing purchased under the provisions of the National Housing Act, as amended.

DEPARTMENT OF DEFENSE STOCK FUNDS

Department of Defense stock funds finance the purchase of consumable materials and supplies for resale to the military services and other authorized customers (10 U.S.C. 2208). These inventories are stocked and sold at

designated Defense activities worldwide. Consumable mobilization reserve materials are also purchased through the stock funds.

Budget program.—The increase in obligations in 1978 and 1979 results from projected price increases, longer procurement leadtimes and procurement of crude oil for the Department of Energy strategic petroleum reserve. Price increases, leadtimes, and procurement of mobilization reserve stocks has caused the value of yearend inventories to increase, as shown below (in millions of dollars):

Financing the budget program.—Except for the financing of mobilization reserve stocks, the budget program is financed from sales to customers. An appropriation of \$101 million in 1979 is requested to finance additional mobilization reserve assets. Gross expenditures in 1979 are projected to be \$1,441 million higher than in 1978 as a result of continuing price increases and the procurement of crude oil for the Department of Energy. Estimated expenditures are shown below (in millions of dollars):

authorized to incur obligations in anticipation of future years' sales (10 U.S.C. 2210(b)). Pursuant to this authority, contract authority of \$2,040 million was available at the end of 1977, estimated to decrease to \$1,655 million in 1979.

Operating results and financial conditions.—Revenue and expenses for 1978 and 1979 are projected on a break-even basis. It is estimated that by the end of 1979, investment (equity) of the U.S. Government will be \$13,807 million, including \$17,357 million in inventory and other assets capitalized, less \$3,484 million in working capital transferred out and a cumulative operating deficit of \$66 million.

INDUSTRIAL FUNDS

Department of Defense industrial funds finance various Defense activities that perform industrial or commercial type functions on a reimbursable basis (10 U.S.C. 2208). Workload at these activities is generated by orders from various customers who provide reimbursement through progress payments for the full cost of the work performed. This enables the industrial funds to maintain the level of working capital needed for continued operations. Government investment as of June 30, 1979, is estimated at \$407 million.

Budget program.—The policy of stabilizing the rates charged to customers will continue in 1979. Estimated total costs of goods and services produced in 1979 are projected to increase by \$809 million, reflecting an increase in support requirements. Yearend totals are shown in the following table (in thousands of dollars):

The U.S. Army activities financed through the Army industrial fund include depot supply and maintenance operations, research and development, arsenals, and technical engineering, the U.S. Army Missile Materiel

Readiness Command and the eastern and western areas of the Military Traffic Management Command. The increase in cost of goods and services produced in 1979 reflects a continued expanded depot maintenance program for the Army to reduce accumulated backlogs.

The Navy industrial fund finances a variety of activities, including aircraft maintenance facilities, ordnance stations, research laboratories, shipyards, strategic systems project offices, printing plants, public works centers, and the Military Sealift Command. Workload at the industrially funded facilities is projected to slightly increase between 1978 and 1979.

The Marine Corps industrial fund finances maintenance depots engaged in repairing or overhauling Marine Corps equipment and providing technical engineering support. The increase in costs and services in 1979 continues the effort begun in 1976 to accelerate the depot maintenance programs to reduce backlogs and to increase services being provided to customers.

The activities financed under the Air Force industrial fund include printing plants, laundries, depot maintenance activities, real property maintenance facility, and the Military Airlift Command. The increase in the costs of goods and services produced in 1979 results from higher in-house operating costs, increased contractual service costs, the rise in price of aviation fuel, and expansion of the fund to include a new real property maintenance facility.

The Defense industrial fund finances the Defense Clothing and Textile Supply Center and leased communications procured by the Defense Commercial Communications Office.

GENERAL PROVISIONS

SEC. 801. No part of any appropriation contained in this Act shall be used for publicity or propaganda purposes not authorized by the Congress.

SEC. 802. During the current fiscal year, the Secretary of Defense and the Secretaries of the Army, Navy, and Air Force, respectively, if they should deem it advantageous to the national defense, and if in their opinions the existing facilities of the Department of Defense are inadequate, are authorized to procure services in accordance with section 3109 of title 5, United States Code, under regulations prescribed by the Secretary of Defense, and to pay in connection therewith travel expenses of individuals, including actual transportation and per diem in lieu of subsistence while traveling from their homes or places of business to official duty station and return as may be authorized by law: *Provided*, That such contracts may be renewed annually.

SEC. 803. During the current fiscal year, provisions of law prohibiting the payment of compensation to, or employment of, any person not a citizen of the United States shall not apply to personnel of the Department of Defense.

SEC. 804. Appropriations contained in this Act shall be available for insurance of official motor vehicles in foreign countries, when required by laws of such countries; payments in advance of expenses determined by the investigating officer to be necessary and in accord with local custom for conducting investigations in foreign countries incident to matters relating to the activities of the department concerned; reimbursement of General Services Administration for security guard services for protection of confidential files; and all necessary expenses, at the seat of government of the United States of America or elsewhere, in connection with communication and other services and supplies as may be necessary to carry out the purposes of this Act.

SEC. 805. Any appropriation available to the Army, Navy, or the Air Force may, under such regulations as the Secretary concerned may prescribe, be used for expenses incident to the maintenance, pay, and allowances of prisoners of war, other persons in Army, Navy, or Air Force custody whose status is determined by the Secretary concerned to be similar to prisoners of war, and persons detained in such custody pursuant to Presidential proclamation.

SEC. 806. Appropriations available to the Department of Defense for the current fiscal year for maintenance or construction shall be available for acquisition of land or interest therein as authorized by section 2672 or 2675 of title 10, United States Code.

SEC. 807. Appropriations for the Department of Defense for the current fiscal year shall be available, (a) except as authorized by the Act of September 30, 1950 (20 U.S.C. 236-244), for primary and secondary schooling for minor dependents of military and civilian personnel of the Department of Defense residing on military or naval installations or stationed in foreign countries, as authorized for the Navy by section 7204 of title 10, United States Code, [in an amount not exceeding \$266,750,000,] when the Secretary of Defense finds that schools, if any, available in the locality, are unable to provide adequately for the education of such dependents: *Provided*, That under such regulations as may be issued by the Secretary of Defense, such schooling in a school operated by the Department of Defense under this section may be provided without tuition for minor dependents of civilian and military personnel of the Department of De-

fense who died while entitled to compensation or active duty pay: *Provided further*, That where such personnel die subsequent to January 11, 1971, such schooling must be continued or commenced within one year after the date of death; (b) for expenses in connection with administration of occupied areas; (c) for payment of rewards as authorized for the Navy by section 7209(a) of title 10, United States Code, for information leading to the discovery of missing naval property or the recovery thereof; (d) for payment of deficiency judgments and interests thereon arising out of condemnation proceedings; (e) for leasing of buildings and facilities including payment of rentals for special purpose space at the seat of government, and in the conduct of field exercises and maneuvers or, in administering the provisions of title 43, United States Code, section 315q, rentals may be paid in advance; (f) payments under contracts for maintenance of tools and facilities for twelve months beginning at any time during the fiscal year; (g) maintenance of defense access roads certified as important to national defense in accordance with section 210 of title 23, United States Code; (h) for the purchase of milk for enlisted personnel of the Department of Defense heretofore made available pursuant to section 1446a, title 7, United States Code, and the cost of milk so purchased, as determined by the Secretary of Defense, shall be included in the value of the commuted ration; (i) transporting civilian clothing to the home of record of selective service inductees and recruits on entering the military services; (j) payments under leases for real or personal property for twelve months beginning at any time during the fiscal year; and (k) pay and allowances of not to exceed nine persons, including personnel detailed to International Military Headquarters and Organizations, at rates provided for under section 625(d)(1) of the Foreign Assistance Act of 1961, as amended.

SEC. 808. Appropriations for the Department of Defense for the current fiscal year shall be available for: (a) donations of not to exceed \$25 to each prisoner upon each release from confinement in military or contract prison and to each person discharged for fraudulent enlistment; (b) authorized issues of articles to prisoners, applicants for enlistment and persons in military custody; (c) subsistence of selective service registrants called for induction, applicants for enlistment, prisoners, civilian employees as authorized by law, and supernumeraries when necessitated by emergent military circumstances; (d) reimbursement for subsistence of enlisted personnel while sick in hospitals; (e) expenses of prisoners confined in non-military facilities; (f) military courts, boards, and commissions; (g) utility services for buildings erected at private cost, as authorized by law, and buildings on military reservations authorized by regulations to be used for welfare and recreational purposes; (h) exchange fees, and losses in the accounts of disbursing officers or agents in accordance with law; (i) expenses of Latin American cooperation as authorized for the Navy by law (10 U.S.C. 7208); (j) expenses of apprehension and delivery of deserters, prisoners, and members absent without leave, including payment of rewards of not to exceed \$25 in any one case; and (k) expenses of arrangements with foreign countries for cryptologic support.

SEC. 809. Insofar as practicable, the Secretary of Defense shall assist American small business to participate equitably in the furnishing of commodities and services financed with funds appropriated under this Act by making available or causing to be made available to suppliers in the United States, and particularly to small independent enterprises, information, as far in advance as possible, with respect to purchases proposed to be financed with funds appropriated under this Act, and by making available or causing to be made available to purchasing and contracting agencies of the Department of Defense information as to commodities and services produced and furnished by small independent enterprises in the United States, and by otherwise helping to give small business an opportunity to participate in the furnishing of commodities and services financed with funds appropriated by this Act.

SEC. 810. No appropriation contained in this Act shall be available for expenses of operation of messes (other than organized messes the operating expenses of which are financed principally from nonappropriated funds) at which meals are sold to officers or civilians, except under regulations approved by the Secretary of Defense, which shall (except under unusual or extraordinary circumstances) establish rates for such meals sufficient to provide reimbursements of operating expenses and food costs to the appropriations concerned: *Provided*, That officers and civilians in a travel status receiving a per diem allowance in lieu of subsistence shall be charged at the rate of not less than \$2.50 per day: *Provided further*, That for the purposes of this section payments for meals at the rates established hereunder may be made in cash or by deduction from the pay of civilian employees: *Provided further*, That members of organized nonprofit youth groups sponsored at either the national or local level, when extended the privilege of visiting a military installation and permitted to eat in the general mess by the commanding officer of the

installation, shall pay the commuted ration cost of such meal or meals.

Sec. 811. No part of any appropriation contained in this Act shall remain available for obligation beyond the current fiscal year unless expressly so provided herein.

Sec. 812. [Appropriations of the Department of Defense available for operation and maintenance may be reimbursed during.] *During* the current fiscal year [for all expenses involved in the preparation for disposal and for the disposal of military supplies, equipment, and materiel, and for all expenses of production of lumber or timber products pursuant to section 2665 of title 10, United States Code, from amounts received as proceeds from the sale of any such property: *Provided*, That a report of receipts and disbursements under this limitation shall be made quarterly to Congress: *Provided further*, That] no funds available to agencies of the Department of Defense shall be used for the operation, acquisition, or construction of new facilities or equipment for new facilities in the continental limits of the United States for metal scrap baling or shearing or for melting or sweating aluminum scrap unless the Secretary of Defense or an Assistant Secretary of Defense designated by him determines, with respect to each facility involved, that the operation of such facility is in the national interest.

Sec. 813. (a) During the current fiscal year, the President may exempt appropriations, funds, and contract authorizations, available for military functions under the Department of Defense, from the provisions of subsection (c) of section 3679 of the Revised Statutes, as amended, whenever he deems such action to be necessary in the interest of national defense.

(b) Upon determination by the President that such action is necessary, the Secretary of Defense is authorized to provide for the cost of an airborne alert as an excepted expense in accordance with the provisions of section 3732 of the Revised Statutes (41 U.S.C. 11).

(c) Upon determination by the President that it is necessary to increase the number of military personnel on active duty subject to existing laws beyond the number for which funds are provided in this Act, the Secretary of Defense is authorized to provide for the cost of such increased military personnel, as an excepted expense in accordance with the provisions of section 3732 of the Revised Statutes (41 U.S.C. 11).

(d) The Secretary of Defense shall immediately advise Congress of the exercise of any authority granted in this section, and shall report monthly on the estimated obligations incurred pursuant to subsections (b) and (c).

Sec. 814. No appropriation contained in this Act shall be available in connection with the operation of commissary stores of the agencies of the Department of Defense for the cost of purchase (including commercial transportation in the United States to the place of sale but excluding all transportation outside the United States) and maintenance of operating equipment and supplies, and for the actual or estimated cost of utilities as may be furnished by the Government and of shrinkage, spoilage, and pilferage of merchandise under the control of such commissary stores, except as authorized under regulations promulgated by the Secretaries of the military departments concerned with the approval of the Secretary of Defense, which regulations shall provide for reimbursement therefor to the appropriations concerned and, notwithstanding any other provision of law, shall provide for the adjustment of the sales prices in such commissary stores to the extent necessary to furnish sufficient gross revenue from sales of commissary stores to make such reimbursement: *Provided*, That under such regulations as may be issued pursuant to this section all utilities may be furnished without cost to the commissary stores outside the continental United States and in Alaska: *Provided further*, That no appropriation contained in this Act shall be available in connection with the operation of commissary stores within the continental United States unless the Secretary of Defense has certified that items normally procured from commissary stores are not otherwise available at a reasonable distance and a reasonable price in satisfactory quality and quantity to the military and civilian employees of the Department of Defense.

Sec. 815. No part of the appropriations in this Act shall be available for any expense of operating aircraft under the jurisdiction of the armed forces for the purpose of proficiency flying, as defined in Department of Defense Directive 1340.4 except in accordance with regulations prescribed by the Secretary of Defense. Such regulations (1) may not require such flying except that required to maintain proficiency in anticipation of a member's assignment to combat operations and (2) such flying may not be permitted in cases of members who have been assigned to a course of instruction of ninety days or more.

Sec. 816. No part of any appropriation contained in this Act shall be available for expense of transportation, packing, crating, temporary storage, drayage, and unpacking of household goods and

personal effects in any one shipment having a net weight in excess of thirteen thousand five hundred pounds.

Sec. 817. Vessels under the jurisdiction of the Department of Commerce, the Department of the Army, the Department of the Air Force, or the Department of the Navy may be transferred or otherwise made available without reimbursement to any such agencies upon the request of the head of one agency and the approval of the agency having jurisdiction of the vessels concerned.

Sec. 818. Not more than 20 per centum of the appropriations in this Act which are limited for obligation during the current fiscal year shall be obligated during the last two months of the fiscal year: *Provided*, That this section shall not apply to obligations for support of active duty training of civilian components or summer-camp training of the Reserve Officers' Training Corps.

Sec. 819. During the current fiscal year the agencies of the Department of Defense may accept the use of real property from foreign countries for the United States in accordance with mutual defense agreements or occupational arrangements and may accept services furnished by foreign countries as reciprocal international courtesies or as services customarily made available without charge; and such agencies may use the same for the support of the United States forces in such areas without specific appropriation therefor.

In addition to the foregoing, agencies of the Department of Defense may accept real property, services, and commodities from foreign countries for the use of the United States in accordance with mutual defense agreements or occupational arrangements and such agencies may use the same for the support of the United States forces in such areas, without specific appropriations therefor: *Provided*, That the foregoing authority shall not be available for the conversion of heating plants from coal to oil at defense facilities in Europe: *Provided further*, That within thirty days after the end of each quarter the Secretary of Defense shall render to Congress and to the Office of Management and Budget a full report of such property, supplies, and commodities received during such quarter.

Sec. 820. During the current fiscal year, appropriations available to the Department of Defense for research and development may be used for the purposes of section 2353 of title 10, United States Code, and for purposes related to research and development for which expenditures are specifically authorized in other appropriations of the service concerned.

Sec. 821. No appropriation contained in this Act shall be available for the payment of more than 75 per centum of charges of educational institutions for tuition or expenses of off-duty training of military personnel, nor for the payment of any part of tuition or expenses for such training for commissioned personnel who do not agree to remain on active duty for two years after completion of such training.

Sec. 822. No part of the funds appropriated herein shall be expended for the support of any formally enrolled student in basic courses of the senior division, Reserve Officers' Training Corps, who has not executed a certificate of loyalty or loyalty oath in such form as shall be prescribed by the Secretary of Defense.

Sec. 823. No part of any appropriation contained in this Act, except for small purchases in amounts not exceeding \$10,000, shall be available for the procurement of any article of food, clothing, cotton, woven silk or woven silk blends, spun silk yarn for cartridge cloth, synthetic fabric or coated synthetic fabric, or wool (whether in the form of fiber or yarn or contained in fabrics, materials, or manufactured articles), or specialty metals including stainless steel flatware, not grown, reprocessed, reused, or produced in the United States or its possessions, except to the extent that the Secretary of the Department concerned shall determine that a satisfactory quality and sufficient quantity of any articles of food or clothing or any form of cotton, woven silk and woven silk blends, spun silk yarn for cartridge cloth, synthetic fabric or coated synthetic fabric, wool, or specialty metals including stainless steel flatware, grown, reprocessed, reused, or produced in the United States or its possessions cannot be procured as and when needed at United States market prices and except procurements outside the United States in support of combat operations, procurements by vessels in foreign waters, and emergency procurements or procurements of perishable foods by establishments located outside the United States for the personnel attached thereto: *Provided*, That nothing herein shall preclude the procurement of specialty metals or protective clothing produced outside the United States or its possessions when such procurement is necessary to comply with agreements with foreign governments requiring the United States to purchase supplies from foreign sources for the purposes of offsetting sales made by the United States Government or United States firms under approved programs serving defense requirements or where such procurement is necessary in furtherance of the standardization and interoperability of equipment requirements within NATO so long as such agreements with foreign governments comply, where applicable, with the requirements of section 36 of the Arms Export Control

Act and with section 814 of the Department of Defense Appropriation Authorization Act, 1976: *Provided further*, That nothing herein shall preclude the procurement of foods manufactured or processed in the United States or its possessions: *Provided further*, That no funds herein appropriated shall be used for the payment of a price differential on contracts hereafter made for the purpose of relieving economic dislocations: *Provided further*, That none of the funds appropriated in this Act shall be used except that, so far as practicable, all contracts shall be awarded on a formally advertised competitive bid basis to the lowest responsible bidder.

SEC. 824. None of the funds appropriated in this Act shall be used for the construction, replacement, or reactivation of any bakery, laundry, or drycleaning facility in the United States, its territories or possessions, as to which the Secretary of Defense does not certify in writing, giving his reasons therefor, that the services to be furnished by such facilities are not obtainable from commercial sources at reasonable rates.

SEC. 825. During the current fiscal year, appropriations of the Department of Defense shall be available for reimbursement to the United States Postal Service for payment of costs of commercial air transportation of military mail between the United States and foreign countries.

SEC. 826. Appropriations contained in this Act shall be available for the purchase of household furnishings, and automobiles for military and civilian personnel on duty outside the continental United States, for the purpose of resale at cost to incoming personnel, and for providing furnishings, without charge, in other than public quarters occupied by military or civilian personnel of the Department of Defense on duty outside the continental United States or in Alaska, upon a determination, under regulations approved by the Secretary of Defense, that such action is advantageous to the Government.

SEC. 827. During the current fiscal year, appropriations available to the Department of Defense for pay of civilian employees shall be available for uniforms, or allowances therefor, as authorized by law (5 U.S.C. 5901; 80 Stat. 508).

SEC. 828. Funds provided in this Act for legislative liaison activities of the Department of the Army, the Department of the Navy, the Department of the Air Force, and the Office of the Secretary of Defense shall not exceed \$6,900,000 for fiscal year [1978] 1979: *Provided*, That this amount shall be available for apportionment to the Department of the Army, the Department of the Navy, the Department of the Air Force, and the Office of the Secretary of Defense as determined by the Secretary of Defense.

SEC. 829. Of the funds made available by this Act for the services of the Military Airlift Command, \$100,000,000 shall be available only for procurement of commercial transportation service from carriers participating in the civil reserve air fleet program; and the Secretary of Defense shall utilize the services of such carriers which qualify as small businesses to the fullest extent found practicable: *Provided*, That the Secretary of Defense shall specify in such procurement, performance characteristics for aircraft to be used based upon modern aircraft operated by the civil air fleet.

SEC. 830. During the current fiscal year, appropriations available to the Department of Defense for operation may be used for civilian clothing, not to exceed \$40 in cost for enlisted personnel: (1) discharged for misconduct, [unfitness,] unsuitability, or otherwise than honorably; (2) sentenced by a civil court to confinement in a civil prison or interned or discharged as an alien enemy; or (3) discharged prior to completion of recruit training under honorable conditions for dependency, hardship, minority, disability, or for the convenience of the Government.

SEC. 831. No part of the funds appropriated herein shall be available for paying the costs of advertising by any defense contractor, except advertising for which payment is made from profits, and such advertising shall not be considered a part of any defense contract cost. The prohibition contained in this section shall not apply with respect to advertising conducted by any such contractor, in compliance with regulations which shall be promulgated by the Secretary of Defense, solely for (1) the recruitment by the contractor of personnel required for the performance by the contractor of obligations under a defense contract, (2) the procurement of scarce items required by the contractor for the performance of a defense contract, or (3) the disposal of scrap or surplus materials acquired by the contractor in the performance of a defense contract.

SEC. 832. Funds appropriated in this Act for maintenance and repair of facilities and installations shall not be available for acquisition of new facilities, or alteration, expansion, extension, or addition of existing facilities, as defined in Department of Defense Directive 7040.2, dated January 18, 1961, in excess of [\$75,000] \$100,000: *Provided*, That the Secretary of Defense may amend or change the said directive during the current fiscal year, consistent with the purpose of this section.

SEC. 833. During the current fiscal year, upon determination by the Secretary of Defense that such action is necessary in the

national interest, he may, with the approval of the Office of Management and Budget, transfer not to exceed \$750,000,000 of the appropriations or funds available to the Department of Defense for military functions (except military construction) between such appropriations or funds or any subdivision thereof, to be merged with and to be available for the same purposes, and for the same time period, as the appropriation or fund to which transferred: *Provided*, That such authority to transfer may not be used unless for higher priority items, based on unforeseen military requirements, than those for which originally appropriated and in no case where the item for which funds are requested has been denied by Congress: *Provided further*, That the Secretary of Defense shall notify the Congress promptly of all transfers made pursuant to this authority.

SEC. 834. None of the funds appropriated in this Act may be used to make payments under contracts for any program, project, or activity in a foreign country unless the Secretary of Defense or his designee, after consultation with the Secretary of the Treasury or his designee, certifies to the Congress that the use, by purchase from the Treasury, of currencies of such country acquired pursuant to law is not feasible for the purpose, stating the reason therefor.

SEC. 835. During the current fiscal year, cash balances in working capital funds of the Department of Defense established pursuant to section 2208 of title 10, United States Code, may be maintained in only such amounts as are necessary at any time for cash disbursements to be made from such funds: *Provided*, That transfers may be made between such funds in such amounts as may be determined by the Secretary of Defense, with the approval of the Office of Management and Budget, except that transfers between a stock fund account and an industrial fund account may not be made unless the Secretary of Defense has notified the Congress of the proposed transfer. Except in amounts equal to the amounts appropriated to working capital funds in this Act, no obligations may be made against a working capital fund to procure war reserve material inventory, unless the Secretary of Defense has notified the Congress prior to any such obligation.

SEC. 836. (a) The Secretary of Defense shall require all prime contractors receiving contract awards of \$500,000 or more from the Department of Defense to file a report with the Secretary at the end of the year showing the amount of Department of Defense work (in terms of dollars) each such contractor had performed by subcontractors during such year and to identify the State or States in which each subcontractor performed the work subcontracted to it.

(b) The Secretary of Defense shall submit a report annually to the Congress showing, on a State-by-State basis, the total amount of Department of Defense funds paid to subcontractors, during the year for which the report is submitted, by the prime contractors described in subsection (a).]

SEC. [837] 836. No part of the funds appropriated under this Act shall be used to pay salaries of any Federal employee who is convicted in any Federal, State, or local court of competent jurisdiction, of inciting, promoting, or carrying on a riot, or any group activity resulting in material damage to property or injury to persons, found to be in violation of Federal, State, or local laws designed to protect persons or property in the community concerned.

SEC. [838] 837. No part of the funds appropriated under this Act shall be used to provide a loan, guarantee of a loan, or a grant to any applicant who has been convicted by any court of general jurisdiction of any crime which involves the use of or the assistance to others in the use of force, trespass, or the seizure of property under control of an institution of higher education to prevent officials or students at such an institution from engaging in their duties or pursuing their studies.

SEC. [839] 838. None of the funds available to the Department of Defense shall be utilized for the conversion of heating plants from coal to oil at defense facilities in Europe.

SEC. [840] 839. None of the funds appropriated by this Act shall be available for any research involving uninformed or nonvoluntary human beings as experimental subjects.

SEC. [841] 840. Appropriations for the current fiscal year for operation and maintenance of the active forces shall be available for medical and dental care of personnel entitled thereto by law or regulation (including charges of private facilities for care of military personnel, except elective private treatment); welfare and recreation; hire of passenger motor vehicles; repair of facilities; modification of personal property; design of vessels; industrial mobilization; installation of equipment in public and private plants; military communications facilities on merchant vessels; acquisition of services, special clothing, supplies, and equipment; and expenses for the Reserve Officers' Training Corps and other units at educational institutions.

SEC. [842] 841. No part of the funds in this Act shall be available to prepare or present a request to the Committees on Appropriations for the reprogramming of funds, unless for higher priority items, based on unforeseen military requirements, than those for which

originally appropriated and in no case where the item for which reprogramming is requested has been denied by the Congress.

Sec. [843] 842. No funds appropriated in this Act shall be available to pay claims for nonemergency inpatient hospital care provided under the Civilian Health and Medical Program of the Uniformed Services for services available at a facility of the uniformed services within a 40-mile radius of the patient's residence.

Sec. [844] 843. None of the funds contained in this Act available for the Civilian Health and Medical Program of the Uniformed Services under the provisions of section 1079(a) of title 10, United States Code, shall be available for (a) services of pastoral counselors, or family and child counselors, or marital counselors unless the patient has been referred to such counselor by a medical doctor for treatment of a specific problem with results of that treatment to be communicated back to the physician who made such referral; (b) special education, except when provided as secondary to the active psychiatric treatment on an institutional inpatient basis; (c) therapy or counseling for sexual dysfunctions or sexual inadequacies; (d) treatment of obesity when obesity is the sole or major condition treated; or (e) reconstructive surgery justified solely on psychiatric needs including, but not limited to, mammary augmentation, face lifts and sex gender changes; (f) reimbursement of any physician or other authorized individual provider of medical care in excess of the seventy-fifth percentile of the customary charges made for similar services in the same locality where the medical care was furnished; or (g) any service or supply which is not medically or psychologically necessary to diagnose and treat a mental or physical illness, injury, or bodily malfunction as diagnosed by a physician, dentist, or a clinical psychologist, as appropriate, except as authorized by section 1079(a)(4) of [Title] title 10, United States Code.

Sec. [845] 844. Funds appropriated in this Act shall be available for the appointment, pay, and support of persons appointed as cadets and midshipmen in the two-year Senior Reserve Officers' Training Corps course in excess of the 20 percent limitation on such persons imposed by section 2107(a) of title 10, United States Code, but not to exceed 60 percent of total authorized scholarships.

[Sec. 846. None of the funds appropriated in this Act shall be available for the operation and support of more than four Naval districts as established by sections 5221 and 5222, title 10, United States Code, after June 30, 1977.]

[Sec. 847. None of the funds appropriated by this Act shall be available to pay any member of the uniformed service for unused accrued leave pursuant to section 501 of title 37, United States Code, for more than sixty days of such leave, less the number of days for which payment was previously made under section 501 after February 9, 1976.]

[Sec. 848. None of the funds appropriated in this Act may be used to pay any claim over \$5,000,000 against the United States, unless such claim has been thoroughly examined and evaluated by officials of the Department of Defense responsible for determining such claims and a report is made to the Congress as to the validity of these claims.]

Sec. [849] 845. None of the funds appropriated by this Act may be used to support more than 300 enlisted aides for officers in the United States Armed Forces.

Sec. [850] 846. No appropriation contained in this Act may be used to pay for the cost of public affairs activities of the Department of Defense in excess of \$25,000,000.

Sec. [851] 847. None of the funds provided in this Act shall be available for the planning or execution of programs which utilize amounts credited, during the current fiscal year, to Department of Defense appropriations or funds pursuant to the provisions of section 37(a) of the Arms Export Control Act representing payment for the actual value of defense articles specified in section 21(a)(1) of that Act: *Provided*, That such amounts so credited shall be deposited in the Treasury as miscellaneous receipts as provided in 31 U.S.C. 484.

[Sec. 852. (a) None of the funds appropriated by this Act may be used to (1) convert base operating support functions, excluding real property maintenance and repair, to commercial contract during the period October 1, 1977, through September 30, 1978, or (2) to fund continued performance during fiscal year 1978 of base operating support contracts, excluding real property maintenance and repair, awarded between the date of enactment of this Act and September 30, 1977, which convert base operating support activities performed by employees of the Government of the United States to commercial contract.

(b) None of the funds appropriated by this Act may be obligated for commercial contracts to be physically performed at an installation or facility including leased facilities for the following types of work: (1) weapons system engineering and logistical support; (2) ship, aircraft, missile, automotive and tracked vehicle intermediate level maintenance or depot maintenance; or (3) research, development, test, and evaluation, if the work to be physically performed at

an installation or facility during fiscal year 1978 by commercial contracts would result in a reduction of employees of the Government of the United States at that installation or facility.]

[Sec. 853. None of the funds appropriated by this Act or available in any working capital fund of the Department of Defense shall be available to pay the expenses attributable to lodging of any person on official business away from his designated post of duty, or in the case of an individual described under section 5703 of title 5, United States Code, his home or regular place of duty, when adequate government quarters are available, but are not occupied by such person.]

Sec. [854] 848. During the current fiscal year, for the purpose of conducting a test to evaluate a capitation approach to providing medical care and to that end for the purpose of providing adequate funds in Department of Defense Medical Regions 1 and 9 for medical care, including the expenses of the Civilian Health and Medical Program of the Uniformed Services, funds available to the Department of Defense in the appropriation "Operation and Maintenance, Defense Agencies" for expenses of the Civilian Health and Medical Program of the Uniformed Services may be transferred to appropriations available to the military departments for operation and maintenance, and funds available to the military departments for operation and maintenance may be transferred between such appropriations: *Provided*, That funds transferred pursuant to this authority shall be merged with and made available for the same purpose as the appropriation to which transferred: *Provided further*, That the Secretary of Defense shall notify the Congress promptly of all transfers made pursuant to this authority: *Provided further*, That transfer authority provided herein shall be in addition to that provided in section 833 of this Act.

Sec. [855. Effective October 1, 1977, no] 849. No appropriation contained in this Act shall be available to fund any costs of a Senior Reserve Officers' Training Corps unit—except to complete training of personnel enrolled in Military Science 4—which in its junior year class (Military Science 3) has for the four preceding academic years, and as of September 30, 1977, enrolled less than (a) seventeen students where the institution prescribes a four-year or a combination four- and two-year program; or (b) twelve students where the institution prescribes a two-year program: *Provided*, That, notwithstanding the foregoing limitation, funds shall be available to maintain one Senior Reserve Officers' Training Corps unit in each State and at each State-operated maritime academy: *Provided further*, That units under the consortium system shall be considered as a single unit for purposes of evaluation of productivity under this provision.

Sec. [856] 850. (a) None of the funds appropriated by this Act shall be available to pay the retainer pay of any enlisted member of the Regular Navy, the Naval Reserve, the Regular Marine Corps, or the Marine Corps Reserve who is transferred to the Fleet Reserve or the Fleet Marine Corps Reserve under section 6330 of title 10, United States Code, on or after December 31, 1977, if the provisions of section 6330(d) of title 10, are utilized in determining such member's eligibility for retirement under section 6330(b) of title 10: *Provided*, That notwithstanding the foregoing, time creditable as active service for a completed minority enlistment, and an enlistment terminated within three months before the end of the term of enlistment under section 6330(d) of title 10, prior to December 31, 1977, may be utilized in determining eligibility for [retirement] retirement: *Provided further*, that notwithstanding the foregoing, time may be credited as active service in determining a member's eligibility for retirement under section 6330(b) of title 10 pursuant to the provisions of the first sentence of section 6330(d) of title 10 for those members who had formally requested transfer to the Fleet Reserve or the Fleet Marine Corps Reserve on or before October 1, 1977.

(b) None of the funds appropriated by this Act shall be available to pay that portion of the retainer pay of any enlisted member of the Regular Navy, the Naval Reserve, the Regular Marine Corps, or the Marine Corps Reserve who is transferred to the Fleet Reserve or the Fleet Marine Corps Reserve under section 6330 of title 10, United States Code, on or after December 31, 1977, which is attributable under the second sentence of section 6330(d) of title 10 to time which, after December 31, 1977, is not actually served by such member.

Sec. [857] 851. None of the funds appropriated in this Act for programs of the Central Intelligence Agency shall remain available for obligation beyond the current fiscal year.

[Sec. 858. None of the funds appropriated in this Act may be used for the consolidation or realignment of advanced undergraduate pilot training squadrons of the Navy as currently proposed by the Department of Defense.]

Sec. [859] 852. None of the funds provided by this Act may be used to pay the salaries of any person or persons who authorize the

transfer of unobligated and deobligated appropriations into the Reserve for Contingencies of the Central Intelligence Agency.

SEC. [860] 853. The appropriation, "Shipbuilding and Conversion, Navy", which would expire for obligation on September 30, [1977] 1978, shall remain available for obligation until September 30, [1979] 1980.

[SEC. 861. None of the funds appropriated in this Act may be used to support more than 10,201 full-time and 2,603 part-time military personnel assigned to or used in the support of Morale, Welfare and Recreation activities as described in Department of Defense Instruction 7000.12 and its enclosures, dated July 17, 1974.]

Sec. 854. During the current fiscal year the Department of Defense may guarantee loans pursuant to Title III of the Defense Production Act of 1950 as amended (50 U.S.C. App. 2091, 64 Stat. 800) in an amount not to exceed \$30,000,000. (Department of Defense Appropriation Act, 1978).

GENERAL PROVISIONS—MILITARY CONSTRUCTION

SEC. 101. Funds appropriated to the Department of Defense for construction in prior years are hereby made available for construction authorized for each such department by the authorizations enacted into law during the [first] second session of the Ninety-fifth Congress.

SEC. 102. None of the funds appropriated in this Act shall be expended for payments under a cost-plus-a-fixed-fee contract for work, where cost estimates exceed \$25,000, to be performed within the United States, except Alaska, without the specific approval in writing of the Secretary of Defense setting forth the reasons therefor.

SEC. 103. None of the funds appropriated in this Act shall be expended for additional costs involved in expediting construction unless the Secretary of Defense certifies such costs to be necessary to protect the national interest and establishes a reasonable completion date for each project, taking into consideration the urgency of the requirement, the type and location of the project, the climatic and seasonal conditions affecting the construction, and the application of economical construction practices.

SEC. 104. None of the funds appropriated in this Act shall be used for the construction, replacement, or reactivation of any bakery, laundry, or drycleaning facility in the United States, its territories, or possessions, as to which the Secretary of Defense does not certify, in writing, giving his reasons therefor, that the services to be furnished by such facilities are not obtainable from commercial sources at reasonable rates.

SEC. 105. Funds herein appropriated to the Department of Defense for construction shall be available for hire of passenger motor vehicles.

SEC. 106. Funds appropriated to the Department of Defense for construction may be used for advances to the Federal Highway Administration, Department of Transportation, for the construction of access roads as authorized by section 210 of title 23, United States Code, when projects authorized therein are certified as important to the national defense by the Secretary of Defense.

SEC. 107. None of the funds appropriated in this Act may be used to begin construction of new bases inside the continental United States for which specific appropriations have not been made.

SEC. 108. No part of the funds provided in this Act shall be used for purchase of land or land easements in excess of 100 per centum of the value as determined by the Corps of Engineers or the Naval Facilities Engineering Command, except: (a) where there is a determination of value by a Federal court, or (b) purchases negotiated by the Attorney General or his designee, or (c) where the estimated value is less than \$25,000, or (d) as otherwise determined by the Secretary of Defense to be in the public interest.

SEC. 109. None of the funds appropriated in this Act may be used to make payments under contracts for any project in a foreign country unless the Secretary of Defense or his designee, after consultation with the Secretary of the Treasury or his designee, certifies to the Congress that the use, by purchase from the Treasury, of currencies of such country acquired pursuant to law is not feasible for the purpose, stating the reason therefor.

SEC. 110. None of the funds appropriated in this Act shall be used to (1) acquire land, (2) provide for site preparation, or (3) install utilities for any family housing, except housing for which funds have been made available in annual military construction appropriation Acts.

[SEC. 111. None of the funds appropriated or otherwise made available under this Act shall be obligated or expended in connection with any base realignment or closure activity, until all terms, conditions and requirements of the National Environmental Policy Act have been complied with, with respect to each such activity.] (Military Construction Appropriation Act, 1978.)

GENERAL PROVISIONS—CIVIL DEFENSE

SEC. 1. Appropriations contained in this Act for carrying out civil defense activities shall not be available in excess of the limitations on appropriations contained in section 408 of the Federal Civil Defense Act, as amended (50 U.S.C. App. 2260).

SEC. 2. No part of any appropriation in this Act shall be available for the construction of warehouses or for the lease of warehouse space in any building which is to be constructed specifically for civil defense activities. (Independent Agencies Appropriations Act, 1978.)

1. *Operation and maintenance.*—A total of 2,629 interments were made in 1977; 4,100 interments are estimated for 1978; and 4,140 are projected for 1979. There will be 628 developed acres to be maintained in 1979.

2. *Administration.*—Provision is made for determining eligibility for interment; management of Arlington and Soldiers' Home National Cemeteries; and administrative support.

3. *Special construction, Arlington National Cemetery.*—Funds in the amount of \$330 thousand are being requested to continue design work on future projects.

CORPS OF ENGINEERS—CIVIL

Federal Funds

General and special funds:

The following appropriations shall be expended under the direction of the Secretary of the Army and the supervision of the Chief of Engineers for authorized civil functions of the Department of the Army pertaining to rivers and harbors, flood control, beach erosion, and related purposes.

GENERAL INVESTIGATIONS

For expenses necessary for the collection and study of basic information pertaining to river and harbor, flood control, shore protection, and related projects, restudy of authorized projects, and when authorized by law, surveys and studies of projects prior to authorization for construction, **[\$103,646,000]** \$108,100,000 to remain available until expended. 1. *Surveys.*—(a) Navigation and flood damage prevention studies are made to determine the need and economic justification for proposed water and related land resources developments. Shoreline protection studies are undertaken to determine the need for shore protection and remedial measures at specific localities. Funds are requested to continue 178 studies. The budget request contemplates reducing the total number of studies in the budget and slowing progress on other lower priority studies.

(b) Comprehensive river basin studies provide for consideration of the water and related land resource needs of river basins. They are coordinated with the river basin planning efforts of other Federal agencies and non-Federal interests. Funds are requested for preparation of reports on the following: (1) Connecticut River Basin, (2) Kanawha River Basin, (3) Puget Sound and adjacent waters, (4) Red River below Denison Dam, (5) South-eastern New England, (6) Susquehanna River Basin, and (7) White River Basin.

(c) Special studies are made to resolve unique or complex water resource problems. Funds are requested to continue the following 12 special studies: (1) Chesapeake Bay, (2) diversion of Lake Michigan water at Chicago, (3) Great Lakes, St. Lawrence seaway navigation season extension, (4) Great River resource management study, (5) hydropower resources study, (6) Lake Erie wastewater management, (7) Long Island Sound dredged mate-

rial containment study, (8) Metropolitan Washington, D.C., water supply, (9) national waterway study, (10) Passamaquoddy tidal power study, (11) Tennessee-Tombigbee waterway urban study, and (12) water levels of the Great Lakes.

(d) Funds are requested to review the operation of nine completed projects because significant changes in physical and/or economic conditions have occurred. Funds are requested to continue studies of authorized projects prior to submissions of requests for deauthorization. Funds are requested to continue restudy of the Palouse River, Pullman, Wash.; Bonpas Creek, Ill.; and Holland Harbor, Mich.; and to initiate restudy of Celina Lake, Ky.

(e) Coordination studies with Federal, State, and local agencies and interests give appropriate consideration to present and future requirements for all beneficial uses of water and related resources, including navigation, flood damage prevention, water supply, irrigation, water quality control, wastewater management, power, recreation, bank and shoreline protection, and fish and wildlife conservation.

(f) The Water Resources Development Acts of 1974 and 1976 authorized selected projects for the phase I design memorandum stage of advance engineering and design. These continuing studies will provide additional information and recommendations on plans for which the preliminary feasibility and desirability have been established, but which require further investigations.

2. *Collection and study of basic data.*—(a) *Stream gaging.*—Funds are transferred to the U.S. Geological Survey for all, or part, of the cost of operation and maintenance of about 2,500 stream gaging stations which are of specific interest to the Civil Works Mission.

(b) *Precipitation studies.*—Funds are transferred to the National Weather Service for hydrometeorological studies for use by the corps in planning and designing various types of water resource projects.

(c) *Fish and wildlife studies.*—Prior to 1978 the corps transferred lump sum amounts to the Fish and Wildlife Service to offset the costs of studies on fish and wildlife aspects of areas under study by the corps. These studies are now directly funded at field level from funds appropriated for the studies.

(d) *International waters studies.*—Funds are used for engineering studies to assist the U.S. Government in meeting treaty commitments between the United States and Canada.

(e) *Flood plain management services.*—Funds are used to prepare and provide information on flood hazards, advice, and technical assistance requested by States, local government agencies, and by other Federal agencies for guidance in the management of flood plain areas. Because of the growing program of flood insurance studies and program related services carried out by the Department of Housing and Urban Development through the Federal Insurance Administration, the budget reflects, in part, phasedown of certain types of corps-funded services, such as flood plain information reports.

(f) *Hydrologic studies.*—These studies provide rainfall-runoff relationships, flood frequency, snow melt, flood forecasting, analysis of past storms and floods, sedimentation, and other studies of a related hydrologic nature that are not chargeable to authorized projects or studies.

(g) *Scientific and technical information centers.*—Four information centers (soil mechanics, concrete technology, hydraulic engineering, and coastal engineering) acquire,

examine, evaluate, and disseminate newly published scientific and technical information.

(h) *Coastal data collection.*—Collect and evaluate long-term statistical data on coastal conditions, including wave climate, the location and quantity of sand resources, erosion and accretion rates, and other historical data on shoreline changes and conditions. Efforts are underway to develop accurate hindcast models which will use available historical weather records to compute the wave conditions which resulted from those weather conditions. Physical measurements of conditions along the California coast will be initiated in 1979 to initiate long term data collection and to verify the West Coast hindcast model.

(i) *Transportation systems.*—The requested funds are for the operation and updating of the Corps of Engineers inland navigation system analysis program, which is a system of models and data files used to maximize the efficient operation and use of inland waterways, and to improve the planning for their future maintenance and improvement.

(j) *National program of inspection of dams.*—Requested funds will be used to inspect and evaluate about 2,000 potentially high-hazard non-Federal dams and to continue verification and updating of the existing national inventory of dams.

3. *Research and development.*—These investigations are conducted to improve the corps capability to execute the civil works program. The objectives are to maximize effectiveness, economy, and safety, with due regard for protecting and enhancing the environment. The current program includes investigations of: design, materials, construction management, structural engineering, and electrical and mechanical engineering; coastal engineering; flood control and navigation, improvement of operation and maintenance techniques, hydrology of cold regions, and ice engineering; environmental quality, including environmental impact and wastewater management; water resources planning studies, including planning methodologies; analytical techniques for water resources management; recreation and flood plain management; and testing and evaluation of earth resources satellite applications to civil works activities.

CONSTRUCTION, GENERAL

For the prosecution of river and harbor, flood control, shore protection, and related projects authorized by laws; and detailed studies, and plans and specifications, of projects (including those for development with participation or under consideration for participation by States, local governments, or private groups) authorized or made eligible for selection by law (but such studies shall not constitute a commitment of the Government to construction), **[\$1,523,820,000] \$1,274,400,000**, to remain available until expended [: *Provided*, That no part of this appropriation shall be used for projects not authorized by law or which are authorized by law limiting the amount to be appropriated therefor, except as may be within the limits of the amount now or hereafter authorized to be appropriated: *Provided further*, That not to exceed \$4,000,000 of this appropriation is available to carry out the purposes of the Endangered Species Act of 1973 (Public Law 93-205), as amended, including cooperative efforts as contemplated by that Act to relocate endangered or threatened species to other suitable habitats as may be necessary to expedite project construction].

[(Rescission)]

[Appropriations provided under this head in the Public Works for Water and Power Development and Energy Research Appropriation Act, 1977, are hereby rescinded in the amount of \$6,550,000]. (*Public Works for Water and Power Development and Energy Research Appropriation Act, 1978; additional authorizing legislation to be proposed for \$282,000,000.*)

The requested appropriation is \$1,274 million which is \$250 million less than 1978 appropriations. However, 1979 outlays are anticipated to be only \$28 million less than 1978 because of large carryover balances. The budget request and constrained out-year planning ceilings anticipate completion delays averaging about 18 months for about 38 projects. Further recommendations on the ongoing program and new starts will be made when the water policy review, currently underway, is completed.

1. *Advance engineering and design.*—Design studies establish project features and cost estimates required for preparation of contract plans. The funds requested for 87 projects will bring designs and plans for 18 to a point where they will be ready for construction and will permit continuation of planning on 69 other projects. The budget request anticipates funding delays in advance engineering and design on 8 projects, and provides no funds for continuation of design on 15 projects.

2. *Navigation projects.*—This activity includes improvement of channels and harbors by dredging and construction of breakwaters, jetties, and dikes; construction of locks, dams, and canals; and mitigation of shore damages attributable to navigation projects. Work will be continued on 20 channel and harbor projects, and on 9 lock, dam, and canal projects. Funds are requested to complete work on 6 channel and harbor projects, and on 1 lock, dam, and canal project.

3. *Beach erosion control projects.*—The Federal Government participates in the cost of restoring and protecting shores against erosion by waves and currents. Funds are requested to complete one project, continue work on seven projects, and provide reimbursement to non-Federal interests on two projects.

4. *Flood control projects.*—The funds that are requested are for local protection projects and reservoirs for flood control and other purposes, such as water supply. Local protection projects consist of channel improvements, levees, floodwalls, emergency streambank and shoreline protection, and small snagging and clearing work on navigable streams and tributaries. Work will be continued on 60 local protection projects, and on 40 reservoir projects. Six local protection projects and eight reservoir projects will be completed with the requested funds.

5. *Multiple-purpose power projects.*—The requested funds will provide for continued construction of 17 hydroelectric projects, and completion of 4 hydroelectric projects. In 1979, 15 power units with a generating capacity of 1,223 megawatts will be brought on line.

6. *Rehabilitation.*—Rehabilitation work is undertaken on existing projects that have deteriorated to the extent that their usefulness has been impaired. Work will be initiated on 5 projects and continued on 10 projects. One project will be completed with the requested funds.

7. *Recreation facilities at completed projects.*—\$10 million is requested for projects to be developed under a policy requiring local cost-sharing comparable to that now required for the recreation facilities of all new projects. \$8 million is requested to remedy sanitary deficiencies at completed projects.

8. *Streambank erosion control evaluation and demonstration.*—Funds are requested in accordance with section 32 of Public Law 93-51 to conduct a national streambank erosion prevention and control demonstration program.

9. *Shoreline erosion control demonstration.*—Funds are requested in accordance with section 54 of Public Law 93-51 to conduct a national shoreline erosion control demonstration program.

10. *Fish and Wildlife studies.*—Funds were provided in prior years for detailed studies and reports by the U.S. Fish and Wildlife Service to determine the effects on fish and wildlife resources of projects. Starting in 1978, these activities are being funded under individual project requests.

11. *Aquatic plant control.*—This program is for the control and progressive eradication of water hyacinths, alligator weed, Eurasian watermilfoil, and other obnoxious aquatic plant growths from navigable waters. The authority includes research to develop the most effective and economic control measures. Two large-scale operations management tests for control of hydrilla and water hyacinths are well underway as technology transfer projects. Significant advances are being made in the development of specific herbicides for the control of problem aquatic plants.

12. *Employees compensation.*—Funds are requested in accordance with 5 U.S.C. 785, to reimburse the Employees' compensation fund, on account of injuries or death of employees or persons.

1. *Navigation projects.*—Operation and maintenance will be carried out on 268 channel and harbor projects and on 34 lock and dam projects. Funds are requested to continue the operation of 218 locks and the dredging of an estimated 270 million cubic yards of material.

2. *Flood control projects.*—245 flood control reservoirs and 21 local protection projects will be operated and maintained. In 1979, over 400 million recreation days of use are estimated at completed flood control projects. The requested funds will provide \$5 million for research to develop improved design and operational procedures to meet environmental and water quality objectives while maintaining authorized project purposes.

3. *Multiple-purpose power projects.*—By the end of 1979, it is estimated that 71 multiple-purpose projects will be operated and maintained with a scheduled capacity of

approximately 19 million kilowatts. These projects will provide approximately 4% of the electrical energy produced nationally in 1979.

4. *Protection of navigation.*—Under laws for the protection and preservation of navigable waters, regulations are established and permits granted for activities and structures affecting navigable waters. Approximately 18,000 permit applications will be processed for completion.

FLOOD CONTROL AND COASTAL EMERGENCIES—Continued

This activity provides for flood emergency preparation, flood fighting and rescue operations, and repair of flood control and Federal hurricane or shore protection works. It also provides for emergency supplies of clean drinking water where the source has been contaminated and, in drought distressed areas, provision of adequate supplies of water for human and livestock consumption. The request is for the replenishment of this account.

1. *Executive direction and management.*—The Office, Chief of Engineers, and 11 division offices supervise work in 36 district offices.

2. *Board of Engineers for Rivers and Harbors.*—The Board reviews reports on proposed projects and makes advisory recommendations to the Chief of Engineers.

3. *Coastal Engineering Research Center.*—The center plans and conducts research in the field of coastal engineering, develops standards, and reviews technical reports.

4. *Commercial statistics.*—Data on waterborne commerce are collected, compiled, and published.

5. *Special investigations.*—Investigations are made and reports prepared pursuant to congressional and other special requests for information on the civil works program.

FLOOD CONTROL, MISSISSIPPI RIVER AND TRIBUTARIES

For expenses necessary for prosecuting work of flood control, and rescue work, repair, restoration, or maintenance of flood control projects threatened or destroyed by flood, as authorized by law (33 U.S.C. 702a, 702g-1), ~~["\$253,081,000"]~~ \$204,000,000, to remain available until expended: *Provided*, That not less than \$250,000 shall be available for bank stabilization measures as determined by the Chief of Engineers to be advisable for the control of bank erosion of streams in the Yazoo Basin, including the foothill area, and where necessary such measures shall complement similar works planned and constructed by the Soil Conservation Service and be limited to the areas of responsibility mutually agreeable to the District engineer and the State Conservationist: *Provided further*, That not to exceed \$1,000,000 of this appropriation is available to carry out the purposes of the Endangered Species Act of 1973 (Public Law 93-205), as amended, including cooperative efforts as contemplated by that Act to relocate endangered or threatened species to other suitable habitats as may be necessary to expedite project construction. (Public Works for Water and Power Development and Energy Research Appropriation Act, 1978; additional authorizing legislation to be proposed for \$132,000,000.)

FLOOD CONTROL, MISSISSIPPI RIVER AND TRIBUTARIES—Continued

The Corps of Engineers—Civil is responsible for the flood control program for the Lower Mississippi Valley from Cape Girardeau, Mo., to the Gulf of Mexico and its contiguous basins.

1. *General investigations.*—Eleven studies will be continued with 1979 funds, of which one will be completed. Basic data subsequently used in planning and designing projects are collected. Funds are requested to continue three phase I advance engineering and design studies.

2. *Advance engineering and design.*—Funds are requested to continue planning of one local protection feature.

3. *Construction.*—The budget authority requested for construction is \$141 million, which is \$33 million less than 1978. However, outlays will only be about \$13 million less because of carryover balances. Completion of 8 features will be delayed about 18 months by the budget request and constrained outyear planning ceilings.

4. *Major rehabilitation.*—Funds are requested for rehabilitation of the Old River control structure.

5. *Maintenance.*—Funds are requested for the operation and maintenance of four navigation locks, five flood control dams and numerous flood control structures and for maintenance of bank stabilization, revetments, and levees. Over 34 million cubic yards of material will be dredged in navigable channels.

¹ Balances of selected resources are identified in the statement of financial condition.

The fund provides for the acquisition, operations, and maintenance of plant and equipment used in civil works functions, for temporary financing of services chargeable

to civil appropriations and for furnishing facilities and services for military functions of the Department of the Army, other governmental and private persons (33 U.S.C. 576).

Budget program—Operating costs.—Operating costs will increase about 10% in 1979.

5. *Land and structures.*—The 1979 program includes \$10.9 million for the design, rehabilitation, and construction of structures for use by Cold Regions Laboratory, Waterways Experiment Station, Rock Island, Jacksonville and St. Paul districts.

6. *Dredges.*—The 1979 program includes \$40.9 million for the design, construction and rehabilitation of the Corps of Engineers hopper dredges as follows: \$37.6 million for the construction of the lower Mississippi River and west coast shallow draft; \$2.6 million for rehabilitation of the quarters on the dredges *Biddle* and *Langfitt*; \$0.5 million for direct pumpout for the dredge *Hyde*; \$0.15 million for conversion of the electrical system from DC to AC on the dredge *Gerig*.

7. *Other floating plant.*—The 1979 program includes \$14.52 million for the design, rehabilitation, and construction of major items of floating plant for use by various Corps districts.

8. *Land-based equipment.*—The 1979 program includes \$3.37 million to purchase ADP equipment.

9. *Tools, office furniture, and equipment.*—The 1979 program includes \$1.5 million for a variety of relatively small tools, office furniture, and equipment.

Financial condition.—Capital (Government equity) of the fund amounted to \$281.0 million on September 30, 1977, and is limited to \$351.6 million by the Public Works for Water and Power Development and Energy Research Appropriation Act, 1978. Removal of the capital limit is proposed for 1979. Capital was increased by net earnings of \$19.3 million in 1977. Increases in 1977, 1978, and 1979 are principally due to earnings reserved for plant replacement which are wholly invested in assets. Capital of the fund is expected to reach \$335.8 million at the end of 1978 and \$392.1 million at the end of 1979.

Consolidated summary of personnel.—The revolving fund is used to initially finance all payrolls of the Corps of Engineers—Civil.

The table which follows shows the distribution of personnel and salary costs to appropriations of the Corps of Engineers and to other accounts:

OPERATION AND MAINTENANCE

For maintenance and operation of the United States Soldiers' and Airmen's Home, to be paid from the [Soldier's] Soldiers' and Airmen's Home permanent fund, [\$16,356,000] \$16,939,000: Provided, That this appropriation shall not be available for the payment of hospitalization of members of the Home in United States Army hospitals at rates in excess of those prescribed by the Secretary of the Army upon recommendation of the Board of Commissioners of the Home and the Surgeon General of the Army. (24 U.S.C. 41-60; 31 U.S.C. 711(12), 7258(a).)

Note.—The appropriation for this account for 1978 had not been enacted at the time this budget was prepared. The 1978 amounts shown below are based upon a continuing resolution in effect through September 30, 1978, that provides for this account at a rate consistent with the amounts that would be provided by the conference version of the Departments of Labor, and Health, Education, and Welfare Appropriation Act, 1978.
