1. *Safety inspection and administration.*—The Federal Railroad Safety Act of 1970 provides that the Secretary of Transportation shall prescribe as necessary appropriate rules, regulations, orders, and standards for all areas of railroad safety. The principal objective under this program is to reduce accidents through effective investigation and enforcement of Federal railroad safety laws and regulations. The growth in this program in 1979 provides for 25 additional positions, increase in data processing activities, and continuation of the planning and evaluation activity for reviewing the effectiveness of those programs.

2. *Automated track inspection program.*—In 1979, funds are provided to procure a large track survey vehicle, for a total fleet of four large track survey vehicles and two highway-rail vehicles. Data from all surveys will provide railroads and track inspectors with information for monitoring track geometry and rail flaw defects.

3. *Grants-in-aid for railroad safety.*—Under the grants-in-aid program, States are assisted in paying salaries and expenses incurred for State safety inspectors authorized under section 206 of the Railroad Safety Act of 1970. In 1979, a threefold increase of State inspectors (to 100) is anticipated to aid the Federal Railroad Administration in enforcement of Federal safety standards.

The State rail assistance program, authorized by section 5 of the Department of Transportation Act as amended, is designed to provide financing assistance to States for rail planning and for: (1) rail service continuation payments; (2) the cost of purchasing a line of railroad or other rail properties for future rail service; (3) rehabilitating rail properties, and (4) providing substitute or alternate mode service in a manner less expensive than continuing rail service. The large carryover of funds in this area is due to unanticipated delays in the development of State rail plans during 1977.

Section 906 of the Railroad Revitalization and Regulatory Reform Act of 1976, as amended, authorizes the establishment of a Minority Business Resource Center to assist minority business firms, entrepreneurs, and venture groups in securing contracts and subcontracts arising out of the restructuring and revitalization of the Nation's railroads. The 1979 request includes administrative costs related to support positions.

The other administration program provides for the necessary salaries and related expenses of the Federal

Railroad Administration in support of Federal assistance programs, including, the Railroad rehabilitation and improvement financing accounts, grants to the National Railroad Passenger Corp. and the State grant portion of the Railroad safety appropriation; and for allocation positions to the Federal Highway Administration for audit services.

The Railroad Revitalization and Regulatory Reform Act of 1976, as amended, provides for the upgrading of rail passenger service between Boston, Mass., and Washington, D.C. Improvements to this Northeast corridor include improvements to the right-of-way, associated facilities, and installation of the necessary equipment for improved operations. This program will be conducted in four geographic segments:

Boston-New Haven.—This segment has the lowest level of ridership in the corridor. Work planned through 1979 will concentrate on restoring the deteriorated right-of-way. Heavy track work will continue and construction will be started on new roadbeds, bridges, and crossing separations.

New Haven-New York.—This is the third most heavily traveled segment. Detailed design will be completed for all activities, construction will be started for bridge repair and replacement, and safety-related fencing. Commuter agencies of New York and Connecticut are making major contributions to the rail improvements in this segment.

New York-Philadelphia.—This is the most heavily traveled segment with more than half of all the riders in the corridor. Detailed design will be nearly completed for all improvements contemplated. Heavy work will continue on tracks and maintenance facilities. Since commuter traffic is also heaviest in this segment, emphasis will be placed on integrating intercity improvements with the commuter service.

Philadelphia-Washington.—This segment is the second most heavily traveled portion of the corridor. When coupled with the New York-Philadelphia segment, it provides rail transport to the vast majority of rail passengers in the Northeast. The detailed designs for all contemplated improvements will be nearly complete. Work will start on route realignments, building and repair of bridges, and installing safety-related fencing, while heavy work on tracks and tunnels will continue.

Other.—Includes system engineering which provides for system modeling, standards, design and requirements criteria; and program management and administration which provides overall program planning, scheduling, monitoring, supervision, inspection, and evaluation.

FRA established the Northeast corridor project for the overall program planning of this program. Actual improvement work will be accomplished through commercial contractors, primarily the National Railroad Passenger Corporation. Salaries and related expenses of Federal employees are funded under this activity.

The Rail Transportation, Improvement and Employment Act of 1976 intended to use financial assistance for programs aimed at reducing unemployment and at repairing, rehabilitating, or improving roadbeds and facilities. These funds expired on December 31, 1976 since authorizing legislation was never passed.

GRANTS TO THE NATIONAL RAILROAD PASSENGER CORPORATION*

The Rail Passenger Service Act of 1970, as amended, created the National Railroad Passenger Corporation (Amtrak), as a private, for-profit corporation. The Department of Transportation, in cooperation with Amtrak, is conducting a review of Amtrak's route system and will submit a report to the Congress by March 1, 1978. The results of this study are expected to influence the final subsidy level in 1979.

1. *Operating grants.*—The estimate of \$510 million continues the standard, which was established in 1978, for Federal assistance to the Corporation. Except for increases in taxes and interest, the proposed operating subsidy in 1979 is being held to the same level as in 1978.

2. *Capital grants.*—Amtrak had programed the full \$900 million in guaranteed loan funds by the end of 1977. By 1976, however, it had already become very doubtful that these loans could be repaid from Amtrak's operating revenues, and capital funding was shifted to a grant basis in that year. It is proposed to continue to fund capital improvements in 1979 with capital grants.

3. *Debt retirement.*—The 1979 program also proposes continuation of the systematic retirement of Amtrak's section 602 loans now held entirely by the Federal Financing Bank. The \$25 million proposed in 1979 would further reduce the available guaranteed loan funding to \$850 million.

4. *Purchase of Northeast corridor.*—Under the purchase agreement of March 23, 1976, between Amtrak and Con-Rail the installments for the Northeast corridor purchase should aggregate approximately \$24 million in 1979.

The Emergency Rail Facilities Restoration Act authorized the Secretary of Transportation to make loans for the purpose of restoring or replacing railroad facilities, equipment, or services damaged or destroyed as a result of the natural disasters which occurred during the month of June 1972.

The act provided that no loan application could be approved later than 8 months from the date of its enactment, which was October 27, 1972. Therefore, the program was terminated in 1974. In 1978, the unexpended balance will be returned to the general fund of the Treasury.

The Alaska Railroad is operated by the Federal Government under the act of March 12, 1914 (38 Stat. 305), as a public enterprise activity of the Federal Railroad Administration.

Budget program.—The major activity of the rail line operation program is transportation service; the principal supporting activities are maintenance of way and structures and maintenance of equipment. Lease of real properties, riverboats, and related facilities round out the other operating programs.

Financing.—To the extent possible, programs are financed by revenues earned from freight and passenger services and other services incidental thereto. It is estimated that freight tonnages will decrease in 1978 and in 1979. This decline is due in part to reduced petroleum product freight haulage, as the result of a new oil products refinery coming onstream in Fairbanks. Also, there is a projected plateau in general business levels in Alaska until such time as other energy resources are developed; that is, natural gas and coal. Appropriated funds will be used to maintain equipment and facilities at a level needed for safe and efficient operations.

RAILROAD REHABILITATION AND IMPROVEMENT FINANCING
FUNDS—Continued

Section 509 of the Railroad Revitalization and Regulatory Reform Act of 1976, as amended, authorizes the Secretary of Treasury to purchase fund anticipation notes from the Secretary of Transportation. The Secretary of Transportation will use these funds to purchase redeemable preference shares from railroads to provide for capital needs critical to preserving essential rail freight services. Funds will be provided to railroads with the highest priority on projects effecting mergers and consolidations. Under the provisions of the act, repayments on the shares will not commence earlier than 6 years after purchase by the United States. Section 511 of Public Law 94-210, as amended, also authorizes obligation guarantee authority, for meeting the long-term needs of the railroads. Railroads utilize this funding mechanism to finance major new facilities and rehabilitation or consolidation of current facilities. The appropriation language provides for standby authority to issue notes in the event of default, up to the cumulative level of loans anticipated to be guaranteed through 1979.

Interest will be paid to the Treasury on fund anticipation notes issued under section 507(b) on the cash drawn down against the notes issued. No net Federal outlays are involved.

This fund was established to finance all capital and operating assistance grants, contracts, and loan activities authorized by the Urban Mass Transportation Act of 1964, as amended. The capital and operating assistance grants and technical studies activities are financed by the authority to obligate in advance of appropriations. Other activities and administrative expenses are funded through appropriations, with such appropriations being accounted for within the available contract authority.

The administration is proposing a major highway and transit authorization bill in 1978 which will substantially modify the programs described below. That bill's program and budgetary effect on transit is presented on page 716 of this Appendix.

Capital investment outlay.—Capital facilities grants.—Pursuant to section 3 of the act, grants are made to State and local public agencies to assist in financing acquisition, construction, reconstruction, and improvement of facilities of mass transportation service in urban areas. In 1979, the activity level will be \$1.4 billion in capital grants.

The \$1.4 billion level in 1979 is estimated to fund 260 new projects. This compares with an activity level of \$1.4 billion in 1978 for an estimated 245 projects and \$1.3 billion in 1977 for 228 projects.

Formula grants.—Pursuant to section 5 of the act (amended by section 103 of the National Mass Transportation Assistance Act of 1974), grants can be made to urbanized areas or parts thereof on the basis of a formula for the acquisition, construction, and improvement of facilities and equipment, and the payment of operating expenses.

In 1979, the activity level will be \$0.9 billion. This is estimated to fund 385 projects, and compares with an activity level of \$0.8 billion in 1978 with an estimated 350 projects, and \$0.6 billion in 1977 with 453 projects.

Technical studies grants.—Pursuant to section 9 of the act, State and local public agencies are assisted in carrying out studies relating to management operations, capital requirements, economic feasibility, and conducting similar activities in preparation for the construction, acquisition, or improved operating of mass transportation systems, facilities, and equipment. Regional transportation plans are also developed with these grants.

In 1979, the activity level will be \$55.0 million with an estimated 325 grant recipients. The activity level compares with \$55.0 million in 1978 and an estimated 300 projects, and \$43.2 million in 1977 for 286 projects.

Research, development, and demonstration grants and contracts.—This activity—conducted under section 6 of the act—involves projects designed for the development, testing, and demonstration of new facilities equipment techniques (operations and managerial), and methods

which assist in reducing urban transportation needs, in improving mass transportation services, and/or in meeting total urban transportation needs at an effective cost level.

In 1979, the activity level will be \$68.0 million with an estimated 240 projects. This compares with \$67.5 million in 1978 with an estimated 225 projects, and \$58.9 million in 1977 with 223 projects.

Managerial training.—Grants under this activity—authorized in section 10 of the act—are made to public bodies to provide university fellowships for up to 1 year of advanced training. Fellowship awards are made for the training of personnel employed in managerial, technical, and professional positions in the urban mass transportation field.

In 1979, the activity level will be \$0.5 million with an estimated 100 fellowships. This compares with \$0.5 million in 1978 and \$0.5 million in 1977, with 100 fellowships in 1978 and 83 in 1977.

University research and training.—Grants under this activity—authorized in section 11 of the act—are awarded to public and private nonprofit institutions of higher learning. The grants are to assist in establishing or continuing programs which combine professional training in urban transportation and related fields.

In 1979, the activity level will be \$2.0 million with an estimated 35 projects, which compares with \$2.0 million in 1978 with 35 projects and \$2.0 million in 1977 with 34 projects.

Administrative expenses.—This activity provides for carrying out administrative functions, including executive direction, budgeting, accounting, management information, procurement, property management, and personnel management. The administrative expenses activity will be conducted at a \$21.4 million level in 1979. This compares to \$20.0 million in 1978, and \$14.6 million in 1977.

Capital facilities loans.—Under this activity, two types of loans are available. Capital improvement loans finance the acquisition, construction, reconstruction, and improvement of facilities and equipment. Loans are also provided for the advance acquisition of real property for planned mass transportation systems. This activity has such a low volume of approvals, no estimate is made for new loan commitments.

Interstate transfers.—Grants under this activity are authorized by the 1973 Highway Act. States and localities may cancel plans for unneeded interstate highway segments and transfer authorized funds to transit or highway projects. In 1979, an estimated \$400 million in transit projects and \$100 million in highway projects will be assisted under the provision of 23 U.S.C. 103(e)(4), compared to an estimated \$689 and \$100 million in 1978 for transit and highway projects, respectively. No funds have been requested for Washington, D.C., pending completion of the analysis of alternatives.

Urban systems.—23 U.S.C. 142(e) authorizes use of urban systems authorities in assisting transit projects as substitutions have been made for highway efforts. Use is based on local decisions. The estimate for 1979 is \$39.0 and 1978 is \$25.0 million. Administrative commitments for this activity are accounted for within the FHWA budget.

Commuter rail operating subsidies.—Pursuant to section 17 of the act (authorized by the Railroad Revitalization and Regulatory Reform Act of 1976), emergency operating assistance grants are made to absorb a portion of such additional costs of providing rail passenger service resulting from the conveyance of rail properties and service

obligations to the Consolidated Rail Corporation (Con-Rail) and other eligible recipients.

For 1979, the administration's new highway and transit bill proposes an enlarged program of formula-based assistance for all facets of public transit in urban areas. This will make this separate program for commuter rail operating subsidies unnecessary.

There follows a series of schedules reflecting usage of authorities made available to the Urban Mass Transportation Administration (in millions of dollars).

The continuing overall goal of the Saint Lawrence Seaway Development Corporation is to keep the St. Lawrence Seaway system a safe, reliable, and efficient transportation artery. The Corporation is continuing to interface with a multitude of diverse interests that share the common goal of expanding commerce on the Great Lakes/St. Lawrence Seaway system. In 1979, the Corporation will continue to operate and maintain the U.S. part of the seaway and pursue programs to increase the efficiency of the system by continuing efforts to: (1) extend the navigation season, (2) work closely with current and potential seaway shippers, Great Lakes ports and other organizations, (3) encourage increased use of the seaway system, and (4) maintain and improve our lock facilities and lock approach channels. As in the past years, we will also carry on with our winter lock maintenance program. The Saint Lawrence Seaway Development Corporation's 1979 budget reflects these objectives:

1. *Administrative expenses* (limitation).—This program provides for management and administration of the Corporation, and includes finance, legal, civil rights, procurement, personnel administration, and other related support services.

2. *Operations*.—This program provides for operation of all facilities and for planning and development activities. Operations are conducted on a 24-hour day, 7-day week

basis throughout the navigation season with maintenance functions being performed throughout the year. Some major maintenance items are necessarily deferred to the non-navigation season when both operations and maintenance forces are utilized for their accomplishment.

Replacements and improvements.—This program provides for capital investments such as purchase and installation of visibility measurement equipment, navigation aid replacement and construction, ice control improvements, season extension projects and building, plant, and equipment replacements.

The Corporation and the Saint Lawrence Seaway Authority of Canada have reached agreement on a revised joint seaway tariff of tolls. The agreement which remains to be formalized provides for increases to be phased in over 3 years beginning with the 1978 navigation season. Under the new tariff agreement, the Corporation's share of revenue generated on the Montreal/Lake Ontario section will be 29% rather than 27% as has been the case since 1967. The Corporation projects its revenues will be about \$9.5 million in 1979, which it proposes to apply as follows:

1. \$6.3 million to pay operating expenses consisting of \$1.3 million for administrative expenses (subject to limitation) and \$5.0 million for operations.

2. \$1.7 million estimated for the funded depreciation account from which replacement and improvement costs will be paid.

3. \$1.5 million for redemption of Corporation revenue bonds issued to the U.S. Treasury.

This appropriation finances all costs of the Research and Special Programs Directorate, established September 23, 1977. This organization includes the activities of the former Materials Transportation Bureau and selected line functions formerly in the Office of the Secretary. Its mission is to insure the safe transportation of dangerous or hazardous cargoes in commerce and to carry out special programs and research and development activities which are more effectively and appropriately conducted in an organization separate from the Office of the Secretary and the existing operating administrations. Responsibilities of the Directorate are carried out under the following activities:

Operations.—This activity provides for the expenses for central supervisory and management functions necessary for overall planning and direction of the Directorate; administration of transportation programs involving passenger and cargo security, facilitation services, systems engineering, national emergency plans, management of the Transportation Safety Institute; and, for the conduct of hazardous materials and pipeline safety regulatory programs.

Research and development.—This activity provides for research and development to complement research programs of the operating administrations, to stimulate

industry efforts to advance transportation technology, to develop multimodal and intermodal systems and technology, to encourage university research and to support the hazardous materials and pipeline safety regulatory programs.

Grants.—This activity provides for grants-in-aid to State agencies of up to 50% of the actual costs for conducting a gas pipeline safety program as authorized by the Natural Gas Pipeline Safety Act of 1968.

The fund was established to facilitate the operations of the Transportation Systems Center (TSC) in Cambridge, Mass. The Center is funded from the Office of the Secretary and the operating administrations in the Department.

Legislation will be proposed to establish a working capital fund to finance this activity beginning in 1979. This intragovernmental revolving fund will then permit the programs of the Center to be presented in a manner similar to other such activities elsewhere in the Government. Funding levels are estimated to be in the amounts included in the 1979 column of the above schedule.

The Transportation Systems Center serves as the research, analysis, and development resource for the Office of the Secretary and the operating administrations. Its planned projects for 1979 are grouped into the following objectives:

Modernize regulation and legislation.—TSC activity concentrates on the analysis of Federal regulation of motor carriers and other modes to explore the financial and technical relationships which govern these operations. It also assesses the effect of transportation policies on social and economic conditions.

Increase efficiency and service.—This is the principal area of the Center's work and it involves air, marine, rail, and urban systems. TSC is involved in the analysis and development of new technology, operations analysis of systems, and systems development.

Improve safety and security.—TSC is a primary source of rail and motor vehicle safety research for the Department. Technological support in airport surface traffic control, wind shear, crash protection, and human factors is also provided.

Lessen unfavorable environmental impacts.—The Center's work in this area involves environmental pollution assessment, as well as aircraft, truck, and rail emissions modeling and measurement projects. Ship oil spill prevention technologies are also part of the program.

Minimize adverse impacts of energy constraints.—This effort emphasizes technology and impact assessments in the areas of automotive fuel economy, energy policy, and conservation technology alternatives. The Center is also developing automotive energy efficiency information and performing fuel economy monitoring in support of DOT's mission.

Increase knowledge base.—This effort concentrates on the analysis, generation, collation, standardization, and dissemination of transportation information. This involves developing statistics and computer systems for information retrieval. TSC serves as one of DOT's main focal points for the sharing of data with State and local governments and, as appropriate, with private industry.

Legislation is recommended to establish a comprehensive system of liability and compensation for damages caused by oil pollution in the navigable waters of the United States, their connecting or tributary waters, and in the high seas areas.

The legislation would establish strict liability for the owners and operators of sources of oil discharges and create a back-up compensation fund for damages, including cleanup, resulting from oil spills.

Legislation is recommended to eliminate second career training for air traffic controllers who are eligible for immediate retirement.

FEDERAL HIGHWAY ADMINISTRATION

The proposed 1979 highway and transit bill entails consolidation of many of the presently authorized, discrete highway program categories into fewer and broader categories. The following five schedules show the 1979 budget effects of that consolidation: the first four schedules delete program levels (obligations) for those programs which are being consolidated in 1979; and the last schedule more than offsets the deletions with increases for a larger, reconfigured Federal-aid highways program. Total added program level in 1979 as a consequence of the legislation is \$165 million.

As consequences of the legislative proposals, the general provision of Highway-Related Safety Grants (Sec. 303) would no longer be needed, and the general provision on Federal-Aid Highways (Sec. 316) would be revised to permit obligations in the amount proposed in the above schedules.

The activity structure of the "Federal-aid highways" account is revised to coincide with the pending authorizations. The new broadened activities will give far greater flexibility to the recipients of Federal-aid in developing solutions to their individual transportation problems.

Financial assistance will be provided to States for: Construction and improvements on the National System of Interstate and Defense Highways; construction and improvements to urban and rural highway systems; promulgation of a highway safety improvement program; rehabilitation or reconstruction of unsafe bridges; and, other highway programs of national significance. Includes aid for off-system highways, highway beautification, territorial highways, and highway-related safety grants.

1. *Interstate system.*—As of September 30, 1977, 38,674 miles of the 42,500-mile system were open to traffic. Funds will be provided to pursue completion, close critical gaps, and rehabilitate segments now reaching the end of their designed life. States and localities may also withdraw previously approved interstate segments and apply authorized funds to substitute transit or highway projects.

2. *Primary program.*—Provides financial assistance to States for highway construction on the primary system and related projects.

3. *Small urban and rural program.*—Provides financial assistance to the States for public transportation and highway transportation improvement efforts required in rural areas or urban areas of less than 50,000 in population. Funds are available for roads and streets not now on Federal-aid highway systems and for public transit projects, including operating assistance. Also provides assistance to three territories for highway improvements.

4. *Urban program.*—Provides Federal assistance for highway construction and improvements in urban areas with a population above 50,000. Funds are available for any road or street not on the interstate or primary system, and for any public transportation project currently eligible under the urban systems program.

5. *Highway safety program.*—Provides financial assistance to States for safety improvements on highways such as pavement marking; high-hazard/roadside obstacle removal; rail-highway crossings (on or off system); and safety related construction. In addition, provides funding for the highway safety standards effort (highway-related safety grants) through a "takedown" from the basic authorization.

6. *Bridge program.*—Provides greatly expanded Federal financial assistance for the replacement or rehabilitation of unsafe bridges.

7. *Other.*—Provides for assistance in the areas of Federal lands highways, highway beautification including control of outdoor advertising and junkyard screening, and emergency relief.

8. *Administration and research.*—Provides for executive and general administrative and research expenses of the Federal Highway Administration. These funds are expended under "Limitation on general operating expenses." Planning funds are provided to the States through a "takedown" from each program authorization category.

URBAN MASS TRANSPORTATION ADMINISTRATION

The following tables reflect the changes to the Federal mass transit assistance programs to be proposed in the administration's new highway/transit authorization bill to be submitted to the Congress. The first set of tables reflects the termination on September 30, 1978, of the existing transit programs described on page 706 of the Appendix. The second set of tables presents the new programs proposed to go into effect on October 1, 1978.

Proposed legislation provides for amendment to the Urban Mass Transportation Act of 1964, as amended (the act), which was established to finance capital and operating

assistance grants, contracts, and loans pertaining to mass transit activity.

In addition to the purposes stated in the Urban Mass Transportation Act of 1964, the purposes and goals of the proposed legislation are:

(1) To provide a longer-term and more predictable source of assistance to large metropolitan areas through formula grant programs; to finance the efficient and effective use of existing transportation services and facilities; and,

(2) To encourage the planning, development, and operation of areawide public transportation systems which meet Federal and local environmental, urban development and energy conservation objectives.

Urban discretionary grants.—Provides grants to State and local agencies for major mass transportation investments. Such investments may include construction of new fixed guideway systems; extensions to existing guideway systems; major bus fleet expansions; capital grants for emergency repairs to transit facilities resulting from natural disasters; deployment of new technology; joint development projects; and technical planning assistance. The usage of interstate transfer grants is also provided whereby States and localities may withdraw previously approved interstate segments, and apply the authorized funds to substitute transit or highway projects. Amounts shown include no new funding of interstate transfer grants for Washington, D.C. Such funding will be requested at a later date after completion of the reevaluation of transit construction plans in that city.

Urban formula grants.—Provides for grants to urbanized areas or parts thereof on the basis of a formula for the payment of operating expenses; the construction, acquisition, and improvement of facilities and equipment; for routine capital projects such as the replacement of buses and rail cars; the modernization of existing systems—both bus and rail; for urban highway projects; innovative transit demonstrations; joint development and technical planning assistance.

Rural formula grants.—These funds are displayed under the Federal Highway Administration activities. In 1979 a total of \$779 million is proposed to be allocated. These funds provide for highway and transit grants to small urban and rural areas (under 50,000 population) on the basis of a formula. Both the payment of operating expenses and capital expenses are eligible. At least 10% of the sums apportioned to each State must be used for public transportation purposes.

Research and training.—Provides for grants and contracts for the purposes of developing, testing, and demonstrating new facilities, equipment, techniques and methods (operations and managerial), and improving mass transportation services; grants to public bodies to provide for advanced training for personnel in the mass transportation field; and grants are awarded to public and private, non-profit institutions to assist in establishing or continuing programs which combine professional training and research in the field of mass transportation.

Administrative expenses.—Provides for the administrative costs of the Urban Mass Transportation Administration.

GENERAL PROVISIONS

SEC. 301. During the current fiscal year applicable appropriations to the Department of Transportation shall be available for maintenance and operation of aircraft; hire of passenger motor vehicles and aircraft; purchase of liability insurance for motor vehicles operating in foreign countries on official departmental business; and uniforms, or allowances therefor, as authorized by law (5 U.S.C. 5901-5902).

SEC. 302. None of the funds provided in this Act shall be available for the planning or execution of programs the commitments for which are in excess of ~~[\$540,000,000]~~ \$575,000,000 in fiscal year ~~[1978]~~ 1979 for "Grants-in-aid for airports" under 49 U.S.C. 1714 (a) and (b).

SEC. 303. None of the funds provided under this Act shall be available for the planning or execution of programs, the obligations for which are in excess of \$28,000,000 in fiscal year ~~[1978]~~ 1979 for "Highway-related safety grants".

SEC. 304. None of the funds provided under this Act shall be available for the planning or execution of programs the total obligations for which are in excess of \$172,000,000 in fiscal year ~~[1978]~~ 1979 for "State and Community Highway ~~[Safety]~~ Safety". *Provided that within such total obligations up to \$40,000,000 shall be reserved for use at the discretion of the Secretary for high priority highway safety projects.*

SEC. 305. None of the funds provided in this Act shall be available for administrative expenses in connection with commitments for the Urban Mass Transportation Act of 1964, as amended, aggregating more than ~~[\$2,365,000,000]~~ \$2,396,900,000 in fiscal year ~~[1978]~~ 1979.

SEC. 306. None of the funds provided under this Act shall be available for administrative expenses in connection with obligations against contract authority for interstate substitutions under 23 U.S.C. 103(e)(4) aggregating more than ~~[\$350,000,000]~~ \$300,000,000 in fiscal year ~~[1978]~~ 1979.

SEC. 307. None of the funds provided under this Act shall be available for the planning or execution of programs for any further construction of the Miami jetport or of any other air facility in the State of Florida lying south of the Okeechobee Waterway and in the drainage basins contributing water to the Everglades National Park until it has been shown by an appropriate study made jointly by the Department of the Interior and the Department of Transportation that such an airport will not have an adverse environmental effect on the ecology of the Everglades and until any site selected on the basis of such study is approved by the Department of the Interior and the Department of Transportation: *Provided, That nothing in this section shall affect the availability of such funds to carry out this study.*

SEC. 308. The Governor of the Canal Zone is authorized to employ services as authorized by 5 U.S.C. 3109, in an amount not exceeding \$150,000.

SEC. 309. Funds appropriated for operating expenses of the Canal Zone Government may be apportioned notwithstanding section 3679 of the Revised Statutes, as amended (31 U.S.C. 665), to the extent necessary to permit payment of such pay increases for officers or employees as may be authorized by administrative action pursuant to law which are not in excess of statutory increases granted for the same period in corresponding rates of compensation for other employees of the Government in comparable positions.

SEC. 310. Funds appropriated under this Act for expenditure by the Federal Aviation Administration shall be available (1) except as otherwise authorized by the Act of September 30, 1950 (20 U.S.C. 236-244), for expenses of primary and secondary schooling for dependents of Federal Aviation Administration personnel stationed outside the continental United States at costs for any given area not in excess of those of the Department of Defense for the same area, when it is determined by the Secretary that the schools, if any, available in the locality are unable to provide adequately for the education of such dependents and (2) for transportation of said dependents between schools serving the area which they attend and their places of residence when the Secretary, under such regulations as he may prescribe, determines that such schools are not accessible by public means of transportation on a regular basis.

SEC. 311. Appropriations contained in this Act for the Department of Transportation shall be available for services as authorized by 5 U.S.C. 3109, but at rates for individuals not to exceed the per diem rate equivalent to the rate for a GS-18.

[SEC. 312. None of the funds in this Act shall be available for the implementation or execution of a program in the Department of Transportation to collect fees, charges or prices for approvals, tests, authorizations, certificates, permits, registrations, and ratings which are in excess of the levels in effect on January 1, 1973, or which did not exist as of January 1, 1973, until such program is reviewed and approved by the appropriate committees of the Congress.]

SEC. **[313]** 312. None of the funds provided in this Act for liquidation of contractual obligations under the Urban Mass Transportation Act of 1964, as amended, shall be made available for liquidation of obligations entered into under section 5 of that Act to support mass transit facilities, equipment or operating expenses unless the applicant for such assistance has given satisfactory assurances in such manner and form as the Secretary may require, and in accordance with such terms and conditions as the Secretary may prescribe, that the rates charged elderly and handicapped per-

sons during nonpeak hours shall not exceed one-half of the rates generally applicable to other persons at peak hours: *Provided*, That the Secretary, in prescribing the terms and conditions for the provision of such assistance shall (1) permit applicants to continue the use of preferential fare systems for elderly or handicapped persons where those systems were in effect on or prior to November 26, 1974, (2) allow applicants a reasonable time to expand the coverage of operating preferential fare systems as appropriate, and (3) allow applicants to define the eligibility of "handicapped persons" for the purposes of preferential fares in conformity with other Federal laws and regulations governing eligibility for benefits for disabled persons.

SEC. [314] 313. No part of any appropriation contained in this Act shall remain available for obligation beyond the current fiscal year unless expressly so provided herein.

SEC. [315] 314. None of the funds provided under or included in this Act shall be available for the planning or execution of programs, the obligations for which are in excess of \$7,445,000,000 for "Federal-Aid Highways" in fiscal year [1978] 1979; *Provided*, That this limitation shall not apply to obligations for emergency relief authorized by 23 U.S.C. 125 [; *Provided further*, That this limitation shall not become effective if subsequent legislation containing an obligation limitation on "Federal-Aid Highways" for fiscal year 1978 is enacted into law by September 30, 1977].

SEC. 316. None of the funds provided in this act shall be available for the planning or execution of programs for any construction or improvements at Flushing Airport in New York City.]

SEC. [317] 315. Obligations for the Great River Road shall include preliminary engineering and the planning or execution of

projects for the acquisition of areas of archeological, scientific, or historical importance and of necessary easements for scenic purposes, the construction or reconstruction of roadside rest areas, bicycle trails, and scenic viewing areas, the reconstruction and rehabilitation of existing road segments, and the construction of new route segments. No such funds, however, shall be used for constructing new segments until 60 per centum of the Great River Road in each State is completed: *Provided*, That such completion may be waived if the Administrator determines that circumstances in such State prevent such completion.

SEC. 318. Such funds as may be necessary shall be utilized from the appropriations above made available to the Federal Aviation Administration and to the Civil Aeronautics Board for the preparation of a plan to coordinate as promptly as possible the use of Midway Airport with O'Hare Airport in Chicago, Illinois, for service by regularly scheduled airline carriers in order to relieve air traffic congestion and to promote air safety in that area.]

SEC. 319. Funds appropriated for grants to the National Railroad Passenger Corporation under Public Law 95-26 and for the fiscal year 1978 purchase payments for the Northeast Corridor shall be used for the payment of any principal and interest costs due or payable to the Consolidated Rail Corporation after March 11, 1977.]

SEC. 316. Appropriations under the heading "Facilities and Equipment (Airport and Airways Trust Fund)" in the Department of Transportation and Related Agencies Appropriation Acts, 1976, 1977 and 1978, shall be available through fiscal years, 1980, 1981 and 1982 respectively. (Department of Transportation and Related Agencies Appropriation Act, 1978.)

1. *Matching funds in primaries.*—Upon certification by the Federal Election Commission, every candidate entitled to receive payments is entitled to payments in an amount equal to the contributions each has on or after the beginning of the calendar year immediately preceding the election year. Candidates may receive approximately \$5 million each.

2. *Nominating conventions of parties.*—Upon certification by the Commission, payments may be made to the national committee of a major party or a minor party which elects to receive its entitlement. The total of such payments will be limited to the amount in the account at the time of payment. The national committee of each party may receive payments beginning on July 1 of the year immediately preceding the calendar year in which a presidential nominating convention of the political party is held. The two major parties will receive \$2 million dollars each, plus a cost-of-living increase.

3. *Candidates for general elections.*—The two eligible candidates of each major party in a Presidential election will be entitled to equal payments in an amount which, in the aggregate, shall not exceed \$20 million each, plus a cost-of-living increase.

Also, provision is made for new parties, minor parties and candidates, who may in future elections receive in excess of 5% of the popular vote and, therefore, be entitled to reimbursement of qualified campaign expenditures. To date, no such parties have met these requirements.

This account provides for Federal economic assistance to State and local governments to help prevent those governments from taking budget-related actions which are injurious to national economic recovery. The funds may be used for the maintenance of basic services but not for the acquisition of major capital equipment, or for construction.

The Public Works Employment Act of 1976 as amended by the Intergovernmental Antirecession Act of 1977, beginning July 1, 1977, provides a five-quarter ceiling of \$2.25 billion. For each quarter, there is made available for distribution \$125 million, plus \$30 million for each full one-tenth percentage point of seasonally adjusted national unemployment for the most recent calendar quarter ending 3 months prior to the beginning of such quarters exceeding 6%.

The States and local governments entitlements are based on the relative size of their revenue sharing payments and the extent to which their rates of unemployment in the appropriate quarter exceed 4.5%. A State or local government will not receive a payment for a given quarter if its assigned unemployment rate for the last month of the appropriate quarter does not exceed 4.5% or if its quarterly revenue sharing allocation is less than \$100. Puerto Rico, the Virgin Islands, Guam, and American Samoa are entitled to an additional amount of 1% of the amount allotted to the States and localities for each quarter. No payments are made for any quarters in which the average national unemployment rate did not exceed 6%.

Presently, 17,420 units of government are receiving antirecession payments: 45 States and U.S. territories,

This trust fund was established by the State and Local Fiscal Assistance Act of 1972 and renewed under Public Law 94-488, the State and Local Fiscal Assistance Amendments of 1976, to provide general revenue sharing payments to States and localities to supplement revenue sources. Payments to the States and localities are made at least quarterly. It is anticipated that the fourth quarter payment for each year will continue to be paid within the first 5 days of the succeeding year, as provided by law.

One-third of the funds appropriated is allocated to the States and two-thirds are allocated to local jurisdictions to carry out general purpose governmental functions. At present 36,583 units of general purpose government are eligible to receive revenue sharing funds: the 50 States and the District of Columbia, 3,082 counties, 17,803 municipalities, 15,390 towns and townships, and 257 Indian tribes and Alaskan native villages.

Distribution formulas seek to measure a government's size, its need, and its effort to meet its need. State and local jurisdictions are allowed, particularly under the renewal legislation, to use the funds for any purposes which constitute legal purposes for use of their own locally generated revenues.

The Federal Law Enforcement Training Center provides facilities, equipment, and support services for conducting recruit, advanced, specialized, and refresher training for law enforcement personnel of the 33 participating agencies. Center personnel also conduct the instructional programs for the basic recruit and some of the advanced training. This appropriation is for operating expenses of the Center for common and specialized law enforcement training and for research in law enforcement training methods and curriculum content. The 1979 estimate provides for the law enforcement training conducted by the Center, planning and curricula development for the Center and operation of living quarters and food service for the students.

¹ Includes capital investment as follows: 1977, \$1,830 thousand; 1978, \$13,666 thousand; 1979, \$6,818 thousand.

This appropriation provides for the costs of adapting the former Glynco Naval Air Station, near Brunswick, Ga., for the permanent location of the Federal Law Enforcement Training Center (FLETC). Because of the flexible nature of facilities, the campus-like training center will be able to accommodate in excess of 1,000 resident students. The total estimated cost to this appropriation for the facilities, equipment and services will be \$30 million. The Center conducts recruit, advanced, specialized, and refresher training for enforcement personnel of the Center's 33 participating Federal agencies.

An additional \$7 million was appropriated for the construction of a special training, semi-enclosed firing range and motorcade training area at Beltsville, Md., the original site for the FLETC. These facilities have been completed and are operated presently by the U.S. Secret Service for its specialized training programs and firearms requalification for other Federal agencies.

1. *Disbursement and claims.*—(a) *Payments.*—Payments are made through 11 regional offices for Federal civilian agencies, except the U.S. Postal Service, the U.S. marshals, and certain Government corporations. These disbursing services are provided through the issuance of checks, letters of credit, and electronic funds transfer (EFT) payments. Savings bonds are also issued for employees under the payroll savings plan.

The total checks, savings bonds, and electronic funds transfer payments and productivity relating to this function carried out by the Division of Disbursement follow:

(b) *Check claims settlement.*—This function provides for the adjudication and settlement of claims against the United States resulting from situations in which Government checks have been forged, lost, stolen, destroyed, or mutilated. It receives moneys from banks, endorsers, and other parties having liability to the United States through fraudulent or otherwise improper negotiation of Government checks.

Approximately 50% of the requests for stop payment on Government checks result in actual paid check claims acted upon by the Division of Check Claims.

2. *Government-wide accounting.*—This activity includes maintaining a system of central accounting and reporting; disclosing the monetary assets and liabilities of the U.S. Treasury; and providing for the integration of Treasury cash and funding operations with the financial operations of disbursing and collecting officers of all Federal agencies. Periodic reports are prepared under this function to show budget results, other financial operations, and the financial status of the Government.

In addition, this function includes the check payment and reconciliation operation with volume and related productivity as follows:

3. *Banking and cash management.*—(a) *Treasury tax and loan operations.*—This activity segment provides primarily for compensation to commercial banks through the Federal Reserve Banks for services rendered in maintaining the Treasury tax and loan accounts and provides support to the Federal Reserve Banks for their day-to-day operations concerning the accounts. Legislation has recently been enacted which will allow Treasury to earn a return on its tax and loan account balances. In essence, the banks will pay interest on the Treasury tax and loan funds deposited with them and will be reimbursed for their services.

(b) *Depository, cash, and currency operations.*—This activity segment provides banking and related cash services involved in the management of the Government's cash resources. It provides guidance to the system for advancing Federal funds under various grant programs and other programs through letters of credit; designates and supervises banks as Government depositories; controls U.S. foreign currency transactions to afford the best currency availability to the Government; and settles claims for the redemption of mutilated currency.

Savings generated through this activity for the Treasury as a whole are as follows:

Public Law 94-12, approved March 29, 1975, provided for a special payment to recipients of benefits under certain retirement and survivor benefit programs.

In accordance with the law, the Secretary of the Treasury made a one-time special payment of \$50 to each

General and special funds—Continued

SPECIAL PAYMENT TO RECIPIENTS OF CERTAIN RETIREMENT AND SURVIVORS BENEFITS—Continued

individual who, for March 1975, was entitled to monthly insurance benefits under title II of the Social Security Act, to monthly pension or annuity benefits under the Railroad Retirement Acts, or to supplemental security income benefits. An individual was entitled to only one special payment, even though he may have been entitled to benefits under two or more of the above-mentioned programs.

These payments were not social security benefits in any sense but were intended to provide to the aged, blind, and disabled a payment comparable in nature to the tax rebates which the law provided to those who were working.

NEW YORK CITY SEASONAL FINANCING FUND, ADMINISTRATIVE EXPENSES

For necessary expenses in carrying out the administration of the New York City Seasonal Financing Act of 1975, as authorized by law (31 U.S.C. 1507(c)), \$1,150,000. (89 Stat. 799; Department of Housing and Urban Development—Independent Agencies Appropriation Act, 1978.)

The Check forgery insurance fund was established in the amount of \$50 thousand by the act approved November 21, 1941 (31 U.S.C. 561). Additional appropriations of \$50 thousand in 1964, \$100 thousand in 1970, and \$1,800 thousand in 1973 increased the fund to a total of \$2 million. This fund is for use by the U.S. Treasury in

making settlement with the payees or special endorsees in case of checks drawn on the U.S. Treasury which have been paid on forged endorsements.

To reduce hardships sustained by payees of Government checks that have been stolen and forged, settlement is made in advance of the receipt of funds from the endorsers of the checks through reclamation procedure by this office. Benefits from these early settlements are shared by claimants and the Government in that the claimants are more quickly restored financially to their proper position and the Government is spared the necessity of much unproductive correspondence. If the U.S. Treasury is unable to recover funds, the revolving account sustains the loss.

Amendments to the Fishermen's Protective Act of 1967 (Public Law 92-569) created a Fishermen's protective fund to reimburse owners of vessels for the amounts of fines, fees, and other direct charges which were paid by the owners to a foreign country to secure the release of their vessels and crews.

Prior to the creation of the Fishermen's protective fund, the Secretary of State certified to the Secretary of the Treasury the amounts due vessel owners. These certified amounts due vessel owners were held by the Secretary of the Treasury until a request was received for their submission for a supplemental appropriation. As a result, vessel owners were not reimbursed for the amounts due them until the supplemental appropriation had been enacted. The Fishermen's protective fund greatly reduces the time required to make payment to the vessel owner. The Secretary of the Treasury can now make payment within 48 hours of receipt of the certification from the Secretary of State.

1. *National defense conditional gift fund.*—The Secretary of the Treasury accepts on behalf of the United States, conditional gifts of money or other intangible property to be used for a particular defense purpose. Intangibles other than money, are converted at the best terms available. The moneys held in trust are paid to those appropriation accounts which best effectuate the intent of the donors (68 Stat. 566).

2. *Esther Cattell Schmitt gift fund.*—Public Law 87-467 (76 Stat. 88) authorized the acceptance of the gift made to the United States by the will of Esther Cattell Schmitt. The income received from the gift to the United States is paid by the Secretary of the Treasury to beneficiaries named in provisions of the will.

¹ Includes capital investment as follows: 1977, \$10,445 thousand; 1978, \$8,470 thousand; 1979, \$9,592 thousand.

The U.S. Customs Service's fundamental authority is contained in the provisions of the Tariff Act of 1930, as amended. In addition, the Customs Service participates in the administration and enforcement of some 400 other provisions of laws and regulations of 40 other agencies which govern international traffic and trade. The Customs Service mission is multifaceted and requires that the Service:

Control, regulate, and facilitate the movement of carriers, persons, and commodities between the United States and other nations.

Assess, collect, and protect the revenue accruing to the United States from duties, taxes, and fees incident to international traffic and trade.

Protect the American consumer and the environment against the introduction of hazardous and noxious products into the United States, and protect American industry and the American worker against unfair competition from foreign manufacturers and producers.

Detect, interdict, and/or investigate smuggling and other illegal practices designed to gain illicit entry into the United States of prohibited articles, narcotics, drugs, and other contraband; fraudulent activities calculated to avoid the payment of duties, taxes, and fees, or to evade the legal requirements of international traffic and trade; and illegal international trafficking in arms, munitions, and currency.

1. *Inspection and control.*—In enforcing the provisions of the Tariff Act and related laws, the inspection and

control activity must: (a) accommodate the demands of expanding passenger and cargo workloads, while maintaining the appropriate enforcement level; (b) open new ports of entry or expand service at existing ports to meet the needs of the traveling and importing public, and growing international trade; (c) tailor the conduct of mission responsibilities to achieve maximum utilization of Customs resources with minimum disruption of international trade and travel patterns.

Resource requirements and jurisdictional responsibility of the border management agencies, of which the Service is an important part, are currently under study by the President's Reorganization Project.

The proposed funding increase will permit the Customs Service to reduce normal processing delays for individuals and cargo. Concurrently, the contraband interdiction rate can be increased. In addition, the proposed increase will permit the enforcement of sections 608 and 609 of the Trade Act of 1974, which require the collection and verification of export statistics.

Shipments as determined by invoices.....	7,917	7,960	8,390
Persons arriving from foreign countries....	263,363	293,000	305,000

2. *Appraisalment and entry processing.*—In enforcing the provisions of the Tariff Act and related laws, the appraisalment and entry processing activity must: (a) accommodate the demands of increasing international trade by improving Customs processing through more efficient methods, development of compliance measures and improved laboratory analysis; (b) complete the development of the automated merchandise processing system (AMPS) by 1981; (c) introduce an increased post audit program to augment current transaction-by-transaction processing methods.

The proposed funding increase will permit the Customs Service to lease a computer toward completion of the automated merchandise processing system. The additional funding will also permit increased audit coverage and far greater selectivity in processing import transactions. In addition, the proposed increase will permit the enforcement of sections 608 and 609 of the Trade Act of 1974, which require the collection and verification of export statistics.

3. *Tactical interdiction.*—The primary objective of this activity is to interdict or deter all forms of smuggling through the implementation of a mobile interdiction concept. The permeability of U.S. borders; the mobility of traffickers; and the prerogative of traffickers to choose time, place and mode of smuggling dictate that this activity maintain a high degree of mobility in order to meet the smuggling threat where and when it appears.

The proposed funding increase will permit the acquisition of three aircraft providing a significant increase in interception capabilities.

4. *Investigations.*—Functions as the external investigative arm of the Customs Service in conducting civil, criminal, and fact-finding investigations relating to violations of Customs and related laws.

5 *Technical and legal support.*—This activity consists of Customs Service efforts in enforcement support and regulations and rulings. The Office of Enforcement Support is responsible for the adaptation of technological advances and state-of-the-art equipment and systems to enforcement programs. The Office of Regulations and Rulings is responsible for providing rulings, interpretations and final administrative decisions to the Customs Service, the trading and traveling public and other Government agencies.

6 *Executive management and internal affairs.*—This activity, which includes the Office of the Commissioner of Customs, consists primarily of the efforts of the Office of Internal Affairs and Chief Counsel.

The Office of Internal Affairs is an independent fact-finding Customs entity reporting directly to the Commissioner of Customs. The office functions as an extension of the Office of the Commissioner of Customs responsible for administering servicewide programs to assure the highest possible standards of integrity and to assure that Customs programs are being carried out in a productive, cost-beneficial manner.

The Office of the Chief Counsel participates in every Customs program by providing formal and informal legal advice and support to all organizational levels in every geographic location.

The Bureau of Engraving and Printing designs, manufactures, and supplies most of the major evidences of a financial character issued by the United States. It is the sole source of Federal Reserve notes, various public debt instruments, as well as most of the minor evidences of a financial character issued by the United States, such as postage and internal revenue stamps. The Bureau executes certain printings for various territories administered by the United States, particularly postage and revenue stamps.

The anticipated work volume is based on estimates of requirements submitted by agencies served. The program comprises the following activities:

1. *Engraving and printing*—(a) *Currency*.—Total deliveries of currency for 1978 and 1979 are estimated to be 3.6 and 4.1 billion notes. During 1977 the Bureau delivered 3.0 billion Federal Reserve notes.

(b) *Stamps*.—This category of work is comprised mainly of postal and internal revenue stamps. The projected requirements for 1978 and 1979 reflect a slight decrease from the number of stamps delivered in 1977. In 1977 the Bureau delivered 27.3 billion stamps.

(c) *Food coupons*.—Production of this program is the joint responsibility of the Bureau and the private sector. The Bureau maintains the administrative functions and responsibilities to control the food coupon program. Production is expected to approximate 2.1 billion in 1977; 2.3 billion in 1978; and 2.8 billion in 1979.

(d) *Securities*.—This program encompasses the production of a wide variety of bonds, notes, and debentures for the Bureau of Public Debt and certain other agencies of the Government.

(e) *Commissions, certificates, et cetera*.—This program represents a small portion of the Bureau's total workload.

2. *Space utilized by other agencies*.—Charges are made to other agencies for services provided for space they occupy in the Bureau's buildings.

3. *Other direct charges for miscellaneous services*.—Charges for a wide variety of miscellaneous services performed by Bureau personnel are made to the agencies concerned on an actual cost basis.

Operating results and financial condition.—The loss of \$904 thousand from Bureau operations in 1977 will be recovered in the ensuing year in accordance with provisions of 31 U.S.C. 181.

Public Law 95-81 authorized an appropriation of \$5 million in 1978 for additional capital for the Bureau of Engraving and Printing fund. This will increase the total amount of the funds equity for 1979 to \$59.1 million, represented by appropriations of \$14.3 million, surcharges of \$26.8 million and donated assets of \$18.0 million.

2. *Processing deposits and issues of monetary metals and coins.*—This activity includes disbursements of coins: moving, shipping, storing, and verifying bullion

and coin, receipt of gold and silver bullion for exchange and settlement of international balances; and counting and classifying uncurrent coins returned to the Mints for recoinage. Total coins shipped in 1977 were 10.7 billion, estimated for 1978 and 1979 are 11.5 billion and 12.6 billion respectively.

3. *Protection of monetary metals and coins.*—Protection of the Government's holdings of gold and silver bullion and coin is maintained by armed guards and modern protective devices.

4. *Refining gold and silver bullion.*—Gold and silver bullion are refined in order to facilitate accountability, protection, and storage, and to bring the bullion up to a degree of purity suitable for use in the world markets.

5. *Executive direction.*—Executive direction will be allocated to the various other Mint activities in 1979.

ADMINISTERING THE PUBLIC DEBT—Continued

This appropriation provides funds for the conduct of all public debt operations and the promotion of the sale of U.S. savings-type securities.

1. *Processing and accounting for*—(a) *Savings and retirement securities*.—This activity is concerned with savings bonds and notes, and retirement-type securities. Functions performed include: (1) prescribing the specifications for, ordering, storing, and distributing security stock; (2) establishing records of registration and status; (3) maintaining accounting control over financial transactions, security transactions and accountability, and interest cost; (4) maintaining and servicing individual accounts of owners of Series H bonds and authorizing issuance of interest checks; (5) adjudicating claims on account of lost, stolen, or destroyed securities; (6) conducting transactions in outstanding securities; (7) microfilming, auditing, and recording all retired securities and maintaining permanent custody of the microfilm; and (8) destroying retired securities.

The 1979 appropriation request will provide funds to compensate savings bond issuing agents and to increase compensation for paying agents, as a partial offset to the collection by the Treasury of interest on tax and loan account balances.

¹ Includes capital investment as follows: 1977, \$466 thousand; 1978, \$101 thousand; 1979, \$238 thousand.

This appropriation provides for the overall planning and direction of the Internal Revenue Service, for management of the Service's support programs and for internal audit and internal security. This 1979 appropriation request provides for maintaining both the Service's support programs and those programs concerned with sound internal procedures and employee integrity.

1. *Executive direction.*—This activity sets policies and goals, provides the research and planning necessary for orderly and effective accomplishment of the Revenue Service's mission, provides leadership and direction in the execution of plans, and provides for the administrative support of all operations.

2. *Internal audit and security.*—This activity establishes and verifies maintenance of quality controls in the Revenue Service. It provides a continuing and independent review of all Revenue Service operations, thereby assuring the Commissioner and operational managers that appropriated funds are spent only for authorized purposes, that tax revenues are properly safeguarded, and that public confidence in the integrity of Revenue Service employees is maintained.

¹ Includes capital investment as follows: 1977, \$9,772 thousand; 1978, \$6,912 thousand; 1979, \$9,357 thousand.

This appropriation provides for processing tax returns and related documents, and maintaining accurate, current taxpayer accounts by means of an automated system. It also provides for taxpayer assistance and for collecting delinquent taxes and securing unfiled returns. Statistical reporting responsibilities of the Internal Revenue Service also come under this appropriation.

1. *Data processing operations.*—This activity provides for all actions associated with the mailing out of tax return forms and instructions, receipt of completed returns and payments, deposit of the payments, and verification through an automated master file system of the accuracy of information provided on the tax returns. It provides for payment of refunds, offset of refunds against delinquent accounts, issuance of notices that payments are overdue, identification of possible nonfilers for investigation, and assistance in the selection of tax returns for audit.

2. *Collection.*—This activity is responsible for collecting unpaid taxes and securing unfiled returns.

3. *Taxpayer service.*—This activity aids voluntary compliance with Federal tax laws on the part of all taxpayers by informing them of their responsibilities and by providing service which will assist them in meeting their obligations.

4. *Statistical reporting.*—This activity prepares statistical information on income and on various features of the tax system, performs other statistical research, and forecasts the number of tax returns to be filed by type, size, and geographical area.

The increases for 1979 are to keep pace with workload, to maintain the automated processing system, to provide essential taxpayer service, and to maintain the program for securing unfiled returns and unpaid taxes.

¹ Includes capital investment as follows: 1977, \$6.734 thousand; 1978, \$4,540 thousand; 1979, \$5,100 thousand.

This appropriation provides for detecting and correcting noncompliance with the tax laws. Additional funds requested for 1979 are necessary to maintain the Service's ability to assure evenhanded application and adequate enforcement of the tax laws, and thus maintain a satisfactory rate of voluntary compliance. This requires enhancement of the audit and tax fraud investigation programs, as well as additional staffing for taxpayer conferences and appeals, legal services, and exempt organizations.

1. *Audit of tax returns.*—This activity provides for a selective examination of tax returns to see if taxpayers have properly complied with the internal revenue laws. It corrects errors and explains corrections to the taxpayers. It also makes determinations as to whether certain organizations or funds are exempt from taxation.

2. *Tax fraud and special investigations.*—This activity provides for enforcement of the criminal statutes relating to violations of tax laws. It investigates cases of suspected intent to defraud, recommends prosecution as warranted, and assists in the preparation and trial of criminal tax cases.

3. *Taxpayer conferences and appeals.*—This activity provides for administrative consideration and settlement of taxpayer appeals of audit findings.

4. *Technical rulings and services.*—This activity develops tax return forms, instructions, and guides; issues rulings and opinions as to application of the tax laws, and meets with taxpayer groups to review and resolve special tax problems.

5. *Legal services.*—This activity comprises the legal counsel and legal assistance needed by the Service to administer and enforce the internal revenue laws.

6. *Employee plans.*—This activity monitors private pension plans to insure compliance with the Employment Retirement Income Security Act of 1974.

7. *Exempt organizations.*—This activity determines whether organizations seeking tax-exempt status meet certain tests to qualify, and examines tax returns of those organizations to insure compliance with such an exemption. It also examines the returns of private foundations to insure payment of proper excise taxes.

This revolving fund was established pursuant to section 112(a) of the Federal Tax Lien Act of 1966, solely to serve as the source of financing the redemption of real property by the United States. In collecting delinquent taxes, situations arise where it is to the Government's advantage to buy property on which it has a lien when the property is sold at a foreclosure sale brought by the holder of a lien which is superior to the Government's. The advantage arises when the property is worth substantially more than the first lienholder's equity but is being sold for an amount that barely covers that equity, thereby leaving no proceeds to apply against delinquent taxes. Under these circumstances, if the Government buys the property and subsequently puts it up for sale under more advantageous conditions, it is possible to realize sufficient profit on the transaction to fully or partially collect the amount of taxes due. The revolving fund is reimbursed from the proceeds of the sale in an amount equal to the amount expended from the fund for the redemption. The balance of the proceeds are applied against the amount of the tax, interest, penalties, and additions thereto, and for the costs of sale. The remainder, if any, would revert to the parties legally entitled to it.

The income of the Comptroller of the Currency is derived principally from assessments paid by national banks and interest on investments in U.S. Government obligations. In accordance with 12 U.S.C. 481 assessments paid by national banks are not construed to be Government funds. No funds derived from taxes or Federal appropriations are allocated to or used by the bureau in any of its operations.

The Administrator of National Banks charters new banking institutions only after investigation and due consideration. Supervision of existing national banks is aided by the required submission of periodic reports and detailed, onsite examinations, the latter conducted by a staff of approximately 2,200 national bank examiners. At the present time there are approximately 4,700 national banks with 17,000 operating branches and total assets of \$730 billion. As a result of the reports submitted and the examinations conducted, the bureau determines the financial condition of individual national banks and the system as a whole, the soundness of operations and compliance with applicable laws and regulations.

In addition, the Comptroller considers applications for mergers in which the resulting bank will be a national bank, and applications from banks to establish branches. The Comptroller of the Currency promulgates rules and regulations for the guidance of national banks, bank directors, et cetera, and publishes them as manuals so that they are readily available to the interested parties.

Legislation is proposed to delete the requirement for appropriations to the Secretary of the Treasury for the purchase of fund anticipation notes to capitalize the Railroad improvement and rehabilitation fund, thereby eliminating the need for Treasury to handle these debt transactions as budgetary transactions. The current requirement results in double counting of budget authority on the part of Treasury and Transportation. This change in legislation in no way hinders the Department of Transportation from exercising its agency debt authority, but merely allows its treatment in the same manner as all other debt transactions.

In order to improve the efficiency of the municipal bond market, it is proposed that State and local governments be given the option to issue taxable securities in return for a Federal subsidy equal to 35-40% of the net interest cost. To prevent overloading the municipal market with bonds which essentially depend on private or Federal credit, it is recommended that industrial development bonds and federally guaranteed financing which also adversely affect the Treasury securities market, be limited to the taxable market. Industrial development bonds required to be issued in the taxable market might be provided a Federal interest subsidy for a portion of the net interest costs.

As part of the overall proposed National energy plan, this appropriation would provide for rebates on fuel efficient automobiles and for payments of the per capita rebate from the Crude Oil Equalization Tax to those individuals who do not pay income taxes. The level of the appropriation requested would be based upon the tax receipts received by the Government from manufacturers of fuel inefficient automobiles and producers of crude oil.

GENERAL PROVISIONS—TREASURY DEPARTMENT

SEC. 101. Appropriations in this Act to the Treasury Department shall be available for uniforms or allowances therefor, as authorized by law (5 U.S.C. 5901-2) including maintenance, repairs, and cleaning; purchase of insurance for official motor vehicles operated in foreign countries; entering into contracts with the Department of State for the furnishing of health and medical services to employees and their dependents serving in foreign countries; and services as authorized by 5 U.S.C. 3109.

SEC. 102. Motor vehicles for police-type use by the Treasury Department may be purchased without regard to the general purchase price limitation for the current fiscal year. (*Treasury Department Appropriations Act, 1978.*)

TITLE V—GENERAL PROVISIONS

THIS ACT

mitted for the appropriations: *Provided*, That this section shall not apply to travel performed by uncompensated officials of local boards and appeal boards of the Selective Service System; to travel performed directly in connection with care and treatment of medical beneficiaries of the Veterans Administration; or to payments to interagency motor pools where separately set forth in the budget schedules.

SEC. 502. No part of any appropriation contained in this Act shall be available to pay the salary of any person filling a position, other than a temporary position, formerly held by an employee who has left to enter the Armed Forces of the United States and has satisfactorily completed his period of active military or naval service and has within ninety days after his release from such service or from hospitalization continuing after discharge for a period of not more than one year made application for restoration to his former position and has been certified by the Civil Service Commission as still qualified to perform the duties of his former position and has not been restored thereto.

[SEC. 503. No part of any appropriation made available in this Act shall be used for the purchase or sale of real estate or for the purpose of establishing new offices inside or outside the District of Columbia: *Provided*, That this limitation shall not apply to programs which have been approved by the Congress and appropriations made therefor.]

SEC. [504] 503. No part of any appropriation contained in this Act shall remain available for obligation beyond the current fiscal year unless expressly so provided herein.

SEC. [505] 504. No part of any appropriation contained in this Act shall be available for the procurement of or for the payment of the salary of any person engaged in the procurement of any hand or measuring tool(s) not produced in the United States or its possessions except to the extent that the Administrator of General Services or his designee shall determine that a satisfactory quality and sufficient quantity of hand or measuring tools produced in the United States or its possessions cannot be procured as and when needed from sources in the United States and its possessions or except in accordance with procedures prescribed by section 6-104.4(b) of Armed Services Procurement Regulation dated January 1, 1969, as such regulation existed on June 15, 1970. This section shall be applicable to all solicitations for bids opened after its enactment.

SEC. [506] 505. No part of any appropriation contained in this Act shall be available for the procurement of, or for the payment of, the salary of any person engaged in the procurement of stainless steel flatware not produced in the United States or its possessions, except to the extent that the Administrator of General Services or his designee shall determine that a satisfactory quality and sufficient quantity of stainless steel flatware produced in the United States or its possessions, cannot be procured as and when needed from sources in the United States and its possessions, or except in accordance with procedures provided by section 6-104.4(b) of Armed Services Procurement Regulation, dated January 1, 1969. This section shall be applicable to all solicitations for bids issued after its enactment. (*Treasury, Postal Service, and General Government Appropriation Act, 1978.*)

ENERGY RESEARCH AND DEVELOPMENT ADMINISTRATION

The Energy Research and Development Administration was abolished pursuant to the Department of Energy Organization Act (Public Law 95-91) and Executive Order No. 12009. All functions were transferred to the Department of Energy. The related appropriation language and amounts formerly included in this chapter are reflected with the successor accounts in the Department of Energy.

EPA's research and development efforts are conducted through grants, contracts, and agreements with universities, industries, other private commercial firms, non-profit organizations, State and local governments, and Federal agencies as well as through research and development at EPA's laboratories and field locations.

These efforts are oriented toward producing the scientific knowledge and the tools for regulating, preventing, and abating pollution and are specifically directed to the problems of air and water pollution control, drinking water and radiation protection, solid and toxic waste management, pesticides control, noise abatement, and energy related environmental research and development programs. Activities encompass research on the effects of pollutants on man, animals, aquatic life, plants, materials, and the general environment; research on the processes, such as dispersion that affect pollution; the development of new and improved sampling and analytical methods and instruments for measuring pollutants; the development and demonstration of new and improved technology for preventing and controlling pollution and recovery of materials from wastes; and insuring environmental protection necessary to facilitate the use of domestic energy supplies with particular emphasis on coal and nuclear systems and the concurrent development of appropriate control technologies and emerging energy systems to minimize control cost and environmental impact. Overall management and support is included.

EPA is responsible for major Federal environmental pollution abatement and control programs which involve the development of environmental standards; monitoring and surveillance of pollution conditions; grant support for State and local water quality pollution control planning; direct Federal pollution control planning; grant support for State, regional, and local pollution control programs; technical assistance to pollution control agencies and organizations; and assistance to Federal agencies in complying with environmental standards and insuring that their activities have minimum environmental impact. Overall management and support resources are included.

Air quality.—The air program encompasses activities related to the development of control strategies and control programs, and the implementation of such programs to achieve air quality standards. This objective is accomplished in two basic ways: (1) State and local actions are encouraged by the provision of assistance in all areas of technical and policy matters; and (2) direct Federal action is taken in cases of State or local failure to fulfill the requirements of the Clean Air Act.

Support of State and local programs and the development of Federal air pollution emissions standards are the highest priorities of the Federal air pollution control and abatement programs. Emissions standards developed include new source performance standards (NSPS), national emission standards for hazardous air pollutants (NESH-

APS) and motor vehicle emissions standards. The motor vehicle program also includes certification and testing to insure that prototype vehicles meet Federal emissions and fuel economy standards.

Major accomplishments in the air programs are as follows:

The Administration will integrate the Department of Transportation's transportation planning process with the Environmental Protection Agency's air quality planning requirements to insure adequate planning to meet air quality health standards in regions where these standards are not now being met.

Water quality.—The water quality program encompasses the following major activities: (1) developing effluent standards for industrial dischargers, (2) managing the municipal wastewater facilities construction grant program, (3) assisting State and local agencies in developing water quality management programs, (4) assisting the States in implementing their water pollution control programs including implementation of delegated Federal responsibilities, (5) responding to major oil and hazardous materials spills, and (6) implementing numerous other provisions of the Federal Water Pollution Control Act and the Marine Protection, Research and Sanctuaries Act. Major accomplishments projected for 1979 as compared to 1978 and 1977 are as follows:

	1977 actual	1978 estimate	1979 estimate
Number of effluent standards promulgated.....	17	13	24
Number of active construction grant projects managed.....	11,198	10,670	11,295

Safe drinking water.—The safe drinking water program encompasses: (1) developing and promulgating national drinking water standards, (2) assisting the States in assuming primary responsibility for monitoring and enforcing compliance with the national standards, (3) assuming Federal responsibility for monitoring and enforcing compliance with the national standards where the States fail to assume responsibility, (4) developing and promulgating regulations for controlling underground injection of wastes, (5) assisting States in assuming primary responsibility for implementing these regulations, (6) assuming Federal responsibility for implementing these regulations where the States fail to assume such respon-

sibility, and (7) carrying out other provisions of the Safe Drinking Water Act. Principal accomplishments planned for 1979 as compared to 1977 and 1978 are:

Pesticides.—The pesticides program has primary responsibility for implementing the requirements of the 1972 Federal Insecticide, Fungicide and Rodenticide Act as amended and the lead role in the design and implementation of EPA's pesticide strategy. Supplies are controlled to keep hazardous chemicals off the market and to prevent unreasonable adverse effects to man or the environment. This will be accomplished in 1979 through registration of an estimated 8,500 new products and amendments and the processing of 50 actions which are necessary to the proper assessment of the health and safety of suspect compounds. The reregistration process allows the Agency to make a rebuttable presumption against registration of pesticides which appear to cause unreasonable adverse effects to human health or the environment. The initiation of generic standard building will be directed to completion of the review and validation of scientific data for 50 chemicals used as active ingredients and 60 on common formulations of those chemicals. In addition, control will be exercised through the process of classification of pesticide products for restricted or general use as well as pesticide residue tolerance-setting, resulting from an estimated 250 tolerance petitions.

Radiation.—The radiation program endeavors to eliminate unnecessary health and environmental effects by limiting exposures to radiation from releases of radionuclides to the environment; from medical and occupational uses of radiation; and from nonionizing radiation sources.

Reductions in potential health effects will be achieved from the promulgation in 1977 of environmental standards for facilities in the uranium fuel cycle.

In 1979, amendments will be promulgated to the uranium fuel cycle standard and to the drinking water standards which will increase the number of radionuclides covered. Standards for disposal of high level radioactive wastes will also be promulgated.

The program has gained new responsibilities as a result of the Clean Air Act Amendments of 1977, and a major effort in 1979 will be to gather the data and information on sources and environmental impacts required to make a mandatory determination by August 1979 of the need to control airborne radioactive pollutants through mechanisms available in the act.

Solid waste.—Major accomplishments of the solid waste program projected for 1979 as compared to 1978 and 1977 are:

² Not applicable.

Toxic substances.—The toxic substances program includes activities relating to the identification and control of risks to human health and the environment posed by chemical substances. These activities in 1979 will include the establishment of regulations to obtain testing data and other information on about 16 chemicals or groups of chemicals, completion of indepth risk assessments on 10 chemicals and initiation of hazard evaluations on approximately 18 additional substances, and development of control strategies and regulations on 9 chemical substances.

Noise.—The noise program's major activities to reduce the detrimental health and welfare effects of noise include: the development of regulations controlling noise emissions, the provision of technical assistance to strengthen State and local noise programs, and the coordination of noise reduction and research activities throughout the Federal Government.

EPA's enforcement responsibilities are in the areas of air and water pollution control, drinking water, pesticides, solid waste, toxic substances, and noise control. Much of the effort is in support of or in cooperation with State and local enforcement programs, such as the enforcement of air quality standards, navigable and interstate water quality standards, and issuance of pollution discharge permits. Enforcement includes such actions as notices of violation, abatement orders, enforcement conferences, civil and criminal court actions, and, in the case of pesticides, recalls, and seizures. Overall management and support resources are included.

Air enforcement.—The air enforcement program is directed toward achieving compliance with the standards and regulations established for stationary and mobile sources of air pollution under the provisions of the Clean Air Act. The Federal enforcement program also assists and monitors States to insure that they have adequate enforcement programs.

The Federal stationary air enforcement program conducts field investigations and takes enforcement actions to assure compliance with Clean Air Act requirements. In 1979 penalties will begin to be assessed against recalcitrant polluters. The stationary source enforcement program also enforces provisions of the Energy Supply and Environmental Coordination Act (ESECA) relating to the conversion of existing facilities from oil and gas to coal burning.

The Federal mobile source enforcement program conducts audits of auto and truck assembly lines to insure compliance with pollution emission standards through the selective enforcement audit program (SEA). Investigations are conducted to determine the need to recall vehicles with emissions control defects and to insure that vehicles have not had controls removed or rendered inoperative by tampering. Inspections are also performed through the States to insure that leaded gasoline is not sold as unleaded fuel. This prevents contamination of emissions control systems.

The following are accomplishments for air enforcement:

Federal enforcement activities:	1977 actual	1978 estimate	1979 estimate
Stationary sources:

Number of States with adequate field surveillance programs.....	10	15	30
Enforcement actions.....		490	497
Noncompliance penalties assessed.....		144	286

Water quality enforcement.—In 1979, the water quality enforcement program will focus on compliance monitoring by conducting sampling and evaluation inspections. In addition, continuing emphasis will be placed on issuance of National Pollution Discharge Elimination System wastewater discharge permits by issuing or reissuing major municipal, industrial, and new source permits. A significant portion of these permits will be made finally effective by making determinations on variance requests. Other activities will include enforcement actions that are necessary to achieve compliance with requirements of the Federal Water Pollution Control Act, the Rivers and Harbors Act, and the Marine Protection, Research, and Sanctuaries Act. Included in enforcement actions will be oilspill and Refuse Act cases. In addition, the program will conduct pre-enforcement and technical enforcement evaluations of self-monitoring reports and resolution of adjudicatory hearings, including unresolved cases from prior fiscal years.

Enforcement actions.....	3,384	1,935	3,670
Adjudicatory hearings.....	210	477	492
Variances.....	160	410	202

Safe drinking water enforcement.—The safe drinking water enforcement program will emphasize compliance with the Safe Drinking Water Act by issuing 1,125 variances and exemptions, taking 20 enforcement actions, and by overseeing 36 public water supply State primacy programs. In addition, the program will review reports from 500 public water supplies that have been issued variances or exemptions. It is projected that the program will respond to two emergency situations that involve imminent and substantial endangerment to public health.

Pesticide enforcement.—The pesticide enforcement program for 1979 will emphasize industry compliance with product registration requirements and user compliance with label directions. Activities include registration of pesticide producer establishments, sampling and label checks of products at the producer establishments and in the marketplace. Also, the program will include observations of pesticide applicators and the initiation of enforcement actions when violations are detected. In 1979, the States will assume many of these functions under the provision of Federal/State cooperative enforcement grants.

Solid waste enforcement.—The solid waste enforcement program is responsible for the enforcement of the Resource Conservation and Recovery Act of 1976. To assure compliance with this Act, the program will emphasize the issuance of 500 facility permits, and the review of state-issued permits. In addition, the program includes the issuance of 250 notices of violation, and the performance of onsite inspections of hazardous waste generators.

Toxic substances enforcement.—The toxic substances enforcement program is responsible for the enforcement of the Toxic Substances Control Act of 1976 (TSCA). To assure compliance with TSCA, the program will conduct 600 inspections for violators of section 6, and from these inspections 306 court actions and civil penalties will be taken against violators. Other activities include 50 inspections for toxics emergencies; 25 inspections for compliance with notice requirements of section 5; and 30 inspections of imports.

Noise enforcement.—The noise enforcement program is directed toward enforcing noise standards promulgated pursuant to the Noise Control Act of 1972. In 1979, the program's activities will include reviewing production verification reports, monitoring production verification tests, monitoring selective enforcement audit tests, conducting inspections of manufacturer records, and conducting noise testing site comparison studies.

The 1978 President's budget recommended a 10-year program for the waste treatment grant program. The Administration's proposed plan is intended to provide the necessary long-term assurance of continued Federal funding to fulfill the Federal commitment to this program. The long-term (10 year) Federal funding plan will provide \$45 billion to meet water quality requirements by focusing Federal funding on the most critical water quality improvements. The requested \$4.5 billion for 1979 is to continue this program.

The municipal wastewater facilities construction grants program provides 75% Federal financial assistance to municipal, intermunicipal, State, and interstate agencies to construct wastewater treatment and appurtenant facilities to comply with effluent standards required by the Federal Water Pollution Control Act. Projected needs for such facilities will require \$45 billion in Federal assistance over the next 10 years. Major accomplishments in 1979 as compared to 1978 and 1977 are:

	1977	1978	1979
Amount of grants awarded (billions)	\$7.5	\$4.0	\$5.0
Number of grants awarded	4,326	5,600	6,400
Number of construction completions	797	1,040	2,000
Number of active projects	11,198	10,670	11,295

Much of the increased construction workload in 1979 will be managed by the Corps of Engineers working

under an interagency agreement with the Environmental Protection Agency.

SCIENTIFIC ACTIVITIES OVERSEAS (SPECIAL FOREIGN CURRENCY PROGRAM)

For payments in foreign currencies which the Treasury Department determines to be excess to the normal requirements of the United States, for necessary expenses of the Environmental Protection Agency in the conduct of scientific activities overseas in connection with environmental pollution, as authorized by law, \$4,000,000, to remain available until expended: *Provided*, That this appropriation shall be available in addition to other appropriations to such Agency, for payments in the foregoing currencies. This appropriation provides for the programs and activities relating to the promotion of maximum utilization by Federal agencies, and the transfer among agencies of excess real property. It provides for the disposal of surplus real property by sale, exchange, lease, permit, or transfer to authorized organizations as well as the protection and maintenance of excess and surplus property pending its disposition. It also provides for the appraisal of excess and surplus property, for the appraisal of public buildings leases, sites, and other related building programs for Government-owned and leased buildings, as well as for the establishment of specifications, standards, and methods governing such appraisals.

1. *Utilization and disposal.*—In 1979 it is estimated that the sale of 185 properties, originally costing \$200 million

will return to the Government \$50 million in proceeds, of which \$30.1 million will be deposited to GSA's account with the balance associated with credit sales and sales for other agencies. Utilization transfers should total 130 properties with an acquisition value of \$110 million, and other disposal actions are expected to total 275 properties with an acquisition value of \$200 million. The number of surveys to identify underutilized properties to be conducted by GSA are estimated at 120 in 1979. An estimated \$40 thousand in reimbursements will be realized in 1978 and 1979 for expenses of the sale of properties not in the GSA inventory.

2. *Appraisal.*—The total number of appraisals estimated for 1979 is 2,400.

3. *Protection and maintenance.*—In 1979 it is estimated that protection and maintenance costs will reach \$1,400 thousand.

Appraisers, auctioneers, and brokers familiar with local markets are used to accelerate the disposal of surplus real and related personal property. Fees of appraisers, auctioneers, and brokers and costs of advertising and surveying are paid out of receipts from disposals within each year in accordance with 40 U.S.C.A. 485(b). Such proceeds also pay for the direct expense in connection with utilization of excess real and related personal property. Disposal appraisals totaled 397 in 1977 and are estimated to reach 415 in both 1978 and 1979.

FEDERAL BUILDINGS FUND—Continued

LIMITATION ON AVAILABILITY OF REVENUE—continued

The fund, established in 1975, replaces direct appropriations by using income derived from rent assessments (standard level user charges—SLUC) which approximate commercial rates for comparable space and services. SLUC income was \$1,137 million in 1977 and is estimated at \$1,351 million for 1978 and \$1,430 million for 1979. Of the 1978 amount, only \$1,333 million is permitted to be retained in accordance with Public Law 95-81 dated July 31, 1977, and an additional \$14 million may be retained in accordance with the proposed 1978 Pay Act supplemental. The 1979 amounts are distributed among major executive agencies as follows (excludes reimbursable activity):

¹ The 1978 resource requirements include \$13,837 thousand requested to fund the October 1977 classified pay increase in Real property operations and program direction and wage-board increases in Real property operations.

² The 1979 resource requirements include \$13,968 thousand for the cost of the October 1977 classified pay increase in Real property operations and program direction and wage-board increases in Real property operations.

The Federal buildings fund direct program consists of the following activities:

1. *Construction and acquisition of facilities.*—This activity provides for space acquisition through direct federally financed construction of facilities, including the extension and conversion of existing buildings. It finances all costs directly attributable to Federal buildings fund construction projects for site acquisition, design, management and inspection, and construction. The total cost of new commitments for direct federally financed construction is estimated at \$20 million in 1978 and \$18 million in 1979.

2. *Alterations and major repairs.*—This activity provides for alterations and major repairs of public buildings. Cost effectiveness, overall appearance, state of repair, and operating efficiency are the principal criteria used in establishing priorities of work required with primary consideration given to repairs to prevent deterioration and

damage to the buildings, their support systems, and necessary operating equipment.

3. *Purchase contract payments.*—This activity provides for payment of liabilities incurred for facilities acquired under purchase contract authority. Purchase contract authority, which provided for private investment capital financing of public buildings, expired at the end of 1975. The periodic payments on the purchase contracts cover principal, interest, taxes, and other requirements.

4. *Rental of space.*—This activity provides for the acquisition of space through the leasing of either existing buildings, including space occupied by Federal agencies in U.S. Postal Service facilities, or facilities to be built with private capital for lease to the Government. Rental of existing commercial and Postal Service buildings is estimated to provide 91 million square feet in 1978 and 93 million square feet in 1979.

5. *Real property operations.*—This activity provides for operation of Government-owned and leased facilities, including cleaning, utilities and fuel, protection, maintenance, other miscellaneous services such as moving as a result of space adjustments, moving of agencies into newly acquired space, evaluation of new materials and equipment, and field supervision of the foregoing services. The 1979 direct program compares with the 1978 program as follows (estimated square feet and expenses in millions):

	1978		1979	
	Square Feet	Expenses	Square Feet	Expenses
Cleaning.....	180	\$149	183	\$158

Protection.....	206	45	209	45
Other operations.....	279	39	280	34
Total.....		473		473

6. *Program direction.*—This activity provides for the overall general management, long- and short-range planning, and administration of all programs which are the responsibility of the Public Buildings Service. In addition, this activity finances the costs of management and administration of each of the individual direct activities of the Federal buildings fund.

Other programs.—When requested by Federal agencies, the Public Buildings Service provides building services such as tenant alterations, cleaning and other operations, and protection services which are in excess of those services provided under the standard level user charge.

Note.—Includes \$1,064 thousand in 1978 for activities previously financed from General departmental management, HEW.

This appropriation provides for Government-wide management of supplies and personal property, transportation and public utilities services, operating the worldwide supply system, and maintaining and disposing of strategic and critical materials.

1. *Supply distribution.*—This activity manages and operates a national supply distribution system of wholesale distribution facilities through which commercial-type commodities are received, stored, and issued on a worldwide basis to Federal agencies. Supplies are shipped by the wholesale operation to customer agencies from GSA supply distribution facilities located in each of the 10 GSA regions. The sales estimate for 1979 is \$784 million, approximately the same level as 1978.

2. *Procurement.*—This activity has the contracting responsibility for commercial-type items required by Federal agencies and other authorized users of the Federal Supply Service system. In addition to contracting and purchasing, the Procurement activity selects commodities for inclusion in the stores, nonstores, and Federal supply schedules programs by determining the methods of supply that are most economical and effective. Total procurement volume in 1977 was \$3.0 billion, and is estimated to be \$3.5 billion in 1978 and 1979. This office is responsible for the inventory management program of the Federal Supply Service. Inventory levels available for issue to customer agencies are projected at \$233 million for 1978 and 1979 with a stockturn of 3.2.

3. *Standards and quality control.*—Timely delivery of commodities of specified quality is assured by inspection and surveillance at contractors' plants or GSA supply facilities by laboratory tests and analyses prior to acceptance, and by contract administration assistance. Qualitative requirements of Federal agencies for commodities are reflected in Federal specifications and Federal standards which are mandatory for use in procurement. In 1979, the standardization program will consist of the promulgation of 2,470 Federal specifications and standards actions.

FEDERAL SUPPLY SERVICE—Continued

OPERATING EXPENSES—Continued

4. *Transportation and public utilities.*—This activity provides assistance to civilian Federal agencies for improving transportation practices and passenger travel management; develops guides and procedures; negotiates reasonable rates with carriers; performs audits on all Federal transportation documents; and provides procurement assistance, rates, and routing, and related transportation services. It develops Government-wide policies and procedures to improve the overall efficiency of the Government-owned motor vehicle fleet and assists the various Federal agencies with motor equipment management. Also, it negotiates with public utility companies on behalf of executive agencies and provides technical assistance in connection with regulatory proceedings concerning transportation and public utilities.

5. *Customer service and support.*—The customer service and support activity plans, directs, and coordinates managerial and operational programs to insure effective logistics support to all Federal agencies. This activity is responsible for determining the adequacy of the support programs and for monitoring responsiveness to agency requirements. Continued emphasis will be placed on the customer liaison and customer market research program to increase the scope of supply and procurement support rendered by the Federal Supply Service to other Federal agencies.

This activity also manages and operates programs for processing and control of agency requisitions, commodity management, and logistics data systems.

A variety of commonly used administrative and office supplies, maintenance supplies, and standard forms are provided to Federal agencies through self-service retail facilities located wherever there is a concentration of Federal activities. Sales through these self-service stores will increase from \$74 million in 1977 to an estimated \$79 million in 1978 and \$89 million in 1979.

6. *Property management.*—This activity manages the national and supplemental stockpile of strategic and critical materials required to keep the Nation's mobilization base viable. This includes costs of receiving, storing, inspecting, and maintaining the material in storage locations.

7. *Personal property disposal.*—This activity manages and operates the Government-wide excess Federal personal property program including the utilization, donation, rehabilitation, and sale of property. This embraces the personal property for public benefit purposes; sale of surplus and exchange/sale of personal property (except DOD property); and rehabilitation of personal property owned by the Government to extend its useful life.

8. *Service direction.*—This activity provides for the management and direction, both departmental and in the field, of all Federal Supply Service programs. This activity also includes the Federal procurement regulations system which maintains continuous liaison with Federal agencies and with industry, participating in the work of boards, committees, and groups where related to responsibilities of

the Federal Supply Service. In addition, this activity finances, on a centralized basis, all costs for postage, intercity telephone and payments to the Federal buildings fund.

¹ Includes deferred charges of \$5,379 thousand in 1977.

This fund finances, on a reimbursable basis, a national supply depot system and a system of ordering supplies for direct delivery to agencies. Supplies or services are sold from the fund at cost to other agencies and the District of Columbia. Related operating expenses are provided under the appropriation Federal Supply Service, operating expenses.

Also financed by the fund and reimbursed by using agencies are the operations of interagency motor vehicle pools, the rehabilitation and repair of furniture and equipment, and the redistribution of materials no longer needed overseas.

Budget program.—This estimate provides for supplies and services to military and civilian agencies and provides for the operation of the credit return program.

1. *Supply operations*—(a) *Stores, regular.*—Stock of common-use commodities are purchased in volume and stored in supply depots for sale to Government agencies. Sales were \$801.1 million in 1977, and are estimated to be \$852.0 million in 1978, and \$873.0 million in 1979.

(b) *Stores, direct delivery.*—Orders for stores-type items, if sufficiently large and delivery time is not a factor, are placed with the commercial source of supply for delivery directly to the customer. Sales were \$34 million in 1977, and are estimated to be \$50 million in 1978 and 1979.

(c) *Nonstores items.*—Definite quantity requirements of commodities which are not susceptible to economical stocking in supply depots are purchased for direct shipment to using agencies. Sales were \$466.4 million in 1977, and are estimated to be \$479.0 million in 1978 and 1979.

2. *Export operations.*—Stores and nonstores items are shipped to overseas customers. Receipts to the fund cover packing, transportation costs, and other reimbursable services. Sales were \$24.3 million in 1977, and are estimated to be \$17.8 million in 1978, and \$19.0 million in 1979.

3. *Property management and disposal operations.*—Furniture and equipment repair services provided through commercial sources wherever feasible and economical were \$0.6 million in 1977 and are estimated to be \$0.8 million in 1978 and \$0.5 million in 1979. Receipts to the fund covering redistribution costs of materials no longer required overseas were \$0.2 million in 1977, and are estimated to be \$0.8 million in 1978, and \$0.5 million in 1979.

4. *Motor pools.*—Services are provided through a system of interagency motor pools. Sales were \$125.0 million in 1977, and are estimated to be \$149.5 million in 1978, and \$206.0 million in 1979. Vehicle mileage in interagency motor pools was 853 million in 1977 and is estimated to be 897 million in 1978 and 963 million in 1979.

5. *Administrative equipment.*—Administrative equipment is purchased and charged on an accrual basis to the using activities. Receipts were \$2.1 million in 1977, and are estimated to be \$3.4 million in 1978, and \$3.6 million in 1979.

Other revenue and expense.—Gain or losses on equipment disposals, adjustments between fiscal years, inventory writeoffs, and discounts are applied against operating costs.

Operating results and financial condition.—Investment of the U.S. Government at the end of 1979 is estimated at \$510.8 million consisting of \$282.8 million direct appropriations, \$194.9 million donated assets and reserves, \$33.3 million capitalized surplus, with \$0.2 million deducted for long-term leave liability.

Intragovernmental funds—Continued

GENERAL SUPPLY FUND—Continued

Any operating surplus, as determined by the General Accounting Office audit, must be returned to the Treasury as miscellaneous receipts.

Central blueprinting, photostating, duplicating, and distribution services are financed by a working capital fund (40 U.S.C. 293). As authorized by the Joint Committee on Printing, U.S. Congress, GSA has established and operates 12 printing plants to meet the needs of GSA and other Government agencies. In addition, GSA operated 13 duplicating plants at the end of 1977 and anticipates operating 14 in 1978 and 1979.

This appropriation provides for basic operations dealing with management of the Government's archives and records, operation of Presidential libraries, and grants for historical publications.

In 1979, records in the National Archives and Federal records centers will total approximately 15.2 million cubic feet. The number of reference services expected to be provided will total 19.9 million.

1. *Records management and centers.*—In 1979, agencies will transfer 1.1 million cubic feet of inactive records to the records centers. Records disposal from the records centers will total 0.7 million cubic feet in 1979, and the number of reference services expected to be provided will total 16.6 million.

2. *Archives and related services.*—A substantial portion of the workload of the National Archives and related services activity is determined by the volume of reference requests received from Government agencies and the public. In 1979 the number of reference services expected to be provided is estimated at 3.4 million.

3. *National Historical Publications and Records Commission.*—This activity provides for carrying out the national historical documents program, established by the act of July 28, 1964 (Public Law 88-838), as amended, for grants to State and local agencies and to nonprofit organizations and for allocations to Federal agencies in connection with the publication and preservation of source materials significant to the history of the United States.

4. *Service direction.*—This activity provides management and overall direction of all National Archives and Records Service programs and the payments of rental charges to the Federal Buildings Fund.

This appropriation provides for the direction and coordination of a comprehensive Government-wide program for the management, procurement, and utilization of automatic data processing and communications equipment and services, development of Government-wide policy pertaining to ADP systems acquisition, management, and utilization, and the overall management of operations designed to provide specialized services to agencies in each of these fields.

1. *Automated data management services.*—This activity provides for the overall management, control, and coordination of Government-wide programs and activities relating to the procurement of ADP and communications equipment, maintenance, and related supplies and services. The projected program for 1979 provides for the management of reimbursable ADP procurement and the excess ADP equipment redistribution programs financed through the ADP fund.

2. *Telecommunications services.*—This activity provides for the overall management, control, and coordination of Government-wide programs and activities relating to the procurement, operation, maintenance, and utilization of telecommunications equipment and services. The projected program for 1979 provides for the management of reimbursable programs financed through the FT fund, including the design and engineering of networks and facilities for Federal civil agencies.

3. *Agency assistance, planning, and policy.*—This activity provides for the development and coordination of operational policies, procedures, regulations, and publications governing the management, operation, and utilization of Government-wide ADP and telecommunications activities. Studies are made to determine the economic impact of ADP and telecommunications programs under

development; programs of long-range research in the fields of ADP and telecommunications equipment and facilities are coordinated; overall management of the Government-wide ADP and telecommunications management information systems is provided; and the Government-wide ADP and telecommunications standardization programs are implemented. This activity is also involved in regulatory representation consisting of negotiations with the communications industry concerning consumer considerations of the Government, and participation in regulatory proceedings on communications cases. The projected program for 1979 provides for the management of reimbursable teleprocessing services and data processing programs financed through the ADP fund.

¹ Includes deferred charges of \$2,979 thousand in 1977.

This fund was authorized by Public Law 87-847, approved October 23, 1962. It finances, on a reimbursable basis, a telecommunications system for the Federal Government which is a major operating component of the national communications system.

Expenses payable from the fund include personal services, procurement by lease or purchase of equipment and operating facilities (including cryptographic devices), and other costs necessary to operate the system. These expenses are reimbursed from appropriations and funds of any agency or organization for telecommunications services and facilities made available to them.

The initial capital of \$9 million appropriated in 1963 was increased by \$20 million appropriated in 1977. This capital may be increased by donation of supplies and equipment.

Budget program.—The estimate provides for a continued increase in the volume and quality of communications services provided to executive agencies of the Government. Total sales for 1977 were \$359.0 million and are estimated at \$383.1 million in 1978 and \$451.1 million in 1979.

1. **Voice program.**—Provides for a telephonic system which enables personnel in each Federal agency to communicate directly with any other agency in the Nation. The system provides day-to-day services and incorporates features which would be necessary in emergency situations. Total sales for 1977 were \$311.7 million and are estimated at \$332.7 million in 1978 and \$398.2 million in 1979. Intercity Federal Telecommunications System calls were 183 million in 1977 and are estimated at 194 million in 1978, and 210 million in 1979.

2. **Record program.**—Provides a common unified records communications system to satisfy record communications requirements of the Federal civil agencies by providing machine-to-machine service for transmission of data by teletypewriter, facsimile, and other transmission media while at the same time providing message processing capability required for peak-period traffic loads, time zone differences, machine code and language translation, and processing of multiple address messages. Total sales for this program are projected to increase from \$30.9 million in 1977 to \$32.8 million in 1978 and \$34.8 million in 1979.

3. **Circuit procurement program.**—Provides for centralized procurement of circuits and related equipment for civil agencies to obtain the benefits of multiple tariff

offerings of commercial carriers, while at the same time permitting each agency to maintain operational control over its own circuits. Sales are projected to increase from \$11.7 million in 1977 to \$11.8 million in 1978 and \$12.1 million in 1979.

4. *Special program.*—Provides for an effective communications security program for civil agencies including GSA in keeping with the objectives of the U.S. communications security plan, and a consolidated program of procurement and maintenance of equipment to implement such security plans. This program provides assurances for the continuity of the Federal telecommunications system in the event that portions of the system are disabled or destroyed. In addition, this program provides telecommunications support to the Federal Disaster Assistance Administration in the emergency and major disaster programs. Total sales for 1977 were \$4.7 million and are estimated at \$5.8 million in 1978 and \$6.0 million in 1979.

Operating results and financial condition.—At the end of 1977, the net investment in the fund is estimated to be \$28.7 million, composed of \$29.0 million appropriated, \$0.2 million donated assets capitalized, less \$0.5 million unfunded leave liability. Following the close of each fiscal year any surplus earnings, after making provision for any prior year losses, are deposited in miscellaneous receipts of the Treasury.

¹ Includes deferred charges of \$50 thousand in 1977.

The Automatic data processing fund was authorized by Public Law 89-306, to coordinate and provide for the economic and efficient purchase, lease and maintenance of automatic data processing equipment by Federal agencies.

The fund finances on a reimbursable basis a Government-wide automatic data processing operation, including the procurement by lease, purchase, transfer, or otherwise of ADP equipment, maintenance of equipment, procurement and/or development of software programs with Government-wide application, and operation of service centers and related functions.

Budget program.—The estimate provides for a continued increase in revenue during 1978 and 1979. Sales are estimated to increase from \$61,076 thousand in 1977 to \$94.1 million in 1978 to \$117.6 million in 1979.

1. *Data processing.*—This activity finances the operation of a data processing program which provides ADP services on a Government-wide basis. These ADP services consist of local and remote computer processing, including teleprocessing services contracts; programmer analyst, project manager, and consultant services; computer performance evaluation and simulation; general purpose software; and a full range of commercially acquired data processing services. This program also provides for financing of joint-use ADP facilities operated by two or more agencies under GSA policy guidance. In addition, this program provides financing for Federal data processing centers established to be operated by GSA or by delegation of authority from GSA to be operated by other agencies under GSA policy guidance.

It is estimated that revenue from data processing programs and other related operations will increase from \$54.7 million in 1977 to \$81.4 million in 1978 and to \$98.2 million in 1979.

Intragovernmental funds—Continued**AUTOMATIC DATA PROCESSING FUND—Continued**

2. *Lease program.*—This program finances the purchase and multiyear lease of ADP equipment and software from manufacturers for subsequent lease to Federal agencies at costs substantially below commercial annual lease prices. Purchases are made by the fund when special discounts with time limitations and other arrangements become available and agencies are unable to take advantage of these cost reduction opportunities due to budget cycle limitations. In addition to purchase, this program acquires excess Government-owned ADP equipment where there is a known user or the equipment has a high potential for reutilization, capitalizes it at fair market value, and leases it to Federal agencies at a cost substantially below all other least cost alternatives available to the using agency.

It is estimated that revenue from the lease program will increase from \$6,304 thousand in 1977 to \$12,667 thousand in 1978 and to \$19,413 thousand in 1979.

FEDERAL PREPAREDNESS AGENCY—Continued

SALARIES AND EXPENSES—continued

The Federal Preparedness Agency advises and assists in the formulation, development, and coordination of national civil preparedness policies, and assists in fostering State and local participation in preparedness programs. Specific programs include:

1. *Civil crisis preparedness.*—Identifies and evaluates current and possible future threats to the U.S. economy by dependence on the natural, industrial, or economic resources of any foreign nation, and develops policies and programs within the Government to accommodate or avoid these dependencies. Provides information and guidance to Federal departments and agencies, State and local governments, and certain national business, labor, farm, and other organizations and the public on the employment of domestic resources during periods of present or potential economic stringency or crisis. Develops and recommends concepts, plans, and systems for managing the Nation's critical resources in a range of civil crisis contingencies.

2. *Conflict preparedness.*—Directs and coordinates the preparation and implementation of policies, plans, and programs to meet approved objectives for general war and controlled conflict preparedness, including planning and program guidance to Federal departments and agencies and to State and local governments; provides overall direction for the development, review, and testing of preparedness plans, facilities, and arrangements at all levels of government; directs and coordinates the necessary communications systems essential to the continuity of government program; develops programs, provides guidance, and coordinates preparedness measures for nuclear contingencies; develops international programs in support of civil emergency preparedness for general war and controlled conflict contingencies under the general policy guidance of the National Security Council, and develops general policy guidance for the preparation of plans for emergencies caused by acts of terrorism.

3. *Research, development, and program coordination.*—Directs and coordinates technical and scientific work programs; provides leadership and guidance in the development of an analytical base for broad nonmilitary defense policy; develops a central research and development program designed to carry out assigned Executive Order responsibilities; provides advice and assistance to other agencies in planning for research in areas involving each agency's interest; provides overall direction, guidance, and coordination of special studies in broad resource area; maintains close working relationship with the scientific community; directs the computer and programing support activities of FPA and other Federal departments and agencies with emergency preparedness responsibilities as requested.

4. *Stockpile acquisitions and disposals.*—Develops plans and programs to acquire and dispose of stockpiled materials in accordance with statutory provisions. This includes the collection of technical, economic, and marketing data and an analysis of factors such as supply, demand, consumption, prices, specifications, and quality.

WILLIAM LANGER JEWEL BEARING PLANT REVOLVING FUND—continued

The Government-owned William Langer Jewel Bearing Plant at Rolla, N. Dak. is the only facility of its kind in the United States which has the capability to produce all types of jewel bearings in quantity. The plant was established by the Department of Defense in 1953 and turned over to GSA in 1957. On January 1, 1970, financing of the operation was placed under a revolving fund, which was authorized by Public Law 90-469, approved August 8, 1968.

The plant produces jewel bearings for sale at fixed prices to Government agencies, and their contractors and subcontractors for national defense purposes, and to GSA for the national stockpile. Mandatory source provisions are contained in the Federal Procurement Regulations and Armed Services Procurement Regulations in support of this operation. These provisions require Government agencies and their contractors to procure and use jewel bearings manufactured at the William Langer Jewel Bearing Plant under certain specified conditions.

This appropriation provides financing of administrative operations services on a centralized and integrated basis for all General Services Administration programs.

1. *Administration.*—Consists of accounting and reporting, credit, insurance, budgeting, and related financing systems, personnel and office services, and ADP system development, design and programming. These services are also provided to Presidential commissions and committees on a reimbursable basis.

2. *Legal services.*—Covers the fields of real property, personal property, archives and records, automated data and telecommunications, transportation audit, strategic and critical materials stockpiling, preparedness policy, and finance and administration. This activity also administers the contract compliance program assigned to GSA by the Office of Contract Compliance Programs, Department of Labor.

3. *Board of Contract Appeals.*—Provides a forum for a fast and economic resolution of disputes between a contractor and GSA over provisions or performance of a contract.

4. *Federal Information Centers.*—In conjunction with the Civil Service Commission, GSA operates 40 centers across the country to assist persons who need a service provided by the Federal Government but do not know which agency or office provides it. This activity is financed from Federal agency reimbursements to this appropriation.

The Consumer Information Center is primarily responsible for encouraging the development of consumer product information from the major Federal agencies and

departments as a result of the Government's research, development, and procurement activities.

In addition, the Center is charged with the responsibility of promoting greater public awareness of existing Federal publications through wide dissemination to the general public of the consumer information catalog and free publications, which are financed from using Federal agencies reimbursements to this appropriation for GPO distribution costs.

The National Aeronautics and Space Administration conducts the civilian space programs of the United States for peaceful purposes. The agency's activities are designed to maintain U.S. leadership in aeronautical and space research, technology, and utilization. The objectives of these activities include extending our knowledge of the Earth, its environment, the solar system, and the universe; expanding the practical applications of space technology; developing, operating, and improving space vehicles; providing technology for improvement of the civil and military usefulness of aeronautical vehicles while minimizing their environmental effects and energy consumption; disseminating pertinent results to potential users in all sectors of the economy; and promoting international cooperation in peaceful activities in space.

This appropriation provides for research and development activities of the National Aeronautics and Space Administration as follows:

1. *Space transportation systems.*—This activity provides all the transportation systems and associated support and capabilities required to conduct operations in space. The objectives include development of the reusable Earth-to-orbit space shuttle vehicle and establishment of a national fleet of orbiters; creation of a space transportation system (STS) operations capability, including U.S. participation with the European Space Agency in a cooperative program on the spacelab to be flown in the shuttle; preparations for STS operations, including mission planning, recurring hardware procurement, launch operations, and flight support; development of new component and subsystem technology and conceptual studies and research on future space operations; and launch operations and support for expendable launch vehicles for automated space missions before the transition to the space transportation system.

(a) *Space shuttle.*—The space shuttle, the first reusable Earth-to-orbit vehicle, is the key element of the versatile space transportation system that will open up a new era in Earth-oriented observations, scientific exploration, and technology advances. The shuttle will offer unique capabilities that are not available with today's expendable launch vehicles. These new capabilities include retrieving

payloads from orbit for reuse, servicing and repairing satellites in space, operating and returning space laboratories, and performing rescue missions. The shuttle system will dramatically increase the scope and flexibility of space operations while decreasing their cost for all users—NASA, DOD, other Government agencies, universities, commercial firms, and international customers.

Space shuttle development is progressing toward the first orbital flight in 1979 and initial operational capability in 1980. The approach and landing tests of orbiter 101, the *Enterprise*, were successfully accomplished at the Dryden Flight Research Center, Calif. Ground test efforts on all shuttle elements are intensifying. Major development will be conducted in 1979 on the final assembly and delivery of orbiter 102, as well as delivery of its main engines, external tank, and solid rocket boosters, to the Kennedy Space Center, Fla., in preparation for the first orbital flight. Efforts will also continue on the completion of the main propulsion system testing at the National Space Technology Laboratories, Miss., to verify readiness for orbital flight; main engine testing to accomplish preliminary flight certification; solid rocket motor qualification firings; and completion of full-scale ground vibration testing at the Marshall Space Flight Center, Ala. Fabrication and assembly of orbiter 103 primary structures will continue and detail parts fabrication for secondary structures will start; long-lead efforts for orbiter 104 will proceed and fabrication will begin; and efforts initiated in 1978 to procure long-lead subsystems required to configure the structural test article to orbital flight capability will continue. Operational planning for the shuttle fleet will be increased.

The above activities are consistent with the Administration's decision to support a four-orbiter shuttle fleet operating from launch and landing facilities at the Kennedy Space Center (east coast) and Vandenberg Air Force Base (west coast), by June 1983. The procurement of a fifth shuttle orbiter, previously planned as part of a five-orbiter fleet, can be considered in future years in the event that projected flight rates, or the accidental loss of a orbiter, warrant such an action.

(b) *Space flight operations.*—This activity provides for NASA development efforts related to the establishment of a space transportation system (STS) operations capability; development and test support at NASA centers for space flight programs; STS operations requirements; and advanced programs study and evaluation.

The STS operations capability development efforts include the spacelab, upper stages, multiuse mission and payload support equipment, mission control center upgrading and payload and operations support. These efforts are required to facilitate the planning and transition to space transportation system operations.

The spacelab program is carried out jointly by NASA and the European Space Agency (ESA) to provide domestic and international users with a multipurpose, reusable space laboratory. ESA is responsible for the design, development, production, and delivery of the first spacelab and associated ground-support equipment to NASA. NASA is responsible for the development of flight and ground-support equipment not provided by ESA and for procurement of additional hardware needed to support NASA's missions. The spacelab will be flown to and from Earth orbit in the cargo bay of the shuttle.

The upper stages consist of the interim upper stage (IUS), which is being developed by DOD, and the spinning solid upper stage (SSUS), which is being developed commercially. During 1979, NASA will continue to work with DOD to assure that the IUS meets NASA and other non-DOD mission requirements, and will also continue the design and development of NASA unique items to support IUS mission planning for planetary missions such as the Jupiter Orbiter Probe. The SSUS, a spin-stabilized, solid propellant, expendable upper stage, will be sized to be used for placing Delta and Atlas-Centaur class payloads into synchronous orbit. Activity in 1979 will focus on analytical integration and mission planning.

Multiuse mission and payload support equipment consists of ground and flight hardware required for the interfaces between the payloads and the space transportation system. This class of hardware will be developed into a standard reusable inventory for a variety of payloads.

The mission control center at the Johnson Space Center, Tex., will be reconfigured to support the STS operational flight requirements. The 1979 efforts include completion of system requirements definition and design specifications and additional hardware, equipment, and software.

In addition, emphasis will be placed on payload and operations support activities, including planning for the payload operations control center, support for orbital flight test payloads, operations management studies, and development of flight hardware and software for an orbital flight test mission to move Skylab from its present orbit. These efforts also include definition of requirements and interfaces; design and fabrication of hardware to adapt payloads; analysis of alternative operational concepts, payload accommodation techniques and transportation of cargo to and from the launch sites; and payload manifests for early shuttle flights.

In the area of space transportation system operations, the 1979 requirements include procurement and assembly of solid rocket booster and external tank components; procurement and assembly of both interim and spinning solid upper stage configurations; and flight and mission planning, software development, operational systems performance and capability analyses, and flight crew training.

The advanced programs effort provides technical data for definition and evaluation of potential future space missions.

(c) *Expendable launch vehicle development and support.*—This program includes expendable launch vehicle activities, such as launch operations and engineering and maintenance to sustain launch activities, and component reliability improvement.

2. *Scientific investigations in space.*—The goal of the space science program is to increase our knowledge of the universe. Investigations of the Earth, Moon, Sun, interplanetary space, solar system, other stars and galaxies, and the interaction among these bodies and systems are conducted, using a variety of flight systems and ground-based observations. The results from these scientific investigations significantly contribute to our understanding of the origin, evolution, and fundamental laws of the universe, including the dynamic processes that shape the environment and life on Earth.

(a) *Physics and astronomy.*—The objective is to increase our knowledge and understanding of the Earth's space environment, the Sun, stars, and other celestial bodies. Research is being conducted to investigate the Earth's upper atmosphere and ionosphere, the magnetosphere, and the interplanetary medium. Space-based investigations of cosmic ray, X-ray, gamma ray, ultraviolet, infrared, and radio emissions—not possible from ground-based observatories because of the obscuring effects of the Earth's atmosphere—give us a unique opportunity to study the Sun and other celestial bodies. These investigations are the basis for increasing our knowledge of the fundamental laws of nature, especially those which govern the Earth's environment.

During 1977 the first in a series of high-energy astronomy observatories (HEAO-A) was successfully launched. Two additional HEAO launches are scheduled for 1978 and 1979, respectively. These missions are designed to explore the previously inaccessible X-ray, gamma ray, and cosmic ray sources in the universe. Work is also proceeding on a solar maximum mission, scheduled for launch in 1979 to take advantage of the next period of peak solar activity. Development will continue in 1979 on a 2.4-meter space telescope to be launched by the shuttle in 1983. This multipurpose telescope will be able to observe galaxies at far greater distances than those which can be observed from the best ground-based observatory. Definition and development efforts on a variety of payloads to be flown on spacelab missions are being conducted, including preliminary work on several facility-type payloads to investigate phenomena in the various physics and astronomy disciplines. In addition, work is continuing on several Explorers, such as the international ultraviolet explorer to be launched in early 1978; the international Sun-Earth explorer missions, with launches in 1977 and 1978; the infrared astronomy satellite, which is a cooperative mission with the Netherlands and the United Kingdom; and the dynamics explorer. The solar mesospheric explorer will be initiated in 1979.

The Solar Polar Mission, a joint NASA and European Space Agency mission will begin development in 1979 leading to launch in 1983. This key mission will contribute scientific information concerning the link between solar activity and the Earth's weather and climate.

Upper atmospheric research is progressing toward the goal of understanding the Earth's atmosphere well enough to assess the physical effects resulting from natural and man-caused events, such as the release of fluorocarbons in the atmosphere.

(b) *Lunar and planetary exploration.*—The objective of this program is to increase scientific knowledge about the

General and special funds—Continued

RESEARCH AND DEVELOPMENT—Continued

origin and evolution of the solar system and of life and to apply the results of these investigations toward a better understanding of our own planet. The program provides for systematic studies of the Moon, the planets and their satellites, meteoroids, asteroids, comets, and the particles and fields of interplanetary space. These investigations are accomplished by using automated space flight missions, supported by laboratory and theoretical research and instrument development.

Since the advent of lunar and planetary exploration about 15 years ago with the first Mariner launch to Venus in 1962, the United States has achieved 13 automated missions to the planets and many missions to the Moon. Reconnaissance missions to Mercury, Venus, Mars, and Jupiter have been successfully conducted. Pioneer 10 is now escaping the solar system, and Pioneer 11 is en route to a rendezvous with Saturn in September 1979. The early flyby missions of Mars, followed by an orbiter in 1971, paved the way for the highly successful Viking orbiter and lander missions in 1976. All these achievements are revolutionizing previous theories of the solar system and advancing our understanding of the Earth's evolution and environment.

The activities to be conducted in 1979 provide for orderly progress in the systematic exploration of the solar system. The emphasis will be on capitalizing on the returns from past and ongoing missions.

Exploration of the inner planets began in 1974 with Mariner 10's first closeup views of Mercury and Venus. In 1978, two Pioneer missions will be launched to conduct indepth studies of Venus. The orbiter mission will provide coverage of the planet's characteristics and environment; the multiprobe mission will yield the first detailed measurements of the dense Venusian atmosphere. In addition, Viking operations on the surface of Mars and in orbit around the planet and analysis of the storehouse of scientific data from the Viking missions will continue.

Exploration of the outer planets began with Pioneer 10's flyby of Jupiter and continued with Pioneer 11's encounter of Jupiter in 1974. In 1977, two Voyager missions were launched to expand our knowledge of Jupiter and Saturn. The Jupiter encounters will occur in March and July of 1979, respectively, and the Saturn encounters in November of 1980 and August of 1981, respectively. These spacecraft will also make initial scientific measurements of several satellites of the two giant planets; an option exists to target one spacecraft to Uranus. In addition, development will continue on the Jupiter orbiter probe mission, which was initiated in 1978 and is scheduled for launch on the Shuttle in late 1981 to early 1982. This mission will provide the first indepth studies of Jupiter's atmosphere and long-term observations of its characteristics and satellites.

(c) *Life sciences.*—This program will continue in 1979 to provide for the research and technology necessary to meet the goals of insuring human health, safety, well-being, and effective performance in space flight; utilizing space technology and the space environment to advance knowledge and applications in Earth medicine and biology; and understanding the origin and distribution of life in the universe.

3. *Space and terrestrial applications.*—The objective of this activity is to develop, demonstrate, and transfer space technology systems and related capabilities which can be effectively applied to down-to-Earth needs.

(a) *Space applications.*—Research and development activities in the space applications program apply space systems and technology to meeting needs for new and improved capabilities in identifying and monitoring Earth resources; in observing, measuring and forecasting atmospheric and ocean conditions; in global and regional communications; and in experimentation with advanced techniques in materials processing. The research and development activities involve active participation by current and future users of these capabilities, within the government, in industry and in the academic community.

Earth resources identification and monitoring by means of remote sensing from space has demonstrated new capabilities to provide data useful in such areas as agricultural assessments, water resources measurement, coastal zone monitoring, improvement of maps, land use and surface mine monitoring, forestry and range resources inventory, and mineral and petroleum exploration. Remote sensing activities will continue with the launch in early 1978 of Landsat-C, which will extend the current Landsat series and also provide new capabilities to acquire data in the thermal bands of the energy spectrum. Development will continue on Landsat-D, with a second generation higher resolution remote sensing instrument, the thematic mapper. Launch of Landsat-D in 1981 is expected to expand and enhance the uses of remote sensing data in a number of beneficial applications. The Landsat remote sensing capabilities will be supplemented by experimental use of data from the Heat Capacity Mapping Mission to be launched in 1978. Measurements from this satellite will be applied to thermal inertia mapping and rock-type identification, with the potential for substantial contributions in oil and mineral exploration as well as in siting major civil works. Joint activities with users will be conducted to demonstrate and evaluate specific applications of the remote sensing data in a wide variety of areas.

In 1979, remote sensing will also be applied to magnetic field measurement with the launch of Magsat. This satellite will provide data for use by the U.S. Geological Survey to update and improve worldwide magnetic anomaly maps. One application of these maps is in long-term planning of mineral and hydrocarbon exploration.

Space capabilities are used in studies of tectonic plate movements and stresses to contribute to our understanding of earthquakes. These activities will continue in 1979.

In the area of atmospheric and ocean conditions, NASA is involved with the National Oceanic and Atmospheric Administration and others in research and development activities directed toward near-term improvements in weather prediction, pollution monitoring, and ocean condition forecasting, as well as in longer term efforts directed toward major improvements in these areas and toward a much better understanding of climatic trends. Near-term activities include the launch and operation of Nimbus-G, an experimental air and water pollution monitoring satellite; Tiros-N, the prototype for an advanced meteorological satellite system; and Seasat-A, an experimental satellite with significant capabilities for observing and monitoring ocean conditions. All three of these satellites are planned for launch during 1978. The stratospheric aerosol and gas experiment mission to measure atmospheric constituents is scheduled for launch in 1979. Research and development activities in weather forecasting will include severe storm research and participation in a major global atmospheric research program experiment. Climate research activities will be undertaken in 1979 in

cooperation with other Federal agencies, and development will be initiated on an Earth Radiation Budget Satellite System. This satellite system is designed to measure variations in the energy exchange between the Earth's atmosphere and space and other atmospheric factors important to climate research. Research and development will be pursued in environmental quality monitoring and in oceanographic areas related to the remote sensing capabilities of spaceborne systems. Work will be in progress in 1979 on atmospheric experiments to be conducted on spacelab missions, including a halogen occultation experiment to demonstrate improved capabilities to monitor pollution of the upper atmosphere.

Materials processing research and development activities are designed to exploit the unique characteristics of the space environment to achieve results which are not possible or economically practical on Earth. Experiments are being conducted in laboratories and with sounding rockets to build on the results of tests conducted on previous space flights and to prepare for experiments to be conducted on future shuttle/spacelab missions. Development of equipment and experiments to be used on these missions will continue in 1979.

In communications, research and development efforts concentrate on advanced technology for communications satellite systems with significantly improved capabilities and on providing technical support and consultation to other government agencies. Technical consultation activities include support of the Nation's participation in the World Administrative Radio Conference in 1979 which will reallocate worldwide usage of radio frequencies for communications activities. Experiments using the applications technology satellites and the cooperative applications satellite with Canada are continuing. Development is proceeding on the search and rescue satellite system, another cooperative venture with Canada, to demonstrate improved capabilities for detecting and locating distress signals from aircraft and marine vessels.

(b) *Technology utilization.*—This program is designed to accelerate the transfer to the nonaerospace industry, as well as State and local governments, of new knowledge and innovative technology generated by NASA and NASA contractors. During 1979, NASA will continue its efforts to assure effective and widespread dissemination of new technology through a variety of established mechanisms: publications; industrial applications centers; computer software management and information centers; State technical assistance centers; application teams; and applications engineering projects.

4. *Space research and technology.*—The objectives are to provide a technology base which will adequately support current and future space activities and provide approaches for further reducing the cost of these activities. The 1979 program will establish and maintain a solid foundation of research and technology in the various technology disciplines, with increased emphasis in the major areas of information systems, spacecraft systems, power systems and transportation systems.

In 1979, research will be initiated to develop and demonstrate technology necessary to provide a data information and management system with an order of magnitude increase in efficiency and effectiveness from current systems. Experiments selected as part of the space technology shuttle/spacelab payloads effort will be advanced to the experiment integration and flight readiness phase preparatory to the early space shuttle and spacelab flights. In 1979, experiments will be integrated into the

Long Duration Exposure Facility to be flown on a Shuttle orbiter flight test mission. In the low-cost systems area, emphasis will be on the standardization of hardware and the improvement of business and programmatic practices.

5. *Aeronautical research and technology.*—The objectives are to assist in providing the Nation with the necessary research and technology for safer, more economical, more efficient, and environmentally acceptable air transportation; to support the Department of Defense in maintaining the superiority of U.S. military aircraft; and to help industry maintain a strong U.S. competitive position in the international aviation marketplace.

The 1979 program supports these objectives by stressing the technology areas judged to be the most critical by special in-house and out-of-house assessments, industry, advisory groups, and other users of technology within and outside the Federal Government. The 1979 activities are designed to maintain a strong research and technology base position in the various technology disciplines. The strength of this generic research and technology base is essential to enhance the growth of new improved aeronautical products. Emphasis will be placed on improving aircraft energy efficiency and performance; reducing noise and pollution; improving safety and terminal area operations; and advancing long-haul and short-haul air transportation concepts.

In the area of conventional takeoff and landing aircraft, efforts will continue to focus on aircraft energy efficiency technology including an additional phase of laminar flow control technology. These efforts are aimed at providing, by the mid-1980's, the technology advances that could lead to a 50% reduction in aircraft fuel requirements.

Efforts will also continue on technology for reducing aircraft noise and emissions and evaluation of the suitability of broad specification jet fuels for operation in current and next generation aircraft. Rotorcraft activities will continue to emphasize rotor aerodynamics, structures, avionics, flight dynamics, terminal operations, engines and drive systems and rotor system design. General aviation activities will focus on the reduction of noise and emissions, crashworthiness and advanced low-cost avionics systems. In vertical takeoff and landing technology, broad-based research for future military and civil aircraft applications will be continued. Supersonic cruise research will continue to establish a focused technology base in the areas of propulsion, aerodynamics, structures, and controls. Research and technology efforts will also continue in support of the military in the area of high-performance aircraft.

6. *Energy technology applications.*—The objective is to assure that the national energy programs can benefit from NASA's expertise gained in developing aeronautics and space technology. This program seeks to identify and evaluate NASA's aerospace technologies and capabilities having energy applications, and to provide support to Government agencies engaged in national energy programs.

7. *Supporting activity.*—The objective is to provide general support necessary for the attainment of NASA missions.

(a) *Tracking and data acquisition.*—This program provides tracking and data acquisition support to the entire NASA flight program, including automated missions to the planets and in Earth orbit, manned missions, sounding rockets, and aerodynamic test flights.

This appropriation provides for contractual services for the design, major rehabilitation, and modification of facilities; the construction of new facilities; minor construction; the purchase of land and equipment related to construction and modification; and advanced design related to facilities planned for future authorization. The principal projects in the 1979 program are described below:

1. *Space transportation systems.*—This activity includes funds for space shuttle facilities at various locations.

2. *Scientific investigations in space.*—No new projects are included for 1979.

3. *Space and terrestrial applications.*—No new projects are included for 1979.

4. *Space research and technology.*—No new projects are included for 1979.

5. *Aeronautical research and technology.*—This activity includes the modification of the unitary plan wind tunnel, the 3.5-foot wind tunnel, the 12-foot pressure wind tunnel, and the 40- by 80-foot subsonic wind tunnel at the Ames Research Center; rehabilitation of the unitary plan wind tunnel and construction of the national transonic facility, at the Langley Research Center, Hampton, Va.; and the construction of a research analysis center at the Lewis Research Center, Cleveland, Ohio.

7. *Supporting activity.*—The estimates for this activity provide for modifications and additions for logistic and supply functions at the Goddard Space Flight Center; modification and addition to the space flight operations facility, and modifications to various buildings for seismic protection, at the Jet Propulsion Laboratory, Pasadena, Calif.; modifications for the utility control system at the Langley Research Center; rehabilitation and modification of facilities not in excess of \$500 thousand per project, and minor construction of new facilities and additions to existing facilities not in excess of \$250 thousand per project,

at various NASA installations and at Government-owned plants operated by contractors; and facility planning and design.

This appropriation provides for research in Government laboratories, management of programs, and other expenses for the operation of NASA installations.

Responsibility for the space transportation systems activity is located at the John F. Kennedy Space Center, Kennedy Space Center, Fla.; Lyndon B. Johnson Space Center, Houston, Tex.; Marshall Space Flight Center, Huntsville, Ala.; and the National Space Technology Laboratories, Bay St. Louis, Miss. The scientific investigations in space and space and terrestrial applications activities are concentrated principally at the Ames Research Center, Moffett Field, Calif.; Goddard Space Flight Center, Greenbelt, Md.; Langley Research Center, Hampton, Va.; Lewis Research Center, Cleveland, Ohio; Lyndon B. Johnson Space Center; Marshall Space Flight Center; National Space Technology Laboratories; and the Wallops Flight Center, Wallops Island, Va.

The space research and technology activity is conducted at the Ames, Goddard, Langley, Lewis, Johnson, Marshall, and Wallops Centers, as well as the Dryden Flight Research Center, Edwards, Calif.

Aeronautical research and technology work is conducted at the Ames, Dryden, Langley, and Lewis Research Centers.

Programwide support and management are provided by NASA headquarters, Washington, D.C. Support activities for tracking and data acquisition requirements are performed at the Goddard Space Flight Center and Wallops Flight Center.

International cooperation.—U.S. dollars are advanced from foreign governments to allow the National Aeronautics and Space Administration to procure, in the United States, nonmilitary space-oriented materials and services on their behalf. Authority for this action is granted by the National Aeronautics and Space Act of 1958 (42 U.S.C. 2451 et seq.).

This appropriation provides funding for the payment of compensation and pension benefits to veterans and survivors who satisfy certain requirements as set forth in title 38, United States Code. Other benefits which are related to, but not readily combined with either the compensation or pension programs, are also funded by this appropriation. This appropriation's funding requirements for 1979, including additional funding for proposed legislation, are estimated to be \$9,998.2 million, an increase of \$391.8 million.

1. *Compensation.*—Compensation is payable as either a disability benefit or a survivorship benefit. Criteria for entitlement are based on a veteran's disabilities incurred in or aggravated by active military service, death while on active duty, or death resulting from service-connected disabilities.

Veteran compensation cases will increase slightly to an estimated 2,250,005 average cases during 1979. Survivor cases are projected to decline by 795 to an estimated 363,515 during 1979.

Public Law 95-117, effective October 1, 1977, increased both disability compensation for disabled veterans and DIC rates for widows and children by 6.6%. Legislation will be proposed in 1979 to provide cost of living increases for veterans and DIC widows and children, averaging 5.8%.

2. *Pensions.*—As with compensation, pension may be paid to a veteran or his survivor(s). Veteran's entitlement is based on active duty service of a specific length (normally 90 days or more) during a designated war period; disabilities considered permanent and total; and countable income below established levels. There is no disability requirement for survivor cases.

Veteran pension cases are projected to increase by 1,080 in 1979 to an estimated caseload of 1,025,165. Survivor pension cases will increase by 17,548 during the same period.

Public Law 95-204, effective January 1, 1978, increased by 6.5% benefits payable to current law pension recipients and parents receiving dependency and indemnity compensation. Legislation will be proposed in 1979 to provide a 6.1% cost of living increase or other improvements for these beneficiaries.

3. *Burial benefits.*—Provides for the payment of a burial allowance up to \$800 when a veteran dies as the result of a service-connected disability, the payment of a plot allowance of \$150 when an eligible veteran is not buried in a national cemetery or other cemetery under the jurisdiction of the United States, and the furnishing of a headstone or marker for the grave of a veteran. Other burial benefits paid from this appropriation include an allowance of \$250 to help the deceased veteran's family pay burial and funeral expenses; transportation costs where death occurs under VA care; provision of a flag for a casket; and transportation of the body of a service-connected deceased veteran to a national cemetery.

4. *All other.*—These payments cover miscellaneous benefits which are not readily combined with any of the preceding categories. They include payments for: retired officers, adjusted service and dependents pay, special allowance dependents, invalid lifts and other devices, tort claim settlements, veterans mortgage life insurance, veterans clothing allowance, death gratuities, veterans group life insurance, and beginning in 1977, soldiers and sailors civil relief. Public Law 95-117, effective October 1, 1977, increased clothing allowance rates from \$190 to \$203.

This appropriation finances the education, training, and rehabilitation of veterans and servicepersons who served since February 1, 1955 (post-Korean conflict veterans and post-Vietnam era veterans). It also finances educational assistance allowances for eligible dependents of those veterans: (a) who died from service-connected causes or have a total and permanent rated service-connected disability, and (b) servicepersons who were captured or missing in action.

A combination of fewer eligible people remaining and proposed legislation to terminate flight and correspondence programs reduces the 1979 funding estimates \$571.9 million below 1978.

1. *Education and training.*—The number of post-Korean conflict veterans and servicepersons in training is expected to decrease in 1979 to a level of 1,104,830. This decrease in trainees is attributable in part to more veterans reaching their delimiting date, the termination of new eligibles under the post-Korean GI bill, and proposed legislation which would eliminate flight and correspondence training after September 30, 1978.

Public Law 94-502 instituted the post-Vietnam era GI bill effective January 1, 1977. In 1979, 2,170 veterans are expected to train under this program. Proposed legislation would eliminate the pre-discharge remedial education program, the effects of which would take place in 1980.

The number of sons and daughters receiving educational assistance in 1979 is expected to decrease to a level of 86,200. The number of wives and widows is expected to increase to 23,590 in 1979. Proposed legislation would eliminate correspondence training after September 30, 1978.

Public Law 95-202 increased educational assistance rates effective October 1, 1977, for post-Korean veterans, sons and daughters, and wives and widows by 6.6% and increased the work study allowance for veterans to equate with the federally mandated minimum wage.

The following table provides a comparison of trainees and costs for the four types of trainees mentioned above.

Payments to Education loan fund: Public Law 95-202, created a system whereby eligible veterans and persons may accelerate their educational entitlement through use of an educational loan. Upon completion of training the VA would pay one-third of the loan as an acceleration of the trainee's entitlement. The cost to the Readjustment benefits appropriation is:

	1977 actual	1978 estimate	1979 estimate
Cost (in thousands).....	-----	\$105	\$1,194

Additional funding for the Education loan fund will also be required due to the increase in loans resulting from the enactment of Public Law 95-202. The cost to the Readjustment benefits appropriation for this will be:

Non-expenditure transfer required (in thousands).....	-----	\$17,200	\$74,300

2. *Special assistance to disabled veterans.*—Disabled veterans requiring vocational rehabilitation receive assistance to cover the costs of subsistence, tuition, books, supplies, and equipment. The number of trainees will continue to increase to 34,800 by 1979. Public Law 95-202 provided a 6.6% increase in subsistence allowances effective October 1, 1977, and increased the work study allowance to equate with the federally mandated minimum wage.

Specially adapted housing grants are provided to certain severely disabled veterans. The number is expected to increase to 892 in 1978 and then drop to 870 in 1979.

General and special funds—Continued

READJUSTMENT BENEFITS—Continued

The increase in 1978 from 1977 results from the effect of Public Law 95-117, effective October 1, 1977, which extended eligibility to veterans requiring canes, crutches, braces, or a wheelchair for locomotion as a result of the loss of use of one arm and one leg.

An allowance is provided to certain disabled veterans and certain persons on active duty toward the purchase price of new automobiles, adaptive equipment, and the maintenance and replacement of such equipment. Public Law 95-116, effective October 1, 1977, extended automobile grants and adaptive equipment eligibility to veterans of World War I and also to veterans of the peacetime period between the world wars. As a result of this legislation these programs will decline to 990 automobile grants and 10,790 adaptive equipment items in 1979 from a peak of 1,890 grants in 1977 and 12,310 adaptive equipment items in 1978.

The Veterans insurance and indemnities appropriation is made up of the former appropriations for Military and naval insurance, applicable to World War I veterans, the National service life insurance, applicable to certain World War II veterans, and the Servicemen's indemnities, applicable to Korean conflict veterans. The appropriation also provides supplemental funds for the Service-disabled veterans insurance fund. Financing is mainly by congressional appropriation, and by a small amount of premiums.

1. *Military and naval insurance.*—Payments are made to the U.S. Government life insurance fund as a reimbursement for claims traceable to extra hazards of military service. Payments are made also to policyholders and beneficiaries for claims on war-risk insurance issued to servicemen and veterans of World War I.

2. *National service life insurance.*—Payments are made to the National service life insurance fund as a reimbursement for costs of the following: (a) disability and death claims traceable to the extra hazards of service; (b) gratuitous insurance granted to certain persons who were unable to make application for national service life insurance; and (c) death claims on policies under waiver of premiums while the insured was on active duty.

Payments are made also to policyholders and beneficiaries on nonparticipating national service life insurance policies issued to World War II veterans with service-connected disabilities and on worthy exceptional cases that would not have been covered under the law in effect at the time of death.

The general decline in the policies in force is indicated in the following table (dollars in thousands):

3. *Payments to service-disabled veterans insurance fund.*—Payments are made to the Service-disabled veterans insurance fund to supplement the premium and other receipts of the fund in amounts necessary to pay claims on insurance policies issued to veterans with service-connected disabilities.

Financing.—Operations are financed by appropriation funding and a small amount of premiums.

The Veterans Administration is committed to providing the highest quality medical care to eligible veteran beneficiaries. To this end, the VA will operate the largest medical care delivery system in the country, with 172 hospitals, 16 domiciliaries, 92 nursing homes, and 228 outpatient clinics in 1979. In addition to these facilities, patients are cared for in contract Federal and community hospitals, community nursing homes with VA support and State-run domiciliaries, nursing homes and hospitals. This system will treat over 1.4 million patients in 1979, and over 18.2 million outpatient medical and dental visits will be made to VA and community facilities.

In 1979, a continued priority for VA health care will be meeting the needs of veterans with service-connected disabilities and of aging veterans. To do so, the Veterans Administration will continue its efforts to increase the flexibility of the medical care delivery system by providing treatment through the mode and program most suited to the patient's need. The use of outpatient and ambulatory care programs will obviate the need for some hospital admissions and use of community living arrangements such as home-based care, foster home care, et cetera, will permit increased outplacement of hospitalized veterans with a corresponding reduction in length of stay. Arrangements will be continued and improved to provide for hospital and medical care, in the private sector, for certain dependents and survivors of veterans, as authorized by law.

In conjunction with this mission, it is essential that effective education and training programs be conducted within the VA which serve several purposes: to enable VA personnel to obtain the latest information concerning treatment and related clinical matters; to provide a recruitment source for highly qualified physicians and other personnel; and to contribute on a selective basis to those portions of the national health manpower pool which have a continuing need for additional or replacement personnel. Since the VA is one of the Nation's largest employers of health service personnel, it is appropriate that this agency conduct these education and training activities.

The Veterans Administration is also continuing in an expanding program of demonstrations of new models of health organization and delivery including regionalization of its hospitals and improvements in design and location of outpatient clinics.

Specific increases are requested in 1979 for (1) workload increases, including new hospitals, (2) new specialized medical services, (3) noncontrollable payroll increases, (4) increased usage of drugs, utilities, communications, pro-

visions, prosthetics, medical and dental supplies, and operating supplies, and (5) maintenance and repair, minor improvements, and equipment.

A supplemental appropriation in the amount of \$4,288 thousand for 1978 is anticipated under supplemental now requested, existing legislation.

1. *Medical research.*—This program is comprised of institutional and special research and is designed to utilize the unique capability of the Veterans Administration hospital system in answering questions which can only be answered by a large number of patients under a single management. Examples of some projects included under institutional research are: Alcohol and cirrhosis of the

liver; aging; schizophrenia; spinal cord injury; impact of psychotherapeutic drugs; and anticoagulant therapy in pulmonary embolism. Certain cooperative studies included under special research are: Surgical treatment of angina pectoris; cancer chemotherapy; and relative potency and side-effect liability of new and marketed analgesics and sedatives.

2. *Rehabilitative research.*—This is a research program to develop and test prosthetic, orthopedic, sensory aids and adaptive equipment for the purpose of improving the care and rehabilitation of disabled eligible veterans, including amputees, paraplegics, and the blind.

3. *Health services research.*—This program provides support for health services projects at VA hospitals for improving the effectiveness and economy of delivery of health services and improving the accessibility of services to veterans.

1. *Medical, hospital, and domiciliary administration* covers the central office development, implementation, and administration of policies, plans, and broad objectives, as well as providing for executive direction of all agency medical programs.

2. *Postgraduate and inservice training* provides for tuition and registration payments, lecturer fees, travel expenses, and training materials incidental to continuing education programs for professional medical and administrative staff. This also serves as a media for disseminating information on medical advances resulting from research efforts.

3. *Exchange of medical information* provides for entering into agreements with medical schools, hospitals, research centers, and individual institutions and members of the medical-scientific community under which physicians and staff at hospitals not affiliated with medical and other schools will maintain closer contact with such schools and other primary sources of medical information.

¹ Includes capital investment as follows: 1977, \$3,474 thousand; 1978, \$3,438 thousand; 1979, \$19,879 thousand.

This appropriation provides for the administration of nonmedical veterans benefits through the Department of Veterans Benefits; operation and maintenance of 108 national cemeteries by the National Cemetery System; data processing operations and communications systems through the Department of Data Management; and top management direction and support through agency-level staff offices.

Amounts requested for 1979 are \$37.6 million above the total 1978 estimate including supplemental requirements. These additional funds are requested to support further development of the revised Compensation, Pension and Education Target System; the net impact of within-grade salary increases; and other increases in communications and program support costs.

1. *General administration.*—This activity contains the executive direction of the agency and several top level supporting offices. In addition, it covers the Board of Veterans Appeals which decides all cases of appeals to the Administrator on claims involving benefits under veterans legislation.

2. *Data management.*—This activity manages all computer operations and provides technical support and assistance in the development of new computer and communications systems.

3. *Veterans benefits.*—This activity determines eligibility and adjudicates all claims for compensation, pensions, educational assistance, housing loan assistance, and insurance awards. A summary of program objectives and anticipated workload is included in the following paragraphs:

(b) *Veterans services.*—The mission of this service is to provide information, advice and assistance concerning the availability and procurement of benefits under the law to all veterans, their dependents, and survivors.

(c) *Compensation, pension, and education.*—This activity provides timely and efficient service to veterans and their dependents related to compensation, pension, and education benefits under the various laws enacted by Congress. Compensation and pension workloads are expected to slightly decline, and the number of trainees is expected to decrease as reflected in the following table (in thousands):

	1976 actual	1977 actual	1978 estimate	1979 estimate

(d) *Loan guaranty.*—This program mission is to provide a viable form of credit assistance whereby housing credit needs of veterans and servicemen may be satisfied by private capital on more liberal terms than generally available to nonveterans. Added responsibilities associated with the Housing Act of 1974 and the Real Estate Settlement

Procedures Act of 1974 produce a continued high level of loan activity. Key workloads are listed below (in thousands):

These funds finance major construction, where the estimated cost of the project is \$2 million or more, for (1) construction of new facilities, (2) modernization of existing facilities, and (3) alteration and improvement of facilities under the jurisdiction of the Veterans Administration. It provides funds for planning, architectural and engineering services, and site acquisition in addition to construction funds.

A program funding level of \$320,554 thousand is recommended for 1979 under the Construction, major appropriation to be financed with new budget authority of \$295,855 thousand and reprogramming of \$24,699 thousand from prior appropriated funds.

The request provides \$81,000 thousand to construct the replacement hospital project at Seattle, Wash., and \$139,100 thousand to construct the replacement hospital project at Portland, Oreg.

Unobligated 1977 balances in the amount of \$6,063 thousand were transferred into this account on October 1, 1976, from the expiring account, "Construction of hospital and domiciliary facilities."

These funds finance minor construction, where the estimated cost of the project is less than \$2 million, for (1) construction of new facilities, (2) modernization of existing facilities, (3) alteration and improvement of facilities under the jurisdiction of the Veterans Administration, and (4) expenses of the Office of Construction. It provides funds for planning, architectural and engineering services, and site acquisition in addition to construction funds.

A total request of \$121,147 thousand is recommended for 1979 to be financed with budget authority (appropriation) for Construction, minor projects. This amount includes \$91,447 thousand for other improvement projects, \$1,320 thousand for computer centers additions and alterations, \$2,080 thousand for regional offices replacement or renovation, and \$26,300 thousand for general administration. Within the general administration funds, \$4,000 thousand is included for contract advance planning; this is the second consecutive year that funds will be provided for the development of major projects through the preliminary plans stage.

Unobligated 1977 balances in the amount of \$1,614 thousand were transferred into this account October 1, 1976, from the expiring account, "Construction of hospital and domiciliary facilities."

This program, as amended by Public Law 95-62, approved July 5, 1977, provides grants to assist the States to construct State home facilities for furnishing domiciliary or nursing home care to veterans, and to expand, remodel or alter existing buildings for furnishing domiciliary, nursing home, or hospital care to veterans in State homes. Grants for State nursing facilities may not provide for more than 2½ beds per thousand veteran population in any State. Grants to any one State may not exceed one-third of the amount appropriated in any fiscal year.

Public Law 95-62 provides for a single authorization of up to \$15 million, VA participation in construction of new domiciliaries as well as new nursing homes, and for sums appropriated to remain available until expended.

As of September 30, 1977, funds in excess of \$64 million have been obligated to help finance 125 projects in 27 States.

Grants are currently made to the Republic of the Philippines for the medical care and treatment, at the Veterans Memorial Medical Center or at other facilities by contract, of Philippine Commonwealth Army veterans and new Philippine Scouts. Paragraph 632 of title 38, United States Code, authorizes up to:

1. \$2 million annually for medical care and treatment, of which total payments for nursing home care may not exceed \$250 thousand. The payment for nursing home care is on the same terms and conditions as for hospital care for any Commonwealth Army veteran or new Philippine Scout and at a per diem rate not to exceed 50% of the hospital per diem rate.

2. \$50 thousand annually for grants for education and training of health service personnel.

3. \$50 thousand annually for grants for replacement and upgrading of hospital equipment and physical plant, with such amount to remain available until expended.

Current legislation expires September 30, 1978, and extension is not proposed.

LOAN GUARANTY REVOLVING FUND—Continued

To assist eligible veterans to obtain credit for the purchase or construction of homes, the Veterans Administration guarantees loans made by private lenders. The total number of guaranteed or insured loans closed is expected to be 382,000 in 1978 and 372,000 in 1979 bringing the total amount of guaranteed loans outstanding by the end of 1979 to \$89.4 billion. The Loan guaranty revolving fund provides for expenses and revenues of property and loan transactions resulting from settlement of guaranty claims.

Budget program.—1. *Real property acquisitions.*—Private lenders who have acquired property as a result of foreclosure on defaulted guaranteed or insured loans may elect to convey that property to the Veterans Administration. The table below reflects this activity and excludes the amount of indebtedness established against the veteran:

	1977 actual	1978 estimate	1979 estimate

Total cost (in thousands).....	\$327,678	\$346,468	\$376,955

2. *Property improvements.*—After conveyance of the property to the Veterans Administration, capital expenditures are often necessary to place the property in salable condition. The following table summarizes these expenditures:

	1977 actual	1978 estimate	1979 estimate
Number of improvements to acquired properties.....	17,515	17,575	18,225
Average cost per property.....	\$1,531	\$1,700	\$1,800
Total cost (in thousands).....	\$26,809	\$29,888	\$32,805

3. *Claims processed.*—These payments are made to lenders in accordance with the Veterans Administration guaranty contract and represent the difference between the amount owed by the veteran on a defaulted loan and the value of the foreclosed property (as established by Veterans Administration). These payments are in addition to property acquisition costs shown in 1, above. The following table reflects this activity:

	1977 actual	1978 estimate	1979 estimate
Individual homes:

4. *Repurchase of loans sold, net.*—Pursuant to Veterans Administration Regulation 4600, dated March 22, 1962, the Administrator may sell (with full recourse) loans which have been created incident to the sale of Veterans Administration acquired property. If the loans go into default, the Administrator may repurchase them. The following table reflects this activity:

Average cost per repurchase.....	\$17,549	\$18,400	\$19,300
Total cost (in thousands).....	\$43,522	\$44,528	\$44,390

5. *Cash advances—Vendee loans.*—Cash expenditures are not involved in the establishment of vendee loans or installment contracts. However, it is often necessary to subsequently advance cash on behalf of the borrower in order to protect the interest of the Government.

	1977 actual	1978 estimate	1979 estimate
Total cost (in thousands).....	\$3,489	\$2,500	\$2,550

6. *Loans acquired.*—Guaranteed or insured loans in a default status may be purchased by the Administrator to avoid foreclosure when temporary forbearance will allow the veteran borrowers to cure the default. The following table reflects this activity:

10. *Interest expense on participation certificates.*—Represents the amount of interest the trustee is required to pay holders of participation certificates in respect to which vendee accounts have been set aside pursuant to 38 U.S.C. 1820(c). To the extent this expense exceeds the amount of interest collections on an equal amount of loans pledged to the trustee, participation sales insufficiencies result.

Financing.—Normal revenue and receipts consist principally of interest income, cash proceeds from the

sale of real property acquired as a result of foreclosure on guaranteed or insured loans, and repayments on mortgages made incident to such sales. It is estimated that \$224.0 million in 1978 and \$240.1 in 1979 will be received from these sources. Also, an estimated \$272.0 million in vendee loans will be sold in 1978 and \$311.1 million in 1979.

The Department of Housing and Urban Development—Independent Agencies Appropriation Act, 1977 (Public Law 94-378) provided that the unobligated balances including retained earnings of the Direct loan revolving fund shall be available for transfer to the Loan guaranty revolving fund. No transfers are expected in 1978. In 1979, however, a transfer of \$100.0 million is expected.

Direct loans are made to veterans to purchase, construct, or improve homes, to purchase farms on which there are farm residences to be occupied by the veterans as their homes; or to construct, alter, repair, or improve farm dwellings to be occupied by the veterans as their homes.

Such loans are made only in rural areas, small cities, and towns where private credit for the making of guaranteed loans is and has been generally unavailable. The maximum term is 30 years and the maximum loan amount was increased from \$25 to \$33 thousand effective October 1, 1976, pursuant to Public Law 94-324. The interest rate is the same as the rate allowable for guaranteed loans.

Budget program—1. Direct loans to veterans.—Under existing legislation, there is no terminal date on the authority to make direct loans. The Veterans Housing Act of 1970 revived the expired unused loan entitlement of World War II and Korean conflict veterans and provided that direct lending authority and veterans eligibility would be open-ended until their entitlement is used.

2. **Cash advances and repurchases, vendee loans.**—Cash expenditures are not involved in the establishment of vendee loans or installment contracts. However, it is often necessary subsequently to advance cash on behalf of the borrower in order to protect the interest of the Government. These advances are added to unpaid loan balances. In addition, vendee loans sold with full recourse may be repurchased if they go into default.

3. **Property improvements.**—Properties are acquired by foreclosures on, or the voluntary conveyance of, title to properties securing loans owned by the Veterans Administration. Capital expenditures are often necessary to put the property in salable condition. The following table summarizes these expenditures:

Number of improvements to acquired properties.....	1977 actual	1978 estimate	1979 estimate
.....	89	100	95
Average cost per property.....	\$539	\$630	\$660
Total cost (in thousands).....	\$48	\$63	\$63

4. **Interest on borrowings.**—Interest expense is accrued monthly. These accruals are computed on the interest bearing capital of the fund and adjusted for the unexpended balance of the fund.

5. **Property management and selling expense.**—Property management expense includes local real estate taxes, services performed by management brokers, and maintenance of the property in salable condition; sales expense includes brokers' fees and advertising costs incident to the sale of property owned by the Veterans Administration. This cost averages approximately 5% of the selling price. Operating expenses generally include a variety of miscellaneous expenses paid by the Government incident to closing and liquidating loans:

6. **Interest expense on participation certificates.**—Represents the amount of interest the trustee is required to pay holders of participation certificates in respect to which direct loans have been set aside. To the extent this expense exceeds the amount of interest collections on an equal amount of loans pledged to the trustee, participation sales insufficiencies result.

Financing of participation sales insufficiencies is as follows (in thousands of dollars):

7. *Discount on sale of loans.*—Represents the discount absorbed by VA incident to the sale of direct loans. Discounts occur when the contract rate of interest does not afford a yield commensurate with the market.

Financing.—Normal revenue and receipts consist principally of interest income and repayments on direct loans made to veterans. It is estimated that \$130.2 million in 1978 and \$123.4 million in 1979 will be received from these sources. In addition, it is estimated that \$54.2 million will be realized in 1978 from the sale of direct loans, and \$59.6 million in 1979.

The Veterans Canteen Service was established by Congress in 1946 to furnish at reasonable prices merchandise and services necessary to the comfort and well-being of veterans in hospitals and domiciliaries operated by the Veterans Administration (38 U.S.C. 4201-08).

Budget program.—Sales are expected to be \$138,123 thousand in 1978 and \$157,059 thousand in 1979.

Financing.—No appropriation by the Congress will be required for the operation of the Veterans Canteen Service during 1979. Operations will be financed from current revenues. The Congress originally appropriated a total of \$4,965 thousand to establish and operate the Service. Funds in excess of the needs of the Service totaling \$12,068 thousand have been paid to the Treasury as of September 30, 1977.

Operating results and financial condition.—Operating revenue is expected to be sufficient to cover operating expenses. Retained earnings are required for necessary working capital, therefore, no funds are available for payment to the Treasury during 1978.

This fund finances the payment of claims on nonparticipating life insurance policies issued and currently open for new issues to veterans having service-connected disabilities. The program provides insurance coverage for service-disabled veterans at standard rates. As a result, premium payments do not cover operating and capital reserve requirements. Annual deficits are met by transfers from the Veterans insurance and indemnities appropriation. Administrative expenses are paid from the General operating expenses appropriation.

Operating costs.—(1) *Death claims.*—Represents payments to designated beneficiaries.

(2) *All other.*—This category represents payments to policyholders who surrender their policies for their cash value and hold endowment policies which have matured.

Capital investment.—A policyholder may borrow up to 94% of the value of his policy. This activity increases with the increased number of policyholders.

The general increase in the activity of this fund is indicated in the following table (dollars in thousands):

	1976 actual	1977 actual	1978 estimate	1979 estimate
Number of policies.....	167,044	175,770	180,900	185,100
Insurance in force.....	\$1,508,707	\$1,587,083	\$1,633,000	\$1,671,000

Financing.—Operations are financed from premiums and other receipts. Additional funds are derived from the Veterans insurance and indemnities appropriation, instead of direct appropriations to this fund. It is estimated that the payment will be \$0.1 million in 1978 and \$3 million in 1979.

Operating results and financial condition.—Since premium and other receipts are insufficient to cover operations, the fund continues to project liabilities in excess of assets. The deficit is expected to reach an estimated \$143.7 million by September 30, 1979.

This fund pays claims and administration costs on nonparticipating life insurance policies issued during the period May 1, 1965, through May 2, 1966, under three life insurance programs: (1) service-disabled standard insurance, (2) service-disabled rated insurance, and (3) nonservice disabled insurance established by the National Service Life Insurance Act of 1940, as amended (38 U.S.C. 725(b)(c)), availing disabled World War II and Korean conflict veterans an opportunity to acquire life insurance coverage who were no longer eligible for other Government insurance because of delimiting dates.

Budget program.—1. *Death claims.*—Represents payments to designated beneficiaries.

2. *All other.*—This category represents payments to the General operating expense appropriation for the administrative costs of processing claims and maintaining the accounts, and those policyholders who: (a) surrender their policies for cash value; (b) hold endowment policies which have matured; and (c) have purchased total disability income coverage and subsequently become disabled.

3. *Policy loans made.*—A policyholder may borrow up to 94% of the cash value of his policy.

The following table reflects the decrease in the number of policies and the amount of insurance in force (dollars in thousands):

This fund is used to make loans up to \$2,500 to eligible persons training under chapters 32, 34, and 35 of title 38, U.S.C., who are without sufficient funds to meet their expenses (38 U.S.C. 1737). Repayments are used to make new loans.

Public Law 95-202, approved November 23, 1977, has broadened the scope of eligibility for loans to such an extent that the number of loans is expected to increase from 14,282 in 1977 to 60,440 in 1978 and 63,320 in 1979. As a result, additional budget authority is required—\$17.2 million in 1978, and \$74.3 million in 1979.

This fund finances the payment of group life insurance premiums to private insurance companies under the Servicemen's Group Life Insurance Act of 1965 (38

U.S.C. Sec. 765-776) as amended and any expenses incurred by the Veterans Administration in administration of the act.

Budget program.—1. *Premium payments.*—This item represents the payment of premiums to private insurance companies. The decline in payments during 1978 and 1979 is consistent with the estimated reduction in the number of members.

2. *Payment to General operating expenses appropriation.*—This item represents payment for administrative costs incident to the program. An annual reduction in requirements is forecast.

This revolving fund, established pursuant to the Veterans Omnibus Health Care Act of 1976, Public Law 94-581, approved October 21, 1976, provides a mechanism for the furnishing of rehabilitative services to certain veteran beneficiaries who are receiving medical care and treatment from the Veterans Administration.

Funds to operate the various rehabilitative activities and provide for the therapeutic work for remuneration for patients and members in Veterans Administration health care facilities are derived from contractual arrangements with private industry or nonprofit entities. This is a self-sustaining fund and therefore no appropriation is required to support these activities.

Under the provisions of 38 U.S.C. 5011, the Supply fund finances on a reimbursable basis the cost of warehouse inventories at depots and field stations and selected items of equipment procured centrally. It also finances, on the same basis, items and services to other Federal agencies who either request or are assigned to the Veterans Administration for support.

Budget program.—The fund provides financial support for: (1) Maintenance of depot and field station inventories; (2) maintenance and operation of three supply depots; (3) a publications depot including printing services to VA installations on a centralized basis; (4) operation of a service and reclamation program operating out of the supply depots; (5) centralized periodical procurement and library cataloging; and (6) a marketing center or central buying office.

The publications and reproduction program provides printing service and distribution of printed matter to VA installations. Printed matter is acquired in accordance with the rules of the Joint Committee on Printing from the Government Printing Office, the General Services Administration, a VA-operated plant, and from commercial sources.

The marketing center is responsible for determining the levels of inventories to be carried at depots and acquiring stock to maintain such levels. It is also responsible for the central contracting of items not available from other Government sources for VA installations and other Government agencies as may be determined economical or advisable.

The Supply fund does not finance costs for the operation and administration of supply activities at field stations. These costs are charged directly to applicable appropriations.

Financing.—Costs of supplies, equipment, and services acquired through the Supply fund and Supply fund operating costs are recovered through reimbursements from the VA appropriations and other Government agencies receiving goods and services.

Operating results and financial conditions.—The fund operated at a profit of \$343 thousand in 1977 and carried forward a loss of \$477 thousand from prior years. During the past 10 years and transition quarter the fund has shown a loss of \$97 thousand on a total of \$2 billion cost of

Funds are made available from grants approved by the Public Health Service under the provisions of Public Law 90-31, June 24, 1967.

Mental Health Amendments of 1967 provides that appropriations to the Public Health Service for research, training, or demonstration project grants shall also be available, on the same terms and conditions as apply to non-Federal institutions, for grants for the same purpose to hospitals of the Veterans Administration. Funds and employment for 1979 have been transferred to and reflected under the appropriation Medical and prosthetic research.

This account consists of voluntary contributions by eligible servicepersons and Department of Defense contributions on behalf of specific servicepersons. Its purpose is a depository for that portion of the contributory matching educational program which provides educational assistance payments to participants who entered the service after December 31, 1976, and are pursuing training under chapter 32 (38 U.S.C.). The Department of Defense has advised us that they do not anticipate making any contributions on the behalf of servicepersons until 1979. The estimated activity in the fund follows:

This fund was established in 1940 as the financing mechanism for the World War II servicemen's and veterans' insurance program authorized by the National Servicemen's Life Insurance Act of 1940 (72 Stat. 1154). Over 22 million policies have been issued under this program. Since issuance of new policies ended in 1951, the insurance in force is estimated to decrease in 1979 by \$366 million, representing a decrease of 79,000 policies. Activity of the fund reflects a rising claim, but declining loan workload. The trend in the number and amount of policies in force is shown as follows (dollars in thousands):

This fund is operated on a commercial basis to the extent possible consistent with law. Administrative expenses are charged to the General operating expenses account.

The income of the fund is derived from premium receipts, interest on investments, and payments which are made to the fund from the Veterans insurance and indemnities appropriation for claims: (1) resulting from extra hazards of the veterans' service, and (2) arising on certain policies held by personnel on active duty.

Assets of the fund, which are largely invested in special Treasury interest-bearing securities and in policy loans, are expected to increase from \$8,638 million as of September 30, 1977, to \$9,336 million as of September 30, 1979. The actuarial estimate of policy obligations as of September 30, 1977, totals \$8,551 million, leaving a balance of \$87 million for contingency reserves.

VETERANS SPECIAL LIFE INSURANCE FUND—Continued

This fund finances the payment of claims on life insurance policies issued before January 31, 1957, to veterans who served in the Armed Forces subsequent to April 1, 1951 (38 U.S.C., section 723). No new policies can be issued and the number of policies in force are expected to decline by 7,979 in 1978 and 17,100 in 1979. Policyholders may elect to purchase total disability income coverage with the payment of additional premiums.

Budget program.—1. *Death claims.*—Represents payments to designated beneficiaries.

2. *Cash surrenders.*—A policyholder may terminate his insurance by cashing in his policy for its cash value.

3. *Dividends.*—Public Law 93-289, enacted May 24, 1974, provides for policyholders to participate in the distribution of annual dividends.

4. *All other.*—Classified in this category are payments to policyholders who: (a) hold endowment policies which have matured; (b) have purchased total disability income coverage and subsequently become disabled; and (c) are paid interest on dividend credits and deposits.

The following table reflects the decrease in the number of policies and the amounts of insurance in force (dollars in thousands):

	1976 actual	1977 actual	1978 estimate	1979 estimate
Number of policies.....	584,518	577,579	569,600	552,500
Insurance in force.....	\$5,117,370	\$5,060,952	\$4,997,076	\$4,855,980

Financing.—Payments from this fund are financed primarily from premium receipts and interest on investments.

Operating results and financial condition.—Favorable mortality experience on insurance written against this fund has kept death claim payments well below the amount of premium and interest receipts, thereby producing an annual increase in the retained earnings of the fund. The retained earnings have, since the inception of the program, been reduced by payments of a special dividend and subsidy payments to the Veterans insurance and indemnities appropriation and the Veterans reopened insurance fund. Excess earnings of the fund are now distributed to the policyholders in the form of an annual dividend.

Legislation is planned to authorize the Administrator to provide professional mental and psychological readjustment services to new Vietnam era veterans during a period not to exceed 1 year after discharge from military service, or for Vietnam era veterans already discharged from military services, for the 1-year period following enactment of this authority. This legislation is estimated to increase 1979 budget authority by \$9.9 million.

Legislation also would be proposed to authorize the Administrator to negotiate fee-for-services contracts with community agencies for the treatment of drug and alcohol dependent patients in psychiatric residential treatment centers, therapeutic communities, or halfway houses. Enactment of this legislation is estimated to increase budget authority by \$2.4 million in 1979.

Legislation is planned to effect reimbursement to the Veterans Administration by workers' compensation and private insurers for the cost of inpatient and outpatient

hospital medical care and treatment to veterans for their non-service-connected disabilities. Reimbursement from this program is estimated to be \$120 million in 1979.

Legislation would be proposed to amend current legislation to limit the payment for reimbursement of travel expenses of beneficiaries provided medical care for non-service-connected disabilities. This proposal is estimated to save \$38.5 million in 1979.

Legislation also would be proposed to extend the provisions of the Veterans Administration Physician and Dentists Pay Comparability Act for an additional year, to September 30, 1979. This legislation is estimated to increase 1979 budget authority by \$3.9 million.

ADMINISTRATIVE PROVISIONS

Not to exceed 5 per centum of any appropriation for the current fiscal year for "Compensation and pensions", "Readjustment benefits", and "Veterans insurance and indemnities" may be transferred to any other of the mentioned appropriations, but not to exceed 10 per centum of the appropriations so augmented.

Appropriations available to the Veterans Administration for the current fiscal year for salaries and expenses shall be available for services as authorized by 5 U.S.C. 3109.

No part of the appropriations in this Act for the Veterans Administration (except the appropriations for "Construction, major projects" and "Construction, minor projects") shall be available for the purchase of any site for or toward the construction of any new hospital or home.

No part of the foregoing appropriations shall be available for hospitalization or examination of any persons except beneficiaries entitled under the laws bestowing such benefits to veterans, unless reimbursement of cost is made to the appropriation at such rates as may be fixed by the Administrator of Veterans Affairs. OTHER INDEPENDENT AGENCIES

ACTION

ACTION, the Federal agency for volunteer service, was established on July 1, 1971. The agency brings together a number of volunteer programs including the Peace Corps, Volunteers in Service to America (VISTA), Foster Grandparents (FGP), and Retired Senior Volunteer Program (RSVP).

Funds for ACTION are requested in two appropriations: (1) Operating expenses, domestic programs; and (2) Operating expenses, international programs (Peace Corps). These appropriations each contain a share of the agency's common support costs. This share is included in the program support activity in each appropriation. Special schedules of these common support costs are presented following the regular appropriation schedules.

International programs.—Major elements funded under this appropriation are the recruitment and training of applicants, volunteer operations overseas, promotion of international voluntarism, cooperation with third party volunteer organizations and the management and staff required to support the volunteers.

1. *Peace Corps training.*—Each volunteer will receive intensive training which is designed to develop language abilities, provide a knowledge of the country of assignment and further develop required job skills. Beginning in 1979, most trainees will receive specialized training in a secondary discipline. In addition, several specialized recruiting activities are conducted in this activity.

2. *Peace Corps volunteers.*—In 1979, volunteers will be serving in approximately 65 countries throughout the world. Volunteer assignments are concentrated in seven basic areas of human needs; health and nutrition, food and water, knowledge and skills, economic development and income, energy and conservation, community services, and housing. In 1979, the greatest numbers of volunteers will be serving in health, food, and educational programs.

3. *Special international volunteer programs.*—In 1979 ACTION will continue programs to encourage and assist international voluntarism. It will participate in ongoing multinational volunteer programs and development of appropriate technology manuals.

4. *Program support.*—This activity includes salaries, travel, rents and other costs associated with staff operations in the United States and abroad. It also includes a share of ACTION agencywide costs, such as recruitment; medical services; policy and planning; auditing; legal counsel and similar functions.

This appropriation finances the Federal share of volunteer programs within the United States and its territories.

1. *Volunteers in Service to America.*—The VISTA program provides full-time volunteers to assist low-income communities working on the problems of poverty. In 1979 VISTA volunteers will organize people for self-help through grassroots community groups. Special emphasis will be made in three areas: community regeneration, health and nutrition and energy conservation.

2. *Service learning programs.*—The service learning programs provide opportunities for high school and college students to learn as they perform service to their communities. Particular emphasis in 1979 will be given to integrating, and refocusing the national student volunteer program and youth challenge program. The University Year for ACTION program will be phased out during 1979.

3. *Older American volunteer programs.*—These programs provide opportunities for Americans, age 60 and over, to volunteer in their communities to serve the infirmed, the emotionally disturbed, the mentally retarded, and other individuals in need. In the Senior Companion Program volunteers are working to help the frail elderly maintain independent living arrangements. In 1979, the Foster Grandparent Program will be exploring ways to deinstitutionalize children whenever possible and finding new ways to serve those in institutions.

4. *Citizen participation and volunteer demonstration programs.*—These programs will work to stimulate widespread citizen participation in voluntary action through technical assistance and model demonstration programs. They will promote involvement of local citizens and mobilize private resources to help communities build their own capacity to meet their human needs. In addition, funds will be used to evaluate the concept of a national youth service.

5. *Program support.*—Costs of program direction and administration both at headquarters and at the regional and State offices are financed by this activity. This activity also includes a share of agencywide support and evaluation costs.

¹ Includes capital investment as follows: 1978, \$2 thousand; 1979, \$6 thousand.

The Conference, established pursuant to 5 U.S.C. 571, et seq., is authorized on a permanent basis to assist the President, the Congress, the administrative agencies, and executive departments in improving existing administrative procedure, including achievement of needed regulatory reform. It is responsible for conducting studies of the efficiency, adequacy, and fairness of present procedures by which the Federal administrative agencies and executive departments determine the rights, privileges, and obligations of private persons. On the basis of such studies the Conference issues formal recommendations for improvements and then encourages implementation of the recommendations through appropriate agency, congressional, or judicial action.

In addition to its research activities, the Conference also arranges for the interchange among administrative agencies of information useful in improving administrative procedures; collects, tabulates, analyzes, and publishes statistics from administrative agencies to identify and correct delays and other problems in the administrative process; and, on an ongoing basis, furnishes assistance and advice on matters of administrative procedure to the agencies, Congress, and others.

The Advisory Committee on Federal Pay was appointed in accordance with the Federal Pay Comparability Act of 1970. The Committee assists the President in carrying out the policy of comparability in pay between major Federal statutory pay systems and private enterprise. The Committee reviews the annual report of the President's pay agent and considers the recommendations of representatives of Federal employees and other officials of the Federal Government. The Committee then prepares for the President an independent report with its findings and recommendations.

The Committee meets jointly throughout the year with the President's pay agent and the Federal Employees Pay Council in an attempt to reach early resolution of issues between them and thus to improve labor relations in the Federal Service and to reduce the number of decisions regarding white-collar pay that must be reached in a crisis atmosphere. It provides advisory opinions on unresolved issues.

The Committee is charged with an ongoing review of the way in which Federal compensation derives from, and is dependent upon, the forces at work in the private sector, considering the impact of both Federal and private sector pay on the national economy and making periodic reports to the President on changes which should be proposed in Federal compensation policies and practices.

The American Battle Monuments Commission is responsible for the maintenance and construction of U.S. monuments and memorials commemorating the achievements in battle of our Armed Forces since April 6, 1917, controlling erection of monuments and markers by U.S. citizens and organizations in foreign countries, and for the design, construction, and maintenance of permanent military cemetery memorials in foreign countries.

Altogether, the Commission maintains on foreign soil 23 military cemetery memorials; 11 monuments and memorials not a part of the cemeteries; and 2 bronze tablets. In addition, the Commission maintains three large memorials on U.S. soil.

Service men and women who were missing in action, or lost or buried at sea are memorialized at the cemeteries and memorials by the inscription of their names on the "Tablets of the Missing." Additional "Tablets of the Missing" are being constructed at the Honolulu memorial for the missing of Vietnam.

In 1979, the Commission will initiate construction of a memorial on Saipan to the Americans who died in the Marianas Campaign.

The Agency advises the President and the Secretary of State on arms control and disarmament policy and its implementation, and participates in negotiations with other countries looking toward international agreements to control, reduce, or eliminate arms. Among the activities to which ACDA resources will be devoted in 1979 are support of the Strategic Arms Limitation Talks with the Soviet Union and other arms controls negotiations, support of the nuclear safeguards program of the International Atomic Energy Agency and external research relating to the development of alternative nuclear fuel cycles consistent with the President's nonproliferation objectives, and activities relating to arms transfer reviews and the preparation of arms control impact analyses of weapons systems.

The Agency's external research in these areas is conducted through contracts with nongovernmental research organizations and reimbursable agreements with other U.S. Government agencies.

The Board regulates the economic aspects of domestic and international air carrier operations. In 1979, the Board will place added emphasis on enhancing the climate for competition and assuring that the needs of travelers and the shipping public are met.

1. *Awards of operating authority.*—This program involves regulation of domestic and international operating authority. For 1979, the awards program will be directed toward the achievement of greater reliance on competitive market forces. This will result in an increase in route hearing activity in the areas of competing applications for authority in the same market, proposals allowing new carriers to enter the system and applications designed to tap new markets.

In international aviation, the Board's workload will continue to expand due to the growing complexity of bilateral and multilateral negotiations/consultations. The Board will participate in a Government-wide effort to increase the effectiveness of U.S. international aviation procedures and policy.

2. *Regulation of fares and rates.*—This program covers regulation of passenger fares, cargo rates, service mail rates, and subsidy rates. For 1979, major emphasis in support of our goal to foster competition will yield a significant growth in rate changes as competitive types of filings involve market oriented, rather than system or industrywide proposals which predominated in the past. Low-fare international and domestic service will be encouraged.

3. *Regulation of agreements and interlocking relationships.*—This program includes: review of applications for interlocking directorates, agreements between air carriers, and review of agreements on fares and rates under which U.S.-flag carriers participate in the International Air Transport Association (IATA). In 1979, the Board plans to encourage competition by processing new cases and agreements, decreasing existing backlogs and monitoring control and interlocking relationships for conflicts of interest. In the IATA area, the Board will handle a growing workload stemming primarily from the shorter duration of international rate agreements.

4. *Regulation of air carrier accounting and reporting.*—This program includes: administration of uniform systems of accounts and reports; substantiation of carriers'

conformance with regulations; and onsite audits of carriers' records. In 1979, the Board plans to develop new accounting and reporting systems that will place the Board more in line with business accounting practices and to implement a data system to monitor and evaluate the liberalized and expanded charter activities plus develop an on-line traffic and financial system. Also, the Board's research, analytical, and informational capabilities will be reinforced in order to assist the Board in hearing competitive cases.

5. *Enforcement and consumer advocacy.*—This program includes the handling of passenger and shipper complaints; investigation of violations of the economic provisions of the Federal Aviation Act; the prosecution of enforcement cases in the courts; and representation of consumer interests in Board proceedings. During 1979, the enforcement activity will continue to focus on the seven substantive program areas (consumer matters, charters, unauthorized air carriers, accounting and reporting, cargo, agreements/antitrust, rebating, and discounting). Regarding the consumer, the Board will step up its advocacy activities by participating in additional route and rate cases, upgrading our consumer complaint and correspondence activities and by conducting a survey of consumer reaction to fare and service alternatives and the quality of service provided by individual carriers.

The Civil Aeronautics Board fixes rates of subsidy compensation to promote the development of air transportation required for the commerce of the United States, the Postal Service, and the national defense. The Board makes subsidy payments to subsidy-eligible certificated air carriers who have demonstrated a statutory need therefor. Subsidy is provided to cover the carrier's operating loss incurred under honest, economical, and efficient management and to provide it an opportunity to earn a fair return (after taxes) on investment used and useful in the air transportation services.

Of the 43 certificated U.S. domestic and international air carriers, only 7 local service carriers, 2 regional carriers and 3 Alaskan carriers are currently subsidized.

1. *Assuring a merit work force.*—This activity consists of: (a) keeping personnel policies current; (b) staffing for Federal employment; (c) assuring the fitness and suitability of the Federal work force; and (d) improving personnel and management. In 1979 the Commission will meet increased demands for staffing services; improve employment examinations through new instruments, procedures, documentation, and rating schedules; follow up on prior agency personnel evaluations to insure identified inadequacies have been corrected; and strengthen agency training programs.

The workloads for this activity are reflected on the following table:

PRODUCTION COUNT

	1977 actual	1978 estimate	1979 estimate
Applications processed for Federal employment.....	1,671,119	1,612,500	1,650,000

National agency check and inquiry cases.....	260,873	292,700	292,700

2. *Providing retirement and insurance benefits.*—The Commission administers retirement, group life insurance, and health benefit programs for Federal employees and annuitants. The principal functions of this activity include: adjudicating annuity, disability, death, refund, and deposit claims; making payments to annuitants and other claimants; negotiating with private carriers to provide the insurance and health benefits authorized; auditing the records and operations of insurance underwriters; and maintaining the trust funds that were established for financing these benefits programs. In 1979 the Commission will process increased annuity and disability workloads, administer an expanding health benefits program, increase audits of health insurance carriers, provide expanded payroll allotment privileges for annuitants, and continue efforts to automate and modernize current systems.

Workloads are reflected in the following table:

3. *Strengthening State and local personnel administration.*—The purpose of the Intergovernmental Personnel Act of 1970, as administered by the Commission, is to strengthen and improve the personnel resources of State and local governments. The Commission provides grant moneys and technical assistance to develop and encourage personnel administration programs consistent with prescribed merit employment principles. In 1979 additional resources are required to promote a more active intergovernmental mobility program, and to meet requests for technical assistance.

Workloads are reflected in the following table:

Number of jurisdictions assisted.....	500	500	650

4. *Other programs.*—This activity consists of four functions: (1) Administration of the Voting Rights Act of 1965, as amended; (2) the President's Commission on Personnel Interchange; (3) the President's Commission on White House Fellowships; and (4) the Federal employees appeals programs. The Civil Service Commission provides administrative support to the two Presidential commissions, and, under provisions of the Voting Rights Act, maintains lists

of eligible voters and appoints examiners and election observers at the request of the Attorney General.

In 1979 additional resources are needed to meet increased workloads for adverse action appeals and EEO complaint appeals.

The following table displays anticipated workloads:

2. *Payment of Government share of retirement costs.*—The Civil Service Retirement Amendments of 1969 provide for financing of current year's costs of the unfunded liability created since its enactment on October 20, 1969. Any statute which authorizes (1) new or liberalized benefits, (2) extension of retirement coverage, or (3) pay increases, is deemed to authorize appropriations to the fund to finance the unfunded liability created.

3. *Transfers for interest on unfunded liability and payment of military service annuities.*—The Secretary of the

Treasury is required to make annual payments from general revenues into the Retirement fund on the basis of a sliding scale of percentages of an amount equivalent to: (1) Interest on the unfunded liability, and (2) annuity disbursements attributable to military service. The Civil Service Commission, at the end of each year beginning in 1971, notifies the Secretary of the Treasury of the amount of payment to be made to the Retirement fund and reports such sums to the President and Congress. The required percentage of the total amount for 1978 is 80% and for 1979, 90% of such amount.

Executive Order 11491, entitled "Labor-Management Relations in the Federal Service", established the Federal Labor Relations Council as a central authority to administer and interpret the order, decide major policy issues, prescribe regulations, and from time to time, report and make recommendations to the President.

The order also established the Federal Service Impasses Panel as an agency within the Council. The panel is authorized to consider impasses resulting from negotiations between labor organizations and agency management, and to take whatever action it considers necessary to settle an impasse.

This appropriation provides Federal grants, authorized by the Intergovernmental Personnel Act of 1970, to improve and strengthen the personnel and management training systems in State and local units of government. It continues to provide for the most critically needed projects having the greatest payoff. By consensus of State and local governments, the highest priority nationwide

projects are: to improve employer-employee relations, to achieve equal employment opportunity consistent with merit principles, to develop job-related and valid selection systems, to strengthen employee development and staff capability for increased productivity, and to develop comprehensive merit-based personnel systems for improved management.

Under authority of 5 U.S.C. 1304 and other laws and Executive orders, the Civil Service Commission conducts full field security investigations for other departments and agencies, performs training activities, and conducts miscellaneous services for Federal agencies and State and local governments on a reimbursable basis.

Budget program.—In 1979 workloads are expected to decrease slightly in investigations; however, agency demands for training will exceed 1977 levels.

Chief workloads of the two major activities are displayed below:

This fund is used to pay annuities to retired employees or their survivors; to make refunds to former employees for amounts withheld; and to beneficiaries of employees who died before retirement or before the annuities equaled the amount withheld and to pay administrative expenses of the Commission in administering the program. The estimated unfunded liability for the civil service retirement system as of September 30, 1977, is \$116 billion. Pertinent statistics as of the end of the fiscal year are shown below:

EMPLOYEES HEALTH BENEFITS FUND—Continued

Program and Financing (in thousands of dollars)—Continued

90.00 Outlays.....	-71,935	-109,816	-43,266

The fund finances the cost of health benefits for: (1) active employees, (2) employees who retired after June 1960, or their survivors, (3) those annuitants transferred from the Retired Federal employees health benefits program as authorized by Public Law 93-246, and (4) the related expenses of the Commission in administering the program.

Budget program.—The balance of the fund is available for payments without fiscal year limitation. Numbers of participants at the end of each fiscal year are as follows:

	1977 actual	1978 estimate	1979 estimate
Active employees.....	2,310,000	2,333,100	2,356,500
Annuitants.....	985,000	1,089,600	1,155,000
Total.....	3,295,000	3,422,700	3,511,500

In determining a biweekly subscription rate to cover program costs, 1% is added to the rates developed by health benefit carriers, for administrative expense, and 3% is added for a contingency reserve held by the Commission for each carrier. The Commission is authorized to transfer unused administrative reserve funds to the contingency reserve.

For Postal Service employees, the Government's contribution to the health benefits premiums is 75% of the current unweighted average of the high option premiums of six large plans in 1978. For general schedule and wage board employees, the Government's contribution is 60% in 1978.

Financing.—The fund is financed by: (1) withholdings from active employees and annuitants; (2) agency contributions for active employees, appropriated to agencies; and (3) Government contributions for annuitants appropriated to the Commission.

Operating results.—Funds advanced to carriers but not used to pay claims in the current period are carried forward as special reserves for use in subsequent periods. About \$20 million unused administrative funds were transferred to the contingency reserve in 1977. The contingency reserves are retained by the Commission and paid to carriers, as necessary, to defray future rate increases or to provide increased benefits.

This fund finances insurance premiums paid to private insurance companies for Federal employees group life insurance and expenses of the Civil Service Commission in administering the program. Separate cost data is maintained for employees regular group life insurance, an additional \$10 thousand authorized in 1967, and insurance for members of former beneficial associations.

Budget program.—The status of the basic (regular and optional) life insurance program on September 30 is as follows:

Life insurance in force (in billions of dollars):	1977 actual	1978 estimate	1979 estimate
On active employees ¹	51.3	54.3	54.3
On retired employees.....	11.5	13.1	14.6

Annuitants.....	1,000	1,044	1,086
Total	<u>3,429</u>	<u>3,464</u>	<u>3,497</u>

¹ Excludes equal amount of accidental death and dismemberment insurance.

Financing.—For non-Postal Service employees premium costs for the regular program are met by withholding 35½ cents biweekly from the salaries of employees, for each \$1 thousand of life insurance and a 50% matching by employer agencies. The optional program is financed by withholding from employees' salaries or retirees' annuities and the beneficial association program is financed by direct collection from members. Most of the difference between receipt and benefit payments under the policy is held in reserve for paying future life insurance claims. The status of reserves at the end of the years is as follows (in millions of dollars):

Held in special contingency reserves:	1977 actual	1978 estimate	1979 estimate
By basic program insurer.....	49.4	50.0	50.0
By beneficial association insurer.....	3.2	2.2	1.2

Total reserves	<u>2,582.4</u>	<u>3,031.1</u>	<u>3,515.3</u>

The carrier held contingency reserve for the basic program was reduced to \$50 million as of June 30, 1976, and it is expected to remain at this level in subsequent years. Excess income from the program over benefit payments and other expenses is deposited in the U.S. Treasury to the credit of the Employees life insurance fund. The operations of the insurer for the regular and optional life insurance program to the end of each year follow (in millions of dollars):

This fund, created by the Retired Federal Employees Health Benefits Act, finances: (1) The cost of health benefits for retired employees and survivors who enroll in the Government-sponsored uniform health benefits plan; (2) the contribution to retired employees and survivors who retain or purchase private health insurance; and (3) expenses of the Civil Service Commission in administering the program.

Budget program.—The fund is available without fiscal year limitation. Amounts contributed by the Government shall be paid into the fund from annual appropriations. Numbers of participants at the end of the fiscal year are as follows:

	1977 actual	1978 estimate	1979 estimate
Uniform plan.....	48,372	22,231	21,008
Private plans.....	95,306	85,559	80,254
Total.....	143,678	107,790	101,262

Financing.—The fund is financed by contributions from those participants enrolled in the Government-sponsored plan and by Government contributions. The special contingency reserve with the carrier of the uniform plan is currently limited to \$375 thousand at the end of the policy year. Excess income from the program over benefit payments and other expenses is deposited in the U.S. Treasury to the credit of the retired employees health benefits program.

Operating results.—There will be an estimated \$12.7 million contingency reserve in the fund at the end of 1979 as compared with an estimated \$13.3 in 1978. Withholdings from the annuitants have been increased as well as the Government's contribution. Also, the participants will be encouraged to enroll in the Federal employees health benefits program through an open season planned in 1978.

1. *Reports and studies.*—Studies are conducted concerning areas in which there may be civil rights denials, and reports are issued with recommendations to the President and the Congress.

2. *Hearings, legal analysis, and legal services.*—Hearings are conducted by the Commissioners to investigate and obtain information about civil rights denials. Legal analysis is undertaken and reports are issued with recommendations to the President and the Congress. In-house legal services are provided.

3. *Field operations.*—Regional office staff and advisory committees hold conferences and open meetings to gather information and issue reports to disseminate information about civil rights problems. Programing to implement Commission recommendations and provide solutions to civil rights problems is maintained.

4. *Publications and information dissemination.*—The Commission uses publications, films, liaison with private and public groups, the media, and a variety of other techniques to provide civil rights information to affected groups, those who have responsibilities to comply with Federal civil rights laws and policies, those who implement these laws and policies, and the general public.

5. *Federal program evaluation.*—Programs of Federal agencies are appraised for compliance with civil rights laws to determine whether their benefits reach all groups equitably. Complaints which allege discrimination are received from the public and referred to Federal agencies having jurisdiction.

6. *National issues.*—Current civil rights issues are examined and monographs, statements or reports are prepared dealing with the issues. Conferences and consultations are held in connection with Commission projects or to provide liaison with private and public civil rights agencies.

7. *Basic civil rights research and clearinghouse library.*—Basic civil rights research into the causes of discrimination is conducted. Technical assistance in research methodology is provided to ongoing Commission studies. A library is maintained to support research, studies, hearings, conferences and other Commission activities and to provide a national clearinghouse for civil rights information.

8. *Age discrimination programs.*—Hearings are conducted and a study undertaken to make recommendations to the President and the Congress concerning unreasonable discrimination because of age.

The Committee for Purchase from the Blind and Other Severely Handicapped was established by the Wagner-O'Day Act of 1938, as amended. Its primary objective is to increase the employment opportunities for the blind and other severely handicapped and, whenever possible, to prepare them to engage in normal competitive employment. The Committee determines which commodities and services are suitable for Government procurement from qualified nonprofit agencies serving the blind and other severely handicapped; publishes a procurement list of such commodities and services; determines the fair market price for commodities and services on the procurement list; and makes rules and regulations necessary to carry out the purposes of the act.

The Committee staff supervises the selection and assignment of new commodities and services, assists in establishing prices, reviews and adjusts these prices, verifies the qualifications, and monitors the performance of workshops.

¹Includes capital investment as follows: 1977, \$90 thousand; 1978, \$40 thousand; 1979 \$70 thousand.

The Commodity Futures Trading Commission (CFTC) administers the Commodity Exchange Act of 1936, as amended. The purpose of the CFTC is to further the economic utility of the futures markets by encouraging their efficiency, assuring their integrity and protecting participants against abusive trade practices, fraud, and deceit. The object is to enable the markets to better serve their designated function in providing a price discovery mechanism and as a means of offsetting price risk. In properly serving these functions, the futures markets contribute toward better planning, more efficient distribution and consumption, and more economical marketing. In these ways they serve the public interest.

Enforcement of the act during 1976 included regulation of 66 active futures contracts trading 47 commodities on 10 exchanges. Total volume and value of future trading in all commodities reached 36.9 million contracts and \$819.9 billion for the last calendar year. These figures represent increases of about 14.5% for volume and 37.2% for value over the same figures in calendar year 1975.

The goals of the CFTC are to: (1) insure and enhance market utility; (2) assure protection of customers, integrity of the marketplace, and participants; (3) maximize regulatory effectiveness and efficiency; and (4) manage the CFTC programs to achieve maximum efficiency and effectiveness. The CFTC administers the Commodity Exchange Act through the following five major program areas.

Daily market surveillance.—Responsibilities under this program include daily surveillance of the market activity of large individual traders and fundamental economic market factors. The longer term activities of surveillance concentrate on the review of contract terms and condi-

tions to insure conformity with current cash marketing conditions and support of orderly markets. The program is responsible for the publication of market data, the enforcement of Federal limits, and the monitoring of exchange limits on speculative trading and positions.

Research and education.—The objectives of this program are to systemically investigate the functioning of markets and market users; to develop better tools to assist in detecting and preventing price distortions; and to develop and disseminate educational and statistical materials regarding futures trading.

Registration, audits and contract markets.—Responsibilities under this program are: To prevent misuse of customers' funds by Futures Commission merchants; to assure that the rules and practices of the contract markets are in compliance with the provisions of the Commodity Exchange Act and the rules of the Commission; and to review and approve applications from individuals and firms for registration under the provisions of the act.

Enforcement.—The enforcement program involves investigations of alleged or apparent violations of the act or the regulations, including suspected price manipulation and cornering, cheating, fraud and deceit, noncompetitive and other illegal trading practices, and the mishandling of customers' funds and accounts. Such investigations often develop evidence warranting the prompt institution and prosecution of administrative and/or Federal court proceedings to sanction offenders, prevent or stop violations, and deter others from violating the act.

The 1974 amendments to the act provide for the handling of customer's reparation claims for damages against persons registered with the Commission. Some customer complaints against registrants are referred to them for response to the customers' allegations.

Executive direction and centralized support.—The purpose of this program is to maintain the overall policy development and executive direction of the CFTC programs through the offices of the chairman, commissioners, general counsel, and executive director, as defined in the act, and all centralized administrative support. The hearings and appeals subprogram provide adjudicatory hearings. Direct policy expertise is provided in the areas of policy analysis, policy planning and evaluation, governmental operations, and public information. General administrative support is maintained at both headquarters and the regional offices.

1. *Community action operations.*—The 1979 estimate includes a \$12 million increase over the 1978 level of \$369 million for community action agencies which will strengthen the administrative and program capabilities of smaller agencies. The 1979 estimates for the senior opportunity and services, youth sports and summer youth recreation programs remain at the 1978 levels. The request for the State economic opportunity offices reflects a change in the State share of the program from 20% to 50% of the total. This change will be administratively accomplished so that the cost of these State offices, which are under the direction of the governors, will be an equal responsibility of the Federal and State governments. The 1979 community food and nutrition program request is \$22 million, a decrease of \$7.5 million from 1978 which anticipates that the major Department of Agriculture food and nutrition programs will increase outreach efforts to the poor, reducing the requirement to monitor these programs by CSA. The 1979 request for emergency energy conservation services is \$10 million as compared to the 1978 level of \$65 million. The request reflects the transfer of CSA weatherization activities to the new Department of Energy. Weatherization programs for low-income families will be continued by the Department of Energy with local community action agencies as presumptive prime sponsors. The CSA energy request primarily continues other energy conservation activities, such as crisis intervention and demonstration efforts. The decrease between 1977 and 1978 for energy conservation services is associated with CSA administration in 1977 of a one-time \$200 million fuel bill payment program. The 1979 estimate includes \$1 million to assist migrant and seasonal farmworkers in meeting emergency needs and developing self-help activities. Training and technical assistance directed toward improving the administrative and managerial capacity of community action agencies will be funded in 1979 at a \$3 million level as compared to \$1 million in 1978.

2. *Community economic development.*—The economic development demonstration program was initiated in 1968. Current assessments of the program indicate that community development corporations (CDC) as a whole have not had an appreciable impact in their areas in terms of employment of significant numbers of people, attraction of private capital, or promotion of profitable private businesses. The \$25.8 million requested will provide CSA with the flexibility to phase down the number of CDC's it supports by 1979 so that funding can be concentrated upon the CDC's with the most potential for successfully demonstrating the community economic development concept. All CDC's will continue to be eligible for program funds from other government and private sources.

3. *Evaluation.*—The 1979 request includes \$3.1 million for CSA to perform the evaluation work associated with its research and demonstration programs and to conduct major national impact evaluations of CSA programs.

4. *Demonstrations.*—This activity supports research into alternatives for eliminating poverty and expansion of promising concepts to demonstration scale. Included within this activity is a request for \$6 million for rural housing demonstration projects. Examples of CSA activities within this demonstration activity are: rehabilitation and repair of substandard housing; loans to low-income families; production of modular homes to be constructed onsite; and training work crews in construction trade skills. The significant increase in other demonstration projects emphasizes CSA's role in developing innovative concepts and demonstrations related to the delivery of assistance to the poor.

5. *Program administration.*—This activity provides supportive administration of CSA programs. The 1979 increase over 1978 consists of costs associated with full-year utilization of permanent employees hired during 1978 under CSA's reorganization plan plus within-grade and career ladder promotions. This is offset partially by a reduction of 22 positions not required after completion of the reorganization.

¹ Includes capital investment as follows: 1977, \$105 thousand; 1978, \$95 thousand; 1979, \$115 thousand.

The Consumer Product Safety Act of 1972 established the Consumer Product Safety Commission as a regulatory agency for the following purposes: (1) to protect the public against unreasonable risks of injury associated with consumer products; (2) to assist consumers in evaluating the comparative safety of consumer products; (3) to develop uniform safety standards for consumer products and to minimize conflicting State and local regulations; and (4) to promote research and investigations into the causes and prevention of product-related deaths, illnesses and injuries.

The Commission also administers the Federal Hazardous Substances Act, the Poison Prevention Packaging Act, the

Flammable Fabrics Act and the Federal Refrigerator Safety Act.

To carry out its responsibilities under these acts, the Commission has developed a set of programs which address specific product hazards. These programs are:

1. *Fire and thermal burn hazards.*—Activities undertaken in this program are directed toward reducing the estimated 1.6 million injuries annually resulting from burning materials, heated surfaces, and smoke inhalation.

2. *Electric shock hazards.*—Activities conducted under this program are aimed at reducing injuries and deaths from electrical shock and related hazards associated with consumer products.

3. *Chemical and environmental hazards/acute.*—The activities of this program address the estimated annual toll of 250,000 poisonings from toxic substances found in products in and around the home.

4. *Chemical and environmental hazards/chronic.*—The activities in this program are aimed at reducing the exposure to chemical substances, such as carcinogens, which have delayed adverse effects (often years after initial exposure) or which cause adverse effects after long-term exposure.

5. *Mechanical hazards.*—The activities in this program area address injuries from children's products, athletic/sports products, powered equipment and home structures and other products used in the home. These categories account for over one-third of all product injuries requiring hospital emergency room treatment.

Activities within each of these program areas encompass a broad spectrum from data collection and analysis through rule development to enforcement and the conduct of information and education campaigns.

The Corporation for Public Broadcasting assists in the development and improvement of noncommercial television and radio broadcasting through direct support of national interconnection services, research and analysis activities, fund raising support, and substantial direct payments to radio and television stations for general operational support. These general support grants for television licensees are fixed by agreement at a percentage of annual appropriations. The Corporation also makes grants to radio and television stations and other entities throughout the country for production of programs for national, regional, and local use.

The District of Columbia Self-Government and Governmental Reorganization Act (Public Law 93-198, December 24, 1973) terminated as of January 2, 1975, the District's permanent authority to borrow from the U.S. Treasury to finance its capital improvements program.

The Self-Government Act authorized the District of Columbia to issue tax-exempt general obligation bonds to finance capital improvements projects. To prevent undue disruption during the development of the District's bond issuance program, the Self-Government Act provided interim authority under which the District could borrow from the U.S. Treasury to finance capital projects for which funds had been authorized or appropriated before January 2, 1975, and to finance the District's share of the cost of the adopted regional transportation system specified in the National Capital Transportation Act of 1969 (D.C. Code, sec. 1-1441 et seq.).

Because of unanticipated delays in the development of the city's bond issuance program, the Self-Government Act has been amended by Public Law 95-131 (October 13, 1977) to extend the interim borrowing authority for all projects approved prior to October 1, 1979. The 1976 and 1977 Appropriations Acts for the District of Columbia contained language provisions authorizing Treasury loans to finance capital projects approved in those two acts.

Public Law 93-198 set a ceiling on outstanding long-term debt of the District of Columbia. Under that limitation, the District may neither issue general obligation bonds nor borrow funds from the U.S. Treasury to finance capital projects if the amount of the additional obligation thus incurred would cause debt service on outstanding long-term debt in any one year to exceed 14% of District revenues estimated to be credited to the District during the year in which the bonds were to be issued or the Treasury loans were to be drawn down.

The District of Columbia is requesting an appropriation of \$129,790 thousand for capital investment loans from the U.S. Treasury for 1979. The entire amount is for the general fund. D.C. Act 1-42 (January 22, 1976) established the general fund of the District and provided that the following revenues would be deposited in the general fund: taxes, fees, charges, and miscellaneous receipts; Federal payments; loans from the U.S. Treasury and other sources; and any moneys for operating expenses not otherwise designated to be deposited in another fund of the District Government. D.C. Act 1-42 abolished the District's

highway, water, sanitary sewage works, and metropolitan area sanitary sewage works funds.

Together with funds available under prior loan authorizations, the 1979 estimate of \$129,790 thousand will meet the full cash requirements for capital projects during the year ending September 30, 1979. The budget estimate assumes that all capital investment expenditures from appropriated funds during the year will be financed with U.S. Treasury loans.

The following table shows the status of general fund capital investment loans authorizations on a cumulative basis:

The Emergency Loan Guarantee Act (Public Law 92-70) created an Emergency Loan Guarantee Board composed of the Secretary of the Treasury, as chairman, the Chairman of the Board of Governors of the Federal Reserve System, and the Chairman of the Securities and Exchange Commission. The Board was given authority to guarantee, or make commitments to guarantee, loans to major business enterprises. The maximum amount for outstanding loans guaranteed was not to exceed \$250 million at any time.

On September 9, 1971, the Board found that Lockheed Aircraft Corp. met the requirements of the act and approved a Government guarantee to 24 banks which might lend to Lockheed up to \$250 million. The guarantee commitment to Lockheed and its lending banks required repayment of the guaranteed portion of the borrowings by December 31, 1977, unless the Board and the lending banks consent to extend the maturity date for 1 additional year, as provided for under the act.

All loans had been repaid by December 15, 1977, and the guarantee commitment terminated.

The Equal Employment Opportunity Commission was created by title VII of the Civil Rights Act of 1964. The purposes of the Commission are to end discrimination based on race, color, religion, sex, or national origin in hiring, promotion, firing, wages, testing, training, and all other conditions of employment. An amendment to the 1964 act, in March 1972, gave the Commission authority to bring civil action in Federal district courts to enforce the provisions of title VII.

The budget for the agency supports five activities:

1. *Executive direction and public information.*—This activity provides for the direction and coordination of the Commission's programs.

2. *Policy implementation.*—This activity provides guidance and assistance on the development and implementation of new policy, and develops and monitors new programs designed to expand the agency's service-delivery capability.

3. *Legal program.*—The Office of the General Counsel conducts litigation for the Commission under title VII, and

provides legal advice and counsel to the Commission on all phases of its work.

4. *Enforcement and affirmative action.*—This activity investigates, determines cause of, and conciliates charges of employment discrimination filed with the Commission; litigates cases against respondents unwilling to comply with title VII; enters into cooperative agreements with State and local fair employment practice agencies; and carries out systemic enforcement.

5. *Management and administration.*—This activity gives administrative and management support to all elements of the Commission.

The Export-Import Bank of the United States was organized in 1934. Its programs are authorized under the Export-Import Bank Act of 1945, as amended. The purpose of the Bank is to aid in financing and to facilitate U.S. exports.

To accomplish its objectives, Eximbank authority and resources are used to: assume commercial and political risks that exporters or private financial institutions are unwilling or unable to undertake; overcome maturity and other limitations in private sector export financing; assist U.S. exporters to meet foreign officially sponsored export credit competition; and provide leadership and guidance in export financing to the U.S. exporting and banking communities and to foreign borrowers.

Operating results and financial condition.—The Bank is a wholly owned Government corporation. Capital stock of \$1 billion was purchased by the U.S. Treasury. In addition, the Bank is authorized to borrow from the Treasury up to \$6 billion; the Bank pays interest on such borrowings.

The Bank's net income is estimated to be \$178,046 thousand in 1979, compared with \$135,964 thousand in

1978 and an actual income of \$137,461 thousand in 1977. From its net income the Bank plans to pay a dividend to the U.S. Treasury and add the balance to its retained income reserve to provide for future contingencies. Total investment of the Government in the corporation is estimated to be \$3,129 million on September 30, 1979.

The Administration supervises a coordinated agricultural credit system of farm credit banks and associations which make credit available to farmers and their cooperatives.

Assessments based upon estimated administrative expenses are collected from agencies in the farm credit system and are available for administrative expenses. Obligations are incurred within fiscal year budgets approved by the Federal Farm Credit Board.

Supervision and examination of farm credit banks and associations.—Provision is made for supervision and examination of: 12 Federal land banks; 13 banks for cooperatives; 12 Federal intermediate credit banks; 529 Federal land bank associations; and 428 production credit associations. Also, these credit agencies are furnished such services as assistance in financing and investments, credit analysis, development of appraisal standards and policies, preparation of reports and budgets, and development and distribution of information on farm credit.

The Federal Deposit Insurance Corporation was created by the Banking Act of 1933 to provide protection for bank depositors and to foster sound banking practices. Initially deposit insurance was limited to \$2,500 per depositor. This protection has been \$40 thousand since November 27, 1974. In order to accomplish its varied functions in the protection of bank depositors, the Corporation is authorized to promulgate and enforce rules and regulations relating to the supervision of insured banks and to perform other regulatory and supervisory duties consistent with its responsibilities as insurer. The major portion of the Corporation's operations consists of examining State banks which are not members of the Federal Reserve System and liquidation activities attendant to insured banks which have closed.

The insurance fund is supported by an authorization to borrow up to \$3 billion from the Treasury of the United States. No borrowing under this authorization has been made to date and none is anticipated in 1978 and 1979.

Income of the Corporation is derived principally from insurance assessments paid by insured banks and interest on investment in U.S. Government securities. As of September 30, 1977, the deposit insurance fund amounted to \$7.8 billion. The entire fund represents the accumulated net income of the Corporation and is reserved for the protection of depositors in insured banks and for payment of administrative and insurance expenses. No funds derived from taxes or Federal appropriation are allocated to or used by the Corporation in any of its operations.

The estimates for 1978 and 1979 in these statements make no provision for losses and expenses which might occur by reason of the closing of any bank after September 30, 1977, because there is no sound basis for predicting which insured banks if any, will close after that date.

FEDERAL HOME LOAN BANK BOARD

The Federal Home Loan Bank Board formulates policies for and supervises the operation of the 12 Federal home loan banks, the system of Federal savings and loan associations, and the Federal Savings and Loan Insurance Corporation. It is also responsible for the examination of Federal savings and loan associations and for the examination and supervision of State-chartered institutions insured by the Federal Savings and Loan Insurance Corporation.

The expenditure programs of the Federal Home Loan Bank Board and the Federal Savings and Loan Insurance Corporation are presented as business-type budgets. The Home Owner's Loan Act of 1933, as amended, provides that all expenses of the Office of Examinations and Supervision—formerly the Division of Examinations—Federal Home Loan Bank Board, shall be considered nonadministrative. The administrative expenses of the Federal Home Loan Bank Board, including the home office of the Office of Examinations and Supervision, are paid from assessments against the 12 Federal home loan banks and the Federal Savings and Loan Insurance Corporation. The expenses of the field offices of the Office of Examinations and Supervision are paid from fees collected from savings and loan institutions examined and from assessments against the Federal Savings and Loan Insurance Corporation.

Title I of the Emergency Home Finance Act of 1970 authorized the Federal Home Loan Bank Board to subsidize the interest rate charged by each of the 12 Federal home loan banks on lending to member savings and loan associations in order to stabilize the flow of funds into residential construction. The program was initiated in 1971 with an appropriation of \$85 million. An additional \$62.5 million was appropriated in 1972. The program was phased out in 1973.

1. *Examination and supervision of Federal home loan banks.*—The Board examines and supervises the operations of the 12 Federal home loan banks.

2. *Examination and supervision of Federal and State-chartered thrift institutions.*—Supervisory examinations are made of Federal savings and loan associations, State-chartered associations insured by the Federal Savings and Loan Insurance Corporation, and all uninsured member institutions of the Federal home loan bank system which are not examined by the State examiners. Examinations are also made of institutions applying for insurance of accounts and for conversion from a State to a Federal charter, when required by the Board. The financial condition and operations of each insured institution are analyzed and corrective action is instituted when warranted. Supervision of insured institutions operating under State charter is carried on, cooperatively, with the respective State authorities.

3. *Chartering and insuring savings and loan associations.*—Federal savings and loan associations are chartered

and regulated. Applications of State-chartered associations for conversion to Federal savings and loan associations and applications of Federal savings and loan associations for establishment of branch offices are also examined. In addition, an analysis and evaluation is made of insurance risk in connection with applications submitted by savings and loan associations for insurance of share accounts.

4. *Executive direction and staff services.*—This includes formulation of basic policy and the furnishing of staff services common to the Board and the Insurance Corporation.

5. *Analysis of operations.*—Analyses are made of the financial condition of member institutions, the flow of savings, and the character and volume of mortgage lending. Selective reviews are made of geographical areas and trends in the field of thrift and home mortgage finance, including the volume of activity and interest rates for all major types of mortgage lenders.

6. *Administrative services.*—These consist of auditing; accounting, budgeting, and financial reporting; internal budget control; and fiscal organization and management. Also included are general housekeeping and operating services, which include printing and reproduction work.

7. *Acquisition and construction of a building in the District of Columbia.*—The Demonstration Cities and Metropolitan Development Act of 1966 authorized the Board to acquire property and construct a building in the District of Columbia to provide quarters and facilities for the Board. Under the law, the Board is required to prepare and submit an annual budget program for the building as provided in title I of the Government Corporation Control Act.

8. *Authority of the Treasury to purchase Federal home loan bank obligations.*—The 12 Federal home loan banks, seek to improve the financial condition of member institutions. The banks, which are owned by the member institutions, obtain funds primarily from public issuances of consolidated obligations. Authority to borrow from the Treasury was temporarily increased from \$4 billion to \$6 billion by an amendment to the National Housing Act, approved October 28, 1974. The increase expired on August 10, 1975. A total of \$1,574,500 thousand was borrowed in 1975 and 1976.

The amounts shown in the schedules for the activities discussed above include administrative expenses under annual limitations; nonadministrative expenses under a separate limitation; and certain additional expenses not under a limitation. Administrative expenses are estimated to increase from \$17.6 million in 1978 to \$18.3 million in 1979. Nonadministrative expenses covering examination and supervision of savings and loan associations are discussed separately, below.

The Office of Examination and Supervision has the major role in fulfilling the Federal Home Loan Bank Board's statutory responsibility for monitoring and regulating the savings and loan industry. This Office examines and, when necessary, supervises and assists all savings and loan associations to assure the public that savings deposited in these associations are safe and to make credit more accessible to potential home buyers.

The Federal Savings and Loan Insurance Corporation (FSLIC) also relies on the Office of Examinations and Supervision to protect its assets against depletion from the financial failure of any insured savings and loan association. The Office's responsibility extends to all institutions insured by the Federal Savings and Loan

Insurance Corporation as well as to noninsured member institutions of the Federal home loan bank system not subject to State examination.

The Office monitors savings and loan associations through continual analysis of their operating policies and financial reports, regularly scheduled examinations, and occasional special examinations. The purpose of the monitoring process is to determine compliance with Federal Home Loan Bank Board regulations and to ascertain the quality of management and the financial soundness of the member associations. If the Office detects actual or potentially unsafe or unsound practices in insured associations, supervising agents from the Federal home loan banks work with the association to prevent or correct poor financial or management performance. The operations of the Office are funded substantially through direct examination charges imposed on savings and loan associations.

The Office also has examination and supervisory responsibilities with respect to savings and loan holding companies and their subsidiaries. In addition, the Office has assumed responsibilities pursuant to legislation in the areas of consumer credit protection, equal opportunity, and security measures.

The following table reflects the work of the Office:

The Federal Savings and Loan Insurance Corporation is authorized under title IV of the National Housing Act to insure savings in all Federal savings and loan associations and in State-chartered institutions of the savings and loan type which apply and qualify for insurance. The protection, which insures each saver in a member association against financial loss up to a statutory limit of \$40 thousand, may be provided either through the prevention of default or the payment of insurance to savings accounts holders in the event of liquidation. Preventing default, which protects each investor regardless of the amount in his account, is accomplished by making contributions or by purchasing all or a part of an association's assets. Also, the Corporation is authorized to make loans to institutions in financial difficulty. Preventive measures are preferred by the Corporation. However, in the event liquidation is necessary, the Corporation acts as a receiver, or co-receiver upon the request of a State authority in cases involving State-chartered institutions. In addition, the Corporation, upon determination by the Board, is empowered to act, even retroactively, as sole receiver in cases involving State-chartered institutions.

The corporation functions under direction of the Federal Home Loan Bank Board, which provides administrative services and conducts the examination and supervision of insured institutions. The expenses of the Board and its staff offices are paid from assessments made on the Corporation and the Federal Home Loan Banks.

In carrying out its responsibility for protecting savings in insured savings and loans associations, the Corporation has settled 117 cases since its creation in 1934. Actual losses sustained and provision for losses to September 30, 1977, have amounted to \$216.2 million representing approximately 4.4% of cumulative gross income. Detailed information on these cases is summarized in the following table:

Budget program.—The Insurance Corporation's budget program consists of the following activities:

1. *Administrative expenses subject to limitation.*—This category includes the estimated costs of executive direction and policy formulation in 1979.

2. *Payment to Federal Home Loan Bank Board for services and facilities.*—The Corporation will pay 21% of the total administrative expenses of the Federal Home Loan Bank Board plus 49% of the remaining 79% in 1979 in return for services and facilities from the Board, including the Washington Office of the Office of Examinations and Supervision. The Corporation will also pay 40% of the Office of Examinations and Supervision district offices' expenses.

3. *Contributions and provision for contributions to insured thrift institutions.*—This item is the estimated amount needed in 1979 to prevent the default of insured institutions.

4. *Refund of additional premium prepayments.*—A 1962 amendment of the National Housing Act required that each insured institution pay an additional premium in the nature of a prepayment at a rate equal to 2% of the increase in savings for the previous calendar year, less an amount equal to any requirement for the purchase of Federal Home Loan Bank stock during the period. The amendment also provided for the crediting of a return on the accumulated prepayment of each insured association at a rate equal to the average rate realized by the Corporation on its own investment portfolio.

Another amendment to the National Housing Act provides for a phaseout of the secondary reserve over the first 10 minimum net reduction years occurring after December 31, 1973. In May of each year, the Corporation will reduce the amount of each insured institution's pro rata share of the secondary reserve as of the preceding December 31 by a cash refund of the difference between the pro rata share and the percentage of its beginning balance on a percentage basis prescribed in the law.

5. *Other expenses.*—This provides for liquidation and other expenses of the Corporation in connection with the workout of contribution agreements, the disposition of assets purchased from, and loans to insured institutions to prevent default.

Financing.—The original capital of \$100 million has been completely repaid to Treasury, together with an additional \$43 million in interest. The Corporation has continuing authority to borrow from the Treasury for insurance purposes, up to a limit of \$750 million outstanding at any one time. No borrowing under this authorization have ever been necessary. The Corporation has additional authority to assess against each insured institution additional premiums for insurance until the amount of such premiums equals the amount of all losses and expenses of the Corporation, except that the total amount so assessed in any 1 year against any such institution shall not exceed one-eighth of 1% of the total amount of the accounts of its insured savers.

Operating results.—The Corporation is entirely self-supporting. Revenues and other receipts have been sufficient to meet all insurance losses, operating expenses, and return on capital stock, leaving a reserve for contingencies of \$4,437.8 million as of September 30, 1977.

Total revenues and other receipts since 1934 of \$4,924.9 million have been applied as follows:

USE OF FUNDS		
[Dollars in millions]		
	Amount	Percent

Return on capital stock to U.S. Treasury.....	42.9	.9
Reserve for contingencies.....	4,437.8	90.1
Total.....	4,924.9	100.0

Funded operating expenses for 1979 are estimated at \$110 million. Net operating income for 1979, which is expected to be \$607 million, will be retained by the Corporation to meet future contingencies.

The Federal Maritime Commission administers the shipping statutes which require regulation of the domestic offshore and international waterborne commerce of the United States. In addition, the Commission has responsibility for the licensing of ocean freight forwarders; and for insuring that vessel owners or operators establish financial responsibility for water pollution, death or injury to passengers or other persons on voyages to and from U.S. ports, and indemnification of passengers for the nonperformance of transportation. Major program objectives for 1979 will continue to deal with the issue of illegal rebating and other forms of malpractice by carriers operating in the ocean trades of the United States; and achieving compliance with the statutes through an effective regulatory program.

The Service is mandated to prevent or minimize interruptions of the free flow of commerce growing out of labor disputes by assisting parties to disputes in industries affecting commerce to settle their disputes through conciliation and mediation.

1. *Mediation services.*—The Service assists labor and management in mediation and prevention of disputes

affecting industries engaged in interstate commerce and defense production, other than rail and air transportation, whenever in its judgment such disputes threaten to cause a substantial interruption of commerce. Under the authority of Executive Order 11491, as amended, the Service also makes its mediation and conciliation facilities available to Federal agencies and organizations representing Federal employees in the resolution of negotiation disputes. The Service closed 606 dispute mediation cases in the Federal sector in 1977 and anticipates some 700 cases in 1979. Public Law 93-360, effective August 25, 1974, amended the National Labor Relations Act to extend its coverage to employees working in private nonprofit health care institutions. These amendments provide that upon receipt of notice of contract termination or modification or initial contract negotiations, the Service is mandated to contact the parties in an effort to achieve agreement through mediation, with the parties being required to participate in meetings called by the Service. Mediation efforts by FMCS may continue while a board of inquiry is looking into the facts of a dispute. During 1977, the Service closed a total of 1,419 health case assignments, and anticipates an equal number in 1979. About 87 percent of the 28,656 mediation assignments closed which required the services of mediators were settled without work stoppages. The workload shown below includes assignments closed in both the private and public sectors.

2. *Technical assistance/public information and educational services.*—Through its technical assistance program, the Service has initiated and developed labor-management committees, training programs, conferences, and specialized workshops dealing with a wide range of contemporary issues in collective bargaining. Through this program the Service will continue to work with both labor and management to bring about a better understanding of the collective bargaining process, and to improve their day-to-day working relationships.

Mediators also participate in public information and educational activities each year. Through university lectures and participation in seminars and conferences, the labor-management community and the general public gain understanding of the uses of mediation, arbitration, and collective bargaining.

3. *Arbitration services.*—The Service assists disputants in utilizing the arbitration process for the resolution of disputes of rights (grievances) and disputes of interest (negotiations) in the private and public sectors.

This activity also includes the cost of selecting boards of inquiry to look into the facts of a dispute in the health care industry. This responsibility is carried out through the assignment of arbitrators who are experienced as dispute resolvers in the industry. In addition, the Service administers expedited arbitration for the U.S. Postal Service in major areas of the country, national agreement in construction, and a number of multilocation contracts.

4. *Management and administrative support.*—This program provides for policy planning, evaluation, direction, coordination, legal advice, employee development, research, management, and administrative support for the programs of the Federal Mediation and Conciliation Service.

5. *Boards and panels.*—Provision is made for ad hoc employment of labor relations experts, individually or in panels, in support of the mediation function, and for boards of inquiry appointed by the President in emergency disputes. Public Law 93-360 also amended title II of the Labor Management Relations Act, 1947, by adding a new section 213 which provides that the FMCS may appoint an impartial board of inquiry to look into the facts of a contract dispute involving health care institutions.

The Federal Trade Commission is charged by law with insuring that competition in the marketplace is vigorous, free, and fair. This is accomplished by eliminating threats to fair and honest competition from all sources, both public and private.

1. *Maintaining competition.*—The antitrust laws were enacted to foster and preserve competition and the free enterprise system. The Commission examines competitive restraints imposed by the private sector or by Government regulatory actions that unduly restrict or limit the competitive process and takes action, where appropriate, to eliminate such restraints. In 1979, the Commission will focus principal antitrust attention on the energy, health care, and transportation industries. The thrust of these activities will continue to be on removing barriers to the operation of an unfettered market system—barriers that may encourage critical nonmarket determined price increases.

2. *Consumer protection.*—The Commission is charged with eliminating unfair or deceptive practices which unfairly influence, inhibit, or restrict the consumer's purchasing decisions or are otherwise unconscionable. The Commission will employ the remedies conferred by the Magnuson-Moss Act in pursuing these practices, namely, rulemaking, enforcement against nonrespondents, and consumer redress actions, as well as case-by-case adjudication. It will continue implementation of trade regulation rules (TRR's) promulgated pursuant to that act and will conduct impact evaluations of those TRR's. The Commission will also continue to examine and take action to eliminate restrictive practices which cause substantial monetary injury to consumers.

3. *Economic activities.*—This mission has two principal thrusts. First, economic and financial data are collected and analyzed, leading to the publication of statistical reports on the performance of important sectors of the American economy. Second, competitive conditions and business conduct in selected industries are investigated and evaluated.

The Harry S Truman Memorial Scholarship Act authorizes up to \$30 million to be appropriated to the Harry S Truman Memorial Scholarship Trust Fund, which it establishes in the Treasury of the United States. The act specifies that the Secretary of the Treasury shall invest in full the amounts appropriated in interest-bearing obligations of the United States, or obligations guaranteed as to both principal and interest by the United States. Funds for Truman scholarships and operating expenses of the Foundation will come from the interest and earnings on the investments.

Because the fully authorized amount of \$30 million has now been appropriated to the trust fund, no additional budget authority is requested.

The Harry S Truman Memorial Scholarship Act, the official Federal memorial to the 33d President, establishes the Harry S Truman Scholarship Foundation. The Foundation is authorized to award college scholarships of up to \$5 thousand annually to persons who demonstrate outstanding potential for and who are preparing to pursue a career in public service.

During 1976 and 1977, the Foundation conducted its first nationwide competition to select Truman scholars. One Truman scholar was selected from each State, plus the District of Columbia, Puerto Rico, and—considered as a single entity—Guam, the Virgin Islands, American Samoa, and the Trust Territory of the Pacific Islands. Those selected in the first competition received their first scholarship payment in the fall of 1977.

The Foundation is currently conducting its second annual competition by attempting to build on the solid base established in its first year.

This independent Commission of five members was created to hear and adjudicate claims, existing before August 13, 1946, of American Indian tribes, bands, or other identifiable groups of Indians residing within the territorial limits of the United States. As of September 30, 1977, of the 617 claims docketed, 484 were completed and 21 transferred to the Court of Claims pursuant to Public Law 94-465 approved October 8, 1976. Payments of awards are dependent upon subsequent appropriations made through claims, judgments, and private relief acts appropriations to the Treasury Department.

Public Law 94-465 provides that the Commission shall terminate on September 30, 1978.

INTERGOVERNMENTAL AGENCIES

ADVISORY COMMISSION ON INTERGOVERNMENTAL RELATIONS

The Advisory Commission on Intergovernmental Relations is an independent, bipartisan body which attempts to identify and analyze the causes of intergovernmental conflicts, and recommends ways of strengthening and improving the American federal system. The 26-member Commission includes representatives of the executive, legislative and administrative branches of all levels of government—Federal, State, and local—as well as representatives of the general public.

The Commission and its staff examine Federal and State programs having an intergovernmental aspect. Proposed legislation is reviewed to determine its overall effect on the federal system. The Commission also identifies emerging problems of Federal-State-local relations.

The Commission makes recommendations concerning the allocation of responsibilities and revenues among the various levels of government. The recommendations and published reports growing out of the Commission's work are submitted to the executive and legislative branches of Federal, State, and local governments for appropriate desired action.

Continuing and annual projects of the Commission include the monitoring of the general revenue sharing effort, coordinating the review procedures established by the Office of Management and Budget Circular A-85, polling the changing public attitudes on government and taxes, surveying State and local finances, monitoring the legislation of State and local governments, and the implementing of Commission recommendations on the Federal, State, and local levels.

Other projects which are nonrecurring but currently under Commission study include intergovernmental aid (categorical and block grants); competition among the States and regions for jobs, growth, and development; State-mandated local government expenditures; the Michigan single-business tax; countercyclical aid to State and local governments; and Federal-aid management.

The Consolidated working fund receives funds from other Federal agencies for special projects carried out by the Commission pursuant to contracts with these

agencies. Each contract is charged for a share of the Commission's overhead.

1978 will see the completion of all of these contracts, as the Commission concentrates on mandated and Commission-approved projects. The projects to be completed in 1978 are a study of Federal payments in lieu of taxes on Federal property, financed by the Department of Agriculture, and the 14-volume study of categorical and block grants financed by the Department of Health, Education, and Welfare.

Contributions from State and local governments and nonprofit organizations are used to strengthen the Commission's clearinghouse, information, and policy implementation services to State and local governments and to improve intergovernmental coordination and relations.

In 1977, the Commission returned to seeking contributions from State and local governments. The States are responding positively and goals of \$60 thousand in 1978 and \$100 thousand for 1979 have been established by the Office of Management and Budget and the Congressional Appropriations Committees.

The Appalachian Regional Development Act assigns the following major responsibilities to the Commission:

(1) Develop, on a continuing basis, comprehensive and coordinated plans and programs and establish priorities thereunder, giving due consideration to other Federal, State, and local planning in the region;

(2) Conduct and sponsor investigations, research, and studies, including an inventory and analysis of the resources of the region, and in coordination with Federal, State, and local agencies, sponsor demonstration projects designed to foster regional productivity and growth;

(3) Review and study, in cooperation with the agency involved, Federal, State, and local public and private programs and, where appropriate, recommend modifications or additions which will increase their effectiveness in the region;

(4) Encourage private investment in industrial, commercial, and recreational projects; and

(5) Serve as a focal point and coordinating unit for Appalachian programs.

It is the function of the Federal Cochairman of the Commission and his staff to coordinate the Appalachian program with all Federal agencies.

The Appalachian Regional Development Act also provides for a professional Commission staff. Employees of the Commission, under the act, are determined not to be Federal employees but are the joint employees of the Federal and State Governments.

As authorized in the Appalachian Regional Development Act, the 13 Appalachian States share with the Federal Government the administrative expenses of the Appalachian Regional Commission. The States will advance funds in the amount of \$1,780 thousand to pay their share of these expenses in 1979.

The Appalachian Regional Commission will provide technical support for the research and local development districts' programs and for health and child development programs by an advance of funds in the amount of \$710 thousand from the "Appalachian regional development programs" appropriation.

The Office of the States' Washington Representative established by the Appalachian State Governors represents the 13 Appalachian States in the day-to-day operation of the Commission. That office is supported solely by the States, and is not included in these accounts.

Contribution to the Commission.—The Commission was created by compact among the four States in the basin, the District of Columbia, and the Federal Government for the purpose of water pollution abatement and control. It is also responsible for the management of water and associated land resources.

The appropriation represents the Federal Government's share of the expenses of the Commission's operations. Funds also are contributed by the signatory bodies (member States and District of Columbia). The Commission also receives an Environmental Protection Agency program grant under the authority of the Federal Water Pollution Control Act, as amended. Under the amended compact law, State shares have been increased substantially to provide for an expanded program of activities, requiring an equivalent increase in the Federal contribution.

The Washington Metropolitan Area Transit Authority is a non-Federal agency established pursuant to an interstate compact among Maryland, Virginia, and the District of Columbia. The Authority's primary functions are to plan, develop, finance, and provide for the construction of the Metrorail rapid transit system and to provide for the operation of an integrated and coordinated bus/rail transit system to serve the National Capital area. The rail system will extend from a central distributor system in the District of Columbia into the participating jurisdictions of Maryland and Virginia.

Construction costs for the rail system are funded by a combination of bonds and grants from the local, State, and Federal Governments. The National Capital Transportation Act of 1969 provided the initial Federal funding and was amended in 1972 to provide additional funding. The 1972 amendments provided for a Federal guaranty of the Authority's bonds in an amount not to exceed \$1.2 billion, conversion of the Authority's bonds from a tax-exempt to a taxable security, and payment of an interest subsidy by the Federal Government to the Authority of 25% of the net interest cost.

The total system cost was revised in 1976. In keeping with practices encouraged by the GAO, cost estimates are adjusted semiannually to show increases or decreases that have or are expected to occur. While the latest estimate of total system costs is \$5,038 million plus an unfunded contingency of \$416 million, the Federal Government has used a planning ceiling on total system costs of \$4,677 million to encourage construction cost savings.

The Federal authorization of \$1,147 million contained in the National Capital Transportation Act of 1969 was exhausted in 1978 with the advance appropriation of \$15.4 million in 1977. However, under the Federal Aid Highway Act of 1973, local jurisdictions may identify interstate highway projects no longer necessary whose Federal and local matching shares on an 80% Federal, 20% local basis may be used to support rapid transit construction. In 1976 about \$399 million of Federal grants were made for Metro construction by canceling certain Interstate highway segments in the District of Columbia. In 1977, \$328 million was approved by the same process. In 1978, \$275 million of Metro work is expected to be approved in lieu of Interstate highways in the Washington area.

During 1979, Federal interstate highway funds attributable to the local jurisdictions are proposed to be the construction financing source along with 20% local moneys. Approval of transfers in 1979 by the Federal Department of Transportation, however, is contingent upon satisfactory completion of a federally requested reevaluation of alternatives to Metro rail transit in several of the corridors surrounding Washington, D.C. Because of this uncertainty, an estimate for interstate highway funds for Metro construction in 1979 will not be available until mid-1978. A budget amendment is expected to be submitted to the Congress at that time.

When this alternatives analysis study has been completed and recommendations on the balance of the rail system to be constructed have been made by the local jurisdictions, a financial plan will be developed to indicate the balance and sources of funding required to complete and operate the new rail system configuration and to cover debt service costs.

Apart from the rail capital construction program is the requirement of annual interest costs on outstanding Authority bonds sold in support of the construction program. This requirement includes two components—Federal 25% bond interest subsidy and debt service assistance. The Federal Government, in accordance with Public Law 92-349, provides an annual bond interest subsidy of 25% of total net bond interest costs. The bond interest subsidy requirement for 1979 is \$19,374 thousand. Under the same authorization, the Federal Government provided temporary debt service assistance on the balance of the interest due on an 80% Federal, 20% local cost sharing basis. The amount provided in 1977 was \$12,243 thousand and in 1978 a total of \$29,283 thousand. A more permanent arrangement for financing the debt service on these bonds for 1979 and beyond will be developed with the local jurisdictions as part of the financing plan to be prepared upon completion of the alternatives analysis.

INTERNATIONAL COMMUNICATION AGENCY

Reorganization Plan No. 2 of 1977 consolidates into a new agency, to be known as the International Communication Agency, the functions now exercised by the United States Information Agency and the Department of State's Bureau of Educational and Cultural Affairs.

This Agency will conduct the international communication, educational, cultural and exchange programs of the United States, and will advise the President, the National Security Council, and the Secretary of State on these matters. The programs and activities of the Agency will strive to tell the world about United States society and policies, particularly our commitment to cultural diversity and individual liberty, and at the same time, to inform ourselves about the world to enrich our own culture and to give us the understanding to deal effectively with problems among nations.

Administrative savings resulting from this consolidation are estimated to be \$120 thousand in 1978 and \$600 thousand in 1979.

Note.—Includes \$531 thousand in 1978 and \$595 thousand in 1979 for activities previously financed from: Salaries and expenses (special foreign currency program). The comparable amount in 1977 is \$474 thousand. Also includes \$434 thousand in 1978 (beginning Apr. 1, 1978) and \$878 thousand in 1979 for activities previously financed from: Salaries and expenses, Administration of foreign affairs, State. The comparable amounts funded under State prior to the transfer are: 1977, \$730 thousand; 1978 (ending Mar. 31, 1978), \$434 thousand. Excludes \$730 thousand in 1979 for UNESCO activities transferred to: Salaries and expenses, Administration of foreign affairs, State. Comparable amounts for 1977, \$695 thousand, and for 1978, \$760 thousand, are included above.

Agency operations are largely financed from this appropriation and the related special foreign currency appropriation, and consist of the following major elements:

1. *Overseas missions.*—The Agency operates 198 posts in 120 countries. These posts administer the exchange-of-persons program and conduct informational and other cultural programs using materials prepared locally and by the media services in Washington.

2. *Exchange of persons.*—This activity covers educational and cultural exchanges between the United States and approximately 150 countries. Specifically, it provides for the exchange of American and foreign scholars under supervision of the Board of Foreign Scholars; short-term visits by foreign leaders to the United States; travel of American specialists abroad; and, encouragement and facilitation to private organizations in similar exchange activities.

3. *Broadcasting Service.*—This Service, better known as the Voice of America, produces radio broadcasts in English and in 36 foreign languages. Programs are broadcast from transmitters at five domestic and eight overseas locations. The Service also supplies the overseas missions with recorded radio programs and scripts for placement on foreign stations.

4. *Other communication programs.*—This activity serves primarily to support overseas missions by acquiring, producing, and adapting program materials in various medium for their use. Included are motion picture and television films; editorial news and feature stories; pamphlets and periodicals; printing services, supplies and equipment; collections of American publications and English-teaching materials for overseas U.S.-operated libraries, reading rooms, and binational centers; exhibits and visual materials; and special international exhibitions, including those developed and shown in the U.S.S.R. and Eastern Europe under special cultural exchange agreements. This activity also includes cultural presentations of American performing art groups and aid to American-sponsored elementary and secondary schools abroad.

5. *Program management.*—This activity encompasses managerial staffs and centralized servicing functions for the Agency as a whole, including the Office of the Director, the Office of Planning and Program Direction, the Office of Management, legal counsel, and other staff support.

6. *Administrative support.*—This activity covers payments to the Department of State for administrative services for the Agency's overseas operations and certain special support services at headquarters; to the General Services Administration for rental of space and related costs at domestic locations; and to the Department of Defense for worldwide postal services.

ACQUISITION AND CONSTRUCTION OF RADIO FACILITIES—Continued

These funds, which remain available until expended, will provide for:

1. *Acquisition and construction of facilities.*—In 1978, a major expansion of Voice of America transmitting facilities will be initiated to alleviate the deficiency in VOA high-power transmitters noted in the President's Report on International Broadcasting. The BBC Woofferton facility used by VOA and the VOA's relay stations in Liberia and the Philippines will each be augmented with the addition of four 250-kilowatt shortwave transmitters and associated antenna systems and power facilities. The 1979 request provides funds to complete the augmentation projects in Liberia and the Philippines.

2. *Maintenance and improvement of existing facilities.*—This program provides for continuing repairs and improvements required to maintain worldwide VOA facilities. The 1979 plan includes funds for a new curtain antenna at the Greenville relay station and for the first phase of automating the Washington plant master control.

3. *Research and development.*—Research will continue in engineering development, equipment design, and radio propagation techniques specifically applicable to the Voice of America.

1. *International educational exchange activities (special foreign currency program).*—This appropriation formerly provided dollars for the purchase of foreign currencies. Since 1963 budget authority for these programs has been included in the Mutual educational and cultural exchange activities appropriation. In 1979 budget authority for these programs is included in the new Salaries and expenses (special foreign currency program) appropriation.

2. *Special international exhibitions (special foreign currency program).*—This appropriation formerly provided dollars for the purchase of foreign currencies. Since 1975 budget authority for these programs has been included in the Special international exhibitions appropriation. In 1979 budget authority for these programs is included in the new Salaries and expenses appropriation.

Preservation of ancient Nubian monuments (special foreign currency).—This appropriation provided for grants of Egyptian pounds, excess to the requirements of the United States, to UNESCO for the preservation and removal of certain temples in Egypt and the Sudan. Grants were also made to American archeological expeditions and groups doing related research in Nubia.

This fund provides for guarantees to U.S. firms of convertibility of currencies earned in the export of U.S. books, periodicals, films, and other informational media. Congressional action in connection with the Agency's 1967 appropriation called for cessation of such guarantees, and no new guarantees have been initiated. However, the revolving fund authority remains in effect.

The U.S. International Trade Commission investigates and reports to the President and Congress on the conditions, causes, and effects of competition between domestic and foreign industry.

The Commission conducts investigations and, where appropriate, makes determinations and recommendations in cases where (1) serious injury to industries may warrant increases in duties, the imposition of quotas, or the provision of adjustment assistance; (2) imports of goods sold at less than fair value may injure an industry; (3) imports of agricultural products may materially interfere with certain programs of the Department of Agriculture; (4) unfair methods of competition in the importation or sale of foreign articles may tend to injure an industry or restrain and monopolize trade and commerce in the United States; or (5) foreign governments may have subsidized imports into the United States.

The Commission provides technical assistance to the U.S. representatives in international trade negotiations and publishes the "Tariff Schedules of the United States Annotated."

The Commission also works with other agencies to improve the compatibility of statistics on imports, exports, and production; participates in international efforts to develop a harmonized commodity code adaptable for modernized tariff nomenclature purposes and for recording, handling, and reporting of transactions in national and international trade; and monitors the trade with non-market economy countries.

In 1979, emphasis will continue on activities heavily affected by the Trade Act of 1974, particularly in areas

such as investigations of alleged unfair import practices and participation in the development of a harmonized commodity code. The Commission will continue to make investigations and less formal research studies on its own initiative and to monitor international trade activities so as to provide the Congress and the President with early information on developing problems and prompt assistance in the resolution of these problems.

The budget estimates for the Commission are included without revision by the President pursuant to section 175 of the Trade Act of 1974.

The Commission's resources are divided among six major programs:

1. *Formal proceedings.*—This program encompasses the operations involved in deciding all formal and certain informal proceedings filed with the Commission. It includes granting operating authorities, regulating rates and deciding financial matters, providing necessary economic, cost, and financial data used in the decisionmaking process and administrative and management support. Programmatic goals for 1979 include the expansion of computer technology and the reduction of regulatory lag.

2. *Compliance and enforcement.*—This program includes the compliance and enforcement activities of the Commission designed to insure that carrier operations are in compliance with the Interstate Commerce Act and related statutes. It includes analyses and investigations of carrier operations, complaints with particular emphasis on those of individual consumers, assuring that carriers are properly insured, and administrative and management support. Programmatic goals for 1979 will focus upon the prosecution of cases having major impact on the transportation industry and upon efforts increasing the effectiveness and relevance of consumer assistance activities.

3. *Financial oversight.*—This program includes formulating and policing the uniform systems of accounts, compiling financial statistics, operating the Commission's Early Warning System, overseeing financial disclosures by regulated carriers, conducting financial audits of carrier records and administrative and management support.

Programmatic goals for 1979 include the completion of major revisions of the prescribed accounting and reporting systems to provide reliable financial and cost data to the Commission and to reduce reporting requirements for all regulated carriers.

4. *Tariff examination.*—This program includes the examination of tariffs filed with the Commission to insure compliance with published rules and regulations, deciding requests for exceptions from normal procedures, handling informal complaints and requests to pay reparations, and administrative and management support. Programmatic goals for 1979 center around the development of statistical techniques that will reduce the number of publications requiring an in-depth analysis and improving the consumer-oriented tariff examination program.

5. *Planning rail service.*—This program includes the long-range transportation policy planning activities of the Commission pertaining to existing rail service. It includes analysis and evaluation of reports, railroad merger proposals and acquisitions, and providing technical assistance to States for the administration of planning and subsidy programs. Programmatic goals for 1979 will continue the evaluation of the policies, plans, and programs of the Commission on the basis of an ongoing analysis of national rail transportation needs and would establish and maintain standards for freight and commuter rail service continuation subsidies.

6. *Rail public counsel.*—This program is intended to insure that the public is informed and represented in proceedings concerning the railroad industry.

Section 1 (16) of the Interstate Commerce Act, as amended by the Regional Rail Reorganization Act of 1973, authorizes the Commission to direct rail service over the lines of a rail carrier which has ceased a portion or all of its operations under the conditions specified in the statute. The Commission is further authorized to make payments to directed carriers to cover costs incurred to the extent they exceed direct revenues.

The funds obligated in 1977 provide funding for directed service over the lines of the Lehigh and New England Railway Co.

Note.—In accordance with the Legal Services Corporation Act, the Corporation may directly submit their budget request to the Congress. The Corporation is expected to request budget authority of \$304,032 thousand in 1979.

The Legal Services Corporation Act of 1974 created a private nonprofit corporation which provides financial support to programs offering legal assistance in non-criminal proceedings to low-income persons. Resources for similar legal services efforts are provided from other Federal programs such as Title XX social services of the Social Security Act, the Older Americans Act, and general revenue sharing. Other Federal, State, local, and private sources contributed over \$30 million to the Corporation's grantees in 1977.

Appropriations for the Corporation have grown almost 300% between 1975 and 1978 as is shown in the following table. The Administration is proposing another increase for basic legal services programs to allow expanded coverage of low-income areas and real growth by legal services offices. The basic legal services program would increase substantially from \$135 million in 1978 to \$215 million in 1979.

The National Capital Planning Commission, pursuant to the National Capital Planning Act of 1952, as amended, is the central planning agency for the Federal Government in the National Capital Region. The act has as its purpose the securing of comprehensive planning for the physical development of the National Capital. In developing the comprehensive plan for the National Capital region, the Commission: (1) prepares and adopts the Federal elements, and (2) reviews, for Federal interest, District government elements. The Commission also reviews and makes recommendations on development

plans and capital improvement programs originated by Federal and local government agencies. The reductions of eight positions in 1978 and four positions in 1979 are based, in part, on the Home Rule Act of 1974, which gave local planning functions to the District of Columbia. The President's reorganization project is undertaking a study to improve the structure for representing Federal Government concerns in the National Capital region and these functions will be included within that study.

The National Center for Productivity and Quality of Working Life was created in November 1975 by Public Law 94-136.

The Center's primary goal is to act as a catalyst and focal point for national efforts by stimulating, assisting, and coordinating others to increase productivity growth and improve the quality of working life throughout the economy. It has become one of the main reference sources for information, data, methods, and techniques for productivity improvement. It provides an organization through which different sectors of the economy can work toward reconciling differences on productivity issues.

Under a Board of Directors composed of leading business, labor, government, and public representatives, the staff helps various industries deal with productivity issues that individual companies could not solve by themselves. The Center will continue its work of getting decision-makers working together on productivity issues of critical importance to our economy.

Federal credit unions are privately owned, cooperative associations organized for the purpose of promoting thrift among their members and creating a source of credit for provident or productive purposes, authorized by the Federal Credit Union Act of 1934, as amended.

The Administration finances its activities out of fees for services performed.

The Administration's activities consist of: (a) chartering new Federal credit unions, (b) supervising established Federal credit unions, (c) making periodic examinations of their financial condition and operating practices, and (d) providing administrative services. Data relating to activities are shown below.

CREDIT UNION SHARE INSURANCE FUND—Continued

The insurance fund is used to carry out a program of insurance for member accounts in Federal credit unions and State-chartered credit unions which apply and qualify for insurance, authorized by Public Law No. 91-468, enacted October 19, 1970.

Budget program.—The activities consist of: (a) providing member account insurance, (b) formulating standards and requirements for insured credit unions, and (c) providing for liquidation or other disposition of the assets and liabilities of solvent and insolvent, insured credit unions.

The extent of the program is estimated as follows:

Item	1977 actual	1978 estimate	1979 estimate
Number of insured credit unions.....	16,512	17,012	17,512
Number of insured member accounts (thousands).....	26,300	27,700	29,100
Shares of insured member institutions as of Dec. 31 of the previous calendar year (millions of dollars).....	\$30,353	\$36,530	\$43,033

It is estimated that approximately 4,750 State-chartered credit unions will be enrolled in the program by the end of 1979.

Financing.—Each insured credit union is required to pay a normal premium of one-twelfth of 1% of the total amount of its member accounts. The insurance fund is structured to be self-supporting through the insurance premiums which are paid by member credit unions. The estimated premiums of \$34,525 thousand in 1979 are expected to cover all insurance claims and provide for an increase in the fund balance. This will be held in Government interest-bearing securities as an insurance reserve. The fund has \$100 million in borrowing authority from the Treasury for use in unforeseen emergencies. The authority to borrow from the Treasury has never been used and probably will not be exercised in 1978 or 1979.

Operating results.—Anticipated net income of \$34,881 thousand will be retained in the fund, raising the balance for unforeseen emergencies to \$153 million by the end of 1979.

General and special funds:

SALARIES AND EXPENSES

For expenses necessary for the National Labor Relations Board to carry out the functions vested in it by the Labor-Management Relations Act, 1947, as amended (29 U.S.C. 141-167), and other laws, \$88,520,000; \$100,467,000: Provided, That no part of this appropriation shall be available to organize or assist in organizing agricultural laborers or used in connection with investigations, hearings, directives, or orders concerning bargaining units composed of agricultural laborers as referred to in section 2(3) of the Act of July 5, 1935 (29 U.S.C. 152), and as amended by the Labor-Management Relations Act, 1947, as amended, and as defined in section 3(f) of the Act of June 25, 1938 (29 U.S.C. 203), and including in said definition employees engaged in the maintenance and operation of ditches, canals, reservoirs, and waterways when maintained or operated on a mutual, nonprofit basis and at least 95 per centum of the water stored or supplied thereby is used for farming purposes.

Note.—The appropriation for this account for 1978 had not been enacted at the time this budget was prepared. The 1978 amounts shown below are based upon a continuing resolution in effect through September 30, 1978, that provides for this account at a rate consistent with the amounts that would be provided by the conference version of the Departments of Labor, and Health, Education, and Welfare Appropriation Act, 1978.

The Board resolves representation disputes in industry and remedies and prevents specified unfair labor practices by employers or labor organizations. Case intake in 1977 was 37,586 unfair labor practice cases and 15,651 representation cases. Estimates for unfair labor practice cases are 39,867 for 1978, and 42,882 for 1979. Representation case estimates are 17,072 for 1978, and 18,131 for 1979.

1. *Field investigation.*—Charges of unfair labor practices and petition for elections to resolve representation disputes are investigated by regional office personnel. Over 91% of the unfair labor practice cases and about 83% of the representation cases are closed by settlement, dismissal, or withdrawal. The remainder are prepared for public hearing. The agency strives to maximize the voluntary settlement of all cases, and the avoidance of litigation.

2. *Administrative law judge hearing.*—Administrative law judges conduct public hearings in unfair labor practice cases. Their findings and recommendations are set forth in their decisions. In 1977 there were 1,402 hearings closed, 65 proceedings adjusted after close of hearing, and 1,238 decisions issued. The estimate for 1978 is for 1,615 hearings to be closed, 95 adjusted after hearing, and 1,273 de-

cisions. The estimate for 1979 is for 1,793 hearings to be closed, 130 adjusted after hearing, and 1,794 decisions.

3. *Board adjudication.*—In an unfair labor board practice case a judge's decision becomes a Board order if no exceptions are filed. About 36% of these decisions become automatic Board orders or are complied with voluntarily. The remainder with exceptions filed requires contested Board decisions. In 1977, 1,127 such Board decisions were issued; the estimates for 1978 and 1979 are 1,242 and 1,416 respectively. In representation cases, regional directors initially decide the issues by Board delegation. In 1977 regional directors issued 2,197 such decisions; and the estimate is 2,414 for 1978 and 2,540 in 1979. The Board itself decides representation issues on referral from regional directors or by granting a request for review of a regional director's decision. In 1977 the Board issued 187 representation decisions; the estimates for 1978 and 1979 are 357 and 361 respectively. The Board also ruled on 513 objection and challenge questions in election cases in 1977; it is estimated that 493 such rulings will be required in 1978 and 544 in 1979.

4. *Securing compliance with Board orders.*—If the parties do not voluntarily comply with the Board's order involving unfair labor practices, the Board must request the appellate courts to enforce its decisions. In 1977 a total of 360 Board decisions of all kinds required such litigation; the estimate for 1978 is 425, and for 1979 it is 515.

SALARIES AND EXPENSES

For expenses necessary for carrying out the provisions of the Railway Labor Act, as amended (45 U.S.C. 151-188), including emergency boards appointed by the President, **[\$3,703,000] \$3,969,000.**

Note.—The appropriation for this account for 1978 had not been enacted at the time this budget was prepared. The 1978 amounts shown below are based upon a continuing resolution in effect through September 30, 1978, that provides for this account at a rate consistent with the amounts that would be provided by the conference version of the Departments of Labor, and Health, Education, and Welfare Appropriation Act, 1978.

1. *Mediatory services.*—The Board mediates disputes over wages, hours, and working conditions for some 650 rail and air carriers and approximately 800,000 employees in the two industries.

Beginning in 1978, the Board's new technical assistance activity will enable labor and industry representatives to explore informally the relevant economic and noneconomic problems which condition collective bargaining in the railroad and airline industries.

2. *Voluntary arbitration and emergency disputes.*—When the parties fail to resolve their disputes through mediation, they are urged to submit their differences to arbitration. If neither mediation nor voluntary arbitration is successful, the President, when notified of disputes which threaten seriously to interrupt service, may appoint an emergency board to investigate and report on the disputes. Such reports usually serve as a basis for resolving the disputes.

3. *Adjustment of railroad grievances.*—Railroad employee grievances resulting from disputes over the interpretation or application of collective bargaining contracts may be brought for settlement to the National Railroad Adjustment Board. The divisions of the Board are composed of an equal number of carrier and union representatives compensated by the party or parties they represent. Administrative direction and support are provided by the staff director/grievances and clerical assistants who are compensated by the National Mediation Board. The appropriation also provides for neutral referees to sit with the Board when they are deadlocked. Boards of adjustments are also financed under this activity.

The National Science Foundation supports basic and applied research, science and technology policy research, and related scientific programs, to promote the progress of science and advance the Nation's health, prosperity, welfare, and security. The Foundation's 1979 research programs are designed to: (1) Strengthen basic research in the mathematical, physical, biological, environmental, and social sciences and in engineering and materials; (2) focus U.S. scientific and technical resources on research and related activities having the highest potential for contribution to the understanding and resolution of significant problems; (3) promote international cooperation through science and technology; (4) provide for the development of an adequate scientific manpower base to meet future needs; and (5) address scientific and technological policy issues.

The major research program activities of the Foundation are:

(1) *Mathematical and physical sciences and engineering.*—This activity provides support for research projects directed at increasing understanding of natural laws and phenomena and gaining new knowledge about engineering principles and materials to strengthen the Nation's technology base. Major research efforts are supported in mathematics, physics, chemistry, engineering, materials, and computer science.

(2) *Astronomical, atmospheric, Earth, and ocean sciences.*—The general objectives of this activity are to gain new knowledge in astronomical and atmospheric sciences over the entire spectrum of physical phenomena; to better understand the physical and chemical makeup of the Earth and its geologic history; and to increase understanding of the oceans, their composition, structure, behavior, and resources. The Foundation provides the bulk of funding for the cost of operating and maintaining the 29 research vessels that make up the academic research fleet. The Foundation also supports six national research centers, five for astronomy and one for atmospheric sciences. These centers provide specialized facilities, equipment, staffing, and operational support which are beyond the capability of most individual educational or research institutions.

(3) *U.S. Antarctic program.*—The Foundation provides overall management for the U.S. program in the Antarctic and supports a multidisciplinary research program on global weather and climate, renewable and nonrenewable resources, and the physical and biological characteristics of Antarctica and its surrounding seas. This activity is the sole expression of U.S. interest and presence in Antarctica.

(4) *Biological, behavioral, and social sciences.*—The biological, behavioral, and social sciences activity consists of four major programs: Physiology, cellular, and molecular biology; behavioral and neural sciences; environmental biology; and social sciences. This activity aims to increase knowledge and understanding of fundamental life processes and forces affecting man as an individual and as a member of society. Emphasis continues to be given to plant sciences research because of its potential for providing knowledge on various questions related to food production.

(6) *Applied science and research applications.*—This activity seeks to focus scientific and technological capabilities on current and emerging problems of national significance; shorten the time between scientific discoveries and their applications; and increase the use of science and technology in addressing the problems of the public sector.

Its principal areas of concern are problem focused research applications, applied research, integrated basic research, problem analysis, and intergovernmental science and public technology. In 1979 a major emphasis will be on earthquake hazards mitigation.

(7) *Scientific, technological, and international affairs.*—This activity includes research and other efforts aimed at enhancing U.S. science through international cooperative science and technology programs, improving science information transfer, and providing science and technology policy research and assessment. The programs in this area include the collection and analysis of information on funding of research and development and on scientific and engineering manpower.

(8) *Program development and management.*—This activity provides for the operation, support, management, and direction of all NSF programs and activities and includes necessary funds to develop, manage, and coordinate these program activities.

SCIENTIFIC ACTIVITIES (SPECIAL FOREIGN CURRENCY PROGRAM)—CON.

The special foreign currency program utilizes U.S.-owned excess currencies in certain foreign countries to support cooperative scientific projects, seminars, and the travel of U.S. and foreign scientists involved in mutually beneficial efforts. In addition, support is provided for the translation, publication, and dissemination of foreign scientific and technical information considered to be of interest to the U.S. scientific community. The Foundation awards grants to both U.S. and foreign institutions and scientists. Payments for this program are made in foreign currencies which the Department of the Treasury determines to be excess to the requirements of the United States.

One of the Foundation's key objectives is the initiation and support of programs to strengthen science education at all educational levels.

The 1979 science education program activity is organized as four subactivities:

1. *Scientific personnel improvement.*—Encouraging the highest quality standards in students and institutions by providing support for fellowships, traineeships, and other student-oriented activities; and by increasing the entry into the sciences of talented women, minorities, and the handicapped who have been historically underrepresented in these fields.

2. *Science education resources improvement.*—Strengthening the capabilities of schools, colleges, and universities for science education and research training; and stimulating the incorporation of validated knowledge and instructional strategies in science teaching.

3. *Science education development and research.*—Developing technologies, instructional methods, and course materials relevant to the teaching and learning of science.

4. *Science and society.*—Increasing public understanding of science and technology and their role in meeting national needs; increasing understanding of the interrelationships between scientific priorities and policies and the ethical and human values of society; increasing both the amount and quality of communication between the scientific community and the public; and increasing the use of science by the public.

tion of the safeguards involved in the transportation of hazardous materials; and the review on appeal of actions against certificates or licenses issued by the Department of Transportation.

1. *Policy and direction.*—This activity includes the establishment of policy and program objectives, centralized management of Safety Board programs, and provision of legal and information services.

2. *Accident investigation.*—The Board's primary mission includes the management of accident investigations, the identification of probable cause, the development recommendations, and the preparation of reports on aviation, railroad, highway, marine, and pipeline accidents.

3. *Technology.*—This program provides the Board's technical advice and services in the areas of human, vehicular, operational, and hazardous materials factors; maintains accident data information; and provides laboratory support.

4. *Plans and programs.*—Through this activity the Board conducts special studies, evaluates the safety efforts of other Government agencies, and coordinates the Board's training programs.

5. *Administration.*—This activity provides financial management, management analysis, personnel management, procurement and facilities management, and other administrative services.

6. *Administrative law judges.*—This program includes the review on appeal of the suspension, amendment, modification, revocation, or denial of any operating certificate or license issued by the Secretary of Transportation under the Federal Aviation Act of 1958.

1. *Nuclear reactor regulation.*—The assurance of adequate safety, environmental protection, and safeguards in the issuance of reactor licenses is the primary objective of this program. In 1979, applications for new powerplant construction permits, operating licenses, and special reviews will continue at a level similar to that projected for 1978. In addition to the licensing effort associated with operating reactors, special analysis will be accomplished to assure that operating reactors which were issued operating licenses prior to 1969 continue to operate safely. Minimizing licensing time through employment of standard review plans, resolution of generic technical problems, standardized plant designs, and increased organizational efficiencies will continue as a primary objective in 1979.

2. *Standards development.*—The engineering standards development effort for light water reactors (LWR's) will address three areas: Completion of detailed supporting standards to complement the broad performance requirements already completed; development of new standards to reflect needs identified in the licensing and inspection and enforcement processes; and updating of standards to reflect experience from plant operation, research results, feedback from users of standards, advances in technology, and improved regulatory practices.

3. *Inspection and enforcement.*—The new initiative started in 1978 to implement a resident inspection program will be continued in 1979. The resident inspection program will provide a greater number of inspection hours on nuclear sites with no increase in inspection personnel. In 1979, NRC safety inspections will keep pace with the projected growth in the number of operating reactors and reactors under construction. The inspection program will continue to play a supportive role in the process of issuing construction permits and operating licenses. Safety inspections of fuel cycle facilities will increase in 1979 commensurate with facility growth as will the materials inspection effort. The level of effort devoted to safeguards inspections will also be increased in 1979 to accomplish added safeguards inspection requirements for reactors, fuel cycle facilities, and nuclear materials.

4. *Nuclear material safety and safeguards.*—Due to a serious backlog in nuclear materials licensing and an accelerated effort in the waste management program, 1979 fuel cycle requirements will increase.

To accommodate the President's guidance on waste management, the Commission has also requested supplemental fuel cycle funding in 1978.

The initial years of the safeguards program assumed more activity by the nuclear industry in the area of plutonium recycle and fabrication than is now forecast. The safeguards requirements in 1979 reflect this lower level of activity and consequently are below the 1978 level.

5. *Nuclear regulatory research.*—The 1979 confirmatory research program for the NRC places major emphasis on continuing the quantification of safety margins for the light water reactors. LWR emergency core cooling system experiments and fuel behavior tests will require increased funding in 1979 to maintain the planned testing program which includes turnover of the lost-of-fluid test (LOFT) facility from DOE to NRC. In addition, 1979 finds many of the experiments that were begun in prior years yielding meaningful data which must be analyzed. Codes related to more accurate predictions of the performance capability of emergency core cooling systems will continue to be developed and refined based on test results. A minimum effort is included to improve our understanding of the safety aspects of advanced reactors. The fast breeder reactor research effort will allow NRC to maintain the necessary level of competence in this area pending further administration guidance. Funding for advanced converter reactors has been maintained constant at a low level to enable NRC to respond effectively should commercialization begin. Site safety research to define with greater precision the potential effects on nuclear facilities of such natural phenomena as earthquakes and tornadoes will receive continued attention. Environmental and health effects, fuel cycle, and safeguards research will be continued at 1978 levels to assure an adequate information basis exists for evaluating nuclear facility license applications.

¹ Restoration of balances to liquidate prior Post Office Department obligations.

Note.—This table represents the Postal Service request as transmitted without change as well as the President's request, pursuant to section 3, P.L. 93-328.

This appropriation is for the purpose of reimbursing the Postal Service for public service costs and loss in revenue associated with carrying certain categories of mail at free and reduced rates. The \$65,632 thousand requested for previously unfunded liabilities of the former Post Office Department provides \$34,632 thousand to cover payments to the employees' compensation fund in 1979 for injuries to postal employees which occurred prior to July 1, 1971, and \$31 million to cover one-twelfth of the \$372,796,423 in earned and unused annual leave balances due postal employees on June 30, 1971, from the former Post Office Department.

In addition to the amounts shown above, a supplemental appropriation of \$91,959 thousand is proposed for coverage of revenue foregone under new rates proposed for implementation on June 1, 1978, and for reimbursement for expenses incurred by the Commission on Postal Service, authorized by Public Law 94-421. These amounts are shown in greater detail in Part III of the Appendix. The transactions of the Postal Service appear in Part IV of the Appendix under Off-Budget Federal Entities.

The following table represents the estimated revenue foregone by the Postal Service in 1979 for carrying certain categories of mail at free and reduced rates.

PAYMENTS TO RAILROAD RETIREMENT TRUST FUND

For payment to the Railroad Retirement Account, as provided under sections 15(b) and 15(d) of the Railroad Retirement Act of 1974, **[\$250,000,000]** \$313,000,000.

Note.—The appropriation for this account for 1978 had not been enacted at the time this budget was prepared. The 1978 amounts shown below are based upon a continuing resolution in effect through September 30, 1978, that provides for this account at a rate consistent with the amounts that would be provided by the conference version of the Departments of Labor, and Health, Education, and Welfare Appropriation Act, 1978.

90.00 Outlays-----	250,000	250,000	313,000

This appropriation finances the Federal subsidy to the Railroad retirement account for certain costs not financed by taxes from the railroad sector.

Payment for dual benefits.—This is the fourth request for appropriations authorized by the Railroad Retirement Act of 1974 to subsidize dual or “windfall” benefits received by persons covered by both the railroad retirement system and the social security system, until these windfalls are ended.

Because the social security benefit formula heavily favors persons with short periods of service, low earnings, or both, persons acquiring eligibility under both systems generally receive a disproportionate benefit since in most instances the social security coverage is only supplementary to their regular railroad employment.

The Railroad Retirement Act of 1974 authorizes annual appropriations, on a level cost basis, from 1976 through the year 2000 to subsidize the phaseout of dual benefits. The amount of the appropriation, under this act, is to be reestimated every three years, in conjunction with the triennial actuarial valuation of the railroad retirement system. While the original estimates were for a level amount of \$250 million, the 13th actuarial valuation indicates an amount of \$363 million from 1979 onward which is a 40% increase over the original estimate. The administration is proposing legislation to no longer index the initial windfall benefit for workers who retire after December 31, 1978. This would increase the costs of the annual payment from \$250 million to \$313 million in 1979.

REGIONAL RAIL TRANSPORTATION PROTECTIVE ACCOUNT

For payment of benefits under section 509 of the Regional Rail Reorganization Act of 1973, to remain available until expended, including not to exceed **[\$100,000]** \$75,000 for payment to the Railroad Retirement Board for administrative expenses, **[\$50,000-000]** \$25,000,000.

Note.—The appropriation for this account for 1978 had not been enacted at the time this budget was prepared. The 1978 amounts shown below are based upon a continuing resolution in effect through September 30, 1978, that provides for this account at a rate consistent with the amounts that would be provided by the conference version of the Departments of Labor, and Health, Education, and Welfare Appropriation Act, 1978.

The Regional Rail Reorganization Act of 1973 provides for various benefits to protected employees adversely affected in the establishment of the Midwest and Northeast rail system provided by that act. The payment of all allowances, expenses, and costs provided protected employees will be made by the Consolidated Rail Corporation, the United States Railway Association (where applicable), and acquiring railroads. Upon certification to the Railroad Retirement Board of the amounts paid to protected employees, these organizations will be reimbursed for such amounts by the Board. The act authorizes appropriations to the Board for this purpose up to the aggregate sum of \$250,000 thousand. Appropriations totaling \$162,630 thousand have been enacted as shown below (dollars in thousands):

Year:	AMOUNTS APPROPRIATED	Amounts

After enactment of the 1979 appropriation, \$62,370 thousand may be appropriated under the authorization. The appropriation request of \$25,000 thousand for 1979 is to cover the estimated benefits to be paid during that period with up to \$75 thousand available to reimburse the Railroad Retirement Board for estimated administrative expenses incurred in handling that function.

The Board administers an unemployment and sickness insurance system and an employment service for unemployed railroad workers. Administrative expenses are financed through a permanent appropriation of 0.50% of taxable payroll. As of each September 30, the unobligated balance in this fund in excess of \$6 million is transferred to the Railroad unemployment insurance account in the unemployment trust fund (45 U.S.C. 361).

1. *Maintenance of earnings accounts.*—Insurance payments for unemployment and sickness benefits are based on individual records of earnings and daily wage rates. The workload fluctuates according to such factors as level of employment and rate of turnover in the railroad industry. The costs are shared on an allocated basis with the retirement program. Accounts posted are estimated at 680,000 in 1979.

2. *Processing of unemployment insurance claims.*—Workers' claims for unemployment compensation are filed locally and certified for payment through the headquarters offices. Unemployment claims receipts are projected to decline by 25% as indicated in the following table:

3. *Processing of sickness claims.*—These claims are filed by mail and certified for payment through the headquarters offices of the Board. Sickness claims receipts

are also projected to decline, as indicated in the preceding table.

4. *Claimant placement services.*—The Board conducts an employment service for unemployment benefit claimants. Savings of benefit payments of approximately \$2,820 thousand are expected in 1979 from the placement of approximately 5,000 claimants in jobs, few of which are outside of the railroad sector.

5. *Administration.*—The costs of administration are shared between this and the retirement program on an allocated basis.

Under the Railroad Retirement Act of 1974, which radically restructured railroad retirement, beneficiaries receive the equivalent to a social security benefit based on a worker's railroad wages and other covered employment (designated "Tier I"), a railroad industry pension like other private pension plans but embedded in Federal law (designated "Tier II"), and one-third of the 1.1 million beneficiaries also receive a dual or "windfall" benefit. Railroad workers and employers pay taxes on wages to finance: (1) retirement and disability benefits paid to primary beneficiaries and their dependents; (2) benefits to the survivors of railroad workers; and, (3) hospital insurance benefits (medicare). A Federal subsidy to the Railroad retirement account finances the windfall benefits received by individuals covered by both railroad retirement and social security. The taxes are deposited in the Railroad retirement account and invested in Government securities. The portion of the taxes which finances social security and hospital insurance benefits are transferred to the old-age, survivors and disability insurance trust funds and to the Federal hospital insurance trust fund under the financial interchange provisions governing railroad retirement and social security.

Supplemental annuities are also paid to certain employees in addition to regular benefits and windfalls. This program is financed by a tax paid by employers and deposited in the Railroad retirement supplemental account.

Income.—The income of the Railroad retirement accounts consists of taxes paid by railroad employers and employees; interest on investments; annual appropriations to subsidize windfall benefits as authorized by the Railroad Retirement Act of 1974; and, payments from the Federal old-age and survivors insurance trust fund and the Federal disability insurance trust fund. The railroad retirement system has an arrangement of annual financial interchanges with the social security system so as to place social security in the same position in which it would have been if railroad employment had been directly covered by social security.

Retirement, disability, and survivor benefit payments.—Payment estimates reflect the increases in benefit rates provided by law and for certain liberalizations in eligibility requirements provided by the Railroad Retirement Act of 1974.

Administrative expenses.—Such expenses are subject to annual limitations in appropriation acts (see Limitation on salaries and expenses).

Payment to Federal hospital insurance trust fund.—Portion of taxes which finances hospital insurance benefits is for payment to the Federal hospital insurance trust fund, since payments of hospital benefits for railroad retirement beneficiaries are made from that fund.

LIMITATION ON SALARIES AND EXPENSES

For expenses necessary for the Railroad Retirement Board, **[\$33,282,000] \$34,317,000**, to be derived from the railroad retirement accounts: *Provided*, That \$500,000 of the foregoing amount shall be apportioned for use pursuant to section 3679 of the Revised Statutes, as amended (31 U.S.C. 665), only to the extent necessary to process workloads not anticipated in the budget estimates and after maximum absorption of the costs of such workloads within the remainder of the foregoing limitation has been achieved: *Provided further*, That notwithstanding any other provision in law, no portion of this limitation shall be available for payments of standard level user charges pursuant to section 210(j) of the Federal Property and Administrative Services Act of 1949, as amended (40 U.S.C. 490(j); 45 U.S.C. 228a-r).

Note.—The appropriation for this account for 1978 had not been enacted at the time this budget was prepared. The 1978 amounts shown below are based upon a continuing resolution in effect through September 30, 1978, that provides for this account at a rate consistent with the amounts that would be provided by the conference version of the Departments of Labor, and Health, Education, and Welfare Appropriation Act, 1978.

¹ Includes capital investment as follows: 1977, \$375 thousand; 1978, \$152 thousand; 1979, \$312 thousand.

The Board administers the Railroad Retirement Act which provides annuities for age and disability and benefits for survivors and dependents of railroad workers. The Board also participates in the administration of the hospital and medical insurance programs for persons covered by the Railroad Retirement Act for which it is reimbursed by the social security trust funds.

The Board also administers a program for the payment of industry financed supplemental annuities to certain career railroad workers.

1. *Maintenance of earnings accounts.*—Eligibility for retirement and the amount of benefits paid are based on individual earnings records. The workload fluctuates according to the level of employment, and rate of turnover in the railroad industry. Accounts posted are estimated at 680,000 in 1979. The costs are shared with the railroad unemployment insurance program.

2. *Processing applications.*—This activity includes processing annuity claims under the Railroad Retirement Act of 1974.

3. *Maintenance of beneficiary rolls.*—This activity includes all work related to the placement, continuance, and removal of persons on the benefit rolls. The number of persons on the rolls receiving monthly benefit payments will decrease slightly from 1,028,000 at the end of 1977 to an estimated 1,027,000 at the end of 1978 with another decrease to 1,022,000 at the end of 1979. The num-

ber of persons also receiving supplemental annuities will increase from 165,000 at the end of 1977 to 176,000 at the end of 1978 and 185,000 at the end of 1979.

4. *Medicare.*—This activity includes the work of processing applications to establish eligibility for health and medical insurance benefits.

5. *Administration.*—The cost of administration is shared between the retirement and the railroad unemployment insurance programs.

The Board conducts renegotiation proceedings with contractors and subcontractors to determine and eliminate excessive profits on defense and space contracts and related subcontracts. The Renegotiation Act provides that a report must be filed with the Board by every contractor or subcontractor having receipts or accruals in a year which exceed \$1 million.

From the date of its establishment through September 30, 1977, the Board made determinations of excessive profits in the amount of \$1.3 billion, before adjustment for Federal income and excess profits tax credits. Of this total, \$18.2 million was determined during 1977.

1. *General management and support staff.*—The support staff provides administrative management, legal, and program analysis and planning services to the statutory board and to the headquarters and regional boards' staffs. Increases in 1979 will permit the continued development of uniform screening and review criteria to facilitate case processing and will allow for the accelerated application of ADP in the Board's financial review process.

2. *Headquarters operations.*—The headquarters operations staff assists the Board in the formulation of policy, gives technical guidance to, and coordinates the activities of the field organization. It is responsible for the screening

of contractors' filings and the handling of requests for exemptions and assists the Board in completing certain cases which have been processed in the field. Planned management actions will permit increased efficiency, improved case analysis, and a reduction in the case backlog.

3. *Regional operations.*—The regional boards conduct renegotiation proceedings and make recommendations and determinations of excessive profits. Planned management actions in 1979 will assist in reducing the case backlog.

¹ Includes capital investment as follows: 1977, \$1,558 thousand; 1978, \$375 thousand; 1979, \$664 thousand.

The primary purpose of the Commission is to protect the interests of the investing public.

1. *Full disclosure.*—In order to insure that investors will be provided with material facts concerning securities offered for public sale, issuers who propose to offer new securities for public sale generally are required to file a registration statement with the Commission and report assets. Commission staff review these filings to insure full and fair disclosure and to prevent fraud and misrepresentation.

¹ Includes capital investment as follows: 1977, \$32 thousand; 1978, \$145 thousand; 1979, \$45 thousand.

During 1979 the Selective Service System will improve its capability to respond rapidly and efficiently from a standby posture to meet a new and more demanding manpower requirement of the Department of Defense. The System's effort to improve its capability will be founded on a new concept of post M-day registration using the Nation's election machinery, and the refinement of automatic data processing (ADP) procedures. A comprehensive program of mobilization planning and training, attuned to the new and improved capability will be conducted as a vital part of achieving that capability. The capability will include the use of the Emergency Military Manpower Procurement System (EMMPS) which will be maintained as a viable system.

1. *Mobilization readiness.*—In standby, this activity includes all facets of National and State operational and administrative planning and a comprehensive training program for the Selective Service Reserve Forces. Planning guidelines for the emergency reconstitution of the System will be modified to achieve an improved capability. Detailed State plans providing for emergency and non-emergency reconstitution of the System, mass and continuing registration of those persons liable for registration, and a secondary expansion of the System will be revised, maintained, tested, and updated regularly by the State Reserve Forces and will be reviewed and approved by National headquarters.

The testing will also interface with DOD readiness exercises. The mobilization readiness training of the System's Reserve and National Guard officers will be a high priority and will be closely supervised at the National level. Computerized registrant processing capability will be maintained, refined, and tested on a regular schedule. Contact will be maintained with the civilian community, other Federal agencies and private organizations as necessary to facilitate the rapid and efficient expansion of the System in the event of an emergency.

2. *Administration.*—This activity includes the Office of the Director of Selective Service as well as personnel ad-

ministration, fiscal management, logistics, and other necessary administrative services in support of the mobilization readiness planning and training programs.

3. *Reserve program.*—Funds are provided for the continued utilization and training of Reserve and National Guard officers who constitute the Selective Service Reserve Forces. During scheduled training drills and periods of annual active duty, the Reserve Forces will refine and test state mobilization plans including those for reconstitution, registration and secondary expansion. Training of the Reserve Forces will focus on the implementation of the mobilization plans, thereby insuring that should reconstitution become necessary, plans can be carried out smoothly, quickly, and efficiently. An adequate force of experienced, well-trained Reserve and National Guard officers is an essential resource of the Selective Service System in standby.

4. *Reconciliation service.*—This activity included personnel support and travel expenses for the few remaining enrollees in the reconciliation service program, and was concluded in 1977.

The Small Business Administration counsels, assists, and protects the interest of small business, and provides aid to business firms and homeowners who have suffered losses through disasters. These efforts are conducted through the following activities:

1. *Procurement assistance.*—This activity assures small business a fair share of Government procurements. In the minority enterprise business development program, section 8(a), the basic objective is to assist in the establishment or expansion of minority or disadvantaged firms which have the potential of developing into viable competitive businesses in a reasonable period of time.

2. *Management assistance.*—The management assistance activity is structured to aid in the establishment, growth, and success of small businesses. Through counseling services, training programs, and publications, small business owner/managers are assisted in their goal of improving the management and efficiency of their businesses. In addition, section 7(j) of the Small Business Act, as amended, provides authority to contract for professional management training and support to assist the small business entrepreneurs.

3. *Finance and investment.*—This activity is comprised of:

(a) *Business loans.*—This includes loans and financial counseling to business concerns, businesses eligible under section (i) of the Small Business Act and those loans to the handicapped or nonprofit organizations hiring the handicapped under section 7(h) of the Small Business Act. The program for 1979 is projected as follows:

	[Dollars in millions]	
	Number	Amount
7(a) business loans.....	34,350	\$3,229
7(h) handicapped loans.....	250	20
Economic opportunity loans.....	4,425	120
Total.....	39,025	3,369

(b) *Development company loans.*—This covers (a) efforts to encourage private lending institutions to expand their role in the economic development of their respective States and (b) loans to State and local development companies to enable them to provide the long-term capital equity and loans to small businesses. The program level for 1979 is estimated at \$86 million.

(c) *Investment company assistance and supervision.*—In order to stimulate and supplement the flow of private capital to small business concerns, the Small Business Administration is authorized to (a) license, regulate, and examine small business investment companies, and (b) provide funds to such companies for financing small business firms. The program level for 1979 is estimated at \$145 million.

(d) *Surety bond guarantees.*—In order to enable small firms to obtain bid, performance, and payment bonds otherwise denied them through asserted lack of financial and other capability, the Small Business Administration is authorized to guarantee sureties against losses resulting from the breaching of such bonds by small contractors who were furnished bonds by the sureties under the provision of this program. SBA guarantees a portion of the loss under contracts not exceeding \$1,000 thousand in amount. The program level (contracts insured) for 1979 is estimated at \$1.5 billion.

(e) *Pollution control equipment contract guarantees.*—The purpose of this newly established fund is to alleviate the adverse impact of pollution regulations on small businesses. The agency estimates that approximately 12 tax-free bond issues will be approved in 1979 for about \$50 million to assist about 125 firms in their efforts to abate pollution.

(f) *Nonphysical disaster loans.*—Provides loans to small firms to enable them to comply with new health and safety standards (involving changes in equipment, facilities, or methods of operation) imposed by a number of Federal statutes or State laws enacted in conformity therewith. Similar loans are also authorized for any small firm likely to suffer substantial economic injury as a result of any international agreement limiting the development of strategic arms or the installation of strategic arms facilities,

base closings and those adversely affected by the energy crisis. In addition, loans are made to businesses who suffer economic loss due to displacement.

(g) *Reimbursable program.*—SBA works with the Economic Development Administration, Department of Commerce, in servicing EDA loans on a reimbursable basis. A memorandum of understanding establishes SBA's responsibilities in servicing EDA loans.

4. *Operations.*—This activity has the responsibility for the guidance, supervision, and policy planning of all field office operations and for the direction and guidance of all disaster operations.

5. *Disaster loanmaking.*—This provides financial assistance on favorable terms to property owners for rehabilitation of property damaged by natural disasters.

6. *General counsel.*—The Office of General Counsel is responsible for analyzing and interpreting legislation, regulations and orders relating to the operations of the Small Business Administration, and advising officials as to the legal aspects of the development and execution of policies and programs.

7. *Administration.*—This activity provides the administrative support to the program activities of the Small Business Administration. These activities include budget and finance, management services, personnel and field administration.

8. *Planning, research, and data management.*—The planning and research function includes analysis of the economic environment and its impact on small business, evaluation of program activities, and the development of new or revised size standards for defining small business in all industries. In addition, funds of \$1.0 million are requested for research contracts in order to conduct comprehensive studies on the agency's major lending program—7(a) business loans. Data management is responsible for the installation, analysis, and operation of the data processing capability of the agency.

9. *Advocacy and public communications.*—The advocacy function is responsible for the initiation, coordination, and development of the agency's position as the Government's principal advocate of small business, promoting counseling, and spreading awareness of the position of small business with all Federal agencies and State and local governments, maintaining liaison with trade and professional organizations, developing and recommending policy concerning the advisory councils to the agency, and communication between the agency and the small business community, news media, and the public at large.

10. *Congressional and legislative affairs.*—This activity has the principal responsibility for information, communication, and understanding between the agency and the executive and legislative branches of the Federal and State Governments.

11. *Minority small business.*—The responsibility for the formulation of policy for SBA's programs which provide assistance to minority small concerns, and for evaluating agency performance and execution in light of such policy is performed by this activity. The Associate Administrator for Minority Small Business assures that these programs

are focused on common objectives, and that comprehensive assistance is provided to minority small businesses.

12. *Civil rights activities.*—This office is responsible for the overall planning, administration, and review of the agency's equal employment opportunity program, title VI and related programs and the contract compliance programs.

13. *Executive direction.*—This activity provides policy determination and coordination of all SBA programs by the Administrator, his Deputy, and administrative staffs of the central, regional, district, and branch offices. This function also includes the agency's audit and investigative responsibilities.

This fund was established on July 1, 1966 to finance loan programs and prime contracting activity performed pursuant to sections 7(a), 7(b)(3), 7(e), 7(h), 7(i), and 8(a) of the Small Business Act, as amended, and titles III and V of the Small Business Investment Act of 1958, as amended. Public Law 95-89, approved August 4, 1977, transferred the financing of loans made pursuant to section 7(b)(3) to the Disaster loan fund.

Public Law 95-89 also established program limitations for 1979. The following table compares the amounts requested with these limitations (in thousands of dollars):

1. *Financial assistance. Business loans (sec. 7(a), Small Business Act).*—Funds may be loaned to business concerns that are not dominant in their fields. To such small businesses, loans may be made directly or in participation with banks or other lending institutions, and shall be of such value or so secured as reasonably to assure repayment. No loan may be made unless the financial assistance is not otherwise available on reasonable terms. No direct loan may be made unless it is shown that a bank participation is not available, and no loan on an immediate participation basis may be made unless it is shown that a guaranteed loan is not available. Under the guaranty plan, the Small Business Administration agrees to purchase the guaranteed portion of the loan only upon default.

The agency's share of an immediate participation or guaranteed loan is limited to 90%. Its maximum outstanding loan and/or commitment to any one borrower is limited by statute to \$350 thousand for direct and immediate participation loans and \$500 thousand for guaranteed loans.

Business loans (sec. 7(h), Small Business Act).—The Small Business Investment Act Amendments of 1972, signed into law on October 27, 1972, added a new section to the Small Business Act authorizing loans to handicapped

persons operating or establishing a small business, and to nonprofit organizations hiring the handicapped.

Funds may be loaned to any one borrower up to a maximum of \$350 thousand for 15 years.

Business loans (sec. 7(i), Small Business Act).—The Small Business Administration administers a program of financial assistance to small business concerns and to qualified persons seeking to establish such concerns. Loans may be on a direct, immediate participation, or guaranteed basis for up to \$100 thousand, for a maximum term of 15 years. The credit and collateral requirements are more flexible than those applicable to 7(a) business loans, and provision for management training is made an integral part of the program.

Development company loans.—The Small Business Administration lends funds to State and local development companies pursuant to section 501 and 502 of the Small Business Investment Act, as amended. Funds are available to State development companies for general use purposes under section 501 and State and local development companies for plant construction, conversion, or expansion, including the acquisition of land, under section 502.

2. *Investment company assistance.*—A primary function of small business companies is to provide a source of needed equity capital for small concerns. To encourage the formation and growth of such investment companies. The Small Business Investment Act, as amended, authorized the Small Business Administration to purchase, or to guarantee the timely payment of all principal and interest as scheduled on debentures issued by such companies. The Small Business Investment Act Amendments of 1972, approved October 27, 1972 (Public Law 92-595), authorize in addition the purchase of preferred securities (shares of nonvoting stock or other securities having similar characteristics) from small business investment companies operating under authority of new section 301(d) wherein the investment policy of such companies will be to make investments solely in small concerns owned and operated by disadvantaged persons.

Debentures purchased or guaranteed by the Small Business Administration shall be subordinate to any other debenture bonds, promissory notes, or other debts and obligations of such companies, unless the Administration determines otherwise in the exercise of reasonable investment prudence. The amount of debentures which may be purchased or guaranteed, or preferred securities which may be purchased, and outstanding at any one time from a company depends on the amount of combined private paid-in surplus of such company, but in no event may exceed \$35 million for other than 301(d) companies.

Operating costs.—Interest expense.—Pursuant to section 4(c) of the Small Business Act, interest is payable into miscellaneous receipts of the Treasury on outstanding cash disbursements from the fund. The interest rate or rates applicable to each year's disbursements are determined at the beginning of the year by the Secretary of the Treasury, taking into consideration the current average yields on outstanding interest-bearing marketable public debt obligations of the United States of comparable maturities. For interest computation purposes, collections of interest and principal on unpledged loans and other receipts to the fund are applied against the earliest year's disbursements still outstanding. The rates set by the Secretary of the Treasury for disbursements in 1978 are $7\frac{1}{4}\%$ for 7(a) business, economic opportunity and State development company loans, $7\frac{3}{8}\%$ for SBIC loans and/or debentures, and $7\frac{5}{8}\%$ for local development company loans. Interest is also payable to the holders of participa-

tion certificates at specified rates set at the time of each sale.

Financing.—This fund was capitalized by transfer of an applicable portion of the assets, liabilities, and unexpended balance of the revolving fund, Small Business Administration on July 1, 1966, and by transfer of the unexpended balance of appropriations previously made for the trade adjustment assistance loans. Appropriations are authorized to be made to the fund as additional capital to the extent required to carry out the authorized functions.

In lieu of appropriations, additional capital funds required in the several years prior to 1971 were provided by the sale of participations in loan pools. Of the \$1.35 billion of such participation certificates sold, \$1,117.2 million was allocated to this fund, of which \$282.5 million remained outstanding on September 30, 1977. Beginning in 1971, capital funds required have been provided by appropriations.

In lieu of the past practice of reserving a percentage of all new guaranty approvals in order to provide for subsequent purchases, the request for budget authority in 1979 contains a projection of guaranteed purchases anticipated for that fiscal year plus a contingent amount of 10% to provide for any fluctuations in the economy or other adverse factors.

Participation sales insufficiencies.—The Participation Sales Act of 1966, authorized appropriations without fiscal year limitation of such sums as may be necessary to permit trustor agency to pay the trustee such insufficiency as the trustee may require on account of outstanding participations. A permanent appropriation in such amount as may prove necessary each year was provided in the Independent Offices Appropriation Act of 1967, in connection with participation sales of \$850 million as were authorized by the act. However, for each of the years 1968 through 1978, the Congress provided annual appropriations for any insufficiency arising from the \$150 million sales authority provided in the agency's appropriation act.

Operating results.—The fund will continue to operate at a deficit. Interest and fee income will not be sufficient to cover interest, other expenses, and a provision for estimated loan losses. Primarily this reflects the excess of interest expense rates over interest income rates. Included in the deficit of the fund is the cost differential on section 8(a) contracts. In expanding the use of the section 8(a) prime contracting authority to bring more minority firms into the Government procurement process, there are instances in which the program objectives justify a payment to the minority subcontractor in excess of an apparent competitive market price to the procuring agency.

Public Law 89-409, approved May 2, 1966, established this fund as of July 1, 1966, to finance disaster loans made pursuant to sections 7(b), 7(f), and 7(g) of the Small Business Act, as amended. Public Law 95-89, approved August 4, 1977, provided for the financing of loans to displaced businesses made under section 7(b)(3) which was previously excluded under Public Law 89-409. Under current law, both the Farmers Home Administration in the Department of Agriculture and the Small Business Administration have authority to make emergency farm disaster loans. To remedy difficulties caused by this overlap in responsibility, legislation is proposed accompanying the 1979 budget to limit such authority to the Farmers Home Administration, which is better equipped to handle this program through its long experience in dealing with farmers. This change will also assure that loan assistance is extended only to those who are unable to obtain loans from private lenders.

Physical disaster loans.—Under this function, loans are made at favorable terms to property owners for rehabilitation of property damaged by natural disasters. Estimated approvals for physical disaster loans are expected to be \$1.55 billion in 1978, due to severe drought conditions. In 1979, approvals are estimated at \$250 million.

Nonphysical disaster loans.—Under this function, loans are made to small firms which need assistance in complying with various Federal or State statutes and regula-

tions (Clean Air Act of 1970, Occupational Safety and Health Act of 1970, et cetera); to small businesses which have suffered economic loss due to displacement or economic injury as a result of shortages in energy-producing materials. Estimated approvals for nonphysical disaster loans including displaced business loans, are expected to be \$210 million in 1978 and \$60 million in 1979.

Interest expense.—Pursuant to section 4(c) of the Small Business Act, interest is payable into miscellaneous receipts of the Treasury on outstanding cash disbursements from the fund. The rate set by the Secretary of the Treasury for disbursements in 1978 is 7% for physical disaster loans, 7½% for nonphysical disaster loans and 7% for displaced business loans. Interest is also payable to the holders of participation certificates at specified rates set at the time of each sale.

Financing.—Appropriations are authorized to be made to the fund as capital to the extent required to carry out the authorized functions. A capital appropriation of \$190 million is requested for 1979.

Participation sales insufficiencies.—The Participation Sales Act of 1966 authorized appropriations without fiscal year limitation of such sums as may be necessary to permit any trustor agency to pay the trustee such insufficiency on account of outstanding participations. This authority is not applicable to the sales in the predecessor fund.

Public Law 93-386, the Small Business Amendments of 1974, established this fund to finance the lease guarantees program.

The lease guarantees program was designed to provide prime space for those small business firms which cannot compete with prospective tenants with AAA ratings. This program has been incurring excessive losses and has not been an important form of assistance to small businesses. As a result, the program has been terminated.

Public Law 93-386, the Small Business Amendment Act of 1974, established this fund to finance the surety bond guarantees program.

The Small Business Administration will guarantee a portion of the losses sustained by a surety company as a result of the issuance of a bid, payment, and/or performance bond to a small business concern on a contract up to \$1 million.

It is estimated that surety bond guarantees will be made in connection with 22,300 contracts totaling \$1.5 billion in 1979. SBA will undertake improvements in this program to reduce the high loss rates which have occurred in recent years.

Public Law 94-305, approved June 4, 1976, established this fund to alleviate the adverse impact of pollution regulations on small businesses. The Small Business Administration may, whenever it determines that small business concerns are to be at an operational or financial disadvantage with respect to the planning, design, or installation of pollution control facilities or the financing thereof, guarantee the payment of rentals or other amounts due under qualified contracts.

It is estimated that 12 tax-free bonds for \$50 million will be approved in 1979.

¹ Includes capital investment as follows: 1977, \$3,096 thousand; 1978, \$2,712 thousand; 1979, \$2,921 thousand.

The Smithsonian Institution maintains public exhibits representative of the arts, American history, aeronautics and astronautics, technology, anthropology, geology, and biology (including living animal exhibits); acquires and preserves for reference and study purposes millions of items of scientific, cultural, and historic importance; conducts research in the natural and physical sciences and in the history of cultures, technology, and the arts; presents performances of American arts and crafts; undertakes education programs at all levels; and participates in the exchange of scientific information.

The Institution is responsible for the operation and maintenance of 10 major exhibition buildings, as well as a zoological park; a preservation and storage facility at Silver Hill, Md.; a conference center at Elkridge, Md.; two natural preserves, in Panama and on the Chesapeake Bay; an observatory on Mt. Hopkins, Ariz.; and supporting administrative, laboratory, and storage areas. Visitor attendance to buildings on and off the Mall, including the National Zoological Park, totaled more than 23 million in 1977.

In 1979, emphasis will be placed on increasing the level of scientific research and folklife studies, upgrading the guard force commensurate with standards in Government agencies, continuing phased programs to maintain the Institution's facilities and to provide essential protection services, and improving collections storage and management efforts.

Special research projects designed to provide unique and invaluable information in the areas of human nutrition, environmental preservation, and disease prevention will be undertaken. In order that the professional research staff can function at the highest level of productivity,

attention will continue to be directed toward providing more adequate support in the areas of library materials and laboratory equipment and supplies.

Central administration and supporting services will be strengthened to improve program direction, management, and assistance to a complex organization.

The Smithsonian Science Information Exchange, Inc. (SSIE) is a non-profit corporation, affiliated with the Smithsonian Institution, that operates pursuant to a contract with the Smithsonian. The Exchange collects, indexes, stores, retrieves, and disseminates information about ongoing scientific research and it responds to requests for information on who is currently working on what project, where, when, and under what source of funding. SSIE also provides directories of ongoing research in response to the requirements of Federal agencies. Its purpose is threefold: (1) to assist in the avoidance of unwarranted duplication of research; (2) to enhance scientific communication and creative interaction; and (3) to provide overviews of national research activities to aid in the research management and science policy-making process.

The objectives of the Woodrow Wilson Center are to produce scholarship of the highest quality on subjects that matter to our civilization and to communicate that scholarship to a wider audience within and beyond Washington through publication and dialog.

The Center has chosen to fulfill these objectives through its fellowship and guest scholar program. The Center conducts each year a major open international competition for a limited number of fellowships. The scholars themselves and the scholarly work they produce constitute the

memorial to Woodrow Wilson. Virtually all of the Center's expenditures derive from the basic decision to create a resident body of fellows.

The Center is enjoined by its congressional statute to raise both public and private funds and indeed the Center's major objectives could not be attained by an exclusive reliance on either Federal appropriation or private contribution. The present request for a Federal appropriation for 1979 is one that seeks only minor adjustments and improvements in an institution that is largely established and already carrying out its mandate.

The Joint Federal-State Land Use Planning Commission for Alaska was created by Public Law 94-203, the Alaska Native Claims Settlement Act, as amended. The Commission, composed of five Federal and five State members, will be in existence until June 30, 1979. With the support of a small professional staff, it performs land use planning and coordinating functions, and makes recommendations to the President and the Congress, and the Governor and the legislature of Alaska concerning disposition and uses of Federal and State lands in Alaska. Under the law, Commission expenses are shared equally by the Federal government and the State of Alaska. The 1979 program reflects a decrease resulting from a planned phase-down of operations prior to the scheduled termination in June 1979.

Section 17(a)(9)(A) of the Alaska Native Claims Settlement Act, Public Law 92-203, limits the Federal share of the expenses of the Joint Federal-State Land Use Planning Commission for Alaska to 50%. The State of Alaska provides for the remaining 50% of Commission expenses. As projected for 1979, a portion of the State's support share will be provided in-kind through the payment of the State cochairman's salary and benefits, assignment of State employees to the Commission, and rental of office space. For 1979, the total State cash and in-kind contributions are estimated to equal \$594 thousand.

The Congress created the Tennessee Valley Authority in 1933 for the unified development of a river basin comprising parts of seven States. TVA is a corporation wholly owned by the Federal Government. Its program in 1979 will be financed from three sources: (1) appropriations by the Congress; (2) proceeds available from current power operations and borrowings against future power revenues; and (3) proceeds available from nonpower activities.

The following table provides detailed information on programs financed by power proceeds and borrowings and programs financed by appropriations and nonpower proceeds.

Budget program—1. *Regional resources development program*.—A major objective of the TVA Act is full development and use of all the resources of the Tennessee River basin. The development of these resources is reflected in regional and national gains in the areas of navigation, flood control, water quality, recreation, and fisheries and wildlife development; in agriculture and forest and minerals resources; in human resources development; and in related economic and industrial development.

(a) *Water resources development* includes operation and continuing development of the all-year 9-foot navigation channel from the mouth of the river at Paducah, Ky., to Knoxville, Tenn., a distance of 650 miles.

Flood control activities include operating the system of multipurpose reservoirs to retain excessive seasonal runoff and regulate discharges at flow rates that can be accommodated by downstream channels and reservoirs. Flood crests are reduced along the Tennessee River and its major tributaries and along the lower Ohio and Mississippi Rivers.

Funding for water resources operations will be \$11,576 thousand. The water resources development program includes capital investments, totaling \$41,174 thousand. Of this total, \$7,000 thousand will be used to continue construction of the Duck River project, \$20,000 thousand will be used in constructing a new lock at Pickwick Landing Dam, \$7,479 thousand for the Bear Creek project, and \$1,846 thousand for the Tellico project. The remaining \$4,849 thousand is designated for additions and improvements in existing facilities.

(b) *Natural resources development* activities aid in the management and development of the region's natural resources to support the growing regional economy and enhance the area's environment of farms, forests, lakes, and streams. These efforts include: Agricultural education and demonstration programs to help rural residents improve their standard of living; implementation of new technologies and dissemination of information to promote the growth and use of the timber resources of the Tennessee Valley; various environmental quality projects such as assisting local governments with solid waste collection and disposal problems, monitoring of regional air quality, and improvement of the quality of the region's streams and lakes; efforts to enhance fisheries and waterfowl resources and benefits; recreation resources development activities to both improve access to TVA lakes and assist communities with their recreation programs; and a vigorous environmental education program. Total 1979 appropriation funding requirements for natural resources development are \$11,523 thousand. This figure includes \$10,535 thousand for operations, and \$988 thousand for recreation facilities.

(c) *Land Between The Lakes*.—Work will continue on development of the 170,000-acre area in western Kentucky and Tennessee situated between TVA's Kentucky Reservoir and the Corps of Engineers' Barkley Reservoir. Land Between The Lakes is a demonstration of new ideas in public outdoor recreation and environmental education. Expenses for this program are estimated at \$4,600 thousand. Work on facilities to serve visitors requires a capital investment of \$3,000 thousand.

(d) *Community resources development* efforts provide for the orderly physical, economic, and social development

of communities to increase the general welfare of the citizens in the region. TVA provides technical assistance and guidance to local communities to help them improve the quality of public services, revitalize central business districts, identify and develop new industrial sites, improve the quality and availability of health services, develop local flood damage prevention programs, and provide other supportive services such as economic analysis and environmental planning. TVA also assists the minority business community and economically depressed counties so that they may contribute more fully to the region's growth.

Community resources development funding for 1979 is \$10,468 thousand. Of this total, \$7,126 thousand is for operating expenses, \$1,362 thousand is designated for the completion of the South Chickamauga Creek project, and \$1,980 thousand for local flood damage prevention facilities.

2. *National fertilizer development program*.—Chemical facilities at Muscle Shoals, Ala., are maintained and operated as the National Fertilizer Development Center. Program activities are of two general types: Fertilizer research and development and introduction to the American farmer of new fertilizer materials and improved fertilizer uses. The appropriation financed operating expense of this program is \$22,480 thousand and includes fertilizer research and development and fertilizer introduction efforts.

Fertilizer research and development consists of basic chemical and agronomic research and fertilizer products and processes research and development. TVA works cooperatively with the Department of Agriculture, the land grant universities, and with industry to increase the effectiveness of the research and to avoid duplication. Costs of fertilizer research and development are financed solely from appropriations and are estimated as \$11,329 thousand for 1979.

Fertilizer introduction is carried on cooperatively with the land grant universities and the fertilizer industry. It includes carefully controlled small-plot demonstrations, tests and demonstrations of fertilizer materials and practices on selected operating farms, and nationwide educational introduction of fertilizers.

Program costs are financed from appropriations and nonpower proceeds, the majority of which arises from the sale of experimental fertilizers to industry and farmers. Estimates of appropriation funding required in 1979 are \$11,151 thousand. An additional \$26,517 thousand will be derived from nonpower proceeds.

Capital investment is appropriation financed and is budgeted at \$4,776 thousand for 1979. Included are: (1) construction of a demonstration scale unit for producing urea polyphosphate, (2) replacement of obsolete railroad tank cars used in delivering TVA products, and (3) other improvements, additions, and replacements.

3. *National energy demonstration program*.—The national energy demonstration program consists of significant involvement in energy conservation activities and in development of alternative energy sources. Estimates of appropriations for 1979 include: \$10,971 thousand for completion of the ammonia-from-coal project; \$365 thousand for continuing development of alternative ammonia-from-coal processes; \$200 thousand for limited developmental

production of coal-gas feedstock; and \$725 thousand for waste-heat utilization.

In addition, estimated expenditures of \$6,000 thousand are included for new initiatives to allow TVA to continue demonstration activities in areas of power pooling and biomass and to facilitate improved efficiencies in energy uses by TVA and by commercial, industrial, and institutional energy users in the TVA region through technical assistance.

TVA will also participate in joint energy demonstration activities with the Department of Energy (DOE) for which the initial DOE contributions are estimated as \$7,150 thousand in expenditures for 1979.

In activities involving energy research and demonstrations, TVA uses internally generated power system revenues to finance work that represents a direct benefit to the Tennessee Valley region. Estimates for 1979 funding of the national energy demonstration projects directly benefiting the Valley are \$28,301.

4. *Power program.*—TVA is the sole supplier of electric power in an area of 80,000 square miles of the Tennessee Valley States. Income from power operations, net of interest charges and depreciation, is estimated to be \$319,172 thousand in 1979.

Of the \$1,150,330 thousand estimate for power generating facilities, all to be financed from power proceeds and borrowings, \$47,248 thousand is for continuing Sequoyah nuclear units 1-2; \$3,111 thousand for Raccoon Mountain pumped-storage units 1-4; \$102,501 thousand for Watts Bar nuclear units 1-2; \$183,421 thousand for Bellefonte nuclear units 1-2; \$404,371 thousand for Hartsville nuclear units 1-4; \$192,751 thousand for Phipps Bend nuclear units 1-2; and \$216,927 thousand for Yellow Creek nuclear units 1-2. Each element in this program of power generating capacity additions is essential to meeting expected power needs of the Tennessee Valley region.

Capital investment for all power supply and use facilities in 1979, including transmission system facilities and nuclear fuel acquisitions, is estimated at \$1,691,931 thousand.

5. *General service activities.*—Operating costs for general service activities include mapping and remote sensing, bridge maintenance, scientific and technical cooperation expenses, fallout shelter maintenance, and reimbursable services furnished at the request and expense of other agencies. Operating expenses for 1979, net of reimbursables, are \$1,930 thousand. Capital investment for 1979 is estimated at \$10,747 thousand for additions and replacements of office, transportation, electronic computing, and other facilities used jointly in conducting TVA programs.

¹ The adjusted unobligated balance brought forward of \$2,230 thousand reflects the reclassification of commitment for chemical facilities in the amount of \$583 thousand from nonpower proceeds to appropriations of Sept. 30, 1976.

Operating results and financial conditions.—Only the power program is intended to be self-supporting; the net expense of nonpower programs is covered largely by appropriation funding. Payments to the Treasury from power proceeds in 1979 are estimated at \$80,420 thousand—\$60,420 thousand as a dividend (return on the appropriation investment in the power program) and \$20,000 thousand as a reduction in the appropriation investment in the power program. Borrowings for the power program are expected to increase by \$1,360,000 thousand during 1979.

Total assets are estimated to increase by \$1,756,943 thousand during 1979. A total of \$1,697,048 thousand of the increase in assets is in the power program and \$59,895 thousand is in nonpower programs. The estimate of liabilities at September 30, 1979, is \$1,458,354 thousand more than the estimate at September 30, 1978. This increase reflects the proposed borrowings in 1979. Total Government equity at September 30, 1979, is estimated to be \$298,589 thousand greater than that at September 1978. This change includes the requested appropriation for 1979 and the net income from power operations, less payments to the Treasury and the net expense of nonpower programs.

The United States Railway Association was created to prepare and implement a system plan for restructuring and rehabilitating the bankrupt railroads of the Northeast and Midwest. The Association submitted a final system plan to the Congress on July 25, 1975. On April 1, 1976, railroad facilities designated in the plan were conveyed to a new operating entity called the Consolidated Rail Corporation (ConRail).

The current tasks of the Association are (a) to provide and monitor the Federal funds which are to be made available to ConRail for working capital and rehabilitation and (b) to defend the reorganization which has been implemented against legal challenges filed by the estates of the reorganized railroads.

These funds have been provided for the U.S. Railway Association to purchase debentures and series A preferred stock issued by the Consolidated Rail Corporation. The Corporation will utilize these funds along with internally generated funds and funds from private sources to undertake a major rehabilitation of plant and equipment and to cover losses that may occur during the initial phase of operations.

Appropriations totaling \$2.026 billion through 1979 were provided by Public Law 94-252. The investment of these funds is intended to make possible the establishment of ConRail as a private corporation that will operate on a profitable basis.

The Water Resources Council was established to encourage conservation, development, and utilization of water and related land resources on a comprehensive and coordinated basis.

1. *Administration and coordination.*—Includes Council staff activities and expenses, other than for comprehensive planning. Staff activities include: revising and rewriting principles and standards for projects to reflect changes in objectives and other evaluation criteria as directed by the President's water policy review; audit of the title III planning grants program; providing executive direction for all Council programs and activities; and providing general administration support for Council staff, and all programs and activities.

2. *River basin commissions.*—River basin commissions have been established under title II of Public Law 89-80. Activities for 1979 include preparation of portions of each comprehensive, coordinated, joint plan and to provide an updated priorities report for each commission.

3. *Planning grants to States.*—Financial assistance is provided to the States to stimulate their participation in water and related land resources planning. Council staff will assist States in developing planning capability and competency and State water and related land resources plans as products.

4. *Comprehensive planning.*—This program includes activities relating to level B and special studies; comprehensive planning for nontitle II river basin commission areas; the water assessment and appraisal program; and the water for energy program. Activities for 1979 include: continued funding of the 1978 ongoing level B studies; providing data capability by 1980 to support future water assessment and reporting activities as desirable; provide program management of water for energy assessments under section 13, Public Law 93-577; providing a level of funding to the nontitle II entities for the preparation of their regional plans and priorities reports; and progress toward achieving operational potential of the water assessment and appraisal program by 1980.

On April 6, 1977, the President announced his support for the establishment of a consumer agency. The proposed Office of Consumer Representation will represent consumer interests before other Federal Government agencies, provide consumer information and education, and handle consumer complaints.

When Congress enacts authorizing legislation for the new consumer representation agency, personnel and other resources currently authorized for other agencies will be transferred to the new agency. The net result will be a more effective representation of consumer interests at less cost to the Federal Government.

PART II

SCHEDULES OF PERMANENT POSITIONS

EXPLANATION OF SCHEDULES

Part II contains detailed schedules of permanent positions, which are furnished to the Congress pursuant to the Budget and Accounting Act of 1921, as amended, excluding waivers thereunder granted by the Appropriations Committees.

Most civilian employees in the Federal Government are included in one of the following pay systems: Executive level, general schedule, or Foreign Service. The salary ranges for the grades in each of these systems are shown in the following tables. Pay rates for wage-board positions included in the "ungraded" positions are established on the basis of prevailing rates, which vary from area to area. Salary ranges shown for executive levels, general schedule (GS), and Foreign Service (FO, FR or FS) are those that became effective in October 1977, pursuant to Executive Order 12010 of September 28, 1977.

FS-9.....	9,927 to 12,906
FS-10.....	8,902 to 11,575

Note.—In the general schedule grades and certain other positions, the pay scales shown in the schedules may be exceeded when pay rates in the private sector for comparable occupations in one or more areas or locations are substantially above the statutory rates. In such cases, the Civil Service Commission has authority to permit a higher entrance level (not to exceed the maximum pay step prescribed by statute) and add a corresponding number of steps above the stated pay range.

The following pages display schedules of permanent positions for each of the three branches of Government. The schedules relate to positions established for full-time employment without time limit, and to any others occupied for a year or more. These schedules cover all permanent positions of the organizational element(s) identified, regardless of the source from which financed. Positions to be filled by reimburseable details from other agencies, and positions financed by allocations to other agencies will be reflected in the corresponding schedules of those agencies.

Authorized positions as of the end of the year are counted, whether filled or unfilled at that time; positions abolished during the year are not counted. Each schedule contains a listing of the grades of authorized positions and the total number in each grade as illustrated below:

Grades are reflected in the stub column; the most commonly used grade series, general schedule, is abbreviated "GS-..." Salary ranges are shown only when the grades are unique to a single agency or bureau (for example, physicians and nurses schedules within the Department of Medicine and Surgery, Veterans Administration) or where a grade is identified only by title. In the latter case, the title of each grade and the basic salary range is listed. Classification systems with the same salary ranges as the general schedule are so noted. A subtotal line is shown for executive level positions as well as for each separate series of positions, whenever more than one position is shown in these categories. Two additional lines provide for deducting the number of unfilled positions to arrive at the total employment in permanent positions at the end of the year.

PART III

SUPPLEMENTALS AND RESCISSIONS

EXPLANATION OF REQUESTS

This part contains supplemental appropriations requests being proposed for congressional consideration in this budget, and supplemental requests now pending before the Congress. Requests for supplemental appropriations are made after enactment of regular appropriations. Information is also included on proposals to rescind budget authority.

PROPOSED SUPPLEMENTAL REQUESTS

Supplemental requests for various program purposes, for 1978 increased pay costs, and for general provisions of appropriation language are shown as separate sections, following the usual form of supplemental appropriations acts.

Section I.—Supplementals for various purposes other than increased pay costs are presented in this title and include: suggested appropriation language, program and financing schedules, and the reasons for the requests.

Section II.—Requests for pay supplementals in this title are in the form of suggested appropriation language for 1978. The amounts contained in the appropriation language also appear as separate line entries in the regular program and financing schedules in Part I.

1014

SUPPLEMENTALS PENDING

Section III.—The Congress has not completed consideration of the conference version of H.R. 9375, a pending 1978 supplemental appropriations bill. The appropriations language contained in the bill and program and financing schedules that display the effects of the appropriations are listed—with two exceptions—in accordance with the conference version of the bill. Rescissions of appropriations associated with the B-1 bomber are displayed, consistent with the administration position and as contained in the Senate-passed version of the bill. The amount to be provided for the Clinch River breeder reactor is listed at the level of the administration request, rather than the higher conference bill level.

RESCISSION PROPOSALS

Section IV.—Under the provisions of the Impoundment Control Act of 1974 (Public Law 93-344), whenever the President proposes rescission of enacted appropriations, a special message must be sent to the Congress giving details of the proposal. This part of the Appendix contains program and financing schedules for rescission proposals being sent to the Congress.

Relation of obligations to outlays:			
71.00 Obligations incurred, net.....			
90.00 Outlays.....			

This supplemental request will provide resources to cover possible exchange losses from U.S. participation in the Supplementary Financing Facility of the International Monetary Fund (IMF). The purpose of the Supplementary Financing Facility is temporarily to augment the ability of the IMF to assist member countries with balance of payments problems. The fund provides financial resources on a conditional and temporary basis, thereby allowing countries time to implement required policy measures without resort to abrupt and harmful restrictions on trade and payments. The size of payments deficits which have resulted from the increases in the international price of oil and the worldwide recession has greatly increased the potential need for IMF financing relative to currently available resources. Major industrial and oil-exporting countries have joined in agreeing to make available an amount equal to 8,705 million Special Drawing Rights (approximately \$10.5 billion) to the Supplementary Financing Facility in order to provide a prompt and substantial temporary increase in the Fund's resources, while customary and more time-consuming negotiations for a periodic quota increase are undertaken. The international monetary reserves of the United States are correspondingly increased by the amount of the U.S. resources transferred to the facility, and could be drawn on by the United States in case of need. No outlays from the requested appropriation of \$200 million will result unless the United States incurs an exchange loss due to the appreciation of the dollar with respect to the Special Drawing Right over the life of the facility.

PAYMENT TO FOREIGN SERVICE RETIREMENT AND DISABILITY FUND

(Supplemental now requested, existing legislation)

For an additional amount for "Payment to Foreign Service retirement and disability fund", \$2,770,000.

¹ Includes capital investment of \$25 thousand.

This proposed supplemental appropriation will provide funds necessary to carry out extended responsibilities set forth in the Export Administration Amendments of 1977 (Public Law 95-52) and reimburse the Postal Service for prior year deficiencies in penalty mail payments. The extended responsibilities of the Export Administration Amendments of 1977 include provisions aimed at improving the licensing process and at strengthening the U.S. policy against compliance with foreign boycotts.

MINORITY BUSINESS ENTERPRISE

MINORITY BUSINESS DEVELOPMENT

(Appropriation language now requested, existing legislation)

The amount made available in the appropriation under this head in the Department of Commerce Appropriation Act, 1978, for program development and management is increased by \$289,000 and the amount to remain available until expended is decreased by \$289,000.

This appropriation language change will allow the Office of Minority Business Enterprise to have staff support provided by Federal employees instead of contract personnel. This is desirable in view of the importance of this program in achieving the President's goal of doubling Federal purchases from enterprises owned by minorities.

SCIENCE AND TECHNICAL RESEARCH

SCIENTIFIC AND TECHNICAL RESEARCH AND SERVICES

(Supplemental now requested, existing legislation)

For an additional amount for the "National Bureau of Standards", \$1,569,000, to remain available until expended, of which not to exceed \$485,000 may be transferred to the "Working Capital Fund", National Bureau of Standards, for additional capital.

This supplemental appropriation is requested to implement section 383 of the Energy Policy and Conservation Act of 1975. Test procedures will be developed for comparing re-refined or otherwise processed used oil with new oil for a variety of uses. These procedures will provide the basis for Federal Trade Commission rulings for industry test procedures and labeling standards. Reliable test procedures and standards will also provide consumers with a realistic means for evaluating recycled oil products thereby promoting their use.

90.00 Outlays		23,000	8,000

This supplemental appropriation will fund pinpoint disaster applications from 1968 through the present and current major disaster applications. The requested amount includes \$26 million for funding the backlog of 625 disaster applications relating to pinpoint disasters which occurred on or after January 2, 1968. In addition, \$5 million is required for partially funding anticipated major disasters. This amount will provide assistance to approximately 50 applicants.

SALARIES AND EXPENSES

This supplemental request is needed to cover the Office of Education's higher than anticipated postage costs.

STUDENT LOAN INSURANCE FUND

(Supplemental now requested, existing legislation)

For an additional amount for the "Student Loan Insurance Fund", \$223,939,000, to remain available until expended: *Provided, That the Commissioner may make new loans from unobligated amounts available within the Higher Education Facilities Loan and Insurance Fund as authorized by section 771(a)(2) of the Higher Education Act.*

74.40	Obligated balance, end of year	-155,639	
90.00	Outlays	68,300	155,639

This proposed supplemental is needed to handle increased mandatory costs for guaranteed student loans. Because of increases in interest rates, the special allowance payable to lenders, based upon money market conditions, will need to be increased significantly. Increases in new loan volume for both 1977 and 1978 will also require greater subsidy costs than originally anticipated. Other cost increases result from a provision in the Education Amendments of 1976 which increases the reinsurance rate on loans guaranteed by State agencies. The supplemental also includes an amount to cover a deficit in funding for default claims in 1977.

The provision included above in the appropriation language allows the Commissioner of Education to make new loans from uncommitted balances in the Higher Education Facilities and Loan Insurance Fund. These loans would be used to help meet a growing need of post-secondary institutions to make their buildings energy-efficient, to provide access for the handicapped, and to

meet new Federal, State and local standards for occupational safety and health and environmental protection.

This proposed supplemental appropriation would provide additional Federal funding to States and local governments for fiscal relief from the costs of welfare in 1978. This funding was authorized by section 401 of Public Law 95-216 (the Social Security Amendments of 1977), enacted December 20, 1977.

DEPARTMENTAL MANAGEMENT

GENERAL DEPARTMENTAL MANAGEMENT

(Supplemental now requested, existing legislation)

For an additional amount for "General departmental management", \$1,047,000.

Program and Financing (in thousands of dollars)

74.40 Obligated balance, end of year.....		-84	
90.00 Outlays.....		963	84

This supplemental request provides funds to initiate the second phase in the development of a new accounting system which would provide increased reliability and efficiency. This request also includes funds to enable the General Counsel to continue to provide prompt service to litigants in an increasing number of court cases in all of the Department's program areas including disability insurance, student loan enforcement, the supplemental security income program, and many others. New case filings have increased for three reasons: Increased resort to the courts by aggrieved persons; increased efforts by the Department to control program costs; and establishment by Congress of additional programs. The major portion of these funds would be allocated to litigation workloads facing the Social Security Administration.

OFFICE OF INSPECTOR GENERAL

(Supplemental now requested, existing legislation)

For an additional amount for "Office of Inspector General," \$2,328,000.

Program and Financing (in thousands of dollars)

Identification code 75-0128-1-1-604	1977 actual	1978 est.	1979 est.

90.00 Outlays.....		2,148	180

This request would strengthen the new Office of the Inspector General by providing sufficient staff to investigate major new allegations for fraud and abuse which have resulted from new initiatives to identify potential fraud through computer searches of available Federal and State records. The first initiatives are focused on the medicaid and aid to families with dependent children programs, and future initiatives will examine other major

departmental programs including medicare and student financial assistance.

In addition, this proposal will provide sufficient funds to support fully the current operations of the Audit Agency, the Office of Investigations, and the Office of Health Care and Systems Review.

OFFICE FOR CIVIL RIGHTS

(Supplemental now requested, existing legislation)

For an additional amount for "Office for Civil Rights", \$20,146,000.

90.00 Outlays.....		18,534	1,612

This supplemental would permit the Office for Civil Rights to reduce its backlog of uninvestigated complaints of discrimination. The Department lacks the resources it needs to comply with its own regulations and is under a court order to request the additional resources necessary to correct this deficiency. These funds will allow the Department to comply with that order. This request will also provide technical assistance to the recipients of HEW funds, so that they may voluntarily and economically implement section 504 of the Rehabilitation Act of 1973 which prohibits discrimination against the handicapped.

Department of Housing and Urban Development

HOUSING PROGRAMS

RENT SUPPLEMENT PROGRAM

(Supplemental now requested, existing legislation)

The limitation otherwise applicable to the maximum payments that may be required by all contracts entered into under section 101 of the Housing and Urban Development Act of 1965 (12 U.S.C. 1701s) is increased by \$24,300,000: Provided, That budget authority obligated under such contracts shall be limited to \$24,300,000.

This supplemental provides for interim rent increases for 1978 for eligible units now under rent supplement contracts as authorized by the Housing and Urban Development Act of 1965, as amended. Beginning in 1979, the Department proposes the enactment of a troubled projects operating subsidy program. This new subsidy program would eliminate the need for future annual adjustments under the rent supplement program.

Liquidation of the contract authority released by this proposed supplemental will be accomplished through the use of \$24.3 million of appropriated funds currently estimated to lapse at the end of fiscal year 1978.

¹ Transferred to Land and water conservation fund to return funds temporarily transferred to the Bureau of Land Management to cover excess 1977 firefighting obligations, as authorized by sec. 102, General Provisions.

These supplemental funds are required to combat forest and range fires on public lands. The requested amount includes \$26 million to repay the Land and water conservation fund for authority transferred to cover fire obligations in 1977.

PAYMENTS IN LIEU OF TAXES

(Appropriation language change now requested, existing legislation)

Provided, That funds appropriated herein may be used to correct underpayments in the previous fiscal year to achieve equity among all qualified recipients.

Under this program, payments are made to local governments to offset losses of property taxes due to Fed-

eral ownership of certain lands. Existing law does not provide a mechanism for making adjustments to these payments after the fiscal year has ended; the purpose of this proposed appropriation language is to permit correction of underpayments in order to assure equitable payments to all qualified recipients.

This proposed supplemental will provide grant funds for the Government of the Northern Mariana Islands as provided for in the provisions of the Covenant to Establish a Commonwealth of the Northern Mariana Islands in Political Union with the United States of America (Public Law 94-241). This law provides that these grant

funds shall be adjusted upward or downward to offset changes in the purchasing power of the United States dollar by the Gross National Product Implicit Price Deflator. Funds are also requested to cover compensation payments made for new cases of radiation related illness to the inhabitants of Rongelap and Utirik Atoll which resulted from a thermonuclear detonation in March 1954. These payments are authorized by Public Law 95-134.

These supplemental requests are needed to finance increased costs for executive pay resulting from the February 1977 executive pay raise and for printing the Federal Register and Code of Federal Regulations.

SALARIES AND EXPENSES, UNITED STATES ATTORNEYS AND MARSHALS

(Appropriation language now requested, existing legislation)

In addition to the amount made available in the appropriation under this head in the Department of Justice Appropriation Act, 1978, there shall be made available through lease from the General Services Administration to the Marshals Service not more than eight hundred passenger motor vehicles of which not more than five hundred and seventy shall be for police-type use; Provided, that of the leased police-type vehicles not more than two hundred and eighty shall be purchased by the General Services Administration without regard to the purchase price limitation for the current fiscal year.

This proposed language change will permit the purchase of full size police-type motor vehicles by the General Services Administration for lease to the Marshals Service. The Marshals Service requires these vehicles primarily for the transportation of prisoners. Lease of the motor vehicles by the Marshals Service will be through the Inter-agency Motor Pool System of the General Services Administration.

This supplemental request is necessary to compensate banks for maintaining tax and loan accounts. Previously, banks recovered the cost of providing these services through the earnings they generated on the tax and loan account balances left on deposit with each bank. This change in the manner of compensating the banks is a result of recent legislation providing the Treasury with authority to earn a return on the tax and loan funds at the commercial banks. The Treasury will earn a return on its tax and loan funds by investing those funds with depositaries maintaining tax and loan accounts. These earnings are greater than the amount the banks must be compensated for their services, so this new arrangement will be advantageous to the Federal Government. Both compensation and interest earnings are expected to start on April 1, 1978.

BUREAU OF THE PUBLIC DEBT

ADMINISTERING THE PUBLIC DEBT

(Supplemental now requested, existing legislation)

For an additional amount for "Administering the public debt", \$15,512,000.

90.00 Outlays.....		15,512	

This supplemental request will provide funds to compensate agents directly for issuing U.S. savings bonds, and to increase the fee for agents which redeem savings bonds and notes. In the past, commercial banks which issued savings bonds were compensated for this service by the earnings they generated on the idle Federal tax and loan account balances deposited in each bank. Recently enacted legislation authorizes the Secretary to earn interest on these funds. Direct compensation of issuing agents will be advantageous to the Government in that the interest earnings are expected to be much greater than the amounts that banks and other agents will be compensated.

This supplemental request is for mandatory payments to the Civil service retirement and disability fund. Under the provisions of the Civil Service Retirement Amendments of 1969, unfunded liability generated by new statutes must be financed in 30 equal annual installments, with the first payment due as of the end of the fiscal year in which each new liberalization, extension of coverage, or increase in pay is effective.

The October 1977 pay adjustment for general schedule and wage-board employees will create additional unfunded liability. The first annual installment will be \$317,973 thousand; \$110,785 thousand is requested as a result of a reestimate of the effects of past pay raises and of interest due from the change in the fiscal year.

This proposed supplemental is needed to provide the resources for the Association to litigate valuation matters before the Special Court created by the Regional Rail Reorganization Act of 1976 (Public Law 93-236) as well as to monitor the progress of the Consolidated Rail Corporation.

GENERAL PROVISIONS

DEPARTMENT OF DEFENSE—CIVIL

CORPS OF ENGINEERS—CIVIL

The period of July 1, 1976 through September 30, 1976 shall be treated as a fiscal year for the purposes of Section 7 of the Flood Control Act of 1941, as amended (U.S.C. 701c-3).

This general provision would allow disbursement of monies collected during the Transition Quarter from the lease of lands at Corps of Engineers projects to States in accordance with the provisions of 33 U.S.C. 701 c-3.

EXECUTIVE OFFICE OF THE PRESIDENT

OFFICE OF SCIENCE AND TECHNOLOGY POLICY

The limitation on travel expenses for the Office of Science and Technology Policy for fiscal year 1978 is increased to \$260,000.

This general provision will enable the Office to cover its higher than anticipated travel costs. These costs are a result of increased use of outside experts and panels.

DEPARTMENT OF JUSTICE

SEC. 208. The Attorney General shall have authority for the supervision and support of all persons charged with offenses against the United States, including authority to contract with state and local authorities for the safekeeping, care, subsistence and medical aid of prisoners.

This general provision language is needed to resolve any doubt about whether the authority of the Attorney General includes the authority to contract with State and local authorities to detain unsentenced Federal prisoners in non-Federal institutions. With the passage of the fiscal year 1978 appropriation act and the transfer of a major segment of the appropriation "Support of United States prisoners" from the jurisdiction of the Bureau of Prisons to the U.S. Marshals Service, the authority to detain unsentenced prisoners is less clear.

DEPARTMENT OF LABOR

PENSION BENEFIT GUARANTY CORPORATION

The Pension Benefit Guaranty Corporation is authorized to make such expenditures within limits of funds and borrowing authority available to such cor-

poration, and in accord with law, and to make such contracts and commitments without regard to fiscal year limitations as provided by section 104 of the Government Corporation Control Act, as amended (31 U.S.C. 849), as may be necessary in carrying out the revised program through September 30, 1978, for such corporation.

This proposal will permit the Pension Benefit Guaranty Corporation to change its budget program to purchase annuities for participants of terminated plans on a selected basis.

DEPARTMENT OF TRANSPORTATION

FEDERAL AVIATION ADMINISTRATION

Section 312 of Public Law 95-85 is amended by substituting a colon for the period at the end thereof and adding the following proviso:

Provided, That this Section shall not apply to fees, charges or prices which are imposed or collected by the Federal Aviation Administration for approvals, tests, authorizations, certificates, permits, or ratings which are issued or furnished to foreign governments or foreign citizens or nationals outside the United States.

The proposed general provision language change will provide the Federal Aviation Administration (FAA) with authority to recover the costs resulting from providing services to foreign applicants located outside the United States desiring FAA certification.

URBAN MASS TRANSPORTATION ADMINISTRATION

The limitation on commitments for the Urban Mass Transportation Act of 1964, as amended, contained in section 305 of the Department of Transportation and Related Agencies Appropriation Act, 1978, is increased to \$2,414,479,000.

This general provision will permit \$49.5 million of unobligated balances from prior years under section 17 of the Urban Mass Transportation Act, as amended, to be committed in fiscal year 1978. Of the \$55 million appropriated for rail service operating payments in 1977, \$49.5 million was not committed, principally because of delays encountered in securing labor protection clearances under Section 13(c) of the Urban Mass Transportation Act.

ENVIRONMENTAL PROTECTION AGENCY

Section 406 of the Department of Housing and Urban Development—Independent Agencies Appropriation Act, 1978 is rescinded

This general provision language will enable the Environmental Protection Agency to proceed with an indirect source review program for federally assisted, owned, or operated parking facilities.

The Alaska Hydroelectric Power Development Fund was established by the Alaska Hydroelectric Power Development Act (section 203, Public Law 94-587) to develop hydroelectric power generation projects in Alaska. The fund consists of Federal and non-Federal moneys deposited in the fund. Activities proposed in 1979 consist of studies required for the Phase 1 general design memorandum stage of advance engineering and design of the Susitna River, Alaska project. All expenditures made from the fund in 1979 will be from money deposited in the fund by non-Federal interests.

DEPARTMENT OF ENERGY

ENERGY

(Supplemental appropriations pending)

[ENERGY RESEARCH AND DEVELOPMENT ADMINISTRATION]

[OPERATING EXPENSES]

For an additional amount for "Operating expenses", to remain available until expended, \$54,000,000, of which \$33,000,000 shall be for the Clinch River Breeder Reactor Project and which shall become available only upon the enactment into law of authorizing legislation.

Not to exceed \$17,000,000 of the funds appropriated for "Operating expenses" in the Public Works for Water Power Development and Energy Research Appropriation Acts for fiscal year 1976 (Public Law 94-180) and 1977 (Public Law 95-355) are hereby made available to reimburse the General Services Administration for the expenses of renovation, furnishing and repair of facilities necessary to provide temporary and permanent space for personnel relocated as a result of the establishment and activation of the Department of Energy.

【OPERATING EXPENSES—FOSSIL FUELS】

For an additional amount for "Operating expenses—fossil fuels", \$1,000,000.

【FEDERAL ENERGY ADMINISTRATION】

【SALARIES AND EXPENSES】

For an additional amount for "Salaries and expenses", \$273,194,000, of which \$253,110,000 shall become available only upon enactment of authorizing legislation as follows: (1) for conservation grants for schools and health care facilities, \$200,000,000; for conservation grants for local government buildings, \$25,000,000; for grants for financial assistance to utility regulatory commissions, \$6,630,000; for solar heating and cooling installations in Federal buildings, \$20,000,000; to remain available for obligation until September 30, 1979; and (2) for administration of grants for schools and health care facilities, local government buildings, and utility rate reform, \$1,480,000: *Provided*, That of the total amount of this appropriation, not to exceed \$6,000,000 shall remain available until expended for a reserve to cover any defaults from loan guarantees issued to develop underground coal mines as authorized by Public Law 94-163; *Provided further*, That the indebtedness guaranteed or committed to be guaranteed under said law shall not exceed the aggregate of \$62,000,000.

【STRATEGIC PETROLEUM RESERVE】

For an additional amount for "Strategic petroleum reserve", \$383,173,000, to remain available until December 31, 1978.

GENERAL PROVISIONS

SEC. 201. Section 1302 of the Supplemental Appropriation Act, 1957, as amended (31 U.S.C. 724(a)), is amended by inserting the following after "Title 28," the first time it appears: "the Act of December 28, 1922, chap. 17, 42 Stat. 1066, awards rendered by the Indian Claims Commission, and amounts (in excess of the amounts payable from agency appropriations) of claims determined meritorious under section 2733 or 2734 of Title 10, section 715 of Title 32, and section 203 of the National Aeronautics and Space Act of 1958,".

SEC. 202. Any appropriation for the fiscal year 1978 required to be apportioned pursuant to 31 U.S.C. 665, may be apportioned on a basis indicating the need (to the extent any such increases cannot be absorbed within available appropriations) for a supplemental or deficiency estimate of appropriation to the extent necessary to permit payment of such pay increases as may be granted pursuant to law to civilian officers and employees and to active and retired military personnel. Each such appropriation shall otherwise be subject to the requirements of 31 U.S.C. 665.

SEC. 203. No part of any appropriation contained in this Act shall remain available for obligation beyond the current fiscal year unless expressly so provided herein.

SEC. 204. The provisions of sections 491(c) and 491(d) of the Legislative Reorganization Act of 1970, as amended (2 U.S.C. 88b-1), shall not apply to the pay of pages of the Senate and House of Representatives during the period between the recess or adjournment of the first session of the Ninety-fifth Congress and the convening of the second session of the Ninety-fifth Congress. The pay of Senate and House pages shall continue during such period of recess or adjournment.

SEC. 205. Effective October 1, 1977, section 106(a)(8) of the Legislative Branch Appropriation Act, 1963 (2 U.S.C. 60j(a)(8)), is amended by inserting "Deputy Chief Guide," after "Chief Guide,".

SEC. 206. Effective October 1, 1977, section 111 of the Legislative Branch Appropriation Act, 1978, is amended—

(1) by striking out "an amount equal to three times the amount referred to in section 105(e)(1) of such Act, as amended and modified" in subsection (a) and inserting in lieu thereof "\$149,286"; and

(2) by striking out "the amount referred to in section 105(e)(1) of the Legislative Branch Appropriation Act, 1968, as amended and modified," each place it appears in subsection (b) and inserting in lieu thereof "\$49,762".

SEC. 207. Section 114 of the Legislative Branch Appropriation Act, 1978, is amended by striking out "each of which is in the office of a Senator and the pay for which is disbursed by the Secretary of the Senate" and inserting in lieu thereof "the pay for each of which is disbursed by the Secretary of the Senate out of an appropriation under the heading 'SALARIES, OFFICERS AND EMPLOYEES'".

SEC. 208. Effective August 5, 1977, the last sentence of section 506(e) of the Supplemental Appropriations Act, 1973 (2 U.S.C. 58(e)) is amended by inserting after "Office of the" the following: "President pro tempore, Deputy President pro tempore,".

SEC. 209. The Secretary of Transportation shall, not later than 60 days after the date of enactment of this Act, designate as a route on the National System of Interstate and Defense Highways, from mileage withdrawn from such System before the date of enactment of this Act under authority of 23 U.S.C. 103(e), and which is available for such designation, 1.5 miles in the State of Washington for a connection with Interstate Route 5 and the City of Tacoma, Washington.

SEC. 210. Any export license referred to in Section 11 of Public Law 95-92 which is issued initially on or before September 30, 1978 may from time to time thereafter be renewed, reissued or modified (or in the event of lapse of such license, replacement licenses may be issued), provided that any such renewal, reissuance or modification (or any such replacement license) does not change significantly any such license as initially issued.

RESCISSION PROPOSALS

The proposed rescissions shown below are being transmitted to the Congress currently. As required by the Impoundment Control Act of 1974 (Public Law 93-344), rescission proposals are transmitted as special messages from the President. Each special message contains information on the reasons for and estimated effects of each proposed rescission. All special messages and their accompanying reports are published in the Federal Register following their transmittal to the Congress.

PART IV

OFF-BUDGET FEDERAL ENTITIES

OFF-BUDGET FEDERAL ENTITIES

Part IV contains detailed budgets and explanatory statements of certain Federal entities that are not part of the budget totals. These budgets and statements are made available as auxiliary information.

Public Law 93-32 removed from the budget totals the governmental financing of rural electric and telephone systems administered by the Department of Agriculture.

The Pension Benefit Guaranty Corporation, a wholly owned Government corporation, was established by the Employee Retirement Income Security Act of 1974, within the Department of Labor but outside the budget totals.

The Department of the Treasury administers two activities outside the budget totals:

The Exchange stabilization fund was established by the Gold Reserve Act of 1934 for the purpose of stabilizing the exchange value of the dollar. Since it is not practicable to forecast the transactions of the fund in gold, foreign currencies, and foreign investments, estimates for 1978 and 1979 include only administrative expenses and interest on investments. Under proposed legislation, appropriations would be authorized for administrative expenses, and these expenses would be included in the budget total.

The Federal Financing Bank was created by the Federal Financing Bank Act of 1973 to: (1) assure coordination of Federal and federally assisted borrow-

ing programs with the overall economic and fiscal policies of the Government, (2) reduce the cost of Federal and federally assisted borrowing from the public, and (3) assure that such borrowings are financed in a manner least disruptive to private financial markets and institutions. The bank is authorized to make commitments to purchase and sell, and to purchase and sell on terms and conditions determined by the bank, any obligation that is issued, sold, or guaranteed by a Federal agency.

The Board of Governors of the Federal Reserve System provides its administrative budget for inclusion without further review. In conformance with its accounting system, the figures for the Board are on a calendar year basis.

The budget presentation of the Postal Service reflects its conversion to independent status consistent with the Postal Reorganization Act of 1970. The activities of the Postal Service, but not the Federal subsidy, are excluded from the budget totals and presented here.

The United States Railway Association, established by the Regional Rail Reorganization Act of 1973, is a Government corporation. Part of the financing activities of the Association are presented here, while the administrative expenses of the Association and the purchase of ConRail securities are reflected in Part I.

The Rural Electrification Administration conducts two capital investment programs: (1) The rural electrification program to provide electric service to farms and other

rural establishments; and (2) the rural telephone program to furnish and improve telephone service in rural areas.

Insured electric and telephone loans are financed from the Rural Electrification and telephone revolving fund (RETRF) under the authority of the Rural Electrification Act of 1936, as amended. Insured loans bear either 2% or 5% interest in accordance with criteria as specified in the act, and must be repaid within a period not to exceed 35 years. REA also guarantees loans made by the Federal Financing Bank (FFB) and other qualified lenders at rates agreed upon by the lender and the borrower.

Public Law 94-570 amended the Rural Electrification Act by transferring into the revolving fund \$455,634,525 in borrowing authority carried over from the fiscal year 1973 authorization and by revising the method of determining borrower eligibility for special rate (2%) loans.

Insured loans from the RETRF are financed from available receipts or Treasury borrowings. Loans made from the RETRF are held in a pool as security for certificates of beneficial ownership (CBO's) which are sold to investors. Through 1977, CBO's have been sold to the Federal Financing Bank in the amount of \$353.6 million.

1. *Rural electrification.*—This capital investment program is financed through REA-insured loans and guarantees of loans made by other qualified lenders for the construction and operation of generating plants, electric transmission, and distribution lines or systems in rural areas.

The 1979 budget request reflects the availability of supplemental financing from the National Rural Utilities Cooperative Finance Corporation (CFC) and other sources to satisfy a part of the capital requirements of the rural electric systems.

2. *Rural telephone.*—This capital investment program is financed through REA insured loans and guarantees of loans made by other qualified lenders for the construction, improvement, expansion, acquisition, and operation of telephone lines and facilities or systems to furnish and improve service in rural areas.

The 1979 budget request reflects the availability of supplemental financing from the Rural Telephone Bank to satisfy a part of the capital requirements of the rural telephone system.

The Rural telephone bank (RTB) was established by Public Law 92-12, approved May 7, 1971, which amended the Rural Electrification Act of 1936, as amended. The RTB provides a supplemental source of financing for the REA telephone program. Public Law 92-234, approved June 30, 1972, amended the act to permit the Secretary of the Treasury to purchase the bank's debentures. This has minimized the bank's borrowing costs. The bank charges an interest rate based on the average cost of money to the bank, but not less than 5% per annum. The weighted average interest rate on cumulative loans through September 30, 1977, was 6.85. During the first quarter of fiscal year 1978, loans were made at 6.5% interest.

Equity capital of the bank consists of class A stock purchased by the United States, classes B and C stock purchased by bank borrowers, organizations eligible to become borrowers and organizations controlled by borrowers, and retained earnings. The maximum borrowing authority of the bank by law is limited to 20 times its paid-in capital and retained earnings. Total available borrowing authority of the bank for 1978 is estimated at \$5.2 billion. For fiscal year 1979 it is estimated at \$6.0 billion.

Bank loans totaled \$160.3 million in fiscal year 1977. After almost 6 years in operation loans to 385 borrowers have been approved, totaling over \$923 million. Telephone bank loans are estimated at \$185 million for 1978 and \$230 million for 1979.

Administrative support for the general operations of the bank are provided on a part-time basis by REA employees and the Office of the General Counsel, without cost to the bank, as provided for in the enabling legislation. Certain administrative expenses, such as expenses of the elected members of the Board of Directors, postage fees and the audit by the General Accounting Office, must be borne by the bank.

Title IV of the Employee Retirement Income Security Act of 1974 (Public Law 93-406) provides for the establishment of a wholly owned Government corporation, the

Pension Benefit Guaranty Corporation. This Corporation is administered by a board of directors, the chairman being the Secretary of Labor. The Corporation's mission is to administer insurance programs to prevent the loss of pension benefits to participants if pension plans terminate and are not able to pay the insured benefits, and to provide portability assistance.

The act further provides that the Corporation's budget not be included in the totals of the U.S. budget, however, it is subject to the budget and related provisions of the Government Corporation Control Act.

1. *Administration.*—Expenses associated with this activity include the costs of executive direction, legal support, financial controls, program development and operations, and associated management and information services.

2. *Benefit payments.*—Terminated plans are taken over by the Corporation and a trust fund established for plans taken into trusteeship. The Corporation assumes control of the plan assets and takes responsibility for the expected plan liability. The trust pays the share of benefit payments actuarially covered by plan assets, the balance is paid by the revolving fund.

Beginning in 1978, the Corporation will initiate a program of annuity purchases for participants of terminated plans on a selected basis. This program is intended to preserve the full value of anticipated retirement benefits by providing plan administrators with an additional option as they seek annuities in the open market.

Financing.—The Corporation is required by law to be independently financed and self-supporting. Sources of financing are insurance premiums from on-going defined benefit pension plans, assets from terminating plans, investment income, and collections of liabilities imposed by law on employers sponsoring insufficient terminating plans. The Corporation's insurance premium rate must be approved by a joint resolution of Congress. Premium receipts are placed in revolving funds with the U.S. Treasury, which in part are used to pay the administrative expenses of carrying out the basic benefit insurance program.

The following informational table details the status of the Corporation's trust funds.

Operating results.—To carry out its programs, the Corporation is authorized to borrow up to \$100 million from the U.S. Treasury. Current income from the sources

noted above is sufficient to fund current benefits and no borrowing has been required or is anticipated for the budget year. The following table details the changes the Corporation has experienced in its actuarial liability due to terminations and benefit payments.

¹ Losses result from revaluation of special drawing rights and foreign exchange transactions.

For the purpose of stabilizing the exchange value of the dollar, the Secretary of the Treasury is authorized to enter into stabilization agreements, and to deal in gold and foreign exchange and other instruments of credit and securities. An exchange stabilization fund, with a capital of \$200 million (derived from the increment resulting from the reduction in the weight of the gold dollar which took place in 1934) is authorized by law for this purpose (31 U.S.C. 822a). All earnings and interest accruing to this fund are available for the purposes thereof, including administrative expenses required in connection with the fund's monetary and financial operations and related international economic activities. Transactions in special drawing rights and U.S. holdings of special drawing rights (SDR's) are administered by this fund.

The principal sources of the fund's income have been the handling charges imposed on purchases and sales of gold for the account of the fund, profits on foreign exchange transactions, and interest on investments held by the fund. The cumulative income of the fund from its inception through September 30, 1977, has been \$723 million; administrative expenses have totaled \$163 million; and net income has been \$560 million.

Due to the impracticality of forecasting fund transactions in gold, foreign currency and foreign investment, actual data is provided only through 1977. The 1978 and 1979 projections are made for administrative expenses and the interest income on Government securities.

The administration has transmitted legislation to the Congress which would bring on-budget the administrative expenses; the interest income on Government securities in this fund would then be included.

FEDERAL FINANCING BANK—Continued

The Federal Financing Bank (FFB) was created December 29, 1973, to assure the coordination of Federal and federally assisted borrowings from the public and to assure that such borrowings are financed in a manner least disruptive of private financial markets and institutions.

The Bank has become the vehicle through which most Federal agencies finance their programs involving the sale or placement of credit market instruments, including agency securities, guaranteed obligations, participation agreements, and the sale of assets. The major exceptions to date are the title XI ship mortgage bonds, the federally guaranteed tax-exempt Housing and Urban Renewal notes and bonds, and the Government National Mortgage Association asset sales.

During 1977, the Federal Financing Bank made loans and advances totaling \$21.1 billion to Federal agencies and federally guaranteed borrowers. In the absence of the Bank, the majority of borrowers would have issued their obligations in the market at a cost significantly higher than that charged by the FFB.

At the first meeting of the Board of Directors of the Bank on May 23, 1974, the Board approved a policy of borrowing from the Treasury Department on an interim basis. These borrowings were to be periodically repaid by the sale of FFB securities in the market. On July 23, 1974, the Bank auctioned \$1.5 billion of 244-day Federal Financing Bank bills dated July 30, which matured on March 31, 1975. In a later meeting on June 5, 1975, the Board of Directors decided that the Bank would borrow all funds from the Treasury Department matching the terms and conditions of its borrowings from the Treasury with the terms and conditions of its loans. The Bank is currently lending funds at a rate one-eighth of 1% above the new issue rate of marketable U.S. Treasury securities of similar terms and conditions.

The Federal Reserve System operates under the provisions of the Federal Reserve Act of 1913, as amended, and other acts of Congress.

Program.—To carry out its responsibilities under the act, the Board determines general monetary, credit, and operating policies for the System as a whole and formulates the rules and regulations necessary to carry out the purposes of the Federal Reserve Act. The Board's principal duties consist of exerting an influence over credit conditions and supervising the Federal Reserve banks and member banks.

Capital outlays.—(a) *Annex office building construction program.*—The proposed budget contains a provision for capital expenditures for converting open mall space under the building superstructure to high density office space consistent with the Board's long-range occupancy requirements.

(b) *Renovation of Board building.*—In July 1976, the Board approved a program to modernize and renovate interior portions of the original Board building and to upgrade the electrical, mechanical, and utilities systems. The primary benefits are expected to be increased density of population, improved environmental conditions, and improved energy conservation. This work is underway and barring unforeseen circumstances will be completed in 1978.

Financing.—Under the provisions of section 10 of the Federal Reserve Act, the Board of Governors levies upon the Federal Reserve banks, in proportion to their capital and surplus, an assessment sufficient to pay its estimated expenses. The Board, under the act, determines and prescribes the manner in which its obligations are incurred and its expenses paid. Funds derived from assessments are deposited in the Federal Reserve Bank of Richmond, and the act provides that such funds "shall not be construed to be Government funds or appropriated moneys." No Government appropriation is required to support operations of the Board.

The Postal Reorganization Act of 1970, Public Law 91-375, converted the Post Office Department into the U.S. Postal Service, an independent establishment within the Executive Branch. The Postal Service commenced operations July 1, 1971. This agency is charged with providing patrons with reliable mail service at reasonable rates and fees.

The U.S. Postal Service is governed by an 11-member Board of Governors, including 9 Governors appointed by the President, a Postmaster General who is selected by the Governors, and a Deputy Postmaster General who is selected by the Governors and the Postmaster General.

Decisions on changes in domestic rates of postage and fees for postal services are recommended to the Governors of the Postal Service by the independent Postal Rate Commission after a hearing on the record under the Administrative Procedure Act. The Commission also recommends decisions on changes in the domestic mail classification schedule to the Governors. Decisions of the Governors on rates of postage, fees for postal services, and mail classification are final, subject to judicial review.

Programs.—Included are all postal activities providing window services; processing, delivery, and transportation of mail; research and development; administration of postal field activities; and associated expenses of providing facilities and financing.

Financing.—The activities of the U.S. Postal Service are financed from the following sources: (1) Mail and services revenue, (2) reimbursements from Federal and non-Federal sources, (3) proceeds from borrowing, (4) interest from U.S. securities and other investments, and (5) appropriations by the Congress. All receipts and deposits are made to the Postal Service fund and are available without fiscal year limitation for payment of all expenses incurred, retirement of obligations, investment in capital assets, and investment in obligations and securities.

The 1979 program for the U.S. Postal Service is based on an anticipated mail volume of 96 billion pieces compared to 95 billion estimated for 1978, and 92.2 billion for 1977.

Since 1973, transactions of the Postal Service fund and the assets and liabilities of the U.S. Postal Service no longer appear within the totals of the U.S. budget. The schedules presented here reflect summary data on postal operations.

Section 2005 of the Postal Reorganization Act authorizes borrowing authority of \$10 billion with a yearly limitation of \$2 billion, of which not more than \$500 million may be used to cover operating expenses. As of September 30, 1979, it is expected that indebtedness outstanding pursuant to this borrowing authority will amount to \$3.6 billion.

Operating.—Estimated receipts will total \$17.7 billion in 1979. This includes \$15.8 billion from mail and services revenue, \$131.8 million from investment income, \$1.8 billion from appropriations including \$65.6 million to cover unfunded liabilities of the Post Office Department, and miscellaneous other income of \$17.7 million.

The United States Railway Association is authorized by the Regional Rail Reorganization Act, as amended, to borrow funds and make loans to certain railroads. Borrowings by the United States Railway Association are guaranteed by the Secretary of Transportation. The aggregate of outstanding obligations of the Association are limited to \$395 million at any one time. Two types of loans are currently authorized: (a) Loans related to the implementation of the system plan developed by the Association for restructuring the bankrupt railroads in the Northeast and Midwest, and (b) loans to defray obliga-

tions of the reorganized railroads which were incurred prior to the conveyance of their rail properties but which were unpaid after the conveyance to the Consolidated Rail Corporation on April 1, 1976. During the current fiscal year, the Association will utilize practically all of its present borrowing authority. No new loans are anticipated for the budget year. Securities in lieu of interest were received by the Association on its investment in ConRail 7.5% debentures.

PART V

OTHER MATERIALS

EXPLANATION OF OTHER MATERIALS

This section includes the following material required by section 601 of the Congressional Budget Act of 1974:

(a) a list of advance appropriations requested in this budget for 1980; together with a list of all accounts for which 1980 advance appropriations are authorized; and

(b) a statement of amendments and revisions to 1978 budget authority requests that were transmitted to the Congress after the 1978 Budget but prior to the transmittal of the 1979 Budget.

ADVANCE APPROPRIATIONS FOR 1980

Section 601(h) of the Congressional Budget Act of 1974 (Public Law 93-344) requires inclusion in the budget of: "... information with respect to estimates of appropriations for the next succeeding fiscal year for grants, contracts, or other payments under any program for which there is an authorization of appropriations for such succeeding fiscal year and such appropriations are authorized to be included in an appropriation act for the fiscal year preceding the fiscal year in which the appropriation is to be available for obligation." There are two funding measures used to assure Federal financing of programs beyond fiscal year 1979 in annually appropriated programs: *advance appropriations* and *forward funding*.

Advance appropriations provide funding in fiscal year 1979 appropriations bills for programs beyond fiscal year 1979. Since these appropriations are not available until after fiscal year 1979, the amounts will not be included in fiscal year 1979 budget totals, but will be reflected in the budget totals for the fiscal year requested. Section 601(h) of the Congressional Budget Act requires an identification of these items. In fulfillment of this requirement, the table below lists those accounts authorized to receive, in fiscal year 1979, advance appropriations for fiscal year 1980. The listing is in two parts: Section I shows the amounts of advance 1980 appropriations included in the 1979 budget. Section II is a listing of accounts for which advance appropriations are authorized, but no advance 1980 appropriations are requested.

Forward funding also provides for fiscal year 1980 requirements in the 1979 budget. This funding measure is proposed for ongoing grants programs from 1979 appropriations. Under these provisions, the 1979 appropriation may be obligated in 1979 to finance the grantee program for 1980. These appropriations are included in the 1979 budget totals and are not required to be separately identified in this section. However, in the table below, a footnote identifies these appropriation accounts.

STATEMENT OF AMENDMENTS TO AND REVISIONS IN BUDGET AUTHORITY FOR FISCAL YEAR 1978

(Between the Transmittal of the 1978 and 1979 Budgets)

A statement of all amendments to or revisions in budget authority requested between submission of the fiscal 1978 budget and the fiscal 1979 budget is presented below. This statement is being included in the budget in accord with section 201 of the Budget and Accounting Act, 1921, as amended by section 601(g) of the Congressional Budget Act of 1974.

The modifications to requests for 1978 budget authority that were made through the course of the past year took three forms. If the Congress had not yet acted on a pending request, the President sent amendments to the January 1977, budget requests. If appropriations had been

enacted, the President proposed either supplemental budget authority or rescission of enacted appropriations.

Amendments and requests for supplemental appropriations are printed in the documents of the House of Representatives and the Senate that are identified in part A of the following listing. The President's proposals for rescission are included in special messages to the Congress under the Impoundment Control Act of 1974 (Public Law 93-344). Both the special messages and monthly cumulative reports on the items they cover are printed in the Federal Register.

PART B. REQUESTS FOR RESCISSION OF 1978 BUDGET AUTHORITY

A rescission (R78-1) of funds provided to the Department of Justice was proposed on September 23, 1977. This rescission proposal was printed as H. Doc. 95-226 and in the Federal Register of September 29, 1977 (vol. 42, No. 189, pt. IX). These funds are now being deferred pending enactment of a related transfer proposal. The following three rescissions of 1978 budget authority, which are being proposed in connection with this budget, are expected to be transmitted to the Congress prior to the budget transmittal date:

International Security Assistance; Military Assistance (R78-2).
Department of State:
International Organizations and Conferences;
Contributions for international peacekeeping activities (R78-3).
Federal Home Loan Bank Board Revolving Fund (R78-4).
Details of these new proposals are printed in Part III of this volume.

GOVERNMENT-SPONSORED ENTERPRISES

GOVERNMENT-SPONSORED ENTERPRISES

Part VI contains detailed budgets and explanatory statements of certain Government-sponsored enterprises. All of these enterprises are chartered by the Federal Government and supervised by a Government agency although they are privately owned. These budgets are not reviewed by the President; they are presented as submitted by the enterprises. This section includes:

- (a) Student Loan Marketing Association.
- (b) Federal National Mortgage Association.
- (c) Banks for cooperatives.
- (d) Federal intermediate credit banks.
- (e) Federal land banks.
- (f) Federal home loan banks.

1096

(g) Federal Home Loan Mortgage Corporation.

The Student Loan Marketing Association is a corporation, supervised by the Department of Health, Education, and Welfare, to assist in financing college student loans.

Both the Federal home loan banks and the Federal Home Loan Mortgage Corporation are supervised by the Federal Home Loan Bank Board. The other three systems of banks are supervised by the Farm Credit Administration.

The Federal National Mortgage Association is a mortgage finance corporation supervised by the Department of Housing and Urban Development.

The Student Loan Marketing Association (SLMA), a Government-sponsored, private corporation, was created by the Education Amendments of 1972 to expand funds available for student loans by providing liquidity to banks, educational institutions, and other lenders engaged in the Guaranteed student loan program.

To date, SLMA has provided liquidity through direct purchase of insured student loans from eligible lenders and by making warehousing advances, secured by insured student loans, to eligible lenders. Proceeds from warehousing advances are required to be invested in additional student loans.

Operations.—By December 1977, SLMA is expected to have outstanding \$250,741 thousand in warehousing advances. It is expected that volume under this program will reach an adjusted level of \$234,970 thousand by September 30, 1978, with continued activity in 1979. SLMA expects to purchase \$166,765 thousand in loans in 1978 and \$191,713 thousand in 1979, to a level of \$518,247 thousand as of September 1979.

SLMA is authorized by the Health Professions Educational Assistance Act of 1976 to provide a secondary market for federally insured loans to graduate health

professions students. As this program has not yet become operational, its effect on SLMA's warehousing advance and loan purchase programs is uncertain.

Financing.—To obtain funds for its programs, SLMA is authorized, with the approval of the Secretary of Health, Education, and Welfare and the Secretary of the Treasury, to issue its own debt obligations. The Secretary of HEW is authorized by the Education Amendments of 1972 to guarantee as to principal and interest such obligations issued prior to July 1, 1982, regardless of maturity date. As of September 30, 1977, SLMA had total outstanding debt obligations to the Federal Financing Bank of \$510 million. SLMA expects to continue selling guaranteed debt obligations to the Federal Financing Bank in the future.

The corporation is authorized to issue common stock to qualified educational and financial institutions and raised \$24.5 million less issuance costs of \$635,257, or a net of \$23.9 million by June 1974.

Management.—At its annual meeting in May 1977, the shareholders of SLMA elected a board of directors to serve until May of 1978. The shareholders of SLMA are entitled to elect 14 members to the board. Pursuant to the Education Amendments of 1972, the President of the United States continues to appoint the remaining 7 members of the 21-member board, as well as designating the chairman of the board. The seven directors appointed by the President in 1975 continue to serve in their present capacity.

The forecast data with respect to operations are based on certain specific assumptions by management, including the continued successful development, implementation, and financing of authorized programs. The board of directors has not yet reviewed or approved these financial estimates. Accordingly, such data should not be relied upon as an official forecast of the corporation's future business.

The Federal National Mortgage Association (FNMA) is a Government-sponsored private corporation. Its purpose is to provide supplementary assistance to the secondary market for home mortgages by supplying a degree of liquidity for mortgage investments, thereby improving the distribution of investment capital available for home mortgage financing.

To carry out this purpose, FNMA buys mortgages insured by the Federal Housing Administration or guaranteed by the Veterans' Administration or conventional mortgages, which are, under certain conditions, insured by private mortgage insurance companies.

The Emergency Home Finance Act of 1970 empowered FNMA, with the approval of the Secretary of HUD, to purchase, service, lend on the security of, and otherwise invest in conventional mortgages. FNMA acts to minimize the possible additional risk involved in purchasing conventional mortgages by applying strict qualifications to such purchases.

The authorizing statute, the Housing Act of 1954, approved August 2, 1954, originally contemplated that FNMA's secondary market operations would ultimately be completely owned and financed by private participants. On September 30, 1968, pursuant to the Housing and Urban Development Act of 1968, approved August 1, 1968, FNMA was converted to a Government-sponsored, privately-owned corporation whose expenditures and receipts are not reflected in the Federal Budget.

The common stock of the Corporation is owned by the public, is fully transferable and is listed on major stock exchanges. The Corporation may require each mortgage seller to purchase stock equal to not more than 2% of the unpaid principal amounts of mortgages purchased or to be purchased by the Corporation from such seller.

The Corporation has three separate authorities to borrow money from private sources. It may issue subordinated capital debentures in an amount not in excess of twice the net equity. It may in addition borrow amounts not in excess of the sum of net equity and subordinated capital debentures outstanding multiplied by a factor

established by the Secretary of Housing and Urban Development. This factor is currently set at 25. These borrowings usually take the form of debentures and short-term discount notes. Finally, FNMA may issue securities guaranteed by the Government National Mortgage Association which are fully backed by pools of mortgages. This last type of borrowing is limited only by the size of FNMA's loan portfolio.

For the years ended September 30, 1976 and 1977, income and retained earnings were as follows (in millions of dollars):

The 13 Banks for cooperatives are under the general supervision of the Farm Credit Administration. They finance the operations of farmers' cooperatives. The funds to finance these loans are obtained primarily from sales of bonds to the public and from their own capital funds. The bonds issued by the banks are not guaranteed by the U.S. Government either as to principal or interest. All of their expenses are paid from their own income and are not included in the budget of the United States. Included in these expenses is the banks' share of the costs of the Farm Credit Administration.

BANKS FOR COOPERATIVES—Continued

The Farm Credit Act of 1955 provided for eventual ownership of the banks by farmers' cooperatives and the retirement of the U.S. Government's investment. This was accomplished on December 31, 1968, when the remainder of the U.S. Government capital was retired.

The banks for cooperatives presently operate under authorities contained in title III of the Farm Credit Act of 1971, Public Law 92-181, as amended.

The 12 Federal intermediate credit banks are under the general supervision of the Farm Credit Administration. They serve as banks of discount for agriculture, discounting agricultural and livestock paper for, and making loans to local financing institutions such as production credit associations, agricultural credit corporations, livestock loan companies, and commercial banks. They also provide the production credit associations with necessary supervision and services.

The banks' lending funds are obtained primarily from the sale of bonds to the public and from their own capital funds. The bonds are not guaranteed by the U.S. Government either as to principal or interest. All of their expenses are paid from their own income and are not included in the budget of the United States. Included in these expenses is the credit banks' share of the costs of the Farm Credit Administration.

The banks were originally wholly owned Government corporations set up exclusively as banks of discount; however, pursuant to the Farm Credit Act of 1956, the banks become mixed-ownership corporations and were made responsible for supervising the production credit associations and assisting them to make sound credit available to farmers.

All of the capital stock of the Federal intermediate credit banks, from organization in 1923 to December 31, 1956, was held by the U.S. Government. The 1956 act provided a long-range plan for the eventual ownership of the credit banks by the production credit associations and the gradual retirement of the Government's investment in the banks. This retirement was accomplished in full on December 31, 1968.

The Federal intermediate credit banks presently operate under authorities contained in title II of the Farm Credit Act of 1971, Public Law 92-181, as amended.

The Federal land banks, through the 529 Federal land bank associations, which are located at the local level, make long-term real estate loans to farmers and ranchers. These banks and associations are under the general supervision of the Farm Credit Administration. The funds to finance these loans are obtained primarily from the sale of the banks' bonds to the public and from their own capital funds. These bonds are not guaranteed by the U.S. Government either as to principal or interest. All of their expenses are paid from their income and are not included in the budget of the United States. Included in these expenses is the land banks' share of the costs of the Farm Credit Administration.

The last of the Government capital that had been invested in the banks was repaid in 1947.

The Federal land banks presently operate under authorities contained in title I of the Farm Credit Act of 1971, Public Law 92-181, as amended.

The 12 Federal Home Loan Banks are chartered and supervised by the Federal Home Loan Bank Board under the authority of the Federal Home Loan Bank Act of 1932. The banks are financial institutions whose main function is to supply their members—principally savings and loan-type institutions and savings banks—with credit to smooth their operations and enhance their service to the public as savings media and home-mortgage lenders. Each bank operates in a geographic district designated by the Board and together the banks cover all of the United States as well as Puerto Rico, the Virgin Islands, and

Guam. In 1977, the banks extended credit amounting to \$10.3 billion and received repayments of \$9.3 billion. Advances outstanding on September 30, 1977, totaled \$17.1 billion.

The principal source of funds for the lending operation is the sale of consolidated obligations of the banks to the public. On September 30, 1977, \$17.2 billion of these obligations were outstanding. The consolidated obligations are not guaranteed by the U.S. Government as to principal or interest. Other sources of lendable funds include a portion of members' deposits as determined by Board policy (total deposits were \$3.6 billion on September 30, 1977) and funds paid for the purchase of capital stock by member institutions, amounting to \$3.2 billion at the end of 1977. Funds not immediately used for advances to members are invested until such times as needed.

The capital stock of the Federal home loan banks is owned entirely by the members. Initially the U.S. Government purchased stock of the banks in the amount of \$125 million. The banks had repurchased the Government's investment in full by mid-1951.

The entire operating expenses of the banks are paid from their own income and are not included in the budget of the United States. Included in these expenses is the assessment by the Federal Home Loan Bank Board to cover a portion of the Board's administrative and other costs.

The Federal Home Loan Mortgage Corporation (a federally chartered corporation) was organized on July 24, 1970, under the Emergency Home Finance Act of 1970. The act exempts the Corporation from all taxation by the United States or by any State, county, municipality, or local taxing authority, except for real property taxes. The Corporation is under the direction of a Board of Directors composed of the members of the Federal Home Loan Bank Board. The Corporation purchases, sells, and otherwise deals in mortgages on residential properties. The Corporation's capital stock was issued, at par, to the Federal home loan banks; the stock is non-voting and nontransferable, and its ownership is restricted to the Federal home loan banks.
