**Program operations.**—Title IV of the Housing Act of 1950 authorizes direct loans at 3 percent interest to colleges, universities, and eligible college housing agencies for the construction, renovation, or acquisition of housing and related student service facilities. Such loans may be made for up to \$3.5 million and must normally be repaid within 30 years. No new loan commitments are planned in 1986.

**Financing.**—Loan capital for this program has been provided primarily through Treasury borrowings and the sale of participation certificates which are backed by pools of existing college housing loans held by the Federal Government.

As of September 30, 1984, \$2,687.3 million was borrowed. Interest, at a rate of 2.75 percent, is payable to Treasury on the total borrowings, less the average undisbursed cash balance in the fund during the year.

Sales of participation certificates by the Government National Mortgage Association (GNMA) were provided for under the Participation Sales Act of 1966, and were authorized specifically for college housing loans under appropriation acts in 1967 and 1968. The participation certificates outstanding held by this account total \$451,504 thousand as of September 30, 1984 and are expected to remain at this level during 1985 and 1986.

Insufficiencies appropriations may be used to finance any deficit resulting from the interest rate payable on participation certificates being higher than the interest rate paid by institutions on pledged loans. The budget authority required for insufficiencies is computed as follows:

## PARTICIPATION INSUFFICIENCIES

(In thousands of dollars)

	1984 actual	1985 estimate	1986 estimate
Interest accrued on participation certificates .....	28,138	28,138	28,138
Interest accrued on an equal amount of loans in the pool .....	-10,566	-3,300	.....
Insufficiency .....	17,572	24,838	28,138
Financed by:			
Investment income from participation sales fund, net .....	-11,599	-41,566	-50,491
Brought forward from prior year adjusted .....	-326	.....	.....
Amount financed from (—) or repaid to other funds .....	-5,647	16,728	22,353
Budget authority required .....	.....	.....	.....

The estimated net operating income of \$17.5 million will decrease the cumulative deficit to \$424.2 million in 1986.

Available resources (loan repayments, interest revenue, and other income in excess of operating expenses) will be used to redeem a portion of the agency's debt in

outstanding Treasury borrowings, as is similarly being done in 1985. It is anticipated that \$102 million will be repaid to Treasury in 1986; \$62 million is anticipated to be repaid in 1985.

A total of \$284.2 million was collected in principal repayments in 1984, including \$169.2 million in discounted loan prepayments. Loan prepayments in 1985 are expected to total \$113 million, and prepayment discounting authority is expected to be available again in 1986.

The budget provides \$250 thousand to fund facilities management and property disposition expenses related to loan collection action in 1986. Expenses associated with auditing, facility inspections, and loan servicing will be paid for with Departmental Management (Salaries and expenses account) funds.

A total of \$3.0 million was collected in 1984 from institutions in default. The status of defaulted loans is shown in the table below:

Note.—Recoveries include collections on both principal and interest; however, because collections on defaulted loans are applied first to delinquent interest, collection amounts shown above do not reduce outstanding principal by \$2,400 thousand for 1984, 1985, and 1986. In 1984 \$641 thousand was collected on defaulted principal outstanding and is included in the total.

**National Institute of Education.**—Research, development, and dissemination activities aid students, teachers, administrators, and decisionmakers at all levels of education. There are several major programs.

Research centers focus on topics of national concern in education. Regional laboratories determine and help meet the educational R&D needs in specified geographic regions.

The National Assessment of Educational Progress surveys young Americans to provide reliable information about the nation's attainment in certain important skill areas. The Educational Resources Information Center system makes the education literature accessible through computerized abstracts and indexes.

The Institute supports other individual projects, as well as study groups and national leadership conferences.

**National Center for Education Statistics.**—Statistics are collected on educational institutions and on individuals to monitor trends in education. A coordinated program of statistical services is supported which provides: (1) assistance to States in developing comparable data bases, (2) analyses of the implications of data, and (3) dissemination of timely information to the public and educational practitioners.

Note.—The activities previously financed in four accounts under Department of Education, Special Institutions—American Printing House for the Blind; National Technical Institute for the Deaf; Gallaudet College; and Howard University—in 1984 and 1985 are presented in these schedules and are proposed to be financed in this account in 1986. Budget authority and outlays are distributed by account above.

This new account consolidates four prior accounts, each of which included a grant to a particular institution. The special shared relationship that each of these institutions enjoys with the Federal Government consists of congressional recognition of the institution in law and is reflected in the fact that the grants are the largest single source of institutional funds.

**American Printing House for the Blind.**—This institution provides educational materials to blind students below the college level. In 1984, Federal appropriations represented 41 percent of the institution's operating budget. Legislation will be proposed to terminate the institution's 1879 trust fund in 1986. An increase offsetting the loss of interest income is included in the regular appropriation request.

**National Technical Institute for the Deaf.**—This institution is a national coeducational residential center that provides postsecondary technical education for deaf people to prepare them for successful employment. In 1984, Federal appropriations represented 85 percent of the institute's operating budget. The budget display shows separately the costs of educating victims of the rubella epidemic of 1964-65.

**Gallaudet College.**—This institution is a private, non-profit educational institution which provides an undergraduate higher education program for deaf persons, a preparatory program for students who need such training to qualify them for college admission, a graduate program in fields of study related to deafness, and continuing education and public service programs appropriate to its postsecondary education mission. The budget display shows separately the costs of educating victims of the rubella epidemic of 1964-65.

Gallaudet also operates on campus the Model Secondary School for the Deaf, which serves deaf students of high school age, and the Kendall Demonstration Elementary School for younger children. In connection with their instructional programs, these schools also develop materials and methods for teaching deaf children.

In 1984, Federal appropriations represented 78 percent of the college's operating budget and 100 percent of the operating budgets of the related elementary and secondary schools.

**Howard University.**—This institution is a private, nonprofit educational institution consisting of 17 schools and colleges. Federal funds are used to provide partial support for the academic program as well as for

the teaching hospital facilities. In 1984 Federal appropriations represented 62 percent of the University's operating budget for its academic program.

Legislation will be proposed in 1986 to eliminate the trust fund. An offsetting increase of \$10,000 is requested in the regular appropriation. Administration of the annual interest payment, which now amounts to less than 1 percent of the annual operating budget of this institution, is no longer cost-effective.

The request reflects savings due to management initiatives resulting from the implementation of the President's management reform initiatives.

**Postsecondary education.**—The postsecondary education activity includes direct costs of administering student aid and other higher education programs.

**Other education programs.**—This activity includes direct costs of administering elementary and secondary education, bilingual education, vocational and adult education, handicapped education, and rehabilitation services programs. This activity also supports educational research and improvement activities.

**Civil rights.**—The Office for Civil Rights carries out enforcement programs under title VI of the Civil Rights Act of 1964 (racial and ethnic discrimination), title IX of the Education amendments of 1972 (sex discrimination), section 504 of the Rehabilitation Act of 1973 (discrimination against the handicapped), and the Age Discrimination Act of 1975. Resource requirements are related largely to complaints made to the Office.

No new contributions from any source are currently anticipated for 1985 or 1986.

## GENERAL PROVISIONS

SEC. 301. None of the funds appropriated by the title for grants-in-aid of State agencies to cover, in whole or in part, the cost of operation of said agencies, including the salaries and expenses of officers and employees of said agencies, shall be withheld from the said agencies of any State which have established by legislative enactment and have in operation a merit system and classification and compensation plan covering the selection, tenure in office, and compensation of their employees, because of any disapproval of their personnel or the manner of their selection by the agencies of the said States, or the rates of pay of said officers or employees.

SEC. 302. Funds appropriated in this Act to the American Printing House for the Blind, Howard University, the National Technical Institute for the Deaf, and Gallaudet College shall be subject to audit by the Secretary of Education.

SEC. 303. None of the funds provided herein shall be used to pay any recipient of a grant for the conduct of research an amount equal to as much as the entire cost of such research.

SEC. 304. No part of the funds contained in this title may be used to force any school or school district which is desegregated as that term is defined in title IV of the Civil Rights Act of 1964, Public Law 88-352, to take any action to force the busing of students; to force on account of race, creed or color the abolishment of any school so desegregated; or to force the transfer or assignment of any student attending any elementary or secondary school so desegregated to or from a particular school over the protest of his or her parents or parent.

SEC. 305. (a) No part of the funds contained in this title shall be used to force any school or school district which is desegregated as that term is defined in title IV of the Civil Rights Act of 1964, Public Law 88-352, to take any action to force the busing of students; to require the abolishment of any school so desegregated; or to force on account of race, creed or color the transfer of students to or from a particular school so desegregated as a condition precedent to obtaining Federal funds otherwise available to any State, school district or school.

(b) No funds appropriated in this Act may be used for the transportation of students or teachers (or for the purchase of equipment for such transportation) in order to overcome racial imbalance in any school or school system, or for the transportation of students or teachers (or for the purchase of equipment for such transportation) in order to carry out a plan of racial desegregation of any school or school system.

SEC. 306. None of the funds contained in this Act shall be used to require, directly or indirectly, the transportation of any student to a school other than the school which is nearest the student's home, except for a student requiring special education, to the school offering such special education, in order to comply with title VI of the Civil Rights Act of 1964. For the purpose of this section an indirect requirement of transportation of students includes the transportation of students to carry out a plan involving the reorganization of the grade structure of schools, the pairing of schools, or the clustering of schools, or any combination of grade restructuring, pairing or clustering. The prohibition described in this section does not include the establishment of magnet schools.

SEC. 307. No funds appropriated under this Act may be used to prevent the implementation of programs of voluntary prayer and meditation in the public schools.

SEC. 308. Section 402(c) of the Housing Act of 1950 is amended by striking out in clause (9) "October 1, [1984"] 1985" and inserting in it place "October 1, [1985"] 1986".

[SEC. 309. No funds appropriated in any Act to the Department of Education for fiscal years 1984 and 1985 shall be withheld from distribution to grantees because of the provisions of the order entered by the United States District Court for Northern District of Illinois on June 30, 1983.] (*Department of Education Appropriation Act, 1985.*)

**Naval reactors development.**—This program provides for the design, development, and testing of improved naval nuclear propulsion plants and reactor cores having longer core life, increased reliability, improved performance, and simplified operating and maintenance requirements. These reactors are necessary to meet a variety of military requirements. During 1986 efforts will continue to improve existing submarine and surface ship reactors and plant components and to develop new advanced reactor concepts and propulsion plants. This program also continues test facility upgrading and materials facility construction, and provides equipment to support ongoing reactor design research and testing activities.

**Weapons activities.**—This program provides for the research, development, engineering, testing, and production of all U.S. nuclear weapons; maintenance of these weapons for their stockpile life, and retirement and disposal of nuclear weapons from the stockpile. This program also includes the inertial confinement fusion activities, which have applications in the near term to weapons physics. In 1986, the weapons program will continue to provide new technology to maintain a modern nuclear force, along with the design and development of new weapon systems in response to defense requirements. This program also provides for the certification of safety, reliability, and performance of new weapon systems and surveillance of the existing stockpile. Increases are provided for continued production of weapon systems and for stockpile improvements. In addition, this program provides for facility construction, maintenance, and restoration for the weapons research and development, testing, and production activities.

**Verification and control technology.**—This program provides staff and programmatic resources for the conduct of research activities directed toward the advancement of verification technology related to nuclear treaties and arms control measures. In 1986, the program provides for continued technical and scientific efforts to support nuclear test limitation treaties and nuclear arms reduction negotiations. Other activities provide analytical support to export control requirements, non-proliferation policy, and weapon analysis issues. This program also provides capital equipment for nuclear

detection technology efforts and analytical support activities.

**Materials production.**—This program provides nuclear materials to meet near-term national defense and nondefense requirements and sustain a base production program capable of meeting long-term nuclear materials production requirements consistent with the annual Presidential Nuclear Weapons Stockpile Memorandum and the annual Materials Management Plan. In 1986, this program will operate a reactor feed material production complex, five production reactors, chemical processing plants at three major sites, R&D efforts on long-range alternatives for production of nuclear materials, and support facilities integral to the operation of the facilities mentioned above. Activities will continue to increase production of nuclear materials including producing high purity plutonium for blending with fuel-grade plutonium to produce weapon-grade plutonium, the Special Isotope Separation and developing technology. A program to improve productivity at Savannah River, Richland, and Oak Ridge will be initiated. In addition, environmental protection and physical security and safeguard matters will continue to be addressed at all materials production sites.

**Defense waste and byproducts management.**—This program provides for safe interim storage of nuclear wastes and utilization of byproducts generated primarily from nuclear materials production and naval propulsion; and for the development of alternative technologies and processes to support final disposal of defense nuclear waste. The 1986 program provides funds for continuation of the waste operations program including transfer of wastes to new tanks and long-term improvements, including construction of the Defense Waste Processing Facility at the Savannah River plant in South Carolina and preparation for operation of the Waste Isolation Pilot Plant near Carlsbad, New Mexico.

**Nuclear safeguards and security.**—This program provides for the development of measures for the protection of nuclear weapons in the agency's custody, special nuclear materials, classified materials and information, and agency property. It also provides technical support and advice to the development of foreign country nuclear materials security and international agency safeguards. In 1986, this program will continue development of procedures that preclude the unauthorized disclosure, theft, or loss of classified material; management of a research and development program to safeguard nuclear weapons and nuclear materials and protect agency facilities against sabotage; providing for assistance to site managers in designing effective safeguards systems; and support of international safeguards technology.

**Security investigations.**—This activity covers the costs related to performance of security investigations for personnel who, in performance of their official duties, must have access to restricted data, national security information or special nuclear material, or who occupy a designated critical sensitive position.

**Defense nuclear energy.**—This program is focused on two key ongoing activities to develop nuclear power

sources for a variety of DOD terrestrial and space military missions. In 1986, the program will concentrate on the development of reactor technology for space applications in the range of 50–1,000 kWe (SP-100 Project), and on the development of a 15–20 kWe terrestrial reactor as an alternate power supply to update the Distant Early Warning (DEW) line across Northern Canada (North Warning System Project). The SP-100 Project will initiate system design and facility modification efforts in support of a ground test of a single concept selected during late 1985 and will evaluate the feasibility of extending SP-100 technology into the multi-megawatt power range. The North Warning System Project will complete fabrication of the demonstration reactor core and design of the prototype reactor system.

**Life sciences and nuclear medicine applications.**—The life sciences and nuclear medicine applications activities, previously included in the General science and research appropriation, have been merged with the Biological and environmental research activities within the Energy supply, research and development appropriation.

**High energy physics.**—Research in this program focuses on the fundamental constituents of matter, the fundamental forces in nature and the transformations between matter and energy at the most elemental level. The program includes experimental and theoretical particle physics research and related advanced accelerator and detector technology R&D. The primary mode of experimental research involves the study of collisions of energetic particles using large particle accelerators or colliding beam facilities by means of advanced multi-particle detector systems and associated electronics. Research in 1986 will continue studies of known fundamental constituents of particles, initiate searches for new particle constituents, and continue to pursue a unified description of the four fundamental forces in nature.

The 1986 high energy physics budget request addresses the funding requirements to provide an overall accelerator utilization of approximately 50 percent; for completion of the Tevatron I and Stanford Linear Collider (SLC) construction projects; and for continuation of advanced accelerator and detector R&D related to the next generation high energy particle accelerator. A major feature of the High Energy Physics program in 1986 will be the operation of the Tevatron superconducting synchrotron at Fermilab for fixed-target experiments near the 1000 GeV energy range and preliminary operation for 1000 GeV on 1000 GeV colliding beam experiments. Priority is also given to operation and research utilization of the Alternating Gradient Synchrotron, at Brookhaven National Laboratory, with its new unique high energy polarized proton beam, to operation of the electron position storage ring (PEP), and to pre-operating systems tests of the SLC at the Stanford Linear Accelerator Center (SLAC). The request provides continuing support for effective participation by university based groups in experimental research including accelerator user group efforts and non-accelerator experiments, and for theoretical research efforts. The 1986 high energy physics capital equipment request provides for meeting only the highest priority needs associated with the initial complement of detectors and secondary beams required to implement the research programs using the major new capabilities being provided by the Tevatron I proton-antiproton collider at Fermilab and by the SLC electron-positron collider at SLAC.

**Nuclear physics.**—Research in this program strives to attain a deeper understanding of the interactions, properties, and structures of atomic nuclei and nuclear matter at a fundamental level through interdependent accelerator experiments and theoretical investigations of atomic nuclei. The program supports the operation of seven national accelerator facilities whose beams are available to all qualified scientists and four dedicated university accelerator facilities.

The 1986 nuclear physics budget request addresses the funding requirements to provide an overall utilization of the national accelerator facilities of about 45 percent. The budget request also provides for initiation of heavy ion nuclear research and accelerator operations at the Alternating Gradient Synchrotron at Brookhaven and for continued advanced accelerator R&D studies in support of the Continuous Electron Beam Accelerator Facility project to be located at Newport News, Virginia. Major research themes in 1986 include the role that quarks play in the makeup and interactions of nuclei, nuclei as proving grounds for understanding the basic strong and electroweak forces of nature, possible existence of new forms of nuclear matter, and, the mechanisms by which colliding nuclei exchange mass, energy, and angular momentum.

**General science program direction.**—Provides direction, management, and administrative support to all programs within general science.

The purpose of energy supply, research and development is to develop new energy technologies and improve existing energy technologies. Included in this mission are basic and applied research, with selected technology development.

This account provides funds for operating expenses, capital equipment and construction projects for the research and technological development of the various energy technologies under examination in the energy supply, research and development mission.

**Solar energy.**—In 1986, the solar energy program will conduct research and development to help the U.S. private sector develop solar technologies as competitive energy supply options. Solar technologies consist of methods which directly or indirectly convert the Sun's radiation for heating, cooling, lighting, and electric power generation applications. Moderate and high temperature solar heat, photovoltaics, biofuels, wind and ocean thermal are specific solar energy systems being investigated. Additionally, funds are provided for technology transfer activities, generic resource assessments and capital improvements at the Solar Energy Research Institute.

**Geothermal.**—In 1986, the geothermal program will conduct research in partnership with the private sector to build a technology base for future commercial geothermal development. Technical and economic barriers to the use of geothermal resources will be lessened. The program will further develop knowledge of, and methods to recover energy from, the nation's geopressed resources. Specific technologies related to the use of geothermal energy will be developed in the areas of hot dry rock, hydrothermal resources, hard rock penetration, magma energy extraction.

**Hydropower.**—In 1986, the hydropower program consists of monitoring existing hydropower projects and providing technical information and technology transfers.

**Electric energy systems.**—In 1986, the electric energy system program will conduct research coordinated with the private sector on future electric networks to: (1) determine safety thresholds; (2) enhance regional energy exchange; (3) optimize control of electric energy sources; (4) enhance electric service; and (5) improve system efficiency fuel displacements.

**Energy storage systems.**—In 1986, the energy storage program will conduct research to: (1) develop low-cost, efficient, long lasting, high energy and power density electrochemical storage; (2) transfer energy and resource conserving technology to the electrolytic industries, and (3) explore new technologies for batteries and electrochemical processes.

**Nuclear fission.**—Major portions of the nuclear fission R&D program were consolidated and restructured to provide a balanced Civilian Reactor Development Program that will enable the development of viable nuclear energy options to meet near, intermediate, and long-term energy needs. The program will pursue technology development efforts with the private sector and foreign technology exchange. The elements of the program are improved light water reactor technology, advanced converter reactor technology, advanced breeder reactor technology, water cooled breeder reactor technology, and civilian reactor development program support.

The improved light water reactor technology program will conduct R&D efforts to support the Three Mile Island cleanup effort and to maximize the application of lessons learned to major regulatory issues. Programs will also include participation in the last year of tests at the LOFT (Loss of Fluid Test) facility as well as smaller efforts to monitor and assist in resolution of key light water regulatory and technology issues.

The advanced converter reactor technology program will feature a more sharply focused initiative to encourage development of safe, secure, and economical nuclear power reactors, ones that may become attractive energy options within the next 10 years. The tasks in this area will focus on utilizing high technology developments for all advanced reactor concepts. Conceptual designs will be developed for an innovative light water reactor, high temperature gas reactor, and liquid metal converter reactor. Common elements of application and potential benefit of each technology will be explored, particularly in the areas of smaller plant size, simplified designs, innovative safety features, enhanced licensability, plant modularization, increased factory fabricability, and other features which offer the potential for major reductions in plant costs.

The advanced breeder reactor technology program will continue to move away from a focus on federally funded demonstration projects. Major breeder reactor R&D facilities will continue to support long term participation in nuclear nonproliferation efforts. The technology program will continue but will be reshaped to reflect commercial introduction of the breeder in the next century.

The water cooled breeder reactor technology program will focus activities on evaluating the core fuel from the Shippingport reactor to determine the breeding characteristics of the light water breeder design.

The civilian reactor development program support will include generic studies applicable to the range of nuclear reactor power options that are under research and development. The program will provide adequate support to sustain major participation by our universities, building a strong foundation for applying emerging technologies and maintaining expertise for the future. Also included are essential safeguards and security activities to ensure an integrated safeguards system for facilities within the nuclear energy sector which acquire, use, store and dispose of special nuclear materials.

The advanced nuclear systems program will continue development work on the space power systems for use on U.S. space missions. The 1986 program will principally support work on the National Aeronautics and Space Administration Galileo Spacecraft and the Ulysses, formerly the International Solar Polar Mission Spacecraft, which are scheduled for launch in 1986.

The remedial actions program includes efforts to treat or stabilize radioactive wastes and perform required decontamination and decommissioning at contaminated DOE and legislatively dictated non-government facilities and sites. The major program areas are the Formerly Utilized Sites Remedial Action program, the Grand Junction Remedial Action program, the Uranium Mill Tailings Remedial Action program for inactive uranium mill tailings sites, the Surplus Facilities program for DOE contaminated facilities declared surplus and resulting principally from civilian nuclear energy programs, and the West Valley Demonstration project, which will demonstrate the solidification of high-level radioactive waste.

The nuclear waste technology program includes efforts to develop acceptable technologies and technical

support activities related to the long-term management of commercial radioactive wastes. Specific activities include: stabilization, closure and waste treatment technology demonstrations and facilitating the establishment of a national disposal system, and development of nuclear waste treatment processes and forms suitable for transportation, storage, and disposal in a geologic repository.

The civilian waste research and development program provides testing of new at-reactor spent fuel storage technologies through cooperative demonstrations with utilities to evaluate their safety and feasibility in order to provide a data base for NRC licensing requests. Other research activities include: alternative methods, such as the subseabed program, for the permanent disposal of high-level radioactive wastes; basic generic research and development support for the geologic disposal of civilian nuclear waste; and coordination of generic international waste disposal activities.

*Environment, safety, and health.*—In 1986, this program will conduct audits and appraisals of field office performance in complying with DOE safety and environmental quality policies and standards and achieving effective safety and environmental protection performance; develop policies and standards; provide technical assistance as needed to further compliance; maintain radiological emergency response resources; and review National Environmental Policy Act (NEPA) documents. These functions contribute to an independent assurance of environmental protection, safety and health protection throughout the Department. Particular emphasis will be placed in 1986 on the Department's Nuclear Energy, Defense and Energy Research programs with regard to the operation of DOE nuclear facilities.

*Biological and environmental research.*—The goals of this program are to provide scientific data through the conduct of research on the health and environmental effects of energy technologies and to support development of new medical applications of radiation for the treatment of human disease. Planned 1986 activities include studies of the health and environmental effects of radiation and other energy-related pollutants, studies to provide basic information on pollutant-induced damage in biological systems, and research on new radionuclides for use in medical applications. This program will also conduct comprehensive research on the effects of increased levels of carbon dioxide on climate, and will continue research on the environmental effects of nonnuclear energy technologies.

*Spill test facility.*—The overall goal is to conduct user-sponsored spill tests in support of safety research associated with the handling, shipping and storage of liquefied gaseous fuels and other hazardous fluids. The 1986 efforts will be directed to assuring program continuity and facility responsiveness to user sponsored testing activities.

*Magnetic fusion.*—The goal of this program is to develop fusion as an energy option. The program proposed at a level of \$390 million, maintains a balance between our domestic science and technology program and those

abroad to allow for effective international collaboration. The program emphasis has shifted to the near-term scientific and technological output of the program, including the production of well trained scientists and engineers, and contribution of advanced technology development for industrial and defense applications, while continuing to pursue the long-term energy goal of fusion at a pace consistent with our national energy need.

*Supporting research and technical analysis.*—The role of these programs is to expand the scientific and engineering base for future energy technology development and to provide independent objective evaluations of Energy Research Activities and associated manpower needs. Educational support of energy technology research in universities is also provided.

*Basic energy sciences.*—This program funds basic research in the physical, biological, and engineering sciences in support of both the nuclear and non-nuclear technology programs. The principal focus of the program is energy; however, a number of other important national goals are also supported including U.S. leadership in science and technology and the training of scientists and engineers. In 1986, work will continue in materials sciences, chemical sciences, nuclear sciences, advanced energy projects, biological energy research, and research in engineering systems, applied mathematics, and the geosciences. Research related to advanced materials development, combustion, chemistry of coal, catalysts, photochemistry, nondestructive evaluation techniques and support for existing unique national user research facilities will be continued. In 1986, the construction of the Center for Advanced Materials at Lawrence Berkeley Laboratory, the upgrade of the National Synchrotron Light Source at Brookhaven National Laboratory, and the enhancement to the Stanford Synchrotron Radiation Laboratory at the Stanford Linear Accelerator Center will continue. In addition, construction funds are provided for general plant projects, accelerator improvements and modifications, and the ion collision physics facility at Kansas State University.

*University research instrumentation.*—This program will support the purchase, by the major research universities, of state-of-the-art, scientific instrumentation used in energy-related research areas such as combustion, materials, catalysis, and radioactive waste management.

*University research support.*—This program supports energy related research and training through the university reactor fuel assistance program, the university laboratory cooperative research program, the energy manpower development program, and related education and training activities.

*Energy research analysis.*—This activity involves the independent assessment of existing or proposed technological initiatives, including examination of the base of research that underlies energy supply and utilization technologies.

*Multiprogram laboratories facilities support.*—This program supports DOE's national laboratories and includes the previously enacted multiprogram general purpose facilities program as well as a new program,

environmental compliance activities at Oak Ridge National Laboratory. The goal of the multiprogram facilities program is to provide funds for rehabilitating and replacing deficient common-use utilities, roads, and buildings at the multiprogram laboratories. Following the completion of a major scoping study of environmental problems at ORNL in 1985, the environmental compliance program will fund several major environmental projects in 1986. These can be expected to correct deficiencies in the following categories: process waste systems, hazardous and toxic material management, and watershed and storm sewer discharge projects.

**In-house energy management.**—This program funds energy conservation retrofit projects at department facilities. These projects are designed to improve the efficiency of DOE energy use and set an example for other Federal agencies and the private sector. Surveys are conducted to identify cost-effective candidate projects and projects are then selected on a competitive basis using as the primary criterion the greatest economic return.

**Technical information and management program.**—This program contributes to DOE's missions in advancing energy and nuclear defense technologies and protecting U.S. economic and military security through the effective management and control of the Department's scientific and technical knowledge which is contained in its information resources. Major objectives which are structured to meet the overall purpose are the effective management, control, and use of the results of DOE's multibillion dollar research program, and the acquisition and management of results of worldwide investment in energy R&D.

**Plant engineering and design.**—This program identifies and supports through the advanced funding of Architect-Engineering (A-E) services those proposed construction projects considered critical to timely accomplishment of energy activities. A-E services permit designated non-defense projects to proceed from conceptual design into Preliminary (Title I) and Definitive (Title II) design prior to Congressional authorization.

**Policy and management.**—Provides executive direction, management assistance and administrative support to all programs within energy supply activities.

**Uranium resource assessment.**—The program was closed out in 1984.

**Uranium enrichment activities.**—The goal of this program is to meet domestic, foreign and United States Government requirements for uranium enrichment services (enrichment of uranium and uranium compounds in the isotope U-235) in the most economical, reliable, safe, and environmentally acceptable manner possible. This program is comprised of four subprograms: (a) gaseous diffusion operations and support; (b) enrichment research and development; (c) gas centrifuge enrichment plant; and (d) program direction.

The gaseous diffusion operations and support program provides for all activities related to operation and maintenance of the three gaseous diffusion enrichment

plants located at Oak Ridge, Tennessee, Paducah, Kentucky, and Portsmouth, Ohio.

The enrichment research and development program provides for those activities related to the development of the gas centrifuge enrichment process and to the development of the atomic vapor laser isotope separation enrichment process. The gas centrifuge enrichment plant program provides principally for the construction, startup, and operation of the gas centrifuge enrichment plant located at Portsmouth, Ohio.

The program direction program provides for personnel compensation, personnel benefits, travel and other expenses for 69 full-time permanent positions. In 1986, program funding will be on a reimbursable basis.

**Coal.**—The objectives of this program will be to continue generic, technology base and environmental research to provide an adequate scientific and engineering knowledge base to foster technological advances by the private sector, as well as to remove key uncertainties. The 1986 research activities include research in flue gas cleanup, waste management, coal preparation, and gas stream cleanup technologies. Advanced research and technology development efforts will be continued including basic and applied research on materi-

als and components, processes, direct utilization, and research that cross-cuts all Fossil Energy programs. Coal liquefaction industrial and in-house research will continue on direct and indirect liquefaction processes, catalyst evaluations, and toxicology studies of coal liquids. Research in the direct use of coal in an environmentally sound and efficient manner will continue including the continuation of fluidized bed combustion technologies, alternate coal-slurry fuel utilization, and advanced combustor technology development. The heat engines technology base program will continue advanced technology research related to coal-fired turbines and diesels. Fossil Energy in close consultation with the private sector, is continuing to realign the MHD program. Fuel cells research will continue in the areas of phosphoric acid, molten carbonate, and advance concepts. Surface and underground coal gasification research will also be continued to provide data for effective technology transfer to industry.

**Petroleum.**—This program will promote improved technologies for the exploration, development, and production of petroleum resources. The 1986 effort will concentrate on enhanced recovery of light and heavy oils, and tar sands. The fundamental studies of chemistry and physics related to oil shale processes will also continue as well as environmental mitigation efforts. In advanced process technology, a broad spectrum of efforts will be pursued aimed at expanding the knowledge base for extraction technologies as well as continuing technology research in the Arctic and offshore program.

**Enhanced gas recovery.**—This program will continue efforts related to Western tight gas sands fracturing experiments, and supporting research. In addition, Eastern gas shales testing and model verification will continue. Environmental and advanced research will also be pursued.

**Program direction.**—This program provides the funding for both Headquarters and field personnel in Fossil Energy as well as overhead expenses funded in prior years by assessment of the technical programs. In addition, it provides support for the day-to-day project management functions such as facility operations, maintenance, finance, personnel, and administrative support, and other non-programmatic field support related activities. Finally, institutional investment (GPP, capital equipment) projects are funded under this program.

This program includes those activities necessary to operate, explore, conserve, develop, and produce the naval petroleum reserves at the maximum efficient rate and to conserve the oil shale reserves. This will include routine operation and maintenance, development and exploration drilling, environmental and conservation work, and construction and installation of on-reserve

facilities and related systems required for the collection, storage, and distribution of produced petroleum and related products.

## ENERGY CONSERVATION\*

\*See Part II for additional information.

For necessary expenses in carrying out energy conservation activities, [\$467,969,000] \$176,130,000 to remain available until expended: Provided, That for the base State Energy Conservation Program (part D of the Energy Policy and Conservation Act, sections 361 through 366), each State will hereafter match in cash or in kind not less than 20 percent of the Federal contribution: Provided further, That these funds may be used for grants to the Commonwealth of the Northern Mariana Islands, the Federated States of Micronesia, the Republic of the Marshall Islands, and the Republic of Palau under part D of title III of the Energy Policy and Conservation Act (relating to primary and supplemental State energy conservation programs, 42 U.S.C. 6321-6327) and under the National Energy Extension Service Act (42 U.S.C. 7001-7011): Provided further, That pursuant to section 111(b)(1)(B) of the Energy Reorganization Act of 1974, as amended, 42 U.S.C. 5821(b)(1)(B), of the amount appropriated under this head, \$16,000,000 shall be available for a grant for basic industry research facilities located at Northwestern University without section 111(b)(2) of such Act being applicable]. (Department of the Interior and Related Agencies Appropriations Act, 1985, as included in Public Law 98-473.)

**Buildings and community systems.**—In 1986, the buildings and community systems program will assist the private sector in research in the area of economical and efficient energy use, primarily related to buildings. Such areas as energy efficiency in: (1) building-insulation, energy retrofit, wall and roof systems, (2) consumer products, and (3) community systems and windows and daylighting will be researched. Support will also be provided for conservation regulatory programs (e.g., Federal Energy Management Program).

**Industry.**—In 1986, the industrial energy program will conduct research and development designed to increase energy use efficiency and the use of alternative fuels in private industry. Such areas as waste energy reduction, industrial process efficiency, industrial cogeneration and related support activities will be undertaken.

**Transportation.**—In 1986, the transportation program focuses on research efforts to improve energy efficiency in the transportation sector, thus, reducing dependence on conventional petroleum products. Major efforts include: construction of a High Temperature Materials Laboratory and ceramics materials development for heat engines, subsystem R&D for electric vehicles, and alternate fuels research.

**State and local assistance.**—The 1986 request provides funding to encourage energy conservation initiatives through a mix of activities and programs, including direct financial assistance, technical assistance, and developmental demonstration projects to enhance private sector involvement in energy conservation. The request provides funding for program direction, including management of the State Energy Conservation (ECPA grants) and Energy Extension Service programs. These program funds will be managed by the existing

State and Local Assistance grant program in the Department of Energy.

**Multisector.**—In 1986 the multisector program supports technology base research in such areas as combustion and thermal sciences, materials sciences, biocatalysis, and tribology.

**Policy and management.**—Provides for overall management guidance to Energy Conservation programs to ensure effective management.

**Facilities.**—Provides for a grant for basic industry research facilities located at Northwestern University. No funds are requested for this activity in 1986.

The objective of this program is to decrease the vulnerability of the United States to disruptions in world petroleum markets by creating a crude oil stockpile to be used in the event such disruptions occur.

The account provides for petroleum reserve storage facility construction, ongoing operations and maintenance activities, planning studies, and program administration.

In 1986, an indefinite moratorium on further development of the reserve is proposed. The moratorium will be periodically reevaluated in light of changes in world oil markets and the U.S. Government fiscal situation.

Beginning in 1982 and continuing to the present, petroleum acquisition and transportation is funded from the SPR Petroleum Account pursuant to the Omnibus Budget Reconciliation Act of 1981 (Public Law 97-35).

This program supports energy information activities which are designed to provide timely, accurate and relevant energy information for use by the Administration, the Congress, and the general public.

**Collection, production and analysis.**—These activities design, develop and maintain information systems on oil, natural gas, coal, nuclear, electric, alternate fuel sources, and energy consumption. These programs collect data and ensure its accuracy. They also prepare limited short-term forecasts, and prepare reports associated with these energy sources, and with energy end-use, prices, supply and demand, economic, international, and financial matters.

**Program services.**—The activities funded in program services include the operation of the Energy Information Administration (EIA) computer facility, telecommunications support, customer services, and ADP software support to in-house EIA personnel and others. In addition, the National Energy Information Center (NEIC) disseminates publications, analytic reports, information directives, public use tapes, and responds to public inquiries. Finally, this activity provides survey

and statistical design standards, documentation standards, and energy data public-use forms clearance, and burden control services.

**Policy and management.**—This program provides direction to EIA through the Office of the Administrator, provides funding for administrative services, and provides administrative support to EIA program offices in the area of planning, budgeting, contract administration, personnel, and administrative services.

**Economic regulation.**—The Economic Regulatory Administration (ERA) is responsible for pursuing and finalizing any remaining enforcement actions to assure that oil companies complied with petroleum regulations in effect prior to decontrol of oil in January 1981. Naturally, the funding level is reduced from prior years as enforcement cases are completed. In addition, ERA authorizes the import and export of natural gas and export of electricity, and licenses international electricity transmission facilities.

**Hearings and appeals.**—The Office of Hearings and Appeals issues all final orders of an adjudicatory nature other than those over which the Federal Energy Regulatory Commission has jurisdiction. It decides appeals of such orders, examines requests for exception relief, and administers refund proceedings involving consent order funds obtained as a result of petroleum enforcement actions.

The Federal Energy Regulatory Commission (FERC) is charged with regulating certain interstate aspects of the natural gas, hydroelectric, oil pipeline, and electric industries. Such regulation includes issuing licenses, inspecting dams, and providing other services to regulated businesses. In 1986, these businesses will pay an estimated \$48.7 million in fees and charges to cover the Commission's cost of providing licenses, inspections and other services.

**Natural gas regulation.**—The Commission regulates 150 natural gas pipeline companies and approximately 8,500 producers. Responsibilities include issuing certificates of public convenience and necessity for natural gas pipelines, determining rates for the transportation of natural gas, and establishing curtailment provisions.

**Hydropower licensing regulation.**—The Commission issues permits and licenses for hydroelectric projects, enforces the terms and conditions of the licenses, and performs dam safety inspections. There are currently 795 hydroelectric projects under license representing more than 1,160 hydroelectric developments with an ultimate generating capacity of about 59 million kilowatts.

**Oil pipeline regulation.**—The Commission's responsibilities include the establishment of economical and reasonable transportation rates. A total of 138 oil pipeline companies, including the Trans Alaska Pipeline System (TAPS), are currently under the jurisdiction of the FERC. The valuation of these regulated companies approximates \$20 billion. The deregulation of pipelines is being proposed in those instances where consumers' interests are best served by this approach.

**Electric power regulation.**—The Commission is responsible for determining rates for the interstate sale or transmission of wholesale electric energy for 214 electric utilities and for overseeing electric utility corporate transactions.

The objectives of the loan guarantee program are: (1) to encourage and assist the private sector in developing geothermal resources by sharing the lenders' financial risk associated with the introduction of new technology; and (2) to develop normal borrower-lender relationships that will in time encourage the flow of credit without the need for Federal assistance.

This interim program was established in 1980 for the purpose of expediting the development and production of alternative fuels.

When the Synthetic Fuels Corporation was declared to be operational in 1982, the uncommitted and unobligated funds remaining in the program were transferred to the Energy Security Reserve for use by the Synthetic Fuels Corporation with the exception of the Great Plains Gasification Project which remained under the jurisdiction of the Department of Energy.

The nuclear waste activities program consists of efforts related to the development, acquisition and operation of facilities for the disposal of civilian nuclear waste which is not destined for low level waste burial grounds. These activities are funded by appropriations from the nuclear waste fund which is paid for by the users of the disposal service.

The Alaska Power Administration (APA) is responsible for operation, maintenance and power marketing for the Eklutna and Snettisham hydroelectric projects in accordance with the authorizing legislation for each project.

The 1986 budget request assumes transfer of APA projects to ownership by the State of Alaska by the end of 1985, thus eliminating the need for further Federal appropriations.

Expected receipts for 1986 are \$14,949 thousand on energy sales of 357 million kilowatt-hours under replacement reform criteria.

Bonneville Power Administration (BPA) is the Federal electric power marketing agency in the Pacific Northwest. BPA markets hydroelectric power from 21 multipurpose water resource projects of the U.S. Army Corps of Engineers and 9 projects of the U.S. Bureau of Reclamation, plus some energy from non-Federal generating projects in the region. These generating resources and BPA's transmission system, planned by the end of 1986 to consist of an estimated 14,632 circuit-miles of high-voltage transmission lines and 388 substations, are operated as an integrated power system with operating and financial results combined and reported as the Federal Columbia River Power System. BPA markets about one-half of the electric energy produced in the Northwest and provides about four-fifths of the region's electric power transmission capacity.

BPA is responsible for meeting the net firm power requirements of its requesting customers through a variety of means, including energy conservation programs, acquisition of renewable and other resources, and power exchanges with utilities both in and outside the region.

BPA will continue its operations on the basis of its self-financing authority and the new borrowing authority provided by the Pacific Northwest Electric Power Planning and Conservation Act (Public Law 96-501) for energy conservation and renewable energy resources and capital fish facilities. Authority to borrow available to the Bonneville Power Administration is available on a permanent, indefinite basis. This authority is limited only in that the amount of borrowing outstanding at any time cannot exceed \$3,750,000,000.

*Budget programs.—Resource planning, acquisition, and oversight.*—Provides for the orderly planning, acquisition, and oversight of reliable, cost-effective, environmentally acceptable resources, including resources purchased prior to the Regional Act, needed to serve BPA's portion of the region's forecasted net electric load requirements that cannot be met through cost-effective conservation.

*Energy conservation.*—Provides for funding conservation measures, including home energy efficiency, commercial energy efficiency, street lighting, utility distribution system loss reduction, industrial technological transfers, passive solar energy applications, and conservation measures for new home and commercial building construction.

*System planning and construction.*—Provides for continuation of construction work on transmission lines, substations and related facilities initiated in prior

years, initiation of construction on system additions, and planning and research and development for a reliable, efficient and cost-effective regional transmission system. During 1986, BPA plans to construct and energize approximately 520 miles of line and 4 substations.

*Operation and maintenance.*—

*System operation.*—Provides for operating an estimated 14,632 miles of line and 388 substations of the BPA transmission system in 1986.

*System maintenance.*—Provides for maintaining the facilities and equipment of the BPA transmission system in 1986.

*Power marketing.*—Provides for forecasting regional demand; negotiating power sales and wheeling, billing, and servicing these contracts; reviewing and establishing wholesale power and wheeling rates; and encouraging public participation in the formation of BPA policies and programs.

*Power scheduling.*—Provides for the scheduling of power.

*Fish and wildlife.*—Provides for protection, mitigation and enhancement of fish and wildlife of the Columbia River and its tributaries, including related spawning grounds and habitat in accordance with the Pacific Northwest Electric Power Planning and Conservation Act (Public Law 96-501).

*Planning Council.*—Provides for activities of the Pacific Northwest Electric Power and Conservation Planning Council required by the Pacific Northwest Electric Power Planning and Conservation Act (Public Law 96-501).

*Interest on borrowings.*—Provides for payments to the U.S. Treasury for interest on borrowings to finance BPA's construction, energy conservation, and fish and wildlife programs under \$3,750,000,000 borrowing authority provided by the Federal Columbia River Transmission System Act (FCRTSA) as amended by the Regional Act and replenished by Public Law 98-50.

*Associated project costs.*—Provides for repayment of the operation and maintenance costs of the 30 U.S. Army Corps of Engineers and U.S. Bureau of Reclamation power generating projects, interest and amortization on the U.S. Bureau of Reclamation capital investment in power generating facilities and coordination agreement payments to the Federal Energy Regulatory Commission.

*Reimbursable.*—Provides for 28 percent of Hanford Generating Project operating expenses paid by two investor-owned utilities through trust fund arrangements. Also provides for services such as construction, operation and maintenance of transmission facilities when requested and financed by other entities.

*Contingencies.*—Although contingencies are not specifically funded, the need may arise to provide for purchase of power in low-water years; for repair and/or replacement of facilities affected by natural and man-made emergencies, including the resulting additional costs for contracting, construction, and operation and maintenance work; for unavoidable increased costs for the planned program due to necessary but unforeseen adjustments, including engineering and design changes, contractor and other claims and relocations, or for payment of a retrospective premium adjustment in excess nuclear property insurance policy, in the event one of

the participating utilities has an accident with property damage in excess of \$500 million.

*Financing.*—The FCRTSA provides for the use by BPA of all receipts, collections, and recoveries in cash from all sources, including the sale of bonds, to finance the annual budget programs of BPA. These receipts result primarily from the sale of power and wheeling. The FCRTSA also provides for authority to borrow from the U.S. Treasury at rates comparable to borrowings at open market rates for similar issues. As amended by the Regional Act and replenished by Public Law 98-50, it allows for \$3,750,000,000 of borrowing to be outstanding at any time. Borrowing authority estimated for use in 1986 is \$263,200,000.

*Operating results.*—Total revenues and receipts are expected to amount to approximately \$3,963,600,000 in 1986 based on revised repayment criteria. Estimated cumulative retained earnings at the close of the budget year are \$350,139,000, a net increase of \$56,400,000 from 1985.

The Southeastern Power Administration (SEPA) markets power generated at Corps of Engineers Hydroelectric generating plants in a 10-State area of the Southeast. Deliveries are made by means of transmission facilities owned by others. There are 21 projects now in operation. A schedule of kilowatt capacity of projects in operation or under construction follows:

	Installed capacity
Projects in operation .....	2,792,375
Project under construction: Richard B. Russell (initial operation beginning 1985) .....	600,000
Total .....	3,392,375

SEPA sells power at wholesale primarily to publicly and cooperatively owned electric distribution utilities using wheeling and pooling agreements with the region's large private utilities to provide firm power to its customers. SEPA does not own or operate any transmission facilities. Its long-term contracts provide for periodic electric rate adjustments to insure that the Federal Government recovers all costs of operation and all capital invested in power, with interest, in keeping with statutory requirements. The SEPA program includes the following activities:

*Systems operations and maintenance.*—Provision is made for negotiation and administration of power contracts, collection of revenue, development of wholesale power rates, the amortization of power investment, investigation and planning of proposed water resources projects, scheduling and dispatch of power generation, scheduling storage and release of water, administration of contractual operation requirements, and determina-

tion of methods of operating generating plants individually and in coordination with others to obtain maximum utilization of resources. Miscellaneous receipts deposited in the Treasury were \$73,029,188 for 1984 and are estimated to be \$105,664,000 for 1985. The application of current market interest rates to unamortized debt balances and the establishment of fixed repayment schedules will result in estimated receipts of \$227,035,000 during 1986.

**Purchase power and wheeling.**—Provision is made for the payment of wheeling fees and for the purchase of electricity in connection with disposal of power under contracts with utility companies.

The Southwestern Power Administration (SWPA), operates as a marketing agent for hydroelectric power and energy produced at Corps of Engineers dams in a six-State area. It also operates and maintains some 1,660 miles of high voltage transmission lines, 34 substations and switching stations and 20 radio and microwave stations. SWPA sells its power at wholesale primarily to publicly and cooperatively owned electric distribution utilities. Its long-term contracts provide for periodic rate adjustments to insure that the Federal Government recovers all costs of operation and all capital invested in power, with interest, in keeping with statutory requirements.

SWPA also is responsible for scheduling and dispatching power, negotiating power sales contracts, and constructing facilities required to meet changing customer load requirements.

**Systems operation and maintenance.**—Provision is made for investigating and planning proposed water resources projects, scheduling and dispatching power generation, scheduling storage and release of water, administering contractual operation requirements, and determining methods of operating generating plants individually and in coordination with others to obtain maximum utilization of resources. facilities to assure reliable service, negotiation and administration of power contracts, collection of revenue, development of wholesale power rates and the amortization of the power investment. Estimated proprietary receipts which are deposited in the Treasury are \$91,503,000 in 1984, and are estimated to be \$94,824,000 in 1985. The application of current market interest rates to unamortized debt balances and the establishment of fixed repayment schedules will result in estimated receipts of \$158,600,000 in 1986.

**Purchase power and wheeling.**—Provision is made for the payment of wheeling fees and for the purchase of energy in connection with the marketing of power under contracts with utility companies.

**Construction.**—The construction program provides transmission, substation and switching facilities to transmit power generated at Corps of Engineers' hydroelectric projects in the Southwest. This program is coordinated with the Corps of Engineers' construction program and customer requirements in order that transmission and related facilities will be in place when these power projects are completed and available for marketing. This program also provides for the purchase of capital electrical equipment used for upgrading the established system to meet changing customer load requirements.

All operation and maintenance activities, with the exception of the gross expenses for the purchase of power and payment of transmission charges, are financed through direct appropriations. An appropriation for the purchase of power and payment of transmission expenses is necessary to cover monthly net expenditures for the thermal power and energy and transmission service provided to SWPA.

The Western Area Power Administration (Western) markets power in 15 western States from generating projects of the Bureau of Reclamation, Corps of Engineers and the International Boundary and Water Commission's powerplants in Texas. Western operates and maintains about 16,000 miles of high-voltage transmission lines and over 200 associated substation/switchyards and constructs transmission facilities, including new transmission lines, substations and essential additions and modifications to existing facilities.

Western sells power at wholesale to publicly and cooperatively owned electric distribution utilities. Its long-term contracts provide for periodic rate adjustments to ensure that the Federal Government recovers all costs of operation and all capital invested in power with interest in keeping with statutory requirements.

**Systems operation and maintenance.**—A total of 12 power systems will be operated and maintained to market power produced principally by the Bureau of Reclamation and Corps of Engineers. Additionally, revenue will be available from Boulder Canyon project operations for Western's power marketing and transmission expenses, without further appropriation, as provided in the Hoover Power Plant Act of 1984 (Public Law 98-381). Western will continue to participate in conservation and renewable energy programs in 1986.

Commercial power is sold to wholesale customers such as municipalities, cooperatives, irrigation districts, public utility districts, State and Federal government agencies, and private utilities. Receipts are deposited in

the Reclamation fund, the General fund, the Colorado River Dam fund, and the Lower Colorado River Basin Development fund.

Energy sales and revenues resulting from these Western power systems operations, excluding the Colorado River Storage project, the Navajo generating plant, and the Central Arizona project are as follows:

	1984 actual	1985 estimate	1986 estimate
Energy sales (millions of kilowatt hours).....	34,846	28,113	28,733
Revenue from energy sales (in thousands of dollars).....	365,944	385,735	553,327

**Purchase of power and wheeling.**—The program provides for purchase of power, wheeling, and fuel conservation expenses. Financing of this program consists of \$56,700,000 of new budget authority, \$25,800,000 from prior year balances and \$104,734,000 associated with net billing procedures and Bonneville Power Administration power transfers, for a total program cost of \$187,234,000.

**System construction.**—Construction of transmission facilities is necessary to maintain system reliability and for marketing of electric power produced from generating plants of others. Funding is provided in 1986 for system interties, joint construction participation, replacement of deteriorated wood poles and damaged wood or steel structures, reconductoring and upgrading transmission lines to increase system capacity and reliability, construction of operation and maintenance facilities, and system security additions. Western, in cooperation with others, will continue studies and other developmental activities for the design and construction of the third AC intertie in California. Engineering studies will also continue on Western's transmission systems.

**Reimbursable program.**—This program involves services provided by Western to others under various types of reimbursable arrangements. In 1986, the reimbursable program primarily provides for construction and operation and maintenance services by Western for the Bureau of Reclamation.

Western's operation and maintenance and power marketing expenses for the Colorado River storage project, the Colorado River Basin project and the Fort Peck project will be financed from power revenues collected by Western.

Western operates and maintains approximately 3,000 miles of transmission lines and over 40 substations associated with these projects. Wholesale power is provided to utilities over the interconnected high-voltage transmission systems. Long-term contracts provide for periodic rate adjustments to ensure that the Federal Government recovers all costs of operation and all capital invested in power with interest in keeping with statutory requirements.

Energy sales and revenues from power operations associated with the Colorado River storage project and the Colorado River Basin project are significantly reduced in 1985 and 1986 due to energy requirements for pumping purposes of the central Arizona project. However, the decrease in revenue in 1986 is offset by in-

creased revenues derived from revised repayment criteria. The revenue from the Fort Peck project is integrated with Pick-Sloan Missouri Basin project revenue and is included in the construction, rehabilitation, operation and maintenance account.

**Colorado River storage project.**—Western markets power and operates and maintains the power transmission facilities of units of the Colorado River storage project and the Seedskaadee participating project. Provision is made for payment for purchase of electricity and wheeling fees to meet contractual obligations and fuel conservation.

**Colorado River Basin project.**—The 1986 program provides for Western's power marketing and operation and maintenance expenses for the Navajo project participation agreement and Central Arizona project. Financing will be from project power revenue.

**Fort Peck project.**—Revenue collected by Western is used to defray construction, operation and maintenance and power marketing expenses associated with the power generation and transmission facilities of the Fort Peck project, Corps of Engineers—Civil, and emergency expenses to ensure continuous operation. The Corps operates and maintains the power generating facilities, and Western operates and maintains the transmission system and performs power marketing functions. Funding is provided in 1986 for completion of reconstruction and realignment of the Fort Peck-Havre 161-kV transmission line in Montana.

**Navy Geothermal projects at Fallon, NV.**—The 1985 Energy and Water Development Act provides that revenues from the projects shall be available to the Secretary of Energy, without further appropriation, for payment of power generation and power marketing costs associated with the projects. Due to slippage in test generation, revenues are not anticipated to be available until 1987.

**Departmental administration.**—This account includes funds for a wide array of policy development and analysis activities, institutional and public liaison functions, and other program support requirements necessary to insure effective operation and management. Specific activities provided for are:

**Policy, planning and analysis.**—The Office of Policy, Planning and Analysis identifies major energy policy issues and develops an agenda for their resolution. It creates a foundation for better energy policy and programs through analysis and evaluation.

**International affairs.**—This organization supports the formulation of international energy policy, analyses and assessments of the current world energy situation, international cooperation in energy matters, and the Department's participation in the Administration's nuclear nonproliferation program.

**Management and administration.**—This office provide a wide range of institutional support services to the headquarters organizations and to the Department as a whole. Areas of responsibility include: organization and management systems; personnel management; contractor industrial relations; equal employment opportunity; automated data processing management and acquisition; telecommunications management; program/project, construction and facility management; procurement and assistance management; and budget, accounting and finance; as well as performing and supplying administrative services.

**Congressional affairs.**—This office is responsible for coordinating and directing the legislative liaison with the Congress. It gathers information on issues under Departmental jurisdiction; counsels and advises DOE staff on relationships with the Congress; serves as liaison between relevant DOE elements and Congressional authorization and/or oversight committees and other Members; and coordinates the designation and scheduling of DOE witnesses to testify at hearings.

**Operations offices.**—The operations offices perform a wide variety of functions in support of energy activities throughout the country. Among these functions are field procurement, engineering and construction management, health and safety monitoring, property management, labor relations and maintenance of personnel and financial systems.

**General Counsel.**—This office is responsible for providing legal services with respect to all energy activities except for those functions belonging exclusively to the

Federal Energy Regulatory Commission, which is served by its own General Counsel and litigation arising from the Emergency Petroleum Allocation Act. Its responsibilities more specifically entail the provision of legal opinion, advice and services to administrative and program offices, and the conduct of both administrative and judicial litigation, as well as legal advice and support for enforcement activities. Further, the General Counsel appears before State and Federal agencies in defense of national energy policies and activities. The office is responsible for the coordination and clearance of proposed legislation affecting energy activities and testimony before Congress. The General Counsel is also responsible for oversight of intelligence activities; assuring consistency and legal sufficiency of all energy regulations; administering and monitoring standards of conduct requirements; and conducting the Patents program.

**Inspector General.**—The responsibilities of this office are to supervise, coordinate, and provide policy direction for audit and investigative activities relating to the promotion of economy and efficiency in the administration or the prevention or detection of fraud or abuse in programs and operations.

**Office of the Secretary.**—Directs and supervises the staff and provides policy guidance to line and staff organizations in the accomplishment of agency objectives.

**Board of Contract Appeals.**—Hears and resolves contractual disputes arising from the Administration's financial assistance programs, including guaranteed loans, loan agreements, grants and cooperative agreements.

**Minority Economic Impact.**—Is responsible for: (1) advising the Secretary on the effects of the Department's policies, regulations and actions on minorities and minority business enterprises; (2) conducting research to determine energy consumption and use patterns of minorities; (3) providing technical assistance to minority educational institutions and minority business enterprises to enable them to participate more fully in Departmental research activities; (4) providing loans to minority bank and thrift institutions under the minority bank development program. The office also is responsible for the White House Initiatives on Historically Black Colleges and Universities for the Department.

**Cost of work for others.**—This activity covers cost of work for others. Cost of work for others is work performed under orders placed with the Department by non-DOE entities.

**External affairs.**—Manages and ensures coordination of the Department's information dissemination activities with the news media; state, territorial, tribal and local government officials; other Federal agencies; consumer/citizen and business organizations; and the general public. It supports program offices and provides guidance to ensure consistency in program activities with the constituent groups mentioned above. It provides oversight on relations between Federal energy activities and all external groups and entities, excluding international.

## ADMINISTRATIVE PROVISIONS, DEPARTMENT OF ENERGY

Appropriations under this Act for the current fiscal year shall be available for hire of passenger motor vehicles; hire, maintenance, and operation of aircraft; purchase, repair, and cleaning of uniforms; and reimbursement to the General Services Administration for security guard services.

From [this appropriation] appropriations under this Act, transfers of sums may be made to other agencies of the Government for the performance of work for which the appropriation is made.

None of the funds made available to the Department of Energy under this Act shall be used to implement or finance authorized price support or loan guarantee programs unless specific provision is made for such programs in an appropriations Act.

## General and special funds—Continued

## ADMINISTRATIVE PROVISIONS, DEPARTMENT OF ENERGY—Continued

The Secretary is authorized to accept lands, buildings, equipment, and other contributions from public and private sources and to prosecute projects in cooperation with other agencies, Federal, State, private, or foreign: *Provided*, That (1) revenues received from the sale of any products produced in facilities other than demonstration plants operated as part of Department of Energy programs appropriated under this Act shall be covered into the Treasury as miscellaneous receipts; and (2) revenues and other moneys received by or for the account of the Department of Energy or otherwise generated by sale of products in connection with demonstration plant projects of the Department appropriated under this Act may be retained by the Secretary of Energy, to be available until expended, and used only for plant construction, operation, costs, and payments to cost-sharing entities as provided in appropriate cost-sharing contracts or agreements: *Provided further*, That the remainder of revenues after the making of such payments shall be covered into the Treasury as miscellaneous receipts: *Provided further*, That any contract, agreement or provision thereof entered into by the Secretary pursuant to this authority shall be submitted to the Senate Committee on Appropriations and the House Committee on Appropriations and a period of thirty days shall elapse while Congress is in session (in computing the thirty days, there shall be excluded the days on which either the Senate or the House is not in session because of adjournment for more than three days) before the contract, agreement or provision thereof shall become effective, except that such committees, after having received the proposed contract, agreement or provision thereof, may, by separate resolutions in writing, waive the condition of all or any portion of such thirty-day period.]

[Where the Secretary has the legal authority under other provisions of law, including other provisions of this Act, to undertake projects for the design, construction, or operation of Government-owned facilities for developing or demonstrating the conversion of coal into gaseous, liquid, or solid hydrocarbon products, the Secretary may use the authority contained in Public Law 85-804 (50 U.S.C. 1431-1435), with respect to such contracts or agreements for or related to such projects: *Provided*, That any contract, agreement, or provision thereof entered into by the Secretary using the authority of Public Law 85-804 shall be submitted to the Senate Committee on Appropriations and the House Committee on Appropriations and a period of thirty days shall elapse while Congress is in session (in computing the thirty days, there shall be excluded the days on which either the Senate or the House is not in session because of adjournment for more than three days) before the contract, agreement or provision thereof shall become effective, except that such committees, after having received the proposed contract, agreement or provision thereof, may, by separate resolutions in writing, waive the condition of all or any portion of such thirty-day period. The notification required herein shall be in lieu of the notification requirements of Public Law 85-804.]

The Secretary of Energy may transfer to the Emergency Preparedness appropriation such funds as are necessary to meet any unforeseen needs from any funds available to the Department of Energy from this Act.

*Any statutory provisions requiring the maintenance of full-time permanent Federal employees, or prohibiting actions to reduce employment levels, or otherwise establishing requirements for personnel levels of the Department of Energy or any of its offices or activities, are repealed.*

*Notwithstanding the provisions of the Small Business Innovative Research Act (Public Law 94-219), the rate authorized in fiscal year 1986 for carrying out the small business innovation research program shall not exceed the rate authorized for fiscal year 1985 for carrying out this program. (Department of the Interior and Related Agencies Appropriations Act, 1985, as included in Public Law 98-473.)*

## GENERAL PROVISIONS—DEPARTMENT OF ENERGY

SEC. 301. Appropriations for the Department of Energy under this title for the current fiscal year shall be available for hire of passenger motor vehicles; hire, maintenance and operation of aircraft; purchase, repair and cleaning of uniforms; and reimbursement to the General Services Administration for security guard services. From these appropriations, transfers of sums may be made to other agencies of the

United States Government for the performance of work for which this appropriation is made. None of the funds made available to the Department of Energy under this Act shall be used to implement or finance authorized price support or loan guarantee programs unless specific provision is made for such programs in an appropriation Act. The Secretary is authorized to accept lands, buildings, equipment, and other contributions from public and private sources and to prosecute projects in cooperation with other agencies, Federal, State, private, or foreign.

## (TRANSFERS UNEXPENDED BALANCES)

SEC. 302. Not to exceed 5 per centum of any appropriations made available for the current fiscal year for Department of Energy activities funded in this Act may be transferred between such appropriations, but no such appropriation, except as otherwise provided, shall be increased or decreased by more than 5 per centum by any such transfers, and any such proposed transfers shall be submitted promptly to the Committees on Appropriations of the House and Senate.

## (TRANSFERS OF UNEXPENDED BALANCES)

SEC. 303. The unexpended balances of prior appropriations provided for activities covered in this Act may be transferred to appropriation accounts for such activities established pursuant to this title. Balances so transferred may be merged with funds in the applicable established accounts and thereafter may be accounted for as one fund for the same time period as originally enacted.

SEC. 304. The expenditure of any appropriation under this Act for any consulting service through procurement contract pursuant to section 3109 of title 5, United States Code, shall be limited to those contracts where such expenditures are a matter of public record and available for public inspection, except where otherwise provided under existing law, or under existing Executive order issued pursuant to existing law.

SEC. 305. None of the funds in the Department of Energy shall be used to pay the expenses of, or otherwise compensate, parties intervening in regulatory or adjudicatory proceedings funded in the Department of Energy.

[SEC. 307. For carrying out activities authorized by title II of Public Law 93-410 the Department of Energy is authorized to transfer no more than \$25,000,000 to the Geothermal Resources Development Fund from unobligated balances within the Uranium Supply and Enrichment Activities account: *Provided*, That such transfer shall be reported promptly to the Committees on Appropriations of the House and Senate. The amount authorized to be transferred by this provision is in addition to the authority provided in section 302 of this Act.]

SEC. [308] 306. Of the funds appropriated for Energy Supply, Research and Development Activities under this Act, \$2,000,000 shall be available until expended to further domestic technology transfer by facilitating access to data within the national laboratories, including the use of supercomputers.

SEC. 307. *Notwithstanding the provisions of the Small Business Innovative Research Act (Public Law 94-219), the rate authorized in fiscal year 1986 for carrying out the small business innovation research program shall not exceed the rate authorized for fiscal year 1985 for carrying out this program.*

SEC. 308. *Notwithstanding any other provision of law, the unpaid balance of principal for power and irrigation investments, to be repaid by the power marketing administrations, shall be repaid annually at a level not less than would be required under a straight-line amortization schedule, and annual interest payments shall be made on the total unamortized balances of such power and irrigation investments, at an interest rate to be set each fiscal year equal to the average yield during the preceding fiscal year on interest-bearing marketable securities of the United States which have terms of 15 years or more remaining to maturity, with the average yield computed based on average daily bid prices. If necessary to implement this provision, each power marketing administration is authorized to establish contingency reserves. (Public Law 98-360, making appropriations for energy and water development, 1985.)*

## TITLE V—GENERAL PROVISIONS

SEC. 501. No part of any appropriation contained in this Act shall remain available for obligation beyond the current fiscal year unless expressly so provided herein.

SEC. 502. None of the funds in this Act shall be used to pay the expenses of, or otherwise compensate, parties intervening in regulatory or adjudicatory proceedings funded in this Act.

SEC. 503. The expenditure of any appropriation under this Act for any consulting service through procurement contract, pursuant to 5 U.S.C. 3109, shall be limited to those contracts where such expenditures are a matter of public record and available for public inspection, except where otherwise provided under existing law, or under existing Executive order issued pursuant to existing law.

SEC. 504. None of the funds in this Act shall be used to implement, administer, or enforce any regulation which has been disapproved pursuant to a resolution of disapproval duly adopted in accordance with the applicable law of the United States.]

SEC. [505] 504. None of the funds appropriated in this Act shall be used to implement a program of retention contracts for senior employees of the Tennessee Valley Authority.

SEC. [506] 505. Notwithstanding any other provision of this Act or any other provision of law, none of the funds made available under this Act or any other law shall be used for the purposes of conducting any studies relating or leading to the possibility of changing from the currently required "at cost" to a "market rate" or any other non-cost-based method for the pricing of hydroelectric power by the six Federal public power authorities, or other agencies or authorities of the Federal Government, except as may be specifically authorized by Act of Congress hereafter enacted. (*Public Law 98-360, making appropriations for energy and water development, 1985.*)

## FOOD AND DRUG ADMINISTRATION

### Federal Funds

#### General and special funds:

#### [SALARIES AND] PROGRAM EXPENSES\*

\*See Part II for additional information.

For necessary expenses, not otherwise provided for, of the Food and Drug Administration; for payment of salaries and expenses for services as authorized by 5 U.S.C. 3109, but at rates for individuals not to exceed the per diem rate equivalent to the rate for GS-18; of the Food and Drug Administration; for rental of special purpose space in the District of Columbia or elsewhere; and for miscellaneous and emergency expenses of enforcement activities, authorized and approved by the Secretary and to be accounted for solely on the Secretary's certificate, not to exceed \$25,000; [\$372,072,000] \$409,072,000, of which \$1,450,000 shall remain available until expended for construction and renovation of facilities: Provided, That not to exceed \$5,000,000 in collections from user fees may be credited to appropriations available to the Food and Drug Administration, and shall remain available until expended. Funds provided under this heading may be used for one-year contracts which are to be performed in two fiscal years so long as the total amount for such contracts is obligated in the year for which the funds are appropriated.

#### [STANDARD LEVEL USER CHARGES (FDA)]

[For payment of Standard Level User Charges pursuant to Public Law 92-313 for programs and activities of the Food and Drug Administration which are included in this Act, \$26,072,000; Provided, That in the event the Food and Drug Administration should require modification of space needs, a share of the salaries and expenses appropriation may be transferred to this appropriation, or a share of this appropriation may be transferred to the salaries and expenses appropriation, but such transfers shall not exceed 10 per centum of the funds made available for Standard Level User Charges to or from this account.]

Note.—A regular 1985 appropriation for this account had not been enacted at the time this budget was prepared. A continuing resolution (Public Law 98-473) provides funds to the extent and in the manner provided for in the conference version of H.R. 5743, making appropriations for Agriculture, Rural Development, and Related Agencies, 1985.

[Sec. 127. Notwithstanding any other provision of this joint resolution, and in addition to amounts appropriated elsewhere, there are appropriated \$3,200,000 for fiscal year 1985 for Salaries and Expenses of the Food and Drug Administration to carry out the Drug Price Competition and Patent Term Restoration Act of 1984; and \$8,350,000 for fiscal year 1985 for the Food and Drug Administration for activities (including construction) related to acquired immune deficiency syndrome, which shall be available only to the extent an official budget request is transmitted to the Congress.] (Public Law 98-473, making continuing appropriations for the fiscal year 1985.)

lyzes collected samples to verify that these products are safe and properly labeled and—when necessary—takes regulatory action to obtain compliance with the law.

**Drugs.**—FDA reviews research and manufacturing data to support the safety and efficacy of drugs prior to marketing, evaluates literature and experience reports submitted by industry and the medical profession, and conducts research. FDA also inspects manufacturing firms, reviews labeling, analyzes samples, and—when necessary—takes regulatory action to enforce the legal requirements.

**Devices and radiological products.**—FDA is responsible for ensuring the safety and effectiveness of medical devices and eliminating unnecessary exposure to electronic product radiation through research, surveillance, performance standards and premarket approval of certain devices.

**National Center for Toxicological Research.**—FDA conducts research programs to study the biological effects of potentially toxic chemical substances found in man's environment.

**Program management.**—This activity supports executive and administrative functions.

**Buildings and facilities.**—This activity provides for construction and renovation of facilities.

## ADMINISTRATIVE PROVISIONS, INDIAN HEALTH [SERVICES ADMINISTRATION]

Appropriations in this Act [to the] for Indian Health [Services Administration], available for salaries and expenses, shall be available for services as authorized by 5 U.S.C. 3109 but at rates not to exceed the per diem equivalent to the rate for GS-18, and for uniforms or allowances therefor as authorized by law (5 U.S.C. 5901-5902), and for expenses of attendance at meetings which are concerned with the functions or activities for which the appropriation is made or which will contribute to improved conduct, supervision, or management of those functions or activities: *Provided*, That none of the funds appropriated under this Act to the Indian Health Service shall be available for the initial lease of permanent structures without advance provision therefor in appropriations Acts: *Provided further*, That non-Indian patients may be extended health care at all Indian Health Service facilities, if such care can be extended without impairing the ability of the Indian Health Service to fulfill its responsibility to provide health care to Indians served by such facilities and subject to such reasonable charges as the Secretary of Health and

Human Services shall prescribe, the proceeds of which shall be deposited in the fund established by sections 401 and 402 of the Indian Health Care Improvement Act: *Provided further*, That funds appropriated to the Indian Health Service in this Act, except those used for administrative and program direction purposes, shall not be subject to limitations directed at curtailing Federal travel and transportation: *Provided further*, That with the exception of service units which currently have a billing policy, the Indian Health Service shall not initiate any further action to bill Indians in order to collect from third-party payers nor to charge those Indians who may have the economic means to pay unless and until such time as Congress has agreed upon a specific policy to do so and has directed the IHS to implement such a policy: *Provided further*, That hereafter the Indian Health Service may seek subrogation of claims including but not limited to auto accident claims, including no-fault claims, personal injury, disease, or disability claims, and workman's compensation claims except as otherwise limited by the fourth proviso of this section: *Provided further*, That hereafter, notwithstanding any other law, an Indian tribe may acquire and expend funds, other than funds appropriated to the Service, for major renovation and modernization, including planning and design for such renovation and modernization of Service facilities, including facilities operated pursuant to contract under the Indian Self-Determination and Education Assistance Act (Public Law 93-638) subject to the following conditions:

(1) the implementation of such project shall not require or obligate the Service to provide any additional staff or equipment;

(2) the project shall be subject to the approval of the Area Director of the Service area office involved;

(3) the tribe shall have full authority to administer the project, but shall do so in accordance with applicable rules and regulations of the Secretary governing construction or renovation of Service health facilities; and

(4) no project of renovation or modernization shall be authorized herein if it would require the diversion of Service funds from meeting the needs of projects having a higher priority on the current health facilities priority system. (*Department of the Interior and Related Agencies Appropriation Act, 1985, as included in Public Law 98-473.*)

Title VII, part C of the Public Health Service Act established a revolving fund from which health professions schools could borrow in order to provide loans to their students. Public Law 89-751, the Allied Health Professions Personnel Training Act of 1966, amended the Public Health Service Act to authorize the Federal Government to pay the difference between the interest paid by students to the schools and the interest payable by the schools to the Government National Mortgage Association (GNMA) and the Treasury.

The participation certificates outstanding, held by this fund, were \$9,729,000 at the end of 1984 and are estimated to remain at that level in 1985 and 1986.

<sup>1</sup> Delayed posting of 1983 transactions.

Title VI and subsequently title XVI of the Public Health Service Act established a loan and loan guaran-

tee fund for medical facilities with a maximum amount allowable for the Government's liability. Direct loans were made available for public facilities and guaranteed loans for private, nonprofit facilities.

Funds under this authority were established in the amount of \$50 million for use in fulfilling guarantees in event of default, \$30 million as a revolving fund for direct loans and an amount for interest subsidy payments on guaranteed loans. Default and interest subsidy funds are replenished as necessary through the annual appropriation process.

To cover \$30.8 million interest subsidy obligations in 1986, new budget authority of \$25 million is requested in 1986 to supplement \$5.8 million derived from prior year unobligated funds and repayments within this fund. About \$1.0 billion in direct and guaranteed loans will be outstanding in 1986.

**HEALTH CARE FINANCING ADMINISTRATION****Federal Funds****General and special funds:****GRANTS TO STATES FOR MEDICAID**

[For carrying out, except as otherwise provided, title XIX of the Social Security Act, \$16,293,491,000, to remain available until expended.] For making payments to States (other than Puerto Rico, Guam, the Virgin Islands, the Northern Mariana Islands, and American Samoa) in fiscal year 1986 for medical assistance under paragraphs (1) and (5) of section 1903(a) of the Social Security Act, \$16,150,121,000, to remain available until expended: Provided, That no such State shall be entitled to payment under those paragraphs for medical assistance costs incurred in fiscal year 1986 in excess of 118.9 per centum of the total amount the State expended for medical assistance under its State plan during the most recent full fiscal year for which substantially complete actual expenditure reports have been received by the Secretary as of January 20, 1985 and have been approved by the Secretary as of the start of fiscal year 1986.

For making payments to States (other than Puerto Rico, Guam, the Virgin Islands, the Northern Mariana Islands, and American Samoa) in cases of hardship, as determined under regulations of the Secretary, \$300,000,000, which is the maximum amount the Secretary may obligate for these purposes.

For making payments to States (other than Puerto Rico, Guam, the Virgin Islands, the Northern Mariana Islands, and American Samoa) for administrative and training expenses for fiscal year 1986, in lieu of payments under paragraphs (2), (3), (5), (6), and (7) of section 1903(a) of the Social Security Act \$1,191,148,000, to remain available until expended: Provided, That this amount shall be the maximum amount to which such States shall be entitled for such expenses incurred during fiscal year 1986, and shall be allocated among States in proportion to each State's actual administrative and training expenses incurred during the most recent full fiscal year for which substantially complete actual expenditure reports have been received by the Secretary as of January 20, 1985 and have been approved by the Secretary as of the start of fiscal year 1986: Provided further, That each State may use not more than 10 per centum of its allocation under this paragraph for State administrative and training expenses associated with other Federally-funded, State-administered public assistance programs.

For making payments to States (other than Puerto Rico, Guam, the Virgin Islands, the Northern Mariana Islands, and American Samoa) for medical assistance for the first quarter of fiscal year 1987 under paragraphs (1) and (5) of section 1903(a) of the Social Security Act, \$6,157,000,000, to remain available until expended: Provided, That the maximum amount available for medical assistance expenditures to a State for the first quarter of fiscal year 1987 shall not exceed the State's first quarter grant award of fiscal year 1986, increased or decreased by a percentage estimated by the Secretary to be equal to the projected percentage increase or decrease (as the case may be) in the index of the medical care expenditure category of the Consumer Price Index for all urban consumers (U.S. City average) for the 12 month period ending September 30, 1987.

For making payments to States (other than Puerto Rico, Guam, the Virgin Islands, the Northern Mariana Islands, and American Samoa)

for administrative and training expenses for the first quarter of fiscal year 1987, in lieu of payments under paragraphs (2), (3), (5), (6), and (7) of section 1903(a) of the Social Security Act, \$320,000,000, to remain available until expended: Provided, That this amount shall be allocated among States in proportion to each State's administrative and training expenses incurred during the most recent full fiscal year for which substantially complete actual expenditure reports have been received by the Secretary as of January 20, 1985 and have been approved by the Secretary as of the start of fiscal year 1986: Provided further, That each State may use not more than 10 per centum of its allocation under this paragraph for State administrative and training expenses associated with other Federally-funded, State-administered public assistance programs.

For making payments to Puerto Rico, Guam, the Virgin Islands, the Northern Mariana Islands, and American Samoa for fiscal year 1986 for carrying out title XIX of the Social Security Act, \$69,200,000, to remain available until expended.

For making payments to Puerto Rico, Guam, the Virgin Islands, the Northern Mariana Islands, and American Samoa, under title XIX of the Social Security Act for the first quarter of fiscal year 1987, \$23,000,000, to remain available until expended.

[For making, after May 31, 1985 payments to States under title XIX of the Social Security Act, for the last quarter of fiscal year 1985 for unanticipated costs, incurred for the current fiscal year, such sums as may be necessary, the obligations and the expenditures to be charged to the subsequent appropriations for the current or succeeding fiscal year.]

Payment under title XIX may be made for any quarter beginning after June 30, [1984] 1985, and before October 1, [1985] 1986, with respect to any State plan or plan amendment in effect during any such quarter, if submitted in, or prior to such quarter and approved in that or any such subsequent quarter.

[For making payments to States under title XIX of the Social Security Act for the first quarter of fiscal year 1986, \$5,980,000,000, to remain available until expended.] (Department of Health and Human Services Appropriation Act, 1985; legislative action required.)

A number of legislative proposals affect the Federal Hospital Insurance Trust Fund outlays. The major proposals would:

Establish copayments for home health visits;

Entitle individuals to Medicare coverage in the first full month they are 65;

Provide beneficiaries the option of choosing Medicare vouchers to purchase health insurance in the private market;

Make Medicare the secondary payor to private health insurance if working Medicare beneficiaries above age 69 so elect;

Reform Medicare financing of indirect medical education to eliminate the inappropriate doubling of the traditional, analytically based adjustment factor; and

Hold reimbursement limits for hospitals exempt from the prospective payment system at 1985 levels through 1986.

FEDERAL SUPPLEMENTARY MEDICAL INSURANCE TRUST FUND—  
Continued

There are a number of legislative proposals that affect the Federal Supplementary Medical Insurance (SMI) Trust Fund. These proposals would:

Extend the current freeze on physician reimbursements for one year;

Index the SMI deductible to the Medicare economic index beginning January 1, 1987;

Entitle individuals to Medicare coverage in the first full month they are 65;

Make Medicare the secondary payer to private health insurance if working Medicare beneficiaries above age 69 so elect;

Freeze the clinical laboratory fee schedule for one year effective July 1, 1985;

Modestly increase the SMI premium effective January 1, 1986; and

Provide beneficiaries the option of choosing Medicare vouchers to purchase health insurance in the private market.

## ASSISTANCE PAYMENTS PROGRAM

For carrying out, except as otherwise provided, titles I, IV-A and -D, X, XI, XIV, and XVI, of the Social Security Act and the Act of July 5, 1960 (24 U.S.C., ch. 9), **[\$6,170,000,000]** **\$5,750,162,000** (in addition to the **\$2,095,000,000** already appropriated for the first quarter of this fiscal year), to remain available until expended.

For making payments to States (other than Puerto Rico, Guam, and the Virgin Islands) for administrative and training expenses, in lieu of payments under section 403(a)(3) of the Social Security Act for fiscal year 1986, **\$928,416,000**, to remain available until expended: Provided, That this amount shall be the maximum amount to which such States shall be entitled for such expenses incurred during fiscal year 1986, and shall be allocated among States in proportion to each State's actual administrative and training expenses incurred during the most recent full fiscal year for which substantially complete actual expenditure reports have been received by the Secretary as of January 20, 1985 and have been approved by the Secretary as of the start of fiscal year 1986: Provided further, that each State may use not more than 10 per centum of its allocation under this paragraph for State administrative and training expenses associated with other federally-funded, State-administered public assistance programs.

For making, after May 31 of the current fiscal year, payments to States under titles I, IV-A and -D, X, XIV, and XVI of the Social Security Act for the last three months of the current fiscal year for unanticipated costs, incurred for the current fiscal year, [such sums as may be necessary] not to exceed **\$1,200,000,000**, the obligations and expenditures to be charged to the subsequent appropriations for the current or succeeding fiscal year.

For making payments to States under titles I, IV-A and -D, X, XIV, and XVI of the Social Security Act for the first quarter of fiscal year [1986] 1987, except as otherwise provided, **[\$2,095,000,000]** **\$1,951,646,000**, to remain available until expended.

For making payments to States (other than Puerto Rico, Guam, and the Virgin Islands) for administrative and training expenses, in lieu of payments under section 403(a)(3) of the Social Security Act for first quarter of fiscal year 1987, **\$242,108,000**, to remain available until expended: Provided, That this amount shall be the maximum amount to which such States shall be entitled for such expenses incurred during the first quarter of fiscal year 1987, and shall be allocated among States in proportion to each State's actual administrative and training expenses incurred during the most recent full fiscal year for which substantially complete actual expenditure reports have been received by the Secretary as of January 20, 1985 and have been approved by the Secretary as of the start of fiscal year 1986: Provided further, that each State may use not more than 10 per centum of its allocation under this paragraph for State administrative and training expenses associated with other federally-funded, State-administered public assistance programs: Provided, That States shall require all employable applicants and recipients for aid to families with dependent children to engage in the activities specified in section 402(a)(35) of the Social Security Act, and shall require all employable recipients to engage in employment activities such as those described in section 409 of the Act or section 20 of the Food Stamp Act, as a condition of receiving assistance, and that Federal matching funds under section 403(a)(3) for administrative and training costs, which the Secretary determines are directly associated with these required activities, shall be available, notwithstanding any other restrictions under this heading: Provided further That in calculating a family's eligibility and benefits, States shall exclude the needs of an employable caretaker relative with no dependent child under age sixteen: Provided further That a minor who has never been married, and the dependent child

for whom the minor is responsible, shall be eligible for aid under Title IV-A of the Social Security Act only if the minor is living in his parent's (or guardian's) place of residence, unless the State determines that a compelling basis (established in accordance with criteria of the Secretary), other than establishing eligibility for, or increasing the amount of, aid payable under that title, exists for the minor's living elsewhere, and in such a case, payment may be made to a concerned person on behalf of the minor and dependent child: Provided further, That no State shall be entitled, for fiscal year 1986, to reimbursement, from amounts appropriated under this or any other Act, in excess of the amount resulting from applying the rate prescribed by section 403(a)(3)(C) of that Act and the above provisions with respect to expenditures under section 402(a)(19) or 445(f) of that Act. (Department of Health and Human Services Appropriations Act, 1985; legislative action required.)

This appropriation makes grants to States for the Federal share of State expenditures for aid to families with dependent children (AFDC) and related activities.

**Maintenance assistance.**—Aid to families with dependent children and related programs provide funds for needy persons. Selected program statistics are shown below.

**Research and evaluation.**—Projects are supported to develop knowledge needed to evaluate and implement major policy and program changes in the assistance payments program.

**Administrative expenses.**—The administrative costs budgeted for the assistance payments program provide for Federal direction of the various grant programs that provide maintenance assistance to the needy.

The budget estimates for 1986 include savings from legislation that will be proposed to create new opportunities for work and work experience, reform Federal funding of State and local administrative and training costs, and improve targeting of AFDC benefits.

Included in the 1986 funding level for State and local administrative and training costs is \$145,000 thousand budgeted for costs associated with proposed new work and work experience-related activities.

The Child Support Enforcement program assists States in assuring that absent parents meet their responsibility in providing support for their children. This goal is accomplished through locating absent parents, proving paternity, establishing child support obligations and enforcing their collection.

Child support payments made by absent parents on behalf of recipients of Aid to Families with Dependent Children (AFDC) go to the State or local child support enforcement agency for distribution. The Federal share of the child support collections is deducted from Federal payments to States for AFDC. These collections appear as an offset in the Assistance Payments appropriation.

This program makes grants to States and Indian tribes to aid low-income households with high energy costs through payments to eligible households, energy suppliers, and building operators. Legislation will be proposed for 1986 that will fund low-income home energy assistance in part from settlements of petroleum price overcharge lawsuits brought under the Emergency Petroleum Act of 1973.

**Direct program.**—The old-age and survivors insurance (OASI) program provides income to retired workers, their dependents, and survivors. The program is financed by payroll taxes paid by employers, employees, and self-employed individuals.

The contribution rates are applied to taxable earnings up to a specified maximum. The maximum was \$35,700 in 1983, \$37,800 in 1984, \$39,600 in 1985 and is expected to increase to \$41,400 in 1986.

**Benefit payments.**—Benefits are based on average taxable earnings, indexed for inflation.

**Administration.**—This activity reflects the costs of administering this program.

**Payment to railroad retirement account.**—Since 1951, almost \$22 billion in annual payments from the OASI trust fund have helped finance the rail industry pension fund. The annual OASI payment includes funds for

some benefits which are not, in turn, paid to railroad workers and their families.

**Reimbursable program.**—Advances are made from the OASI trust fund for the administrative expenses of the general fund programs and certain other services administered by SSA with full reimbursement to the trust fund (including interest when appropriate).

The disability insurance (DI) program protects individuals and families by providing income to insured disabled workers (and their dependents). This program is financed by payroll taxes paid by workers, employers, and self-employed individuals.

**Benefit payments.**—Disability insurance benefits are made to certain disabled individuals and their dependents:

Automatic cost-of-living benefit increases are the same as for the OASI program.

**Administration.**—This activity reflects administrative and other nonbenefit expenses attributable to the DI program.

**Payment to railroad retirement account.**—Annual adjustments are made between the DI trust fund and the railroad retirement fund. This adjustment is computed on the same basis as the payment from the OASI trust fund which is described in the preceding section.

For monthly payments to States for carrying out the Social Services Block Grant Act, \$2,700,000,000. (Department of Health and Human Services Appropriation Act, 1985.)

【SEC. 401. (a)(1) Notwithstanding any provision of title XX of the Social Security Act, the amount applicable under section 2003(c)(3) of such Act shall be \$2,725,000,000 for fiscal year 1985. Of such amount,

\$25,000,000 shall be allotted and used in accordance with this section.】

【(2) In addition to any other amounts appropriated under this resolution or any Act, there are hereby appropriated \$25,000,000 for fiscal year 1985, for carrying out title XX of the Social Security Act, to be used in accordance with the provisions of this section.】

【(3) Amounts appropriated under this section shall remain available until September 30, 1985, without regard to section 102 of this resolution.】

【(4) Except as otherwise provided in this section, each State's allotment of the additional amounts authorized and appropriated under this section shall be the same proportion of \$25,000,000 as such State's proportional allotment of other title XX funds for fiscal year 1985, as determined under section 2003 of the Social Security Act.】

【(b) The additional \$25,000,000 made available to the States for fiscal year 1985 pursuant to subsection (a) shall—

(1) be used only for the purpose of providing training and retraining (including training in the prevention of child abuse in child care settings) to providers of licensed or registered child care services, operators and staff (including those receiving in-service training) of facilities where licensed or registered child care services are provided, State licensing and enforcement officials, and parents;

(2) be expended only to supplement the level of any funds that would, in the absence of the additional funds appropriated under this section, be available from other sources (including any amounts available under title XX of the Social Security Act without regard to this section) for the purpose specified in paragraph (1), and shall in no case supplant such funds from other sources or reduce the level thereof; and

(3) be separately accounted for in the reports and audits provided for in section 2006 of the Social Security Act.】

【(c)(1) In order to provide guidance and assistance to the States in utilizing funds allocated pursuant to title XX of the Social Security Act, not later than 3 months after the date of enactment of this section, the Secretary shall draft and distribute to the States for their consideration, a Model Child Care Standards Act containing—

(A) minimum licensing or registration standards for day care centers, group homes, and family day care homes regarding matters including—

(i) the training, development, supervision, and evaluation of staff;

(ii) staff qualification requirements, by job classification;

(iii) staff-child ratios;

(iv) probation periods for new staff;

(v) employment history checks for staff; and

(vi) parent visitation; and】

【(2)(A) Any State receiving an allotment under such title from the funds made available as a result of subsection (a) shall have in effect, not later than September 30, 1985—

(i) procedures, established by State law or regulation, to provide for employment history and background checks; and

(ii) provisions of State law, enacted in accordance with the provisions of Public Law 92-544 (86 Stat. 115) requiring nationwide criminal record checks.

for all operators, staff or employees, or prospective operators, staff or employees of child care facilities (including any facility or program having primary custody of children for 20 hours or more per week), juvenile detention, correction or treatment facilities, with the objective of protecting the children involved and promoting such children's safety and welfare while receiving service through such facilities or programs.】

【(B) In the case of any State not meeting the requirements of subparagraph (A) by September 30, 1985, such State's allotment for fiscal year 1986 or 1987 shall be reduced in the aggregate by an amount equal to one-half of the amount by which such State's allotment under such title was increased for fiscal year 1985 as a result of subsection (a).】

【(d) The determination and promulgation required by section 2003(b) of the Social Security Act with respect to the fiscal year 1985 (to take into account the preceding provisions of this section) shall be made as soon as possible after the date of the enactment of this Act.】 (Public Law 98-473, making continuing appropriations for the fiscal year 1985.)

The work incentive (WIN) program was designed to encourage and assist individuals receiving support from the aid to families with dependent children (AFDC) program to achieve self-support through a program of employment, training, and support services. Training was administered by the Department of Labor; supportive services by the Department of Health and Human Services. State expenditures have been federally matched at the rate of 90%. Repeated studies, however, have shown that the WIN program is not cost effective. Therefore, the President's 1986 budget does not propose separate funding for WIN. Instead, under the President's 1986 budget proposals, AFDC applicants and recipients will be required to participate in job search and other employment-related activity as a condition of AFDC eligibility. These new activities will be administered by the Department of Health and Human Services' Office of Family Assistance and separately funded at a matching rate of 50 percent. In addition, States can use Social Services Block Grant resources and Job Training Partnership Act resources for other work-related activity for AFDC recipients.

**Grants to States.**—Includes registration, appraisal and employability planning, job search, training, child care services, adjudication of the work test, and WIN demonstrations. In 1986 the WIN program will be phased out with unexpended carryover funds.

**Program direction and evaluation.**—This activity provides for the administration and evaluation of the WIN program and WIN demonstrations. Resources for administration will be divided between the Departments of Labor and Health and Human Services in 1985.

## GENERAL PROVISIONS

SEC. 201. [None of the funds appropriated by this title for grants-in-aid of State agencies to cover, in whole or in part, the cost of operation of said agencies, including the salaries and expenses of officers and employees of said agencies, shall be withheld from the said agencies of any State which have established by legislative enactment and have in operation a merit system and classification and compensation plan covering the selection, tenure in office, and compensation of their employees, because of any disapproval of their personnel or the manner of their selection by the agencies of the said States, or the rates of pay of said officers or employees.] No funds appropriated by this Act may be used by the Department of Health and Human Services to pay an indirect cost rate in excess of the grantee's fiscal year 1985 rate which was in effect on December 31, 1984: Provided, That this section applies only to those grantees which had fiscal year 1985 indirect cost rates in effect on December 31, 1984.

[SEC. 202. None of the funds provided herein shall be used to pay any recipient of a grant for the conduct of research an amount equal to as much as the entire cost of such research.]

SEC. [203] 202. Appropriations in this Act for the Health Resources and Services Administration, the National Institutes of Health, the Centers for Disease Control, the Alcohol, Drug Abuse, and Mental Health Administration, the Office of the Assistant Secretary for Health, the Health Care Financing Administration, and Departmental Management shall be available for expenses for active commissioned officers in the Public Health Service Corps and for not to exceed two thousand [five] four hundred commissioned officers in

the Regular Corps; expenses incident to the dissemination of health information in foreign countries through exhibits and other appropriate means; advances of funds for compensation, travel, and subsistence expenses (or per diem in lieu thereof) for persons coming from abroad to participate in health or scientific activities of the Department pursuant to law; expenses of primary and secondary schooling of dependents in foreign countries, of Public Health Service commissioned officers stationed in foreign countries, at costs for any given area not in excess of those of the Department of Defense for the same area, when it is determined by the Secretary that the schools available in the locality are unable to provide adequately for the education of such dependents, and for the transportation of such dependents, between such schools and their places of residence when the schools are not accessible to such dependents by regular means of transportation; expenses for medical care for civilian and commissioned employees of the Public Health Service and their dependents, assigned abroad on a permanent basis in accordance with such regulations as the Secretary may provide; rental or lease of living quarters (for periods not exceeding five years), and provision of heat, fuel, and light and maintenance, improvement, and repair of such quarters, and advance payments therefor, for civilian officers, and employees of the Public Health Service who are United States citizens and who have a permanent station in a foreign country; purchase, erection, and maintenance of temporary or portable structures; and for the payment of compensation to consultants or individual scientists appointed for limited periods of time pursuant to section 207(f) or section 207(g) of the Public Health Service Act, at rates established by the Assistant Secretary for Health, or the Secretary where such action is required by statute, not to exceed the per diem rate equivalent to the rate for GS-18; for carrying out section 472 of the Public Health Service Act; not to exceed \$9,500 for official reception and representation expenses related to any health agency of the Department when specifically approved by the Assistant Secretary for Health.

SEC. [204] 203. None of the funds contained in this Act shall be used to perform abortions except where the life of the mother would be endangered if the fetus were carried to term.

SEC. [205] 204. Funds advanced to the National Institutes of Health Management Fund from appropriations in this Act shall be available for the expenses of sharing medical care facilities and resources pursuant to section 327A of the Public Health Service Act.

SEC. [206] 205. Funds appropriated in this title for the Social Security Administration and the Office of Child Support Enforcement shall be available for not to exceed \$5,000 for official reception and representation expenses related to income maintenance or child support enforcement activities of the Department when specifically approved by the Commissioner of Social Security.

SEC. [207] 206. Funds appropriated in this title for the Health Care Financing Administration shall be available for not to exceed \$2,000 for official reception and representation expenses when specifically approved by the Administrator of the Health Care Financing Administration.

SEC. [208] 207. No funds appropriated for the fiscal year ending September 30, [1985] 1986, by this or any other Act, may be used to pay basic pay, special pays, basic allowance for subsistence and basic allowances for quarters of the commissioned corps of the Public Health Service described in section 204 of title 42, United States Code, at a level that exceeds 110 percent of the Executive Level I annual

rate of basic pay: *Provided*, That amounts received from employees of the Department in payment for room and board may be credited to the appropriation accounts "Health Resources and Services", "National Institutes of Health "Office of the Director", "Disease Control", and "Federal Subsidy for Saint Elizabeths Hospital". *Funds appropriated by this Act or any other Act shall not be used for special, revised special, or continuation pay to any physician or dentist appointed to the Public Health Service Commissioned Corps during the current year whose primary duties are determined by the Secretary to be administrative or managerial: Provided*, That any physician or dentist who, through promotion or reassignment within the Corps, assumes as primary duties administrative or managerial responsibilities may, at the discretion of the Secretary, receive such special, revised special or continuation pay.

SEC. [209] 208. None of the funds appropriated in this title shall be used to transfer the general administration of programs authorized under the Native American Programs Act from the Department of Health and Human Services to the Department of the Interior.

SEC. 209. *Funds provided in this Act may be used for one-year contracts which are to be performed in two fiscal years, so long as the total amount for such contracts is obligated in the year for which the funds are appropriated.*

SEC. 210. *Funds appropriated in this title are available for added compensation authorized by section 208(e) of the Public Health Service Act or by 37 U.S.C. 301(a)(5) only for individuals receiving such added compensation on the day before the date of enactment of this Act.*

SEC. 211. *Funds appropriated by this Act may be used to pay bonuses, as authorized under 5 U.S.C. 5948, only to those persons who are licensed to practice medicine, except that this provision shall not apply to individuals receiving such bonuses prior to January 1, 1986.*

SEC. 212. *Not to exceed one-half of one percent of appropriations made available for this fiscal year for the activities of the National Institutes of Health funded in this Act may be transferred to any other appropriation for the National Institutes of Health, but no such appropriation, except as otherwise provided, shall be increased or decreased by more than one per centum by any such transfers and Congress shall be notified promptly of any such transfer: Provided*, That research grants or contracts funded by any appropriation made to any National Institute of Health or the Alcohol, Drug Abuse, and Mental Health Administration, shall be awarded only after consideration by the advisory body of the full cost of such a research grant or contract.

SEC. 213. *The Secretary is authorized to make cash awards to commissioned officers of the Public Health Service for specific suggestions, inventions, or achievements which are of benefit to the Government.*

SEC. 214. *Notwithstanding 31 U.S.C. 1348, and for the purpose of insuring proper management of federally supported computer systems and data bases, funds appropriated by this Act are available for the purchase of dedicated telephone service between the private residences of employees assigned to computer centers funded under this Act, and the computer centers to which such employees are assigned.*

SEC. 215. *Notwithstanding the provisions of the Small Business Innovation Development Act, Public Law 97-219, the rate utilized in fiscal year 1986 for carrying out the Small Business Innovation Research Program shall not exceed the rate authorized for fiscal year 1985 for carrying out this program. (Department of Health and Human Services Appropriation Act, 1985.)*

## DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

This chapter presents the budget and program estimates for the Department of Housing and Urban Development. Most of the Department's programs are also discussed in Part 5 of the budget (the Federal program by function) under one of three headings: Commerce and housing credit (mortgage credit and deposit insurance); Community and regional development; and Income security (public assistance and other income supplements).

The major divisions of this chapter conform to the following Department activities:

*Housing programs* cover the Department's major housing subsidy programs except for those activities under the public housing and Indian housing programs. The mortgage insurance activities of the Federal Housing Administration, including loan management and property disposition activities, are also included under this heading. Other activities included under this heading are community disposal operations, the Office of Interstate Land Sales Registration, manufactured home inspection and monitoring, rental rehabilitation grants, and the rental development grant program.

*Public and Indian Housing programs* cover public housing management and development activities (including modernization) and provision of Indian Housing assistance. Also included are credit and financing activities related to development and modernization.

*Government National Mortgage Association (GNMA)* covers the Department's programs to assist in the availability of mortgage credit and stabilize financing of selected types of mortgage loans. This heading also covers GNMA management and liquidating functions, the guarantee of mortgage-backed securities, and trustee activities in connection with participation certificates that are backed by loan obligations of various trustor agencies.

*Community planning and development* covers the Community development grant and Urban development action grant programs authorized by the Housing and Community Development Act of 1974, as amended. This organization is also responsible for the administration of the rental rehabilitation grant and the Urban home-steading programs as well as the Rehabilitation loan (section 312) program, terminated categorical community development programs, and the revolving fund for liquidating programs which includes the liquidation of the new communities fund.

*Policy development and research* includes the policy development, economic analysis, program evaluation, and research activities of the Department.

The subsidized housing programs schedule reflects both budget authority to enter into contracts for subsidized housing and a permanent indefinite appropriation for payments required to liquidate contracts under the separate programs as described below:

Total reservations in 1986 are estimated at \$1,391.9 million reflecting the first year of a proposed 2-year moratorium on incremental subsidized housing commitments. The \$1,391.9 million will be used to fund 14,500 section 8 project based units required to provide assistance to projects already in the subsidized inventory and to protect the status of current tenants.

New budget authority of \$499.0 million combined with anticipated carryover of \$892.9 million of unobligated balances from 1985 is sufficient to meet 1986 reservation requirements.

Indefinite appropriations will be available in 1986 and subsequent years to liquidate contractual obligations under the various subsidized housing programs as follows:

*Lower income housing (section 8).*—As part of the President's spending freeze, the budget proposes to implement a 2-year moratorium on the reservation of additional, or incremental, section 8 certificates and

vouchers. All activity in 1986 will be directed toward maintaining the viability of the current subsidized inventory by providing 14,500 project based units as well as to meet necessary amendment requirements.

Beginning in 1988, the administration plans to recommence providing incremental units to the section 8 inventory at the rate of 97,500 units per year including 10,000 section 8/202 units for the elderly or handicapped.

The 2-year moratorium in 1986 and 1987 is part of the overall effort to control discretionary federal spending in order to reduce the deficit.

**Public and Indian Housing.**—No new public housing or Indian housing units are proposed for commitment in 1986 or 1987. The administration proposes to recommence providing 2,500 Indian housing units beginning in 1988. Such additional new construction is proposed in 1988 because section 8 existing certificates and vouchers may not be suitable in Indian housing locations. No new Public Housing units are proposed in 1988 and subsequent years since the section 8 voucher program is expected to provide more cost efficient assistance.

The 1986 Budget includes \$276.5 million of budget authority including \$82.3 million for public and Indian housing amendments, \$19.2 million for section 23 lease adjustments and \$175.0 million for public and Indian housing modernization activities.

The 1986 Budget also includes a major reform of the method of financing public and Indian Housing construction and modernization activities. Traditionally, such activities have been financed by long term Federal commitments to make principal and interest payments in the private credit markets. Beginning in 1986, the administration plans to provide direct Federal financing in the form of fully funded grants to Public Housing Agencies and Indian Housing Authorities. For more information on this change, refer to the description below of the impact of the proposed legislation.

**Rental rehabilitation and development grants.**—The Housing and Urban-Rural Recovery Act of 1983 authorized programs of assistance grants to States and localities to stimulate the rehabilitation of older multifamily units and the development of new construction units.

Housing vouchers and section 8 existing units have been made available to support the Rental Rehabilitation Grant Program in 1984. Vouchers will also be provided to support the program in 1985.

No new commitments for Housing Development Grants are proposed after 1985. Rental Rehabilitation Grants will be resumed beginning in 1988.

**Rent Supplemental.**—The program of conversion of units from Rent Supplement to section 8 is expected to be completed in 1985. No new commitments for conversions or rescissions of recaptured authority are projected for 1986 and thereafter. Rent supplement assistance payments will continue to be made on behalf of qualified low-income tenants in approximately 14,000 units which are not expected to convert to section 8.

**Section 235.**—The Housing and Urban-Rural Recovery Act of 1983 (Public Law 98-181) authorized a restructured section 235 program based on a 10-year interest

reduction subsidy. A total of \$150 million of budget authority was provided in the Second Supplemental Appropriations Act of 1984 (Public Law 98-396) to fund the program and it is estimated that this amount will be reserved in 1985 in support of 5,400 units.

**Section 236.**—The Housing and Urban Development Act of 1968, as amended, authorizes the section 236 Rental Housing Assistance Program which subsidizes the monthly mortgage payment that an owner of a rental or cooperative project is required to make. This interest subsidy reduces rents for lower income tenants.

**College housing grants.**—No new applications for grants have been approved since the program was terminated in 1973. Payments are made pursuant to the existing contracts.

The budget does not propose a 1986 appropriation for the Rental Rehabilitation Grants Program. A 2-year funding moratorium will be implemented at the end of 1985. Under this grant program, authorized by section 17 of the U.S. Housing Act of 1937, assistance has been provided to States and cities to enable the rehabilitation of rental properties in conjunction with the section 8 voucher program.

This schedule reflects the impact on the Annual Contributions for Assisted Housing Program of the proposed change in the method of financing Public and Indian Housing construction and modernization activities. These changes would end reliance upon the private credit markets for financing and substitute direct financing by HUD. Associated with this reform proposal is the deobligation and rescission of unliquidated obligated balances of contract authority and budget authority heretofore used to support private market credit instruments for projects which have not been permanently financed.

The schedule also reflects savings associated with:

Proposed improvements to subsidized tenant income verification procedures. The proposal would authorize and require Federal, State and local government agencies to release social security or employer identification numbers to HUD or other administering agencies in order to verify tenant income using post-audit computer matching.

A proposed freeze on section 8 existing and voucher program fair market rents in 1986. This action would allow 1985 fair market rents to remain in effect in 1986.

Additional authorizing language will be proposed to implement these changes.

Troubled projects operating subsidies are provided to financially troubled subsidized projects assisted under certain FHA insuring authorities. The subsidies are intended to prevent potential losses to the FHA fund resulting from project insolvency and to preserve these projects as a viable source of housing for low- and moderate-income tenants.

Funding is provided for essential repairs to correct deficiencies resulting from deferred maintenance. No appropriation is requested for 1986. However, an estimated carryover balance of \$8 million, together with an estimated \$55 million from the Rental housing assistance fund, will be available in 1986 and \$54 million is estimated to be used to provide financial assistance to approximately 163 projects.

This demonstration program is testing whether contracting directly with local public housing agencies and section 202 housing for the elderly or handicapped sponsors to supply congregate services is more effective than alternative Health and Human Services (HHS) and other social services programs. Congregate services can include meal services and essential supportive services. These three- to five-year contracts commenced in 1980 and will be evaluated over the life of the contracts. No additional resources are requested for 1986 since current funds are sufficient to evaluate the relative efficiency of this HUD program.

Section 620 of the National Manufactured Housing Construction and Safety Standards Act of 1974, as amended, authorizes enforcement of appropriate construction standards for the construction, design and performance of manufactured homes to assure their quality, durability and safety. All manufactured homes produced since the standards took effect on June 15, 1976 must comply with Federal construction and safety standards. The States are actively encouraged to participate in the program under compliance plans approved by HUD.

A fee is charged to the manufacturers for each manufactured home produced to cover the costs of the monitoring and enforcement activities by HUD contract agents. These fees are deposited in a special fund administered by the Department. Fee receipts are transferred to the Salaries and expenses account to defray the direct administrative expenses of the program.

The Interstate Land Sales Full Disclosure Act provides protection to the public with respect to purchases or leases of subdivision lots. Statements of record must be filed with the Secretary before subdivisions with 100 or more lots may be sold in interstate commerce, except when the subdivision is eligible for exemption.

The Secretary is authorized to charge a fee, to be paid by the developer when filing a statement of record. The fee receipts are permanently appropriated and have helped finance a portion of the direct administrative expenses incurred in program operations. The schedule of fees will be changed to provide additional receipts to offset fully program costs.

**Public enterprise funds:****TITLE III—CORPORATIONS**

Corporations and agencies of the Department of Housing and Urban Development and the Federal Home Loan Bank Board which are subject to the Government Corporation Control Act, as amended, are hereby authorized to make such expenditures, within the limits of funds and borrowing authority available to each such corporation or agency and in accord with law, and to make such contracts and commitments without regard to fiscal year limitations as provided by section 104 of the Act as may be necessary in carrying out the programs set forth in the budget for [1985] 1986 for such corporation or agency except as hereinafter provided: *Provided*, That collections of these corporations and agencies may be used for new loan or mortgage purchase commitments only to the extent expressly provided for in this Act (unless such loans are in support of other forms of assistance provided for in this or prior appropriation Acts), except that this proviso shall not apply to the mortgage insurance or guaranty operations of these corporations, or where loans or mortgage purchases are necessary to protect the financial interest of the United States Government. (*Department of Housing and Urban Development—Independent Agencies Appropriation Act, 1985.*)

**FEDERAL HOUSING ADMINISTRATION FUND**

For payment to cover losses, not otherwise provided for, sustained by the Special Risk Insurance Fund and General Insurance Fund as authorized by the National Housing Act, as amended (12 U.S.C. 1715z-3(b) and 1735c(f)), [\$387,683,000] \$239,762,000, to remain available until expended.

During [1985] 1986, within the resources available, gross obligations for direct loans are authorized in such amounts as may be necessary to carry out the purposes of the National Housing Act, as amended.

During [1985] 1986, additional commitments to guarantee loans to carry out the purposes of the National Housing Act, as amended, shall not exceed \$50,900,000,000 of loan principal.

During fiscal year [1985] 1986, gross obligations for direct loans of not to exceed [\$65,448,000] \$89,222,000, are authorized for payments under section 230(a) of the National Housing Act, as amended, from the insurance fund chargeable for benefits on the mortgage covering the property to which the payments made relate, and payments in connection with such obligations are hereby approved. (*Department of Housing and Urban Development—Independent Agencies Appropriation Act, 1985.*)

<sup>1</sup> Claims on current mortgages.

The FHA fund consists of four separate funds. Financial data for each individual fund is maintained for control and reporting purposes.

*The Mutual mortgage insurance fund* provides for the Department's basic single family mortgage insurance program. It is a mutual fund where mortgagors, upon termination of their mortgages, share surplus premiums paid into the fund that are not required for operating expenses or losses.

*The Cooperative management housing insurance fund*, also a mutual fund, provides mortgage insurance for management-type cooperatives authorized by section 213 of the National Housing Act, as amended.

*The General insurance fund* provides for a large number of specialized mortgage insurance programs, including the insurance of loans for property improvements as well as for cooperatives, condominiums, housing for the elderly, land development, group practice medical facilities and nonprofit hospitals.

*The Special risk insurance fund* provides mortgage insurance on behalf of mortgagors eligible for interest reduction payments who otherwise would not be eligible for mortgage insurance. In addition, the fund provides insurance on mortgages covering experimental housing where strict adherence to State or local building regulations is not observed. Also provided is insurance for high-risk mortgagors who normally would not be eligible for mortgage insurance.

Expenses and losses connected with defaulted notes, assigned mortgages and acquired properties are charged

to the appropriate insurance fund by the mortgage insurance program. During 1986, it is estimated that applications for single-family and multifamily mortgage insurance covering 634,500 units will be received and that mortgage insurance will be written covering 495,200 single-family and multifamily units. In addition, it is estimated that approximately 43,200 single-family and multifamily units will be acquired by the Department during 1986 and that 43,200 single-family and multifamily units will be sold. More detailed activity information follows in the "Program Highlights" table shown below.

Insurance reserves from operations reflect the interest earned on mortgage notes and the income and expenses applicable to acquired properties.

Insurance reserves from operations at the end of 1986 are estimated to be in a surplus position for the Mutual mortgage insurance and Cooperative management housing insurance funds, but in a deficit status of about \$5.9 billion for the two other funds. The status of estimated insurance reserves from operations (retained income or deficit) through 1986 is as follows:

## STATUS OF INSURANCE RESERVES FROM OPERATIONS

[In millions of dollars]

Insurance fund:	1984 actual	1985 estimate	1986 estimate
Mutual mortgage .....	3,639	3,930	4,436
Cooperative management housing .....	25	26	26
General .....	-2,673	-2,761	-2,788
Special risk .....	-2,909	-3,030	-3,133
Total FHA Fund .....	-1,918	-1,835	-1,459

As a result of the continued deficits in the FHA fund over the last several years, a number of steps have been taken to halt and ultimately reverse this net loss trend. These include faster foreclosures of properties in default and faster sales of acquired properties to reduce holding costs.

For 1985, a new Temporary mortgage assistance payments program is being implemented that is designed to prevent precipitous foreclosure by helping insured homeowners who have experienced temporary financial reverses and cannot make their full monthly mortgage payments. This new program is viewed as a viable alternative to the Home mortgage assignment program currently being carried out by the Department and will assist in the effort to minimize insurance claims against the FHA fund.

**Budget program.**—The budget proposes an appropriation of \$240 million to restore the net realized losses from the sale of property and notes covered by the General insurance and Special risk insurance funds.

**Financing.**—In 1984, \$6.3 million of debentures were issued and \$72.9 million were redeemed. There was \$260.0 million repaid to the Treasury in 1984. It is estimated that a net of \$220 million will be repaid to the Treasury in 1985 and \$245 million will be repaid in 1986. Beginning in 1986, the up-front premium will be increased from 3.8 to 5 percent of the amount insured and will be payable by the purchaser at loan settlement.

**Operating expenses.**—Funds are paid directly into a consolidated account, Salaries and expenses, Department of Housing and Urban Development, for administrative expenses based on workload related to programs

The Housing for the elderly or handicapped fund was established pursuant to section 202 of the Housing Act of 1959, as amended. The fund provides direct loans to nonprofit organizations building and managing housing projects for lower income persons who are elderly or handicapped.

Projects must include an assured range of necessary services for the occupants of such projects. In addition, the section 8 lower income housing assistance payments program is used in conjunction with the section 202 program. Applications under the two programs are processed simultaneously. As part of the Administration's spending freeze plan, the Budget proposes a 2-year moratorium on new activity. Consequently, the loan limitation of \$50 million will be available only for amendments to previously approved pipeline projects.

The program and financing schedule for this account summarizes the Federal government's administrative commitments and obligations for this program. The amounts reflected in the summary of administrative commitments portion of the schedule reflect outstanding section 202 fund reservations, whereas, the costs and obligations portion of the Program and Financing schedule reflects commitments which have reached the initial loan closing stage of processing.

**Financing.**—Prior to the implementation of the revised program, funds for loans had been provided by appropriation to a revolving fund. Additional financing had been obtained through issuance of certificates of participation in pools of mortgages financed from this program as provided by the Participation Sales Act of 1966. The following table shows the financing of participation insufficiencies:

The Nonprofit sponsor assistance fund provides interest-free loans to nonprofit organizations to plan housing projects to be financed under the Section 202 Housing for the elderly or handicapped program. To ensure a sufficient commitment by the sponsor to the proposed project, up to 80%, but not to exceed \$50,000, of the start-up costs are funded through these "seed money" loans. Sponsors are required to demonstrate their finan-

cial capacity by providing 20% from their own funds which is repaid from the initial proceeds of the section 202 construction loan. Loans made in 1986 are to assist in the planning of Section 202 projects that were approved in 1985 and prior years.

The Housing and Urban Development Act of 1968 authorized the Secretary to establish a revolving fund into which rental collections in excess of the established basic rents for units in section 236 subsidized projects would be deposited.

The Housing and Community Development Amendments of 1978 authorized the Secretary, subject to approval in appropriation acts, to transfer excess rent collections received after 1978 to the Troubled projects operating subsidy program. Prior to that time, collections were used for paying tax and utility increases in section 236 projects. The Housing and Community Development Act of 1980 amended the 1978 Act by authorizing the transfer of excess rent collections regardless of when collected.

Payments are provided to assist public housing agencies (PHAs) and Indian Housing Authorities (IHAs) to meet certain deficits in the operation of PHA-owned and IHA-owned low-income housing. These payments are in addition to the annual contributions for debt service provided by HUD.

The operating subsidy estimates for 1986 are based upon the Performance Funding System (PFS). The estimates continue to reflect increased tenant payments resulting from the impact of implementing various provisions included in the Housing and Urban Development Amendments of 1981 (Public Law 97-35). The estimates also reflect recently enacted legislation changing the definition of adjusted tenant income (Public Law 98-181), lower utility consumption estimates based on existing and anticipated energy conservation improvements and a one-year freeze of PHA and IHA personnel and related expense levels.

The Low-Rent Public Housing Loan Fund provides direct Federal loans to support Public Housing Agency (PHA) and Indian Housing Authority (IHA) construction, acquisition, and modernization activities. These loans are made from available resources of this fund and from up to a current ceiling of \$12.25 billion of borrowings from the Treasury. Payments to amortize fully the indebtedness (based upon tax-exempt interest rates) incurred by the PHAs and IHAs for these purposes are provided from the housing payments appropriations (in the Subsidized housing programs account) to liquidate contract authority under existing Annual Contributions Contracts (ACCs). In 1985, these obligations will be liquidated through permanent, indefinite appropriations.

The Administration is proposing to reform the financing of public and Indian housing development and modernization. This reform will not affect program levels, but will simplify the manner in which the programs are financed. The financing of these activities through the use of tax-exempt obligations for completed and ongoing PHA and IHA development and modernization activities will not resume. Instead, the Department's financing needs for these programs will be met through Treasury borrowings, and the Department's separate financing operations will be consolidated into Treasury's general government financing operations.

Prior to the enactment of the Deficit Reduction Act of 1984, the loan fund was used to provide direct Federal short-term loans to PHAs and IHAs as authorized by section 4 of the United States Housing Act of 1937, as amended. These loans were extended (1) during the early stages of a development or modernization project and prior to the issuance of federally guaranteed PHA and IHA short-term tax-exempt notes (the proceeds of which were used to repay the direct loans and to finance further development and modernization costs); and (2) when private market conditions precluded the PHAs and IHAs from issuing new or refinancing outstanding guaranteed short-term notes.

Although projects were financed on a long-term tax-exempt basis prior to 1974, between 1974 and 1980, no long-term financing took place and financing of projects took place through sales of PHA and IHA short-term tax-exempt obligations. In 1980, long-term financing resumed through sales of the short-term obligations to the Federal Financing Bank (FFB). Budgetary resources have been provided to make periodic payments directly to the FFB of amounts reflecting the interest differential between originally estimated short-term tax-exempt financing and the long-term FFB instruments (which have an interest rate of one-eighth of one percent higher than the Treasury borrowing rate).

Since the enactment of the Deficit Reduction Act, questions have been raised concerning the tax status of the PHA and IHA notes. As a result, since September, 1984, the Department has been using Treasury borrowings to provide direct loans to PHAs and IHAs to redeem outstanding short-term notes as they mature and finance development and modernization activities. To meet present and short-term future needs of the fund, the borrowing limitation was increased by the President, as is authorized under section 4 of the U.S. Housing Act, from \$1.5 to \$12.25 billion. A further increase to \$16 billion is anticipated in order to satisfy the balance of loan fund requirements for 1985. In the 1985 Continuing Resolution (Public Law 98-473), Congress directed Treasury to extend loans to the Department at tax-exempt interest rates and appropriated \$300 million to the Treasury to compensate for the differential between the tax-exempt rates and Treasury's taxable borrowing costs. In addition, the Continuing Resolution overrode provisions in section 4 of the Housing Act by specifying that the Department was to extend loans to PHAs and IHAs at tax-exempt (instead of taxable) interest rates to be used to meet PHA and IHA project financing needs resulting from the suspension of note sales.

The Federal commitment to provide ACC payments has effectively constituted a full Federal guarantee of the outstanding principle financed in the private markets backed by the Treasury borrowing authority provided under section 4 of the U.S. Housing Act. In the past, an exposure factor was used to estimate the likely need for direct Federal financing. Until recently, the available Treasury borrowing authority enabled HUD to guarantee \$20 billion in short-term financing. This contingent liability to provide direct Federal loans was tracked through loan approvals. The recent suspension of private financing has transformed the contingent liability into direct liability. The ceiling on loan approvals is therefore no longer relevant. Accordingly, the status of loan approval is no longer part of this presentation.

To implement the Administration's reform effort, legislation is being proposed which will involve the cancellation of (1) PHA and IHA direct loans, (2) Federal debt service obligations of ACCs for projects which have not reached permanent financing, and (3) Treasury debt incurred as a result of the direct loans extended by HUD to PHAs and IHAs to redeem notes and finance development and modernization activities committed through the end of 1985. This forgiveness of Treasury debt will occur annually, and unliquidated budget authority remaining from subsidized housing payments appropriations will be deobligated and rescinded.

Short-term or temporary financing consists of direct loans to the PHAs/IHAs during early stages of development or modernization and federally guaranteed short-term notes issued by PHAs/IHAs (loans by private lenders). The status of temporary financing follows:

In order to improve the method used to finance public and Indian housing development and modernization, the Administration is proposing several legislative changes that will have an effect upon the financial status of the loan fund. A shift to a grant approach for project financing is being proposed starting in 1986. As part of the overall financing reform, obligations for principal and interest repayments under loans outstanding to public housing agencies and Indian housing authorities will be cancelled. In addition, legislation will be proposed to forgive Treasury debt incurred by the Department as a result of (1) direct loans issued to redeem maturing notes and (2) the financing of development and modernization activities committed through the end of 1985.

## LOANS TO FEDERAL NATIONAL MORTGAGE ASSOCIATION

The fund is authorized to make up to \$2.25 billion of loans to the Federal National Mortgage Association. Such loans were made in the first few months of the Association's existence as a private corporation while it arranged lines of credit with commercial banks. No loans have been made since that time and the loan authority will be used only in emergency situations.

**Special assistance functions.**—The Association was authorized, pursuant to section 305 of the National Housing Act, to make purchase commitments and to purchase FHA-insured and VA-guaranteed mortgage loans. This legislation was repealed in November, 1983. The Association will now only honor existing commitments. Funds are currently available to provide special assistance for financing: (1) selected types of residential mortgage loans pending establishment of marketability, and (2) residential mortgage loans generally as a means of stabilizing building activities. This function is administered with the use of processing facilities of the Federal National Mortgage Association.

**Budget program.**—Congress approved appropriation language included in the 1985 budget that: (1) forgave all outstanding Treasury borrowings issued under this account effective October 1, 1984; and (2) transferred all remaining assets and liabilities of the fund to the Management and Liquidating Functions Fund.

The Association is required to manage and liquidate its initial mortgage portfolio and other mortgages, loans or obligations. Liquidation of the portfolio is accomplished through regular principal repayments according to their amortization schedules, by sales of mortgages when they can be absorbed by private investors without disruption of normal market conditions and through principal credits arising from prepayments and foreclosures.

The fund's initial portfolio consisted of mortgages on hand, or purchased under contracts made before November 1, 1954. Certain additional mortgages, loans, and other obligations may be acquired for this portfolio from the Secretary of Housing and Urban Development. Residential housing mortgages may also be acquired from any Federal instrumentality.

**Budget program.**—Congress approved appropriation language included in the 1985 Budget that: (1) forgave all outstanding Treasury borrowing issued under the Special Assistance Functions Fund and Emergency Mortgage Purchase Assistance Fund and (2) transferred all remaining assets and liabilities of these funds to the Management and Liquidating Function Fund.

Mortgage purchases, representing deliveries from commitment contracts in prior years of the Special Assistance Functions Fund and the Emergency Mortgage Purchase Assistance Fund are estimated at \$792 million

## Public enterprise funds—Continued

## MANAGEMENT AND LIQUIDATING FUNCTIONS FUND—Continued

in 1985 and \$342 million in 1986 and sales of these mortgages are estimated at \$1,601 million in 1985 and \$971 million in 1986. Commitments of \$2 million are requested in 1985 to cover increases to prior commitments outstanding.

**Financing.**—These functions are financed principally by portfolio liquidations, and, in the sales of portfolio mortgages and participation certificates in mortgage pools.

**Operating results.**—Net loss of \$393 million and \$218 million is estimated for 1985 and 1986, respectively.

The Housing and Urban Development Act of 1968 authorized the Government National Mortgage Association (GNMA) to guarantee the timely payment of principal and interest on trust certificates or other securities issued by any financial institution approved for this purpose, and based on and backed by a trust or pool of FHA-insured, FmHA-insured, or VA-guaranteed mortgages.

GNMA guarantees the timely payment of principal and interest on the guaranteed securities. Actual losses for 1984 and estimated losses for 1985 and 1986 are presented below.

(In thousands of dollars)

Mobile home pools .....	0	0	0
Single-family pools .....	83	85	85
Project pools .....	15	15	17

**Budget program.**—Program activity is summarized in the following table.

(In thousands of dollars)

	1984 actual	1985 estimate	1986 estimate
Commitments issued .....	39,665,000	53,460,000	51,110,000

Securities outstanding .....	176,484,605	206,174,605	233,939,265

**Financing.**—In addition to an application fee, guarantee fees and other charges are assessed issuers of guar-

anteed securities to cover costs incurred by GNMA in connection with the guarantees and to establish a reserve against possible future payments of claims under the guarantee. The budget reflects a proposed nine basis point increase (from six basis points to fifteen basis points) in guarantee fees for the basic MBS program to take effect in 1986. This proposed fee is closer to that charged by other private issuers of mortgage-backed securities who provide similar guarantees, and is part of a Government-wide effort to facilitate additional private sector activity in the secondary market for home mortgages. Similar fees are also being proposed for the Federal National Mortgage Association and the Federal Home Loan Mortgage Corporation.

**Operating results.**—Fee collections and other income are expected to exceed expenses by \$307 million in 1986. This amount will be retained to cover future year expenses and as a reserve against losses that may be incurred on guarantees.

The National Housing Act, as amended, authorized the Association to create trusts to facilitate the financing of mortgages and other loan obligations owned by Government agencies. Under this authority, participations in the interest and principal collections on pooled loan obligations pledged by various trustor agencies were sold to private investors.

The budget schedules of the trustor agencies originally owning the loan obligations reflected sale of participation certificates as borrowing from the public. Collections on the pooled obligations are transferred to the Association and invested until distributed to the holders of participation certificates as required by the trust agreement. Collections are then redistributed to trustor agencies for payment of interest and retirement of certificates.

Whenever interest collections on pooled obligations together with investment income are insufficient to cover required interest payments and a share of administrative and other costs, the trustor agencies pay to the Association, as trustee, amounts equal to the insufficiencies. The costs of any such insufficiencies are covered by appropriations which appear in the accounts of the trustor agencies or by balances available in those accounts.

In the event the principal collections on pooled loans are not sufficient to meet scheduled retirements of par-

ticipation certificates, the Association, as trustee, may either borrow from the Treasury or sell additional certificates to redeem those coming due. Alternatively, those trustor accounts with unobligated balances available may repurchase pooled loans to provide the cash required for scheduled redemptions.

Title V of the Energy Security Act of 1980 authorized the creation of the Solar Energy and Energy Conservation Bank to encourage energy conservation and the use of solar energy. It has provided funds to subsidize loans and grants for the installation of energy conservation and solar energy improvements in single and multi-family residences, and agricultural and commercial buildings.

In 1984, the Bank provided additional funds to the 47 States and territories participating in the program and awarded funds to six new participants. A total of \$17.9 million was obligated to the States including the remainder of the 1983 appropriation as well as a portion of the 1984 appropriation. The remainder of the 1984 appropriation was obligated in November 1985, and the 1985 appropriation is expected to be obligated before the end of the fiscal year. Recaptures of approximately \$9.9 million in 1985 and \$2.2 million in 1986 are anticipated. No appropriation is requested for 1986.

------	---	---------	---------	---------

Title I of the Housing and Community Development Act of 1974, as amended, authorizes the Secretary to make grants to units of general local government and States for the funding of local community development programs.

Funds are distributed to eligible entitlement applicants using the higher of two objective formulas. Funds must be allocated between entitlement cities and urban counties and States and small cities.

Legislation is being proposed to change the distribution of entitlement and nonentitlement funds from 70%/30% to 60%/40%. This percentage distribution will allow States to undertake more of the community development activities currently carried out by the Farmers Home Administration.

**Guaranteed loans.**—Guaranteed loan assistance under section 108 has been provided to permit eligible communities to finance acquisition of real property and rehabilitation of publicly owned real property, plus certain related expenses. No guarantee commitments are proposed for 1986 and legislation is being proposed to repeal section 108.

**Budget program.**—An appropriation of \$3,124.8 million is proposed for 1986. Outlays are estimated at \$3,900 million in 1985 and \$3,520 million in 1986.

## [URBAN DEVELOPMENT ACTION GRANTS]

[For grants to carry out urban development action grant programs authorized in section 119 of the Housing and Community Development Act of 1974, as amended (42 U.S.C. 5301), pursuant to section 103 of that Act, \$440,000,000, to remain available until September 30, 1988: *Provided*, That \$2,500,000 of such amount shall be made avail-

able for technical assistance grants under section 119(q) of such Act: *Provided further*, That notwithstanding section 119(q) such \$2,500,000 shall be made available for such grants only to cities and urban counties eligible for assistance under section 119 which have not been grantees before fiscal year 1985 for programs under section 119 of such Act: *Provided further*, That with respect to funds provided herein the provisions of section 119(i) shall be construed as not applying to such \$2,500,000.] (*Department of Housing and Urban Development—Independent Agencies Appropriation Act, 1985.*)

Section 810 of the Housing and Community Development Act of 1974, as amended, authorizes the Secretary of HUD to transfer one- to four-unit HUD-owned properties, without payment, to units of local government for use in an urban homesteading program. In addition, the Act authorizes the Administrator of Veterans Affairs and the Secretary of Agriculture to transfer their unoccupied, single family properties for use in such programs.

The Housing and Urban-Rural Recovery Act of 1983 amended section 810 to permit the transfer of HUD-owned multifamily properties to units of local government for homesteading on a demonstration basis. This Act also amended section 810 to permit a demonstration to determine the feasibility of providing assistance to State and local governments in purchasing one- to four-family properties for conveyance to lower income families. These demonstrations will be carried out in 1985 but not continued in 1986.

**Budget program.**—An appropriation of \$12 million is proposed for 1986 and will be used to support only single family property transfers.

Title I of the Housing Act of 1949, as amended (42 U.S.C. 1450 et seq.), authorized Federal capital grants and development loans to local public agencies for rehabilitation and redevelopment of slums and blighted areas.

Title I of the Housing and Community Development Act of 1974 (Public Law 93-383) terminated this program on January 1, 1975. No commitments for new grants or loans have been made since that date. Eligible activities of the terminated program may be funded, at the option of the grant recipient, under the Community development block grant program, authorized by the 1974 Act.

The assets and liabilities of the Urban Renewal program will be transferred to the Revolving Fund (Liquidating Programs) at the end of 1985, as authorized by the 1974 Act. No new budget authority is required for the program and a permanent indefinite appropriation to liquidate prior unfunded contract authority is estimated at \$22.9 million in 1985. Loan commitments pre-

viously made under this program are still outstanding and will continue until financial settlement of the projects involved is reached. The status of loan commitments outstanding at the end of each period is as follows:

------	--	--------	--------	--------

<sup>1</sup> Includes outstanding balances of the new communities fund when that program was transferred into this account.

The Revolving fund (liquidating programs) was established by the Independent Offices Appropriation Act of 1955 for the more efficient liquidation of assets acquired under a number of housing and urban development programs. The budget reflects the transfer of assets and liabilities of the Urban Renewal Program to the Revolving fund (liquidating programs) in 1986, as authorized by the 1974 Act.

**Financing.**—In the past, certificates of participation in pools of public facility loans were sold. Funds were appropriated annually to cover the difference between interest due on the participation certificates and interest collections on the loans underlying the certificates.

The budget authority required for interest insufficiencies was transferred to the Revolving fund (liquidating programs) when public facility loan assets and liabilities

ities were transferred to this account in 1975. The computation of budget authority required for public facility loans is shown in the following table:

The Housing and Urban Development Act of 1970 directs the Secretary to undertake programs of research, studies, testing, and demonstrations related to the HUD mission. These functions are carried out internally and through contracts with industry, nonprofit research organizations, and educational institutions, and through agreements with State and local governments and other Federal agencies.

In 1986, the Department will maintain its emphasis on improving the efficiency, effectiveness, and equity of HUD programs, and on identifying ways of achieving cost reductions.

The fair housing assistance program, authorized by title VIII of the Civil Rights Act of 1968, provides funding to State and local agencies and community housing resource boards to aid in eliminating housing discrimination.

The budget proposes financial assistance of \$4.0 million for 110 agencies to assure prompt and effective processing of title VIII (Civil Rights Act of 1968) complaints. The budget also proposes funding of \$1.0 million for 50 community housing resource boards which assist HUD, realtors and builders in designing, implementing, and monitoring voluntary affirmative marketing agreements and programs.

In 1986, this program will be revised as part of a comprehensive fair housing strategy which will also include the proposed "Fair Housing Initiatives Program." The reduced appropriation request for this program is dependent on the enactment of the new proposal which would include categories currently funded within this account.

## FAIR HOUSING INITIATIVES

For contracts, grants, and other assistance, not otherwise provided for, necessary for carrying out the Fair Housing Initiatives program, \$10,000,000 to remain available until September 30, 1987: Provided, That this amount shall be available only upon enactment into law of authorizing legislation: Provided further, That if such authorizing legislation is not enacted prior to January 1, 1986, not to exceed \$1,700,000 shall be available for contracts, grants, and other assistance, not otherwise provided for, of the Fair Housing Assistance program, as authorized by Title VIII of the Civil Rights Act of 1968, as amended. (Additional authorizing legislation to be proposed.)

(Proposed for later transmittal under proposed legislation.)

The budget proposes a new Fair Housing Initiatives Program for 1986. This program is designed to alleviate housing discrimination by increasing support to public and private organizations. The program would authorize the Secretary of HUD to make grants to, or to enter into contracts or cooperative agreements with 1) State of local governments or public or private nonprofit entities that carry on programs to eliminate or prevent discrimination in housing, and 2) public or private entities to develop, implement, or coordinate fair housing education and outreach programs.

New community assistance grants were authorized by the Housing and Urban Development Act of 1970, as amended.

**Budget program.**—Grants were distributed to new community developers under section 718 to supplement public facility projects in existing new communities. Public Law 96-7, dated April 9, 1979, rescinded all budget authority not administratively committed. Any amounts recovered subsequent to that date will be rescinded automatically. All remaining commitments are estimated to be disbursed by the end of 1985.

This fund is the repository of gifts and bequests which the Secretary of Housing and Urban Development is authorized to accept and use for the purposes of aiding the work of the Department. The provision of section 7(k)(1) of the Department of Housing and Urban Development Act, 42 U.S.C. 3535(k)(1), authorizes the installment of a fund amount for the above purpose.

## TITLE IV—GENERAL PROVISIONS

SEC. 401. Where appropriations in titles I and II of this Act are expendable for travel expenses and no specific limitation has been placed thereon, the expenditures for such travel expenses may not exceed the amounts set forth therefor in the budget estimates submitted for the appropriations: *Provided*, That this section shall not apply to travel performed by uncompensated officials of local boards and appeal boards of the Selective Service System; to travel performed directly in connection with care and treatment of medical beneficiaries of the Veterans Administration; to travel performed in connection with major disasters or emergencies declared or determined by the President under the provisions of the Disaster Relief Act of 1974 to site-related travel performed in connection with the Comprehensive Environmental Response, Compensation, and Liability Act of 1980; or to payments to interagency motor pools where separately set forth in the budget schedules.

SEC. 402. Appropriations and funds available for the administrative expenses of the Department of Housing and Urban Development and the Selective Service System shall be available in the current fiscal year for purchase of uniforms, or allowances therefor, as authorized by law (5 U.S.C. 5901-5902); hire of passenger motor vehicles; and services as authorized by 5 U.S.C. 3109.

SEC. 403. Funds of the Department of Housing and Urban Development subject to the Government Corporation Control Act or section 402 of the Housing Act of 1950 shall be available, without regard to the limitations on administrative expenses, for legal services on a contract or fee basis, and for utilizing and making payment for services and facilities of Federal National Mortgage Association, Government National Mortgage Association, Federal Home Loan Mortgage Corporation, Federal Financing Bank, Federal Reserve banks or any member thereof, Federal home loan banks, and any insured bank within the meaning of the Federal Deposit Insurance Corporation Act, as amended (12 U.S.C. 1811-1831).

SEC. 404. No part of any appropriation contained in this Act shall remain available for obligation beyond the current fiscal year unless expressly so provided herein.

SEC. 405. No funds appropriated by this Act may be expended—

(1) pursuant to a certification of an officer or employee of the United States unless—

(A) such certification is accompanied by, or is part of, a voucher of abstract which describes the payee or payees and the items or services for which such expenditure is being made, or

(B) the expenditure of funds pursuant to such certification, and without such a voucher or abstract, is specifically authorized by law; and

(2) unless such expenditure is subject to audit by the General Accounting Office or is specifically exempt by law from such audit.

SEC. 406. None of the funds provided in this Act to any department or agency may be expended for the transportation of any officer or employee of such department or agency between his domicile and his place of employment, with the exception of the Secretary of the Department of Housing and Urban Development, who, under title 5, United States Code, section 101, is exempted from such limitation.

SEC. 407. None of the funds provided in this Act may be used for payment, through grants or contracts, to recipients that do not share in the cost of conducting research resulting from proposals not specifically solicited by the Government: *Provided*, That the extent of cost sharing by the recipient shall reflect the mutuality of interest of the grantee or contractor and the Government in the research.

SEC. 408. None of the funds provided in this Act may be used, directly or through grants, to pay or to provide reimbursement for payment of the salary of a consultant (whether retained by the Federal Government of a grantee) at more than the daily equivalent of the maximum rate paid for GS-18, unless specifically authorized by law.

[SEC. 409. No part of any appropriation contained in this Act for personnel compensation and benefits shall be available for other object classifications set forth in the budget estimates submitted for the appropriations without the approval of the Committees on Appropriations.]

SEC. [410.] 409. None of the funds in this Act shall be used to pay the expenses of, or otherwise compensate, non-Federal parties intervening in regulatory or adjudicatory proceedings. Nothing herein affects the authority of the Consumer Product Safety Commission pursuant to section 7 of the Consumer Product Safety Act (15 U.S.C. 2056 et seq.).

SEC. [411.] 410. Except as otherwise provided under existing law or under an existing Executive order issued pursuant to an existing law, the obligation or expenditure of any appropriation under this Act for contracts for any consulting service shall be limited to contracts which are (1) a matter of public record and available for public inspection, and (2) thereafter included in a publicly available list of all contracts entered into within twenty-four months prior to the date on which the list is made available to the public and of all contracts on which performance has not been completed by such date. The list required by the preceding sentence shall be updated quarterly and shall include a narrative description of the work to be performed under each such contract.

SEC. [412.] 411. Except as otherwise provided by law, no part of any appropriation contained in this Act shall be obligated or expended by any executive agency, as referred to in the Office of Federal Procurement Policy Act (41 U.S.C. 401 et seq.) for a contract for services unless such executive agency (1) has awarded and entered into such contract in full compliance with such Act and the regulations promulgated thereunder and (2) requires any report prepared pursuant to such contract, including plans, evaluations, studies, analyses and manuals, and any report prepared by the agency which is substantially derived from or substantially includes any report prepared pursuant to such contract, to contain information concerning (A) the contract pursuant to which the report was prepared and (B) the contractor who prepared the report pursuant to such contract.

[SEC. 413. No part of any appropriation contained in this Act shall be available to implement, administer, or enforce any regulation which has been disapproved pursuant to a resolution of disapproval duly adopted in accordance with the applicable law of the United States.]

SEC. [414.] 412. Except as otherwise provided in section 406, none of the funds provided in this Act to any department or agency shall be obligated or expended to provide a personal cook, chauffeur, or other personal servants to any officer or employee of such department or agency.

SEC. [415.] 413. None of the funds provided in this Act to any department or agency shall be obligated or expended to procure passenger automobiles as defined in 15 U.S.C. 2001 with an EPA estimated miles per gallon average of less than 22 miles per gallon. (*Department of Housing and Urban Development—Independent Agencies Appropriation Act, 1985.*)

The language "without the approval of the Committees on Appropriations" contained in "Title IV, General Provisions, Section 409" in Public Law 98-371 is hereby repealed. (Second Supplemental Appropriations Act, 1984.)

## DEPARTMENT OF THE INTERIOR

### LAND AND MINERALS MANAGEMENT

#### BUREAU OF LAND MANAGEMENT

The Bureau of Land Management (BLM) is currently responsible for the conservation, management and development of 310 million acres of public lands, including 138 million acres in Alaska. Of these, 60 million acres in Alaska will ultimately be conveyed to other parties (Alaska Natives, the State of Alaska, and other agencies). The Bureau also has full responsibility for mineral leasing and supervising of minerals operations on the public lands and on some 370 million acres of Federal mineral estate underlying other ownerships. The administration's initiative to adjust jurisdictional responsibilities between BLM and the U.S. Forest Service affects several accounts in this section of the budget, and preliminary estimates of budget impacts are reflected in several accounts. However, as this initiative is more fully defined for implementation, some amendments to the budget as presented may be required.

**Energy and minerals management.**—The 1986 program provides for issuing leases for Federal minerals onshore including Alaska, and for the supervision of minerals development activities on Federal and Indian leases, including oil and gas, coal, geothermal, oil shale, tar sands, phosphates, sodium and potash. Emphasis in the 1986 budget is on inspection, enforcement and resource evaluation capabilities to verify production and assure proper operations on leases for both fluid and solid minerals. Emphasis is also placed on improving surface management regulation compliance for mining on public lands and on developing a hazardous materials waste inventory and abatement strategy. BLM is also responsible for the mineral resource evaluation, economic evaluation and regulation and supervision of minerals operations on both Federal lands and Indian lands.

**Lands and realty management.**—Land and realty actions include processing rights-of-way applications for energy-related development; processing land selections under the Alaska Native Claims Settlement Act and the Alaska Statehood Act; processing State indemnity selections, land exchanges, Recreation and Public Purposes Act and other lands and realty cases; review of public land withdrawals, revocation of withdrawals and new withdrawal processing; and sale of lands under the terms of the Federal Land Policy and Management Act and, in Nevada, under the Burton-Santini Act. BLM is also responsible for the system of public land records, some of which date back nearly 200 years. BLM is involved in a multiyear process to improve and auto-

mate the land records in support of both resource and minerals program needs.

**Renewable resources management.**—Includes such activities as forest management; range management; recreation management; soil, water, and air management; wildlife habitat management; and fire management. These activities provide for development, utilization, protection, preservation and sustained yield management of the natural resources on the public lands.

**Planning and data management.**—Includes such activities as resource management planning, development of land use plans, and automated data management.

**Cadastral survey.**—Provides for identification of land boundaries and legal property descriptions to facilitate land management programs.

**Firefighting and rehabilitation.**—Provides for protection of public land natural resources and other values from loss or depletion due to wildfires.

**Technical services.**—Provides for enforcement of laws and regulations governing the management, use, and protection of public lands.

This activity also provides engineering services including survey and design, development of specifications, contract administration, construction cost estimating, maintenance scheduling, transportation system management, facility evaluation, sign shop operation, and maintenance for buildings, roads, and trails.

**General administration.**—Includes executive management, equal employment opportunity programs, and general administrative services such as financial management, personnel management, management analysis, procurement, and property management to support Bureau activities and includes certain Bureau-wide fixed costs such as SLUC, postage and FTS charges.

The Oregon and California Lands appropriation provides for the BLM management of 2.1 million acres of revested railroad and wagon road lands located in Western Oregon for permanent forest production under the principle of sustained yield. As part of the Administration's initiative to adjust jurisdictional responsibilities between the BLM and U.S. Forest Service on a westwide basis, responsibility for managing the Oregon and California lands would be transferred to the Forest Service at the beginning of 1986. Consequently, there are no funds requested in the 1986 budget for BLM in this account.

**Rattlesnake NRA and Wilderness Area.**—Represents the monetary value of bidding rights issued under the authority of Public Law 96-476 and the estimated value of adjustments to those rights as required by section 7 of the Lee Metcalf Wilderness and Management Act of 1983. The bidding rights may be used as monetary credits against that portion of bonus payments, rentals or royalty payments paid under the Mineral Leasing Act of 1920, as amended, into the Treasury of the United States and retained by the Federal Government on any

Federal coal lease won or otherwise held by the holder. The value of unused bidding rights increases at a rate set quarterly by the Secretary of the Treasury, pursuant to section 11 of the Debt Collection Act of 1982 (31 U.S.C. 3717). There were \$14,327 thousand monetary credits outstanding at the end of 1984, with \$14,500 thousand estimated to be outstanding at the end of both fiscal year 1985 and 1986.

**Cranberry Wilderness Area.**—Represents the value of coal deposits and other mineral interests and rights within and contiguous to the Cranberry Wilderness Area in West Virginia acquired by the Federal Government pursuant to section 4 of Public Law 97-466.

The appropriation is derived from a percentage of receipts received from grazing of livestock on public lands, and grazing and mineral leasing receipts on Bankhead-Jones Farm Tenant Act lands transferred from the Department of Agriculture by various Executive orders. On public lands, the fee from grazing includes a range improvement fee, which is available for range improvements when appropriated (43 U.S.C. 315i, 1701). In 1986, range improvement funds will be used exclusively for on-the-ground development and project survey and design. Maintenance of existing and future improvements is the responsibility of the livestock operators.

Proposed legislation would make recreation user fees, now deposited into the Land and Water Conservation Fund, available beginning in 1987 to operate and improve recreational and other programs of the Bureau of Land Management.

## SERVICE CHARGES, DEPOSITS, AND FORFEITURES

For administrative expenses and other costs related to processing application documents and other authorizations for use and disposal of public lands and resources, for monitoring construction, operation, and termination of facilities in conjunction with use authorizations, and for rehabilitation of damaged property such amounts as may be collected under sections 209(b), 304(a), 304(b), 305(a), and 504(g) of the Act approved October 21, 1976 (43 U.S.C. 1701), and sections 101 and 203 of Public Law 93-153, to be immediately available until expended: *Provided, That pursuant to this act and hereafter, and except with respect to those applications for which costs are recovered on the basis of a schedule of fees or charges fixed by regulation, the amounts collected under section 304 of the Act of October 21, 1976, and sections 101 and 203 of Public Law 93-153 and appropriated under this heading shall be sufficient to meet the actual cost, including direct and indirect costs, to the United States, as determined by the Secretary, of the application processing and other activities, including the full cost of preparation of environmental impact statements, required in connection with the application for which such charges are made: Provided further, That pursuant to this Act and hereafter, and except with respect to those applications for which costs are recovered on the basis of a schedule of fees or charges fixed by regulation, no funds other than those appropriated under this heading, or otherwise available under the provisions of subsection 307(c) of the Act of October 21, 1976, may be used to meet the costs determined by the Secretary, in his discretion, to be reasonable under section 304(b) of said Act. (43 U.S.C. 1719, 1734, 1735, and 1764; 30 U.S.C. 185; 87 Stat. 584; Department of*

*Leasing of grazing lands.*—State, county, and privately owned grazing lands that are intermingled with public grazing lands are managed on a leased basis within the limits of receipts from such arrangements (43 U.S.C. 315m).

*Payments to Oklahoma (royalties).*—The State of Oklahoma is paid 37½% of the Red River oil and gas royalties in lieu of State and local taxes on Kiowa, Comanche, and Apache tribal lands to be used for construction and maintenance of public roads and support of public schools (65 Stat. 252).

*Payments to Coos and Douglas Counties, Oreg., from receipts, Coos Bay Wagon Road grant lands.*—Out of receipts from the Coos Bay Wagon Road grant lands in Oregon, payments in lieu of taxes are made to Coos and Douglas Counties for schools, roads, highways, bridges, and port districts (53 Stat. 753-754). Starting in 1986, these payments would be made by the U.S. Forest Service as they would have the responsibility for managing the Oregon and California and Coos Bay Wagon Road lands currently managed by the BLM.

*Payments to counties, Oregon and California grant lands.*—Fifty percent of the receipts of Oregon and California land-grant funds are paid to the counties in which the lands are situated, to be used as other county funds (39 Stat. 218; 50 Stat. 876). Starting in 1986, these payments would be made by the U.S. Forest Service as they would have the responsibility for managing the Oregon and California and Coos Bay Wagon Road lands currently managed by the BLM.

*Payments to States (proceeds of sales).*—The States are paid 5% of the net proceeds from sale of public land and public land products (31 U.S.C. 1305).

*Payments to States from grazing receipts, etc., public lands outside grazing districts.*—The States are paid 50% of the grazing fee receipts from public domain lands outside grazing districts (43 U.S.C. 315i, 315m).

*Payments to States from grazing receipts, etc., public lands within districts.*—The States are paid 12½% of grazing fee receipts from grazing district lands within their boundaries (43 U.S.C. 315b, 315i).

*Payments to States from grazing receipts, etc., public lands within grazing districts, miscellaneous.*—The States are paid specifically determined amounts from grazing fee receipts from miscellaneous lands within grazing districts when payment is not feasible on a percentage basis (43 U.S.C. 315).

*Payments to Alaska, National Petroleum Reserve.*—Alaska is paid 50% of the receipts from sales, bonuses,

royalties, and rentals resulting from the leasing of oil and gas in the National Petroleum Reserve in Alaska for use in planning, construction, maintenance, and operation of essential public facilities and other necessary provisions of public service (94 Stat. 2964).

*Payments to counties, national grasslands.*—Of the revenues received from the use of submarginal lands, 25% is paid to the counties in which such lands are situated, for school and road purposes (7 U.S.C. 1012).

*Expenses, road maintenance deposits.*—Public Law 94-579, approved October 21, 1976, permanently appropriated certain moneys to the Secretary of the Interior. Users of roads under jurisdiction of the Bureau of Land Management may make deposits for maintenance purposes, and moneys collected are available for necessary road maintenance. Moneys collected on Oregon and California grant lands are available for those lands only (43 U.S.C. 1701 et seq.). Starting in 1986, that portion of road maintenance expenses relating to Oregon and California lands and other public lands in western Oregon would be handled by the Forest Service.

*Payments to Nevada from receipts on land sales.*—Public Law 96-586 authorizes and directs the Secretary to sell not more than 700 acres of public lands per calendar year in and around Las Vegas, Nevada; proceeds of which are to be used to acquire environmentally sensitive lands in the Lake Tahoe Basin of California and Nevada. Annual revenues are distributed to the State of Nevada (5%) and the county in which the land is located (10%).

*Payments from proceeds, sale of water.*—When lessees or operators drilling for oil and gas on public lands strike water, water wells may be developed by the Department from proceeds from sale of water from existing wells (30 U.S.C. 221-229).

al]: *Provided further*, That no later than six months after the date of enactment of this Act, the Secretary of the Interior shall conclude a land exchange between the Oregon International Port of Coos Bay and the United States. Lands to be offered by the United States are described in Federal Register Notice, May 10, 1984. Lands to be offered by the Port are described as lots 4 through 16 inclusive, block 30, Nasburg's Addition to Marshfield, Coos County, Oregon. The Secretary is authorized to execute such instruments as may be necessary to permit the grantee to use permanently and develop for public roadway purpose, a tract of land described in Department of the Army Easement Number DACW 57-2-84-4 on Coos Bay North Jetty Road. As otherwise provided pursuant to the Federal Land Policy and Management Act of 1976 (90 Stat. 2743, Public Law 94-579), the Secretary shall conclude the above mentioned land exchange]. The Minerals Management Service supervises exploration for and the development and production of oil, gas, and other minerals on the Outer Continental Shelf (OCS) lands and collects royalties, rentals, and bonuses due the Federal Government and Indian lessors from minerals produced on Federal and Indian lands.

**Outer Continental Shelf (OCS) lands.**—The program provides for: (1) performance of environmental assessments to insure compliance with the National Environmental Policy Act (NEPA); (2) conduct of lease offerings; (3) selection and evaluation of tracts offered for lease by competitive bidding; (4) assurance that the Federal Government receives fair market value for leased lands; and (5) regulation and supervision of energy and mineral exploration, development, and production operations on the OCS lands.

The decrease in 1986 primarily reflects termination of Federal funding for processing costs related to the acquisition of geologic and geophysical data.

**Royalty management.**—The Royalty Management program provides accounting, auditing, and compliance activities for royalties, rentals, and bonuses due from minerals produced on Federal, Indian, and allotted lands. The program includes an automated accounting system to ensure that all royalties are properly collected.

The decrease in Royalty Management primarily reflects the deferral of pending decisions on how to proceed with modifications to the current system design, and the phase out of the Royalty-In-Kind program.

States receive at least 50 percent of the revenues from mineral leases on public lands, but all of the costs of collecting these revenues are borne by the Federal Government. In 1986, it is proposed that the expenditures of the Government in managing and administering the Federal onshore mineral leasing programs be deducted from Federal onshore mineral leasing revenues before these revenues are distributed.

**General administration.**—General administrative expenses provide for management, executive direction and

coordination, administrative support, Federal building space and general support services.

Alaska is paid 90% and other States 50% of the receipts from bonuses, royalties, and rentals resulting from development of mineral resources under the Mineral Leasing Act (30 U.S.C. 191), and from leases of potash deposits (30 U.S.C. 285), on both public domain and acquired lands. Costs for collecting these receipts are now borne by the Federal Government. In 1986, it is proposed that the costs of generating these revenues be shared by all recipients by deducting amounts expended by the Government in management and administration of Federal onshore mineral leasing programs before these revenues are distributed.

**State regulatory program grants.**—This program activity is to provide grants to States for the operation of permanent enforcement programs under the terms of the Act. As of September 30, 1984, 24 States with actual or planned coal mining facilities had approved state programs.

**Federal regulatory programs.**—This activity includes programs for Federal oversight of State permanent regulatory programs, for monitoring State inspection and enforcement, for the provision of technical assistance to States and for the administration of the Federal coal program in States without approved permanent enforcement programs. The request includes appropriation language and funding that will enable OSM, when it is the Regulatory Authority, to carry out reclamation work when performance bonds are forfeited. At present, forfeited bonds are deposited in the General Fund and cannot be expended without an appropriation.

**General administration.**—This activity includes: the Offices of the Director and Assistant Directors; the Headquarters staffs for Public Affairs, Equal Employment Opportunity, Congressional Liaison, and Regulatory and Issues Management; and the Divisions of Planning and Budget, Financial Management, Personnel, and Management Services. Also financed are certain categories of office-wide expenses most readily accommodated in a single budget line item, including office rent, telephones, and postage. The amount requested for this activity represents only that portion of the total General Administration expenses which are attributable to the Regulation and Technology appropriation. The remainder have been requested from the Abandoned Mine Reclamation Fund.

**State reclamation program grants.**—Each State with an approved reclamation program is entitled, subject to appropriation, to receive 50 percent of Abandoned Mine Reclamation Fund revenues derived from operating mines in that State. With grants, States assume primary responsibility for addressing problems such as subsidence, underground fires, open shafts and acid drainage in accordance with priorities set forth in the Act.

**Federal reclamation programs.**—This activity includes fee collection and assistance to States in developing reclamation programs, abandoned mine lands reclamation projects undertaken directly by the Office of Surface Mining and the Rural Abandoned Mine Program (RAMP) administered by the Soil Conservation Service.

**Small operator assistance payments.**—This activity provides for payments for authorized services to eligible coal mine operators in preparing applications for mining permits under a permanent State or Federal regulatory program. These services include determining the probable hydrologic consequences of the proposed mining operation and analysis of test borings or core samplings.

**General administration.**—This activity includes the same items as described for the General Administration activity in the Regulation and Technology appropriations. The funds for this activity represent only that portion of general administration expenses which are attributable to the Abandoned Mine Reclamation Fund.

Of the total request for new budget authority, \$1,770 thousand is to be derived from the General Fund rather than the Abandoned Mine Reclamation Fund. This will essentially reimburse the Fund for instances in which it was used for non-reclamation activities. In 1984 \$1,315 thousand was transferred to the Regulation and Technology appropriation in order to perform federal regula-

## BUREAU OF RECLAMATION

Appropriations to the Bureau are made from the general fund and special funds. The special funds are: (a) the Reclamation fund, largely derived from certain irrigation and power revenue; receipts from the sale, lease, and rental of public lands; and certain oil and mineral revenue; and (b) the Colorado River Dam fund, permanently available revenues of the Boulder Canyon project. The 1986 estimates are summarized by source as follows (in thousands of dollars):

Work in the Construction program is for the purpose of developing and managing water for irrigation, municipal and industrial use, salinity control, dam safety, and flood control in the 17 western States. Funding under this program provides for transfers to the Lower Colorado River Basin Development Fund and Upper Colorado River Basin fund. The Lower Colorado River Basin Development fund provides for the development and construction of the Central Arizona project. The Upper Colorado River Basin fund supports water supplies in the Upper Colorado River Basin area.

In 1986 construction will begin on three projects and will continue on 57 projects. Preconstruction activities will be underway on two projects, and work will begin on up to three new safety of dams projects.

Under the Small Reclamation Projects Act (43 U.S.C. 422a–422l), loans and/or grants can be made to non-Federal organizations for construction or rehabilitation and betterment of small water resource projects. Funds are provided to continue construction on ten projects and to begin construction on six new projects. This funding will provide improvements to existing irrigation distribution systems by rehabilitating pumping plants, canal and lateral structures, enlarging and extending drains and enable the purchasing of maintenance equipment.

Under the Distribution Systems Loans Act (43 U.S.C. 421a–421d), loans can be made to organizations for the construction of irrigation and municipal or industrial water distribution systems on authorized Federal reclamation projects. Work will continue on one project in 1986.

This appropriation finances studies of potential projects for the conservation and utilization of water and related land resources and includes plan formulation investigations, general engineering and research activities and advance planning work.

**Plan formulation investigations.**—These include project investigations, individual units of the Colorado River Water Quality Improvement Program, and special investigations throughout the 17 Western States to formulate water resource development plans for river basins or specific projects.

**Advance planning.**—This program provides for detailed studies of projects that are viable for implementation but require additional work toward finalizing a definite plan.

**General engineering and research.**—Studies are directed toward developing new construction materials, better planning tools, and design and construction techniques. Included are studies of atmospheric water resources to increase precipitation by cloud seeding.

In 1986, a total of 33 projects, project areas, or divisions of projects will be operated and maintained for power, municipal and industrial water supplies, irrigation, flood control, and other benefits with funds made available under this appropriation.

Provision is also made for administration of water marketing contracts on Corps of Engineers projects, examination of existing structures, and administration of the provisions of the Reclamation Reform Act of 1982 (96 Stat. 1261).

In addition, operation and maintenance costs of the Colorado River Storage Project, the Colorado River Basin Project, and the Boulder Canyon Project are shown on the consolidated operation and maintenance table preceding this account. Pursuant to Public Law 98-381, beginning in 1986 operation and maintenance costs of the Boulder Canyon Project are funded by a permanent appropriation from the Colorado River Dam fund.

The general administrative expenses program provides for the executive direction and management of all reclamation activities, as performed by the Commissioner's offices in Washington, DC and Denver, CO, and seven regional offices. The Denver Engineering and Research Center and regional offices charge individual projects or activities for direct beneficial services and related administrative and technical costs. These charges are covered under other appropriations.

Revenue from Boulder Canyon project operations is placed in this fund. Due to a recent change in law (Public Law 98-381), the fund is available without further appropriation for payment of expense of operation and maintenance of the project, for payment of interest on amounts advanced from the Treasury, and for annual payments of not more than \$300 thousand each to Arizona and Nevada and for repayment of advances from the Treasury for construction or other purposes (43 U.S.C. 617a).

Obligations in 1986 include \$2.3 million non-Federal financing for betterment of generating facilities.

This fund is derived from repayments and other revenue from water resource development, together with certain receipts from sales, leases, and rentals of Federal lands in the 17 Western States, and is available for expenditure pursuant to authorization contained in appropriation acts.

## SPECIAL FUNDS

Sums herein referred to as being derived from the reclamation fund [ ], the Colorado River Dam fund, [ ] or the Colorado River development fund, are appropriated from the special funds in the Treasury created by the Act of June 17, 1902 (43 U.S.C. 391), and the Act of December 21, 1928 (43 U.S.C. 617a), and the Act of July 19, 1940 (43 U.S.C. 618a), respectively. Such sums shall be transferred, upon request of the Secretary, to be merged with and expended under the heads herein specified; and the unexpended balances of sums transferred for expenditure under the head "General Administrative Expenses" shall revert and be credited to the special fund from which derived. (Public Law 98-360, making appropriations for energy and water development, 1985.)

The fund provides for more efficient financing and financial management of centralized administrative services for support of Bureau programs and for work performed for others. General provisions of law are proposed that would establish the fund late in 1985, 30 days after enactment of appropriations for 1986. Estimates for 1985 and 1986 reflect this proposal.

**ADMINISTRATIVE PROVISIONS**

Appropriations for the Bureau of Reclamation shall be available for purchase of not to exceed 16 passenger motor vehicles of which [13] 15 shall be for replacement only; purchase of [one additional] two aircraft, of which one shall be for replacement only; payment of such amounts as may be necessary, without regard to the provisions of Section 7 of the Public Buildings Amendments of 1972, for renovation of existing building No. 53 to accommodate the new central computer facilities at the Denver Federal Center, Lakewood, Colorado; payment of claims for damages to or loss of property, personal injury, or death arising out of activities of the Bureau of Reclamation; payment,

except as otherwise provided for, of compensation and expenses of persons on the rolls of the Bureau of Reclamation appointed as authorized by law to represent the United States in the negotiations and administration of interstate compacts without reimbursement or return under the reclamation laws; for service as authorized by section 3109 of title 5, United States Code, in total not to exceed \$500,000; rewards for information or evidence concerning violations of law involving property under the jurisdiction of the Bureau of Reclamation; performance of the functions specified under the head "Operation and Maintenance Administration", Bureau of Reclamation, in the Interior Department Appropriations Act, 1945; preparation and dissemination of useful information including recordings, photographs, and photographic prints; and studies of recreational uses of reservoir areas, and investigation and recovery of archeological and paleontological remains in such areas in the same manner as provided for in the Acts of August 21, 1935 (16 U.S.C. 461-467) and June 27, 1960 (16 U.S.C. 469): *Provided*, That no part of any appropriation made herein shall be available pursuant to the Act of April 19, 1945 (43 U.S.C. 377), for expenses other than those incurred on behalf of specific reclamation projects except "General Administrative Expenses" and amounts provided for plan formulation and advance planning investigations, and general engineering and research under the head "General Investigations".

Sums appropriated herein which are expended in the performance of reimbursable functions of the Bureau of Reclamation shall be returnable to the extent and in the manner provided by law.

No part of any appropriation for the Bureau of Reclamation, contained in this Act or in any prior Act, which represents amounts earned under the terms of a contract but remaining unpaid, shall be obligated for any other purpose, regardless of when such amounts are to be paid: *Provided*, That the incurring of any obligation prohibited by this paragraph shall be deemed a violation of section 3679 of the Revised Statutes, as amended (31 U.S.C. 1341).

No funds appropriated to the Bureau of Reclamation for operation and maintenance, except those derived from advances by water users, shall be used for the particular benefits of lands (a) within the boundaries of an irrigation district, (b) of any member of a water users' organization, or (c) of any individual when such district, organization, or individual is in arrears for more than twelve months in the payment of charges due under a contract entered into with the United States pursuant to laws administered by the Bureau of Reclamation. The Geological Survey provides basic scientific data and information concerning water, land, and mineral resources.

**National mapping, geography, and surveys.**—The national mapping program produces and makes available,

## GEOLOGICAL SURVEY—Continued

## General and special funds—Continued

## SURVEYS, INVESTIGATIONS, AND RESEARCH—Continued

in printed and digital format, cartographic and geographic base data, multipurpose and special-purpose maps. Map receipts are retained in a permanent account.

The 1986 funding increases provide for digital cartographic data required by 1987 to prepare for the 1990 census and initial work necessary for the implementation of an advanced cartographic systems program.

Funding reductions in 1986 are related to land use—land cover mapping and the termination of side looking airborne radar data acquisition.

*Geologic and mineral resource surveys and mapping.*—The national program of onshore and offshore geologic research and investigations produces: (1) improved methods and instruments for mineral and energy assessments; (2) geologic, geophysical, and geochemical maps and analyses; (3) information on the chemistry and physics of the Earth, the climate, and the geologic processes by which it was formed and is being modified; (4) information on geologic hazards; and (5) information for use by other Federal and State agencies in the management of public lands and in national policy determinations.

The 1986 funding increases provide for deep continental studies, world energy assessments, mineral resources assessments of public lands, and offshore geologic studies of the Exclusive Economic Zone (EEZ).

Decreased funding for 1986 is related to geothermal resource assessment, uranium/thorium, and volcano, earthquake and landslide hazards programs.

*Water resources investigations.*—The national program of water resources investigations has the objective of appraising the Nation's water resources and insuring that the data necessary to develop and manage them efficiently and effectively are available when needed. The program produces data and analyses to support decisions on water planning, water management, energy development and enhancement of the quality of the environment.

The 1986 funding accelerates research on toxic substances hydrology and increases the Federal data collection program. Federal-State cooperative efforts are enhanced to provide additional scientific/technical assistance related to groundwater protection.

No funding is requested for the Federal coal hydrology program. Funds are also reduced for the Water Institutes program.

*General administration.*—General administrative expenses provide for management, executive direction and coordination, and administrative support.

*Facilities.*—This activity finances the operation and maintenance facilities management and special support services for the operation of the national center headquarters and field centers.

*Reimbursements* from non-Federal sources are from States and municipalities for cooperative efforts proceeds from sale to the public of copies of photographs and records; proceeds from sale of personal property; reimbursements from permittees and licensees of the Federal Energy Regulatory Commission; and reimburse-

ments from friendly countries and international organizations for technical assistance. Reimbursements from other Federal agencies are for mission related work performed at the request of the financing agency.

## Minerals research.—

**Health and safety technology.**—This program provides technology that will reduce occupational illnesses, accidents, and disasters associated with mining. Health research addresses instrumentation and control technology to reduce levels of respirable dust, noise, toxic gas products, and radiation found in mine air, and to develop ventilation systems that provide the proper quality and quantity of air flow in underground mines. Safety hazard reduction research investigates and develops means to help control fires and explosions; methane occurrence and migration; to reduce industrial hazards; to minimize ground control related accidents; to improve post disaster survival and rescue; and to control explosives and blasting. The 1986 budget reflects the completion of research efforts in industrial hygiene, methane control, post-disaster survival and rescue, ventilation, radiation, communications and illumination within the industrial hazards area, and a reduction of resources devoted to noise control, systems engineering, and fire and explosion prevention. Research in explosives will be increased.

**Mining technology.**—The program investigates mining techniques which improve domestic mineral recovery from metal and nonmetal mines and technology to reduce the adverse environmental effects associated with mining and mineral processing activities. The program places special emphasis on improving techniques for mining domestic low-grade deposits of strategic and critical minerals. In the 1986 budget, the Bureau proposes to redirect funds from work being conducted on

incremental mining equipment to work on the recovery of coal from thick western coal seams.

**Minerals and materials research.**—Research is conducted to develop basic information on fundamental scientific and engineering principles of minerals processing that will support and enhance the mineral industry's efforts to improve productivity, increase energy efficiency and be more environmentally acceptable, and also to investigate new or alternative techniques which increase production of strategic, critical, and other essential minerals from low-grade or complex domestic ores. The 1986 budget reflects an emphasis on long-term, high risk, high potential payoff projects that possess the best chance for widespread application. Reductions occur in applied research of a more commercial nature, which should be the responsibility of the mining industry.

**Minerals information and analysis.**—

**Minerals information.**—This program provides a reliable data base, including the automated Minerals Information System, for analysis of national minerals problems by collecting, interpreting, and disseminating worldwide information relating to the production, consumption, and availability of nonfuel minerals. The program maintains information on the production and consumption of approximately 100 mineral commodities, and also on the minerals and related industries of about 160 countries.

**Mineral data analysis.**—In-depth economic, technical, and policy studies that address the worldwide supply and demand for nonfuel minerals are conducted in this program. The Minerals Availability System, a computerized data base system, develops and utilizes methodologies for evaluation of mineral deposits based on quantifiable technical, economic, and social data. The program also includes mineral land assessments on certain Bureau of Land Management (BLM) and U.S. Forest Service lands, carried out jointly with the U.S. Geological Survey.

**Mineral institutes.**—As in 1984 and 1985, no funds are requested for this program in 1986 because other sources of public and private support are adequate to meet program objectives.

**General administration.**—The general administration program finances executive guidance and administrative services for the Bureau of Mines.

The Helium Act Amendments of 1960, Public Law 86-777 (50 U.S.C. 167), authorized activities necessary to provide sufficient helium to meet the current and foreseeable future needs of essential government activities.

## BUREAU OF MINES—Continued

## Public enterprise funds—Continued

## HELIUM FUND—Continued

The program includes production, conservation, sale, and distribution of helium and involves the management of helium program facilities and resources to:

(a) Provide helium to meet current demands of all Federal agencies.

(b) Provide helium to meet the foreseeable future helium requirements of essential Government programs.

(c) Conduct investigations and evaluations to improve the helium program.

Income from helium sales, services, and rentals of containers is estimated to provide the required funding for program cash outlay through 1986. During 1986, the Bureau of Mines will produce and sell about 260 million cubic feet (MMcf) of Grade-A helium at its Exell Helium Plant in the Texas Panhandle to meet the needs projected by the Departments of Defense and Energy, the National Aeronautics and Space Administration, and other Federal agencies. Approximately 100 MMcf, or 38 percent, will be liquefied for shipment. Additionally, the Bureau is expecting to purify about 40 MMcf of stored private helium for redelivery to private industry as a contract service. Thus, the total Grade-A helium output is expected to be about 300 MMcf.

**Habitat resources.**—The Service conducts investigations, provides technical and planning assistance, makes recommendations on land and water resource development projects sponsored, licensed or assisted by the Federal Government, and conducts research on environmental contaminant effects on fish and wildlife.

**Wildlife resources.**—The Service manages the national wildlife refuge system of 424 units, 149 waterfowl production areas, and 58 wildlife management areas, on about 89.9 million acres; directs and coordinates national migratory bird programs; enforces Federal game laws and regulations; conducts research to improve wildlife management; and assists in reducing damage caused by wildlife.

**Fishery resources.**—The Service focuses on interstate and international fisheries such as anadromous species, fisheries of the Great Lakes, interstate river and reservoir systems, and fisheries on Service lands.

**Endangered species.**—The goal of this program is to prevent species from becoming extinct and, where possible, to return them to the point where they are neither endangered nor threatened.

**General administration.**—To carry out the above programs, the Service also provides general administrative support.

*Federal aid in fish restoration and management.*—Beginning in 1986, this activity will be funded under the "Sport fish restoration account," Fish and Wildlife Service, Department of the Interior.

UNITED STATES FISH AND WILDLIFE SERVICE—Continued  
General and special funds—Continued

## MISCELLANEOUS PERMANENT APPROPRIATIONS—Continued

**Federal aid in wildlife restoration.**—States, Puerto Rico, Guam, the Virgin Islands, American Samoa, and the Northern Mariana Islands are allocated funds equal to the 11% excise tax on sporting arms and ammunition, the 10% excise tax on handguns, and the 11% tax on certain archery equipment. States are reimbursed up to 75% of the cost of approved wildlife and hunter education projects.

**Proceeds from sales, water resources development projects.**—Receipts collected from the sale of products from refuges on which other agencies have primary jurisdiction pay the costs of producing these products and for managing wildlife habitat.

**Education.**—The Bureau of Indian Affairs operates schools, supports tribally operated schools, and provides financial assistance to public schools serving Indian children.

The Bureau provides financial assistance to Indian students for higher education studies, supports some tribally operated post-secondary institutions, and offers continuing education programs in many communities.

**Indian services.**—This activity includes municipal-type government services for Indian communities, along with assistance to tribes in self-government and self-determination projects.

**Economic development and employment program.**—Economic development is encouraged and assisted through programs of technical and financial aid to Indian individuals and organizations. Indian tribal organizations and individuals are assisted with securing and managing loans. Individual Indians are assisted by vocational training and employment placement. Roads are maintained to provide for the movement of people and goods as needed by Indian communities.

**Natural resources development.**—This activity provides for the conservation, development and use of Indian land, water, and related resources.

**Trust responsibilities.**—This activity provides for the protection of Indian rights and property, and the management of assets held in trust for Indian tribes and individuals.

**Facilities management.**—This activity provides for the maintenance and operation of Bureau facilities and the provision for GSA owned or leased facilities.

**General administration.**—These functions include executive direction, administrative services, safety management, employee compensation payments, construction management, and education program management.

The fund was established pursuant to the Indian Financing Act of 1974. The purpose of the fund is to support a program of guaranteeing or insuring loans made by commercial lending institutions to Indians and to tribes and other Indian organizations for economic development purposes. An interest subsidy is paid from the fund on loans guaranteed or insured to reduce the Indian borrower's rate of interest. The purpose of this program is to provide an incentive to the private lending sector to make loans to Indians which would not otherwise be made.

This Cooperative Fund, established by section 313 of the Southern Arizona Water Rights Settlement Act (96 Stat. 1274-1285), provides a source of funds for the Secretary of the Interior to carry out the obligations of the Secretary under sections 303, 304, and 305 of the act. Only interest accruing to the fund may be expended. However, the law provides that no such interest can be spent prior to the earlier of 1992 or the completion of the main project works of the Central Arizona Project.

## MISCELLANEOUS TRUST FUNDS

## TRIBAL TRUST FUNDS

In addition to the tribal funds authorized to be expended by existing law, there is hereby appropriated not to exceed \$4,000,000 from tribal funds not otherwise available for expenditure [and in addition hereafter tribal funds may be advanced to Indian tribes during each fiscal year for such purposes as may be designated by the governing body of the particular tribe involved and approved by the Secretary including: expenditures for the benefit of Indians and Indian tribes; care, tuition, and other assistance to Indian children attending public and private schools (which may be paid in advance or from date of admission); purchase of land and improvements on land, title to which shall be taken in the name of the United States in trust for the tribe for which purchased; lease of lands and water rights; compensation and expenses of attorneys and other persons employed by Indian tribes under approved contracts; pay, travel, and other expenses of tribal officers, councils, committees, and employees thereof, or other

tribal organizations, including mileage for use of privately owned automobiles and per diem in lieu of subsistence at rates established administratively but not to exceed those applicable to civilian employees of the Government; and relief of Indians, including cash grants]. Under the terms of the 1947 Trustee Agreement between the United States and the Security Council of the United Nations, the United States exercises full jurisdiction over the Trust Territory and is obligated to promote the political, economic, and educational advancement of the inhabitants. These responsibilities are carried out through the Department of the Interior.

The United States seeks to terminate the trusteeship and, to accomplish this, has signed a compact of free association with the governments of the Marshalls Islands, Palau, and the Federated States of Micronesia. The compact for the Marshall Islands and the Federated States of Micronesia is pending approval by the United States Congress and is discussed in the Department of State.

## GENERAL PROVISIONS, DEPARTMENT OF THE INTERIOR

SEC. 101. Appropriations made in this title shall be available for expenditure or transfer (within each bureau or office), with the approval of the Secretary, for the emergency reconstruction, replacement, or repair of aircraft, buildings, utilities, or other facilities or equipment damaged or destroyed by fire, flood, storm, or other unavoidable causes: *Provided*, That no funds shall be made available under this authority until funds specifically made available to the Department of the Interior for emergencies shall have been exhausted.

SEC. 102. The Secretary may authorize the expenditure or transfer of any no year appropriation in this title, in addition to the amounts included in the budget programs of the several agencies, for the suppression or emergency prevention of forest or range fires on or threatening lands under jurisdiction of the Department of the Interior; for the emergency rehabilitation of burned-over lands under its jurisdiction; for emergency actions related to potential or actual earthquakes or volcanoes; for emergency reclamation projects under section 410 of Public Law 95-87; and shall transfer, from any no year funds available, to the Office of Surface Mining Reclamation and Enforcement, such funds as may be necessary to permit assumption of regulatory authority in the event a primacy State is not carrying out the regulatory provisions of the Surface Mining Act: *Provided*, That appropriations made in this title for fire suppression purposes shall be available for the payment of obligations incurred during the preceding fiscal year, and for reimbursement to other Federal agencies for destruction of vehicles, aircraft, or other equipment in connection with their use for fire suppression purposes, such reimbursement to be credited to appropriations currently available at the time of receipt thereof: *Provided further*, That funds transferred pursuant to this section must be replenished by a supplemental appropriation which must be requested as promptly as possible.

SEC. 103. Appropriations made in this title shall be available for operation of warehouses, garages, shops, and similar facilities, whenever consolidation of activities will contribute to efficiency or economy, and said appropriations shall be reimbursed for services rendered to any other activity in the same manner as authorized by sections

1535 and 1536 of title 31, U.S.C.: *Provided*, That reimbursements for costs and supplies, materials, equipment, and for services rendered may be credited to the appropriation current at the time such reimbursements are received.

SEC. 104. Appropriations made to the Department of the Interior in this title shall be available for services as authorized by 5 U.S.C. 3109, when authorized by the Secretary, in total amount not to exceed \$300,000; hire, maintenance, and operation of aircraft; hire of passenger motor vehicles; purchase of reprints; payment for telephone service in private residences in the field, when authorized under regulations approved by the Secretary; [and the] payment of dues, when authorized by the Secretary, for library membership in societies or associations which issue publications to members only or at a price to members lower than to subscribers who are not members; *and such amounts as may be necessary shall be available to compensate private debt collection agencies under contract with the Secretary as provided for in the Debt Collection Act of 1982 as amended by Public Law 98-167*: *Provided*, That no funds available to the Department of the Interior are available for any expenses of the Great Hall of Commerce.]

SEC. 105. Appropriations available to the Department of the Interior for salaries and expenses shall be available for uniforms or allowances therefor, as authorized by law (5 U.S.C. 5901-5902 and D.C. Code 4-204).

SEC. 106. Appropriations made in this title shall be available for obligation in connection with contracts issued by the General Services Administration for services or rentals for periods not in excess of twelve months beginning at any time during the fiscal year.

[SEC. 107. No funds provided in this title may be expended by the Department of the Interior for the procurement, leasing, bidding, exploration, or development of lands within the Department of the Interior Central and Northern California Planning Area which lie north of the line between the row of blocks numbered N816 and the row of blocks numbered N817 of the Universal Transverse Mercator Grid System.]

[SEC. 108. No funds provided in this title may be expended by the Department of the Interior for the preparation for, or conduct of, pre-leasing and leasing activities (including but not limited to: calls for information, tract selection, notices of sale, receipt of bids and award of leases) of lands within:

(a) An area of the Outer Continental Shelf, as defined in section 2(a) of the Outer Continental Shelf Lands Act (43 U.S.C. 1331(a)), located in the Atlantic Ocean, bounded by the following line: from the intersection of the seaward limit of the Commonwealth of Massachusetts territorial sea and the 71 degree west longitude line south along that longitude line to its intersection with the line which passes between blocks 598 and 642 on Outer Continental Shelf protraction diagram NK 19-10; then along that line in an easterly direction to its intersection with the line between blocks 600 and 601 of protraction diagram NK 19-11; then in a northerly direction along that line to the intersection with the 60 meter isobath between blocks 204 and 205 of protraction diagram NK 19-11; then along the 60 meter isobath, starting in a roughly southeasterly direction; then turning roughly northeast, north, and west until such isobath intersects with the northern boundary of block 974 of protraction diagram NK 19-6; then along the line that lies between blocks 930 and 974 of protraction diagram NK 19-6 in a westerly direction to the first point of intersection with the seaward limit of the Commonwealth of Massachusetts territorial sea; then southwesterly along the seaward limit of the territorial sea to the point of beginning at the intersection of the seaward limit of the territorial sea and the 71 degree west longitude line.

(b) The following blocks are excluded from the described area: In protraction diagram NK 19-10, blocks numbered 474 through 478, 516 through 524, 560 through 568, and 604 through 612; in protraction diagram NK 19-6, blocks numbered 969 through 971; in protraction diagram NK 19-5, blocks numbered 1005 through 1008; and in protraction diagram NK 19-8, blocks numbered 37 through 40, 80 through 84, 124 through 127, and 168 through 169.

(c) The following blocks are included in the described area: In protraction diagram NK 19-11, blocks numbered 633 through 644, 677 through 686, 721 through 724, 765 through 767, 809 through 810, and 853; in protraction diagram NK 19-9, blocks numbered 106, 150, 194, 238, 239, and 283; and in protraction diagram NK 19-6, blocks numbered 854, 899, 929, 943, 944, and 987.

(d) Blocks in and at the head of submarine canyons: An area of the Outer Continental Shelf, as defined in section 2(a) of the Outer Continental Shelf Lands Act (45 U.S.C. 1331(a)), located in the Atlantic Ocean off the coastline of the Commonwealth of Massachusetts, lying at the head of, or within the submarine canyons known as Atlantis Canyon, Veatch Canyon, Hydrographer Canyon, Welker Canyon, Oceanographer Canyon, Gilbert Canyon, Lydonia Canyon, Alvin Canyon, Powell Canyon, Munson Canyon, and Corsair Canyon, and consisting of the following blocks, respectively:

(1) On Outer Continental Shelf protraction diagram NJ 19-1; blocks 36, 37, 38, 42-44, 80-82, 86-88, 124, 125, 130-132, 168, 169, 174-176, 212, 213.

(2) On Outer Continental Shelf protraction diagram NJ 19-2; blocks 8, 9, 17-19, 51-52, 53, 54, 61-63, 95-98, 139, 140.

(3) On Outer Continental Shelf protraction diagram NK 19-10; blocks 916, 917, 921, 922, 960, 961, 965, 966, 1003-1005, 1009, 1011.

(4) On Outer Continental Shelf protraction diagram NK 19-11; blocks 521, 522, 565, 566, 609, 610, 653-655, 697-700, 734, 735, 741-744, 769, 778-781, 785-788, 813, 814, 822-826, 829-831, 857, 858, 866-869, 873-875, 901, 902, 910-913, 917, 945-947, 955, 956, 979, 980, 989-991, 999.

(5) On Outer Continental Shelf protraction diagram NK 19-12; blocks 155, 156, 198, 199, 280-282, 324-326, 369-371, 401, 413-416, 442-446, 450, 451, 489-490, 494, 495, 530, 531, 533-540, 574, 575, 577-583, 618, 619, 621-623, 626, 627, 662, 663, 665-667, 671, 672, 706, 707, 710, 711, 750, 751, 754, 755, 794, 795, 798, 799.

(6) On Outer Continental Shelf protraction diagram NK 19-9; blocks 559-561, 603-607, 647-651, 693-695, 737-739.

(7) On Outer Continental Shelf protraction diagram NK 20-7; blocks 706, 750, 662, 618, 574.

(e) Nothing in this section shall prohibit the lease of that portion of any blocks described in subsection (d) above which lies outside the geographical boundaries of the submarine canyons and submarine canyon heads described in subsection (d) above: *Provided*, That for purposes of this subsection, the geographical boundaries of the submarine canyons and submarine canyon heads shall be those recognized by the National Oceanographic and Atmospheric Administration, Department of Commerce, on the date of enactment of this Act.

(f) Nothing in this section shall prohibit the Secretary of the Interior from granting contracts for scientific study, the results of which could be used in making future leasing decisions in the planning area and in preparing environmental impact statements as required by the National Environmental Policy Act.

(g) References made to blocks, protraction diagrams, and isobaths are to such blocks, protraction diagrams, and isobaths as they appear on the map entitled Outer Continental Shelf of the North Atlantic from 39° to 45° North Latitude (Map No. MMS-10), prepared by the United States Department of the Interior, Minerals Management Service, Atlantic OCS Region.】

SEC. [109.] 107. None of the funds appropriated or otherwise made available pursuant to this Act shall be obligated or expended to finance changing the name of the mountain located 63 degrees, 04 minutes, 15 seconds west, presently named and referred to as Mount McKinley.

SEC. [110.] 108. Notwithstanding any other provisions of law, appropriations in this title shall be available to provide insurance on official motor vehicles, aircraft, and boats operated by the Department of the Interior in Canada and Mexico.

【SEC. 111. No funds provided in this title may be expended by the Department of the Interior for the lease sale of tracts in Lease Sale numbered 80 within the following areas:

(1) an area of the Department of the Interior Southern California Planning Area bounded by the following line on the California (Lambert) Plane Coordinate System: From the point of intersection of the international boundary line between the United States and Mexico and the seaward boundary of the California State Tidelands west along said international boundary line to the point of intersection with the line between the row of blocks numbered 28 west and the row of blocks numbered 27 west; thence north to the northeast corner of block 20 north, 28 west; thence northwest to the southwest corner of block 29 north, 35 west; thence north along the line between the row of blocks numbered 36 west and the row of blocks numbered 35 west to its

intersection with the seaward boundary of the California State Tidelands; thence easterly along the seaward boundary of the California State Tidelands to the point of beginning;

(2) a portion of the Department of the Interior Southern California Planning Area which lies both: (a) east of the line between the row of blocks numbered 53 west and the row of blocks numbered 52 west, and (b) north of the line between the row of blocks numbered 34 north and the row of blocks numbered 35 north, on the California (Lambert) Plane Coordinate System;

(3) the boundaries of the Channel Island National Marine Sanctuary, as defined by title 15, part 935.3 of the Code of Federal Regulations; and

(4) the boundaries of the Santa Barbara Channel Ecological Preserve and Buffer Zone, as defined by the Department of the Interior, Bureau of Land Management Public Land Order numbered 4587 (vol. 34, page 5655 Federal Register March 26, 1969).

This section shall not affect the authority of the Secretary of the Interior to approve any plan, or to grant any license or permit, which is restricted to scientific exploration or other scientific activities, or other preleasing activities necessary up to the point of sale.】

## GENERAL PROVISIONS, DEPARTMENT OF THE INTERIOR

SEC. 201. Appropriations in this title shall be available for expenditure or transfer (within each bureau or office), with the approval of the Secretary, for the emergency reconstruction, replacement, or repair of aircraft, buildings, utilities, or other facilities or equipment damaged or destroyed by fire, flood, storm, or other unavoidable causes: *Provided*, That no funds shall be made available under this authority until funds specifically made available to the Department of the Interior for emergencies shall have been exhausted.

SEC. 202. The Secretary may authorize the expenditure or transfer (within each bureau or office) of any appropriation in this title, in addition to the amounts included in the budget programs of the several agencies, for the suppression or emergency prevention of forest or range fires on or threatening lands under jurisdiction of the Department of the Interior.

SEC. 203. Appropriations in this title shall be available for operation of warehouses, garages, shops, and similar facilities, wherever consolidation of activities will contribute to efficiency, or economy, and said appropriations shall be reimbursed for services rendered to any other activity in the same manner as authorized by the Act of June 30, 1932 (31 U.S.C. [686] 1535 and 1536): *Provided*, That reimbursements for costs of supplies, materials, equipment, and for services rendered may be credited to the appropriation current at the time such reimbursements are received.

SEC. 204. Appropriations in this title shall be available for hire, maintenance, and operation of aircraft; hire of passenger motor vehicles; purchases of reprints; payment for telephone services in private residences in the field, when authorized under regulations approved by the Secretary; and the payment of dues, when authorized by the Secretary, for library membership in societies or associations which issue publications to members only or at a price to members lower than to subscribers who are not members.

SEC. 205. 【The cost of foundation treatment, drainage, and instrumentation work planned or under way at Twin Buttes Dam, Texas, shall be nonreimbursable under federal reclamation laws.】

(a) *Within 30 days after enactment of this bill, there shall be established in the Treasury of the United States a working capital fund to assist in the management of certain support activities of the Bureau of Reclamation (hereafter referred to as the "Bureau"), Department of the Interior. The fund shall be available without fiscal year limitation for expenses necessary for furnishing materials, supplies, equipment, work, and services in support of Bureau programs, and, as authorized by*

law, to agencies of the Federal Government and others. Such expenses may include the acquisition, replacement, and operation of a central computer and related automatic data processing equipment; engineering services; payroll and other management services; acquisition and replacement of equipment and facilities, including the purchase, lease, or rent of motor vehicles and aircraft within any limitations set forth in appropriations made to carry out the functions of the Bureau and such other activities as may be approved by the Director, Office of Management and Budget.

(b) The fund shall be credited with appropriations made for the purpose of providing or increasing capital. There are authorized to be transferred to the fund (at fair and reasonable value at the time of transfer) the inventories, equipment, receivables, and other assets, less the liabilities, related to the functions to be financed by the fund as determined by the Secretary of the Interior.

(c) The fund shall be credited with appropriations and other funds of the Bureau, and other agencies of the Department of the Interior, other Federal agencies, and other sources, for providing materials, supplies, equipment, work, and services as authorized by law. Such payments may be made in advance or upon performance.

(d) Charges to users will be at rates approximately equal to the costs of furnishing the materials, supplies, equipment, facilities, and services (including such items as depreciation of equipment and accrued annual leave).

(e) There are hereby authorized to be appropriated such sums as are necessary to carry out the purposes of this section.

(f) Funds that are not necessary to carry out the activities to be financed by the fund, as determined by the Secretary, shall be covered into miscellaneous receipts of the Treasury.

[SEC. 206. The cost of foundation treatment, drainage, and instrumentation work planned or underway at Foss Dam, Oklahoma, shall be nonreimbursable and nonreturnable under the Federal reclamation law.]

[SEC. 207. (a) It is the sense of Congress that—

(1) the Garrison Diversion Unit was authorized by Congress and reflects the entitlement of the State of North Dakota to a federally funded water development program as compensation for North Dakota's contributions to the Pick-Sloan Missouri Basin program;

(2) there is a need to put to beneficial use water from the Missouri River within the State of North Dakota;

(3) there are municipal and industrial water resource problems in North Dakota that are presently unmet;

(4) there are irrigation and agricultural water needs in areas which cannot be met by the Garrison Diversion Unit as presently authorized;

(5) the Garrison Diversion Unit, as presently authorized, raises significant issues of economic, environmental, and international concern;

(6) the water needs of the State of North Dakota should be resolved by contemporary water development alternatives; and

(7) a Secretarial commission should be established to examine the water needs of North Dakota and propose development alternatives which will lead to the early resolution of the problems identified.]

[(b) No funds appropriated under this title for the Garrison Diversion Unit, Pick-Sloan Missouri Basin program, shall be expended or committed for expenditure on construction contracts prior to December 31, 1984. Notwithstanding the preceding sentence, funds appropriated may be expended or committed for expenditure for the work associated with the commission established by this section. Funds may be expended or committed for expenditure after such date for construction of the Garrison Diversion Unit—

(1) in accordance with the recommendations of the Secretarial commission established under subsection (c); or

(2) if the commission fails to make such recommendations, as presently authorized.]

[(c)(1) The Secretary of the Interior shall, within thirty days after the date of enactment of this section, appoint a commission, composed of 12 individuals, to review the contemporary water development needs of the State of North Dakota and propose modifications to the Garrison Diversion Unit consistent with the existing authorization. The Secretary shall designate one member who shall serve as chairman of the commission who shall set the dates of hearings, meetings, and other official commission functions in carrying out the purposes of this section. The commission, in developing its recommendations, shall hold no fewer than three public hearings, at least two of which shall be in the State of North Dakota. Any recommendations of the

commission shall be agreed to by at least 8 members. The commission shall cease to exist on December 31, 1984.]

[(2) The commission is directed to examine, review, evaluate, and make recommendations with regard to the contemporary water development needs of the state of North Dakota, taking into consideration—

(A) the costs and benefits incurred and opportunities foregone by the State of North Dakota between 1944 and 1984 as a result of the establishment and implementation of the Pick-Sloan Missouri Basin program;

(B) the need and potential for North Dakota to put to beneficial use within the State water from the Missouri River;

(C) the need for construction of additional facilities to put to beneficial use water from the Missouri River;

(D) the municipal and industrial water needs and development potential within the State of North Dakota, including such matters as—

(i) quality of water supply,

(ii) the ability of existing systems to meet present and future demand,

(iii) related groundwater problems,

(iv) water treatment,

(v) water delivery by pipeline, and

(vi) instream flow needs;

(E) the possible use of groundwater recharge for municipal and industrial uses, as well as irrigation;

(F) the current North Dakota water plan, including proposed projects, to determine if elements of the plan (such as the southwest pipeline project) should be recommended for Federal funding;

(G) whether or not the Garrison Diversion Unit can be redesigned and reformulated;

(H) the institutional and tax equity issues in the State of North Dakota as they relate to the authorized project and alternative water development proposals;

(I) the fiscal and economic impacts of the Garrison Diversion Unit, as compared with alternative proposals for irrigation and municipal and industrial water supply;

(J) the environmental impacts of the water development alternatives mentioned in this section, compared with those of the Garrison Diversion Unit, including impacts on wildlife refuges, wetlands, wildlife habitat, waterfowl, and other environmental impacts as well as make recommendations to reduce and minimize those impacts; and

(K) the international impacts of the water development alternatives described in this section compared with those of the Garrison Diversion Unit and make recommendations to reduce and minimize those impacts.

All recommendations of the commission shall retain the originally authorized discount rate.]

[(3) The commission shall submit to the Secretary of the Interior, the chairmen of the Senate Committees on Energy and Natural Resources and Appropriations, and the House Committees on Interior and Insular Affairs and Appropriations, no later than December 31, 1984, a report which contains the conclusions and recommendations of the commission with regard to the items described in paragraph (2).]

[(d) The Secretary of the Interior is authorized and directed to implement the recommendations of the commission report consistent with existing authority.]

[(e) Nothing in this section shall affect any litigation initiated prior to June 1, 1984.] (Public Law 98-360, making appropriations for energy and water development, 1985).

### TITLE III—GENERAL PROVISIONS

SEC. 301. The expenditure of any appropriation under this Act for any consulting service through procurement contract, pursuant to 5 U.S.C. 3109, shall be limited to those contracts where such expenditures are a matter of public record and available for public inspection, except where otherwise provided under existing law, or under existing Executive order issued pursuant to existing law.

SEC. 302. No part of any appropriation under this Act shall be available to the Secretaries of the Interior and Agriculture for use for any sale hereafter made of unprocessed timber from Federal lands west of the 100th meridian in the contiguous 48 States which will be exported from the United States, or which will be used as a substitute for timber from private lands which is exported by the purchaser:

*Provided*, That this limitation shall not apply to specific quantities of grades and species of timber which said Secretaries determine are surplus to domestic lumber and plywood manufacturing needs.

SEC. 303. No part of any appropriation under this Act shall be available to the Secretary of the Interior or the Secretary of Agriculture for the leasing of oil and natural gas by noncompetitive bidding on publicly owned lands within the boundaries of the Shawnee National Forest, Illinois: *Provided*, That nothing herein is intended to inhibit or otherwise affect the sale, lease, or right to access to minerals owned by private individuals.]

SEC. 304. No part of any appropriation contained in this Act shall be available for any activity or the publication or distribution of literature that in any way tends to promote public support or opposition to any legislative proposal on which congressional action is not complete.

SEC. 305. No funds appropriated by this Act shall be available for the implementation or enforcement of any rule or regulation of the United States Fish and Wildlife Service, Department of the Interior, requiring the use of steel shot in connection with the hunting of waterfowl in any State of the United States unless the appropriate State regulatory authority approves such implementation and enforcement.]

SEC. 306. No part of any appropriation contained in this Act shall remain available for obligation beyond the current fiscal year unless expressly so provided herein.

SEC. 307. None of the funds provided in this Act to any department or agency shall be obligated or expended to provide a personal cook, chauffeur, or other personal servants to any officer or employee of such department or agency.

SEC. 308. Except for lands described by sections 105 and 106 of Public Law 96-560, section 103 of Public Law 96-550, section 5(d)(1) of Public Law 96-312, and except for land in the State of Alaska, and lands in the national forest system released to management for any use the Secretary of Agriculture deems appropriate through the land management planning process by any statement or other Act of Congress designating components of the National Wilderness Preservation System now in effect or hereinafter enacted, and except to carry out the obligations and responsibilities of the Secretary of the Interior under section 17(k)(1) (A) and (B) of the Mineral Leasing Act of 1920 (30 U.S.C. 226), none of the funds provided in this Act shall be obligated for any aspect of the processing or issuance of permits or leases pertaining to exploration for or development of coal, oil, gas, oil shale, phosphate, potassium, sulphur, gilsonite, or geothermal resources on Federal lands within any component of the National Wilderness Preservation System or within any Forest Service RARE II areas recommended for wilderness designation or allocated to further planning in Executive Communication 1504, Ninety-sixth Congress (House Document numbered 96-119); or within any lands designated by Congress as wilderness study areas or within Bureau of Land Management wilderness study areas: *Provided*, That nothing in this section shall prohibit the expenditure of funds for any aspect of the processing or issuance of permits pertaining to exploration for or development of the mineral resources described in this section, within any component of the National Wilderness Preservation System now in effect or hereinafter enacted, any Forest Service RARE II areas recommended for wilderness designation or allocated to further planning, within any lands designated by Congress as wilderness study areas, or Bureau of Land Management wilderness study areas, under valid existing rights, or leases validly issued in accordance with all applicable Federal, State, and local laws or valid mineral rights in existence prior to October 1, 1982: *Provided further*, That funds provided in this Act may be used by the Secretary of Agriculture in any area of National Forest lands or the Secretary of the Interior to issue under their existing authority in any area of National Forest or public lands withdrawn pursuant to this Act such permits as may be necessary to conduct prospecting, seismic surveys, and core sampling conducted by helicopter or other means not requiring construction of roads or improvement of existing roads or ways, for the purpose of gathering information about and inventorying energy, mineral, and other resource values of such area, if such activity is carried out in a manner compatible with the preservation of the wilderness environment: *Provided further*, That seismic activities involving the use of explosives shall not be permitted in designated wilderness areas: *Provided further*, That funds provided in this Act may be used by the Secretary of the Interior to augment recurring surveys of the mineral values of wilderness areas pursuant to section 4(d)(2) of the Wilderness Act and acquire information on other national forest and public

land areas withdrawn pursuant to this Act, by conducting, in conjunction with the Secretary of Energy, the national laboratories, or other Federal agencies, as appropriate, such mineral inventories of areas withdrawn pursuant to this Act as he deems appropriate. These inventories shall be conducted in a manner compatible with the preservation of the wilderness environment through the use of methods including core sampling conducted by helicopter; geophysical techniques such as induced polarization, synthetic aperture radar, magnetic and gravity surveys; geochemical techniques including stream sediment reconnaissance and X-ray diffraction analysis; land satellites; or any other methods he deems appropriate. The Secretary of the Interior is hereby authorized to conduct inventories or segments of inventories, such as data analysis activities, by contract with private entities deemed by him to be qualified to engage in such activities whenever he has determined that such contracts would decrease Federal expenditures and would produce comparable or superior results: *Provided further*, That in carrying out any such inventory or surveys, where National Forest System lands are involved, the Secretary of the Interior shall consult with the Secretary of Agriculture concerning any activities affecting surface resources: *Provided further*, That funds provided in this Act may be used by the Secretary of the Interior to issue oil and gas leases for the subsurface of [any lands designated by Congress as wilderness study areas] any Federal lands within any Forest Service RARE II areas recommended for wilderness designation or allocated to further planning in Executive Communication 1504, Ninety-sixth Congress (House Document numbered 96-119), or within any wilderness study areas designated by Congress or within any Bureau of Land Management wilderness study areas, that are immediately adjacent to producing oil and gas fields or areas that are prospectively valuable. Such leases shall allow no surface occupancy and may be entered only by directional drilling from outside the wilderness study area or other nonsurface disturbing methods. : *Provided further*, That funds provided in this Act may be used by the Secretary of the Interior to issue oil and gas leases for the subsurface of any Federal lands within any component of the National Wilderness Preservation System which is closed by law to leasing where the oil or gas resources underlying such lands are being drained through oil or gas wells on adjacent lands: *Provided further*, That any oil and gas leases issued for such lands adjacent to producing oil and gas fields or to areas prospectively valuable, or for such lands subject to drainage, shall allow no surface occupancy and may be entered only by directional drilling from outside the wilderness or by other nonsurface disturbing methods.

SEC. 309. None of the funds provided in this Act shall be used to evaluate, consider, process, or award oil, gas, or geothermal leases on Federal lands in the Mount Baker-Snoqualmie National Forest, State of Washington, within the hydrographic boundaries of the Cedar River municipal watershed upstream of river mile 21.6, the Green River municipal watershed upstream of river mile 61.0, the North Fork of the Tolt River proposed municipal watershed upstream of river mile 11.7, and the South Fork Tolt River municipal watershed upstream of river mile 8.4.

SEC. 310. No assessments may be levied against any program, budget activity, subactivity, or project funded by this Act unless such assessments and this basis therefor are presented to the Committees on Appropriations and are approved by such committees.]

SEC. 311. Employment funded by this Act shall not be subject to any personnel ceiling or other personnel restriction for permanent or other than permanent employment except as provided by law.]

SEC. 312. Funds provided for land acquisition in this Act may not be used to acquire lands for more than the approved appraised value (as addressed in section 301(3) of Public Law 91-646) except for condemnations and declarations of taking, without the written approval of the Committees on Appropriations.]

SEC. 313. Notwithstanding any other provisions of law, the Secretary of the Interior, the Secretary of Agriculture, the Secretary of Energy, and the Secretary of the Smithsonian Institution, are authorized to enter into contracts with State and local governmental entities, including local fire districts, for procurement of services in the suppression, detection, and suppression of fires on any units within their jurisdiction. [In addition, any contracts or agreements with the jurisdiction for fire management services listed above which are previously executed shall remain valid.]

SEC. 314. None of the funds provided by this Act to the United States Fish and Wildlife Service may be obligated or expended

to plan for, conduct, or supervise deer hunting on the Loxahatchee National Wildlife Refuge.

**[SEC. 315.** Funds available to the Department of the Interior and the Forest Service in fiscal year 1985 for the purpose of contracting for services that require the utilization of privately owned aircraft for the carriage of cargo or freight shall be used only to contract for aircraft that are certified as air-worthy by the Administrator of the Federal Aviation Administration as standard category aircraft under 14 CFR 21.183 unless the Secretary of the contracting department determines that such aircraft are not reasonably available to conduct such services.]

**[SEC. 316.** None of the funds provided in this Act may be used for the augmentation of grizzly bear populations in currently occupied areas of Forest Service grizzly bear habitat or the preparation of specific augmentation proposals to establish new grizzly bear populations in areas identified as suitable grizzly bear habitat in any unit of the National Park System or National Forest System unless the appropriate General Management Plan or Forest Plan provides for such augmentation and has been adopted, including having been available for public comment and review: *Provided*, That such activities may be conducted only with funds specifically justified for such purpose in an agency budget justification and subsequently approved in a report accompanying an appropriation bill making appropriations for that agency, or with funds provided for through reprogramming procedures: *Provided further*, That this is not intended to prohibit the emergency relocation of nuisance bears into currently occupied areas of congressionally designated wilderness areas within Forest Service boundaries, or into other currently occupied situation on areas where conflict between bears and humans is not likely to occur: *Provided further*, That the Secretaries of Interior and Agriculture shall provide for a public meeting at each affected National Forest and National Park Headquarters and the subsequent publication of the "Guidelines for Management Involving Grizzly Bears in the Greater Yellowstone Area" in the Federal Register, reflecting the public comments: *Provided further*, That notwithstanding any other provision of law, agencies included in this Act are authorized to reimburse permittees for such reasonable expenses as may be incurred as a result of moving permitted animals from one location to another, as may be required by the permitting agency, in order to prevent harassment and attacks by grizzly bears. Such expenses are to be determined by the agency responsible for the permitted action.]

**[SEC. 317.** The Administrator of the General Services Administration shall transfer to the Secretary of the Interior, without reimbursement, for inclusion in the War in the Pacific National Historical Park the following parcels of land:

- (1) Agat Bay, parcel 2, United States Naval Station, Guam (GSA control number 9-N-GU-426); and
- (2) GLUP: Nimitz Hill, parcel 3, Nimitz Hill Annex Area "C", Municipality of Asan, Guam (GSA control number 9-N-GU-415).]

**[SEC. 318.** The Secretary of the Interior shall quantify, in cooperation with the Secretary of Agriculture and the Governor of North Dakota, and consistent with an agreement to be negotiated between the Secretary of the Interior and the Governor of North Dakota, the number of wetland acres, including a description by quarter section, subject to waterfowl production area easements in each county; and the Secretary and the Governor shall develop a plan for the purchase of additional easement acres previously authorized by the Governor.]

**[SEC. 319.** The primary term of any geothermal lease in effect as of July 27, 1984, issued pursuant to the Geothermal Act of 1970 (Public Law 91-581, 84 Stat. 1566, 30 U.S.C. 1001-1025) is hereby extended to December 31, 1986, if the Secretary of the Interior finds that—

- (a) a bona fide sale of the geothermal resource, from a well capable of production, for delivery to or utilization by a facility or facilities, has not been completed (1) due to administrative delays by government entities, beyond the control of the lessee, or (2) such sale would be uneconomic;
- (b) substantial investment in the development of or for the benefit of the lease has been made; and
- (c) the lease would otherwise expire prior to December 31, 1986.

Notwithstanding any other provision of law, the Secretary shall not issue any geothermal lease pursuant to the Geothermal Steam Act of 1970 (Public Law 91-581, as amended) in the Island Park Known as Geothermal Resource Area adjacent to Yellowstone National Park.]

**[SEC. 320.** Notwithstanding title 5 of the United States Code or any other provision of law, after September 30, 1984, rents and charges collected by payroll deduction or otherwise for the use or occupancy of quarters of agencies funded by this Act shall therefore be deposited

in a special fund in each agency, to remain available until expended, for the maintenance and operation of the quarters of that agency: *Provided*, That for the fiscal year ending September 30, 1985, and each fiscal year thereafter, such amounts as may be collected may be expended in the agency unit or subunit (e.g. Park, refuge, hatchery, Forest, Agency office, School, Service unit, hospital, clinic, etc.) where the funds are collected: *Provided further*, That up to 10 per centum of funds collected in such unit may be transferred to another unit within the same agency.]

**[SEC. 321.** The Secretary of Energy pursuant to the Federal Nonnuclear Energy Research and Development Act of 1974 (Public Law 93-577), shall—

- (1) no later than sixty days after the date of the enactment of this Act, publish in the Federal Register a notice soliciting statements of interest in, and proposals for projects employing emerging clean coal technologies, which statements and proposals are to be submitted to the Secretary within ninety days after the publication of such notice; and

- (2) no later than April 15, 1985, submit to Congress a report that analyzes the information contained in such statements of interest and proposals, assesses the potential usefulness of each emerging clean coal technology for which a statement of interest or proposal has been received, and identifies the extent to which Federal incentives, including financial assistance, will accelerate the commercial availability of these technologies.]

**[SEC. 322.** Section 5542(b)(2)(B)(iv) of title 5, United States Code, is amended by inserting immediately before the period at the end thereof a comma and the following: "including travel by an employee to such an event and the return of such employee from such event to his or her official-duty station".]

**[SEC. 323.** It is the sense of the Congress that the Continental Scientific Drilling Program is an important national scientific endeavor, benefiting the commerce of the Nation, which should be vigorously pursued by Government and the private sector. The Continental Scientific Drilling program is an important national scientific endeavor that is vital to the understanding of the geologic evolution of the Earth and the economic value of its resources; the most effective and efficient means of realizing the fullest potential in the Continental Scientific Drilling Program is through a cooperative effort by the Department of Energy, the National Science Foundation, and the United States Geological Survey; many important commercial and scientific advances may result from the Continental Scientific Drilling Program; and many foreign nations are engaged in a comparable deep drilling program, and cooperation and coordination would be beneficial to United States efforts. It is the sense of the Congress that—

- (1) the Continental Scientific Drilling Program is an important national scientific endeavor by the United States which should be enthusiastically implemented through a joint cooperative effort among the United States Department of Energy, the National Science Foundation, and the United States Geological Survey;

- (2) the private sector should be encouraged to support the Continental Scientific Drilling Program and the participating agencies should solicit appropriate private sector participation in such program; and

- (3) the United States Government should cooperate to the extent practicable with the international community in developing this important scientific and technical activity.]

**[SEC. 324.** Notwithstanding any other provision of this joint resolution or any other law, section 401(c)(1) of Public Law 95-87 is amended by striking the word "and" after the words "in situ;" and adding the following after the word "subsidence;": "and establishment of self-sustaining, individual state administered programs to insure private property against damages caused by land subsidence resulting from underground coal mining in those States which have reclamation plans approved in accordance with section 503 of this Act: *Provided*, That funds used for this purpose shall not exceed \$3,000,000 of the funds made available to any State under section 402(g)(2) of this Act;".]

**[SEC. 325.** None of the funds provided for in this joint resolution or hereafter provided shall be used to lease the mineral interest of the United States with respect to a tract of land in Payne County, Oklahoma, totalling nine hundred sixty acres located on the Indian Base Meridian; township 19 north; range 1 east, section 22 west half; section 26 northwest quarter; section 27 north half, southeast quarter; unless such lease prohibits the surface occupancy of the land for development of those interests.]

【SEC. 326. The land acquisition and relocation authorized for Centralia, Pennsylvania, under chapter IV of Public Law 98-181 shall not require any matching share of funding from the State of Pennsylvania under Section 407(e) of the "Surface Mining Control and Reclamation Act of 1977".】

【SEC. 327. Each amount of budget authority provided in this Act, for payments not required by law, is hereby reduced by 2 per centum: *Provided*, That such reductions shall be applied ratably to each account, program, activity, and project provided for in this Act.】 (*Department of the Interior and Related Agencies Appropriations Act, 1985, as included in Public Law 98-473.*)

【The following may be cited as "The John F. Kennedy Center Act Amendments of 1984".】

【Section 9 of the Kennedy Center Act (20 U.S.C. 76o) is amended—

(1) by inserting "(a)" immediately after "SEC. 9.", and by striking out the third, fourth, and seventh sentences thereof; and

(2) by adding at the end thereof the following new subsections:】

【"(b) Effective as of the date of enactment of this subsection the obligations of the Board incurred under subsection (a) of this section shall bear no interest, and the requirement of the Board to pay the unpaid interest which has accrued on such obligations is terminated.

【"(c) There is hereby established in the Treasury of the United States a sinking fund, the Kennedy Center Revenue Bond Sinking Fund (hereinafter referred to as the 'Fund'), which shall be used to

retire the obligations of the Board incurred under subsection (a) of this section upon the respective maturities of such obligations. The Board shall pay into the Fund, beginning on January 1, 1987 and ending on January 1, 2016, the annual sum of \$200,000 in amortization of the principal amount of the obligations. Such sums shall be invested by the Secretary of the Treasury in public debt securities with maturities suitable for the needs of the Fund and bearing interest at rates determined by the Secretary of the Treasury, taking into consideration the current average market yield on outstanding marketable obligations of the United States of comparable maturities. The interest on such investments shall be credited to and form a part of the Fund. Moneys in the Fund shall be used exclusively to retire the obligations of the Board incurred under subsection (a) of this section. Adjustments of not greater than plus or minus 5 per centum may be made from time to time in the annual payments to the Fund in order to correct any gains or deficiencies as a result of fluctuations in interest rates over the life of the investments: *Provided, however*, That a final adjustment shall be made between the Board and the Secretary of the Treasury at the end of the amortization period to correct any overall gain or deficiency in the Fund. The terms of this adjustment shall be covered by a memorandum of understanding between the Board and the Secretary of the Treasury to be consummated on or before the time the initial payment into the Fund is made."】 (*Public Law 98-473, making continuing appropriations for the fiscal year 1985.*)

**Program direction and policy coordination.**—The Attorney General, aided by the Deputy Attorney General, Associate Attorney General, and other Department policy-level officials directs and supervises the programs and activities of the Department.

**Administrative review and appeals.**—This activity includes the Office of the Pardon Attorney and the Executive Office for Immigration Review (EOIR). The Pardon Attorney receives and reviews all petitions for clemency. The Executive Office for Immigration Review contains the Immigration Judge function and the Board of Immigration Appeals. EOIR was established January 1, 1983 to improve the immigration hearing and appeal process. Workload for the activity follows:

**Federal justice research program.**—This program supports applied research projects on broad systemic issues affecting the total Federal civil and criminal justice system. In the future, this program can be carried out within the National Institute of Justice's purview.

**State and local drug grants.**—This is a program to aid State and local law enforcement agencies in the exchange of intelligence information. No funding is requested for 1986 because these activities are a State and local responsibility.

**Organized crime drug enforcement.**—This program is composed of the Governors Project and the annual report. The Governors Project is an effort to enlist the aid of the Nation's Governors in achieving the overall goal of reforming State and local criminal justice systems while the annual report details statistical data collected on Task Force cases.

The United States Parole Commission makes decisions to grant or deny parole to Federal prisoners serving sentences of one year or more, sets conditions of parole, supervises parolees and mandatory releasees, re-commits parolees in the event of violations of the conditions of supervision, and determines the termination of supervision in accordance with the Parole Commission and Reorganization Act of 1976.

In 1986, this program will meet the statutory limitations by granting or denying parole within the legal time requirements to all Federal prisoners who are eligible for parole consideration. In addition to this basic function, the Commission will seek to improve the rehabilitation process by monitoring an effective parole supervision program through the U.S. probation officers. Finally, the Commission conducts ongoing research programs and administers its responsibilities under the labor and pension laws.

The Government is represented in each of the 94 judicial districts by a U.S. attorney and a U.S. marshal.

**U.S. attorneys.**—The U.S. attorneys are responsible for the prosecution of criminal offenses against the United States, the representation of the Government in civil actions in which the United States is concerned, and the initiation of proceedings for the collection of fines, penalties, and forfeitures owed to the United States. The 1986 estimates provide for the continued support of the Comprehensive Crime Control Act of 1984 (Public Law 98-473) and the new federal judgeships included in the Bankruptcy Amendments and Federal Judgeship Act of 1984 (Public Law 98-353).

**Bankruptcy matters.**—The estimates reflect the administration's proposal to discontinue the pilot U.S. trustees program at the end of 1985 unless specific action is taken by Congress to continue it.

**U.S. marshals.**—The U.S. Marshals Service is responsible for the protection of the Federal judiciary, protection of witnesses, execution of warrants and court orders and the custody and transportation of unsentenced federal prisoners. The 1986 estimates provide for the continued support of the Comprehensive Crime Control Act of 1984 and the new federal judgeships included in the Bankruptcy Amendments and Federal Judgeship Act of 1984.

**Reimbursable program.**—Federal funds in 1986 are derived primarily from the U.S. Air Force for ICBM transportation security services provided by the U.S. Marshals Service, as well as the Bureau of Prisons for the transportation of prisoners, and the Department of State for security details at the United Nations. Non-Federal funds are derived from State and local governments for witness protection and for the transportation of prisoners pursuant to State writs.

**Care of U.S. prisoners in non-Federal institutions.**—Under this program, the U.S. Marshals Service contracts with State and local jails to board Federal prisoners and detainees for short periods of time. These periods of detention occur before and during a trial and while awaiting transfer to Federal institutions after conviction. Approximately 93,500 prisoners will be boarded in approximately 820 jails at an average cost of \$37.00 per offender day in 1986.

**Cooperative agreement program.**—Agreements are negotiated with State and local governments for renovating, constructing, and equipping facilities that detain Federal prisoners.

Fees and expenses are paid to witnesses who appear on behalf of the Government in cases in which the United States is a party. Costs incurred are affected by factors over which the Department of Justice exercises little control. The U.S. attorneys and the Department's six legal divisions are served by this appropriation.

**Fact witnesses.**—Payment for attendance fees, per diem and travel is provided for witnesses who testify as to events or facts about which they have personal knowledge.

**Protection of witnesses.**—The U.S. Marshals Service is responsible for the protection of witnesses and their dependents; subsistence costs of protected witnesses and their families are paid from this fund. This program is designed to assure the safety of Government witnesses whose testimony on behalf of the Government places them or their families in jeopardy.

**Expert witnesses.**—Provides for the payment of fees and expenses associated with the preparation and presentation of testimony by technical and scientific experts in legal proceedings involving the United States.

**Mental competency examinations.**—This program provides payments to psychiatrists and physicians for court-ordered examinations of the mental competency of persons accused of offenses against the United States. Reports and court testimony relating to the examinations are included in these fees.

**Reimbursable program.**—Non-Federal funds are derived by reimbursement from States and localities to cover the costs, in whole or in part, of maintaining those State or local organized crime witnesses and their families who have been accepted into the witness protection program.

**Prevention and conciliation of community disputes.**—The Community Relations Service (CRS) provides assistance to communities in resolving disputes, disagreements, and difficulties arising from discriminatory practices based on race, color, or national origin which impair the rights of citizens or which disrupt or threaten to disrupt peaceful relations among citizens.

The 1986 request will provide CRS with resources to continue to focus on racial disputes in the areas of law enforcement, immigration, corrections, education, employment, housing, community development, and Indian rights, among others. In 1986, CRS also anticipates continuing response to conflicts involving Indo-Chinese refugees as well as the Ku Klux Klan. CRS will continue to monitor and will help communities to forestall threats of urban civil disorder.

**Reception, processing and care of Cubans and Haitians.**—This activity provides for the reception, processing, resettlement, health and mental care, and other services of Cuban and Haitian entrants who entered the United States in 1980 and each year thereafter and who subsequently have been detained by the Immigration and Naturalization Service for their undocumented or unauthorized entry into the United States.

The overall objectives of the Federal Bureau of Investigation (FBI) are to have a significant impact toward reducing criminal activity, to investigate civil matters in which the Federal Government has an interest, and to provide information to the executive branch relating to national security.

These objectives result in the FBI's being actively involved in a wide range of investigations, including traditional law enforcement investigations (bank robbery, kidnaping, fugitive, bank embezzlement, etc.), investigations involving more modern phenomena (organized crime, white-collar crime, civil rights violations, antitrust violations, etc.), and investigations of hostile intelligence activities within the United States. The Drug Enforcement Administration (DEA) reports to the Director of the FBI and the FBI has concurrent jurisdiction with DEA over Federal drug violations.

The activities through which the mission is accomplished and workload data are as follows:

*Criminal, security, and other investigations.*—This activity includes all field investigations of the Federal

Bureau of Investigation. These investigations are conducted by FBI Special Agents in 59 field offices and more than 407 resident agencies located throughout the United States and Puerto Rico. National priority investigations include white-collar crime, organized crime, terrorism and foreign counterintelligence. Other investigative areas are civil rights, fugitive, general government crimes, personal crimes, civil and general property crimes, applicant, and other investigations.

The FBI is reimbursed by other Federal agencies for certain investigative activities such as preemployment background inquiries and name checks.

This activity also includes resources devoted to national program supervision, coordination, and management of FBI investigations.

	1984 actual	1985 estimate	1986 estimate
Investigative matters .....	312,581	331,600	335,450
Arrests .....	7,457	7,510	7,707
Convictions .....	10,840	10,110	10,206

**Investigative support.**—Investigative support consists of training, forensic laboratories, attachés in foreign countries, investigative records and communications, ADP and telecommunications, and technical field support and equipment. A major capital investment of \$13.1 million is planned for the construction of a multi-purpose dormitory/classroom facility at the FBI Academy and for the expansion and improvement of utility, sewerage, and mechanical support systems which necessarily must accompany such construction. The dormitory/classroom facility will allow the FBI to meet critical needs for new agent and in-service training and will allow maximum use of the Forensic Science Research and Training Center. The FBI will continue implementation of its long-range ADP plan.

Federal training—FBI Academy:	1984 actual	1985 estimate	1986 estimate
New agents trained .....	680	300	450
In-service training .....	4,772	5,500	4,800
Federal training—field: Special agents trained in field .....	7,274	7,830	7,830

Investigative support systems: Clusters installed .....	45	119	20
Field locations served .....	96	127	150
Name checks processed .....	2,282,019	2,200,000	2,200,000

**State and local assistance.**—The FBI supports State and local law enforcement by providing training, laboratory, identification, and informational services. Emphasis is being placed on the training of State and local police instructors to enable their agencies to become more self-sufficient and, thereby, allow the FBI to concentrate its resources on high priority initiatives. Training is conducted at various locations within the United States but most courses are conducted at the FBI National Academy in Quantico, Va.

The FBI's National Crime Information Center (NCIC) and Uniform Crime Reporting (UCR) program provide criminal justice information to Federal, state and local law enforcement agencies without charge. The NCIC system contains over six million records relating to wanted and missing persons, stolen property, and criminal histories. The UCR program collects data from more than 13,000 law enforcement agencies and provides this information to criminal justice agencies and researchers, the academic community, and others.

The FBI's Identification Division is the national repository for fingerprint identification data. In 1986, approximately 7.0 million fingerprint cards will be processed. Processing of noncriminal fingerprint checks for State and local agencies and banking institutions is on a reimbursable basis.

General law enforcement training:	1984 actual	1985 estimate	1986 estimate
State and locals trained at FBI Academy .....	6,238	5,295	5,375
State and locals trained in field .....	182,226	182,226	182,226
Forensic services non-Federal:

UCR statistical reports processed .....	1,480,416	1,630,416	1,630,416

**Program direction.**—This activity includes the management, administrative support, legal, planning, evaluation, inspection, and financial functions of the FBI. Some workload measures include press releases, assistance to media, FBI publications disseminated, title III applications, undercover operations proposals, civil actions, field office audits and position classification matters.

The mission of the Drug Enforcement Administration (DEA) is to control abuse of narcotics and dangerous drugs by restricting the aggregate supply of those drugs. At the Federal level, DEA is the lead drug law enforcement agency. DEA accomplishes its objectives through coordination with State, local, and other Federal officials in drug enforcement activities; development and maintenance of drug intelligence systems; regulation of legitimate controlled substances activities; and enforcement coordination and intelligence-gathering activities with foreign government agencies.

Cooperation among Federal law enforcement agencies is extensive, especially within the 13 organized crime drug enforcement (OCDE) task forces. DEA's involvement is integral to this nationwide coordinated enforcement strategy. When coupled with the expansion of DEA/FBI cooperative efforts, overall drug enforcement capabilities have been significantly strengthened in recent years.

The means by which DEA performs its mission are summarized by the following activities;

*Enforcement of Federal law and investigations.—*

*Domestic enforcement.*—This activity aims to eliminate or immobilize major drug trafficking organizations and thereby reduce the domestic supply of illicit drugs. The measures below indicate the level of activity performed by this program.

	1984 actual	1985 estimate	1986 estimate
DEA initiated arrests.....	7,820	7,900	7,900

*Diversion control.*—By authority of the Controlled Substances Act and the Comprehensive Crime Control Act (CCCA) of 1984 (Public Law 98-473), this activity addresses the problem of the diversion of controlled substances from the legitimate channels in which they are manufactured, distributed, and dispensed. Under the CCCA, the DEA has been given expanded authority to administratively revoke or suspend the registration of any practitioner, manufacturer or distributor whose actions have resulted in the

diversion of controlled substances, if such revocation or suspension is deemed to be in the public interest. The measures below indicate the level of activity performed by this program:

The Immigration and Naturalization Service is responsible for administering laws relating to the admission, exclusion, deportation, and naturalization of aliens. Specifically, the Service inspects aliens to determine their admissibility into the United States; adjudicates requests of aliens for benefits under the law; prevents illegal entry into the United States; investigates, apprehends, and removes aliens in this country in violation of the law; and examines alien applicants wishing to become citizens.

**Enforcement.**—This activity contains most of the resources needed for preventing illegal entry into the United States and facilitating the entry of qualified persons. This includes inspection of applicants for admission, patrol of the border, and the location of undocumented aliens who are in the United States following illegal entry or violation of status after legal entry. Apprehensions are made through the inspection of farms and ranches, by the investigation of information about the location of undocumented aliens, and through investigative case work. Also included are the resources for the Service's nationwide anti-smuggling program and for the detention and deportation of undocumented aliens.

Most reimbursements received by the Service are for overtime work performed by immigration inspectors at air and sea ports of entry, as required by statute. The Airport and Airways Development Act requires that the carriers reimburse the Service for inspections performed outside normal duty hours at the convenience of the carrier.

This appropriation will provide for the custody and care of an average of 33,790 offenders and for the maintenance and operation of 47 penal institutions, 5 regional offices, and a central office located in Washington, D.C.

The appropriation also finances the boarding of sentenced Federal prisoners in State and local jails and therapeutic, community residential and other facilities for short periods of time. An average of 4,258 sentenced prisoners will be in contract facilities in 1986.

The Bureau receives reimbursements for daily care and maintenance of State and local offenders, for utilities produced by Federal Prison Industries, Inc., and for meals provided to Bureau staff at institutions.

**Inmate care, custody, and programs.**—This activity covers the cost of all food, medical supplies, clothing, welfare services and release clothing, transportation and gratuities, staff salaries, including salaries of Health Resources and Services Administration commissioned officers, and operational costs of functions directly related to providing inmate care. This activity also finances the costs of institution security; academic, social and occupational education courses; religious pro-

grams, and psychological services. In 1986, resources are requested to activate a 1,000-bed Alien Detention Center in Oakdale, Louisiana; to activate new housing units at ten existing institutions; and to provide for an anticipated increase in the average daily population.

**Institution administration and maintenance.**—This activity covers all costs associated with the general operation and maintenance of facilities. Included are functions of the warden's office, personnel, financial management, safety, staff training, mechanical services, motor pool operations, powerhouse operations, and other administrative functions.

**Contract confinement.**—This activity provides for the confinement of sentenced Federal offenders in contract State and local facilities and for the care of Federal prisoners in contract community residential centers. During 1986, major programs will operate at current levels.

**Program direction.**—This activity covers the costs of regional and central office executive direction and management support functions such as research and evaluation, systems support, financial management, personnel, and legal counsel. During 1986, major programs will operate at current levels.

The National Institute of Corrections (NIC) was established by the Juvenile Justice and Delinquency Prevention Act of 1974 to provide leadership in improving correctional programs and practices, especially in State and local organizations. The NIC awards contracts and grants to provide technical assistance to requesting correctional organizations; to maintain an information service to provide information on the latest developments, research results, et cetera, in the field of corrections; to provide training to the correctional community to improve systems and skills; and to conduct limited research and evaluation of correctional activities.

The NIC Jail Center will continue to improve the knowledge and skills of sheriffs and jail administrators, enabling them to upgrade services and practices within their jail operations.

The National Corrections Academy will offer training to local correctional personnel working in prisons, community corrections, and jails. In 1986, the Academy will train approximately 2,000 students in the areas of management theory, current issues affecting jails, institutions, probation and parole, standards implementation, inmate services and programs, and the use of volunteers and community resources.

The dissemination of relevant correctional policies, programs, practices and resource documents will continue through the clearinghouse activity of NIC.

Federal Prison Industries, Inc. (FPI), was created by Congress in 1934 and is a wholly-owned Government corporation. Its mission is to employ and train Federal inmates through a diversified program providing products and services to other Federal agencies. These operations are conducted in such a manner as to offer a minimum of competition to private industry and labor. Employment provides inmates with work, occupational knowledge and skills, plus money for personal expenses and family assistance.

The Corporation has been expanding its operations to provide additional industrial employment opportunities at existing and planned institutions.

**Budget program.**—Federal Prison Industries, Inc., is entirely self-sustaining. No appropriations are required. The amounts used by the Corporation for the administrative expenses and vocational training expenses are subject to a congressional limitation.

**Financing program.**—Revenues are derived entirely from the sale of products and services to other Federal agencies. Operating expenses are applied against these revenues, resulting in operating income or loss. Earnings surplus to the needs of the manufacturing operations, capital improvements and cash reserves are used to pay vocational training expenses, meritorious service awards, and accident compensation.

**Operating results.**—To date, Federal Prison Industries, Inc., has returned to the Treasury a total of \$82 million of retained income excess to the Corporation's needs. No contributions from budget authority have been made to offset deficits for non-revenue producing outlays since the inception of the fund.

The Justice Assistance Act of 1984 provides authority for limited financial and technical assistance to States and local units of government to reduce crime and juvenile delinquency and to provide emergency assistance for local law enforcement. The Act also continues the National Institute of Justice and the Bureau of Justice Statistics to encourage basic and applied research and to gather and disseminate accurate and comprehensive justice statistics. The Juvenile Justice and Delinquency Prevention Act of 1974, as amended, places within the Office of Juvenile Justice and Delinquency Prevention responsibility for the development, implementation, and coordination of a comprehensive juvenile justice and delinquency prevention program. The Juvenile Justice, Runaway Youth, and Missing Children's Act Amendments of 1984 added to the Office of Juvenile Justice and Delinquency Prevention the authority to assist efforts to prevent the abduction of children and locate missing children. The Office of Justice Programs provides staff support and coordinates the activities of the Office of Juvenile Justice and Delinquency Prevention, the National Institute of Justice, the Bureau of Justice Statistics, the Public Safety Officers' Benefits program, and the Bureau of Justice Assistance, which administers the State and local assistance programs.

basic and applied research for the improvement of Federal, State, and local criminal, civil, and juvenile justice systems; new methods for the prevention and reduction of crime and the detection, apprehension, and rehabilitation of criminals; and the dissemination of the results of such research efforts.

**Criminal justice statistical programs.**—Funds provide for the collection and analysis of statistical information concerning crime, victims, offenders, criminal justice processes, juvenile delinquency, and civil disputes in support of public and private policy and decisionmaking about society's response to crime; planning, coordination, implementation and provision of technical assistance to States to initiate innovative applications of communications and information systems technology for State and local criminal justice systems; and assurance of conformance with privacy and security regulations.

**State and local assistance.**—This program is broken into two parts; a block grant program which receives 80 percent of the funds and a discretionary grant program which receives the remaining 20 percent. Under the block grant program each State receives a base amount of \$250,000 with the remainder available being allocated according to the relative population of the States. Grant funds may only be used for programs which are of proven effectiveness or which have a high probability of improving the criminal justice system. Financial and technical assistance is offered to jurisdictions to replicate approaches that have been shown to work elsewhere but that States and localities would not otherwise be able to undertake.

The discretionary grant program provides funds for training and technical assistance to grantees and criminal justice personnel. National or multi-state projects and demonstration programs related to the same priority objectives authorized for the block grants will also be funded.

The amount of new budget authority for 1986 appears to be significantly greater than the 1985 appropriation. This is because the amount appropriated in 1984 for this activity was not available for obligation until the authorization was signed October 12, 1984. Thus the actual amount available in 1985 is \$69,398,000.

**Emergency assistance.**—Funds are used to provide emergency assistance to a State or locality after the Attorney General has determined that a law enforcement emergency exists. A law enforcement emergency is a situation where the capacity of local resources has been exceeded.

**Juvenile justice programs.**—Funds under this activity assist States and localities in the development of more effective education, training, research, prevention, treatment, and rehabilitation programs in the area of juvenile delinquency. No new budget authority will be requested in 1986 since the major thrusts of the grant program—deinstitutionalization of status offenders and the separation of juvenile and adult offenders—have been achieved to the extent practicable.

**Missing children.**—Funds for this program will be used to reduce the incidence of crimes against children, particularly kidnapping and sexual exploitation, by assisting families, citizen groups, law enforcement agen-

cies and government institutions in a national effort to insure the safety and protection of children.

**Public safety officers' benefits program.**—Funds are used to pay \$50,000 in death benefits to eligible survivors of public safety officers who die in the line of duty. Beginning in 1985, Federal public safety officers are also covered under this program.

**Mariel Cubans.**—This was a one time reimbursement in 1985 to certain states for part of the cost of incarcerating Mariel Cubans who had originally been paroled by the Federal Government.

**Crime control programs.**—This activity provides for expenditures from past Law Enforcement Assistance Administration programs which were not continued under the Justice System Improvement Act of 1979. Also included are programs which were authorized by the Justice System Improvement Act of 1979 which have since been terminated. These programs are the criminal justice formula grants program, national priority grants program, general criminal justice grants program, training, and crime prevention programs.

**Management and administration.**—Funds provide for executive direction and control, program operation, and administrative support of the above activities.

## GENERAL PROVISIONS—DEPARTMENT OF JUSTICE

SEC. 201. A total of not to exceed **[\$75,000]** \$120,000 from funds appropriated to the Department of Justice in this title shall be available for official reception and representation expenses in accordance with distributions, procedures, and regulations established by the Attorney General, including such limitations for reception and representation as may be established for the Department elsewhere in this Act.

[SEC. 202. Notwithstanding any other provision of law or this Act, materials produced by convict labor may be used in the construction of any highways or portion of highways located on Federal-aid systems, as described in section 103 of title 23, United States Code.]

[SEC. 203. (a) Subject to subsection (b) of this section, authorities contained in Public Law 96-132, "The Department of Justice Appropriation Authorization Act, Fiscal Year 1980", shall remain in effect until the termination date of this Act or until the effective date of a Department of Justice Appropriation Authorization Act, whichever is earlier.]

[(b)(1) With respect to any undercover investigative operation of the Federal Bureau of Investigation or the Drug Enforcement Administration which is necessary for the detection and prosecution of crimes against the United States or for the collection of foreign intelligence or counterintelligence—

(A) sums authorized to be appropriated for the Federal Bureau of Investigation and for the Drug Enforcement Administration, for fiscal year 1985, may be used for purchasing property, buildings, and other facilities, and for leasing space, within the United States, the District of Columbia, and the territories and possessions of the United States, without regard to section 1341 of title 31 of the United States Code, section 3732(a) of the Revised Statutes (41 U.S.C. 11(a)), section 305 of the Act of June 30, 1949 (63 Stat. 396; 41 U.S.C. 255), the third undesignated paragraph under the heading "Miscellaneous" of the Act of March 3, 1877 (19 Stat. 370; 40 U.S.C. 34), section 3324 of title 31 of the United States Code, section 3741 of the Revised Statutes (41 U.S.C. 22), and subsections (a) and (c) of section 304 of the Federal Property and Administrative Service Act of 1949 (63 Stat. 395; 41 U.S.C. 254 (a) and (c)),

(B) sums authorized to be appropriated for the Federal Bureau of Investigation and for the Drug Enforcement Administration, for fiscal year 1985, may be used to establish or to acquire proprietary corporations or business entities as part of an undercover investigative operation, and to operate such corporations or business entities on a commercial basis, without regard to section 9102 of title 31 of the United States Code,

(C) sums authorized to be appropriated for the Federal Bureau of Investigation and for the Drug Enforcement Administration, for fiscal year 1985, and the proceeds from such undercover operation, may be deposited in banks or other financial institutions, without regard to section 648 of title 18 of the United States Code and section 3302 of title 31 of the United States Code, and

(D) proceeds from such undercover operation may be used to offset necessary and reasonable expenses incurred in such operation, without regard to section 3302 of title 31 of the United States Code,

only, in operations designed to detect and prosecute crimes against the United States, upon the written certification of the Director of the Federal Bureau of Investigation (or, if designated by the Director, a member of the Undercover Operations Review Committee established by the Attorney General in the Attorney General's Guidelines on Federal Bureau of Investigation Undercover Operations, as in effect on July 1, 1983) or the Administrator of the Drug Enforcement Administration, as the case may be, and the Attorney General (or, with respect to Federal Bureau of Investigation undercover operations, if designated by the Attorney General, a member of such

Review Committee), that any action authorized by subparagraph (A), (B), (C), or (D) is necessary for the conduct of such undercover operation. If the undercover operation is designed to collect foreign intelligence or counterintelligence, the certification that any action authorized by subparagraph (A), (B), (C), or (D) is necessary for the conduct of such undercover operation shall be by the Director of the Federal Bureau of Investigation (or, if designated by the Director, the Assistant Director, Intelligence Division) and the Attorney General (or, if designated by the Attorney General, the Counsel for Intelligence Policy). Such certification shall continue in effect for the duration of such undercover operation, without regard to fiscal years.]

[(2) As soon as the proceeds from an undercover investigative operation with respect to which an action is authorized and carried out under subparagraphs (C) and (D) of subsection (a) are no longer necessary for the conduct of such operation, such proceeds or the balance of such proceeds remaining at the time shall be deposited in the Treasury of the United States as miscellaneous receipts.]

[(3) If a corporation or business entity established or acquired as part of an undercover operation under subparagraph (B) of paragraph (1) with a net value of over \$50,000 is to be liquidated, sold, or otherwise disposed of, the Federal Bureau of Investigation or the Drug Enforcement Administration, as much in advance as the Director or the Administrator, or the designee of the Director or the Administrator, determines is practicable, shall report the circumstances to the Attorney General and the Comptroller General. The proceeds of the liquidation, sale, or other disposition, after obligations are met, shall be deposited in the Treasury of the United States as miscellaneous receipts.]

[(4)(A) the Federal Bureau of Investigation or the Drug Enforcement Administration, as the case may be, shall conduct a detailed financial audit of each undercover investigative operation which is closed in fiscal year 1985,

(i) submit the results of such audit in writing to the Attorney General, and

(ii) not later than 180 days after such undercover operation is closed, submit a report to the Congress concerning such audit.]

[(B) The Federal Bureau of Investigation and the Drug Enforcement Administration shall each also submit a report annually to the Congress specifying as to their respective undercover investigative operations—

(i) the number, by programs, of undercover investigative operations pending as of the end of the one-year period for which such report is submitted.

(ii) the number, by programs, of undercover investigative operations commenced in the one-year period preceding the period for which such report is submitted, and

(iii) the number, by programs, of undercover investigative operations closed in the one-year period preceding the period for which such report is submitted and, with respect to each such closed undercover operation, the results obtained. With respect to each such closed undercover operation which involves any of the sensitive circumstances specified in the Attorney's General's Guidelines on Federal Bureau of Investigation Undercover Operations, such report shall contain a detailed description of the operation and related matters, including information pertaining to—

(I) the results,

(II) any civil claims, and

(III) identification of such sensitive circumstances involved, that arose at any time during the course of such undercover operation.]

[(5) For purposes of paragraph (4)—

(A) the term "closed" refers to the earliest point in time at which—

(I) all criminal proceedings (other than appeals) are concluded, or

(II) covert activities are concluded, whichever occurs later,

(B) the term "employees" means employees, as defined in section 2105 of title 5 of the United States Code, of the Federal Bureau of Investigation, and

(C) the terms "undercover investigative operation" and "undercover operation" mean any undercover investigative operation of

the Federal Bureau of Investigation or the Drug Enforcement Administration (other than a foreign counterintelligence undercover investigative operation)—

(i) in which—

(I) the gross receipts (excluding interest earned) exceed \$50,000, or

(II) expenditures (other than expenditures for salaries of employees) exceed \$150,000, and

(ii) which is exempt from section 3302 or 9102 of title 31 of the United States Code.

except that clauses (i) and (ii) shall not apply with respect to the report required under subparagraph (B) of such paragraph.]

[Sec. 204. (a)(1) Section 1201 of the Omnibus Crime Control and Safe Streets Act of 1968 (42 U.S.C. 3796) is amended by adding at the end thereof the following new subsection:]

["(g) The authority to make payments under this section shall be effective only to the extent provided for in advance by appropriation Acts.".]

[(2) Section 1202 of such Act (42 U.S.C. 3796a) is amended—

(A) by striking out "or" at the end of clause (2);

(B) by striking out the period at the end of clause (3) and inserting in lieu thereof "; and"; and

(C) by adding at the end thereof the following:

"(4) to any person employed in a capacity other than a civilian capacity.".]

[(3) Section 1203 of such Act is amended—

(A) by striking out clause (3) and inserting in lieu thereof the following:

"(3) 'firefighter'—

"(A) means a person whose duties include performing work directly connected with the control and extinguishment of fires and who, at the time the personal injury referred to in section 1201 is sustained, is engaged in such work or in another emergency operation; and

"(B) includes a person serving as an officially recognized or designated member of a legally organized volunteer fire department;"

(B) by striking out clause (5) and inserting in lieu thereof the following:

"(5) 'law enforcement officer' means a person—

"(A) the duties of whose position include performing work directly connected with—

"(i) the control of crime or juvenile delinquency;

"(ii) the enforcement of the criminal laws; or

"(iii) the protection of Federal officials, public buildings or property, or foreign diplomatic missions; and

"(B) who, at the time the personal injury referred to in section 1201 is sustained, is—

"(i) engaged in the detection of crime;

"(ii) engaged in the apprehension of an alleged criminal offender;

"(iii) engaged in the keeping in physical custody of an alleged or convicted criminal offender; or

"(iv) assaulted or subjected to the conduct of criminal activity in the line of duty, and

includes police, correction, probation, parole, and judicial officers;"

(C) in clause (6) by inserting "the United States," after "means"; and

(D) in clause (7), by striking out "fireman" and inserting in lieu thereof "firefighter".]

[(b) The amendments made by subsection (a) shall take effect with respect to injuries sustained on or after October 1, 1984.]

SEC. 202. Appropriations for "Salaries and expenses, general administration", "Salaries and expenses, United States attorneys and marshals", "Salaries and expenses, Federal Bureau of Investigation", "Salaries and expenses, Immigration and Naturalization Service", and "Salaries and expenses, Federal Prison System", shall be available for uniforms and allowances therefor as authorized by law (5 U.S.C. 5901-5902). **Job training programs.**—Provides leadership, policy direction, and administration for a decentralized system of block grants to States for job training, the Job Corps youth training program, and services to special target

groups. Staffing levels are reduced since the Job Corps program is being phased out during 1986.

**Employment security.**—Provides policy direction and management for the administration of the nationwide public employment service system and the unemployment insurance services in each State; for the settlement of trade adjustment petitions; and for a system of collecting and analyzing labor market information. Staffing levels are reduced during 1986 due to the expiration of the trade adjustment assistance program at the end of 1985.

**Financial control and management systems.**—Provides for the formulation and execution of the budget, fiscal management, audit control, debt collection, internal control, contracting services, statistical and data processing management systems, personnel direction, facilities and space management, and contractor and grantee property management. The 1986 request reflects savings to be realized by implementing a Department-wide consolidation of administrative functions to the National Capital Service Center.

**Executive direction and administration.**—Provides general management and administrative functions, including: research and evaluation, performance standards, and publications development.

**Regional operations.**—Provides for administration and management of ETA programs in the regions. The 1986 request reflects savings to be realized by implementing consolidation of some regional functions and phaseout of the Job Corps and trade adjustment assistance programs.

**Apprenticeship services.**—Promotes apprenticeship as a method of skill acquisition across a broad range of occupations and industries through a Federal-State apprenticeship administrative structure.

## TRAINING AND EMPLOYMENT SERVICES\*

\*See Part II for additional information.

For expenses necessary to carry into effect the Job Training Partnership Act, [including the purchase and hire of passenger motor vehicles, the construction, alteration, and repair of buildings and other facilities, and the purchase of real property for training centers as authorized by the Job Training Partnership Act, \$3,643,545,000] \$2,805,521,000 plus reimbursements, to be available for obligation for the period July 1, [1985] 1986, through June 30, [1986] 1987, including \$2,000,000 for the National Commission for Employment Policy, [including] and \$3,000,000 for all activities conducted by and through the National Occupational Information Coordinating Committee under the Job Training Partnership Act[, and including \$10,000,000 for service delivery areas under section 101(a)(4)(A)(iii) of the Job Training Partnership Act in addition to amounts otherwise provided under sections 202 and 251(b) of the Act: *Provided*, That no funds from any other appropriation shall be used to provide meal services at or for Job Corps centers] : *Provided*, That of the funds made available for obligation for the Summer Youth Employment and Training Program for the program years 1985 and 1986 the Secretary of Labor may reserve an amount, which, when combined with excess unexpended funds, shall not exceed fifteen percent of the total provided for the program, and allot such funds to the States so that each service delivery area receives, as nearly as possible, an amount equal to its prior year allocation for this program. For the purposes of this provision, "excess unexpended funds" shall mean for program year 1985, any amount unexpended as of September 30, 1985, in excess of ten percent of the prior year State allotment, and for program year 1986, any amount unexpended as of September 30, 1986, in excess of ten percent of the prior year State allotment. Reallocations of excess unexpended funds pursuant to this provision shall be accomplished by reducing, by an amount equivalent to the amount of excess unexpended funds, allotments made to the States: *Provided further*, That funds made available for the Job Corps for program year 1985 shall remain available for obligation through program year 1986 for costs related to the closing and securing of Job Corps Centers, including separation costs of employees of the Departments of Agriculture and Interior. [For the summer youth employment and training program authorized by the Job Training Partnership Act, \$100,000,000, in addition to amounts otherwise provided herein for these purposes, to be allocated to States so that each service delivery area receives, as nearly as possible, an amount equal to its prior year allocation for this program, to be available for obligation for the period July 1, 1984, through June 30, 1985.]

[For activities authorized by sections 236, 237, and 238 of the Trade Act of 1974, \$26,000,000.] (Department of Labor Appropriation Act, 1985.)

This account provides for a flexible and decentralized system of Federal and local programs of training and other services for economically disadvantaged persons, designed to lead to permanent gains in employment. Such programs are authorized by the Job Training Partnership Act. The account is forward funded on a July to June cycle.

**Grants to States.**—Includes block grants to provide financial assistance to States and territories to design and operate training programs to meet their training and employment needs, grants to operate the summer

youth employment and training program, and grants for programs to meet the needs of workers displaced from their jobs due to technological and other changes in the economy. Persons eligible for trade adjustment assistance will be provided training, job search, relocation assistance and related services under JTPA, title III, dislocated worker discretionary authority. Seventy percent of block grant funding will be used for training, including remedial education and basic skills, institutional training, and on-the-job training. A 1985 rescission proposal is included for the summer youth employment and training and dislocated worker assistance programs. These two programs have substantial amounts of unused 1984 funds which can be used to maintain these programs at established service levels.

**Federally administered programs.**—Provides program support for Job Training Partnership Act activities and training assistance through nationally administered programs for special segments of the population that have particular disadvantages in the labor market. Among groups to be served are Indians and other native Americans, migrant and seasonal farmworkers, and veterans. Also included is the Job Corps which is designed to provide training in both basic literacy and arithmetic skills and vocational skills for youth aged 14–21 who have severe educational and economic disadvantages, primarily through a national network of residential centers. Between October 1985 and June 1986 a phaseout of the 107 centers operated by private profit and non-profit contractors and the Departments of Agriculture and the Interior will occur. Sufficient resources are available in the 1985 appropriation to finance the program phase-down and the closing and securing of centers. A 1985 rescission in this activity is requested to effect savings in congressionally specified management categories pursuant to section 2901 of the Deficit Reduction Act of 1984. A rescission is also requested for funds provided for Trade Act Assistance programs because individuals eligible for these programs will be served under the JTPA dislocated worker assistance program.

## NOTES

Contingency obligations totaling \$210,682 for 1984 are included in State operations and State integrity activities. Excludes \$15,889 thousand in 1986 for activities transferred to Department of Labor, Bureau of Labor Statistics, salaries and expenses. Comparable amounts for 1984 (\$14,017 thousand), and 1985 (\$13,661 thousand) are included above.

**Unemployment compensation.**—State operations amounts provide administrative grants to State agencies which pay unemployment compensation to eligible workers and collect State unemployment taxes from employers. These agencies also pay unemployment benefits to former Federal personnel as well as trade adjustment assistance to eligible individuals. Grants are also provided to upgrade State automated systems for benefit payments and collection of taxes. State integrity activities provide administrative grants to State agencies to improve the integrity and financial stability of the unemployment compensation program through the establishment of a quality control program and the continuation of related activities designed to assess and reduce errors and prevent fraud, waste and abuse in the payment of unemployment compensation benefits and the collection of unemployment taxes. National activities relating to the Federal-State unemployment insurance programs are conducted through contracts or agreements with the State agencies. Beginning in 1986, certain program statistics activities will be financed through the Bureau of Labor Statistics. Contingency funds are available only to meet increases in the costs

of administration resulting from changes in State law, increases in the number of claims filed and claims paid, or increased salary costs caused by changes in State compensation plans.

**Employment service.**—The public employment service is a nationwide system providing no-fee employment services to individuals who are seeking employment and employers who are seeking workers. State employment service activities are financed by allotment to States distributed under a demographically based funding formula established under the Wagner-Peyser Act, as amended. Employment service allotments are funded on a program year basis running from July 1 through June 30 of the following year.

Employment service activities serving national needs including interstate job listings, labor certification of aliens and the Targeted Jobs Tax Credit Program which expires December 31, 1985, are conducted through specific reimbursable agreements between the States and the Federal Government under the Wagner-Peyser Act, as amended. The national labor statistics activities were transferred to the Bureau of Labor Statistics in 1985.

This account provides advances to several other accounts for the purpose of paying unemployment compensation to eligible individuals under various Federal

and State unemployment compensation laws whenever the balances in the funds prove insufficient. Advances made to the Federal employees compensation account in the Unemployment trust fund, advances made to the extended unemployment account in the Unemployment trust fund to finance the Federal supplemental compensation program through its expiration on March 31, 1985, and advances made to the Federal unemployment benefits and allowances appropriation account are non-repayable. All other advances made to the Federal unemployment account and to the Extended unemployment compensation account (both in the Unemployment trust fund) are repaid, without interest, to the general fund of the Treasury.

This account also provides advances, which are repayable with interest, to the Black Lung Disability Trust Fund for making payments from that fund whenever its balances prove insufficient.

The financial transactions of the Federal-State and railroad unemployment insurance systems are made through the Unemployment Trust Fund. All State and Federal unemployment tax receipts are deposited in the trust fund and invested in Government securities until needed for benefit payments or administrative costs. States may receive repayable advances from the fund when their balances in the fund are insufficient to pay benefits. The fund may receive repayable advances from the general fund when it has insufficient balances to make advances to States or to pay the Federal share of extended benefits.

State payroll taxes pay for all regular State benefits. During periods of high State unemployment, extended benefits, financed one-half by State payroll taxes and one-half by the Federal unemployment payroll tax, are also paid. Temporary Federal Supplemental Compensation benefits are financed with Federal general revenues. This program expires on March 31, 1985. The Federal tax pays the costs of Federal and State administration of unemployment insurance and veterans employment services, and 97% of the costs of the employment service.

The Federal employees compensation account provides funds to States for unemployment compensation benefits paid to eligible former Federal civilian personnel, Postal Service employees, and ex-servicemembers. Benefits paid are reimbursed to the Federal Employees Compensation account by the various Federal agencies. Any additional resources necessary to assure that the account can make the required payments to States will be provided from the Advances to the Unemployment Trust Fund and Other funds account.

Both the benefit payments and administrative expenses of the separate unemployment insurance program for railroad employees are paid from the unemployment trust fund and receipts from the tax on wages of railroad employees are deposited in the fund to meet expenses.

This proposal would extend coverage under the Federal-State unemployment insurance program to railroad employees. Under a special Federal transitional program, railroad workers who become unemployed after September 30, 1985, would have their claims processed by State unemployment insurance agencies and receive the same benefits as comparable nonrailroad employees in their State. Benefit amounts would be reimbursed to the State agency by the employing railroad. Without this change, the rail sector unemployment fund would be unable to pay full benefits on a timely basis in 1986. Following enactment of necessary State legislation, the transition program would conclude, and rail employees and employers would be treated like all other private sector employees and employers.

This wholly owned government corporation administers programs of mandatory termination insurance to prevent loss of pension benefits under covered private, defined-benefit pension plans if plans terminate or if multiemployer plans are unable to pay benefits. Terminated plans are taken over by the Corporation. The Corporation assumes control of their assets, administers them in a trust fund held in a private bank, and takes responsibility for paying benefits. The Corporation also provides repayable assistance to insolvent multiemployer plans when necessary to pay benefits and to forestall termination and subsequent Corporation responsibility to pay benefits.

Checks issued .....	428,774	600,600	764,400

**Financial assistance.**—If multiemployer-sponsored plans become insolvent the Corporation gives repayable loans to enable the plans to continue paying benefits. Financial assistance to an insolvent plan is made only after the plan takes a series of prescribed steps to place the plan on a sound financial basis.

**Financing.**—Sources of financing are per capita annual premiums from ongoing covered plans, assets from terminated plans, investment income, and amounts due the Corporation from the sponsors of terminating plans (employer liability). Also, the Corporation is authorized to borrow up to \$100 million from the U.S. Treasury. No borrowing is anticipated for the budget year. Terminations of single employer plans have exceeded expectations. The budget contains a request to Congress to increase the premium single employer plans must pay on each covered participant to \$7.50.

**Operating results.**—The following tables show the status of the Corporation's trust funds and the Corporation's operating results.

**Enforcement of wage and hour standards.**—The Wage and Hour Division works to obtain compliance with the minimum wage, overtime, child labor, and other employment standards under the Fair Labor Standards Act, Migrant and Seasonal Agricultural Worker Protection Act, and the wage garnishment provisions in title III of the Consumer Credit Protection Act. Prevailing wages are determined and employment standards enforced under various Government contract wage standards. In 1986, approximately 411,000 persons are expected to be aided under the Fair Labor Standards Act, through assessing employers for underpayments and securing agreements to pay the workers. Through the special minimum wage program, 445,000 persons will be aided by certificates issued and employment authorized. In Government contract compliance actions, over 42,000 persons will be aided through assessing employers for underpayments and securing agreements to pay the workers. Under the Migrant and Seasonal Agricultural Worker Protection Act program, approximately 110,000 persons will be aided through enforcement of employment standards for migrant and seasonal agricultural workers.

**Federal contractor EEO standards enforcement.**—The Office of Federal Contract Compliance Programs (OFCCP) works to ensure nondiscrimination in employment on Federal contracts. It is responsible for conducting compliance activities to assure that Federal contractors take affirmative action in the hiring and promotion of minorities and women under the authority of Executive Orders 11246 and 11375. Administration of affirmative action provisions of the Rehabilitation Act of 1973, relating to the hiring and promotion of physically and mentally handicapped individuals, is included in this activity. Also included is the administration of the Vietnam Era Veterans Readjustment Assistance Act provid-

ing for affirmative action by Federal contractors to employ and advance in employment disabled veterans and veterans of the Vietnam era. In 1986, about 5,850 compliance reviews, 1,130 complaint investigations, and 4,860 other compliance actions will be taken with respect to contractor employment practices.

**Federal programs for workers' compensation.**—Under this income maintenance activity the Employment Standards Administration administers the Federal Employees' Compensation Act, the Longshoremen's and Harbor Workers' Compensation Act, and the benefit provisions of the Federal Mine Safety and Health Act of 1977. These programs insure that eligible disabled and injured workers or their survivors receive compensation and medical benefits and a range of services including rehabilitation, supervision of medical care, and technical and advisory counseling to which they are entitled. Technical assistance is provided to the States to upgrade their workers' compensation laws.

**Executive direction and support services.**—This activity includes planning, personnel management, financial management, research and Federal/State liaison programs, management systems implementation, and data processing operations. Major goals in 1986 will include implementing financial management initiatives; continued efforts to eliminate internal fraud, waste, and mismanagement; the improvement of management information, automated data processing, and program and fiscal accountability; and legislative and regulatory improvements.

**Federal Employees' Compensation Act benefits.**—Currently, approximately 46,500 claimants are receiving long-term compensation benefits for job-related injuries, diseases, or deaths, as specified in the Federal Employees' Compensation Act (FECA) and its extensions. Pertinent medical bills are paid for compensable injuries.

Compensation benefits are paid when the injury causes loss of job time. Workers suffering noncontroverted, traumatic injuries continue in full pay status for a period not to exceed 45 days, paid by the employing agency rather than through this account. All medical costs associated with these continuation-of-pay claims are examined and paid by the FECA program. In addition, the FECA program is responsible for claims extending beyond 45 days, all nontraumatic injuries and controverted claims, medical costs associated with the above, and the review of the agency-paid continuation-of-pay claims. Costs to this account are subsequently charged back to the employing agency.

The trust fund consists of all moneys collected from the coal mine industry under the provisions of the Black Lung Benefits Revenue Act of 1981, in the form of an excise tax on mined coal tonnage. These moneys are expended to pay compensation, medical, and survivor benefits to eligible miners and their survivors, where mine employment terminated prior to 1970 or where no mine operator can be assigned liability. In addition the fund pays all administrative costs incurred in the operation of the black lung program. The fund is administered jointly by the Secretaries of Labor, the Treasury, and Health and Human Services. The Benefits Revenue Act provides for repayable advances to the fund in the event fund resources will not be adequate to meet program obligations. Such advances are to be repaid with interest. Advances outstanding at the end of the year are: 1981, \$1,510 million; 1982, \$1,793 million; 1983, \$2,151 million; 1984, \$2,497 million; 1985, \$2,863 million; and 1986, \$3,013 million.

The trust funds consist of amounts received from employers for the death of an employee where no person is entitled to compensation for such death, for fines and penalty payments, and pursuant to an annual assessment of the industry, for the general expenses of the fund under the Longshoremen's and Harbor Workers' Compensation Act, as amended.

These trust funds are available for payments of additional compensation for second injuries. When a second injury, when combined with a previous disability, results in increased permanent partial disability, permanent total disability, or death, the employer provides compensation only for the disability caused by the subsequent injury; compensation to supplement the employer's payment is provided from this fund. In addition, the fund pays one-half of the increased benefits provided under the Longshoremen's and Harbor Workers' Compensation Act, as amended, for persons on the rolls prior to 1972. Maintenance payments are made to disabled employees undergoing vocational rehabilitation to enable them to return to remunerative occupations, and the costs of necessary rehabilitation services not otherwise available to disabled workers are defrayed. Payments are made in cases where other circumstances preclude payment by an employer and to provide medical, surgical, and other treatment in disability cases where there has been a default by the insolvency of an uninsured employer. Estimates for 1985 and 1986 reflect amendments enacted in 1984 (Public Law 98-426) that limited annual cost-of-living adjustments to no more than 5 percent and revised the method for the annual assessment of the industry.

**Safety and health standards.**—New and revised standards are proposed and promulgated to protect the safety and health of workers. All new standards, except emergency temporary standards, are promulgated under procedures providing opportunity for public comment. Before any standard is proposed or promulgated, a determination is made that: (1) a significant risk of serious employee injury or health impairment exists; (2) the standard will reduce this risk; (3) the standard is economically and technologically sound; and (4) the standard is cost-effective when compared with alternative regulatory proposals providing equal levels of protection.

**Enforcement.**—The Occupational Safety and Health Act of 1970 provides for enforcement of Federal standards in States declining to assert jurisdiction and for grants to assist States in administering and enforcing State standards. Compliance with occupational safety and health standards is gained in part by the physical

inspection of plants and facilities and by encouraging the voluntary protection efforts of employers and employees. Programs are targeted to the investigation of claims of imminent danger and employee complaints, the investigation of fatal and catastrophic accidents, programmed inspections of firms with injury-illness rates that are above the national average, and inspections for serious health and safety hazards.

**Technical support.**—Technical assistance is provided on all aspects of standards setting, variances, compliance assistance, and enforcement programs. Laboratory support is provided to compliance officers. Comprehensive scientific and technical information services are made available. The economic and environmental impacts of proposed standards are analyzed.

**Compliance assistance.**—This activity contributes to the balanced use of the authority provided by the Act through a variety of employer and employee assistance activities. Under cooperative agreements, State agencies are reimbursed for 90% of the costs of providing free onsite consultation to employers upon request. Grants are awarded to assist organizations to develop their capacity to provide occupational safety and health training for workers and employers. Employers are encouraged to establish voluntary labor-management and self-inspection protection programs. This activity also provides leadership and assists agencies in implementing job safety and health programs to protect Federal workers. Professional training for compliance personnel and others with related workplace safety and health responsibilities is conducted at the OSHA Training Institute.

**Safety and health statistics.**—Statistics on occupational fatalities, injuries, and illnesses are collected directly or through grants to States and published annually to aid in the identification of occupational safety and health problems and to facilitate administration.

**Executive direction and administration.**—These activities include executive direction, planning and evaluation, management support, legislative liaison, inter-agency affairs, and administrative services.

**Enforcement.**—Enforcement of the Federal Mine Safety and Health Act of 1977 includes inspection of mines, the development and promulgation of health and safety standards, assistance in mine rescue operations, investigations of serious accidents in mines, recommendations to reduce working hazards, and on-site education and training assistance. The estimates will support all inspections specified in the Act of mines expected to be operating throughout 1985 and 1986. The reduced number of coal inspections reflects a more efficient use of inspection staff in follow-up inspections to ensure abatement of violations.

**Assessments.**—This activity assesses civil monetary penalties for violations of safety and health standards.

**Educational policy and development.**—This activity develops and coordinates MSHA's mine safety and health education and training policies and provides classroom instruction at the National Academy for MSHA personnel, other Government personnel, and the mining industry. States are encouraged to develop training programs through grants and technical assistance.

**Technical support.**—This activity provides technical services and advice to field managers, mine inspectors, State program employees, and industry management to assist enforcement or improve mining practices. It also collects and analyzes data relative to the cause, frequency, and circumstances of accidents.

**Program administration.**—This activity provides for general administrative functions and collection of civil monetary penalties.

**Executive direction.**—Provides policy direction for all programs and functions assigned to the Department. Provides guidance for the development and implementation of governmental policy to protect and promote the interests of the American worker—toward achieving better employment and earnings, promotion of labor standards, safeguarding of pension rights, promotion of affirmative action in employment, and collection and analysis of statistics on the labor force.

**Legal services.**—Includes enforcement of Federal labor statutes and legal advisory, legislative, and litigation services related to the statutes administered by the Department.

**International labor affairs.**—Integrates all international labor programs and foreign economic policy within the Department; gives Departmental guidance to the U.S. participation in international organizations

concerned with labor and employment and training problems; and provides for labor and employment and training technical services to other Government and international agencies.

**Administration and management.**—Exercises leadership in all DOL administration and management programs and services. Provides policy guidance on matters of budget and resource and personnel management. Assures equal employment opportunity to all DOL employees and applicants for employment and provides for consistent and constructive internal labor-management relations throughout the Department.

**Adjudication.**—Conducts formal hearings and renders timely decisions on claims filed under (a) the Longshoremen's and Harbor Workers' Compensation Act and its extensions, (b) the Black Lung Benefits Reform Act of 1977, (c) the Federal Employees' Compensation Act, and (d) other acts involving health and safety regulations, unfair labor practices, and other labor-related areas.

**Promoting employment of the handicapped.**—The President's Committee on Employment of the Handicapped seeks to identify and eliminate barriers standing in the way of full social and vocational opportunities for physically and mentally handicapped persons.

**Women's bureau.**—Promotes the welfare and seeks to improve the economic status of working women; seeks to increase the utilization of women in the Nation's economy; and encourages the advancement of women workers.

**Veterans employment service.**—Veterans employment and training programs are financed beginning in 1985 under the Assistant Secretary for Veterans Employment and Training.

**Civil rights.**—Ensures full compliance with title VI of the Civil Rights Act of 1964 and other regulatory non-discrimination provisions in programs receiving financial assistance from the Department of Labor and promotes equal opportunity in these programs and activities.

*State administration.*—The Disabled Veterans Outreach Program (DVOP) provides intensive employability development services to secure permanent employment for veterans with service-connected disabilities and the most disadvantaged Vietnam-era veterans. Local Veterans Employment Representatives (LVER's) provide job development, placement, and supportive services directly to veterans and act as functional supervisors of the services provided veterans by other local office staff to ensure compliance with the performance standards for services to veterans.

*Administration.*—Identifies policies and programs to serve and meet employment and training needs of veterans. Assures the adequacy of counseling, testing, job training, and job placement services for veterans through monitoring, evaluating, and providing technical assistance and training to the delivery systems providing these services. Provides information and processes complaints to help veterans, reservists, and members of the National Guard obtain employment rights provided by law.

**Administrative management services.**—Provides a broad range of administrative services, including printing, mailing, messengers, motor pool, accounting and payroll oversight, supply and property management, and safety and health services.

**Field services.**—Provides centralized services from the Department's regional offices to all agencies of the Department located in the regions. The services include personnel management, voucher audit, and administrative services. The 1986 request reflects savings to be realized by consolidating regional office services.

**Facilities management.**—Manages the Frances Perkins Building, which is the Department's headquarters, under the terms of an agreement with the General Services Administration.

**National Capital Service Center.**—Provides a range of centralized services to all agencies of the department located in the national capital area. These services include personnel, accounting, payroll and voucher payments, procurements, and contracting. The 1986 request reflects a department-wide consolidation of administrative functions.

**Penalty mail and telecommunications.**—Provides for departmental mail payments to the U.S. Postal Service and telecommunications payments to the General Services Administration.

**Financing.**—The fund is reimbursed by the agencies for which centralized services are performed at rates which return in full all expenses of operation, including reserves for accrued annual leave and depreciation of equipment.

**Operating results.**—The fund ended 1984 with a net operating income loss of \$2.8 million.

#### ALLOCATIONS RECEIVED FROM OTHER ACCOUNTS

Note.—Obligations incurred under allocations from other accounts are included in the schedules of the parent appropriations as follows:  
U.S. Information Agency, "Salaries and expenses."

### GENERAL PROVISIONS

SEC. 101. Appropriations in this Act available for salaries and expenses shall be available for supplies, services, and rental of conference space within the District of Columbia, as the Secretary of Labor shall deem necessary for settlement of labor-management disputes.

SEC. 102. None of the funds appropriated under this Act shall be used to grant variances, interim orders or letters of clarification to employers which will allow exposure of workers to chemicals or other workplace hazards in excess of existing Occupational Safety and Health Administration standards for the purpose of conducting experiments on workers health or safety. (*Department of Labor Appropriation Act, 1985.*)

#### TITLE V—GENERAL PROVISIONS

SEC. 501. The expenditure of any appropriation under this Act for any consulting service through procurement contract, pursuant to 5 U.S.C. 3109, shall be limited to those contracts where such expenditures are a matter of public record and available for public inspection, except where otherwise provided under existing law, or under existing Executive order issued pursuant to existing law.

SEC. 502. No part of any appropriation contained in this Act shall be expended by any executive agency, as referred to in the Office of Federal Procurement Policy Act (41 U.S.C. 401 et seq.), pursuant to any obligation for services by contract, unless such executive agency has awarded and entered into such contract in full compliance with such Act and regulations promulgated thereunder.

SEC. 503. Appropriations contained in this Act, available for salaries and expenses, shall be available for services as authorized by 5 U.S.C. 3109 but at rates for individuals not to exceed the per diem rate equivalent to the rate for GS-18.

SEC. 504. Appropriations contained in this Act, available for salaries and expenses, shall be available for uniforms or allowances therefor as authorized by law (5 U.S.C. 5901-5902).

SEC. 505. Appropriations contained in this Act, available for salaries and expenses, shall be available for expenses of attendance at meetings which are concerned with the functions or activities for which the appropriation is made or which will contribute to improved conduct, supervision, or management of those functions or activities.

SEC. 506. No part of the funds appropriated under this Act shall be used to provide a loan, guarantee of a loan, a grant, the salary of or any remuneration whatever to any individual applying for admission, attending, employed by, teaching at, or doing research at an institution of higher education who has engaged in conduct on or after August 1, 1969, which involves the use of (or the assistance to others in the use of) force or the threat of force or the seizure of property under the control of an institution of higher education, to require or prevent the availability of certain curricula, or to prevent the faculty, administrative officials, or students in such institution from engaging in their duties or pursuing their studies at such institution.

SEC. 507. The Secretaries of Labor, Health and Human Services, and Education are authorized to transfer unexpended balances of prior appropriations to accounts corresponding to current appropriations provided in this Act: *Provided*, That such transferred balances

are used for the same purpose, and for the same periods of time, for which they were originally appropriated.

SEC. 508. No part of any appropriation contained in this Act shall remain available for obligation beyond the current fiscal year unless expressly so provided herein.

SEC. 509. No part of any appropriation contained in this Act shall be used, other than for normal and recognized executive-legislative relationships, for publicity or propaganda purposes, for the preparation, distribution, or use of any kit, pamphlet, booklet, publication, radio, television, or film presentation designed to support or defeat legislation pending before the Congress, except in presentation to the Congress itself.

No part of any appropriation contained in this Act shall be used to pay the salary or expenses of any grant or contract recipient, or agent acting for such recipient, related to any activity designed to influence legislation or appropriations pending before the Congress.

SEC. 510. The Secretaries of Labor, Health and Human Services, and Education are each authorized to make available not to exceed \$7,500 from funds available for salaries and expenses under titles I, II, and III, respectively, for official reception and representation expenses; the Director of the Federal Mediation and Conciliation Service is authorized to make available for official reception and representation expenses not to exceed \$2,500 from the funds available for "Salaries and expenses, Federal Mediation and Conciliation Service"; and the Chairman of the National Mediation Board is authorized to make available for official reception and representation expenses not to exceed \$2,500 from funds available for "Salaries and expenses, National Mediation Board".

SEC. 511. None of the funds appropriated by this Act shall be used

to pay for any research program or project or any program, project, or course which is of an experimental nature, or any other activity involving human participants, which is determined by the Secretary or a court of competent jurisdiction to present a danger to the physical, mental, or emotional well-being of a participant or subject of such program, project, or course, without the written, informed consent of each participant or subject, or a participant's parents or legal guardian, if such participant or subject is under eighteen years of age. The Secretary shall adopt appropriate regulations respecting this section.

SEC. 512. None of the funds provided in this Act to any department or agency may be expended for the transportation of any officer or employee of such department or agency between his domicile and his place of employment, with the exception of the Secretaries of Labor, Health and Human Services, and Education, and medical officers and other health personnel on out-patient medical service who are exempted from such limitations under 31 U.S.C. 1344.

【SEC. 513. Notwithstanding any other provision of this Act, no funds appropriated by this Act may be used to execute or carry out any contract with a non-governmental entity to administer or manage a Civilian Conservation center of the Job Corps which was not under such a contract as of September 1, 1984.】

SEC. 513. *Upon the enactment of the Compact of Free Association, amounts appropriated by this Act for Federal financial assistance to the Trust Territory of the Pacific Islands shall be available only for the Republic of Palau, but only in amounts that such Republic would have received had the Compact not been enacted. (Departments of Labor, Health and Human Services, and Education and Related Agencies Appropriation Act, 1985.)*

#### NOTES

The activities financed in "Reopening consulates" in 1984 and 1985 are presented in these schedules and are proposed to be financed in this account in 1986. Budget authority and outlays are distributed by account above.

Includes (\$27,379 thousand) in 1986 for activities transferred from Administration of Foreign Affairs, Acquisition, Operation, and Maintenance of Buildings Abroad. Comparable amounts for 1984 (\$26,499 thousand) and 1985 (\$31,748 thousand) are included above.

The program described below is financed by this appropriation and by reimbursements from other agencies. Those agencies are provided with most of their administrative services overseas by the Department of State.

*Executive direction and policy formulation.*—The Secretary is assisted in the formulation of policy and direction of the Department's activities by appropriate staff officers, specialized offices, and functional and regional bureaus of the Department. Public affairs, congressional

al affairs, and inspection, audit, and investigation activities are included.

*Diplomatic relations with foreign countries.*—This includes representation of the United States and its citizens abroad, primarily for political and economic negotiations and for reporting and analysis.

*Diplomatic relations through international organizations.*—In collaboration with other Government agencies, U.S. policy is developed and coordinated on political and security issues and in such specialized fields as world health, education, and labor activities. Included are resources to support U.S. missions to international organizations abroad, as well as domestically-located missions to the United Nations and the Organization of American States.

*Conduct of consular affairs.*—Activities included are overseas and domestic visa and American citizen services. Visa services involve the issuance, denial, and adjudication of immigrant and non-immigrant visas; refugee processing; and visa fraud detection and investigation. American citizen services include the issuance of passports, emergency assistance to American citizens abroad, and passport fraud detection and investigation.

*Technical support programs.*—These encompass data processing efforts, personnel and physical security, training and development programs, worldwide telecommunications and courier services, and medical services.

*Administrative and staff activities.*—These include normal domestic and overseas administrative services such as personnel, budgeting, accounting, and procurement.

This budget reflects the restructuring of the FBO Salaries and Expenses allotted funds to the regional bureaus for building operating expenses and replacement furnishings and fixtures, also the transfer of short-term lease costs and living quarters allowances from FBO Salaries and Expenses to the regular FBO appropriation.

As a result of the Indian rupee no longer declared in excess, building operating expenses that were being funded from the FBO Special Foreign Currency appropriation are now included in the Salaries and Expenses appropriation.

These funds are used for payment of the United States' share of the expenses of 11 international fisher-

ies commissions, one international sea council, and the expenses of the respective commissioners. The commissions either conduct or plan and coordinate studies to determine measures necessary for the preservation and expansion of the productivity of fishery stocks. In addition, the Halibut and Pacific Salmon Commissions regulate their respective fisheries; the Great Lakes Fishery Commission carries on a program of lamprey eradication and control; and all the commissions are authorized to recommend conservation measures to the member governments. The sea council proposes and organizes fishery and oceanographic investigations and disseminates the results to the member governments.

## DEPARTMENT OF TRANSPORTATION

### FEDERAL HIGHWAY ADMINISTRATION

Title 23 U.S.C. ("Highways") and other supporting legislation provide authority for the various programs of the Federal Highway Administration designed to improve highways throughout the Nation. The 1982 Surface Transportation Assistance Act (STA Act) provided authorizations from 1983 through 1986 in general, and made several significant changes to the Federal-aid highways program.

In summary, the 1986 budget contemplates \$15,323.3 million in budget authority and \$13,693.5 million in outlays. The following table compares 1986 program level (obligations) with those of prior years.

The motor carrier safety mission is to reduce the risk of accidents in truck and bus highway transportation by regulation of motor carriers engaged in interstate commerce through safety management audits and roadside examinations. The program also seeks to simplify the Federal Motor Carrier Safety Regulations, increase regulatory compliance, and support commercial motor vehicle related safety research.

Financial assistance is made available to States under the following programs for construction and improvements on the National System of Interstate and Defense Highways and for urban and rural transportation programs. To avoid the proliferation of programs exempt from routine funding controls, a Federal-aid highways obligation limitation of \$13.250 billion, covering all Federal-aid programs except emergency relief and minimum allocation is proposed. Total obligations will be frozen in 1986 (and 1987) at 1985 levels.

*Interstate construction.*—Of the 42,500-mile system, 40,935 miles were open to traffic as of June 30, 1984. Construction of the Interstate system has been of high Federal priority.

*Interstate 4R.*—To preserve the Nation's investment in the Interstate highway system, a major expansion of the Interstate program of resurfacing, restoring, rehabilitation, and reconstruction has been undertaken.

*Interstate substitutions.*—Provides financial assistance to States and localities which withdraw previously approved Interstate segments and apply authorized funds to substitute highway projects. A general provision is proposed to permit funding in this activity of both highway and transit substitute projects.

*Primary system.*—Provides financial assistance to States for highway construction, reconstruction and related planning for the primary highway system.

*Secondary system.*—Provides financial assistance to States for highway construction, rehabilitation, reconstruction, and related planning and research on the secondary and urban systems in rural and small urban areas (with populations of 50,000 or less). Assistance is also provided for forest and public lands highways.

*Urbanized area transportation programs.*—Provides financial assistance to States for highway construction, rehabilitation, reconstruction, and related planning and research on the urban system in urbanized areas (with populations of more than 50,000). In addition, funds can be used for capital expenditures for buses and other public transportation facilities.

*Bridge program.*—Provides financial assistance to States to replace or rehabilitate bridges with deficiencies that are hazardous to the safety of motorists.

*Consolidated safety programs.*—Provides financial assistance to States for safety improvements to the highway systems, including hazard elimination, pavement marking, and rail highway crossings.

*Administration and research.*—Provides for executive and general administrative and research expenses of

Federal-aid highways. These funds are expended under the limitation on general operating expenses.

*Other.*—Provides for emergency relief, 85% minimum allocation, Federal lands, and other miscellaneous programs.

The improvements in the Federal-aid highway program highlighted above are designed to focus Federal involvement and funding generally on the programs of highest Federal interest (e.g., Interstate and primary), and to increase flexibility to the States to use Federal-aid program funds to address their particular needs and priorities. The budget, with one exception, maintains the authorizations included in the 1982 Surface Transportation Assistance Act. The park and parkhighway program (\$100 million) is proposed for elimination because the \$1 billion park restoration initiative, including the parkhighway program, is complete.

This limitation provides for the salaries and expenses of the Federal Highway Administration. Resources are allocated from the following programs: Federal-aid highways, highway-related safety grants, motor carrier safety, and highway safety research and development. The 1986 estimate includes reductions to reflect esti-

mated savings and productivity increases stemming from the Administration's management reform initiatives.

**Program direction and coordination.**—Provides overall direction and coordination of the highway transportation program; provides legal services for all programs; plans and directs public affairs programs; and develops and recommends policies and standards, and ensures compliance with the civil rights and equal opportunity procedures by the Federal Highway Administration and by recipients of grants-in-aid administered by the Federal Highway Administration.

**General program support.**—Formulates policy, multiyear and long-range plans and goals for highway programs, and data and analyses for current and long-range programming; conducts direct and contract research and development relating to traffic operations, new construction techniques, and the social and environmental aspects of highways; provides administrative support services for all elements of the Federal Highway Administration; and provides on-the-job training for employees of the Federal Highway Administration and training opportunities for other highway-related personnel. To allocate costs more efficiently, the budget continues to charge non-federal personnel trained by the National Highway Institute half of the cost of instruction.

**Highway programs.**—Provides engineering guidance to Federal and State agencies and to foreign governments, and conducts a program to encourage use of modern traffic engineering procedures to increase the vehicle-carrying capacity of existing highways and urban streets; assists States, other Federal agencies, and certain foreign countries in right-of-way acquisition and develops procedures for highway location selection and consideration of environmental impacts; and finances construction skill training programs for disadvantaged workers hired by contractors on federally aided highway projects.

**Field operations.**—Provides staff advisory and support services in field offices of the Federal Highway Administration; and provides program and engineering supervision of the several highway programs through 9 regional and 52 division offices.

This appropriation seeks to identify, correct, and evaluate those critical elements that contribute to loss of life, disabling injuries, and property damage on American highways. The emphasis of research is to provide workable and timely solutions to a set of critical safety problems. This program attempts to meet the increasing demands for solutions to urgent safety problems, such as traffic management in construction and maintenance zones and new longer range initiatives in safety hardware, driver aids, and system performance measurement.

Funds appropriated for this account are transferred to the general operating expenses limitation, where the program is administered in conjunction with other research and development programs of the Federal Highway Administration. The 1986 budget continues at the 1985 level.

The Motor Carrier Safety Grant program, authorized by the 1982 Surface Transportation Assistance Act, provides grants to States to enforce safety standards of intra- and interstate trucking under Federal jurisdiction. States become eligible for funds by adopting Federal truck safety standards and maintaining minimum levels of financial support. Uniform safety standards both enhance the coordination of enforcement activities and simplify the safety requirements of interstate trucking parties.

Federal grants for enforcement of commercial motor vehicle safety standards may not be used to maintain efforts already undertaken by State governments. The purpose of the grant program is to raise the level of enforcement, not to substitute Federal for State and local dollars. The 1986 budget is maintained at the 1985 level.

The Highway Revenue Act of 1956, as amended, provides for the transfer from the General fund to the Highway trust fund of revenue from the motor fuel tax and certain other taxes paid by highway users. The Secretary of the Treasury estimates the amounts to be so transferred. In turn, appropriations are authorized from this fund to meet expenditures for Federal-aid highways and other programs specified by law.

Miscellaneous Trust Funds contains the following programs financed out of the highway trust fund and reimbursed by the requesting parties.

*Cooperative work, forest highways.*—Contributions are received from States and counties in connection with cooperative engineering, survey, maintenance, and construction projects for forest highways.

*Technical assistance, U.S. dollars advanced from foreign governments.*—The Federal Highway Administration renders technical assistance and acts as agent for the purchase of equipment and materials for carrying out highway programs in foreign countries. Currently, these services are being rendered in Costa Rica, Saudi Arabia, and Kuwait.

*Contributions for highway research programs.*—In association with the General Services Administration and the Department of Defense, tests of highway equipment are conducted for the purpose of establishing performance standards upon which to base specifications for use by the Government in purchasing such equipment.

*Advances from State cooperating agencies.*—Funds are contributed by the State highway departments or local subdivisions thereof for construction and/or maintenance of roads or bridges. The work is performed under the supervision of the Federal Highway Administration.

The Federal-Aid Highway Act of 1968 authorized \$300 million for the establishment of a right-of-way revolving fund. This fund is utilized to make cash advances to the States for the purpose of purchasing right-of-way parcels in advance of highway construction and thereby preventing the inflation of land prices from significantly increasing construction costs. Although the loans are currently interest-free, an interest charge will be proposed in the reauthorization of the Surface Transportation Assistance Act.

The initial legislation for this program required the States to construct the highway and reimburse the revolving fund within seven years from the date of the advance. The 1973 Highway Act extended the required time limit on construction to 10 years and the 1976 Highway Act extended the time limit indefinitely, if deemed necessary by the Secretary.

In 1986, gross obligations will be limited to \$50 million, consistent with prior years' practice.

Operations and research programs are frozen to near the 1985 level. This is due to both an overall program level freeze and selected management savings. Within and between the program areas described below, however, funding levels vary to reflect current priorities.

**Rulemaking programs.**—Covers rulemaking activity relative to the promulgation of Federal motor vehicle safety standards for new and used motor vehicles, tires, and equipment; automotive fuel economy standards required by the Energy Policy and Conservation Act; international harmonization of standards; and regulatory reform.

**Enforcement programs.**—Provides for the enforcement of programs described under the rulemaking activity, including manufacturer compliance with motor vehicle safety and automotive fuel economy standards, investigation of safety-related motor vehicle defects, and surveillance of odometer tampering.

**Highway safety programs.**—Provides for technical assistance to the States in the conduct of their highway safety programs; demonstration programs emphasizing alcohol countermeasures and safety belt usage to reduce highway fatalities and injuries; and operation and improvement of the national driver register. A national safety belt usage outreach program will be underway in 1985 and 1986 to implement the Secretary of Transportation's decision on Federal Motor Vehicle Safety Standard 208, occupant protection. The program will promote the usage of safety belts and passive restraints. In 1986, the program will be funded entirely from existing appropriations and transfers of unobligated balances from other National Highway Traffic Safety Administration and Federal Highway Administration accounts.

**Research and analysis.**—Provides motor vehicle safety and highway safety research and development in support of all NHTSA programs, including the collection and analysis of data to identify safety problems, develop alternative solutions, and assess costs, benefits, and effectiveness. Research will continue to improve vehicle crashworthiness performance, accident avoidance characteristics of cars, trucks and motorcycles, and support for increasing safety belt usage and alcohol control. The budget includes funds to continue the development of a national accident data collection program to improve problem identification, regulatory reform, and program evaluation activities.

**Office of the Administrator.**—Provides for the overall executive direction, coordination and implementation of agency programs. Includes legal, public affairs, civil rights and executive secretariat support for programs of this administration.

**General administration.**—Provides for the planning, program evaluation, and basic administrative and supporting services for programs of this administration.

The Motor Carrier Safety Program is being transferred from the Federal Highway Administration under a proposal to combine it with the National Highway Traffic Safety Administration.

The motor carrier safety mission is to reduce the risk of accidents in truck and bus transportation by regulation of motor carriers engaged in interstate commerce.

This account represents portions of the operations and research account authorized under 23 U.S.C. 403 and financed from the Highway Trust Fund for the following activities:

**Highway safety programs.**—Provides for headquarters and field staff to assist the States in the conduct of their highway safety and demonstration programs, and

to develop and implement a national safety belt usage outreach program.

**Research and analysis.**—Provides for highway safety research in support of NHTSA programs, including the collection and analysis of data to determine the relationship between driver performance characteristics and crashes causing death or personal injury. Research is also undertaken to improve safety belt usage and alcohol control. The 1986 budget includes funds to continue the development of a national accident data collection program to improve problem identification, regulatory reform, and program evaluation activities.

**Office of the Administrator.**—Provides for the pro rata contribution to the cost of executive direction, coordination and implementation of agency programs. Includes legal, public affairs, civil rights and executive secretariat support for programs of this administration.

**General administration.**—Provides for the pro rata contribution to the cost of planning, program evaluation, and basic administrative and supporting services for programs of this administration.

Proposed legislation would transfer to this account highway safety research and development programs previously administered by the Federal Highway Ad-

ministration. This proposal would transfer certain research and development activities authorized under the provisions of 23 U.S.C. 403 to the National Highway Traffic Safety Administration. The transfer is part of the larger highway safety program consolidation proposed in the 1986 budget.

**Safety formula grants.**—Grant allocations are determined on the basis of a statutory formula established under 23 U.S.C. 402. Individual States use this funding in areas which have the greatest potential for achieving safety improvements and reducing traffic fatalities and accidents. Activities are centered predominantly on efforts to control the drinking driver; stimulate activities to improve child passenger safety and increase safety belt usage; increase traffic law enforcement; improve the quality of emergency medical services, principally through additional training of State and local personnel; improve the collection and analysis of traffic accident data; and establish and maintain a computerized traffic recordkeeping system.

**Safety formula grant administration.**—Under 23 U.S.C. 402, up to 5 percent of amounts authorized for safety formula grants are permitted to be used for reimbursement to the operations and research account for grant administration. Funds of \$5.2 million are required to cover the expenses of administering Federal grant activity in 1986.

**School bus driver training.**—Grant allocations were determined on the basis of a statutory formula established under 23 U.S.C. 406. Funds were distributed to States for school bus driver training.

**Alcohol safety incentive grants.**—Grant allocations will be made under 23 U.S.C. 408, to those States which adopt and implement effective programs to reduce traffic safety problems resulting from persons driving while under the influence of alcohol. These grants will be made in accordance with established criteria and will only be used to implement and enforce such programs. Public Law 97-364 establishes a two-tier grant system. The first tier, i.e., basic grant, amounts to 30 percent of each State's apportionment under the safety formula grant program (section 402 program) if the State meets specified minimum criteria. The second tier is a supplemental grant of up to 20 percent of the State's apportionment if it qualifies for the base grant and implements additional specified alcohol traffic safety measures. Public Law 98-363 established a third tier to encourage States to enact stiffer penalties for drunk driving. In 1986, the total program level will increase consistent with the States' ability to use the funds.

**Safety education and information.**—Pursuant to the Surface Transportation Assistance Act of 1978 as amended, additional pilot projects will be implemented during 1985 to demonstrate and evaluate programs to achieve maximum measurable effectiveness through the use of television and radio in reducing traffic accidents, injuries and deaths.

**Occupant protection program.**—In 1986, it is proposed to utilize \$10 million authorized under section 209 of Public Law 95-599 for the safety education and information program to fund the national occupant protection program. These funds are required in 1986 to continue the implementation of the information program announced in conjunction with the Federal Motor Vehicle Safety Standard 208, occupant protection decision.

Proposed legislation would transfer to this account highway-related safety standards previously administered by the Federal Highway Administration. This proposal would centralize the implementation and maintenance of the provisions of 23 U.S.C. Section 402 within a single agency, thereby, improving the administration of the grant program.

The Motor Carrier Safety Grants Program would be transferred from the Federal Highway Administration under proposed legislation. The Motor Carrier Safety Grant Program, authorized by the 1982 Surface Transportation Act, provides grants to States to enforce safety standards of intra- and interstate trucking under Federal jurisdiction. States become eligible for such funds by adopting Federal truck safety standards. Uniform safety standards both enhance the coordination of enforcement activities and simplify safety requirements in the interstate trucking industry.

The 1986 budget is frozen at the 1985 level, minus selected management savings.

**Executive direction and administration.**—Executive direction provides for the salaries and related expenses of the Office of the Administrator, Chief Counsel, Civil Rights and Public Affairs. Together with the Office of Policy, these offices resolve national problems confronting the railroad industry and provide top level support to the Federal Railroad Administrator. The Office of Administration consists of salaries and related expenses and contractual support for day-to-day operations. Included are the Office of Personnel and Training, Management Systems, Procurement, and Financial Services. In 1984 and 1985, funds are transferred in from the research and development and rail service assistance accounts, respectively, to cover increased pay costs.

**Policy support.**—This office will continue to put emphasis on planning and developing a consistent body of government policy that will contribute to an efficient and privately-owned national freight railroad network, while minimizing the burden of the general taxpayer.

**Reimbursable program.**—In 1984, the National Highway Traffic Safety Administration shared the expense of enhancing certain accounting systems. In addition, the Maritime Administration and the Office of the Secretary shared the expense of contracting a grain transportation study with the University of Illinois. Any future activities will be of this same nature.

Budget authority is being decreased in 1986 because of large carryover balances from prior year appropriations. This does not reflect a reduction in the program.

**Equipment, operations, and hazardous materials safety.**—This program provides for conduct of research to ensure the safe performance of equipment, including critical components, operating practices and the transport of hazardous materials in the railroad environment.

**Track safety.**—This program provides for the conduct of research to ensure the safe performance of the track structure, including all of its critical components, and other elements of the railroad right-of-way.

**Track/train safety testing.**—This program provides for the conduct of research to ensure the safe performance of the railroad system operating as a whole, including the dynamic interaction between rail vehicles and the track structure on which they travel.

**Other.**—This program area consists of carryover funds for contractual support for other special research activities and are non-recurring.

**Administration.**—This program provides for the salaries and related expenses for technical expertise and management functions to administer the preceding railroad safety research programs.

**Reimbursable program.**—Other Government agencies provide reimbursements for information on research and development testing, evaluation and analyses.

**Local rail service assistance.**—This program provides discretionary and formula grants to all States for rail planning and for track rehabilitation of light density lines. No funds are requested in 1986.

**Administration and special projects.**—This program provides for contract funds and salaries and related expenses to administer Federal assistance programs, labor-management activities, railroad rehabilitation and improvement financing funds, grants to the National Railroad Passenger Corporation and the Conrail labor protection program.

**Loan guarantee defaults.**—Interest due to the Department of Treasury on rollover of promissory notes issued in prior years will be paid off in a 1985 supplemental request.

**Washington Union Station.**—The Department of Transportation assumed responsibility for leasing Washington Union Station in 1984. In 1986 funds will be used for rental, maintenance, operation and security services of that facility, as in 1985.

This program is being frozen at the 1985 level, with the exception of an increase of six staff-years and new budget authority for the automated track inspection program.

**Federal enforcement.**—This program provides salaries and related expenses for safety field operations designed to reduce the number of railroad related accidents/incidents. Federal inspectors monitor railroads for compliance with Federal laws with specific emphasis on passenger and hazardous material routes. In addition, this staff provides training to Federal, State and railroad industry personnel on related safety enforcement activities, including programs dealing with the problem of alcohol and drug abuse. Budgeted field positions for 1986 will increase from the 1985 level of 379 to 385.

**Automated track inspection program.**—One set of FRA's automated track inspection vehicles has been transferred to Guilford Industries under a licensing agreement. The license requires Guilford to make the data from automated inspections available to FRA track inspectors upon request. Another set of vehicles completed a system survey of Amtrak routes on November 30, 1984, and is stored in Philadelphia pending disposition. The final car, self-propelled T-10, is operating under the supervision and planning of FRA's Office of Safety and will survey approximately 25,000 miles of track in 1986.

**Safety regulation and program administration.**—This program funds the salaries and related expenses of safety headquarters personnel, data gathering and dissemination, planning and evaluation activities and administration of the State grants-in-aid program. The ongoing responsibility of this program is to issue new or revised standards, procedures, and regulations to provide a safer railroad environment. This program also administers technical training and management of rail-highway grade crossings.

**Grants-in-aid for railroad safety.**—This program assists States in paying salaries and expenses incurred for State safety inspectors on a 50-percent cost-sharing basis. No funds are requested in 1986.

## CONRAIL LABOR PROTECTION—Continued

## 【(INCLUDING TRANSFER OF FUNDS)】—Continued

vide protection to Conrail employees deprived of employment because of actions taken under the 3R Act as amended by the Northeast Rail Service Act of 1981. This amount includes \$40 million available for 1985. No funds are requested in 1986 because it is expected that Conrail will be returned to the private sector by then and labor protection will be a corporate, rather than Federal, responsibility.

**Conrail title V labor benefits.**—The Northeast Rail Service Act of 1981 terminated labor protection benefits under title V of the Regional Rail Reorganization Act and authorized a new Conrail labor protection program, on October 1, 1981, the effective date of the repeal of title.

**Rock Island labor protection.**—This program provides benefits for former Rock Island Railroad employees as authorized in the Rail Safety and Service Improvement Act of 1982. The 1984 appropriation provided one-time only funding of \$35 million for the program.

**Construction.**—This program provides for the upgrading of rail passenger service between Boston, MA, and Washington, DC. Activity in 1985 will remain high as construction continues on projects obligated in earlier years. Major construction projects that will continue into 1985 include Boston South Station, Providence Station, Boston Service Facility, Wilmington Service Facility, catenary installation at the Washington Service Facility, installation of signal systems, right-of-way improvements jointly funded with the Massachusetts Bay Transit Authority, final bridge work in New Jersey and Connecticut, and parking garages at New Haven, Wilmington, and New Carrollton stations. \$2.2 billion has been appropriated for this program through 1984. No funds are requested for this program in 1986. At the end of 1985, responsibility for any additional construction on the Northeast Corridor will transfer to the National Railroad Passenger Corporation (Amtrak). However, outlays will continue from prior year obligations.

**Reimbursable program.**—Collections are made from Federal and non-Federal agencies for cost-shared improvement projects, such as stations.

**System engineering/program management and administration.**—System engineering involves system modeling, standards, design, and requirements criteria. In 1985 the primary effort will be to complete and audit a number of projects being closed out. At the end of 1985 all Northeast Corridor Improvement Program work scope and responsibility will be transferred to Amtrak.

**Public grade crossing elimination.**—No funds are requested for this program in 1986; however, outlays will continue from prior year appropriations.

## MEMORANDUM

2299 U.S. contingent liability for guaranteed loans outstanding, end of year .....

The National Railroad Passenger Corporation (Amtrak) is a private corporation. Federal assistance is provided through the Department of Transportation in the following manner:

**Operating grants and State assisted routes.**—No funds are requested in 1986, because Amtrak's performance to date has failed to justify continued massive federal subsidies of interstate, commuter, and state-assisted rail passenger service.

**Labor protection and capital grants.**—No funds are requested in 1986. Outlays are anticipated from prior year obligations. Labor protection payments, insofar as they exist, are a responsibility of the corporation.

**Loan guarantee default.**—In 1984, DOT borrowed from the Treasury to pay off a loan the Federal Financing Bank had made to Amtrak, which Amtrak was unable to pay. A supplemental appropriation was made in 1984 to repay the Treasury borrowing and accrued interest. No funds are requested in 1986.

This appropriation finances personnel and other support costs associated with managing and directing UMTA program responsibilities including executive direction, policy, budget, financial management, civil rights, public affairs, legal, grants delivery and management, technical assistance, and research and demonstration support. The reduction in Administrative Expenses from 1985 to 1986 results primarily from a planned 27 percent reduction in staffing, consistent with termination of selected mass transit programs. In addition, the 1986 request includes an adjustment for the President's proposed pay reduction of 5 percent.

This appropriation provides for grants and contracts for the purpose of developing, testing, and demonstrating new equipment, techniques, and methods (analytical, operational, and managerial), and improving mass transportation services; grants to public bodies to provide for advanced training for personnel in the mass transportation field; and grants to public and private, nonprofit institutions to assist in establishing or continuing programs which combine professional training and research in the field of mass transportation. In addition, grants are provided to enhance the effective utilization of human resources and to ensure the participation of minority business enterprises in the transit industry. No appropriation is requested for 1986. Approximately \$24.6 million in unobligated balances will be deferred to fund the program in 1986. In addition to the continuing program, areas of emphasis in 1986 will

include private sector transit alternatives, transit safety and security, operations and management practices, transit technology and alternative fuels, construction engineering and project management oversight, maintenance, and human resources.

Grants under this activity are authorized by the Federal-Aid Highway Act of 1973 as amended (23 U.S.C. 103(e)(4)) whereby States and localities may withdraw previously approved segments of the Interstate System and substitute transit or other highway capital projects. Through 1985, this appropriation provided funding for substituted transit projects while funding for substituted highway projects was included in the budget of the Federal Highway Administration. Beginning in 1986, no funding is requested under this account. Eligible substituted transit project commitments are proposed to be funded through the Interstate Transfer program under the Federal-Aid Highways Account (Trust Fund), administered by the Federal Highway Administration. For 1986, a \$700 million obligation level is estimated.

The National Capital Transportation Amendments of 1979 authorized \$1.7 billion in Federal funds for the construction of the federally committed portion of the Washington Metrorail system. Through 1985, \$740 million has been appropriated to the Washington Metrorail system leaving a balance of \$960 million remaining under this authorization. An appropriation of \$250 million is requested for 1986 to continue construction of the system.

Through 1985, this program provided grants on the basis of legislative formulas to State and local agencies

for mass transportation capital and operating expenses. Capital expenses included construction, acquisition, modernization, and improvement of existing transit facilities and equipment, employment of new technology, and technical planning assistance. Operating assistance expenses included administration, maintenance and operation of transit systems.

The authorization for Section 5 of the National Mass Transportation Assistance Act of 1974 terminated at the end of 1983 and was replaced by the Section 9 program. Some unobligated Section 5 carryover is expected to be available in 1986.

No appropriations are requested under this heading in 1986. Rather, it is proposed that formula grants for capital expenses be funded from the Mass Transit Account. This proposal is further explained below under the account heading Formula Capital Grants (Trust Fund).

## FORMULA CAPITAL GRANTS (LIMITATION ON OBLIGATIONS)

Total obligations for grants under the contract authority authorized for fiscal year 1986 in section 21 of the Urban Mass Transportation Act of 1964, as amended (49 U.S.C. 1601 et seq.), shall not exceed \$1,100,000,000. (Additional authorizing legislation to be proposed.)

## LIQUIDATION OF CONTRACT AUTHORIZATION

For payment of obligations incurred in carrying out section 21 of the Urban Mass Transportation Act of 1964, as amended (49 U.S.C. 1601 et seq.) administered by the Urban Mass Transportation Administration, \$55,000,000, to be derived from the Highway Trust Fund and to remain available until expended.

For 1986, legislation is being proposed to amend Section 21 of the Urban Mass Transportation Act of 1964 to provide that funds available in the Mass Transit Account be allocated on the basis of legislative formulas to State and local agencies for mass transit capital investments rather than on a discretionary basis as in the last two years.

Since benefits derived from mass transit accrue primarily to localities and in light of the mounting pressure on the Federal deficit, it is appropriate to reduce the Federal role to one of managing and allocating the penny gas tax for transit. Since this penny gas tax for transit is collected nationally, it is also appropriate that it be allocated nationally so that, to the greatest degree

possible, all payers of this tax may receive benefits from it.

Furthermore, the legislative proposal will not provide funding to subsidize public transit operating costs. Operating decisions are made at the local level and, therefore, are a local responsibility.

An obligation limitation of \$1.1 billion, consistent with annual receipts from the one penny per gallon motor fuel tax for mass transit, is proposed for 1986.

**Urban formula grants.**—Funding is proposed to be allocated on the basis of legislative formulas to State and local agencies for mass transportation capital activities in urbanized areas with populations of 50 thousand or more.

**Non-urban formula grants.**—Funding is proposed to be allocated to States by a legislative formula for mass transportation capital activities in nonurbanized areas with populations below 50 thousand.

The Surface Transportation Assistance Act of 1982 established the Mass Transit Account in the Highway Trust Fund and finances it with the equivalent of one cent per gallon of motor fuels taxes paid by highway users. The Secretary of the Treasury estimates the amounts to be so transferred. In turn, appropriations for liquidating cash are authorized to be made from the mass Transit Account to meet expenditures for mass transit capital investments.

The status of the fund is as follows (in thousands of dollars):

	1984 actual	1985 estimate	1986 estimate

## 【DISCRETIONARY GRANTS (LIMITATION ON OBLIGATIONS)】

【None of the funds in this Act shall be available for the implementation or execution of programs in excess of \$1,120,000,000 in fiscal year 1985 for grants under the contract authority authorized in section 21(a)(2)(B) of the Urban Mass Transportation Act of 1964, as amended (49 U.S.C. 1601 et seq.): *Provided*, That this limitation shall not apply to any authority for section 21(a)(2)(B) previously made available for obligation: *Provided further*, That no funds shall be made available for the proposed Woodward light rail line in the Detroit, Michigan, area until a source of operating funds has been approved in accordance with Michigan law: *Provided further*, That the Woodward line restriction shall not apply to alternatives analysis studies.】

## LIQUIDATION OF CONTRACT AUTHORIZATION

For payment of obligations incurred in carrying out section 21(a)(2) of the Urban Mass Transportation Act of 1964, as amended (49 U.S.C. 1601 et seq.), administered by the Urban Mass Transportation Administration, 【\$450,000,000】 \$720,000,000 to be derived from the Highway Trust Fund and to remain available until expended. In 1983, the first year of the Mass Transit Account, authorized funding was apportioned for capital mass transit projects in this account in urban and non-urban areas in accordance with legislative formulas. Funding in this account authorized for 1984 and 1985 was allocated for capital mass transit projects under Discretionary Grants which provided additional financial assistance over and above the Section 9 and 18 Formula Grants programs.

**Urban formula grants.**—For 1983, funding was allocated on the basis of legislative formulas to State and local agencies for mass transportation capital activities in urbanized areas with populations of 50 thousand or more.

**Non-urban formula grants.**—For 1983, funding was allocated to States by a legislative formula to nonurbanized areas with populations below 50 thousand.

**Discretionary grants.**—For 1984 and 1985, funding has provided financial assistance at the discretion of the Secretary (though often directed by Congress) for planning and capital investments in mass transportation. The Discretionary Grants program has been used to fund selected bus projects, rail modernization projects, and new fixed guideway systems. In addition, a small amount of discretionary funds were used for selected grants to support planning, innovative techniques, and special elderly and handicapped transportation services. In 1986, no funding is requested for discretionary allocation. Rather, a separate formula grant program is proposed to ensure that resources will be more fairly allocated on the basis of a legislative formula to provide capital assistance for investments in mass transit projects, from the nationally derived motor fuel tax.

Continued Federal funding under the Discretionary Grants account for major new fixed guideway investments, or new starts, can result in the development of many inefficient, expensive transit systems that will cost more to operate than other available transportation alternatives. Since additional funding will not be made available for new major fixed guideway facilities in 1986 and subsequent years, current available funding for 1984 and 1985 will be utilized to complete committed fixed guideway projects now under construction.

**Operations.—**

**Operation of traffic control system.**—This activity covers the operation of a national system of air traffic management in the United States, its territories and possessions on a 24-hour basis. With the aid of radar, communications, and other facilities, traffic management personnel at 24 centers monitor and control en route flights of civil and military aircraft conducted under instrument conditions to assure safety and to expedite the flow of traffic. Terminal control facilities are operated at major civil airports to guide traffic movements at and in the vicinity of the airports. A system of flight service stations provides weather and aeronautical information to pilots, processes flight plans and provides inflight advisory and emergency services.

**Installation and materiel services.**—This activity covers procurement, contracting and materiel management programs; administrative communications services provided through the Federal Telecommunications System (FTS); supply support for the National Airspace System (NAS) and agency aircraft, except for aircraft related to the research and development program; leased space for which payment is made to General Services Administration (GSA); and other logistics support functions.

**Maintenance of traffic control system.**—This activity covers direction and engineering services related to the maintenance, improvement, and modification of facilities and equipment in the traffic control system; operational leased communications; and technical operation and maintenance of a national network of air navigation aids and traffic control facilities in the United States, and its territories and possessions.

**Administration of aviation standards program.**—This activity exists to promote flight safety of civil aviation by assuring: the airworthiness of aircraft; the competence of pilots, aviators and aviator technicians; the adequacy of flight procedures and air operations; the evaluation of inflight facility performance for compliance with prescribed standards. In addition, this activity covers the safe operation and the effective development, utilization, and maintenance of the

FAA's aircraft fleet. Resources are also included under this activity for the conduct of the Federal Government's civil aviation security program, and to ensure the medical fitness of personnel in the national airspace system.

**Development direction.**—This activity covers the planning, direction, and evaluation of the engineering and development program, the direct project costs of which are financed under the Research, engineering and development appropriation.

**Administration of airports program.**—This activity includes the following work programs: (1) administration of an airport grant program for airport planning and development; (2) maintenance of the national plan of integrated airport systems; (3) development and application of airport engineering and safety standards; (4) collection, processing, and dissemination of airport data; and (5) safety certification of airports serving air carriers utilizing aircraft with a seating capacity of more than 30 passengers.

**Direction, staff and supporting services.**—This activity covers administrative and housekeeping functions such as administrative supplies, communications, and payrolls at Oklahoma City, Atlantic City, and regional offices. Included also for these locations are activities for direction and management, public affairs, international aviation, legal, accounting, budget, civil rights, personnel management, labor relations, communication control, data systems, and management systems. Also included are centrally managed items, such as Federal employees compensation payments, unemployment compensation, and penalty mail.

**Centralized training.**—This activity funds the cost of instructor staff and related services, supplies and equipment, student travel and per diem costs, and cost of planning, supervising and directing training for the agency's predominantly technical workforce. The training is conducted generally on a centralized basis at the FAA Academy located at Oklahoma City and the FAA Management Training School at Lawton, Oklahoma.

The Headquarters Administration Appropriation provides administrative services at the Washington Headquarters location of the Federal Aviation Administration. The subactivities financed by this appropriation are:

**Procurement.**—Directs the management and procurement of materiel and supplies for the Washington headquarters.

**Executive direction.**—Establishes and directs the implementation of policy and broad technological, operational, and managerial concepts.

**Communications control.**—Provides key agency officials with effective executive telecommunications.

**Public affairs.**—Insures that relevant information concerning FAA is consistently presented in a factual and timely manner.

**Legal.**—Provides legal counsel and advice for the handling of all legal matters with which FAA is concerned, in order to insure conformance with all legal requirements of all applicable laws, rules, regulations, and orders.

**Planning/policy.**—Recommends FAA policy and plans; identifies needed national air system changes; and performs economic analysis of regulations.

**Accounting.**—Provides accounting, financial advisory, and audit liaison services.

**Budget.**—Identifies and defines budgetary needs and assures that they are effectively presented to the Office of the Secretary of Transportation, Office of Management and Budget, and Congressional Committees, and that funds and other resources available to the agency are effectively utilized.

**Civil rights.**—Assures full and affirmative implementation of civil rights and equal opportunity precepts within the Federal Aviation Administration.

**International aviation.**—Insures adequacy of international aviation systems policies, maintains effective liaison with foreign governments.

**Personnel management.**—Develops, issues, and guides the personnel policies of the FAA.

**Labor relations.**—Provides advice and assistance on labor relations and employee conduct and discipline programs, and administers national labor agreements.

**Management systems/data systems.**—Develops and administers the implementation and operation of FAA organizational plans, management systems and controls, and administrative standards and procedures; provides data processing, editorial, graphics, and publishing services.

**Centralized training.**—Plans, develops, coordinates, and directs the training of the FAA workforce.

This appropriation finances maintenance, operations, management, and capital investment costs for equipment and minor facility projects at the federally owned Washington National and Washington Dulles International Airports, which serve the Metropolitan Washington area.

The operation of the airports is conducted on a commercial basis with revenues derived from landing fees, concession activity, and lease arrangements being deposited as receipts in the general fund of the Treasury. The direct operating costs and capital investment are financed by direct appropriation.

In 1986, Washington National is expected to produce an operating profit of \$17.4 million and Washington Dulles International an operating profit of \$5.4 million, resulting in a combined operating profit of \$22.8 million. The deduction of \$8.1 million in depreciation and interest for the two airports results in a net profit of \$14.7 million. Management initiatives will result in conversion of 25 positions to contract performance and a savings of one position resulting from the FAA payroll consolidation plan.

The rate structures and concession arrangements are established so as to assure the recovery of operating costs, interest expenses, and an appropriate return on the Government's investment during the useful life of the airports.

The following table reflects activity at the airports:

## AIRCRAFT PURCHASE LOAN GUARANTEE PROGRAM

The Secretary of Transportation may hereafter issue notes or other obligations to the Secretary of the Treasury, in such forms and denominations, bearing such maturities, and subject to such terms and conditions as the Secretary of the Treasury may prescribe. Such obligations may be issued to pay any necessary expenses required pursuant to any guarantee issued under the Act of September 7, 1957, Public Law 85-307, as amended (49 U.S.C. 1324 note). The aggregate amount of such obligations during fiscal year [1985] 1986 shall not exceed \$125,000,000. Such obligations shall be redeemed by the Secretary from appropriations authorized by this action. The Secretary of the Treasury shall purchase any such obligations, and for such purpose he may use as a public debt transaction the proceeds from the sale of any securities issued under the Second Liberty Bond Act, as now or hereafter in force. The purposes for which securities may be issued under such Act are extended to include any purchase of notes or other obligations issued under the subsection. The Secretary of the Treasury may sell any such obligations at such times and price and upon such terms and conditions as he shall determine in his discretion. All purchase, redemptions, and sales of such obligations by such Secretary shall be treated as public debt transactions of the United States. (*Department of Transportation and Related Agencies Appropriation Act, 1985, as included in Public Law 98-473.*)

The fund currently provides direct support for the aviation insurance program authorized under title XIII of the Federal Aviation Act.

Income to the fund is derived from premium deposits for premium insurance coverage issued, income from authorized investments, and binder fees for nonpremium coverage issued. The binders provide aviation insurance coverage for U.S. air carrier aircraft used in connection with certain Government contract operations entered into by the Department of Defense (DOD) and Department of State (DOS). There exist indemnity agreements under which the DOD and DOS agree to reimburse the Department of Transportation for all payments on account of losses to air carriers sustaining damage to their aircraft by an insured peril with respect to the aircraft operating under contract to DOD and DOS.

Administrative costs are paid from the Aviation Insurance Revolving Fund, into which are credited receipts from premiums, salvage, and interest on assets of the fund (49 U.S.C. 1536).

The Tax Equity and Fiscal Responsibility Act of 1982 (26 U.S.C. 9502) provides for the revenues received in the Treasury from the 8% passenger ticket tax and certain other taxes paid by airport and airway users to be transferred from the general fund of the Treasury to the Airport and Airway trust fund. The Secretary of the Treasury estimates the amount to be so transferred. In turn, appropriations are authorized from this fund to meet obligations for airport planning and development and noise compatibility planning and programs; facilities and equipment; research, engineering and development; and a portion of operations and headquarters administration.

The status of the fund is as follows (in thousands of dollars):

Primarily because of penalty provisions built into the 1982 Act, actual appropriations from the Trust Fund for FAA's cost of operating the airport and airway system has been substantially lower than amount contemplated in the Act and have resulted in overall user share of system cost well below the 85 percent share appropriately allocated to non-Federal users.

Legislation will be proposed, effective in 1986, to amend the provisions governing Trust Fund share of FAA operating cost to provide for a flat 75 percent recovery rate, to eliminate the penalties, and terminate the intragovernmental payments now transferred to the Trust Fund from the general fund of the Treasury, equivalent to imputed interest on the unexpended balance of the Trust Fund.

## GRANTS-IN-AID FOR AIRPORTS (LIQUIDATION OF CONTRACT AUTHORIZATION) (AIRPORT AND AIRWAY TRUST FUND)

The Airport and Airway Improvement Act of 1982 (Public Law 97-248, as amended) authorizes the Secretary of Transportation to incur obligations for grants, airport planning and development, and noise compatibility planning and programs through 1987. Obligations in 1986 are proposed to be \$1,017 million, the newly authorized 1986 amount provided in the Airport and Airway Improvement Act of 1982, as amended by the Surface Transportation Assistance Act of 1982.

Under this appropriation, the Federal airway system is improved by the installation of new equipment and the construction and modernization of facilities to keep pace with aeronautical activity. The appropriation also finances major capital investments required by other agency programs, such as aircraft for flight inspection of facilities, and related training, and experimental fa-

cilities for the engineering and development program. The operating costs of facilities procured under this appropriation are financed under the Operations appropriation.

The funding requested for 1986 is in accordance with the Federal Aviation Administration's comprehensive plan for modernizing and improving air traffic control and airway facilities services.

Budget activities include:

*Air route traffic control centers.*—Long-range radar, communications and automation equipment provide air traffic controllers information on aircraft positions at distances up to 185 miles.

*Airport traffic control towers.*—Terminal area radar, communications and automation equipment aid air traffic controllers in handling air traffic at distances up to 60 miles.

*Flight service facilities.*—Flight service stations and associated facilities provide flight assistance to pilots, particularly general aviation pilots.

*Air navigation facilities.*—Very high, medium and low frequency facilities are used to define airways and air routes and provide distance, direction and weather information to pilots. Precision landing systems, distance measuring equipment and visual lighting aids assist pilots in making final approaches to airport runways.

*Housing, utilities, and miscellaneous facilities.*—This activity includes general facility support requirements which apply to a wide range of FAA installations.

*Aircraft and related equipment.*—This activity includes the procurement, modification and/or replacement of aircraft and equipment both to inspect the accuracy and other characteristics of navigation and traffic control aids from the air and to conduct research and development activities.

*Development, test and evaluation facilities.*—This activity provides for leasing and improvements of the plant and facilities at the Federal Aviation Administration Technical Center in Atlantic City, NJ.

The FAA conducts engineering and development programs to improve the national air traffic control system and to increase its productivity and capacity to meet the expected air traffic demands of the future. The agency also administers aviation medical research

aimed at increasing the personal effectiveness of air traffic controllers and the safety of aircrewmembers.

These programs are conducted by the agency's technical personnel, and through contracts with qualified private firms, universities, individuals and other Government agencies.

**Air traffic control.**—Existing technology is applied to air traffic control problems to keep the current system operating safely and system improvements are made to increase the productivity and capacity of the current system. These improvements include the development and implementation of a collision avoidance capability which operates independently of the ATC system and development of the Voice Switching and Control System which will provide improved voice communication switching between controllers within an ATC facility, between controllers at adjacent facilities, and between controllers and pilots over air-ground radio outlets.

This program also includes activities designed to insure that the air traffic control system will satisfy the demands of the 1990's, particularly those affecting the interface between pilots and traffic controllers. This work includes developing new traffic control concepts; assessing their technical, economic, and operational feasibility and conducting selected feasibility demonstrations.

**Advanced computer.**—This activity modernizes the air traffic control system by providing for an advanced automation system to accommodate the demand for air traffic services forecasted for the post-1990's. Program efforts include design, development, and testing of a host computer and advanced automation system.

**Navigation.**—This activity provides for modernization, expansion, and improvement of the common navigation system facilities. The requested funds will support research and development activities for enroute navigation to assess and develop standards for candidate navigation systems for use in the post-1995 period.

**Aviation weather.**—This activity provides for a program, coordinated with the Departments of Defense and Commerce, to modernize the acquisition, processing, dissemination, and display of weather information tailored to the needs of aviation users. Development of weather radars and weather processors, and research into hazardous weather phenomena in terminal areas will be emphasized.

**Aviation medicine.**—Aeromedical research is directed toward identifying and eliminating those physiological and psychological factors harmful to personnel engaged in operating the traffic control system or which may jeopardize flight safety.

**Aircraft safety.**—This activity covers the development of regulations for an accident prevention program designed to promote flight safety of civil aircraft. Development of systems and devices to prevent and deter sabotage in the civil air transportation system will also continue. Funds requested will continue research in fire safety, including cabin fires, and continue research in transport, general aviation, and flight safety.

**Environment.**—Principal efforts under this activity are the development of data to support rulemaking and to minimize the undesired environmental effects on the public attributable to the air transportation system. Research

will continue into air pollution and noise control, primarily associated with certification and enforcement requirements.

The Airport and Airway Improvement Act of 1982 authorizes use of the Airport and Airway trust fund as the source of financing a portion of FAA's operating costs. Cost allocation studies by the FAA show that, overall, 85% of the cost of the FAA's programs is attributable to the users contributing to the trust fund. In

1986, it is proposed accordingly that 75% of the Operations and Headquarters Administration appropriations be financed from the trust fund to provide an overall 85% recovery. Appropriate legislation will be transmitted to effect this level of financing.

Funds for operating expenses represent more than two-thirds of the total Coast Guard program level. To carry out its duties the Coast Guard employs multipurpose vessels, aircraft, and shore units, strategically located along the coasts and inland waterways of the United States and in selected areas overseas. Amounts requested for the activities described below reflect a freeze of the 1985 appropriation adjusted for costs of increased pay and operation of new equipment. Savings will be achieved through management initiatives including consolidation of stations consistent with recommendations of the Grace Commission, implementation of efficiencies in the commercial vessel safety inspection

program, and increased utilization of contracting out of support activities.

**Search and rescue.**—The Coast Guard maintains a nationwide system of boats, aircraft, cutters, and rescue coordination centers on 24-hour alert capable of responding to notice of a distress incident.

**WORKLOAD DATA**

Persons otherwise assisted .....	144,610	146,580	148,810
Property saved (in thousands of dollars) .....	654,070	661,000	668,000
Value of property assisted (in thousands of dollars) .....	1,966,060	1,987,900	2,007,900

**Aids to navigation.**—A network of manned and unmanned aids to navigation is maintained along our coasts and on our inland waterways to insure the safe passage of the mariner. Loran stations are operated in the United States and abroad to serve the needs of the armed services and marine and air commerce. Administrative control is exercised over the construction, maintenance, and operation of bridges across navigable waters of the United States.

**Marine safety.**—The Coast Guard reviews plans and specifications for the construction or alteration of merchant vessels; conducts periodic inspections; investigates casualties; and sets standards, procedures, and practices under which merchant marine personnel are licensed and regulated. The Coast Guard operates a boat safety standards program and provides boater information and support of the Coast Guard Auxiliary and the individual State boating safety programs.

**WORKLOAD DATA**

Potential units affected .....	583,000	588,000	593,000
Classroom instruction (student lessons in millions) .....	1.35	1.40	1.45
Courtesy marine examinations (auxiliary) .....	271,747	265,000	260,000

**Marine environmental protection.**—Under various laws, international agreements, and conventions, the Coast Guard is charged with the prevention of damage to the marine environment, response to pollution incidents, and the enhancement of environmental quality. Also, under statutory requirements the Coast Guard must safeguard and secure U.S. ports and waterways.

**WORKLOAD DATA**

	1984 actual	1985 estimate	1986 estimate
Environmental protection:			
Aerial oil pollution patrols (hours) .....	1,600	1,600	1,600
Oil and hazardous substances spills .....	12,500	12,500	12,500
Cargo transfer operations monitored .....	9,722	9,838	9,955
Oil pollution removal operations .....	320	320	320
Port safety:

Waterfront facilities inspected .....	3,151	3,512	3,512
Harbor patrols (operating hours) .....	64,682	66,234	67,010

**Enforcement of laws and treaties.**—Maritime enforcement of laws and treaties is accomplished by cutters and aircraft conducting patrols to enforce international agreements and Federal laws on the high seas and waters over which the U.S. exercises jurisdiction. Fisheries enforcement involves living marine resources, while general law enforcement concerns drug smuggling, illegal immigration, hijacking/theft of vessels and other unlawful activities.

**WORKLOAD DATA**

	1984 actual	1985 estimate	1986 estimate
Cutter operating hours:			
Fisheries enforcement .....	56,093	64,000	64,000

General law enforcement .....	18,045	19,500	20,400
Seizures—vessels .....	223	230	270

**Ice operations.**—Polar ice operations are performed by icebreakers in support of programs of the Coast Guard and other agencies, the latter on a reimbursable basis. A council of user agencies is in the process of recommending a preferred method for sharing the costs of polar icebreaking operations, which will achieve a reasonable balance among the elements of equity, efficiency, and administrative simplicity, as recommended by the Polar Icebreaker Requirements Study Interagency Report. Domestic ice operations are performed on the navigable waters of the United States. Also included are certain marine science activities.

**WORKLOAD DATA**

	1984 actual	1985 estimate	1986 estimate
Polar ice operations: Icebreaker deployment days .....	662	670	670
Domestic ice operations:

Aircraft reconnaissance operating hours .....	200	300	300
Vessels assisted .....	440	440	440
International Ice Patrol: Aircraft hours .....	590	500	500

**Military readiness.**—The Coast Guard operates as a service in the Navy in time of war or national emergency at the direction of the President. During peacetime, an effective state of military preparedness is maintained through individual and unit training, by joint naval training exercises, and by Coast Guard single and multiship operations.

**WORKLOAD DATA**

	1984 actual	1985 estimate	1986 estimate
Cutters participating in naval fleet training exercises .....	41	45	45
Cutter days .....	554	575	575
Joint service or Coast Guard exercises .....	57	59	60
Units participating .....	180	200	202

**Headquarters administration.**—Headquarters administration provides funding for administrative services at the headquarters location of the Coast Guard, including executive direction; budget, planning and policy; command, control, communication, and operations; financial management; legal; engineering; civil rights; and personnel and health services for the Coast Guard.

**Capehart family housing indebtedness.**—The following schedule shows the status of the indebtedness assumed from the Department of Defense for transfer of family housing units for assignment as public quarters.

This appropriation provides for the major acquisition, construction, and improvement of vessels, aircraft, shore units, and aids to navigation, excluding minor acquisitions, alterations, additions, renewals, and replacements funded in the Operating expenses appropriation where estimated costs of a program are \$125 thousand or less, or where renewals and replacements involve less than 75 percent of the original facility. Most of the facilities financed by this appropriation are multi-mission in nature and are required by the Coast Guard in the performance of its operational and regulatory missions.

**Vessels.**—By the end of 1986, significant progress will have been made in the acquisition of new cutters and the renovation and modernization of existing ones. The 1986 appropriation will provide for the construction of one river tender and the vessel renovation and modernization of three 210-foot medium endurance cutters and two 378-foot high endurance cutters, and the polar icebreaker, the CGC NORTHWIND.

**Aircraft.**—Forty-two of the ninety-six HH-65A Short Range Recovery (SRR) helicopters will be delivered by the end of 1986. Considerable progress will be made in acquiring aircraft sensors to enhance search and rescue and law enforcement missions. Twenty HC-130 Search Radars will be ordered and a multi-year procurement of Forward Looking Infra-Red sensors for the new SRR helicopter will be initiated.

**Shore facilities.**—Recent shore facility projects have emphasized both new construction and renovations, improvements, or replacements of existing facilities. 1986 will see the initiation of major renovation efforts at Support Centers Seattle, WA, and Alameda, CA, and Training Center Petaluma, CA. Particular emphasis has been and will be placed on upgrading shore facilities to insure adequate support of new and renovated high and medium endurance cutters. Projects have also been initiated to provide advanced electronic data processing and communications to Coast Guard commands to enhance productivity and management decisions.

This appropriation provides the Government's share of the costs for altering or removing bridges determined to be obstructions to navigation. Generally, bridges to be altered were built with what are now insufficient vertical and/or horizontal clearances for free navigation on navigable waters of the United States. The 1986 budget proposal freezes funding at the 1985 appropriation level.

#### RETIRED PAY

For retired pay including the payment of obligations therefor otherwise chargeable to lapsed appropriations for this purpose, and payments under the Retired Serviceman's Family Protection and Survivor Benefits Plans, and for payments for medical care of retired personnel and their dependents under the Dependents Medical Care Act (10 U.S.C., ch. 55), **[\$330,800,000]** \$351,800,000. Coast Guard Reserve Forces provide qualified individuals and trained units for active duty in time of war or national emergency. This objective is accomplished through formal training and augmentation of Regular Forces in the performance of peacetime missions during domestic emergencies and during routine and peak operations. Funds requested reflect a freeze of the 1985 appropriation adjusted for costs associated with increases in pay and Selected Reserve strength. The program will provide a Ready Reserve of 17,800, including a Selected Reserve of 12,500.

**Initial training.**—This activity encompasses direct costs of initial training for three categories of nonprior service trainees.

**Continuing training.**—Direct costs of officer and enlisted drills and annual active duty for training are programmed under this activity.

**Operation and maintenance of training facilities.**—All costs for the operation and maintenance of Reserve training facilities are programmed under this activity.

**Administration.**—This activity encompasses all administrative costs of the Reserve Forces program.

**Miscellaneous services for other accounts.**—The Coast Guard performs functions related to mobilization for the Selective Service System for which reimbursement is received.

The Coast Guard's Research and Development program seeks to maintain and expand the technological base in areas crucial to the successful execution of the Coast Guard's operational and regulatory missions. The R&D program includes the development of techniques, methods, hardware, and systems which directly contribute to increasing the productivity and effectiveness of operating forces. Tests and evaluations are carried out in conjunction with research and development. The 1986 request, which represents a freeze of the 1985 appropriation, will provide for: development of improved search and rescue capability, including support for replacement of patrol boat (WPB) capability; development of improved aid to navigation performance techniques; development of improved commercial vessel safety and recreational boating safety knowledge bases to support establishment, modification, or discontinuance of various regulations and standards; development of systems and procedures for control and cleanup of pollutant spills; development of techniques to support law enforcement efforts; and research, development, test, and evaluation in broad program, energy, and multi-mission project areas.

This fund insures immediate cleanup of oil or other hazardous polluting substances spilled into the navigable waters of the United States, adjoining shorelines or waters of the contiguous zone. The fund is used when a spill occurs and the responsible owners or operators of a vessel, onshore facility, or offshore facility do not accomplish immediate cleanup with their own resources. Expenditures from the fund are later reimbursed by the responsible owners or operators.

The Internal Revenue Code of 1954, as amended, and the Federal Boat Safety Act of 1971 (Public Law 92-75), as amended, provide for the transfer of Highway Trust Fund revenue derived from the motor boat fuel tax and certain other taxes to the Aquatic Resources Trust Fund. The Secretary of the Treasury estimates the amounts to be so transferred. In turn, appropriations are authorized from this fund to meet expenditures for recreational boating safety assistance and other programs specified by law.

## MARITIME ADMINISTRATION

The programs administered by the Maritime Administration (MarAd) are authorized by the Merchant Marine Act, 1936, and other related acts. The Agency promotes the development and maintenance of an American merchant marine for commercial and defense needs; grants subsidy aid for operation of vessels by American flag operators; conducts maritime research and development; insures construction loans and mortgages for construction or conversion of vessels; maintains in a standby condition Government-owned fleets; and trains cadets to become licensed merchant ship officers.

The following table shows the funding for the MarAd programs, including proposed rescissions and supplements, for which detail is furnished in the budget schedules:

The Merchant Marine Act of 1936, as amended, provides that operating subsidies shall be paid to qualified operators of U.S.-flag vessels in order to promote the maintenance of a U.S. Merchant Marine capable of providing essential ocean-shipping services. A strong U.S. Merchant Marine is important to the national security and to the development of its foreign commerce. Subsidies are designed to achieve a parity between certain U.S. and foreign ship operating costs. The 1986 request provides funds for existing operating-differential subsidy contracts. No new contracts are included. The administration will seek to eliminate the "double subsidy" associated with the carriage of military and premium rated cargo, a recommendation of the Grace Commission.

The major objective of the research and development program is to develop methods, equipment, and systems to make the U.S. shipbuilding and ship operating industries more efficient, competitive, and productive.

In 1986, the research and development program, which is frozen at the 1985 funding level, will focus on projects in the major program areas as follows:

**Advanced ship development.**—This program involves projects to achieve greater productivity in the building of ships and projects directed toward the development of new and improved ship machinery.

**Advanced ship operations.**—This program supports improving the efficiency, competitiveness, and safety of U.S.-flag ship operations through the development of advanced management operating techniques using computerized systems, improving fleet control by means of advanced navigation/communication systems, improving cargo handling methods and equipment, and improving intermodal cargo movement.

**Research facilities.**—This program provides for research facilities operations, and investigation and simulation of new problems related to ship operations, safety, and design.

**Advanced maritime technology.**—This program investigates advanced technological concepts and requirements, and formulates and conducts specific systems analysis and systems development projects.

The 1986 budget proposes a freeze on MarAd operating and training expenses at the 1985 level adjusted for various administrative savings and one-time 1985 costs. The specific activities funded are as follows:

*Maritime education and training—*

*Merchant Marine Academy.*—This activity provides for operating the Merchant Marine Academy at Kings Point, N.Y. The objective of the Academy is to instruct and prepare selected personnel for service as officers in the merchant marine. Consistent with the Grace Commission recommendation to reduce the number of students at the Academy, the budget pro-

poses a 5-percent enrollment reduction in the next entering class. Approximately 230 officers will graduate in 1986.

*State marine schools.*—Assistance is provided to States in the operation and maintenance of maritime academies or colleges for the training of merchant marine officers. This assistance involves direct payments to the State schools, student incentive payments to cadets, and maintenance of vessels provided for use as training ships. An estimated 700 officers will graduate from these schools in 1986.

*Additional training.*—This activity provides for costs of administration of the Merchant Marine Academy and State marine school programs at the bureau level, and for the conduct of supplementary training courses required for merchant marine personnel.

*National security support capability.*—This activity provides for maintaining U.S. merchant ships in the National Defense Reserve Fleet for service as naval and military transport auxiliaries in time of war and national emergency and for emergency preparedness activities.

*Operating programs—*

*Development of waterborne transportation systems.*—This activity provides for direct technical and administrative costs of programs for development and construction of cost-competitive U.S. merchant ships in sufficient quantity to meet national maritime objectives.

*Use of waterborne transportation systems.*—This activity provides for the direct technical and administrative costs of promoting the effective development and use of merchant ships and ship systems. Program objectives involve increasing U.S.-flag participation in U.S. foreign trade and reducing or eliminating operating subsidies when no longer required to sustain a viable shipping operation.

*General administration.*—This activity provides for overall executive direction and general administrative functions of the Maritime Administration. Reductions in directly funded staffing reflect planned increases in the use of contracted services and other management efficiencies.

The Merchant Marine Act of 1936, as amended, established the Federal ship financing fund to assist in the development of the U.S. merchant marine by guaranteeing construction loans and mortgages on U.S.-flag vessels built in the United States.

The Omnibus Budget Reconciliation Act of 1981 (Public Law 97-35) established a limitation on MarAd obligations guaranteed and outstanding at any time under Title XI of the Merchant Marine Act amounting to \$9.5 billion. The proposed 1986 limitation on commitments of \$900 million, \$300 million of which would be used only if needed in the interest of national security, is consistent with the administration's 1982 Maritime policy. However, due to market conditions, the 1986 estimate of anticipated commitments is only \$300 million.

The estimated level of new commitments and guaranteed construction loans and mortgages, and the estimated aggregate level of guarantees in force and commitments outstanding are shown in the following table:

## Public enterprise funds—Continued

## FEDERAL SHIP FINANCING FUND—Continued

Total outstanding commitments and guarantees, end of year.....	7,841	7,303	6,888	6,673

**Budget program.**—Administrative expenses incurred in the operation of the Federal ship financing fund are paid from income to the fund. Reimbursements to the Operations and training appropriation are anticipated at \$4,000 thousand in 1986. The estimate also includes \$4,000 thousand for expenses incidental to protection of vessels acquired primarily through defaults. Direct loans in the form of advances to operators to forestall possible defaults are estimated at \$15 million in 1986. In 1986 the estimate includes \$100 million as a contingency against possible defaults.

**Financing.**—The fund receives income from insurance premiums on construction loans and mortgages, fees, and interest on U.S. Government securities and mortgages held directly.

The Maritime Administration is authorized to reactivate, operate, deactivate, and charter merchant vessels. These operations are financed by the Vessel operations revolving fund. In addition, the fund is available to finance the necessary expenses to protect, maintain, preserve, acquire, and use vessels involved in mortgage foreclosure or forfeiture proceedings instituted by the United States; and to process advances received from Federal agencies.

**Budget program.**—The 1986 program anticipates an increased level of maintenance and upgrading of the Ready Reserve Fleet and activation and operation of ships as directed by the Navy. In 1984, Marad began acting as agent for the Navy in the acquisition of ships. Projected acquisition costs are \$83 million in 1985 and \$32 million in 1986.

**Financing.**—Expenses are principally financed by reimbursements from Federal agencies.

The Maritime Administration is authorized to insure against loss or damage from marine war risks until commercial insurance can be obtained on reasonable terms and conditions. This insurance includes war risk hull and disbursements interim insurance, war risk protection and indemnity interim insurance, second seamen's war risk interim insurance, and war risk cargo insurance standby program. Authority to underwrite insurance expired September 30, 1984. Legislation to reauthorize this program will be proposed to the 99th Congress.

**Budget program.**—It is estimated that during 1986 insurance coverage will be provided for approximately 562 U.S.-flag ships, 2,568 Lighter Aboard Ship (LASH) and Seabee barges, and 75 foreign-flag ships owned by U.S. citizens. The program also includes provision for second seamen's war risk insurance covering the crews of 11 vessels under contract with the Military Sealift Command.

**Financing.**—The War risk insurance revolving fund was established under 46 U.S.C. 1288. It receives income from binder fees, insurance premiums, interest from investments and claim reimbursements from other Federal agencies. Underwriting agents' fees and expenses, appraisal contractors' fees, and insurance claims are paid from this income.

The Saint Lawrence Seaway Development Corporation is a wholly owned Government Corporation responsible for the operation, maintenance and development of the United States portion of the St. Lawrence Seaway between Montreal and Lake Erie. Major priorities are to control Seaway Corporation costs and to encourage increased use of the Seaway system. The Seaway Corporation is focusing on ways to promote and market the Seaway system. The Corporation's 1986 budget reflects the activities to accomplish these objectives as follows:

**Administrative expenses (limitation).**—This program provides for management and administration of the Corporation.

**Operations.**—The program provides for operation of all facilities and for planning, engineering and development activities. Operations are conducted on a 24-hour day, 7-day week with maintenance functions being performed throughout the year.

**Replacements and improvements.**—This program provides for necessary replacement of aging equipment, machinery, and tools in addition to continuing improvements toward a safer and more economical system.

On the basis of current traffic projections and no increase in toll levels, the Corporation estimates its revenues for 1986 to reach \$13.0 million, which it proposes to apply as follows: (1) \$10.4 million for operations consisting of \$1.8 million for administrative expenses and \$8.6 million for operations, maintenance and development, and (2) \$2.6 million for replacements and improvements. There are no new programs budgeted for 1986.

The Research and Special Programs Administration serves as a research, analytical, and technical development arm of the Department for multimodal research and development, as well as special programs. Particular emphasis is given to pipeline safety and transportation of hazardous cargo by all modes of transportation.

Responsibilities of the Administration are carried out under the following activities:

**Operations.**—Provides for salaries and expenses and for central supervisory and management functions, including a management information system necessary for overall planning and direction. Provides for management and execution of transportation programs involving passenger and cargo security, aviation data management (previously conducted by the Civil Aeronautics Board), national emergency plans/preparedness, and management of the Transportation Safety Institute. Provides for hazardous materials and pipeline safety regulatory and enforcement programs.

**Research and development.**—Provides for research to support the hazardous materials and pipeline safety regulatory programs, to complement research programs of other operating administrations.

**Grants.**—Provides for grants-in-aid to State agencies that conduct a gas pipeline safety program as authorized by the Natural Gas Pipeline Safety Act of 1968.

Despite an increase in personnel to collect and process aviation data, the 1986 budget is at nearly the same level as the 1985 budget, due to selected management savings.

The Working Capital Fund finances multidisciplinary research, evaluation, and analysis activities undertaken at the Transportation Systems Center (TSC) in Cambridge, MA. The fund is financed through negotiated agreements with the Office of the Secretary, Departmental operating administrations, and other governmental elements requiring the Center's capabilities. These agreements also define the activities undertaken at TSC.

**General administration.**—This appropriation finances the costs of policy development and central supervisory and coordinating functions necessary for the overall planning and direction of the Department. It covers the immediate secretarial offices as well as those of the assistant secretaries and the general counsel. Also covered are staff assistance and supervision of general management and administration in the Department and execution of functions carried out by the Civil Aeronautics Board prior to January 1, 1985. In addition, the Office of the Secretary provides services on a reimbursable basis for technical assistance to transportation projects, and participation in intergovernmental planning groups. The budget proposes to freeze 1986 funding at the 1985 level adjusted for the termination of the Essential Air Service and various administrative reductions.

**The Minority Business Resource Center.**—This activity provides contractual support for the Center, which now operates in the Office of the Secretary to assist minority business firms, entrepreneurs, and venture groups in securing contracts and subcontracts arising out of projects that involve Federal funding.

The Secretary of Transportation, through powers of delegation and review, now administers the section 419 subsidy program, which was added as part of the Airline Deregulation Act of 1978. Subsidy under this program is paid to airlines—primarily commuter carriers. No funds are requested for this program in 1986, and legislation will be proposed for its termination, effective September 30, 1985.

This appropriation finances those research activities and studies concerned with planning, analysis, and information development needed to support the Secretary's responsibilities in the formulation of national transportation policies. The budget proposes 1986 funding at the 1985 level adjusted for various administrative reductions.

The program is carried out primarily through contracts with other Federal agencies, educational institutions, nonprofit research organizations, and private firms.

**Transportation policy and planning.**—This research provides the foundation for development of transportation policy, for coordination of national level transportation planning, and for dealing with such difficult issues as regulatory modernization, energy conservation, environmental and safety impacts of transportation.

**Special programs.**—Projects provide technical studies and other data in support of the Secretary's decisions involving State and local level planning, consumer affairs, commercial space transportation, science and technology and evaluation of departmental programs.

**University research and internships.**—This activity provides assistance to colleges, universities and their students to conduct research in the field of transportation. Special emphasis is placed on assisting historically Black colleges and universities in taking part in transportation research and aiding minority students in preparing for careers in transportation.

The working capital fund finances common administrative services that are centrally performed in the interest of economy and efficiency in the Department.

Services rendered are charged for at rates that return in full all operating expenses, including a normal reserve for accrued annual leave and depreciation of equipment. The fund is reimbursed by the operating administrations and offices being served.

The activities of the working capital fund have been consolidated as follows:

*Publishing and graphics activities* include publishing and graphic programs; still photographic services; and visuals services.

*Support services activities* include imprest fund; central employment information; warehouse management; parking management; chauffeur services; mail and messenger service; management information center; facilities and space management; and security service.

*Library services* include information retrieval and security services.

*Transportation computer activities* include computer time-sharing services and the transportation computer center.

## TITLE III—GENERAL PROVISIONS

SEC. 301. During the current fiscal year applicable appropriations to the Department of Transportation shall be available for maintenance and operation of aircraft; hire of passenger motor vehicles and aircraft; purchase of liability insurance for motor vehicles operating in foreign countries on official departmental business; and uniforms, or allowances therefor, as authorized by law (5 U.S.C. 5901-5902).

SEC. 302. Funds appropriated for the Panama Canal Commission may be apportioned notwithstanding section 3679 of the Revised Statutes, as amended (31 U.S.C. 1341), to the extent necessary to permit payment of such pay increases or decreases for officers or employees as may be authorized by administrative action pursuant to law which are not in excess of statutory increases or decreases granted for the same period in corresponding rates of compensation for other employees of the Government in comparable positions.

SEC. 303. Funds appropriated under this Act for expenditures by the Federal Aviation Administration shall be available (1) except as otherwise authorized by the Act of September 30, 1950 (20 U.S.C. 236-244), for expenses of primary and secondary schooling for dependents of Federal Aviation Administration personnel stationed outside the continental United States at costs for any given area not in excess of those of the Department of Defense for the same area, when it is determined by the Secretary that the schools, if any, available in the locality are unable to provide adequately for the education of such dependents and (2) for transportation of said dependents between schools serving the area which they attend and their places of residence when the Secretary, under such regulations as may be prescribed, determines that such schools are not accessible by public means of transportation on a regular basis.

SEC. 304. Appropriations contained in this Act for the Department of Transportation shall be available for services as authorized by 5 U.S.C. 3109, but at rates for individuals not to exceed the per diem rate equivalent to the rate for a GS-18.

[SEC. 305. None of the funds provided under this Act for urban formula grants shall be made available to support mass transit facilities, equipment, or operating expenses unless the applicant for such

assistance has given satisfactory assurances in such manner and forms as the Secretary may require, and in accordance with such terms and conditions as the Secretary may prescribe, that the rates charged elderly and handicapped persons during nonpeak hours shall not exceed one-half of the rates generally applicable to other persons at peak hours: *Provided*, That the Secretary, in prescribing the terms and conditions for the provision of such assistance shall permit an applicant whose existing fare collection system does not reasonably permit the collection of half fares to continue to use a preferential fare system for elderly and handicapped persons which was in effect on or before November 26, 1974, and which incorporates the offering of a free return ride upon payment of the generally applicable full fare, except that such a system may be used after October 1, 1984, only if such system is available for use by all elderly and handicapped persons.]

SEC. [306] 305. None of the funds appropriated in this Act for the Panama Canal Commission may be expended unless in conformance with the Panama Canal Treaties of 1977 and any law implementing those treaties.

[SEC. 307. None of the funds provided in this act may be used for planning or construction of rail-highway crossings under section 322(a) of title 23, United States Code, or under section 701(a)(5) or section 703(1)(A) of the Railroad Revitalization and Regulatory Reform Act of 1976 at the—

(1) School street crossing in Groton, Connecticut; and

(2) Broadway Extension crossing in Stonington, Connecticut.]

SEC. [308] 306. None of the funds in this Act shall be used for the planning or execution of any program to pay the expenses of, or otherwise compensate, non-Federal parties intervening in regulatory or adjudicatory proceedings funded in this Act.

[SEC. 309. None of the funds in this Act shall be used to assist, directly or indirectly, any State in imposing mandatory State inspection fees or sticker requirements on vehicles which are lawfully registered in another State, including vehicles engaged in interstate commercial transportation which are in compliance with Part 396—Inspection and Maintenance of the Federal Motor Carrier Safety Regulations of the U.S. Department of Transportation.]

SEC. [310] 307. None of the funds contained in this Act shall remain available for obligation beyond the current fiscal year unless expressly so provided herein.

[SEC. 311. Notwithstanding any other provision of law, total amounts of contract authority authorized for fiscal year 1985 in section 21(a)(2)(B) of the Urban Mass Transportation Act of 1964, as amended, shall be available for obligation through fiscal year 1988.]

[SEC. 312. None of the funds in this or any other Act shall be available for the planning or implementation of any change in the current Federal status of the Transportation Systems Center.]

SEC. [313] 308. The expenditure of any appropriation under this Act for any consulting service through procurement contract, pursuant to section 3109 of title 5, United States Code, shall be limited to those contracts where such expenditures are a matter of public record and available for public inspection, except where otherwise provided under existing law, or under existing Executive order issued pursuant to existing law.

[SEC. 314. None of the funds in this Act may be used to implement a rulemaking which would lower the annual passenger ceiling at Washington National Airport.]

SEC. [315] 309. (a) For fiscal year [1985] 1986 the Secretary of Transportation shall distribute the obligation limitation for Federal-aid highways by allocation in the ratio which sums authorized to be appropriated for Federal-aid highways and highway safety construction which are apportioned or allocated to each State for such fiscal year bear to the total of the sums authorized to be appropriated for Federal-aid highways and highway safety construction which are apportioned or allocated to all the States for such fiscal year.

(b) During the period October 1 through December 31, [1984] 1985 no State shall obligate more than 40 per centum of the amount distributed to such State under subsection (a), and the total of all State obligations during such period shall not exceed 25 per centum of the total amount distributed to all States under such subsection.

(c) Notwithstanding subsections (a) and (b), the Secretary shall—

(1) provide all States with authority sufficient to prevent lapses of sums authorized to be appropriated for Federal-aid highways and highway safety construction which have been apportioned to a State, except in those instances in which a State indicates its intention to lapse sums apportioned under section 104(b)(5)(A) of title 23, United States Code.

(2) after August 1, [1985] 1986, revise a distribution of the funds made available under subsection (a) if a State will not obligate the amount distributed during that fiscal year and redistribute sufficient amounts to those States able to obligate amounts in addition to those previously distributed during that fiscal year giving priority to those States having large unobligated balances of funds apportioned under section 104 of title 23, United States Code, and giving priority to those States which, because of statutory changes made by the Surface Transportation Assistance Act of 1982 and the Federal-Aid Highway Act of 1981, have experienced substantial proportional reductions in their apportionments and allocations.

(3) not distribute amounts authorized for administrative expenses and the Federal Lands Highway Programs.

*SEC. 310. Notwithstanding any other provision of law, funds available in and derived from the Highway Trust Fund for fiscal year 1986 for substitute projects authorized by 23 U.S.C. 103(e)(4), shall be available for both highway and mass transit substitute projects.*

[This Act may be cited as the "Department of Transportation and Related Agencies Appropriation Act, 1985".] (*Department of Transportation and Related Agencies Appropriation Act, 1985, as included in Public Law 98-473; additional authorization language to be proposed.*)

[SEC. 124. Notwithstanding any other provision of this joint resolution, the Secretary of the Department of Transportation shall grant an exemption from the January 1, 1985 deadline for compliance with the provisions of Public Law 96-193, if an applicant for such exemption submits to the Secretary prior to January 1, 1985 an application for exemption which complies with the provisions of subsections (b) or (c) of this section.]

[(b) the Secretary shall specify the form and manner in which any application shall be made. Any such application from a person operating aircraft for which equipment to assure compliance with the provisions of Public Law 96-193 ("hush kits") is currently under development shall include a copy of a contract entered into by the applicant and a known supplier of equipment which would bring the applicant into compliance with the provisions of Public Law 96-193.]

[(c) applicants currently operating aircraft obtained prior to January 1, 1980 for which no such compliance equipment is currently under development shall accompany their application with a sworn commitment to enter into a contract not later than June 1, 1985 for aircraft which will comply with the provisions of Public Law 96-193.]

[(d) Nothing in this section shall be construed to limit the power of the Secretary to deny any application or revoke any exemption granted under this section if, after examining any contract submitted under subsection (b) or (c) of this section, the Secretary determines that the applicant or holder of such exemption will not be able to comply with the requirements of Public Law 96-193 within the time-frame set forth in such exemption. No exemptions shall be issued to any applicant pursuant to this section unless the Secretary determines that the contract required under subsection (b) or (c) of this section is with a bona fide supplier of equipment to assure compliance in the case of subsection (b) of this section, or complying aircraft in the case of subsection (c) of this section; that such equipment or aircraft can reasonably be expected to achieve compliance, that such contract provides for non-refundable deposits sufficient to assure good faith compliance by such applicant; and that the contract provides for compliance at the earliest possible date.]

[(e) Any exemption granted under this section shall expire not later than December 31, 1985 except that, if the Secretary determines that equipment to ensure compliance with the provisions of Public Law 96-193 which has been certified by the Department for that purpose will not be available to the holder of the exemption by that date, the Secretary may extend such exemption for such period as the Secretary determines is necessary to insure compliance with such provisions.]

[(f) No person receiving an exemption under the provisions of this section may increase either the frequency of operations into the place for which the exemption was granted, or increase the number of non-compliant aircraft operated at the place for which the exemption was granted beyond that existing in the twelve months prior to the date of enactment of this section.]

[(g) No exemption granted pursuant to this section shall (i) permit flights at any airport in the United States, as the term United States is defined in 49 U.S.C. 1301, other than Miami International Airport, in Miami, Florida, and Bangor International Airport, in Bangor, Maine, or (ii) permit the operation of flights which serve both Miami International Airport and Bangor International Airport.]

[SEC. 125. Notwithstanding any other provisions of law or this joint resolution, unexpended balances of funds appropriated by the Department of Transportation and Related Agencies Appropriations Act of 1984, for employee protection as authorized by the Rock Island Railroad Transition and Employee Assistance Act as amended (45 U.S.C. 1001 et seq.), shall continue to remain available for such purpose until not later than April 1, 1985; and, such funds shall be expended in accordance with the amendment made by section 201 H.R. 3648 as passed by the House of Representatives on March 6, 1984.]

[SEC. 125A. Notwithstanding any other provision of this joint resolution to the contrary, none of the funds in this joint resolution shall be available for the planning or execution of programs, the total obligations for which are in excess of \$126,500,000 in fiscal year 1985 for "State and community highway safety" authorized under 23 U.S.C. 402. Any amount provided in this joint resolution under the heading relating to Highway Traffic Safety Grants for the purposes specified in this subsection which is not identical to the obligation level specified in this subsection shall have no force and effect.]

[SEC. 125B. Notwithstanding any other provision of this joint resolution, not to exceed \$7,500,000 shall be available in the fiscal year ending September 30, 1985 from the unobligated balances in the appropriations "Highway Safety Research and Development", "Railroad Research and Development", and "Research, Training and Human Resources", for the purposes of carrying out a national program to encourage the use of automobile safety belts and passive restraints as authorized by 23 U.S.C. 403.]

[SEC. 125C. (a) Notwithstanding section 16 of the Federal Airport Act (as in effect on November 25, 1947), the Secretary of Transportation is authorized, subject to the provisions of section 4 of the Act of October 1, 1949 (50 App. U.S.C. 1622(c)), and the provisions of subsection (b) of this section, to grant release from any of the terms, conditions, reservations, and restrictions contained in a deed of conveyance dated July 30, 1948, under which the United States conveyed certain property to the city of Flagstaff for airport purposes.]

[(b) Any release granted by the Secretary of Transportation under subsection (a) shall be subject to the following conditions:

(1) the city of Flagstaff shall agree that in conveying any interest in the property which the United States conveyed pursuant to the deed described in subsection (a), the city of Flagstaff will receive an amount which is equal to the fair market value (as determined pursuant to regulations issued by such Secretary); and

(2) any such amount so received shall be used for the development, improvement, operation, or maintenance of a public airport.]

[SEC. 125F. The Secretary of Transportation shall waive the alternate design requirements specified in "Alternate Design for Bridges Policy Statement" (49-FR93 # 21409), allowing construction of a steel deck tied arch option only (including approach spans), for the Smith Avenue High Bridge, St. Paul, Minnesota.] (*Public Law 98-473, making continuing appropriations for the fiscal year 1985.*)

## GENERAL PROVISIONS—MARITIME ADMINISTRATION

Notwithstanding any other provision of this Act, the Maritime Administration is authorized to furnish utilities and services and make necessary repairs in connection with any lease, contract, or occupancy involving Government property under control of the Maritime Administration and payments received by the Maritime Administration for utilities, services, and repairs so furnished or made shall be credited to the appropriation charged with the cost thereof: *Provided*, That rental payments under any such lease, contract, or occupancy on account of items other than such utilities, services, or repairs shall be covered into the Treasury as miscellaneous receipts.

No obligations shall be incurred during the current fiscal year from the construction fund established by the Merchant Marine Act, 1936, or otherwise, in excess of the appropriations and limitations contained in this Act, or in any prior appropriation Act and all receipts which otherwise would be deposited to the credit of said fund shall be covered into the Treasury as miscellaneous receipts.

[None of the funds provided in this Act for the Maritime Administration shall be used for enforcement of any rule with respect to the repayment of construction differential subsidy for permanent release of vessels from the restrictions in section 506 of the Merchant Marine Act, 1936, as amended, until May 15, 1985.]

The Office of the Secretary serves as the principal policy formulation and implementation arm of the Secretary of the Treasury.

**Secretarial policy and program development.**—The Secretary has primary responsibility for formulating and recommending domestic and international financial policy, economic policy, and tax policy; managing the public debt; overseeing the development of automated information processes; and participating in the formulation of broad fiscal policies that have general significance for the economy.

**Inspector General.**—This activity is responsible for maintaining a comprehensive audit and internal investigation program. It is organizationally independent and reports directly to the Secretary and the Deputy Secretary.

**International affairs.**—The programs conducted within this activity are designed to analyze and implement international monetary and development financing policy. Additional staff support is provided in areas concerned with international investment, trade, and balance of payments issues.

**Departmental policy and administrative services.**—This activity provides central administrative policies

and guidance to the entire Department; the direct administrative support required for the Office of the Secretary operations; and computer support and services.

**Buildings maintenance and operations.**—This activity provides for maintenance and operation of the main Treasury Building and the Annex, including utilities and custodial and craftsmen services. In addition, this activity provides for all telecommunications facilities and services and the Federal buildings fund payment for all space occupied by the Office of the Secretary outside of the Treasury Building and the Annex.

**Repairs and improvements.**—This activity provides the funding for major repairs and improvements to the Treasury Building and Annex.

**Matching funds in primaries.**—Upon certification by the Federal Election Commission, every candidate entitled to receive payments is entitled to an amount equal to the contributions each has received on or after the beginning of the calendar year immediately preceding the election year.

**Nominating conventions of parties.**—Upon certification by the Commission, payments may be made to the national committee of a major party or a minor party which elects to receive its entitlement. The total of such payments will be limited to the amount in the account at the time of payment. The national committee of each party may receive payments beginning on July 1 of the year immediately preceding the calendar year in which a presidential nominating convention of the political party is held. The two major parties will receive \$3 million each, plus a cost-of-living increase.

**Candidates for general elections.**—The eligible candidates of each major party in a Presidential election will be entitled to equal payments in an amount which, in the aggregate, shall not exceed \$20 million each, plus a cost-of-living increase.

Also, provision is made for new parties, minor parties and candidates, who may receive in excess of 5% of the popular vote and, therefore, be entitled to reimbursement of qualified campaign expenditures.

The Secretary of the Treasury is authorized to deal in gold and foreign exchange and other instruments of credit and securities as deemed necessary, consistent with U.S. obligations in the International Monetary Fund (IMF), regarding orderly exchange arrangements. An Exchange Stabilization Fund, with a capital of \$200 million, is authorized by law for this purpose (31 U.S.C. 5302). All earnings and interest accruing to this fund are available for the purposes thereof. Transactions in special drawing rights (SDR's) and U.S. holdings of SDR's are administered by the fund. U.S. drawings from the IMF are also advanced to the fund.

The principal sources of the fund's income have been profits on foreign exchange transactions and interest on foreign exchange swap transactions and on investments held by the fund, including interest earned on fund holdings of U.S. Government securities.

Due to the impracticability of forecasting fund transactions in foreign currency and foreign investment, projections are not provided for those items. However, as an offset to actual data and projections made in the budget for interest paid on U.S. Government securities, data for the interest income on fund holdings of U.S. Government securities is provided for 1984 and projected for 1985 and 1986. Holdings of U.S. Government securities amounted to \$3,243 million on September 30, 1984. The interest earnings on these securities is estimated to increase these holdings to \$3,523 million in 1985 and \$3,812 million in 1986. As required by Public Law 95-612, the fund no longer is used to meet administrative expenses.

<sup>1</sup> Pursuant to the Special Drawing Rights Act of 1968, Special Drawing Rights (SDR) allocated to or otherwise acquired by the United States are resources of the Exchange Stabilization Fund (ESF). SDR, once allocated, are permanent resources unless cancelled (which requires an 85 percent majority decision of the total voting power of the Board of Governors of the International Monetary Fund), the Special Drawing Account is liquidated, the International Monetary Fund is liquidated, or the United States chooses to withdraw from the Fund or terminate its participation in the Special Drawing Account. Except for payment of interest and charges on SDR allocations to the United States, the payment of the Exchange Stabilization Fund liability related to SDR allocations is conditional on events listed above, in which the United States has a substantial or controlling voice. The Special Drawing Rights Act also authorizes the Secretary of the Treasury to issue Special Drawing Rights certificates to the Federal Reserve Banks in return for dollar deposits in amounts equal to the value of the SDR held. The certificates may be issued to finance the acquisition of SDR from other countries or to provide resources for financing ESF operations.

This trust fund was established by the State and Local Fiscal Assistance Act of 1972 with amendments added in 1983 to provide general revenue sharing payments to local governments only to supplement revenue sources. Payments to recipients are made at least quarterly. It is anticipated that the fourth quarter payment for each year will continue to be paid within the first 5 days of the succeeding year, as provided by law.

During 1984, 39,226 units of general purpose government were eligible to receive revenue sharing funds: 3,107 counties, 19,070 municipalities, 16,714 townships, and 335 Indian tribes and Alaskan villages.

In 1985 it is anticipated that approximately the same number of units of general purpose government will be eligible to receive Revenue Sharing funds.

The distribution formulas seek to match payments and local fiscal responsibilities by taking into account each jurisdiction's population, per capita income, and tax effort. Recipients may use the funds for any purposes that are legal purposes for uses of their own locally generated revenues.

The Federal Law Enforcement Training Center provides the necessary facilities, equipment, and support services for conducting recruit, advanced, specialized, and refresher training for law enforcement personnel of the participating organizations. Center personnel conduct the instructional programs for the basic recruit and some of the advanced training. This appropriation is for operating expenses of the Center for common and specialized law enforcement training and for research in law enforcement training methods and curriculum content. The 1986 estimate provides for law enforcement training; maintenance, repair, alteration and minor construction of facilities; planning and curricula development for the Center; and operation of living quarters and food service. In addition, the Center has a substantial reimbursable program to accommodate the needs of the participating organizations and for State and local law enforcement personnel.

## Disbursement and claims.—

**Payments.**—Payments are made through 7 regional offices for Federal civilian agencies, except the U.S. Postal Service, the U.S. Marshals Service, and certain Government corporations. These disbursing services are provided through the issuance of checks, letters of credit, and electronic funds transfer (EFT) payments. Claims for EFT payments are also processed.

The total checks, savings bonds, and electronic funds transfer payments, and productivity relating to this function carried out by the Division of Disbursement follow:

**Cash management.**—This activity is involved in the development, implementation, and maintenance of ef-

efficient and effective management of the Government's cash resources. It provides guidance to the system for advancing Federal funds under various grant programs and other programs through letters of credit; designates and supervises banks as Government depositaries; controls U.S. foreign currency transactions to afford the best currency availability to the Government; develops applications for the use of electronic funds transfer for Government collections and payments; manages the direct deposit marketing program; and develops regulations and legislative authority for the implementation of Reform 88 cash management initiatives.

**Federal Reserve bank operations.**—This activity provides for reimbursements to the Federal Reserve banks for maintenance of Treasury tax and loan accounts, Treasury general account processing, Automated Clearing House Services, and the U.S./Iran Claims Tribunal. Fee payments are made to commercial depositaries for Federal Tax Deposits processed under the Tax and Loan Investment program, and the Treasury in turn earns interest on funds held on deposit.

**General financial services.**—This activity provides financial services for numerous accounts, including the two Social Security Trust Funds, the two Medicine Trust Funds, the Unemployment Trust Fund, D.C. Government loan accounts, Synthetic Fuel Development account and the Airport and Airway Trust Fund. In addition, this activity provides for payment of domestic and international claims.

## HUD PUBLIC HOUSING INTEREST SUBSIDY PAYMENTS

[SEC. 113A. Notwithstanding any other provision of this joint resolution, there is appropriated to the Treasury \$300,000,000, to be made available to cover the additional interest expenses incurred on borrowings by the Secretary of Housing and Urban Development from the Treasury that are necessary to extend direct loans to local public housing agencies as authorized under section 4(a) of the United States Housing Act of 1937, for the purposes of financing public housing projects as authorized under section 5(c) of the United States Housing Act of 1937: *Provided*, That the foregoing appropriation shall be available only in connection with additional interest expenses incurred on Treasury borrowings having maturities not in excess of seven months

from the date that such borrowings occur: *Provided further*, That no such Treasury borrowings in connection with the foregoing appropriation shall take place after April 3, 1985: *Provided further*, That the foregoing \$300,000,000 shall be available until expended on interest incurred pursuant to the Treasury borrowings: *Provided further*, That direct loan proceeds shall be made available for new loan commitments and contract executions for public housing development, modernization and Indian housing, and for financing of existing contracts: *Provided further*, That notwithstanding section 4 of the United States Housing Act of 1937, or any other provision of law, loans made pursuant to section 4(a) of the United States Housing Act of 1937 by the Secretary of Housing and Urban Development (and Treasury borrowing under section 4(b) of such Act), which are necessary due to the failure to publicly sell tax-exempt public housing agency obligations, shall be at interest rates comparable to the interest rates on such obligations issued by public housing agencies.] (Public Law 98-473, making continuing appropriations for fiscal year 1985.)

In any month when the Railroad Retirement Board finds that the balance in the railroad retirement account is insufficient to pay annuity amounts due to be paid, the Secretary of the Treasury shall transfer to the credit of the railroad retirement account such additional amounts upon notification by the Board. Amounts advanced to the Board may not exceed certain estimated receipts of the railroad retirement account, and amounts must be repaid to the general fund with interest within 10 days of such receipts.

Because of certain increased taxes and other benefits deriving from the Railroad Retirement Solvency Act of 1983, it is not expected that loans to the Board will continue under this account.
