## ENERGY SECURITY RESERVE

## (RESCISSION)

[Of the funds appropriated to the Energy Security Reserve by the Department of the Interior and Related Agencies Appropriations Act, 1980 (Public Law 96-126) and subsequently made available to carry out title I, part B of the Energy Security Act (Public Law 96-294) by

Public Laws 96-304 and 96-514, \$5,375,000,000 are rescinded: *Provided*, That of the remaining funds in the Energy Security Reserve for carrying out title I, part B of the Energy Security Act, the amount of \$5,700,000,000 shall be initially available only for obligation to projects with Letters of Intent authorized by the Board of Directors of the United States Synthetic Fuels Corporation on or before June 1, 1984; and, if by reason of Board determinations that the Corporation will not enter into financial assistance contracts with projects for which such Letters were authorized, or that lesser amounts of financial assistance than those specified in such authorizations shall be awarded, there remains a balance of such amount which is unobligated and uncommitted, 50 percent of said balance shall cease to be available for obligation and the remaining 50 percent of said balance shall thereafter be available for commitment or obligation by the Corporation pursuant to the Energy Security Act: *Provided further*, That until such time as the comprehensive strategy is approved pursuant to section 126(c) of the Energy Security Act, the Board of Directors shall solicit proposals and award financial assistance pursuant to applicable sections of the Energy Security Act without regard to the national synthetic fuel production goal established under section 125 of the Act: *Provided further*, That of the \$5,375,000,000 rescinded from the Energy Security Reserve, \$750,000,000 shall be deposited and retained in a separate account hereby established in the Treasury of the United States, entitled the "Clean Coal Technology Reserve," which account and the appropriations therefor, shall be available for the purpose of conducting cost-shared clean coal technology projects for the construction and operation of facilities to demonstrate the feasibility for future commercial application of such technology, including those identified in section 320 of the fiscal year 1985 Department of the Interior and Related Agencies Appropriations Act, as reported by the Senate Committee on Appropriations (H.R. 5973, Senate Report 98-578), without fiscal year limitation, subject to subsequent annual appropriations in the Department of the Interior and Related Agencies Appropriations Act.]

[Section 117 of the United States Synthetic Fuels Corporation Act of 1980 is amended by adding at the end of thereof the following new subsection:]

["(f) Subject to section 118, Directors, officers, and employees of the Corporation shall be subject to the same standards of ethical conduct and financial reporting as are set forth in Executive Order 11222. The Chairman shall promptly implement such standards.".]

[Section 168 of the United States Synthetic Fuels Corporation Act of 1980 is amended by—

(1) Redesignating section 168 as subsection 168(a); and

(2) Inserting at the end thereof the following new subsection:]

["(b) An aggrieved person may bring action in the district courts of the United States to enforce, and secure compliance with, the policies and guidelines of the Corporation implementing the requirements of subsections 121 (a) and (b) for public disclosure of information and the requirements of subsection 116(f) for meetings of the Board of Directors to be open to the public and preceded by reasonable public notice.".] (Department of the Interior and Related Agencies Appropriations Act, 1985, as included in Public Law 98-473.)

The Energy Security Act established the U.S. Synthetic Fuels Corporation (SFC) to provide financial assistance for the production of synthetic fuels. Payments are made by the Secretary of the Treasury to the SFC as funds are required to meet the SFC's disbursement needs.

Appropriations are made to the Energy Security Reserve in the Treasury. The authority of the SFC to incur obligations is limited by the level of appropriations to the Secretary of the Treasury.

This fund is for use by the U.S. Treasury in making settlement with the payees or special endorsees in case of checks drawn on the U.S. Treasury which have been paid on forged endorsements.

To reduce hardships sustained by payees of Government checks that have been stolen and forged, settlement is made in advance of the receipt of funds from the endorers of the checks through reclamation procedure by this office. Benefits from these early settlements are shared by claimants and the Government in that the claimants are more quickly restored financially to their proper position and the Government is spared the necessity of much unproductive correspondence. If the U.S. Treasury is unable to recover funds, the revolving account sustains the loss.

Pershing Hall memorial fund .....			

*Esther Cattell Schmitt gift fund.*—Public Law 87-467 (76 Stat. 88) authorized the acceptance of the gift made to the United States by the will of Esther Cattell Schmitt. The income received from the gift to the United States is paid by the Secretary of the Treasury to beneficiaries named in provisions of the will.

*National defense conditional gift fund.*—The Secretary of the Treasury accepts on behalf of the United States, conditional gifts of money or other intangible property to be used for a particular defense purpose. Intangibles other than money are converted at the best terms available. The moneys held in trust are paid to those appropriation accounts which best effectuate the intent of the donors (68 Stat. 566).

The Federal Financing Bank (FFB) was created to assure the coordination of Federal and federally assisted borrowing from the public and to assure that such borrowings are financed in a manner least disruptive of private financial markets and institutions. The FFB's activities in 1986 are on-budget. Legislation carrying this out will be proposed.

The Bank is the vehicle through which most Federal agencies finance their programs involving the sale or placement of credit market instruments, including agency securities, guaranteed obligations, participation agreements, and loan assets. The major exceptions are Title XI ship mortgage bonds and Government National Mortgage Association asset sales.

During 1984 the Federal Financing Bank made guaranteed loan originations and loan asset purchases of \$20.3 billion, as well as \$1.4 billion in investments in Federal agency debt.

The following table reflects the composition of the FFB account by agency and program in thousands of dollars. Budget authority is equal to gross purchases of loan assets or guaranteed loan originations. Outlays equal budget authority less the repayment of principal.

The FFB in certain cases capitalizes the interest on loans outstanding. This capitalized interest is not reflected in the Bank's budget authority or outlays since it does not require FFB borrowing from the Treasury.

FFB purchases of Federal agencies' debt is not reflected in the budget totals because borrowing and the repayment of borrowings between Federal agencies and the Treasury are not budgetary transactions. These transactions are reflected as borrowing in the accounts of the particular agencies. The use of the FFB permits these agencies to borrow at lower rates than would occur if the agencies went to the market. This was a major reason for the creation of the Bank. They are financed by an equal amount of FFB borrowings from Treasury, which are an addition to the borrowings recorded in the statement of financial conditions. The extent of these FFB investments is reflected below:

The Bureau of Engraving and Printing designs, manufactures, and supplies most of the major evidences of a financial character issued by the United States. It is the sole source of Federal Reserve notes, various public debt instruments, as well as most of the minor evidences of a financial character issued by the United States, such as postage and internal revenue stamps. The Bureau executes certain printings for various territories administered by the United States, particularly postage and revenue stamps.

The anticipated work volume is based on estimates of requirements submitted by agencies served. The program comprises the following activities:

*Engraving and printing.*—

*Currency.*—Total deliveries of currency for 1985 and 1986 are estimated to be 6.2 and 6.6 billion notes. During 1984 the Bureau delivered 5.8 billion Federal Reserve notes.

*Stamps.*—This category of work is comprised mainly of postal and internal revenue stamps. The projected requirements for 1985 and 1986 are 34.8 and 35.8 billion stamps, respectively. In 1984, the Bureau delivered 31.3 billion stamps.

*Securities.*—This program encompasses the production of a wide variety of bonds, notes, and debentures for the Bureau of Public Debt and certain other agencies of the Government.

*Commissions, certificates, etc.*—This program is comprised primarily of Presidential and Department of Defense commissions and certificates, White House invitations, and identification cards for various Government agencies. It represents a small portion of the Bureau's total workload.

*Space utilized by other agencies.*—Other agencies are charged for services provided in the space occupied in the Bureau's buildings.

*Other miscellaneous services.*—A wide variety of miscellaneous services are performed by Bureau personnel for other agencies, which are charged on an actual cost basis.

*Purchase of operating equipment.*—This category consists of new purchases and replacement of printing equipment and other related printing items.

*Plant alterations and experimental equipment.*—This category encompasses alterations made on the Bureau's buildings and purchases of experimental equipment.

The operations of the Bureau are currently financed by means of a revolving fund established in accordance with the provisions of Public Law 656, August 4, 1950 (31 U.S.C. 181), which requires the Bureau to be reimbursed by customer agencies for all costs of manufacturing products and services performed. The Bureau is also authorized to assess amounts to acquire capital equipment and provide for working capital needs. Bureau operations during 1984 resulted in an accumulated retained earnings of \$38.9 million.

This appropriation provides funds for the conduct of all public debt operations and the promotion of the sale of U.S. savings-type securities.

*Processing and accounting for:*

**Savings securities.**—This activity is concerned with the issuance, servicing, and retirement of savings bonds and notes and retirement-type securities, including: (1) The maintenance and servicing of individual accounts of owners of series H and HH bonds and the authorization of interest payments, and (2) the maintenance of accounting control over financial transactions, securities transactions and accountability, and interest cost. These functions are performed directly by the Bureau of the Public Debt, by the Federal Reserve Banks as fiscal agents of the United States, and by the 44,000 qualified agents which issue and redeem savings bonds and notes.

**Marketable and special securities.**—This activity is concerned with all securities of the United States, other than savings and retirement securities, including securities of Government corporations for which the Bureau of the Public Debt provides services. Functions performed relate to the issuance, servicing, and retirement of these securities, both directly by the Bureau and through the Federal Reserve Banks, as fiscal agents, including: (1) The maintenance and servicing of individual accounts of owners of registered securities and book-entry Treasury bills; (2) the authorization of interest and principal payments; and (3) the maintenance of accounting control over financial transactions, securities transactions and accountability, and interest cost. Beginning in 1986, the Bureau will eliminate all new issues of definitive securities by offering notes and bonds in full book-entry form only. The Bureau is developing, in conjunction with the Federal Reserve, a new Treasury Direct Access System for new issues of notes and bonds in book-entry form and phasing out the in-house Treasury Bill System to provide for a single direct access system for all Treasury marketable securities.

**Promoting the sale of savings bonds.**—This activity consists of sales promotion efforts, using press, radio, other advertising media, and organized groups, augmented by concentrated sales campaigns emphasizing

payroll savings plans. These functions are performed by the U.S. Savings Bonds Division, a separate organization within the Department of the Treasury.

This appropriation provides for processing tax returns and related documents, and maintaining accurate, current taxpayer accounts by means of an automated system.

**Returns processing and revenue accounting.**—This activity provides for all actions associated with the mailing out of Federal Tax Deposit (FTD) and tax return forms and instructions, receipt of completed returns and payments, deposit of those payments, processing and accounting for revenue collections and FTD's and verification through an automated master file system of the accuracy of information provided by the taxpayer. It provides for payment of refunds, offset of refunds against delinquent accounts, issuance of notices that payments are overdue, identification of possible non-filers for investigation, and assistance in the selection of tax returns for audit. This activity also prepares statistical information and provides for computer operations at the ten service centers and district offices.

**Computer services.**—This activity provides ADP support to process tax returns, maintain account records, and aid tax enforcement and productivity management.

This appropriation provides for the examination of tax returns and the administrative settlement of taxpayer appeals of examination findings. Funds are requested to continue the Service's ability to assure even-handed application and adequate enforcement of the tax laws and to maintain a satisfactory rate of voluntary compliance with the internal revenue laws. It also provides for monitoring employee pension plans, determining qualifications of organizations seeking tax-exempt status, and examining tax returns of exempt organizations.

**Examination.**—This activity encourages voluntary compliance with the internal revenue laws through the determination of correct tax liability by the selective examination of tax returns, the correction of errors, and explanation of these corrections to taxpayers.

**Appeals and tax litigation.**—The appeals portion of this authority provides for an independent administrative review of contested tax assessments and adjustments with the objective of settling tax controversies without litigation. When settlement is not possible, the tax litigation portion of the activity provides for the handling of Tax Court litigation and for the coordination of the Service's legal position in order to assure consistency.

**Employee plans and exempt organizations.**—This activity monitors private pension plans to insure compliance with the Employee Retirement Income Security Act of 1974, as amended, determines whether organizations seeking tax-exempt status meet certain tests to

qualify, and examines tax returns of those organizations to insure compliance with such an exemption and to insure payment of unrelated business income taxes. It also examines the returns of private foundations to insure payment of proper excise taxes.

This appropriation provides for enforcing statutes relating to detection and investigation of criminal violations of the Internal Revenue laws, collecting unpaid accounts, securing unfiled tax returns and payments, providing assistance to taxpayers and preparing technical rulings.

**Tax fraud investigations.**—This activity provides for enforcement of the criminal statutes relating to violations of Internal Revenue laws. It investigates cases of suspected intent to defraud, recommends prosecution as warranted, and assists in the preparation and trial of criminal tax cases.

**Collection.**—This activity has the responsibility for collecting unpaid accounts and securing delinquent returns; developing and implementing programs to prevent accounts from becoming delinquent and preventing nonfiling; and determining and analyzing the reasons for and the types of nonfiling.

**Taxpayer service.**—This activity aids voluntary compliance with Federal tax laws by informing taxpayers of their responsibilities and by providing services and information through various media which assist them in meeting their obligations. Inquiries concerning tax laws, IRS notices and procedures, and tax account problems are resolved.

**Enforcement, litigation and rulings.**—This activity provides legal advice and assistance to field enforcement activities, furnishes non-tax legal services and issues rulings and opinions as to the application of tax laws.

The Energy Tax Act of 1978 authorized a solar-wind business energy credit beginning October 1, 1978. There will be instances where a solar-wind business credit will

exceed the amount of tax liability owed on the return resulting in either an offset to another tax liability of the filer or a refund. This account provides for those funds which are required to cover the offsets (to other liabilities) or make payments to businesses when solar-wind credits exceed the tax liabilities owed as provided by Public Law 95-618.

Public Law 96-223 repealed the refundable credit for solar or wind property for taxable years beginning after December 31, 1979. Funds were required through 1985 to cover offsets or make payments resulting from amended returns filed, the examination of returns filed, and other returns filed for the years covered by the statute.

Under certain circumstances, as provided in 26 U.S.C. 6611, interest is paid on Internal Revenue collections which must be refunded. Since enactment of the Economic Recovery Tax Act (Public Law 97-34) and the Tax Equity and Fiscal Responsibility Act (Public Law 97-248), the rate of interest changes every six months to reflect the prime interest rate then in effect. A 13% rate will be in effect until June 30, 1985. Public Law 97-248 also provides for daily compounding of interest.

This revolving fund was established pursuant to section 112(a) of the Federal Tax Lien Act of 1966, to serve as the source of financing the redemption of real property by the United States. In collecting delinquent taxes, situations arise where it is to the Government's advantage to buy property on which it has a lien when the property is sold at a foreclosure sale brought by the holder of a lien which is superior to the Government's. The advantage arises when the property is worth substantially more than the first lienholder's equity but is being sold for an amount that barely covers that equity,

thereby leaving no proceeds to apply against delinquent taxes. Under these circumstances, if the Government buys the property and subsequently puts it up for sale under more advantageous conditions, it is possible to realize sufficient profit on the transaction to fully or partially collect the amount of taxes due. The revolving fund is reimbursed from the proceeds of the sale in an amount equal to the amount expended from the fund for the redemption. The balance of the proceeds are applied against the amount of the tax, interest, penalties, and additions thereto, and for the costs of sale. The remainder, if any, would revert to the parties legally entitled to it.

The Secret Service is responsible for protection of the President and other officials, investigating counterfeiting of currency and check forgeries, protection of the White House and various other buildings within Washington, DC.

*Investigations, protection, and uniformed activities.*—The Service must provide for the protection of the President of the United States, members of his immediate family, the President-elect, the Vice President, or other officer next in the order of succession to the Office of the President, and the Vice President-elect, and the members of their immediate families unless the members decline such protection; protection of the person of a visiting head of a foreign state or foreign

government and, at the direction of the President, other distinguished foreign visitors to the United States and official representatives of the United States performing special missions abroad; the protection of persons who are determined to be major Presidential or Vice Presidential candidates unless such protection is declined; upon request of a Presidential or Vice Presidential candidate of a major political party, as determined by the Secretary after consultation with the advisory committee, the Secretary may authorize the U.S. Secret Service to furnish protection to the spouse of such major Presidential or Vice Presidential candidate, except that such protection shall not commence more than 120 days prior to the general Presidential election; the protection of the person of a former President and his wife during his lifetime, the protection of the person of the widow of a former President until her death or remarriage, and minor children of a former President until they reach 16 years of age, unless such protection is declined. The Service is also responsible for investigation of counterfeiting of currency, specie, and securities; forgery and altering of Government checks and bonds; thefts and frauds relating to Treasury electronic funds transfers; and other criminal and noncriminal cases.

The Secret Service Uniformed Division protects the Executive Residence and grounds in the District of Columbia; any building in which White House offices are located; the President and members of his immediate family; the temporary official residence of the Vice President and grounds in the District of Columbia; the Vice President and members of his immediate family; foreign diplomatic missions located in the Washington metropolitan area and such other areas as the President may direct on a case-by-case basis.

The Treasury Security Force is responsible for safeguarding paper currency and other Government securities and obligations that are contained in the Main Treasury Building and its Annex in Washington, DC.

The Comptroller of the Currency was created for the purpose of establishing and regulating a national banking system. The National Currency Act of 1863 (12 U.S.C. 1 et seq., 12 Stat. 665) provided for the chartering and supervising functions in this connection. The income of the bureau is derived principally from assessments paid by national banks and interest on investments in U.S. Government obligations.

The Administrator of National Banks charters new banking institutions only after investigation and due consideration. Supervision of existing national banks is aided by the required submission of periodic reports and detailed onsite examinations, the latter conducted by a staff of approximately 2,100 national bank examiners. At the present time there are approximately 4,900 national banks with more than 24,700 operating branches and total assets of \$1,450 billion.

In addition, the Comptroller considers applications for mergers in which the resulting bank will be a national bank and applications from banks to establish branches. The Comptroller of the Currency promulgates rules and regulations for the guidance of national banks and bank directors.

## DEPARTMENT OF THE TREASURY—GENERAL PROVISIONS

Note.—A regular 1985 appropriation bill has not been enacted. The following general provisions were enacted by reference in a continuing resolution (Public Law 98-473).

SEC. 101. Appropriations to the Treasury Department in this Act shall be available for uniforms or allowances therefor, as authorized by law (5 U.S.C. 5901), including maintenance, repairs, and cleaning; purchase of insurance for official motor vehicles operated in foreign countries; entering into contracts with the Department of State for the furnishings of health and medical services to employees and their dependents serving in foreign countries; and services as authorized by 5 U.S.C. 3109.

【SEC. 102. None of the funds appropriated by this title shall be used in connection with the collection of any underpayment of any tax imposed by the Internal Revenue Code of 1954 unless the conduct of officers and employees of the Internal Revenue Service in connection with such collection complies with subsection (a) of section 805 (relating to communication in connection with debt collection), and section 806 (relating to harassment or abuse), of the Fair Debt Collection Practices Act (15 U.S.C. 1692).】

【SEC. 103. (a) None of the funds appropriated by this Act may be used to disqualify, pursuant to section 411(d)(1)(B) of the Internal Revenue Code of 1954, any plan which has vesting requirements or provides for nonforfeitable rights to benefits, equal to or more stringent than 4/40.】

【(b) None of the funds appropriated by this Act may be used to issue an unfavorable advance determination letter, pursuant to section 411(d)(1)(B) of the Internal Revenue Code of 1954, with respect to any plan which has vesting requirements or provides for nonforfeitable rights to benefits, equal to or more stringent than 4/40.】

SEC. 【104】 102. Not to exceed 【1】 5 per centum of any appropriations in this Act for the Department of the Treasury may be transferred between such appropriations. However, no such appropriation shall be increased or decreased by more than 【1】 5 per centum and Congress shall be notified promptly of any such proposed transfers 【shall be approved in advance by the Committees on Appropriations of the House and Senate】.

【SEC. 106. None of the funds made available by this Act may be used to place the United States Secret Service, the United States Customs Service, and the Bureau of Alcohol, Tobacco and Firearms under the operation, oversight, or jurisdiction of the Inspector General of the Department of the Treasury.】

A regular 1985 appropriation bill has not been enacted. The following general provisions were enacted by reference in a continuing resolution. (Public Law 98-473.)

## THIS ACT

SEC. 501. Where appropriations in this Act are expendable for travel expenses of employees and no specific limitation has been placed thereon, the expenditures for such travel expenses may not exceed the amount set forth therefor in the budget estimates submitted for the appropriations: *Provided*, That this section shall not apply to travel performed by uncompensated officials of local boards and appeal boards of the Selective Service System; to travel performed directly in connection with care and treatment of medical beneficiaries of the Veterans' Administration; to travel of the Office of Personnel Management in carrying out its observation responsibilities of

the Voting Rights Act; or to payments to interagency motor pools where separately set forth in the budget schedules.

SEC. 502. No part of any appropriation contained in this Act shall be available to pay the salary of any person filling a position, other than a temporary position, formerly held by an employee who has left to enter the Armed Forces of the United States and has satisfactorily completed his period of active military or naval service and has within ninety days after his release from such service or from hospitalization continuing after discharge for a period of not more than one year made application for restoration to his former position and has been certified by the Office of Personnel Management as still qualified to perform the duties of his former position and has not been restored thereto.

SEC. 503. No part of any appropriation made available in this Act shall be used for the purchase or sale of real estate or for the purpose of establishing new offices inside or outside the District of Columbia: *Provided*, That this limitation shall not apply to programs which have been approved by the Congress and appropriations made therefor.

SEC. 504. No part of any appropriation contained in this Act shall remain available for obligation beyond the current fiscal year unless expressly so provided herein.

SEC. 505. The expenditure of any appropriation under this Act for any consulting service through procurement contract, pursuant to 5 U.S.C. 3109, shall be limited to those contracts where such expenditures are a matter of public record and available for public inspection, except where otherwise provided under existing law, or under existing Executive order issued pursuant to existing law.

SEC. 506. No part of any appropriation contained in this Act shall be available for the procurement of or for the payment of the salary of any person engaged in the procurement of any hand or measuring tool(s) not produced in the United States or its possessions except to the extent that the Administrator of General Services or his designee shall determine that a satisfactory quality and sufficient quantity of hand or measuring tools produced in the United States or its possessions cannot be procured as and when needed from sources in the United States and its possessions, or except in accordance with procedures prescribed by section 6-104.4(b) of Armed Services Procurement Regulation dated January 1, 1969, as such regulation existed on June 15, 1970: *Provided*, That a factor of 75 per centum in lieu of 50 per centum shall be used for evaluating foreign source end products against a domestic source end product. This section shall be applicable to all solicitations for bids opened after its enactment.

SEC. 507. None of the funds made available to the General Services Administration pursuant to section 210(f) of the Federal Property and Administrative Services Act of 1949 shall be obligated or expended after the date of enactment of this Act for the procurement by contract of any service which, before such date, was performed by individuals in their capacity as employees of the General Services Administration in any position of guards, elevator operators, messengers, and custodians, except that such funds may be obligated or expended for the procurement by contract of the covered services with sheltered workshops employing the severely handicapped under Public Law 92-28.

SEC. 508. No funds appropriated in this Act shall be available for administrative expenses in connection with implementing or enforcing any provisions of the rule TD ATF-66 issued June 13, 1980, by the Department of the Treasury, Bureau of Alcohol, Tobacco and Firearms on labeling and advertising of wine, distilled spirits and malt beverages, except if the expenditure of such funds is necessary to comply with a final order of the Federal court system.]

SEC. [509] 508. None of the funds appropriated by this Act may be obligated or expended in any way for the purpose of the sale, lease, rental, excessing, surplus or disposal of any portion of land identified on the date of enactment of this Act as Fort DeRussy in Honolulu, Hawaii.

SEC. 510. None of the funds appropriated in this Act may be used for administrative expenses to close the Information Resources Management Office of the General Services Administration located in Sacramento, California.]

SEC. 511. None of the funds made available by this Act for the Department of the Treasury may be used for the purpose of eliminating any existing requirement for sureties on customs bonds.]

SEC. 512. None of the funds made available by this Act shall be available for any activity or for paying the salary of any government employee where funding an activity or paying a salary to a government employee would result in a decision, determination, rule, regulation, or policy that would prohibit or otherwise prevent the Customs Service from enforcing section 307 of the 1930 Tariff Act.]

SEC. 513. None of the funds appropriated under this Act shall be obligated or expended to implement, promulgate, administer, enforce, or reissue or revise the proposed Office of Personnel Management regulations and the proposed Federal Personnel Manual issuances published in the Federal Register on March 30, 1983, on pages 13341 through 13381, as superseded by proposed regulations and Federal Personnel Manual issuances published in the Federal Register on July 14, 1983, on pages 32275 through 32312, and as further superseded by proposed regulations and the Federal Personnel Manual issuances published in the Federal Register on October 25, 1983 on pages 49462 through 49498: *Provided*, That this section shall expire on July 1, 1985.]

SEC. [514] 509. None of the funds made available by this Act shall be available for the purpose of transferring control over the Federal Law Enforcement Training Center located at Glynco, Georgia, out of the Treasury Department.

SEC. 515. Of the total amount of budget authority provided for fiscal year 1985 by this or any other Act that would otherwise be available for consulting services, management and professional services, and special studies and analyses, 10 per centum of the amount intended for such purposes in the President's budget for 1984, as amended, for any agency, department, or entity subject to apportionment by the Executive shall be placed in reserve and not made available for obligation or expenditure: *Provided*, That this section shall not apply to any agency, department, or entity whose budget request for 1985 for the purposes stated above did not amount to \$5,000,000.]

SEC. 516. No part of any appropriation contained in this Act shall be available for the procurement of, or for the payment of, the salary of any person engaged in the procurement of stainless steel flatware not produced in the United States or its possessions, except to the extent that the Administrator of General Services or his designee shall determine that a satisfactory quality and sufficient quantity of stainless steel flatware produced in the United States or its possessions, cannot be procured as and when needed from sources in the United States or its possessions or except in accordance with procedures provided by section 6-104.4(b) of Armed Services Procurement Regulations, dated January 1, 1969. This section shall be applicable to all solicitations for bids issued after its enactment.]

SEC. [601] 510. No part of any appropriation contained in this Act shall be used for publicity or propaganda purposes within the United States not heretofore authorized by the Congress.

SEC. [609] 511. No part of any appropriation contained in this Act shall be available for the payment of the salary of any officer or employee of the United States Postal Service, who—

(1) prohibits or prevents, or attempts or threatens to prohibit or prevent, any officer or employee of the United States Postal Service from having any direct oral or written communication or contact with any Member or committee of Congress in connection with any matter pertaining to the employment of such officer or employee or pertaining to the United States Postal Service in any way, irrespective of whether such communication or contact is at the initiative of such officer or employee or in response to the request or inquiry of such Member or committee; or

(2) removes, suspends from duty without pay, demotes, reduces in rank, seniority, status, pay, or performance or efficiency rating, denies promotion to, relocates, reassigns, transfers, disciplines, or discriminates in regard to any employment right, entitlement, or benefit, or any term or condition of employment of, any officer or employee of the United States Postal Service, or attempts or threatens to commit any of the foregoing actions with respect to such officer or employee, by reason of any communication or contact of such officer or employee with any Member or committee of Congress as described in paragraph (1) of this subsection.

SEC. [613] 512. Except for vehicles provided to the President, Vice President and their families, or to the United States Secret Service, none of the funds provided in this Act to any Department or Agency shall be obligated or expended to procure passenger automobiles as defined in 15 U.S.C. 2001 with an EPA estimated miles per gallon average of less than twenty-two miles per gallon. The requirements of this section may be waived by the Administrator of the General Services Administration for special purpose or special mission automobiles.

SEC. [618] 513. No funds appropriated by this Act shall be available to pay for an abortion, or the administrative expenses in connection

tion with any health plan under the Federal employees health benefit program which provides any benefits or coverages for abortions, [under such negotiated plans after the last day of the contracts currently in force].

SEC. [619] 514. The provisions of section [618] 513. shall not apply where the life of the mother would be endangered if the fetus were carried to term. (*Public Law 98-473 making continuing appropriations for the fiscal year 1985.*)

This appropriation finances research and development through contracts, grants, and intergovernmental agreements. These activities provide the scientific basis for EPA's regulatory actions.

**Air.**—Research will provide the data base needed to review the national ambient air quality standards, and establish new source performance standards and emission standards for hazardous air and mobile source pollutants.

**Water quality.**—Research in water quality includes gathering scientific data pertaining to toxic pollutants, developing guidelines for establishing site-specific water quality standards, support to the National Pollution Discharge Elimination System, and assessing the impact of various wastes when dumped into the ocean. Research is also performed in the municipal wastewater area.

**Drinking water.**—Includes research to evaluate the health effects of drinking water contaminants, methods to treat these contaminants in a cost-effective manner, and research to support the Agency's ground water protection activities.

**Hazardous waste.**—Research activities include providing hazardous waste measurement methods and protocols, assessing the risk from exposure to hazardous wastes, and developing the necessary data to revise and implement treatment, storage and disposal standards and regulations pursuant to recently enacted legislation.

**Pesticides.**—Activities provide scientific data to support the pesticides program by means of health and environmental exposure studies, the development of exposure protocols, and the quality assurance program.

**Radiation.**—Activities include radiological monitoring and surveillance services for the Department of Energy nuclear testing program at the Nevada Test Site.

**Interdisciplinary.**—Activities provide support for the long term research program, risk assessment guidelines, technology transfer, and quality assurance.

**Toxic substances.**—Activities support the development of scientific and technological methods to understand, predict and manage the entry and movement of chemicals into the environment and to determine the effects of these chemicals on both human health and the ecosystem.

**Energy.**—Activities support the development of a sound technical energy resource data base. Particular emphasis is placed on understanding and assessing the causes and effects of acid rain.

This appropriation includes funds for contracts, grants, and cooperative agreements for pollution abatement, control, and compliance activities.

**Air quality.**—The air program performs activities related to the achievement of air quality standards. These objectives are met by providing: (1) financial and technical assistance to State and local governments; and (2) direct Federal action where State or local governments are unable to meet the requirements of Federal law. Emphasis in 1986 will be directed primarily at the attainment and maintenance of National Ambient Air Quality Standards (NAAQS) and increased State participation as a way of achieving air quality objectives.

**Water quality.**—The water quality regulatory program has as its goal the protection and restoration of the Nation's waters. The program relies on a partnership between EPA and the States to meet the goals of the Act. The program encompasses the following major activities: (1) managing the municipal wastewater facilities construction grants program; (2) issuing National Pollutant Discharge Elimination System (NPDES) permits for industrial and municipal sources; (3) developing guidelines for issuance of dredge and fill permits; and (4) assuring compliance with regulations.

**Drinking water.**—The safe drinking water program protects the Nation's drinking water supplies from contaminants. This involves: (1) setting national drinking water standards that protect human health; (2) initiating enforcement actions for compliance with drinking water and underground injection control regulations; and (3) assisting States in implementing or directly implementing these regulatory programs.

**Hazardous waste.**—The hazardous waste program is designed to insure that hazardous wastes are managed in a manner that will protect public health and the environment. With the passage of the 1984 RCRA Amendments, emphasis will be placed on the development of regulations and standards to support new areas such as leaking underground storage tanks, small quantity generators, municipal landfills, and corrective action for prior releases at solid and hazardous waste facilities. Similarly, the program will continue to emphasize delegation of authority to the States and to accelerate permitting and enforcement of hazardous waste regulations. State assumption of hazardous waste authorities will be encouraged through Federal financial assistance, regulations, and guidance.

## General and special funds—Continued

## ABATEMENT, CONTROL, AND COMPLIANCE—Continued

**Pesticides.**—EPA is responsible for protecting the public health and the environment from unreasonable pesticide risks, taking into account the economic, social, and environmental costs and benefits from pesticide use. Major activities include: (1) review and registration of pesticide products; (2) developing and processing registration standards; and (3) enforcement of pesticide use rules, with emphasis on Federal/State cooperation.

**Radiation.**—The radiation program endeavors to eliminate adverse health and environmental effects by limiting exposure to radiation. Major activities include development and promulgation of standards, regulations and guidelines to reduce exposure from radiation sources. In 1986, the program will concentrate its regulatory efforts on standards for airborne radionuclides, and decommissioning of nuclear facilities.

**Interdisciplinary.**—The interdisciplinary program is composed of several activities which cut across media programs. This involves: (1) review of environmental impact statements (EIS) to insure that actions undertaken by Federal agencies do not adversely affect the environment, (2) Federal agencies compliance with statutes and regulations for pollution control, and (3) all legal aspects of the Agency's enforcement efforts.

**Toxic substances.**—The toxic substances program is responsible for protecting human health and the environment from unreasonable risks posed by chemicals. The program places a balanced emphasis on evaluation and control of new and existing chemicals. Nonregulatory approaches to obtain compliance will be used where appropriate. It also manages funding appropriated in 1984 for grants and loans under the Asbestos School Hazard Abatement Act of 1984.

This appropriation covers grants made by States to local public agencies for construction of municipal wastewater treatment facilities in order to assist States and localities in attaining and maintaining water quality standards. It also includes disbursements under a 1983 loan agreement with Puerto Rico to cover local funding shortfalls, pursuant to the 1983 Territorial Omnibus Act. Additional authorizing legislation will be submitted shortly that will phase out the program by 1990.

This appropriation provides funds for the implementation of the Comprehensive Environmental Response, Compensation, and Liability Act of 1980. This Act provides authority for responding to and cleaning up hazardous substance emergencies and uncontrolled waste sites.

There are four basic components to the Superfund program: Hazardous Substance Response Actions; Enforcement; Research and Development; and Management and Support. These components will be integrated and coordinated to insure the wisest use of Fund money in order to achieve the greatest possible cleanup.

Financial responsibility for the program will be shared by the Federal and State governments as well as industry. EPA will allocate funds from its appropriation to other Federal agencies to carry out the Act. Legislation to reauthorize and increase the program funding and tax authorities will be submitted shortly.

The Federal Buildings Fund finances the activities of the Public Buildings Service which provides space and services for Federal agencies in a relationship similar to that of landlord and tenant.

The Fund, established in 1975, replaces direct appropriations by using income derived from rent assessments (standard level user charges—SLUC) which approximate commercial rates for comparable space and services. SLUC and other income to the fund is as follows:

The Federal Buildings Fund program consists of the following activities financed from standard level user charges:

**Construction and acquisition of facilities.**—Space is acquired through direct federally financed construction of facilities, extensions to existing buildings costing over \$500,000 and direct purchase of facilities. All costs directly attributable to Federal Buildings Fund construction projects for site acquisition and construction are also financed under this activity. The total cost of new commitments for direct federally financed construction and acquisition of facilities is estimated at \$112.5 million in 1985 and \$243.4 million in 1986.

**Repairs and alterations.**—Repairs and alterations of public buildings are funded under this activity. Protection of the Government's investment, health and safety of building occupants, transfer of agencies from leased space, and cost effectiveness are the principal criteria used in establishing priorities. Primary consideration is given to repairs to prevent deterioration and damage to buildings, their support systems, and operating equipment. This activity also provides for conversion of existing facilities and extensions estimated to cost less than \$500,000.

**Design and construction services.**—This activity consolidates funding for the full range of design and construction services including preparation of drawings and specifications, management and inspection of construction and repairs and alterations projects, other construction related costs and non-project related technical services. In the case of new construction projects and repairs and alterations projects over \$500,000, design work will be restricted to those projects reflected in the budget justifications for this activity or projects which have been specifically approved in appropriation acts.

**Purchase contract payments.**—Payments are made for liabilities incurred under purchase contract authority. Purchase contract authority, which provided for private investment capital financing of public buildings, expired at the end of 1975. The periodic payments cover principal, interest, taxes, and other requirements.

**Rental of space.**—Space is acquired through the leasing of buildings including space occupied by Federal agencies in U.S. Postal Service facilities. This program

## Intragovernmental funds—Continued

## FEDERAL BUILDINGS FUND—Continued

## LIMITATIONS ON AVAILABILITY OF REVENUE—Continued

will provide an estimated 88.9 million square feet in 1985 and 83.8 million square feet in 1986.

**Real property operations.**—Services are provided for Government-owned and leased facilities, including cleaning, utilities and fuel, protection, maintenance, and miscellaneous services (such as moving, evaluation of new materials and equipment, and field supervision). The 1986 direct program compares with the 1985 program as follows (estimated square feet and expenses in millions):

	1985		1986	
	Square feet	Expenses	Square feet	Expenses
Cleaning.....	176,552	198,935	174,079	193,336

Contracting.....		7,360		7,300
Space management.....				27,137
Total.....		700,680		709,678

**Program direction.**—Overall general management, including office automation, systems development, financial management, policy development, planning, program evaluation and administration, is funded under this activity.

**Other programs.**—When requested by Federal agencies, the Public Buildings Service provides building services such as tenant alterations, cleaning and other operations, and protection services which are in excess of those services provided under the standard level user charge.

This appropriation provides for Government-wide direction and coordination of a worldwide supply distribution system, management of supplies and personal property; transportation and travel management; vehicle fleet management; and property management activities for utilization, rehabilitation and donation of Federal property. The major on-going objectives of these programs are to reduce the cost of Government, maximize efficiency of operations and provide excellent service to all customers. To this end, the strategic objectives in 1985 and 1986 are to accelerate the GSA/FSS management plan that proposes further streamlining and refinement of the wholesale depot system and a major restructuring of the retail distribution system to provide a more responsive, cost efficient method of customer support.

**Supply.**—The purpose of this activity is to provide and support a worldwide logistics supply system to contract for and distribute supplies and property to authorized users of the Federal supply system. This budget proposes \$137,341,000 in 1986 to support the following programs:

(a) A national distribution system of wholesale and retail facilities through which commercial-type commodities are received, stored and issued on a worldwide basis to customer agencies. This includes operation of programs for: requisition processing; inventory management; commodity management and logistics data management and the civilian agency catalog activity. The major objective of these programs is to increase the scope of supply support rendered to Federal agencies through increased productivity and efficiency. In 1985, FSS will initiate, in accordance with OMB Circular No. A-76, five studies of the wholesale depot system with projected completion dates in 1986. A-76 studies of the 4 full service facilities will commence in 1986 with scheduled completion dates in 1987 and 1988. Presupposing conversion to commercial contracting after the five studies, the estimated savings in 1986 are \$0.9 million and 258 FTE. In 1985, FSS plans to close 29 self-service stores and open 6 customer supply centers. This

changeover will reduce the retail network from 50 to 21 self-service stores with 18 customer supply centers. The net impact on resources will be a reduction of \$0.9 million and a reduction of 176 FTE in 1986. A-76 studies will commence in 1986 on the retail network system with projected completion in 1988. The wholesale distribution operation consists of sales shipped to customer agencies from 8 depots; a fuel yard located in Washington, DC and items issued to agencies through self-service stores and Customer Supply Centers. Sales volumes in 1986 are estimated to be as follows: stores' regular, \$1,165.0 million; stores' direct delivery, \$97.0 million; and special orders at \$654.0 million. Inventory levels available for issue to customer agencies are estimated at \$276 million at the end of 1985 and 1986 with a stock turn of 3.4.

(b) Contracting for commercial-type items required by Federal agencies and other authorized users. These functions are carried out by 11 buying offices and 4 National Commodity Centers responsible for designated commodities: tools, furniture, automotive and general office and scientific products. This program selects commodities for inclusion in the stores, special order, and Federal supply schedules by determining the most economical and effective method of supply. Automation of the procurement processes has enhanced the GSA/FSS competitive procurement program. Implementation of the automated document preparation system (BRAVO X) automates the preparation/publishing of schedules, commercial item descriptions, GSA supply catalog and other related procurement documents; Multi-Use File for Interagency News (MUFFIN) provides on-line information on FSS commodities and services; and the prototype automated procurement system shortens the time between solicitation and award of schedule contracts. The primary goal of the contracting program is to capture a greater portion of the Government market for common use goods and services by diverting Federal agency purchases from the open market to more economical GSA supply sources. The goal in 1986 is to increase procurement volumes to \$4.4 billion. Procurement volumes in 1986 are estimated as follows:

[In millions of dollars]

Stores stock.....	1,262.0
Special order.....	654.0
Schedules.....	2,100.0
Vehicle purchases.....	395.0

(c) Contract management to assure that vendors fully meet all terms and conditions of contracts, and that the quality of materials purchased complies with the requirements of those contracts. Testing capability is maintained through commercial and Government laboratories. The Quality Approved Manufacturer's Program allows manufacturers with approved quality control systems to ship material to agencies without Government inspection.

**Transportation.**—The purpose of this activity is to provide a comprehensive and effective Government-wide program for transportation and travel management, operation and maintenance of motor equipment to meet agency requirements, and development and execution of the automotive procurement functions of

the Government. This budget proposes \$11,185,000 to support the transportation programs.

The GSA/FSS transportation and travel management programs continue to provide support and dollar savings for Government agencies through negotiated airline city-pair contracts, Amtrak discounts, Travel Management Centers (TMC), hotel/motel discounts, long-term vehicle lease contracts program, Centralized Maintenance Control Centers, and the Federal Fleet Management consolidation program.

**Property management.**—This activity manages and operates a Government-wide excess personal property program including the utilization, donation, and sale of property. It encompasses all Government agencies, and provides for utilization of excess property; donation of surplus personal property for public benefit purposes; sale of surplus and exchange/sale of personal property (except DOD property); and rehabilitation and reclamation of Government personal property to extend its useful life. The Personal Property Centers centralize operations for handling Federal agencies excess and surplus personal property pending disposition. Centralization significantly reduces storage space requirements Government-wide; provides rapid disposition of excess and surplus property; and reduces duplicative handling of such property. The budget proposes \$15,731,000 in 1986 to support increased quantity of personal property activities and dollar savings to Government agencies.

In 1986, transfers of excess personal property are expected to be \$747 million, transfers of surplus property are estimated at \$505 million; and sales proceeds are estimated to be \$62 million.

**Reimbursable operations.**—This activity provides supply support services to other Government agencies on a reimbursable basis, principally involving (1) the special handling of items to be shipped to overseas destinations, (2) the provision of technical support services to the Government of Saudi Arabia for a joint U.S./Saudi Arabian project, (3) the provision of rehabilitated furniture to agencies at a reduced cost, (4) the printing of the Federal Travel Directory through a reimbursable agreement with the Military Traffic Management Command, (5) the provision of administrative support associated with the Foreign Military Sales Program, and (6) the operation of Seized and Forfeited Personal Property Centers. The budget proposes a level of reimbursable services of \$30,787,000 in 1986.

This fund finances, on a reimbursable basis, (1) a national supply distribution system and a system of ordering supplies for direct delivery to agencies; (2) a system of interagency Federal Fleet Management Centers; and (3) the purchase of administrative equipment for using activities. This estimate provides for supplies and services to both military and civilian agencies.

**Supply operations.—**

**Stores, regular.**—Stock of common-use commodities are purchased in volume, stocked, and issued through supply facilities to Government agencies. Sales were \$918.8 million in 1984, and are estimated to be \$1,035.0 million in 1985, and \$1,129.0 million in 1986.

**Stores, direct delivery.**—Orders for stores-type items, if sufficiently large and delivery time is not a factor, are placed with the commercial source of supply for delivery directly to the customer. Sales were \$73.1 million in 1984, and are estimated to be \$90.0 million in 1985 and \$97.0 million in 1986.

**Special order.**—Definite quantity requirements of commodities which are not susceptible to economical stocking in supply facilities are purchased for direct shipment to using agencies. Sales were \$632.3 million in 1984, and are estimated to be \$654.0 million in 1985 and in 1986.

**Export operations.**—Stores and special order items are shipped to overseas customers. Receipts to the fund cover packing, transportation costs, and other reimbursable services. Sales were \$32.6 million in 1984, and are estimated to be \$35.0 million in 1985, and \$36.0 million in 1986.

**Federal Fleet Management Centers.**—Services are provided through a system of Fleet Management Centers. Sales were \$236.6 million in 1984, and are estimated to be \$260.0 million in 1985, and \$310.0 million in 1986. Vehicle mileage in the system was 954 million in 1984 and is estimated to be 1,017 million in 1985 and 1986.

**Administrative equipment.**—Administrative equipment is purchased and charged to primarily GSA using activities. Receipts were \$3.5 million in 1984, and are estimated to be \$3.9 million in 1985 and \$4.2 million in 1986.

**Other revenue and expense.**—Gains or losses on equipment disposals, adjustments between fiscal years, inventory writeoffs, and discounts are applied against operating costs.

This appropriation provides for the overall direction and coordination of comprehensive Government-wide programs for the management, procurement, and utilization of automatic data processing, telecommunications, and office information equipment and services. It provides for the development and coordination of Government-wide policies, procedures and regulations pertaining to ADP, telecommunications, and office information systems acquisition, management and utilization; provides for establishment of Government-wide automated data processing standards; provides information services to the public; and provides for the overall management of operations financed through the Automatic Data Processing (ADP) Fund and the Federal Telecommunications (FT) Fund.

**Federal information resources management.**—This activity develops, plans, and directs Government-wide programs for the management and acquisition of Federal information resources and for improving Federal records and information management programs including policies and regulations relative to these programs.

**Central information services.**—This activity manages and directs data and information systems; provides data and information services; operates programs for the improvement of Government-wide software; and provides near-term planning, applied research and development, engineering, operation, and management of the Federal Telecommunications System (FTS).

In 1984, responsibility for publication of the Catalog of Federal Domestic Assistance Programs was transferred from the Office of Management and Budget to

the General Services Administration and is included in this activity.

**Information resources procurement.**—This activity provides for the overall management, control, and coordination of Government-wide programs and activities relating to the procurement of ADP and telecommunications equipment, software, maintenance, and related supplies and services; the implementation of Government-wide ADP resources sharing programs; and the management of reimbursable ADP and telecommunications procurement programs financed through the Automatic Data Processing Fund and the Federal Telecommunications Fund.

**Regional information services.**—This activity is the focal point for OIRM regional activities; provides for the overall management, control, and coordination of Government-wide programs and activities relating to the operation, maintenance, and utilization of local telecommunications equipment and services; provides for the management of reimbursable programs financed through the Federal Telecommunications Fund; and provides assistance to the public through the Federal Information Centers.

**GSA information systems.**—This activity develops and oversees GSA policy concerning the acquisition, development, and use of automated information systems, equipment, and facilities within the guidelines established by the Executive Steering Committee for Information Resources Management; ensures that the GSA ADP Strategic Plan is kept current and that initiatives undertaken are consistent with the plan; and develops and enforces standards and procedures to be used by GSA organizations in the acquisition, development, and use of automated information systems, equipment and facilities. In addition, this activity provides, on a reimbursable basis, internal common use ADP and data communications support and services.

**Information security oversight office.** This office makes available to the public as much information as possible regarding the affairs of Government, while at the same time providing maximum protection for national security information. In 1986, 125 inspections of information security programs will be conducted; a total of 100 reviews of agency regulations, systematic review guidelines and classification guides will be performed; implementing directives will be prepared and promulgated; and seminars and symposia will be conducted to promote better understanding of the program.

The Consumer Information Center Fund, a revolving fund established by Public Law 98-63 on July 30, 1983, provides for a more efficient operation of the Consumer Information Center's activities. Previously, these activities were funded from a direct appropriation with the cost of distributing agency publications funded by reimbursements from the participating agencies. The new fund assumed all of the liabilities, obligations and commitments of the Consumer Information Center account. Under the revolving fund, the Consumer Information Center's activities are financed from monies deposited to the fund, consisting of annual appropriations from the general funds of the Treasury, reimbursements from agencies, user fees collected from the public and other income incident to Consumer Information Center activities. Revenue generated by the reimbursable activities of this fund is expected to increase from \$2.1 million in 1984 to \$3.0 million in 1985 to \$3.1 million in 1986.

**Operations.**—The Consumer Information Center helps Federal departments and agencies release consumer information collected as a by-product of the Government's program activities. The Consumer Information Center maintains close working relationships with more than 30 Federal agencies in order to identify, develop, promote and make accessible to the public Federal consumer information. In addition, the Consumer Information Center promotes public awareness of this information through publication of the quarterly *Consumer Information Catalog*, and through various media services.

**Publications Distribution.**—The Consumer Information Center bills agencies and in turn reimburses the Government Printing Office for the costs of distributing free publications to the public.

This fund finances, on a reimbursable basis, a telecommunications system for the Federal Government which is a major operating component of the national communications system.

Expenses payable from the fund include personal services, procurement by lease or purchase of equipment and operating facilities (including cryptographic devices), and other costs necessary to operate the system. These expenses are reimbursed from appropriations and funds of any agency or organization for telecommunications services and facilities made available to them.

The estimate for 1986 provides for a continued increase in the volume and quality of communications services provided to executive agencies of the Government. Total sales for 1984 were \$691.2 million and are estimated at \$786.0 million in 1985, and \$820.9 million in 1986.

**Voice program.**—Provides for a telephonic system which enables personnel in each Federal agency to communicate directly with any other agency in the Nation. The system provides day-to-day services and incorporates features which would be necessary in emergency situations. In addition, this program finances reimbursable services in support of other agencies' dedicated requirements. Total sales for 1984 were \$661.5 million and are estimated at \$745.3 million in 1985 and \$768.2 million in 1986. Intercity Federal Telecommunications System calls were 300 million in 1984 and are estimated at 320 million in 1985 and 1986.

**Data program.**—Provides a common unified communications system to satisfy record communications requirements of the Federal civil agencies by providing machine-to-machine service for transmission of data by teletypewriter, facsimile, and other transmission media, while at the same time providing message processing capability required for peak-period traffic loads, time zone differences, machine code and language translation, and processing of multiple address messages. Total sales for this program are projected to decrease from \$17.0 million in 1984 to \$7.8 million in 1985 and increase to \$8.5 million in 1986.

**Circuit procurement program.**—Provides for centralized procurement of dedicated circuits and related equipment for civil agencies to obtain the benefits of multiple tariff offerings of commercial carriers, while at the same time permitting each agency to maintain operational control over its own circuits. Sales were \$1.5 million in 1984, and are projected at \$2.6 million for 1985 and \$2.8 million for 1986.

**Special programs.**—Provides for an effective communications security program for civil agencies in keeping with the objectives of the U.S. communications security plan, and a consolidated program of procurement and maintenance of equipment to implement such security plans. This program provides assurances for the continuity of the Federal telecommunications system in the event that portions of the system are disabled or destroyed. In addition, this program provides telecommunications support to the Federal Emergency Management Agency in the emergency and major disaster programs. Total sales for 1984 were \$11.2 million and are estimated at \$30.3 million in 1985 and \$41.4 million in 1986.

**Capital outlays.**—Provides for the purchase of telecommunications equipment where an initial capital outlay will result in the most efficient and cost effective operation of the Federal Telecommunications System and the least cost provision of services and facilities to Federal user agencies. Capital outlays were \$7.3 million in 1984 and are estimated to be \$10.7 million for 1985 and \$14.4 million for 1986.

**Operating results and financial condition.**—At the end of 1984, the net investment in the fund was \$36.8 million, composed of \$36.5 million appropriated and \$0.3 million donated assets capitalized. Following the close of each year any surplus earnings, after making provision for any prior year losses, are deposited in miscellaneous receipts of the Treasury.

The Automatic Data Processing Fund was authorized by Public Law 89-306, to coordinate and provide for the economic and efficient purchase, lease and maintenance of automatic data processing equipment by Federal agencies.

The fund finances on a reimbursable basis a Government-wide automatic data processing operation, including the procurement by lease, purchase, transfer, or otherwise of ADP equipment, maintenance of equipment, procurement and/or development of software programs with Government-wide application, procurement of a wide range of ADP services through national and regional contracts with private sector vendors and operation of service centers, and related functions.

The estimate provides for an increase in revenue during 1985 and 1986. Sales are estimated to increase from \$173.6 million in 1984 to \$249.2 million in 1985 and \$296.0 million in 1986.

**Multiple award schedules program.**—This program provides the contractual vehicle for Federal agencies to acquire services and equipment (currently only personal computers) from private sector vendors participating in certain GSA multiple award schedule contracts. This program is designed to simplify and expedite the procurement process for services by allowing agencies to purchase against already existing GSA multiple award schedule contracts.

**Federal Data Processing Centers (FDPC).**—FDPC's are operated by either GSA or by another agency under a delegation of authority from the Administrator of GSA. The centers provide a full range of services to all Federal agencies including consulting assistance in the formulation of strategic Federal Information Resources Management (IRM) plans, interactive ADP conversion support, language and software validation requirements, and a system for data collection. GSA is continuing its evaluation of existing and potential Federal data processing centers and whenever economic feasibility and agency requirements justify it, additional FDPC's will be established.

**Contract services program (CSP).**—CSP provides ADP services to Federal agencies through regional contracts with private sector vendors. Services provided include systems analysis and programing; systems design and definition of equipment and systems requirements; computer output microfiche production; data conversion services; and office automation systems analysis and microcomputer support. Contracts are tailored to local market conditions and needs of specific Federal agencies. Overall contract administration, central guidance, and policy direction are provided by GSA.

**Equipment lease program.**—This program finances the multiyear lease of ADP equipment by the ADP Fund for subsequent leaseback to Federal agencies and administers the leaseback of ADP equipment purchased by the Fund as a result of the Opportunity Buy Program.

**Excess ADP equipment program.**—This program finances the screening of excess Government-owned ADP equipment and, where there is a known user or high potential for reutilization, the activities involved with acquiring, reassigning and relocating the equipment with a new user.

**Opportunity buy program.**—This program finances ADP equipment purchases when special discounts with time limitations and other arrangements become available and agencies are unable to take advantage of these cost reduction opportunities due to budget cycle limitations. When such offers yield a high rate of return, achieve a significant cost avoidance, and the agency cannot reprogram funds to make the purchase, the offer is considered by the Opportunity Buy Program for purchases through the ADP Fund.

**Operating results and financial condition.**—At the end of 1984, the net investment of the fund was \$43.3 million, composed of \$30.0 million appropriated, \$12.9 million donated assets capitalized, and \$0.4 million reserve for unanticipated discontinuance of equipment. Following the close of each year any surplus earnings after making provision for prior year losses are deposited in miscellaneous receipts of the Treasury.

This appropriation funds the staff for the acquisition, administration and disposal of National Defense Stockpile inventories; administration and disposal of the Defense Production Act inventory; and utilization and disposal of excess and surplus real property in 1986.

The estimate for 1986 provides for storage, maintenance and inspection of stockpile materials, disposal of those stockpile materials excess to objectives and the acquisition of materials needed to meet objectives, the appraisal of real property, and continuing emphasis on reuse of existing real property to extend its useful life.

**Stockpile management.**—This activity manages the national defense stockpile of strategic and critical materials required to keep the Nation's mobilization base viable. It includes costs of receiving, storing, inspecting, and maintaining the material in storage locations.

**Stockpile transactions.**—This activity develops and implements plans and programs to acquire and dispose of stockpiled materials in accordance with statutory provisions. It includes the collection of technical, economic, and marketing data and an analysis of factors such as supply, demand, consumption, prices, specifications, and quality. These activities support the development of marketing and acquisition plans and programs, which are then implemented by the conduct of transactions in the commodities market.

**Real property.**—This activity promotes maximum utilization of real property by Federal agencies and the transfer among agencies of excess real property. It provides for the disposal of surplus real property by sale, exchange, lease, permit, assignment, or transfer, as well as the protection and maintenance of excess and surplus property pending its disposition. It also provides for the appraisal of excess and surplus property, necessary environmental and cultural analyses, disposition and predisposition reuse planning, and real property utilization surveys.

## NATIONAL DEFENSE STOCKPILE TRANSACTION FUND\*

## LIMITATION ON AVAILABILITY OF FUNDS

\*See Part II for additional information.

During the fiscal year ending September 30, 1985, not more than \$185,000,000, in addition to amounts previously appropriated, all to remain available until expended, may be obligated from amounts in the National Defense Stockpile Transaction Fund for the acquisition of strategic and critical materials under section 6(a)(1) of the Strategic and Critical Materials Stock Piling Act (50 U.S.C. 98e(a)(1)) and for transportation and other incidental expenses related to such acquisition: *Provided*, That none of the funds appropriated by this paragraph may be used to purchase any strategic and critical materials for the National Defense Stockpile that are not mined and refined in the United States: *Provided further*, That this paragraph shall only apply to those strategic and critical materials that are currently mined and refined in the United States or which can be produced domestically at the levels and quantities required by the Federal Emergency Management Agency.

Note.—The limitation for this account had not been enacted at the time this budget was prepared. A continuing resolution (Public Law 98-473) provides amounts to the extent and in the manner provided for in the conference version of H.R. 5798, Treasury, Postal Service and General Government Appropriations Act, 1985, as passed by the House of Representatives.

This appropriation provides for policy direction and coordination of all GSA programs by the Administrator, his Deputy, 11 Regional Administrators and Congressional and External Affairs; agency-wide acquisition policy, planning and coordination; and agency-wide ad-

ministrative, financial, and management support services on a centralized and integrated basis.

**Office of the Administrator, salaries and expenses:**

**Executive direction.**—Directs the execution of all functions assigned GSA by the Federal Property and Administrative Services Act of 1949 as amended, and the reorganization plans of the President. Maintains close coordination with Small Business Administration on national minority business proposals and contracts, assuring they receive a fair share of departments' business. Formulates agency policy regarding management improvement initiatives.

**Communications, congressional and public affairs.**—Responsible for GSA customer relations and public information activities, directing and coordinating interaction between agency officials and members of Congress, and for program initiatives within the agency.

**Board of Contract Appeals.**—In accordance with the Contract Dispute Act of 1978, the Board has jurisdiction over any dispute relating to a contract for the provision of goods and services to the Government, inclusive of, but not limited to, disputes clause cases concerning contract performance; appeals of disappointed bidders; and proposed debarment or suspension actions.

**Acquisition policy.**—Oversees the implementation of GSA-wide acquisition, supply, and storage management policies, and insures implementation through surveillance and performance of acquisition management reviews. It also has the function of the Federal Acquisition Institute. This office is the primary point of contact with the Office of Federal Procurement Policy; administers the Federal Procurement Regulations; and prepares legislation for the agency acquisition program.

**Regional support and operations.**—Major responsibilities of this activity are contract review and clearance; contract assurance and compliance; small and disadvantaged business counseling; and processing EEO complaints. It is also responsible for overall management of field offices.

Administrative, financial, and management support, salaries and expenses:

**Comptroller.**—Centralized budgeting, financial management, and accounting are provided to the GSA services and staff offices. In addition, provides accounting services to Department of Justice in defense of Indian tribal claims against the U.S. Government. Also provides contract audit for transportation bills and claims against the Government by commercial carriers.

**Personnel.**—This activity is responsible for the planning, implementation, and direction of all activities of GSA related to personnel management, including labor management relations, training, equal employment opportunity, position management and personnel documents.

**Management support and administrative services.**—Directs the GSA mobilization, emergency relocation and national civil defense planning program, including coordination of support services and assistance to other agencies. Oversees implementation of audit reports from Office of Inspector General and the GAO, and physical security surveys to prevent misuse and theft of GSA assets. Coordinates all activities of GSA related to administrative management, and the management of the GSA printing and distribution program.

**Legal services.**—Covers the field of real property, personal property, automated data and telecommunications, transportation and public utilities, stockpile acquisition and disposal and finance and administration.

This appropriation provides agencywide audit and investigative functions to identify and correct manage-

ment and administrative deficiencies within GSA which create conditions for existing or potential instances of fraud, waste and mismanagement. The audits function provides internal audit, contract audit, and inspections services. Contract audits provide professional advice to GSA contracting officials on accounting and financial matters relative to the negotiation, award, administration, repricing, and settlement of contracts. Internal audits review and evaluate all facets of GSA operations. Inspections services provide detailed technical evaluations of GSA operations. The investigative function provides for the detection and investigation of improper and illegal activities involving GSA programs, personnel, and operations.

Central blueprinting, duplicating, and distribution services are financed by a working capital fund (40 U.S.C. 293). As authorized by the Joint Committee on Printing, U.S. Congress, GSA has established and operates 11 printing plants to meet the needs of GSA and other Government agencies. These activities are under

continuous review to assure that the method of printing is the least costly alternative to the Government.

GENERAL SERVICES ADMINISTRATION—  
GENERAL PROVISIONS

Note.—A regular 1985 appropriation bill has not been enacted. The following general provisions were enacted by reference in a continuing resolution (Public Law 98-473).

SEC. 1. The appropriate appropriation or fund available to the General Services Administration shall be credited with (1) cost of operation, protection, maintenance, upkeep, repair, and improvement, included as part of rentals received from Government corporations pursuant to law (40 U.S.C. 129); and (2) appropriations or funds available to other agencies, and transferred to the General Services Administration, in connection with property transferred to the General Services Administration pursuant to the Act of July 2, 1948 (50 U.S.C. 451ff) and such appropriations or funds may be so transferred, with the approval of the Office of Management and Budget.

SEC. 2. Funds available to the General Services Administration shall be available for the hire of passenger motor vehicles.

SEC. 3. Appropriations available to any department or agency during the current fiscal year for necessary expenses, including maintenance or operating expenses, shall also be available for payment to the General Services Administration for charges for space and services and those expenses of renovation and alteration of buildings and facilities which constitute public improvements, performed in accordance with the Public Buildings Act of 1959 (73 Stat. 749), the Public Buildings Amendments of 1972 (86 Stat. 216), or other applicable law.

SEC. 4. Not to exceed **[1]** 3 per centum of funds made available in appropriations for operating expenses and salaries and expenses, during the current fiscal year, may be transferred between such appropriations for mandatory program requirements. **[Any transfers proposed shall be submitted promptly to the Committees on Appropriations of the House and Senate for approval.]** *The Administrator*

*shall promptly notify the Committees on Appropriations of the House and Senate of any transfers.*

SEC. 5. Funds in the Federal Buildings Fund made available for fiscal year **[1985]** 1986 for Federal Buildings Fund activities may be transferred between such activities only to the extent necessary for mandatory program requirements. **[Any transfers proposed shall be submitted promptly to the Committees on Appropriations of the House and Senate for approval.]** *The Administrator shall promptly notify the Committees on Appropriations of the House and Senate of any transfers.*

**[SEC. 6. Funds hereafter made available to the General Services Administration for the payment of rent shall be available for the purpose of leasing space in buildings erected by the lessor on land owned by the United States.]** *(Public Law 98-473, making continuing appropriations for the fiscal year 1985.)*

------	--	-------	-------	-------

This appropriation provides for research and development activities of the National Aeronautics and Space Administration. The elements of the program and the work to be performed during 1986 are described below:

#### Space Transportation Systems.—

**Capability Development.**—The principal activities include development of the orbital maneuvering vehicle, development of the US/Italy tethered satellite system, efforts related to the Spacelab, the upper stages that place satellites in high altitude orbits not attainable by the shuttle, the engineering and technical base support at NASA centers, payload operations

## General and special funds—Continued

## RESEARCH AND DEVELOPMENT—Continued

and support equipment, and advanced programs study and evaluation efforts.

Development of a reusable orbital maneuvering vehicle will begin in 1986 with initial operations planned for 1990. The OMV will retrieve spacecraft, provide remote satellite servicing and other operations beyond shuttle capability.

The Tethered Satellite System, scheduled for initial flight in 1988, will provide a unique capability for conducting space experiments in regions remote from the Space Shuttle orbiter, especially in the upper atmosphere.

The European Space Agency (ESA) developed Spacelab successfully completed its first mission in December 1983 and will fly both its second development and first dedicated operational missions during 1985. Dedicated missions for 1986 involve use of the Spacelab module, pallets and other minor structures for science and applications missions.

Efforts on Space Transportation System upper stages will be pursued further. In 1986, two Centaur/STS upper stages will be delivered for the 1986 launches of the Galileo and the Ulysses Missions. Development of a common Centaur for the STS will continue. Additional upper stage vehicles are being procured for the Venus Radar Mapper, Tracking and Data Relay Satellite Missions, and other NASA scientific missions.

*Space station.*—The United States will continue with the definition and design of a space station. The space station will provide permanently manned, space-based facilities to allow for enhancement of the Nation's science and applications programs, and for development of capabilities for commercial exploitation of space, while exploring advanced technologies potentially useful to the economy.

In 1986, definition studies, advanced technology developments and preliminary design will be pursued.

One of the main objectives of the definition and design period will be to clarify future costs and capabilities potential station configurations. In particular, emphasis will be placed on insuring that potential station configurations provide a balance between manned and unmanned elements that can be readily adapted to changing national requirements and future technologies.

*Scientific Investigations in Space.*—The Space Science and Applications programs expand our knowledge of the Earth and its space environment, the solar system, the galaxy and the universe, and conduct research and selected technology developments to encourage the application of space technologies to needs on Earth.

*Physics and Astronomy.*—Research is being conducted to investigate the Earth's environment, the Sun and the interplanetary medium, the galaxy and distant space, as well as the interrelationships among these areas and the processes that control them.

The major activities in 1986 include: final integration and testing of the Hubble Space Telescope leading to a launch in the second-half of 1986; fabrication and testing of the major Gamma Ray Observatory

subsystems; and the continuation of Shuttle/Spacelab instrument development and mission management activities including development of sounding rocket-type payloads to be flown on the Shuttle. Spacelabs-2 and -3 are scheduled for launch in 1985 and Spacelab-4 is scheduled for launch in early 1986. Work is also continuing on several Explorer projects to continue research thrusts started in prior years.

*Planetary Exploration.*—This program encompasses the scientific exploration of the planets and their satellites, comets and asteroids, and the interplanetary medium to increase knowledge of the origin and evolution of the solar system.

During 1986, the final testing of the Galileo spacecraft will be completed leading to launch to Jupiter in May 1986. The Ulysses (previously the International Solar Polar Mission) spacecraft will be delivered by the European Space Agency (ESA) and launched in May 1986. The Venus Radar Mapper spacecraft design and development activities will be continued during 1986 with critical design reviews on the spacecraft and synthetic aperture radar. In addition, the Mars Geoscience/Climatology Orbiter mission design and development activities will be continued. This mission, scheduled for launch in 1990, will perform geochemical and climatological mapping of Mars. Voyager 2 (launched in 1977) will perform encounters with Uranus in 1986 and Neptune in 1989.

Studies will also be conducted during 1986 on future candidate missions. Analysis of data from past planetary missions will also continue, including data from the continuing Voyager and Pioneer Missions.

*Life Sciences.*—This program provides for the research and technology required to meet the goals of ensuring human health, safety, well-being, and performance in space; using the space environment to advance knowledge in Earth medicine and biology, and understanding the origin and distribution of life in the universe.

During 1986, the life sciences flight experiments development activities will continue, leading to a series of reflyable dedicated life sciences Shuttle/Spacelab missions, the first of which is scheduled for launch in 1986.

*Space and Terrestrial Applications.*—

*Space Applications.*—The major programs in space applications are observations of the Earth and its environment, materials processing, space communications and information systems. Major solid Earth observation activities in 1986 include evaluation of Shuttle Imaging Radar data for geological mapping in the land and ocean environment, imaging spectrometer technological activities and geodynamics studies of global tectonic plate deformation.

Environmental observation activities focus on utilizing space technology to understand the Earth's atmosphere, oceans, ionosphere and magnetosphere. In 1986, Shuttle/Spacelab payload development efforts will continue along with definition activities on advanced instruments such as the Imaging Spectrometer Observatory, the Solar Terrestrial Atmospheric Spectrometer, and the Light Detection and Ranging measurement devices. In addition, development of in-

struments to be flown on the Tethered Satellite System will continue.

Development will continue in 1986 on the Upper Atmospheric Research Satellite (UARS) mission to conduct research on the Earth's upper atmosphere with the goal of understanding it well enough to assess its susceptibility to chemical change. The UARS mission will provide a unique data set of the influence of the composition and dynamics of the upper atmosphere on tropospheric weather and climate.

Development activities will be continued in 1986 on a Scatterometer, to be flown in 1989 on the Navy's Remote Ocean Sensing System, to measure wind velocity on the surface of the ocean. NASA, the National Oceanic and Atmospheric Administration (NOAA) and the Navy will use data obtained by the Scatterometer to calculate ocean currents and other measurements that will improve our understanding of the momentum coupling of the atmosphere and ocean.

Materials Processing activities in space (also known as microgravity science) in 1986 will involve the investigation of the processes and phenomena which would be most enhanced by the absence of gravity.

These activities are conducted through a combination of ground-based research, aircraft and drop tube towers and with Shuttle experiments.

In space communications, development activities will be continued in 1986 on the advanced communications technology satellite (ACTS) planned for launch in 1989. ACTS is planned to provide advanced technologies for future communications satellites. Research and analysis will continue to support development of advanced component and device technology for communications satellite systems.

Information Systems activities in 1986 will provide analysis and technology to address concerns of the science community for improved access to and efficient manipulation of the massive amounts of data derived from space science and applications missions.

**Commercial programs.**—These programs include technology utilization and commercial use of space.

The technology utilization program is designed to transfer aerospace technology from NASA's research and development base to nonaerospace sectors of the U.S. economy. During 1986, NASA will continue its efforts to help foster the dissemination of new technology developed by the Agency's programs.

The commercial use of space is designed to increase private sector awareness of the opportunities in space. Private industry will be encouraged to invest and participate in high technology research and development utilizing the unique characteristics of space.

**Space Research and Technology.**—In 1986, work directed toward providing the broad base of technology underlying the conduct of future space missions will continue.

**Aeronautical Research and Technology.**—This program conducts research and develops technology for future military and civil aircraft through support for the staff, major facilities and other activities of the three major aeronautical centers.

Major thrusts of 1986 activities include: continuing advancement in both basic aeronautical disciplines and systems research; maintaining and operating specialized facilities essential to aeronautical research; and pursuing technological advances in critical areas of high risk and potentially high payoff to the Nation. These activities will continue to provide a strong research and technology base in the aeronautical disciplines of fluid and thermal physics, applied aerodynamics, materials and structures, controls and guidance, human factors, information sciences, propulsion and power, flight systems, and systems analysis and studies. Systems technology efforts will continue in a variety of areas including rotorcraft, high-performance aircraft, supersonic aircraft, advanced propulsion systems, and numerical aerodynamic simulation.

**Supporting Activity: Tracking and Data Acquisition.**—These programs provide advanced studies to ensure capability for tracking, data acquisition, communications, and data processing support required by all NASA flight projects in accomplishing their mission objectives. Research and development activities will provide tracking and data acquisition support systems for future flight programs.

------	---	---------	---------

This appropriation provides for production and operational activities for the Space Transportation System; and for tracking, telemetry, command, and data acquisition support of all NASA flight projects. The elements of the program and the work to be performed during 1986 are described below.

## Space Transportation Systems.—

## Shuttle production and capability development.—

The Space Shuttle is the key element of a versatile Space Transportation System that is available to a wide variety of national and international users.

This program provides for the national fleet of Space Shuttle orbiters including main engines, launch site and mission operations control requirements, initial structural and operational spares, production tooling, and related supporting activities. In 1985, Columbia (OV-102) will complete a major modification process that will strengthen the internal structure and provide Columbia with greater vehicle load-carrying capability. Atlantis (OV-104) is scheduled for delivery in April 1985. Discovery (OV-103) is presently planned to be used for the first West Coast launch in 1986.

In 1986, the principal activities are: continued improvement and testing of the Space Shuttle's main engines to increase their durability and reliability at full power level; fabrication of engines and spare components to support the orbiter fleet planned flight rate, the ongoing fabrication of the various major orbiter structural spares such as the wings, vertical stabilizer, crew modules, payload bay doors and aft thrust structure, and the initial launch of the filament wound composite motor case for the solid rocket booster that will provide for increased performance capability for selected missions. For the external tank, emphasis continues on cost-reduction/production readiness efforts as the production rate build-up increases.

Another principal activity involves enhancement of launch and mission support capability. The first line of facilities at the Kennedy Space Center developed earlier to support launch processing and checkout of the Shuttle vehicle is being enhanced. A second line of facilities is being procured to service the increased number of orbiters and to achieve and sustain a level of up to 20 East Coast launches per year. During 1986, a second launch pad and third mobile launch platform will be activated.

**Operations.**—This activity provides the standard operational services for the Space Shuttle and the expendable launch vehicles. The Space Shuttle operations program provides launch services for NASA missions, Department of Defense, other U.S. Government, domestic commercial and international missions on a reimbursable basis.

In 1986, the planned flight rate will continue to build consistent with the increased demands for launch and operational services by users. The spectrum of users will continue to expand in both number and variety as the Space Shuttle system demonstrates its reliability and man-aided capabilities. In 1986, the Shuttle operations program will provide for the pro-

curement of hardware, mission integration and training, ground processing and flight operations.

The NASA expendable launch vehicle programs (Scout, Delta, Atlas Centaur, and Atlas F) will be completely funded on a reimbursable basis in 1986. The Delta program will continue to support the last two launches currently scheduled through 1986. The remaining launches in the Atlas-Centaur program include two international missions planned for 1985 and three government missions planned through 1987.

**Supporting Activity: Tracking and Data Acquisition.**—This program using ground-based and satellite (tracking and data relay satellite system) components provides vital tracking, telemetry, command, and data acquisition support to meet the requirements of all NASA flight projects. In addition to NASA flight projects, support is provided on a reimbursable basis for projects of the Department of Defense and other Government agencies, commercial firms, and other countries and international organizations engaged in space research endeavors.

#### CONSTRUCTION OF FACILITIES

For construction, repair, rehabilitation and modification of facilities, minor construction of new facilities and additions to existing facilities, and for facility planning and design not otherwise provided, for the National Aeronautics and Space Administration, and for the acquisition or condemnation of real property, as authorized by law, **[\$150,000,000] \$149,300,000**, to remain available until September 30, **[1987] 1988: Provided**, That, notwithstanding the limitation on the availability of funds appropriated under this heading by this appropriation Act, when any activity has been initiated by the incurrence of obligations therefor, the amount available for such activity shall remain available until expended, except that this provision shall not apply to the amounts appropriated pursuant to the authorization for repair, rehabilitation and modification of facilities, minor construction of new facilities and additions to existing facilities, and facility planning and design: **Provided further**, That no amount appropriated pursuant to this or any other Act may be used for the lease or construction of a new contractor-funded facility for exclusive use in support of a contract or contracts with the National Aeronautics and Space Administration under which the Administration would be required to substantially amortize through payment or reimbursement such contractor investment, unless an appropriation Act specifies the lease or contract pursuant to which such facilities are to be constructed or leased or such facility is otherwise identified in such Act: **Provided further**, That the Administrator may authorize such facility lease or construction, with **[the approval of]** notice to the Committees on Appropriations, if he determines that deferral of such action until the enactment of the next appropriation Act would be inconsistent with the interest of the Nation in aeronautical and space activities **[: Provided further**, That with funds appropriated under the Research and Development account and the Space Flight, Control and

Data Communications account to NASA in this Act, and subsequent appropriations Acts, NASA may enter into a contract with the California Institute of Technology to amortize the Central Engineering Building over a twelve-year period for a total cost of not to exceed \$17,000,000, plus applicable financing costs equal to the prime rate plus 2 percent, under the authority granted under Public Law 98-45. The building shall be built at the Jet Propulsion Laboratory with title to be vested initially in the California Institute of Technology, and to revert to NASA upon completion of payments. **(Department of Housing and Urban Development—Independent Agencies Appropriation Act, 1985; additional authorizing legislation to be proposed.)**

This appropriation provides for contractual services for the design, repair, major rehabilitation, and modification of facilities; the construction of new facilities; minor construction; the purchase of land and equipment related to construction and modification; and advanced design related to facilities planned for future authorization. The principal projects in the 1986 program are described below:

**Space transportation systems.**—This activity includes funds for Space Shuttle facilities at various locations.

**Scientific investigations in space.**—This activity includes the construction of a spacecraft systems development and integration facility and the construction of additions to the research projects laboratory at the Goddard Space Flight Center, Greenbelt, MD; and construction of payload control rooms at the Kennedy Space Center, FL.

**Aeronautical research and technology.**—This activity includes the completion of the construction of a numerical aerodynamic simulation facility at the Ames Re-

This appropriation provides for research in Government laboratories, management of programs, and other expenses for the operation of eight NASA field installations.

Programwide support and management are provided by NASA headquarters, Washington, DC.

The budget levels proposed in this account for 1986 and later years reflect economies from management reform efforts now underway or planned.

**International cooperation.**—Foreign governments advance funds to allow the National Aeronautics and Space Administration to procure, in the United States, nonmilitary space-oriented materials and services on their behalf. Authority for this action is granted by the National Aeronautics and Space Act of 1958 (42 U.S.C. 2451 et seq.).

## [GENERAL PROVISIONS]

【The National Aeronautics and Space Administration has authority, notwithstanding any other provision of law, to take such actions as the Administrator deems necessary to provide to the National Science Foundation, on a fully reimbursable basis, Class VI Computers, otherwise acquired for service at NASA installations under authorized acquisition procedures, with accompanying peripheral equipment, as requested by the Foundation: *Provided*, That the National Science Foundation is authorized to receive from the National Aeronautics and Space Administration, Class VI Computers, with such accompanying peripheral equipment as NASA makes available, and, upon receipt, to sell said computer and peripheral equipment to an institution of higher education under such terms as it deems appropriate notwithstanding any other provision of law.】 (*Department of Housing and Urban Development—Independent Agencies Appropriation Act, 1985.*)

The Office of Personnel Management will implement a number of initiatives to achieve greater efficiencies through consolidation and centralization of the management of its field operations. These actions will meet the administration's goals of reducing administrative overhead expenses and streamlining delivery systems. In addition, the OPM will be conducting studies for contracting out business-like functions to effect more efficient operations whenever possible.

The Office of Personnel Management is responsible for personnel management functions which include the following activities:

**Staffing services.**—This activity consists of: (a) recruiting; (b) examining; and (c) developing classification standards.

Workloads are reflected in the following table:

**Administrative services.**—This activity includes: (a) personnel and equal employment opportunity; (b) budget; (c) finance; (d) facilities, publishing and acquisitions management; and (e) library and health services in support of all OPM programs.

**ADP services.**—This activity consists of the central computing facility and related functions in support of program requirements.

**Executive services.**—This activity includes: (a) executive direction; (b) policy development and evaluation; (c) legal advice and representation; (d) public affairs; (e) legislative activities; (f) labor-management relations; (g) the Inspector General function; and (h) administration of the Senior Executive Service system.

**Office of Government Ethics.**—This activity carries out the provisions of the Ethics in Government Act of 1978 and subsequent amendments. In accordance with the requirements of Public Law 98-150, it is estimated that requests for appropriations for the next four fiscal years will be: 1987, \$1,144 thousand; 1988, \$1,141 thousand; 1989, \$1,175 thousand; 1990, \$1,141 thousand.

**Other programs.**—This activity includes: (a) administering the Voting Rights Act of 1965; and (b) operating expenses of the President's Commissions on Executive Exchange and White House Fellows.

Workloads are reflected in the following table:

#### PAYMENT TO CIVIL SERVICE RETIREMENT AND DISABILITY FUND\*

\*See Part II for additional information.

For financing the unfunded liability of new and increased annuity benefits becoming effective on or after October 20, 1969, as authorized by 5 U.S.C. 8348, and annuities under special acts, to be credited to the Civil Service Retirement and Disability Fund: **[\$4,366,868,000] \$4,407,234,000.** *Provided,* That annuities authorized by the Act of May 29, 1944, as amended [2 C.Z.C. 181] (22 U.S.C. 3682(e)), August 19, 1950, as amended (33 U.S.C. 771-775), may hereafter be paid out of the Civil Service Retirement and Disability Fund.

Note.—A regular 1985 appropriation for this account had not been enacted at the time this budget was prepared. A continuing resolution (Public Law 98-473) provides funds to the extent and in the manner provided for in the conference version of H.R. 5798, Treasury Postal Service and General Government Appropriations Act, 1985, as passed by the House of Representatives.

**Payment of annuities under special acts.**—These annuities are paid to persons who were employed on the construction of the Panama Canal or to their widows; and benefits are paid to widows of former employees of the Lighthouse Service. Numbers of recipients are as follows:

	Sept. 30, 1984	Sept. 30, 1985	Sept. 30, 1986
Panama Canal annuitants .....	71	70	69
Lighthouse Service widows .....	212	201	191

**Payment of Government share of retirement costs.**—The Civil Service Retirement Amendments of 1969 provide for financing of the current year's costs of the unfunded liability created since its enactment on October 20, 1969. Any statute which authorizes (1) new or liberalized benefits, (2) extension of retirement coverage, or (3) pay increases, is deemed to authorize appropriations to the fund to finance the unfunded liability created.

**Transfers for interest on unfunded liability and payment of military service annuities.**—The Secretary of the Treasury is required to make annual payments from general revenues into the Retirement fund of an amount equivalent to: (1) interest on the unfunded liability (\$9,194 million), and (2) annuity disbursements attributable to military service (\$2,045 million). The Office of Personnel Management, at the end of each year, notifies the Secretary of the Treasury of the amount of payment to be made to the Retirement fund and reports such sums to the President and Congress. The unfunded liability on which the interest payment is computed is based on static economic assumptions, i.e. no inflation, which cause the liability to be understated. A more realistic estimate of the unfunded liability is made under Public Law 95-595 which requires dynamic assumptions which include future inflation. For 1983, the static unfunded liability on which interest was paid in 1984 was \$187.9 billion as opposed to the more realistic estimate under Public Law 95-595 of \$528.1 billion.

**Payments for contribution deficiency.**—The Social Security Amendments of 1983 make employees hired after December 31, 1983 subject to Social Security taxes. The Federal Employees' Retirement Contribution Temporary Adjustment Act of 1983, Public Law 98-168, provides that such employees will contribute only 1.3 percent of their basic pay to the various Federal retirement systems for interim coverage and that the appropriate agencies shall determine the amount of the contribution deficiency at the end of 1984, 1985, and 1986.

## General and special funds—Continued

## PAYMENT TO CIVIL SERVICE RETIREMENT AND DISABILITY FUND—Continued

The Office of Personnel Management will notify the Secretary of the Treasury of the deficiency for each fiscal year with respect to the Civil service retirement and disability fund, and an amount equal to the deficiency will be credited to the fund before the close of the fiscal year.

**Payments for spouse equity.**—The Civil Service Retirement Spouse Equity Act of 1984, Public Law 98-616, provides for the payment of survivor annuities to eligible former spouses of annuitants who died between September 1978 and May 1985 and who did not elect survivor coverage. The law authorizes the Office of Personnel Management to notify the Secretary of the Treasury of the amount of such annuities paid each fiscal year and directs the Secretary to credit this amount to the Civil Service Retirement and Disability Fund. However, the budget contains no estimates for this activity.

This schedule reflects the effect of an administration legislative proposal to: (1) eliminate the 1986 COLA increase, define future COLA's as the lesser of CPI or GS increases, and pay 55 percent of COLA on annuities in excess of \$10,000; (2) change survivor benefits to more closely conform with Social Security benefits; (3)

revise the annuity calculation formula to include the high five average salary; (4) phase-in a penalty for early retirement before age 65; (5) phase-out the retirement credit allowed for unused sick leave; and (6) phase-in increased Postal Service and D.C. Government contributions to cover the dynamic normal cost of retirement benefits. These changes will more closely align CSR benefits with those found in the private sector.

The fund provides for the cost of health benefits for: (1) active employees; (2) employees who retired after June 1960, or their survivors; (3) those annuitants transferred from the Retired Federal employees health benefits program as authorized by Public Law 93-246; and (4) the related expenses of the Office of Personnel Management in administering the program.

**Budget program.**—The balance of the fund is available for payments without fiscal year limitation. Numbers of participants at the end of each fiscal year are as follows:

	1984 actual	1985 estimate	1986 estimate
Active employees .....	2,288,000	2,313,000	2,313,000
Annuityants .....	1,401,000	1,444,000	1,484,000
Total .....	3,689,000	3,757,000	3,797,000

In determining a biweekly subscription rate to cover program costs, one percent is added to the rates developed by health benefit carriers, for administrative expense, and three percent is added for a contingency reserve held by the Office of Personnel Management (OPM) for each carrier. The OPM is authorized to transfer unused administrative reserve funds to the contingency reserve.

For Postal Service employees, the Government's contribution to the health benefits premiums is 75 percent of the current unweighted average of the high option premiums of six large plans. For general schedule and wage-board employees, the Government's contribution is 60 percent.

## EMPLOYEES HEALTH BENEFITS FUND—Continued

**Operating results.**—Funds advanced to carriers but not used to pay claims in the current period are carried forward as special reserves for use in subsequent periods.

The Office of Personnel Management maintains a contingency reserve, funded by employee and Government contributions, that may be used to defray future cost increases or provide increased benefits. OPM makes payments to carriers from this reserve whenever carrier-held reserves fall below levels prescribed by OPM regulations.

This fund finances insurance premiums paid to private insurance companies for Federal employees group life insurance and expenses of the Office of Personnel Management in administering the program. Separate cost data is maintained for employees regular group life insurance and insurance for members of former beneficial associations. The Federal Employees' Group Life Insurance Act of 1980 increases basic coverage for participants under age 45 and offers additional option coverages.

**Budget program.**—The status of the basic (regular and optional) life insurance program on September 30 is as follows:

Life insurance in force (in billions of dollars):	1984 actual	1985 estimate	1986 estimate
On active employees <sup>1</sup> .....	164	170	165
On retired employees .....	19	20	21

Annuitants .....	1,310	1,340	1,370
Total .....	3,745	3,775	3,805

<sup>1</sup> Excludes amount of accidental death and dismemberment insurance.

**Financing.**—For non-Postal Service employees, premium costs for the regular program are met by withholding 22 cents biweekly from the salaries of employees for each \$1 thousand of life insurance and a 50 percent matching by employer-agencies. The optional program is financed by withholding from employees' salaries or retirees' annuities. The beneficial association program is financed by direct collection from members. Most of the difference between receipt and benefit payments under the policy is held in reserve for paying future life

insurance claims. The status of reserves at the end of the year is as follows (in millions of dollars):

Held in reserve:	1984 actual	1985 estimate	1986 estimate
Contingency reserve .....	50	50	50
Beneficial association program reserve .....	1	1	1
U.S. Treasury reserve .....	5,966	6,685	7,409
Total reserves .....	6,017	6,736	7,460

The contingency reserve for the basic program was reduced to \$50 million as of June 30, 1976, and it is expected to remain at this level. Excess income from the program over benefit payments and other expenses is deposited in the U.S. Treasury to the credit of the Employees life insurance fund. The operations of the insurer for the regular and optional life insurance program is as follows: (in millions of dollars):

This appropriation provides for the payment of compensation benefits to veterans and survivors. Previously, funds for this program were appropriated under the title "Compensation and Pensions."

Compensation is paid to veterans for disabilities incurred in or aggravated during active military service. Death and Indemnity Compensation (DIC) is paid to survivors of service persons or veterans whose death occurred while on active duty or as a result of service-connected disabilities.

The Administrator may pay a clothing allowance to each veteran who wears or uses a prosthetic or orthopedic appliance (including a wheelchair) which, in the judgment of the Administrator, tends to wear out or tear the clothing of such veteran.

The "Veterans' Compensation and Program Improvements Amendments of 1984" (Public Law 98-223) increased compensation rates for disabled veterans and DIC rates for surviving spouses and children by 3.5 percent effective April 1, 1984.

The "Veterans' Benefits Improvement Act of 1984" (Public Law 98-543) increased compensation rates for veterans, DIC for spouses and children, and the veterans' clothing allowance by 3.2 percent effective December 1, 1984.

This appropriation provides for the payment of pension benefits to veterans and survivors. Previously, funds for this program were appropriated under the title "Compensation and Pensions."

Pension benefits may be paid to veterans or their survivors. Veteran's entitlement is based on active duty service of a specific length (normally 90 days or more) during a designated war period; disabilities considered permanent and total; and countable income below established levels. There is no disability requirement for survivor cases. Income support is provided at established benefit levels.

The "Veterans' Benefits Improvement Act of 1984," Public Law 98-543, established a pilot four year program of vocational training for veterans newly eligible for pension beginning February 1, 1985.

Although the 1986 caseload is decreasing, the average cost is increasing. This is due to the "Veterans and Survivors' Pension Improvement Act of 1978," effective January 1, 1979, which reformed the pension program and provides automatic annual cost-of-living increases comparable to annual social security increases for those pensioners in the improved program and to parents

receiving dependency and indemnity compensation. These increases, effective with payments made on January 1, are based on the same percentage as social security benefits are increased. The January 1, 1986 increase is expected to be 4.1 percent.

In accordance with Public Law 97-377, this appropriation restores Social Security benefits to certain surviving spouses or children of veterans who died of service-connected causes. In 1984, budget authority was provided by a transfer from the Department of Defense appropriation "Retired pay, Defense." Beginning in 1985, financing is being provided in the form of offsetting collections from the Department of Defense.

This appropriation finances the education and training of veterans and servicepersons whose service was, at least in part, between February 1, 1955 and December 31, 1976 (post-Korean conflict veterans and Vietnam era veterans). It also finances educational assistance allowances for eligible dependents of those veterans: (a) who died from service-connected causes or have a total and permanent rated service-connected disability; and (b) servicepersons who were captured or missing in action. In addition, certain disabled veterans are provided with vocational rehabilitation, specially adapted housing grants, and automobile grants with the associated approved adaptive equipment. Because of fewer eligible people remaining for Vietnam era training, the funding level in 1986 will be \$156 million less than in 1985, with the supplemental appropriation.

**Education and training.**—The 1986 decrease in Vietnam era veteran and serviceperson trainees is attributable to veterans having used their entitlement or reaching their delimiting date.

The following table provides a comparison of trainees and costs for the three types of trainees included in education and training, and reflects the enactment of the 1985 supplemental appropriation.

Total cost (in thousands) .....	\$13,643	\$12,389	\$10,595

**Special assistance to disabled veterans.**—Service disabled veterans requiring vocational rehabilitation receive assistance to cover the costs of subsistence, tuition, books, supplies, and equipment.

Specially adapted housing grants, up to a maximum of \$35,500, are provided to certain severely disabled veterans. Veterans who suffer service-connected blindness or who have lost the use of both upper extremities can receive up to \$6,000.

An allowance, up to a maximum of \$5,000, is provided to certain service-disabled veterans and servicepersons toward the purchase price of automobile. Adaptive equipment and the maintenance and replacement of such equipment is also provided.

The following table shows a caseload and cost comparison for these beneficiaries and reflects the enactment of the 1985 supplemental appropriation.

**Peacetime supplementary educational assistance.** Public Law 98-525, enacted October 19, 1984, established two new peacetime educational programs: An assistance program for veterans who enter active duty during the period beginning July 1, 1985, and ending on June 30, 1988, and an assistance program for certain members of the Selected Reserve. The Readjustment benefits appropriation will pay the basic allowance for the peacetime veterans. No payments are expected until 1987. Supplementary educational assistance for peacetime veterans and the basic allowance for reservists will be financed by payments from the Department of Defense and the Department of Transportation. Only payments for reservists are expected in 1985 and 1986.

**Budget program.**—This program was established by the Emergency Veterans' Job Training Act of 1983, approved August 15, 1983, as Public Law 98-77. Public Law 98-543, enacted October 24, 1984, extended the date by which veterans must commence training, from before March 1, 1985 to on or before September 1, 1985. During 1984, \$64.1 million was obligated for 15,695 veterans entering approved training programs. It is anticipated that by the end of 1986, 28,600 veterans will have benefited by this program at a cost of \$140.5 million.

**Financing.**—A total of \$150.0 million was appropriated in 1984, of which \$9.5 million was used by the readjustment benefits appropriation for payment of education benefits under section 18 of Public Law 98-77. Although training will continue through 1986, no obligations will be made after 1985.

**Military and naval insurance.**—Payments are made to the U.S. Government life insurance fund for certain World War I veterans for extra hazards of military service and for claims on war risk insurance issued to servicemen and veterans of World War I.

**National service life insurance.**—Payments are made to the national service life insurance fund for certain World War II veterans for: (a) the extra hazards of service; (b) gratuitous insurance granted to certain persons unable to apply for national service life insurance; (c) death claims on policies under waiver of premiums while the insured was on active duty.

Payments are also made to policyholders and beneficiaries on nonparticipating national service life insurance policies issued to World War II veterans with service-connected disabilities and on worthy exceptional cases that would not have been covered under the law in effect at the time of death.

The general decline in the number of policies and the amount of insurance in force is expected to continue in 1986 as indicated in the following table (dollars in thousands).

In 1986 increased costs are associated with: (1) operational requirements of new facilities; (2) uncontrollable payroll increases; and (3) increased cost of drugs, utilities, communications, provisions, prosthetics, medical and dental supplies and operating supplies. These increased costs are offset by: (1) the government-wide five percent pay reduction, and (2) a one percent reduction in employment due to productivity increases.

**Maintenance and operation of VA facilities—**

**VA hospital care.**—Increased costs over 1985 are \$91,332 thousand for operating the medical, surgical, and psychiatric bed sections in 172 VA hospitals.

**Medical research.**—This program is comprised of institutional and special research. In addition to the broad spectrum of biomedical research projects, priority is given to research on agent orange and conditions that frequently occur among veterans such as aging, alcoholism, schizophrenia, delayed stress disorders, and spinal cord injury and tissue regeneration. Cooperative studies include surgical treatment of angina pectoris, adjunct treatment of diabetes, and relative potency and side-effect liability of new and marketed sedatives. This budget request includes \$3,800 thousand for continuation of an Agent Orange Epidemiological Study being conducted by the Centers for Disease Control, Department of Health and Human Services.

**Rehabilitation research.**—This program is dedicated to the development and application of science and technology to improve the care of the physically disabled veteran through prostheses for the amputee, improved wheelchairs for the paralyzed, and better joint functions for the arthritic. It also includes care for those with visual, hearing and speech disorders.

**Health services research.**—This program provides support for health services projects at VA medical centers for improving the effectiveness and economy of delivery of health services and improving the accessibility of services to veterans.

This appropriation provides for the administration of nonmedical veterans benefits through the Department of Veterans Benefits; operation and maintenance of 109 national cemeteries by the Department of Memorial Affairs; and top management direction and administrative support, including data processing, fiscal, personnel, and legal services through agency-level staff offices.

**Veterans benefits.**—Determines eligibility and adjudicates all claims for compensation, pensions, educational assistance, housing loan assistance, and insurance awards. Beginning in 1986, greater efficiencies will be achieved by consolidating field office functions that do not require face-to-face contact with the veteran. No field office will be closed. A summary of program objectives and anticipated workload is included in the following paragraphs:

**Veterans services.**—Provides information, advice, and assistance concerning the availability and procurement of benefits under the law to all veterans, their dependents, and survivors.

The major construction request emphasizes correction of life/safety code deficiencies in existing VA medical facilities. Seven projects involve fire and safety improvements, three correct electrical deficiencies, and two projects correct seismic deficiencies. Many replacement, modernization, and other construction projects also make numerous safety improvements. Additional funds are included to remove asbestos when it is encountered during renovation.

The request contains two new nursing homes. Further, the request includes construction funds for a modernization project in Mountain Home, TN, and to begin a replacement project in Houston, TX, and a modernization project in Philadelphia, Pennsylvania.

The purpose of the VA home loan guaranty program is to facilitate the extension of mortgage credit on favorable terms by private lenders to eligible veterans. In the event of foreclosure, the Federal guaranty protects lenders against losses up to a maximum of the lesser of 60% of the mortgage amount or \$27,500.

**Budget program.—**

**Acquisition of homes.**—The number of acquisitions is expected to decline while the average cost is expected to increase for 1986.

Note.—This statement excludes unfunded contingent liabilities under loan guarantee and insurance programs as follows: 1984, \$38 billion; 1985, \$62 billion; and 1986, \$66 billion.

<sup>1</sup> Over the period 1951 to 1963, the Direct loan revolving fund borrowed \$1,730,078 thousand from Treasury. Previous budgets have shown this indebtedness being transferred to the Loan guaranty revolving fund along with transfers of unobligated balances. This budget correctly shows the indebtedness to Treasury as a liability of the Direct loan revolving fund.

Legislative initiatives are proposed to increase the loan origination fee on guaranteed loans from 1 to 5 percent and allow purchasers of VA-owned property who buy on terms (vendee loans) to either pay a five percent fee or pay the current one percent fee, make a minimal five percent down payment, and obtain private mortgage insurance. The 5 percent fee for both guaranteed and vendee loans can be financed over the life of the loan.

The above legislative initiatives are estimated to reduce budget authority by \$404.6 million and outlays by \$604.6 million in 1986.

<sup>1</sup> Over the period 1951 to 1963, the Direct loan revolving fund borrowed \$1,730,078 thousand from Treasury. Previous budgets have shown this indebtedness being transferred to the Loan guaranty revolving fund along with transfers of unobligated balances. This budget correctly shows the indebtedness to Treasury as a liability of the Direct loan revolving fund.

This fund finances the payment of claims on nonparticipating life insurance policies issued and currently is open for new issues to veterans having service-connected disabilities. The program provides insurance coverage for service-disabled veterans at standard rates. Administrative expenses are paid from the General operating expenses appropriation.

*Operating costs.*—

*Death claims.*—Represents payments to designated beneficiaries.

*All other.*—Represents payments to policyholders who surrender their policies for their cash value and hold endowment policies which have matured.

*Capital investment.*—A policyholder may borrow up to 94 percent of the value of his policy.

The trend in the number and amount of policies in force is indicated in the following table (dollars in thousands):

	1984 actual	1985 estimate	1986 estimate
Number of policies.....	188,964	187,104	185,184
Insurance in force.....	\$1,713,293	\$1,696,472	\$1,679,063

*Financing.*—Operations are financed from premiums and other receipts. Additional funds are received by transfer from the Veterans insurance and indemnities appropriation, instead of direct appropriations to this fund.

*Operating results and financial condition.*—Since premium and other receipts are insufficient to cover operations, the fund continues to project liabilities in excess of assets. The deficit is expected to reach an estimated \$208 million by September 30, 1986.

This fund pays claims and administrative costs on participating life insurance policies issued during the period May 1, 1965, through May 2, 1966, under three life insurance programs: (1) service-disabled standard insurance, (2) service-disabled rated insurance, and (3) nonservice disabled insurance availing disabled World War II and Korean conflict veterans an opportunity to acquire life insurance coverage who were no longer eligible for other Government insurance.

**Budget program.—**

**Death claims.**—Represents payments to designated beneficiaries.

**Dividends.**—Policyholders participate in the distribution of annual dividends.

**All other.**—This represents payments to the General operating expenses appropriation for the administrative costs of processing claims and maintaining the accounts, and to those policyholders who: (a) surrender their policies for cash value; (b) hold endowment

policies which have matured; and (c) have purchased total disability income coverage and subsequently become disabled.

**Policy loans made.**—A policyholder may borrow up to 94 percent of the cash value of his policy at an interest rate adjusted to reflect private sector borrowing costs.

The following table reflects the decrease in the number of policies and the amount of insurance in force (dollars in thousands):

	1984 actual	1985 estimate	1986 estimate
Number of policies.....	152,452	145,352	133,482
Insurance in force.....	\$1,047,263	\$998,423	\$916,888

**Financing.**—Operations are financed from premiums collected from policyholders and interest on investments. Excess earnings of the fund are now distributed to the policyholders in the form of an annual dividend.

Legislation will be requested to repeal the authority permitting the Veterans Administration to make education loans, effective October 1, 1985. The VA Education Loan Program has experienced excessively high default rates. Congress has previously acted to repeal loans available to most veterans and full repeal of this program will now be proposed.

## VOCATIONAL REHABILITATION REVOLVING FUND

During 1986, within the resources available, gross obligations for direct loans are authorized in such amounts as may be necessary to carry out the purposes of the "Vocational rehabilitation revolving fund" (38 U.S.C. chapter 31).

This fund provides loans up to \$620 to veterans enrolled in a program of vocational rehabilitation who are temporarily in need of additional funds to meet expenses.

**Budget program.**—Interest-free direct loans are granted to veterans in vocational rehabilitation training. The loans are repaid over a period of 10 months by offset from benefit payments.

**Financing.**—With initial capitalization through an appropriation, the fund is financed solely by repayments. Administrative expenses are borne by the general operating expenses appropriation.

**Operating results.**—The following table presents operating results:

This revolving fund, established pursuant to the Veterans Omnibus Health Care Act of 1976, Public Law 94-581, provides a mechanism for the furnishing of rehabilitative services to certain veteran beneficiaries who are receiving medical care and treatment from the Veterans Administration.

Funds to operate the various rehabilitative activities and provide for the therapeutic work for remuneration for patients and members in Veterans Administration health care facilities are derived from contractual arrangements with private industry or nonprofit entities. This is a self-sustaining fund, and therefore no appropriation is required to support these activities.

Under the provisions of 38 U.S.C. 5021, the Supply fund finances on a reimbursable basis the cost of warehouse inventories at depots and field stations and selected items of equipment procured centrally. It also finances, on the same basis, items and services to other Federal agencies who either request or are assigned to the Veterans Administration for support by the Office of Federal Procurement Policy.

**Budget program.**—The fund provides financial support for: (1) maintenance of depot and field station inventories; (2) maintenance and operation of three supply depots; (3) operation of a service and reclamation program operating out of the supply depots; (4) centralized periodical procurement and library cataloging; (5) a marketing center or central buying office; and (6) a

publications depot that provides forms for VA installations on a centralized basis.

The Supply fund does not finance costs for the operation and administration of supply activities at VA field stations. These costs are charged directly to applicable appropriations.

**Financing.**—Costs of supplies, equipment, and services acquired through the Supply fund and Supply fund operating costs are recovered through reimbursements from the VA appropriations and other Government agencies receiving goods and services. For 1986 Supply fund sales are estimated to reach \$760 million. Average inventory needed to support those sales will be \$115 million.

**Operating results.**—The fund operated at a profit of \$2.4 million in 1984. The new total of retained earnings is \$45.1 million, which has been used to finance inventory growth. Operating expense as related to sales was 4.9 percent.

This account consists of voluntary contributions by eligible servicepersons and matching contributions provided by the Department of Defense. The fund provides educational assistance payments to participants who entered the service after December 31, 1976, and are pursuing training under chapter 32, title 38, U.S.C. Public Law 96-342, the Department of Defense Authorization Act, 1981, added two educational assistance programs for certain individuals who enlisted or reenlisted in the Army, Navy, Air Force or Marine Corps after September 30, 1980 and before October 1, 1981. Section 901 of that act is a non-contributory program with educational assistance provided by the Department of Defense. Section 903 authorizes the Department of Defense to make monthly contributions for certain post-Vietnam era participants. Public Law 98-525, enacted October 19, 1984, precludes new enrollments into this program during the period July 1, 1985 to June 30, 1988, while enrollment for the All-Volunteer Force Education Program is open. The estimated activity in the fund follows:

This fund is operated on a commercial basis to the extent possible except that administrative expenses are charged to the General operating expenses account.

The income of the fund is derived from premium receipts, interest on investments, and payments which are made to the fund from the Veterans insurance and indemnities appropriation.

Assets of the fund, which are largely invested in special Treasury interest-bearing securities and in policy loans, are expected to increase from \$10,704 million as of September 30, 1985 to \$10,937 million as of September 30, 1986. The actuarial estimate of policy obligations as of September 30, 1985, totals \$10,632 million, leaving a balance of \$72 million for contingency reserves.

The fund is operated on a commercial basis to the extent possible except that administrative expenses are charged to the General operating expenses account.

The income of the fund is derived from interest on investments, premiums, and payments from the Veterans insurance and indemnities appropriation. Effective January 1, 1983, premiums were discontinued since reserves held in the fund were adequate to meet future liabilities of the program.

Assets of the fund, which are largely invested in interest-bearing securities and policy loans, are estimated to decrease from \$300 million as of September 30, 1985, to \$270 million as of September 30, 1986, as an increasing number of policies mature through death or disability. The actuarial evaluation of policy obligations as of September 30, 1985, total \$294 million, leaving a balance of \$6 million for contingency reserves.

This fund finances the payment of claims on life insurance policies issued before January 3, 1957, to veterans who served in the Armed Forces subsequent to April 1, 1951. No new policies can be issued. Policyholders may elect to purchase total disability income coverage with the payment of additional premiums.

**Budget program.**—

**Death claims.**—Represents payments to designated beneficiaries.

**Cash surrenders.**—A policyholder may terminate his or her insurance by cashing in the policy for its cash value.

**Dividends.**—Policyholders participate in the distribution of annual dividends.

**All other.**—Classified in this category are payments to policyholders who: (a) hold endowment policies which have matured; (b) have purchased total disability income coverage and subsequently become disabled; and (c) are paid interest on dividend credits and deposits.

The following table reflects the decrease in the number of policies and the amounts of insurance in force (in thousands of dollars):

	1984 actual	1985 estimate	1986 estimate
Number of policies .....	383,170	358,285	348,450
Insurance in force .....	\$3,345,554	\$3,128,186	\$3,042,317

**Financing.**—Payments from this fund are financed primarily from premium receipts and interest on investments.

**Operating results and financial condition.**—Favorable mortality experience on insurance written against this fund has kept death claim payments well below the amount of premium and interest receipts, thereby producing an annual increase in the total revenue of the fund. Excess earnings of the fund are now distributed to the policyholders in the form of an annual dividend.

## ADMINISTRATIVE PROVISIONS

## (INCLUDING TRANSFER OF FUNDS)

Not to exceed 5 per centum of any appropriation for **1985** *1986* for "Compensation **and pensions**", "*Pensions*", "*Burial benefits and miscellaneous assistance*", "Readjustment benefits", and "Veterans insurance and indemnities" may be transferred to any other of the mentioned appropriations, but not to exceed 10 per centum of the appropriations so augmented.

Appropriations available to the Veterans Administration for **1985** *1986* for salaries and expenses shall be available for services as authorized by 5 U.S.C. 3109.

No part of the appropriations in this Act for the Veterans Administration (except the appropriations for "Construction, major projects" and "Construction, minor projects") shall be available for the purchase of any site for or toward the construction of any new hospital or home.

[No part of any sum appropriated or otherwise made available in this Act for the Veterans Administration may be obligated or expended for the purchase of any site for, or toward the construction of, any new hospital to replace the Allen Park Veterans' Administration

Hospital, prior to the receipt by the Administrator of Veterans Affairs of the ongoing General Accounting Office study of such replacement project, except that such funds may be obligated or expended for design and engineering studies for such replacement project without regard to the limitation under this paragraph.]

No part of the foregoing appropriations shall be available for hospitalization or examination of any persons except beneficiaries entitled under the laws bestowing such benefits to veterans, unless reimbursement of cost is made to the appropriation at such rates as may be fixed by the Administrator of Veterans Affairs.

One or more pilot programs shall be conducted to determine the effectiveness of utilizing private contractual services to assist in the administrative collection of various types of delinquent debts or other funds due the Government.

*The unexpended balance in the appropriation under the heading "Compensation and pensions" may be transferred to and merged with the newly established appropriations for "Compensation," "Pensions," and "Burial benefits and miscellaneous assistance" in amounts determined by the Administrator of Veterans Affairs. (Department of Housing and Urban Development-Independent Agencies Appropriation Act, 1985.)*

**Volunteers in Service to America.**—The service learning programs will assist secondary and post-secondary educational institutions to establish and maintain service learning activities for both students and their communities. The Young Volunteers in ACTION program expands the use of student volunteers in poverty-related problem areas. The VISTA program provides full-time volunteers to assist communities working to resolve local problems in the areas of literacy, drug abuse prevention, youth (child abuse, runaways, etc.), refugees, food banks, and other Agency emphasis areas.

**Citizen participation and volunteer demonstration programs.**—These programs stimulate and encourage volunteer services and provide community groups with small grants for project impetus and assistance. In 1986, these grants will aid the expansion of private volunteer activities and programs for drug abuse prevention, illiteracy, and the problems of runaway youth.

**Older American volunteer programs.**—These programs provide opportunities for people aged 60 and over to volunteer their services to the community by working with the emotionally disturbed, the mentally retarded and physically handicapped, the infirm, and the isolated elderly. In 1986, approximately 18,425 Foster Grandparent volunteers will serve about 65,000 children. Emphasis will be on preventing institutionalization of children and on returning children to communities. The Retired Senior Volunteer program will support 407,000 part-time volunteers providing service in the areas of health, nutrition, education, the problems of troubled youth, refugee assistance, crime prevention, and other community services. Approximately 6,900 volunteers in the Senior Companion program will provide long-term care services to about 24,000 frail and elderly Americans.

**Program support.**—Costs of program direction and administration are financed by this activity.

The Conference assists the President, the Congress, and the Federal departments and agencies in improving

administrative procedure. It conducts studies of the efficiency, adequacy, and fairness of the procedures that the agencies and departments use to determine the rights, privileges, and obligations of private persons. The Conference issues formal recommendations for improvements and then encourages their implementation.

In addition to its research activities, the Conference also arranges for the interchange among administrative agencies of information useful in improving administrative procedure and, on an ongoing basis, furnishes assistance and advice on matters of administrative procedure to the agencies, Congress, and others.

The Conference receives funds from other Federal agencies for special projects carried out by the Conference pursuant to agreements with these agencies.

The Advisory Committee on Federal Pay was appointed in accordance with the Federal Pay Comparability Act of 1970. The Committee assists the President in carrying out the policy of comparability in pay between major Federal statutory pay systems and private enterprise. The Committee reviews the annual report of the President's pay agent and considers the recommendations of representatives of Federal employees and other officials of the Federal Government. The Committee then prepares for the President an independent report with its findings and recommendations.

The Committee meets jointly throughout the year with the President's pay agent and the Federal Employees Pay Council in an attempt to reach early resolution of issues between them. It provides advisory opinions on unresolved issues.

The Architectural and Transportation Barriers Compliance Board was established by Section 502 of the Rehabilitation Act of 1973 to ensure compliance with the Architectural Barriers Act of 1968. Its primary role is to carry out a compliance program to ensure accessibility and usability of most Federal and Federally-funded buildings by physically handicapped persons. In 1986, the Board will continue to process, investigate, and resolve complaints of noncompliance. In 1984, 233 complaints were received. Emphasis is on voluntary, amicable resolution of access issues.

The Board also develops Federal minimum accessibility guidelines and requirements for the standards under the Architectural Barriers Act, and provides technical assistance to public and private organizations affected by Federal accessibility regulations.

The Committee for Purchase from the Blind and Other Severely Handicapped was established by the Wagner-O'Day Act of 1938, as amended. Its primary objective is to increase the employment opportunities for the blind and other severely handicapped and, whenever possible, to prepare them to engage in normal competitive employment. In 1986, 56,800 blind and handicapped individuals are projected to be employed in 331 producing workshops. The committee determines which commodities and services are suitable for Government procurement from qualified nonprofit agencies serving the blind and other severely handicapped; publishes a procurement list of such commodities and services; determines the fair market price for commodities and services on the procurement list; and, makes rules and regulations necessary to carry out the purposes of the Act. The committee proposes to have 2,040 items on its procurement list, for an estimated

The Commodity Futures Trading Commission (CFTC) administers the Commodity Exchange Act of 1936, as amended. The purpose of the CFTC is to further the economic utility of the futures markets by encouraging their efficiency, assuring their integrity, and protecting participants against abusive trade practices, fraud, and deceit. The object of commodity futures trading regulation is to enable the markets to better serve their designated functions of providing a price discovery mechanism and a means of offsetting price risk. By properly serving these functions, the futures markets serve the public interest by contributing toward better planning, more efficient distribution and consumption, and more economical marketing.

**Market surveillance, analysis and research.**—Responsibilities under this program include daily surveillance of the market activity of large individual traders and fundamental economic market factors to insure orderly markets. Contract terms and conditions are reviewed to insure conformity with current cash marketing conditions and adequate deliverable supplies. This program also systematically investigates the functioning of markets and market users and develops better tools to assist in detecting and preventing price distortions.

**Enforcement.**—The enforcement program is responsible for detecting, investigating, and litigating violations of the Act or regulations. These violations may include actual and attempted market manipulations, cheating and defrauding customers, and abusive trading practices such as fictitious trading, wash trading, and prearranged trading. This program may seek redress through the administrative process or by injunctive actions in the Federal Courts.

The appropriation for the Corporation for Public Broadcasting is enacted two years in advance. For 1986, Congress has appropriated \$159.5 million, which included a supplemental appropriation of \$29.5 million. For 1987, an appropriation of \$200 million was enacted in 1984. Although public broadcasting is an important national resource, a funding level of \$200 million is incompatible with the urgent need to reduce Federal spending. The Administration is, therefore, requesting a \$14 million rescission for a \$186 million appropriation in 1987. For 1988, the Administration is requesting \$214 million.

Under current authorizing legislation, the Corporation for Public Broadcasting has two major activities: (1) direct payments to public television and radio stations to be used at their discretion for purposes related primarily to program production or acquisition; and (2) support for the production and acquisition of radio and television programs for national distribution. In addition, the Corporation assists in the financing of several system-wide activities, including national satellite interconnection services and the payment of music royalty fees, and provides limited technical assistance, research, and planning services to improve system-wide capacity and performance.

## General and special funds:

## FEDERAL PAYMENT TO THE DISTRICT OF COLUMBIA

For payment to the District of Columbia for the fiscal year ending September 30, [1985] 1986, \$425,000,000, as authorized by the District of Columbia Self-Government and Governmental Reorganization Act, Public Law 93-198, as amended (D.C. Code, sec. 47-3406): *Provided*, That none of these funds shall be made available to the District of Columbia until the number of full-time uniformed officers in permanent positions in the Metropolitan Police Department is at least 3,880, excluding any such officer appointed after August 19, 1982, under qualification standards other than those in effect on such date].

For payment to the District of Columbia for the fiscal year ending September 30, [1985] 1986, in lieu of reimbursement for charges for water and water services and sanitary sewer services furnished to facilities of the United States Government, [\$24,100,000] \$30,100,000, as authorized by the Act of May 18, 1954, as amended (D.C. Code, secs. 43-1552 and 43-1612).

For the Federal contribution to the Police Officers and Fire Fighters', Teachers' and Judges' Retirement Funds as authorized by the District of Columbia Retirement Reform Act, Public Law 96-122, approved November 17, 1979 (93 Stat. 866), \$52,070,000.

#### 【SAINT ELIZABETHS HOSPITAL】

##### TRANSITIONAL PAYMENT FOR SAINT ELIZABETHS HOSPITAL

For a Federal contribution to the District of Columbia, \$20,000,000, to be made available only upon enactment into law of a Federal statute which establishes the relative financial responsibilities of the Federal Government and the government of the District of Columbia for the costs of operating Saint Elizabeths Hospital: *Provided*, That if the claims to the District of Columbia for reimbursement for operating costs of Saint Elizabeths Hospital for fiscal year 1985 are less than \$55,207,000, there shall revert to the Treasury of the United States so much of such Federal contribution as is equal to the amount by which such claims are less than \$55,207,000 as authorized by the Saint Elizabeths Hospital and District of Columbia Mental Health Services Act, Public Law 98-621, \$25,000,000.

#### 【INAUGURAL EXPENSES PAYMENTS】

【For payment to the District of Columbia in lieu of reimbursements for expenses incurred in connection with Presidential inauguration activities, \$2,300,000, as authorized by section 737(b) of the District of Columbia Self-Government and Governmental Reorganization Act, Public Law 93-198, as amended (87 Stat. 824; D.C. Code, sec. 1-1803).】

#### 【CRIMINAL JUSTICE INITIATIVE】

【For a Federal contribution to the District of Columbia, \$9,873,000.】

Note.—A regular 1985 appropriation for this account had not been enacted at the time this budget was prepared. A continuing resolution (Public Law 98-473) provides funds to the extent and in the manner provided for in the conference version of H.R. 5899, District of Columbia Appropriations Act, 1985.

The Federal payment of \$425.0 million is intended to defray expenses of the government of the District of Columbia. Discussions are occurring between the administration and the District of Columbia government designed to produce a formula Federal payment. This appropriation also includes a payment of \$30.1 million for water, water services, and sanitary sewer services rendered to Federal facilities by the District of Columbia during 1986 (act of May 18, 1954, as amended). This appropriation also includes a contribution of \$52.1 million which represents the Federal share of payments to District of Columbia retirement funds for police officers, fire fighters, teachers and judges (act of November 17, 1979). Finally, this appropriation includes a payment of \$25.0 million to assist in financing St. Elizabeths Hospital as part of a six-year plan to transfer administrative

and financial responsibility from the Federal Government to the District (Public Law 98-621).

The Equal Employment Opportunity Commission (EEOC) is the Federal agency responsible for enforcement of: the Age Discrimination in Employment Act of 1967; title VII of the Civil Rights Act of 1964; the Equal Pay Act of 1963; and, in the Federal sector only, section 501 of the Rehabilitation Act of 1963. These acts prohibit employment discrimination based on race, sex, religion, national origin, age, or handicap status. The Equal Employment Opportunity Commission is also responsible for carrying out Executive Order 12067 which promotes coordination and minimizes conflict and duplication among Federal agencies which administer stat-

utes or regulations involving employment discrimination.

The budget for the agency supports three activities: *Executive direction and program support.*—This activity provides for the direction and coordination of the Commission's programs. It also provides administrative and management support services for the agency.

*Enforcement.*—This activity resolves charges of employment discrimination filed with the Commission; litigates cases against respondents unwilling to comply with title VII, the Equal Pay Act, or the Age Discrimination Employment Act; carries out systemic enforcement; and promotes the participation of handicapped individuals in the Federal work force.

*State and local grants.*—This activity provides funds to State and local fair employment practice (FEP) agencies to assist in the resolution of employment discrimination complaints.

## EXPORT-IMPORT BANK OF THE UNITED STATES

The Export-Import Bank of the United States is authorized to make such expenditures within the limits of funds and borrowing authority available to such corporation, and in accordance with law, and to

make such contracts and commitments without regard to fiscal year limitations, as provided by section 104 of the Government Corporation Control Act, as may be necessary in carrying out the program set forth in the budget for the current fiscal year for such corporation: *Provided*, That none of the funds available during the current fiscal year may be used to make expenditures, contracts, or commitments for the export of nuclear equipment, fuel, or technology to any country other than a nuclear-weapon state as defined in article IX of the Treaty on the Non-Proliferation of Nuclear Weapons eligible to receive economic or military assistance under this Act that has detonated a nuclear explosive after the date of enactment of this Act.

## LIMITATION OF PROGRAM ACTIVITY

【During the fiscal year 1985 and within the resources and authority available, gross obligations for the principal amount of direct loans shall not exceed \$3,865,000,000: *Provided*, That during the fiscal year 1985, total commitments to guarantee loans shall not exceed \$10,000,000,000 of contingent liability for loan principal.】 *During the fiscal year 1986, no resources and authority shall be available for new direct loans and no such loan obligations shall be made: Provided*, That such restriction shall not affect the performance, administration, extension, rescheduling or refinancing of, or accounting for, direct loan obligations incurred in prior fiscal years. Commitments to guarantee loans may be made only to the extent that the total loan principal, any part of which is to be guaranteed, shall not exceed \$12,000,000,000, of which up to \$1,800,000,000 may be committed with direct interest subsidies: *Provided*, That these direct interest subsidies shall not exceed \$100,000,000, estimated on a present value basis on the date of each commitment, net of related application fees. (Foreign Assistance and Related Programs Appropriations Act, 1985, as included in Public Law 98-473; additional authorizing legislation to be proposed.)

## LIMITATION ON REVOLVING FUND FOR ADMINISTRATIVE EXPENSES

Not to exceed **[\$22,092,000]** \$21,175,000 (from assessments collected from farm credit system banks) shall be obligated during the current fiscal year for administrative expenses [including the hire of three passenger motor vehicles], as authorized under 12 U.S.C. 2249.

Note.—A regular 1985 limitation for this account had not been enacted at the time this budget was prepared. A continuing resolution (Public Law 98-473) limits funds through September 30, 1985, at a rate consistent with amounts that would be provided by the conference version of H.R. 5743, making appropriations for Agriculture, Rural Development, and Related Agencies, 1985.

The Administration supervises a coordinated agricultural credit system of farm credit banks and associations which make credit available to farmers and their cooperatives.

Assessments based upon estimated administrative expenses are collected from institutions in the farm credit system and are available for administrative expenses. Obligations are incurred within fiscal year budgets approved by the Federal Farm Credit Board.

Provision is made for supervision and examination by the Farm Credit Administration of the Farm Credit System institutions. The operating expenses of the Farm Credit Administration are paid by the system institutions through assessments which are deposited in a revolving fund in the Treasury and are available for the use of FCA. System institutions are funded through the sale of their bonds and discount notes in the public money markets without the guarantee of the U.S. Government.

## FEDERAL DEPOSIT INSURANCE CORPORATION

The Federal Deposit Insurance Corporation was created by the Banking Act of 1933 to provide protection for bank depositors and to foster sound banking practices. The deposit insurance ceiling protection has been \$100,000 since March 31, 1980. In order to accomplish its varied functions in the protection of bank depositors, the Corporation is authorized to promulgate and enforce rules and regulations relating to the supervision of insured banks and to perform other regulatory and supervisory duties consistent with its responsibilities as insurer. The major portion of the Corporation's operations consists of the examination of State banks that are not members of the Federal Reserve System and liquidation activities attendant to insured banks that have closed.

The insurance fund is supported by an authorization to borrow up to \$3 billion from the Treasury of the United States. No borrowing under this authorization has been made to date and none is anticipated in 1985 and 1986.

In order to facilitate deposit assumptions and mergers, or to assist operating banks, the Corporation is authorized to purchase notes issued by the assuming or acquiring bank, or in the case of direct assistance, notes issued by the operating bank. The above schedule reflects the outstanding principal amounts of these notes, projected repayments based on the notes agreements, and estimated additional disbursements and repayments during 1985 and 1986. Also reflected in the schedule is a \$3.5 billion note for Continental Illinois National Bank to The Federal Reserve Bank of Chicago which was assumed by the FDIC as part of a 1984 assistance agreement.

Income of the Corporation is derived principally from insurance assessments paid by insured banks and interest on investment in U.S. Government securities. As of

September 30, 1984, the deposit insurance fund amounted to \$16.7 billion. The entire fund represents the accumulated net income of the Corporation and is reserved for the protection of depositors in insured banks and for payment of administrative and insurance expenses. No funds derived from taxes or Federal appropriation are allocated to or used by the Corporation in any of its operations.

The estimates for 1985 and 1986 in these statements make provision for losses and expenses which might occur by reason of the closing of any bank after September 30, 1984.

**Civil defense.**—The civil defense programs feature an Integrated Emergency Management System approach. The programs are designed to develop generic evacuation and in-place protection plans and functional emergency capabilities to mitigate, prepare for, respond to, and recover from emergencies caused by natural, technological, and attack-related hazards.

**Comprehensive emergency preparedness planning.**—This program provides for the enhancement of State and local governments' capability to prepare for, respond to, and mitigate disasters and emergencies. Program activities include analyses, needs assessments, technical guidance and financial support designed to assist State and local governments in developing a com-

prehensive approach to preparedness planning. A primary instrument for implementing CEPP is the disaster improvement grant program. These annual grants provide up to \$25,000 to States on a 50/50 match basis for improving or maintaining disaster assistance plans. All but a few States are participants in this program.

**Radiological emergency preparedness.**—This program provides assistance to State and local governments through the issuance of guidance, review and approval of plans, and evaluation of exercises. The program is focused on improvement of State and local capabilities to cope with radiological accidents at commercial nuclear power plants, other fixed nuclear facilities, nuclear materials license holders and transportation of radioactive materials.

**Federal preparedness.**—The goals of the Federal preparedness activity are to achieve Government readiness to ensure that the Nation will be able to respond to, manage, and recover from peacetime or wartime national security emergencies and to enable Government, at all levels, to cope with the consequences of accidental, natural, and man-caused occurrences.

**Training and fire programs.**—This activity prepares Federal, State and local officials, their supporting staff, and the public to meet the responsibilities and challenges of domestic emergencies through planning, mitigation, preparedness, response, and long-term recovery. Educational programs are provided through the Emergency Management Institute and the National Fire Academy. In addition, under the U.S. Fire Administration, this activity concentrates on providing a Federal focus on identifying problems with which the Nation's fire and rescue services must deal, finding solutions to these problems, and supporting State and local fire protection and emergency rescue efforts.

**Flood plain management.**—This activity involves the operation of a program that combines mapping, regulatory, and technical-assistance efforts for the purposes of responding to known flood hazards and mitigating their effects through a comprehensive approach to the management of flood plains. This activity will be funded through the National Flood Insurance Fund in 1986.

The National Insurance Development Fund provides the funding source for two programs authorized by the Urban Property Protection and Reinsurance Act of 1968, as amended: (1) The FAIR (Fair Access to Insurance Requirements) Plan/Riot Reinsurance Program, and (2) the Federal Crime Insurance Program. The Supplemental Appropriations Act, 1984 (Public Law 98-181) did not extend authority for the Riot Reinsurance Program beyond November 30, 1983. The Federal Crime Insurance Program was extended until September 30, 1985. The budget estimates assume there will be no new policies issued subsequent to those dates. However, there will be operating expenses associated with unexpired policies and the close-out of contractor activities.

**Budget program.—**

**Riot reinsurance claims.**—No claims payments are anticipated in 1986.

**Crime insurance.—**

**Insurance claims.**—Claims reflect insurance payments in the program.

**Operating expenses.**—Expenses are incurred by fiscal agents in issuing policies, settling claims, and maintaining accounting and statistical records.

**Administrative expenses.**—This represents the administrative cost of operating the programs.

**Interest expense.**—This represents interest on Treasury borrowings needed to defray underwriting and loss expenses of the crime insurance program.

**Financing.**—Claims and expenses are estimated to be paid from premium income and Treasury borrowings.

**Operating results.**—Claims and expenses are expected to exceed premium income resulting in a decrease in the reserves of the fund. The deficits have been reduced, in fact, by major rate increases and rating changes which have taken place in both programs.

The National Flood Insurance Act of 1968, as amended, authorizes the Federal Government to provide flood insurance on a national basis. Flood insurance may be sold or continued in force only in communities which enact and enforce appropriate flood plain management measures. Communities must participate in the program within 1 year of the time they are identified as flood prone in order to be eligible for flood insurance and some forms of Federal financial assistance for acquisition or construction purposes.

Under the emergency program, structures in identified flood-prone areas are eligible for limited amounts of coverage at subsidized insurance rates. Under the regular program, studies must be made of different flood risks in flood-prone areas to establish actuarial premium rates. These rates are charged for insurance on new construction. Coverage is available on virtually all types of buildings and their contents in amounts up to \$245 thousand for residential and \$550 thousand for other types.

Significant indicators of program size are as follows:

	1984 actual	1985 estimate	1986 estimate

## Budget program.—

**Insurance underwriting expense.**—Cost of initiating and maintaining flood insurance policies is estimated at \$135,341 thousand in 1986.

**Loss and adjustment expense.**—Insured flood losses and associated loss adjustment expense is estimated at \$436,247 thousand in 1986.

**Interest expense.**—Interest on Treasury borrowings needed to defray underwriting and loss expenses is estimated at \$9,160 thousand in 1986.

The following activities are proposed for transfer to the National Flood Insurance Fund from other appropriations in FEMA's budget:

**Flood studies and surveys.**—These studies are estimated at \$36,902 thousand in 1986.

**Flood hazard reduction.**—This activity, which includes the state assistance program, is estimated at \$4,070 thousand in 1986.

**Purchase of property.**—This activity provides for the acquisition of property that has received severe or repeated flood damage and is estimated at \$4,778 thousand in 1986.

**Salaries and expenses.**—This activity provides for salaries and related expenses of all Federal staff administering the National Flood Insurance Program and is estimated at \$8,405 thousand in 1986.

**Financing.**—The Administrator is authorized to borrow up to \$1 billion to carry out the program. Borrowings are estimated to total \$216,044 thousand by the end of 1986. An appropriation of \$92,852 thousand is requested in 1986 to retire agency debt. The program is also financed through premium income.

**Operating results.**—Cumulative loss for this program is projected to be \$1.5 billion at the end of 1986. This deficit is financed through appropriations of \$1.2 billion and Treasury borrowings of \$0.3 billion.

stitutions insured by the Federal Savings and Loan Insurance Corporation.

The expenditure programs of the Federal Home Loan Bank Board and the Federal Savings and Loan Insurance Corporation are presented as business-type budgets. The Home Owner's Loan Act of 1933, as amended, provides that all expenses of the Office of Examinations and Supervision shall be considered nonadministrative. The administrative expenses of the Federal Home Loan Bank Board, including the home office of the Office of Examinations and Supervision, are paid from assessments against the 12 Federal home loan banks and the Federal Savings and Loan Insurance Corporation. The expenses of the field offices of the Office of Examinations and Supervision are paid from fees collected from savings and loan institutions examined and from assessments against the Federal Savings and Loan Insurance Corporation.

**Budget program.**—The Board's budget program consists of several activities:

**Supervision of Federal home loan banks and applications processing.**—The Board supervises the operations of the 12 Federal home loan banks. Federal savings and loan associations are chartered and regulated. Applications of State-chartered associations for conversion to Federal savings and loan associations and applications of Federal savings and loan associations for establishment of branch offices are also examined. In addition, an analysis and evaluation is made of insurance risk in connection with applications submitted by savings and loan associations for insurance of share accounts.

**Examination and supervision of Federal and State-chartered thrift institutions.**—Supervisory examinations are made of Federal savings and loan associations, State-chartered associations insured by the Federal Savings and Loan Insurance Corporation, and all uninsured member institutions of the Federal home loan bank system which are not examined by the State examiners. Examinations are also made of institutions applying for insurance of accounts and for conversion from a State to a Federal charter, when required by the Board. The financial condition and operations of each insured institution are analyzed and corrective action is instituted when warranted. Supervision of insured institutions operating under State charter is carried on cooperatively, with the respective State authorities.

**Executive direction and staff services.**—This includes formulation of basic policy and the furnishing of staff services common to the Board and the Insurance Corporation.

**Analysis of operations.**—Analyses are made of the financial condition of member institutions, the flow of savings, and the character and volume of mortgage lending. Selective reviews are made of geographical areas and trends in the field of thrift and home mortgage finance, including the volume of activity and interest rates for all major types of mortgage lenders.

**Administrative services.**—These consist of accounting, budgeting, and financial reporting; internal budget control; and fiscal organization and management. Also included are general housekeeping and operating services.

The 12 Federal home loan banks seek to improve the financial condition of member institutions. The banks, which are owned by the member institutions, obtain funds primarily from public issuances of consolidated obligations. Section 11(i) of the Federal Home Loan Bank Act authorizes the banks to borrow from the Treasury up to \$4 billion outstanding at any one time.

The amounts shown in the schedules for the activities discussed above for 1986 include administrative expenses under an annual limitation; nonadministrative expenses under a separate limitation; and certain addi-

tional expenses not under a limitation. Administrative expenses are estimated to increase from \$24.8 million in 1985 to \$25.2 million in 1986. Nonadministrative expenses covering examination and supervision of savings and loan associations are discussed separately, below.

The Federal Savings and Loan Insurance Corporation (FSLIC) relies on the Office of Examinations and Supervision to protect its assets against depletion from the financial failure of any insured savings and loan association. The Office's responsibility extends to all institutions insured by the Federal Savings and Loan Insurance Corporation as well as noninsured member institutions of the Federal home loan bank system not subject to State examination.

The Office monitors savings and loan associations through continual analysis of their operating policies and financial reports, regularly scheduled examinations, and occasional special examinations. The purpose of the monitoring process is to determine compliance with Federal Home Loan Bank Board regulations and to ascertain the quality of management and the financial soundness of the member associations. If the Office detects actual or potentially unsafe or unsound practices in insured associations, supervisory agents from the Federal home loan banks work with the association to prevent or correct poor financial or management performance. The operations of the Office are funded substantially through direct examination charges imposed on savings and loan associations.

The Office also has examination and supervisory responsibilities with respect to savings and loan holding companies and their subsidiaries. In addition, the Office has assumed responsibilities pursuant to legislation in the areas of consumer credit protection, equal opportunity, and security measures.

The following table reflects the work of the Office:

The Federal Savings and Loan Insurance Corporation is authorized under title IV of the National Housing Act to insure savings in all Federal savings and loan associations, Federal mutual savings banks, and in State-chartered institutions of the savings and loan type which apply and qualify for insurance. The protection, which insures each saver in a member association against financial loss up to a statutory limit of \$100 thousand, may be provided either through the prevention of default or the payment of insurance to savings accounts holders in the event of liquidation. Preventing default, which protects each investor regardless of the amount in his account, is accomplished by making contributions or by purchasing all or a part of an association's assets. Also, the Corporation is authorized to make loans to institutions in financial difficulty. Preventive measures are preferred by the Corporation. However, in the event liquidation is necessary, the Corporation acts as a receiver, or co-receiver upon the request of a State authority in cases involving State-chartered institutions. In addition, the Corporation, upon determination by the Board, is empowered to act, even retroactively, as sole receiver in cases involving State-chartered institutions.

The Corporation functions under the direction of the Federal Home Loan Bank Board, which provides administrative services. The expenses of the Board and its staff offices are paid from assessments made on the Corporation and the Federal home loan banks.

In carrying out its responsibility for protecting savings in insured savings and loans associations, the Corporation has settled 256 cases since its creation in 1934. Actual losses sustained and provision for losses to September 30, 1984, have amounted to \$3,033.0 million representing approximately 21.7 percent of cumulative gross income. Detailed information on these cases is summarized in the following table:

*Budget program.*—The Insurance Corporation's budget program consists of the following activities:

*Administrative expenses subject to limitation.*—This category includes the estimated costs of executive direction and policy formulation.

*Payments to Federal Home Loan Bank Board for services and facilities.*—The Corporation will pay 21% of the total administrative expenses of the Federal Home Loan Bank Board plus 49% of the remaining 79% in 1986 in return for services and facilities from the Board.

*Contributions and provision for contributions to insured thrift institutions.*—This item is the estimated amount needed in 1986 to prevent the default of insured institutions.

*Refund of additional premium prepayments.*—A 1962 amendment of the National Housing Act required that each insured institution pay an additional premium in the nature of a prepayment at a rate equal to 2% of the increase in savings for the previous calendar year, less an amount equal to any requirement for the purchase of Federal Home Loan Bank stock during the period. The amendment also provided for the crediting of a return on the accumulated prepayment of each insured association at a rate equal to the average rate realized by the Corporation on its own investment portfolio.

Another amendment to the National Housing Act provides for a phaseout of the secondary reserve over the first 10 minimum net reduction years occurring after December 31, 1973. In May of each year, the Corporation would reduce the amount of each insured institution's pro rata share of the secondary reserve as of the preceding December 31 by a cash refund of the difference between the pro rata share and the percentage of its beginning balance on a percentage basis prescribed in the law.

The Garn-St Germain Depository Institutions Act of 1982 permits the FSLIC to terminate the payback of the secondary reserve when it determines that extraordinary financial conditions exist which increase the risk to the insurance fund. The payback can continue thereafter if otherwise authorized by law.

*Liquidation and other expenses.*—This provides for liquidation and other expenses of the Corporation in connection with the workout of contribution agree-

ments, the disposition of assets purchased from, and loans to insured institutions to prevent default.

**Interest on notes payable.**—This is interest paid on promissory notes issued by the Corporation for the purchase of either Income Capital Certificates or Net Worth Certificates. The certificates are issued by qualifying insured institutions with low net worth in order to improve or maintain their capital position.

**Financing.**—The original capital of \$100 million has been completely repaid to Treasury, together with an additional \$43 million in interest. The Corporation has continuing authority to borrow from the Treasury for insurance purposes, up to a limit of \$750 million outstanding at any one time. No borrowing under this authorization has ever been necessary. The Corporation has additional authority to assess against each insured institution additional premiums for insurance until the amount of such premiums equals the amount of all losses and expenses of the Corporation, except that the total amount so assessed in any 1 year against any such institution shall not exceed one-eighth of 1% of the total amount of the accounts of its insured savers.

**Operating results.**—The Corporation is entirely self-supporting. Revenues and other receipts have been sufficient to meet all insurance losses, operating expenses, and return on capital stock, leaving a reserve for contingencies of \$9,954.5 million as of September 30, 1984. Total revenues and other receipts since 1934 of \$13,998.3 million have been applied as follows:

The purpose of the Authority is to serve as a neutral party in the settlement of disputes that arise between unions, employees, and agencies on matters outlined in the Federal Service Labor Management Relations Statute, decide major policy issues, prescribe regulations, and disseminate information appropriate to the needs of agencies, labor organizations, and the public. Establishment of the Federal Labor Relations Authority gives full recognition to the role of the Federal Government as an employer.

**Authority members.**—The Authority adjudicates labor-management disputes in the Federal sector including: appeals on negotiability issues; exceptions to arbitration awards; appropriate units for the purposes of exclusive recognition; eligibility of labor organizations for national consultation rights and unfair labor practice complaints.

Workloads are reflected in the following table:

The Federal Maritime Commission administers the shipping statutes, which require regulation of the domestic offshore and international waterborne commerce of the United States. In addition, the Commission has responsibility for the licensing of ocean freight forwarders and for insuring that vessel owners or operators establish financial responsibility for death or injury to passengers or other persons on voyages to and from U.S. ports, and indemnification of passengers for the nonperformance of transportation. Major program areas for 1986 will concentrate on implementing the new Shipping Act of 1984; developing plans for deregulation of the domestic offshore trades; and developing a program to computerize the filing of tariffs utilizing private sector resources. Legislation will be proposed to transfer the passenger vessel certification program to the Department of Transportation.

The Service assists parties to labor disputes in industries affecting commerce to settle their disputes through conciliation and mediation.

**Dispute mediation.**—The Service assists labor and management in mediation and prevention of disputes, other than those involving rail and air transportation, whenever such disputes threaten to cause a substantial interruption of interstate commerce or a major impairment of the national defense. The Service also makes mediation and conciliation services available to Federal agencies and organizations representing Federal employees in the resolution of negotiation disputes. The Service provides mandatory mediation and, where necessary, impartial boards of inquiry to assist in resolving labor disputes involving private nonprofit health care institutions. The workload shown below includes assignments closed in both the private and public sectors.

The Federal Trade Commission is charged by law with ensuring that competition in the marketplace is vigorous, free, and fair. This is accomplished by eliminating threats to fair and honest competition from all sources, both public and private.

**Maintaining competition.**—The Commission's efforts

to enforce the antitrust laws are aimed at reducing prices to consumers, limiting the effects of inflation, and fostering and preserving competition and the free enterprise system. The Commission examines competitive restraints imposed by the private sector or by regulatory actions that unduly restrict or limit the competitive process and adversely affect consumers and takes action, where appropriate, to eliminate such restraints.

**Consumer protection.**—The Commission is charged with eliminating unfair or deceptive acts or practices affecting commerce. The goal of the consumer protection mission is to improve market performance so that consumers can make informed choices when exercising their purchasing power. To accomplish this goal, the Commission will remove harmful private and public restrictions on market performance; encourage business to provide consumers with accurate and useful information; and reinforce market forces that enhance consumer welfare.

**Economic activities.**—This mission has four major functions: conducting research on the performance of the industrial economy; providing economic support to Commission's antitrust and consumer protection efforts; advising the Commission on the impact of governmental regulation on competition in various industries; and developing economic reports on industrial structure and performance.

Public Law 93-642 established the Harry S Truman Scholarship Foundation to operate the scholarship program that is the permanent Federal memorial to the 33rd President of the United States. The Foundation awards college scholarships of up to \$5 thousand annually for up to four years to qualified persons who demonstrate outstanding potential for and interest in careers in public service at the local, State, or Federal level.

Legislation will be proposed in 1985, to take effect with the 1986 program, to eliminate the current \$5 thousand cap on annual award levels, allowing the Foundation to raise awards. However, the Foundation reserves the right, and intends if necessary, to adjust award levels or the number of scholars, or both, to avoid any decline in the asset value of its trust fund.

In 1986, the Foundation will conduct its tenth annual competition to select up to 105 new Truman scholars and will continue to assist in the placement of graduating Truman scholars in public service positions.

**Scholarship awards.**—This activity is comprised of scholarships awarded to cover eligible educational expenses.

**Program administration.**—This activity covers all costs of operating the program, including annual program announcement, interview and selection of Truman scholars, calculation and disbursement of scholarship awards, monitoring of student progress, and placement assistance.

**Investment transactions.**—This activity represents Treasury investment transactions costs involving purchase at a premium or sale at a discount.

The Advisory Commission on Intergovernmental Relations (ACIR) is an independent, bipartisan body which identifies and analyzes the causes of intergovernmental conflicts and recommends ways of strengthening and improving the American Federal system. The 26-member Commission includes elected and appointed officials from Federal, State, and local governments and representatives of the general public.

The Commission and its staff examine Federal, State, and local trends, events, and programs having an intergovernmental impact. Proposed legislation and executive actions are reviewed to determine their overall effect on the Federal system. The Commission also identifies

emerging problems of Federal-State-local relations and assists States and localities in anticipating and meeting problems caused by various intergovernmental overlaps and conflicts.

The Commission makes recommendations concerning the workings and structural arrangements of governmental units and allocation of responsibilities and revenues among the various levels of government. The recommendations and published reports growing out of the Commission's work are submitted to the executive and legislative branches of Federal, State, and local governments for appropriate action.

Continuing and annual projects of the Commission include assessing the changing public attitudes on government and taxes; developing a "Representative Tax System" for all 50 States; analyzing fiscal disparities; publishing an annual catalog of Federal aid; surveying and identifying trends in State and local finances; monitoring key intergovernmental legislation of Federal, State, and local governments; and providing educational and technical assistance to Federal, State, and local governments regarding Commission recommendations.

Nonrecurring projects currently under Commission study include the analysis of tax interactions; a study of turnback proposals; city financial emergencies; state taxation of mail order sales; analysis of changing American politics and the implications for federalism; and the study of alternative ways of providing local services.

Appropriations finance the personnel and personnel-related expenses incurred in the basic day-to-day operation of the Commission.

The Commission receives funds from other Federal agencies for special projects carried out by the Commission pursuant to contracts with these agencies. Each contract is charged for a share of the Commission's overhead.

The Commission was created by compact among the four States in the basin, and the District of Columbia for the purpose of water pollution abatement and control, and for the management of water and associated land resources.

The appropriation represented Federal assistance to the Commission's operations. Funds also are contributed by the signatory bodies (member States and District of Columbia). The Commission also receives an Environmental Protection Agency program grant under the authority of the Federal Water Pollution Control Act, as amended.

No Federal appropriation is requested for 1986.

The Washington Metropolitan Area Transit Authority (WMATA) is a non-Federal agency established pursuant to an interstate compact among Maryland, Virginia, and the District of Columbia. The Authority's primary functions are to plan, develop, finance, and construct the Metro-rail rapid transit system and to operate the bus/rail transit system in the National Capital area. The rail system extends from the District of Columbia into the participating jurisdictions of Maryland and Virginia.

Rail capital construction grants and operating assistance grants to the WMATA are funded through the budget for the Department of Transportation. This WMATA account provides the annual Federal share of interest payments on outstanding WMATA bonds sold in support of the rail construction program. The WMATA bonds, totaling \$997 million, are guaranteed by the Federal government. In August, 1982, the WMATA and the Department of Transportation approved a Supplemental Bond Repayment Participation Agreement providing for an overall two-thirds Federal and one-third local sharing of the interest and principal costs of the bonds. The 1986 request represents the Federal share under the terms of the Agreement.

The U.S. International Trade Commission is an independent agency created by act of Congress. The Commission's current powers and duties are provided for by the Tariff Act of 1930; the Trade Act of 1974; the Trade Agreements Act of 1979; the Agricultural Adjustment Act; and, section 1911 of the Financial Institution Regulatory and Interest Rate Control Act of 1978, 12 U.S.C. 635a-2.

The Commission conducts investigations and, where appropriate, makes determinations and recommendations, or takes action, in cases where (1) serious injury to industries may warrant increases in duties, the imposition of quotas, or the provision of adjustment assistance; (2) imports of goods sold at less than fair value may injure an industry; (3) foreign governments, organizations, or individuals, may have subsidized imports into the United States; (4) unfair methods of competition in the importation or sale of foreign articles may tend to injure an industry or restrain and monopolize trade and commerce in the United States; or (5) imports of agricultural products may materially interfere with certain programs of the Department of Agriculture.

The Commission advises the President as to the probable economic effect on the domestic industry and consumers, of modification of duties and other barriers to trade which may be considered for inclusion in any proposed trade agreement with foreign countries. Further, the Commission, at the request of the President, the Congress, or on the Commission's own motion, undertakes comprehensive studies and provides reports on key issues relating to international trade and economic policy matters.

The Commission, in cooperation with the Secretary of the Treasury and the Secretary of Commerce, establishes for statistical purposes an enumeration of articles imported into the United States and exported from the United States, and seeks to establish comparability of such statistics with statistical programs for domestic production.

The Commission also issues a publication containing U.S. tariff schedules and related matters and considers questions concerning the arrangements of such schedules and the classification of articles.

Pursuant to section 175 of the Trade Act of 1974, the budget estimates for the Commission are included without revision by the President.

The Interstate Commerce Commission is responsible for the regulation of interstate surface transportation. Consistent with the downward trend in the regulation of surface transportation which grew out of the regulatory reform legislation of 1980 and 1982, the Commission is reducing staff in 1986.

**Motor program.**—This includes the regulation of rates, the granting of operating authorities, the regulation of mergers and acquisitions, and the planning, analysis, and policy development associated with these activities as they relate to the Interstate Commerce Act as amended by the Motor Carrier Act of 1980, the Household Goods Transportation Act of 1980, and the Bus Regulatory Reform Act of 1982. The activities of interstate motor freight and passenger carriers, freight forwarders, and water carriers are monitored, and enforcement actions are instituted to ensure compliance with regulations intended to protect the public interest and promote an adequate and efficient system.

The greatest decreases in workload and staffing for 1986 will occur in the motor carrier regulatory functions. Applications for operating authority are expected to continue to decrease as they have since enactment of motor and bus deregulation legislation. Since the rules

necessary to implement the Motor Carrier and Bus Acts have been largely completed, time spent on rulemaking preparation and on litigation arising from rulemakings will also decline. However, the number of motor carrier tariff filings is expected to increase, as carriers continue to change rates quickly and frequently.

**Rail program.**—This encompasses the regulation of rates and of mergers, acquisitions, construction and abandonment of railway lines, as well as the planning, analysis, and policy development associated with these activities as provided for in the Interstate Commerce Act. Staff ensure compliance with railroad regulations in order to protect the public interest.

Resources devoted to rail activities will decrease in 1986. While workload associated with Conrail abandonments, rate complaints, and intrastate rate cases and State certifications is expected to decrease, work associated with mergers, acquisitions, consolidations, and other abandonments is expected to increase. Substantial resources will also be devoted to rail monitoring studies and major rail rulemakings.

**General management and administration.**—These activities provide support services, including data processing, budget and financial management, personnel, procurement, and contracting services. Support services and related staffing will be reduced in 1986, consistent with reductions in staffing levels throughout the agency.

The Japan-United States Friendship Act of 1975 established the Japan-United States Friendship Trust Fund, and created the Japan-United States Friendship Commission to make grants from the Fund for the promotion of scholarly, cultural, and artistic activities between Japan and the United States. The Commission is authorized to make expenditures from the appropriated income of the fund and, in an amount not to exceed 5% annually of the principal of the fund, to pay the expenses of the Commission and to make grants in support of studies, fellowships, scholarships, book collections, art programs, and other cultural and educational activities, primarily in the United States. The Commission received a contribution in May 1981 of \$2 million from the Government of Japan to be used for the purposes of the Act during the next several years.

The Legal Services Corporation (LSC) funds State and local agencies that provide free civil legal assistance to the poor. LSC is a private, non-profit corporation which is outside the Federal Government and acts independently of related social and community services programs. Grantees are involved both in cases for individual clients and in broader "law reform" activities.

The Administration proposes that the Corporation not be reauthorized and that no further Federal funding be provided.

The Merit Systems Protection Board performs the adjudicatory functions necessary to maintain the civil service merit system. These include hearing appeals on adverse actions, reduction in force actions, and retirement. The Board will report to the President on whether merit systems are sufficiently free from prohibited personnel practices to protect the public interest.

Board workloads are reflected in the following table:

The Special Counsel is empowered to investigate prohibited personnel practices in Federal agencies and political activities prohibited by the Hatch Act, and to administratively prosecute offending employees and agencies before the Merit Systems Protection Board. The Special Counsel may also transmit "whistleblower" allegations to the agency head concerned and require an agency investigation and a report to the Congress and the President when found appropriate.

Many cases that are referred to the Office are resolved without recourse to formal proceedings before the Board. Efforts to obtain such informal resolutions will continue in 1986.

Pursuant to Public Law 98-497, the National Archives and Records Administration will be established as an independent agency on April 1, 1985. This agency will conduct the activities previously conducted by the National Archives and Records Service of GSA.

In 1986, records in the National Archives and Federal records centers will total approximately 15.9 million cubic feet. The number of reference services expected to be provided will total 29.8 million.

**Records centers.**—In 1986, agencies will transfer 1,373 thousand cubic feet of inactive records to the records centers. The records centers will dispose of 1,239 thousand cubic feet of records in 1986, and 25.8 million reference services will be provided.

*Archives and related services.*—A substantial portion of the workload of the National Archives and related services activity is determined by the volume of reference requests received from Government agencies, the public, and the number of documents sent by Federal agencies to be published in the Federal Register. For 1986 the number of reference services is estimated at 4.0 million and the number of Federal Register pages to be processed will be 703,000.

Through the records declassification program, historically valuable information in the records of the Federal Government and in donated historical materials are made available to the public by declassifying as much information as possible without endangering the national security. In 1986, 7.2 million pages will be reviewed for declassification.

*National Historical Publications and Records Commission.*—This Commission coordinates and provides technical assistance to archival planning and assessment projects in many States and also offers a specialized reference service to Federal, State and local and nongovernment institutions that are publishing significant portions of records from official government files. The Commission also lends its endorsement and support to those specific projects that further the basic objectives stated in its legislation.

The National Capital Planning Commission is the central planning agency for the Federal Government in the National Capital Region. The National Capital Region consists of the District of Columbia; Montgomery and Prince Georges counties in Maryland; Arlington, Fairfax, Loudoun and Prince William counties in Virginia; and all cities in Maryland and Virginia within the outer limits of such counties.

During 1986, the Commission will continue its efforts to closely work with other Federal agencies, the District of Columbia government, and other local governments and jurisdictions in the National Capital Region, including the Metropolitan Washington Council of Governments (COG). Major emphasis will be placed on the maintenance of Federal elements to the Comprehensive Plan for the National Capital, the five-year Federal Capital Improvements program, and the review of Federal land acquisition and development proposals in the region. The Commission will continue to perform Federal interest reviews of the impact of proposed local, State and regional planning efforts on the Federal establishment, as well as perform increased numbers of reviews of Federal grant applications dealing with land and water use in the National Capital Region.

The National Council on the Handicapped is composed of 15 members appointed by the President and confirmed by the Senate. Established under the Rehabilitation Act of 1973, as amended, the Council is charged with reviewing all laws, programs, and policies of the Federal Government affecting disabled individuals. The Council is mandated to complete a major study by February 1986 on disincentives to establishment of integrated, community-based services for handicapped persons. The Council is further charged with establishing general policies for the National Institute of Handicapped Research and making recommendations to the President, the Congress, the Rehabilitation Services Administration Commissioner, the National Institute of Handicapped Research Director, and other Federal Departments and agencies as may be appropriate.

The insurance fund is used to carry out a program of insurance for member accounts in Federal credit unions and State-chartered credit unions which apply and qualify for insurance, authorized by Public Law 91-468, enacted October 19, 1970.

**Budget program.**—The activities consist of: (a) providing member account insurance, (b) formulating standards and requirements for insured credit unions, and (c) providing for liquidation or other disposition of the assets and liabilities of solvent and insolvent, insured credit unions.

The extent of the program is estimated as follows:

Item	1984 actual	1985 estimate	1986 estimate
Number of insured credit unions.....	15,277	15,180	15,067
Shares of insured member institutions as of Dec. 31 of the previous calendar year (in millions of dollars).....	87,500	100,500	110,000

It is estimated that approximately 4,701 State-chartered credit unions will be enrolled in the program by the end of 1986.

**Financing.**—For calendar year 1984, each insured credit union is required to pay a regular premium of one-twelfth of 1 percent of the total amount of its member accounts. No special premium was assessed in 1984 as had been voted for in 1982 and 1983. As a result of Public Law 98-369 (July 18, 1984), each insured credit union will also be required in January 1985 to deposit and maintain in the insurance fund 1 percent of its member share accounts. The fund is structured to be entirely self supporting through the moneys paid by member credit unions. The moneys received plus the income generated from their investment are expected to cover all administrative and financial costs, as well as increase the fund balance proportionate to insured share growth. It is anticipated that the nearly fourfold increase in the insurance fund generated from the 1 percent deposit will eliminate the need to assess the annual premium except in years of catastrophic credit union losses. The fund has \$100 million in borrowing authority from the Treasury for use in unforeseen emergencies.

**Operating results.**—Anticipated net income of \$126,600 thousand will be retained in the fund, raising the balance for unforeseen emergencies to \$1,267 million by the end of 1986.

The National Credit Union Central Liquidity Facility was established under Public Law 95-630. It began operations on October 1, 1979. The Central Liquidity Facility provides loans to member credit unions for seasonal and emergency needs.

The two primary sources of funds for the Facility are stock subscriptions from credit unions and borrowings from the Federal Financing Bank. Credit unions, which choose to become members of the Facility, are required to purchase stock equal to one-half of 1% of their assets. One-half of the subscription in stock is forwarded to the Facility and deposited in the fund. The re-

maining half of the subscription remains on call in the credit union in investments as approved by the NCUA Board.

The Facility may borrow funds from any source to relend to member credit unions. This amount of borrowings is limited to twelve times the amount of capital stock subscriptions by the authorizing statute (Public Law 95-630). In 1986, an appropriation limitation on new loans of \$600 million is proposed, of which it is currently anticipated that \$550 million will be used.

The National Endowment for the Humanities funds activities intended to improve the quality of education and teaching in the humanities, to strengthen the scholarly foundation for humanities study and research activity, and to advance understanding of the humanities among broad general audiences.

Support is provided through outright grants, matching grants, and a combination of the two. Eligible applicants include schools, higher education institutions, libraries, museums, historical organizations, professional associations, other cultural institutions, and individuals.

In 1986, major emphasis is being placed on projects and activities that improve humanities education and teaching in the Nation's schools, colleges, and universities, advance research and scholarship, and stimulate non-Federal support of the humanities.

The National Institute of Building Sciences is a non-profit, nongovernmental corporation authorized by the Housing and Community Development Act of 1974. The purpose of the Institute is to support the development and maintenance of nationally recognized building performance criteria for maintenance of life, safety, health, and public welfare. In 1984, the Institute received a

The Board resolves representation disputes in industry and remedies and prevents specified unfair labor practices by employers or labor organizations. Case intake in 1984 was 34,855 unfair labor practice cases and 8,571 representation cases. Estimates for unfair labor practice cases are 36,598 for 1985 and 38,428 for 1986. Representation case estimates are 9,000 for 1985 and 9,540 for 1986.

**Field investigation.**—Charges of unfair labor practices and petition for elections to resolve representation disputes are investigated by regional office personnel. Over 94 percent of the unfair labor practice cases and about 82 percent of the representation cases are closed by settlement, dismissal, or withdrawal. The remainder are prepared for public hearing. The agency strives to maximize the voluntary settlement of all cases and the avoidance of litigation.

**Administrative law judge hearing.**—Administrative law judges conduct public hearings in unfair labor practice cases. Their findings and recommendations are set forth in their decisions. In 1984 there were 876 hearings closed, 9 proceedings adjusted after close of hearing,

and 1,030 decisions issued. The estimate for 1985 is for 1,194 hearings to be closed, 10 adjusted after hearing, and 1,210 decisions. The estimate for 1986 is for 1,228 hearings to be closed, 10 adjusted after hearing, and 1,207 decisions.

**Board adjudication.**—In an unfair labor practice case a judge's decision becomes a Board order if no exceptions are filed. About 30 percent of these decisions become automatic Board orders or are complied with voluntarily. The remainder with exceptions filed requires contested Board decision. In 1984, 953 such Board decisions were issued; the estimates for 1985 and 1986 are 1,320 and 1,320 respectively. In representation cases, regional directors initially decide the issues by Board delegation. In 1984 regional directors issued 1,340 such decisions; and the estimate is 1,008 for 1985 and 1,076 in 1986. The Board itself decides representation issues on referral from regional directors or by granting a request for review of a regional director's decision. In 1984 the Board issued 128 representation decisions; the estimates for 1985 and 1986 are 116 and 121 respectively. The Board also ruled on 265 objection and challenge questions in election cases in 1984; it is estimated that 372 such rulings will be required in 1985 and 344 in 1986.

**Securing compliance with Board orders.**—If the parties do not voluntarily comply with the Board's order involving unfair labor practices, the Board must request the appellate courts to enforce its decisions. In 1984 a total of 173 Board decisions of all kinds required such litigation; the estimate for 1985 is 410, and for 1986 it is 427.

**Mediator services.**—The Board mediates disputes over wages, hours, and working conditions for some 650 rail and air carriers and approximately 700,000 employees in the two industries.

The Board also provides technical assistance to enable labor and industry representatives to explore informally the relevant economic and noneconomic problems that condition collective bargaining in the railroad and airline industries.

**Voluntary arbitration and emergency disputes.**—When the parties fail to resolve their disputes through mediation, they are urged to submit their differences to arbitration. If neither mediation nor voluntary arbitration is successful, the President, when notified of disputes which threaten seriously to interrupt service, may appoint emergency boards to investigate and report on the

disputes under section 10 of the Railway Labor Act (RLA). Such reports usually serve as a basis for resolving the disputes.

The Northeast Rail Service Act of 1981 amended the Railway Labor Act by adding a new emergency dispute procedure covering disputes between a publicly funded and operated commuter carrier and its employees. The 1981 act requires the Board to appoint the public members of factfinding panels on Conrail.

**Adjustment of Railroad Grievances.**—Railroad employee grievances resulting from disputes over the interpretation or application of collective bargaining contracts may be brought for settlement to the National Railroad Adjustment Board (NRAB). The divisions of the Board are composed of an equal number of carrier and union representatives compensated by the party or parties they represent. Public Law 89-456 provides for the adjustment of disputes involving grievances resulting from interpretation or application of bargaining agreements in the railroad industry otherwise referable to the NRAB. The Northeast Rail Service Act of 1981 also provides access to this machinery for Conrail employees with grievances arising from the application of employee protection benefits. The appropriation provides for neutral referees to sit with the various boards when they are deadlocked.

Administrative direction and support for the public law boards, special boards of adjustment and the NRAB are provided by Federal employees who are compensated by the National Mediation Board.

The major research program activities of the Foundation are:

**Mathematical and physical sciences.**—Research in this activity is directed at increasing understanding of natural laws and phenomena. It includes research in mathematics, computer science, physics, chemistry, and materials science. Studies deal with a broad range of significant science areas such as new amorphous materials and materials of limited dimensionality, organometallic chemistry and catalysis, the fundamental forces and constituents of physical matter, new computing methods based on parallel processing and new mathematical structures and techniques. Provision of modern research instrumentation and facilities and support of young scientists is stressed in all programs.

**Engineering.**—Research supported by this activity aims to increase U.S. engineering capability and strength, and on selected occasions, to focus that capability and strength on areas which are relevant to national problems. Topics supported include: electrical, communications, and systems engineering; chemical, biochemical, and thermal engineering; mechanics, structures, and materials engineering; science base development in design, manufacturing, and computer engineering; fundamental research underpinning emerging and critical engineering systems; and Engineering Research Centers.

**Biological, behavioral, and social sciences.**—This activity supports research in cellular biology, molecular biology, behavioral and neural sciences, environmental biology, social and economic sciences, and information sciences. Research covers: inquiry into the mechanisms underlying the ways living organisms develop, grow, reproduce, maintain themselves, and age; studies in environmental biology, including the behavior of biological communities and ecological and physiological adaptations of populations to natural environments; attempts to understand the biological, environmental, and cultural factors that underlie the behavior of human beings and animals, with explicit emphasis on nervous system structure and function; analysis of the underlying forms and processes affecting economies, organizations and societies, as well as the development of scientific data bases and the improvement of measurement methodology; and discovery of the properties of information—the processes by which it is generated, structured communicated and used.

**Astronomical, atmospheric, Earth, and ocean sciences.**—This research advances physical knowledge of the universe and knowledge of the planet Earth. It includes studies of the life cycles of stars; the nature of the Earth and its geologic history; open ocean dynamics and resources; the influence of the Arctic on the Earth's climate; the physics and chemistry of the Earth's atmosphere; and implementation of the Arctic Research and Policy Act of 1984.

**Scientific, technological, and international affairs.**—This activity supports and performs research and analysis to link producers of research with the users of research; facilitate international scientific cooperation; provide policy-oriented data, information and analysis; and support cross-disciplinary activities that strengthen the Nation's scientific research base. Programs cover joint research between universities and industry; small business innovation research; cooperative scientific activities between the U.S. and advanced and developing countries; studies on the state of the science and technology enterprise and its socioeconomic impact; and special research initiation and improvement activities.

**Advanced scientific computing.**—This activity is aimed at providing high quality access to advanced computational facilities to the academic research community. Major components are support for the establishment of new supercomputer centers and improvement of networks for supercomputer access.

**Program development and management.**—This activity provides for the operation, support, management, and direction of all NSF programs and activities and

**U.S. Antarctic program.**—The Foundation manages the U.S. program in the Antarctic and supports a multi-disciplinary research program on weather and climate, earth sciences, glaciology and other physical and biological characteristics of Antarctica and its surrounding seas. This activity is the major expression of U.S. interest and presence in Antarctica.

**Operations support.**—Logistical support, including aircraft, helicopters and vessels and living accommodations on the Antarctic base, is provided.

The special foreign currency program utilizes U.S.-owned excess currencies in certain foreign countries to support cooperative scientific projects, seminars, and the travel of U.S. and foreign scientists involved in mutually beneficial efforts. Payments for this program are made in foreign currencies which the Department of the Treasury determines to be excess to the requirements of the United States.

The major science and engineering education activities of the Foundation are:

**Research career development.**—Promotes the future strength of the Nation's scientific endeavors by awarding graduate research fellowships to some of the most promising graduate students in science and engineering.

**Materials development and research.**—Promotes improvement in science and mathematics education for the Nation's schools through the development of instructional materials for students and teachers through the support of research to better understand the process of teaching and learning.

**College science instrumentation.**—Assists in strengthening science instruction at the Nation's undergraduate colleges through support for modern scientific equipment.

**Teacher enhancement and informal science education.**—Supports local and regional projects for continuing education and professional development of precollege mathematics and science teachers and programs of informal science education through museums and the media.

**Studies and program assessment.**—Supports studies and analyses to provide a systematic and current understanding of the condition of science and mathematics education in the United States.

U.S. dollars which are advanced from foreign governments as contributions to the cost of the international phase of ocean drilling (IPOD) under the National Science Foundation ocean drilling programs.

Gifts and donations are used for costs associated with meetings for visiting foreign scientists and certain special functions of the National Science Board. These funds are not otherwise available.

Complementary Agreement Seven of the Agreement on Friendship, Defense and Cooperation, between the United States and Spain, provides for the establishment of a research grant program to promote cooperative efforts in basic research between these countries. Principal activities supported include: cooperative research, joint seminars, exchange of senior scientists and short-term research development visits.

The National Transportation Safety Board, as an independent nonregulatory agency, is charged with promoting transportation safety through the investigation of accidents, the conduct of special studies, the development of recommendations to prevent accidents, the evaluation of the effectiveness of other Government agencies in preventing transportation accidents, and the review of appeals on actions taken against transportation certificates and licenses. The 1986 budget proposal reflects a freeze of the 1985 funding level, with additional selected management savings.

**Policy and direction.**—This activity provides Board-wide policy and program guidance, the determination of probable cause of transportation accidents, the issuance of safety recommendations, the approval of accident reports, the final review of appeals involving airman and seaman certificates and licenses, the implementation and direction of policies and programs, liaison with the Congress and other Government agencies, and legal and public affairs advice and services.

**Accident investigation.**—This activity provides for the management of accident investigations, the development of their probable cause, the development of recommendations, and the preparation of reports on aviation, railroad, highway, marine, pipeline, and hazardous materials accidents.

**Technology.**—This activity provides specialized advice and services for the Board's accident investigation, accident prevention, and safety promotion activities in the areas of human, vehicular, environmental, and operational factors. It develops recommendations, provides laboratory support, and conducts special investigations.

**Safety programs.**—This activity provides oversight of other transportation agencies through the conduct of evaluations of their safety programs. This activity also provides oversight of transportation systems through the conduct of safety studies. In addition, it manages the development and follow-up of the Board's safety recommendations and the Board's responses to Notices of Proposed Rulemaking. It provides statistical analysis of transportation accident and incident data, and it acts as program manager for some of the Board's safety objectives to insure action is taken on certain transportation safety problems not being addressed by Government or industry.

**Administration.**—This activity provides administrative support to assure accomplishment of Board programs through financial management, personnel management and training, procurement and facilities services, automated data processing services, equal employment opportunity, and other administrative support.

**Administrative law judges.**—These judges conduct hearings on appeal from the suspension, amendment, modification, revocation, or denial of any operating certificate or license issued by the Secretary of Transportation under the Federal Aviation Act of 1958.

The National Transportation Safety Board is mandated by Congress to investigate all catastrophic transportation accidents and therefore, has no control over the frequency of costly accident investigations. The emergency fund provides a funding mechanism by which

periodic accident investigation cost fluctuations can be met without delaying critical phases of the investigations.

**Nuclear reactor regulation.**—The primary objective of nuclear reactor regulation is the assurance of public health and safety, and protection of the environment in the design, siting, construction and operation of nuclear power reactors. Continued emphasis will be on the review and implementation of cost-effective safety issues pertaining to operating reactors, and ensuring that the NRC licensing process does not unnecessarily delay plant fuel loading, startup testing, and operations. Other major goals include timely resolution of only high priority generic safety issues, including high priority human factors issues. NRC will perform the regulatory activities necessary for the decontamination of the Three Mile Island-2 (TMI-2) power plant, the defueling of the reactor, and the disposition of the radioactive waste.

**Inspection and enforcement.**—The purpose of inspection and enforcement programs is to ensure that nuclear reactors, fuel facilities and material licensees under NRC jurisdiction are constructed, operated and used in a manner which protects the public health and safety and the environment, and that prompt and vigorous enforcement action is taken against licensees who do not comply with NRC regulations. The Inspection and enforcement program is conducted by the NRC headquarters Office of Inspection and Enforcement and NRC's five regional offices. The headquarters office has responsibility for inspection policy and program development, assessment of regional implementation of the inspections program, appraisal inspections to determine licensee and regional performance, vendor inspections, escalated enforcement actions, evaluation of licensee events, response to incidents, management of the NRC Operations Center, emergency preparedness license reviews, specialized technical training for all of NRC, and the NRC Quality Assurance (QA) program. The regional offices implement the NRC inspection program by conducting inspections of reactors, fuel facilities and materials licensees, initiating and taking certain enforcement actions, conducting systematic assessment of licensee performance, performing emergency preparedness annual reviews, responding to incidents by dispatching personnel to the site in question, and providing technical support to the Office of Investigations. In the regions, the increased number of operating reactors will require additional inspections. A second resident

inspector will be assigned to all construction sites and reactors in preoperational testing.

**Nuclear material safety and safeguards (NMSS).**—These programs have the primary objective of ensuring adequate protection of the public health and safety and the environment in the design, siting, construction, and operation of nuclear fuel cycle facilities including nuclear waste storage and disposal facilities, and the utilization and transportation of nuclear materials. NMSS is responsible for performing the safety, environment, and safeguards reviews of applications for fuel cycle facility operating licenses, and the amendment and renewal of such licenses. NMSS is also responsible for licensing the utilization of nuclear materials and for regulating the design of containers, as required by 10 CFR 71, used for transporting nuclear materials. In addition, NMSS is responsible for conducting reviews of the safeguards plans for power and non-power reactors. The achievement of program goals is a joint undertaking of the NMSS Headquarters Office and the five regional offices. Major emphasis during 1986 will continue to be placed on implementation of the Nuclear Waste Policy Act of 1982.

**Nuclear regulatory research.**—The 1986 program will continue to develop an independently verified source of safety information to be used in conjunction with data furnished by licensees as a basis for licensing and regulatory decisions. Research is also used to develop a safety base and analytical methods in support of Commission rulemaking activities and policy determinations. For example data on the radioactive material released during an accident will be used as one of the Research bases for implementation of regulatory actions such as Reactor Siting Rule and Emergency Planning Guidelines including minimum required evacuations. Research efforts in 1986 will deal with safety issues that arise from operator action and equipment malfunction that can be expected to occur during the life of a nuclear power plant. Further, efforts associated with accidents beyond the current design basis with fission product releases will be continued along with efforts on developing and improving reliability analysis and methods for quantifying probability consequences associated with reactor accidents. Reactor Engineering work will focus on the qualification, operation and repair of reactor components and systems to provide a basis for evaluating the reactor reliability. Waste management works in high level waste, supporting licensing assessment and evaluation of how waste forms will interact with geological, hydrological media.

The mission of the Office of the Federal Inspector for the Alaska Natural Gas Transportation System is to oversee the construction and initial operation of a 4,837-mile, joint U.S.-Canadian pipeline system to transport Alaska natural gas from Prudhoe Bay to the Chicago and San Francisco areas in the lower 48 States. Specifically, the Federal Inspector is charged with reviewing project sponsor designs and cost estimates to ensure safe and efficient construction practices; coordinating and expediting the issuance of all Federal permits and authorizations; and enforcing all Federal statutes relevant to the construction project, including those related to environmental protection.

The budget for the agency normally supports five major programs and executive direction and administration functions; however, due to the delay in construction on the Alaskan Leg, the budget has been consolidated, reflecting the reduced level of activity since 1983.

The Panama Canal Act of 1979 established the Panama Canal Commission to operate and maintain the interoceanic waterway. The Commission is self-sufficient in its operations and makes payments to the Republic of Panama as specified in the Panama Canal Treaty of 1977.

**Budget program—Transit operations.**—The services performed by this activity are (in thousands of dollars):

	1984 actual	1985 estimate	1986 estimate
Maintenance of channels and dams.....	38,357	39,427	38,754
Navigation service and control.....	65,832	69,850	72,305

General repairs, engineering, and maintenance services.....	43,275	44,461	44,307
Fire and facility protection services.....	9,333	10,225	10,362
Public service payments to Panama.....	10,000	10,000	10,000
Payments to Panama.....	59,144	64,467	66,234
General canal expense.....	18,099	16,948	16,895
Total operating expenses.....	287,703	300,655	307,685
Less intra-agency recoveries.....	30,508	27,370	26,555
Net operating expenses.....	257,195	273,285	218,130

Annuity payments to Panama are for certain public services to be provided by Panama, a fixed annuity of \$10 million, and an annuity based on net tonnage of vessels transiting the canal. These payments are prescribed in paragraph 5 of article III and paragraph 4(a) and 4(b) of article XIII of the Panama Canal Treaty of 1977.

In 1986, the Transit Reservation System, which is designed to finance partially the capital program, is projected to generate \$3.3 million. Vessel traffic volume and other indices of workload are as follows:

	1984 actual	1985 estimate	1986 estimate
Ship transits (over 300 net Panama Canal tons) ....	11,384	11,850	12,035
Tolls (in thousands of dollars).....	289,155	310,000	320,000

Capital obligations for 1986 include the following major projects: replacement of one tugboat, procurement of two towing locomotives, replacement and addition of transit equipment, and the installation of a fire protection system at lock facilities.

**Supporting services.**—The services performed by these support activities are (in thousands of dollars):

	1984 actual	1985 estimate	1986 estimate
Supply and logistical services.....	36,281	35,703	36,739
Utilities.....	43,053	50,025	52,439
Other supporting services.....	10,377	11,642	12,298
Total operating expenses.....	89,711	97,370	101,476
Less intra-agency recoveries.....	27,000	27,219	28,495
Net operating expenses.....	62,711	70,151	72,981

Capital obligations for 1986 include several projects for electric power and communication systems improvements.

**Administrative and general expense.**—This category includes the overall direction and administrative expenses of the Commission; the costs of the employee health benefits program; early retirement costs; the annuitant welfare program; death and disability payments; and the cost of health and education services provided to Commission employees and dependents at Department of Defense facilities. Also included is the interest expense on the investment of the U.S. Government in the Canal. The interest collected in 1986 and hereafter will be transferred to miscellaneous receipts of the U.S. Treasury where it will be available to finance operations of the U.S. Government. In years past, the interest has only been deposited in the Panama Canal Commission Special Fund, reducing the investment of the U.S. Government in the Canal and thus, the interest collected in subsequent years.

This appropriation reimburses the Postal Service for previously unfunded liabilities of the former Post Office Department. The Administration proposes to stop reimbursing the Postal Service for losses in revenue associated with carrying certain categories of mail at free and reduced rates beginning in 1986. However, legislation will be proposed that will enable the Postal Service to continue the subsidy for most existing subsidized mailers.

The Postal Reorganization Act of 1970, Public Law 91-375, converted the Post Office Department into the U.S. Postal Service, an independent establishment within the executive branch. The Postal Service commenced operations July 1, 1971. This agency is charged with providing patrons with reliable mail service at reasonable rates and fees.

The U.S. Postal Service is governed by an 11-member Board of Governors, including 9 Governors appointed by the President, a Postmaster General who is selected by the Governors, and a Deputy Postmaster General who is selected by the Governors and the Postmaster General.

Decisions on changes in domestic rates of postage and fees for postal services are recommended to the Governors of the Postal Service by the independent Postal Rate Commission after a hearing on the record under the Administrative Procedure Act. The Commission also recommends decisions on changes in the domestic mail classification schedule to the Governors. Decisions of the Governors on rates of postage, fees for postal services, and mail classification are final, subject to judicial review.

**Programs.**—Included are all postal activities providing window services; processing, delivery, and transportation of mail; research and development; administration of postal field activities; and associated expenses of providing facilities and financing.

**Financing.**—The activities of the U.S. Postal Service are financed from the following sources: (1) mail and services revenue, (2) reimbursements from Federal and non-Federal sources, (3) proceeds from borrowing, (4) interest from U.S. securities and other investments, and (5) appropriations by the Congress. All receipts and deposits are made to the Postal Service Fund and are available without fiscal year limitation for payment of all expenses incurred, retirement of obligations, investment in capital assets, and investment in obligations and securities.

Section 2005 of title 39, United States Code, authorizes the Postal Service to borrow by issuing obligations which may not exceed \$10 billion outstanding at any one time. In any one fiscal year, the net increase in

amounts outstanding may not exceed \$1.5 billion in obligations issued for the purpose of capital improvements and \$500 million for the purpose of defraying operating expenses. As of September 30, 1986, it is expected that the total debt instruments issued and outstanding pursuant to this authority will amount to \$923 million.

**Operating.**—Estimated receipts will total \$31.0 billion in 1986. This includes \$29.8 billion from mail and services revenue, \$236 million from investment income and \$39 million from appropriations.

Legislation will be proposed to increase the employer's contribution for retirement beginning in 1986 by 2% each year until the Postal Service is paying the full cost of benefits for its employees. Legislation will also be proposed to permit the Postal Service to increase the rates of the full ratepayers so that the postal subsidy will continue for most of the current preferred mailers.

This appropriation is a Federal subsidy to the rail industry pension for costs not financed by the railroad sector. The American taxpayer subsidy annually exceeds \$1,000 per rail employee.

*Subsidy for windfall payments.*—When first authorized in 1974, the windfall subsidy appropriation was estimated at \$250 million annually for 25 years, or a total subsidy of \$6.25 billion. In two years, the annual windfall subsidy estimate increased by 45 percent and, within five years, the Railroad Retirement Board reported that the original 1974 estimate had doubled to \$500 million and would continue to increase if there were any inflation after 1980.

The Carter administration, faced with increasingly large projected subsidy costs, sought to limit to \$350 million annually the general taxpayers' liability to subsidize this rail industry pension, a position also reflected in the March revisions to the 1982 budget. Based on their collectively-bargained agreement and assuming a \$350 million subsidy appropriation, rail labor and management successfully sought congressional restructuring of the rail industry windfall in Public Law 97-35. The rail sector sought to limit windfall payments to the appropriated subsidy amounts rather than rely on the rail industry funded retirement account. This extended the subsidy well beyond the year 2000.

## AD HOC FEDERAL SUBSIDY FOR RAIL UNEMPLOYMENT INSURANCE

This appropriation provided a one-time subsidy to a separate rail sector fund. This separate rail fund remains unique at the request of the rail sector, which sought to be exempt from universal unemployment insurance. As long as the rail sector wishes to maintain their separate fund, they should pay for it: the American taxpayer should not subsidize a separate, special fund for the rail sector.

## FEDERAL PAYMENT TO THE RAILROAD RETIREMENT ACCOUNT

For payment to the accounts established in the Treasury for the payment of benefits under the Railroad Retirement Act for unnegotiated checks, [\$15,000,000] \$2,200,000 which shall be the maximum amount available for payments pursuant to section 417 of Public Law 98-76: *Provided*, That these funds shall remain available through September 30, [1986] 1987. (Departments of Labor, Health and Human Services, and Education and Related Agencies Appropriation Act, 1985.)

The Board administers a separate rail sector fund for unemployment and sickness insurance payments. Administrative expenses are financed from employer unemployment taxes. The rail sector fund is projected to be unable to pay full benefits on a timely basis beginning in fiscal year 1986. Excess administrative funds will be transferred to the railroad sickness and unemployment fund to help pay unemployment and sickness benefits to rail workers.

**Maintenance of rail earnings accounts.**—Unemployment and sickness payments are based on individual records of rail earnings and daily wage rates.

**Processing of rail unemployment insurance claims.**—Claims for unemployment compensation are filed with employers and certified for payment through the headquarters office. As the table below indicates, unemployment claims are projected to decline by 60 percent from 1983 to 1986, resulting in a proportionate reduction in workloads and staffing requirements. The budget proposes to increase rail sickness and unemployment insurance administrative resources and staffing above the levels justified by the declining workload, to enhance the prevention and detection of waste, fraud, and abuse.

**Processing of rail sickness claims.**—These claims are filed by mail and certified for payment through the headquarters office. Sickness claims are also projected to decline by 13 percent, from 411,900 in 1983 to 327,000 in 1986.

**Rail claimant placement services.**—The Board conducts an employment service for unemployment benefit claimants.

**Administration.**—The costs of administration are shared between this and the rail pension program on an allocated basis, which is periodically revised for actual experience.

**Office of Inspector General.**—The Office of Inspector General of the Railroad Retirement Board was established by Public Law 98-76. In 1985 and 1986, 20 full-time equivalent staff will be devoted to this activity, the costs of which are shared between this and the rail pension program on an allocated basis. All investigatory activities will be brought under this Office's direction.

Railroad retirees generally receive the equivalent to a social security benefit and a rail industry pension collectively bargained like other private pension plans but embedded in Federal law. About 351,000 individuals also receive a "windfall" benefit.

**Income.**—Railroad industry pension fund revenues are derived from pension contributions by railroad employers and employees; interest on investments; various temporary subsidies; and payments from the Federal old-age, survivors and disability insurance trust funds. The railroad retirement system has an annual financial interchange with social security. Under this arrangement, social security has paid railroad retirement some \$22 billion, with annual payments exceeding \$2 billion. It was designed by the rail sector to help finance the rail industry pension, placing social security in the same position in which it would have been if railroad employment had been directly covered by social security.

**Retirement, disability, and survivor benefit payments.**—Estimates reflect the increases in benefit rates provided by law.

**Administrative expenses.**—These expenses are subject to annual limitations in appropriation acts (see Limitation on Administration).

**Payment to Federal hospital insurance trust fund.**—That portion of taxes which finances hospital insurance benefits is for payment to the Federal hospital insurance trust fund, since payments of hospital benefits for railroad beneficiaries are made from that fund.

These proposals would: (1) make uniform the treatment of rail pension payments for income tax and cost-of-living adjustment purposes, rectifying an anomaly under current law that treats some rail pension payments as if they were social security benefits; (2) extend Federal/State UI coverage to railroad employment, enabling the insolvent railroad sickness and unemployment fund to repay its debts to the rail pension fund; and, (3) freeze cost-of-living adjustments on rail pensions for one year.

The Board administers the rail industry pension based on collectively bargained agreements which are incorporated in Federal statute.

**Maintenance of rail earnings accounts.**—Eligibility for retirement and the amount of rail benefits paid are based on individual rail earnings records.

**Processing rail applications.**—This activity includes processing annuity claims under the Railroad Retirement Act of 1974. Based on amendments enacted in Public Law 97-35, benefit computations were simplified. Coupled with the continued decline in railroad retirement applications and automation of previously manual procedures, the Board's workload devoted to this activity is expected to continually decrease each year. The table below shows the continued decline anticipated in major workloads.

	1984 actual	1985 estimate	1986 estimate
Pending, start of year .....	41,608	34,815	27,815
New Railroad Retirement applications .....	89,508	83,000	76,000

Total dispositions (excluding partial awards) .....	110,560	105,000	98,000
Pending, end of year .....	34,815	27,815	20,815

The budget proposes to invest \$8.1 million to upgrade the Board's automated claims processing capability.

(Substantial funds for investments in automation were also included in the 1984 and 1985 appropriations.) The Board estimates that the major automation projects to be completed in 1986–88 will result in improved service, more accurate payments, and a dramatic improvement in productivity. The Board projects these investments will result in savings of about 200 work years and full-time equivalent positions and commensurate savings in administrative and other program expenses. The budget proposes to adjust staffing levels in railroad retirement only for the estimated savings from automation, and to devote the staff resources freed by declining workloads to automation and quality control.

The Board projects work year savings of 17 in 1985, 36 in 1986, 64 in 1987, 173 in 1988, and 203 in 1989 from these investments.

**Maintenance of rail beneficiary rolls.**—The Board will explore and adopt new approaches to improve service to beneficiaries, primarily by making improvements in automation.

As shown below, the Board projects this workload will continue to decline, as the number of beneficiaries on the rolls continues to decline.

	1984 actual	1985 estimate	1986 estimate
Total beneficiaries.....	970,207	951,000	942,000

**Office of Inspector General.**—The costs of the Office of Inspector General are shared between the rail pension, social security, and railroad unemployment insurance program on an allocated basis. During 1986, the Board will devote 20 full-time equivalent staff to this activity. All investigatory activities will be brought under this office's direction.

**Medicare.**—This activity includes on a reimbursable basis processing applications for the Social Security and Health Care Financing Administrations of the Department of Health and Human Services to establish eligibility for health and medical insurance benefits under title XVIII of the Social Security Act for rail beneficiaries.

**Administration.**—The cost of administration is shared between the rail pension, social security, and the railroad unemployment insurance programs.

In recognition of the continuing decline in virtually all its major workloads, the Board will explore and adopt new approaches to improve service to beneficiaries, primarily by making improvements in automation.

**Office of Inspector General.**—The costs of the Office of Inspector General are shared between the rail pension, social security, and railroad unemployment insurance program on an allocated basis. During 1986, the Board will devote 20 full-time equivalent staff to this activity. All investigatory activities will be brought under this office's direction.

All railroad retirees receive the equivalent of a social security benefit, and they may also receive rail industry pension payments and special windfall payments. Social security benefits for former railroad employees are funded by the social security trust funds, and rail industry pension payments are the responsibility of the rail sector. The combination of both these payments in a single trust fund gave rise to serious concerns that social security payments to railroad retirees might be jeopardized by the continuing financial problems of the rail industry pension fund. To ensure and protect the integrity of social security benefits to railroad retirees, the Railroad Retirement Solvency Act of 1983 mandated that beginning in 1985, the financing and payment of Federal social security benefits be separated from the rail industry pension trust fund.

The primary purpose of the Commission is to protect the interests of the investing public.

**Full disclosure.**—To insure that investors will be provided with material facts concerning securities offered for public sale, issuers who propose to offer new securities for public sale are required to file registration statements with the Commission at its home or regional offices. Issuers having total assets and security-holder populations of specified sizes are also required to furnish comparable information on a continuing basis in annual and other periodic reports, in proxy solicitation materials, and in tender offers and acquisition reports. Commission staff review these filings to insure full and fair disclosure and to prevent fraud and misrepresentation.

**Electronic filing pilot project.**—The purpose of this pilot project is to eliminate reliance on paper in the receipt, review, and dissemination of public disclosure documents. The pilot project which began operating in September 1984, is testing the feasibility of receiving, analyzing, and disseminating a limited number of corporate filings electronically.

Following the pilot project, the SEC intends to select an operational contractor which will assume the responsibility for providing at no cost to the government, a nationwide capability for electronic receipt, analysis, and dissemination of filings. Transition from the pilot to the operational system will occur during May to September, 1986. The no-cost contractor will have the right to market and sell public information from the Commission's data base.

In 1986 the Selective Service System will continue to register men as they reach age 18, conduct a non-registrant identification program to insure compliance with the law, and maintain a data base of registrant records. The System will continue to develop enhancements to ensure its capability to respond rapidly and efficiently from its standby posture.

**Mobilization readiness.**—This activity includes all facets of National and Regional operational planning, maintenance of automated registration information, a comprehensive training program for the Selective Service Reserve Forces, a training program for the standby board members, and administrative functions. The processing procedures of the Registrant Information Management System will continue to be tested and refined to insure that it can fully satisfy the emergency manpower needs of the Armed Forces.

**Reserve program.**—This activity involves the preparation of the Reserve and National Guard officers for mobilization assignments in specific positions with the Selective Service System. Special focus of the program is on the exercise of the mobilization plans to ensure a high readiness capability in the event of mobilization.

The Smithsonian Institution conducts research in the natural and physical sciences and in the history of cultures, technology, and the arts; acquires and preserves for reference and study purposes over one hundred million items of scientific, cultural, and historic importance; maintains public exhibits representative of the arts, American history, aeronautics and astronautics, technology, anthropology, geology, and biology (including living animal exhibits); presents performances of American arts and crafts; undertakes education programs at all levels; and participates in the exchange of scholarly information.

The Institution is responsible for the operation and maintenance of 12 major exhibition buildings, as well as the Museum of African Art buildings; a zoological park and animal conservation and research center; the new Museum Support Center and other collections storage and preservation facilities at Silver Hill, MD; two natural preserves, in Panama and on the Chesapeake Bay; an astrophysical observatory on Mount Hopkins, AZ; and supporting administrative, laboratory, and storage areas. The new Center for African, Near Eastern, and Asian Cultures, currently under construction in the Quadrangle south of the Smithsonian Institution Building, is scheduled to open to the public in 1987. Visitor attendance to buildings on and off the Mall, including the National Zoological Park, is expected to total approximately 27 million in 1985. Millions more will view traveling exhibitions.

In 1986, emphasis will continue to be placed on strengthening the security of the collections; improving the maintenance of the physical plant; providing collections management support, including the purchase of additional collections storage equipment for the Museum Support Center and continuation of the move of the collections to be located there; insuring scientific equipment support of ongoing research programs; and proceeding with the establishment of the office automation and collections information systems. Moreover, resources are included for initial program and support requirements for staffing and operating the Center for African, Near Eastern, and Asian Cultures and for the Directorate of International Activities. Support for American research abroad is provided through initial funding for American overseas research centers.

This account supports a program of grants payable in excess U.S.-owned foreign currencies to U.S. universities, museums, and other institutions of higher learning, including the Smithsonian itself, for field research in areas of traditional Smithsonian competence in those countries where excess local currencies are available.

Areas of research include archeology and related disciplines, systematic and environmental biology, astrophysics and Earth sciences, and museum programs. Special programs funded by this account are the foreign currency reserve for future scholarly programs of the American Institute for Indian Studies, a consortium of American universities, and U.S. support for excavating and preserving the ancient city of Moenjodaro in Pakistan.

**National Air and Space.**—The National Air and Space Museum was completed and opened to the public on July 1, 1976. Necessary repairs to the building's facade and terrace will continue.

**Museum Support Center.**—The Institution accepted beneficial occupancy of the Museum Support Center in early 1983. These facilities will provide additional space for the care, curation, conservation, deposit, preparation, and study of the National Collections, for the related documentation of the collections, and for the training of museum conservators. Space presently used for storage will be returned to its intended use for public exhibition.

**Quadrangle.**—Construction will continue in 1986 for the new Center for African, Near Eastern, and Asian Cultures, located in the Quadrangle south of the Smithsonian Institution Building.

**Hirshhorn Museum and Sculpture Garden.**—The unobligated balance of the construction account for the Hirshhorn Museum, returned to the Institution by the General Services Administration in 1984, will be used to correct defects related to the original construction of the building.

The objectives of the Woodrow Wilson Center are to produce scholarship of the highest quality on subjects that matter to our civilization and to communicate that scholarship to a wider audience within and beyond Washington through publication and dialog.

The Center has chosen to fulfill these objectives through its fellowship and guest scholar program. Each year the Center conducts a major open international competition for a limited number of fellowships. The scholars and the scholarly work they produce constitute the memorial to Woodrow Wilson. Virtually all of the Center's expenditures derive from the basic decision to create a resident body of fellows.

The Center is directed by its congressional statute to raise both public and private funds and the Center's major objectives could not be attained by an exclusive reliance on either Federal appropriation or private contribution.

The Navajo and Hopi Indian Relocation Commission was established by Public Law 93-531 to plan and conduct relocation activities associated with the settlement of a land dispute between the two tribes.

Bonuses are paid to clients who volunteered for relocation prior to July 7, 1982. Relocation of clients includes such activities as certification, housing acquisition and construction, and land acquisition. Discretionary funds will be used for activities which will facilitate and expedite the overall relocation effort.

The Tennessee Valley Authority (TVA) was created in 1933 as a Government-owned corporation for the unified development of a river basin comprised of parts of seven States. Its program in 1986 will be financed from three sources: (1) appropriations by the Congress; (2) proceeds available from current power operations and borrowings against future power revenues; and (3) proceeds available from nonpower activities.

The following table provides detailed information on programs financed by power proceeds and borrowings and programs financed by appropriations and nonpower proceeds.

**Budget program—natural resources.**—TVA concentrates its efforts on programs in navigation, flood control, dam safety and maintenance of the waterway.

**Water resources.**—Includes operation and continuing development of the navigation channel from Paducah, KY, to Knoxville, TN. The 1986 proposal includes \$1,250,000 for navigation user fees.

For flood control, TVA operates a system of multi-purpose reservoirs to retain excessive seasonal runoff and regulate discharges at flow rates that can be accommodated by downstream channels and reservoirs. As a result, flood crests are reduced along the Tennessee River and its tributaries and also the lower Ohio and Mississippi Rivers.

Dam safety modifications and maintenance activities ensure that the waterway system meets Federal safety guidelines in the event of severe flood conditions and maintenance is performed to keep the system in good and safe operating condition.

**Resource management.**—The program contains two major areas of effort: Protection of public lands and waters under TVA trust; and valley mapping and

demonstrations of remote sensing in support of TVA activities as well as the regional mapping needs of the U.S. Geological Survey.

**National fertilizer development.**—The National Fertilizer Development Center in Muscle Shoals, AL, is active in two program areas: Research and development and introduction.

Research and development consists of basic chemical and agronomic research and development of fertilizer products and processes. This is accomplished in cooperation with the Department of Agriculture, the land-grant universities, and industry.

Introduction is conducted with the land-grant universities and the fertilizer industry. It includes small-plot demonstrations, tests and demonstrations of fertilizer materials and practices on selected operating farms. Beginning in 1986 this component of the fertilizer program will become self-supporting.

**Power program: Power supply and use.**—TVA is the sole supplier of electric power to an area of 80,000 square miles in the seven Tennessee Valley States. Income from power operations, net of interest charges

and depreciation, and other operating expenses is estimated at \$569,032 thousand in 1986.

The power generating facilities presented in the capital investment table are financed from power proceeds and borrowings.

**General services.**—Operating costs for general service activities include bridge maintenance, fallout shelter maintenance, and reimbursable services furnished at the request and expense of other agencies.

**Financing.**—Amounts estimated to become available in 1986 are to be derived from (1) the requested appropriation of \$38,605 thousand; (2) nonpower revenues and receipts of \$16,648 thousand; and (3) power revenues and receipts of \$4,934,950 thousand. In addition, the budget program anticipates financing from borrowings of \$275,000 thousand backed by future revenues. A summary of the application of appropriations follows:

**Operating results and financial conditions.**—Only the power program and fertilizer introduction are intended to be self-supporting; the net expense of nonpower programs is covered largely by appropriation funding. Payments to the Treasury from power proceeds in 1986 are estimated at \$110,600 thousand—\$90,600 thousand as a dividend (return on the appropriation investment in the power program) and \$20,000 thousand as a reduction in the appropriation investment in the power program.

Outstanding borrowings for the power program are expected to increase by \$275,000 thousand during 1986.

Total assets are estimated to increase by \$845,480 thousand during 1986. A total of \$843,405 thousand of the increase in assets is in the power program and \$2,075 thousand is in nonpower programs. The estimate of liabilities at September 30, 1986, is \$383,235 thousand more than the estimate at September 30, 1985. Total Government equity at September 30, 1986, is estimated to be \$462,245 thousand greater than that at September 1985. This change includes the requested appropriation for 1986 and the net income from power operations, less payments to the Treasury and the net expense of non-power programs.

The United States Information Agency conducts the international communication, educational, cultural and exchange programs of the United States. The Agency advises the President, the National Security Council, and the Secretary of State on the above areas, and assists in the development and execution of a national policy on international communications.

Agency operations are largely financed from this appropriation and the related special foreign currency appropriation and consist of the following major elements:

**Overseas missions.**—The Agency plans to operate 214 posts in 129 countries in 1986. These posts administer the exchange-of-persons program and conduct informational and other cultural programs using materials prepared locally and by the media services in Washington.

**Voice of America.**—This activity produces radio broadcasts in English and in 41 languages. Programs are broadcast from transmitters at 5 domestic and 12 overseas locations.

**Educational and cultural affairs.**—This activity covers the staff that administers educational and cul-

tural exchanges between the United States and over 140 countries. It also provides program and support costs for the President's International Youth Exchange program, American-sponsored schools abroad, binational centers, U.S.-operated libraries and reading rooms abroad and other educational and cultural activities. Grant costs for the Academic and Visitor Exchanges, the Humphrey Fellowship program and the Private Sector Exchange program are funded separately in the Educational and Cultural Exchanges account.

**Program coordination, production, and support.**—This activity serves primarily to support overseas missions by coordinating program planning and by producing, acquiring, and adapting various program materials for their use.

**Television and film Service.**—This Service acquires and produces programs for distribution overseas and for direct telecasts via satellite.

**National Endowment for Democracy.**—In 1985, \$18,500 thousand was appropriated for this activity as part of the Salaries and expenses account. However, in 1984, funding was provided in a separate account. The 1986 budget proposes to reestablish a separate appropriation for the Endowment in 1986 as indicated below.

**Agency direction and management.**—This activity encompasses managerial staffs and centralized servicing functions for the Agency as a whole.

The 1986 request for this account will provide funds to cover added operating costs, principally overseas employee wage scales and inflationary increases for rents, utilities, diesel fuel, and other overseas goods and services. Additional increases will provide funds to expand and improve Voice of America broadcasts and engineering operations; to upgrade the technical facilities of the Television and Film Service; to expand the Agency's worldwide television broadcast system Worldnet; to increase overseas staffing to administer expanding exchange activities; and to enhance the Agency's research capabilities, training, book program, and other activities.

Beginning in 1986, new appropriations for these payments in excess of available balances

will be budgeted for in the Salaries and expenses account.

This appropriation provides funding for programs authorized by the Mutual Educational and Cultural Exchanges Act of 1961, as amended, including academic exchanges and grants for foreign leaders and professionals to make short-term visits to the United States. USIA operates a variety of cooperative exchange programs with the private sector. It also arranges special programs for selected foreign individuals and groups visiting the United States under other than U.S. Government sponsorship.

The Agency also manages other exchange related activities funded from the Agency's S&E appropriation, i.e.: international youth exchange, Board of Foreign Scholarships, student support, studies of the U.S. and libraries, reading rooms, cultural centers and related resources.

The staff costs to operate the exchange programs funded by this appropriation are included in the Agency's S&E account.

**Academic and visitor exchanges.**—This activity consists of academic exchange of American and foreign graduate students, teachers, scholars and specialists; officially invited international visitors as well as important foreign visitors who are not U.S. Government-sponsored; and a program sponsored jointly by the U.S. Congress and the Federal Republic of Germany's Bundestag, to exchange youth from the two countries for an academic year.

**Hubert H. Humphrey fellowships.**—This activity provides for one year of graduate training to promising mid-career professionals from third world countries.

**Private sector programs.**—This activity supports traditional and other exchange programs conducted by non-governmental organizations.

**Congress-Bundestag Exchange Program.**—This activity provides mutual full scholarships for year-long academic homestay programs between Germany and the United States. This project is co-funded with each country providing half of the necessary funds to support these exchanges.

The 1986 request will provide for cost increases and enhancements in the academic and visitor exchanges and Humphrey fellowships.

Note: New budget authority for this activity in 1985, totaling \$18,500 thousand, was earmarked in the Salaries and Expenses account.

The National Endowment for Democracy is a private, nonprofit corporation established in the District of Columbia to encourage and strengthen the development of democratic institutions and processes internationally, including activities which promote individual rights and freedom, through private sector initiatives, exchanges, training programs, and other activities.

The National Endowment for Democracy Act provides that the U.S. Information Agency will make an annual grant to the Endowment to enable the Endowment to fulfill the purposes of the Act. The Endowment does not carry out programs directly but provides fund-

ing for activities of the Free Trade Union Institute of the AFL-CIO, the National Chamber Foundation of the U.S. Chamber of Commerce (the Act earmarks funds for these two organizations), and other private organizations and groups. The 1986 estimates will enable the Endowment to enhance programs initiated during its initial years of operation and to develop new programs.

The Voice of America: Radio Marti Program was created by the Radio Broadcasting to Cuba Act (Public Law 98-111), signed by the President on October 4, 1983. The Radio Marti Program will broadcast 14.5 hours each day, seven days a week from studios in Washington, DC. The programs will be transmitted via the present Voice of America transmitter facility at Marathon, Florida.

The objectives of the Radio Marti Program are: (1) to support the right of the people of Cuba to seek, receive, and impart information and ideas through any media and regardless of frontiers; (2) to be effective in furthering the open communication of information and ideas through use of radio broadcasting to Cuba; (3) to serve as a consistently reliable and authoritative source of accurate, objective, and comprehensive news; and (4) to function in accordance with all Voice of America standards, and to broadcast programs which present a variety of views.

**Program operations.**—These funds provide for program operations which include personnel compensation, research, transmission costs and other programming requirements. In 1985, three domestic news bureaus will be opened in Miami, New York, and Los Angeles. The Radio Marti Program will go on the air in early calendar year 1985.

**Acquisition and construction of facilities.**—Upgrading of the Marathon transmitter site is now underway. This

upgrading includes purchase and installation of one 50 KW transmitter and upgraded generator and antenna systems. Construction of the permanent broadcast studios in Washington is scheduled to be completed by July 1985. Temporary broadcast studios in Washington and the existing equipment at Marathon can be used until the new facilities have been completed.

**Acquisition and construction of facilities.**—In fiscal year 1985, the Agency continued the multi-year effort of modernizing and expanding the technical transmission capability of the Voice of America (VOA). This effort responds to the recent reviews of the operations of U.S. Government funded radios, which found deficiencies in the VOA's capability to meet current public diplomacy objectives. To eliminate these deficiencies and provide an operationally effective global radio network that is a critical element of the public diplomacy programs of the Agency, VOA will continue to rehabilitate and modernize existing stations, expand selected operational sites, and construct additional new facilities. The 1986 appropriation, plus balances, will provide \$158,208 thousand for this program.

**Maintenance and improvement of existing facilities.**—This program will provide \$14,452 thousand for the continuing repairs and improvements required to maintain the VOA's existing global radio network.

**Advanced engineering and technical development.**—This category will provide \$500 thousand for the continuing program of engineering development, equipment design and radio propagation techniques specifically applicable to the VOA. It also will provide \$10,475

thousand to continue work on developing an automated worldwide monitoring system and the worldwide operations center, continue studies on worldwide technical transmission requirements, and purchase additional systems engineering technical assistance.

**Land rentals.**—This activity will provide \$517 thousand for land rental payments for certain VOA facilities overseas and in the United States.

USRA was created as a temporary agency in 1973 to oversee the formation of Conrail, monitor its performance, and act as a conduit for Federal assistance. These activities have been completed; Conrail is currently a profitable corporation operating without government subsidy. Nevertheless, in 1985, the Association will retain a staff of 35.

## General and special funds—Continued

## [ADMINISTRATIVE EXPENSES]—Continued

Congress has indicated that it desires to retain USRA to monitor the government's sale of Conrail. Such capability also exists in independent agencies such as GAO, ICC, and Conrail itself. In fact, these agencies, which are part of the USRA Board of Directors, have staff that regularly supplement the work of USRA. In addition, USRA has retained an investment banking firm to analyze the Conrail sale.

The Department of Transportation continues its efforts to sell Conrail. It is anticipated that the tasks of USRA (to be prepared to respond to congressional requests on Conrail) will be fulfilled by the end of 1985, and the agency will have no function in 1986.

<sup>1</sup> Conrail commuter transition costs were substituted for debentures.

These funds were provided for the U.S. Railway Association to purchase debentures and series A preferred stock issued by the Consolidated Rail Corporation.

The Association purchased \$1 billion in Conrail debentures prior to 1978. Since reaching the \$1 billion level, purchases of securities have been in the form of series A preferred stock. These purchases amounted to \$2,280 million at the end of 1984. However, full recovery of this investment is unlikely.

The Department of Transportation is currently trying to sell the Government's interest in Conrail, as mandated by the Northeast Rail Services Act of 1981.

The United States Railway Association is authorized by the Regional Rail Reorganization Act, as amended, to borrow funds and make loans to certain railroads. These borrowings are guaranteed by the Secretary of Transportation and are limited to an aggregate of outstanding obligations of \$395 million. Two types of loans are currently authorized: (a) loans related to the implementation of the system plan developed by the Association for restructuring the bankrupt railroads in the Northeast and Midwest, and (b) loans to defray obligations of the reorganized railroads which were incurred prior to the conveyance of their rail properties but which were unpaid after the conveyance to the Consolidated Rail Corporation on April 1, 1976. During 1984, the Association disposed of Penn Central Stock holdings and repaid \$16.9 million in loan principal. Additionally, \$37.2 million in loan principal and \$27.3 million in Accrued Interest was liquidated as a result of the Delaware and Hudson Railroad sale to Guilford Transportation Industries, Inc. No new loans will be made in 1986.

**Technical analysis and evaluation.**—Provides for generic studies and specific reviews of individual proposals for financial assistance.

**Administrative and management services.**—Provides for necessary administrative expenses, including compensation for all Corporation personnel and consultants, expenses for computer usage, for space needs of the Corporation and similar expenses.

**Financial assistance.**—Provides for drawdowns of loan guarantees, price guarantees and cost sharing arrangements to improve project cost estimates.

The Synthetic Fuels Corporation (SFC) is intended to assist private industry to finance the development of synthetic fuels from coal, oil shale and other energy resources. Private sector firms will plan, construct, operate and/or own the synthetic fuel plants, but will receive financial assistance from the Corporation in the form of purchase agreements, price guarantees, guaranteed loans and direct loans. The activities of the Corporation are required to be off-budget under current law, although all of the Federal funds are provided by the "Energy security reserve" account in the Department of the Treasury. Legislation will be proposed to include the Corporation's activities within the budget totals as shown here.

In 1984 the unused portion of funds previously committed to the Oil Shale Corp. became available to the Corporation. The Congress then enacted two rescissions, one for \$2,000,000,000 in the Deficit Reduction Act (Public Law 98-369) and the other for \$5,375,000,000 in the 1985 Continuing Resolution (Public Law 98-473). These rescissions affect the "Energy security reserve" account. The latter amount included: (1) Provision for a separate account to be established in the Treasury Department for a "Clean Coal Technology Reserve" in the amount of \$750,000,000; (2) a restriction on projects with Letters of Intent providing limited recoupment of funds for such projects not approved by the Board; and (3) elimination of the national synthetic fuel production goal originally included in the Act. Application of these legislated changes, the approval of one cost sharing agreement and two projects and the incurring of administrative expenses left \$7,894,000,000 available at the start of 1985.

**PART II**

**SUPPLEMENTALS AND RESCISSIONS**

---

---

II-1

## EXPLANATION OF REQUESTS

This part contains supplemental appropriations requests for 1985 being proposed for congressional consideration in this budget. Requests for supplemental appropriations are usually made after enactment of regular appropriations. In cases where programs are funded under a continuing resolution, some requests are included to supplement the funding available under the resolution. Information is also included on proposals to rescind budget authority and to rescind or otherwise reduce the availability of other budgetary resources.

### PROPOSED SUPPLEMENTAL REQUESTS

Supplemental requests are shown as separate sections.

*Section I.*—Supplementals proposed in this budget for various purposes other than increased pay costs are presented in this section and usually include: suggested appropriation language, the related budget schedules, and the reasons for the requests. In some cases, language is proposed to reduce mandatory program levels (entitlements, for example) included in authorizing legislation. In such cases, separate budget schedules are not shown, but the reduced funding levels that would result are reflected in the regular budget schedules for the account in Part I. Language is also included to

propose reductions in enacted direct loan and guaranteed loan limitations. A status of direct loans or status of guaranteed loans schedule will show the changes in credit activity resulting from the lower limitation.

*Section II.*—Requests for pay supplementals in this section are in the form of suggested appropriations language. The amounts contained in the appropriations language also appear as separate line entries in the regular program and financing schedules in Part I.

### RESCISSION PROPOSALS

*Section III.*—Under the provisions of the Impoundment Control Act of 1974 (Public Law 93-344), whenever the President proposes rescission of enacted appropriations, a special message must be sent to the Congress giving details of the proposal. Included in this part—for rescission proposals being made in conjunction with this budget—are related budget schedules, references to the special message being sent to the Congress, and explanations of the proposals. This part also includes rescissions proposed for certain categories (e.g., travel, consulting services, etc.) included in section 2901 of the Deficit Reduction Act of 1984 (Public Law 98-369).

74.40	Obligated balance, end of year		-91,232	-89,407
90.00	Outlays			1,825

This supplemental appropriation would provide funds to complete the second increase in resources of the Asian Development Fund (\$63 million) and to complete

the United States pledge to the first replenishment of the fund (\$28 million), that was originally due in 1979.

**INTERNATIONAL ORGANIZATIONS AND PROGRAMS**

(Supplemental now requested, existing legislation)

*Of the funds appropriated under this heading in the Foreign Assistance and Related Programs Appropriations Act, 1985 (as included in Public Law 98-473), \$20,500,000 shall be available for the International Atomic Energy Agency, \$4,689,000 shall be available for the United Nations Environment Program, and \$47,000 shall be available for the United Nations Institute for Training and Research.*

This proposed language would provide for an increase in funds for International Atomic Energy related activities in support of Administration efforts to strengthen the Non-Proliferation Treaty of 1968.

**AGENCY FOR INTERNATIONAL DEVELOPMENT**

**INTERNATIONAL DISASTER ASSISTANCE**

(Supplemental now requested, additional authorizing legislation required)

For an additional amount for "International disaster assistance", \$25,000,000, to remain available until expended.

2190	Unused balance of limitation, expiring.....		-167,000	.....

This reduction in the guaranteed loan limitation is part of an overall proposal to terminate the activity in this account. A rescission of budget authority is included elsewhere in Part II.

**INTERNATIONAL TRADE ADMINISTRATION****OPERATIONS AND ADMINISTRATION**

(Supplemental language now requested, existing legislation)

During fiscal year 1985, and within the resources and authority available, gross obligations for the principal amount of direct loans shall not exceed \$500,000 and total commitments to guarantee loans may be made only to the extent that the total loan principal, any part of which is to be guaranteed, shall not exceed \$6,667,000.

## NATIONAL OCEANIC AND ATMOSPHERIC ADMINISTRATION

### FISHERMEN'S CONTINGENCY FUND

(Supplemental now requested, existing legislation)

For an additional amount for "Fishermen's Contingency Fund", \$500,000, for carrying out the provisions of Title IV of Public Law 95-372, as amended, to be derived from receipts collected pursuant to that Act, to remain available until expended.

#### Program and Financing (in thousands of dollars)

Identification code	13-5120-1-2-376	1984 actual	1985 est.	1986 est.

<b>Relation of obligations to outlays:</b>				
71.00	Obligations incurred, net .....		500	
90.00	Outlays .....		500	

This proposed supplemental would provide funds to pay claims under Title IV of the Outer Continental Shelf Lands Act as amended. This increase would be covered by receipts collected pursuant to the Act and is necessary to carry out the provisions of Public Law 98-498, enacted October 19, 1984.

### FEDERAL SHIP FINANCING FUND, FISHING VESSELS

(Supplemental now requested, existing legislation)

For necessary expenses of the "Federal Ship Financing Fund, Fishing vessels", \$20,700,000, to remain available until expended together with such sums as may be necessary for the payment of interest, for payment to the Secretary of the Treasury for debt reduction.

#### Program and Financing (in thousands of dollars)

This proposed supplemental would eliminate the Treasury debt and the accrued interest incurred by the Federal Ship Financing Fund. The debt is the result of Treasury borrowings that were necessary to meet U.S. Government commitments under the Fisheries Obligation Guarantee Program.

## Department of Education OFFICE OF ELEMENTARY AND SECONDARY EDUCATION

### SCHOOL ASSISTANCE IN FEDERALLY AFFECTED AREAS

(Supplemental language now requested, existing legislation)

*Under the heading "School Assistance in Federally Affected Areas" in Public Law 98-619, delete the phrase which reads, "Provided further, That in determining entitlements under section 3 of the Act of September 30, 1950 (Public Law 874, Eighty-first Congress), the local contribution rate for each local educational agency shall not be less than the local contribution rate for that agency for fiscal year 1984 increased by the percentage increase (if any) in the national average per pupil expenditure for fiscal year 1984 from fiscal year 1983."*

This language would allow the Department's revised regulations governing the determination of local contribution rates to be implemented. The policy contained in these regulations is designed to phase out the unreasonable, inequitable rates possible under a former policy, which would be perpetuated under the 1985 enacted appropriations language.

## OFFICE OF SPECIAL EDUCATION AND REHABILITATIVE SERVICES

### EDUCATION FOR THE HANDICAPPED

(Supplemental language now requested, existing legislation)

*The \$61,000,000 appropriated in the Department of Education Appropriation Act, 1985, Public Law 98-619, for part D of the Education of the Handicapped Act shall be available for obligation on October 1, 1984, and shall remain available until September 30, 1985.*

This proposed language would change the period of availability for 1985 funds for part D projects to permit obligation for special education personnel development activities during the normal funding cycle for these projects.

## OFFICE OF POSTSECONDARY EDUCATION

### STUDENT FINANCIAL ASSISTANCE

(Supplemental language now requested, existing legislation)

*Under the heading "Student Financial Assistance" in Public Law 98-619, delete the phrase which reads, "Provided further, That not withstanding section 411(a)(2)(A)(i) and section 411(b)(5) of the Higher Education Act, the maximum grant a student may receive for the 1985-86 academic year shall be \$2,100;" and substitute the following: Provided further, That notwithstanding sections 411(a)(2)(A)(i), 411(a)(2)(B)(i), and 411(b)(5) of the Higher Education Act, the maximum grant a student may receive for the 1985-86 academic year shall be the lesser of \$2,000 or 50 per centum of the cost of attendance.*

The proposed language would change the Pell grant award rules so that the authorized funds would be adequate to finance the program under current estimates. If the language is not enacted by April 15, 1984, the Secretary will implement the provisions of section 411(b)(3)(B) of the Higher Education Act to reduce payments to the level of funds available. Use of section 411(b)(3)(B) would reduce the number of Pell grant re-

cipients by about 300,000 (primarily those otherwise eligible for an award of from \$200 to \$700) and reduce the amount of the grant for those eligible for an award of less than \$1,900.

#### GUARANTEED STUDENT LOANS

(Supplemental now requested, existing legislation)

For an additional amount for "Guaranteed student loans", \$664,846,000, to remain available until expended: *Provided, That notwithstanding section 438 of the Higher Education Act, the rate for the special allowance paid quarterly to holders on loans made for academic year 1985-86 which are eligible for interest benefit payments under section 428(a) of said Act shall be (1) three-eighths of one per centum while the loan is in in-school, grace, or deferment status and (2) three-fourths of one per centum while the loan is in in-repayment status: Provided further, That notwithstanding section 427A, the applicable interest rate to be charged over the life of the loan made for academic year 1985-86 under sections 427 or 428, for which a borrower is eligible to receive interest benefits, shall be established by the Secretary based on the average of the bond equivalent rates of 91-day United States Treasury bills auctioned during the quarter ending March 31, 1985, rounded to the nearest whole percent: Provided further, That notwithstanding sections 425(a)(1), 428(a)(8), and 428(i), all loans made for academic year 1985-86 pursuant to Part B, other than loans authorized under section 428B, shall be paid in multiple disbursements, as defined in regulation by the Secretary: Provided further, That notwithstanding section 428(a)(8), payments of interest benefits under section 428 and of special allowances under section 438 shall be calculated on the basis of loan funds actually disbursed, as determined by the Secretary: Provided further, That notwithstanding section 428(i), a guarantee agency shall not be authorized to act as an escrow or multiple disbursement agent: Provided further, That notwithstanding section 428(c) of said Act, the maximum amount that the Secretary shall reimburse any State, or nonprofit private institution or organization, in any year with respect to losses as a result of default on the unpaid balance of the principal and accrued interest of any loans made for academic year 1985-86 is ninety per centum of the amount expended by such entity in discharge of its insurance obligation, except that if the ratio of the cumulative net defaults, as defined by the Secretary, at the end of the prior year to the cumulative amount of such entity's reinsured loans that have entered repayment as of the end of the prior year exceeds five per centum, the reimbursement rate shall be reduced to seventy per centum, except that if the ratio is nine per centum or more, the reimbursement rate shall be reduced to fifty per centum.*

74.40	Obligated balance, end of year .....		-30,207	
90.00	Outlays .....		634,639	30,207

This supplemental request would provide funds to meet both additional 1984 program costs in excess of 1984 estimates (incurred in 1984 but carried over into 1985) and estimated 1985 mandatory interest subsidy costs in excess of amounts currently available. The request would not finance administrative cost allowances for loan commitments made after September 30, 1984, or advances for reserve funds based on loans entering repayment after September 30, 1983.

The supplemental language requests four program changes, to be effective for loans made for academic year 1985-86, that would (1) tailor lender subsidies to reflect lender costs more closely, (2) set regular loan borrower interest rates at the average of 91-day Treasury bill rates for the quarter ending March 31, 1985, rounded to the nearest whole percent, (3) require multiple disbursement of loans during the school year and pay subsidies on amounts actually disbursed, and (4) provide incentives for enhanced guarantee agency debt collection efforts by increasing agency cost-sharing.

#### HIGHER EDUCATION

(Reappropriation now requested, existing legislation)

*Of the funds appropriated in 1985 for Title III of the Higher Education Act of 1965, as amended, \$15,200,000 for the endowment grant program under section 333 shall remain available until expended.*

This proposed appropriation language would extend the availability of funds for the endowment grant program under Title III of the Higher Education Act. To ensure that 1985 funds intended to be used for the endowment grant program would continue to be available for this purpose in the event that eligible institutions are unable to match their Federal grants before the end of this fiscal year.

#### COLLEGE HOUSING LOANS

(Supplemental language now requested, existing legislation)

*Under the heading "College Housing Loans" in Public Law 98-619, delete the phrase which reads, "During fiscal year 1985 and within the resources and authority available, gross commitments for the principal*

## COLLEGE HOUSING LOANS—Continued

*amount of direct loans shall be \$40,000,000." and substitute the following: During fiscal year 1985, no new commitments for the principal amount of direct loans shall be made.*

This proposal would reduce the authority to spend from the Unemployment Trust Fund by \$37 million for trust fund authority to be added to the Employment Service (ES) grant program for program year 1985. The amended authorizing legislation provided a new distribution formula for grants to States which has resulted in grant amounts in some areas that are higher than amounts previously devoted to ES activities prior to the new formula. Management and program efficiencies achieved through the new grant mechanism should offset any inflation needs that States may experience. This proposal would also reduce by \$3.767 million the authority to spend from the Unemployment Trust Fund for ES retirement plan amortization in five States. The basic ES grant and management flexibility provided to States under Section 6 of the Wagner-Peyser Act as amended results in sufficient amounts to meet all retirement plan needs in the five States.

## RAIL SERVICE ASSISTANCE—Continued

This supplemental appropriation would pay debt owed to the Department of Treasury resulting from a default by the United States Railway Association on a loan made to the Delaware and Hudson railroad pursuant to section 211 of the Regional Rail Reorganization Act of 1973. Because Treasury lends these funds at the current interest rate, an appropriation is also requested to cover interest that is accruing each day until the notes are repaid.

## SETTLEMENTS OF RAILROAD LITIGATION

(Supplemental now requested, existing legislation)

For the settlement of promissary notes pursuant to section 210(f) of the Regional Rail Reorganization Act of 1973 (Public Law 93-236) as amended, \$4,223,000 to remain available until expended, together with such sums as may be necessary for the payment of interest due to the Secretary of Treasury under the terms and conditions of such notes.

This request would enable the Panama Canal Commission to comply with provisions of the Panama Canal Treaty of 1977 that require the payment of surplus

## OPERATIONS AND FACILITIES—Continued

Canal operating revenues to the Republic of Panama. The estimated 1984 surplus is subject to adjustment pending completion by the General Accounting Office of an audit of the financial statement of the Commission. By diplomatic note, the United States has agreed to make the required payment to Panama by April 30, 1985.

In addition, this request would permit the Commission to continue to replace equipment and facilities in line with its long-term goal of maintaining the Canal's facilities and improving the efficiency and safety of Canal transit service.

## RAILROAD RETIREMENT BOARD

## LIMITATION ON ADMINISTRATION

(Supplemental language now requested, existing legislation)

*The limitation on administrative expenses for "Limitation on Administration" contained in Public Law 98-619, shall be reduced to \$52,324,000.*

This proposed limitation reduction reflects reduced obligations primarily due to more accurate expenditure estimates for personnel compensation and benefits, as a result of fund lapses in 1983 and 1984, and other economies by the Board in a contribution to deficit reduction.

LIMITATION ON RAILROAD UNEMPLOYMENT INSURANCE  
ADMINISTRATION FUND

(Supplemental language now requested, existing legislation)

*The limitation on further administrative expenses for "Limitation on Railroad Unemployment Insurance Administration Fund", contained in Public Law 98-619, shall be reduced to \$16,176,000.*

This proposed limitation reduction reflects reduced obligations primarily due to more accurate expenditure estimates for personnel compensation and benefits, as a result of fund lapses in 1983 and 1984, and other economies by the Board in a contribution to deficit reduction.

In 1984 and 1985 the Congress provided funds to plan, design, and construct a number of research facilities. Included were eight facilities totaling \$37,900 thousand as follows:

**Fiscal year and Projects**

1985—South Central Small Farms Research Center.

1985—National Soil Tilth Center.

1985—Germplasm Collection Facility.

1985—Metabolism and Radiation Research Laboratory.

1984—South Central Agricultural Research Laboratory.

1984—Plant Stress and Soil Moisture Laboratory.

1984—Forage Seed Production and Research Center.

1984—Old West Regional Veterinary School.

These research centers would add at least 80 scientist years of research facility capacity to the Agricultural Research Service System even though the research facility system has been operating well below its capacity for years. The long-range annual operating costs for these facilities is estimated to be \$16 million.

This rescission is proposed to assure a more effective use of existing facilities; eliminate excessive Federal spending while reducing the budget deficit and further to resist efforts to construct unnecessary, new research facilities.

The construction of the Old West Veterinary School requires Regional cooperation and State matching funds. The attainment of these criteria is uncertain at this time and a rescission is proposed to eliminate federally appropriated funds.

In 1984, claims totaling \$12,000 were filed by farmers before the December 31, 1984 deadline. The \$100,000 provided by the 1985 appropriation address a problem which is of limited scope. Rescission of the remaining \$88,000 is proposed because of the need to reduce Federal spending. Authorizing legislation for the program will expire at the end of 1985.

<b>Relation of obligations to outlays:</b>

90.00	Outlays		-215,964	

This rescission proposal would reduce 1985 budget authority by the amount made available to reimburse the Rural Electrification and Telephone Revolving Fund for interest subsidies and losses incurred in 1983. This reimbursement to the Revolving Fund is not necessary since the fund's actual interest income exceeded its interest expense in 1983.

The Federal Government, however, incurred a loss of at least \$215 million in 1983 from REA loans because REA direct loan interest rates are below the cost of Government borrowing. An appropriation to reimburse

the Revolving Fund would continue a costly loan subsidy. The only way to cover this loss to the Government and the taxpayer is to raise REA direct loan interest rates to the cost of Government borrowing. This would be in accord with the original statute establishing the REA loan program, which set interest rates at and above Treasury cost of borrowing.

The 1985 appropriation for the Federal purchase of Bank stock is proposed for rescission. The Federal Government has already provided the \$300 million in capital called for in the original statute establishing the Bank. These funds only begin to be repaid starting in 1995. The Bank has the authority to raise funds in private credit markets on the \$300 million capital base provided by the Federal Government, and it is authorized to borrow without limitation from the U.S. Treasury at the same interest rate the Treasury pays, with 50-year repayment terms. Even without the capital proposed for rescission, the Bank would continue to be heavily subsidized with taxpayer dollars, and rural telephone borrowers would continue to enjoy low-cost money. The Bank's current lending rate is 9.5 percent. This proposal would not affect the Bank's lending levels or outlays, nor would it reduce the total budgetary resources available to the Bank.

Funds totaling \$18,750,000 for the Trade Adjustment Assistance (TAA) program are proposed for rescission. The TAA proposal would rescind congressionally provided funds for grants and loans to firms adversely affected by increased imports. The fact that a firm has been harmed by import competition should not in and of itself constitute justification for special government assistance. U.S. trade laws provide remedies against unfair import competition. In addition, high TAA default rates suggest that a large proportion of these loans and loan guarantees have not resulted in the intended adjustment.

This rescission is part of an overall proposal to reduce this program. Supplemental language reducing the direct and guaranteed loan programs is included elsewhere in Part II.

An additional rescission is proposed to effect savings in congressionally specified management categories pursuant to section 2901 of the Deficit Reduction Act of 1984, as explained at the beginning of this section.

Funds for the Magnet schools assistance and Excellence in education programs are proposed for rescission. The Administration continues to support the concept of magnet schools as an effective means to promote voluntary school desegregation. The Administration does not believe the Federal Government has a responsibility to finance local desegregation efforts in this way. Funds for Magnet school programs are available under the Chapter 2 Block grant program. The Excellence in education program would duplicate ongoing activities, funded with other discretionary resources, that recognize exemplary schools and practices.

Funds appropriated for Emergency immigrant education under the account Grants to schools with substantial numbers of immigrants are proposed for rescission in 1985. The children who need additional educational assistance who would be served by this program are also served by other programs because they are educationally disadvantaged, limited English proficient or because of their refugee status. The administration believes that services under other education programs, particularly chapters 1 and 2 of the Education Consolidation and Improvement Act of 1981, Title VII of the Elementary and Secondary Education Act, the Refugee Act of 1980 and the Refugee Education Assistance Act of 1980, are sufficient to ease the burden to school districts of educating these children.

In order to restrain Federal spending, rescissions are proposed for the following activities: academic facilities grants, national graduate fellowships, assistance to Guam, land grant endowments for American Samoa and Micronesia, special higher education projects authorized under title III of the Library Services and Construction Act of 1984, and the Robert A. Taft Institute of Government. The academic facilities program would duplicate support for research facilities and equipment currently provided by several other Federal agencies more qualified to assess national research and development needs. The national graduate fellowship program would duplicate support available through the National Science Foundation and the National Endowments for the Arts and the Humanities for individuals in the arts, humanities, and social sciences. Graduate students with financial need are also eligible for assistance under the Department's general student financial aid programs. The other activities, most of which are funded for the first time in 1985, are narrow in purpose and nonessential.

This proposal would rescind 1985 contract authority of \$30 million for land acquisition. This authority has not been used in recent years and has been rescinded by Congress for the last three fiscal years. Significant increases in the authorized level of the Land and Water Conservation Fund and the use of reprogramming procedures have eliminated the need for the authority.

An additional rescission is proposed to effect savings in congressionally specified management categories pursuant to section 2901 of the Deficit Reduction Act of 1984, as explained at the beginning of this section.

A program rescission of \$244,536,000 includes a \$100,000,000 reduction in the Job Training Partnership

Act (JTPA) summer youth employment and training program, a \$119,500,000 reduction in the JTPA dislocated worker assistance program and a \$25,036,000 reduction in Trade Act assistance program funding. Because sufficient unused carry over funds are available from prior years, no service reductions would occur in the summer and dislocated worker programs; persons eligible for Trade Act assistance will be served by the dislocated worker program.

An additional rescission is proposed to effect savings in congressionally specified management categories pursuant to section 2901 of the Deficit Reduction Act of 1984, as explained at the beginning of this section.

## OFF-BUDGET FEDERAL ENTITIES

Public Law 93-32 removed from the budget totals the governmental financing of rural electric and telephone systems administered by the Department of Agriculture. Legislation will be proposed to include these amounts within the budget totals. Budget schedules and statements on a comparable basis for 1984-1986 are provided in Part I under the Department of Agriculture, Rural Electrification Administration.

The Board of Governors of the Federal Reserve System provides calendar year data for its administrative budget for inclusion without further review. Budget schedules and statements are provided for information in Part V.

Public Law 97-35 established the SPR Petroleum account for the purpose of acquisition, transportation, and injection of petroleum products into the strategic petroleum reserve. The law specifies that account transactions shall not be included in the budget totals. Legislation will be proposed to include these amounts within the budget totals. Budget schedules and statements on a comparable basis for 1984-1986 are provided in Part I under the Department of Energy, Energy Activities.

The Federal Financing Bank was created by the Federal Financing Bank Act of 1973, which specifies that the receipts and disbursements of the Bank shall not be included in the budget totals. Legislation will be proposed to include these amounts within the budget totals, and budget schedules and statements on a comparable basis for 1984-1986 are provided in Part I under the Department of the Treasury, Federal Financing Bank Activities. For the 1986 budget, these activi-

ties will be included in the Treasury Department. However, the legislation will propose that they be charged to the agencies and accounts being serviced by the Bank.

The activities of the Postal Service, but not the Federal subsidy, were excluded from the budget totals in the past. Consistent with legislation to be proposed to move other off-budget Federal entities on-budget, all of the Postal Service activities are included in Part I under Other Independent Agencies.

The United States Railway Association, established by the Regional Rail Reorganization Act of 1973, is a Government corporation. Part of the financing activities of the Association was presented off-budget, while the administrative expenses of the Association and the purchase of Conrail securities were included on-budget in Part I. Legislation will be proposed to include all of the amounts for the Association within the budget totals, and budget schedules and statements on a comparable basis for 1984-1986 are provided in Part I under Other Independent Agencies.

The United States Synthetic Fuels Corporation was established by the United States Synthetic Fuels Act of 1980. The activities of the Corporation were off-budget, while all the Federal funds provided to the Corporation were included in the budget totals in the Department of the Treasury. Legislation will be proposed to include the activities of the Corporation within the budget totals. Budget schedules and statements on a comparable basis for 1984-1986 are provided in Part I under Other Independent Agencies.

## EXPLANATION OF OTHER MATERIALS

This section includes the following material:

(a) A list of advance appropriations, as required by the Congressional Budget Act of 1974 (31 U.S.C. 1105(17)), a list of appropriations with advance funding provisions, and a list of appropriations with forward funding provisions.

(b) A statement of amendments and revisions to 1985 budget authority requests that were transmitted to the

Congress after the 1985 Budget but prior to the transmittal of the 1986 Budget, as required by section 601 of the Congressional Budget Act of 1974.

(c) A statement of the amounts of appropriations requested for Offices of Inspectors General, as required by section 3 of the Federal Managers' Financial Integrity Act of 1982 (Public Law 97-255).

## ADVANCE APPROPRIATIONS, ADVANCE FUNDING, AND FORWARD FUNDING FOR 1986

*I. Advance appropriations* are provided for use in a fiscal year, or more, beyond the fiscal year for which the appropriation act is passed. Advance appropriations in 1986 appropriations bills will provide funding for programs beyond 1986. Since these appropriations are not available until after 1986, the amounts will not be included in 1986 budget totals, but will be reflected in the budget totals for the fiscal year requested.

The Congressional Budget Act of 1974 (31 U.S.C. 1105(17)) requires inclusion in the budget of "information on estimates of appropriations for the fiscal year following the fiscal year for which the budget is submitted for grants, contracts, and other payments under each program for which there is an authorization of appropriations for that following fiscal year when the appropriations are authorized to be included in an appropriation law for the fiscal year before the fiscal year in which the appropriation is to be available for obligation." In fulfillment of this requirement, the table below lists those accounts authorized to receive, in 1986, advance appropriations for 1987 and later years. The listing is in two parts: Part A shows the amounts of advance appropriations included in the 1986 budget. Part B is a listing of accounts for which advance appropriations are authorized but not requested in the 1986 budget.

**A. Accounts for which advance appropriations are included in the 1986 budget:**

**Department of Health and Human Services:<sup>1</sup>**

- Assistance payments program (42 U.S.C., sec. 601) \$2,193,754 thousand for 1987.
- Child support enforcement program (42 U.S.C., sec. 651) \$170,750 thousand for 1987.
- Supplemental security income program (42 U.S.C. sec. 1381) \$2,339,250 thousand for 1987.
- Special benefits for disabled coal miners (30 U.S.C., sec. 921) \$270,000 thousand for 1987.
- Grants to States for medicaid (42 U.S.C., sec. 1396) \$6,500,000 thousand for 1987.
- Corporation for Public Broadcasting: \$159,500 thousand for 1986; \$186,000 thousand request pending for 1987; \$214,000 thousand requested for 1988.

**B. Accounts authorized to receive advance appropriations but for which none are requested in the 1986 budget:**

**Department of Agriculture:**

- Food program administration (42 U.S.C., sec. 1752).
- Food donations program (Public Law 93-29, sec. 209).
- Child nutrition programs (42 U.S.C., sec. 1752).

**Department of Education. The following activities are authorized to receive advance appropriations (20 U.S.C. 1223 and 29 U.S.C. 703):**

- Compensatory education for the disadvantaged.
- Impact aid.
- Special programs.
- Indian education.
- Bilingual education.
- Education for the handicapped.
- Rehabilitation services and handicapped research.
- Vocational and adult education.
- Student financial assistance.
- Guaranteed student loans.
- Higher education.

- Higher education facilities loans and insurance.
- College housing loans.
- Educational research and statistics.
- Libraries.
- Special institutions.
- Education and research overseas (special foreign currency program).

**Department of Energy:**

- Fossil energy research and development (Public Law 98-146).

**Department of Health and Human Services:**

- Family social services (Public Law 96-272).
- Human development services (Public Law 97-35, sec. 657, Public Law 97-115, sec. 209).

<sup>1</sup> The accounts listed for the Department of Health and Human Services for which advance appropriations are requested for 1987 also are requesting advance funding (see section II).

*II. Advance funding* is authority provided in appropriations acts to obligate and disburse funds during a fiscal year from a succeeding year's appropriation. The funds so obligated increase the budget authority for the fiscal year in which obligated and reduce the budget authority of the succeeding fiscal year. Essentially, this is a device for avoiding supplemental requests late in the fiscal year for certain entitlement programs should the appropriations for the current year prove to be too low. The table below lists those accounts for which advance funding authority is requested in the 1986 budget.

**Department of Health and Human Services:**

- Grants to States for medicaid.
- Special benefits for disabled coal miners.
- Supplemental security income program.
- Assistance payments program.
- Child support enforcement program.

**Department of Labor:**

- Federal unemployment benefits and allowances.
- Special benefits.
- Black lung disability trust fund.

*III. Forward funding* is authority provided in an appropriations act to obligate funds in one fiscal year for the financing of ongoing programs of grantees during the succeeding fiscal year. The budget authority for such programs is included in the budget totals for the year in which it is appropriated. This device is often used for education programs, so that grants can be made prior to the start of the school year. The language providing forward funding for education programs will specify that amounts appropriated will not be available until some time into the year of the appropriation (e.g., July 1, 1986) and in most cases will specify that such amounts will remain available until the end of the succeeding fiscal year. The table below lists those accounts for which forward funding is requested in whole or in part in the 1986 budget.

**Department of Education:**

- Compensatory education for the disadvantaged.
- Special programs.
- Education for the handicapped.
- Vocational and adult education.

In the training and employment area, forward funding is provided in some accounts by providing appro-

priations for a program year which starts in the fiscal year of the appropriation and extends into the following fiscal year. Program years running from July 1 to June 30 are authorized for training programs under the Job Training Partnership Act, State Employment Service operations under section 6 of the Wagner-Peyser Act, and senior citizen employment programs under Title V

of the Older Americans Act. The table below lists those accounts for which such forward funding is requested in the 1986 budget.

Department of Labor:

Training and employment services.

Community service employment for older Americans.

State Unemployment Insurance and Employment Services Operations.

## STATEMENT OF AMENDMENTS TO AND REVISIONS IN BUDGET AUTHORITY FOR 1985

(Between the Transmittal of the 1985 and 1986 Budgets)

A statement of all amendments to or revisions in budget authority requested between transmittal of the 1985 budget and the 1986 budget is presented below. This statement is being included in the budget in accord with the Congressional Budget Act of 1974 (31 U.S.C. 1105(d)).

The modifications to requests for 1985 budget authority that were made through the course of the past year took three forms. If the Congress had not yet acted on a pending request, the President sent amendments to the budget requests transmitted in February 1984. If appropriations had been enacted, the President proposed

either supplemental budget authority or rescission of enacted appropriations.

Amendments and requests for supplemental appropriations are printed in the documents of the House of Representatives and the Senate that are identified in part A of the following listing. The President's proposals for rescission are included in special messages to the Congress under the Impoundment Control Act of 1974 (Public Law 93-344). Both the special messages and monthly cumulative reports on the items they cover are printed in the Federal Register.

## GOVERNMENT-SPONSORED ENTERPRISES

Part V contains detailed budgets and explanatory statements of certain Government-sponsored enterprises. All of these enterprises were established and chartered by the Federal Government and are sponsored by a Government agency, although they are privately owned and generally privately financed. These budgets are not reviewed by the President; they are presented as submitted by the enterprises. This section includes:

- The Student Loan Marketing Association (SLMA); a corporation to assist in financing college student loans. It is sponsored by the Department of Education.

V-2

- The Federal National Mortgage Association; a mortgage finance corporation supervised by the Department of Housing and Urban Development.
- The banks for cooperatives, Federal intermediate credit banks, and Federal land banks; supervised by the Farm Credit Administration.
- The Federal home loan banks and the Federal Home Loan Mortgage Corporation; supervised by the Federal Home Loan Bank Board.

The Board of Governors of the Federal Reserve System provides calendar year data for its administrative budget for inclusion without further review. The Board's budget schedules and statements are provided here for information.

<sup>1</sup> Amortization of discount on purchased loans.

The Student Loan Marketing Association (SLMA), a shareholder-owned corporation, was created by the Education Amendments of 1972 to expand funds available for student loans by providing liquidity to lenders engaged in the guaranteed student loan program.

The forecast data with respect to operations are based on certain specific assumptions by management, including the continued successful development, implementation, and financing of authorized programs. The board of directors has not yet reviewed or approved these financial estimates. Accordingly, such data should not be relied upon as an official forecast of the corporation's future business.

SLMA provides liquidity through direct purchase of insured student loans from eligible lenders and through warehousing advances, which are loans to lenders se-

cured by insured student loans or by Government or agency securities. SLMA is authorized, at the request of appropriate State and Federal officials, to make direct loans to students in capital shortage areas and to advance funds to States which will provide loans to students. Public Law 97-35 authorized SLMA to provide a secondary market for noninsured loans; to serve as a guarantee agency in support of loan availability at the request of the Secretary of Education; to purchase and underwrite student loan revenue bonds; and to provide such additional services as determined by its board of directors to be supportive of the credit needs of students generally.

SLMA is authorized by the Health Professions Educational Assistance Act of 1976 to provide a secondary market for federally insured loans to graduate health professions students.

Between November 1981 and October 1983, SLMA consolidated 31,805 loans worth \$389,668 thousand. On November 1, 1983, the authority to carry out this activity expired. Between 1980 and 1983, it was also authorized to make direct loans to borrowers for purposes of loan consolidation.

**Operations.**—At September 30, 1984, SLMA had \$4,034,299 thousand outstanding in warehousing advances. It is expected that volume will reach a level of \$4,438 million by September 30, 1985, with continued activity in 1986. SLMA expects to purchase \$1,638 million in loans in 1985 and have a net increase of \$594 million in 1986. At September 30, 1984, SLMA had entered into agreements to purchase during the next 167 months up to \$2,664 million insured student loans if such loans are offered for sale. At September 30, 1985, SLMA expects to have outstanding the same level of such agreements to purchase. At September 30, 1984, SLMA also had outstanding \$2,273 million in financing commitments; at September 30, 1985, it expects to have the same level of commitments outstanding.

**Financing.**—Between 1974 and early 1982, SLMA borrowed through the Federal Financing Bank. The Secretary of Education was authorized by the Education Amendments of 1980 to guarantee principal and interest on such obligations issued prior to October 1, 1984. Under an agreement with the Department of the Treasury reached in early 1981, Sallie Mae began borrowing directly in the private capital markets. Its last borrowing through the FFB occurred in January 1982. Its obligations today have certain characteristics, provided by Charter, which give them "agency" status, but they are not federally insured or guaranteed. As of September 30, 1984, SLMA had outstanding \$5,000,000 thou-

sand in long-term notes from the Federal Financing Bank, as well as \$4,998,423 thousand in nonguaranteed obligations. Nonguaranteed obligations included \$450,891 thousand in discount notes, \$1,673,985 thousand in short-term debt obligations and \$2,873,547 thousand in long-term debt obligations.

**Management.**—At its annual meeting in May 1984, the shareholders of SLMA elected a board of directors to serve until May 1985. The shareholders of SLMA are entitled to elect 14 members to the board. Pursuant to the Education Amendments of 1972, seven public directors were appointed by the President, who also names the chairman from among the 21 members.

The 1986 Budget proposes legislation that would impose on all Government-sponsored enterprises a fee on new securities issued after September 30, 1985. The purpose of this fee is to reimburse the Federal Government for the borrowing advantages these enterprises enjoy as a result of their special relationship with the Government. As part of this proposal, SLMA will be charged a fee of .05 percent (five basis points) on the outstanding balance of debt issued during 1986. This fee will be raised to .083 percent per year on the outstanding balance of debt issued in 1987 and beyond.

The Federal National Mortgage Association (Fannie Mae) is a Government-sponsored private corporation. Its purpose is to provide supplementary assistance to the secondary market for home mortgages by supplying a degree of liquidity for mortgage investments, thereby improving the distribution of investment capital available for home mortgage financing.

Fannie Mae purchases mortgages at market prices pursuant to commitments issued to sellers through a variety of programs. It finances these purchases primarily through the issuance of debt securities. Fannie Mae's debt instruments are characterized as "Agency Issues" in the securities market, but not in the Federal Government budget.

The common stock of the Corporation is owned by the public, is fully transferable and is listed on major stock exchanges.

The forecast data contained in this material has been developed based on certain general economic assumptions prevalent in December 1984 and should not be construed as an official forecast of the Corporation's position.

The Corporation has three separate authorities to borrow money from private sources. It may issue subordinated obligations. It may, in addition, borrow

amounts not in excess of the sum of net equity and subordinated obligations outstanding multiplied by a factor established by the Secretary of Housing and Urban Development. This factor is currently set at 30. These borrowings usually take the form of debentures and short-term discount notes. Finally, Fannie Mae may issue securities guaranteed by the Government National Mortgage Association which are fully backed by pools of mortgages. There is no statutory limitation on the amount of those obligations that may be outstanding.

According to accounting practices for private corporations, the mortgages in the pools of loans supporting the mortgage-backed securities are considered to be owned by the holders of these securities. Consequently, on the books of the Federal National Mortgage Association (Fannie Mae), these mortgages are not considered assets and the securities outstanding are not considered liabilities. However, the concepts of the budget of the U.S. Government consider these mortgages and mortgage-backed securities to be assets and liabilities, respectively, of Fannie Mae. For the purposes of this document, therefore, they are presented as assets and liabilities in the accompanying schedules. On the schedule of Status of direct loans for mortgage-backed securities, the items labeled "New loans" and "Recoveries: Repayments and prepayments" are budgetary terms. However, from the Corporation's perspective, these items are "Amounts issued" and "Amounts passed through to the holders of securities", respectively.

The forecast data contained in this material has been developed based on certain general economic assumptions prevalent in December 1984 and should not be construed as an official forecast of the Corporation's position.

The 13 banks for cooperatives are under the general supervision of the Farm Credit Administration. They finance the operations of farmers' cooperatives. The funds to finance these loans are obtained primarily from sales of bonds to the public and from their own capital funds. The bonds issued by the banks are not guaranteed by the U.S. Government either as to principal or interest. All of their expenses are paid from their own income and are not included in the budget of the United States. Included in these expenses is the banks' share of the costs of the Farm Credit Administration.

The Farm Credit Act of 1955 provided for eventual ownership of the banks by farmers' cooperatives and the retirement of the U.S. Government's investment. This was accomplished on December 31, 1968, when the remainder of the U.S. Government capital was retired.

The banks for cooperatives presently operate under authorities contained in title III of the Farm Credit Act of 1971, Public Law 92-180, as amended.

The 1986 Budget proposes legislation for charging all Government-sponsored enterprises a fee on new securities issued after September 30, 1985. The purpose of this fee is to reimburse the Federal Government for the privileges these enterprises enjoy as a result of their relationship with the Government. As part of this proposal, the Banks for Cooperatives will be charged a fee of .05 percent (five basis points) on the outstanding balance of debt issued during 1986. This fee will be raised to .083 percent per year on the outstanding balance of new debt issued in 1987 and beyond.

The 12 Federal intermediate credit banks are under the general supervision of the Farm Credit Administration. They serve as banks of discount for agriculture, discounting agricultural and livestock paper for, and making loans to local financing institutions such as production credit associations, agricultural credit corporations, livestock loan companies, and commercial banks. They also provide the production credit associations with necessary supervision and services.

The banks' lending funds are obtained primarily from the sale of bonds to the public and from their own capital funds. The bonds are not guaranteed by the U.S.

Government either as to principal or interest. All of their expenses are paid from their own income and are not included in the budget of the United States. Included in these expenses is the credit banks' share of the costs of the Farm Credit Administration.

The banks were originally wholly owned Government corporations set up exclusively as banks of discount; however, pursuant to the Farm Credit Act of 1956, the banks become mixed-ownership corporations and were made responsible for supervising the production credit associations and assisting them to make sound credit available to farmers.

All of the capital stock of the Federal intermediate credit banks, from organization in 1923 to December 31, 1956, was held by the U.S. Government. The 1956 act provided a long-range plan for the eventual ownership of the credit banks by the production credit associations and the gradual retirement of the Government's investment in the banks. This retirement was accomplished in full on December 31, 1968.

The Federal intermediate credit banks presently operate under authorities contained in title II of the Farm Credit Act of 1971, Public Law 92-181, as amended.

The Federal land banks, through the 438 Federal land bank associations, which are located at the local level, make long-term real estate loans to farmers and ranchers. These banks and associations are under the general supervision of the Farm Credit Administration. The funds to finance these loans are obtained primarily from the sale of the banks' bonds to the public and from their own capital funds. These bonds are not guaranteed by the U.S. Government either as to principal or interest. All of their expenses are paid from their income and are not included in the budget of the United States. Included in these expenses is the land banks' share of the costs of the Farm Credit Administration.

The last of the Government capital that had been invested in the banks was repaid in 1947.

The Federal land banks presently operate under authorities contained in title I of the Farm Credit Act of 1971, Public Law 92-181, as amended.

The 1986 Budget proposes legislation for charging all Government-sponsored enterprises a fee on new securities issued after September 30, 1985. The purpose of this fee is to reimburse the Federal Government for the privileges these enterprises enjoy as a result of their relationship with the Government. As part of this proposal, the Federal Land Banks will be charged a fee of .05 percent (five basis points) on the outstanding balance of debt issued during 1986. This fee will be raised to .083 percent per year on the outstanding balance of new debt issued in 1987 and beyond.

The 12 Federal Home Loan Banks are chartered and supervised by the Federal Home Loan Bank Board under the authority of the Federal Home Loan Bank Act of 1932. The banks are financial institutions whose main function is to supply their members—principally savings and loan-type institutions and savings banks—with credit to smooth their operations and enhance their service to the public as savings media and home-mortgage lenders. Each bank operates in a geographic district designated by the Board and together the banks cover all of the United States as well as Puerto Rico, the Virgin Islands, and Guam. In 1984, the banks extended credits of \$75.1 billion and received repayments of \$60.0 billion. Advances outstanding on September 30, 1984, totaled \$73.0 billion.

The principal source of funds for the lending operation is the sale of consolidated obligations of the banks to the public. On September 30, 1984, \$67.4 billion of these obligations were outstanding. The consolidated obligations are not guaranteed by the U.S. Government as to principal or interest. Other sources of lendable funds include a portion of members' deposits as determined by Board policy (total deposits were at \$15.0 billion on September 30, 1984) and funds paid for the purchase of capital stock by member institutions, amounting to \$6.9 billion at the end of 1984. Funds not immediately used for advances to members are invested until such times as needed.

The capital stock of the Federal home loan banks is owned entirely by the members. Initially the U.S. Government purchased stock of the banks in the amount of \$125 million. The banks had repurchased the Government's investment in full by mid-1951.

The entire operating expenses of the banks are paid from their own income and are not included in the budget of the United States. Included in these expenses is the assessment by the Federal Home Loan Bank Board to cover a portion of the Board's administrative and other costs.

The Federal Home Loan Mortgage Corporation (Freddie Mac) is a government-chartered corporation created under the Emergency Home Finance Act of 1970. Congress chartered Freddie Mac to provide mortgage lenders with an organized national secondary market into which they could sell originated conventional mortgage loans, so lenders can obtain needed funds to meet new demands for mortgages. Freddie Mac serves as a conduit to facilitate the flow of investment dollars from capital market investors to mortgage lenders, and ultimately to homebuyers in the form of available mortgage credit.

Freddie Mac is a publicly-chartered corporation beneficially owned by America's savings institutions through common stock held for them by the Federal Home Loan Banks. Freddie Mac is managed by a Board of Directors, the Federal Home Loan Bank Board, that is appointed by the President with consent of the Senate. All of Freddie Mac's expenses are paid from its own income, and no Federal budget authority or outlays have ever assisted in its mission.

After purchasing mortgage loans from individual mortgage lenders, Freddie Mac groups the mortgages into pools ranging from \$1 million to \$100 million in mortgage loans. Freddie Mac then packages these loans in the form of conventional mortgage pass-through securities, called "Mortgage Participation Certificates" (PCs). A PC represents an undivided ownership interest in a group or pool of residential mortgage loans as purchased by Freddie Mac. The timely payment of interest and full return of principal on the mortgages underlying PCs is guaranteed solely by Freddie Mac. This guarantee is backed by corporate reserves to cover

default losses on individual mortgages and not by the Federal Home Loan Bank System or the full faith and credit of the U.S. Government.

Freddie Mac offers lenders the opportunity to either sell their mortgages for cash or "swap" them for PCs. "Swap" PCs enable lenders to restructure their portfolios by offering these PCs directly to investors, using them as collateral for borrowing or retaining them for sale later. This provides lenders with greater liquidity when the need for more mortgage credit arises.

In 1983, Freddie Mac introduced its Collateralized Mortgage Obligation (CMO), a bond of several classes fully secured by a pool of mortgages, which added important investment incentives to mortgage-related securities. The new security's importance to mortgage finance was reflected in increased interest among non-traditional investors, such as pension funds. In Freddie Mac CMO issues, the cash flow from the principal payments on the mortgage collateral is directed serially to the successive classes of the bonds. The result is a multi-tiered maturity structure—short, intermediate and long—from which investors may choose. Freddie Mac issued \$1.7 billion in CMOs in 1983 and \$1.2 billion in 1984.

The forecast data contained in this material has been developed based on certain economic assumptions and estimates which are reviewed and revised periodically, and should not be construed as an official forecast of the corporation's position.

The 1986 Budget proposes legislation for charging all Government-sponsored enterprises a fee on new securities issued after September 30, 1985. The purpose of this fee is to reimburse the Federal Government for the privileges these enterprises enjoy as a result of their relationship with the Government. As part of this pro-

posal, Freddie Mac will be charged a fee of .05 percent (five basis points) on the outstanding balance of debt (including CMOs) issued during 1986. This fee will be raised to .083 percent per year on the outstanding balance of new debt issued in 1987 and beyond.

According to accounting practices for private corporations, the mortgages in the pools of loans supporting the mortgage-backed securities are considered to be owned by the holders of these securities. Consequently, on the books of Freddie Mac, these mortgages are not considered assets and the securities outstanding are not considered liabilities. However, the concepts of the budget of the United States Government consider these mortgages and mortgage-backed securities to be assets and liabilities, respectively, of Freddie Mac. For the purposes of this document, therefore, they are presented as assets and liabilities in the accompanying schedules. On the Status of Direct Loans schedule for mortgage-backed securities, the items labeled "New loans" and "Recoveries: Repayments and prepayments" are budgetary terms. However, from Freddie Mac's perspec-

tive, these amounts represent "Sales of PCs" and "Amounts passed through to PC holders," respectively.

The Federal Reserve System operates under the provisions of the Federal Reserve Act of 1913, as amended, and other acts of Congress.

**Program.**—To carry out its responsibilities under the act, the Board determines general monetary, credit, and operating policies for the System as a whole and formulates the rules and regulations necessary to carry out the purposes of the Federal Reserve Act. The Board's principal duties consist of exerting an influence over credit conditions and supervising the Federal Reserve banks and member banks.

**Financing.**—Under the provisions of section 10 of the Federal Reserve Act, the Board of Governors levies upon the Federal Reserve banks, in proportion to their capital and surplus, an assessment sufficient to pay its estimated expenses. The Board, under the act, determines and prescribes the manner in which its obligations are incurred and its expenses paid. Funds derived from assessments are deposited in the Federal Reserve Bank of Richmond, and the Act provides that such funds "shall not be construed to be Government funds or appropriated moneys." No Government appropriation is required to support operations of the Board.

The information presented pertains to Board operations only. Expenditures made on behalf of the Federal Reserve banks for production, issuance, retirement, and shipment of Federal Reserve notes are not included, since they are reimbursed in full by the Federal Reserve banks.
