BUDGET MESSAGE OF THE PRESIDENT

To the Congress of the United States:

I am transmitting my recommendations for the Budget of the United States for the fiscal year ending June 30, 1951.

This Budget is a statement of the financial program for the United States Government, under both existing laws and new legislation which I am recommending to the Congress. It is an expression, in financial terms, of the actions this Government can and should take at this time to build toward economic growth and the expansion of human freedom, in our own country and in the world.

For the fiscal year 1951, Budget expenditures under this financial program are estimated at 42.4 billion dollars, about 860 million dollars below estimated expenditures for the current year. Budget receipts under existing tax laws are estimated to be 37.3 billion dollars, a decrease of about 460 million dollars below the present year. The estimated Budget deficit for the fiscal year 1951 is thus 5.1 billion dollars under present tax laws, compared with an anticipated deficit of 5.5 billion dollars in the fiscal year 1950.

I shall shortly recommend to the Congress certain adjustments in our tax laws which will produce some net additional revenue in 1951, not reflected in this Budget. These adjustments will result in a larger revenue increase in subsequent years.

A reduction, greater than that in expenditures, has been made in the requests for new appropriations and other obligational authority in 1951. Expenditures occur when the Government pays its obligations, and the Congress grants authority to incur obligations when it enacts appropriations, contract authorizations, and authorizations to borrow from the Treasury. The authority to incur new obligations which I am recommending for the fiscal year 1951 totals 40.5 billion dollars, considerably below the 1950 level. This fact is significant as an indication that the downward trend in expenditures from 1950 to 1951 may be expected to continue.

BUDGET TOTALS
[Fiscal years. In millions]

	1949 actual	1950 estimated	1951 estimated
Receipts.....	\$38,246	\$37,763	\$37,306
Expenditures.....	40,057	43,297	42,439
Deficit.....	-1,811	-5,534	-5,133

NOTE.—Estimated receipts exclude new tax proposals.

This financial program provides a sound basis on which to proceed. It will properly support the extraordinary responsibilities of the Federal Government, both at home and abroad, and at the same time meet our obligation to pursue a policy of financial prudence and restraint. Such a policy must be directed at producing a surplus as soon as possible under favorable economic conditions. The reductions in expenditures, which I recommend, can be achieved and still permit our Government to carry on its necessary operations effectively. The moderate increase in revenue, which I shall recommend in conjunction with specific tax reforms, can be achieved without impairing continued economic progress.

In preparing this Budget, I have carefully evaluated the possible alternatives in the light of the realities of our present situation. The soundness of a fiscal program cannot properly be judged simply by the year-to-year change in the expected margin between receipts and expenditures. A prudent program must meet much broader tests, if it is to serve the long-range interests of our people.

The soundness of a fiscal program must first of all be judged by whether it allows the people, through their Government, to meet the demands which the foreign and domestic situations put upon them. The necessary functions of the Government in our complex society are varied and widespread. They require large expenditures but they are vital to our security, to the protection of our liberties, to continued social and economic progress, and to the welfare of our people. I have reviewed the expenditure programs in the Budget, one by one, and found them necessary to achieve these purposes. I am confident that the Congress will come to essentially the same conclusion.

The soundness of the Government's fiscal program must also be judged by its impact on the economy. The Federal Budget is a substantial part of the total flow of incomes and expenditures in our country each year. Federal receipts and expenditures must both be planned to encourage the prosperity of the economy and keep it healthy and growing. Irresponsible and short-sighted budgetary action could contribute to a worsening of the world situation and to a decline in production and employment in the United States. Under either of these circumstances, we would find ourselves faced by the necessity of Budget outlays much larger than those I am proposing, while the prospect for increased revenues would be much less encouraging. I am convinced that the recommendations I am making, both for expenditures and for revenues, will contribute to continued economic development.

The soundness of a fiscal program must be judged, finally, in the light of where that program will take us over a period of years. This

is partly a matter of necessity: most Government programs are based on a time schedule extending over a number of years, and a large part of the Budget in any one year represents binding commitments to spend established in previous years on the one hand, and tax liabilities already incurred on the other. It is primarily a matter of wisdom: sharp and arbitrary changes in Government programs, even where feasible, involve economic loss and dislocations, and may cause serious damage to parts of the economy. I am confident that the fiscal recommendations provide a solid basis for moving toward budgetary balance in the next few years. My confidence is based on three main considerations.

First, it has been possible to reduce anticipated expenditures for the fiscal year 1951 by close to 1 billion dollars below the estimated level for 1950, and an even greater reduction has been made in the request for new obligational authority. Thus, the policies followed in preparing this Budget will permit further reductions in subsequent years. Specifically, the largest item in the Budget, national defense expenditures, is expected to approximate the 1951 level in the next few years; and the costs of our foreign aid and veterans' programs should continue the decline already expected between 1950 and 1951. It should also be possible in future years to reduce the cost of programs which have helped to meet the postwar transition problems of specific major areas of our economy, notably the support of agricultural prices and the creation of an adequate secondary market for housing mortgages. Finally, if the Congress enacts the proposed increase in postal rates, the burden of the postal deficit on recent Budgets will be largely eliminated.

The programs mentioned above constitute the bulk of the Federal Budget. With respect to other programs, relating primarily to domestic activities, Federal responsibilities will increase as the Nation grows. But the additional budgetary requirements for these programs, under a prudent fiscal policy, should be substantially less than the decline to be expected in the extraordinary postwar programs. In this connection it should be emphasized that the urgently needed insurance measures which are recommended in the fields of unemployment compensation, old-age security, and medical care will be primarily financed by special taxes designed to defray their costs.

Thus, assuming continued favorable economic and international developments, it is possible to plan on further reductions in total expenditures after 1951.

The second major consideration supporting my confidence in this fiscal program is the fact that our economy is a dynamic and growing one. Each year our population and the productivity of our labor force

rise, and our total national output must rise also if we are to fulfill our obligation to maintain high employment. As our economy grows, tax revenues will grow also. The effects of this growth are not fully reflected in the receipts estimates for 1951, because the temporary decline in incomes during this past year will affect some tax yields in 1951.

Federal expenditures are themselves of fundamental importance to our prospects for steady economic growth. Programs for such purposes as national defense and international recovery are essential to maintain a favorable international situation. In addition, many Federal expenditures constitute direct supports for important sectors of our economy, or direct investments in assets such as power facilities or in better education and other services, which add to the productive capacity of the Nation. Thus this Budget is not only consistent with an expanding economy, but will make a substantial contribution to that objective.

In analyzing the economic impact of Federal financial operations on our economy, increasing attention is also being paid to the aggregate of Federal cash transactions with the public, which are not fully reflected in the totals of Budget expenditures and receipts. Primarily important is the fact that, as long as the social insurance trust funds are building reserves to cover liabilities in future years, they show a substantial excess of receipts over payments. Therefore, the current economic impact of Federal financial activities, as reflected in the net difference between all cash receipts from and all cash payments to the public, is usually different from that indicated by the Budget surplus or deficit. In 1951, for example, the excess of cash payments over receipts is estimated at 2.7 billion dollars, 2.4 billion dollars less than the estimated Budget deficit. Continuing improvement in our fiscal position, which our present plans should achieve, will therefore probably result in an excess of total cash income over cash outgo before the Budget will show a surplus. This aspect of our over-all fiscal position is important in supporting the basic economic soundness of the fiscal program, although it does not lessen the need for the greatest possible prudence in the conduct of our financial operations as reflected in the Budget, which is the proper instrument of Executive and Legislative control.

The third major consideration supporting the soundness of this fiscal program is the fact that the tax recommendations which I shall transmit to the Congress will both improve our tax structure and place us in a better position to meet our continuing fiscal requirements. It is highly important that we begin to make the basic changes in the tax system which are needed to make it more equitable and to

provide better incentives for producing the amounts and types of investment, consumption, and savings which will contribute to an expanding economy. The large and badly devised tax reduction of 1948 sharply limits the extent to which we can make changes at the present time. Nevertheless, we can and should make now some of the changes which are needed in our tax laws, and bring nearer the time when the Budget can be balanced. Because of the time lag in tax collections after changes in the law, and the fact that some of the changes will result in an immediate loss in revenue, the tax recommendations which I shall submit to the Congress will produce less additional revenue in 1951 than in subsequent years, when the changes will be fully effective.

For all these reasons, the financial program which I am recommending represents a sound, long-range basis on which to plan our governmental operations at this time. It is directed at achieving a budgetary balance in the only way in which it can be achieved—by measures which support rather than impair the continued growth of our country. It is based on expenditure plans which can be sustained in the years following 1951 without embarrassment to our fiscal position. Its accomplishment does, however, depend upon our continued self-control in holding expenditure programs to no more than necessary levels.

As in all recent years, the Budget for 1951 is dominated by financial requirements to pay the costs of past wars and to achieve a peaceful world. Estimated expenditures for these purposes are 30 billion dollars, or about 71 percent of the total Budget. This is a reduction of 1.8 billion dollars from estimated expenditures for the same purposes in 1950. National defense and international programs, designed to insure our security and to create the economic and political conditions necessary for world peace, will require about 18 billion dollars. Veterans' programs and interest on the public debt, commitments arising mainly from the last war, will require about 12 billion dollars.

Our unprecedentedly large expenditures in recent years for international programs have been undertaken to assist free peoples to recover from the devastation of the war and to restore their capacity for future growth both in material things and in the practice of democratic principles. These programs are proving to be an investment paying dividends, far beyond their cost, in enhancing our own security and in providing a basis for world peace and prosperity. The job is not yet done, the goals are not yet reached; but the progress so far achieved makes possible in 1951 a substantial reduction in the dollar costs of these programs. Total expenditures for international affairs and finance are estimated at 4.7 billion dollars, a reduction of 1.3 billion

dollars from 1950. This amount reflects the minimum requirements for these programs, and their success to date emphasizes the compelling need to carry them through on the planned basis.

As progress is made toward achieving the short-range objectives of recovery and relief, two other international activities assume increasing importance. First, I am renewing the recommendation for a program of technical and capital assistance to underdeveloped countries. The Budget expenditures in 1951 will be relatively small but they represent a step of great significance in the encouragement of world economic expansion and the growth of world trade, which are essential to our national prosperity. Second, I am recommending additional funds in 1951 for the mutual defense assistance program, authorized by the Congress last year, and now getting under way. This program is a necessary supplement to economic growth as a bulwark against aggression, and is an integral part of the cooperative effort to assure the continued independence of free nations.

Expenditures for national defense must be sufficient to provide us with the balanced military strength we must maintain in the present world situation, at a level which can be sustained over a period of years. In 1951, expenditures for national defense are estimated at 13.5 billion dollars, an increase of about 400 million dollars over 1950. The present level of expenditures is substantially less than was anticipated a year ago, and is the result of careful Budget planning and vigorous administrative action.

Expenditures for veterans' services and benefits are estimated at 6.1 billion dollars in 1951, a decline of 825 million dollars from 1950. Our veterans' programs represent commitments which the Government has made to those who have served in its armed forces, and these commitments must be met. While that part which represents pensions, medical care, and similar services will continue to rise gradually, the program of readjustment benefits was intended to be transitional, and we should plan on a continued reduction in its cost during the next few years.

Interest on the public debt is estimated at 5.6 billion dollars in 1951, slightly lower than in 1950. This is, of course, a fixed commitment of the Government, and represents predominantly the cost of financing the last war.

All expenditures, other than those for international, national defense, and veterans' programs, and interest on the debt, total 12.5 billion dollars, about 29 percent of the total Budget. This is an increase of about 1 billion dollars from estimated expenditures for these purposes in 1950. They include many important activities such as the Atomic Energy Commission and the Maritime Commission, which are

closely related to our national security. Furthermore, they represent those positive functions which Government must fulfill if we are to have a healthy and growing economy. Federal expenditures for these purposes in 1951 are expected to constitute a substantially lower percentage of the total national income than the corresponding percentage in 1939.

The 12.5 billion dollars which this Budget provides for these domestic programs, viewed item by item, reflects—and has been generally recognized by the Congress to reflect—the necessary contributions of the Federal Government in our modern economy. The major question in my mind is not whether we are doing too much, but whether the budgetary requirements of the major national security and war-connected programs have constrained us to undertake too little toward supporting and stimulating the realization of our country's great potential development. It must be recognized that failure to support essential Federal activities would impede the continued expansion upon which the well-being of our economy and the soundness of the Government's fiscal position alike depend.

Expenditures in this Budget, designed to assist economic development in the categories of housing and community development, agriculture, natural resources, transportation and communication, finance, commerce, and industry, and labor, together amount to 7.9 billion dollars, 19 percent of total estimated expenditures.

We must push ahead, for example, with atomic energy development, and the Budget provides 817 million dollars for this purpose. We must maintain and develop adequate aviation facilities and services, for which 230 million dollars is included. The Federal Government should continue to assist States in developing an adequate national highway system; Federal expenditures for this purpose are estimated at 507 million dollars in 1951. The development of our rivers for flood control, navigation, reclamation, power, and other uses is of fundamental importance for economic growth, and is largely a Federal responsibility, for which this Budget includes 1.4 billion dollars. The Government is substantially aiding private industry and local communities in producing more and better housing at prices people can afford; 1.3 billion dollars is included for these purposes. Over 800 million dollars is provided to further the conservation of farm lands and to make loans for extending electricity to farms.

There is one aspect of these expenditures which has properly received widespread attention by the Congress and the public as having an important bearing on the long-run fiscal position of the Government. Many expenditures represent the acquisition of assets which are recoverable or will give continuing returns in future years, and

which in normal business accounting would not usually be considered as current expense. It is estimated that in the 1951 Budget such expenditures, excluding military public works and equipment, amount to about 5.6 billion dollars, of which about 4 billion dollars is anticipated to be in the recoverable category. In the case of the Federal Government, in contrast to private business, these investment expenditures cannot properly be financed differently from other items in the Budget. But their size and nature are important in evaluating the strength of our fiscal position. A special analysis of the nature and extent of investment expenditures is included in part III of the Budget this year for the first time.

Economic growth must be matched by comparable development in the social well-being and living standards of all our people. Continued progress depends in large part upon the increasing fulfillment of the responsibilities of Government in such fields as social welfare, education, and public health. In addition to the transfer of 594 million dollars of pay-roll taxes to the railroad retirement trust fund, the Budget proposes total funds of 2.1 billion dollars for social welfare, health, and security, and 434 million dollars for education and general research, about one-sixteenth of total Federal expenditures. These, too, are investments in the future of our country. Over 80 percent of these funds is for grants to States and localities.

The remaining programs, classified under general government, are estimated to cost 1.3 billion dollars. These funds provide for over-all legislative, judicial, and executive operations of the Government, and for various central services such as the maintenance of public buildings. Included in this total are 424 million dollars for tax collection and other financial operations, and 333 million dollars for the Government's payment to the civil service retirement fund.

The detailed activities of Government agencies in all fields have been closely reviewed to eliminate all but the minimum operations required. This has made necessary the denial of request after request for additional funds which—taken by themselves and in the judgment of particular groups affected—are highly meritorious. The progress made in this Budget in reversing the trend toward higher expenditures and in achieving a substantial reduction has been made possible only by the most vigorous application, in every area, of a policy of holding the numerous activities to essential levels.

In a very few cases—mainly middle-income housing—the exigencies of particular situations justify the recommendation of limited new domestic programs. In addition, I am renewing proposals previously made for aid to education and expanded public assistance, primarily in the form of grants to States, and for the enactment of certain social

insurance legislation which would be financed primarily by special taxes. Beyond this, however, I am recommending no new programs which would require large expenditures in future years, above the amounts included in this Budget. In the case of existing programs, while vigorous effort is being devoted to improving their efficiency, they must in the public interest be given sufficient funds to allow effective operation.

The rise from 2.5 billion dollars in 1950 to 3.1 billion dollars in 1951 in estimated civil public works expenditures, including grants and loans, reflects almost entirely the minimum requirements of projects and programs now under way. With respect to Federal public works in such fields as reclamation, flood control, and rivers and harbors, this Budget does not provide for starting any new projects, despite the pressures that exist for initiating construction of a large number of additional projects which are already authorized. Federal grants to States for public works have also been generally limited to the necessary costs required to carry forward continuing construction programs, primarily those for highways, airports, and hospitals.

Our policies with respect to expenditures must of course remain flexible to meet shifts in international or economic conditions. The policies I have outlined represent the sound and necessary basis for Budget programs in the light of the outlook at this time.

MANAGEMENT IMPROVEMENT PROGRAM

The past year has been one of outstanding achievement in improving the organization and operating methods of the executive branch. This is an important fact to note in the Budget Message as the accomplishment of better management in Government is essential to the fulfillment of our established fiscal goals. It is also a responsibility to which every official must give increased attention if the public is to receive a full return on its tax dollar. Action has been taken on many fronts. To cite but a few: the Department of State has been reorganized; improved operating methods have been installed in the Treasury Department; further progress toward unification has been made with the creation of a Department of Defense; central service functions of the Government have been reorganized in the General Services Administration; significant reorganizations have occurred in the Post Office Department, the Department of Commerce, and the Civil Service Commission.

In cooperation with the Congress, I intend to continue a vigorous program to achieve further improvements in governmental management.

One phase of this program requires the enactment of legislation and the approval of reorganization plans. During the coming year I recommend that the Congress enact basic personnel legislation to make possible further improvements in the way the Government recruits, trains, and supervises its employees. I also recommend that the Congress take action to allow the Post Office to maintain its own accounts and conduct its financial affairs on a businesslike basis and to permit appointment of postmasters by the Postmaster General.

During the session I shall transmit to the Congress a number of reorganization plans. The objective of these plans will be the establishment of clear lines of responsibility and authority for the management of Government activities and the more effective grouping of Government programs within departments and agencies.

A second phase of the management improvement program includes Government-wide activities in which all agencies participate. Major undertakings in this area are the installation of more efficient property and records management practices under the leadership of the General Services Administration; strengthening of personnel management activities under the leadership of the Civil Service Commission; and institution, under the sponsorship of the Bureau of the Budget, of systematic review by all agencies of operating effectiveness and economy as required by the Classification Act of 1949. In addition, more modern accounting practices are being installed throughout the Government under the guidance of a joint committee consisting of the Secretary of the Treasury, the Comptroller General, and the Director of the Budget.

In the field of programing and budgeting, the progress made toward presentation of this 1951 Budget on a "performance" basis is an example of results stemming from the improvement program. An examination of the body of this document will indicate a substantial change from that of previous years. The activities for which funds are recommended are described so that the Congress and the citizens may see more clearly the relationship between the activities to be performed and the costs of those activities. Future Budget documents will include additional improvements. Some of these will reflect current efforts both to strengthen and simplify Government accounting and to develop better measures of work performance. Others will provide additional kinds of analyses to enable examination and understanding of the Budget from different standpoints.

The third aspect of the management improvement program is the work being done by individual departments and agencies. I have instructed each department and agency head to inaugurate an aggressive program of management improvement in his department. These

departmental programs have been reviewed in terms of their relation to financial requirements and their contribution to the solution of known problems. I will announce shortly certain areas to which priority will be given in the management improvement work of the executive branch during the year 1950. The special fund for management improvement which was authorized by the Congress last year will be utilized to carry out some of the specific projects. In following through to secure results from this entire program I will have the assistance and advice of my Advisory Committee on Management Improvement.

Under our Federal form of government, many public services are the common concern of Federal, State, and local government. Continuing attention needs to be given by all levels of government to the problems arising from the interrelations of our tax systems and the administration of common governmental functions. Federal and State and local officials are currently studying the possibilities of further cooperative arrangements in tax administration in order to reduce costs and improve coordination. We are also cooperating in developing legislative proposals to deal with several current problems of mutual concern: provision of certain local services to Federal personnel, application of local taxes to personnel and transactions on Federal reservations, and the establishment of a general system of payments to State and local governments whose property-tax base has been reduced by Federal acquisitions of real estate.

The reports of the Commission on Organization of the Executive Branch of the Government have provided the framework for much of the improved organization and management which has been achieved and which I hope to achieve during the coming year. While work has been started in a number of the areas containing the greatest potential for economy and improved operations, many further legislative and administrative actions are needed. It should be realized that the greater effectiveness and economy and better service to the public, which come from improved management, are the cumulative result of a great many individual actions. Realization of those goals requires the coordinated and unrelenting efforts of all Federal officials and employees. We must continue to emphasize the achievement of better management as an important part of the job of public service in which the Congress and the executive branch are engaged.

BUDGET RECEIPTS

Budget receipts in the fiscal year 1951 are estimated at 37.3 billion dollars under existing tax legislation, 457 million dollars below the estimate for the current year. Decreased collections from corpora-

tion income taxes account for the principal decline in receipts between the 2 years, reflecting the fact that the reduction in corporate profits from the calendar year 1948 peak does not have its full effect on tax receipts until the fiscal year 1951. The estimates of receipts assume economic activity at approximately the same level as at the present time.

I will shortly transmit to the Congress my recommendations for changes in our tax laws to provide a more balanced and equitable tax structure and to increase Federal revenues. The net increase in revenues during 1951 will be substantially smaller than in subsequent years, owing to the time required for some of the changes to become fully effective.

NOT E.—Estimated receipts for 1951 exclude new tax proposals, except for recommended changes in employment taxes and miscellaneous receipts.

Direct taxes on individuals.—Receipts from the income tax on individuals exceed those from any other tax. The total of 18.9 billion dollars estimated for 1951 for direct taxes on individuals is practically

unchanged from the 1950 total, and reflects continued high levels of employment and income.

Direct taxes on corporations.—The fiscal year 1951 estimate of receipts from taxes on corporations is 10.5 billion dollars. During the fiscal year 1951 corporations will pay income tax on the profits earned during the calendar years 1949 and 1950. The decline in profits from the peak level of 1948 will therefore adversely affect these receipts for the fiscal year 1951.

Excises and customs.—Under present laws very little change is anticipated in collections of excise taxes and customs.

Employment taxes.—The tax rate for old-age and survivors insurance was increased from 1 to 1½ percent on the first of this month; hence the receipts estimate for 1950 includes taxes based upon both the old rate and the new. Receipts for 1951 under existing legislation represent a full year's collection at the new higher rate.

I have recommended expansion and improvement of the old-age and survivors insurance system and a new program of medical care insurance. It is estimated that the additional taxes to be collected for these programs will amount to 1.4 billion dollars in 1951. Since these sums will be transferred immediately to trust accounts, Budget receipts will not be increased.

Miscellaneous receipts.—Miscellaneous receipts have been declining steadily since 1947, primarily because of the drop in sales of surplus property originally acquired for war purposes. During 1951 receipts from surplus property will be only about 0.1 billion dollars compared to the peak of 2.9 billion dollars in 1947.

There are other decreases in the estimates of miscellaneous receipts which are in the nature of changes in reporting. Certain receipts, notably of the Farmers' Home Administration and of the public housing program, were formerly deposited into miscellaneous receipts, but are now deducted from the expenditures of the programs involved. These changes, of course, have no effect on the surplus or deficit.

The estimate of miscellaneous receipts for 1951 reflects my recommendation that legislation be enacted to permit the acceleration of capital repayment by the Federal home loan banks. An increase in patent fees is also necessary to make the Patent Office more nearly self-supporting.

Refunds of receipts.—Refunds for 1951 are estimated at about the same level as for the current year, 0.7 billion dollars less than in 1949.

The decline is the result of the fact that 1949 refunds were unusually high because of the retroactive features of the Revenue Act of 1948.

PUBLIC DEBT

The public debt amounted to 252.8 billion dollars on June 30, 1949. Estimated Budget deficits of 5.5 billion dollars in the fiscal year 1950 and 5.1 billion dollars in the fiscal year 1951, together with certain minor adjustments, will cause the debt to increase to 263.8 billion dollars by the end of 1951. In 1951, about 2.5 billion dollars of the increase in the debt will be financed by new investments in Federal securities by trust accounts and other Government agencies.

BUDGET EXPENDITURES AND AUTHORIZATIONS

A summary of Budget expenditures according to the broad programs or functions for which the money is spent is set forth in the table below. This table includes all expenditures from the general and special funds of the Treasury and the net expenditures of wholly owned Government corporations. Expenditures from the trust funds are excluded.

BUDGET EXPENDITURES AND AUTHORIZATIONS BY MAJOR FUNCTION

[Fiscal years. In millions]

Function	Expenditures			New obligational authority for 1951

¹ In addition, \$51 million dollars of reserved 1950 contract authorizations and 22 million dollars of 1950 appropriations will be available for 1951 programs.

¹ This Budget also includes 4,514 million dollars of appropriations to liquidate prior year contract authorizations.

All expenditures flow from obligational authority enacted by the Congress. The net new appropriations and other authorizations recommended for the fiscal year 1951 total 40.5 billion dollars. Of this total, 33.1 billion dollars is now formally recommended for action by the Congress, while 7.4 billion dollars is tentatively estimated for later submission. In addition, this Budget includes appropriations of 4.5 billion dollars to liquidate obligations incurred under prior year contract authorizations, more than half in programs for the national defense.

Since contracts with industry must be let well ahead of deliveries, a considerable lead time is required for the economical operation of many Government programs. This is especially true for public works and military procurement. Financial obligations incurred in prior years, therefore, will have already fixed a substantial part of the estimated Budget expenditures for 1951. Of the total Budget expenditures of 42.4 billion dollars estimated for 1951, about 12.1 billion dollars, 29 percent, will be payments for obligations incurred in 1950 or in earlier years; the remainder will be for 1951 obligations.

Net new appropriations recommended for 1951 are 1.6 billion dollars less than those estimated for 1950. They represent total appropriations (including permanent appropriations) less those to be used to liquidate prior year contract authorizations. New contract authorizations (which will require later appropriations to liquidate) totaling 3.4 billion dollars are also included in this Budget, also about 1.6 billion dollars less than the estimated new contract authority for 1950. Special authorizations to use the proceeds of Treasury borrowing in the financing of certain Government programs are included in the 1951 recommendations to the amount of 1.4 billion dollars. This represents a decline of 6 billion dollars from the 1950 estimate for this type of authorization. The estimate for 1950, however, anticipates action by the Congress in providing supplemental public debt authorizations of 2 billion dollars for the Commodity Credit Corporation, one-half billion dollars for the Reconstruction Finance Corporation, and stand-by borrowing authority of 1.7 billion dollars for the Federal Savings and Loan Insurance Corporation and the Federal home loan banks.

PROGRAMS

The following sections describe the programs undertaken in each of the major functions of the Government and the new proposals I am making in this Budget. In addition, this year for the first time the Budget contains (in part II) improved presentations showing in detail the programs and performance of all Government agencies.

INTERNATIONAL AFFAIRS AND FINANCE

In 1951, as in every year since the war, the cost of our international programs will be large because far-reaching problems remain to be solved. Notable progress has been made toward foreign economic recovery, but some of the most difficult steps lie ahead. The threat of aggression still exists, requiring continued efforts to bolster the defenses of free nations. The economic underdevelopment of great areas of the world deprives their peoples of the adequate living standards in which free institutions can flourish, and deprives other peoples of needed resources which expanded world trade could bring.

The 1951 Budget provides for 4.7 billion dollars of expenditures on our international activities. This is 1.3 billion dollars, or more than 20 percent, below estimated expenditures in 1950. This very substantial reduction reflects the declining costs of our recovery and relief programs as they have stimulated and supported economic reconstruction, rising living standards, and growing political stability. My recommendations for 1951 represent the minimum amount required to carry our plans forward toward a successful conclusion. The continuing and grave uncertainties which remain in the world situation make it imperative that we be prepared to adjust our efforts to accord with developments. If, however, we make at this time the investment necessary to achieve continued economic recovery, I expect the trend in total expenditures for our international activities to continue downward in subsequent years.

Recovery and relief costs, which in 1951 will be over 75 percent of international expenditures, will diminish rapidly as recovery programs near completion, although new measures may become necessary to attain specific objectives in particular areas. At the same time, our programs for stimulating foreign economic development assume increasing importance, and expenditures for this purpose should increase somewhat in future years as political conditions stabilize and opportunities for mutually advantageous technological improvement and productive investment abroad increase. Furthermore, expenditures for foreign military assistance will remain substantial for several years as shipments are made under the programs authorized in 1950 and proposed for 1951.

Conduct of foreign affairs.—Expenditures in 1951 for the State Department, through which we conduct our foreign affairs, will be about the same as for the current year. The decline of war claims payments will be about offset by increased requirements in other programs, notably the Department's recent assumption of

INTERNATIONAL AFFAIRS AND FINANCE

¹ Includes transfer from funds for aid to occupied areas.² Less than one-half million dollars.³ This Budget also includes 518 million dollars of appropriations to liquidate prior year contract authorizations.

responsibilities in Germany. The international information and education program will continue at the expanded level to be reached this year.

Our Government also participates in many international agencies, principally the United Nations and its affiliates. Through such

participation we are actively engaged in a cooperative and world-wide effort to build the foundations for continued peace and the social and economic betterment of all peoples. One important aspect of this effort has been the development of a set of principles and a mechanism, through the proposed International Trade Organization, for facilitating the growth of world trade on a multilateral basis. I again urge that the Congress approve the charter of the International Trade Organization and pass the necessary implementing legislation.

European recovery program.—A major problem of foreign policy today is the fact that certain key areas of the world, principally western Europe, are faced with the necessity of making fundamental and complex adjustments to the far-reaching changes in their trade and financial relationships which resulted from the war. The great achievement of the European recovery program to date has been to help these countries to recover from the devastation of war, to restore living standards, and to maintain political stability, and thus to place them in a position to make the adjustments that are required.

As a consequence of their situation, these countries have experienced an extraordinary need in recent years for commodities and equipment which could, for the most part, be supplied only by this country, but for which they were not able to pay by the export of goods and services. If we had permitted their imports to sink to the temporarily reduced level which they could finance, it would have drastically reduced their living standards and invited unrest and destructive economic nationalism. Instead, we have undertaken a planned and mutual effort designed to achieve, during a relatively short period of United States assistance, expanded foreign production and trade, an increase in exports yielding dollars and a lessening need for imports requiring dollars, and an increased international flow of investment capital, thus establishing the basis for economic growth and prosperity.

The European recovery program has made notable progress toward these objectives since its inception almost 2 years ago. As a result, 1951 appropriation requirements for all segments of the program, including that portion of our aid to western Germany which has previously been provided separately from funds for aid to occupied areas, will be more than 1 billion dollars below the amounts provided by the Congress for the same purposes in 1950. Serious obstacles, however, remain to be surmounted. A substantial expansion in international trade and investment is necessary if the remaining adjustments are to be completed without involving serious economic and political dislocation.

The past year has shown that this task will not be easy. To achieve an increased flow of trade and investment will require far-sighted and vigorous steps by the European countries, and by other nations as well, including our own, if international economic relationships are to be established on a sound basis. The funds included in this Budget for continuing our participation in the European recovery program are an essential element for further progress.

Other international recovery and relief programs.—Our economic aid to occupied areas similarly takes the form of recovery programs designed to balance their trade at levels adequate to maintain stability without continued United States assistance. During the current fiscal year, responsibility for economic aid to western Germany has been transferred from the Department of the Army to the Economic Cooperation Administration, and these costs will be met in 1951 from European recovery program funds. Army-administered aid to occupied areas in 1951 will therefore be limited almost wholly to Japan and the Ryukyu Islands. The substantial sums invested in Japanese recovery since the end of the war are yielding results which permit a reduction in 1951 outlays for this purpose, and bring us nearer to termination of this program.

Although I have urged the Congress to authorize a similar recovery program for the Republic of Korea, funds provided to date permit operation at only a relief level. Early enactment of the legislation now pending will permit recovery to proceed and hasten the date when our aid can be concluded. The estimates in this Budget anticipate a start toward recovery in the remainder of the current fiscal year and substantial further progress in 1951.

Our remaining international requirements for purposes of relief, as contrasted with recovery, are chiefly those for assistance to refugees. The work of the International Refugee Organization will extend through 1951; its remaining work load, however, is substantially reduced, allowing a 65 percent reduction in our contribution below the 1950 level. The estimate for the Displaced Persons Commission reflects my recommendation that the present Displaced Persons Act be speedily amended to make it fair and workable. The provision for aid to Palestine refugees is the present estimate of our share of the cost of the proposed United Nations' program for restoring to productive activity the several hundred thousand persons displaced during the recent conflict in Palestine.

Foreign economic development.—Since the end of the war, the urgent, though temporary, requirements for international recovery and relief

have of necessity taken priority over longer-range efforts to promote world economic development. The devastation left by war had to be overcome. The restoration of economic strength to the world's principal industrial areas necessarily had to precede any real economic progress in the less-developed parts of the world.

Now that recovery is well under way, we must increasingly turn our attention to measures for the gradual and permanent expansion of world production, trade, and living standards which are necessary for enduring world peace. Great potentialities for such expansion lie in the underdeveloped areas of the world, with resulting benefits to the peoples of these areas and to other countries, including our own.

I again urge the Congress to authorize a program of technical assistance to enable the peoples of these areas to learn, and to adapt to their own needs, modern technological and scientific knowledge in such fields as agriculture, health, education, transportation, and industry. The achievements of our present technical assistance activities in the American Republics and in Europe attest to the success and practicability of this approach. This Budget provides for expenditures of 25 million dollars for the new program. This includes the United States share in the cost of the program for technical assistance recently approved by the United Nations.

A second basic requirement for economic progress in underdeveloped areas is a substantial increase in the inflow of capital for productive investment. These areas should offer opportunities for private capital and private enterprise, if there is assurance of fair and equitable treatment for foreign capital such as is contained in the commercial treaties which are now being negotiated with many nations. Nevertheless, there will remain certain abnormal risks which deter potential investors, and I again urge the enactment of legislation authorizing an experimental program by the Export-Import Bank to guarantee private developmental investments against such risks.

In many cases the flow of private capital may not be available or adequate, or particular circumstances may make governmental action preferable. In such cases, the investment of public funds may be needed, through such institutions as the International Bank for Reconstruction and Development and the Export-Import Bank. These institutions are currently directing their emphasis to loans for developmental purposes.

Foreign military assistance.—Although economic recovery is the most essential condition to the maintenance of freedom and stability in western Europe and other regions of vital importance to our own

security, economic vitality alone will not suffice to prevent aggression. Stronger military defenses are required, but these nations cannot unaided strengthen their defenses to a point sufficient to deter aggression without seriously retarding their recovery efforts. To solve their dilemma and to strengthen our own defenses, we agreed last year to unite with our neighbors of the North Atlantic community in developing and putting into effect an integrated defense plan for that area.

We have implemented that decision through the Mutual Defense Assistance Act of 1949, which provides for the supply of arms to the Treaty nations to supplement their own defense measures. The act also continues our previous program of assistance to Greece and Turkey, which has already achieved substantial success in ending the guerrilla threat to Greek independence and in strengthening Turkish defenses. In addition the act provides for military aid to certain other areas in the Middle and Far East.

The North Atlantic Treaty nations are now proceeding with the development of an integrated defense plan, the translation of that plan into equipment and supply needs, and a realistic determination of what each participant can do, both for itself and for the others, in meeting those requirements. For the current year the Congress provided 1 billion dollars for military assistance to the Treaty nations, and 359 million dollars for the other nations covered by the act. For the fiscal year 1951 I am recommending new obligational authority of 1.1 billion dollars, including 500 million dollars new contract authority.

Except for the previously authorized Greek-Turkish program, expenditures in 1950 will be relatively low, owing to late enactment of the new program and the time required for agreement on joint plans and for the subsequent determination of detailed requirements. Expenditures in 1951 for foreign military assistance will be almost twice as great as in 1950, and may rise somewhat further thereafter, owing to the long delivery time characteristic of military procurement.

Philippine aid.—The special concern and responsibility we feel for the progress of the Philippine Republic have taken the principal form, since the war, of assistance in the physical rehabilitation of damaged facilities and the payment of war damage claims. The cost of both of these programs will decline sharply in 1951 as they approach completion. We will continue to follow with sympathetic interest the achievements of the Philippine people and to assist them in making their contribution to our common objectives.

NATIONAL DEFENSE

Our expenditures for national defense continue to be the largest item in the Budget. Under current world circumstances, in which the strength of the United States is making such a vital contribution toward world peace, we must continue to make the expenditures necessary to maintain a position of relative military readiness. At the same time, we must plan our expenditures for national defense so that we will achieve our purpose at a reasonable cost, well within our capacity to sustain over a period of years.

This Budget represents a further step toward these objectives. It provides for active forces in a high state of training, available for immediate use if necessary and as a nucleus for rapid expansion in the event of an emergency, and for reserve forces, organized and trained for early mobilization if necessary. This Budget contemplates the continued development of planning for industrial mobilization and the accumulation of a stockpile of strategic and critical materials. It continues to emphasize research and development to keep our military technology abreast of scientific developments, and procurement of newly developed weapons to improve the equipment of the ready forces. At the same time this program is sufficiently flexible to provide a basis for rapid changes should developments in technology or international conditions make them necessary.

The recommendations for national defense in this Budget take into account the progress which has been made and can reasonably be anticipated in the programs now being developed for the effective integration of our defense plans and organizations with those of other North Atlantic Treaty nations. These defense plans, together with our assistance in strengthening the forces of these countries through the mutual defense assistance program, should provide an increasing measure of security to free peoples on both sides of the Atlantic as well as elsewhere in the world.

For the past 2 years we have been adjusting our military programs to achieve a balanced structure which can be maintained over a period of years without an undue use of national resources. The National Security Act of 1947 and the amendments to that act in 1949 have provided a sound organizational framework within which to work toward this objective. Vigorous actions have been taken to reduce overhead, to improve efficiency, to eliminate activities of low priority, and to realign our armed forces in accordance with a unified strategic concept. As a result, the estimate of obligational authority for the 1951 program of the Department of Defense, including certain obligations in 1951 from 1950 authority, is 13 billion dollars, as compared

with 14.2 billion dollars recommended for 1950 in the Budget a year ago.

My recommendations in this Budget provide for balanced land, naval, and air forces. In order to avoid the creation of forces involving commitments over a period of years beyond what we could reasonably expect to provide, I have had placed in reserve certain authorizations for the current year which were provided primarily for the expansion of the Air Force. These recommendations for the Defense Department for 1951 contemplate substantially the continuation of the revised 1950 program.

The estimated obligational authority of 13.7 billion dollars for 1951 includes 4.0 billions for the Army, 3.9 billions for the Navy, and 4.4 billions for the Air Force. In addition the recommendations include 0.8 billion for other Department of Defense activities, including retired pay and proposed legislation; and 0.6 billion for other national defense activities, mainly stockpiling of strategic and critical materials. Of this obligational authority expected to be required in 1951, 11.4 billion dollars is appropriations and 1.4 billion dollars is contract authorizations, both requiring action by the Congress. In addition, 873 million dollars is to come from appropriations and contract authorizations which were placed in reserve in 1950 and are available for 1951 needs.

The estimated expenditures for national defense in 1951 of 13.5 billions, including stockpiling and other defense items, are an increase of about 400 million dollars from estimated expenditures for 1950. The increase results almost entirely from procurement and other commitments made under authorizations previously approved by the Congress. Expenditures in subsequent years will reflect the reduction of new obligational authority for 1951.

Military strength.—Extension of authority for selective service, for which I plan to submit legislation, is vital as a positive demonstration of our resolve to maintain the strength of the free world. With it we will retain our ability to expand our armed forces rapidly in an emergency and will also insure adequate replacements to maintain the required strength of our active forces.

The extension of selective service authority will provide a temporary solution to the military manpower problem of the active forces, but will leave unsolved the problem of trained manpower for our reserve forces. I point out again the necessity of a program of universal training if we are to provide on a continuing basis sufficient numbers of men for the reserve forces, adequately trained to use effectively the increasingly complex machines of war.

MESSAGE OF THE PRESIDENT

Total.....	11,914	13,148	13,545	³ 11,359	1,441

¹ Includes appropriations of 22 million dollars made for the fiscal year 1950 which will be available for obligation in the fiscal year 1951.

² Includes contract authorizations of 851 million dollars made for the fiscal year 1950 which will be available for obligation in the fiscal year 1951.

³ This Budget also includes 2,533 million dollars of appropriations to liquidate prior year contract authorizations.

The total personnel assigned to combat forces will be the greatest since the completion of the demobilization following World War II, although the amounts recommended for 1951 will provide about 3 percent fewer officers and enlisted personnel on full-time active duty than at present. In 1951, it is planned to continue the organized units of the reserve forces at approximately the strength which is expected to be achieved by the end of the current year, but with better equipment, facilities, and training.

MILITARY PAY STRENGTH

[In thousands]

	Regular and reserves on full-time active duty			Reserves in drill pay status	
	Mar. 31, 1948	Dec. 31, 1949 (estimate)	1951 average (estimate)	October 1949	1951 average (estimate)
Army.....	538	639	630	565	605
Navy and Marine Corps.....	488	492	461	213	256
Air Force.....	368	416	416	82	118
Total.....	1,394	1,547	1,507	860	979

Under these recommendations for the Army, this Budget will provide 10 divisions, 48 antiaircraft battalions, and other combat and service units. Complementing the active Army will be the National Guard with 350,000 personnel and the Organized Reserve with 255,000 in regular training.

The Navy under these recommendations will operate an active naval fleet of 652 ships including 238 combatant ships. Six Marine Corps battalion landing teams will be maintained. A total of 5,900 aircraft will be operated by the active forces, and 2,500 by the reserve forces. Supplementing the Navy and Marine Corps will be 204,850 members of the Naval Reserve and 50,772 of the Marine Corps Reserve in regular training.

It is contemplated that the active Air Force will be organized into 48 groups and 13 separate squadrons, approximately its present strength. The Air National Guard and Air Force Reserve will be organized into 27 groups and 25 base wings, respectively. A total of 8,800 airplanes, from trainers to heavy bombers, will be operated by the active Air Force, and in addition 3,400 by the Air National Guard and the Air Force Reserve.

Pay and support of active duty military personnel.—The services of the officers and enlisted men and women on active duty will require 4.3 billion dollars, over one-third of Defense Department military expenditures. This will provide for pay, allowances, subsistence, travel, and clothing for the active forces at the new rates of pay and allowances set by the Career Compensation Act of 1949.

Operation and maintenance of equipment and facilities.—Estimated expenditures of 3.3 billion dollars will provide for operating and maintaining the aircraft, ships and vehicles, the airfields, training centers, hospitals, depots, various headquarters, ports, and other stations. Most of this amount will be required for the pay of civilian employees in these activities. These employees constitute the bulk of the approximately 725,000 civilian employees expected to be engaged in the military functions of the Defense Department in 1951. This represents a substantial reduction from the 865,000 provided for in the 1950 Budget.

Civilian components.—I have consistently stressed the importance of the civilian components of our armed forces. The Army and Air National Guard and the Air Force, Army, Navy, and Marine Corps Reserves will require estimated expenditures of 696 million dollars in 1951, as compared with the 663 million dollars estimated for 1950. This will provide for the training of forces totaling 979,000, which approximates the number expected to be in regular training by the end of the current year. Continued improvements are planned in the equipment available to these forces and in the effectiveness of their training programs. In order to overcome a major deficiency in the program for these forces, I recommend that the Congress authorize the construction of additional armories and similar training facilities. Funds for this purpose are included in the amount estimated for proposed legislation.

In addition the Reserve Officers' Training Corps of the Air Force, Army, and Navy will necessitate expenditures of 44 million dollars in 1951 to provide a continuing source of junior officers for the reserve forces and a portion of the junior officers required by the active forces. This will provide an estimated 19,000 new junior officers in 1951, an increase of 2,000 over the estimate for 1950.

Research and development.—The experiences of the last war clearly demonstrated the decisive importance in modern warfare of superior weapons and equipment and of the application of scientific research to the production of new weapons and techniques of combat. In

peacetime, as well as war, scientific and technical advances here and abroad make possible continuing improvements in the performance of military weapons, and open to us and to other nations the possibilities of new types of weapons which can profoundly affect military concepts and tactics.

We must continue a broad and active program of military research and development. The research and development programs of the Department of Defense, together with the related programs of the Atomic Energy Commission, the National Advisory Committee for Aeronautics, and other agencies of the Government, have as their objectives to develop improved weapons and equipment for the modernization of our military forces, to exploit the possibilities of new types of weapons and devise defenses against them, and to stimulate scientific research likely to have future military applications.

Expenditures of the Department of Defense for research and development in 1951 are estimated at 606 million dollars, slightly less than in the current year. This amount includes the principal costs of the research and development activities, except for the construction of research facilities and the pay and support of military personnel engaged in research and development activities.

Aircraft procurement.—Procurement of complete aircraft will require expenditures of 2.1 billion dollars in 1951 for approximately 2,300 airplanes, compared with 1.7 billion dollars for approximately 2,800 airplanes in 1950. The change in average unit cost reflects the increasing complexity and cost of individual airplanes.

The recommendations in this Budget will provide for new contracts to be made in 1951 totaling 2.0 billion dollars, compared with 1.9 billion dollars in 1950. This contemplates that 851 million dollars of 1950 authorizations being held in reserve will be applied against requirements for aircraft to be contracted for in 1951.

Approximately 3.3 billion dollars of unexpended authorizations contracted for in 1950 and prior years will be carried forward into 1951. This carry-over, together with the contracts to be made in 1951, will provide 5.3 billion dollars of complete aircraft to be delivered and paid for in 1951 and subsequently. Under present procurement plans it is estimated that, in addition to the 1951 deliveries of 2,300 airplanes, approximately 3,100 airplanes will be delivered in 1952 and later years from authorizations provided prior to that time.

Construction of ships.—Naval ship construction will require 298 million dollars of estimated expenditures in 1951. While no new obligational authority is recommended in this Budget, the 1951

expenditures will be only slightly less than the 314 million dollars estimated for 1950. Various substitutions and adjustments have been made during the past year in the uncompleted portion of the shipbuilding program. In addition to work completed in 1951, 467 million dollars of presently authorized naval ship construction will remain to be completed in 1952 and later years.

Major procurement other than aircraft and ships.—Major procurement other than aircraft procurement and ship construction, will require expenditures of 678 million dollars, a 50 percent increase over the estimate for the current year and more than three times as much as in 1949. This will provide, mainly, combat equipment for Army and Marine Corps troops, equipment for modernizing the fleet, non-combat vehicles for the three military departments, and ammunition, torpedoes, and guided missiles. The substantial increase in expenditures in 1951 results largely from the sizable expansion in this program during the past 2 years. The new obligational authority recommended for 1951, totaling 755 million dollars, will be at a moderately higher level than 1950. This will continue the larger procurement program embarked on in 1949 and continued with increases in 1950.

Amounts included for combat vehicles, artillery, guns, and other equipment for Army and Marine Corps troops will permit substantial modernization of the equipment for the ready forces, and will reflect the progress of our research and development efforts. It will provide an orderly step in the replacement of the equipment left over from World War II which by the end of 1951 will be at least 6 years old and therefore in need of substantial improvements in design as a result of technical and scientific developments. The equipment for modernizing the fleet will give emphasis to the role of antisubmarine warfare.

Military public works.—Construction of military public works will result in considerably smaller expenditures in 1951 than in 1950. This is largely because only part of the authorizations proposed in my 1950 Budget were enacted. Exclusive of the construction for which legislative authorization will need to be made, 1951 expenditures are estimated at 182 million dollars compared with 299 million dollars for 1950. This will provide for such construction as housing for troops and their families, operational facilities, and facilities for research and development. The obligational authority necessary for additional projects not yet authorized by legislation are included in the tentative estimate for proposed legislation.

Industrial mobilization, service-wide administration and finance, inter-service projects, and Office of the Secretary of Defense.—The Defense Department's part in industrial mobilization planning will provide for maintaining machine tools and stand-by industrial plants, for tooling of pilot production lines, and for placing educational orders, as well as for continuing industrial mobilization planning studies with industry. Expenditures for this purpose are estimated at 109 million dollars in 1951 compared with 117 million dollars in 1950.

Other Defense Department activities, largely of service-wide nature, will result in expenditures estimated at 382 million dollars, a slight increase from 1950.

Proposed legislation (including military public works).—In order to provide for early starts on projects and activities for which legislation is proposed I am including an estimate of 372 million dollars for new obligational authority, the largest part of which is for military public works for both regular and reserve forces.

Unexpended reimbursements from mutual defense assistance program.—The Defense Department receives reimbursements for some of the equipment which it takes from its stocks to ship to other countries under the mutual defense assistance program. The manufacture and delivery of equipment out of these reimbursements will, for the most part, not be possible before the following year. Hence these reimbursements will appear as credits in Defense Department expenditures in 1950 and 1951. As deliveries from these funds are made in future years, compensating increases in Defense Department expenditures will result.

Pay of retired military personnel.—Amounts are appropriated annually to provide the cost of pay for retired military personnel. The expenditures of 345 million dollars estimated for 1951 provide this retirement pay for persons whose services were for the most part rendered prior to World War II. The Government is at present incurring obligations for future payments at a rate two and one-half times the current retired pay expenditures.

Stockpiling of strategic and critical materials.—The stockpile program will provide the means for augmenting the supplies of materials expected to be available to us in time of emergency. Accelerated progress toward present objectives will be made during the year since available supplies have increased somewhat, partly as a result of orders placed previously to encourage new development.

I recommend 500 million dollars of new obligational authority for this program in 1951. This amount when added to the authority already available will provide total authority for deliveries in 1951 and later years of 1.1 billion dollars. Expenditures are expected to rise from 580 million dollars in 1950 to 650 million dollars in 1951.

The recommended new obligational authority will bring the funds for the stockpile to within 729 million dollars of the present total objective of 3.3 billion dollars. By the end of 1951, 65 percent of the stockpile will be delivered, and an additional 13 percent will be under contract for delivery after 1951. We will be nearer to our goals for the materials the supply of which would be the most susceptible to interruption, than for the stockpile as a whole.

National Advisory Committee for Aeronautics and other activities supporting defense.—Expenditures for all other activities supporting defense will total 43 million dollars, after deducting 48 million dollars of net receipts in the defense activities of the Reconstruction Finance Corporation. Slight increases in funds will be necessary for the National Advisory Committee for Aeronautics to move forward with its basic research activities in aeronautics. The funds for the National Security Resources Board will be maintained at about the present level, and the cost of maintaining industrial reserve plants by the General Services Administration will decline slightly. Other activities provided for include the Selective Service System as well as various defense activities of other agencies. The defense activities of the Reconstruction Finance Corporation, having to do with rubber, tin, and fibers, will result in larger receipts than expenditures, mainly as a result of reduction of inventories.

VETERANS' SERVICES AND BENEFITS

Expenditures of 6.1 billion dollars are estimated for veterans' programs, one-seventh of all Budget expenditures estimated for 1951. The size of these requirements reflects the fivefold increase since 1939 in the number of living veterans and the new readjustment benefits provided for the World War II veterans, as well as the increases in rates of benefits and in services to veterans generally.

Most of the expenditures for veterans' benefits and services are not controllable by the ordinary appropriation process. Expenditures depend largely on how many of our 19,000,000 living veterans, and how many dependents of deceased veterans, apply and qualify for aid under some 300 laws. The variable impact of veterans' programs on the Budget is indicated by the fact that expenditures for the

fiscal year 1950 are now estimated 1.4 billion dollars higher than they were estimated a year ago. As a result, it now is necessary not only to request restoration of the appropriations for the Veterans Administration eliminated by the last session of the Congress, but also to recommend additional supplemental appropriations for 1950.

Expenditures in the fiscal year 1951 are estimated to decline 825 million dollars from the level for the current year. In the next few years we should be able to see a further substantial reduction in Budget expenditures for veterans' programs, as the temporary readjustment benefit programs taper off or expire under existing legislation. On the other hand, it should be recognized that permanent veterans' laws will necessitate high expenditures for many years. In particular, expenditures for pensions and for hospital and medical care will continue to increase from year to year.

I have called attention in previous Messages to the responsibilities which our Nation has toward its veterans and to our efforts to assist them to resume as nearly as possible their normal places in our society. We have provided a comprehensive and complete program of special Government benefits for veterans of all wars—including extensive economic aids, education and training assistance, job reinstatement and preference rights, as well as extensive medical and other services. Veterans, as citizens, of course, are also benefited under the general programs developed in the last 15 years to maintain high employment and to advance the Nation's economic welfare.

Almost 2,000,000 veterans with disabilities incurred in the service, and over 300,000 families of veterans deceased from service causes, are now being assisted under the veterans' programs. Our primary long-run obligations in providing veterans' benefits and services are to this group. We must give them timely help to surmount the economic and physical handicaps sustained as the result of military service and to assist them to assume the full responsibilities of civilian life. In the last 2 years, substantial additional increases in compensation rates to dependents and to veterans of World Wars I and II have brought the rates to this group reasonably into line with the rise in the cost of living since 1939.

The remaining 17,000,000 veterans are practically all without service disabilities. The Government has made available liberal benefits to help all veterans of the two world wars make the transition from military to civilian life. The veterans of World War II, in particular, have received readjustment benefits to assist them in obtaining education, training, jobs, businesses, and homes. Most of the citizen-soldiers of World War II returned to civilian life 4 years

ago and have had adequate opportunity to reestablish themselves in their communities. The original, sound purposes of the Servicemen's Readjustment Act have largely been served. Some of the benefits under the act have already terminated and the need for others, such as education and training benefits, is drawing to a close.

Veterans without service disabilities will continue to be eligible for liberal benefits under the permanent veterans' laws after the termination of temporary programs. At the same time, these veterans are eligible in many cases for benefits under the general social security programs of the Government. We now seek to improve and to broaden the general social security programs to provide protection against the economic hazards of old age, disability, illness, and unemployment. The social security proposals pending in the Congress apply to all the people, including veterans. In the pending bill to improve the old-age and survivors insurance system, veterans would receive credit for the period of military service during World War II toward benefits under the system. On the other hand, proposals are also pending in the Congress to increase greatly the special programs for veterans, who with their dependents now comprise about two-fifths of our total population. There is real cause for concern that we may overlook the close relationship of these two systems and superimpose on the general system of benefits an overlapping and unwarranted series of special benefits for veterans.

I again urge that in considering new or additional aids for veterans without service disabilities, the Congress judge their necessity not merely from the standpoint of military service, but also on the basis of benefits under the general social security, health, and education programs available to all the people, including veterans. Our objective should be to make our social security system more comprehensive in coverage and more adequate, so that it will provide the basic protection needed by all citizens. We should provide through the veterans' programs only for the special and unique needs of veterans arising directly from military service.

I am sure that our veterans are willing to share with other citizens in the benefits which can be gained for all through a positive program of economic and social advancement. They recognize that their best interest is inseparable from the best interest of the Nation. For a democratic Nation like ours can thrive only as all its citizens—veterans and nonveterans alike—are enabled through fair and equal opportunities to live as self-respecting, self-reliant men and women in a free and prosperous country.

¹ This Budget also includes 160 million dollars of appropriations to liquidate prior year contract authorizations for hospital construction.

Readjustment benefits.—By the end of the fiscal year 1951 it is estimated that under the Servicemen's Readjustment Act 8,000,000 veterans will have received education and training benefits at a cost of 12.9 billion dollars, and that 9,000,000 will have drawn unemployment and self-employment allowances totaling 3.9 billion dollars. In addition 2,400,000 veterans will have obtained 13 billion dollars in loans for homes, farms, and businesses under the Government loan guarantee program for veterans.

The average enrollment in school, job, and farm training courses under the education and training provisions of the Servicemen's Readjustment Act is expected to decline from 1,986,000 in the current year to 1,837,000 in 1951 and to require expenditures of 2.5 billion dollars.

The education and training program, however, is now considerably bigger than had been expected. The average number of participants

in 1950 is estimated at 400,000 above the level anticipated a year ago. Largely because of this unexpected increase I shall soon transmit to the Congress a supplemental appropriation estimate of about 700 million dollars to cover the higher expenditures now estimated for the current fiscal year. The bulk of the increase is in schools below the college level, particularly in trade and vocational schools. While enrollment in other courses is decreasing, enrollment in these courses is still increasing and in 1951 is estimated to average 936,000—41 percent higher than in 1949 and 14 percent higher than estimated for the current fiscal year.

The continued expansion of enrollment in schools below college level, more than 4 years after most veterans have been returned to civilian life, raises the question whether this program still conforms to the original sound objectives of the Servicemen's Readjustment Act—to enable veterans to resume education or training interrupted by the war or to restore skills lost during military service. There is some question whether large numbers of veterans enrolled in these schools are in fact being trained for occupations for which they are suited and in which they will be able to find jobs when they finish their training. I have asked the Administrator of Veterans' Affairs and the Director of the Bureau of the Budget to study this situation thoroughly and to recommend to me any corrective measures, administrative or legislative, which should be taken to assure that our expenditures for this program yield a proper return both to the veterans and to the Nation as a whole.

Since July 1949, under the terms of the "GI bill", veterans discharged from service remain eligible for unemployment and self-employment allowances for only 2 years after date of discharge. On the average 59,000 claimants are expected to draw allowances, estimated at 61 million dollars, in the fiscal year 1951. This compares with an average of 1,400,000 veterans receiving allowances in the peak year of this program, fiscal year 1947.

Under the Government loan guarantee program, it is expected that 386,000 veterans will obtain loans, almost all for homes, amounting to over 2 billion dollars in the fiscal year 1951. The estimated outlays of 68 million dollars for this program are chiefly for the payment of the first year's interest on the guaranteed portion of the loans. Expenditures for losses on defaulted loans are now relatively small, although the contingent liability is sizable since the amount of the Government guarantees is now about 48 percent of the total loans. In addition to guaranteeing veterans' loans, the Government also purchases guaranteed mortgages held by financing institutions.

(Mortgage purchases are classified under housing and community development.)

The "other" expenditures for readjustment benefits cover allowances for burial expenses of veterans, tuition and supplies for disabled veteran trainees, and Government grants for special housing for certain seriously disabled veterans.

Compensation and pensions.—It is estimated that an average of 3,058,000 individuals and families will receive compensation and pension payments totaling more than 2.2 billion dollars in the fiscal year 1951. Beginning in 1951 disability retirement payments of 78 million dollars to 31,000 Reserve officers, shown in this item in prior years, have been transferred to the military retired pay account of the Department of Defense. Apart from this reclassification to national defense, there is an estimated net increase in 1951 of 99,000 in the average number of cases, and of 71 million dollars in expenditures over the current year, entirely for cases without service disabilities.

The 1951 expenditure estimate of 2.2 billion dollars includes 1.5 billion dollars in compensation for service-connected cases, covering an average of 344,000 families of deceased veterans and 1,981,000 veterans with disabilities. The compensation and pension total also includes 160 million dollars for subsistence allowances to service-disabled veterans in the vocational education and training program. Pension payments to an average of 732,000 non-service-connected cases in 1951 are estimated to total 553 million dollars, about two-thirds to living veterans and one-third to survivors of deceased veterans.

Insurance.—The Government reimburses the veterans' life insurance trust funds for payments on account of deaths traceable to war hazards, and also pays directly certain claims to veterans who failed to meet the regular standards of insurability. The expenditures in the fiscal year 1950 include nonrecurring transfers of 413 million dollars to the national service life insurance fund arising from a resurvey of the Government's liability for such contributions. Expenditures in 1951 for insurance claims payable by the Government are estimated at 39 million dollars.

Hospital and domiciliary construction.—Construction of hospitals to provide 37,000 new beds and additional domiciliary facilities, costing 872 million dollars, is now about one-third completed. By June 1951 it is estimated that three-fourths of the work will have been done.

When this program is finished, there will be sufficient beds to provide adequately for foreseeable needs for all service-connected cases and a more liberal allowance of beds than at present for non-service-connected cases. Obligational authority already available is more than adequate to meet the needs of the program now under way.

Hospital and other services and administration.—Current expenses for hospital and medical care are estimated at 590 million dollars in the fiscal year 1951. About four-fifths of these expenditures are for the in-patient care program, and in this program two-thirds of the cases currently are non-service-connected. A daily average of 138,000 patients in hospitals and homes is estimated for 1951, about 9,000 more than were cared for in 1949 and 4,000 more than in the current year. The other one-fifth of the expenditures is largely for the out-patient medical and dental care programs.

Other current expenses, which are chiefly the costs of administering and operating the nonmedical benefits programs and of general administration of the Veterans Administration, are estimated to decline in 1951 to 269 million dollars.

Trust accounts.—The national service life insurance and Government life insurance trust funds operate as mutual insurance systems on a commercial pattern, except that no administrative expenses are paid by them and the amounts held in reserve and as surplus are invested in Government obligations by the Secretary of the Treasury. Veterans of World Wars I and II and present servicemen now hold about 6,800,000 active policies in these two systems. Premiums and earnings, supplemented by Government payments of over 4 billion dollars for claims involving deaths and disabilities resulting from extra hazards of military service, have built up assets in these two funds to an estimated 9.7 billion dollars at the present time.

The Government life insurance fund has been on a dividend-paying basis since 1921. A special dividend of 40 million dollars was paid early in the fiscal year 1950. The first national service life insurance dividend, amounting to an estimated 2.8 billion dollars and payable to all servicemen of World War II who hold or have held policies, has been declared. Payments are now scheduled to begin shortly. It is estimated that 2.2 billion dollars will be disbursed in the current fiscal year and the balance in 1951 or later, as applications are filed. In the next few years a regular dividend schedule is to be established for national service life insurance. These dividends are not a Budget expenditure since they are paid from the trust funds.

SOCIAL WELFARE, HEALTH, AND SECURITY

The coming year will be an extremely significant one for the Nation's social security program. The decisions of the Congress on pending legislation will determine the direction which this country will follow in providing basic protection against the major economic hazards of old age, unemployment, illness, and disability. It is my strong belief that it is a responsibility of the Government to provide this protection, and to provide it in a manner that is consistent with our ideals of independence and self-reliance—through the already established and tested principle of contributory social insurance. This was the basic philosophy of the Social Security Act, in which the major role was given to social insurance, financed mutually by employers and employees, with benefits available as a matter of right without a means test. Public assistance was given only a supplementary role to fill in the diminishing gaps in insurance protection.

The effects of our failure in recent years to carry out this philosophy are already dramatized by the increase in the public assistance rolls. Because the protection of social insurance is so limited and inadequate, far too many people have been forced to seek public relief. In some States, for example, half the aged people are on the relief rolls. Approximately 2,700,000 aged people and 1,500,000 dependent children now receive public assistance. By contrast, only 1,900,000 aged persons receive insurance benefits and 800,000 children and their mothers receive survivors benefits under the old-age and survivors insurance system. Average old-age insurance benefits are only 26

dollars a month compared with average old-age public assistance benefits of 45 dollars.

Public demand for some form of basic financial protection against loss of earning power is evident in the keen interest of wage earners in industrial pension and insurance plans. There can be no question that our society can and should provide such protection. What I wish to emphasize is that the basic approach should be through a comprehensive public program of old-age, survivors, and disability insurance, rather than through a multiplicity of unrelated private plans, which would inevitably omit large numbers of the working population and treat others unequally. Private plans and voluntary insurance can then provide desirable supplemental protection.

I urge that the Congress enact legislation to expand and improve the old-age and survivors insurance system in accordance with the recommendations made last spring. Specifically, nearly all gainfully employed people, including farmers and the self-employed, should be covered; benefits should be increased sharply; and disability should be added to the risks covered. It is also important that the tax base be raised to the first 4,800 dollars of earned income, not only to reflect changes in wage levels since 1939, but also to bring both receipts and benefits to proper levels.

The recommended program will cover about 85 percent of all employed people, and will thus gradually reduce the need for public assistance. In the meantime, however, it is necessary to provide some help for those persons not yet protected by social insurance, as well as for those who would need public aid even with an adequate social insurance system. I therefore renew my recommendation of last year that the program of Federal grants to States for public assistance be extended and improved. The proposal that I submitted to the Congress last spring was designed to permit Federal sharing in the cost of aid to needy persons excluded from the present program, as well as in the cost of essential medical and welfare services. It was also designed to make Federal grants more responsive to the financial resources of each State. Within the framework of general policy under the Social Security Act, the States are responsible for determining the size of benefit payments and the eligibility of individuals for assistance. In adopting amendments to the present program, we should continue to rely on the States to bear a considerable share of the financial responsibility.

In the field of health, I presented a set of recommendations to the Congress on April 22, 1949, outlining in some detail a program for the Nation, centering in a national system of medical-care insurance. Since that time, the extension and enlargement of the hospital con-

struction program which I recommended has been enacted, and considerable headway has been made on some of my other recommendations. I hope that the Congress will soon complete action on legislation to increase Federal assistance to local health services. Strengthening of these is fundamental to our national health. In addition, legislation should be enacted to provide financial aid to medical and related schools to encourage the training of additional medical personnel. In the case of nurses, tuition scholarships and subsistence aids should be made available for training graduate nurses, and grants should be made to States for vocational education for practical nurses, to encourage more young women to enter the profession.

To fill in a major gap in our social security system, I again strongly urge the adoption of legislation providing for a comprehensive system of prepaid medical care insurance. This should be geared in with our other social insurance programs and financed predominantly by employer and employee contributions.

Action on these measures should no longer be delayed. We cannot in good conscience let our social security system remain in the blueprint stage, and allow relief programs to become our primary defense against want.

This Budget contains estimates for all of my proposals. The greater part of them would be financed through special taxes, with receipts going into Government trust funds and payments being made directly from the funds. Social insurance benefits, by providing support for the aged and disabled and their dependents, help to relieve individual families, employers, and communities of this burden. At the same time, by replacing the present haphazard arrangements with a comprehensive pattern of social insurance, we promote the stability of the economy and preserve the self-respect of all our citizens.

My proposals will add an estimated 271 million dollars to Budget expenditures in 1951, principally in the form of grants to States. Of this amount, 200 million dollars is for improvement of public assistance and 67 million dollars for health programs. These items, plus increases under existing legislation in these two fields, are expected to cause Budget expenditures for social welfare, health, and security to rise in the fiscal year 1951 to a level of 2.7 billion dollars, an increase of 417 million dollars over the current year. Aside from proposed legislation, the primary cause of the increase is a rise in grants to States for public assistance and hospital construction. Included in the total is 594 million dollars representing the transfer of pay-roll tax receipts to the railroad retirement trust fund.

¹ This Budget also includes 151 million dollars of appropriations to liquidate prior year contract authorizations.

I recommend again that the Federal Security Agency be given departmental status; its functions are so important to the domestic policies of the Government that the head of this Agency should be a member of the President's Cabinet.

Assistance to the aged and other special groups.—Grants-in-aid to States for public assistance to the needy aged, the blind, and dependent children are expected to reach 1.2 billion dollars in 1951 under the present program, with the Federal share averaging about 52 percent of total payments by State and local governments to these groups. For some time, the number of recipients has been increasing and now exceeds 4,000,000 persons; it is expected to average 4,600,000

during 1951. Average benefits are also expected to continue their rise. As a result, Federal expenditures will exceed those for the current year by an estimated 55 million dollars. The Budget contains an additional 200 million dollars as the first-year expenditure estimated for proposed legislation to cover all the needy and to put the program on a variable grant basis. The revised formula which I have recommended would relate grants to the financial resources of the individual States and would also permit the Federal share to be held within reasonable limits.

I am also proposing legislation to strengthen the Federal-State program of vocational rehabilitation and to provide additional opportunities for rehabilitation of the more severely handicapped. By enabling these people to become productive workers, instead of liabilities to their families and communities, we are enhancing our national supply of skills and productive ability. The Budget includes 4 million dollars for the first year under the proposed legislation.

Railroad retirement insurance.—The amount of 594 million dollars included as an expenditure in the Budget is actually the transfer of special tax receipts to a trust account for payment of benefits to retired railroad workers and their survivors. Apart from credits for military service, the program is financed by taxes on railroad wages, shared equally by employees and employers. Under present law, the transfers of tax receipts to the fund must be made in advance of collection and thus interest begins to accrue to the fund before the taxes are collected. To avoid this payment of interest on money not yet received, the Congress should direct that these taxes be transferred to the trust fund when received, as is now done with the old-age and survivors insurance taxes.

I recommend also that the Congress revise the procedure for making Federal Government payments for military service credits allowed to railroad employees. Such payments to the railroad retirement trust fund should be made annually in the years ahead on the basis of claims actually approved as workers retire. As the law now stands, these payments are made in advance, without adequate relationship to eventual requirements for actual benefits. To cover such future claims, 193 million dollars has already been advanced to the trust fund. Unless the law is amended as recommended in this Budget, further payments of approximately 33 million dollars will be required in each of the next four fiscal years.

Promotion of public health.—Federal expenditures for public health are mainly for grants-in-aid to States and for research. Of the 334

million dollars estimated for existing programs in the fiscal year 1951, 213 million dollars is for financial assistance to the States for general public health services and for a wide variety of special State and local programs, including hospital construction, maternal and child health, tuberculosis control, and mental health. The increase of 75 million dollars in expenditures over 1950 for existing programs is caused largely by a rise in grants to liquidate prior years' hospital construction authorizations. This program is helping communities throughout the Nation to reduce the hospital shortage.

Because adequate general public health services are basic in our health program, I am recommending that grants for this purpose be increased by 9 million dollars, bringing them up to 23 million dollars, the maximum authorized under existing law. An additional 5 million dollars is included for proposed legislation to increase these grants beyond the existing ceiling. At the present time, most of the counties of this Nation lack, either wholly or in part, the basic local public health services which must form the foundation for our efforts to improve the Nation's health. The increase permitted by existing law will provide only a start toward meeting this serious deficiency. New legislation is, therefore, needed to remove the existing statutory ceiling and provide a sound basis for aiding States in the future development of adequate local health services.

Other proposed legislation is expected to add 62 million dollars to expenditures, of which 30 million dollars is for aid to medical education to increase enrollments in schools of medicine, nursing, dentistry, and public health, and 7 million dollars is for expansion of health and welfare services to mothers and children. Expenditures under pending legislation authorizing special health services to school children are estimated at 25 million dollars.

The direct research activities of the Public Health Service and the grants to individuals and institutions for research, teaching, and training, will require an estimated 47 million dollars in 1951, a moderate increase over 1950. No provision is made in this Budget for further expansion of Public Health Service grants to medical schools for undergraduate teaching and for construction of additional research facilities on the basis of special disease categories. This anticipates early enactment of legislation for general aid to medical education, which would contain adequate provisions for aid to medical schools in meeting their costs of teaching and in constructing additional facilities. Such legislation would permit an integrated program of research and teaching at medical schools, which should be far more conducive to good results than separate financing for each major type of disease.

Trust accounts.—Under the old-age and survivors insurance, railroad retirement, and Federal employee retirement programs, benefit disbursements are made from the trust funds and are not included in Budget expenditures. On the receipts side, the pay-roll contributions for old-age and survivors insurance are transferred directly to the trust fund and not included in total Budget receipts. Receipts and payments under the proposed health insurance program would also be handled in this manner. Railroad retirement taxes, on the other hand, are included in total Budget receipts and are transferred to the trust account as a Budget expenditure. The Government contribution to its employee retirement funds is, of course, a Budget expenditure (classified under general government).

SOCIAL WELFARE, HEALTH, AND SECURITY

(Major trust accounts)

[Fiscal years. In millions]

Fund and item	1949 actual	1950 estimated	1951 estimated
Federal old-age and survivors insurance trust fund:

Payment for initial expenses.....			—35
Net accumulation.....			215

The money in these trust funds is invested in Government securities, and the interest earned is added to the principal of each trust fund. Accumulated assets now total 18 billion dollars.

Under present law, the old-age and survivors insurance tax rate advanced on January 1, 1950, to 1½ percent each for employers and employees. In view of the recommended increase in benefits and addition of disability coverage, I propose that the further tax increase to 2 percent each, presently scheduled for January 1, 1952, be moved up to January 1, 1951. The proposed legislation would raise benefits in the fiscal year 1951 from about 800 million dollars under existing law to approximately 2.2 billion dollars. Thereafter disbursements for benefits can be expected to climb gradually as claims mature. The 4 percent combined tax should produce revenues of approximately 5 billion dollars a year with employment at a high level, so that for the next several years reserves would continue to accumulate.

A period of preparation will be required to set up the health insurance system. I am proposing that in the meantime a small pay-roll tax of one-fourth of 1 percent each on employers and employees become effective January 1, 1951, to defray initial expenses. Setting up this tax will also make possible the establishment of eligibility and other administrative records.

HOUSING AND COMMUNITY DEVELOPMENT

Last year the Congress adopted as the declared objective of national housing policy "a decent home and suitable living environment for every American family." Real progress has been made toward achieving this goal. Private enterprise, with extensive Government assistance, built a million new houses last year, more than ever before, and at generally reduced prices. Far-sighted new legislation was enacted, which gives practical support to private and local initiative in clearing slums and developing our cities, in providing special assistance for low-income families in cities and on farms, and in promoting better methods and lower costs for all types of housing construction.

Our task this year is twofold. We must continue to push ahead rapidly in carrying out these major new programs. We must also further improve Federal housing legislation. In particular, to close the biggest remaining gap, I am recommending legislation which will aid middle-income groups to obtain adequate housing they can afford.

Budget expenditures for housing and community development are estimated at 1.3 billion dollars in 1951. Of this total, almost 1 billion dollars, or about 75 percent, represents the current estimate of expenditures for mortgage purchases by the Reconstruction Finance

Corporation to support the private mortgage market. The Corporation will subsequently be reimbursed for its expenditures in buying these mortgages, either through collections or through sale to private institutions.

¹ Stand-by borrowing authority of 1,750 million dollars is recommended to become available in 1950.

² This Budget also includes 18 million dollars of appropriations to liquidate prior year contract authorizations.

Most of the Federal expenditures for housing and community development, including mortgage purchases, are financed by public debt authorizations rather than by appropriations. The public housing and urban redevelopment programs will require relatively small appropriations in the early years, with substantial increases in later years. The Federal Housing Administration insures each year about 3 billion dollars in private home mortgages, but since this is an insurance operation it has only a minor effect on current Budget expenditures.

Federal Housing Administration.—Almost half the record volume of private new housing now under construction is being financed with mortgages insured or guaranteed by the Federal Government, largely by the Federal Housing Administration, and also by the Veterans Administration (classified under veterans' services and benefits). By removing all major risks from mortgage lending, these insurance and guarantee programs make it possible for American families to buy housing on substantially better terms than they could obtain otherwise. About 350,000 other families now live in rental housing which was financed by Government-insured mortgages. In the case of both sales and rental housing, established procedures of the Federal Housing Administration, including inspections, provide assurance that recognized housing standards are met.

As long as favorable economic conditions continue, income from premiums and other sources will exceed expenses and permit substantial investment in Government securities to build up reserves against possible later losses.

In the past year the mortgage insurance program has successfully stimulated construction of rental housing and lower-cost housing for sale. I have already recommended additional legislation to encourage further the construction of lower-cost housing for sale. I shall shortly transmit recommendations to provide, on a permanent rather than an emergency basis, a more effective stimulus to lower rental housing. For both rental and sales housing, the new proposals would also provide needed incentives to construction of units of adequate size for family living.

Reconstruction Finance Corporation.—Since last spring, the Federal National Mortgage Association, a subsidiary of the Reconstruction Finance Corporation, has been making heavy purchases of mortgages from private lenders, of which the major portion is guaranteed by the Veterans Administration. These purchases have made it possible for veterans in all parts of the country to buy houses on the advanta-

geous terms offered under the Servicemen's Readjustment Act. Substantial commitments to purchase mortgages insured by the Federal Housing Administration have also been particularly helpful in assuring the availability of adequate funds for rental housing construction.

The continuing need for a stand-by secondary market does not mean that Government purchases should be regarded as a permanent substitute for private financing. Accordingly, the administration of this program will be directed toward encouraging private lenders to hold a larger portion of these mortgages as well as to repurchase the mortgages previously sold to the Federal Government. Important administrative steps are being taken but they can be only gradually effective, and substantial future expenditures will be necessary to carry through on the large volume of commitments already outstanding. Estimated commitments will exhaust the present authorization of 2.5 billion dollars shortly after the close of the current fiscal year. Because the rate of commitment is uncertain, I am recommending an additional 500 million dollars in public debt authorizations in fiscal year 1950 and 250 million dollars in 1951.

Prospective expenditures for mortgage purchases cannot be estimated accurately, since their amount depends largely on whether private lenders decide to hold the mortgages as permanent investments or to sell them to the Government. For example, the initial estimate a year ago of 200 million dollars in such purchases for the fiscal year 1950 was later revised upward to 1.3 billion dollars and is now reduced to 940 million dollars.

The Reconstruction Finance Corporation also has special authority to lend up to 50 million dollars to producers of prefabricated housing and large-scale builders using advanced construction methods. I recommend that the Corporation be authorized to lend an additional 25 million dollars for these and related purposes. The accomplishments of this program to date have been below our expectations, but the potential benefits from the development of new housing production methods are so great that I believe a further limited investment of Federal funds, building upon the experience already gained, will yield good returns.

Cooperative housing for middle-income families.—Even with these various Federal aids, enough private housing of the right types is not yet being produced generally throughout the country at prices which families with modest incomes can afford. As a necessary supplement to our other housing programs, I am recommending new legislation to authorize Federal assistance to cooperatives and nonprofit corporations in building and managing housing projects. Under the plan I

am proposing, the Federal Government would provide technical assistance in organizing housing cooperatives and adequate arrangements for their financing. Through financial and other savings, material reductions in rents or charges are anticipated.

Because of the limited American experience with housing cooperatives, this program initially must be viewed as experimental, and cannot be expected to attain a large volume in 1951. With proper Federal leadership and assistance, however, it offers real promise that middle-income families will be able to help themselves obtain good housing at costs within their means.

Home Loan Bank Board.—This Board supervises the operation of the Home Owners' Loan Corporation, the Federal home-loan banks, and the Federal Savings and Loan Insurance Corporation.

The Home Owners' Loan Corporation is rapidly liquidating the remainder of its mortgages by selling them to private lenders. During the depression years, the Corporation made more than 3 billion dollars in loans, thus enabling over 1,000,000 families to keep their homes. By the end of the fiscal year 1951, all of these loans will be repaid or sold.

Savings and loan associations supervised by the Federal home-loan banks provide roughly a third of all home-mortgage financing. The share accounts of most of these associations are insured by the Federal Savings and Loan Insurance Corporation. The favorable experience of these associations in recent years has permitted the Corporation to build up reserves against possible future losses. To further protect investors in these associations in the event of future emergency, I again recommend legislation to provide, on a stand-by basis, authority for both the Federal home-loan banks and the Insurance Corporation to borrow from the Treasury. These provisions, which should become effective in 1950, would be roughly comparable to the Federal assistance already available for the commercial banking system. As in the case of the banking system, moreover, they should be accompanied by measures to authorize more rapid repayment of the Federal Government's investment in these institutions, and to provide more effective and specific authority for the Home Loan Bank Board to regulate lending by the member institutions.

Farm housing.—During the first 2 years of the new farm housing program, about 40,000 low-income farmers will receive help in obtaining better housing. In 1951, the Department of Agriculture will lend an estimated 45 million dollars, as well as provide general technical assistance and some direct grants for farm repairs and improvements.

Public housing programs.—The Public Housing Administration and local housing authorities throughout the country have been taking the steps necessary to get the new low-rent public housing program promptly under way. Preliminary loans have already been authorized to assist 227 communities plan projects which will comprise an estimated 220,000 dwelling units.

Our goal is to have 175,000 units under construction or completed by the end of the fiscal year 1951. Most of the Federal expenditures during this period will be for temporary loans for planning, site acquisition, and initial construction. Private funds will be used for much of the construction financing and nearly all of the permanent financing. The Federal Government indirectly guarantees the local housing authority obligations issued for these purposes by contracting to pay annual contributions sufficient to maintain the low rents required for the projects.

In addition, the Public Housing Administration supervises the management and disposition of 450,000 permanent and temporary housing units constructed to meet emergency war and veterans' needs. In the fiscal year 1951, an estimated 20,000 permanent units will be sold and 38,000 temporary units will be transferred to local agencies or demolished. This disposition of both types of housing can be accelerated if the Congress enacts the amendments to basic legislation which I have previously recommended. Expenditures of these programs are more than covered by receipts from sales and rentals; in addition to covering current expenses, receipts from sales and rentals will result in 62 million dollars in miscellaneous receipts to the Treasury in the fiscal year 1951.

General housing aids.—Under recent legislation, the Housing and Home Finance Administrator is initiating the comprehensive program of housing research which I have long advocated as a necessity to achieve our national housing objective. The long-range objective of this program is to improve knowledge about housing in order to aid in cost reduction and in stimulating the increased and sustained production of housing. Emphasis is being placed upon development of research plans with full participation by other interested public and private groups, so as to assure the maximum possible utilization of existing information and research facilities.

Slum clearance and community development.—Orderly development and redevelopment of our cities and metropolitan areas is essential if we are to realize the full potential growth in production and living standards in the decades to come. Each city clearly has the primary

responsibility for initiating and carrying through the far-reaching reconstruction plans required to meet its peculiar needs.

Under the provisions of the new slum clearance and community redevelopment program, the Federal Government now can provide financial assistance needed to augment local resources. Actual development will necessarily proceed gradually, area by area, with carefully planned provision for the housing of families displaced from slum areas and for the uses most appropriate for the redeveloped areas. For the first 2 years of the program, Federal expenditures will comprise loans to local public agencies to help them prepare plans and begin acquisition of sites. When acceptable local project plans are presented, the Federal Government contracts to pay a maximum of two-thirds of all net project costs. Contracts for loans and grants up to 325 million dollars for the fiscal year 1951 are authorized in the basic statute. The grants will not actually be paid until several years hence when the land assembly projects are completed, the redeveloped land sold or leased, and net project costs finally determined.

The Reconstruction Finance Corporation will continue to lend to public agencies for transit lines, tunnels, and other self-liquidating projects in cases where private financing is not initially available on reasonable terms. Private refinancing last year of the large outstanding loan to the Triborough Bridge and Tunnel Authority has made sufficient funds available to finance the new commitments currently anticipated.

Under legislation enacted last year, the General Services Administration is again making advances to State and local governments for public works planning. These advances are repayable when the actual construction occurs. The 2-year program of 100 million dollars will permit preparation of plans for public works estimated to cost more than 3 billion dollars. Every effort is being made to achieve proper coordination in the planning of Federal, State, and local public works and to emphasize projects most appropriate in the event of possible economic emergencies.

Major disasters in the future as in the past will from time to time require prompt Federal assistance to stricken communities. I again urge enactment of pending legislation to provide in advance adequate funds to meet such needs.

EDUCATION AND GENERAL RESEARCH

If education and research are to play their full role in strengthening our democratic society, we must expand our basic research, we must

devise types of education that will prepare youth more effectively for participation in modern society, and we must provide better educational opportunities for more of our people.

It is predominantly a responsibility of all government—local, State, and Federal—to provide for the education of our citizens. The Federal Government for many years has given financial aid to special aspects of education, such as vocational education, and to institutions for special groups, such as Howard University. It has become increasingly evident that Federal support of a more general character is needed if satisfactory educational opportunities are to be made available for all. The Nation cannot afford to waste human potentialities, as we are now doing, by failing to provide adequate elementary and secondary education for millions of children and by failing to help hundreds of thousands of young people who could benefit from higher education.

The importance of this need requires that we provide substantial Federal assistance to States for general educational purposes and for certain other important programs in this field.

To progress toward these objectives, this Budget includes expenditures for education and general research (not including large amounts in veterans, national defense, and other categories) of 434 million dollars in the fiscal year 1951, compared with 125 million dollars in 1950. More than three-fourths is for grants to States. The increase is entirely accounted for by the additional expenditures in 1951 resulting from the new legislation I am recommending. This legislation will entail a further moderate increase in later years.

Promotion of education—Elementary and secondary.—The high mobility that characterizes our people means that no State is immune to the effects of ignorance and illiteracy in other States. The welfare of the Nation as a whole demands that the present educational inequalities be reduced. Educational inequalities are primarily due to differences in the financial resources of States and localities. Income per capita in some States is less than half as great as in others. The States with the lowest incomes have the greatest proportion of school-age children and are unable to finance a fair educational opportunity even with greater effort in terms of tax burden.

School enrollments in practically every State have risen recently and will continue to rise owing to the increased birth rate. Millions of our children are now taught in overcrowded classrooms. For others education is provided only on a part-time basis. At the very time when we need more and better teachers, schools must still employ tens of thousands whose qualifications do not meet the standards

necessary to provide a satisfactory quality of teaching. Because salaries are generally inadequate, too few capable young people are preparing to enter the teaching profession.

For these reasons I urge the Congress to complete legislative action to permit the Federal Government to aid the States in support of the maintenance and operation costs of a basic minimum program of elementary and secondary education. The Budget provides for beginning this aid in the fiscal year 1951.

¹ Less than one-half million dollars.

² This Budget also includes 2 million dollars of appropriations to liquidate prior year contract authorizations.

There is a shortage of school buildings in many parts of the country due to the wartime deferment of construction and the increase in the school-age population. In many localities the need for facilities results from the sudden and substantial impact of Federal activities.

I recommend that the Congress enact legislation providing for grants to States for surveys of their need for facilities and their resources, and grants for the construction of buildings in those particular areas where Federal activities have been responsible for increased enrollments.

For a number of years several Federal agencies, under separate authorizations, have been helping to finance the education of children living on Federal property and in communities affected by Federal activities. I recommend that the Congress enact general legislation to establish a single program for all Federal agencies.

Promotion of education—Higher education.—Large numbers of young people and adults wish to continue their education beyond high school in order to prepare for entrance to professional schools, to receive additional technical or vocational training or to round out their general education. For many of our people, postsecondary education on a part-time or full-time basis, provided in institutions located within commuting distance of home, would meet their needs at low cost. Several of the States are now developing community institutions for this purpose. I have asked the Federal Security Administrator to make a comprehensive study of this development in order to determine whether the Federal Government might appropriately take any action to encourage the States and localities to establish and expand "community colleges."

Primarily because of low family incomes and of the high costs involved, more than half of our young people who could benefit from a college education are now unable to attend. This failure to develop to the fullest extent the capacities of our young people is a matter of national concern. As a step toward correcting this situation, I shall transmit to the Congress a legislative proposal to authorize a limited Federal program to assist capable youth who could not otherwise do so to pursue their desired fields of study at the institutions of their choice.

This Budget includes 1 million dollars as a tentative estimate of appropriations needed in the fiscal year 1951 to establish the required organization and to initiate the program. Assistance to students would begin in the fiscal year 1952.

National Science Foundation.—The Government is investing hundreds of millions of dollars in research—primarily in applied research in the military, atomic energy, and health fields. We must consider, however, not only the ways in which the great reservoir of scientific knowledge already at our disposal can best be utilized, but also the best paths to follow for the discovery of further basic knowl-

edge. To this end, we urgently need a National Science Foundation to stimulate basic research and to assure an effective balance among the Federal research programs. By developing a national research policy and by formulating a truly national research budget it should be possible to relate the activities of public and private institutions in a concerted effort to advance the frontiers of knowledge. The Budget provides 500 thousand dollars for the initial administrative expenses of the proposed National Science Foundation, in the expectation that the Congress will enact legislation, already passed by the Senate, to establish it.

Seventeenth decennial census.—The seventeenth decennial census of population, housing, and agriculture, to be taken this year, will provide basic data essential to important decisions by businessmen, governments, and other groups throughout the Nation. Expenditures for the census, estimated at 45 million dollars in 1950, will drop to 33 million dollars in 1951, and continue to decrease in succeeding years as tabulation and publication of the results are completed.

AGRICULTURE AND AGRICULTURAL RESOURCES

American agriculture is in a period of transition from the peak production requirements of the war and immediate postwar years to the normal requirements of a peacetime economy. During the war, every effort was made to increase agricultural production to meet the needs of our war economy and of our allies. In some cases desirable long-run goals for conservation of soil resources were deferred in the effort to increase production and to minimize the manpower requirements in agriculture. War dislocations and crop shortages abroad created an abnormal export demand for food grains and a few other farm products, financed largely by United States foreign relief and aid programs. In the next few years, this abnormal demand can be expected to adjust to a more normal level and distribution pattern for world trade.

Although this transition from war to peacetime needs has caused a decline in farm prices and a loss in farm income, the operation of Government price supports has served to cushion the decline and has been a major factor in preventing a serious postwar recession in the economy as a whole. The resulting benefits to workers and employers, as well as to farmers, have been many times the outlay of Federal funds. As the necessary adjustments in agriculture are completed, we should look forward to a reduction in budgetary expenditures for this purpose. The need for food and fiber products will continue to expand as our national income and population increase. Production on

existing land, however, must be gradually shifted from the grains and cotton to livestock and dairy production, permitting marginal lands, whose soil is in danger of loss from erosion of wind and water, to be put back into pasture and soil-conserving crops. It is important that Government programs facilitate these adjustments within agriculture as well as between agriculture and the rest of the economy.

¹ Additional borrowing authority of 2 billion dollars is recommended, to become available in the fiscal year 1950.

² Less than one-half million dollars.

Federal agricultural programs, in addition to promoting adjustments in agriculture and stimulating conservation of soil resources, are designed to improve the efficiency of farm production, to provide low-income farmers an opportunity to improve their economic status, to assure farmers generally a reasonable stability in farm income, and to improve the level of rural living.

Total Federal expenditures for agriculture and agricultural resources increased from 2.5 billion dollars in 1949 to an estimated 2.7 billion

dollars in 1950. Both years reflect the operation of price-support programs as farm prices declined. A decrease of 465 million dollars is expected in 1951, resulting from smaller outlays on price supports as acreage allotments and marketing quotas serve to reduce production of some 1950 crops, particularly cotton and corn.

Price support.—Net outlays of the Commodity Credit Corporation amounted to 1.6 billion dollars in 1949. This was the first year since before the war that mandatory price supports have resulted in large cash expenditures and the accumulation of loans and inventories in the hands of the Corporation. Expenditures in 1950, estimated at 1.5 billion dollars, will be largely for corn and cotton, with smaller outlays for peanuts, rice, tobacco, milk and milk products, potatoes, beans, cottonseed, linseed oil, and various other products. Approximately 90 million dollars of the expenditures will be for construction of new grain-storage facilities. In 1951, estimated Commodity Credit Corporation expenditures decline to 952 million dollars because of the expected effects of acreage allotments and marketing quotas on the 1950 crops. In later years, price-support expenditures should decline further as production is adjusted to normal demand.

Estimates for price-support expenditures are, of course, highly tentative, since the actual expenditures depend upon many factors which cannot be accurately forecast, such as the volume of exports, the rate of domestic consumption, and the influence of insects and weather conditions on yields.

The operation of price supports has resulted in the accumulation of large inventories, particularly of cotton, wheat, and corn. These commodity inventories represent assets which provide insurance against possible crop shortages in future years. It is estimated that the financial requirements of the Commodity Credit Corporation in the fiscal year 1951 may exceed its present borrowing authorization. I recommend that the Corporation be given an additional borrowing authority of 2 billion dollars, to be available beginning in 1950.

Farmers' Home Administration.—The Farmers' Home Administration provides management assistance to low-income farmers, and makes loans for farm enlargement and development, production and subsistence, water facilities, homesteads, and farm housing. (Farm housing loans financed under the borrowing authorization provided in the Housing Act of 1949 are classified under housing and community development.) The apparent decline in expenditures for the Farmers' Home Administration in 1950 and 1951 compared with 1949 is due to a shift in financing provisions. In 1949, loans were financed

from appropriated funds, and all loans were shown as expenditures, with collections on old loans going directly into miscellaneous receipts of the Treasury. In 1950 and 1951, most of the loan programs will be financed by a borrowing authorization, and the expenditure figure will reflect loans less collections.

Rural electrification and rural telephones.—On June 30, 1949, approximately 78 percent of all farms were electrified. As coverage is gradually extended to the remaining areas, Rural Electrification Administration loans for electrification will decline. Beginning in the fiscal year 1950, the Rural Electrification Administration will also make loans to rural telephone cooperatives and other independent telephone companies under recently enacted legislation. Loans for this purpose are expected to increase in 1951. Net loan expenditures of the Rural Electrification Administration are estimated to be 427 million dollars in 1951, compared with 355 million dollars in 1950 and 299 million dollars in 1949. I recommend that the Rural Electrification Administration be given new loan authority for the fiscal year 1951 amounting to 450 million dollars, of which 50 million dollars will be available for the rural telephone loan program.

Conservation.—The Soil Conservation Service provides technical advice and assistance to farmers in establishing a sound program of farm management to insure adequate protection and development of soil resources. Conservation practices are also encouraged through the agricultural conservation payments program carried out by the Production and Marketing Administration. By the end of the fiscal year 1951, about 90 percent of the farms of the country will be in organized soil conservation districts. Progress is being made in the preparation and application of desirable farm management plans for the adequate protection of our soil resources, but still greater emphasis will need to be given in future years to soil and water conservation, including the Department's upstream and on-the-farm flood-control program, to reduce siltation in the downstream areas and to enhance the value of projects constructed by the Bureau of Reclamation and the Corps of Engineers.

Expenditures for the Soil Conservation Service and for flood-control work of the Department of Agriculture are expected to increase from 64 million dollars in 1950 to 68 million dollars in 1951. Expenditures for the conservation and use program and for administering acreage allotments and marketing quotas are estimated to be 314 million dollars in 1951 compared with 285 million dollars in 1950 and 182 million dollars in 1949. I am recommending that the advance authori-

zation for the conservation and use program in the 1951 crop year, which will largely determine expenditures in the fiscal year 1952, be maintained at the 1950 crop year level of 285 million dollars.

Other financial aids.—Under the terms of the International Wheat Agreement, the United States will export 168 million bushels of wheat each year for 4 years at a price not in excess of \$1.80 a bushel. In return, importing countries have agreed to buy the wheat at not less than certain specified minimum prices. In the first year, the effective export price for United States wheat is \$1.80. It is estimated that the Commodity Credit Corporation, through which the program is financed, will spend 82 million dollars in the fiscal year 1950 to bridge the gap between the \$1.80 export price and the higher domestic market price. In 1951, such costs are estimated at 76 million dollars. The Corporation is to be reimbursed for each year's cost of the Wheat Agreement from appropriated funds. In 1951, an appropriation of 82 million dollars is recommended to reimburse the Corporation for the cost of the Wheat Agreement in the fiscal year 1950.

Additional financial aid is provided for farmers through the Sugar Act of 1948 and through the permanent appropriation for removal of surplus agricultural commodities. Expenditures under the Sugar Act depend on the volume of domestic sugar production for which sugar growers receive payments at the rates determined in the legislation. It is estimated that expenditures under the Sugar Act will be 69 million dollars in 1951. The permanent appropriation for removal of surplus agricultural commodities, established in 1935, provides a fund each year equal to 30 percent of customs duties. In 1951, it is estimated that 110 million dollars will be available in this fund.

Other development and improvement of agriculture.—Included in this category are the continuing basic services for agriculture, such as research on crop varieties, livestock and poultry, and the production and marketing of farm products; control and eradication of insects and plant and animal diseases; payments to States for experiment stations and cooperative extension work; and the general overhead expenses of the Department. For 1951, I recommend legislation to strengthen the regulation of commodity exchanges by the Commodity Exchange Authority.

NATURAL RESOURCES

This Nation has learned in recent years what it means to have limited natural resources. Our soil, forests, water, and minerals have been drawn upon prodigiously to support two major wars and

the rapid economic growth of our country. If we are to continue to expand production and employment we must use our remaining resources with the greatest possible effectiveness, following sustained-yield principles, developing resources as yet unused, and restoring where possible the resources we have depleted.

¹ Less than one-half million dollars.

² This Budget also includes 500 million dollars of appropriations to liquidate prior year contract authorizations.

A large share of the responsibility for such action falls upon the Federal Government, with respect to both resources on public lands and resources in private ownership. Atomic energy development depends upon our pressing ahead with the present Federal program on a broad scale. Continued economic growth in large areas of our country depends upon steady progress in Federal investment for

flood control, reclamation, electric power, and related facilities. The wisdom with which we utilize our mineral resources will influence our economic strength and security for generations to come. Continued public investment in these areas is a prerequisite in many fields to the expansion of the private investment which we want to encourage.

The dollars which the Federal Government spends on these programs are largely investment dollars. In many cases, such as irrigation, power projects, and the management and improvement of public lands and forests, the activities are wholly or partially self-liquidating. In all cases, economic benefits will accrue to the Nation for many years.

The 1951 Budget provides for total expenditures of 2.2 billion dollars in this area, an increase of 373 million dollars from 1950. Over one-third of the total and of the increase is attributable to expenditures for atomic energy. The balance represents primarily the requirements of projects under way in the fields of flood control and reclamation. This Budget provides for no new projects in these areas. Despite the large number of highly meritorious projects which have already been authorized for construction, we should not at this time add to the present high level of commitments. This policy is necessary both because of our over-all fiscal position and in order to provide the greatest possible measure of stability, under present economic conditions, in the rate of Federal public works expenditures.

Atomic energy.—The United States is seeking both to develop atomic energy for national defense purposes and to realize the great promise in its use for industrial and other peacetime purposes. Our atomic energy development program is a large venture in diverse fields—scientific research, medicine, engineering, industry—and will continue to require substantial outlays in the next few years.

The 1951 expenditures include increased amounts for the production of fissionable materials and weapons, and for the advancement of the science and technology of atomic energy, including accelerated construction of new facilities and development of new types of nuclear reactors. It is principally through the development of new reactors to produce fissionable materials and radioisotopes, generate power, and propel ships and aircraft, that the Atomic Energy Commission expects to evolve means of utilizing for peaceful purposes the energy released by nuclear fission.

Land and water resources.—We have learned a great deal in recent years about the extensive benefits which can be achieved by proper development of our land and water resources—including navigation, flood control, reclamation, power development, soil and forest con-

servation, preservation of fish and wildlife, and recreation. In the interest of sounder and more efficient programs in later years, emphasis in this Budget is placed on more thorough investigation and advance planning, and on assembling more complete basic data. However, the framework of Federal legislation and administrative organization under which we are carrying on development programs is in many respects inadequate and obsolete.

In order to obtain a thorough review of the present basic legislation, I have created by recent Executive Order a Water Resources Policy Commission, which will make recommendations later this year with respect to the broad policies which should guide Federal participation in the development, conservation, and use of water resources—both upstream and downstream—and closely related land-use activities. On the basis of these recommendations, I expect that it will be possible to propose up-to-date and effective policies for the Federal, State, local, and private efforts which are needed to make proper use of water resources throughout the country. Some changes in present Federal legislation can and should be made at this session of the Congress, but major changes should be deferred until the Commission's recommendations are available.

We also need to find more effective arrangements for administering Federal laws and programs concerning land and water-resource development. I have already recommended that the Congress authorize the consolidation of a number of Federal activities in the Pacific Northwest into a Columbia Valley Administration, and provide for its proper integration with other Federal agencies and with State and local responsibilities. In other areas also we should be alert to the opportunities for better administrative arrangements, building on successful experience in the Tennessee Valley and elsewhere, and adapting organizational patterns to the particular circumstances of different regions.

The activities of the Bureau of Reclamation and the flood-control program of the Corps of Engineers, involving the construction of dams, power facilities, canals, channels, and levees, will be limited in 1951 to continuation of work on projects started in prior years. Bureau of Reclamation projects now under way will require an expenditure increase of 64 million dollars in 1951. Expenditures required in 1951 to continue going work of the Corps of Engineers will increase by 77 million dollars over the 1950 total.

The expenditures by the Corps of Engineers and Bureau of Reclamation will result in materially increased power facilities in the next few years. In addition, continuing progress on the existing programs of the Bonneville and Southwestern power systems will result in a

further increase in transmission facilities. An increase of 44 million dollars is recommended for the Tennessee Valley development, notably for expansion of power facilities to meet the growing needs of the atomic energy program.

Experience in recent years has shown that it may not be possible to meet the shortages of water, which are a threat in some areas, through our extensive water-resource programs. I recommend, therefore, that the Congress enact legislation authorizing the initiation of research to find means for transforming salt water into fresh water in large volume at economical costs.

Public lands and national forests.—Over many years, our policy with respect to public lands and forests, now comprising over 900,000,000 acres, has gradually been broadened from one of disposal to one of management and conservation. The range, forest, and mineral resources of these lands have considerable commercial value and bring in substantial receipts; in addition they have important watershed, wildlife, and recreational value. In some respects, we have a long way to go before we shall be managing and conserving these resources to achieve their full use and preservation. We should plan to expand our rehabilitation, protection, and management of these resources in the years ahead; the 1951 Budget includes increased funds for these purposes.

Mineral resources.—The Bureau of Mines and the Geological Survey are carrying on important investigations and research in order to ascertain the extent of our mineral resources and the best means of conserving and using them. In view of the limited domestic supplies of many minerals, there is real need for increased exploration and conservation of strategic and critical minerals.

Through laboratory research and developmental work, including operation of demonstration plants, the Government has shown that some of our liquid fuel demands can be met from synthetic fuels produced from oil shale and coal. This Budget includes funds for a continuation of efforts to improve synthetic liquid fuels, and to narrow the cost differential between synthetic and natural petroleum products.

Use of recreational resources.—During the past travel season there were 32,000,000 visitors to the 181 national park areas. This number of visitors is the highest in the history of the National Park Service; it is double the number before the war. This heavy increase in the use of the park areas has enlarged the requirements for their management and protection. The increase of 9 million dollars in the 1951 Budget

for the Park Service will provide for additional management and maintenance costs and for some urgently needed construction.

Alaskan resources.—Alaska is a land of large natural resources—forests, fish and wildlife, minerals, land, and water—which must be developed in order for the area to make its contribution to the security and economy of the Nation. The 1951 programs discussed above include 23 million dollars for the development of natural resources in Alaska. Developmental expenditures in Alaska under other functions—in particular national defense, transportation, and social welfare—will amount to approximately 162 million dollars.

Indian land resources.—Large areas of Indian lands are rich in timber, oil, gas, and other minerals, the conservation and development of which should be related to programs affecting similar lands. As part of our general program for protecting their rights and for helping the Indians to become self-reliant citizens, funds are included in this Budget for initiating the long-range program for the rehabilitation of the Navajo and Hopi Indians in Arizona and New Mexico. While the greater portion of the amount recommended is for essential construction of educational and health facilities (classified in social welfare, health, and security), provision is made also for expanded conservation and development of the resources of the reservations. Funds are also included for some expansion in conservation activities on Indian lands in other areas, as well as for additional health, education, and other benefits to the Indian population.

TRANSPORTATION AND COMMUNICATION

Efficient transportation and communication services play a major role in promoting the economic growth of our country and in assuring our national security. Throughout our history, the Federal Government has traditionally supplemented private enterprise in this field, wherever necessary to assure adequate services at reasonable cost. To this end, the Government provides basic facilities; it regulates economic and safety aspects of commercial operations; it subsidizes essential services which could not survive without Government aid. In the fiscal year 1951, an estimated 1.7 billion dollars will be spent for these activities, a decline of 212 million dollars from 1950. This assumes a reduction of the postal deficit to a reasonable level, through enactment of postal rate increases.

Most of the Federal transportation expenditures are for the provision and operation of physical facilities. Direct Federal expendi-

tures for aviation facilities, marine navigation aids, waterway improvements, and roads will amount to about 600 million dollars in 1951. In addition, grants to State and local governments for the construction of highways and airports will account for 514 million dollars. Although these programs make important contributions to the development of our economy, over-all budgetary considerations make it impossible to proceed with them as rapidly as we should like. The 1951 Budget recommendations have been held as close to the 1950 level as program commitments would allow.

The long-term interests of the general taxpayer, as well as the users of transportation, will best be served by the development of a balanced transportation system, substantially independent of Government support. It is essential that the various promotional and regulatory activities of the Government fit together into a unified transportation program aimed at achieving that goal. At my request, the Secretary of Commerce recently prepared a report outlining the major policy issues which need to be resolved in order to assure such a program. This report is now being reviewed within the executive branch, and I shall later transmit recommendations for any legislation or other action that may prove appropriate.

Merchant marine.—Under the Merchant Marine Act of 1936, the Federal Government provides both construction and operating subsidies to the maritime industry, intended to offset the competitive effects of lower foreign costs. In the fiscal year 1951, operating subsidies alone are estimated to accrue in the amount of 63 million dollars, about five times the average annual level before the war. Shipbuilding subsidies have recently averaged close to 45 percent of the domestic cost of vessel construction, exclusive of national defense features financed entirely by the Government.

I am seriously concerned by the increasing cost of these existing subsidies and by the potential cost of new subsidies now being advocated. Our national security requires an efficient nucleus of merchant shipping and shipbuilding, adequate to permit such expansion as may be required by a future emergency. However, to limit the burden on the taxpayer, this subsidy program should be held to the minimum level that will satisfy national defense needs. In determining this level, full account must be taken of the availability of vessels from friendly nations in the event of an emergency. The existence of the North Atlantic Treaty provides a framework within which joint international planning of shipping mobilization may proceed.

¹ Less than one-half million dollars.² This Budget also includes 591 million dollars of appropriations to liquidate prior year contract authorizations.

The entire subject of Government aid to the merchant marine is now under active study by the executive agencies concerned. Until such studies are completed, we should proceed cautiously with existing subsidy programs, and should avoid commitments for any major new programs. The Budget for 1951 has been developed on that basis.

Expenditure increases in 1951 for ship construction and for operating subsidies will be partially offset by reductions in other Maritime

Commission activities. The maritime training program is being reduced in size, and consolidated at three locations. Authority for ship chartering, scheduled to expire on June 30, 1950, does not now appear to be required beyond that date. Expenditures will also be lower for the liquidation of wartime obligations.

Navigation aids and facilities.—The safety of surface and air operations at sea requires the navigational aids, rescue stations, and other services provided by the Coast Guard. Expenditures for these activities are estimated to increase from 158 million dollars in 1950 to 181 million dollars in 1951. This increase is largely for the replacement of over-age aircraft, and for more adequate maintenance of existing facilities.

The 1951 recommendations do not provide for starting construction on any new river and harbor projects of the Corps of Engineers. Projects already under way will, however, require an increase in expenditures from 212 million dollars in the fiscal year 1950 to 243 million dollars in 1951, and a further increase in 1952.

I repeat most emphatically my previous recommendations for approval of the Saint Lawrence waterway and power project. Authorization of the seaway, with its related power facilities, is a matter of urgency for our peacetime industry and our national security. In particular, each succeeding year reduces further our domestic reserves of iron ore, and increases correspondingly the importance of the seaway as a means of economical access to the proven ore deposits in Quebec and Labrador.

Aviation.—The Federal Government provides extensive aid, both direct and indirect, to civil aviation. This assistance, which is consistent with our traditional policy of promoting new forms of transportation, has made possible a spectacular development of air transport services, especially during the past decade. Although continued aid is required for the present, the industry should be expected to become increasingly self-supporting in the near future.

At present, direct financial assistance to the air lines is provided through air-mail payments, which are set generally at levels adequate to cover deficiencies in the carriers' commercial revenues. Subsidy is thus merged with the fair compensation for carrying mail, making it difficult to evaluate the cost of this aid in relation to its benefits. The recent rise in total air-mail payments—to an estimated level of about 125 million dollars in 1950—has made it increasingly important that the subsidy element be separately identified. I recommend, therefore, the immediate enactment of legislation to authorize the

separation of subsidy payments from mail compensation. Such subsidies should be paid from funds appropriated to the Civil Aeronautics Board specifically for that purpose.

The standard by which subsidy rates are determined under existing legislation may itself merit review in the light of the industry's present stage of development. Setting subsidies on the basis of the carriers' revenue needs may weaken the incentives for managerial economy, thereby increasing the difficulty of effective regulation by the Civil Aeronautics Board. While a considerable gain in efficiency has been realized by the air lines since the end of the war, there are undoubtedly important opportunities for further improvement. The 1951 Budget will permit the Civil Aeronautics Board to conduct more intensive investigations of air-line efficiency, and to develop operating cost standards. This should assist the Board in shaping its subsidy policies so as to retain, to the maximum extent possible, the normal business incentives for economy.

The continued growth of air transportation depends upon modernization of our airway facilities to permit safe and regular flights under all weather conditions. Expenditures for the development, installation, and operation of such facilities are estimated at 136 million dollars in the fiscal year 1951, 39 million dollars above 1950. Other activities of the Civil Aeronautics Administration—including safety regulation and airport grants—will require expenditures of 93 million dollars in 1951, 3 million dollars higher than in 1950.

Highways.—Major development of our highway system is required to overcome obsolescence and to handle safely and efficiently the steadily increasing traffic loads. This is primarily the responsibility of States, counties, and municipalities. The Federal Government must, however, continue providing financial assistance to the extent necessary to assure a basic system of national roads, built to uniformly adequate standards. Under existing legislation, the Bureau of Public Roads is expected to spend 504 million dollars for highway improvement in 1951, mainly in the form of grants to States. Apart from the emergency relief programs during the depression, this will be the highest annual level of Federal highway expenditures to date.

All of the Federal-aid funds thus far authorized have been apportioned to the States, and new authorizing legislation is therefore required during the present session of the Congress. I recommend that such legislation provide an annual Federal-aid authorization for the next 2 years of 500 million dollars, an increase of 50 million dollars above the current level. Within this total, increased emphasis should be placed upon the Interstate Highway System, a limited network of

routes which is of greatest national importance to peacetime traffic needs as well as to our national defense. The recommended shift in emphasis, and increase in program level, should permit a satisfactory rate of improvement for this System.

Postal service.—Postal rates have not kept pace with increasing costs and, as a result, the postal deficit has reached excessive proportions. Since 1939, the average expense per postal transaction has increased by 67 percent, owing mainly to higher wage and transportation costs; in contrast, average revenue has increased by only 32 percent. On the basis of existing postal rates, the deficit for 1951 is estimated at 555 million dollars. Cases now pending before the regulatory commissions may result in higher payments for transportation, and hence may correspondingly increase the deficit.

The Postmaster General is exploring fully all opportunities for reducing the cost of the postal operation. Modernization of the motor vehicle service, and the mechanization of mail handling, are among the items receiving particular attention. I am confident that the steps now being taken will in the long run help to assure the maximum efficiency of the postal operation. However, the potential savings, if present service standards are maintained, appear small in relation to the prospective deficit; they do not reduce significantly the need for higher revenues at this time.

I have repeatedly urged the Congress to raise postal rates so as to bring them into line with postwar costs. The need for such corrective action becomes steadily more urgent. It is unsound and unnecessary for the postal operation to continue as a growing burden on the general taxpayer. Instead, the users of the postal service should as a group pay the full cost of services received. This requires that the postal deficit be limited to the cost of air-line subsidies, Government mail, franked mail, and other items properly chargeable to the general revenues.

Last year, the Postmaster General recommended to the Congress postal rate revisions designed to yield additional revenue of about 250 million dollars per year. Subsequent increases in employees' pay and in transportation costs have rendered this amount inadequate. I therefore strongly urge again that the Congress pass legislation to bring the postal revenue more in balance with the expenditures of the service. The only alternative to increased rates or a continued large deficit would be an undesirable reduction in the quality of services provided. As a longer range solution to this problem, there should be sufficient flexibility in the postal rate structure to permit at all times a proper relationship between revenues and expenses.

Regulation.—Through regulation, the Federal Government seeks to assure the adequacy, economy, and safety of transportation and communication services. Although the expenditures required for this activity are relatively small, this is one of the more important responsibilities exercised by the Government in this field. The 1951 Budget includes moderate increases for the regulatory commissions, to permit them to reduce backlogs of pending cases, and to meet new problems more promptly.

FINANCE, COMMERCE, AND INDUSTRY

As part of its broad program for balanced economic development, the Federal Government provides a variety of general financial and other aids to promote the stability and growth of independent businesses. These are supplemented by regulatory action designed to remove monopolistic barriers to production and commerce. In addition, in two areas—exports and rents—it is necessary to continue, on a limited basis, wartime controls now in effect. Total expenditures in 1951 are estimated at 212 million dollars, of which net expenditures for loans to business will account for about three-fourths.

¹ Less than one-half million dollars.

Business loans and guarantees.—In the past year, the Reconstruction Finance Corporation has contributed substantially to the financial stability of independent businesses, especially small business. The change in economic conditions last spring resulted in many financing needs which private lenders failed to meet, and consequently applications for Reconstruction Finance Corporation business loans increased rapidly. During recent months, the Corporation has been making about 450 new loans per month, or nearly twice the rate of a year ago. With the favorable business outlook now anticipated, a somewhat lower level of new loan authorizations is estimated in 1951, but net expenditures are expected to rise above 1950 because of disbursements on loans authorized this year. In future years, repayments will provide increasing offsets to disbursements on new loans.

To make sure that this program will meet the needs of business for long-term credit, I am renewing the recommendation for a substantial increase in the present 10-year maximum on loan maturities. I also recommend an addition to the funds available for business loans.

Promotion and regulation of business.—Since the war we have substantially strengthened our antimonopoly program, but continued improvement is essential. I have asked the Secretary of Commerce, in consultation with the Attorney General, the Federal Trade Commission, and the Council of Economic Advisers, to develop recommendations for increasing the effectiveness of this program. A major aspect of this study will be the development of methods to facilitate establishment of small businesses, to promote their stability and growth, and to remove obstacles to their survival as independent competitive enterprises.

The Budget also provides additional funds for strengthening the antimonopoly activities of the Federal Trade Commission. Among other things, this will permit a study of trends in industrial concentration to guide the formulation of Federal policy and to aid in prosecuting specific cases.

As the record levels of housing construction have gradually reduced the housing shortage, rent controls have been removed in many communities. This trend probably will continue. To prevent serious hardship to tenants in areas where shortages remain critical, I am recommending a 1-year extension of rent control authority beyond the present expiration date of June 30, 1950.

Improvement in the supply situation has permitted removal of most commodities from export control. Export licensing of some strategic commodities, however, remains essential because of the uncertain international situation.

LABOR

The programs of the Federal Government in the field of labor are designed to encourage increasingly effective use of our major productive resource—the skill of the American workingman—with the ultimate objective of assuring higher production and standards of living. To this end, the Government fosters responsible and peaceful labor relations based on collective bargaining by offering voluntary mediation services and providing a remedy for unfair labor practices. It promotes fair labor standards for wages, hours, and employment conditions to prevent exploitation and unfair competition based on substandard conditions. It finances a free placement service to aid industry, agriculture, and workers and insures workers, mainly through a Federal-State system, against total loss of income during periods of temporary unemployment. Finally, it collects and publishes information on wages, employment, prices, construction, and other subjects in order that business and economic planning and decisions may be on a factual basis.

The importance of these programs is by no means measured by the total expenditures of 243 million dollars in 1951, since many of the activities are regulatory in nature and require only minor expenditures. Of total expenditures, about 70 percent consists of grants to States for administration of the Federal-State employment service and unemployment compensation system.

Placement and unemployment compensation activities.—The Federal Government sets standards and pays all administrative costs for State operation of public employment offices and unemployment insurance. Public employment offices placed applicants in more than 12,000,000 jobs during the past fiscal year. Of the total job placements, over 7,000,000 were on farms. Still more placements are expected in 1950 and 1951.

The unemployment compensation work load is closely related to general economic conditions. Last year the Congress recognized this fact by appropriating a contingency fund of 5 percent of the basic grants, to be used if the number of claims increased. It now appears that this contingency fund will not be sufficient to pay for the increase in work load which has occurred. I shall, therefore, request a supplemental appropriation for 1950. For 1951, the Budget recommendations for the basic grants assume a somewhat lower average level of unemployment but call for a contingency fund of 10 percent to obviate delays in paying valid claims, should the volume of claims suddenly rise.

LABOR

Mediation and regulation of labor relations.—In my State of the Union Message I have discussed the imperative need for basic revision of the Labor-Management Relations Act of 1947 to incorporate sound provisions on the rights and responsibilities of labor and management in relation to each other and to the general public, and to remove unworkable administrative provisions in the present law. This Budget allows for improving mediation and conciliation activities by providing funds to permit relatively equal service for all parts of the country and for the recently expanded organization for adjustment of employee grievances in the railway industry.

Labor standards and labor training.—The 1949 amendments to the Fair Labor Standards Act, while inadequate in many respects, made substantial improvements in the law by raising the minimum wage to 75 cents an hour and tightening the provision against the use of child labor in production for interstate commerce. I am recommending increased funds for the additional inspection and legal staff which effective enforcement will require. Such enforcement is essential, not only to protect the purchasing power of workers who need it most, but also to protect law-abiding employers from unfair competition.

Two legislative proposals respecting employment conditions, and one on training, should be enacted promptly. First, a permanent Fair Employment Practice Commission should be established. To keep minority groups economically submerged is not only unjust and discriminatory, but also prevents the best use of available manpower. Secondly, I am renewing my recommendation for grants to States to assist them to encourage industrial safety. The Federal Government and the States spend many millions of dollars each year to rehabilitate injured workers. It is only common sense to do what we can to prevent injuries in the first place. Finally, I recommend that a labor extension service be established in the Department of Labor to make available to wage earners educational programs designed to promote sound labor-management relations. Such a program would require about 3 million dollars a year after it gets into operation but would not have substantial effect on the 1951 Budget because of the time required to get under way at the local level.

Trust accounts and unemployment compensation legislation.—Last year's temporary but sharp rise in unemployment provided the first real test of the Federal-State unemployment insurance system since its establishment 15 years ago. The system was of great help in tiding workers over temporary unemployment and in sustaining markets for the products of employed workers. During the last 12 months, a total of 1.7 billion dollars in benefits was paid from the trust fund. At the same time, major shortcomings of the present system became painfully clear. It does not cover enough workers, and does not replace enough of the wages lost through unemployment. I shall submit proposals for legislation to overcome these and other defects by strengthening the present Federal-State system.

At present, only about two-thirds of the workers employed in nonagricultural industries are insured against the hazards of temporary unemployment. Coverage should be extended to employees of small establishments, of industries processing agricultural products, and of the Federal Government. This would raise coverage to about three-fourths of nonagricultural workers. Furthermore, legislation should include minimum Federal standards for eligibility and disqualifications, in order to remove some of the present inequalities in administration among the States.

Present weekly benefits now average about one-third of previously earned weekly wages. The insurance was originally intended to replace at least half of previous earnings—the minimum needed to pay for food and rent—but benefits in many States have not kept up with price rises. In order to assure more nearly adequate benefits

throughout the Nation, the Federal law should provide minimum standards for benefits paid from the State trust accounts. These standards should require benefits of 50 percent of previous wages up to 30 dollars a week for single workers, with additional amounts for dependents up to 42 dollars a week for a worker with three dependents. The legislation should also require that benefits be available to eligible claimants for at least 26 weeks.

In addition to these changes in coverage and benefit standards, I shall recommend amendments to the financing provisions of present legislation, including establishment of a reinsurance system to provide grants to States whose reserves for benefits become temporarily low, despite reasonable measures to maintain adequate funds. Although most States have sufficient reserves to pay higher benefits without increasing taxes, one or two States may need assistance by next autumn or shortly thereafter.

The proposed legislation will affect chiefly the trust fund rather than the appropriations for administration. For both the trust fund and the appropriations, the effect in the fiscal year 1951 will be slight because time will be required for the State legislatures to revise their laws to conform with new standards established by the Congress. Benefits for Federal workers will represent the principal continuing budgetary cost of my recommendations. (The estimated expenditures for these benefits in the fiscal year 1951 are shown under general government.) Estimates for proposed reinsurance appropriations are also included in the Budget. Expenditures from these appropriations will be necessary only if State reserves become inadequate to provide for temporarily high numbers of insured unemployed.

GENERAL GOVERNMENT

The expenditures for general government cover legislative, judicial, and financial management activities, and also many Government-wide administrative services and programs such as property and records management, public buildings construction and maintenance, and the operations of the Civil Service Commission. The total expenditures for these programs for the fiscal year 1951 are estimated at 1.3 billion dollars compared to 1.2 billion for the current fiscal year. The increase is primarily for strengthening further the system of tax collection, for the Government payment to the employees' retirement system, and for public building sites and plans.

Internal revenue operations.—Efficient operation of the Bureau of Internal Revenue, the Federal Government's primary tax collection agency, is essential to protect the Federal revenue and to assure fair treatment to taxpayers. Studies of the organizational structure and administrative procedures of this agency have been under way for some time and have already resulted in many improvements, including the mechanization of some operations. These have enabled the Bureau to strengthen and extend its audit and enforcement activities, thereby collecting additional taxes, not only directly, but also by stimulating a greater degree of voluntary compliance. Further improvements are in prospect. The 1951 appropriation provides for increased funds for these purposes.

Property management.—Under mandate of the Federal Property and Administrative Services Act of 1949, the General Services Administration was established to consolidate a number of Government-wide activities concerned with the procurement, maintenance, and disposal of Federal property. This was in accord with a major recommendation of the Commission on Organization of the Executive Branch of the Government. The General Services Administration is currently undertaking to establish records storage centers and is emphasizing the expansion of inspection services and traffic management, determination of purchasing requirements, and controls to insure proper utilization of Government property.

Civilian employees' retirement system.—Federal employees covered by the civil service retirement and disability system are required by law to contribute 6 percent of their salaries toward future benefits; the Government contributes the remaining cost of benefits provided under the system. The expenditures of 333 million dollars

¹This Budget also includes 41 million dollars of appropriations to liquidate prior year contract authorizations.

estimated for 1951 represent the Government payment necessary to enable the fund to cover its currently accruing obligations.

Construction of public buildings.—Of estimated expenditures of 53 million dollars in 1951 for construction of public buildings, more than half is for acquiring sites and drawing plans for future construction in accordance with the Public Buildings Act of 1949. Expenditures for actual construction will be limited to projects already under way.

Operation of the Weather Bureau.—Modest increases are requested to meet the increased demand for the services of the Weather Bureau. These include the requirements for general weather service, aviation forecasts, and assisting in the protection of our forests from fire hazards. Increases in Atlantic weather patrol observations and in forecasting and briefing services to pilots on international flights are to meet commitments under the International Civil Aviation Organization.

Government of Guam, Samoa, and the trust territory of the Pacific islands.—It is the announced aim of this Government to accord civil government to the inhabitants of its non-self-governing Pacific Territories—Guam and American Samoa—which have been under American rule for half a century, and the trust territory of the Pacific islands which we administer under a United Nations trusteeship agreement. As a partial step in this direction I have transferred administrative responsibility for Guam to the Secretary of the Interior and have directed that arrangements be made for a similar transfer on July 1, 1951, with respect to American Samoa and the trust territory. This Budget includes 2 million dollars for Guam as part of a 4 million dollar appropriation recommended for administration of Territories and possessions for the fiscal year 1951. I urge that the Congress enact the proposed organic acts now before it, providing for the civil government of Guam and American Samoa, and similar legislation for the trust territory of the Pacific islands.

Development of the National Capital.—I renew my request that the National Capital Park and Planning Commission be established on a stronger statutory basis. This would enable the Commission to fulfill more effectively its obligations to plan the orderly, coordinated development of the District of Columbia and nearby areas in Maryland and Virginia.

Government Services Corporation.—Several organizations not within the normal governmental framework now provide, in Government buildings and on Government property, cafeteria and recreational services for Federal employees. I recommend that the Congress pass legislation now before it to create a self-supporting Government corporation to carry out these essentially governmental responsibilities.

Federal employees' unemployment compensation.—The proposed broadening of the coverage of the unemployment compensation pro-

gram, recommended elsewhere in this Message, requires a Government payment to extend coverage to Federal employees. This Budget includes 13.5 million dollars for an appropriation to cover benefit payments in the second half of fiscal year 1951, when it is anticipated the program will be in operation.

Civil rights program.—This Budget includes funds to expand civil rights enforcement activities of the Department of Justice under present laws. In addition to the amount provided for establishing a Fair Employment Practice Commission, there is included 800 thousand dollars as the amount needed under proposed legislation to establish a permanent Commission on Civil Rights, which would continuously review our practices and policies in this field, and to provide for an additional Assistant Attorney General to supervise a needed civil rights division in the Department of Justice.

INTEREST ON THE PUBLIC DEBT

Interest on the public debt is a fixed obligation of the Government, determined by the amount of Federal securities outstanding and their interest rates. Payments are financed by permanent indefinite appropriations which do not require annual congressional action.

INTEREST ON THE PUBLIC DEBT

[Fiscal years. In millions]

Agency	Expenditures			Appropriations for 1951 (permanent indefinite)
	1949 actual	1950 estimated	1951 estimated	
Treasury Department.....	\$5,352	\$5,725	\$5,625	\$5,625

Interest payments of 5.6 billion dollars estimated for 1951 are lower than those in 1950, because a shift in reporting methods caused a nonrecurring addition of over 200 million dollars in 1950. Under the new method, effective in the fiscal year 1950, all interest payments are now reported as they become payable rather than when they are actually paid. As a result of the transition, the 1950 total includes interest for prior years that was payable but had not yet been presented for payment at the beginning of the fiscal year 1950. This change does not significantly affect the reporting of interest payments in 1951 and later years.

Apart from this nonrecurring item, total interest payments will continue to rise in the fiscal year 1951. Each year more of the savings bonds sold during the war reach the stage where interest accrues at higher rates. Moreover, continuing accumulations of Government trust funds will cause further increases in special issues to such funds of obligations bearing rates of interest higher than the average on the entire public debt. Finally, the Budget deficits this year and next will add to the total volume of interest-bearing debt. Savings in refunding operations, however, will offset some of this increase in interest cost.

Interest payments on the Federal debt are widely distributed, and represent a particularly important source of income to certain institutions and groups. Almost 2 billion dollars of interest in the fiscal year 1951 is expected to go to individuals and unincorporated businesses. About 1 billion dollars will be paid to commercial banks and almost 1.5 billion to insurance companies, mutual savings banks, and other private investors. Another 1 billion dollars will go to Government retirement funds, social security funds, and various other Government trust funds to build up reserves out of which future benefits will be paid. Over 250 million dollars of interest in 1951 will be paid to the Federal Reserve banks; more than half of such payments will be returned to the Treasury and deposited into miscellaneous receipts. The remainder will be used to defray most of the operating expenses of the Federal Reserve System, to pay dividends to member banks, and to add to surplus.

PROPOSED LEGISLATION—A SUMMARY

The following table shows estimated expenditures, appropriations, and other authorizations included in the Budget for programs under proposed legislation. The second table shows the effect of proposed legislation upon the Government trust funds.

Many of the programs listed under proposed legislation are actually continuations of programs already in existence but for which new authorizations are required to permit their continuance in 1951. These items are set forth separately in the first part of the table.

The Budget also contains a general reserve for contingencies. It is designed as a minimum provision for activities not now definitely foreseen, but on which action may be required before the end of the fiscal year.

Net accumulation in reserve.....	215.0

The Budget for the fiscal year 1951 reflects the great strength and the extensive responsibilities of this country. It represents much more than a collection of facts and figures—it represents the program which I am recommending for our Government in the months ahead. It will influence the course of events for years beyond 1951, and the success with which we push ahead toward enduring peace, continuing economic growth, and a steady strengthening of our democratic society.

In preparing this Budget, I have earnestly applied the fundamental principles which, in the present circumstances, should guide us in the conduct of our affairs. It is an honest Budget, which meets the realities which face us. It provides for essential activities on a minimum basis and no more, despite the great pressures which exist on every side for larger expenditures on specific programs. It meets the obligation of our Government to nourish and support the economic and social health of our Nation. It not only provides for substantial progress in 1951 toward our goal of budgetary balance but also lays the basis for further improvement in subsequent years consistent with the welfare of the country.

We are still a young and growing Nation with a great reserve of human skills and productive resources. We have made and shall make more progress toward a less threatening world. Our strength is not being impaired by our present great responsibilities and the temporary deficits required to meet them. Given wise policies, which meet the broadest tests of national welfare, we can look forward to the future with confidence.

HARRY S. TRUMAN.

JANUARY 3, 1950.

Table 13. Receipts From and Payments to the Public.

INTRODUCTION TO PART I

Part I of the Budget contains the President's estimates of receipts, expenditures, and recommended new authorizations for the fiscal year ending June 30, 1951, together with information showing the effect thereof on the condition of the Treasury. In addition, it shows the latest estimates for the fiscal year in progress, 1950, and actual data for the last completed fiscal year, 1949.

This part is in three sections: (1) Tables 1 to 9, inclusive, deal with Budget transactions—the general and special accounts, checking accounts of corporations and enterprises, and the effect of financial operations on the Treasury cash balance and on the public debt; (2) tables 10 to 12 deal with the trust accounts and special deposits; and (3) table 13 summarizes receipts and expenditures of all accounts, after excluding intragovernmental and non-cash transactions.

TYPES OF TREASURY ACCOUNTS

The receipts and expenditures shown in the Budget are handled through several types of Treasury accounts, as follows:

General accounts.—General accounts are credited with taxes and any other receipts not earmarked for specific purposes by the law, and they are charged with appropriations and expenditures payable "out of any money in the Treasury not otherwise appropriated." Accounts not specified otherwise in the Budget are general accounts.

Special accounts.—Special accounts are credited with receipts belonging to the Government which are earmarked by law for a specific purpose; they are charged with items payable out of such receipts.

Checking accounts of corporations and enterprises.—Most Government corporations and some other enterprises carry money in checking accounts with the Treasurer of the United States. Such accounts are not subject to appropriation procedures but are handled somewhat similar to commercial checking accounts with banks.

Trust accounts.—Trust accounts are credited with receipts held in trust by the Government; such money is appropriated and expended for the purposes of the trust. In the larger trust funds, amounts not required for making payments currently are invested in public-debt securities of the United States.

Special deposits.—Certain agencies, including mixed-ownership corporations, carry some moneys on special deposit with the Treasurer of the United States. Such accounts are somewhat similar to commercial checking accounts with banks. Special deposits are also used for holding collections in suspense temporarily, pending further disposition.

BASIS FOR REPORTS AND ESTIMATES

Receipts.—Taxes are stated on a collections basis, adjusted for 1949 to the amounts reported in the daily Treasury statement. Miscellaneous receipts are reported and estimated on the basis of amounts covered into the official accounts, adjusted for 1949 to the daily Treasury statement.

Expenditures.—Expenditures are reported and estimated on a checks-issued basis, adjusted in total for 1949 to the daily Treasury statement (which is on a checks-issued basis for some agencies and accounts and on a checks-paid basis for others). "Checks issued" include, in addition to checks, interest on the public debt becoming payable, and interfund payments accomplished by transfer-and-counter warrants.

Appropriations and other authorizations.—The Budget tables show appropriations and other authorizations becoming available for each year, even though some are made immediately available in a preceding year and a few supplemental and deficiency appropriations are actually made in a subsequent year. Balances of appropriations and authorizations brought forward from prior years are not reported, except where new action by Congress (in the form of a reappropriation or an extension of contract authorization) is required to keep the authorization available.

Public debt and Treasury cash balance.—The tables show the public debt and the Treasury cash balance at the close of the last two fiscal years, as reported in the daily Treasury statement. Estimates for 1950 and 1951 are on a basis consistent therewith.

CONCEPT OF "BUDGET" TOTALS

The totals of budget receipts, expenditures, and authorizations stated in tables 1 to 9 cover governmental financial transactions generally, with the following exceptions and deductions:

Transactions excluded from budget totals and from the computation of the budget surplus or deficit.—Trust accounts, postal accounts, and special deposit accounts, borrowing and repayment of borrowing, and the few bank accounts which are outside the Treasury or the Treasurer's responsibility do not affect budget receipts, budget expenditures, or the surplus or deficit. However, contributions from the general fund to the postal accounts and to trust funds (except for the contribution to the old-age and survivors' insurance trust fund as explained below) are shown as budget expenditures.

Transactions deducted in equal amounts from budget receipts and expenditures.—"Capital transfers" representing payments from expenditure accounts of wholly owned Government corporations and enterprises into miscellaneous receipt accounts of the Treasury, for retirement of paid-in capital or disposition of earnings, are excluded from both receipts and expenditures, and are shown as memoranda at the end of tables 6 and 8.

Transactions shown as deductions from receipts.—Refunds of receipts and the appropriations from the general fund for the Federal old-age and survivors' insurance trust fund (and similar social welfare trust funds under proposed legislation) are shown as deductions from receipts (in tables 1 and 6), rather than as appropriations and expenditures.

Expenditures stated on a basis net of collections.—In certain cases collections are netted against expenditures, rather than being treated as budget receipts. These are:

Collections placed in checking accounts of corporations and enterprises; collections of revolving funds, such as the general supply fund; interagency payments received for reimbursement to appropriations or as advances to working funds, where one agency performs services for another; refunds to appropriations; and certain other payments received from non-Federal sources, where the law provides that they shall be treated as repayments to appropriations.

TRUST TRANSACTIONS

Tables 10 to 12 show (a) the gross transactions of trust accounts except that investments are stated net of redemptions, (b) the net excess of expenditures over collections in the case of special deposit accounts, including checking accounts of mixed-ownership corporations, and (c) the net expenditures of Government corporations for redemption of their debt in the hands of the public (less sales of such debt to the public).

CONCEPT OF THE CONSOLIDATED CASH TABLE

Table 13 presents information on the flow of money between the Federal Government as a whole, including both budget and trust transactions, and the public. The public is defined to include individuals, banks (including the Federal Reserve banks and Postal Savings System), partnerships, private corporations, State and local governments, foreign governments and international organizations.

This table therefore includes the trust accounts and special deposit accounts, which are not represented in table 1 or its supporting tables. On the other hand, this table excludes intragovernmental transactions, such as budget expenditures which are Government contributions to trust accounts. It also excludes noncash items of a public debt nature, which represent an obligation of the Federal Government to make a cash payment in the future; an example is interest now being accrued on savings bonds held by the public, included in budget expenditures but not counted here because the cash will not pass into the hands of the public until the bonds are redeemed.

Just as the receipt and expenditure figures differ from the budget totals used in table 1 as explained above, so also do the debt figures used in this table differ from the figures used in table 5. The reason is the same—the debt figures used in this table include both Treasury borrowing and Government corporation borrowing, but exclude borrowing which is not from the public (such as borrowing from the trust funds) and noncash borrowing such as the interest accrued on savings bonds.

CLASSIFICATION OF DATA

A new classification of budget receipts by source is introduced in table 6 of this Budget. It follows the general outline of the changes in general receipt accounts made by the Treasury July 1, 1949.

Budget authorizations and expenditures are classified in two ways: By functions, in tables 1, 3, and 7, and by agency or other major units in tables 2, 4, 8, and 9. The functional classification indicates the broad purposes and programs of the Government. Recent changes in the functional classification are explained in appendix 5.

TYPES OF AUTHORIZATIONS

Appropriations.—Appropriations authorize employment of personnel, purchase of supplies and equipment, awarding of contracts, the making of grants, or the incurring of other obligations, and the withdrawal of funds from the Treasury for payment of these obligations.

Because some time usually occurs between the incurring of an obligation and the payment therefor, appropriations are ordinarily made available for expenditure for two fiscal years after they expire for obligation purposes.

Reappropriations.—A reappropriation continues available part or all of the unused balance of an appropriation which would otherwise expire for obligation purposes.

Contract authorizations.—A contract authorization is a statutory authorization by the Congress—usually in an appropriation act—empowering the designated agency to enter into contracts and incur obligations for a stated purpose prior to the enactment of an appropriation.

A contract authorization does not authorize the payment of the bills arising from the obligations incurred. In order to make payments, an appropriation to liquidate the contract authorizations must be enacted by the Congress. Such appropriations to liquidate contract authorizations are included with other appropriations in tables 3, 4, 7, and 8, but are identified in table 9.

Authorizations to expend from public debt receipts.—In lieu of appropriations, the laws in some cases authorize expenditures to be made directly from money which the Treasury borrows. Spending under such authorizations has the same effect on budget totals and on the surplus or deficit as the spending of money which has been directly appropriated.

New obligational authority.—The sum of the authorizations named, less the portion of the appropriation which is to liquidate contract authorizations, comprises the authority newly granted to incur financial obligations.

OFFICIAL ESTIMATES AND FORECASTS

The estimates for appropriations and other authorizations contained in the Budget are of two types: (1) official or formal estimates, recommended at this time for action; and (2) forecasts of supplemental items which will be submitted to the Congress later.

Forecasts of specific items.—Anticipated supplementals for various appropriations for the year 1950 are shown in a separate column, following the actual appropriations already made, in tables 3, 4, 7, 8, and 9. For 1951, the official estimates and the forecasts are in the same column of the tables; the forecast items are distinguished, however, by separate stub-column entries. Part II contains the appropriation details to support the official estimates. Forecast items are included as one-line entries in the chapter summary tables and are mentioned in the program and performance statements; the details on these items will be submitted later.

Reserve for contingencies.—In addition to the various specific supplemental items, a forecast of additional needs, not now foreseen in detail, appears opposite the entry "Reserve for contingencies," in tables 1 to 4 and table 7. This is not a proposal for a lump-sum appropriation to some reserve fund; it is merely a method of making allowance in the budget totals for possible supplemental appropriations to be submitted later if the need arises.

TABLE 1
BUDGET RÉSUMÉ

Based on existing and proposed legislation

[For the fiscal years 1949, 1950, and 1951]

PART A—BUDGET RECEIPTS AND EXPENDITURES

Description	1949 actual	1950 estimate	1951 estimate
BUDGET RECEIPTS (see table 6 for detail):			
Direct taxes on individuals.....	\$18,725,152,438	\$18,668,000,000	\$18,938,000,000
Direct taxes on corporations.....	11,553,689,234	11,175,000,000	10,518,000,000
Excise taxes.....	7,551,485,078	7,631,000,000	7,642,000,000
Employment taxes:			
Existing legislation.....	2,486,717,420	3,047,700,000	3,342,900,000
Proposed legislation.....			1,450,000,000
Customs.....	384,484,795	375,000,000	375,000,000
Miscellaneous receipts:			
Existing legislation.....	2,071,996,555	1,288,573,147	1,095,782,034
Proposed legislation.....			60,000,000
Deduct:			
Appropriation to Federal old-age and survivors insurance trust fund:			
Existing legislation.....	1,690,295,705	2,245,000,000	2,515,000,000
Proposed legislation.....			1,200,000,000
Appropriation to medical care insurance trust fund: Proposed legislation.....			250,000,000
Refunds of receipts (excluding interest).....	2,837,542,005	2,177,045,464	2,151,096,000
Total Budget receipts.....	38,245,667,810	37,763,227,683	37,305,586,034
BUDGET EXPENDITURES (see table 7 for detail):			
National defense.....	11,913,515,099	13,148,389,185	13,544,811,618
Veterans' services and benefits.....	6,668,867,310	6,905,438,951	6,079,780,412
International affairs and finance.....	6,461,687,817	5,963,981,819	4,710,606,863
Social welfare, health, and security.....	1,907,354,679	2,296,643,501	2,713,856,047
Housing and community development.....	282,415,913	1,006,176,789	1,328,863,130
Education and general research.....	69,795,742	125,029,794	433,669,011
Agriculture and agricultural resources.....	2,511,750,283	2,671,007,298	2,206,163,966
Natural resources not primarily agricultural.....	1,512,120,904	1,844,672,629	2,217,823,389
Transportation and communication.....	1,621,797,984	1,893,577,401	1,681,769,876
Finance, commerce, and industry.....	119,924,385	224,624,185	212,037,892
Labor.....	193,313,380	219,297,162	242,608,355
General government.....	1,169,887,631	1,222,866,213	1,266,766,847
Interest on the public debt.....	5,352,301,989	5,725,000,000	5,625,000,000
Reserve for contingencies.....		50,000,000	175,000,000
Adjustment to daily Treasury statement basis.....	-272,374,742		
Total Budget expenditures.....	40,057,107,858	43,296,604,927	42,438,757,406
Surplus or deficit (-).....	-1,811,440,048	-5,533,377,244	-5,133,171,372

PART B—PUBLIC DEBT

Public debt at beginning of year	\$252,292,246,513	\$252,770,359,860	\$258,400,000,000
Increase through excess of Budget expenditures over receipts.....	1,811,440,048	5,533,377,244	5,133,171,372
Other changes in debt.....	-1,333,326,701	+96,262,896	+266,828,628
Public debt at end of year	252,770,359,860	258,400,000,000	263,800,000,000

PART C—BUDGET APPROPRIATIONS AND OTHER AUTHORIZATIONS

Appropriations and other authorizations:			
Appropriations.....	\$37,341,987,756	\$38,949,867,766	\$34,752,981,221
Deduct appropriations to liquidate contract authorizations.....	1,264,427,564	3,026,771,561	4,508,730,394
Appropriations, excluding appropriations to liquidate contract authorizations.....	36,077,560,192	35,923,096,205	30,244,250,827
Contract authorizations.....	2,607,374,385	4,786,385,098	2,062,149,500
Authorizations to expend from public debt receipts.....	2,100,000,000	3,050,300,000	785,000,000
Reappropriations.....	17,362,193	267,274,597	250,000
Total appropriations and other authorizations.....	40,802,296,770	44,027,055,900	33,091,650,327
Anticipated supplemental appropriations and other authorizations:			
Appropriations.....		1,444,076,008	5,491,551,000
Deduct appropriations to liquidate contract authorizations.....		4,100,000	5,100,000
Appropriations, excluding appropriations to liquidate contract authorizations.....		1,439,976,008	5,486,451,000
Contract authorizations.....		148,840,000	1,300,364,000
Authorizations to expend from public debt receipts.....		4,275,000,000	575,000,000
Total anticipated supplemental appropriations and other authorizations.....		5,863,816,008	7,361,815,000
Total Budget appropriations and other authorizations.....	40,802,296,770	49,890,871,908	40,453,465,327

TABLE 2
SUMMARY OF BUDGET EXPENDITURES
BY ORGANIZATION UNIT

Based on existing and proposed legislation

[For the fiscal years 1949, 1950, and 1951]

Description	1949 actual	1950 estimate	1951 estimate
BUDGET EXPENDITURES (see table 8 for detail):			
Legislative branch.....	\$46,506,024	\$61,690,164	\$70,655,064
The Judiciary.....	21,048,498	24,381,408	25,951,371
Executive Office of the President.....	7,996,989	9,870,310	10,655,487
Funds appropriated to the President.....	4,043,690,247	4,133,988,085	4,055,000,000
Independent offices:			
Atomic Energy Commission.....	620,937,630	672,971,274	816,754,000
Civil Service Commission.....	243,921,499	325,174,529	353,299,777
Export-Import Bank of Washington.....	• 56,824,074	71,442,000	47,800,000
General Accounting Office.....	35,161,691	35,764,042	36,933,184
National Advisory Committee for Aeronautics.....	48,682,884	56,160,000	64,600,000
Philippine War Damage Commission.....	170,305,668	187,842,404	60,250,000
Railroad Retirement Board.....	593,588,559	612,881,136	603,461,136
Reconstruction Finance Corporation.....	355,466,002	1,033,962,933	975,692,241
Tennessee Valley Authority.....	26,962,380	51,601,793	96,005,000
United States Maritime Commission.....	133,307,838	162,230,466	222,275,898
Veterans Administration.....	6,556,588,260	6,765,859,665	5,989,169,755
Other independent offices.....	223,296,736	273,317,953	248,157,769
Federal Security Agency.....	1,312,825,738	1,545,286,881	2,231,829,001
General Services Administration.....	507,670,086	797,190,757	920,687,284
Housing and Home Finance Agency.....	• 77,163,104	• 49,078,404	116,459,227
Department of Agriculture.....	2,749,537,785	2,853,281,032	2,415,385,787
Department of Commerce.....	661,759,588	834,267,053	877,482,472
Department of Defense:			
Office of the Secretary of Defense.....	6,727,022	216,515,186	361,688,302
Department of the Army:			
Military functions.....	5,615,234,333	4,459,711,046	4,090,776,081
Civil functions.....	2,121,302,066	1,741,168,522	1,239,142,238
Department of the Navy.....	4,441,566,772	4,413,446,491	4,160,109,171
Department of the Air Force.....	1,800,281,666	3,745,000,000	4,415,000,000
Adjustments due to unexpended reimbursements from the mutual defense assistance program.....		• 50,000,000	• 225,000,000
Department of Defense: Military functions.....			70,000,000
Department of the Interior.....	484,782,665	637,654,559	752,539,773
Department of Justice.....	125,591,460	134,734,653	145,183,675

 Office of the Secretary of Defense
 Department of the Army
 Department of the Navy
 Department of the Air Force
Department of the Interior
Department of Justice
Department of Labor
Post Office Department
Department of State
Treasury Department
District of Columbia

INTRODUCTION TO PART II

Part II is the detailed section of the Budget. It contains specific information with respect to the budget programs for the future year in comparison with the past year and the current year, the text of appropriations and authorizations proposed for enactment by Congress, and certain supporting information.

STEPS TOWARD A "PERFORMANCE BUDGET"

The content and arrangement of this part of the Budget have been changed this year to give greater emphasis to the work programs and "performance" on which the financial requirements are based. The objective of these changes is to make the Budget a more complete and informative document with respect to the services to be performed by each agency and the money required for such services. Development in this direction will take several years to complete.

The specific changes toward a performance budget are as follows:

1. *Appropriation structure.*—A new pattern of appropriations is proposed for the Department of the Interior, the Department of Justice, the Post Office Department, the Department of the Navy, and the General Services Administration. Less complete changes in pattern are proposed for a few other agencies. The changes generally will bring together the appropriations for a program or group of related programs in each agency. Revisions for several other agencies are contemplated for the 1952 Budget.

2. *Activities schedules.*—A break-down of programs or activities, and the money required for each, is provided for each appropriation and fund. In past Budgets such schedules were used for less than 45 percent of the appropriations and funds. The break-down usually shows the current operating programs, grants, other "fixed charges," and major capital outlay.

3. *Narrative statements.*—For each appropriation or fund there is a new statement of "program and performance" which describes the purpose and program of services performed and their relationship to the money required. These narrative statements replace brief explanatory statements which appeared at the beginning of each "chapter" in previous Budgets. It is expected that in future years the narratives can be improved to show more objective data on work-load and unit costs.

4. *Business-type budget statements.*—Business-type budget statements are introduced as supplementary material for a few unincorporated business enterprises. It is contemplated that the use of this type of statement will be extended for other business enterprises of the Government in the 1952 and 1953 Budgets.

5. *Detail of personal services.*—A summary of positions, average employment, and the cost of personal services has been added to the beginning of the schedule of obligations by objects. The detailed break-down by grades and titles has been eliminated from the printed Budget, but such information will be made available as part of the agencies' justification to Congress upon request.

6. *Cost of performance.*—In a few cases the obligations have been broken down to show the total change in items on order, the change in inventories on hand, and the costs actually applied within the year to work programs. This type of information will be presented in more cases in the future as the data become available.

COVERAGE AND ARRANGEMENT OF PART II

The contents of part II are arranged in chapters, one each for the Legislative Branch, The Judiciary, the Executive Office of the President, Funds appropriated to the President for allocation to the various departments and agencies, each executive department and large independent agency, and one for all the other agencies which are outside of the executive departments.

Within each chapter there is first presented the material for regular agencies and bureaus submitted under the Budget and Accounting Act. This is followed by material on Government corporations, submitted under the Government Corporation Control Act.

Material is presented for general, special, and trust accounts in the Treasury which are active for obligation purposes and for the checking accounts of Government corporations. Part II does not contain material on accounts which were not available for obligation after June 30, 1948, nor for special deposits with the Treasurer of the United States.

CHAPTER SUMMARIES

A summary table at the head of each chapter compares the estimated amounts of appropriations and contract authorizations for 1951 with the amounts for 1950. The 1950 columns show separately the amounts already available and a forecast of the supplemental appropriations required. The 1951 figures are in a single column, but a forecast of supplemental appropriations for general and special accounts—to be requested later—appears in a separate line or lines at the end of the relevant section of the table.

NARRATIVE STATEMENTS ON PROGRAM AND PERFORMANCE

The purpose and kind of work done or service performed is described briefly under each annual appropriation. Where practicable, the narrative statement also gives some measure of the field of activity, the volume of work expected for the year, and the relationship of the work volume to the money required. Attention is also directed to major changes in program proposed for the Budget year as compared with the current year. In the case of permanent appropriations, including most trust accounts, the narrative statements explain the source of money, the purpose for which it may be used, and the statutory basis for the appropriation. The statements for a Government corporation or enterprise generally discuss, in addition to the program, the financial organization of the enterprise and the financial results of its operation.

SCHEDULES OF FUNDS AVAILABLE, ACTIVITIES, AND OBJECTS

For general, special, and trust accounts there are regularly three schedules of financial data, as follows:

Funds available.—Preceding the narrative statement for each account there is a schedule which shows the appropriations made or required, other sources of obligational availability, and transfers in and out, coming to a "Total available for obligation." From this figure there are shown deductions for balances not used within the year, leaving the amount of "Obligations incurred." These represent orders placed, contracts awarded, etc., during the year, regardless of when payment is made. (When the cost of an activity has been moved from one appropriation title to another for 1951, the schedules will often show a "comparative transfer" of the obligations for that purpose in the years 1949 and 1950, in order that obligations for all 3 years under both appropriation titles will be on a consistent basis.)

Financial requirements classified by activities.—At the end of each narrative statement on program and performance there is a break-down of financial requirements by purpose, program, project, or activity. The total of this schedule equals the "Obligations incurred" for the year. The classification used is especially tailored for each agency, reflecting its particular duties or responsibilities.

Financial requirements classified by objects.—There is also shown for each account a classification of the obligations incurred, according to a uniform list of objects of expenditure. These object classes, numbered from 01 to 16, reflect the nature of the services or things purchased, regardless of the purpose for which they are used.

BUSINESS-TYPE FINANCIAL STATEMENTS

Business-type budgets, including those submitted under the Government Corporations Control Act, contain statements, as follows:

Source and application of funds (statement A).—The first business-type statement is a balanced presentation of the expenditures and accruals requiring the application of funds each year and a presentation of the funds becoming available in the year. Appended to this statement is an analysis of the effect of the enterprise's financial operations on budgetary expenditures of the Government.

Income and expense, and analysis of surplus (statement B).—A statement of income and expense accrued for the year and the resulting profit or loss is shown. Appended to it is an analysis of the retained earnings or cumulative deficit, showing any additions to it or charges made against it during the year.

Financial condition (statement C).—A "balance sheet" of assets, liabilities, and the investment of the Government completes the major business-type statements. The investment section this year shows the Government's financial interest both as owner (capital and surplus) and as creditor (bonds and notes payable to the Treasury). The latter item was formerly carried as a liability of the enterprise, even though it is merely, like capital, another form of Government equity.

Supporting schedules.—Additional detail for certain items on statements A, B, and C is sometimes carried in supplementary schedules, appropriately numbered and cross-referenced to the main statements. For enterprises under the Government Corporation Control Act, which are subject to an administrative expense limitation on an accrual basis, there are shown schedules somewhat similar to the obligations schedules for general, special, and trust accounts.

OTHER FINANCIAL SCHEDULES AND DATA

Motor vehicle and aircraft summaries.—In accordance with law, there are presented for each agency statements relating to passenger-carrying motor vehicles and aircraft. These statements cover certain elements of cost, the number of vehicles or planes involved, and the use for which they are required in the fiscal year 1951.

Funds available for appropriation.—In the few instances where receipts earmarked for specific purposes are merely reserved, subject to annual appropriations, rather than permanently appropriated, a special schedule of "Funds available for appropriation" is printed. This shows the amount of earmarked balances and the receipts which are available to finance the annual appropriations therefrom.

Statements on revolving (working capital) funds.—Full 3-year business-type budget statements are available for only a few of the revolving (working capital) funds. For the others, there is generally printed, as a minimum, a statement of condition on June 30, 1949, and a statement of income and expense for the fiscal year 1949.

Mixed-ownership corporations.—There are a few corporations or groups of corporations not wholly owned by the Federal Government but in which the United States owns part of the capital stock, has contingent liabilities, or otherwise has fiscal responsibilities. These are not subject to the usual budgeting procedures, but there are printed brief narratives, and for the Federal Deposit Insurance Corporation there are also schedules of administrative expenses.

TEXT OF APPROPRIATION ACTS

Estimates of appropriation.—The official "estimates of appropriation" recommended by the President are in the form of the exact language and amounts proposed for enactment. These are printed following the narrative and finished schedules, which set forth the program and amounts required.

The language in appropriation acts for the fiscal year 1950 is used as a basis for the 1951 proposals. Brackets are set around material therein which it is proposed be omitted; italicized words and figures show proposed additions.

Immediately following the language are citations to relevant laws and the latest appropriation acts, after which the amounts of the 1950 appropriations and the 1951 estimates are printed in bold-face type. If the appropriation is indefinite, the amount of the latest estimate is shown.

Authorizations to use corporate funds.—Government corporations and enterprises subject to the Government Corporation Control Act usually have available their own receipts, and sometimes they have permanent authorizations to borrow from the Treasury or elsewhere. For such enterprises Congress grants approval of their programs year by year in the form of general authorizing language. It is customary for specific limitations to be placed on administrative expenses and occasionally on some other feature of their budgets. The authorizing and limiting language in such cases is printed in the same style as the "estimates of appropriation" for Government-type budgets.

FORECASTS OF SUPPLEMENTAL AUTHORIZATIONS

Chapter summaries contain information on the supplemental appropriations and other authorizations estimated to be needed later in 1950 or in 1951.

The narrative statements explain these forecasts of supplemental requirements briefly—those to carry out

existing programs are explained in the regular narratives; those to carry out new programs under proposed legislation are explained in a special section at the end of the agency's submission.

Supplementals are usually shown in the detailed schedules, however, only when they are due to increases in pay scales. Several laws passed by the Eighty-first Congress after the beginning of fiscal year 1950 contained revisions of existing pay scales, generally effective the latter part of October 1949, resulting in increased pay for most per annum employees. Comparable increases were

granted administratively by some agencies to employees in similar positions not covered by these laws. The estimated cost of all such pay increases for 1950 and 1951 is stated as a single lump sum in the schedules of obligations by activities and separately for each applicable law in the schedules of obligations by objects. These costs are often wholly or partly absorbed within the 1950 appropriation. Where they cannot be completely absorbed, a tentative estimate of the supplemental appropriation required therefor in 1950 is shown in the schedule of funds available for obligation.

LEGISLATIVE BRANCH

Comparative Summary of Appropriations and Appropriation Estimates

Salaries or wages paid out of the items herein for the House of Representatives shall be computed at basic rates as authorized by law, plus increased and additional compensation as provided by the Federal Employees Pay Act of 1945, as amended by the Federal

HOUSE OF REPRESENTATIVES—Continued**CONTINGENT EXPENSES OF THE HOUSE—Continued**

Employees Pay Act of 1946, the Postal Rate Revision and Federal Employees Salary Act of 1948, and the *Second Supplemental Appropriation Act, 1950.*

No part of the appropriation contained in this title for the contingent expenses of the House of Representatives shall be used to defray the expenses of any committee consisting of more than six persons (not more than four from the House and not more than two from the Senate), nor to defray the expenses of any other person except the Sergeant at Arms of the House or a representative of his office, and except the widow or minor children, or both, of the deceased, to attend the funeral rites and burial of any person who at the time of his or her death is a Representative, a Delegate from a Territory, or a Resident Commissioner from Puerto Rico. (*Legislative Branch Appropriation Act, 1950.*)

Total, contingent expenses of the House:

Appropriated 1950, **\$2,203,790** Estimate 1951, **\$2,232,035**

Payment for Contesting Seats, House of Representatives—

【For payment to John C. Davies, contestee, for expenses incurred in the contested election case of Fuller versus Davies as audited and recommended by the Committee on House Administration, \$2,000, to be disbursed by the Clerk of the House.】

【For payment to Vincent L. Browner, contestant, for expenses incurred in the contested election case of Browner versus Cunningham as audited and recommended by the Committee on House Administration, \$2,000, to be disbursed by the Clerk of the House.】

【For payment to Paul Cunningham, contestee, for expenses incurred in the contested election case of Browner versus Cunningham as audited and recommended by the Committee on House Administration, \$2,000, to be disbursed by the Clerk of the House.】 (*Supplemental Appropriation Act, 1950.*)

Appropriated 1950, **\$6,000**

Payment to Widow of Hon. Richard J. Welch, House of Representatives—

【For payment to Sarah O'Connor Welch, widow of Richard J. Welch, late a Representative from the State of California, \$12,500.】 (*Second Supplemental Appropriation Act, 1950.*)

Appropriated 1950, **\$12,500**

Total, House of Representatives, annual definite appropriations:

Appropriated 1950, **\$21,071,475** Estimate 1951, **\$21,804,970**

CAPITOL POLICE**Uniforms and Equipment, Capitol Police, House of Representatives—**

General expenses: For purchasing and supplying uniforms; purchase, exchange, maintenance, and repair of motor-propelled passenger-carrying vehicles; contingent expenses, including \$25 per month for extra services performed for the Capitol Police Board by such member of the staff of the Sergeant at Arms of the Senate or the House, as may be designated by the chairman of the Board; \$17,900. (*Legislative Branch Appropriation Act, 1950.*)

Appropriated 1950, **\$17,900** Estimate 1951, **\$17,900**

Salaries and Expenses of Detailed Police, Capitol Police Board, House of Representatives—

Capitol Police Board: To enable the Capitol Police Board to provide additional protection for the Capitol Buildings and Grounds, including the Senate and House Office Buildings and the Capitol Power Plant, **[\$10,050] \$14,515**. Such sum shall only be expended for payment for salaries and other expenses of personnel detailed from the Metropolitan Police of the District of Columbia, and the Commissioners of the District of Columbia are authorized and directed to make such details upon the request of the Board. Personnel so detailed shall, during the period of such detail, serve under the direction and instructions of the Board and is authorized to exercise the same authority as members of such Metropolitan Police and

members of the Capitol Police and to perform such other duties as may be assigned by the Board. Reimbursement for salaries and other expenses of such detail personnel shall be made to the government of the District of Columbia, and any sums so reimbursed shall be credited to the appropriation or appropriations from which such salaries and expenses are payable and be available for all the purposes thereof: *Provided*, That any person detailed under the authority of this paragraph or under similar authority in the Legislative Branch Appropriation Act, 1942, and the Second Deficiency Appropriation Act, 1940, from the Metropolitan Police of the District of Columbia shall be deemed a member of such Metropolitan Police during the period or periods of any such detail for all purposes of rank, pay, allowances, privileges, and benefits to the same extent as though such detail had not been made, and at the termination thereof any such person who was a member of such police on July 1, 1940, shall have a status with respect to rank, pay, allowances, privileges, and benefits which is not less than the status of such person in such police at the end of such detail: *Provided further*, That the Commissioners are authorized and directed to pay the personnel detailed as of the date of enactment hereof pursuant to authority of this paragraph, during the period of such detail, salary equivalent to that of captain in the Metropolitan Police.】

【Capitol Police Board: For an additional amount to enable the Clerk of the House of Representatives to reimburse the government of the District of Columbia for the salary of one Metropolitan policeman assigned to the Capitol Police Board to provide additional protection for the Capitol Buildings and Grounds, fiscal year 1950, **\$3,754.51.**】 (*Third Deficiency Appropriation Act, 1950; Legislative Branch Appropriation Act, 1950.*)

Appropriated 1950, **\$13,804.51**

Estimate 1951, **\$14,515**

The foregoing amounts under "Capitol Police" shall be disbursed by the Clerk of the House. (*Legislative Branch Appropriation Act, 1950.*)

OFFICE OF THE LEGISLATIVE COUNSEL**Salaries and Expenses, Legislative Counsel, Senate—
Salaries and Expenses, Legislative Counsel, House of Representatives—**

For salaries and expenses of maintenance of the Office of the Legislative Counsel, as authorized by law, including increased and additional compensation as provided by the Federal Employees Pay Act of 1945, as amended by the Federal Employees Pay Act of 1946 [and], the Postal Rate Revision and Federal Employees Salary Act of 1948, and the *Second Supplemental Appropriation Act, 1950*, **[\$191,000] \$199,500** of which \$105,000 shall be disbursed by the Secretary of the Senate and **[\$86,000] \$94,500** by the Clerk of the House of Representatives [and so long as the positions are held by the present incumbents, the legislative counsel of the Senate and the legislative counsel of the House shall each be compensated at the gross annual rate of \$12,000]. (*Legislative Branch Appropriation Act, 1950.*)

Appropriated 1950, **\$191,000**

Estimate 1951, **\$199,500**

EDUCATION OF SENATE AND HOUSE PAGES**Education of Senate, House, and Supreme Court Pages—**

For education of congressional pages and pages of the Supreme Court, pursuant to section 243 of the Legislative Reorganization Act, 1946, **[\$30,075] \$32,800**, which amount shall, as soon as practicable after June 30, **[1949] 1950**, be credited to the appropriation for "General supervision and instruction, public schools, District of Columbia, **[1950] 1951**", and the Board of Education of the District of Columbia is hereby authorized to employ such personnel for the education of pages as may be required and to pay compensation for such services in accordance with such rates of compensation as the Board of Education may prescribe. (*Legislative Branch Appropriation Act, 1950.*)

Appropriated 1950, **\$30,075**

Estimate 1951, **\$32,800**

STATEMENT OF APPROPRIATIONS**Statement of Appropriations—**

For the preparation, under the direction of the Committees on Appropriations of the Senate and House of Representatives of the statements for the **[first] second** session of the Eighty-first Congress,

showing appropriations made, indefinite appropriations, and contracts authorized, together with a chronological history of the regular appropriation bills as required by law, \$4,000, to be paid to the persons designated by the chairmen of such committees to supervise the work. (*Legislative Branch Appropriation Act, 1950.*)

Appropriated 1950, **\$4,000** Estimate 1951, **\$4,000**

Total, legislative miscellaneous, annual definite appropriations:

Appropriated 1950, **\$256,779.51** Estimate 1951, **\$268,715**

LIBRARY OF CONGRESS

INTRODUCTORY STATEMENT

The Library of Congress, established by an act of Congress approved April 24, 1800, is not only the library of the Congress itself, but is also the general library of the Government of the United States, complemented in special fields by other Government libraries. Its collections are comprehensive and varied and include important manuscripts, maps, music, prints, photographs, newspapers, documents of all governments of the world, oriental literature, etc. In addition to housing the collections and performing services connected with them, the Library of Congress also executes certain specialized functions, the principal ones being in connection with the Legislative Reference Service, the Copyright Office, the catalog card distribution service, and the service of books in raised characters and talking books to the adult blind. The Library's first obligation for service is to Congress; the second, to other agencies of the Government; and the third, to other libraries, scholars, investigators, and the general public.

The major objectives for 1951 are as follows:

1. In the case of activities where the work load is regulated by the rate of acquisitions, the objective is the readjustment of those activities to the current rate of acquisitions.

2. In the case of activities where the work load is not related to the rate of acquisitions but is dependent upon some other factor, as the number of requests from Congress, public demand, and applications for copyright, the objective is to strengthen the staff in those areas sufficiently to meet the current work load.

3. In a very small number of instances, the objective is the undertaking of a new project, such as the Writings in American History, or making more rapid progress with an old project, such as the union catalogs.

In terms of broad fields of activity, including both the general and specialized services, obligations chargeable to annual appropriations incurred in 1949 and estimated for 1950 and 1951 are as follows:

Description	1949 actual	1950 estimate	1951 estimate
Acquisitions	\$803,681	\$960,097	\$974,893
Organization of the collections	1,133,502	1,254,802	1,543,404
Reader and reference services	1,119,239	1,197,134	1,386,483
Copyright	778,380	859,228	950,600
Legislative Reference Service	549,286	755,451	856,400
Printed card services	896,618	1,042,736	1,193,600
Books for the adult blind	978,239	1,000,000	1,000,000
Maintenance and protective services	601,423	658,799	768,600
Executive direction and general administrative services	539,238	602,975	695,220
Total obligations	7,399,606	8,331,222	9,369,200

In addition to funds appropriated annually by Congress, the Library of Congress also has available a number of gift and trust funds, working and transferred funds.

Certain responsibilities for the physical equipment, maintenance, and operation of the Library buildings rest by law with the Architect of the Capitol, and estimates for these purposes are carried under the request of that office.

PROGRAM AND PERFORMANCE

This is the principal appropriation to the Library of Congress and is used to finance most of the personal services required for the basic operations of the Library.

1. *Acquisition of library materials.*—This activity is concerned with the planning of the collections of the Library; the procurement of materials by purchase, gift, exchange, copyright deposit, transfer, or otherwise; and the selection of materials for addition to the collections. The objectives for 1951 are: Greater selectivity in ordering of materials, getting current on payment of invoices, and getting current on its record of incoming serial publications. The collections totaled 26,792,116 items as of June 30, 1948, and consisted of 8,387,385 books and pamphlets; 8,896,597 manuscripts; and 9,508,134 maps, pieces of music, and other miscellaneous items. About 8 million pieces are received annually from various sources as indicated in the following table:

Description	1949 actual	1950 estimate	1951 estimate
Purchase.....	606,504	810,000	675,000
Copyright.....	345,317	375,000	375,000
Transfer and deposit (principally from Government agencies).....	2,933,543	3,000,000	3,000,000
Gift.....	889,641	750,000	750,000
Exchange.....	629,317	675,000	700,000
Source unidentified (mainly newspaper and periodical issues).....	2,482,021	2,500,000	2,500,000
Total.....	7,886,343	8,110,000	8,000,000

Of the pieces received, about 1½ million items, including bound volumes of newspapers and periodicals, are added to the collections annually.

2. *Organization of the collections.*—This activity is concerned with the cataloging, classification, marking, and arrangement of all library materials; the maintenance of Library of Congress catalogs; and the control of binding operations. The objective for this activity in 1951 is to increase production to keep pace with the current rate of inflow of materials to be added to the collection and to eliminate some filing arrearages.

Selected data relating to the organization of the collections for 1949 and estimated for 1950 and 1951 are as follows:

Description	1949 actual	1950 estimate	1951 estimate
Volumes fully cataloged and added to the classified collection.....	113,892	142,000	181,000
Items otherwise organized for use (without full cataloging).....	34,400	34,000	34,000
Cards filed in the Library of Congress catalogs.....	1,409,000	1,510,000	2,000,000
Volumes sent to bindery.....	52,239	68,500	75,500
Items repaired, cleaned, mounted, etc.....	149,293	150,000	150,000

The above figures do not include incidental performance by divisions other than those in the processing department, which is the department of the Library primarily engaged in organization of the collections.

3. *Reader and reference service.*—This activity is concerned with the custody of the collections, the provision of books and other library materials within and without the Library, and the rendering of reference assistance. The Library is open to readers 74 hours per week, not including Monday and Friday evenings. The objectives of this activity for 1951 are: The restoration of Monday and Friday night opening; more adequate service to readers during all hours; the expansion of the area specialization program; and the undertaking of a new project, editing of the annual publication, *Writings in American History*. The following table indicates the increase in work load anticipated during 1951:

Description	1949 actual	1950 estimate	1951 estimate
Books and pamphlets served.....	1,559,539	1,580,000	1,600,000
Other units of material served.....	567,693	620,000	680,000
Units issued on loan.....	173,115	188,000	203,000
Reference inquiries answered (includes telephone requests for reference service and loans, aid to readers, and reference conferences).....	616,046	646,000	676,000
Reference letters.....	41,879	42,000	45,000

4. *Executive direction and general administrative services.*—This activity is concerned with the over-all executive direction of and the provision of general administrative services for the entire staff of the Library. The general executive and administrative staff represented 7.37 percent of the total number of positions financed by appropriated funds during 1949, while for 1950 and 1951 they are estimated to represent 7.23 and 7.18 percent, respectively. Emphasis during 1951 will be placed on the initiation of a management improvement program by the proposed addition of four new positions for this purpose.

Unobligated balance, estimated savings.....	-305		
Total obligations.....	741,995	819,728	911,100

PROGRAM AND PERFORMANCE

This appropriation is used to finance the personal services required to operate the Copyright Office in accordance with the provisions of the Copyright Act. The Office is responsible for recording and cataloging all copyright applications, assignments, and renewals; supplying copyright information to the public; and for collecting and accounting for copyright fees. The work of the Copyright Office is essentially a business operation; fees received for services rendered are in excess of personal services and other expenses incidental to the operation of the Office. In addition, the value of books and other library materials deposited in accordance with the Copyright Act and transferred to the Library of Congress are also to be credited to the copyright operation. The income and costs for 1949 and estimated for 1950 and 1951 are summarized as follows:

Description	1949 actual	1950 estimate	1951 estimate
Income:			
Fees applied.....	\$834,738	\$918,211	\$1,010,032
Estimated value of materials deposited.....	511,230	562,344	618,551
Total.....	1,345,968	1,480,555	1,628,583
Costs:			
Salaries.....	741,995	819,728	906,100
Printing and binding catalog of title entries.....	36,385	39,500	39,500
Other costs.....	34,612	29,000	35,500
Total.....	812,992	888,228	981,100

The objective for 1951 is to keep current with the work load at all times and to render prompt and efficient service to the public. The program and performance under each of the activities described below are predicated on an estimated 243,400 copyright registrations during 1951, an estimated 221,300 during 1950, and an actual 201,190 during 1949. About half the increase between 1949 and

1951 is expected as a result of Public Law 84 of the Eighty-first Congress, which is applicable to the copyright of foreign publications.

1. *Receiving and accounting for applications, fees, and correspondence.*—This activity is concerned with receiving and routing all materials mailed or delivered to the Copyright Office, accounting for all moneys received, and filing and maintaining the records relating to the registration of copyrights and materials deposited in accordance with the Copyright Act.

2. *Examining copyright applications.*—This activity is concerned with the examination of all applications and deposits before issuing registration certificates or recording documents to determine whether the provisions of the Copyright Act have been satisfied.

3. *Indexing and cataloging all materials received.*—The Register of Copyrights is required to print complete and indexed catalogs of all items registered. In the interest of over-all economy and the elimination of overlapping activities, the Copyright Office also prepares full catalog entries in accordance with Library of Congress cataloging rules on about 10 percent of the items registered.

4. *Reference services.*—The Copyright Office makes available to the public, on a fee basis, information concerning copyright registrations and the provisions of the Copyright Act, including procedures, policies, and rulings. Performance data for 1949 and estimates for 1950 and 1951 are as follows:

Description	1949 actual	1950 estimate	1951 estimate
Titles searched.....	28,253	28,500	29,000
Letters written on searches and inquiries.....	17,935	18,000	18,500

Obtaining compliance with registration requirements is part of this activity. It is proposed that the compliance program, which more than pays for itself in registration fees and materials received, be given increased emphasis in 1951.

5. *General supervision and legal services.*—This activity is concerned with the supervision and coordination of the work of the Copyright Office; it includes legal services relating to the status and improvement of copyright law in its foreign as well as domestic aspects, such improvement constituting the major objective under this activity in 1951.

PROGRAM AND PERFORMANCE

This appropriation is used to carry out the objectives of the Legislative Reorganization Act of 1946, which involves the preparation of research reports and digests and answering inquiries from Members and committees of Congress relating to legislative problems and programs. The general objectives for 1951 are: The readjustment of all activities of the Legislative Reference Service to an anticipated increase in the number of inquiries and greater research coverage in areas of congressional concern.

1. *Authoritative research and analysis.*—Of the 21 fields of specific congressional concern, specified in the Legislative Reorganization Act of 1946, only 8 were covered during 1949. They were: International economics, international relations, taxation and fiscal policy, public administration, conservation and natural resources, social welfare, American law, and labor. During 1950 the following six additional fields are to be covered: Industrial organization and corporation finance, engineering and public works, transportation and communications, national defense, veterans' affairs, and housing. In 1951 it is proposed to add one additional field, money and banking.

2. *General research.*—This activity is concerned with general research and report writing; spot reference service; the preparation of graphs, charts, and illustrations; and the preparation of translations. The number of inquiries answered under this heading has increased at an average rate of 2,000 per year. The number answered in 1949 was 22,852. It is estimated that 25,000 inquiries will be handled in 1950 and 27,000 in 1951.

3. *Preparation of abstracts, indexes, digests, and summaries.*—This activity is concerned with the preparation of the Digest of Public General Bills, the State Law Index, the Public Affairs Abstracts, and the Summaries of Committee Hearings. In 1949, volume 12 of the State Law Index was prepared. It indexed 29,386 laws passed by

State and Territorial legislatures. It is a tool useful to legislators and others concerned with State laws. It is proposed to resume its preparation in 1951 as a part of the activities covered by the appropriation for the Legislative Reference Service. Public Affairs Abstracts and the Summaries of Committee Hearings, which were not published in 1949, resumed publication in 1950, but the Summaries of Committee Hearings was put on a trial basis with one reporter. It is proposed to expand the scope of the Summaries of Committee Hearings by providing coverage of hearings of more than one committee at a time.

4. *Reference files, bibliographic and reader services.*—This activity is concerned with the preparation and maintenance of reference files, which contain clippings, pamphlets, and documents, and with supplying researchers with a collection of reference and bibliographic tools. It involves the preparation of both selective and comprehensive bibliographies for Members and committees of Congress. Reader services are provided by the Congressional Reading Room.

5. *General supervision.*—This activity is concerned with the over-all direction and supervision of the Legislative Reference Service.

LEGISLATIVE REFERENCE SERVICE

Salaries and expenses: For necessary personal services to enable the Librarian to carry out the provisions of section 203 of the Legislative Reorganization Act of 1946, and the provisions of "An Act providing for the preparation of a biennial index to State legislation," approved February 10, 1927, as amended (2 U. S. C. 164, 165), including not to exceed \$20,000 for employees engaged by the day or hour at rates to be fixed by the Librarian; services as authorized by section 15 of the Act of August 2, 1946 (5 U. S. C. 55a); printing and binding; and supplies and materials; **[\$700,000]** \$856,400.

LIBRARY OF CONGRESS—Continued**Legislative Reference Service, Library of Congress—Continued**

(*2 U. S. C. 131, 136, 139, 150, 164a, 166; Legislative Branch Appropriation Act, 1950.*)

Appropriated 1950, **\$700,000**

Estimate 1951, **\$856,400**

* Includes \$28,300 for activities previously carried under "Index to State Legislation, Library of Congress." The amounts obligated in 1949 and 1950 are shown in the schedule as comparative transfers.

Revision of Annotated Constitution of the United States of America, Library of Congress—

FUNDS AVAILABLE FOR OBLIGATION: Appropriation or estimate—1950, \$35,000.

PROGRAM AND PERFORMANCE

This appropriation is used to finance the revision of a compilation of annotations of key cases on the Constitution designed as a convenience to Members of Congress, lawyers, and political scientists, which was last revised in 1938, the current revision to include annotations of court decisions prior to January 1, 1950.

PROGRAM AND PERFORMANCE

This appropriation maintains the service engaged in the sale of the Library's printed catalog cards and certain other publications. More than 97 percent of this appropriation is chargeable to the cost of card sales, and this cost, plus 10 percent profit, is ultimately returned to the Treasury. The remaining 3 percent represents a service to the Library of Congress. The work of the Card Division is that of a mail-order house; it maintains a stock of

over 150,000,000 cards, representing more than 2,000,000 titles, and fills orders for more than 8,000 customers in the United States and abroad. The objectives for 1951 are: The greater use of card reproduction by means other than printing and, at reduced unit cost, to expedite certain cataloging operations performed in the interest of card subscribers; and increasing the scope and utility of the Library's Cumulative and Subject Catalogs in book form.

1. *Supplying cards for the Library of Congress.*—The number of cards supplied to the Library of Congress in 1949 was 4,003,484; estimated for 1950, 4,528,000; and estimated for 1951, 5,028,000.

2. *Sale of cards to other libraries, etc.*—The number of cards sold in 1949 was 21,639,252; estimated for 1950, 22,164,000; and estimated for 1951, 22,664,000.

3. *Preparation and distribution of publications.*—The preparation and distribution of the Subject Catalog is planned for the entire year 1951, instead of only a half year as in 1950; and additional assistance in the preparation of the Cumulative Catalog is also necessary.

PROGRAM AND PERFORMANCE

This appropriation supports the National Union Catalog, a centralized and cooperatively maintained record of the holdings of more than 700 research libraries of the United States and Canada and probably the most important bibliographical tool in existence. It contains some 15,000,000 cards and is consulted daily by libraries and research institutions in all parts of the United States and the world, as well as by representatives of Government agencies, visiting scholars, and the Library's own staff, in order to locate copies of research works. The staff employed in maintaining this catalog engages in the work of filing cards received, noting additional locations for works already represented in the catalog, eliminating duplicate entries, editing the entries received, and responding to inquiries from other libraries. It is proposed in 1951 to subject the catalog to a systematic editing which will eliminate duplicate cards, replace those which are illegible, and correct errors in filing; and to provide for an increase in the program by procuring an additional 2,000,000 photographically reproduced cards from other major research libraries and filing them.

The number of cards for, and locations of, research materials added in 1949 was 1,386,472; estimated for 1950, 1,500,000; and estimated for 1951, 2,730,000. The number of inquiries answered in 1949 was 12,522; estimated for 1950, 14,000; and estimated for 1951, 15,500. These figures do not include inquiries answered through the use of the Union Catalog by readers themselves or the use of the Union Catalog by members of the Library of Congress staff.

PROGRAM AND PERFORMANCE

The appropriation for the increase of the Library's collections constitutes the only means of acquiring regular trade publications, except for copyright deposits. Though only a small part of the Library's annual receipts are purchased, this constitutes a most important part of its acquisitions, which is essential to fill gaps in the collections. Pieces purchased in 1949 totaled 534,907; estimated for 1950, 720,000; and estimated for 1951, 600,000.

OBLIGATIONS BY ACTIVITIES

Total obligations.....	978,239	1,000,000	1,000,000

PROGRAM AND PERFORMANCE

The Library of Congress library program for the adult blind was established by an act of Congress approved March 3, 1931. This program includes the selection, purchase, and distribution of multiple copies of books in raised characters, braille and moon, and on phonograph records, to 26 regional libraries, which, in turn, circulate them among the adult blind of the Nation; and the purchase, distribution, and repair of the thousands of phonographs on which the records are played. These machines are lent to adult blind readers by 55 different State and local agencies. Priority in distribution is given to blind veterans.

The objectives of the program for 1951 are: The accelerated replacement of obsolete talking book machines and worn-out records; and the clarification of relations between the Library of Congress, the regional libraries, and State and local agencies serving the adult blind.

In order to have the best available advice in the field of sound reproduction, working funds have been advanced to the National Bureau of Standards for a research program which should result in the improvement of talking-book machines, record materials, and in methods of recording talking books. During fiscal year 1949 this arrangement resulted in a satisfactory talking-book machine at a cost reduced from \$63 to \$25 per machine.

1. *Procurement and distribution.*—This activity is concerned with the selection, purchase, and distribution of books; and the purchase, distribution, repair, and replacement of talking-book machines.

¹ Reduction due to inability of available presses to deliver more rapidly.

2. *Cataloging and reference services.*—In providing this service the Division has issued and is maintaining a catalog of talking books issued by the Library of Congress. It also completed for publication a catalog of press-brailled books and plans to undertake the organization for publication of a union catalog of hand-brailled books. It is revising a bulletin explaining braille transcription and an instructional manual for braille proofreaders. Each of the catalogs will be supplemented from time to time.

BOOKS FOR ADULT BLIND

To enable the Librarian of Congress to carry out the provisions of the Act entitled "An Act to provide books for the adult blind", approved March 3, 1931 (2 U. S. C. 135a), as amended, \$1,000,000, including not exceeding \$60,000 for personal services, not exceeding \$200,000 for books in raised characters, and the balance remaining for sound-reproduction records and for the purchase, maintenance, and replacement of the Government-owned reproducers for sound-reproduction records for the blind and not exceeding \$1,000 for necessary traveling expenses connected with such service and for expenses of attendance at meetings when incurred on the written authority and direction of the Librarian; and for printing and binding. (2 U. S. C. 131, 135b, 136, 139, 140; Legislative Branch Appropriation Act, 1950.)

Unobligated balance, estimated savings.....	-300		
Total obligations.....	380,700	450,000	500,000

PROGRAM AND PERFORMANCE

This appropriation is used to finance most of the printing and binding requirements of the Library of Congress, except those which are financed by special appropriations for card and copyright catalog printing. All but a minor part of the costs are for work done by the Government Printing Office, the binding and rebinding work actually being done at the Government Printing Office branch bindery operated in the Library Annex.

1. *Organization of the collections.*—Included under this activity are bookbinding; repair of manuscripts, maps, etc.; purchase of protective boxes and binders; and other miscellaneous bindery operations. It is planned in 1951 to bind an additional 7,000 volumes, bringing the number to be bound up to 75,500 as compared with an estimated 68,500 in 1950 and an actual 57,912 in 1949; and to purchase, on an experimental basis, an improved type of protective box which has a metal foil covering making the box fire resistant.

2. *Reference service, publications.*—Included in this activity are the general publications of the Library of Congress, usually of a bibliographical character, and descriptive of materials contained in its collections. For 1951, the sesquicentennial of the Library, a moderate expansion of this program is proposed.

3. *Administrative printing and binding.*—The largest item in the general administrative category is for printing of miscellaneous forms. This includes about \$19,000 used for copyright application forms in 1949, \$12,000 estimated for 1950, and \$15,000 estimated for 1951. These costs are reimbursed to the Treasury.

The principal publications included in the administrative category are the Annual Report of the Librarian and the Quarterly Journal of Current Acquisitions. It is planned in 1951 to enlarge the size of the annual report and the Quarterly Journal of Current Acquisitions, in commemoration of the sesquicentennial of the Library of Congress, and to issue a series of commemorative brochures describing the collections and services of the Library.

Unobligated balance, estimated savings.....	-641		
Total obligations.....	447,834	535,000	641,500

PROGRAM AND PERFORMANCE

This appropriation provides for the printing of catalog cards and related publications. Approximately 68 percent of the total appropriation is chargeable to the cost of card and publication sales, and this cost, plus 10 percent profit, is ultimately returned to the Treasury; the remaining 32 percent represents service to the Library of Congress. It is planned in 1951 to keep pace with the increased number of titles cataloged.

1. *Card printing for the Library of Congress.*—The number of cards printed in 1949 for the Library of Congress was 3,088,181; estimated for 1950, 3,218,150; and estimated for 1951, 3,386,363.

2. *Card printing for other libraries.*—The number of cards printed in 1949 was 32,561,094; estimated for 1950, 32,539,102; and estimated for 1951, 34,239,887.

3. *Printing and binding the Cumulative Catalog.*—The Cumulative Catalog is a book catalog of the cards printed by the Library of Congress arranged by author. It is issued monthly and cumulated quarterly and annually. There were 803 paid subscriptions for complete or partial service in 1949; it is estimated that there will be 825 in 1950 and 850 in 1951.

4. *Printing and binding the Subject Catalog.*—The Subject Catalog is a book catalog reproducing cards printed by the Library of Congress and arranged according to subject content of the publications represented. It will be cumulated periodically. Publication begins on January 1, 1950.

5. *Printing and binding of publications related to cataloging.*—These publications are auxiliary to the cataloging activities of the Library of Congress and include the Classification Schedules, lists of Subject Headings, Rules of Descriptive Cataloging, and similar publications. No significant change in the publication program is anticipated for 1951.

PROGRAM AND PERFORMANCE

The part of the appropriation dealing with photoduplicating expenses has a dual purpose: (1) Providing photoduplicated materials as requested by Congress, its Members, and its committees; and (2) meeting the administrative photoduplicating requirements of the Library of Congress. The other part of this appropriation is for minor miscellaneous expenses required for the general administration of the Library not properly chargeable to other Library appropriations. In 1951, it is proposed to rent additional tabulating equipment of the most advanced type particularly applicable to bibliographical controls.

PROGRAM AND PERFORMANCE

This consolidated appropriation provides for the cost of personal services and other miscellaneous expenses necessary for the maintenance of the Library buildings and the protection and security of the collections and other properties contained therein.

1. *Maintenance services.*—This activity is concerned with the preservation and cleanliness of the Library buildings and collections; the care of the grounds; the operation and maintenance of telephones, elevators, check stands, motor vehicles, and the laundry; the procurement and custody of furniture, housekeeping materials, and miscellaneous equipment; the assignment and utilization of space; the operation of the receiving room and stock-rooms; and other maintenance services. The principal objectives for 1951 are to improve the cleanliness of the buildings and grounds and of the Library collections; to provide better elevator and telephone service; and to replace obsolete automotive equipment.

2. *Protective services.*—This activity is concerned with the protection of one of greatest accumulations of national treasures in the world. Constant alertness by the Library guard force is necessary to prevent fire and theft, for the maintenance of order, and for regular inspections of all areas in both buildings. For adequate coverage 24 hours per day, 7 days per week, a total of 79 duty stations must be manned throughout the year by the 66 guards and 13 officers currently on the guard force. It is proposed in 1951 to increase the guard force sufficiently to provide adequate protection when members of this force are absent. It is also proposed to accelerate the replacement of worn and shabby uniforms.

PROGRAM AND PERFORMANCE

From time to time, working funds are advanced from various Federal agencies for the performance of such library services as cataloging, indexing, digesting, abstracting, and bibliography, which the Library of Congress is deemed by those agencies peculiarly able to perform. During fiscal years 1949 and 1950 the principal sources of the working fund were the Department of the Air Force and the Department of the Navy.

PROGRAM AND PERFORMANCE

The act of August 20, 1912, appropriates, out of any money not otherwise appropriated, a sum equivalent to interest at 4 percent per annum on a principal fund of \$20,000 held in trust by the Treasury under the will of Gertrude M. Hubbard. The amount so appropriated, together with any unexpended balances from prior years, is available each year for the purchase of engravings and etchings to be added to the Gardiner Greene Hubbard collection (37 Stat. 319).

OBLIGATIONS BY ACTIVITIES

PROGRAM AND PERFORMANCE

The act of March 3, 1925, appropriates a sum equivalent to interest at the rate of 4 percent per annum on a trust fund (the principal of which shall not exceed \$5,000,000) composed of gifts or bequests for the benefit of the Library. Moneys so appropriated become available semiannually for disbursement by the Librarian of Congress for the purposes specified (2 U. S. C. 156-158).

PROGRAM AND PERFORMANCE

The Government Printing Office executes orders for printing, binding, and blank-book work placed by Congress and the departments, independent establishments, and agencies of the Federal Government and furnishes, on order, blank paper, inks, and similar supplies.

The amount appropriated each year includes the printing and binding authorized to be done for Congress; for the printing, binding, and distribution of the Federal Register; and \$7,500,000 for working capital which is returned to the Treasury not later than 6 months after the close of each fiscal year. All work for other agencies of the Government is reimbursed on the basis of actual costs incurred.

officers of the Government Printing Office when in writing ordered by the Public Printer; freight, expressage, telegraph and telephone service, furniture, typewriters, and carpets; traveling expenses, including not to exceed \$3,000 for attendance at meetings or conventions when authorized by the Joint Committee on Printing; stationery, postage, and advertising; directories, technical books, newspapers, magazines, and books of reference [(not exceeding \$1,000)]; adding and numbering machines, time stamps, and other machines of similar character; purchase of uniforms for guards; rubber boots, coats, and gloves; machinery (not exceeding [\$300,000] \$600,000); equipment, and for repairs to machinery, implements, and buildings, and for minor alterations to buildings; necessary equipment, maintenance, and supplies for the emergency room for the use of all employees in the Government Printing Office who may be taken suddenly ill or receive injury while on duty; other necessary contingent and miscellaneous items authorized by the Public Printer; for expenses authorized in writing by the Joint Committee on Printing for the inspection of printing and binding equipment, material, and supplies and Government printing plants in the District of Columbia or elsewhere (not exceeding \$1,000); payment of tort claims pursuant to [section 403 of the Federal Tort Claims Act] law (28 U. S. C. 921); for salaries and expenses of preparing the semimonthly and session indexes of the Congressional Record under the direction of the Joint Committee on Printing (chief indexer at \$5,281, one cataloger at \$4,867, two catalogers at \$3,874 each, and one cataloger at \$3,347); and for all the necessary labor, paper, materials, and equipment needed in the prosecution and delivery and mailing of the work; in all, [\$15,500,000] \$16,250,000; to which sum shall be charged the printing and binding authorized to be done for Congress, including supplemental and deficiency estimates of appropriations; the printing, binding, and distribution of the Federal Register in accordance with the Act approved July 26, 1935 (44 U. S. C. 301-310) (not exceeding [\$450,000] \$475,000); the printing and binding of the Code of Federal Regulations and supplements thereto, as authorized by the Act of July 26, 1935, as amended (44 U. S. C. 311) (not exceeding [\$125,000] \$150,000); the printing and binding for use of the Government Printing Office; the printing and binding (not exceeding \$5,000) for official use of the Architect of the Capitol upon requisition of the Secretary of the Senate; in all to an amount not exceeding [\$8,000,000] \$8,750,000: *Provided*, That not less than \$7,500,000 of such working capital shall be returned to the Treasury as an unexpended balance not later than six months after the close of the current fiscal year: *Provided further*, That notwithstanding the provisions of section 73 of the Act of January 12, 1895 (44 U. S. C. 241), no part of the foregoing sum of [\$8,000,000] \$8,750,000 shall be used for printing and binding part 2 of the annual report of the Secretary of Agriculture (known as the Year-book of Agriculture). (*Legislative Branch Appropriation Act, 1950.*)

Appropriated 1949, \$15,500,000 Estimate 1950, \$16,250,000

Printing and binding for Congress chargeable to the foregoing appropriation, when recommended to be done by the Committee on Printing of either House, shall be so recommended in a report containing an approximate estimate of the cost thereof, together with a statement from the Public Printer of estimated approximate cost of work previously ordered by Congress within the fiscal year for which this appropriation is made.

During the current fiscal year any executive department or independent establishment of the Government ordering printing and binding or blank paper and supplies from the Government Printing Office shall pay promptly by check to the Public Printer upon his written request, either in advance or upon completion of the work, all or part of the estimated or actual cost thereof, as the case may be, and bills rendered by the Public Printer in accordance herewith shall not be subject to audit or certification in advance of payment: *Provided*, That proper adjustments on the basis of the actual cost of delivered work paid for in advance shall be made monthly or quarterly and as may be agreed upon by the Public Printer and the department or establishment concerned. All sums paid to the Public Printer for work that he is authorized by law to do; all sums received from sales of wastepaper, other waste material, and condemned property; and for losses or damage to Government property; shall be deposited to the credit, on the books of the Treasury Department, of the appropriation made for the working capital of the Government Printing Office and be subject to requisition by the Public Printer.

No part of any money appropriated in this Act shall be paid to any person employed in the Government Printing Office while detailed for or performing service in the executive branch of the

public service of the United States unless such detail be authorized by law. (*Legislative Branch Appropriation Act, 1950.*)

PROGRAM AND PERFORMANCE

The Office of the Superintendent of Documents is a division of the Government Printing Office which operates under separate appropriations. The work programs are entirely of a service nature and are of such type that there is no control over the volume of work which the Superintendent of Documents is required by law to perform.

1. *Sales distribution.*—The Superintendent of Documents is authorized by law to sell copies of Government publications purchased from the Public Printer. Acquisition costs are paid from sales receipts, so no appropriation is required for printing sales copies. By provision of law, the sale price is set at the cost of manufacture plus 50 percent. At the end of each fiscal year, excess receipts not required for purchasing additional publications are turned in to the Treasury Department as miscellaneous receipts. For the fiscal year 1948 earned revenue from this source was \$1,082,315 and for 1949 was \$1,439,697. It is estimated that miscellaneous receipts earned will be \$1,600,000 for 1950 and \$1,700,000 for 1951. The number of sales orders has been steadily increasing, and in the last 10 years the volume of orders has more than doubled and the dollar value of publications sold has more than tripled. The current public interest in the Government's publishing program points to a continuing increase in the volume of orders.

2. *Distribution for other agencies and Members of Congress.*—The Superintendent of Documents under provisions of law is required to prepare mailing lists and to perform mailing operations upon the request of any Government agency and without reimbursement from those agencies. Another legal obligation is to handle the mailing of Farmers' Bulletins, Soil Surveys, copies of the Congressional Record, and other publications which are allocated to Members of Congress on a quota basis.

3. *Depository library distribution.*—The Superintendent of Documents is required by law to supply one copy of every Government publication, upon request, to more than 500 libraries which are designated depositories for Government publications.

4. *Cataloging and indexing.*—The law provides that the Superintendent of Documents shall prepare and distribute catalogs and indexes of all publications issued by the Federal Government. The Monthly Catalog of United States Government Publications and the Numerical List and Schedule of Volumes are the two principal publications which are issued to discharge legal requirements.

PROGRAM AND PERFORMANCE

The proceeds of sales of publications, etc., by the Superintendent of Documents are deposited in a trust receipt account and such portion thereof as is required for postage, printing, and refunds is established in the above-named appropriation account. The earned portion of receipts is transferred from time to time to miscellaneous receipts. (44 U. S. C. 71, 31 U. S. C. 725s; decisions of Comptroller General, Jan. 2 and Feb. 21, 1936.)

Appropriated (est.) 1950, **\$2,000,000** Estimate 1951, **\$2,000,000**

GENERAL PROVISIONS

SEC. 102. Purchases may be made from the foregoing appropriations under the "Government Printing Office", as provided for in the Printing Act approved January 12, 1895, and without reference to section 4 of the Act approved June 17, 1910 (41 U. S. C. 7), concerning purchases for executive departments.

SEC. 103. In order to keep the expenditures for printing and binding for the current fiscal year within or under the appropriations for such fiscal year, the heads of the various executive departments and independent establishments are authorized to discontinue the printing of annual or special reports under their respective jurisdictions: *Provided*, That where the printing of such reports is discontinued the original copy thereof shall be kept on file in the offices of the heads of the respective departments or independent establishments for public inspection.

SEC. 104. No part of the funds appropriated in this Act shall be used for the maintenance or care of private vehicles.

SEC. 105. Whenever any office or position not specifically established by the Legislative Pay Act of 1929 is appropriated for herein

or whenever the rate of compensation or designation of any position appropriated for herein is different from that specifically established for such position by such Act, the rate of compensation and the designation of the position, or either, appropriated for or provided herein, shall be the permanent law with respect thereto: *Provided*, That the provisions relating to positions and salaries thereof carried in H. Res. 653 (Eightieth Congress) and H. Res. 6, 39, 45, 62, 84, 103, 172, and 188 (Eighty-first Congress) shall be the permanent law with respect thereto.

SEC. 106. No part of any appropriation contained in this Act shall be paid as compensation to any person appointed after June 30, 1935, as an officer or member of the Capitol Police who does not meet the standards to be prescribed for such appointees by the Capitol Police Board: *Provided*, That the Capitol Police Board is hereby authorized to detail police from the House Office, Senate Office, and Capitol Buildings for police duty on the Capitol Grounds.

SEC. 107. No part of any appropriation contained in this Act shall be used to pay the salary or wages of any person who engages in a strike against the Government of the United States or who is a member of an organization of Government employees that asserts the right to strike against the Government of the United States, or who advocates, or is a member of an organization that advocates, the overthrow of the Government of the United States by force or violence: *Provided*, That for the purposes hereof an affidavit shall be considered prima facie evidence that the person making the affidavit has not, contrary to the provisions of this section, engaged in a strike against the Government of the United States, is not a member of an organization of Government employees that asserts the right to strike against the Government of the United States, or that such person does not advocate, and is not a member of an organization that advocates, the overthrow of the Government of the United States by force or violence: *Provided further*, That any person who engages in a strike against the Government of the United States or who is a member of an organization of Government employees that asserts the right to strike against the Government of the United States, or who advocates, or who is a member of an organization that advocates, the overthrow of the Government of the United States by force or violence, and accepts employment the salary or wages for which are paid from any appropriation contained in this Act shall be guilty of a felony and, upon conviction, shall be fined not more than \$1,000 or imprisoned for not more than one year, or both: *Provided further*, That the above penalty clause shall be in addition to, and not in substitution for, any other provisions of existing law. (*Legislative Branch Appropriation Act, 1950.*)

Total, legislative branch, general and special appropriations:
Appropriated 1950, **\$65,590,911.95** Estimate 1951, **\$77,796,407**

GENERAL PROVISIONS—THE JUDICIARY

SEC. 402. Sixty per centum of the expenditures for the District Court of the United States for the District of Columbia from all appropriations under this title and 30 per centum of the expenditures for the United States Court of Appeals for the District of Columbia from all appropriations under this title shall be reimbursed to the United States from any funds in the Treasury to the credit of the District of Columbia.

SEC. 403. The reports of the United States Court of Appeals for the District of Columbia shall not be sold for a price exceeding that approved by the court and for not more than \$6.50 per volume.

GENERAL PROVISIONS

SEC. **[601]** 501. No part of any appropriation contained in this Act, or of the funds available for expenditure by any corporation included in this Act, shall be used to pay the salary or wages of any person who engages in a strike against the Government of the United States or who is a member of an organization of Government employees that asserts the right to strike against the Government of the United States, or who advocates, or is a member of an organization that advocates, the overthrow of the Government of the United States by force or violence: *Provided*, That for the purposes hereof an affidavit shall be considered prima facie evidence that the person making the affidavit has not contrary to the provisions of this section engaged in a strike against the Government of the United States, is not a member of an organization of Government employees that asserts the right to strike against the Government of the United States, or that such person does not advocate, and is not a member of an organization that advocates, the overthrow of the Government of the United States by force or violence: *Provided further*, That any person who engages in a strike against the Government of the United States or who is a member of an organization of Government employees that asserts the right to strike against the Government of the United States, or who advocates, or who is a member of an organization that advocates, the overthrow of the Government of the United States by force or violence and accepts employment the salary or wages for which are paid from any appropriation or fund contained in this Act shall be guilty of a felony and, upon conviction, shall be fined not more than \$1,000 or imprisoned for not more than one year, or both: *Provided further*, That the above penalty clause shall be in addition to, and not in substitution for, any other provisions of existing law. (*Departments of State, Justice, Commerce, and the Judiciary Appropriation Act, 1950.*)

APPROPRIATION TEXT

To provide for emergencies affecting the national interest or security, without regard to such provisions of law regulating the expenditure of Government funds as the President may specify, and for supplementing the efforts and available resources of State and local governments or other agencies in alleviating hardship or suffering caused by flood, fire, hurricane, earthquake, or other catastrophe in any part of the United States, \$1,000,000: *Provided*, That assistance in alleviating hardship or suffering caused by such a catastrophe may be rendered through such agency or agencies as the President may designate and in such manner as he shall determine, without regard to such provisions of law regulating the expenditure of Government funds or the employment of persons in the Government service as he shall specify, whenever he finds that such a catastrophe is of sufficient severity and magnitude to warrant emergency assistance by the Federal Government in alleviating hardship or suffering caused thereby, and if the Governor of any State in which such a catastrophe shall occur shall certify that such assistance is required, and shall have entered into an agreement with such agency of the Government as the President may designate, giving assurance of expenditure of a reasonable amount of the funds of the government of such State, local governments therein, or other agencies, for the same or similar purposes with respect to such catastrophe: *Provided further*, That within any affected area Federal agencies are authorized to participate in any such emergency assistance: *Provided further*, That no part of this appropriation which may be allocated for alleviating hardship or suffering caused by a catastrophe shall be

expended for departmental personal services or for permanent construction: *And provided further*, That no part of this appropriation shall be available for allocation to finance a function or project for which function or project a budget estimate of appropriation was transmitted pursuant to law during the Eighty-first Congress or the first session of the Eighty-second Congress and such appropriation denied after consideration thereof by the Senate or House of Representatives or by the Committee on Appropriations of either body. (*Independent Offices Appropriation Act, 1950.*)

PROGRAM AND PERFORMANCE

The Bureau of the Budget, as a staff agency of the President, assists him in formulating his proposed Budget and program for the Federal Government and in seeing that the money appropriated by the Congress to run the Federal establishment is spent with maximum regard for efficiency and economy.

1. *Preparation and administration of the Budget.*—In addition to the continuing tasks of advising the President on general budgetary policies, reviewing agency operations and Government-wide programs, preparing the Budget estimates for the President, approving quarterly apportionments of funds, fixing personnel ceilings, and analyzing financial reports, emphasis will be given in 1951 to the improvement of methods of measuring and reporting work performance as a phase of budgeting, the development of improved expenditure and receipt classifications, the improvement of the accounting system (jointly with the General Accounting Office and the Treasury Department), the development of ways to provide the public with a better understanding of the Budget, and the provision of more effective program review and analysis of the major areas of Government expenditures.

2. *Improvement of Government organization and management.*—The 1951 program will continue the development of plans for improving Government organization, with particular emphasis on the installation and follow-up of the approved recommendations of the Commission on Organization of the Executive Branch; the working out of means by which the Bureau of the Budget, the General Services Administration, and the Civil Service Commission can best relate their management activities to the improvement of the operating effectiveness of the executive branch; the development of systems for the appraisal and improvement of the effectiveness and efficiency of the operations of each agency and relating this process to Budget estimates review; and the development of standards for determining program effectiveness and operating efficiency.

3. *Coordination and improvement of Federal statistics.*—Continuing tasks during 1951 will include clearing report forms going to the public in order to prevent duplication and reduce the reporting burden on business and the public; coordinating statistical programs to eliminate overlapping, gaps in data, and inconsistencies; and improving statistical methods and techniques. In addition, emphasis in 1951 will be given to achieving a more systematic and coordinated review of the budgets of the major Federal statistical programs, determining and reducing the unit costs for agency statistical operations, and improving the basic data needed for determination of economic policy.

4. *Legislative review, coordination, and analysis.*—By delegation from the President, in order that he may have the views of the agencies and that his position may be expressed for their guidance and for the information of Congress, the Bureau reviews and analyzes proposed legislation and agency reports on pending legislation, enrolled bills, Executive orders, and proclamations. Work load in terms of number of bills and reports has been growing steadily. During 1951, additional attention will be given to developing methods for earlier handling of agency legislative proposals, reducing the time required for executive branch reporting on pending legislation, providing closer working relationships with congressional committees in order to improve the timing of Bureau action in relation to congressional schedules, and obtaining better data on the cost of legislative proposals.

In order to increase the effectiveness of all the foregoing activities, particularly the first two, it is proposed to add in 1951 two new field offices in parts of the country where no such offices now exist.

PROGRAM AND PERFORMANCE

The National Security Council advises the President with respect to the integration of domestic, foreign, and military policies relating to the national security so as to enable the military services and the other departments and agencies of the Government to cooperate more effectively in matters involving the national security. The Central Intelligence Agency is, by law, under the direction of the Council. The membership of the Council includes the President, the Vice President, the Secretary of State, the Secretary of Defense, and the Chairman of the National Security Resources Board. In addition, when appointed by the President by and with the advice and consent of the Senate, the following officials may also be members of the Council: The Secretaries and Under Secretaries of other executive departments and of the military departments, the Chairman of the Munitions Board, and the Chairman of the Research and Development Board. The law also provides that the Council shall have a staff, headed by a civilian executive secretary

appointed by the President, with such other personnel as may be authorized by the Council.

PROGRAM AND PERFORMANCE

The National Security Resources Board advises the President on the coordination of military, industrial, and civilian mobilization. To this end the Board has established a general framework for resources mobilization planning, within which the Board supplies leadership and guidance throughout the Government in the preparation of plans to insure maximum utilization of the Nation's resources during war, together with measures that must be taken during peacetime against the contingency of war. Specific programs are being carried on in the fields of production, materials, energy and utilities, manpower, transportation, foreign activities, economic management, civil defense, health resources, housing and community facilities, and censorship. Almost all of the agencies of the

Government, as well as many specially qualified leaders from private life, are contributing to this planning process.

PROGRAM AND PERFORMANCE

The Philippine Alien Property Administration was established for the purpose of vesting and disposing of enemy alien property in the Philippines in accordance with the provisions of the Philippine Property Act of 1946 and Trading With the Enemy Act. Residue assets remaining after payment of claims and administrative expenses from vested property must be transferred to the

Philippine Government. An annual limitation is established as to the amount of funds derived from vested property that may be used for administrative expenses. The vesting and debt claims programs will be completed during 1950; litigation will continue into 1952. The 1951 estimate for administrative expenses includes amounts necessary for virtually closing out of operations, such as payment of accrued leave and transportation expenses for returning to the United States employees stationed in the Philippines.

APPROPRIATION TEXT

Administrative expenses, Philippine Alien Property Administration: The Philippine Alien Property Administrator is hereby authorized to pay out of any funds or other property or interest vested in him or transferred to him, necessary expenses incurred in carrying out the powers and duties conferred on him pursuant to the Trading With the Enemy Act, as amended (50 U. S. C. App.), and the Philippine Property Act of 1946 (60 Stat. 418): *Provided*, That not to exceed **[\$250,000]** \$215,500 shall be available for the current fiscal year for the general administrative expenses of the Philippine Alien Property Administration, including the salary of the Administrator at \$10,330 per annum; printing and binding; rent of private or Government-owned space in the District of Columbia; employment outside the United States of persons without regard to the civil service and classification laws including services as authorized by section 15 of the Act of August 2, 1946 (5 U. S. C. 55a); personal services in the District of Columbia and expenses of attendance at meetings of organizations concerned with the work of the agency: *Provided further*, That on or before November 1 of the current fiscal year the Philippine Alien Property Administrator shall make a report to the Appropriations Committees of the Senate and the House of Representatives giving detailed information on all administrative and nonadministrative expenses incurred during the next preceding fiscal year, in connection with the activities of the Philippine Alien Property Administration. PROGRAM AND PERFORMANCE

The China aid program consists of three parts: (1) grants to the Chinese Government for military supplies and equipment, (2) the Department of State's program of aid to Chinese students studying in the United States, and (3) the Economic Cooperation Administration's economic assistance program.

1. *Foreign assistance (military).*—Grants of \$125,000,000 were made to the Chinese Government under the Foreign Assistance Act of 1948.

2. *Exchange of students program.*—The Foreign Aid Appropriation Act of 1950 authorized the President to allocate \$4,000,000 to the Department of State for the expenses of tuition and subsistence of approximately 3,000 Chinese students studying in accredited educational institutions in the United States, and payment of return passage to China of those students. It is anticipated that the program will be terminated by June 30, 1952.

3. *Economic assistance.*—The Economic Cooperation Administration was authorized to utilize the unobligated balance of the 1949 appropriation through February 15, 1950, to continue economic aid to areas of China remaining free of Communist domination.

(a) *Commodities.*—The commodity program has comprised the financing of imports of key commodities into China and supervision of their distribution and use. Due to the military situation the scope of the mainland commodity program was reduced mainly to furnishing

rice for the rationing programs of Canton and Swatow and small quantities of petroleum products for South China. In addition, the island of Taiwan (Formosa) has been supplied with nitrogenous fertilizer for rice plantings, crude petroleum for the Kaohsiung refinery, and small quantities of raw cotton for textile mills.

Subsequent military developments have caused the complete cessation of the flow of aid commodities to the mainland and have restricted the commodity program to Taiwan. Diversion of sizable quantities of commodities to Japan, Korea, and Hong Kong for safekeeping at the time of the Communist take-over of Shanghai created a disposal problem of considerable proportion. Efforts have been made to utilize these commodities to the fullest extent possible in non-Communist areas. Where this is not feasible, the balance is being disposed of by sale at the most favorable terms available.

(b) *Industrial replacement and reconstruction.*—Although the rapidly deteriorating political situation in China caused suspension of this phase of the China aid program before procurement of capital equipment could be started, a considerable amount of preliminary planning had been completed on some projects. In addition, a private United States firm has been rendering engineering services and furnishing technical advice in Taiwan under a United States financed contract with the Chinese Government.

(c) *Rural reconstruction.*—The Joint Commission on Rural Reconstruction was established (1) to increase the domestic production of agricultural commodities, particularly foodstuffs, in short supply; (2) to establish centers for initiating a program, in conjunction with the Chinese Government, of fostering improved agricultural techniques, local government administration, public health work, land reform, and social education; (3) to carry out a large-scale effort in adult education; and (4) to assist in irrigation, dike building, handicraft, and similar rural reconstruction projects started through local initiative and resources.

Because of the military situation, the program was concentrated on projects in areas in south and west China and Taiwan.

(d) *Payment of relief package transportation.*—While circumstances permitted, ocean freight charges on relief packages sent to China by individuals and by American voluntary nonprofit relief agencies were financed from this appropriation.

(e) *Administration.*—The China aid program has been administered by a Washington headquarters staff and a mission staff in China. At present the mission is operating exclusively in Taiwan, with the exception of two offices—one in Hong Kong to handle the liquidation of United States aid program supplies on the South China mainland, and the other in Shanghai to dispose of stocks remaining at the time of the Communist take-over in a manner that will protect the interests of the United States.

PROGRAM AND PERFORMANCE

These funds, representing the final phase of an authorized program of \$675,000,000 for economic and military assistance to the Governments of Greece and Turkey, will finance approximately the first 3 months of the 1950 military program. For the remainder of 1950 this program will be financed from "Mutual defense assistance, Executive Office of the President." The economic program for 1950 is being financed from "Foreign assistance, Executive Office of the President."

FUNDS AVAILABLE FOR OBLIGATION: Appropriation or estimate—1950, \$60,000,000.

PROGRAM AND PERFORMANCE

The objectives of the Korea assistance program are to facilitate the maintenance of political independence, the achievement of economic stability, and the eventual unification of the country as a single democratic state. Originally administered by the Department of the Army, the function was transferred to the Economic Cooperation Administration by Executive order, effective January 1, 1949. During the balance of 1949, the Economic Cooperation Administration continued the relief and rehabilitation program previously run by the Department of the Army.

Legislation to authorize assistance to Korea for 1950, which would provide for economic development through capital expenditures as well as for relief and rehabilitation, was introduced in the first session of the Eighty-first Congress (H. R. 5330). It was passed by the Senate, was favorably reported by the House Foreign Affairs Committee, and awaits action by the House of Representatives. Appropriations totaling \$60,000,000 were made available to maintain an assistance program on the 1949 scale until February 15, 1950. The Budget includes

under proposed legislation an anticipated supplemental of \$65,000,000 which will enable the Economic Cooperation Administration to continue the basic relief program and make a start on economic development projects in the remainder of 1950, and \$115,000,000 for the continuation of the recovery program in 1951.

The 1950 program has involved:

1. *Grants for recovery imports.*—These funds are being spent primarily for fertilizer and agricultural supplies, raw materials, and repair parts for agricultural and industrial equipment. Some outlays for economic development projects in 1950 are scheduled in the supplemental request for funds.

2. *Technical assistance.*—Under this activity the Koreans are assisted in developing an export-import program, in increasing agricultural and industrial output, in maintaining essential services such as transportation and communications, and in effecting financial reforms needed to stabilize the economy.

3. *Payment of relief package transportation.*—These funds are used to pay the ocean transportation charges on relief packages sent to South Korea from the United States by individuals and by American voluntary nonprofit agencies.

4. *Administration.*—The administrative organization consists of a staff in Washington, D. C., and a mission in Korea.

PROGRAM AND PERFORMANCE

These funds provided for the care, handling, and disposal of surplus property located abroad, as well as for the costs of care and handling of property located in the United States which was included with overseas surplus

property in sales to foreign governments. The Departments of the Army and the Navy were given the responsibility for care and handling, and the Department of State for disposal. These functions were transferred to the original owning agencies on July 1, 1949, by the Federal Property and Administrative Services Act of 1949.

From September 27, 1945, to June 30, 1949, surplus property with an original value of approximately \$10 billion was disposed of with a realization of approximately \$1.8 billion and other benefits. A small residual inventory at the end of 1949 was transferred to the original owning agencies.

Consolidated schedule of obligations incurred under allocations from "Care, handling, and disposal of surplus property abroad, Executive Office of the President"

PROGRAM AND PERFORMANCE

The Defense Aid Supplemental Appropriation Act, 1942, authorized the President to procure up to \$600,000,000 worth of defense articles, information and services for the government of any country whose defense the President deemed vital to the defense of the United States, to the extent that the governments agreed to pay for them.

Approximately \$4,011,000 was used for the purpose of repayments to foreign nations in 1949 for undelivered goods.

OBLIGATIONS BY ACTIVITIES

Refunds to foreign nations—1949, \$4,011,261.

OBLIGATIONS BY OBJECTS

13 Refunds, awards, and indemnities—1949, \$4,011,261.

PROGRAM AND PERFORMANCE

The Economic Cooperation Administration (ECA) carries out the European recovery program (ERP) authorized by the Economic Cooperation Act of 1948. This program aims to promote world peace and to serve the general welfare and the national interest of the United States through aiding the countries of Europe in the achievement by the end of the fiscal year 1952 of a healthy economy substantially independent of extraordinary outside assistance.

The participating European countries are: Austria, Belgium, Denmark, Eire, France, the United States-United Kingdom Zone of the Free Territory of Trieste, Greece, Iceland, Italy, Luxembourg, Netherlands, Norway, Portugal, Sweden, Switzerland, Turkey, the United Kingdom, and western Germany. These countries are members of the Organization for European Economic Cooperation (OEEC), which was established to plan and execute a program of self-help and mutual aid, in association with the United States, to increase production, expand foreign trade, create internal financial stability, and facilitate economic cooperation in Europe. Legislative authority for the program terminates June 30, 1950. Included in the Budget under proposed legislation is an

anticipated supplemental of \$3,100,000,000 for foreign assistance and other foreign aid for the fiscal year 1951.

1. *Grants and loans for recovery.*—Dollar grants and loans, made available to participating European countries for the purchase of goods and services through normal trade channels, are designed to enable the recipient countries to expand their productive facilities, maintain reasonable living standards, and readjust their economies to achieve substantial independence from extraordinary outside assistance by the end of fiscal year 1952. Fifteen percent of the total aid during 1949 and an estimated 4 percent during 1950 will be in the form of loans rather than grants.

Each government is required to deposit in a special account with ECA the local currency value of the proceeds from sales of commodities purchased with dollar grants. Ninety-five percent of such "counterpart" funds is available for use by the participating countries for purposes approved by ECA. Through the administration of dollar aid and counterpart funds, ECA reviews the economic policies and progress of the participating countries, and, in cooperation with OEEC and the individual countries, assists in achieving optimum use of total western European resources. Five percent of the counterpart fund is available to the United States for purchase of strategic materials and administrative and other expenses of the United States Government.

In order to stimulate trade among the participating countries, and to make them less dependent upon dollar sources of supply, a system of "conditional aid" was inaugurated. Under this system, dollar grants are made by the United States on the condition that the recipients will extend grants in their own currency to other European countries. The plan is a first step toward the objective of convertibility of currencies and maximum practicable freedom of trade among the participating countries.

During 1949, dollar grants and loans, augmented by counterpart funds and intra-European local currency grants, enabled the participating countries to progress toward recovery goals in several fields. Their consolidated production index (1938=100) rose from 104 at the start of 1949 to 118 at the end. The "dollar gap" was narrowed slightly, the inflationary rise in the cost of living was checked, currencies were devalued in order to stimulate exports, and progress was made in bringing the internal financial situation of the participating countries into balance.

The reduction in dollar grants and loans in 1950 reflects the progress during 1949, as well as the determination of the participating countries to adjust their economies to diminishing United States aid. It is expected that during 1950 further progress toward recovery will be achieved. One important factor in continued progress is a very real improvement in the volume of exports from the ERP countries to the dollar area, principally the United States. Stress is also being placed upon eliminating trade barriers, dual pricing, cartel agreements, and other restraints upon production and commerce, with a view to achieving the ultimate integration of the economies of western Europe which is essential to the preservation of the gains so far achieved.

The Economic Cooperation Act of 1948, as amended, authorizes ECA to guarantee the convertibility into dollars of income from investments in ERP countries. The total of such guaranties may not aggregate more than \$150,000,000. The amended act provides that liabilities be discharged from fees authorized to be charged, or, if liabilities are in excess of such fees, from the Treasury through the purchase by the Treasury of ECA notes.

2. *Strategic materials, purchase, and development.*—Dollars are available to promote the production of and to purchase materials in which the United States is actually or potentially deficient. Five percent local currency counterpart funds may also be used for those purposes.

During 1949, ECA obligated \$622,500 to finance British projects for the production of cobalt and kyanite. In addition, local currency counterpart funds with an equivalent dollar value of \$36,000,000 were obligated for the acquisition of strategic materials. 1949 was largely devoted to surveying the availability of materials for subsequent production and purchase and to preliminary negotiations with owner governments and prospective American mining and development firms.

The obligation of \$32,000,000 of appropriated funds for the development and purchase of strategic materials during 1950 is anticipated through arrangements already initiated or planned, such as those for geological and topographic surveys of British overseas territories, for the purchase and installation of mining and milling equipment for lead-zinc mines in French Morocco, and for the development of bauxite sources and the construction of an alumina plant in Jamaica. It is estimated that local currency counterpart funds equivalent to \$50,000,000 will be obligated.

3. *Technical assistance.*—Information is furnished on American methods and techniques to participating countries and their dependencies on the basis of specific project requests. The exchange of available techniques and expert services among participating countries is stimulated. As commodity aid to Europe declines, technical assistance becomes increasingly important as an instrument for accelerating European recovery by increased industrial and agricultural productivity, reduced production costs, and improved manpower utilization, marketing techniques, and administrative methods. This Government finances only the dollar costs of such assistance, local currency expenses being met by the participating countries.

During 1949, over 80 percent of the dollar obligations for technical assistance involved Greece, where ECA assumed responsibility from the American mission to Greece. In addition, ECA conducted technical surveys of means for increasing productivity in several European industries. In the last quarter of 1949, project applications from other countries increased rapidly; new projects were approved for the United Kingdom, Norway, the Netherlands, Denmark, Italy, and Eire. Over 100 European technicians engaged in ECA-sponsored studies in the United States, and nearly 200 American experts were on assignment in the participating countries and their dependencies.

On the basis of achievements to date and present plans, it is estimated that during 1950 nearly 1,300 European technicians will visit the United States and that over 450 American experts will be sent abroad. The volume of United States technical and scientific literature and equipment to be sent abroad is also scheduled for expansion.

4. *Payment of transportation on relief supplies and packages.*—To encourage voluntary relief contributions to Europe, the Economic Cooperation Act of 1948 provides for the payment of ocean freight charges on three groups of relief shipments to countries receiving dollar grants: (1) supplies sent by United States voluntary nonprofit relief agencies; (2) shipments of individual relief packages by parcel post; and (3) commercial shipments of individual packages sent by ocean freight from the United States.

ECONOMIC COOPERATION—Continued**Foreign Assistance, Executive Office of the President—Continued**

During 1949, ocean freight charges were paid with dollar funds on the following quantities and values of relief supplies:

	Thousands of pounds	Dollar value (estimated)
Supplies of voluntary agencies.....	146, 190	\$37, 100, 000
Individual relief packages.....	215, 580	106, 600, 000
Commercial shipments.....	5, 722	2, 900, 000
Total.....	367, 492	146, 600, 000

Through a United States investment of \$12,082,205, aid valued at over 12 times this amount was thus made available to participating European countries. The programs of the voluntary agencies were considerably expanded through the ocean freight subsidy.

The estimated obligations for relief transportation payments during 1950 are \$1,396,401 less than in 1949 because of the improved living standards in recipient countries, and because of the shift of emphasis on the part of voluntary agencies from food and clothing relief to social and vocational rehabilitation.

5. *Policy formulation and conduct of relations with foreign countries.*—As recognized by the Foreign Assistance Act of 1948 it is essential that the objectives of ERP be coordinated with United States foreign policy aims. This coordination is accomplished by the Department of State through review of program content and plans. The Department also assists in such undertakings as negotiations for reduction in trade barriers and practices, promotion of customs unions, and general financial problems on exchange rates and balance of payments problems. The funds transferred finance only that additional work of the Department of State which results directly from the existence of the ERP.

6. *To carry out the provisions of section 112 of the Foreign Assistance Act of 1948.*—With the passage of this act, the Department of Agriculture assumed the responsibility set forth in section 112 for making current determinations as to whether or not domestic agricultural commodities are in surplus at the time procurement from offshore sources by ERP recipient nations is proposed. Such a determination is necessary in light of the requirement in the act making procurement of agricultural commodities from the United States mandatory when such products are determined to be in surplus.

7. *Travel promotion program.*—Funds are allocated to the Department of Commerce to cover the additional administrative costs occasioned by its assistance in facilitating and encouraging travel by United States citizens to and within the participating countries.

8. *Confidential funds.*—Funds are provided for expenditures of a confidential character other than entertainment and may be expended without vouchers upon certification by the Administrator or Deputy Administrator.

9. *Administration.*—Administration of ERP is carried out by the Administrator, who, assisted by a staff in Washington, directs the entire program; the United States special representative in Europe, who is responsible under the Administrator for executing and supervising overseas ECA activities; and special ECA missions in each of the participating countries.

In addition to the dollar obligations, the local currency equivalent of \$6,985,000 during 1949 and an estimated

\$8,902,000 during 1950 will be expended for ECA administration in Europe.

The increased obligations for administration for 1950 reflect the full annual cost of the organization at the employment level achieved by the end of 1949.

APPROPRIATION TEXT

For expenses necessary to enable the President to carry out the provisions of the Economic Cooperation Act of 1948, as amended by the Act of April 19, 1949 (Public Law 47), for the period commencing April 3, 1949, through June 30, 1949, including expenses of attendance at meetings concerned with the purposes of this appropriation (not to exceed \$6,000); hire of passenger motor vehicles; maintenance and operation and hire of aircraft; payment of damage claims pursuant to law (28 U. S. C. 2672); health service program as authorized by law (5 U. S. C. 150); rents in the District of Columbia; transportation of privately owned automobiles; entertainment (not to exceed \$6,000); exchange of funds without regard to section 3651 of the Revised Statutes; and loss by exchange; \$1,074,000,000: *Provided*, That not to exceed \$4,400,000 in the aggregate shall be available from this appropriation and the appropriation under this head in the Foreign Aid Appropriation Act, 1949, for administrative expenses during the period April 3, 1949, through June 30, 1949.

For expenses necessary to enable the President to carry out the provisions of the Economic Cooperation Act of 1948, as amended by the Act of April 19, 1949 (Public Law 47), for the fiscal year ending

June 30, 1950, including expenses of attendance at meetings concerned with the purposes of this appropriation (not to exceed \$30,000); purchase (not to exceed two) and hire of passenger motor vehicles; maintenance and operation and hire of aircraft; payment of damage claims pursuant to law (28 U. S. C. 2672); health service program as authorized by law (5 U. S. C. 150); rents in the District of Columbia; transportation of privately owned automobiles; entertainment (not to exceed \$25,000); exchange of funds without regard to section 3651 of the Revised Statutes; and loss by exchange; \$3,628,380,000, of which not to exceed \$350,000 shall be available for expenditures of a confidential character (other than entertainment) under the direction of the Administrator or the Deputy Administrator, who shall make a certificate of the amount of each such expenditure which he may think it advisable not to specify, and every such certificate shall be deemed a sufficient voucher for the amount therein specified: *Provided*, That this appropriation shall be consolidated and merged with appropriations under this head for prior periods, and such consolidated appropriation may be used during the fiscal year 1950 within limitations herein specified: *Provided further*, That not to exceed \$16,500,000 of such consolidated appropriation shall be available for administrative expenses during the fiscal year 1950, of which not more than \$25,000 shall be available to the Administrator for any further action he may consider advisable to carry out the provisions of section 115 (f) of the Economic Cooperation Act of 1948, as amended by the Act of April 19, 1949 (Public Law 47): *Provided further*, That the Administrator is authorized to issue notes from time to time during the fiscal year 1950 for purchase by the Secretary of the Treasury in an amount not exceeding in the aggregate \$150,000,000, for the purpose of allocating funds during such fiscal year to the Export-Import Bank of Washington for assistance on credit terms under the provisions of said Act; and the provisions of paragraph (2) of section 111 (c) of said Act shall, to the extent applicable, be applicable to the notes authorized to be issued in this proviso and to all functions of the Administrator, the Secretary of the Treasury, and the Export-Import Bank of Washington in extending the assistance provided for herein.]

The Administrator shall utilize such amounts of the local currency allocated pursuant to section 115 (h) of Public Law 472, Eightieth Congress, as amended, as may be necessary, to give full and continuous publicity through the press, radio, and all other available media, so as to inform the peoples of the participating countries regarding the assistance, including its purpose, source, and character, furnished by the American taxpayer. (Foreign Aid Appropriation Act, 1950.)

PROGRAM AND PERFORMANCE

Funds provided under this appropriation are used to make contributions to the International Children's Emergency Fund of the United Nations. This fund, established by resolution of the United Nations, is for the purpose of assisting in the mental and physical rehabilitation of the children of various countries, with priority given to the children of countries which were victims of aggression. In accordance with this resolution, United Nations member countries were requested to make voluntary contributions to the fund.

The United States Congress authorized a contribution of not to exceed \$100,000,000 in response to an appeal for funds from the United Nations, on a matching basis under which the United States contributes 72 percent of the total resources contributed by all governments, including the United States. Under this authorization, a total of \$75,000,000 has been appropriated for this purpose. Funds for additional contributions are provided in the Budget under proposed legislation.

Consolidated schedule of obligations incurred under allocation from "International Children's Emergency Fund of the United Nations, Executive Office of the President"

OBLIGATIONS BY AGENCIES

Department of State—1949, \$25,491,692; 1950, \$16,712,475.

Appropriation or estimate.....		\$814,010,000	\$500,000,000
Applied to contract authorization.....			-500,000,000
Net appropriation available for obligation.....		814,010,000	
Contract authorization.....		500,000,000	
Total obligations (reserved for allocation).....		1,314,010,000	

PROGRAM AND PERFORMANCE

The mutual defense assistance program was authorized by Congress to support and strengthen United States foreign policy through furnishing military assistance to other nations dedicated to international peace and the principles and purposes of the United Nations Charter. The funds and contract authority are to be used for four major purposes: (1) to reimburse the Department of Defense for military equipment which will be drawn from its war reserves and transferred to recipient countries on a grant basis; (2) to procure from new production in the United States items of military equipment for transfer to recipient countries on a grant basis; (3) to help in financing the dollar costs of imports of materials and machine tools needed for increased military production in western Europe; and (4) to meet costs of rehabilitation, delivery, technical and training assistance, and operating and administrative expenses.

The Budget includes \$500,000,000 to liquidate contract authority authorized for 1950, and as proposed legislation an appropriation of \$647,500,000 and \$500,000,000 in new contract authority.

1. *North Atlantic Treaty countries.*—Assistance is being provided to certain of the North Atlantic Treaty countries to aid them in increasing the integrated defensive strength of the parties to the Treaty. Such assistance is being furnished subject to agreements which are designed to assure that it will be used to promote an integrated defense of the North Atlantic area and to facilitate the development of defensive plans by the Council and Defense Committee of the North Atlantic Treaty.

2. *Greece and Turkey.*—Assistance to Greece continues the program developed in response to the President's message to Congress on March 12, 1947, which aimed to maintain the territorial integrity and independence of Greece.

American military assistance assists Turkey to maintain its national independence and develop further its economic resources, contributing to the maintenance of political stability in the Middle East.

3. *Iran, Korea, Philippines, and the general area of China.*—Military assistance assists Iran to maintain its independence, sovereignty, and territorial integrity against outside pressure. United States aid provides internal security against subversive elements and improves Iran's capacity for national defense.

Military aid will assist Korea (1) to withstand the expansionist threats of the Soviet-dominated regime in North Korea following the withdrawal of United States occupation forces, and (2) to serve as a nucleus for the eventual unification of the country on a democratic basis.

Aid to the Philippines will assist the legally constituted government to maintain its integrity against internal security threats.

Assistance in the general area of China is to be furnished as the President may direct.

APPROPRIATION TEXT

For expenses necessary to enable the President to carry out the provisions of the Mutual Defense Assistance Act of 1949 for the period through June 30, 1950, \$814,010,000, of which (a) \$500,000,000 shall be available, in accordance with section 102, for carrying out the provisions of title I, including expenses, as authorized by section 408 (b), of administering the provisions of said Act and the Act of May 22, 1947 (61 Stat. 103), as amended (in addition to amounts heretofore appropriated for such expenses under the latter Act); (b) \$211,370,000 shall be available in accordance with title II for carrying out the provisions of the Act of May 22, 1947, as amended; and (c) \$102,640,000 shall be available for carrying out the provisions of title III, including \$27,640,000 as authorized by section 302 and \$75,000,000 as authorized by section 303. In addition to the foregoing appropriation, the President is hereby specifically authorized, in accordance with section 103, to enter into contracts for carrying out the provisions of title I in amounts not exceeding in the aggregate \$500,000,000 during the period ending June 30, 1950. For liquidation of obligations incurred pursuant to authority granted under this head in the Second Supplemental Appropriation Act, 1950, \$500,000,000. (Second Supplemental Appropriation Act, 1950.)

PROGRAM AND PERFORMANCE

Funds provided under this appropriation are used to make special contributions to the United Nations for the relief of Palestine refugees. In order to assist in the alleviation of conditions of starvation and distress among the Palestine refugees, the United Nations, in its resolution of November 19, 1948, appealed to all member nations for voluntary contributions sufficient to supply the needed relief.

In accordance with this appeal the United States Congress approved Public Law 25, which authorized \$16,-

000,000 for this purpose; \$12,000,000 was made immediately available for contribution to the United Nations, the remaining \$4,000,000 to be made available for contribution at such time as the President should find that other nations who were parties to the agreement had met their obligations as outlined in the agreement. Funds in the amount of \$27,000,000 are provided in the Budget under proposed legislation for additional contributions to the United Nations for a program of relief and work projects in 1950 and 1951.

Consolidated schedule of obligations incurred under allocation from "Contributions by the United States for relief of Palestine refugees, Executive Office of the President"

OBLIGATIONS BY AGENCIES

Department of State—1949, \$8,000,000; 1950, \$8,000,000.

OBLIGATIONS BY ACTIVITIES

Contributions to United Nations Relief for Palestine Refugees—1949, \$8,000,000; 1950, \$8,000,000.

OBLIGATIONS BY OBJECTS

11 Grants, subsidies, and contributions—1949, \$8,000,000; 1950, \$8,000,000.

APPROPRIATION TEXT

To enable the President to carry out the provisions of the joint resolution of March 24, 1949 (Public Law 25), authorizing a special contribution by the United States to the United Nations for the relief of Palestine refugees, \$12,000,000, and an additional \$4,000,000 to the President for the same purposes as prescribed in the joint resolution of March 24, 1949 (Public Law 25), to such extent as the President from time to time finds that the other nations party to such United Nations agreement have met their obligations to the United Nations Relief for Palestine Refugees, to remain available until June 30, 1950, of which \$8,000,000 shall be used to repay, without interest, the Reconstruction Finance Corporation for advances made pursuant to section 1 of said public law. (Second Deficiency Appropriation Act, 1949.)

Appropriated 1950, \$4,000,000

[SPECIAL FUND FOR MANAGEMENT IMPROVEMENT]

Transferred from various appropriations	-----	\$1,000,000	-----
Transferred to various appropriations	-----	-1,000,000	-----
Total obligations	-----	-----	-----

PROGRAM AND PERFORMANCE

This fund was established to enable the President to conduct studies and carry out measures aimed at improving the effectiveness of Government management and operations and to follow up certain recommendations of the Commission on Organization of the Executive Branch of the Government. The moneys are derived not from new appropriations but from transfers of money reserved from other appropriations, up to a limit of \$1,000,000. The specific projects will get under way during the last half of 1950, under sponsorship of various departments and agencies.

APPROPRIATION TEXT

To enable the President, by allocation to any department, agency, corporation, or independent establishment in the executive branch of the Government, to provide for expenses necessary for carrying out, by contract or otherwise, activities of primary importance in improving the effectiveness of Government management and operations, including personal services in the District of Columbia; services as authorized by section 15 of the Act of August 2, 1946 (5 U. S. C. 55a), but at rates not to exceed \$50 per diem for individuals; travel; and printing and binding; \$1,000,000, to be derived by transfer from the reserved portion of any appropriation or appropriations as the President may designate, against which reserves shall have been established pursuant to Executive Order No. 8512, as amended. (Supplemental Appropriation Act, 1950.)

PROPOSED LEGISLATION

Assistance to economically underdeveloped areas.—The Budget includes under this head \$35 million to provide technical assistance to economically underdeveloped areas through direct United States aid and through contributions to the United Nations for that purpose. This program aims to promote world economic expansion by raising the living standards of the peoples of underdeveloped areas of the world. In cooperation with recipient nations, programs of industrial and agricultural development, public health, and educational improvement will be undertaken.

Disaster relief.—If authorizing legislation for disaster relief, which was introduced in the Eighty-first Congress, is enacted, an appropriation to the President of \$5,000,000

will be requested to provide assistance to States and local governments in major disasters, and for other purposes authorized in the legislation.

Economic cooperation: Foreign assistance and other foreign aid.—Provided in this category are \$3.1 billion for continuation of the European recovery program in 1951 and for any contingencies arising in the field of foreign affairs. The activities conducted under this program in 1950 are set forth under the head "Economic cooperation."

Other.—In addition, proposed legislation extending existing programs is discussed under the following titles:

- Assistance to the Republic of Korea.
- Mutual defense assistance.
- Relief of Palestine refugees.

PROGRAM AND PERFORMANCE

The Commission is responsible for the maintenance and operation of all permanent United States military cemeteries and memorials located in foreign countries.

The estimate provides general maintenance of 23 military cemeteries and 11 World War I memorials, overhead in connection with the World War II construction program, and expenses at the seat of government. The increase from 1950 to 1951 reflects an increased overhead for the construction program which reaches full-scale operation in 1951 and the first year of complete operation of World War II cemeteries.

PROGRAM AND PERFORMANCE

The estimate covers the second year's requirement for a program which will require about 5 years for completion. Construction covers the development of 15 locations and will include permanent headstones, erection of a memorial structure at each location, and other features such as landscaping, roads and paths, water supply, and utility buildings required for operating purposes. Estimated completion is 25 percent in 1950 and 35 percent additional in 1951.

OBLIGATIONS BY ACTIVITIES

Construction of World War II cemeteries—1949, \$674,400; 1950, \$9,353,800; 1951, \$8,088,000.

OBLIGATIONS BY OBJECTS

PROGRAM AND PERFORMANCE

The Commission is responsible for the production of fissionable materials and atomic weapons, research and development on both military and peaceful applications of atomic energy, dissemination of unclassified technical information to broaden scientific knowledge, and the control of scientific and technical data to the extent necessary to safeguard the national security. Coordination of

the Commission's programs with the Department of Defense is secured through the Military Liaison Committee.

The facilities for the production of fissionable materials and weapons, together with the large national laboratories, are operated for the Commission by contractors.

The Commission's budget is presented for the first time on an accrued-cost basis; that is, the amounts in the detailed estimates are the costs of labor, materials, and miscellaneous services actually used in the execution of the programs, reconciled in total to obligations. These estimates are so arranged that progress can be measured under the industrial-type accounting system maintained by the Commission. The operating costs indicated in the budget exclude depreciation of fixed assets, since funds are requested for replacement of plant and equipment as needed.

1. *Operations—(a) Source and fissionable materials.*—The operating costs for this program are the costs of all the materials and operations required to produce the fissionable materials uranium-235 and plutonium. The major activities are the exploration for and procurement of uranium ores; the processing of the ores into feed materials for the plants at Oak Ridge and Hanford, which manufacture fissionable materials; and the production of uranium-235 and plutonium for use in atomic weapons. In addition, research and development work is conducted in order to improve the efficiency of the manufacturing processes.

Exploration in the United States will be continued to develop the maximum domestic supply of uranium ores on an economic basis. As capacity is expanded at Oak Ridge, Hanford, and the feed-materials plants, the quantity of fissionable materials produced will continue to in-

crease during 1950 and 1951. The increase in output during these fiscal years is expected to be greater than indicated by the increase in costs because of process improvements and increased operating efficiency. Research and development work necessary to process improvement will be continued at approximately the 1950 levels.

(b) *Weapons.*—The weapons program comprises weapons research and development and the manufacture, testing, storage, custody, and surveillance of atomic weapons. In 1951, the Commission will continue extensive research in basic, theoretical, and experimental fields of nuclear science; it will also carry on the development of new and improved atomic weapons and the industrial-type production of weapons of the latest approved designs. The increase in the level of operations, made possible by the availability of additional production and research facilities, accounts for the higher costs estimated for 1951.

(c) *Reactor development.*—The Commission's objective is to develop nuclear reactors for the production of fissionable material, the generation of power, and the propulsion of ships and aircraft. It is principally through these atomic energy machines that the Commission expects to evolve means of utilizing for peaceful purposes the energy released by nuclear fission. The reactors currently being developed will be equally important for military purposes. There will be, in 1951, an expanded effort upon development of a ship-propulsion reactor, looking toward its construction in 1952. Development work on three other reactors has progressed to the point that construction is scheduled to begin in 1950. Other reactors are in preliminary development. In addition, this program includes extensive research on materials and systems of chemical processing and heat transfer, essential to reactor design and operation.

(d) *Physical research.*—The program of research in the physical sciences is designed to continue and increase the world leadership of the United States in the utilization of atomic energy by providing an expanding background of basic scientific knowledge, to which the fundamental sciences of physics, chemistry, metallurgy, and mathematics contribute. Such knowledge will provide developmental scientists and engineers with the necessary continuing supply of new basic information. The program also includes the production of radioisotopes at Oak Ridge for use in research and in medical therapy. Although much of the basic research is performed in the Commission's national laboratories, a substantial portion is carried on at universities and other institutions.

(e) *Biology and medicine.*—This program comprises (1) the establishment and the use in the atomic energy program of standards for the protection of the health of all who are or may be exposed to radiation; (2) the promotion and direction of research utilizing atomic energy and its products in the fields of biology, biophysics, and medicine; and (3) the dissemination of related unclassified information. The establishment of radioactive cobalt as a cheap and effective radium substitute, the use of radioactive phosphorus in diagnosing and localizing brain tumors, and the maintenance of an outstanding worker safety record at atomic energy plants are some of the accomplishments in recent years. The Division of Biology and Medicine also carries out the Commission's role in civilian defense planning.

(f) *Community operations.*—In support of its facilities for the manufacture of fissionable materials and weapons, the Commission operates the towns of Oak Ridge, Tenn.; Richland, Wash.; and Los Alamos, N. Mex.; in addition, it provides some housing at other locations. The net

cost of this program includes the cost of the operation of housing, commercial facilities, and all of the usual municipal functions, offset in part by the revenues derived therefrom. Due to the expansion of manufacturing and laboratory activities, the combined population of these towns is expected to increase from about 62,000 in 1949 to about 66,000 in 1950 and about 70,000 in 1951. Despite this projected increase in population, the estimates show a decrease in the cost of the community program, reflecting the Commission's policy of reducing net operating costs by decreasing gross operating costs and increasing revenues.

(g) *Program direction and administration.*—This covers the costs of over-all management and direction of all programs of the Commission, principally salaries and expenses of Commission personnel in the Washington and field offices. It excludes costs which are related directly to the management of manufacturing and research facilities and towns.

2. *Plant and equipment.*—Immediately after its inception, the Commission undertook an extensive program for the replacement of temporary wartime production, research, and community facilities, and for the expansion of its facilities to meet production requirements and research needs. Among such projects are the expansion of production facilities at Oak Ridge and Hanford; the reconstruction of the Los Alamos Laboratory; the construction of the Argonne Laboratory near Chicago and of multi-billion electron-volt particle accelerators in California and New York; the development of a reactor-testing station near Arco, Idaho, where several development reactors will be built; and the partial reconstruction and expansion of housing and community facilities. The recently announced program for the expansion of production facilities will require a supplemental contract authorization of \$128,740,000 in 1950. Unless there arise major new developments or increased requirements for the production of fissionable materials and weapons, it is expected that the peak in requests for new construction will have been reached in 1950, with a substantial decrease in construction to be authorized thereafter. While costs for plant and equipment will increase from 1950 to 1951, obligations for new projects are expected to fall off from \$504.5 million in 1950 to \$192.3 million in 1951.

PROGRAM AND PERFORMANCE

As the central personnel agency of the Federal Government, the Civil Service Commission is responsible for holding examinations, certifying eligibles to fill vacancies, and determining the character and suitability of applicants for employment in the Federal service. It is also responsible for the administration of the Classification Act of 1923, as amended, and the retirement system of the Federal Government under the act of May 22, 1920, as amended.

1. *Examining, placement, and veterans' preference.*—One of the primary functions of the Commission is to recruit, examine, and certify persons for employment. Upon completion of the program for reconverting the Federal service from a "war service" to a "competitive" peacetime basis, the Commission is now concentrating more of its efforts on procuring the best personnel. For 1951, a small increase in funds is requested to improve recruiting methods, to improve examining procedures, and to conduct a positive program to place highly qualified persons where they will be of greatest use to the Government.

A Veterans Federal Employment Service is maintained to assist veterans in securing Federal employment, including placement of disabled veterans, and to assist all veterans in securing the benefits to which they are entitled under the Veterans' Preference Act of 1944.

The Commission's inspection program applies to activities carried on by agencies under authority delegated by the Commission, or under authority of law or Executive order which requires the Commission to prescribe regulations, standards, and instructions.

Production count	1949 actual	1950 estimate	1951 estimate
Applications processed.....	938,900	971,400	984,800
Placements made:			
By the Commission.....	239,920	218,200	211,620
By agency boards and committees.....	264,740	210,000	184,270
Agencies inspected.....	1,620	2,050	2,220

2. *Investigation of character and fitness for employment in the Federal Government.*—Executive Order 9835 assigned to the Civil Service Commission specific responsibilities for carrying out the loyalty program, including the establishment of a master index file for all loyalty investigations; the making of record checks and inquiries concerning applicants for positions in the Federal service; the establishment of regional boards for adjudicating cases of persons accused of disloyalty; and the establishment of a central board to review decisions of the regional boards and of agency boards, and to prescribe the necessary regu-

lations for agencies to follow in carrying out the provisions of the Executive order. Cases presenting questions of loyalty are referred to the Federal Bureau of Investigation for investigation.

The Commission makes investigations of applicants for certain positions in the Federal service, including such positions as postmasters and the higher grade administrative and technical positions.

Production count	1949 actual	1950 estimate	1951 estimate
Record check and inquiry cases.....	514,450	458,950	412,460
Regional loyalty cases adjudicated.....	1,870	1,800	1,800
Loyalty appeals adjudicated.....	70	170	100
Competitive qualifications investigations.....	350	900	2,070
Other personal investigations.....	8,050	11,220	8,210

3. *Administration of the personnel classification system.*—The Civil Service Commission prepares and issues allocation standards for positions under the Classification Act of 1923, as amended; audits position allocations made by the agencies; and establishes new maximum and minimum rates of pay for certain groups of employees. Practically all of the increase requested in 1951 will be used to audit the allocation of positions in the field service.

Production count	1949 actual	1950 estimate	1951 estimate
Allocation standards established.....	2,580	700	700
Position allocations:			
Departmental.....	129,820	120,260	130,400
Field.....	30,620	28,490	132,660

4. *Administration of the Federal retirement system.*—The Commission administers the Civil Service Retirement Act of 1920, as amended, and the Panama Canal Construction and Annuity Act, involving adjudication of annuity and death claims, claims for refund of contributions to the retirement fund, and service credit claims.

Production count	1949 actual	1950 estimate	1951 estimate
Annuity and death claims.....	48,430	50,120	52,740
Refund claims.....	242,780	239,960	240,000
Service credit claims.....	30,900	37,180	37,260
Inquiries answered.....	206,470	201,930	205,370

5. *Service records.*—A service record file, containing the records of approximately 15,000,000 present and former Federal employees, is used as the only central source to furnish basic records necessary for the determination of competitive status and for answers to inquiries on status, service history, and location.

Production count	1949 actual	1950 estimate	1951 estimate
Reports filed.....	2,708,000	2,055,910	1,770,210
Reports audited.....	80,780	86,360	83,500
Status cases determined.....	102,990	100,610	75,000
Inquiries answered.....	86,430	101,820	101,780

6. *Federal Personnel Council.*—The Federal Personnel Council advises the President and the Commission on the protection and improvement of the merit system, recommends changes in the personnel regulations and procedures, and serves as an instrument for raising the standards of personnel administration in the Federal Government.

7. *Regulatory, appellate, and advisory functions of the Commission.*—These cover the formulation of civil-

service rules and regulations, hearing and taking action on all types of appeals; the administration of the political activities statutes; investigation of all matters pertaining to the civil service; and the recommendation of measures to the President to promote accomplishment of the objectives of the civil-service rules and regulations.

8. *Executive and administrative services.*—These include the executive staff and the administrative and housekeeping services required to carry out the Commission's functions.

APPROPRIATION TEXT

Salaries and expenses: For necessary expenses, including personal services in the District of Columbia; not to exceed **[\$25,000]** \$30,000 for services as authorized by section 15 of the Act of August 2, 1946 (5 U. S. C. 55a); not to exceed \$10,000 for medical examinations performed for veterans by private physicians on a fee basis; travel expenses of examiners acting under the direction of the Commission, and expenses of examinations and investigations held in Washington and elsewhere; [not to exceed \$500 for] payment in advance for library membership in societies whose publications are available to members only or to members at a price lower than to

the general public; [purchase of three passenger motor vehicles;] printing and binding; not to exceed **[\$50,000]** \$80,000 for performing the duties imposed upon the Commission by the Act of July 19, 1940 (54 Stat. 767); [not to exceed \$250,000 for allocation to the Federal Bureau of Investigation as required for investigation of applicants for certain positions involving national security when requested by the head of the department or agency concerned in cases where the department or agency concerned does not maintain its own investigative staff] reimbursement of the General Services Administration for security guard services for protection of confidential files; a health-service program as authorized by law (5 U. S. C. 150); payment of tort claims pursuant to [section 403 of the Federal Tort Claims Act] law (28 U. S. C. 2672); and not to exceed \$5,000 for actuarial services by contract, without regard to section 3709, Revised Statutes, as amended; **[\$16,000,000]** \$17,076,000: *Provided*, That no details from any executive department or independent establishment in the District of Columbia or elsewhere to the Commission's central office in Washington or to any of its regional offices shall be made during the current fiscal year, but this shall not affect the making of details for service as members of the boards of examiners outside the immediate offices of the Commission in Washington or of the regional directors, nor shall it affect the making of details of persons qualified to serve as expert examiners on special subjects: *Provided further*, That the Civil Service Commission shall have power in case of emergency to transfer or detail any of its employees to or from its office or field force: *Provided further*, That members of the Loyalty Review Board in Washington and of the regional loyalty boards in the field may be paid actual transportation expenses, and [not to exceed \$10] per diem in lieu of subsistence authorized by the *Travel Expense Act of 1949* while traveling on official business away from their homes or regular places of business, and while en route to and from and at the place where their services are to be performed: *Provided further*, That nothing in section 281 or 283 of title 18, United States Code, or in section 190 of the Revised Statutes (5 U. S. C. 99) shall be deemed to apply to any person because of his appointment for part-time or intermittent service as a member of the Loyalty Review Board or a regional loyalty board in the Civil Service Commission. (5 U. S. C. chap. 12; 18 U. S. C. 611; 31 U. S. C. 388; *Executive Orders 6670, Apr. 7, 1934; 6731, June 5, 1934; 7915 and 7916, June 24, 1938; Independent Offices Appropriation Act, 1950.*)

Appropriated 1950, **\$16,000,000** Estimate 1951, **\$17,076,000**

No part of the appropriations herein made to the Civil Service Commission shall be available for the salaries and expenses of the Legal Examining Unit in the Examining and Personnel Utilization Division of the Commission, established pursuant to Executive Order Numbered 9358 of July 1, 1943, or for the compensation or expenses of any member of a board of examiners (1) who has not made affidavit that he has not appeared in any agency proceeding within the preceding two years, and will not thereafter while a board member appear in any agency proceeding, as a party, or in behalf of a party to the proceeding, before an agency in which an applicant is employed who has been rated or will be rated by such member; or (2) who, after making such affidavit, has rated an applicant who at the time of the rating is employed by an agency before which the board member has appeared as a party, or in behalf of a party, within the preceding two years: *Provided*, That the definitions of "agency", "agency proceeding" and "party" in section 2 of the Administrative Procedure Act shall apply to these terms as used herein.

No part of appropriations herein shall be used to pay the compensation of officers and employees of the Civil Service Commission who allocate or reallocate supervisory positions in the classified civil service solely on the size of the group, section, bureau, or other organization unit, or on the number of subordinates supervised. References to size of the group, section, bureau, or other organization unit or the number of subordinates supervised may be given effect only to the extent warranted by the work load of such organization unit and then only in combination with other factors, such as the kind, difficulty, and complexity of work supervised, the degree and scope of responsibility delegated to the supervisor, and the kind, degree, and value of the supervision actually exercised. (*Independent Offices Appropriation Act, 1950.*)

Total obligations.....	225,394,000	302,504,728	333,344,000

PROGRAM AND PERFORMANCE

This appropriation represents the Government's contribution to the civil-service retirement and disability fund based on an estimated average employment during 1951 of 1,850,000 persons. In addition to the amount contained in this appropriation, all employees covered contribute 6 percent of their salaries. The appropriation also includes the Government's contribution for the persons previously covered by the Canal Zone retirement and disability fund and the Alaska Railroad retirement and disability fund, which were consolidated with this fund in the fiscal year 1950.

OBLIGATIONS BY ACTIVITIES

For the purpose of paying the United States share to the retirement fund—1949, \$225,394,000; 1950, \$302,504,728; 1951, \$333,344,000.

OBLIGATIONS BY OBJECTS

11 Grants, subsidies, and contributions—1949, \$225,394,000; 1950, \$302,504,728; 1951, \$333,344,000.

APPROPRIATION TEXT

[CIVIL-SERVICE RETIREMENT AND DISABILITY FUND]

Civil-service retirement and disability fund: For financing the liability of the United States, created by the Act approved May 22, 1920, and Acts amendatory thereof (5 U. S. C. chap. 14), **\$301,290,728** **\$333,344,000**, which amount shall be placed to the credit of the “civil-service retirement and disability fund”. (*Independent Offices Appropriation Act, 1950.*)

PROGRAM AND PERFORMANCE

This fund is used to pay annuities to retired Federal employees or their survivors, to make refunds to former Federal employees who have left the service, and to pay claims for Federal employees who have died before their annuities are paid in full. The fund is invested in United States Government securities; the interest becomes part of the fund. Included in this fund are the amounts formerly in the Canal Zone retirement and disability fund and the Alaska Railroad retirement and disability fund. It is estimated that as of June 30, 1951, there will be 209,650 persons on the annuity roll, compared with 181,377 as of June 30, 1950, and 152,618 as of June 30, 1949.

PROGRAM AND PERFORMANCE

The Commission on Renovation of the Executive Mansion was established by Public Law 40, Eighty-first Congress. In 1951 the Commission will be engaged in (a) supervising and approving all work necessary to remedy the unsafe conditions existing in the Executive Mansion and for its modernization, including approval of construction plans for its renovation; and (b) the execution of the approved plan for the segregation and preservation of materials of historical importance removed therefrom, including the sale, donation, destruction, or other disposition of the remainder of such material in the manner most consistent with its symbolical value and without commercial exploitation. The Commission is composed of two Senators appointed by the President of the Senate, two Representatives appointed by the Speaker of the House of Representatives, and two members appointed by the President of the United States.

Unobligated balance, estimated savings.....	-617,807		
Total obligations.....	990,593	1,922,500	603,000

PROGRAM AND PERFORMANCE

The Displaced Persons Commission was established pursuant to the Displaced Persons Act of 1948 which authorized the issuance by June 30, 1950, of 205,000 visas to displaced persons for permanent residence in the United States. It is the aim to achieve this immigration in a manner consistent with resettlement opportunities existing in the United States, particularly with regard to employment and housing. Assisting the Commission in its operations are the Departments of State and Justice, and the Federal Security Agency, each of which exercises its statutory responsibilities under existing immigration laws; the Department of the Army, which participates in the security investigation of eligible displaced persons; and the International Refugee Organization, which supervises and finances the movement of displaced persons from ports of embarkation in Europe to the United States.

Selection and resettlement of displaced persons.—In accordance with existing law the selection of displaced persons and the issuance of visas must be completed by June 30, 1950. The preferences, priorities, and numerical limitations of the present act have tended to slow down the program, but the Commission will endeavor to process the full number eligible by this date. If this can be accomplished, 195,000 displaced persons will have either arrived in or embarked for the United States by the end of 1950. It is expected that the remaining 10,000 displaced persons will embark for the United States early in the budget year. Funds recommended herein assume the completion of European operations by the end of September 1950. Operations in the United States, which will consist primarily of handling the resettlement problems of admitted displaced persons, as well as work on the preparation of statutory reports and the answering of correspond-

ence, will continue on a reduced scale throughout the budget year.

There has been included in the Budget, under proposed legislation, \$2,640,000 as an anticipated supplemental for 1951. This legislation would increase the number of displaced persons to be admitted into the United States, eliminate certain administrative provisions, and extend the period during which they may be admitted.

APPROPRIATION TEXT

Displaced Persons Commission: For expenses necessary to carry out the provisions of the Displaced Persons Act of 1948 (Public Law 774, approved June 25, 1948), including personal services and rents in the District of Columbia; travel expenses without regard to the Standardized Government Travel Regulations, as amended, and the rates of per diem allowances under the Subsistence Expense Act of 1926, as amended; [purchase (not to exceed twenty), and] hire of passenger motor vehicles; printing and binding, including printing and binding outside the continental limits of the United States without regard to section 11 of the Act of March 1, 1919 (44 U. S. C. 111); services as authorized by section 15 of the Act of August 2, 1946 (5 U. S. C. 55a); payment of tort claims pursuant to [section 403 of the Federal Tort Claims Act] law (28 U. S. C. 2672); health service program as authorized by law (5 U. S. C. 150); employment of aliens; and payment of rent in foreign countries in advance; [and purchases and services abroad without regard to section 3709 of the Revised Statutes; \$4,210,000] \$1,200,000: Provided, That allocations may be made from this appropriation by the Commission upon approval by the [Director of the] Bureau of the Budget to any department, agency, corporation, or independent establishment of the Government for direct expenditure for the purposes of this appropriation, and any such expenditures may be made under the specific authority herein contained or under the authority governing the activities of the department, agency, corporation, or independent establishment to which amounts are allocated: *Provided further*, That the Commission may enter into agreements with governmental and private agencies and may make payment in advance or by reimbursement for expenses incurred by such agencies in rendering assistance to the Commission in carrying out the purposes of this Act. (*Independent Offices Appropriation Act, 1950.*)

Appropriated 1950, \$4,210,000 Estimate 1951, \$1,200,000

ECONOMIC COOPERATION ADMINISTRATION

Assistance to Greece and Turkey, Executive Office of the President—

FUNDS AVAILABLE FOR OBLIGATION: Transferred from "Assistance to Greece and Turkey, Executive Office of the President"—1949, \$3,700,000; 1950, \$1,500,000.

PROGRAM AND PERFORMANCE

At the request of the Department of State, and because of the exceedingly limited storage facilities in Greece, the Economic Cooperation Administration has included in its approved import program for Greece a limited amount of petroleum, oil, and lubricants. This allocation is utilized to reimburse the Economic Cooperation Administration for supplies furnished to the Greek-Turkish program.

OBLIGATIONS BY ACTIVITIES

Improving effectiveness of armed forces: Furnishing supplies and equipment—1949, \$3,700,000; 1950, \$1,500,000.

OBLIGATIONS BY OBJECTS

11 Grants, subsidies, and contributions—1949, \$3,700,000; 1950, \$1,500,000.

Assistance to the Republic of Korea, Economic Cooperation Administration, Executive Office of the President—

NOTE.—For obligations see schedules under Funds Appropriated to the President, assistance to the Republic of Korea.

PROGRAM AND PERFORMANCE

These funds were allocated to the Economic Cooperation Administration to carry out the economic aid program for China. A performance statement is carried in the Funds Appropriated to the President chapter.

OBLIGATIONS BY ACTIVITIES

Description	1949 actual	1950 estimate	1951 estimate
Economic assistance:			
(a) Commodities.....	\$97,291,966	\$2,612,530	
(b) Industrial replacement and reconstruction.....	2,120,000		
(c) Rural reconstruction.....	1,659,000	1,300,000	
(d) Payment of relief package transportation.....	141,712	70,000	
(e) Administration.....	953,868	657,015	
(f) Pay increases.....		1,285	
Total obligations.....	102,166,546	4,640,830

Total obligations.....		403,425,000	

PROGRAM AND PERFORMANCE

Funds transferred from the appropriation "Government and relief in occupied areas" will be utilized in

providing economic aid to Germany similar to that provided other member nations of the Organization for European Economic Cooperation.

OBLIGATIONS BY ACTIVITIES

Direct country aid—1950, \$403,425,000.

OBLIGATIONS BY OBJECTS

11 Grants, contributions, and subsidies—1950, \$403,425,000.

Permanent indefinite appropriation, special account:

Discharge of Investment Guaranty Liabilities, Economic Cooperation Administration—

FUNDS AVAILABLE FOR OBLIGATION: Appropriation or estimate—1949, \$5,148; 1950, \$180,000.

PROGRAM AND PERFORMANCE

During 1949 investment guaranties in the amount of \$4.6 million were issued. Liability payments of \$5,148 were made from collected fees in this account.

OBLIGATIONS BY ACTIVITIES

Discharge of investment guaranty liabilities—1949, \$5,148; 1950, \$180,000.

OBLIGATIONS BY OBJECTS

07 Other contractual services—1949, \$5,148; 1950, \$180,000.

APPROPRIATION OR ESTIMATE

Appropriated (estimate) 1950, \$180,000

Schedules relating to local currencies made available to the Economic Cooperation Administration without purchase from an appropriation

[All amounts are stated in United States dollar equivalents computed at the rate of exchange current at the time of the transaction]

PROGRAM AND PERFORMANCE

The Commission regulates interstate and international communication by wire and radio.

1. *Common carrier activities.*—In carrying out its responsibility of protecting the public from excessive charges and inadequate service by telephone and telegraph carriers, the Commission reviews and passes upon requests for rate changes, construction or abandonment of facilities, and proposed mergers. It also prescribes accounting systems and standards of service. No change in this program is forecast for the budget year.

2. *Applied technical research and frequency allocation.*—Detailed factual knowledge of radio wave characteristics and equipment capabilities is necessary as a foundation upon which to build the framework of frequency allocation and assignment. Demand for assignment of frequencies, increased by development of new uses of radio, requires the Commission to engage in technical research to make sure the public receives the best possible utilization of the available radio spectrum. The increase in 1951 is primarily for additional television research and equipment.

3. *Field engineering and monitoring.*—Field staff inspect radio stations, give operator examinations, monitor the radio spectrum, locate illegal sources of radio emissions and lost aircraft through radio direction-finding techniques, and gather engineering data for use by the Commission. Interference problems and complaints by the public are handled through the field offices.

4. *Safety and special services.*—Aviation, marine, police, fire, industrial, amateur, and similar uses of radio are licensed and regulated by the Commission. New safety and special uses for radio are developing. As these increase, the spectrum becomes more crowded and the problems facing the Commission in assigning frequencies and licensing operators become more acute. The number of stations authorized for these purposes increased from 125,848 in 1948 to 143,083 in 1949 and will continue to rise. A small increase is planned to allow for additional work in this area.

5. *Broadcast activities.*—The Commission licenses and regulates all standard broadcast (AM), frequency modulation (FM), and television (TV) broadcasting stations. The anticipated increase in the number of applications for new TV stations is partially offset by declining AM and FM applications. The Commission has had to impose a "freeze" on television applications until certain technical problems are resolved and important basic work is performed. The existing backlog of AM applications on hand should be reduced to normal by the close of 1951. The requested increase in this category is due to additional television activities.

6. *Program supervision and general administration.*—Supervision of Commission programs is performed by the Bureau chiefs under executive direction by the Commissioners. Administrative services for the agency are pro-

vided by staff of the Executive Officer and units of the Bureau of the Secretary.

PROGRAM AND PERFORMANCE

Under the act of August 2, 1946, proceeds of sales of vehicles, equipment, accessories, and other items, the exchange of which is authorized by law, may be applied in whole or in part payment toward the purchase of similar items. Receipts from this source are set up in a special appropriation account and are available for the replacement of similar items to the end of the fiscal year following the year in which the sale is made; unused balances are adjusted to miscellaneous receipts.

OBLIGATIONS BY ACTIVITIES

Purchase of automobiles and equipment—1949, \$336; 1951, \$2,600.

OBLIGATIONS BY OBJECTS

09 Equipment—1949, \$336; 1951, \$2,600.

PROGRAM AND PERFORMANCE

The Federal Deposit Insurance Corporation was established under authority of section 8 of the Banking Act of 1933, and section 101 of the Banking Act of 1935 (12 U. S. C. 264-265). Its principal functions are: (1) to insure the deposits of all banks that apply and qualify for insurance under the law, up to a maximum of \$5,000 for each depositor; (2) to extend financial aid to distressed or unsound insured banks by making loans on, or purchasing the substandard assets of such banks in order to facilitate their merger with other insured banks, and to liquidate assets acquired in such transactions; and, (3) to act as receiver for closed insured banks.

The management of the Corporation is vested in a Board of Directors which is also responsible for determining all matters of policy, and the exercise of all powers vested in the Corporation by law. The Board is comprised of three members, two of whom are appointed by the President with advice and consent of the Senate. The third member is the incumbent of the Office of the Comptroller of the Currency, who serves as director without compensation from the Corporation, pursuant to provisions of subsection 101 (b) of section 12B of the Federal Reserve Act, as amended (49 Stat. 684).

On June 30, 1949, there were 13,614 operating commercial and mutual savings banks, the deposits of which were

FEDERAL DEPOSIT INSURANCE CORPORATION— Continued

Administrative Expenses, Federal Deposit Insurance Corporation— Continued

insured by the Corporation. The contingent liability with respect to these deposits totaled about \$76 billion. To protect some 95,000,000 depositors in these banks, the Corporation requires each insured bank to maintain certain standards of banking practice designed to assure solvency and foster confidence on the part of depositors.

All insured banks pay deposit insurance assessments at an annual rate of one-twelfth of 1 percent of their deposit liabilities. During the past 15 years, the returns from deposit insurance assessments and Corporation investments have been sufficient to cover all insurance losses and expenses, and provide for the accumulation of an insurance reserve which, on June 30, 1949, totaled \$1.1 billion. Supplementing this reserve, the Corporation is authorized to borrow from the Treasury such funds as are from time to time required for insurance purposes, not exceeding in the aggregate \$3 billion outstanding at any time. The Corporation has never used its borrowing authority.

No appropriations are made by the Congress to the Corporation. Its administrative expenses are provided for through an authorization approving the use of a specified amount of the Corporation's funds for this purpose.

The original amount of the Corporation's paid-in capital stock was \$289 million, of which the Federal Reserve banks subscribed to \$139 million and the Treasury paid \$150 million. During fiscal years 1948 and 1949, all of the paid-in capital stock of the Corporation was retired and canceled in accordance with Public Laws 363 and 813.

The Corporation examines annually some 6,685 insured nonmember State banks not examined by any other Federal agency and, in order to ascertain its over-all risk, reviews the reports of examination of approximately 6,929 insured banks examined either by the Office of the Comptroller of the Currency or the examining staff of the Federal Reserve System. Under certain instances the Corporation also conducts special examinations of banks in the latter group.

During the 5-year period ended December 31, 1948, the volume of bank loans and other risk assets of the banks subject to examination by the Corporation increased \$5.6 billion to an all-time high of \$13.3 billion. In the same period, the total assets of these banks increased \$13.6 billion to \$34.8 billion. These factors have the effect of materially increasing the volume and complexity of the examination work load. In the fiscal year ended June 30, 1949, only 92.8 percent of the Corporation's examination schedule was completed. This was due primarily to inability to recruit qualified examiners. Fiscal years 1950 and 1951 plans contemplate 100 percent accomplishment of examination schedules.

From the beginning of deposit insurance through December 31, 1948, a total of 410 insured banks have been closed. Of these, 3 were subsequently reopened or taken over by other insured banks; the remaining 407, having approximately 1,350,000 depositors with deposits totaling \$523 million, were liquidated or merged with the aid of loans from the Corporation. Disbursements of the Cor-

poration in these cases, including advances for the protection and maintenance of collateral, amounted to \$311 million. Deposit insurance losses through December 31, 1948, are estimated at \$25 million; \$15 million in connection with receiverships and \$10 million in mergers. On June 30, 1949, the Corporation was conducting 63 active liquidations at 16 field locations. The book value of remaining assets held for liquidation at that date was \$59.2 million.

The \$6,870,000 included for administrative expenses in fiscal year 1951 is approximately 7 percent greater than the amount provided in 1950. The increase, amounting to \$460,000, is attributable primarily to filling of authorized vacant positions, periodic within-grade salary advancements, pay increases adopted by the Board of Directors following enactment of Public Law 429, and further strengthening of the field examination staff.

PROGRAM AND PERFORMANCE

The Service is one of several agencies administering the national policy of promoting industrial peace and stability through encouragement of collective bargaining. By attempting to develop better relationships between representatives of labor and management and through the techniques of mediation and conciliation, the Service assists in the prevention and settlement of labor-management disputes in industries, other than rail and air transportation, affecting interstate commerce. The Service possesses no law enforcement authority; its only power is that of persuasion. The 1951 estimate contemplates a small increase in staff and includes a minor sum for special mediators and boards and panels to be used on a temporary basis in unusual cases.

1. *Mediation and conciliation of labor disputes.*—During fiscal year 1949 the Service made its facilities available in about 15,000 labor-management disputes which involved employees ranging in number from a very few to over half a million. Based on the general economic outlook and the probable climate of labor-management relations, the Service expects to be active in a somewhat larger number of cases in the current and budget years. However, the effectiveness of the Service cannot be reflected in statistical or quantitative terms, because its greatest value lies in its general contribution to the improvement of relationships existing between management and labor. For this reason the Service complements its activities in the settlement of specific disputes by encouraging the development of free collective bargaining and by promoting relationships between representatives of labor and management which better enable them to settle their differences directly and amicably.

2. *Arbitration of labor disputes.*—The national office of the Service maintains a list of qualified arbitrators. On request the Service will provide a panel of names from which parties may select an arbitrator to act in a particular dispute.

3. *Administration.*—Program guidance and general policy formulation are provided through a small staff in the national office and the 12 regional directors. At the request of the Director, the National Labor-Management Panel advises on broad questions affecting the Service.

APPROPRIATION TEXT

Salaries and expenses: For expenses necessary [, fiscal year 1950,] for the Federal Mediation and Conciliation Service to carry out the functions vested in it by the Labor-Management Relations Act, 1947 (29 U. S. C. 171-180, 182), including expenses of the Labor-Management Panel as provided in section 205 of said Act; temporary employment of arbitrators, conciliators, and mediators on labor relations at rates not in excess of [\$35] \$75 per diem; expenses of attendance at meetings concerned with labor and industrial relations; printing and binding; services as authorized by section 15 of the Act of August 2, 1946 (5 U. S. C. 55a); health service program as authorized by law (5 U. S. C. 150); and payment of tort claims pursuant to [section 403 of the Federal Tort Claims Act] law (28 U. S. C. 2672); [\$2,700,000] \$2,949,700. (*Third Deficiency Appropriation Act, 1949.*)

PROGRAM AND PERFORMANCE

The Federal Power Commission issues licenses for hydroelectric projects affecting public lands or navigable waters of the United States and investigates power potentialities of entire river basins. It is responsible for regulating transmission and sale for resale of electric energy and natural gas in interstate commerce.

1. *Licensing of non-Federal hydroelectric projects.*—The 1951 program contemplates a slight increase in personnel required for the issuance of licenses to private, State, and municipal interests for proposed and existing hydroelectric projects affecting public lands and streams subject to Federal jurisdiction, the inspection of construction and operation of such projects, and the determination of the actual legitimate original cost.

Description	1949 actual	1950 estimate	1951 estimate
Number of licensed projects.....	644	660	665
Number of applications pending.....	179	178	178
Total claimed cost (in millions).....	\$984	\$1,119	\$1,196
Annual income to Government from licenses.....	\$1,144,000	\$1,173,000	\$1,180,000

2. *Regulation and surveys, electric power industry.*—Work performed includes the regulation of the transmission and sale for resale of electric energy in interstate commerce and of the rates, accounts, depreciation practices, certain security issues, disposition of properties,

mergers, and the interconnection and coordination of facilities of public utilities subject to the Commission's jurisdiction. Increased emphasis is contemplated on handling rate cases, continuation of tariff conversions, and power market surveys requiring the employment of additional personnel. The gathering, compilation, and publication of statistics and other information concerning the electric utility industry in the United States is also included under this activity.

Description	By calendar year		
	1948 actual	1949 estimate	1950 estimate
Number of public utilities.....	286	290	295
Operating revenues (in millions).....	\$3,626	\$4,061	\$4,548
Number of companies reporting for statistical purposes.....	1,365	1,400	1,400

3. *Regulation and surveys, natural gas industry.*—Activities under the Natural Gas Act include the regulation of the transportation and sale for resale of natural gas in interstate commerce and of the rates, accounts, depreciation, and the issuance of certificates of public convenience and necessity to natural gas companies subject to the jurisdiction of the Commission. Also included are the gathering, compilation, and publication of statistics and other information concerning the natural gas industry in the United States.

The rapid expansion of the natural gas industry since the conclusion of the war has greatly increased the Commission's work load and responsibilities under this activity.

Description	By calendar year		
	1948 actual	1949 estimate	1950 estimate
Number of natural gas companies.....	116	118	124
Operating revenues (in millions).....	\$964.6	\$1,100	\$1,300

4. *Investigations relating to Federal river development projects.*—These investigations include studies of entire river basins and individual projects proposed by the Departments of the Army and Interior to determine possibilities for conservation, development, and utilization of the potential power resources of river basins; review and approval of certain proposed rates for sale of power from such projects; and assisting Congress and Federal and State agencies on matters relating to the power features of Federal river development projects. This activity is also financed under the appropriation "Flood control surveys."

Only 16.6 million kilowatts out of a potential 77 million kilowatts of hydroelectric energy in the United States were developed as of December 31, 1948. It is estimated that 217 studies will be carried on in fiscal year 1951 under this activity, of which 87 will be financed under this appropriation and 130 under "Flood control surveys."

5. *International Joint Commission.*—The International Joint Commission, of which the Chief Engineer of the Federal Power Commission is a member, adjudicates controversies between the Governments of the United States and Canada or nationals of the two countries, principally over boundary waters and waters that cross the boundary, and conducts investigations as directed by the two Governments.

6. *Administration.*—This item, which includes executive direction and common services and the travel and other expenses which attend their performance, will remain at approximately the 1950 level.

FUNDS AVAILABLE FOR OBLIGATION: Appropriation or estimate—1949, \$27,359; 1950, \$26,900; 1951, \$28,900.

PROGRAM AND PERFORMANCE

By the act of June 10, 1920, as amended, 37½ percent of the receipts from certain licenses issued by the Federal Power Commission for the occupancy and use of national forests and public lands within the boundaries of any State is appropriated for payment to such State. Payments of the amounts so appropriated are made each year to the States (16 U. S. C. 810).

OBLIGATIONS BY ACTIVITIES

Payments to States under Federal Power Act—1949, \$27,359; 1950, \$26,900; 1951, \$28,900

OBLIGATIONS BY OBJECTS

11 Grants, subsidies, and contributions—1949, \$27,359; 1950, \$26,900; 1951, \$28,900.

APPROPRIATION OR ESTIMATE

Appropriated (estimate) 1950, **\$26,900** Estimate 1951, **\$28,900**

Payments from Proceeds of Sales, Motor-Propelled Vehicles, Etc., Federal Power Commission—

FUNDS AVAILABLE FOR OBLIGATION: Appropriation or estimate—1949, \$292; 1950, \$1,600; 1951, \$1,600.

PROGRAM AND PERFORMANCE

Proceeds of sales of vehicles, equipment, accessories, and other items, the exchange of which is authorized by law, may be applied in whole or in part payment toward the purchase of similar items. Receipts from this source are set up in a special appropriation account and are available for the replacement of similar items to the end of the fiscal year following the year in which the sale is made; unused balances are adjusted to miscellaneous receipts (5 U. S. C. 118d-1).

OBLIGATIONS BY ACTIVITIES

Purchase of equipment—1949, \$292; 1950, \$1,600; 1951, \$1,600.

OBLIGATIONS BY OBJECTS

09 Equipment—1949, \$292; 1950, \$1,600; 1951, \$1,600.

APPROPRIATION OR ESTIMATE

Appropriated (estimate) 1950, **\$1,600** Estimate 1951, **\$1,600**

Total, Federal Power Commission, permanent definite appropriations:

Appropriated 1950, **\$28,500** Estimate 1951, **\$30,500**

Total, Federal Power Commission, general and special appropriations:

Appropriated 1950, **\$4,058,500** Estimate 1951, **\$4,494,400**

Statement of proposed obligations for purchase and hire of passenger motor vehicles for the fiscal year 1951

FEDERAL POWER COMMISSION

Appropriation	Motor vehicles to be purchased		Old vehicles to be exchanged		Net cost of vehicles to be purchased	Old vehicles still to be used	Cost of hire of motor vehicles	Public purpose and users
	Number	Gross cost	Number	Allowance (estimated)				
Salaries and expenses, Federal Power Commission.	4	\$5,600	4	\$1,600	\$4,000	11	\$500	For use by engineers and other members of the Commission's staff in regional offices for inspection of electric utility and gas plants; also for inspection of hydroelectric projects during construction; and miscellaneous field investigations. 1 car for general administration use in the District of Columbia. Motor vehicles will be hired only for special field investigations or inspections where official cars are not available.

PROGRAM AND PERFORMANCE

Under the laws which it administers the Federal Trade Commission seeks to maintain effective competitive conditions by preventing the development of monopolistic and restrictive trade practices.

1. *Antimonopoly.*—In the prosecution of its anti-monopoly program the Commission seeks to (1) promote free and fair competition in interstate trade through the prevention of price-fixing agreements, boycotts, combinations in restraint of trade, and other monopolistic practices; (2) supervise the registration and operation of associations of American exporters engaged solely in export trade; (3) gather and make available to the President, the Congress, and the public economic data concerning monopoly and related problems as a basis for remedial legislation where needed and for the guidance and protection of the public. The funds requested for 1951 will expand antimonopoly legal case work to take care of the increased number of complaints of monopolistic practices received from the public. The quarterly financial report analyzing the financial operating results of American business will be broadened to provide for the inclusion of wholesale and retail as well as manufacturing corporations, and an economic study will be made of trends in industrial concentration.

2. *Unfair, deceptive, or fraudulent practices.*—In seeking to prevent unfair, deceptive, or fraudulent business practices the Commission (1) safeguards the consuming public by preventing the dissemination of false and fraudulent advertisements as well as other deceptive or fraudulent practices both through cease-and-desist orders and through trade-practice conferences; and (2) protects producers, manufacturers, distributors, and consumers from unrevealed presence of substitutes and mixtures in manufactured wool products. The 1951 program contemplates a reduction in these activities in order that additional funds may be used in antimonopoly work.

3. *Administration.*—Funds for 1951 provide no increase in personnel in the housekeeping and management activities required for the operation of the Commission.

Total obligations.....	33,823,803	33,900,000	35,150,000

PROGRAM AND PERFORMANCE

The work of the General Accounting Office encompasses the settlement of claims by or against the Government; the audit of the financial transactions of Government agencies, including Government corporations; the audit and settlement of fiscal officers' accounts; the rendition of legal decisions relating to governmental fiscal matters; the conduct of investigations relating to the receipt, disbursement, and application of public funds; the maintenance of accounting controls in connection with appropriation and fund accounts; the development, prescribing, and evaluation of accounting systems on a Government-wide basis; and other related and necessary functions. During the fiscal year 1949, refunds and collections in the amount of \$86,669,776 were made through the audit, investigative, and claims activities of the General Accounting Office.

1. *Audit of fiscal transactions of the Government.*—Financial records of the Government are subject to an independent audit by the General Accounting Office as the representative of the Congress. It has, in the past, been customary to have some of these records, such as disbursing and collecting officers' accounts with vouchers and supporting papers, sent to Washington for audit. While this will continue to be done, the trend of the last few years has been to widen and to accelerate the use of the type of audit that takes the auditors to the seat of operation of each department and agency where the accounts and records are maintained. Site audits are now made of all Government corporations, other agencies whose accounting systems permit such audit, and entire segments of accounting systems, such as pay-roll audits. Cost of audit work for the Department of Agriculture

previously financed by transfers of funds is included in this estimate for 1951.

2. *Examination and settlement of claims where the United States is involved.*—The Office makes settlement of all justiciable claims by or against the United States, unless exclusive jurisdiction is specifically conferred upon another agency by law. The number and variety of such claims are directly dependent upon the nature and extent of public expenditures. During the fiscal year 1949, 563,794 claims were settled.

3. *Development, installation, and evaluation of accounting systems.*—This work consists of spearheading, with active participation by the Bureau of the Budget and the Treasury Department, and active cooperation of all other agencies, a broad program for improving accounting in the Federal Government. The program contemplates the full development of sound accounting within each agency, as a working arm of management, in terms of financial information and control. It envisions an integrated pattern of accounting and financial reporting for the Government as a whole responsive to executive and legislative needs. The work to be done in carrying out the responsibilities of the General Accounting Office in the accounting systems field involves participation in the development and improvement of accounting systems in all Government agencies. In 1951 all phases of this program will be pressed forward as rapidly as possible.

4. *Special legislative services to the Congress.*—The Comptroller General is required by the Budget and Accounting Act to submit to the Congress (1) an annual report of the work of the General Accounting Office; (2) reports recommending steps toward "greater economy or efficiency in public expenditures"; (3) reports ordered by either House or by any committee having jurisdiction over revenue, appropriations, or expenditures; (4) reports on expenditures or contracts made in violation of law; and (5) reports upon the adequacy and effectiveness of certain fiscal activities of the Federal establishment. Reports on particular Government functions and agencies are required of him by other laws, and are furnished by him upon request of other congressional committees.

The number of reports requested by, or voluntarily rendered to, the Congress and its committees has increased over 300 percent in the last 4 years.

The legislative work of this Office has not been confined to written reports but has included assistance throughout the entire legislative process, from drafting proposed legislation, testifying before congressional committees at hearings on bills, and assisting in the preparation of committee reports, to reporting to the Bureau of the Budget on the enrolled enactments presented to the President for signature.

PROGRAM AND PERFORMANCE

This independent Commission of three members was created to hear and adjudicate claims, existing before August 13, 1946, of American Indian tribes, bands, or

other identifiable groups of Indians residing within the Territorial limits of the United States or Alaska. Claimants are allowed a period of 5 years from August 13, 1946, within which to submit their claims. The Commission is required to complete its work within 10 years after its first meeting (Apr. 10, 1947). There have been 148 claims filed through September 30, 1949. It is estimated that 52 and 100 claims will be filed during fiscal years 1950 and 1951, respectively.

PROGRAM AND PERFORMANCE

The Interstate Commerce Commission regulates common carriers engaged in interstate and foreign commerce, including railroads, motor carriers, water carriers, pipe lines, contract carriers by motor vehicle and water, freight forwarders, brokers of motor service, and to a limited extent private freight-car lines.

Increased operating costs of the regulated common carriers have necessitated the granting of higher rates. Greater competition between carriers has resulted in increased complaint proceedings before the Commission and has heightened the importance of the Commission's investigatory and inspection activities. The amount requested for 1951 makes provision for the increased per diem travel rates and assumes that the work load of the Commission will continue at the current level with only minor adjustment among the various activities.

1. *Applications, complaints, and other proceedings.*—About one-fourth of the Commission's work involves setting rates, granting operating authorities, and approv-

ing financial organizations. The preparation of decisions in these proceedings involves detailed review of data and holding of informal and formal hearings.

2. *Investigation, litigation, legal advice, and compliance.*—The Commission (a) formulates uniform accounting systems and polices such accounts to obtain accurate transportation cost data for the various common carriers; (b) investigates alleged violations of the Interstate Commerce Act and other acts administered by the Commission; (c) performs legal work on cases involving suits to set aside orders of the Commission; and (d) issues regulations and undertakes other activities designed to promote interstate highway safety.

3. *Collection and analysis of accounting and statistical data.*—The Commission undertakes statistical research regarding all forms of transportation under its jurisdiction. It tabulates and analyzes data shown on waybills to obtain traffic-flow statistics used in studies of carriers' costs. Information from other sources is collected, collated, and made available to the Commission so that it may intelligently regulate the industry on a sound factual basis.

4. *Supervision of rate publications.*—All common-carrier rate tariffs are required to be filed with the Interstate Commerce Commission before they become effective. To protect users from excessive charges, the Commission examines such rates, records rate tariffs, and prepares rate statements.

5. *Railroad car service.*—The Commission maintains a field staff of service agents who work directly with individual railroads in handling problems related to the movement of freight cars. They also supervise use of emergency powers in connection with such movement and regulate the transportation of explosives.

6. *Valuation of railroads and pipe lines.*—The valuation work of the Commission consists of keeping current inventories and costs of properties, and of the development of the elements of value and other data which must be used in prescribing just and reasonable rates, determining divisions of joint rates and fares, prescribing proper switching charges, setting up of depreciation reserves, determining costs of service, and in financial reorganizations. Such data are used also by other agencies of the Federal Government and by State regulatory bodies.

7. *Administration.*—General executive direction of Commission policies and programs is provided by the Commissioners and by the Office of the Secretary. Administrative services are furnished to all bureaus of the Commission by a central administrative staff.

PROGRAM AND PERFORMANCE

The Motor Carrier Claims Commission adjudicates claims against the United States brought by 103 motor carrier transportation systems arising out of their seizure by the Government through the Office of Defense Transportation as a war measure under Executive Order 9462, dated August 11, 1944. All companies have since been returned to their private owners. Amounts required to pay claims will be requested when a determination of Government liability has been made.

PROGRAM AND PERFORMANCE

The National Advisory Committee for Aeronautics is responsible for conducting scientific research in aeronautics. The research activities of the Committee are devoted almost entirely to problems of military aviation, with most of the research directed toward obtaining the basic scientific and engineering data required for continuing improvement in the design of military aircraft, missiles, and their power plants. The Committee also performs applied research for the development or improvement of specific aircraft, missiles, and power plants, at the request of the military departments.

Although the main emphasis is military, the Committee's research has useful applications in commercial aviation.

The research of the Committee is carried on mainly at its three major laboratories, the Langley Aeronautical Laboratory, Langley Air Force Base, Va.; the Ames Aeronautical Laboratory, Moffett Field, Calif.; and the Lewis Flight Propulsion Laboratory, Cleveland, Ohio. In addition, auxiliary flight research stations have been established at Wallops Island, Va., and Muroc Air Force Base, Calif. To supplement the research work performed by its own staff the Committee also sponsors research at scientific and educational institutions and other Government agencies where specialized scientific personnel or facilities are available. Close coordination with the aeronautical programs of the Department of Defense is maintained through military representation on the National Advisory Committee for Aeronautics and all of its subcommittees, and National Advisory Committee for Aeronautics representation on the aeronautics and guided missiles committees of the Research and Development Board of the Department of Defense.

1. *Aerodynamic research.*—In the various fields of aerodynamic research, the programs for 1951 will continue to be centered upon the problems involved in transonic and supersonic flight of military aircraft and guided missiles. Research data must be obtained which will permit the design of aircraft and missiles which can perform satisfactorily at the low speeds of take-off and landing as well as in the critical transonic and supersonic speed ranges. Data obtained from actual flight tests of high-speed piloted and pilotless aircraft will be correlated with wind tunnel results and theoretical studies. Research on various aspects of aerodynamics is carried on at all laboratories and stations of the Committee, with the major portion of the work being performed at the Langley and Ames Aeronautical Laboratories. The increased funds in 1951 are required to staff and operate newly completed specialized research facilities.

2. *Power plants research.*—The power plants research programs for 1951 contemplate the continuation of intensive research on the newer forms of aircraft power plants, such as turbo-jet, ram-jet, turbo-propeller, and rocket engines. Increased efficiency and performance of high-speed military aircraft and missiles will depend on improvements that can be made through continuing research in these fields. Research will be continued on engine components, such as compressors and turbines, on engine materials and fuels, and on complete propulsion systems. Power plants research is conducted by the Committee mainly at the Lewis Flight Propulsion Laboratory. The increase in funds in 1951 is required to staff and operate new research facilities that will be completed by that time.

3. *Aircraft structural research.*—In 1951 it is planned to continue research on problems of aircraft construction with particular emphasis on structural problems resulting from the increased loads, thinner wings, and novel configurations of modern high-speed aircraft. Research in this field is conducted primarily at the Langley Aeronautical Laboratory and at the auxiliary flight research stations at Wallops Island and Muroc Air Force Base.

4. *Operating problems research.*—Research on aircraft operating problems in 1951 will consist mainly of continuing studies now under way on aircraft icing, flight through storms, and the causes and prevention of fires in aircraft engines. These problems are of vital importance to civil aviation as well as to the operation of military aircraft. Research on certain problems under this head will

be performed at each of the laboratories and stations of the Committee.

5. *Headquarters management and coordination.*—The headquarters office of the Committee in Washington, D. C., is responsible for the direction and central administration of the entire research program of the Committee and for maintaining proper liaison and coordination with the military departments, other Government agencies, and the aircraft industry. Small coordination offices are maintained at Wright-Patterson Air Force Base, Dayton, Ohio, to facilitate liaison with the Engineering Division of the Air Force Air Matériel Command; at Los Angeles, Calif., for liaison with the aircraft companies in the West; and at Paris, France, to keep the Committee abreast of European developments in aeronautical research.

Salaries and Expenses, National Advisory Committee for Aeronautics—Continued

APPROPRIATION TEXT

Salaries and expenses: For necessary expenses of the Committee, including contracts, without regard to section 3709, Revised Statutes, as amended, for the making of special investigations and reports and for engineering, drafting and computing services; equipment, maintenance, and operation of the Langley Aeronautical Laboratory, the Ames Aeronautical Laboratory, and the Lewis Flight Propulsion Laboratory; purchase and maintenance of cafeteria equipment; maintenance and operation of aircraft; purchase of eight passenger motor vehicles of which seven shall be for replacement only; printing and binding; personal services in the District of Columbia; services as authorized by section 15 of the Act of August 2, 1946 (5 U. S. C. 55a); including \$2,500 for payment of tort claims pursuant to section 403 of the Federal Tort Claims Act law (28 U. S. C. 2672); and a health service program for employees as authorized by law (5 U. S. C. 150); in all, \$43,000,000 \$46,100,000: *Provided*, That statutory provisions prohibiting the payment of compensation to aliens shall not apply to any person whose employment by the Committee shall be determined by the Chairman thereof to be necessary: *Provided further*, That aircraft and parts, equipment, and supplies may be transferred to the Committee by the Air Force, Army, and Navy without reimbursement. (50 U. S. C. 1946 ed. Supp. II 151, 157; *Independent Offices Appropriation Act, 1950.*)

PROGRAM AND PERFORMANCE

The successful conduct of the aeronautical research programs of the National Advisory Committee for Aeronautics requires a large variety of complex research facilities at its laboratories, including many different types of wind tunnels, elaborate air-handling facilities, and other types of specialized equipment. The vastly increased speeds contemplated for future aircraft and missiles and the greater power and radically different nature of new types of power plants have made necessary major modifications and alterations to many of the Committee's research facilities and created needs for certain additional facilities for conducting research beyond the capabilities of existing equipment.

The construction and equipment program of the Committee financed with the funds shown in this account is outlined below. In addition, however, it is anticipated that supplemental estimates of \$5,000,000 of appropriations and \$15,000,000 of contract authority will be recommended later in 1950 to provide the funds required in 1950 and 1951 for beginning the construction of super-

sonic wind tunnels authorized by the Unitary Wind Tunnel Plan Act of 1949, approved October 27, 1949. These supplemental amounts are included in the budget summaries, but not in the detailed obligations schedules for this account.

1. *Aerodynamic research.*—The new projects contemplated for 1951 consist of special modifications to a large wind tunnel at the Ames Aeronautical Laboratory, alterations to utilities systems at the Langley and Ames Laboratories, and provision for improved access to the auxiliary research station at Wallops Island. Obligations will also be incurred in 1951 against existing contract authority to complete a new wind tunnel which was approved in 1950 for construction at the Langley Aeronautical Laboratory.

2. *Power plants research.*—The only new project contemplated in 1951 under this head consists of modifications to increase the capacity of an existing wind tunnel at the Lewis Flight Propulsion Laboratory. Obligations will also be incurred against existing contract authority for the completion of additional engine research facilities which were approved in 1950 for construction at the Lewis Laboratory.

3. *Aircraft structural and operating problems research.*—The obligations under this head for 1951 contemplate the construction of a special research facility at the Langley Aeronautical Laboratory for the study of structural and operating problems of aircraft landing gear, together with the necessary utilities.

OBLIGATIONS BY ACTIVITIES

PROGRAM AND PERFORMANCE

Maintenance and operation of title I properties.—The National Capital Housing Authority operates 112 units of low-rent housing and 31 nonresidential properties developed or acquired under title I of the District of Columbia Alley Dwelling Act of 1934. As local housing authority for the District of Columbia, it also operates 3,147 units of low-rent housing under the United States Housing Act of 1937, and 4,838 units of war housing. The latter includes 894 units of housing constructed under the Veterans' Re-Use Housing Program.

All operations except those under title I of the Alley Dwelling Act are subject to the supervision of the Public Housing Administration and are included in the consolidated estimates of that agency. Operations under title I are financed by direct congressional appropriation. Under provision of the annual appropriation language, rental receipts from this activity are covered into the Treasury monthly.

The following table shows income, operating expenses, major repairs and replacements, and net income for title I properties for fiscal years 1949, 1950, 1951.

Balance available in subsequent year.....	-987,838	-350,000	
Total obligations.....	422,314	1,332,838	1,104,000

PROGRAM AND PERFORMANCE

The Commission acquires land on behalf of the United States for parks, parkways, and recreational purposes in the District of Columbia and its environs.

1. *George Washington Memorial Parkway.*—The acquisition of land will continue in 1951 by using funds currently available. One-half the cost of such acquisitions will be borne by the respective jurisdictions. On the Maryland side approximately 75 percent of the lands have been or are being acquired; substantial progress has also been made on the Virginia side. Progress during 1951 is dependent upon ability of localities to match Federal funds or willingness of large property owners to contribute half of the value of their holdings within the parkway boundaries.

2. *Extension of National Capital Park System.*—The funds will enable the Commission to continue in 1951 to acquire land at the same rate as in 1950. Acquisition is accomplished by advancing Federal funds to the Maryland-National Capital Park and Planning Commission for the total cost of the lands. One-third of the cost is borne by the Federal Government and the remaining two-thirds is repaid to the United States by the Maryland-National Capital Park and Planning Commission.

3. *Park, parkway, and playground system in the District of Columbia.*—During 1951 it is planned to acquire additional lands in line with the comprehensive plan

developed for this purpose. Six projects have been approved by the Commissioners of the District of Columbia for acquisition during 1951. The expenditures for these acquisitions will be repaid to the United States by the District of Columbia.

PROGRAM AND PERFORMANCE

1. *Conducting Sesquicentennial Exposition.*—These funds cover the costs of staging the celebration commemorating the one hundred and fiftieth anniversary of the establishment of the seat of government in Washington, D. C. The principal costs involve the production of a motion picture in technicolor, erection of an outdoor amphitheater in Rock Creek Park, production of historical symphonic drama, and the staging of ceremonies, parades, receptions, and entertainment of distinguished visitors.

2. *Administration.*—This includes the usual administrative expenses such as pay roll, travel, communications, printing and binding, supplies and equipment costs for 15 employees.

PROGRAM AND PERFORMANCE

The Commission is empowered to utilize receipts from rentals, admissions, gifts, etc., for the same purpose as the original appropriation. Receipts during 1950 and 1951 are estimated at \$23,250,000 of which approximately \$15,000,000 will be used in staging the sesquicentennial celebration. Any surplus receipts not used for purposes incident to the celebration will be deposited into miscellaneous receipts of the Treasury (Public Law 78, 81st Cong.).

1. *Construction of buildings and improvements of grounds.*—In 1950, these funds will be used to erect seven buildings for exhibition purposes and a large recreational area for entertainment and amusement purposes.

2. *Protection and maintenance of buildings and grounds.*—Buildings and grounds will be provided with services such as police and fire protection, cleaning, utilities, maintenance, and repair.

3. *Conducting "Freedom Fair" and other exhibitions.*—Expenses for this phase of the celebration include such items as promotion, publicity, advertising, architectural fees, etc.

Total obligations.....	8,451,934	8,578,048	8,610,048

PROGRAM AND PERFORMANCE

The Board effectuates the policies of the National Labor Relations Act by (1) remedying specified unfair labor practices committed either by employers or by labor organizations which interfere with certain guaranteed rights; (2) the resolution of questions concerning the representation of employees in collective bargaining. The Board has little or no control over the number of actions brought to it. Under the basic statute it must process all properly filed cases. Its objective is to resolve these cases as rapidly as possible, consistent with careful investigation of the facts and due process of law.

In fiscal year 1951 the agency estimates more of both unfair labor practice and representation cases will be filed than in 1949. The estimate coincides with case intake in recent months and known factors. In addition, the agency has the problem of a developing backlog of unfair practice cases to be heard, due to continuing difficulties in recruiting new trial examiners. This backlog affects all agency activity in unfair practice cases, since the processing of cases is an assembly-line operation in which the inability of one section to perform adequately retards the work of all. The 1951 estimate provides for reducing this hearing backlog considerably, but it would not be eliminated finally until fiscal year 1952.

1. *Preparation and informal disposition of cases.*—All unfair labor practice cases begin with the filing of a charge in one of the agency's regional offices. In fiscal year 1949, 5,300 such charges were filed. The 1951 estimate is 5,950. The regional director investigates the charge and may effect an informal settlement, secure withdrawal, or dismiss. When necessary, he issues a formal complaint and notice of hearing—an action required in about 11 percent of cases.

Petitions for representation elections also begin in regional offices. In fiscal year 1949, approximately 8,400 such petitions were filed; the 1951 estimate is 9,350. The regional director investigates the petition and may secure agreement for a consent election, secure withdrawal, or dismiss. About 19 percent of these cases are contested and the regional director must order a hearing to develop a record of the contested issues.

The agency's regional offices conducted about 15,000 union-shop authorization elections in fiscal year 1949. These relatively routine cases will decrease to an estimated 5,000 in fiscal year 1951.

2. *Hearings on contested unfair labor practice cases.*—In a contested unfair labor practice case all parties have an opportunity to be heard before a trial examiner for the Board. On the basis of evidence and arguments, the trial examiner issues his findings and rulings in the form of an "intermediate report."

3. *Case adjudication by the Board.*—In unfair labor practice cases, if no exceptions are filed within 20 days, the trial examiner's intermediate report takes effect as a Board order, but the Board must decide approximately 83 percent of cases after issuance of intermediate reports. The Board reviews the entire record of each case and may issue an appropriate remedial order or dismiss.

A contested representation case is decided by the Board based upon study of the record developed in the hearing ordered by the regional director. The Board may order an election to determine the employee choice of bargaining representative or dismiss the petition. If a union is chosen by the majority of employees in the election as their bargaining representative, it is certified; if not, the petition is dismissed.

4. *Compliance with Board orders, including enforcement through court orders.*—About 60 percent of Board decisions in unfair practice cases require litigation in circuit courts of appeal to enforce compliance.

C. 150); [§8,550,000: Provided, That no part of this appropriation shall be available to organize or assist in organizing agricultural laborers or used in connection with investigations, hearings, directives, or orders concerning bargaining units composed of agricultural laborers as referred to in section 2 (3) of the Act of July 5, 1935 (49 Stat. 450), and as amended by the Labor-Management Relations Act, 1947 (Public Law 101, approved June 23, 1947), and as defined in section 3 (f) of the Act of June 25, 1938 (52 Stat. 1060)] \$8,615,000. (47 U. S. C. 222; Third Deficiency Appropriation Act, 1949.)

Appropriated 1950, \$8,550,000

Estimate 1951, \$8,615,000

NATIONAL MEDIATION BOARD

INTRODUCTORY STATEMENT

The Board, in administering the Railway Labor Act, promotes industrial peace in rail and air transportation. Over 700 carriers and 1.5 million employees are affected by about 5,000 current working agreements.

Salaries and Expenses, National Mediation Board—

FUNDS AVAILABLE FOR OBLIGATION	1949 actual	1950 estimate	1951 estimate
Appropriation or estimate.....	\$335,800	\$360,400	\$412,200
Proposed supplemental estimate due to pay increases.....		13,300	
Total available for obligations.....	335,800	373,700	412,200
Comparative transfer from "Printing and binding, National Mediation Board".....	7,500		
Total obligations.....	343,300	373,700	412,200

PROGRAM AND PERFORMANCE

The major resources of the Board are devoted to (1) mediation of disputes involving rates of pay, rules, and working conditions; and (2) determination of collective bargaining representatives when disputes arise between groups of employees. The volume and characteristics of the Board's work loads reflect in some measure the trends of the national economy. For the current and budget years, a large proportion of mediation work is expected to involve renegotiation or revision of working rules in the light of current conditions. The trend of past years toward increased volume of air-carrier cases is expected to continue, consistent with developing maturity of labor relations in this industry.

The members and executive secretary of the Board devote a portion of their time to policy formulation and general program guidance.

PROGRAM AND PERFORMANCE

1. *Voluntary arbitration of controversies between carriers and employees.*—After mediation efforts have been exhausted, the National Mediation Board is required to attempt to induce the parties to submit their differences to arbitration. The parties are free to reject arbitration.

2. *Investigation of disputes threatening interruption of essential transportation service.*—If all other efforts at adjustment fail, and in the judgment of the National Mediation Board, a dispute threatens substantially to deprive any section of the country of essential interstate transportation, the Board is required to notify the President, who may, in his discretion, create an emergency board to investigate and report respecting the dispute. Pending the fact-finding process and for 30 days thereafter, the parties to the dispute are required by law to continue operations without change. Although not bound to accept the findings and recommendations of the emergency board, the parties ordinarily utilize such findings and conclusions as a basis for agreement resolving the disputed issues.

PROGRAM AND PERFORMANCE

This Board adjusts disputes not settled in earlier stages of grievance procedures which arise out of the interpretation or application of existing wage and rule agreements in the railroad industry. The 36-man Board is composed of an equal number of representatives of the carriers and employee organizations who are paid by the parties, and who form 4 quasi-independent divisions having jurisdiction over employees in specified crafts. Work loads in these divisions reflect the type and diversity of work performed by employees, the nature of applicable work agreements, and the existence or nonexistence of acceptable precedents for adjusting grievances. The 1951 estimate will permit payment of referee's salaries at a rate more nearly consistent with those paid by private parties and other governmental agencies for comparable work.

(a) *Train service employees.*—The great bulk of the Board's work affects these crafts, because the nature of their work is such that cases involve individual employees rather than groups of employees. Over a period of years, case receipts have exceeded those adjusted, resulting in a backlog of over 2 years' work. Prolonged delays in processing cases have stimulated employees to seek more prompt action on their claims through the fact-finding process, to the detriment of sound labor relations and at greater cost to the Government. By agreement of the parties and in accordance with the Railway Labor Act, the Board was enlarged in fiscal year 1950 by two 4-man supplemental boards in an effort to expedite case dispositions. The additional facilities, coupled with certain procedural changes, are expected to enable the Board to achieve near currency in caseloads affecting this group of employees in the next few years. The 1951 estimate

provides for full-year operation of the two supplemental boards.

(b) *Shop employees.*—Cases involving these employees average less than 100 per year but large groups are involved in each case. Work loads are current, and no change is anticipated.

(c) *Other nonoperating employees.*—The current trend of rising case loads is expected to continue. Moreover, termination of the privately financed voluntary express board in fiscal year 1950, due to the dissatisfaction of the parties, will add about 200 cases annually. Work loads are current at the present time.

(d) *Marine employees.*—Work loads are of small volume and are current. No change is anticipated.

NATIONAL RAILROAD ADJUSTMENT BOARD

Salaries and expenses: For expenses necessary for the National Railroad Adjustment Board, including printing and binding, and stenographic reporting services as authorized by section 15 of the Act of August 2, 1946 (5 U. S. C. 55a), **[\$468,100] \$797,300,** of which not less than **[\$93,800] \$296,700,** shall be available for compensation (at rates not in excess of **[\$50] \$75** per diem) and expenses of referees appointed pursuant to section 3 of the Railway Labor Act, as amended.

For an additional amount for "Salaries and expenses, 1950", \$207,700; and the amount made available under this head in the National Mediation Board Appropriation Act, 1950, exclusively for compensation and expenses of referees, is increased from "\$93,800" to "\$170,300". (45 U. S. C. 153; Labor-Federal Security Appropriation Act, 1950; Third Deficiency Appropriation Act, 1949.)

PROGRAM AND PERFORMANCE

The Selective Service Act of 1948 provides for reestablishment of the Office of Selective Service Records as the successor agency to the Selective Service System. The main activities of the new agency would be:

1. *Administration.*—Executive direction of the agency program and staff services including personnel administration, fiscal, and related administrative services are grouped in this activity.

2. *Training in knowledge and methods of selective service operation.*—To permit swift and orderly activation in the eventuality of a future military draft, current planning and training are carried on to have available nationally and in each State a small nucleus of individuals on whose knowledge and experience a future selective service system may be built, if needed.

3. *Preservation and servicing of records of selective service.*—The records of the Selective Service System are organized in a way which permits reference by veterans and other registrants or their designated representatives and by authorized Government agencies. To the records of 50,000,000 registrants now in the 54 Federal record depots there will be added the records of 12,000,000 registrants under the Selective Service Act of 1948. To facilitate the search for records of individual registrants, an alphabetical index of registrants in each State will be prepared. Certain records of registrants over 45 years of age will be destroyed.

4. *Liquidation of Selective Service System.*—If the proposed legislation extending selective service authority is

not enacted, the outstanding affairs of the Selective Service System will be liquidated in 1951. If the legislation is enacted, the amount of this appropriation will be made available, in addition to the supplemental proposed under "Salaries and expenses, Selective Service System," to the new organization.

PROGRAM AND PERFORMANCE

The Housing and Rent Act of 1949, in addition to extending rent control provisions from March 31, 1949, to June 30, 1950, provided additional major functions pertaining to eviction of tenants, treble damages, reconrol of decontrolled areas under certain conditions, and assistance to landlords and tenants to help assure fair rental adjustments. The adequate administration of this act through June 30, 1950, based upon current and projected work load, will require an estimated additional appropriation of \$3,500,000. An estimate of \$16,000,000 for the fiscal year 1951 is included under proposed legislation in connection with the extension of rent control legislation to June 30, 1951.

1. *Administration of rent control program—Rent operations.*—The following table shows the actual and estimated work load for 1949 and 1950. Consideration has been given to decontrol actions taken up to November 4, 1949; and since the effect of future decontrol actions cannot at this time be forecast, the work-load projection for the remainder of the year is based substantially upon current experience.

Docketed work load	1949 actual	1950 estimate
First rent actions processed.....	76,188	146,000
Tenants' complaints processed.....	487,284	472,000
Compliance actions processed.....	241,392	275,000
Landlords' petitions processed.....	476,256	483,000
Eviction cases processed.....	128,255	764,000
Other.....	173,604	146,000
Total docketed work load.....	1,582,979	2,285,000
Settlements for repayment to tenants.....	\$6,322,438	\$6,200,000
Payments to U. S. Treasury.....	\$178,827	\$200,000

Decontrol actions.—The act provides for the decontrol of defense rental areas, or portions of areas, by action of the Expediter on his own initiative, upon recommendation of the local advisory boards, and by State or local option. As of November 11, 1949, there remained under control 390 defense rental areas, which, according to the 1940 census, had a population of 80,645,198 (59.8 percent of United States total) and contained 12,053,339 nonfarm tenant occupied dwelling units (73.3 percent of United States total). The following table summarizes the decontrol actions taken during the period April 1 to November 11, 1949.

	Number	Estimated units	1940 population
Expediter initiative.....	396	904,223	10,911,579
Local option.....	173	549,435	3,031,891
State option.....	6	837,514	5,219,967
Board recommendation.....	4	71,959	465,570
Total decontrol actions.....	579	2,363,131	19,629,007

2. *Veterans' affairs program.*—The Housing Expediter investigates and prosecutes violations of the Veterans' Emergency Housing Act of 1946 and regulations issued thereunder.

The following table reflects the work load under this program during the fiscal year 1949 and from July 1 to November 4, 1949. It is expected that the flow of new cases will cease in the near future and that the cases on hand in the investigative offices will be completed by January 1, 1950. However, there remains a substantial number of cases in the hands of the United States at-

torneys on which requests for additional investigation and legal work are anticipated.

PROGRAM AND PERFORMANCE

The Philippine War Damage Commission, under the Philippine Rehabilitation Act of 1946, adjudicates and pays private property war damage claims resulting from World War II.

Claimed value of the 1,250,000 claims filed with the Commission is \$1,216,000,000. The total approved amount will approximate \$485,000,000 after making the 25-percent statutory deduction on amounts approved in excess of \$500. Of \$400,000,000 authorized for this program, \$388,800,000 will be available for claim payments and \$11,200,000 will be required for administrative expenses of the Commission.

During fiscal year 1951 the Commission will complete adjudication of claims, hear appeals, make final payments to 150,000 claimants, and liquidate the organization by April 30, 1951, the statutory termination date for this program.

PROGRAM AND PERFORMANCE

The Philippine War Damage Commission is responsible for that part of the Philippine rehabilitation program, which is coordinated by the Department of State, dealing with the rehabilitation of public property damaged in World War II.

With this transfer account the Commission has assisted the Philippine Government in reconstructing schools, hospitals, waterworks, irrigation systems, Government buildings, and other essential public facilities. The account includes funds for the administration of the Commission's program. Completion of the program will be accomplished by June 30, 1950.

PROGRAM AND PERFORMANCE

The railroad retirement system is supported by taxes on carriers and their employees established at a level sufficient to support the system on an actuarially sound basis.

This account appropriates the taxes collected to the railroad retirement account (trust fund) to provide for the payment of all annuities, pension, and death benefits authorized under the program.

In 1951 it is proposed to change the appropriated account from an annual definite appropriation to an annual indefinite. This will make it possible to transfer taxes to the account (trust fund) after they are collected. At present, taxes, estimated to be collected during the year, are transferred to the account far in advance of actual collections.

In 1950 there was appropriated to this account \$166,852,000 to be paid to the account in approximately equal installments through 1954 to cover the additional cost of benefits by reason of military service credits. It is impossible at this time to determine the liability for these military credits because of the effect of duplicating benefits, multiple benefits by reason of the same military service, and other factors which will serve to reduce the amount required. Therefore this budget recommends that the appropriations for 1951 through 1954 be rescinded, and proposes in lieu thereof that annual appropriations be made when the actuarial value of increased benefits resulting from military service can be determined by claims submitted and approved. Neither the individuals entitled to military service credits nor the actuarial soundness of the trust fund will be adversely affected by this proposal.

OBLIGATIONS BY OBJECTS

16 Investments and loans (payment to railroad retirement account)—1949, \$574,459,000; 1950, \$602,287,140; 1951, \$594,000,000.

APPROPRIATION TEXT

【Railroad retirement account: For an amount sufficient as an annual premium for the payments required under the Railroad

Retirement Acts of August 29, 1935, and June 24, 1937, and authorized to be appropriated to the railroad retirement account established under section 15 (a) of the latter Act, \$715,889,000, of which \$61,889,000 shall be immediately available: *Provided*, That there is further appropriated for such account \$33,000,000 for each of the fiscal years 1950, 1951, 1952, and 1953, and not to exceed \$34,852,000 for the fiscal year 1954, in all not to exceed \$166,852,000 for military service credits under the Railroad Retirement Act, as amended, and before the final payment hereunder the Railroad Retirement Board shall certify to the Bureau of the Budget the total amount due on account of such military service credits: *Provided further*, That such total amount shall be available until expended for making payments required under said retirement Acts, and the amount not required for current payments shall be invested by the Secretary of the Treasury in accordance with the provisions of said Railroad Retirement Act of June 24, 1937.】

For an annual premium to provide for the payment of all annuities, pensions, and death benefits in accordance with the provisions of the Railroad Retirement Acts of 1935 and 1937, as amended (45 U. S. C. 228-228s), and for expenses necessary for the Railroad Retirement Board in the administration of said acts as specifically provided for under this title, (1) an amount equal to the aggregate of the amounts covered into the Treasury during the fiscal year 1951 as collections under the Railroad Retirement Tax Act (26 U. S. C. 1500-1538), plus (2) an amount equal to the difference between (a) the aggregate of the amounts covered into the Treasury during the fiscal year 1950 and prior years as collections under the Carriers Taxing Act of 1937, as amended, or the Railroad Retirement Tax Act, less the aggregate of the amounts appropriated for administrative expenses of the Railroad Retirement Board for 1949 and prior fiscal years (excluding amounts appropriated for penalty mail for the fiscal years 1945, 1946, 1947, and 1949) and (b) the aggregate of the amounts appropriated for 1950 and prior fiscal years under this head (excluding appropriations aggregating \$200,577,100 for military service credits as provided under section 4 of the Railroad Retirement Act of 1937, as amended), plus (3) the aggregate of the amounts heretofore or hereafter carried either to the surplus fund of the Treasury under the provisions of law codified on June 30, 1949, as section 713 of title 31, U. S. Code, or (as unobligated balances) to the account established pursuant to the Surplus Fund-Certified Claims Act of 1949 (Public Law 159, approved July 6, 1949), for payment of certified claims, from appropriations for administrative expenses of Railroad Retirement Board for the fiscal year 1948 and prior years (excluding amounts appropriated for penalty mail for the fiscal years 1945, 1946, 1947, and 1949): *Provided*, That so much of the first proviso under this head in the Railroad Retirement Board Appropriation Act, 1950, as made appropriations for the fiscal years 1951, 1952, 1953, and 1954 for military service credits under the Railroad Retirement Act, as amended is hereby repealed. (45 U. S. C. 228a-228r; Labor-Federal Security Appropriation Act, 1950).

PROGRAM AND PERFORMANCE

In addition to the railroad retirement program providing age and disability annuities and survivor benefits, the Railroad Retirement Board directs the operation of the railroad unemployment insurance system providing unemployment, sickness, and maternity insurance for railroad workers. The administrative costs of this system are provided through a permanent appropriation of 0.2 percent of taxable pay roll which is deposited in this fund to meet the variable work-load requirements imposed

RAILROAD RETIREMENT BOARD—Continued

Permanent appropriation, special account—Continued

Railroad Unemployment Insurance Administration Fund, Railroad Retirement Board—Continued

upon this program. As of June 30 of each year, any sum in this fund in excess of \$6,000,000 is transferred to the railroad unemployment insurance account in the unemployment trust fund (45 U. S. C. 361).

1. *Maintenance of accounts of employee earnings.*—Insurance payments both in amount and duration for unemployment, sickness, and maternity are based upon individual records of earnings. The principal work load is the processing of compensation items which is carried on simultaneously with a like requirement under the retirement program—the costs being shared proportionately between the two programs.

2. *Processing and payment of unemployment insurance claims.*—Individual claims for unemployment compensation are filed locally and certified for payment through the several regional offices of the Board. The number of initial and subsequent claims for unemployment compensation vary widely due to abrupt changes in economic factors affecting the railroad industry. This explains the need for flexibility in the availability of adequate administrative funds.

3. *Processing and payment of sickness and maternity claims.*—As in the case of unemployment claims, these claims are filed locally and certified for payment through the regional offices of the Board. This is a comparatively new program. Initial experience indicates that the volume of claims for sickness will follow the general health pattern in railroad communities.

4. *General administration.*—Except for certain basic activities solely supported and concerned only with this program, the remainder of the general administration costs are shared between this program and the retirement program on a measured basis.

PROGRAM AND PERFORMANCE

The Railroad Retirement Board administers the federally operated railroad retirement system, financed by employer and employee taxes. This appropriation is for that portion of the administrative expenses of the Board required in the operation of this program, and is derived from the railroad retirement account.

1. *Maintenance of accounts of employee earnings.*—Annuity and benefit payments based upon earnings in railroad employment require individual records of earnings. The work load of maintaining these records fluctuates with the level of employment in the railroad industry, rates of turnover, and similar factors. The primary work load is the processing of compensation items, which represent the individual earnings of workers. This activity is operated jointly with a similar requirement under the railroad unemployment insurance program and the costs are shared on a measured basis.

	1949 actual	1950 estimate	1951 estimate
Compensation items	5,888,918	6,363,500	6,587,000

2. *Processing and certification for payment of initial claims.*—Individual claims for age and disability annuities, survivors benefits, and lump-sum payments are adjudicated and certified to the Treasury for initial payment. The principal work load is the number of new claims received. This load tends to increase each year as more railroad workers are forced to seek retirement because of age or disability.

	1949 actual	1950 estimate	1951 estimate
Claims received	98,419	100,500	104,200

3. *Monthly recertification of awarded claims.*—Once the individual claimant has been certified as entitled to monthly annuity or benefit payments, subsequent monthly recertification is required to assure continuation of such payments. The volume of monthly recertifications tends to grow slowly but steadily larger as the system ages. This growth will continue until the system reaches maturity a number of years hence. The primary work load is the number of monthly payments in force.

	1949 actual	1950 estimate	1951 estimate
Total number of monthly payments	4,081,413	4,514,035	4,929,108

4. *Hearings and appeals.*—Individuals whose claims for annuities or benefits are disallowed or who dispute the award have the right of appeal to the appeals council, and subsequently to the Board itself. The work load is relatively stable.

	1949 actual	1950 estimate	1951 estimate
Appeals	719	700	700

5. *Actuarial services.*—Actuarial studies are required primarily to determine the adequacy of the tax rate to establish and maintain a sufficient reserve to meet all future payments. A triennial actuarial valuation is required by basic law.

6. *General administration.*—Executive direction and general administration is provided by Board members and various staff and general service units. Except for activities, wholly supported and concerned with this program, the remainder are shared between this program and the railroad unemployment insurance program on a measured basis.

Transferred to "Salaries and expenses, Railroad Retirement Board (trust fund)"		-5,104,000	-5,446,000
Proposed transfer to "Salaries and expenses, Railroad Retirement Board (trust fund)" to cover pay increases		-123,000	
Total available for obligation	633,647,770	662,868,737	657,422,737
Balance available in subsequent year	-5,095,737	-4,868,737	-4,422,737
Total obligations	628,552,033	658,000,000	653,000,000
<i>Invested funds</i>			
Total investments held at beginning of year	1,374,500,000	1,720,000,000	2,069,000,000
Net investments during the year	345,500,000	349,000,000	312,500,000
Total investments held at end of year	1,720,000,000	2,069,000,000	2,381,500,000

PROGRAM AND PERFORMANCE

Under the railroad retirement system, workers and their employers make annual contributions in the form of taxes on wages toward the benefits which will be payable when the worker reaches 65, becomes disabled, or when he dies. These annual contributions are appropriated to this trust fund and invested in special Government securities carrying an interest rate of 3 percent. Annuity and benefit payments are paid from the account (trust fund) and annual administrative expenses are derived therefrom. The excess of income over outgo together with annual interest on invested funds are accumulated to provide for the future annuities and benefits being currently earned by workers. When the system reaches maturity, some years hence, the interest on the accumulated investments in the trust fund, together with annual contributions, should be sufficient to pay the annual cost of earned benefits and the annual administrative cost of operating the system.

The present status of the fund is as follows:

	1949 actual	1950 estimate	1951 estimate
Investments, at end of fiscal year	\$1,720,000,000	\$2,069,000,000	\$2,381,500,000
Annual income:			
From taxes ¹	574,459,000	569,287,140	594,000,000
From interest	50,942,877	60,712,860	64,000,000
From military service credits appropriation		33,000,000	
Total	625,401,877	663,000,000	658,000,000

Total obligations	6,117,660	5,852,975	6,427,300

PROGRAM AND PERFORMANCE

The general objective of the seven statutes administered by the Commission is to protect the interests of the public and investors in diversified fields of corporate financing, and in securities and financial markets.

1. *Regulation of the public sale of securities.*—Facilities are maintained to provide for: Statutory standards of disclosure in offerings of securities registered with the Commission for public sale, and in related periodic reports; registration of securities on national securities exchanges; the protection of the rights and interests of purchasers of debt securities issued under mortgage indentures; the regulation of solicitation of proxies, consents and authorizations pertaining to securities of certain companies; prevention and suppression of fraud in the sale of securities, and the administration and enforcement of other provisions of the securities laws. The estimate contemplates that incoming work in 1951 will remain at least at the 1950 level and proposes some expansion in the enforcement work.

2. *Regulation of securities markets.*—The Commission is required to register and regulate national securities exchanges and police the securities markets to prevent and/or detect illegal trading practices; register broker-dealers and investment advisers and supervise certain of their activities; and generally supervise securities markets. The estimate provides a slight increase in 1951 for this activity.

3. *Regulation of public utility holding companies.*—Registered public utility holding companies are subject to broad regulation by the Commission with respect to various financial matters, including supervision of issuance, sale and purchase of securities, purchase and sale of utility properties and other assets, dividend and other financial policies; geographic integration and corporate

simplification of holding company systems and supervision of related reorganizations, mergers, and consolidations; and surveillance of service company arrangements, the solicitation of proxies and consents, the constitution of managements, and intrasystem transactions. At June 30, 1949, there were 46 registered holding company systems having aggregate assets of approximately \$14,263,000,000. These systems include 72 holding companies and 570 subsidiary companies. The estimate provides for the continuance of this activity at the 1950 level.

4. *Regulation of investment companies.*—As of June 30, 1949, there were 358 registered investment companies. The Commission regulates their activities in accordance with prescribed standards.

5. *Assistance to courts in reorganization of bankrupt corporations.*—At the request or with the approval of the court, the Commission participates in proceedings under chapter X of the Bankruptcy Act, so as to provide the court, the trustee, and investors with independent expert assistance on matters arising in the proceedings.

6. *Publication of corporate statistics.*—A quarterly financial report series for manufacturing corporations, is compiled and published jointly with the Federal Trade Commission. In 1951 this series will be extended to include selected nonmanufacturing industries. Also, a study of plant and equipment expenditures by major industrial groups is conducted with the Department of Commerce.

7-9. *Executive, staff, administrative services.*—The estimate provides for the maintenance of this personnel at the 1950 level.

Unobligated balance, estimated savings.....	9,872,896	-----	-----
Total obligations.....	17,603,804	8,565,000	-----

PROGRAM AND PERFORMANCE

The Selective Service System is carrying out the following statutory responsibilities: (1) Registering eligible males between the ages of 18 and 26, classifying those between the ages of 19 and 26 as to availability for service, and selecting for induction the numbers required by the armed forces; (2) providing all possible assistance in maintaining the manpower needs of the armed forces, including the National Guard and the Reserve components (organized units), and assisting the armed services in obtaining compliance with Reserve obligations incurred by individuals under the act; (3) carrying out the mobilization planning responsibilities of the System in collaboration with and according to the mobilization planning programs developed by the National Security Resources Board, and training the required personnel to put manpower procurement plans immediately into operation should an emergency develop; and (4) preserving and servicing the records of 62,000,000 registrants and veterans created under the Selective Training and Service Act of 1940 and the Selective Service Act of 1948.

As specified in the statute, these functions are performed by an organization consisting of a national headquarters, a State headquarters for each State, Territory, and possession, appeal boards and local boards appointed by the President. In 1950 the number of local boards has been reduced to approximately 3,600, many of which are served by joint offices and part-time clerks.

By terms of the Selective Service Act of 1948 this agency will be terminated on June 24, 1950. On that date all of the personnel, property, records, and unexpended balances of appropriations will be transferred to the Office of Selective Service Records, where outstanding affairs of the predecessor agency will be liquidated.

In anticipation of the enactment of proposed legislation extending selective service authority, a supplemental appropriation of \$4,226,000 is forecast for 1951, in addition to the amount estimated under the appropriation "Salaries and expenses, Office of Selective Service Records."

PROGRAM AND PERFORMANCE

The Smithsonian Institution conducts certain types of fundamental research, maintains public exhibits, and preserves valuable items of scientific and historical interest and art objects, and assists in the international exchange of scientific literature.

1. *Management.*—The management staff, responsible for the over-all direction of the Institution, is estimated at the same level as in the current year.

2. *Operations.*—The Institution will continue to operate two museums, the National Collection of Fine Arts (which includes both permanent exhibitions and about a dozen special exhibitions each year), the Canal Zone Biological Area for research in tropical flora and fauna and in the effects of tropical climate on equipment and supplies, and the international exchange service which involves the exchange of scientific publications. Improvement and expansion of storage facilities are planned for 1951, in order to help relieve congested conditions and backlogs of uncataloged and unindexed items in storage now numbering about 2,500,000.

3. *Research.*—The 1951 program in American ethnology will continue anthropological researches among American Indians, Eskimos, and natives of lands under United States jurisdiction, together with work on archeological remains. It is planned to relocate one field station of the

Astrophysical Observatory to a more favorable location, where it can continue its work on solar radiation.

4. *General services.*—In addition to the regular continuing work, provision is made in 1951 for certain non-recurring items in the repair and rehabilitation of facilities in Washington, D. C.

PROGRAM AND PERFORMANCE

The Smithsonian Institution is conducting archeological studies in the Columbia River Basin where river areas will be flooded by construction of Government dams.

OBLIGATIONS BY ACTIVITIES

Columbia River Basin archeological studies—1950, \$47.

OBLIGATIONS BY OBJECTS

09 Equipment—1950, \$47.

Permanent appropriation:

Expenses of Smithsonian Institution, Interest Account—

FUNDS AVAILABLE FOR OBLIGATION: Appropriation or estimate—1949, \$60,000; 1950, \$60,000; 1951, \$60,000.

PROGRAM AND PERFORMANCE

There is appropriated, out of any money not otherwise appropriated, a sum equal to interest at the rate of 6 percent per annum on a trust fund of \$1,000,000 derived from the original bequest of James Smithson and other deposits which were made on the same terms. Moneys so appropriated are paid semiannually to the board of regents for the maintenance and support of the Smithsonian Institution (20 U. S. C. 54, 55).

OBLIGATIONS BY ACTIVITIES

Maintenance and support of Smithsonian Institution—1949, \$60,000; 1950, \$60,000; 1951, \$60,000.

OBLIGATIONS BY OBJECTS

07 Other contractual services—1949, \$60,000; 1950, \$60,000; 1951, \$60,000.

APPROPRIATION OR ESTIMATE

Appropriation 1950, **\$60,000** Estimate 1951, **\$60,000**

Unobligated balance, estimated savings.....	-35		
Total obligations.....	1,073,465	1,118,900	1,200,000

PROGRAM AND PERFORMANCE

There is no material change in the normal program or operation of the National Gallery of Art proposed for 1951 other than the opening to the public of 12 new galleries which are now under construction.

1. *Acquisition, care, and exhibition of art objects.*—The funds will be used to finance: (a) the constant inspection and care, restoration, and research involved in the custody and exhibition of the present important and irreplaceable collections of works of art belonging to the Nation, or on loan; (b) the holding of approximately 300 consultations on works of art in connection with offers of gifts or loans to the Gallery; (c) the preparation of approximately 1,000 curatorial reports in answer to inquiries from the public, and (d) the continuation of miscellaneous activities such as providing special exhibitions, tours, lectures, and library services for the benefit of the public.

2. *Staff services rendered the board of trustees and its committees.*—It is estimated that 160 transactions involving the preparation of resolutions and other documents and 65 agreements involving gifts or loans will be completed during the year. The services entail a variety of technical, legal, secretarial, and financial matters. The increased work load in this activity will require two additional employees in 1951.

3. *Maintenance and operation of Gallery.*—Sixty-four percent of the 1951 estimate is for operation and maintenance of the Gallery's building and grounds including protection of the art treasures and maintenance and repair of equipment. The addition of 12 new galleries (constructed from private funds) requires a small increase in 1951 for protective and labor force and new equipment.

4. *Administrative services.*—The services are continued at the present level.

PROGRAM AND PERFORMANCE

The Tariff Commission organizes and interprets economic data relating to industry, commodities, and foreign trade for governmental use in formulating and implementing United States tariff policy.

1. *Assembly and analysis of basic tariff, production, and trade data.*—Through continuous survey and analysis, the Commission keeps up to date and expands its basic stock of economic and technical information relating to individual commodities, the economic conditions in foreign countries, and their trade policies, a background necessary for the performance of its specific functions. Increased funds will permit a more thorough coverage of commodities in import competition.

2. *Investigations and reports relating to tariffs and other commercial policy questions.*—The Commission conducts investigations bearing on tariffs and other restrictions on imports and makes reports on these subjects to the President or the Congress. In some cases, as required by specific laws or Presidential orders, it recommends courses of action. Other reports are made under more general laws requiring factual information without recommendation. The escape-clause provision in trade agreements permits the withdrawal or modification of concessions in the event of injury to domestic industry and agriculture. It is anticipated that the number of applications for investigation under this provision will increase in 1951. Included also are funds for work relating to the clarification and simplification of tariff classifications.

3. *Work in connection with preparation and operation of trade agreements.*—Activities in this field will continue on the same high level in 1951 as were required for the negotiation of the General Agreement on Tariffs and Trade at Geneva in 1947 and the supplementary negotiations at Annecy in 1949. The Commission not only supplies the factual data as the basis for consideration of concessions by the United States in trade agreements, but also participates in decisions and negotiations. The Commission also makes yearly reports on the operation of the trade-agreements program.

Total obligations.....	776,945	811,400	826,900

PROGRAM AND PERFORMANCE

The Tax Court reviews the determinations of tax deficiencies made by the Commissioner of Internal Revenue on appeal and decides whether there is a deficiency or an overpayment in income, profits, estate, gift, and unjust enrichment taxes, and personal holding company surtaxes; it also reviews the action of the Commissioner in deficiency and refund cases founded on claims under excess-profits

statutes. The Court likewise adjudicates claims for refunds of processing taxes and determines the amount of excessive profits on war or defense contracts when contractors appeal determinations made under statutes providing for the renegotiation of such contracts.

The 1951 budget anticipates a slightly higher average employment in both the adjudication and administrative service activities of the Court. To expedite disposal of cases, the Court plans to use qualified senior attorneys as hearing commissioners in order to cope with an increasing work load and mounting backlog. The following tabulation indicates the volume of the Court's work:

Cases	Actual		Estimate

PROGRAM AND PERFORMANCE

Construction and betterment of American merchant ships may be undertaken by the Commission with funds from this appropriation under the following different arrangements:

1. *Construction for sale.*—In this instance an approved applicant agrees in advance to the purchase of the ship. In the case of vessels for use on essential foreign trade routes, the purchase agreement may include a construction-differential subsidy allowance of up to 50 percent to compensate for the difference between the comparative costs of construction of the vessel in the United States and in a foreign shipyard. Allowance may also be made for national defense features incorporated in the design of the vessel, whether it is intended for use in foreign or domestic trade. Payment for the vessel is usually made on the basis of an initial cash down payment of 25 percent of the purchase price payable by the time of delivery of the vessel, and payment of the unpaid balance over a 20-year period, with interest computed at 3½ percent per annum. This type of agreement, which is ordinarily prerequisite to a construction contract, has been employed in contracts for six vessels started by the Commission during 1948–49. The program for 1950 contemplates initiation of five vessels for sale, and the 1951 program of two such vessels. Receipts from the sale of such ships are carried into Treasury as “Miscellaneous receipts.”

2. *Design and construction of prototype vessels.*—Construction is contemplated of one vessel in 1950 and another in 1951 for Government account. Such vessels are designed as prototypes for mass-production construction in the event of a national emergency and may eventually be sold or chartered. Operational performance data on the use of these ships will be made available to the Commission.

SUMMARY OF POSTWAR NEW SHIP CONSTRUCTION PROGRAM

	Estimated cost	Estimated sales price	Estimated net cost to the Government
Vessels under contract by Dec. 31, 1949:			
5 passenger-cargo ships.....	¹ \$78,843,000	\$41,486,870	\$37,356,130
1 superliner.....	¹ 70,373,000	28,087,216	42,285,784
1 cargo prototype.....	¹ 4,744,000		4,744,000
Additional contracts contemplated for 1950:			
3 passenger-cargo.....	47,500,000	(²)	(²)
2 trallerships.....	22,000,000	22,000,000	
Proposed 1951 program:			
2 passenger-cargo.....	65,000,000	(²)	(²)
1 prototype naval auxiliary.....	10,000,000		10,000,000

¹ Contract price, exclusive of allowable changes and extras and of price escalation.

² Not yet determined.

3. *Reconditioning and betterments.*—Alterations to privately owned vessels, with the aid of construction-differential subsidies, may be made under terms and conditions similar to those applicable to the construction of new vessels. The 1951 program does not include specific provision for any additional betterment contracts.

Most of the expenditures for ship construction are made from 1 to 3 years after the year in which the construction is initiated. Consequently, of the \$35,000,000 cash recommended for appropriation in 1951, only \$5,000,000 is intended for meeting obligations under the new \$75,000,000 program proposed for 1951. The remaining \$30,000,000 would be applied to the liquidation of obligations incurred during 1948–49. Total expenditures for ship construction during 1951 are estimated at \$75,000,000, of which \$70,000,000 will be for vessels started prior to 1951. At the close of 1951 it is estimated that unliquidated obligations of \$199,300,000 will remain outstanding for expenditure in future years.

APPROPRIATION TEXT

Ship construction: For new ship construction, including reconditioning and betterment, as authorized by title V of the Merchant Marine Act, 1936 (except for construction of one prototype vessel under title VII of said Act), \$35,000,000, of which \$30,000,000 is for payment of obligations for new ship construction incurred under authority granted in the Independent Offices Appropriation Act, 1948; and, in addition, the Commission is authorized to enter into contracts for new ship construction in an amount not to exceed \$70,000,000. (Independent Offices Appropriation Act, 1950.)

Estimate 1951, * \$35,000,000

* Estimate is for activities previously carried under “Salaries and expenses, United States Maritime Commission.” The amounts obligated in 1949 and 1950 are shown in the schedule as comparative transfers.

Total obligations.....	25,775,775	44,514,382	58,000,000

PROGRAM AND PERFORMANCE

The Maritime Commission is authorized under section 603 (a) of the Merchant Marine Act of 1936 to enter into long-term contracts in advance of appropriations and to pay operating-differential subsidies to United States citizens who operate vessels in essential services in the foreign commerce of the United States. These subsidies are calculated to meet the disparity in operating costs of

major items of expense between United States and foreign flag vessels competing in the same services.

One-half of the profits, computed annually and averaged over a 10-year period, in excess of 10 percent of a company's capital necessarily employed in the shipping enterprise, however, is subject to recapture by the Commission. Under present arrangements, the actual payments made are based upon the total accrued subsidy cost, less estimated annual recapturable profits. Since the amount of recapturable profits must be calculated on a cumulative basis over each 10-year period of a contract, the withheld subsidy represents a contingent liability which must be paid by the Government to the extent that profits in succeeding years fall below an average of 10 percent.

The amount of subsidy accrual each year reflects (a) the cost differentials between United States and competing foreign lines on major elements of operating costs, (b) the number of ships subsidized, and (c) the number and duration of voyages during the year by such vessels.

The recent widespread devaluation of foreign currencies will probably have the effect of further increasing the disparity between United States and foreign costs of vessel operation, and thus of increasing the total amount of subsidy accrual. However, the extent of this effect will not be known until the calculations of subsidies are made for the calendar year 1950. The estimates contained here make no provision for the effects of currency devaluation.

The major factors related to the amounts of operating-differential subsidy are shown below:

	1949 actual	1950 estimate	1951 estimate
Number of subsidized ships.....	230	235	254
Number of subsidized voyages.....	1,154	1,331	1,403
Average percentage of operating costs subsidized.....	43	45	45
Total subsidy accrual.....	\$40,906,958	\$54,090,970	\$62,888,000
Subsidy withheld as recapturable.....	24,215,183	35,872,688	4,888,000
Appropriation or estimate:			
(a) For current year.....	16,691,775	18,218,382	58,000,000
(b) To liquidate prior-year liability.....			35,380,000
Total.....	16,691,775	18,218,382	93,380,000
Cumulative total of withheld subsidy representing contingent liability of Government at end of year.....	50,119,058	85,991,646	55,499,261

As shown above, the 1951 estimate includes \$58,000,000 to cover the subsidy accrual for that year, less estimated recapture, and in addition an amount of \$35,380,000 to cover prior-year subsidy payments. Provision for this latter amount has now become necessary because actual recapturable profits have been less than was estimated at the time of the original appropriations. At the close of 1951 it is estimated that \$55,499,261 will remain as cumulative recapturable subsidy withheld under current contracts; subsidized operators will be entitled to payments against this amount in future years to the extent that their profits fall below 10 percent of capital necessarily employed in the subsidized operations, and additional appropriations would be required accordingly.

OBLIGATIONS BY ACTIVITIES

Operating-differential subsidies—1949, \$25,775,775; 1950, \$44,514,382; 1951, \$58,000,000.

OBLIGATIONS BY OBJECTS

11 Grants, subsidies, and contributions—1949, \$25,775,775; 1950, \$44,514,382; 1951, \$58,000,000.

APPROPRIATION TEXT

Operating-differential subsidies: For operating-differential subsidies, as authorized by the Merchant Marine Act, 1936, as amended, \$93,380,000, of which \$9,084,000 is for payment of obligations incurred pursuant to authority contained under this head in the Supplemental

Independent Offices Appropriation Act, 1949, and \$26,296,000 is for payment of obligations incurred pursuant to authority contained under this head in the Independent Offices Appropriation Act, 1950, to grant operating-differential subsidies on a long-term basis and to obligate the United States to make future payments in accordance with the terms of such contracts: Provided, That to the extent that the operating-differential subsidy accrual (computed on the basis of parity) is represented on the operator's books by a contingent accounts receivable item against the Commission as a partial or complete offset to the recapture accrual, the operator (1) shall be excused from making deposits in the special reserve fund, and (2) as to the amount of such earnings the deposit of which is so excused shall be entitled to the same tax treatment as though it had been deposited in said special reserve fund. To the extent that any amount paid to the operator by the Commission reduces the balance in the operator's contingent receivable account against the Commission, such amount, unless it is forthwith deposited in the fund, shall be considered as withdrawn under section 607 (h) of the Merchant Marine Act, 1936, as amended: Provided further, That nothing contained in this Act, or in any prior appropriation Act, shall be construed to affect the authority of the Commission pursuant to the provisions of section 603 (a) of the Merchant Marine Act, 1936, as amended, (1) to grant operating-differential subsidies on a long-term basis, and (2) to obligate the United States to make future payments in accordance with the terms of such operating-differential subsidy contracts. (Independent Offices Appropriation Act, 1950.)

Estimate 1951, • \$93,380,000

* Estimate is for activities previously carried under "Salaries and expenses, United States Maritime Commission." The amounts obligated in 1949 and 1950 are shown in the schedule as comparative transfers.

PROGRAM AND PERFORMANCE

Administrative expenses for all the Commission's activities except training, and operating expenses except for ship construction, operating-differential subsidies, vessel operations, and training, are met from this appropriation. Separate limitations govern the major segments of these programs, as follows:

1. *General administrative expenses.*—This limitation provides for the general administrative expenses of the Commission in Washington, D. C., and also those field activities which are generally administrative in nature. Among the Commission's administrative activities are the purchase and sale or charter of Government-owned vessels, supervision of the ship construction and operating-differential subsidy programs, regulation of merchant shipping engaged in international trade, and headquarters supervision over the reserve fleet and the various marine facilities owned by the Commission. In addition, ap-

UNITED STATES MARITIME COMMISSION—Con.

Salaries and Expenses, United States Maritime Commission—Con.

proximately 20 percent of the personnel included under this appropriation will be engaged during 1951 in the liquidation of various work backlogs remaining from the Government's wartime and immediate postwar activities in the operation of vessels. The 1951 estimate reflects a decline in work related to the accounting backlogs and to the chartering of vessels. This decline is partially offset by increased work in supervision of new-ship construction and by an increased staff for the compilation of current data as to competitive foreign-ship construction and operating costs; these data are essential to proper determination of subsidy allowances.

2. *Maintenance of shipyard facilities.*—Since World War II four Government-owned reserve shipyards have been maintained for the purpose of national defense. These yards are large, complex installations costing approximately \$100,000,000 and contain much valuable machinery and equipment. The 1951 estimate provides for the maintenance, preservation, and security of the shipyards in a manner which would assure their readiness for the construction, conversion, and repair of vessels in the event of a national emergency.

3. *Operation of warehouses.*—Five warehouses are maintained for the storage, receipt, and issuance of materials required for the Commission's current operations, as well as the storage of vital marine equipment for any national emergency requiring reactivation of reserve fleet vessels.

4. *Reserve fleet expenses.*—The Merchant Ship Sales Act of 1946, as amended, requires the Maritime Commission to place into the national defense reserve fleet on June 30, 1950, all surplus vessels which are of sufficient value for commercial and national defense purposes to warrant their maintenance and preservation. Accordingly, all vessels in the Commission's reserve fleet, which are in a condition to warrant permanent preservation for national defense purposes, are being retained in the reserve fleet. In addition, the estimate includes an amount of \$2,200,000 to initiate a program for preservation of bottoms of vessels in the reserve fleet by means of a newly developed cathodic method. The following table shows the actual and projected performance of vessel preservation for the fiscal years 1949, 1950, and 1951:

	1949 actual	1950 estimate	1951 estimate
Number of vessels in fleets at close of year	1,934	2,179	2,270
Percentage of preservation completed at close of year	68	81	94
Average number of vessels to be preserved during year	735	712	713

5. *Maintenance and operation of terminals.*—Four Government-owned marine terminals, which were used on a large scale during World War II, are leased for commercial operation. The Commission is responsible for normal maintenance and for major equipment replacements, which are intended to insure the readiness of the terminals for any national emergency. Equipment replacements required by lease agreements account for the major portion of the 1951 increase over 1950. Gross terminal revenues, which are deposited into miscellaneous receipts of the Treasury, are shown in the following table:

Fiscal year	Gross revenue	Expense	Net revenue
1949	\$1,791,215	\$580,149	\$1,211,066
1950 (estimate)	1,903,000	512,574	1,390,426
1951 (estimate)	1,928,000	765,000	1,163,000

APPROPRIATION TEXT

Salaries and expenses: For expenses necessary for carrying into effect the Merchant Marine Act, 1936, and other laws administered by the United States Maritime Commission, [\$63,014,174] \$20,951,000, within limitations as follows:

Administrative expenses, including personal services in the District of Columbia; printing and binding; [not to exceed \$2,000 for newspapers and periodicals;] purchase of seven passenger motor vehicles, for replacement only; not to exceed \$17,700 for services as authorized by section 15 of the Act of August 2, 1946 (5 U. S. C. 55a); [and] not to exceed \$1,125 for entertainment of officials of other countries when specifically authorized by the Chairman; [in all, not to exceed \$8,950,142, together with not to exceed \$586,648 of the unobligated balance in the Federal ship mortgage insurance fund, revolving fund] payment of tort claims pursuant to law (28 U. S. C. 2672); and \$150,000 to be available exclusively for ship structure research, testing and models; \$9,729,000: Provided, That the Maritime Commission is authorized to dispense with the administrative audit of agents' accounts covering voyages beginning prior to April 1, 1949;

[New ship construction, including reconditioning and betterment, as authorized by title V of the Merchant Marine Act, 1936 (except for construction of two prototype vessels under title VII of said Act), \$26,875,000, of which \$12,000,000 is for payment of obligations incurred under authority granted under this head in the Supplemental Independent Offices Appropriation Act, 1949, to enter into contracts for new ship construction in an amount not to exceed \$75,000,000; and, in addition, the Commission is authorized to enter into contracts for new ship construction in an amount not to exceed \$50,000,000: Provided, That no part of this contract authority shall be used to start any new ship construction for which an estimate was

not included in the budget for the current fiscal year, nor to start any new ship construction the currently estimated cost of which exceeds by 10 per centum the estimated cost included therefor in such budget unless the Director of the Bureau of the Budget specifically approves the start of such ship construction and the Director shall submit forthwith a detailed explanation thereof to the Committees on Appropriations of the Senate and of the House of Representatives; and, as used herein, the term "budget" includes the detailed justification supporting the budget estimates: *Provided further*, That not to exceed \$104,000,000 of the funds and contract authority made available for new ship construction, including reconditioning and betterment, in the Supplemental Independent Offices Appropriation Act, 1949, shall continue to be available until December 31, 1949;]

Maintenance of shipyard facilities, **[\$425,000] \$452,000;**

Operation of warehouses, **[\$480,000] \$436,000;**

Operating-differential subsidies, \$18,218,382: *Provided*, That to the extent that the operating-differential subsidy accrual (computed on the basis of parity) is represented on the operator's books by a contingent accounts receivable item against the Commission as a partial or complete offset to the recapture accrual, the operator (1) shall be excused from making deposits in the Special Reserve Fund and, (2) as to the amount of such earnings the deposit of which is so excused, shall be entitled to the same tax treatment as though it had been deposited in said Special Reserve Fund. To the extent that any amount paid to the operator by the Commission reduces the balance in the operator's contingent receivable account against the Commission, such amount, unless it is forthwith deposited in the fund, shall be considered as withdrawn under section 607 (h) of the Merchant Marine Act, 1936, as amended;]

Reserve fleet expense, **[\$7,134,800;] \$9,569,000;**

Maintenance and operation of terminals, **[\$510,850] \$765,000.**

Miscellaneous expenses, including payment of claims pursuant to section 403 of the Federal Tort Claims Act (28 U. S. C. 2672), \$420,000, of which \$250,000 shall be available exclusively for liquidation of liens or claims which may take precedence over the Government's preferred mortgage on vessels.] (Independent Offices Appropriation Act, 1950.)

Appropriated 1950, **\$63,014,174** Estimate 1951, **\$20,951,000**

* Excludes \$128,660,000 for activities transferred in the estimates to appropriations as follows:

"Ship construction, United States Maritime Commission".....	\$35,000,000
"Operating differential subsidies, United States Maritime Commission".....	93,380,000
"Vessel operating functions".....	280,000

The amounts obligated in 1949 and 1950 are shown in the schedule as comparative transfers.

PROGRAM AND PERFORMANCE

This fund provides for the training of officers and seamen for service in the maritime industry of the United States. Training to be provided during 1951 includes the following:

1. *Cadet-midshipmen training in Federal schools.*—The Merchant Marine Academy at Kings Point, N. Y., offers

a 3-year course of training, supplemented by 1 year of active duty at sea, designed to qualify graduates for licenses as merchant marine officers, and for commissions as ensign in the Naval Reserve. The 1951 estimate provides for consolidation of all Federal cadet training at Kings Point. The 1951 estimate also provides for cost of uniforms and textbooks for cadets rather than pay as previously provided. In addition, the Academy provides subsistence, quarters, tuition, and medical care of cadets. The new allowances are intended to place these cadets on an approximate parity with midshipmen in the other Naval Reserve officers' training programs.

2. *Upgrading and specialist training for experienced officers and seamen.*—Training schools will be continued at Alameda, Calif., and Sheepshead Bay, N. Y., for specialist and upgrade training of men already in the maritime industry. Brief courses in the operation of loran navigational equipment will also be continued in Alameda, New Orleans, and New York City.

3. *Training for inexperienced seamen.*—The estimates for 1951 make no provision for the continuation of training of new men for unlicensed ratings because of the large number of experienced seamen who are currently unable to find employment in the industry.

4. *Correspondence training.*—The United States Maritime Service Institute provides correspondence courses in a wide variety of subjects for seamen and officers employed in the maritime industry.

5. *Administration.*—The estimate provides for a reduction in the headquarters staff serving the training program, in accordance with the other reductions made in the program. This activity also includes the provision of emergency medical service at the various reserve fleet sites.

PROGRAM AND PERFORMANCE

The Maritime Commission's authority to sell, charter, and operate war-built vessels will terminate June 30, 1950. The Commission will be required to place all redelivered chartered vessels, estimated to number 82 on June 30, 1950, into the reserve fleet. This estimate provides for placing these vessels in the reserve fleet and related expenses, together with a contingency reserve to protect the Government's interest in vessels sold or chartered.

APPROPRIATION TEXT

[VESSEL OPERATING FUNCTIONS]

Vessel operating functions: For expenses (other than administrative expenses) necessary for [carrying out] liquidating the operating functions transferred to the United States Maritime Commission by section 202 of the Naval Appropriation Act, 1947 (60 Stat. 501), [fiscal year 1950, \$4,036,570] \$1,089,000, including \$250,000 for liquidation of liens or claims which may take precedence over the Government's preferred mortgage on vessels, and other expenses necessary to protect the Government's interest in vessels sold or chartered: *Provided*, That receipts from such functions during the current fiscal year [1950] shall be deposited in the Treasury as miscellaneous receipts.

No additional vessels shall be allocated under charter, nor shall any vessel be continued under charter by reason of any extension of chartering authority beyond June 30, 1949, unless the charterer shall agree that the Commission shall have no obligation upon redelivery to accept or pay for consumable stores, bunkers, and slop-chest items, except with respect to such minimum amounts of bunkers as the Commission considers advisable to be retained on the vessel and that prior to such redelivery all consumable stores, slop-chest items, and bunkers over and above such minimums shall be removed from the vessel by the charterer at his own expense. (*Third Deficiency Appropriation Act, 1949.*)

Appropriated 1950, \$4,036,570 Estimate 1951, \$1,089,000

* Includes \$280,000 for activities previously carried under "Salaries and expenses, United States Maritime Commission." The amounts obligated in 1949 and 1950 are shown in the schedule as comparative transfers.

Liquidation of War Shipping Administration Obligations, Treasury Department—

APPROPRIATION TEXT

War Shipping Administration liquidation: [Not to exceed \$15,000,000 of the] The unexpended balance of the appropriation to the Secretary of the Treasury in the Second Supplemental Appropriation Act, 1948, for liquidation of obligations [found] approved by the General Accounting Office [to have been] as properly incurred against funds of the War Shipping Administration prior to January 1, 1947, is hereby continued available during the current fiscal year.

[Notwithstanding the limitation under this head in the Independent Offices Appropriation Act, 1950, on the amount available from the unexpended balance of the appropriation to the Secretary of the Treasury in the Second Supplemental Appropriation Act, 1948, for liquidation of obligations approved by the General Accounting Office as properly incurred against funds of the War Shipping Administration prior to January 1, 1947, the entire unexpended balance of said appropriation shall remain available during the fiscal year 1950 for liquidation of such obligations.] (*Independent Offices Appropriation Act, 1950; Second Supplemental Appropriation Act, 1950.*)

PROGRAM AND PERFORMANCE

This estimate is to provide funds for the payment of claims and the liquidation of other obligations incurred under this appropriation under terms of the Independent Offices Appropriation Act, 1948. This appropriation act provided for a lesser amount of cash than the amount of obligational authority extended for 1948, and additional cash will be required for the liquidation of such obligations during 1951.

APPROPRIATION TEXT

Construction fund: For an additional amount for payment of obligations (exclusive of obligations for ship construction, reconditioning, and betterments incurred pursuant to authority contained in the Independent Offices Appropriation Act, 1948) incurred prior to July 1, 1948, against the Construction fund established pursuant to the Merchant Marine Act, 1936, as amended, \$10,000,000, to be available until June 30, 1951, for expenditure only. (*Independent Offices Appropriation Act, 1950.*)

Estimate 1951, \$10,000,000

Notwithstanding any other provision of this Act, the Commission is authorized to furnish utilities and services and make necessary repairs in connection with any lease, contract, or occupancy involving Government property under control of the Commission, and payments received by the Commission for utilities, services, and repairs so furnished or made shall be credited to the appropriation charged with the cost thereof: *Provided*, That rental payments under any such lease, contract, or occupancy on account of items other than such utilities, services, or repairs shall be covered into the Treasury as miscellaneous receipts.

The United States Maritime Commission shall not incur any obligations during the current fiscal year from the construction fund established by the Merchant Marine Act, 1936, or otherwise, in excess of the appropriations and limitations contained in this Act: *Provided*, That nothing contained herein and in the Independent Offices Appropriation Act, 1948, shall be construed to affect the authority of the Commission pursuant to the provisions of section 603 (a) of the Merchant Marine Act, 1936, as amended, (1) to grant operating differential subsidies on a long-term basis and (2) to obligate the United States to make future payments in accordance with the terms of such operating-differential subsidy contracts, or in any prior appropriation act, and all receipts which otherwise would be deposited to the credit of said fund shall be covered into the Treasury as miscellaneous receipts. (*Independent Offices Appropriation Act, 1950.*)

PROGRAM AND PERFORMANCE

Philippine citizens are trained as cadet-midshipmen with funds transferred to the Maritime Commission by the State Department. Such training was established as one phase of the rehabilitation assistance provided by the United States for the Philippine Republic and is scheduled to continue through 1954. During fiscal year 1951, 49 cadets will complete the 4-year training course and an additional 40 will be in training at the United States Merchant Marine Academy or at sea aboard United States merchant vessels.

Payments From Proceeds of Sales, Motor-Propelled Vehicles, Etc., United States Maritime Commission—

FUNDS AVAILABLE FOR OBLIGATION: Appropriation or estimate 1951—\$4,125.

PROGRAM AND PERFORMANCE

Proceeds of sales of vehicles, equipment, accessories, and other items, the exchange of which is authorized by law, may be applied in whole or in part payment toward the purchase of similar items. Receipts from this source are set up in a special appropriation account and are available for the replacement of similar items to the end of the fiscal year following the year in which the sale is made; unused balances are adjusted to miscellaneous receipts (5 U. S. C. 118d-1).

OBLIGATIONS BY ACTIVITIES

Purchase of automobiles and equipment—1951, \$4,125.

OBLIGATIONS BY OBJECTS

07 Other contractual services—1951, \$4,125.

APPROPRIATION OR ESTIMATE

Estimate 1951, \$4,125

Trust accounts:

Advances From Greece and Turkey for Assistance, Executive Office of the President (Allocation to United States Maritime Commission, Turkey)—

FUNDS AVAILABLE FOR OBLIGATION: Transferred from "Advances from Greece and Turkey, for assistance," Funds appropriated to the President—1949, \$2,720,000.

PROGRAM AND PERFORMANCE

These funds were allotted to cover the sale of six vessels to Turkey under the provisions of Public Law 75, approved May 22, 1947.

OBLIGATIONS BY ACTIVITIES

Payment to Treasury of proceeds from sale of vessels—1949, \$2,720,000.

OBLIGATIONS BY OBJECTS

09 Equipment—1949, \$2,720,000.

Unclaimed Moneys Due Creditors of Contractors With the United States Under Cost-Plus-A-Fixed-Fee Contracts, United States Maritime Commission—

FUNDS AVAILABLE FOR OBLIGATION: Appropriation or estimate—1949, \$123,313.

PROGRAM AND PERFORMANCE

For deposit of wages and other sums due former employees and other creditors of shipbuilding contractors remaining unclaimed (48 Stat. 1233).

OBLIGATIONS BY ACTIVITIES

Payment of claims—1949, \$123,313.

OBLIGATIONS BY OBJECTS

13 Refunds, awards, and indemnities—1949, \$123,313.

Unearned Moneys, Merchant Ship Sales, War-Built Vessels, United States Maritime Commission—

FUNDS AVAILABLE FOR OBLIGATION: Appropriation or estimate—1949, \$32,500,000; 1951, \$10,000,000.

PROGRAM AND PERFORMANCE

For refund of unearned portions of deposits for purchase of war-built vessels under the Merchant Ship Sales Act of 1946 (60 Stat. 41).

OBLIGATIONS BY ACTIVITIES

Refund of deposits—1949, \$32,500,000; 1951, \$10,000,000.

OBLIGATIONS BY OBJECTS

13 Refunds, awards, and indemnities—1949, \$32,500,000; 1951, \$10,000,000.

Unearned Moneys, Vessel Operation Functions of War Shipping Administration, United States Maritime Commission—

FUNDS AVAILABLE FOR OBLIGATION: Appropriation or estimate—1949, \$1,500,000.

PROGRAM AND PERFORMANCE

For refund of unearned portion of moneys received as revenue from vessel operations (48 Stat. 1232).

OBLIGATIONS BY ACTIVITIES

Refund of unearned moneys received—1949, \$1,500,000.

OBLIGATIONS BY OBJECTS

13 Refunds, awards, and indemnities—1949, \$1,500,000.

Wages Due American Seamen, War Shipping Administration Functions, United States Maritime Commission—

FUNDS AVAILABLE FOR OBLIGATION: Appropriation or estimate—1949, \$706,064; 1950, \$125,000.

PROGRAM AND PERFORMANCE

For deposit of unclaimed wages due American seamen employed aboard vessels operated under the jurisdiction of the Maritime Commission and the former War Shipping Administration (48 Stat. 1233).

OBLIGATIONS BY ACTIVITIES

Payment of claims—1949, \$706,064; 1950, \$125,000.

OBLIGATIONS BY OBJECTS

13 Refunds, awards, and indemnities—1949, \$706,064; 1950, \$125,000.

Working Fund, United States Maritime Commission (Trust Fund)—

FUNDS AVAILABLE FOR OBLIGATION: Advanced from Commodity Credit Corporation capital fund—1950, \$200,000.

PROGRAM AND PERFORMANCE

Funds in this account were advanced from the Commodity Credit Corporation to cover the costs of storing in reserve fleet vessels grain purchased by the Government.

OBLIGATIONS BY ACTIVITIES

Storage of grain in reserve fleet vessels—1950, \$200,000.

OBLIGATIONS BY OBJECTS

PROGRAM AND PERFORMANCE

This appropriation covers the administration and operation of all programs administered by the Veterans Administration except for construction activities and the operation of canteens. The programs fall into two broad categories, namely, (a) the furnishing of medical, hospital, and domiciliary care to veterans, and (b) the administration of the various nonmedical programs authorized by law, chiefly the compensation and pension program, the insurance program, and the benefits for World War II veterans authorized by the Servicemen's Readjustment Act.

1. *Medical, hospital, and domiciliary services.*—The funds available for the medical, hospital, and domiciliary program will provide for the operation of 168 Veterans Administration hospitals and homes, 69 out-patient clinics at regional offices, and reimbursement to other hospitals and homes and private physicians and dentists for the care of eligible veterans. Funds have also been included for medical research, education, operation of supply depots, furnishing of prosthetic appliances, and central and field office supervision of program activities.

(a) *Hospital and domiciliary services.*—Within the funds available, provision will be made for hospital and domiciliary care for veterans with service-connected disabilities and, subject to the availability of beds and receipt of a

statement regarding inability to defray expenses, for veterans with non-service-connected disabilities also. At the end of the fiscal year 1949, approximately 34 percent of the patients in hospitals had service-connected disabilities and 66 percent had non-service-connected disabilities. On June 30, 1949, there were 18,070 veterans awaiting hospitalization, representing about one-third of a month's total admissions. All of these, except 34, had non-service-connected disabilities. More than 547,000 veterans were hospitalized and discharged during the fiscal year 1949. Average daily patient and member loads in the fiscal year 1951 are expected to increase 2.8 percent over fiscal year 1950 levels, as compared with an increase of 3.9 percent between the fiscal years 1949 and 1950.

Average daily load	1949 actual	1950 estimate	1951 estimate
In Veterans Administration hospitals:			
Neuropsychiatric.....	47,787	48,633	48,507
Tuberculosis.....	7,017	7,398	7,690
General medical.....	39,735	42,903	47,836
Total.....	94,539	98,934	104,033
In other hospitals.....	12,320	11,640	9,950
Total, all hospitals.....	106,859	110,574	113,983
In Veterans Administration homes.....	15,288	16,824	17,191
In State homes.....	6,699	6,540	6,580
Total, all homes.....	21,987	23,364	23,771
Total, hospitals and homes.....	128,846	133,938	137,754

The sharp decline in the average number of patients to be cared for in other than Veterans Administration hospitals is due to the increased availability of beds in Veterans Administration hospitals resulting from new construction.

(b) *Out-patient service.*—Provision has been made for medical and dental examination and treatment of eligible veterans on an out-patient basis. Medical and dental examinations are for the purposes of ascertaining need for hospital, domiciliary, or out-patient care and treatment and to determine eligibility for pensions, compensation, vocational rehabilitation, and insurance benefits. Treatment is provided only to veterans with service-connected disabilities and those receiving vocational rehabilitation benefits. Backlogs at the end of fiscal year 1949 were 39 percent under those at the end of the fiscal year 1948 and constituted less than 1 month's work.

The number of individuals examined and treated during the fiscal year 1951 is expected to decline 2 percent from the previous year's level and almost 6 percent from the level of the fiscal year 1949. Approximately 69 percent of out-patient services during the fiscal year 1951 will be furnished through Veterans' Administration facilities.

The remainder will be provided on a fee basis by private physicians and dentists.

Number of individuals	1949 actual	1950 estimate	1951 estimate
<i>Total</i>			
Examined, medical.....	2,742,687	2,772,800	2,756,500
Treated, medical.....	1,672,031	1,611,500	1,575,000
Examined, dental.....	577,975	480,750	465,000
Treated, dental.....	506,071	410,750	376,000
<i>Total</i>	5,498,764	5,275,800	5,172,500
<i>In Veterans Administration facilities:</i>			
Examined, medical.....	2,271,456	2,320,900	2,299,100
Treated, medical.....	966,704	908,000	884,850
Examined, dental.....	315,668	288,450	279,000
Treated, dental.....	82,945	85,000	90,000
<i>Total, Veterans Administration facilities</i>	3,636,773	3,602,350	3,552,950
<i>By private physicians and dentists:</i>			
Examined, medical.....	471,231	451,900	457,400
Treated, medical.....	705,327	703,500	690,150
Examined, dental.....	262,307	192,300	186,000
Treated, dental.....	423,126	325,750	286,000
<i>Total, by private physicians and dentists</i>	1,861,991	1,673,450	1,619,550

(c) *General administration.*—Provision has also been made within the medical program for executive direction and general supervision of medical, hospital, domiciliary, and supply depot activities, except supervision of such activities as finance, personnel, legal, contact, and administrative services. Funds are provided for a central purchasing service to obtain depot stocks and certain field station supplies. Provision is made also for general supervision of the hospital-construction program. The cost of general administration in relation to the total cost of providing medical, hospital, and domiciliary services is declining as indicated below:

	1949 actual	1950 estimate	1951 estimate
Percent of total costs of medical, hospital, and domiciliary services provided for general administration.....	2.4	1.4	1.3

(d) *All other services.*—Other services include medical research and education, and physical alterations at supply depots and out-patient clinics. Medical research is confined to areas related to improved care and treatment of veterans, including prosthetic research and is conducted in Veterans Administration facilities and on a contract basis. Medical education and training includes residency and intern training programs as well as refresher courses for other personnel.

2. *Nonmedical program, administration and operation—*
 (a) *Veterans' and dependents' claims.*—The Office of Claims is responsible for the adjudication of claims filed by veterans and the dependents of veterans for compensation, pension, and other benefits authorized by law. Major items of work are ratings (determinations of basic eligibility) and authorizations (findings as to the amount of benefits payable). The Board of Veterans' Appeals receives all appeals from claimants and renders decisions thereon. The Solicitor is responsible for guardianship and fiduciary relationships in the case of helpless veterans or of minor dependents, and makes field examinations where required.

This activity also includes work done for other activities, such as processing of insurance death claims and appeals, furnishing of legal advice and making case investigations. The necessary physical examinations for

these claims are provided under the medical and hospital activity.

The changes in the work load from 1949 have been projected in line with established trends.

Work-load units	1949 actual	1950 estimate	1951 estimate
Rating actions.....	3,877,767	2,784,000	2,686,000
Authorization actions.....	1,569,627	1,402,000	1,272,000
Appeals processed.....	57,315	66,000	72,000
Cases involving guardianship or fiduciary relationships (average).....	213,429	242,000	268,000
Field examinations.....	163,977	164,000	164,000

(b) *Insurance.*—The Office of Insurance is responsible for the administration of all laws relating to insurance for eligible servicemen and veterans. Operations are in general similar to those of private mutual insurance companies, except that no agents are maintained. Physical examinations for insurance are provided under the medical and hospital activity, and the processing of death claims, appeals, and case investigations are provided under the claims activity.

The number of policies in force is expected to increase in 1950 and 1951, primarily due to the anticipated effect of the payment of the initial dividend on national service life insurance during the last half of the 1950 fiscal year.

Average number of policies in force	1949 actual	1950 estimate	1951 estimate
U. S. Government life insurance.....	507,854	494,000	488,000
National service life insurance ¹	6,100,000	6,300,000	6,400,000
<i>Total</i>	6,607,854	6,794,000	6,888,000

¹ Estimated.

(c) *Vocational rehabilitation and education.*—The Office of Vocational Rehabilitation and Education administers the Vocational Rehabilitation Act of 1943, which provides for the training of veterans disabled in service, and the education and training provisions of the Servicemen's Readjustment Act of 1944, which provides educational benefits for veterans generally, whether or not disabled in service. The Office determines the eligibility of veterans, furnishes advisement and guidance to trainees, follows their progress, furnishes funds to State approving agencies responsible for the certification of on-the-job training establishments, and contracts with training institutions for tuition and other charges. Physical examinations for this activity are provided under the medical and hospital activity and the processing of appeals and case investigations under the claims activity.

A summary measure of work load is the average number of veterans in training. The decrease in the work load from 1949 to 1951 of 302,356 represents a decrease of 326,268 in schools of higher learning, a decrease of 231,927 in on-the-job training, a decrease of 2,743 in institutional on-the-farm training, and a decrease of 15,309 in disabled veterans training in schools below the college level, partly offset by an increase of 273,891 in training under the Servicemen's Readjustment Act in schools below the college level.

Average number of veterans in training	1949 actual	1950 estimate	1951 estimate
Under Servicemen's Readjustment Act.....	2,054,616	1,986,000	1,837,000
Vocational rehabilitation trainees.....	217,740	176,500	133,000
<i>Total</i>	2,272,356	2,162,500	1,970,000

VETERANS ADMINISTRATION—Continued

Salaries and Expenses, Veterans Administration—Continued

(d) *Loan guaranty.*—The Loan Guaranty Service administers the loan guaranty provisions of the Servicemen's Readjustment Act, which includes the issuance of certificates of loan guaranty or insurance, the payment to lenders for the veterans' account of 4 percent of the amount guaranteed or insured, the servicing of loans to effect cures on reported defaults, the payment of claims of lenders on defaulted loans, and, where necessary to protect the Government's interest, the acquisition, management, and disposal of property. Appeals and the furnishing of legal service, primarily in connection with the acquisition and disposal of property, are provided under the claims activity.

The minor work-load decline from 1950 to 1951 in loans closed is confined to farm and business loans, as the number of home loans guaranteed or insured is expected to be 375,000 in both years. All other work-load items increase because of the higher cumulative number of outstanding loans.

Work units	1949 actual	1950 estimate	1951 estimate
Loans closed.....	279,231	389,000	386,000
Defaults cured.....	39,750	54,840	62,720
Claims paid.....	5,286	6,000	6,600
Property acquired.....	1,049	2,360	3,655

(e) *Readjustment allowances.*—The Readjustment Allowance Service administers the readjustment-allowance provisions of the Servicemen's Readjustment Act, which provide for the payment of unemployment and self-employment allowances to veterans. Actual claims taking and payment are handled by the State agencies which process regular unemployment allowances, with the Veterans Administration supplying funds to the States under cooperative agreements. Appeals are processed by the claims activity.

The sharp decline in work-load volume is due to the expiration (in July 1949) of eligibility for all veterans who have been out of service for over 2 years.

Claims paid	1949 actual	1950 estimate	1951 estimate
Unemployment claims.....	22,554,566	6,812,000	2,808,000
Self-employment claims.....	694,087	198,000	64,800
Total.....	23,248,653	7,010,000	2,872,800

(f) *General administration and contact.*—The Contact Service provides information and assistance to veterans and their dependents relative to all programs of the Veterans Administration.

The Administrative Service handles the mail, provides for the central indexing of veterans' records, furnishes tabulating machine service (except for special requirements of certain operating programs), and provides communications, publications, and records services. The records service includes the maintenance of all veterans files (except for insurance files in district offices), and the analysis and disposal of all agency records.

The Office of Finance, in addition to furnishing general supervision to the Finance, Loan Guaranty, and Readjustment Allowance Services, audits field stations, certifies all vouchers (beneficiary, administrative, pay rolls, etc.) to the Treasury Department for payment, maintains accounts and prepares financial reports, maintains a

central control record of loan-guaranty certificates, and handles overpayment cases.

The Office of Personnel maintains a centralized classification service, and provides recruitment, placement, and training services.

Costs for administrative, finance, and personnel activities performed at hospitals and homes are considered a direct charge to the medical, hospital, and domiciliary-care program and are included therein. The major responsibility in connection with procurement is related to the medical, hospital, and domiciliary-care program. Consequently, general supervision is considered as a direct charge to that program. Included under "supply, utility, and real estate" are the following: Personnel engaged in purchasing, recording, storing, and issuing supplies and equipment for central office use and at district, regional, and subregional offices; personnel engaged in maintenance and operation work at nonhospital facilities; and chauffeurs, guards, and repairmen. Also included is the real-estate work (maintenance of records, determinations of space requirements, acquisition and disposal, granting of rights-of-way, etc.) for the entire agency.

Included in general operating expenses are those items of expense not directly allocable to or controllable by the various operating programs, such as transportation, communications, rents, and utility charges, printing and binding, contractual services, supplies and materials, equipment, and alterations and improvements of administrative space. All of such items at hospitals and homes are considered as a direct charge to the medical, hospital, and domiciliary-care program.

DETAIL OF GENERAL ADMINISTRATION AND CONTACT

	1949 actual	1950 estimate	1951 estimate
Contact service.....	\$15,262,621	\$13,199,051	\$12,418,507

APPROPRIATION TEXT

Administration, medical, hospital, and domiciliary services: For necessary expenses of the Veterans' Administration, including maintenance and operation of medical, hospital, and domiciliary services, in carrying out the functions pursuant to all laws for which the Administration is charged with administering, including personal services in the District of Columbia; health-service program as authorized by law (5 U. S. C. 150); purchase of [one hundred and thirty-one] *ninety-four* passenger motor vehicles for replacement only, including one at not to exceed \$3,000; services as authorized by section 15 of the Act of August 2, 1946 (5 U. S. C. 55a); maintenance and operation of farms; recreational articles and facilities at institutions maintained by the Veterans' Administration; expenses incidental to securing employment for war veterans; funeral, burial, and other expenses incidental thereto for beneficiaries of the Veterans' Administration except burial awards authorized by Veterans' Administration Regulation Numbered 9 (a), as amended; aid to State or Territorial homes in conformity with the Act approved August 27, 1888, as amended (24 U. S. C. 134), for the support of veterans eligible for admission to Veterans' Administration facilities for hospital or domiciliary care; [not to exceed \$5,600 for newspapers and periodicals;] *payment of tort claims pursuant to law (28 U. S. C. 2672); and not to exceed \$56,800 \$44,000 for the preparation, shipment, installation, and display of exhibits, photographic displays, moving pictures, and other visual educational information and descriptive material, including the purchase or rental of equipment; \$855,000,000 \$887,800,000, from which allotments and transfers may be made to the Federal Security*

Agency (Public Health Service), the Army, Navy, and Interior Departments, for disbursement by them under the various headings of their applicable appropriations, of such amounts as are necessary for the care and treatment of beneficiaries of the Veterans' Administration: *Provided*, That no part of this appropriation shall be used to pay in excess of one hundred persons engaged in public relations work: *Provided further*, That no part of this appropriation shall be expended for the purchase of any site for or toward the construction of any new hospital or home, or for the purchase of any hospital or home; and not more than [\$3,254,900] \$4,708,000 of this appropriation may be used to repair, alter, improve, or provide facilities in the several hospitals and homes under the jurisdiction of the Veterans' Administration either by contract or by the hire of temporary employees and the purchase of materials: *Provided further*, That hereafter the Administrator shall assign as his representatives, as provided for in the last sentence of section 1100 (a) of the Servicemen's Readjustment Act of 1944 (38 U. S. C. 696f), only such numbers of regional or sectional representatives as he finds necessary to provide for the processing of readjustment allowances in an efficient and economical manner: *Provided further*, That at least one of such representatives shall be assigned to and reside in each State.]

[For an additional amount for "Administration, medical, hospital, and domiciliary services", not exceeding \$15,000,000 of the unobligated balance of funds appropriated for such purposes for the fiscal year 1949, to be transferred to this appropriation: *Provided*, That not exceeding \$1,725,211 of funds available for such purposes during the fiscal year 1950 may be used for the Board of Veterans Appeals.] (3 U. S. C. 43; 5 U. S. C. 17a, 22a, 26a-26b, 29-97, 103a, 103b, 118d-1, 118g, 661-733, 823, 902, 912, 921-922, 931-932, 942a-943a, 947, 949-954; 15 U. S. C. ch. 16; 24 U. S. C. 30, 71-154; 28 U. S. PROGRAM AND PERFORMANCE

These funds cover all compensation (for service-connected disabilities), pensions (for non-service-connected

VETERANS ADMINISTRATION—Continued

Air Force, Army, and Navy Pensions, Veterans Administration—Continued

disabilities), and allowances authorized by Congress including reserve and emergency officers' retirement pay and annuities as well as subsistence allowance paid to veterans receiving vocational rehabilitation under the Vocational Rehabilitation Act of 1943, and payments due under the World War I Adjusted Compensation Act in cases where benefits are not covered by the issuance of adjusted service certificates. Beginning in July 1950 payments to Army and Air Force Reserve officers for disability retirements, involving approximately 30,000 cases, will be made by the Department of Defense.

The amount for 1950 includes an estimated supplemental of \$232,000,000. The need for a supplemental in this administratively uncontrollable appropriation is due to increased case loads beyond those originally provided for in the 1950 appropriation, and increased costs due to legislation enacted by the Eighty-first Congress.

The work load shown is the average number of veterans' cases for which payment was made during 1949 and for which payment is estimated to be made during 1950 and 1951. The actual average payments per veteran's case are shown for 1949 and the estimated average payments for 1950 and 1951. Estimates are based on experience and trends, and have been modified to reflect legislation with effective dates after July 1, 1948, since such legislation was not fully reflected in actual costs in 1949.

OBLIGATIONS BY OBJECTS

Pensions, annuities, and insurance losses—1949, \$2,080,397,582; 1950, \$2,165,171,892; 1951, \$2,237,000,000.

APPROPRIATION TEXT

[Pensions] *Compensation and pensions:* For the payment of compensation, pensions, gratuities, and allowances (including subsistence allowances authorized by part VII of Veterans Regulation 1a, as amended), authorized under any Act of Congress, or regulation of the President based thereon, including emergency officers' retirement pay and annuities, the administration of which is now or may hereafter be placed in the Veterans' Administration, and for the payment of adjusted-service credits as provided in sections 401 and 601 of the Act of May 19, 1924, as amended (38 U. S. C. 631 and 661), **[\$1,998,801,000]** \$2,237,000,000, to be immediately available and to remain available until expended. (10 U. S. C. 1091a; 34 U. S. C. 696-697, 1036a; 38 U. S. C. 11a-2, 21-583, 700-740, foll. ch. 12, V. R. 1 (a), part VII; 42 U. S. C. 410; Act of June 20, 1949, Public Law 108; Act of Aug. 1, 1949, Public Law 194; Act of Aug. 1, 1949, Public Law 195; Independent Offices Appropriation Act, 1950.)

Appropriated 1950, **\$1,998,801,000** Estimate 1951, • **\$2,237,000,000**

* Excludes \$75,919,824 for activities transferred in the estimates to "Retired pay, Army, Navy, Marine Corps, and Air Force—civil functions, Department of Defense." The amounts obligated in 1949 and 1950 are shown in the schedule as comparative transfers.

Readjustment Benefits, Veterans Administration—

Excess of obligations incurred over appropriations.....	31, 849, 163		
Total obligations.....	3, 257, 717, 057	2, 876, 653, 837	2, 610, 000, 000

PROGRAM AND PERFORMANCE

These funds are to cover the costs of the various benefits to veterans of World War II authorized by the Servicemen's Readjustment Act of 1944, which include: The cost of subsistence, tuition, and supplies and equipment for veterans pursuing courses of training; guaranty, claims, and property acquisition costs on veterans' loans; and the payment of readjustment (unemployment and self-employment) allowances to veterans who are eligible. The 1950 column includes an estimated supplemental of \$711,000,000. The need for a supplemental in this administratively uncontrollable appropriation is due to increased loads beyond those originally provided for in the 1950 appropriation.

1. *Education and training.*—Load forecasts of trainees are based upon an analysis of trends in each of the four major categories of training, as follows:

Average number of trainees, Servicemen's Readjustment Act	1949 actual	1950 estimate	1951 estimate
Institutions of higher learning.....	741, 208	603, 000	440, 000
Institutions below the college level.....	662, 109	824, 000	936, 000
On-the-job training.....	378, 729	265, 000	192, 000
On-the-farm training.....	272, 570	294, 000	269, 000
Total.....	2, 054, 616	1, 986, 000	1, 837, 000

While college and on-the-job training have been declining, the number of on-the-farm trainees has been rising steadily and the number of trainees in institutions below the college level (trade, vocational, and secondary schools) has been rising rapidly. All forecasts assume continuation of present trends, except that on-the-farm training is expected to reach its peak in 1950.

While not all veterans in training receive subsistence (some veterans are engaged in training for less than 25 percent of a full-time course), it has been found most

practical to relate subsistence allowances to the average total number of veterans enrolled, and average costs derived on this basis have been extended through 1950 and 1951. Single veterans in full-time training receive \$75 a month; with one dependent, the allowance is \$105, and with more than one the allowance is \$120.

Tuition costs are related to the average number of veterans enrolled in institutional and on-the-farm training, while supplies and equipment are, like subsistence, related to the average total number of veterans enrolled.

2. *Loan guaranty.*—Load forecasts for 1950 are based on recent monthly trends, which have been affected by a number of factors, among them lower housing costs, Government support of the mortgage market through operations of the Reconstruction Finance Corporation, and some easing of interest rates, which has increased the attractiveness of 4-percent mortgages as investments. For 1951, it is assumed that real-estate loans guaranteed or insured will continue at the 1950 rate, with small decline in line with experience on farm and business loans. Guaranty losses and property acquisitions are forecast to increase as the cumulative total of outstanding guaranteed loans rises, at rates of increase which are supported by experience trends.

3. *Readjustment (unemployment and self-employment) allowances.*—Load forecasts for 1950 and 1951 reflect the expiration of the eligibility of most veterans in July of 1949, and are related to the numbers of veterans who have been discharged from service for less than 2 years. Unemployment allowances are paid weekly, and self-employment allowances are paid monthly.

WORK LOAD BY ACTIVITIES

APPROPRIATION TEXT

Readjustment benefits: For the payment of benefits to or on behalf of veterans as authorized by titles II, III, and V, of the Servicemen's Readjustment Act of 1944, [**\$2,197,503,000**] *\$2,610,000,000*, to be immediately available and to remain available until expended: *Provided*, That no part of this appropriation for education and training under title II of the Servicemen's Readjustment Act, as amended, shall be expended for tuition, fees, or other charges, or for subsistence allowance, for any course elected or commenced by a veteran on or subsequent to July 1, 1948, and which is determined by the Administrator to be avocational or recreational in character. For the purposes of this proviso, education or training for the purpose of teaching a veteran to fly or related aviation courses in connection with his present or contemplated business or occupation shall not, in the absence of substantial evidence to the contrary, be considered avocational or recreational when a certificate in the form of an affidavit supported by corroborating affidavits by two competent disinterested persons, has been furnished by a physically qualified veteran stating that such education or training will be useful to him in connection with earning a livelihood: *Provided further*, That no part of this appropriation for education and training under title II of the Servicemen's Readjustment Act, as amended, shall be expended subsequent to the effective date of this Act for subsistence allowance or for tuition, fees, or other charges in any of the following situations:

(1) For any veteran for a course in an institution which has been in operation for a period of less than one year immediately prior to the date of enrollment in such course unless such enrollment was prior to the date of this Act;

(2) For any course of education or training for which the educational or training institution involved has no customary cost of tuition, until a fair and reasonable rate of payment for tuition, fees, or other charges for such course has been determined. In any case in which one or more contracts providing a rate or rates of tuition have been executed for two successive years, the rate established by the most recent contract shall be considered to be the customary cost of tuition notwithstanding the definition of "customary cost of tuition" as hereinafter set forth. If the Administrator finds that any institution has no customary cost of tuition he shall forthwith fix and pay or cause to be paid a fair and reasonable rate of payment for tuition, fees, and other charges for the courses offered by such institution. Any educational or training institution which is dissatisfied with a determination of a rate of payment for tuition, fees, or other charges under the foregoing provisions of this paragraph shall be entitled, upon application therefor, to a review of such determination (including the determination with respect to whether there is a customary cost of tuition) by a board to be known as the "Veterans' Tuition Appeals Board" consisting of three members, appointed by the Administrator for such purpose. Such board shall be subject, in respect to appointment, hearings, appeals, and all other actions and qualifications, to the provisions of sections 5 to 11, inclusive, of the Administrative Procedure Act, approved June 11, 1946, as amended. The decision of such board with respect to all matters shall constitute the final administrative determination. In no event shall the board fix a rate of payment in excess of the maximum amount allowable under the Servicemen's Readjustment Act, as amended. The term "customary cost of tuition" as employed herein and in paragraph 5, part VIII, Veterans Regulation Numbered 1 (a), as amended, is regarded as that charge which an educational or training institution requires a nonveteran enrollee similarly circumstanced to pay as and for tuition for a course, except that the institution (other than a nonprofit institution of higher learning) is not regarded as having a "customary cost of tuition" for the course or courses in question in the following circumstances:

(a) Where the majority of the enrollment of the educational and training institution in the course in question consists of veterans in training under Public Laws 16 and 346, Seventy-eighth Congress, as amended; and

(b) One of the following conditions prevails:

1. The institution has been established subsequent to June 22, 1944.

2. The institution, although established prior to June 22, 1944, has not been in continuous operation since that date.

3. The institution, although established prior to June 22, 1944, has subsequently increased its total tuition charges for the course to all students more than 25 per centum.

4. The course (or a course of substantially the same length and character) was not provided for nonveteran students by the institution prior to June 22, 1944, although the institution itself was established before June 22, 1944: *Provided further*, That nothing in the foregoing proviso shall be construed to affect adversely any legal rights which have accrued prior to the date of enactment of this Act, or to affect payments to educational or training institutions under contracts in effect on such date; (12 U. S. C. 1716 (a) (1), 1747 note; 25 U. S. C. 331 note; 38 U. S. C. 693, 694b, 697, foll. ch. 12 V. R. 1 (a), part VIII; Independent Offices Appropriation Act, 1950.)

PROGRAM AND PERFORMANCE

These funds cover payments that are made as a result of contracts with veterans for World War I war risk insurance. Payments are being made to veterans who suffered permanent or total disability as a result of war service or during the postwar period in which they carried this type of insurance. Payments are also being made to beneficiaries of members of the armed forces who died in service or during the postwar period during which this type of insurance was in force. In addition to these direct payments, funds are transferred each year from this appropriation to the United States Government life insurance fund to meet obligations sustained by that fund incident to the extra hazard of military or naval service. The amount for 1950 includes an estimated supplemental of \$695,000. The need for a supplemental in this administratively uncontrollable appropriation is due to case loads beyond those originally provided for in the 1950 appropriation.

Comparative summaries by fiscal years of work load, average costs, and total obligations by the various activities of the program are as follows:

PROGRAM AND PERFORMANCE

This appropriation is used to finance the construction of new hospitals and homes and additions to existing hospitals and homes to provide new beds and administrative facilities at hospital sites. Provision also is made for the purchase of portable initial equipment for new hospital and domiciliary beds and for major alteration and renovation of existing hospitals and homes. The program now approved is estimated to cost \$871.5 million, a reduction of \$68 million in the 1950 estimated costs due to declines in construction cost. Appropriations to meet expenditure requirements are estimated to be exhausted before the end of 1951, necessitating an appropriation of \$160 million.

1. *Hospital bed-producing projects.*—Current estimates of cost of \$779.9 million are for the construction of 76 projects to provide 36,804 new beds and the acquisition of

a site at Topeka, Kans., for a 1,000-bed neuropsychiatric hospital:

	New hospitals	Additions to existing hospitals	Total
Beds in:			
Neuropsychiatric hospitals.....	8, 465	1, 064	9, 529
Tuberculosis hospitals.....	1, 200	1, 044	2, 244
General, medical, and surgical hospitals.....	23, 781	950	24, 731
Homes.....	300		300
Total.....	33, 746	3, 058	36, 804

Provision also is made for six projects to adapt facilities to meet current needs.

Of the total program providing 36,804 new hospital beds, Veterans Administration has arranged with the Corps of Engineers, United States Army, to assume responsibility for the construction of 45 of the projects providing 22,346 beds at an estimated cost of \$448.4 million. The remaining 31 projects providing 14,458 beds together with the conversions of existing beds will be constructed by the Veterans Administration at an estimated cost of \$304.5 million. The following table sets forth the status of the hospital bed program, the construction of which is the responsibility of the Veterans Administration:

	1949 actual	1950 estimate	1951 estimate
<i>Number of projects</i>			
Under construction at beginning of year.....	7	11	19
Put under construction during year.....	4	14	5
Completed during year.....	0	6	9
Total completed at end of year.....	0	6	15
Under construction at end of year.....	11	19	15
Not under construction at end of year.....	20	6	1
<i>Number of beds</i>			
Under construction at beginning of year.....	1, 618	3, 008	9, 014
Put under construction during year.....	1, 390	6, 950	3, 500
Completed during year.....	0	944	3, 164
Total completed at end of year.....	0	944	4, 108
Under construction at end of year.....	3, 008	9, 014	9, 350
Not under construction at end of year.....	11, 450	4, 500	1, 000

Of the funds in the amount of \$27 million required for portable initial equipment for approximately 25,000 new hospital beds expected to be completed by January 1, 1952, \$9.7 million are available from prior year balances and \$17.3 million are provided in the 1951 budget.

2. *Non-bed-producing projects.*—Funds available for a program of major alterations, improvements, and renovation of existing hospitals and homes now total \$91.6 million. Also included in this amount is \$1.3 million for a new regional office building currently under construction at the Veterans Administration hospital at Wichita, Kans. The status of the work is set forth in the following table:

DOLLAR VALUE OF CONSTRUCTION
[In millions]

	1949 actual	1950 Budget	1951 estimate
Completed prior to 1949.....	\$14. 5		
Under construction at beginning of year.....	7. 6	\$5. 2	\$3. 8
Put under construction during year.....	10. 5	15. 4	26. 8
Completed during year.....	12. 9	16. 8	27. 0
Total completed at end of year.....	27. 4	44. 2	71. 2
Under contract at end of year.....	5. 2	3. 8	3. 6
Not under contract at end of year.....	59. 0	43. 6	16. 8

In view of the backlog of work yet to be started no additional funds have been included for a new 1951 non-bed-construction program.

VETERANS ADMINISTRATION—Continued

Hospital and Domiciliary Facilities, Veterans Administration—Con.

Of the funds in the amount of \$800,000 required for portable initial equipment for non-bed-producing projects \$300,000 are available from prior year balances and \$500,000 are provided in the 1951 budget.

PROGRAM AND PERFORMANCE

The National Service Life Insurance Act of 1940 provides that the Government shall reimburse the national service life insurance trust fund for payments made by the trust fund for reason of the extra hazards of military or naval service, to meet claims for gratuitous insurance, and to cover the cost of waiver of recovery of erroneous payments or overpayments.

In addition, certain veterans who fail to meet the standards of insurability under the act are eligible to enter into insurance contracts. In those cases, premiums are payable to this appropriation and all losses suffered are payable from it.

The amount shown for gratuitous insurance claims in 1950 and 1951 excludes an undetermined number of cases arising out of World War II operations in the Philippine Islands. It is estimated that a supplemental appropriation of \$25,000,000 for 1950 will be required in addition to the amounts shown in these schedules.

WORK LOAD BY ACTIVITY

Total available for obligation.....	101,787,007	100,289,494	71,100,000
Balance available in subsequent year.....	-359,494	-----	-----
Total obligations.....	101,427,513	100,289,494	71,100,000

PROGRAM AND PERFORMANCE

These funds cover the cost of allowances for burial expenses of veterans, tuition, supplies, and equipment for disabled veteran trainees, and housing grants for certain seriously disabled veterans. A supplemental amount of \$24,600,000 in 1950 is necessary for this administratively uncontrollable appropriation because of legislation enacted by the Eighty-first Congress and case loads greater than originally provided for in the 1950 appropriation.

1. *Burial allowances.*—Payments of not to exceed \$150 plus certain other costs are authorized to be paid for the funeral and burial expenses of deceased veterans. The increase forecast for 1950 and 1951 is based on the upward trend apparent for the last several years.

2. *Vocational rehabilitation for disabled veteran trainees.*—This activity experienced an actual average training load of 217,740 veterans during fiscal year 1949. It is estimated on the basis of past trends that the work load will average 176,500 and 133,000 during fiscal years 1950 and 1951, respectively.

The unit for determining costs of tuition is the average number of veterans in institutional and on-the-farm training, while the unit for determining costs of supplies and equipment is the average number of veterans in all types of training. Average costs derived on this basis have been extended through fiscal years 1950 and 1951.

3. *Housing grants for disabled veterans.*—This activity provides for assistance to veterans with specified permanent and total service-connected disabilities in acquiring suitable housing. Under the original law (Public Law 702, 80th Cong.), funds were provided to cover the cost of claims filed by veterans with spinal cord injuries which resulted in paralysis of the legs and lower part of the body. Public Law 286 (81st Cong.) now provides for the same type of assistance in acquiring suitable housing, but broadens the scope of eligibility for this benefit. It is estimated that under the new law an additional 2,200 veterans will qualify for assistance.

Grants to the Republic of the Philippines, Veterans Administration—

FUNDS AVAILABLE FOR OBLIGATION: Appropriation or estimate—1950, \$12,685,000; 1951, \$3,285,000.

PROGRAM AND PERFORMANCE

Funds available in this appropriation are to make grants to the Republic of the Philippines for (a) the construction and equipping of hospitals, and (b) provision of treatment and medical care for Philippine veterans eligible under Public Law 865, Eightieth Congress. The appropriation for 1950 provides \$9.4 million for the construction of a 1,000-bed general hospital. Included in both the 1950 appropriation and the 1951 budget is \$3.3 million to make grants for the medical care and treatment of an average daily load of 1,250 patients.

Account outside the Treasury:

Operation of Canteens, Revolving Fund, Veterans Administration—

PROGRAM AND PERFORMANCE

The purpose of the Veterans Canteen Service is to furnish at reasonable prices articles of merchandise and services essential to the comfort and well-being of veterans of the Armed Forces of the United States in hospitals and homes of the Veterans Administration. No appropriation will be required for the operation of the Veterans Canteen Service during fiscal year 1951. The Congress has appropriated a total of \$4,965,000 to be administered as a revolving fund for the operation of the Veterans Canteen Service. It is contemplated that \$1,465,000 in excess funds will be returned to the Treasury in the fiscal year 1950 and an additional \$500,000 at the end of the fiscal year 1951 (38 U. S. C. 13-13g).

PROGRAM AND PERFORMANCE

Purchase of automobiles and other conveyances is authorized for disabled veterans of World War II who are entitled to compensation (service-connected disability) for the loss, or loss of use, of one or both legs.

In 1950 there remains a balance of \$585,134 which will provide 368 vehicles for veterans who are still in service hospitals or who have experienced an increasing disability subsequent to initial disallowance. The vehicles include necessary special attachments and devices.

PROGRAM AND PERFORMANCE

Under the Soldiers' and Sailors' Civil Relief Act of 1940, premiums becoming due for commercial private life insurance policies could be charged as a loan against the policy while the insured was in service and for 2 years after discharge. The Government guarantees the insurance company the repayment of any indebtedness not liquidated by the insured himself, but any payment made by the Government is a debt owed the Government by the insured. The work load is expected to decline since the majority of those covered have now been out of service for over 2 years.

PROGRAM AND PERFORMANCE

Advances to this account were used (a) to cover the cost of transporting employees and their household effects in connection with the transfer of insurance functions from New York City to Washington, D. C., and (b) to finance

research and development work on artificial limbs and sensory aids by the National Academy of Sciences.

OBLIGATIONS BY ACTIVITIES

APPROPRIATION TEXT

No part of the foregoing appropriations shall be available for hospitalization or examination of any persons except beneficiaries entitled under the laws bestowing such benefits to veterans, unless reimbursement of cost is made to the appropriation at such rates as may be fixed by the Administrator of Veterans' Affairs. (*Independent Offices Appropriation Act, 1950.*)

Total, Veterans Administration, annual definite appropriations:

Appropriated 1950, \$5,610,519,000 Estimate 1951, \$6,007,615,000

Permanent indefinite appropriations, special accounts:

Military and Naval Insurance, Premiums on Term Insurance, Veterans Administration—

FUNDS AVAILABLE FOR OBLIGATION	1949 actual	1950 estimate	1951 estimate
Appropriation or estimate.....	\$337, 049		
Payment to "Military and naval insurance, Veterans Administration".....	-337, 049		
Total obligations.....			

PROGRAM AND PERFORMANCE

As unpaid premiums for term insurance held as liens against converted insurance are collected from the face value of matured converted policies, they are credited to this fund and eventually transferred to "Military and naval insurance, Veterans Administration." No such collections are anticipated for 1950 or 1951.

National Service Life Insurance, Premium Receipts, Veterans Administration—

FUNDS AVAILABLE FOR OBLIGATION	1949 actual	1950 estimate	1951 estimate
Appropriation or estimate.....	\$418, 676	\$424, 310	\$382, 320
Payment to "National service life insurance, Veterans Administration".....	-418, 676	-424, 310	-382, 320
Total obligations.....			

PROGRAM AND PERFORMANCE

Certain veterans who fail to meet the standards of insurability under the National Service Life Insurance Act are nevertheless eligible to enter into insurance contracts. In those cases premiums are payable to the national service life insurance appropriation and all losses are payable from it.

To segregate these receipts properly on the books of the Treasury, all premiums are first credited to this account, and the total amounts received are periodically transferred to the national service life insurance appropriation, where they are available for the payment of claims.

APPROPRIATION OR ESTIMATE

Appropriated (estimate) 1950, **\$424,310** Estimate 1951, **\$382,320**

Payments from Proceeds of Sales, Motor Propelled Vehicles, Etc., Veterans Administration—

FUNDS AVAILABLE FOR OBLIGATION: Appropriation or estimate—1949, \$48,671; 1950, \$20,000; 1951, \$20,000.

PROGRAM AND PERFORMANCE

The proceeds of sales of vehicles, equipment, accessories, and other items, the exchange of which is authorized by law, may be applied in whole or in part payment for the purchase of similar items. Receipts from this source are set up in a special appropriation account and are available for the replacement of similar items to the end of the fiscal year following the year in which the sale is made; unused balances are adjusted to miscellaneous receipts (5 U. S. C. 118d-1).

OBLIGATIONS BY ACTIVITIES

Purchase of motor propelled vehicles, etc.—1949, \$48,671; 1950, \$20,000; 1951, \$20,000.

OBLIGATIONS BY OBJECTS

09 Equipment—1949, \$48,671; 1950, \$20,000; 1951, \$20,000.

APPROPRIATION OR ESTIMATE

Total investments held at end of year	5,563,000	5,338,000	5,127,000

PROGRAM AND PERFORMANCE

This fund was established in order that adjusted service certificates issued to veterans of World War I could be paid at maturity. The law was subsequently modified to provide for payment before maturity, and only a small proportion of the certificates remains unpaid (38 U. S. C. 646-647).

OBLIGATIONS BY ACTIVITIES

Payments of World War I adjusted service certificates—1949, \$583,263; 1950, \$530,697; 1951, \$475,000.

OBLIGATIONS BY OBJECTS

PROGRAM AND PERFORMANCE

This fund represents accumulated benefits of operations of stores, hotels, restaurants, and canteens and rental from concessions; gifts and bequests and proceeds of property left in the care of the homes by former members; unpaid pension money standing to the credit of members of the homes who die leaving no heirs or next of kin and without having disposed of their estate by will. Such funds are available for construction of chapels, amusement halls, and for other purposes designed to promote the comfort and welfare of the veterans at the various hospitals and homes in cases where no general appropriation is available. (24 U. S. C. 111, 136, 139; 31 U. S. C. 725s; 38 U. S. C. 17-17j; 38 U. S. C. 14-14e).

PROGRAM AND PERFORMANCE

All premiums paid for national service life insurance and the earned interest are deposited in the national service life insurance trust fund. This fund bears the liabilities under insurance outstanding including payment of dividends and the refunds of unearned premiums to the policyholders. Payments are made in accordance with awards by the Administrator. The fund is reimbursed for payments on death or disability claims which are traceable to the extra hazard of military or naval service.

To the greatest possible extent consistent with special provisions of law, the fund is operated on a commercial basis, except that no administrative expenses are charged to it, and the Secretary of the Treasury invests the amounts held in reserve and as surplus. Financial statements for the 1948 calendar year follow. The schedules of obligation by activities reflect the payment of the initial dividend during the last half of 1950. This payment is scheduled to start January 1950, and is estimated to total \$2.8 billion.

Total obligations.....	20,103	126,323	378,000

PROGRAM AND PERFORMANCE

Under the provisions of the Servicemen's Readjustment Act of 1944, the Administrator is given authority to effect administrative determinations necessary to safeguard the interest of the Government in the guaranteeing of loans, the payment of claims arising from these, and the disposition of properties acquired. On all sales of acquired property for less than full-cash consideration, the contract of sale must provide for periodic collection of tax and insurance accruals. Such collections are deposited in this fund and subsequently used to defray tax and insurance charges as they mature.

OBLIGATIONS BY ACTIVITIES

Payment of taxes and insurance premiums—1949, \$20,103; 1950, \$126,323; 1951, \$378,000.

Balance available in subsequent year.....	-22,639		
Total obligations.....	43,813	22,639	

PROGRAM AND PERFORMANCE

The Administrator, under the Armed Forces Leave Act of 1946, accepted assignment of any armed forces leave bond for payment of premiums or payment of a policy loan made prior to July 31, 1946, on a United States Government or national service life insurance policy. The act was subsequently amended to provide that such bonds were redeemable at any time after September 1, 1947. The balance in this fund represents leave bonds assigned but not applied to premiums or to policy loans, and not yet claimed by the owners.

OBLIGATIONS BY ACTIVITIES

Refunds to veterans upon demand—1949, \$43,813; 1950, \$22,639.

OBLIGATIONS BY OBJECTS

Total investments held end of year.....	1,318,000,000	1,299,000,000	1,318,500,000

PROGRAM AND PERFORMANCE

All premiums paid on account of insurance converted under the World War (I) Insurance Act are deposited to the credit of this fund and are available for the payment of losses, dividends, refunds, and other benefits provided for under such insurance, including such liabilities as shall have been or shall hereafter be reduced to judgment in a district court of the United States.

In addition to premium receipts and interest, the fund is reimbursed by transfer from the military and naval insurance appropriation for losses suffered by the trust fund by reason of the extra hazard of military or naval service.

To the greatest possible extent consistent with special provisions of law, the fund is operated on a commercial basis, except that no administrative expenses are charged to it, and the Secretary of the Treasury invests the amounts held in reserve and as surplus. Financial statements for the 1948 calendar year follow. The schedules of obligation by activities reflect the payment of a special dividend early in 1950 of approximately \$40,000,000 (31 U. S. C. 725s; 38 U. S. C. 511-518, 805a).

PROGRAM AND PERFORMANCE

The war claims fund consists of moneys representing the value of enemy assets held by the Office of Alien Property of the Department of Justice. Funds are transferred or advanced to other accounts for payment of certain claims arising out of World War II and for administrative expenses in connection therewith.

APPROPRIATION OR ESTIMATE

Payment of War Claims, War Claims Commission and Federal Security Agency—

FUNDS AVAILABLE FOR OBLIGATION: Transferred from “War claims fund”—1950 \$17,052,000; 1951, \$55,552,000.

PROGRAM AND PERFORMANCE

Sums transferred from the war claims fund are used to pay the following classes of claims arising out of World War II: (1) Certain claims of employees of United States contractors for injury, death, or detention benefits; (2) claims of American civilian internees for detention benefits; (3) claims of certain prisoners of war, including many Filipino veterans, for compensation for food deficiencies; (4) claims of religious organizations for reimbursement for relief supplies.

OBLIGATIONS BY ACTIVITIES

Payment of claims—1950, \$17,052,000; 1951, \$55,552,000.

OBLIGATIONS BY OBJECTS

13 Refunds, awards, and indemnities—1950, \$17,052,000; 1951, \$55,552,000.

APPROPRIATION TEXT

PAYMENT OF CLAIMS

For payment of claims, as authorized by the War Claims Act of 1948, from funds deposited in the Treasury to the credit of the war claims fund created by section 13 (a) of said Act, such sums as may be necessary, to be available to the Secretary of the Treasury for payment of claims under sections 4 (a), 4 (b) (2), 5 (e), 6 (b), and 7 of said Act to the payees named and in the amounts stated in certifications by the War Claims Commission and the Federal Security Administrator or their duly authorized representatives, which certifications shall be in lieu of any vouchers which might otherwise be required: *Provided*, That this appropriation shall not be available for administrative expenses. (*Third Deficiency Appropriation Act, 1949.*)

Total obligations.....	-----	305,750	800,000

PROGRAM AND PERFORMANCE

The War Claims Commission was activated in September 1949 to adjudicate and to certify to the Treasury for payment from the war claims fund (described above) internee, prisoner of war, and religious organization claims. The Commission estimates that it will receive 275,000 valid claims, amounting to about \$120,000,000, by March 1, 1951, the statutory deadline for filing claims. It is expected that the great majority of these claims will be adjudicated by the end of 1951.

In addition, the Commission is to prepare a comprehensive report on the over-all problem of claims arising from World War II. This report is due on March 31, 1950; but, in view of the delay in the organization of the Commission, legislation is being proposed to extend the due date for the report to January 3, 1951.

APPROPRIATION TEXT

ADMINISTRATIVE EXPENSES

For expenses necessary [during the fiscal year 1950] for the War Claims Commission, including personal services in the District of Columbia; travel; printing and binding; purchase of one passenger motor vehicle; services as authorized by section 15 of the Act of August 2, 1946 (5 U. S. C. 55a); expenses of attendance at meetings concerned with the purposes of this appropriation; and advances or reimbursements to other Government agencies for use of their facilities and services in carrying out the functions of the Commission; [\$300,000] \$800,000, to be derived from the war claims fund created by section 13 (a) of the War Claims Act of 1948 (Public Law 896, approved July 3, 1948). (*Third Deficiency Appropriation Act, 1949.*)

SEC. 102-A. No part of any appropriation contained in this title for the Atomic Energy Commission shall be used (a) to confer a fellowship on any person who advocates or who is a member of an organization or party that advocates the overthrow of the Government of the United States by force or violence or [with respect to whom the Commission finds, upon investigation and report by] (b) to confer a fellowship involving access to restricted data (as defined in the Atomic Energy Act of 1946, as amended) on any person until the Federal Bureau of Investigation shall have made an investigation and report to the Commission on the character, associations, and loyalty of [whom, that reasonable grounds exist for belief that such person is disloyal to the Government of the United States] such individual, and the Commission shall have determined that permitting such person to have access to restricted data will not endanger the common defense or security: *Provided*, That for the purposes of clause (a) above an affidavit shall be considered prima facie evidence that the person making the affidavit does not advocate, and is not a member of an organization that advocates, the overthrow of the Government of the United States by force or violence: *Provided further*, That any person who advocates or who is a member of an organization or party that advocates the overthrow of the Government of the United States by force or violence and accepts employment or a fellowship the salary, wages, stipend, grant, or expenses for which are paid from any appropriation contained in this title shall be guilty of a felony and, upon conviction, shall be fined not more than \$1,000 or imprisoned for not more than one year, or both: *Provided further*, That the above penal clause shall be in addition to, and not in substitution for, any other provisions of existing law.

SEC. 103. Where appropriations in this title are expendable for travel expenses of employees and no specific limitation has been

INDEPENDENT OFFICES—GENERAL PROVISIONS—Continued

placed thereon, the expenditures for such travel expenses may not exceed the amount set forth therefor in the budget estimates submitted for the appropriations.

SEC. 104. Where appropriations in this title are expendable for the purchase of newspapers and periodicals and no specific limitation has been placed thereon, the expenditures therefor under each such appropriation may not exceed the amount of \$50: *Provided*, That this limitation shall not apply to the purchase of scientific, technical, trade, or traffic periodicals necessary in connection with the performance of the authorized functions of the agencies for which funds are herein provided.]

SEC. 105. No part of any appropriation contained in this title shall be available to pay the salary of any person filling a position, other than a temporary position, formerly held by an employee who has left to enter the armed forces of the United States and has satisfactorily completed his period of active military or naval service and has within ninety days after his release from such service or from hospitalization continuing after discharge for a period of not more than one year made application for restoration to his former position and has been certified by the Civil Service Commission as still qualified to perform the duties of his former position and has not been restored thereto.

SEC. 106. Appropriations contained in this title, available for expenses of travel, shall be available, when specifically authorized by the head of the activity or establishment concerned, for expenses of attendance at meetings of organizations concerned with the function or activity for which the appropriation concerned is made; and shall be available for the examination of estimates of appropriations and activities in the field.

SEC. 107. No part of any appropriation or fund contained in this title shall be available for installing or maintaining systems for administrative appropriation, fund, or inventory accounting except such systems as are prescribed or approved by the Comptroller General: *Provided*, That all agencies, for whose activities provision is made in this title, shall hereafter maintain fiscal-accounting control of all inventories of supplies, materials, or equipment which may be owned by or be in the custody of such agencies.

SEC. 108. No part of any appropriations made available by the provisions of this title shall be used for the purchase or sale of real estate or for the purpose of establishing new offices outside the District of Columbia: *Provided*, That this limitation shall not apply to programs which have been approved by the Congress and appropriations made therefor.

SEC. 109. All agencies provided for in this title shall furnish an administrative break-down of the costs of personnel and other obligations in the District of Columbia and in the field in such detail as the Subcommittees on Independent Offices Appropriations of the Committees on Appropriations of the Senate and the House of Representatives may direct.

SEC. 110. No part of any appropriation contained in this title shall be used to pay the compensation of any employee engaged in personnel work in excess of the number that would be provided by a ratio of one such employee to one hundred and fifteen, or a part thereof, full-time, part-time, and intermittent employees of the agency concerned: *Provided*, That for purposes of this section employees shall be considered as engaged in personnel work if they spend half-time or more in personnel administration consisting of direction and administration of the personnel program; employment, placement, and separation; job evaluation and classification; employee relations and services; training; committees of expert examiners and boards of civil-service examiners; wage administration; and processing, recording, and reporting.]

SEC. 111. None of the sections under the head "Independent offices—General provisions" in this title, except section 102, shall apply to [the Housing and Home Finance Agency, the Inland Waterways Corporation, or] the Tennessee Valley Authority. (*Independent Offices Appropriation Act, 1950.*)

¹ Excludes activity on loans and currency transfer guaranties as agent for the Economic Cooperation Administration. Details with regard to these activities are shown under the Economic Cooperation Administration section of the Budget.

PURPOSE AND FINANCIAL ORGANIZATION

The Bank is authorized by the Export-Import Bank Act of 1945 (12 U. S. C. 635), as amended, "to aid in financing and to facilitate exports and imports and the exchange of commodities between the United States or any of its Territories or insular possessions and any foreign country or the agencies or nationals thereof." In carrying out its objectives the Bank is guided by the policy of the Congress as expressed in the act that it should supplement and encourage and not compete with private capital, and that loans, so far as possible consistent with carrying out its purposes, shall generally be for specific purposes, which, in the judgment of the board of directors, offer reasonable assurance of repayment. The Bank may extend loans and guaranties not in excess at any one time of \$3.5 billion. The management of the Bank is fixed in a board of directors consisting of the Secretary of State, ex officio, and four full-time members appointed by the President by and with the advice and consent of the Senate. One of the members of the Board is designated by the President to serve as Chairman. Not more than three of the five directors may be members of any one political party.

ANALYSIS OF BUDGET PROGRAM

The Bank contemplates no substantial changes during the budget period in the nature of its program under its existing legislation. With the completion of its lend-lease termination credits and emergency program for postwar reconstruction credits, the Bank's activity now centers on a single program of general foreign-trade credits intended to assist the foreign trade of the United States. Among the principal factors considered by the Bank in its choice of credits for this purpose are (1) the extent to which the credits will assist United States exporters and importers; (2) the extent to which a credit will aid in expanding the productive capacity or increase the financial and economic stability of the borrowing country; and (3) in areas faced with serious dollar shortages, the extent to which the credit will promote that type of export from the United States and that type of import into a borrowing country which are most likely to result in increased dollar earnings or decrease dollar expenditures in such areas.

The Bank's credits primarily relate to United States exports, since adequate financing facilities are usually available from commercial banks for United States imports. Nevertheless, the Bank is acutely conscious of the necessity for increased United States imports, in order that a more balanced ratio of exports and imports may be brought about at as high a level as possible. In this connection, the Bank examines its choice of credits with a view toward increasing the foreign availability and production for import into the United States of those products vitally needed for use here.

Lend-lease termination credits.—Repayments and interest in 1949 amounted to \$37.8 million and are estimated

at \$37.3 million in 1950 and \$36.8 million in 1951 under this program.

Postwar emergency reconstruction credits.—Repayments and interest in 1949 were \$33 million and are estimated at \$65 million in 1950 and \$71 million in 1951.

General foreign trade credits.—This program is the principal present activity of the Bank. Credits under this program are usually of a specific project nature. Prior to undertaking any such credit the Bank makes a careful economic and financial study of the project and, in all cases where it is pertinent, the engineering and technical aspects of the credit are carefully investigated. Such studies sometimes can be performed adequately from material made available to the Bank in Washington, but in many cases it is essential that the staff examine and study the project first hand in the borrowing country to obtain a better appraisal of its technical production, sales, financial and management aspects. In administering these project loans it has proven desirable to follow these projects in detail during the course of their development and to establish systematic controls. By virtue of the Bank's influence over the undisbursed portion of a credit authorization the Bank can encourage the most effective use of its credit funds. The work load involved in administering credits, after their initial authorization, is becoming considerably more extensive, but the Bank has found the procedure to be eminently worth while. General balance of payments credits for foreign exchange purposes are also part of the Bank's lending program, but the expected number of such credits in the budget period is few.

Loan balances outstanding under this program at the end of 1949 were \$514.3 million and are estimated at \$643.1 million in 1950 and \$782 million in 1951. Disbursements in 1949 were \$176.6 million and are estimated at \$247.1 million in 1950 and \$261.9 million in 1951. Repayments and interest were \$309 million in 1949 and are estimated at \$139.4 million in 1950 and \$166 million in 1951. The large repayment figure in 1949 is accounted for, primarily, by a repayment of a loan to Canada of \$140 million in anticipation of its due dates.

Revolving credits for small exporters and importers.—The Bank makes its facilities available to small United States exporters and importers who are unable to secure necessary assistance from commercial banks and has authorized a revolving credit of \$1 million to which such concerns may have access.

Although the average amount outstanding per account at any one time is small, approximately \$5,000, the total disbursements under these revolving credits in 1949 were approximately \$262,000. Estimated disbursements are \$300,000 for 1950 and 1951.

Repayments and interest in 1949 totaled \$300,000 and are estimated at \$300,000 for 1950 and 1951.

Types of United States goods and services financed by Bank credits.—The accompanying table indicates the value of exports financed during the fiscal year 1949 through the use of the Bank's credits, classified in accordance with commodity classifications of the Department of Commerce.

Classification of goods and services financed for the fiscal year 1949

Commodity	Amount
Animal and animal products, edible.....	\$95,469
Animal and animal products, inedible.....	366,758
Vegetable food products and beverages.....	145,440
Vegetable products, inedible except fiber.....	2,473,344
Raw cotton.....	32,079,902
Tobacco.....	768

Machine tools.....	933,113
Metallurgical mills equipment.....	24,877,644
Construction and handling.....	349,291
Total.....	214,389,604

Import activities.—An increasing level of United States imports is of great concern to the Bank from the viewpoint of assuring future repayments of the Bank's loans, as well as its importance in providing, in the future, for the highest possible level of a more stabilized balance of exports and imports.

Most United States imports do not currently require direct financing by the Bank since the function of financing such goods from the time they are ready for ocean shipment to this country is usually provided adequately by commercial banks. The Bank's primary role in assisting the growth of necessary imports to the United States is to assist in the foreign development and production of those types of commodities and materials which are increasingly needed in the United States. Thus the Bank's import activities are closely interwoven as an integral part of the Bank's general foreign trade credits pertaining to the export of United States capital equipment for productive development in the borrowing countries.

Private capital participation.—The Bank makes every effort that its credits shall supplement and encourage and not compete with private capital. Each credit application is studied to determine whether private credit is available on reasonable terms and, if not available, the extent to which private capital might supplement the Bank's credits. Effort is made to see that equity capital, both United States and foreign, is adequate in such loan projects to private entities. Participation in the Bank's credits by American exporters at their own risk is encouraged in all credits of a type which lend themselves to such participation. In most cases the extent of exporter participation runs from 25 to 33 percent of the total amount of the financing. The Bank has approximately 69 credits or separate projects on its books of this general character at the present time. The Bank also encourages commercial banks to participate at their own risk in Export-Import Bank loans. Sometimes such participation is arranged in company with the participation of American exporters and exporters are encouraged to interest their banks in such participation. In other cases, commercial banks have been encouraged to take, at their own risk, a portion of Government or quasi-Government loans arranged by the Bank. At times it has been possible for the Bank also to sell foreign notes already in its portfolio to commercial banks for investment. The Bank maintains a special division on its staff to provide close contact with the private capital market.

Activities under the Foreign Assistance Acts of 1948 and 1949.—By provisions of the Foreign Assistance Acts of

EXPORT-IMPORT BANK OF WASHINGTON—Con.

1948 and 1949, when it is determined by the Administrator for Economic Cooperation that assistance should be extended to a participating country on credit terms, the Bank makes and administers the credit on terms specified by the Administrator in consultation with the National Advisory Council on International Monetary and Financial Problems, of which the Chairman of the board of directors of the Bank is a member. The Administrator and the Chairman of the board of directors of the Bank have entered into an agreement providing that the Bank will issue as agent for and upon terms specified by the Administrator currency transfer guaranties of foreign investments which are extended under these acts.

Operations of the Bank under the Foreign Assistance Acts are carried on the books of the Bank independently of operations under the Export-Import Bank Act of 1945 as amended. Activity in this connection is shown by the Economic Cooperation Administration elsewhere in the Budget.

Administrative expenses.—The increased work load of administering project-type loans in addition to the passage of pay act increases have necessitated increases in the administrative expense limitations in 1949, 1950, and 1951. In 1949 the Bank was able to save \$8,000 of its total \$864,000 limitation. In 1950 an estimated savings of \$30,000 in the \$950,000 limitation was reduced to \$7,000 as a result of the pay increases embodied in Public Laws 359 and 429. The expenses arising out of these laws plus the continued increase in the work load in administering project-type loans necessitates an increase in the administrative expense limitation in 1951 to \$980,000.

The board of directors feel that it is essential for the proper management and care of the funds entrusted to them to provide for sufficient administrative controls to enforce the best use of its funds and to minimize risks of nonpayment of principal or interest. With net earnings exceeding \$50 million a year and principal repayments as high as \$170 million in 1951, it is highly important that first emphasis be given to the quality and type of loan administration.

FINANCIAL REVIEW

Earnings.—Earnings of the Bank have been steadily increasing, rising from \$10.3 million in fiscal year 1946, the first year of the Bank's operations under its present legislation, to \$47.8 million in 1949 and estimated at \$49.3 million in 1950 and \$51.3 million in 1951. Earnings are computed by deducting from gross interest and commissions earned the sum of all administrative expenses, interest paid on all borrowings from the United States Treasury, and write-offs of defaulted loans, if any.

Net earnings of the Bank are somewhat exaggerated from the point of view of the Bank's operations as a constituent part of the United States Government as a whole. This arises from the fact that the Bank is financed by \$1 billion in stock owned by the United States Treasury on which dividends are not currently being paid. The

Export-Import Bank Act of 1945 as amended states that "net earnings of the Bank after reasonable provision for possible losses shall be used for payment of dividends on capital stock." Until more experience has been gained the board of directors feels it is impossible to determine what possible future losses may be and how these might reduce current earnings. The board of directors have determined that a reasonable reserve for possible future losses has not yet been established, although the Bank has reserved for that purpose all earnings to date. Consequently the interest cost to the United States Treasury of the money invested in the Bank's stock is not reflected in the Bank's operating costs. Funds in excess of the \$1 billion of capital stock are obtained by borrowing from the United States Treasury at a rate of interest "determined by the Secretary of the Treasury, taking into consideration the current average rate on outstanding marketable obligations of the United States as of the last day of the month preceding the issuance of the obligations of the Bank." Had the Bank paid interest to the United States Treasury on all funds used, whether in the form of stock or borrowings, at the rate representing the average cost of those funds to the United States Treasury, net earnings for the Bank in 1949 on that basis would have been \$26.7 million. This net estimated figure would represent the net earnings of the Bank for the account of the United States Government as a whole.

Effect on budgetary expenditures.—In 1949 the Bank's operations resulted in a net credit to the Government budget of \$56.8 million. This result was materially influenced by a repayment by the Dominion of Canada of \$140 million, prior to the maturity date of the loan. It is estimated that the financial operations of the Bank in 1950 will result in a charge on the Government budget of \$71.4 million and approximately \$47.8 million in 1951. The decrease in the Bank's dependence on the annual Government budget is due primarily to increasing repayments of principal. The steady increase in annual earnings of the Bank and in the repayment of principal as provided in existing loan agreements are gradually making the Bank less dependent upon annual charges to the Government budget.

Investment of the United States Government in the Bank.—The United States Treasury owns \$1 billion of capital stock of the Bank. At the close of 1949 the Treasury also held notes of the Bank in the amount of \$913.9 million which it is estimated will be increased to \$985.2 million in 1950 and \$1,033 million in 1951. In accordance with the present policy of the board of directors to reserve all earnings for future possible losses, earned surplus so reserved has been steadily increasing. At the close of 1949, earned surplus reserved for future contingencies was \$154.6 million and it is estimated that this will increase to \$203.9 million in 1950 and \$255.2 million in 1951, if no losses occur and all principal and interest is paid promptly in accordance with loan agreements. The total investment of the United States Government in the stock, notes and earned surplus of the Bank is thus estimated to increase from \$2,068.5 million at the end of 1949 to \$2,189.1 million in 1950 and \$2,288.2 million in 1951.

STATEMENT A.—*Export-Import Bank of Washington: Statement of sources and application of funds*

[Fiscal years ending June 30, 1949, 1950, and 1951]

	1949 actual	1950 estimate	1951 estimate
FUNDS APPLIED			
To acquisition of assets:			
Loans:			
Under authorizations prior to July 1, 1949:			
Emergency reconstruction.....	\$37,508,037	\$2,184,000	\$1,000,000
General foreign trade.....	176,619,309	179,616,000	97,200,000
Small exporter-importer.....	262,258	300,000	300,000
Under new authorizations made subsequent to July 1, 1949.....		67,500,000	164,700,000
Furniture and equipment.....	10,203	6,000	10,000
	\$214,399,807	\$249,606,000	\$263,210,000
To expenses (statement B):			
Interest paid on notes issued to U. S. Treasury.....	12,194,819	14,450,000	15,330,000
Administrative expenses.....	853,274	920,000	950,000
Pay increases.....		23,000	30,000
Nonadministrative expenses.....	4,211	5,000	5,000
	13,052,304	15,398,000	16,315,000
To repayment of borrowings:			
Retirement of notes held by the U. S. Treasury.....	250,200,000	115,600,000	134,000,000
To repayment to agent banks by borrowers.....	38,711,540	35,000,000	40,000,000
To repayment to agent banks by Export-Import Bank.....	44,602,850	5,000,000	5,000,000
	333,514,390	155,600,000	179,000,000
To increase in working capital:			
Cash in Treasury checking accounts.....	125,319		
Other working capital items.....	228,047	1,138,000	925,000
	353,366	1,138,000	925,000
Total funds applied.....	561,319,867	421,742,000	459,450,000
FUNDS PROVIDED			
By realization of assets:			
Repayment of principal of loans:			
Lend-lease sec. 3c.....	22,750,604	21,700,000	21,700,000
Emergency reconstruction.....	2,602,739	4,700,000	35,000,000
General foreign trade.....	250,036,565	113,300,000	113,000,000
Small exporter-importer.....	297,404	300,000	300,000
Sale of loans to commercial banks.....	3,400,000	5,000,000	10,000,000
Sale of equipment.....	3,060		
	279,090,372	145,000,000	180,000,000
By income (statement B):			
Interest earned on loans.....	60,631,515	64,550,000	67,500,000
Service charges and commissions.....	248,061	150,000	150,000
	60,879,576	64,700,000	67,650,000
By borrowings:			
Issue of notes to U. S. Treasury.....	193,500,000	186,900,000	181,800,000
Financing by agent banks to borrowers.....	27,849,919	25,000,000	30,000,000
	221,349,919	211,900,000	211,800,000
By decrease in working capital items: Cash in Treasury checking accounts.....		142,000	
Total funds provided.....	561,319,867	421,742,000	459,450,000
EFFECT ON BUDGETARY EXPENDITURES			
Checking account expenditures:			
Net increase (—) or decrease in checking account balances.....	—\$125,319	\$142,000	
Net repayment of borrowings.....	—56,700,000	71,300,000	\$47,800,000
Adjustment to checks issued basis.....	1,245		
Net effect on budgetary expenditures.....	—\$56,824,074	\$71,442,000	\$47,800,000

APPROPRIATION TEXT

The following corporation is hereby authorized to make such expenditures, within the limits of funds and borrowing authority available to such corporation and in accord with law, and to make such contracts and commitments without regard to fiscal year limitations as provided by section 104 of the Government Corporation Control Act, as amended, as may be necessary in carrying out the program set forth in the Budget for the fiscal year ending June 30, 1951, for such corporation, except as hereinafter provided:

EXPORT-IMPORT BANK OF WASHINGTON

Not to exceed **[\$950,000]** \$980,000 (to be on an accrual basis) of the funds of the Export-Import Bank of Washington shall be available during the current fiscal year for all administrative expenses of the bank, including [not to exceed \$300 for periodicals, \$300 for newspapers, and \$500 for maps;] health-service program as authorized by law (5 U. S. C. 150), and not to exceed \$5,000 for temporary services, as authorized by section 15 of the Act of August 2, 1946 (5 U. S. C. 55a): *Provided*, That necessary expenses (including special services performed on a contract or fee basis, but not including other personal services) in connection with the acquisition, operation, maintenance, improvement, or disposition of any real or personal property belonging to the bank or in which it has an interest, including expenses of collections of pledged collateral, or the investigation or appraisal of any property in respect to which an application for a loan has been made, shall be considered as nonadministrative expenses for the purposes hereof, (12 U. S. C. 635-635h; 12 U. S. C. Sup. 635 (a), 635d, 635f, and 635i; Treasury and Post Office Departments Appropriation Act, 1950.)

Net income for the year.....	\$160,356	\$656,780	\$617,120

PURPOSE AND FINANCIAL ORGANIZATION

The present charter of the Panama Railroad Company provided by Public Law 808, Eightieth Congress, pre-

scribes the powers of the corporation and constitutes the statutory authority for its activities. The Government's capital investment is \$7,000,000, consisting of a nominal \$1 stock and the balance as paid-in surplus. The management of the corporation is vested in a board of directors currently consisting of the Governor of The Panama Canal as president and 12 other persons appointed by the Secretary of the Army. Directors receive no salary for their services on the board.

The board of directors has the power and duty to appraise, at least annually, its necessary working capital requirements for authorized plant replacement and expansion, and to pay into the Treasury as dividends the amount of funds in excess thereof.

The corporation may borrow from a fund of \$10,000,000 established and maintained in the Treasury, for any authorized purposes of the corporation, but for limited periods only. Repayments shall be redeposited in said fund and be available for subsequent loans. No loans have been made from this fund, nor are any contemplated during fiscal years 1950 and 1951.

ANALYSIS OF BUDGET PROGRAMS

The operations of the Panama Railroad Company comprise seven distinct activities: (1) Railroad, (2) harbor terminal facilities, (3) telephone system, (4) Hotels Tivoli and Washington, (5) commissary division, (6) coaling plant, and (7) New York office and steamship line. Statements of income and expenses for each of these activities are presented as schedule B-1.

Basic assumptions.—The estimates for fiscal year 1951 are based on the assumption that prices will be at approximately the July 1949 level and that the general level of business activity on the Isthmus will be somewhat lower than in fiscal year 1949.

The volume of the Company's business is largely dependent upon the activities of the various United States Government agencies in the Canal Zone. World trade conditions also have an important effect upon its operations. The present indications are that Government activity in the Canal Zone will decline during fiscal years 1950 and 1951.

Railroad.—The railroad comprises 50 miles of main line track between the cities of Panama and Colon, at the Pacific and Atlantic terminals of the Canal, and appurtenances such as freight and passenger stations and terminals, railroad yards, industrial trackage, and the rolling stock. The railroad serves The Panama Canal, the United States Army, Navy, and Air Force, and other Government agencies on the Isthmus, and also performs the functions of a common carrier in meeting the needs of the Republic of Panama, and commercial agencies transacting business in this area.

For purposes of administration and accounting, there are also included under this heading the incidental real estate activities of the Company. The income from rentals is nearly all derived from rental of buildings.

The gross revenues from operations of the railroad during the fiscal year 1949 were \$2,106,283 and for 1950 and 1951 are estimated to be \$2,070,000. Primarily as a result of economies which are being effected in maintenance and operating expenses, it is expected that instead of the net loss of \$219,339 in fiscal year 1949, there will be net incomes in fiscal years 1950 and 1951 of \$9,500 and \$1,000, respectively.

Harbor terminal facilities.—The harbor terminal facilities consist of docks, piers, and appurtenances necessary

for handling, transferring, stevedoring, and storing cargo arriving at the Canal Zone ports of Cristobal and Balboa, either for ultimate destination in the Canal Zone or the Republic of Panama, or for transshipment to points beyond.

The gross revenues of the harbor terminals during fiscal year 1949 were \$2,621,919 and are estimated to be \$2,525,000 for each of fiscal years 1950 and 1951.

Operating expenses for fiscal year 1950 are expected to decrease slightly as a result of decreased business and the completion of deferred maintenance projects, and it is estimated that they will amount to \$2,441,300 in that year as compared to \$2,475,531 in fiscal year 1949. Expenses for fiscal year 1951 are estimated to be \$2,429,800, the decrease as compared to fiscal year 1950 being the result of reduced repair and administrative expenses, offset to some extent by increased depreciation charges resulting from the acquisition of new cargo-handling equipment.

The net income of the harbor terminals in 1949 was \$146,388 and it is estimated to be \$83,700 in fiscal year 1950 and \$95,200 in fiscal year 1951.

Telephone system.—The telephone system provides telephone service for The Panama Canal and for the civilian communities in the Canal Zone. It also leases trunk lines, circuits, and duct space to the Departments of the Army and Navy and to the Government of Panama.

Gross revenues of the telephone system are estimated to be less in fiscal year 1950 than they were in 1949 as the result of lower revenues from rental of trunk lines, circuits, and duct space. There will be a slight increase in revenue in 1951 resulting from rental of telephones to be installed about December 1950, after installation of additional line switches in existing exchanges and in the new Cocoli exchange. The net income of the telephone system will be reduced in both fiscal years 1950 and 1951 as a result of increased administrative expenses resulting from a revised allocation of such expenses among the various units of the Company and from depreciation charges on new telephone cables and equipment. Net revenue in fiscal year 1949 was \$15,738 and it is estimated that in fiscal years 1950 and 1951 it will amount to \$3,300 and \$7,400, respectively.

Hotels Tivoli and Washington.—The Hotel Tivoli in Ancon is owned by The Panama Canal but operated by the Panama Railroad Company. The Hotel Washington in Colon is owned and operated by the Panama Railroad Company.

Both hotels are operated even when financial circumstances are unfavorable because of their status as essential adjuncts to The Panama Canal, or, more broadly speaking, to the United States Government in this area. In fiscal year 1949 the net income of the Hotel Tivoli was \$72,528, but operation of the Hotel Washington resulted in a loss of \$70,578.

Business at the Hotel Tivoli has been maintained at a high level by transient guests from commercial airlines. Although business is expected to decline during fiscal years 1950 and 1951, increased rates for rooms and reduced operating expenses are expected to maintain net income at a level somewhat above that for fiscal year 1949. The Hotel Washington has little business from commercial airlines, and it is estimated that it will necessarily continue to operate at a loss. It is estimated that the net income of the Hotel Tivoli will be \$98,400 in 1950 and \$96,400 in 1951, while the Hotel Washington will show a net loss of \$72,700 in 1950 and \$74,900 in 1951. This will result in a net income for the two hotels combined of \$25,700 in 1950 and \$21,500 in 1951.

PANAMA RAILROAD COMPANY—Continued

In a note accessory to the Treaty of 1936 between the United States and the Republic of Panama, the United States agreed that the hotel business proper would be left in the hands of Panamanian industry when suitable hotel accommodations were available in the Republic of Panama. A new, modern hotel is now under construction in Panama City and present indications are that it will be in operation about July 1, 1952. Should the new hotel be placed in operation during fiscal year 1951, important changes in the result of operations of the Hotel Tivoli may be expected.

Commissary division.—The commissary division provides food supplies, clothing, and other essential requirements to Government employees and their families, to establishments of the United States Government located on the Isthmus, and to commercial shipping. In addition to retail stores in Canal Zone communities, the division operates large dry- and cold-storage plants, a bakery, an ice-cream and milk-bottling plant, an industrial laboratory, an ice plant, an abattoir, and a coffee-roasting plant, primarily as processing plants to supply its retail stores. It also operates the Mindi dairy on the Atlantic side and the Ancon laundry on the Pacific side.

Commissary sales totaled \$32,841,765 in fiscal year 1949, and it is estimated that they will amount to \$30,000,000 in each of fiscal years 1950 and 1951. The net revenue of the commissary division in fiscal year 1949 was \$239,988 and it is estimated that it will amount to \$600,000 in each of fiscal years 1950 and 1951 as a result of increased mark-ups.

Coaling plant.—The Panama Railroad Company operates a coaling plant at Cristobal to supply coal to shipping calling at that Atlantic port. In addition to selling coal, the plant derives revenue from vessels docking at the plant pier but not taking coal.

The net revenue of the coaling plant during fiscal year 1949 was \$43,784. Demands for coal from shipping calling at the Canal will probably diminish as coal-burning vessels are withdrawn from service. It is therefore estimated that the net revenue from coaling plant operations will decline to \$16,600 in fiscal year 1950 and to \$6,700 in fiscal year 1951, based on estimated annual sales of 12,000 and 10,000 tons in these fiscal years, respectively, as compared to 16,600 tons in fiscal year 1949.

New York office and steamship line.—The New York office of the Panama Railroad Company is the main office of the Company in the United States. It has direct supervision over and responsibility for the operation of the steamship service and facilities in connection therewith; for the transportation of supplies, material, equipment, and personnel to the Canal Zone; the operation of a commissary purchasing department, and the necessary accounting required in connection with those activities.

The Company's steamship line comprises three identical cargo and passenger steamers of 10,000 gross tons each, built in 1939 at a cost of \$13,200,000, which maintain a weekly service between New York and Cristobal, Canal Zone. The steamship line is an essential adjunct to the operation and maintenance of The Panama Canal, furnishing ocean transportation for the large quantity of goods required by The Panama Canal and by the civilian community in the Canal Zone, and passenger transportation for employees and their families between the Canal Zone and the United States.

The net income from steamship line operations during fiscal year 1949 was \$224,030, and it is estimated that net incomes for fiscal years 1950 and 1951 will amount

to \$143,400 and \$110,800, respectively. The decreased net incomes in fiscal years 1950 and 1951 will be the result of increased cost of maintenance of ships and agency expenses, combined with a decrease in freight transportation. The estimated maintenance expense for fiscal years 1950 and 1951 is approximately \$50,000 higher than in fiscal year 1949 because of estimated increased costs as the ships grow older. There will be a reduction in cost of ship operation because of lower fuel cost.

Administrative expenses.—The administrative expenses of the Company for fiscal year 1951 are estimated as \$829,700, based upon normal administrative control over the operations of the Company. These expenses cover the cost of executive, administrative, accounting, collecting, disbursing, and legal services on the Isthmus, furnished by The Panama Canal on a reimbursable basis; also the salaries in the New York office of the first vice president, the assistant to vice president and secretary, the treasurer, the auditor, and the employees in the administrative office and in the offices of the treasurer and the auditor. Also included are the general office expenses of these officers and employees, the legal expenses in the United States, and the cost of the annual audit by the General Accounting Office.

FINANCIAL REVIEW

Operating results.—During the fiscal year 1949 the operations of the Company as a whole resulted in a net revenue of \$160,356. A dividend of \$500,000 was paid into the Treasury of the United States.

As the result of increased net income from commissary operations and decreased operating expenses in the other activities, particularly in the railroad (although offset in part by decreased gross revenues resulting from a general decline in business activities), it is estimated that the operation of the Company will result in a net income of \$656,780 in fiscal year 1950 and a net income of \$617,120 in fiscal year 1951.

Capital expenditures.—The principal capital expenditures in fiscal year 1950 will be for new motive power for the railroad, presently contemplated as Diesel-powered passenger train equipment, a number of freight cars for the railroad as part of a long-range program of freight car replacements, the construction of quarters for native employees, the replacement of certain cargo-handling equipment for the harbor terminals, a new telephone exchange building at Cocoli, additions to commissary retail store buildings and the acquisition of miscellaneous equipment for the commissary division. It is estimated also that \$200,000 will be expended in connection with a new cold-storage warehouse, ice-cream and milk-bottling plants. In fiscal year 1951, the principal expenditures will be for additional freight cars and cargo-handling equipment, telephone exchange equipment, and laundry and bakery equipment for the commissary division. It is estimated also that an additional \$600,000 will be expended in connection with the cold storage warehouse project. The total cost of this project is presently estimated at \$5,651,200, scheduled for completion in fiscal year 1953. The amounts estimated to be expended for capital acquisitions are shown in schedule A-1.

Retirements of plant and equipment are estimated to amount to approximately \$263,000 in fiscal year 1950 and approximately \$155,000 in fiscal year 1951.

Steamer rehabilitation.—During the war period the Company's three steamships were under requisition by the Government for war service. No charter hire or other direct compensation was received for war service, but the

Company's goods were transported without charge during that period by or at the expense of the War Department. Estimated freight charges on such goods were set up on the Company's books and accumulated as a reserve to cover the cost of postwar rehabilitation of the ships in the amount of \$7,563,854. The rehabilitation of the vessels was completed prior to June 30, 1948, and the total cost, including bills received after that date, amounted to \$10,678,394, of which \$397,500 was capitalized as of June 30, 1948, representing specific improvements to the vessels, leaving a net restoration cost of approximately \$10,280,894 or \$2,717,040 more than the accumulated reserve. The sum of \$2,800,000 was reserved from surplus to cover this excess cost in fiscal year 1948, and in fiscal year 1949, the unexpended balance, amounting to \$82,960, was returned to surplus.

Depreciation and obsolescence.—The total investment of the Company in plant and equipment as of June 30, 1949, before deducting the portion charged off as depreciation, was \$44,639,546 and it is estimated that at the close of fiscal years 1950 and 1951 it will amount to \$45,930,171 and \$47,122,164, respectively. The portion charged off as depreciation (on a straight-line basis) as of June 30, 1949, amounts to \$28,479,133, and it is estimated that it will amount to \$29,266,877 at the close of fiscal year 1950

and \$30,259,613 at the close of fiscal year 1951. The figures for all 3 years include the sum of \$7,075,342 representing a reserve for obsolescence of roadway and track provided in fiscal year 1949 and charged to the Company's surplus.

The financial condition.—The total assets of the Company dropped from \$46,049,940 at the beginning of 1949 to \$37,012,933 at the end of the year, primarily due to the special charge-off applied to roadway and track mentioned above. Assets will remain about \$37,000,000 at the end of the next 2 years.

Liabilities decreased from \$4,083,930 to \$3,356,824 in fiscal year 1949 and are estimated to be \$3,097,537 at the end of 1950 and 1951. The elimination of the rehabilitation reserve for steamers in 1949 and a reduction in accounts payable in 1950 accounts for the major part of the change.

Disposition of surplus.—The surplus at the end of the fiscal year 1949, after adjustments and the payment of the dividend mentioned above, was \$26,656,109. It is estimated that a dividend of \$500,000 will be paid to the United States Treasury in each of the fiscal years 1950 and 1951. It is recommended that the remainder of the cumulative earnings be retained by the Company for use in its operations.

STATEMENT A.—Panama Railroad Company: Statement of sources and application of funds

[Fiscal years ending June 30, 1949, 1950, 1951]

	1949 actual	1950 estimate	1951 estimate
FUNDS APPLIED			
To acquisition of assets (schedule A-1):			
Structures and equipment:			
Railroad.....	\$5,067	\$776,100	\$200,000
Harbor terminals.....	225,560	256,500	99,000
Telephone system.....	36,044	64,168	355,993
Hotel Washington.....	3,301		
Commissary.....	192,719	454,410	692,000
Total acquisition of assets.....	\$462,691	\$1,551,178	\$1,346,993
To expenses (statement B):			
Cost of commodities sold.....	27,986,546	24,381,500	24,400,300
Direct operating costs.....	14,361,877	14,341,775	14,205,575
Pay increases.....		49,800	74,600
Administrative expenses.....	769,231	14,391,575	14,280,175
Pay increases.....		815,000	804,300
		17,000	25,400
Contributions to civil service retirement fund.....	769,231	832,000	829,700

APPROPRIATION TEXT

The following corporation is hereby authorized to make such expenditures, within the limits of funds and borrowing authority available to it in accord with law, and to make such contracts and commitments without regard to fiscal year limitations as provided by section 104 of the Government Corporation Control Act, as may be necessary in carrying out the programs set forth in the Budget for the fiscal year 1951 for such corporation, except as hereinafter provided:

Panama Railroad Company: Not to exceed **[\$815,000]** \$829,700 (to be computed on an accrual basis) of the funds of the company shall be available during the current fiscal year for its administrative expenses, including administrative services performed for the company by other Government agencies, which shall be determined in

accordance with the company's prescribed accounting system in effect on July 1, 1946, and shall be exclusive of depreciation, payment of claims, expenses of the commissary coupon audit, commissary contraband inspection, expenditures which the company's prescribed accounting system requires to be capitalized or charged to cost of commodities acquired, and expenses in connection with acquisition, construction, operation, maintenance, improvement, protection, and disposition of facilities and other property belonging to the company or in which it has an interest. (*Civil Functions Appropriation Act, 1950.*)

Special account:

PROGRAM AND PERFORMANCE

In accordance with section 254 of title 2 of the Canal Zone Code (Public Law 808, 80th Cong.), there has been deposited in the Treasury in fiscal year 1948 the sum of \$10,000,000 to be maintained in the Treasury as a separate fund from which the corporation may borrow, for limited periods, not to exceed \$10,000,000 for any authorized purpose of the corporation. Repayments shall be redeposited in said fund and will be available for subsequent loans. Loans to the corporation from this fund shall not bear interest.

Statement of proposed obligations for purchase and hire of passenger motor vehicles for the fiscal year 1951

PANAMA RAILROAD COMPANY

Appropriation	Motor vehicles to be purchased		Old vehicles to be exchanged		Net cost of vehicles to be purchased	Old vehicles still to be used	Cost of hire of motor vehicles	Public purpose and users
	Number	Gross cost	Number	Allowance (estimated)				
Panama Railroad Company.....						3	\$20,000	The 3 cars owned by the Panama Railroad Company are maintained and operated by The Panama Canal for use of the Governor, who is president of the Panama Railroad Company, and other officials of the Canal and Railroad. General passenger transportation service for all other official use of the Company on the Isthmus is hired from the pool of the motor transportation division of The Panama Canal.

RECONSTRUCTION FINANCE CORPORATION

[Submitted under the Government Corporation Control Act]

PROGRAM HIGHLIGHTS

[In millions of dollars]

	1949 actual	1950 estimate	1951 estimate
Business loans:			
Commitments (direct loans).....	\$224.2	\$328.0	\$276.0
Disbursements (including purchases of participations).....	142.0	234.0	273.1
Receipts.....	58.2	77.5	116.0
Outstanding at June 30.....	376.2	533.3	690.7
Guaranteed and insured mortgages:			
Commitments.....	703.5	1,320.0	1,158.0
Disbursements.....	424.0	1,100.0	1,300.0
Receipts.....	16.7	160.0	310.0
Outstanding at June 30.....	591.8	1,529.0	2,514.7
Production and sales of synthetic rubber:			
Production costs.....	137.9	109.1	103.9
Sales.....	173.4	134.8	130.3
Tin program:			
Production and purchase costs.....	215.6	112.1	62.5
Sales.....	149.6	168.9	84.4
Net gain for the year: Lending program.....	8.1	27.3	39.1

PURPOSE AND FINANCIAL ORGANIZATION

The Reconstruction Finance Corporation (RFC) is authorized to aid in financing agriculture, commerce, and

industry; to encourage small business; to help in maintaining the economic stability of the country; and to assist in promoting maximum employment and production. Pursuant to the provisions of the Reconstruction Finance Corporation Act, as amended, the Corporation is authorized, subject to a limitation of \$3,550,000,000 in loans or commitments made subsequent to June 30, 1947:

1. To purchase the obligations of and to make loans directly or in participation with banks to business enterprises.
2. To make loans to financial institutions.
3. To subscribe for or make loans upon the preferred stock of insurance companies or purchase legally issued notes or debentures of insurance companies, the aggregate of such loans or purchases outstanding at any one time not to exceed \$15,000,000.
4. To purchase the securities of or make loans to public agencies, the aggregate amount of such loans or purchases outstanding at any one time not to exceed \$200,000,000.
5. To make loans deemed necessary or appropriate because of floods or other catastrophes, the aggregate amount of such loans outstanding at any one time not to exceed \$40,000,000.

Federal National Mortgage Association (FNMA), a subsidiary of the Corporation, is authorized to purchase

RECONSTRUCTION FINANCE CORPORATION— Continued

home mortgages insured by the Federal Housing Administration or guaranteed by the Veterans Administration, the aggregate amount of such mortgages committed or outstanding at any one time not to exceed \$2,500,000,000 (Public Law 387, 81st Cong.). In order to aid housing production, the RFC is authorized by the Housing Act of 1948 to make loans to and purchase the obligations of any business enterprise (not to exceed \$50,000,000 outstanding at any one time) for the purpose of providing financial assistance for the production of prefabricated houses or prefabricated housing components, or for large-scale modernized site construction.

In addition to its lending activities the Corporation is engaged in:

1. The manufacture and sale of synthetic rubber, pursuant to the Rubber Act of 1948 (Public Law 469, 80th Cong.) and Executive Order 9942.

2. The refining of tin ores and concentrates at the Texas City tin smelter, the purchase of refined tin, and the sale of refined tin to private industry or transfer to the national stockpile of that portion in excess of a working inventory, as provided by Joint Resolution approved June 28, 1947 (61 Stat. 190) as amended June 29, 1948 (Public Law 824, 80th Cong.).

3. Liquidation of the affairs of the Defense Plant Corporation, Metals Reserve Company, Rubber Reserve Company, Defense Supplies Corporation, Disaster Loan Corporation, Smaller War Plants Corporation, Defense Homes Corporation, The RFC Mortgage Company, U. S. Commercial Company, and War Damage Corporation.

The lending activities of the Corporation are financed by capital stock in the amount of \$100,000,000, issued to and held by the Secretary of the Treasury, the retention of accumulated earned surplus to the extent of \$250,000,000, and borrowings from the Secretary of the Treasury as needed to carry out its functions. All surplus in excess of \$250,000,000 is required to be deposited in the Treasury as miscellaneous receipts.

The synthetic rubber and tin programs and the liquidation of national defense, war, and reconversion activities are financed with funds arising from the operation and liquidation of these programs in accordance with the provisions of the Government Corporations Appropriation Act, 1949. Funds realized from these activities in excess of financial requirements are deposited in the Treasury as miscellaneous receipts.

ANALYSIS OF BUDGET PROGRAMS

The Corporation's budget is presented on a consolidated basis with that of its subsidiary, the Federal National Mortgage Association. Its activities can be grouped into the following broad categories:

1. Lending activities, including the purchase of mortgages insured by the Federal Housing Administration and guaranteed by the Veterans Administration.

2. National defense, war, and reconversion activities:

(a) Production and sale of synthetic rubber.

(b) Production, purchase, and sale of tin.

(c) Liquidation of war and related activities.

(d) Administration and liquidation of assets acquired from Smaller War Plants Corporation.

The estimates contained in the budget are predicated on the general assumptions that present economic conditions will continue through 1951 without appreciable change and that the need for the Corporation's services will not be greater than at present. Provision has been made

in the budget for (1) an increase in total lending authority of the Corporation; (2) an increase in the existing authority of FNMA to purchase home mortgages; (3) an increase in the authority to provide financial assistance for the sale, distribution, and erection of prefabricated houses; (4) continuation of the authority for production and sale of synthetic rubber through June 30, 1951; and (5) enactment of legislation authorizing continuation and expansion of the fiber plantations.

All of the accompanying financial statements and supporting schedules, with the exception of statement D, "Expenditures and receipts," have been prepared on an accrual basis in conformity with the Corporation's system of accounting. Statement D sets forth the Corporation's various programs and transactions on a cash basis under the following headings: "Part I, lending operations"; "Part II, national defense, war, and reconversion activities"; and "Part III, Smaller War Plants Corporation." In the discussion of programs the amounts used will be those shown on statement D.

LENDING OPERATIONS

(See pt. I, statement D)

The major lending activities of the Corporation are discussed in the sections which follow:

Business loans and participations (authority—sec. 4 (a) (1), Public Law 548, 80th Cong.).—The making and servicing of business loans (including direct housing loans made under sec. 4 (a) (1) Reconstruction Finance Corporation Act) constituted one of the major activities of the Corporation in the fiscal year 1949. It is expected that business loans will increase in number and amount during the fiscal years 1950 and 1951. In the following tabulation actual results for the fiscal year 1949 are compared with projections for the two succeeding years (dollar amounts are shown in millions):

	1949 actual		1950 estimate		1951 estimate	
	Number	Amount	Number	Amount	Number	Amount
Direct loans authorized, less cancellations.....	1,981	\$224.2	3,254	\$328.0	3,123	\$276.0
Loans disbursed by Corporation.....	2,185	166.6	2,831	261.4	3,402	302.5
Outstanding at end of year:						
Direct loan commitments undischarged.....	718	145.8	1,621	226.4	1,712	211.0
Disbursed loans outstanding.....	5,181	376.2	6,715	533.3	8,600	690.7

The Corporation anticipates that most of the loans made to business enterprises during the fiscal year 1951 will be made directly to such enterprises. In the past the majority of loans authorized have been in participation with banks, and while the Corporation may still make such loans (sec. 4 (a) of Public Law 548 authorizes up to 70 percent participation in loans amounting to \$100,000 or less, and up to 60 percent in loans which are in excess of that amount), there has been a decreasing demand by banks for participations. This trend is reflected by the following statistics:

Period	Number authorized		Percent of total	
	Direct	Participation	Direct	Participation
Fiscal year, 1948.....	2,134	2,601	45.1	54.9
July-December 1948.....	972	512	65.5	34.5
January-June 1949.....	1,436	573	71.5	28.5
July-August 1949.....	625	213	74.6	25.4

Conversely, there has been an increasing demand by business enterprises for direct RFC loans. Under the Corporation's authority and policy it must be shown that credit is not otherwise available on reasonable terms before a loan is approved. Banks frequently are reluctant to make long-term loans, and an increasing number of businesses that need such credit have, therefore, found it necessary to apply to the Corporation.

In addition to the increase in direct loans, the Corporation has also been called upon to purchase an increasing number of its share of participation loans. Under the participation procedure, banks disburse and service the loan, and in consideration of a fee, the Corporation stands ready to purchase its agreed percentage upon request of the participating bank. During the fiscal year 1948, the Corporation purchased its share in such participations for a total of \$13,188,000. In 1949, such purchases amounted to \$15,730,000, an increase of 19.3 percent. Purchases in the fiscal years 1950 and 1951 are estimated at \$14,000,000 and \$11,100,000, respectively. Since the total number of participation loans has declined by a marked degree, the estimated purchases show a further increase when related to the total outstanding.

Loans to provide financial assistance for the production of prefabricated houses (authority—sec. 102, Public Law 901, 80th Cong.).—To facilitate the production of housing units, the Corporation is authorized to make loans to producers of prefabricated houses or prefabricated housing components and to provide similar assistance to large-scale modernized site construction projects provided that the total of such loans outstanding at any one time does not exceed \$50,000,000. Pending legislation would increase this amount to \$75,000,000, the proposed increase being for the purpose of aiding the distribution of houses produced under this section. Based on experience in this program during the fiscal year 1949, and inquiries made, it is indicated that the full amount contemplated by pending legislation will be committed prior to June 30, 1951. Actual results in 1949 and projections for 1950 and 1951, follow (dollar amounts are shown in millions):

	1949 actual		1950 estimate		1951 estimate	
	Number	Amount	Number	Amount	Number	Amount
Commitments, less cancellations.....	14	\$20.2	60	\$38.0	10	\$25.0
Disbursements.....	6	8.2	50	37.5	28	32.5
Outstanding at end of year:						
Undisbursed commitments.....	8	12.0	18	12.5	5.0
Loans.....	6	8.2	48	41.4	60	67.8

Catastrophe loans (authority—sec. 4 (a) (4), Public Law 548, 80th Cong.).—The Corporation is authorized to make such loans as it may determine to be necessary or appropriate because of floods or other catastrophes. Upon the occurrence of any catastrophe which may result in the need for financing for relief and rehabilitation, personnel of the Corporation are assigned to the disaster area to work with local authorities, relief agencies, and other Federal agencies in the formulation of plans to assist applicants whose properties or businesses have been damaged. Applications are accepted at the scene, and, if approved, disbursement of the proceeds is effected promptly.

During the fiscal year 1949, the Corporation declared 14 localities as disaster areas and disbursed \$2,711,573 in loans. The most serious of these were the Trinity River flood, the earthquake in the State of Washington, and tornadoes in the south central section of the country.

While it is difficult to predict activity under a program of this nature, provision has been made for disbursements of \$1,500,000 in 1950 and \$1,000,000 in 1951 for catastrophe loans.

Loans to aid financial institutions (authority—sec. 4 (a) (2), Public Law 548, 80th Cong.).—The Corporation is authorized to make loans to aid any financial institution organized under the laws of any State or of the United States, and under certain conditions to subscribe for or make loans upon nonassessable preferred stock of insurance companies. No loans of this nature were disbursed in the fiscal year 1949, and such loans are expected to be small in both number and amount in the fiscal years 1950 and 1951. It is estimated that there will be no loans to banks, and loans to insurance companies are estimated at \$8,000,000 and \$2,000,000 in the 2 years, respectively.

The Corporation held as of June 30, 1949, \$122,816,564 of loans, preferred stock, capital notes, and debentures acquired under authority rescinded in Public Law 132, Eightieth Congress. Such holdings are being liquidated as rapidly as conditions permit. It is estimated that \$8,012,382 and \$8,009,300 will be retired during the fiscal years 1950 and 1951, respectively, as compared to \$14,257,917 in the fiscal year 1949.

Public agency loans (authority—sec. 4 (a) (3), Public Law 548, 80th Cong.).—During the fiscal year 1949 the Corporation received 88 applications in the amount of \$126,847,000 for loans to aid in financing public projects, of which 25 resulted in loans aggregating \$27,364,000. However, it is anticipated that the number and amount of such approvals will be substantially greater during the fiscal years 1950 and 1951. It is estimated that authorizations for such loans will amount to \$100,000,000 and \$70,000,000 in the 2 years. Disbursements against such authorizations and undisbursed authorizations outstanding as of June 30, 1949, are estimated at \$20,000,000 and \$50,000,000, respectively.

The largest public agency loan outstanding as of June 30, 1948, was disposed of during the fiscal year 1949 to private investors. While the Corporation follows the practice of attempting to interest private investors in its holdings of loans for public projects, no significant disposals are contemplated in the fiscal years 1950 or 1951, and receipts in those years consist only of scheduled amortizations.

Railroad loans (authority—sec. 4 (a) (1), Public Law 548, 80th Cong.).—As of June 30, 1949, the Corporation had outstanding \$117,246,021 in loans to railroads, most of which was loaned prior to the fiscal year 1949. While it is difficult to foresee the number of instances in which it will be actually necessary to provide such assistance through loans, it is estimated that commitments of \$42,000,000 and \$32,500,000 will be made in the 2 years with estimated disbursements of \$5,000,000 and \$10,000,000, respectively.

Purchase of insured or guaranteed mortgages and direct housing loans (authority—Public Laws 864 and 901, 80th Cong., and Public Laws 52 and 176, 81st Cong.).—Under the terms of the National Housing Act, as amended, FNMA, a subsidiary of the Corporation, is authorized to provide a secondary market for home mortgages, which are insured by the Federal Housing Administration or guaranteed by the Veterans Administration. Purchase of such mortgages increased very materially during the fiscal year 1949 and is expected to increase further during the fiscal years 1950 and 1951.

In addition to the mortgages being purchased under existing authority of the Association, the RFC held, as of

RECONSTRUCTION FINANCE CORPORATION— Continued

June 30, 1949, 23,359 mortgages, in the amount of \$126,648,000, all guaranteed by the Veterans Administration, which were purchased under authority rescinded on June 30, 1947. The following tabulation sets forth actual results under both programs in the fiscal year 1949, together with projections for the fiscal years 1950 and 1951 (dollar amounts are stated in millions):

	1949 actual	1950 estimate	1951 estimate
Commitments to purchase (less cancellations):			
Insured by FHA.....	\$369.5	\$167.0	\$153.0
Guaranteed by VA.....	334.0	1,163.0	1,005.0
Purchases:			
Insured by FHA.....	297.5	252.0	240.0
Guaranteed by VA.....	126.5	848.0	1,060.0
Repayments:			
Insured by FHA.....	9.3	25.0	32.0
Guaranteed by VA.....	7.4	35.0	78.0
Sales of mortgages to private investors:			
Insured by FHA.....		70.0	140.0
Guaranteed by VA.....		30.0	60.0
Mortgages held at end of year:			
Insured by FHA.....	340.1	496.1	563.0
Guaranteed by VA.....	251.7	1,032.8	1,951.6
Number of mortgages.....	94,165	242,400	422,900

As a result of the increase in mortgages offered to Federal National Mortgage Association, the Congress enacted legislation (Public Law 176, 81st Cong., approved July 19, 1949) authorizing the Association to have outstanding at any one time mortgages and commitments not in excess of \$1,500,000,000. On October 25, 1949, this authorization was increased to \$2,500,000,000 by enactment of Public Law 387, Eighty-first Congress. In view of the continuing volume of mortgages offered and the further quantities available, legislation increasing the authority to \$3,250,000,000 will be proposed. The estimates contained herein are based on the premise that such an increase will be authorized.

During the fiscal year 1949, the Association made no sales of mortgages to private investors. It is expected, however, that in view of seasoning of many of the mortgages now held, substantial sales will be made in the fiscal years 1950 and 1951.

FNMA is also authorized, under the terms of the Alaska Housing Act (Public Law 52, 81st Cong.), to make real-estate loans, including advances thereon during construction, secured by property located in Alaska and insured under the provisions of the National Housing Act. It is estimated that such loans in the fiscal year 1950 will amount to \$5,000,000 and in 1951 to \$10,000,000.

In addition, legislation proposed would authorize the Association to make loans, insured under the National Housing Act, to cooperative housing projects when financial assistance to these organizations is not otherwise obtainable. Since this activity would constitute a new and presently unauthorized program its potential effect on the Corporation's budget has not been projected. If, however, the legislation is enacted into law it is expected that commitments for loans to cooperatives would amount to \$20,000,000 in 1950 and \$40,000,000 in 1951 with disbursements for the respective years amounting to \$10,000,000 and \$30,000,000.

Other loans.—In addition to the major classes of loans discussed above, the Corporation held, as of June 30, 1949, the following major categories of loans for collection or liquidation: (1) a loan of \$114,001,074 to the United

Kingdom of Great Britain and Northern Ireland (collections of \$38,500,000 are expected in each of the fiscal years 1950 and 1951 on this loan); (2) a loan of \$60,000,000 made to the Republic of the Philippines pursuant to Public Law 656, Seventy-ninth Congress (no principal payments are due on this loan until 1952); and (3) mortgages and other assets acquired from Defense Homes Corporation for liquidation pursuant to Public Law 860, Eightieth Congress. Principal repayments of \$540,000 and \$545,000 are estimated on these mortgages in the fiscal years 1950 and 1951, respectively.

Advances made during the fiscal year 1949 to other Government agencies at the direction of Congress are expected to be liquidated during the fiscal year 1950. These are: (1) \$1,000,000,000 to the Economic Cooperation Administration, and (2) \$8,000,000 to aid Palestine refugees.

Properties and securities acquired by foreclosure or in liquidation of loans.—As of June 30, 1949, the Corporation held miscellaneous securities and assets acquired in liquidation of loans, or through foreclosure, in the following amounts (net carrying value, based on the lower of cost or market values):

Securities accepted in reorganization of railroads.....	\$15,760,645
Real and personal property acquired through foreclosure and other liquidation of loans.....	8,324,946
Net value of assets held by Consolidated Realty Corp. of New York.....	2,034,701
Securities accepted in payment of past-due interest.....	16,375
Miscellaneous.....	707,147
Total.....	26,843,814

It is estimated that additional properties will be acquired through foreclosure or other liquidation of loans in the amount of \$9,000,000 during the fiscal year 1950 and \$8,000,000 during 1951. The Corporation's responsibility in connection with these assets centers primarily in their liquidation to the best advantage of the Government. Receipts from sales or other disposition are estimated at \$14,500,000 in the fiscal year 1950 and \$8,000,000 in the fiscal year 1951. Of the total estimated for the fiscal year 1950, \$7,500,000 is expected to result from disposition of a large part of the assets held by Consolidated Realty Corp. of New York. This concern, wholly owned by the Corporation, was organized for the purpose of liquidating collateral acquired through foreclosure of a loan made to a mortgage loan company. It is expected that all remaining assets held by this concern will be disposed of in the fiscal year 1951.

NATIONAL DEFENSE, WAR, AND RECONVERSION ACTIVITIES

(See pt. II, statement D)

Production and sale of synthetic rubber (authority—Public Law 469, 80th Cong.).—The Corporation operates all rubber-producing facilities owned by the Government. The above law specifies that there shall be maintained facilities having an annual rated production capacity of not less than 600,000 long tons of general-purpose rubber and not less than 65,000 long tons of special-purpose rubber. The authorizing legislation also provides for maintenance of stand-by facilities, research and development work in rubber and allied fields, and the formulation of a plan for disposal of Government-owned plants to private ownership.

The authority contained in Public Law 469 expires on June 30, 1950. It is not expected, however, that the disposal of Government-owned facilities to private ownership will have been effected by that date in view of the absence of existing disposal authority and the

budget is therefore based on continuation of RFC operation to June 30, 1951.

Results of operations under this program in the fiscal year 1949 and projections during the fiscal years 1950 and 1951 are set out in the following tabulation (dollar amounts expressed in millions):

	1949 actual	1950 estimate	1951 estimate
Number tons general-purpose rubber produced.....	382,638	305,000	284,500
Number tons special-purpose rubber produced.....	69,947	56,200	51,000
Total cost of production.....	\$137.9	\$109.1	\$103.9
Sales of rubber.....	\$173.4	\$134.8	\$130.3
Number of plants in operation at end of year.....	18	18	18
Cost of plant improvements.....	\$7.5	\$6.0	\$4.0
Cost of maintaining stand-by plants.....	\$3.2	\$3.9	\$3.5
Number of plants in stand-by at end of year.....	11	10	10
Receipts from sale of plants.....	\$13.8	\$0.5	
Number of plants sold.....	3	1	

In addition to the activity reflected by this tabulation, it is expected that special research programs requested by the Department of Defense will be carried on in the fiscal years 1950 and 1951.

Purchase, production, and sale of tin (authority—Public Law 125, 80th Cong., as amended).—The Corporation is authorized and directed to continue operations of the Texas City tin smelter until June 30, 1951. This act includes authority to buy, sell, and transport tin, and tin ores and concentrates, and to finance research in tin smelting and processing.

Activities under this program included, during the fiscal year 1949, the operation of the smelter and purchase and sale of refined tin. Except for secondary sources, these combined activities accounted for the complete tin supplies available to domestic users of this country and, by arrangement with the Bureau of Federal Supply, certain quantities were made available for the national stock pile. It is expected that purchases of refined tin by the Corporation for the account of the Bureau of Federal Supply will continue until December 31, 1949. Thereafter, the Corporation will make available to that agency only such quantities of tin as may be available from the smelter inventory, not required to meet demands of domestic users.

Purchases of refined tin, tin ores and concentrates, and refining costs, amounted to \$215,479,107 in the fiscal year 1949. Sales of tin during the year were \$115,793,628 to the trade. In addition, the Corporation was reimbursed by the Bureau of Federal Supply for tin costing \$33,760,258. Purchases and other costs in the fiscal year 1950 are estimated at \$112,125,000 and in the fiscal year 1951 at \$62,515,000. Sales to domestic users are contemplated at \$72,890,000 and \$62,390,000 in the 2 years. Reimbursements from the Bureau of Federal Supply for tin delivered are estimated at \$96,033,076 and \$22,020,000. The above will result in the Corporation's holding only a normal working inventory at June 30, 1951.

It is also estimated that plant improvement expenditures will amount to \$2,000,000 in 1950 and \$500,000 in 1951, primarily for the completion of projects presently under way. The estimates for operations and plant improvements include costs of research for the purpose of improvement in design and operation of the smelter.

Liquidation of war and related activities (authority—sec. 12, Public Law 132, 80th Cong.).—The Corporation's activities with respect to liquidation and final settlement of projects and programs initiated during the war will be largely completed during the fiscal years 1950 and 1951. As of June 30, 1949, there remained for liquidation and/or

operation the following groups of assets and liabilities with total acquisition cost as indicated:

1. Fiber plantations.....	\$12,030,525
2. Aluminum and magnesium forgings plant.....	4,213,847
3. Other plants and equipment.....	58,079,027
4. Loans, advances, and receivables.....	53,946,406
5. Other assets.....	26,447,378
6. Liabilities related to above programs.....	14,078,331

Fiber plantations

The budget contemplates continued operation of the five fiber plantations in Central America in the fiscal years 1950 and 1951 at the present level. Production of fiber at a cost of \$6,000,000 is anticipated in each of the fiscal years 1950 and 1951 with sales amounting to \$6,226,000 in each year. Of the estimated expenditure of \$6,000,000 in the fiscal year 1951, \$100,000 represents costs of research preparatory to replacement of acreage presently in production. This expenditure is contingent upon enactment of proposed legislation authorizing continuation and expansion of this program.

Aluminum and magnesium forgings plant

It is expected that this plant will be disposed of by transfer to the Department of Defense during the fiscal year 1950.

Other plants and equipment under lease

In addition to plants previously described, the Corporation had, as of June 30, 1949, 37 properties acquired during the war. Of these, 14, with book value of \$35,338,000, are under long-term leases expiring subsequent to June 30, 1949; 10 plants will become available for sale during the fiscal years 1950 and 1951 and are expected to be sold for \$3,800,000 and \$1,600,000 during the respective years; 3 of the plants are being transferred to other Government departments without reimbursement, on the basis of legislation approved by the Eighty-first Congress (Public Laws 161 and 163); the remaining 10 plants are involved in litigation or are being held for transfer to other Government agencies or will be disposed of as conditions permit. Aside from the work load involved in the sale of plants referred to above, the Corporation's activity in connection with these plants will be the administration of continuing leases, administration of conditional-sales contracts, involving plants previously sold, and determining final accountability of lessees in connection with plants previously sold or declared surplus.

Loans, advances, and receivables

In connection with various programs undertaken by the Corporation under wartime authorities, there remained for liquidation, as of June 30, 1949, \$53,946,406 of loans and receivables. Some of these are loans on regular amortization schedules and must be collected when due. Others are claims and receivables which must be collected by negotiation or litigation. In still others, a complete analysis of the cases is necessary, after which it may be determined that there is no basis for the claims as they exist in the Corporation's records. In addition to the amount stated, there are many claims such as claims for refunds for rail freight paid in full when land-grant rates should have applied, the amounts of which are yet to be determined and settled.

Other assets

This includes a variety of items, such as inventories of strategic materials in process of transfer to permanent

RECONSTRUCTION FINANCE CORPORATION— Continued

stockpile, other miscellaneous inventories in process of disposal, and other assets involved in litigation or extended negotiations.

Liabilities

As of June 30, 1949, there remained on the books of the Corporation \$14,078,331 of liabilities arising from wartime programs. This amount does not include contingent liabilities of \$9,841,000, most of which are in litigation or negotiation.

Smaller War Plants Corporation (authority—Executive Order 9665).—As of June 30, 1949, there remained for collection or disposal, the following categories of assets of Smaller War Plants Corporation, transferred to the Corporation for disposal:

Loans.....	\$5,427,120
Notes and accounts receivable.....	1,389,314
Machinery and equipment.....	956,498
Other assets.....	666,957
Total.....	8,439,889

These assets are being liquidated as promptly as possible. Total receipts from collections and sale of assets are estimated at \$1,838,000 in the fiscal year 1950 and \$1,303,500 in the fiscal year 1951.

ADMINISTRATIVE EXPENSES

Administrative expenses of the Corporation include salaries and other related costs of all supervisory and operating personnel assigned departmentally and to the 31 loan agencies comprising the field organization. Also included under this classification and subject to annual authorization are the following expenses: Cost of fiscal and custodial services performed by the Federal Reserve banks, the cost of audits of the Corporation's accounts by the General Accounting Office, rental of office space in Government-owned buildings occupied by Corporation employees, and all expenditures for administrative equipment.

The following tabulation presents a comparison, by major programs, of estimated administrative expenses to be incurred in the fiscal year 1951 with the amounts actually incurred in the fiscal year 1949, and the amounts authorized for the fiscal year 1950:

	1949 actual	1950 estimate	1951 estimate
Lending (including Federal National Mortgage Association).....	\$17,900,936	\$21,308,000	\$23,206,000
Production and sale of rubber and tin.....	2,040,336	2,111,000	2,108,000
Liquidation of war activities.....	5,876,420	2,790,000	1,748,000
Liquidation of assets of Smaller War Plants Corporation.....	371,785	208,600	158,400
Net adjustment for reallocated expenses.....	-353,919	-206,600	-120,400
Total expenses under limitation.....	25,835,558	26,211,000	27,100,000

Necessary expenses for the lending program of the Corporation for the fiscal year 1951, as indicated above, will be \$1,898,000, or 8.9 percent greater than the amount authorized for the fiscal year 1950. Based on present trends, it is anticipated that during the 2-year period ending June 30, 1951, the number of direct loans and commitments outstanding will increase by 66 percent and the number of VA and FHA insured mortgages purchased will increase by 349.1 percent. These increases reflect the work load and related cost of (1) acquisition of an increasing number of loans and mortgages and (2) servicing of the increased volume. The increased servicing cost

results not only from the substantially larger number of loans and mortgages which are anticipated, but also from the policy of loan servicing adopted during the fiscal year 1949. The results of this policy, which provides for periodic review of all deferred participation loans, as well as direct loans, have been to minimize greatly delinquencies and losses. Evidence of this may be seen in the comparison of delinquencies as shown in schedule C-2. As of June 30, 1948, there were 1,628 delinquent business loans of all classes, 12.5 percent of total loans outstanding. As of June 30, 1949, the number of delinquencies had been reduced to 1,434 or 11.9 percent of the total outstanding.

In addition to these increases in measurable work loads, administrative costs have been increased by the large number of loan inquiries received. Of these inquiries, which are expected to continue at the present high level for the fiscal years 1950 and 1951, loans are made to a relatively small percentage of those seeking assistance. The Corporation follows the policy of attempting to work out a plan for assisting all those who seek aid. In many instances the assistance is rendered through furnishing advice and setting up applications for loans so that the applicants may obtain credit from commercial lenders. In some cases advice is furnished which enables the applicant to arrange his affairs without a loan from any source. In other instances the applicant is shown that the purpose for which he seeks a loan cannot be profitable, and he is convinced that he should not try to obtain a loan.

Similarly, the Corporation renders assistance to borrowers through engineering, management, accounting, or financial advice for the purpose of aiding such borrowers in the conduct of their businesses on a sound basis. These services, rendered primarily to small business, have increased in proportion to the volume of loans actually granted, and it is estimated that from 15 to 20 percent of the Corporation's lending cost is chargeable to this activity, from which no revenue accrues.

The expense of administering the synthetic rubber and tin programs is expected to continue at approximately the same level as prevailed in 1949, in spite of increased work load and responsibility in connection with research and distribution. A decrease of 70 percent under the fiscal year 1949 is anticipated in the cost of liquidation of wartime activities and the assets of Smaller War Plants Corporation, due to completion of much of the work involved.

For details of estimates see "Estimate of authorization relating to corporate funds."

FINANCIAL REVIEW

Operating results (statement B).—A comparison of actual income and expense in lending programs in the fiscal year 1949 with those estimated for the fiscal years 1950 and 1951, follows:

[In thousands of dollars]

	1949 actual	1950 estimate	1951 estimate
Total income.....	\$49,432	\$93,187	\$133,182
Total expense, before charge-offs, and adjustments in valuation reserves.....	32,082	55,562	81,816
Net income before charge-offs, and adjustments in valuation reserves.....	17,350	37,625	51,366
Less charge-offs and adjustments in valuation reserves.....	9,219	10,279	12,221
Net income for year.....	8,131	27,346	39,145

The estimated increase in total income in each of the fiscal years 1950 and 1951 results from the increasing

volume of business loans and home mortgages which are expected to be acquired. The increase in projected expenses results primarily from increased interest costs on borrowings from the Treasury necessary to finance the expanded volume of business loans and mortgage purchases contemplated in the fiscal years 1950 and 1951.

Dividends of \$308,736,740 paid and accrued during the fiscal year 1949 represented cumulated earnings to June 30, 1949, in excess of \$250,000,000 of earned surplus which the Corporation is permitted by law to retain. Net income reflected below will be paid to the Treasury as dividends in the fiscal years indicated:

Net earnings 1950 payable in 1951.....	\$10,685,379
Net earnings 1951 payable in 1952.....	15,645,000

In the fiscal year 1949 net profit from operations of the synthetic rubber program amounted to \$6,395,074. It is estimated that in the fiscal years 1950 and 1951 the rubber program will result in losses from operations of \$2,064,000 and \$6,366,000, respectively. This change results primarily from anticipated lower rate of production in these years with no material change in fixed charges such as depreciation and interest.

The tin program was operated at a profit of \$8,815,579 during the fiscal year 1949, resulting primarily from sales of tin purchased in prior years at prices lower than those which prevailed during the year. Due to the substantial drop in tin prices subsequent to June 30, 1949, a loss of \$8,249,030 is anticipated in the fiscal year 1950, of which \$6,565,889 represents provision for loss in value of the inventory to give effect to this decline in prices. The

estimates for 1951 do not contemplate a further decline in prices, and, after deduction of depreciation, a loss of \$1,209,000 is anticipated.

The operating results shown above for the rubber and tin programs do not reflect interest on the Government's investments.

Financial condition and investment of the United States Government (statement C—pt. D).—As indicated in the statement of financial condition as of the end of fiscal years 1948 through 1950, the Corporation's total assets, exclusive of interim advances made to other Government agencies at the direction of the Congress, have increased from \$1,245,674,074 at June 30, 1948, to \$1,421,432,728 at June 30, 1949, and are expected to increase further in the two succeeding years to \$3,738,653,057 by the end of fiscal year 1951. This increase results from the large volume of business loans and purchases of insured and guaranteed mortgages contemplated.

The investment of the Government in the Corporation is represented by: (1) Capital stock of \$100,000,000 held by the Treasury; (2) earned surplus of \$250,000,000; and (3) borrowings from the Treasury. The total investment as of the end of the fiscal years 1948 through 1951, exclusive of borrowings from the Treasury for interim advances to other Government agencies, is as follows:

1948.....	\$891,504,071
1949.....	1,204,552,404
1950.....	2,271,157,759
1951.....	3,457,632,759

The increase in the Government's investment results primarily from borrowings from the Treasury.

For loans to FNMA.....	3,144,000	2,334,343	565,657	2,900,000	244,000
For other purposes:					
Catastrophe loans.....	40,000	4,312	503	4,815	35,185
Insurance company, capital loans.....	15,000	8,000	-----	8,000	7,000
Public agency construction loans.....	200,000	68,619	126,404	195,023	4,977
Business loans and all other.....	1,101,000	³ 534,306	⁴ 441,400	975,706	125,294
	4,500,000	2,940,580	1,133,964	4,083,544	416,456
For prefabricated housing loans.....	75,000	⁵ 67,774	⁶ 5,000	72,774	2,226
Total, lending authority.....	4,575,000	3,017,354	1,138,964	4,156,318	418,682
Section II—Federal National Mortgage Association: For mortgage loans.....	3,250,000	⁷ 2,455,505	⁸ 564,924	3,020,429	229,571

¹ Estimates of limitations for the fiscal years 1950 and 1951 are based on proposed legislation which will provide for (a) an increase of \$500,000,000 in the general lending authority of the Corporation in the fiscal year 1950 to meet the anticipated increase in mortgages to be acquired by FNMA; (b) an increase of \$25,000,000 in the limitation on prefabricated housing loans in the fiscal year 1950, and (c) a further increase of \$500,000,000 in the general lending authority of the Corporation in the fiscal year 1951, of which \$250,000,000 will be available for business loans and \$250,000,000 for mortgages to be acquired by FNMA.

² Includes \$3,874,000 contingent upon proposed legislative increase in lending authority.

³ Includes \$10,000,000 contingent upon proposed legislative increase in lending authority.

⁴ Includes \$114,706,000 contingent upon proposed legislative increase in lending authority.

⁵ Includes \$17,774,000 contingent upon proposed legislative increase in lending authority.

⁶ Total amount is contingent upon proposed legislative increase in lending authority.

⁷ Includes \$125,000,000 contingent upon proposed legislative increase in lending authority.

⁸ Includes \$395,429,000 contingent upon proposed legislative increase in lending authority.

AUTHORIZATION TEXT

Not to exceed **[\$25,775,000]** **\$27,100,000** (to be computed on an accrual basis) of the funds of the Reconstruction Finance Corporation shall be available during the current fiscal year for its administrative expenses and the administrative expenses of the Federal National Mortgage Association; **[not to exceed \$1,500 for periodicals and newspapers;]** purchase (not to exceed **[forty,] sixty-one, of which forty-one shall be** for replacement only) and hire of passenger motor vehicles; health service program as authorized by law (5 U. S. C. 150); use of the services and facilities of the Federal Reserve banks: *Provided*, That as used herein the term "administrative expenses" shall be construed to include all salaries and wages, services performed on a contract or fee basis, and travel and other expenses, including the purchases of equipment and supplies, of administrative offices: *Provided further*, That the limiting amount heretofore stated for administrative expenses shall be increased by an amount which does not exceed the aggregate cost of salaries, wages, travel, and other expenses of persons employed outside the continental United States; the expenses of services performed on a contract or fee basis in connection with termination of contracts or in the performance of legal services; and all administrative expenses reimbursable from other Government agencies: *Provided further*, That the distribution of administrative expenses to the accounts of the Corporation shall be made in accordance with generally recognized accounting principles and practices: *Provided further*, That, except as otherwise provided hereinafter, none of the funds of the Reconstruction Finance Corporation and its subsidiary shall be used for the custody, maintenance, or disposal of any surplus property within the continental limits of the United States, its Territories or possessions, except such property as may be owned by and held for disposal by the Reconstruction Finance Corporation or its subsidiary; but, notwithstanding any other provision of law, the Reconstruction Finance Corporation may waive reimbursement from War Assets Administration for the administrative property transferred prior to July 1, 1946, and for expenses incurred prior thereto in the custody, maintenance, or disposal of any surplus property: *Provided further*, That no part of the funds of the Reconstruction Finance Corporation or of its subsidiary shall be used to make any purchase or for personal services or to enter into any contract for the use or benefit of any other agency of the Government unless such agency shall have authority in law and appropriations available to make reimbursement for such purchase, personal services, or contract. (Treasury and Post Office Departments Appropriation Act, 1950.)

TENNESSEE VALLEY ASSOCIATED COOPERATIVES, INC.

[Submitted under the Government Corporation Control Act]

PROGRAM AND PERFORMANCE

Pursuant to the Government Corporations Appropriation Act of 1948, the Secretary of the Treasury took over active liquidation and dissolution of the Tennessee Valley Associated Cooperatives, Inc., and at his request officials of the Treasury Department were appointed to serve in their official capacities as directors and officers of the Corporation. On December 31, 1948, the board of directors of the Corporation adopted a resolution providing for the dissolution of the Corporation.

During the fiscal year 1949, a total of \$15,475 was deposited into the Treasury as miscellaneous receipts in partial payment of capital and paid-in surplus, which, together with the \$50,000 deposited to the Treasury in the fiscal year 1948, made a total of \$65,475 deposited to the Treasury as miscellaneous receipts. An amount of \$600 was transferred to the Secretary of the Treasury under authority of Public Law 860, Eightieth Congress, of which \$100 is being held for contingencies and \$500 for the final audit by the General Accounting Office. After the lapse of a reasonable length of time, all amounts not paid for the final audit and other expenses will be transferred to miscellaneous receipts of the Treasury.

The final audit was made by the General Accounting Office and the report of this audit is contained in House Document No. 234, Eighty-first Congress, first session.

STATEMENT A.—Tennessee Valley Associated Cooperatives, Inc.: Statement of sources and application of funds

[Fiscal years ending June 30, 1949, 1950, and 1951]

Chemical facilities.....	\$2,102,135	\$3,836,000	\$3,836,000
Facilities for general use.....	\$1,739,294	\$1,090,000	\$1,090,000

¹ Income.

PURPOSE AND FINANCIAL ORGANIZATION

The Tennessee Valley Authority is a Corporation created by act of Congress on May 18, 1933 (16 U. S. C. 831). It was established "to improve the navigability and to provide for the flood control of the Tennessee River; to provide for reforestation and the proper use of marginal lands in the Tennessee Valley; to provide for the agricultural and industrial development of said valley; to provide for the national defense by the creation of a corporation for the operation of Government properties at and near Muscle Shoals in the State of Alabama, and for other purposes." These purposes, directed toward the development of the Tennessee Valley, have not been changed since the creation of the Corporation.

The Tennessee Valley Authority is financed by appropriations, and by proceeds from its operations, principally the sale of power and fertilizer materials. Appropriations are made by the Congress to cover expenses of navigation and flood-control operations, fertilizer research, and resource-development activities, and for capital plant additions such as structures, equipment, and land. Proceeds (referred to in the financial statements as corporate funds) are used to finance the operation of dams and reservoirs; to conduct the business of generating, transmitting, and distributing electric energy; and in manufacturing, selling, and distributing fertilizer and fertilizer ingredients.

Section 26 of the Tennessee Valley Authority Act, as amended, provides for payment into the Treasury of the United States of such proceeds as in the opinion of the Tennessee Valley Authority Board are not required for the purposes enumerated above. Through the 1949 fiscal year, payments to the Treasury of the United States (including \$13,572,500 for the retirement of bonds) have totaled \$47,542,834. Payments for 1950 are estimated at \$6,674,000, of which \$5,500,000 is derived from power operations and \$1,174,000 from nonpower sources.

ANALYSIS OF BUDGET PROGRAMS

The function of the Tennessee Valley Authority is to bring about the unified development of the water and soil resources of the Tennessee Valley. The budget program is divided into five types of activity: (1) Navigation, flood control, and power operations; (2) fertilizer and munitions research; (3) experimental production of fertilizer materials; (4) resource development activities; and (5) construction or acquisition of structures and equipment to be employed in the foregoing operations.

Each of these activities is related to each of the others in both planning and execution, and is conducted to enable the people of the Tennessee Valley to make full and effective use of the area's resources by methods which encourage the enterprise of individual farmers and businessmen, and which strengthen their State and local institutions and agencies.

The 1950 program involves the use of \$66,051,811 of appropriated funds and \$77,988,000 of corporate funds made available from the sale of power, fertilizer products, and other sources. Of the total appropriated funds required, the Congress has already made available \$49,359,150; \$12,365,000 is included in a supplementary request for the current fiscal year; and \$4,327,661 is provided through use of the prior years' unobligated balance and other working capital items. The supplemental estimate is composed of three elements as follows:

1. \$7,000,000 is to begin construction of facilities to meet an increase in the power requirements of the Atomic Energy Commission, an increase which was not anticipated at the time the regular 1950 budget was submitted to the Congress.

2. \$5,000,000 is to enable Tennessee Valley Authority to carry out the 1950 construction program approved by the Congress. Estimates for this program were reduced \$6,876,450 in anticipation of a 15-percent reduction in construction costs and with the understanding that Tennessee Valley Authority would submit a deficiency request in the event that costs did not follow the anticipated trend. Although construction cost indices have increased rather than decreased since action was taken on the 1950 budget, adjustments have been made to hold the deficiency request to \$5,000,000.

3. \$365,000 is to meet the cost of pay increases comparable to Public Law 429.

The program for fiscal year 1951 involves use of \$111,595,000 of appropriated funds and \$78,637,000 in corporate funds. The total of \$190,232,000 would be applied as follows: \$119,696,000 for acquisition of assets, \$58,277,000 for operating expenses, \$6,500,000 for retirement of borrowings and payments to the United States Treasury, and \$5,759,000 to increase working capital.

NAVIGATION, FLOOD CONTROL, AND POWER

A major objective of the Tennessee Valley Authority Act is the unified development and use of the Tennessee

TENNESSEE VALLEY AUTHORITY—Continued

River system for navigation, flood control, and power (16 U. S. C. 831c). As of June 30, 1949, the total investment in facilities serving these purposes was \$716,560,427, and was allocated in accordance with section 14 of the act (16 U. S. C. 831m) as follows: Navigation, \$139,596,813; flood control, \$145,531,197; and power, \$431,432,417. Major components are a system of 22 major dams, 20 major hydroelectric generating stations, 10 navigation locks, 5 major fuel-electric generating stations, and a power-transmission network of about 7,000 circuit-miles.

Navigation operations.—The dams, reservoirs, and other navigation improvements which have been constructed on the Tennessee River and its tributaries now provide a modern 9-foot channel from the Kentucky Dam to Knoxville, Tenn., a distance of 630 miles. The Tennessee Valley is thereby linked with the 6,000-mile inland waterways system, extending from the Great Lakes to the Gulf of Mexico. Freight traffic on the Tennessee River has increased from 32,659,000 ton-miles in 1933 to 256,000,000 ton-miles in 1945 (the first year the channel was substantially complete), and to about 425,000,000 ton-miles in 1948. As the traffic increases, the proportion of higher value commodities shipped on the river is also increasing. Figures to date for calendar year 1949 are about 17 percent ahead of the same period in 1948. In addition to freight transportation there has been a tremendous growth in recreational navigation.

The Tennessee Valley Authority is cooperating with private shippers and transportation companies which serve the Tennessee Valley. Technical and engineering investigations and analyses are made to insure that Tennessee Valley Authority operations and construction provide for safe and efficient navigation, and to supply factual data for businessmen who use the river. Public-use river terminals are operated to provide service for small shippers and to enable the potential large shipper to try initial barge shipments. Between \$2,000,000 and \$3,000,000 of private capital has been invested in new river terminal and storage facilities, and new water-front industrial plants costing many more millions of dollars have been built.

Close working relationships are maintained among the Tennessee Valley Authority, the United States Corps of Engineers, the United States Coast Guard, and State and local agencies in matters relating to navigation on the Tennessee River.

The net expense of navigation operations is estimated at \$3,012,000 in fiscal year 1951, compared to \$2,941,000 in 1950 and \$2,783,085 in 1949. These figures include charges for depreciation on capital plant allocated to navigation, as well as proration of administrative and general expenses and reservoir operating costs common to navigation, flood control, and power.

Flood control operations.—The Tennessee River and its tributaries constitute the most highly developed river-control system in the world, providing 13,534,000 acre-feet of useful controlled storage. Since Norris Dam was placed in service in 1936, the system has on 17 occasions reduced flood crests which, uncontrolled, would have caused major damage. At the city of Chattanooga, alone, the total of the estimated reductions in flood damage resulting from these operations amounts to over \$41,000,000.

Benefits to communities below the mouth of the Tennessee are substantial and extend to the lower Ohio and Mississippi Basins. Studies show that the present reservoir system would be able to reduce at Cairo, Ill., the

height of floods such as have occurred in the past by from 2 to 3½ feet. Such reductions can mean the difference between overtopping and not overtopping the levees along the Mississippi between Cairo and the mouth of the Red River.

The net expense of flood control operations amounted to \$2,281,727 in fiscal year 1949, and is estimated at \$2,415,000 in 1950 and \$2,532,000 in 1951. These figures include charges for depreciation on the capital plant allocated to flood control, as well as proration of administrative and general expenses and reservoir operating costs common to navigation, flood control, and power.

Power operations.—The Tennessee Valley Authority power operations are confined to generation and transmission of power and sales at wholesale to local distribution systems and to Government agencies and certain industries using large amounts of power. Power is distributed by 145 local public agencies to more than a million ultimate consumers. As of June 30, 1949, the installed capacity of the system was 2,747,092 kilowatts, including 36,000 kilowatts in a Department of the Army plant on a tributary of the Cumberland River and 312,560 kilowatts in plants owned by the Aluminum Co. of America but operated as a part of the Tennessee Valley Authority system. The total system output in fiscal year 1949 was 17,136,000,000 kilowatt-hours, of which 13,286,000,000 kilowatt-hours was generated at hydro plants and 3,850,000,000 kilowatt-hours was supplied by fuel plants or other auxiliary sources of supply. System output is estimated at 17,522,000,000 and 17,675,000,000 kilowatt-hours, respectively, for 1950 and 1951.

Net income from power operations (before interest charges) amounted to \$21,481,187 in fiscal year 1949. Estimates for 1950 and 1951 are \$21,447,000 and \$14,925,000, respectively. The return on power investment was 5 percent in 1949. During the next 2 years, with power demands substantially in excess of the capacity of the system's economical power sources, the return on the investment is expected to fall to the range of 3 to 4½ percent. The estimates are based on assumptions of average stream flow. Dry-year conditions would reduce the energy available from hydro sources, increase operating expenses through the use of more steam power plants, and thus lower substantially the amount of net income actually realized. Better-than-average stream flow could produce some increase over the estimates.

FERTILIZER AND MUNITIONS RESEARCH AND DEVELOPMENT

Fertilizer and munitions research and development activities are an essential step in the development of soil resources through the use of improved plant nutrients and the application of sound farming methods. They are useful also in developing and supplying munitions for military purposes (16 U. S. C. 831d, f, and h). The facilities, materials, and staff involved in this program comprise a national laboratory where fertilizer processes and materials are developed and tested as to manufacturing feasibility. Major emphasis is placed on bridging the gap between test-tube research and practical application by private enterprise. To an increasing extent, fertilizer and allied industries are making use of the practical results being developed and made available by the Tennessee Valley Authority.

The activities consist of small-scale chemical research and process development. The first category is limited to exploratory tests, background research, and applied research at the laboratory level. Process development

includes the technical and economic evaluation of research results; development of unit operations; design, construction, and operation of pilot plants; improvement of design features and operating procedures of demonstration or large-scale plants; and preparation of engineering and economic studies directed toward practical utilization of the findings by other agencies and industries. During 1951 emphasis will be placed on the development of a group of related processes for the production of combined phosphate-nitrogen fertilizers. Fertilizer and munitions research and development will require \$1,199,000 in 1951, exclusive of pay increases.

CHEMICAL OPERATIONS

The experimental chemical production facilities at Wilson Dam, Ala., and Columbia, Tenn., will be operated during 1951 for the production of concentrated phosphate and nitrogenous fertilizers. These products will be made available for test-demonstration purposes and for sale under agreements which assure that the materials will be used in a manner that will promote improved farming practices to conserve the soil, increase its fertility, and control water. In the event of a national emergency, the production facilities can produce large quantities of phosphorus and fixed nitrogen for military purposes.

During 1949, phosphate fertilizers containing a total of 94,265 tons of phosphorus pentoxide (P_2O_5) were shipped from Tennessee Valley Authority plants. Estimates for 1950 and 1951 are 100,900 and 99,270 tons, respectively.

Facilities for the production of ammonia and ammonium nitrate fertilizer were operated at capacity in 1949 and are scheduled for full operation in 1950 and 1951. The Tennessee Valley Authority has improved the equipment and techniques of nitrogenous fertilizer manufacture and has made its findings available to private industry.

The fertilizer-production activities are conducted as a developmental rather than a strictly commercial enterprise. However, proceeds from the sale and transfer of products are generally sufficient to pay all costs, including depreciation on capital plant and an applicable portion of administrative and general expenses.

RESOURCE DEVELOPMENT ACTIVITIES

Resource development activities include research and demonstrations in the discovery, creation, and better use of agricultural, forest, mineral, recreational, and fish and game resources; topographic mapping; and investigations and technical assistance in the fields of stream sanitation, public health, transportation and industrial economics, and public administration (16 U. S. C. 831c, d, i, and u). These activities are carried out in cooperation with State, local, and other Federal agencies, and with private landowners and industries.

Appropriated fund requirements, exclusive of pay increases, for resource development activities in 1951 are \$4,879,000, a continuation of the 1950 level. Application of corporate funds received from test-demonstration farmers under a graduated payment plan for test-demonstration fertilizers is estimated at \$225,000.

Agricultural resource development will require appropriated funds of \$2,805,000 in addition to the \$225,000 estimated to be received from farmers. The basic element in the agricultural resource development program is the test-demonstration method. After fertilizers developed in the Tennessee Valley Authority's experimental laboratories have been tested under small-scale controlled conditions, they are further tested, in conjunction with im-

proved farm management practices, on practical farms in the Tennessee Valley and throughout the Nation. These tests are designed to measure the effectiveness and demonstrate the usefulness of high-analysis fertilizers as a means of preventing soil erosion and water run-off, re-building the soil, and improving agricultural production and practices. Under the graduated-payment plan instituted in 1949, test-demonstration farmers pay part of the cost of Tennessee Valley Authority fertilizers used in the program. These practical farm test demonstrations are carried out through the extension services of the land-grant colleges. The Tennessee Valley Authority contributes financial support for the salaries of extension personnel who provide technical guidance to participating farmers. About 9,000 farms will receive test-demonstration fertilizer in 1951.

The expense of forest resource development is estimated at \$745,000 in 1951. The Tennessee Valley Authority participates in a cooperative regional forestry program through studies of forest resources and management practices; research on the utilization of forest resources; assistance and demonstrations in forest management practices, reforestation, and forest fire control; and gives technical advice to State and local agencies, industries, and individuals. This program demonstrates how watershed protection and the regional economy can be furthered by the adoption of sound forestry practices. Specific activities are carried out in accordance with agreements as to areas of work and function with the United States Forest Service and the forestry agencies of the States and counties.

The 1951 estimate for mineral resource development is \$141,000. The Tennessee Valley Authority, in cooperation with other agencies and institutions, carries on investigations and surveys of the mineral resources of the valley area, evaluates mineral deposits, analyzes samples, undertakes ore dressing tests, and conducts research on the development of processes for the beneficiation and utilization of the valley's minerals. Research results are used by other agencies and industries.

An estimate of \$172,000 is included for recreational resource development in 1951. Much of the rapidly growing interest in recreational development in the Tennessee Valley region is attributable to Tennessee Valley Authority reservoirs, which offer opportunities for fishing, swimming, boating, and other outdoor activities. The Tennessee Valley Authority's primary function has been to guide the development around its reservoirs to secure maximum possible use of the total recreational resources of the region. Technical assistance and advisory services are provided to the many State and local public agencies and private interests engaged in planning, building, promoting, and operating recreational facilities. Up to January 1, 1949, the people of the region had invested about \$16,000,000 in parks, pleasure craft, boat docks, resorts, and other recreational facilities on the shores of Tennessee Valley Authority reservoirs.

The 1951 estimate for stream sanitation and public health is \$148,000. The Tennessee Valley Authority conducts research in stream sanitation and provides advisory assistance to State and local agencies, groups, and industries who are developing and carrying out plans for solving stream-pollution problems. Public health studies and assistance involve cooperation with State and local public health agencies in the performance of health services and cooperative research with educational institutions on public health problems associated with Tennessee Valley Authority operations.

TENNESSEE VALLEY AUTHORITY—Continued

The \$91,000 estimate for fish and game investigations provides for studies on such matters as composition and size of fish populations, the reaction of different species of fish to new conditions resulting from dam construction, the effects of environmental conditions on catching fish, and means of increasing the development of waterfowl and other game.

Topographic mapping expenditures in 1951 are estimated at \$476,000.

Special studies and activities to provide necessary information about the region's economy and resources and to assist State and local agencies in meeting problems arising from the impact of the Tennessee Valley Authority program will require \$301,000 in 1951. Transportation and industrial economic studies conducted under this program help to assess the effectiveness and economic returns of the Government's investment in the region, to identify the barriers to greater use of the region's assets, and to relate Tennessee Valley Authority's programs to the needs of communities and industries. The Tennessee Valley Authority extends advice and technical assistance to State and local governments on community planning, finance, and other governmental problems, particularly those which have been affected by Tennessee Valley Authority operations.

CONSTRUCTION AND ACQUISITION OF ASSETS

Gross fund requirements for construction and acquisition of assets are estimated at \$119,696,000 in fiscal year 1951, of which \$101,403,000 would be derived from appropriated funds and \$18,293,000 from proceeds. The program may be summarized as follows:

Completion of South Holston Dam.....	\$3,419,000
Beginning construction of 2 dam and reservoir projects on South Fork of the Holston River.....	6,982,000
Additions, improvements, and investigations—multipurpose dams and reservoirs.....	2,202,000
Continued work on 6 hydrogenerating units now under construction in existing dams.....	13,993,000
Continued construction of a steam plant at Johnsonville, Tenn.....	39,915,000
Continued construction of a steam plant at Widows Creek, Ala.....	15,400,000
Beginning construction of 1 hydrogenerating unit at Fontana Dam.....	1,000,000
Transmission and other electric plant.....	28,919,000
Chemical facilities.....	3,836,000
Facilities for general use.....	1,090,000
Administrative and general expenses distributed to fixed assets.....	2,463,000
Pay increases.....	477,000
Total.....	119,696,000

The first two items above relate to multipurpose structures serving the navigation, flood control, and power programs. The estimate for South Holston Dam provides for completion of this project except for final record drawings and other minor clean-up items. This project is scheduled for closure late in calendar year 1950 with generation of power beginning in the spring of 1951. The second item involving the beginning of construction on two projects on the South Fork of the Holston River near Kingsport, Tenn., provides for active construction of the Boone project and work preparatory to beginning active construction of Fort Henry project in 1952.

Most of the remaining funds required in 1951 will be used to increase the generating capacity and the capacity of the transmission network of the power system. The Tennessee Valley region, wholly dependent for electricity

upon the Tennessee Valley Authority system, is experiencing a steady growth in power loads, including a large increase in the requirements of the Atomic Energy Commission at Oak Ridge. In addition to work already under way, the 1951 program calls for beginning construction of the fifth and sixth units at Johnsonville steam plant and a third hydro unit at Fontana Dam. The installations proposed, together with other projects now under construction within the Tennessee Valley Authority service area, represent a minimum program for bringing the power supply about in balance with the anticipated demand of the system in the winter of 1953-54.

About three-fourths of the estimate of \$3,836,000 for chemical facilities is for completion of projects already under way. The remainder is for new facilities which are essential to continued progress in fertilizer technology and operating economies. About one-half of the estimate for new facilities is for phosphate facilities, including the beginning of a new plant for increasing the capacity to produce the newly developed, highly concentrated calcium metaphosphate fertilizer, equipment to reduce the cost of manufacturing phosphatic fertilizers, and facilities for reducing atmospheric pollution. The rest of the estimate for new facilities covers most of the cost of construction of a plant, scheduled for completion in 1952, for producing a new combination fertilizer containing phosphorus and nitrogen to which potash may be added.

The estimate of \$1,090,000 for general facilities provides for routine replacement of transportation, office, and other general equipment. The largest items of expenditure are for replacement of passenger vehicles, trucks, and other heavy mobile equipment.

ADMINISTRATIVE AND GENERAL EXPENSES

Administrative and general expenses as recorded and reported by the Tennessee Valley Authority are those expenses which are common generally to all of Tennessee Valley Authority's organizations and functions. They consist primarily of costs of administration and management services which have been centralized in the interest of economy and convenience in over-all operations. Schedule B-4 summarizes these expenses by source and shows the distribution to the various programs and projects.

Since the Tennessee Valley Authority's financial records are based on commercial and industrial accounting practices, administrative and general expenses are allocated to the various programs in order to determine and report total costs of each program. These allocations are made on the basis of accounting studies of direction of effort.

Beginning with fiscal year 1948 the administrative and general expenses of the Tennessee Valley Authority have been sharply curtailed. In that year the Tennessee Valley Authority, upon its own initiative and based upon careful studies, voluntarily reduced its estimate by \$620,000. Statutory limitations on this class of expenditure in 1949 and 1950 have resulted in a level of expenditure below that required for maximum operating efficiency. The 1951 estimate of \$4,026,000 represents an increase of \$327,000 over the budget for the current year. The increase will permit the restoration of a level of management services believed to be a minimum for effective discharge of the responsibilities carried by the agency.

FINANCIAL REVIEW

Operating results of the various programs, together with trends anticipated in costs and income, are summarized

in statement B, "Statement of income and expenses," and are discussed briefly in the preceding section on "Analysis of budget programs." The financial position of the Tennessee Valley Authority as of June 30, 1948 and 1949, and estimated position as of the close of fiscal years 1950 and 1951 are shown on statement C, "Statement of financial condition." Following is a brief explanation of significant changes in major items shown thereon:

Cash and cash funds.—Cash balances with the United States Treasury at the end of each year are generally only sufficient to cover outstanding obligations. The forecast cash balance at June 30, 1951, reflects anticipated increases in unliquidated obligations. Cash balances in the United States Treasury collection account include the statutory continuing fund and corporate funds reserved for contingencies.

Land, structures, and equipment.—The June 30, 1951, balance of \$1,108,057,184 reflects an increase of \$112,503,000 during the year, of which \$56,971,000 represents additional construction in progress. The following significant projects are scheduled for substantial completion in 1951 and are reflected in the accounts for completed plant for that year:

(1) Multiple-use dams: South Holston Dam and Reservoir.

(2) Other electric plant: Additional transmission system facilities.

(3) Chemical plant: Gas-reforming equipment, rotating phosphorus furnace, phosphate lands, and certain fluorine recovery facilities.

Interest-bearing investment.—Total interest-bearing investment consists of bonds sold to and held by the United States Treasury. The 1950 and 1951 budget programs provide for retirement of \$2,500,000 in each of these years.

Non-interest-bearing investment.—Through June 30, 1949, the Congress had appropriated \$766,562,331 for use by the Tennessee Valley Authority. For the fiscal year 1950 the Congress has appropriated \$49,359,150, and there is anticipated a supplemental appropriation request of \$12,365,000. The 1951 budget program calls for an appropriation of \$108,264,000 for use in that year.

In addition to the retirement of bonds, mentioned above, repayments of \$3,000,000 and \$4,000,000 from power proceeds are budgeted in fiscal years 1950 and 1951, respectively. Schedule C-1, "Repayment of investment in power program," summarizes the status of repayments under title II of the Government Corporations Appropriation Act, 1948. A repayment of \$1,174,000 from non-power proceeds is budgeted for 1950.

STATEMENT A.—Tennessee Valley Authority: Statement of sources and application of funds

[Fiscal years ending June 30, 1949, 1950, and 1951]

	1949 actual	1950 estimate	1951 estimate
FUNDS APPLIED			
From appropriated funds:			
To acquisition of assets:			
Dam and reservoir projects:			
South Holston.....	\$9,356,853	\$10,387,000	\$3,059,000
Watauga.....	5,438,394	1,135,000	159,000
Boone.....			6,694,000
Fort Henry.....			288,000
Additions and improvements.....	845,478	1,500,000	1,170,000
Power facilities:			
Johnsonville steam plant.....	1,629,840	18,655,000	39,735,000

STATEMENT B.—*Tennessee Valley Authority: Statement of income and expenses*

[Fiscal years ending June 30, 1949, 1950, and 1951]

	1949 actual	1950 estimate	1951 estimate
NAVIGATION OPERATIONS			
Income: Incidental income (statement A).....	\$15,557	\$17,000	\$21,000
Expenses:			
Study and development of river transportation.....	\$208,787	\$222,600	\$219,300
Operation of public-use river terminals.....	37,862	47,400	50,700
Power for lock operations.....	7,442	8,000	8,000
Total direct expenses (statement A).....	254,091	278,000	278,000
Pay increases.....		7,000	8,000
Distribution of administrative and general expenses (schedule B-4).....	13,789	13,000	11,000
Allocated from multipurpose reservoir operations (schedule B-2).....	1,213,653	1,325,000	1,369,000
Total expenses before depreciation.....	1,481,533	1,623,000	1,666,000
Depreciation on navigation facilities.....	563,863	565,000	570,000
Depreciation allocated from multipurpose reservoir operations (schedule B-2).....	753,246	770,000	797,000
Total expenses.....	2,798,642	2,958,000	3,033,000
Net expense of navigation operations	2,783,085	2,941,000	3,012,000
FLOOD CONTROL OPERATIONS			
Expenses:			
Direct expenses (statement A).....	63,353	50,000	80,000
Pay increases.....		1,000	2,000
Distribution of administrative and general expenses (schedule B-4).....	4,100	4,000	4,000
Allocated from multipurpose reservoir operations (schedule B-2).....	1,213,653	1,325,000	1,369,000
Total expenses before depreciation.....	1,281,106	1,380,000	1,455,000
Depreciation on flood control facilities.....	247,375	265,000	280,000
Depreciation allocated from multipurpose reservoir operations (schedule B-2).....	753,246	770,000	797,000
Total expense of flood-control operations	2,281,727	2,415,000	2,532,000
POWER OPERATIONS (Schedule B-1)			
Income (statement A):			
Total operating revenues.....	56,339,085	53,232,800	56,286,500
Total incidental income.....	1,735,043	2,355,200	593,500
Total income.....	58,074,128	55,588,000	56,880,000
Expenses:			
Direct expenses (statement A).....	25,046,452	22,364,000	29,283,000
Pay increases.....		112,000	141,000
Distribution of administrative and general expenses (schedule B-4).....	993,873	730,000	696,000
Allocated from multipurpose reservoir operations (schedule B-2).....	1,221,546	1,335,000	1,378,000
Total expenses before depreciation.....	27,261,871	24,541,000	31,498,000
Depreciation on power facilities.....	8,663,513	9,402,000	10,173,000
Amortization of electric plant acquisition adjustments.....	200,000	200,000	200,000
Depreciation allocated from multipurpose reservoir operations (schedule B-2).....	1,004,328	1,028,000	1,064,000
Total expenses.....	37,129,712	35,171,000	42,935,000
Net expense of navigation operations	20,944,416	20,417,000	13,945,000
MULTIPURPOSE RESERVOIR OPERATIONS (Schedule B-2)			
Income (statement A)	365,640	227,000	207,000
Expenses:			
Direct expenses (statement A).....	3,739,400	3,877,000	3,985,000
Pay increases.....		77,000	95,000
Distribution of administrative and general expenses (schedule B-4).....	275,092	258,000	243,000

SCHEDULE B-1.—*Tennessee Valley Authority: Statement of power operations*

[Fiscal years ending June 30, 1949, 1950, and 1951]

	1949 actual	1950 estimate	1951 estimate
Income:			
Operating revenues:			
Sales of electric energy:			
Municipalities and cooperatives.....	\$27,315,932	\$30,300,000	\$33,900,000
Commercial and industrial.....	13,544,134	10,800,000	11,400,000
Federal agencies.....	6,636,035	7,000,000	9,000,000
Electric utilities.....	8,279,804	4,800,000	1,700,000
Rural (retail).....	186,060	55,500	
Total outside sales.....	55,961,965	52,955,500	56,000,000
Rents and other revenues.....	377,120	277,300	286,500
Total operating revenues, exclusive of interdivisional sales and rents.....	\$56,339,085	\$53,232,800	\$56,286,500
Incidental income from recovery of operating expenses:			
Interchange power delivered.....	1,323,031	2,159,000	369,000
Sales promotion.....	140,041	161,000	190,000
Other.....	269,573	34,200	34,500
Subtotal.....	1,732,645	2,354,200	593,500
Interest from long-term receivables.....	2,398	1,000	
Total incidental income (note 1).....	1,735,043	2,355,200	593,500
Total income (statement A).....	58,074,128	55,588,000	56,880,000
Expenses:			
Production:			
Generation.....	14,647,966	11,705,700	15,175,400
Purchased power.....	1,083,426	1,120,000	1,858,000
Interchange power received.....	1,923,908	838,000	3,514,000
Total production expense.....	17,655,300	13,663,700	20,547,400
Transmission.....	4,083,726	4,321,000	4,498,000
Distribution.....	32,383	18,200	
Customers' accounting and collecting.....	52,890	51,850	51,000
Sales promotion.....	410,246	487,000	573,000
Payments in lieu of taxes.....	2,050,437	2,500,000	2,350,000
General operating expense.....	1,845,230	1,931,000	2,005,000
Interest on funded debt.....	536,771	1,030,000	980,000
Other expense.....	70,900	87,250	88,600
Total operating and interest expense.....	26,737,883	24,090,000	31,093,000
Less interdivisional sales and rents (note 2).....	1,691,431	1,726,000	1,810,000
Total direct expenses (statement A).....	25,046,452	22,364,000	29,283,000
Pay increases.....		112,000	141,000
Distribution of administrative and general expenses (schedule B-4).....	993,873	730,000	696,000
Allocated from multipurpose reservoir operations (schedule B-2).....	1,221,546	1,335,000	1,378,000
Total expenses before depreciation.....	27,261,871	24,541,000	31,498,000
Depreciation on power facilities.....	8,663,513	9,402,000	10,173,000
Amortization of electric plant acquisition adjustments.....	200,000	200,000	200,000
Depreciation allocated from multipurpose reservoir operations (schedule B-2).....	1,004,328	1,028,000	1,064,000
Total expenses.....	37,129,712	35,171,000	42,935,000
Net income from power operations.....	20,944,416	20,417,000	13,945,000

NOTE.—In accordance with the uniform system of accounts prescribed by the Federal Power Commission, TVA's published financial statements reflect these items as follows: 1. Incidental income is deducted from the appropriate operating expense. 2. Interdivisional sales and rents are included in operating revenues. These departures are made herein for clarity of presentation for budgetary purposes.

SCHEDULE B-2.—*Tennessee Valley Authority: Statement of multipurpose reservoir operations*

[Fiscal years ending June 30, 1949, 1950, and 1951]

	1949 actual	1950 estimate	1951 estimate
Income: Incidental income (statement A).....	\$365,640	\$227,000	\$207,000
Expenses:			
Water dispatching operations.....	\$494,156	\$510,200	\$527,600
Malaria control.....	890,455	893,025	892,850
Plant protection and services to visitors.....	584,603	649,625	657,375
Upkeep of roads and grounds.....	311,583	319,900	446,350
Operation of reservoir villages.....	139,179	50,950	30,650
Operation of reservoir lands.....	608,909	623,600	623,875
Operation of backwater protection facilities.....	24,961	27,300	27,500
Engineering investigations and tests.....	415,688	443,300	403,400
System improvement studies.....	106,038	164,300	140,100
Other operations.....	84,897	103,800	135,300
Maintenance of structures and equipment.....	78,931	91,000	100,000
Total direct expenses (statement A).....	3,739,400	3,877,000	3,985,000
Pay increases.....		77,000	95,000
Distribution of administrative and general expenses (schedule B-4).....	275,092	258,000	243,000
Total expenses before depreciation.....	4,014,492	4,212,000	4,323,000
Depreciation on multiple-use facilities.....	2,510,820	2,568,000	2,658,000
Total expenses.....	6,525,312	6,780,000	6,981,000
Net expense of multipurpose reservoir operations.....	6,159,672	6,553,000	6,774,000

ALLOCATION OF MULTIPURPOSE RESERVOIR OPERATIONS TO PROGRAMS

Navigation operations:				
Expenses.....	\$1,213,653	\$1,325,000	\$1,369,000	
Depreciation.....	753,246	770,000	797,000	
	\$1,966,899	\$2,095,000	\$2,166,000	
Flood-control operations:				
Expenses.....	1,213,653	1,325,000	1,369,000	
Depreciation.....	753,246	770,000	797,000	
	1,966,899	2,095,000	2,166,000	
Power operations (schedule B-1):				
Expenses.....	1,221,546	1,335,000	1,378,000	
Depreciation.....	1,004,328	1,028,000	1,064,000	
	2,225,874	2,363,000	2,442,000	
Total multipurpose reservoir operations allocated.....	6,159,672	6,553,000	6,774,000	

SCHEDULE B-3.—*Tennessee Valley Authority: Statement of resource development activities*

[Fiscal years ending June 30, 1949, 1950, and 1951]

	1949 actual	1950 estimate	1951 estimate
Income:			
Fertilizer used in tests and demonstrations.....	\$114,860	\$225,000	\$225,000
Incidental income.....	66,457	51,000	51,000
Total income (statement A).....	\$181,317	\$276,000	\$276,000
Expenses:			
Agricultural resource development:			
Fertilizer used in tests and demonstrations:			
Appropriated funds.....	1,187,010	1,415,000	1,415,000
Corporate funds.....	114,860	225,000	225,000
Test-demonstration planning and supervision.....	671,024	824,200	779,000
Preliminary soil and fertilizer investigations.....	134,460	184,400	265,000
Farm classification and soil surveys.....	64,587	81,400	73,000

TENNESSEE VALLEY AUTHORITY—Continued

APPROPRIATION TEXT

For the purpose of carrying out the provisions of the Tennessee Valley Authority Act of 1933, as amended (16 U. S. C., ch. 12A), including purchase (not to exceed [one] *two*) and hire, maintenance, repair, and operation of aircraft; the purchase (not to exceed [one] *two* hundred and [twelve] *fifty* for replacement only) and hire of passenger motor vehicles, [\$49,359,150] *\$108,264,000* to remain available until expended, and to be available for the payment of obligations chargeable against prior appropriations. (*Independent Offices Appropriation Act, 1950.*)

Appropriated 1950, **\$49,359,150** Estimate 1951, **\$108,264,000**

The following corporation is hereby authorized to make such expenditures, within the limits of funds and borrowing authority available to such corporation and in accord with law, and to make such contracts and commitments without regard to fiscal year limitations as provided by section 104 of the Government Corporation Control Act, as amended, as may be necessary in carrying out the programs set forth in the Budget for the fiscal year ending June 30, 1951, for such corporation, except as hereinafter provided:

Not to exceed [\$3,699,000] *\$4,026,000* of the funds available to the Tennessee Valley Authority, shall be available during the current fiscal year for all administrative and general expenses of the Corporation, which expenses shall be inclusive of costs of all administrative offices and other activities representing management and other functions serving the programs and projects of the Corporation in general. (*Independent Offices Appropriation Act, 1950.*)

Statement of proposed obligations for purchase and hire of passenger motor vehicles for the fiscal year 1951

TENNESSEE VALLEY AUTHORITY

Appropriation	Motor vehicles to be purchased		Old vehicles to be exchanged		Net cost of vehicles to be purchased	Old vehicles still to be used	Cost of hire of motor vehicles	Public purpose and users
	Number	Gross cost	Number	Allowance (estimated)				
Tennessee Valley Authority fund.....	250	\$318,000	250	\$100,000	\$218,000	425	\$4,000	For use of officials and employees of Tennessee Valley Authority. All automobiles are pooled in 1 fleet and issued to individual employees when such means of transportation is economical and advantageous to the Government. The principal users are engineers, construction foremen, time keepers, inspectors, safety engineers, malaria control technicians, agriculturists, foresters, and administrative officers. Reconnaissance body vehicles are used primarily by engineering field parties for survey and engineering work in reservoir sites, valley mapping, transmission-line surveys, and construction. Motor vehicles will be hired on special occasions and at field locations where a pool of motor vehicles is not maintained.

Statement of proposed obligations for purchase, maintenance, and operation of aircraft for the fiscal year 1951

TENNESSEE VALLEY AUTHORITY

Appropriation	Aircraft to be purchased		Aircraft to be exchanged		Net cost of aircraft to be purchased	Old aircraft still to be used	Cost of maintenance and operation of aircraft	Public purpose and users
	Number	Gross cost	Number	Allowance (estimated)				
Tennessee Valley Authority fund.....	2	\$60,000	-----	-----	\$60,000	8	\$114,500	1 plane will be used principally for transporting Tennessee Valley Authority employees on official business; 1 plane will be used mainly for photography, mapping, and reconnaissance and will be available for emergency passenger service; 1 helicopter will be used for power line patrol; and 1 helicopter and 4 planes will be used by technicians and engineers in malaria control larvicide and insecticide application, survey, reconnaissance, inspection of construction and malaria control projects in areas remote from transportation or access roads. After the receipt of the aircraft to be purchased during the latter part of fiscal year 1951, 1 passenger plane and 1 Vultee plane will be retired early in fiscal year 1952.

CORPORATIONS—GENERAL PROVISIONS

SEC. 202. No part of the funds of, or available for expenditure by, any corporation or agency included in this title shall be used to pay the salary or wages of any person who engages in a strike against the Government of the United States or who is a member of an organization of Government employees that asserts the right to strike against the Government of the United States, or who advocates, or

is a member of an organization that advocates, the overthrow of the Government of the United States by force or violence: *Provided*, That for the purposes hereof an affidavit shall be considered prima facie evidence that the person making the affidavit has not contrary to the provisions of this section engaged in a strike against the Government of the United States, is not a member of an organization of Government employees that asserts the right to strike against the Government of the United States, or that such person does not

advocate, and is not a member of an organization that advocates, the overthrow of the Government of the United States by force or violence: *Provided further*, That any person who engages in a strike against the Government of the United States or who is a member of an organization of Government employees that asserts the right to strike against the Government of the United States, or who advocates, or who is a member of an organization that advocates, the overthrow of the Government of the United States by force or violence and accepts employment the salary or wages for which are paid from any funds available to any corporation or agency included in this title shall be guilty of a felony, and upon conviction, shall be fined not more than \$1,000 or imprisoned for not more than one year, or both: *Provided further*, That the above penalty clause shall be in addition to, and not in substitution for, any other provisions of existing laws.

SEC. 203. No part of the funds of, or available for expenditure by, any corporation or agency included in this title shall be used to pay the compensation of any employee engaged in personnel work in excess of the number that would be provided by a ratio of one such employee to one hundred and fifteen, or a part thereof, full-time, part-time, and intermittent employees of the agency concerned: *Provided*, That for purposes of this section employees shall be considered as engaged in personnel work if they spend half-time or more in personnel administration consisting of direction and administration of the personnel program; employment, placement, and separation; job evaluation and classification; employee relations and services; training; committees of expert examiners and boards of civil-service examiners; wage administration; and processing, recording, and reporting. *(Independent Offices Appropriation Act, 1950.)*

GENERAL PROVISIONS

DEPARTMENTS AND AGENCIES

SEC. 301. Unless otherwise specifically provided, the maximum amount allowable during the current fiscal year, in accordance with section 16 of the Act of August 2, 1946 (5 U. S. C. 78), for the purchase of any passenger motor vehicle (exclusive of busses, ambulances, and station wagons), is hereby fixed at \$1,400.

SEC. 302. Unless otherwise specified and during the current fiscal year, no part of any appropriation contained in this or any other Act shall be used to pay the compensation of any officer or employee of the Government of the United States (including any agency the majority of the stock of which is owned by the Government of the United States) whose post of duty is in continental United States unless such person (1) is a citizen of the United States, (2) is a person in the service of the United States on the date of enactment of this Act who, being eligible for citizenship, had filed a declaration of intention to become a citizen of the United States prior to such date, or (3) is a person who owes allegiance to the United States: *Provided*, That for the purpose of this section, an affidavit signed by any such person shall be considered prima facie evidence that the requirements of this section with respect to his status have been complied with: *Provided further*, That any person making a false affidavit shall be guilty of a felony and, upon conviction, shall be fined not more than \$4,000 or imprisoned for not more than one year, or both: *Provided further*, That the above penal clause shall be in addition to, and not in substitution for, any other provisions of existing law: *Provided further*, That any payment made to any officer or employee contrary to the provisions of this section shall be recoverable in action by the Federal Government. This section shall not apply to citizens of the Republic of the Philippines or to nationals of those countries allied with the United States in the prosecution of the war.

SEC. 303. Appropriations of the executive departments and independent establishments for the current fiscal year, available for expenses of travel or for the expenses of the activity concerned, are hereby made available for living quarters allowances in accordance with the Act of June 26, 1930 (5 U. S. C. 118a), and regulations prescribed thereunder, and cost-of-living allowances similar to those allowed under section 901 (2) of the Foreign Service Act of 1946, in accordance with and to the extent prescribed by regulations of the President, for all civilian officers and employees of the Government permanently stationed in foreign countries: *Provided*, That the availability of appropriations made to the Department of State for carrying out the provisions of the Foreign Service Act of 1946 shall not be affected hereby.

SEC. 304. No part of any appropriation for the current fiscal year contained in this or any other Act shall be paid to any person for the filling of any position for which he or she has been nominated after the Senate has voted not to approve of the nomination of said person.

SEC. 305. No part of any appropriation contained in this or any other Act shall be used to pay in excess of \$4 per volume for the current and future volumes of the United States Code Annotated and such volumes shall be purchased on condition and with the understanding that latest published cumulative annual pocket parts issued prior to the date of purchase shall be furnished free of charge, or in excess of \$4.25 per volume for the current or future volumes of the Lifetime Federal Digest. *(Independent Offices Appropriation Act, 1950.)*

CORPORATIONS

SEC. 306. Funds made available by this or any other Act for administrative expenses in the current fiscal year of the corporations and agencies subject to the Government Corporation Control Act, as amended (31 U. S. C. 841), shall be available, in addition to objects for which such funds are otherwise available, for personal services and rent in the District of Columbia; printing and binding; examination of budgets and estimates of appropriations in the field; **travel expenses in accordance with the Standardized Government Travel Regulations, the Subsistence Expense Act of 1926 as amended (except as to per diem rates outside continental United States) and the Act of February 14, 1931, as amended (5 U. S. C. 73a);** services in accordance with section 15 of the Act of August 2, 1946 (5 U. S. C. 55a); and the objects specified in the sections of this title under the head "Departments and agencies", all the provisions of which shall be applicable to the expenditure of such funds unless otherwise specified in the Act by which they are made available: *Provided*, That in the event any functions budgeted as administrative expenses are subsequently transferred to or paid from other funds, the limitations on administrative expenses shall be correspondingly reduced.

SEC. 307. No part of any funds of or available to any wholly owned Government corporation shall be used for the purchase or construction, or in making loans for the purchase or construction of any office building at the seat of government primarily for occupancy by any department or agency of the United States Government or by any corporation owned by the United States Government.

SEC. 308. Funds of corporations and agencies, subject to the Government Corporation Control Act, as amended, covered by the provisions of this or any other Act shall be available during the current fiscal year for payment of tort claims pursuant to **section 403 of the Federal Tort Claims Act** law (28 U. S. C. 2672).

SEC. 309. After June 30, 1949, the corporations or agencies subject to the Government Corporation Control Act, as amended (31 U. S. C. 841), are authorized, with the approval of the Comptroller General, to consolidate, notwithstanding the provisions of any other law, in to one or more accounts for banking and checking purposes all cash, including amounts appropriated, from whatever source derived: *Provided*, That such cash, including amounts appropriated, of such corporations or agencies shall be expended in accordance with the applicable terms of their respective enabling acts and any other acts applicable to their transactions.

REDUCTIONS IN APPROPRIATIONS

Amounts available from appropriations **[and other funds]** are hereby reduced in the sums hereinafter set forth, such sums to be carried to the surplus fund and covered into the Treasury immediately upon the approval of this Act, **[except as otherwise indicated]**:

[FUNDS APPROPRIATED TO THE PRESIDENT]

[Payments, Armed Forces Leave Act, 1946: \$135,000,000.]
[Overtime, leave, and holiday compensation: The balance remaining unobligated on June 30, 1949, such balance to be carried to the surplus fund and covered into the Treasury immediately thereafter.]

[FEDERAL WORKS AGENCY]

[Office of the Administrator: Public works advance planning under title V of the War Mobilization and Reconversion Act of 1944, \$4,164,000.]

[VETERANS' ADMINISTRATION]

[Administrative facilities: \$1,250,000.]
[Vocational Rehabilitation Revolving Fund: \$500,000.]

RAILROAD RETIREMENT BOARD

Railroad retirement account (appropriated account), 1950: \$136,712,860. (Independent Offices Appropriation Act, 1950.)

PROPOSED LEGISLATION

Fair Employment Practices Commission.—A \$700,000 appropriation for 1951 is proposed under the assumption that legislation establishing a program for the elimination of discriminatory employment practices based on race, color, religion, or national origin will be enacted during the second session of the Eighty-first Congress. The estimate would provide for initiating the program during 1951.

National Science Foundation.—The Budget includes \$500,000 for the proposed National Science Foundation in the expectation that legislation establishing it will be passed. The Foundation's primary functions will be to develop a national policy for and to support the promo-

tion of basic research and education in the sciences. It is expected that the Foundation in 1951 will make studies of the Nation's research needs, evaluate existing private and governmental scientific research programs, and determine means of strengthening the national effort in basic scientific research and education.

Other.—In addition, proposed legislation extending existing programs is discussed under the following titles:

- Displaced Persons Commission.
- Office of the Housing Expediter.
- Reconstruction Finance Corporation.
- Selective Service System.

Total obligations.....	1,537,266	1,979,428	2,259,582

PROGRAM AND PERFORMANCE

The Bureau administers the Federal Employees' Compensation Act (including the civilian war benefits program), the Longshoremen's and Harbor Workers' Act, and the War Risk Hazards Act. In addition it administers certain provisions of the War Claims Act of July 3, 1948, on a reimbursable basis, and the District of Columbia Workmen's Compensation Act, the expenses of which are paid from funds carried in the annual appropriation for the District of Columbia.

The 1949 amendments to the Employees' Compensation Act liberalizing and broadening its provisions imposes added and greater responsibilities on the Bureau in order to insure fair and equitable treatment of beneficiaries, to provide greater concentration on development of safe working practices, and to provide adequate protection of the Government.

1. *Docketing and processing of claims.*—All injuries and deaths reported under all the acts administered involve receipting, docketing, and processing of individual cases.

Case load	1949 actual	1950 estimate	1951 estimate
New cases.....	215,709	218,000	221,000
Old cases incomplete.....	50,012	53,012	53,012
Total.....	265,721	271,012	274,012

2. *Investigations.*—Field investigations primarily under the Federal Employees' Compensation Act are essential where there is doubt as to the liability of the United States.

Work load	1949 actual	1950 estimate	1951 estimate
Claims subject to investigation.....	25,332	25,550	27,000
Claim investigations made.....	619	950	1,500
Safety inspections and conferences.....	1,092	1,400	1,600

3. *Hearings and adjudications.*—In addition to the Bureau's responsibility for insuring proper adjudication of all claims presented under the various acts, formal and informal hearings are held under the Longshoremen's and Harbor Workers' Act for the purpose of determining the rights of interested parties in controverted claims.

Work load	1949 actual	1950 estimate	1951 estimate
Backlog of cases, end of year	50,012	53,012	53,012
Longshoremen's and Harbor Workers' Compensation Act:			
Formal hearings	952	1,000	1,000
Informal conferences	31,993	34,500	34,500
Case handlings	188,876	209,000	270,000
Cases closed	219,742	221,500	225,000

4. *Appellate procedure.*—The Employees' Compensation Appeals Board hears and finally decides appeals taken from the decision of the Director of the Bureau, either upon question of fact or question of law arising under any extension of the act. Decisions by the Board are subject to review only by the Board. Appeals will increase substantially subsequent to 1949 due to the more liberal provisions of the amended Federal Employees' Compensation Act.

Work load	1949 actual	1950 estimate	1951 estimate
Appeals docketed	112	175	300
Hearings held	92	120	240
Appeals closed	99	148	248
Opinions published	74	125	204

5. *Administration.*—In addition to the usual management services, this activity includes the study, control, and enforcement of safety policies, and development of procedures and methods of handling claims and preventing accidents.

Total obligations	14,279,584	33,000,000	31,500,000

PROGRAM AND PERFORMANCE

This appropriation is provided to pay authorized benefits under the Federal Employees' Compensation Act, as amended, to civil employees of the United States disabled as a result of injuries sustained in the performance of duty, and to the dependents of employees who die as a result of such injuries. It is also available for the payment of benefits extended to employees on Federal work relief projects in operation from 1933 to 1940; certain war-risk benefits, including the payment of accrued wages to employees captured by the enemy and death benefits to dependents of employees who died as a result of enemy action; and benefits extended under the civilian war benefits program.

	1949 actual	1950 estimate	1951 estimate
Long-term compensated cases	10,683	11,500	12,500
New injuries reported	84,012	84,000	87,000

The increase in the general fund appropriation for 1951 reflects in large part full year coverage under the 1949 amendments as compared with part year coverage in 1950.

This appropriation is supplemented by transfer from the war claims fund established under the War Claims Act of

BUREAU OF EMPLOYEES' COMPENSATION—Con.

Employees' Compensation Fund, Bureau of Employees' Compensation, Federal Security Agency—Continued

1948 for payment of claims covering employees of Government contractors and civilian American citizens who were captured by the Imperial Japanese Government. The reduction of \$5,000,000 in 1951 requirements is based on the fact that the greater portion of wage claims of contractor's employees outside of the United States will be paid in 1950.

Total obligations	393,805	423,800	438,200

PROGRAM AND PERFORMANCE

This is a private residential institution created by act of Congress in 1857 and composed of two schools for the education of the deaf. Practically all funds are derived from the Federal Government and payments by the District of Columbia.

1. *Instruction and administration.*—The institution is administered by a board of trustees, a president, and seven other administrative employees.

Kendall School, with a staff of 10 instructors, provides elementary and secondary education for 92 students, including 58 from the District of Columbia. The remainder, some of preschool age, pay a portion of the cost of their education.

Gallaudet College, with a staff of 20 instructors, enrolls 216 students, 145 of whom are provided with Federal scholarships. Nonscholarship students pay a portion of their cost. A normal school training department trains hearing college graduates for teaching the deaf. Since 1864 the college has enrolled 2,652 students and conferred 1,044 degrees. One instructor is to be added in 1951.

2. *Auxiliary services and plant expenses.*—Practically all students are housed and fed on the campus. Fifty-four employees provide auxiliary services and operate and maintain the physical plant.

Total obligations	4,686,505	4,922,578	5,107,818

PROGRAM AND PERFORMANCE

The Food, Drug, and Cosmetic Act and other laws enforced by the Food and Drug Administration are designed for consumer protection against adulteration and misbranding. They provide safeguards against articles which are harmful, filthy, produced under insanitary conditions, or which involve economic cheats. Control is exercised through factory inspections and examination of articles entering interstate commerce or offered for importation. The estimate for 1951 provides

FOOD AND DRUG ADMINISTRATION—Continued

Salaries and Expenses, Food and Drug Administration, Federal Security Agency—Continued

for a slight increase in enforcement personnel, new scientific equipment, expanded travel, and collection and examination of more samples.

1. *Development of standards.*—Standards of identity, quality, and fill of container, and for tolerances for poisonous substances are promulgated after investigations and formal hearings. Work on 15 classes of food and 10 insecticidal substances is now in process and will be continued in 1951.

2. *Import enforcement operations.*—Annually approximately 177,500 import shipments of commodities subject to the act are offered for entry into the country, of which approximately 21 percent are inspected. A steady increase is indicated in inspections, sample collections, and examinations. In 1949, about 17 percent of the shipments inspected were denied entry. This involved the collection of about 17,000 samples and 71,300 examinations. A slightly higher level of inspections will be maintained in 1951 with the same staff.

3. *Domestic enforcement operations.*—Factory inspections are planned on the basis of importance of the industry to the consuming public and the seriousness of probable violations of the act. Where violation is indicated, samples are collected from interstate commerce for laboratory examination as evidence for legal action. The facts are reported to the Department of Justice with recommendations for seizure, and/or prosecution or injunction through court action. Enforcement by informal warning is authorized and used in the case of minor violations. By collaboration with industry, voluntary compliance with the law is promoted. During the fiscal year 1949, 7,677 of the approximately 77,350 manufacturers, shippers, and warehouses subject to regulation were inspected. In 1950 approximately 8,225 establishments will be inspected, and 8,650 in 1951.

Domestic work load	1949 actual	1950 estimate	1951 estimate
Number of separate inspections.....	16,343	17,450	18,450
Samples collected.....	33,965	35,050	37,500
Laboratory examinations.....	46,978	48,100	51,500

4. *General administration.*—Executive direction and administrative and housekeeping activities will continue at the present level.

PROGRAM AND PERFORMANCE

The Administration tests and certifies antibiotics and insulin, and lists and certifies coal-tar colors suitable for use in foods, drugs, and cosmetics, and inspects seafood-packing establishments upon application by the packers. These services are wholly supported by fees charged against advance deposits, which are appropriated annually to cover the service costs or refunds of unearned deposits. In the fiscal year 1949, 13,937 samples of antibiotics, 288 of insulin, and 4,928 of coal-tar colors were tested. These are estimated at 15,000, 290, and 4,950, respectively, for 1950 and 1951.

During 1949, 18 packers subscribed to the seafood inspection service and 14 during 1950, with a like number estimated for 1951.

APPROPRIATION TEXT

Salaries and expenses, certification and inspection services: For expenses necessary for the certification or inspection of certain products in accordance with sections 406, 504, 506, 507, 604, 702A, and 706 of the Federal Food, Drug, and Cosmetic Act, as amended (21 U. S. C. 346, 354, 356, 357, 364, 372a, and 376), the aggregate of the advance deposits during the current fiscal year to cover payment of fees by applicants for certification or inspection of such products, to remain available until expended. The total amount herein appropriated shall be available for personal services in the District of Columbia and elsewhere; [purchase of not to exceed five passenger motor vehicles; services as authorized by section 15 of the Act of August 2, 1946 (5 U. S. C. 55a);] purchase of chemicals, apparatus, and scientific equipment; and the refund of advance deposits for which no service has been rendered. (Act of July 13, 1949, Public Law 164; Labor-Federal Security Appropriation Act, 1950.)

PROGRAM AND PERFORMANCE

Freedmen's Hospital consists of 375 general beds, 146 tuberculosis beds, and an out-patient department. In addition to furnishing patient care, it operates a training program for medical interns, postgraduate doctors, nurses, and other technical personnel, and is affiliated with Howard University as the teaching hospital for the university's medical school.

Federal appropriations for operation of the hospital are augmented by receipts from pay patients, and the District of Columbia reimburses the Federal Government for care of indigent residents of the District. Currently, the Federal share of operating costs approximates 75 percent.

1. Maintenance and operation, in-patient services.—Hospital patient loads will continue in 1951 at current levels.

PROGRAM AND PERFORMANCE

This university, primarily for the education of Negroes, operates 10 schools and colleges, with full-time enrollments in the 1948-49 school year, exclusive of the summer session, as indicated: Liberal arts, 3,030; graduate school, 302; medicine, 287; dentistry, 284; pharmacy, 189; engineering and architecture, 476; music, 285; social work, 121; law, 149; and religion, 59. The total is 5,182. Students are enrolled from 40 States, the District of Columbia, and 20 foreign countries.

1. *General administration.*—The university is privately controlled and administered by a 24-member board of trustees and a paid staff of 99 persons. The Federal Government is not represented on the board.

2. *Resident instruction and departmental research.*—A staff of 476 provides instruction and performs departmental research. Projected plans call for ultimate decreases in the liberal arts enrollment to 2,000 and in engineering and architecture to 300, and increases in the other schools for a total full-time enrollment of 5,200. In 1951 the medical and dental schools are preparing for instruction of 400 students each; all budget increases are for the expansion of staff in these schools. Some contract research is performed in the fields of medicine and science as well as basic research in the individual schools.

3. *General library.*—The general library operates with a full-time staff of 22 persons who supervise and coordinate the work of 4 other professional school libraries and various subsidiary departmental libraries. All libraries contain 258,902 volumes.

4. *Operation and maintenance of physical plant.*—A staff of 160 employees operates and maintains the physical plant including 42 permanent and temporary buildings and about 49 acres of grounds.

5. *Auxiliary enterprises and noneducational expenses.*—The university dormitories and dining halls accommodate about 30 percent of the students. Other auxiliary services include the operation of a book store and a dental students supply room. Noneducational expenses consist of scholarships, fellowships, and loan funds.

Current revenue is derived from an endowment of \$1,595,971, tuition charges of \$171 to \$360 per year, and miscellaneous fees. Federal funds provide about 51 percent of the operation cost, but are not used for support of the school of religion or the summer school.

PROGRAM AND PERFORMANCE

At present plans and specifications are being prepared for nine new buildings and two alteration jobs. Construction of one of these buildings and one alteration job are under way. Another project provides for the preparation of a master plan for development of the university. The appropriation for 1951 is to complete the planning of a medical building.

PROGRAM AND PERFORMANCE

Of the eight buildings appropriated for, the women's dormitory is under construction; contracts will be awarded for the engineering, dental, and auditorium-fine arts buildings in 1950, and for four others in 1951. Installations in the powerhouse will be completed in 1950. Requests for 1951 include cash to liquidate existing contract authority and \$910,000 additional contract authorization on the dental and auditorium-fine arts buildings.

APPROPRIATION TEXT

Construction of buildings: For construction of buildings on the grounds of Howard University, under the supervision of the [Public Buildings Administration, Federal Works Agency] *General Services Administration*, to remain available until expended, as follows:

[For beginning construction of a law school building, an administration building, a biology building and greenhouse, and men's dormitory units, together with alterations and installations in connection with such construction, including engineering and architectural services, printing and binding, and travel, \$1,000,000, which amount, except such part as may be necessary for the incidental expenses of the University, may be transferred to the Public Buildings Administration, Federal Works Agency, for the purposes of this appropriation; and in addition the Public Buildings Administration is authorized to enter into contracts for construction of such buildings, which shall provide for completion at a total cost to the Federal Government not in excess of \$1,950,000 for the law school building, \$1,625,000 for the administration building, \$1,872,000 for the biology building and greenhouse, and \$1,837,000 for the men's dormitory units: *Provided*, That the limitations on contract authority and total cost may be exceeded or shall be reduced by an amount equal to the percentage increase or decrease, if any, in construction costs generally, dating from July 1, 1948, as determined by the Federal Works Administrator;]

[For payment of obligations incurred under authority provided under this head in the Federal Security Agency Appropriation Act, 1948, and the Federal Security Agency Appropriation Act, 1949, to enter into contracts for construction of a dental school building and an auditorium building, \$2,953,425;]

In addition to the appropriations and contract authority heretofore provided under this head for construction of a dental school building

and an auditorium building, the General Services Administration is authorized to enter into contracts for such construction in an amount not to exceed \$910,000; and the limits of cost established for such buildings in the Federal Security Agency Appropriation Act, 1949, are increased from "\$2,242,520" to "\$2,742,520" for the dental school building, and from "\$2,732,985" to "\$3,142,985" for the auditorium building;

For payment of obligations incurred under authority provided under this head in the Federal Security Agency Appropriation Act, 1950, for construction of a law school building, biology building and greenhouse, administration building, and men's dormitory units, \$1,250,000;

For payment of obligations incurred under authority provided under this head in the First Deficiency Appropriation Act, 1948, as amended by the Second Deficiency Appropriation Act, 1949, to enter into contracts for construction of an engineering building and women's dormitory units, [\$1,706,000] \$744,000. (20 U. S. C. 123; Act of June 23, 1949, Public Law 119, Second Deficiency Appropriation Act, 1949; Labor-Federal Security Appropriation Act, 1950.)

PROGRAM AND PERFORMANCE

A total of \$29,436,741 is authorized under this appropriation title for grants to the States, Hawaii, and Puerto Rico for vocational education, in addition to \$7,150,123 under the Smith-Hughes Act. These funds are allocated to the States on a population basis for training in agriculture, home economics, trade and industry, and distributive occupations, and for the training of teachers of these subjects. Federal funds must be matched in each State. In the 1948-49 school year, a total of over 3,000,000 students received vocational instruction in less than half of the public secondary schools. The program is administered by the Vocational Education Division of the Office of Education.

PROGRAM AND PERFORMANCE

1. *Collection and analysis of statistics.*—The Office of Education gathers factual data and information on current educational methods, practices, and conditions in the United States and foreign countries so that changes, trends, and needs can be appraised and forecast. Information is distributed to teachers, administrators, legislative bodies, and other agencies interested in education. For improvement of the collection and analysis of statistics it is proposed to add four people in 1951.

2. *Administration of grants.*—The Office also administers programs involving grants-in-aid for vocational education and land-grant colleges. One-fourth of the total staff works on this activity, which involves allocation of funds, reviewing reports, assistance to States with appraisal and development of programs, preparation of materials, and training of teachers.

3. *Advice on school organization and administration.*—Through studies and research, conferences, consultation, and correspondence the Office furnishes information and advice to States, schools, and colleges on school organization and administration, including finance, legislation, pupil transportation, plant construction and maintenance, and reorganization of school districts. Increased enrollments occasion many requests for help; 10 additional staff are recommended in 1951 to aid with such problems,

OFFICE OF EDUCATION—Continued

Salaries and Expenses, Office of Education—Continued

including a study of financial assistance for college students.

4. *Advice on methods of instruction.*—To secure improved instruction the Office furnishes information and advice to States and local authorities on methods of instruction in all subjects and at all levels. Many studies are conducted in this area, and as better practices are discovered they are brought to the attention of educational leaders.

5. *Promotion and improvement of the teaching professions.*—Through studies and other techniques the Office helps the States, schools, and colleges to meet the present shortage of teachers, especially in the elementary schools, and to improve training of teachers at all levels so as to secure more adequate supply of better qualified teaching personnel.

6. *International educational relations.*—The Office continuously studies foreign school systems and furnishes information and advice to schools and colleges on educational developments abroad, and on placement of foreign students in colleges and universities. In addition, the Office works with the State Department on the preparation and exchange of educational materials and exchange of personnel with foreign countries. In 1951 the Office will need two additional people for this activity.

7. *Preparation of instructional materials for apprentice training.*—The Office will need in 1951 a very small staff and a small amount for contractual agreements with States for experimental preparation of guides and manuals for apprentice training in the public schools.

8. *Administration.*—General administrative direction of the Office is provided through the Office of the Commissioner and the Division of Central Services. A second associate commissioner is recommended for this activity.

PROGRAM AND PERFORMANCE

Advances were made to the Office of Education during the fiscal year 1949 from various Government agencies to assist in carrying forward programs for the distribution of surplus property to institutions of higher learning; preparation of visual aids for the naval training program and for health services; conduct of the Fulbright teacher exchange; and surveying the training problems for the air training command.

PROGRAM AND PERFORMANCE

Transfer of funds was made in 1950 by the General Services Administration to the Office of Education to provide for the equitable distribution to the States, for educational use, of real property surplus to the needs of the Government. Direct responsibility is now placed upon the Federal Security Agency and subsequent appropriations for this activity will be made to the Office of the Administrator.

Permanent definite appropriations:

Colleges for Agriculture and the Mechanic Arts, Office of Education—

FUNDS AVAILABLE FOR OBLIGATION: Appropriation or estimate—1949, \$2,550,000; 1950, \$2,550,000; 1951, \$2,550,000.

PROGRAM AND PERFORMANCE

This permanent specific appropriation provides for funds to be paid in the amount of \$50,000 to each State and Territory. The funds may be used for instruction, and the facilities for such instruction, in agriculture and the mechanic arts, including related subjects such as

English, mathematics, and economics, and for providing courses for the preparation of instructors for teaching the elements of agriculture and the mechanic arts (7 U. S. C. 301-308, 321-328).

OBLIGATIONS BY ACTIVITIES

Grants to States—1949, \$2,550,000; 1950, \$2,550,000; 1951, \$2,550,000.

OBLIGATIONS BY OBJECTS

11 Grants, subsidies, and contributions—1949, \$2,550,000; 1950, \$2,550,000; 1951, \$2,550,000.

PROGRAM AND PERFORMANCE

Vocational rehabilitation is a service provided through a Federal-State program to make it possible for disabled persons with employment handicaps to obtain suitable, remunerative employment. Over 58,000 persons were rehabilitated in 1949. Their weekly earnings at the time the cases were closed as rehabilitated averaged about \$35 and was six times as high as the weekly average (\$6) at the start of their rehabilitation. The 1951 estimate provides for an increase of \$2,500,000 over 1950 and will enable the States to expand services to the more severely handicapped.

1. *Purchase of case services.*—States are reimbursed for 50 percent of the costs of the purchase of case services for disabled clients including medical examinations, surgical and therapeutic treatment, hospitalization (not to exceed 90 days), prosthetic appliances, transportation, occupational tools and licenses, vocational training, and maintenance. The amount provided for 1951 will enable the States to purchase such services for about 110,000 disabled persons, an increase of 23,000 over the number aided in 1950. The estimate also provides \$10,000 for 100-percent reimbursement to the States for similar services provided war-disabled civilians. It is anticipated that approximately 50 disabled persons in this category will be provided services.

2. *Counseling, guidance, and placement services.*—Successful rehabilitation is dependent on the development of a sound plan for each disabled individual. The \$9,660,000 included in the estimate for 1951 for this activity is to reimburse the States for 100 percent of the necessary costs for these services and will provide the salaries and expenses for about 2,250 State employees including 1,100 counselors. The State vocational rehabilitation agencies will provide counseling and guidance services to about 220,000 disabled clients in 1951, about the same number as in 1950.

3. *State administration.*—This activity provides the necessary costs of the salaries and other expenses of the administrative staffs of the State vocational rehabilitation agencies which are reimbursed 100 percent from Federal funds. The amount will enable the States to maintain this activity at the 1950 level when approximately 350 persons were employed for this function.

APPROPRIATION TEXT

Payments to States (including Alaska, Hawaii, and Puerto Rico): For payments to States (including Alaska, Hawaii, and Puerto Rico) in accordance with the Vocational Rehabilitation Act, as amended (29 U. S. C. ch. 4), including payments, in accordance with regulations of the Administrator, for one-half of necessary expenditures for the acquisition of vending stands or other equipment in accordance with section 3 (a) (3) (C) of said Act for the use of blind persons, such stands or other equipment to be controlled by the State agency, [\$20,500,000 of which] and not to exceed [\$225,000 shall be available to the Federal Security Administrator] \$230,000 for providing rehabilitation services to disabled residents of the District of Columbia, as authorized by section 6 of said Act, which latter amount shall be available for administrative expenses in connection with providing such services in the District of Columbia, printing and binding, including the purchase of reprints, and travel; \$23,000,000, of which not to exceed \$9,660,000 shall be available for guidance and placement of disabled individuals: Provided, That not to exceed 15 per centum of the appropriation shall be used for administrative purposes: And provided further, That section 3709 of the Revised Statutes, as amended, shall not apply to any purchase made or service rendered when the aggregate amount involved does not exceed \$400.

Payments to States (including Alaska, Hawaii, and Puerto Rico), next succeeding fiscal year: For making, after May 31 of the current fiscal year, payments to States in accordance with the Vocational Rehabilitation Act, as amended (including the objects specified in the preceding paragraph), for the first quarter of the next succeeding fiscal year such sums as may be necessary, the obligations incurred and the expenditures made thereunder to be charged to the appropriation therefor for that fiscal year: Provided, That the payments

made pursuant to this paragraph shall not exceed the amount paid to the States for the first quarter of the current fiscal year. (*Labor-Federal Security Appropriation Act, 1950.*)

PROGRAM AND PERFORMANCE

Vocational rehabilitation is provided to eligible handicapped civilians by 87 State agencies. The Office of Vocational Rehabilitation appraises the effectiveness of these State programs and their continued compliance with the Federal act, and assists the States in providing effective State-wide programs. This Office also administers the Randolph-Sheppard Act which authorizes the operation of stands in Federal buildings by blind persons.

1. *Development and implementation of policies and standards.*—The staff of the Office of Vocational Rehabilitation develop policies and standards for a wide variety of services provided the disabled by the State vocational rehabilitation agencies and for the administrative and fiscal planning activities of the State agencies; furnish technical and consultative services to State agencies; and conduct surveys of service programs as well as administrative audits and fiscal reviews. A small increase for this activity is planned for 1951.

2. *Review of State plans, budgets, and grants.*—Under the Vocational Rehabilitation Act, as amended, each State agency is required to submit a working plan, setting forth the scope of the State program and the methods and practices it will use in providing rehabilitation services. Since the plan must reflect current operations, the State agencies submit amendments to their plans from time to time. Some 230 such amendments were reviewed and acted upon in 1949. The State agencies also submit annual budget estimates, which are reviewed and acted upon prior to the beginning of each fiscal year. A small increase in this activity is planned for 1951.

3. *Collection and dissemination of information.*—This activity includes producing informational materials, advising State and Federal officials in public information and public relations matters, maintaining liaison and relations with news media and cooperating organizations, and answering correspondence from individuals.

4. *Administration.*—This activity includes all functions and activities of the Director’s office, as well as all personnel and business management functions and services.

PUBLIC HEALTH SERVICE

APPROPRIATION TEXT

For necessary expenses in carrying out the Public Health Service Act, as amended (42 U. S. C. ch. 6A) (hereinafter referred to as the Act), and other Acts, including (with the exception of the appropriation “Pay, and so forth, commissioned officers, Public Health Service”) personal services in the District of Columbia; purchase of reports, documents, and other material for publication; services as authorized by section 15 of the Act of August 2, 1946 (5 U. S. C. 55a); preparation and display of posters and exhibits by contract or otherwise; packing, unpacking, crating, uncrating, drayage, and transportation of personal effects of commissioned officers and transportation of their dependents on change of station; and increased allowances to Reserve Officers for foreign service; as follows: (*Labor-Federal Security Appropriation Act, 1950.*)

PROGRAM AND PERFORMANCE

The number of reported syphilis cases has declined from a peak of 592,941 in 1943 to 353,393 in 1948 and 300,975 in 1949. The activities financed from this appropriation have two major purposes: (1) to assist States and localities in case finding and treatment; and (2) to develop an immunizing agent and more effective treatment and diagnostic agents and methods.

GRANTS

1. *Grants to States for case finding, treatment, and other control activities.*—It is estimated that the total of all Federal, State, and local expenditures in 1951 for these purposes will equal or exceed that of 1950. The estimated reduction for 1951 in Federal grants allotted to States on a formula basis reflects anticipated increases in State and, particularly, local contributions, both of which have been steadily rising in recent years. Significant increases in local services are also expected to result from the expansion in general grants to States proposed under “Assistance to States, General, Public Health Service” for increasing the number of adequately staffed local health units and for other general health purposes. In addition, estimated decreases in State and local contributions for in-patient treatment in accordance with a forecast of declining in-patient day loads should release more State and local funds for case finding and out-patient treatment.

2. (a) *Grants to States for special in-patient treatment centers.*—Admissions have declined from a peak of 181,754 in 1947 to 179,184 in 1948 and to 160,066 in 1949, and average patient days per admission from 9.8 days in 1947 to 9.3 days in 1948 and to 8.8 days in 1949. The forecasts of patient-day loads and estimates of the Federal share of costs in 1950 and 1951 compared to 1949 are as follows:

	1949 actual	1950 estimate	1951 estimate
Patient days.....	1,409,085	1,280,000	1,100,000
Federal share of patient-day cost.....	\$3.90	\$3.90	\$3.90
Total amount of Federal share.....	\$5,492,794	\$4,992,000	\$4,290,000

Approximately \$200,000 in savings for 1950 are expected to result from lower patient-day loads than those originally estimated for the 1950 budget.

(b) *Grants to States for special case-finding projects.*—Continuing progress by States in achieving improved case-finding methods is expected to decrease the need for making Federal grants on a special project basis.

DIRECT OPERATIONS

1. *Clinical and laboratory research.*—Research is directed toward the development of an immunizing agent, the discovery of more effective therapeutic and diagnostic agents, and the determination of the most effective use of known agents, including optimum penicillin-therapy schedules.

2. *Technical assistance to States.*—Assistance is furnished the States in medical, nursing, and laboratory activities through field studies and demonstrations in improved case-finding methods and treatment, and through preparation and dissemination of scientific information affecting venereal diseases.

3. *Administration.*—1951 expenses for program direction and administrative services are expected to be slightly below those of 1950.

APPROPRIATION TEXT

Venereal diseases: To carry out the purposes of sections 314 (a) and 363 of the Act with respect to venereal diseases, including the operation and maintenance of centers for the diagnosis, treatment, support, and clothing of persons afflicted with venereal diseases; transportation and subsistence of such persons and their attendants to and from the place of treatment or allowance in lieu thereof; diagnosis and treatment (including emergency treatment for other illnesses) of such persons through contracts with physicians and hospitals and other appropriate institutions [without regard to section 3709 of the Revised Statutes, as amended]; fees for case finding and referral to such centers of voluntary patients; reasonable expenses of preparing remains or burial of deceased patients; recreational supplies and equipment; leasing of facilities and repair and alteration of leased facilities; the purchase of not to exceed [sixty] twenty passenger motor vehicles for replacement only, and for grants of money, services, supplies, equipment, and use of facilities to States, as defined in the Act, and with the approval of the respective State health authorities, to counties, health districts, and other political subdivisions of the States, for the foregoing purposes, in such amounts and upon such terms and conditions as the Surgeon General may determine; [\$16,000,000] \$14,000,000. (Labor-Federal Security Appropriation Act, 1950.)

Appropriated 1950, \$16,000,000 Estimate 1951, * \$14,000,000

* Excludes \$83,317 for activities transferred in the estimates to appropriations as follows: "Salaries, Office of Administrator, Federal Security Agency" \$68,712 "Salaries and expenses, division of service operations, Federal Security Agency" 14,605 The amounts obligated in 1949 and 1950 are shown in the schedule as comparative transfers.

PROGRAM AND PERFORMANCE

The reported incidence of tuberculosis in this country remains high; 138,331 cases were reported in 1948. The activities financed from this appropriation have two major purposes: (1) to assist States and localities in case finding, diagnosis, and in placing cases under local medical supervision; and (2) to determine the cause of the disease and the mode of its transmission and to develop improved methods of detection, diagnosis, and treatment as well as an effective immunizing agent.

GRANTS

1. *Grants to States for tuberculosis control activities.*—It is estimated that the total of all Federal, State, and local expenditures in 1951 will equal or exceed that of 1950. The estimated reduction in Federal grants to States for 1951 reflects anticipated increases in State and, particularly, local contributions, both of which have been rising in recent years. In addition, significant increases in local

services are expected to result from the expansion in general grants to States proposed under “Assistance to States, General, Public Health Service” for increasing the number of adequately staffed local health units and for other general health purposes.

DIRECT OPERATIONS

1. *Cooperative applied research.*—In cooperation with States, medical schools, and private investigators, the Service conducts studies of the effectiveness of BCG vaccine for the prevention of tuberculosis and of problems in epidemiology, diagnosis, prognosis, immunology, and therapy of tuberculosis. In addition, the Service makes related studies of chest X-ray interpretation and the development and application of radiological equipment. The 1951 estimate provides for an expansion of BCG vaccine studies in Puerto Rico to include pre-school children.

2. (a) *Consultative services to States.*—These relate to medical, public health nursing, and medical social work, as well as case register and record systems, training in laboratory technique and evaluation, and teaching of chest X-ray interpretations.

(b) *Mass X-ray surveys in large cities.*—It is estimated that over two-thirds of the Nation’s tuberculosis problem is concentrated in cities. In the last 4 years, the Public Health Service has taken chest X-ray films for 2,435,835 adults. Of that number, approximately 24,571 with a tentative diagnosis of tuberculosis have been referred to physicians for diagnosis and treatment. During 1950, the Service is for the first time operating with two complete teams on a full-year basis. Forecasts of work load and unit costs are as follows:

	1949 actual	1950 estimate	1951 estimate
Chest X-ray films	1,173,803	2,479,362	2,900,000
Cost per film	\$0.997	\$0.460	\$0.430
Amount	\$1,170,433	\$1,140,508	\$1,247,000

The relatively high unit costs for 1949 reflect initial equipment and personnel costs connected with organizing a new survey team. Significantly lower unit costs in 1950 and 1951 are expected to result from an increased volume of films and the introduction of improved methods and procedures.

(c) *Follow-up work after mass X-ray surveys.*—Mass X-ray surveys cause an increase in cases requiring follow-up, which is frequently five or six times the normal load. The facilities and personnel of local health departments usually cannot effectively take care of such a rapid increase. It is proposed, as a new program, to assign trained professional workers to local health departments in the two metropolitan survey areas to be covered in 1951 for a specified period of time after the mass case-finding surveys to assist in final diagnosis and other follow-up work.

3. *Administration.*—1951 expenses for program direction and administrative services are expected to remain at approximately the 1950 level.

PROGRAM AND PERFORMANCE

Latest available information indicates that little more than one-half of all counties are serviced by full-time local health units, and many of these are inadequately staffed. This means that most counties lack adequate services in one or more of such fundamental phases of public health as public health nursing, public health dentistry, control of communicable diseases, and sanitation. The basic purpose of this appropriation is to assist States in meeting the need for local health services as well as to provide financial support for State health services of a general character.

GRANTS

1. *Grants to States for general health.*—The proposed increase is primarily for assisting States to expand and strengthen local health services. The 1951 estimate of \$23,450,000 for grants under this appropriation, together with the 1951 estimate of \$3,550,000 for grants to States under "Mental health activities, Public Health Service," equals the limit of \$27,000,000 imposed by existing law.

DIRECT OPERATIONS

1. *Technical assistance to States.*—The present program includes: (a) consultative services to States for local and general health services, and review and analysis of State plans, programs, and budgets; (b) sanitation and other general training of State and local public health personnel, assistance to States in establishing training programs, and in-service training for Public Health Service officers in local health units; and (c) demonstrations in nutrition and diabetes. The 1951 estimate provides for the addition of a screening team for finding diabetes cases and demonstrating the case-finding technique to local health departments. Other increases are for strengthening the training program, reduction of lapses in established positions, and within-grade advancements.

2. *Studies in chronic disease problems.*—The 1951 estimate provides increases in funds for studies in: the development of techniques for screening individuals in one visit for various chronic diseases, mass screening for glaucoma, and home care and restorative services for the chronically ill.

3. *Collection, analysis, and dissemination of vital statistics.*—In addition to continued support for collecting, analyzing, and disseminating statistical data on births, deaths, stillbirths, illnesses, marriages, and divorces, the 1951 estimate provides increases for evaluating the number and distribution of unregistered births and the completeness with which infants are enumerated in the seventeenth decennial census, as well as for operating expenses of the United States National Committee on Vital and Health Statistics, sponsored by the World Health Organization.

4. *Administration.*—1951 expenses for program direction and administrative services are expected to be slightly above those of 1950.

PROGRAM AND PERFORMANCE

Despite notable progress in recent years, many communicable diseases are not yet under control. This appropriation finances laboratory and field investigations and control operations designed to supplement and support the activities of the States and localities in the control of communicable diseases.

1. *General communicable disease control.*—This includes epidemiology, laboratory technological services, general veterinary public health activities, engineering, entomological and technical development activities, and training and production of training materials. The 1951 estimate provides increases for: (a) improving the diagnostic methods and performance of State, local, and other non-profit laboratories; (b) expanding epidemiological studies of the mode of transmission of virus diseases, streptococcal infections, and enteric diseases; and (c) expanding studies of the health hazards involved in the use of new insecticides, rodenticides, and other commercial poisons in the control of communicable diseases.

2. *Investigation and control of specific communicable diseases.*—These diseases are malaria, typhus, plague and other rat-borne diseases, rabies, leprosy, infant diarrheal diseases, poliomyelitis, encephalitis and other virus diseases, and "Q" fever and other rickettsial diseases. The 1951 estimate reflects reductions in control operations for malaria and typhus of 42 and 56 percent, respectively, in accordance with morbidity rates which have sharply declined from their wartime and postwar peaks. Only partially offsetting increases are estimated for investigations of infant diarrheal diseases and encephalitis.

3. *General epidemic and disaster aid.*—Emergency aid is furnished in disease epidemics and disasters which create problems beyond the capacity of State health departments.

4. *Administration.*—The 1951 estimate for program direction and administrative services reflects savings from improved management.

PROGRAM AND PERFORMANCE

The purpose of the activities financed from this appropriation is to supplement and support the activities of States and localities in promoting and preserving the public health through control of the basic essentials of individual and community life—air, water, food, and shelter.

1. *Water pollution control.*—The present program consists of the initial development and organization of activities authorized in the Water Pollution Control Act of 1948, including: technical and consultative services on pre-

vention and abatement of water pollution; preparation of comprehensive river basin programs for pollution control; and field and laboratory investigations in devising and perfecting methods of testing for and treating certain industrial wastes. The 1951 estimate provides increases in funds for the further development of these activities to meet the objectives set forth in the act.

2. *Radiological health services.*—These include the collection, analysis, and dissemination of information relative to the hazards of handling, using, and disposing of radioactive substances and the training of personnel competent to render advisory services to Federal, State, and local authorities in radiological health problems. Increases in funds are proposed for the establishment of a radiological health training unit.

3. *Milk and food sanitation and other general sanitation activities.*—These include consultative and technical assistance to State and local authorities and laboratory and field investigations in sanitation of water, milk, shellfish, and other foods. The 1951 estimate provides increases for a new program of certifying interstate shipments of milk and for intensification of activities in shellfish sanitation.

4. *Sanitation of interstate land, water, and air carriers.*—Under the interstate quarantine regulations, safe food and water must be placed aboard carriers, food-handling equipment and practices must be adequate to prevent contamination, and rest room facilities must be properly designed and maintained. Compliance is obtained through inspections, sanitation guides and standards, and review of plans prior to construction. The estimates for 1950 and 1951 are based on approximately 6,030 inspections.

5. *Industrial hygiene.*—Technical and consultative services are furnished to States, local authorities, and industry, including assistance in establishing, conducting, and improving industrial hygiene services and in making atmospheric pollution studies. Research and investigations are undertaken in the evaluation of injurious and objectionable chemical, physical, and biological agents used or produced in industrial processes, and in the development of control measures. The 1951 estimate reflects increased costs for rents, utilities, and other services resulting from a necessary move from Government-owned space to rented space.

6. *Administration.*—1951 expenses for program direction and administrative services are expected to be slightly above those of 1950.

APPROPRIATION TEXT

Engineering, sanitation, and industrial hygiene: For expenses, not otherwise provided, necessary to carry out those provisions of sections 301, 311, and 361 of the Act relating to sanitation and other aspects of environmental health, including enforcement of applicable quarantine laws and interstate quarantine regulations, and for carrying out the functions of the Surgeon General under the Water Pollution Control Act (33 U. S. C. 466-466 (j)), including purchase of not to exceed thirty-five passenger motor vehicles, of which seven shall be for replacement only; \$4,000,000.

Estimate 1951, * \$4,000,000

* Estimate is for activities previously carried under appropriations as follows:
 "Salaries and expenses, Public Health Service"..... \$754,648
 "Assistance to States, general, Public Health Service"..... 1,162,724
 "Control of communicable diseases, Public Health Service"..... 295,064
 "Salaries and expenses, water pollution control, Public Health Service"..... 1,787,564
 The amounts obligated in 1949 and 1950 are shown in the schedule as comparative transfers.

Grants, Water Pollution Control, Public Health Service—

FUNDS AVAILABLE FOR OBLIGATION: Appropriation or estimate—1950, \$1,000,000; 1951, \$1,000,000.

PROGRAM AND PERFORMANCE

Grants are made to State and interstate water pollution agencies in order to assist them in the conduct of surveys, studies, investigations, and research related to the prevention and control of water pollution caused by industrial wastes.

OBLIGATIONS BY ACTIVITIES

Grants to States for water pollution surveys—1950, \$1,000,000; 1951, \$1,000,000.

OBLIGATIONS BY OBJECTS

11 Grants, subsidies, and contributions—1950, \$1,000,000; 1951, \$1,000,000.

APPROPRIATION TEXT

Grants, water pollution control: For grants to carry out section 8 (a) of the Water Pollution Control Act, approved June 30, 1948 (Public Law 845) (33 U. S. C. 466-466 (j)), \$1,000,000, to remain available until expended. (Labor-Federal Security Appropriation Act, 1950.)

Appropriated 1950, \$1,000,000 Estimate 1951, \$1,000,000

Total obligations.....	1,117,998	1,317,000	1,259,000

PROGRAM AND PERFORMANCE

The activities financed from this appropriation have two basic purposes. The first is to supplement and strengthen the services of the Territorial Department of Health to meet the needs of an expanding military and civilian population in Alaska. The second is to enable the Public Health Service to conduct field and laboratory investigations of the disease problems of the Territory, many of which are different from those in the continental United States.

GRANTS

1. *Special grant to Alaska for general health purposes.*—This grant supplements Territorial, local, and other funds available to the Alaska Department of Health. A slight reduction takes account of a corresponding increase in the allocation to Alaska which would result from the expansion in general grants to States proposed under "Assistance to States, General, Public Health Service."

DIRECT OPERATIONS

1. *Technical assistance to Alaska.*—The Public Health Service assists Alaska through loans of personnel, procurement of supplies, and provision of other services relating to control of venereal diseases and tuberculosis and to sanitation and other general health problems. Decreases in 1951 reflect mainly nonrecurring items of expense incurred in 1950.

2. *Field and laboratory investigations.*—The Service has undertaken long-range studies in Alaska in environmental sanitation, housing, entomology, nutrition and biochemistry, physiology, animal-borne diseases, epidemiology, and infectious diseases. Decreases in the 1951 estimate reflect mainly nonrecurring items of expenses incurred in 1950.

3. *Administration.*—1951 expenses for program direction and administrative services are expected to remain at approximately the 1950 level.

PROGRAM AND PERFORMANCE

The Federal Government provides financial assistance to States, local governments, and nonprofit agencies to defray part of the cost of construction of hospital and public health center projects. Contract authorization totaling \$150,000,000 annually is allocated to the States and Territories on the basis of population and economic need. Actual payments under this contract authority are made as construction proceeds. In no case is the Federal share greater than 66 $\frac{2}{3}$ percent or less than 33 $\frac{1}{3}$ percent of the cost of any project.

Actual and estimated progress of this program since initiation of the construction phase is summarized in the following statement. Amounts shown are cumulative.

Fiscal year	Number of projects approved	Allotments to States	Federal share of approved projects	Appropriations for Federal payments	Federal payments
1948.....	44	\$75,000,000	\$4,009,380	\$15,000,000	\$392,183
1949.....	501	150,000,000	90,114,528	55,000,000	9,685,282
1950.....	1,001	300,000,000	239,905,067	95,000,000	83,059,843

OBLIGATIONS BY ACTIVITIES

Grants for hospital construction—1949, \$86,105,148; 1950, \$149,790,539; 1951, \$150,000,000.

OBLIGATIONS BY OBJECTS

11 Grants, subsidies, and contributions—1949, \$86,105,148; 1950, \$149,790,539; 1951, \$150,000,000.

APPROPRIATION TEXT

Grants for hospital construction: For liquidation of contractual obligations authorized by the Congress to be incurred during the fiscal year 1948 or any subsequent fiscal year for construction grants under part C, title VI, of the Act, as amended, [\$15,000,000] \$125,000,000, to remain available until expended. Allotments under such part C to the several States for the current fiscal year shall be made on the basis of [\$75,000,000, a part of the sum authorized to be appropriated for that fiscal year] \$150,000,000. Whenever the Surgeon General shall have approved an application for a construction project in accordance with section 625 of the Act, subject to the amount of the allotments available to the States for such purposes, the Federal share of the cost of such project, as provided by the Act, shall constitute a contractual obligation of the Federal Government.

[The paragraph "Grants for hospital construction" under the heading "Public Health Service" in the Federal Security Agency Appropriation Act, 1950, is amended by striking out "\$75,000,000" and inserting in lieu thereof "\$150,000,000."] (*Act of Oct. 25, 1949, Public Law 380, 81st Cong.*)

[For an additional amount for "Grants for hospital construction," \$25,000,000, to remain available until expended.] (*Second Supplemental Appropriation Act, 1950; Labor-Federal Security Appropriation Act, 1950.*)

Appropriated 1950, **\$40,000,000** Estimate 1951, **\$125,000,000**

PROGRAM AND PERFORMANCE

This appropriation finances the direct expenses of the Public Health Service under the hospital construction program.

1. *Technical services and medical and hospital resources activities.*—The Service assists the States and their communities in making inventories of their hospitals and health centers, determining the additional facilities required, and developing a coordinated program to meet the indicated need. Proposed hospital and medical center projects for which Federal financial help is requested are reviewed to determine eligibility for assistance, and the project plans and specifications are reviewed for compliance with construction standards. To assure adequate facilities and adherence to cost limits, technical assistance is provided on architectural and engineering aspects. The Service is also authorized by recent legislation to conduct research, experiments, and demonstrations toward the effective development and utilization of hospital serv-

ices, facilities, and resources. Funds are included for initiating this program.

2. *Grants for research, experiments, and demonstrations.*—The new legislation authorizes the Public Health Service to make grants-in-aid to States, local governments, and nonprofit organizations for projects for the conduct of research, experiments, or demonstrations toward the development, utilization, and coordination of hospital services, facilities, and resources. The funds requested are for initiating this program.

3. *Administration.*—This includes administrative direction of the program and its financial administration.

PROGRAM AND PERFORMANCE

This appropriation provides funds for the operation of 26 hospitals and 120 out-patient facilities which render medical care to legal beneficiaries of the Service. The major groups eligible for care in these hospitals are American seamen, United States Coast Guard personnel, Bureau of Employees' Compensation cases, persons afflicted with Hansen's disease (leprosy), and drug addicts. These hospitals also care for a considerable number of patients who are beneficiaries of other Federal agencies; the appropriation is augmented by reimbursements from these agencies. At present about 80 percent of the operating expense of the hospitals is met from the appropriation and 20 percent from reimbursements.

Funds included in this appropriation provide for continuing the standard of care and treatment in 1951 at the present level.

1. *Operation of marine hospitals.*—This activity includes 21 general hospitals, 2 tuberculosis hospitals, and the National Leprosarium at Carville, La. Hospital patient loads are expected to increase slightly over current levels.

AVERAGE DAILY PATIENT LOAD

	1949 actual	1950 estimate	1951 estimate
General hospitals	4,646	4,677	4,687
Tuberculosis hospitals	435	435	450
Leprosarium	393	398	400
Total	5,474	5,510	5,537

2. *Operation of narcotic hospitals.*—Two neuropsychiatric hospitals are operated for the care and treatment of drug addicts and other mentally ill patients. Patient load was 1,988 in 1949 and is estimated to be 2,009 in 1950 and 2,063 in 1951.

PUBLIC HEALTH SERVICE—Continued

Hospitals and Medical Care, Public Health Service—Continued

3. *Operation of out-patient clinics and offices.*—There are 17 full-time out-patient clinics and 103 part-time out-patient offices. A total of 649,691 treatments and examinations were given in 1949; it is estimated that 679,443 will be given in 1950 and 675,962 in 1951.

4. *Coast Guard, medical services.*—Medical services are provided by the Service for Coast Guard personnel at shore stations and on vessels. The estimate covers the pay and allowances of Service personnel detailed to the Coast Guard and other expenses of medical care. The increase is due principally to the staff required for additional oceangoing vessels which the Coast Guard plans to put in operation.

5. *Administration.*—This provides for the professional and administrative direction of the above programs.

Total obligations.....	3,145,609	3,129,055	3,104,000

PROGRAM AND PERFORMANCE

The purposes of this appropriation are: (1) to prevent the introduction of epidemic diseases into the United States from foreign countries; and (2) to provide medical services to the Department of State and to the Immigration and Naturalization Service in the examinations of aliens. During 1949, no reported outbreaks of diseases were attributed to introduction from other countries.

1. *Medical examinations of immigrants at the Mexican and Canadian borders and quarantine inspections at the Mexican border.*—The number of quarantine inspections increased from 18,375,325 in 1948 to 23,969,329 in 1949. The number of persons without appropriate immunization documents who were vaccinated increased from 68,838 in 1948 to 86,229 in 1949. In the same period, immigration examinations declined from 287,833 to 264,702.

2. *Medical examinations of visa applicants in foreign countries.*—The number of examinations of such applicants at the various consulates in Europe, Canada, Mexico, Cuba, and China declined from 103,199 in 1948 to 79,870 in 1949. The scope of these examinations, however, was broadened in 1949.

3. *Medical examinations of aliens and quarantine inspections of persons, vessels, and aircraft entering the United States or its insular possessions.*—The number of examinations of entering aliens increased from 1,025,970 in 1948 to 1,103,612 in 1949. In addition, the number of inspections of airplane passengers and airplane crews as well as vessel passengers increased significantly in the same period. However, the inauguration of dockside boarding at stations wherever feasible is expected to effect substantial savings in boat maintenance and operating personnel.

4. *Administration.*—1951 expenses for program direction and administrative service are expected to remain at approximately the 1950 level.

PROGRAM AND PERFORMANCE

The Service appraises the health needs of Federal employees and provides professional and technical guidance to Federal agencies in the development and operation of employee health programs. The Service also operates a health program directly for the Federal Security Agency and, on a reimbursable basis, conducts programs for other Federal agencies.

PROGRAM AND PERFORMANCE

The purpose of the activities financed from this appropriation is to foster and conduct research in fundamental problems in microbiology, communicable diseases, community health, pathology and pharmacology, physiology, biochemistry and nutrition, chemistry and chemotherapy, physical biology, and other fields.

GRANTS

1. *Grants to medical schools and other institutions and to individuals for research and training.*—1950 funds are supporting approximately 565 research projects, averaging \$9,700 a project, and 170 research fellowships, averaging \$2,940 each. The 1951 program contemplates a sizable expansion in research grants, particularly for support of extensive investigations in a new field of medical research recently opened up by discovery of the therapeutic activity of certain steroid compounds, including cortisone and adrenocorticotrophic hormone (ACTH), which promise beneficial effect in the treatment of rheumatoid arthritis and other diseases.

DIRECT OPERATIONS

1. *Research.*—This supports basic research in fundamental physiological and biochemical processes, in infectious and tropical diseases, and in biologics control. The 1951 estimate contemplates expansion of studies of the causes and possible cures for the crippling diseases of the bones and joints, with particular emphasis on rheumatoid arthritis, including research in cortisone, ACTH, and related compounds. Proposed increases are partially offset by the discontinuation of yellow-fever vaccine production by 1951.

2. *Other direct operations.*—The expense of administering the research grant and fellowship program in 1951 is expected to approximate that incurred in 1950. The cost of program direction and central administration to this appropriation will be below that of 1950 as a result of estimated reimbursements from “Mental health activities, Public Health Service” for administrative services rendered the National Institute of Mental Health.

APPROPRIATION TEXT

National Institutes of Health, operating expenses: For the activities of the National Institutes of Health, not otherwise provided for, including research fellowships and grants for research projects pursuant to section 301 of the Act; the regulation and preparation of biologic products; the purchase of not to exceed [ten] six passenger motor vehicles for replacement only; not to exceed \$1,000 for entertainment of visiting scientists when specifically approved by the Surgeon General; and erection of temporary structures for storage of equipment and supplies and housing of animals, \$12,075,000; and, in addition, the Surgeon General is authorized, upon the recommendations of the National Advisory Health Council, to approve applications for research grants, not to exceed a total of \$1,925,000, for periods beyond the current fiscal year, and such grants shall, if approved during the current fiscal year, constitute a contractual obligation of the Federal Government \$13,250,000. (42 U. S. C. 241, 262, and 263; Labor-Federal Security Appropriation Act, 1950.)

Appropriated 1950, \$12,075,000 Estimate 1951, a \$13,250,000

a Includes \$87,000 for activities previously carried under "Operating expenses, National Cancer Institute, Public Health Service."

Excludes \$469,614 for activities transferred in the estimates to appropriations as follows:
 "Operating expenses, National Cancer Institute, Public Health Service"..... \$215,000
 "Dental health activities, Public Health Service"..... 57,750
 "Operating expenses, National Heart Institute, Public Health Service"..... 95,250
 "Control of tuberculosis, Public Health Service"..... 101,614
 The amounts obligated in 1949 and 1950 are shown in the schedule as comparative transfers.

PROGRAM AND PERFORMANCE

Approximately 200,000 people died from cancer in 1948. It is estimated that 600,000 people are presently under treatment for cancer and that 375,000 new cases are diagnosed each year. The activities financed from this appropriation have three major purposes: (1) to foster and conduct research in the causes of the various types of cancer and in the development of improved methods of detection, diagnosis, and treatment; (2) to improve teaching in cancer problems and increase the supply of personnel trained for cancer work; and (3) to assist in developing and maintaining detection, diagnostic, and home care services at the local level.

GRANTS

1. Grants to medical and dental schools and other institutions and to individuals for research and training.—1950 funds are supporting approximately: 260 research projects, averaging \$10,000 a project; 155 research fellowships, averaging about \$3,225 each; 105 stipends to graduate physicians for specialized training, averaging over \$3,600 each; and teaching grants of \$25,000 to each of 72 recognized 4-year medical schools and of \$5,000 to each of 47 recognized dental schools and 2-year medical schools.

In addition, grants have been made to 41 institutions to assist in the construction of cancer research facilities. The 1951 estimate provides cash to liquidate prior-year commitments, but no new cash or contract authority for this special disease category program. This assumes enactment of proposed legislation to provide general aid to medical, dental, and public health schools, including adequate aid for constructing additional facilities for teaching as well as research. An estimate for this general aid program is included under proposed legislation.

2. Grants to States for detection, diagnosis, and other control services.—Federal funds, allocated to all States and four territories on a formula basis, are designed to strengthen State and local clinical and educational services.

3. Grants for special control projects.—Seventy-one special control projects receive financial assistance through special grants of Federal funds to State and local health agencies, universities, hospitals, and nonprofit professional organizations to develop, initiate, or establish improved types of cancer control techniques and devices.

DIRECT OPERATIONS

1. Research.—Fundamental research is conducted in biology, biochemistry, biophysics, endocrinology, pathology, chemotherapy, and epidemiology. Growing em-

PUBLIC HEALTH SERVICE—Continued

Operating Expenses, National Cancer Institute, Public Health Service—Continued

phasis is being placed on clinical research in the following areas: functional changes in patients with cancer; characteristics of human malignant tissues; and clinical chemotherapy.

2. *Other direct operations.*—These include (a) review of State plans and budgets submitted in connection with the State grant-in-aid program, consultative services to States in the development of their programs, and demonstrations and field studies in new and improved diagnostic tests and procedures; (b) review of applications for grants, awards, and stipends for research and training; and (c) program direction and administration.
