National Cancer Institute: To enable the Surgeon General, upon the recommendations of the National Advisory Cancer Council, to make grants-in-aid for research and training projects relating to cancer, including grants for drawing plans, erection of buildings and acquisition of land therefor; to cooperate with State health agencies, and other public and private nonprofit institutions, in the

prevention, control, and eradication of cancer by providing consultative services, demonstrations, and grants-in-aid and the purchase of not to exceed six passenger motor vehicles for replacement only; and to otherwise carry out the provisions of title IV, Part A, of the Act, [\$18,900,000] \$20,086,000, of which not less than [\$3,000,000] \$5,000,000 shall be available exclusively for payment of obligations for research and training grants incurred under authority heretofore granted under this head; and, in addition to the amount appropriated herein, the Surgeon General is authorized, upon the recommendations of the National Advisory Cancer Council, to approve applications for research and training grants, including grants for drawing plans, erection of buildings, and acquisition of land therefor, not to exceed a total of \$6,000,000 for periods beyond the current fiscal year, and such grants shall, if approved during the current fiscal year, constitute a contractual obligation of the Federal Government. (Labor-Federal Security Appropriation Act, 1950.)

Appropriated 1950, \$18,900,000 Estimate 1951, *\$20,086,000

* Includes \$215,000 for activities previously carried under "Operating expenses, National Institutes of Health, Public Health Service."
Excludes \$108,469 for activities transferred in the estimates to appropriations as follows:
"Operating expenses, National Institutes of Health, Public Health Service"..... \$87,000
"Salaries, Office of Administrator, Federal Security Agency"..... 13,109
"Salaries and expenses, division of service operations, Federal Security Agency"..... 8,360
The amounts obligated in 1949 and 1950 are shown in the schedule as comparative transfers.

PROGRAM AND PERFORMANCE

Approximately half of the beds in the Nation's hospitals are occupied by the mentally ill. A relatively large percentage of those seeking medical attention have conditions which are influenced by some form of emotional disorder. The activities financed from this appropriation have three major purposes: (1) to foster and conduct research in the causes of the various mental and neurological diseases and in the development of improved methods for their prevention, detection, diagnosis, and treatment; (2) to improve teaching in mental health and increase the supply of personnel trained for mental health work; and (3) to assist in the development and maintenance of preventive, diagnostic, and out-patient clinical services at the local level.

GRANTS

1. *Grants to medical schools and other institutions and to individuals for research and training.*—The 1951 estimate provides for increases in: research grants from 57 to 79 projects, at an average cost of \$14,000; research fellowships from 25 to 50, at an average cost of \$4,000 each; graduate teaching grants in psychiatric nursing, psychiatric social work, psychology, and psychiatry from 154 to 180, at an average cost of \$10,000 each; training stipends in psychiatric nursing, psychiatric social work, psychology, and psychiatry from 450 to 525, averaging \$2,000 each.

In addition, 1950 funds are supporting grants of \$10,000 each to 42 medical schools for undergraduate teaching in psychiatry. The 1951 estimate provides cash to liquidate prior-year commitments but no new cash for expanding this special disease category program. This assumes enactment of proposed legislation to provide general aid to medical, dental, and public health schools, which would contribute to the strengthening of medical school teaching staffs, not only for mental health but also for heart diseases, cancer, and other diseases on an integrated basis. An estimate for this general aid program is included under proposed legislation.

2. *Grants to States for detection, diagnosis, and other preventive and control services.*—Federal grants, allocated to States on a formula basis, have resulted in the initiation of mental health programs in 27 States and territories and the expansion of mental health programs in 24 others. State programs assisted with Federal funds include preventive and educational activities, professional services, clinical services, and training of State and local mental health personnel.

DIRECT OPERATIONS

1. *Research.*—The 1950 appropriation includes funds for: a very limited development of intramural laboratory and clinical research programs in preparation for operations at the Clinical Center now under construction at Bethesda, Md.; research in narcotic and barbiturate addiction; epidemiological field research in multiple sclerosis; a field study in Phoenix, Ariz., to determine the mental health needs of an urban community with a heterogeneous population; and supporting services in biometrics, publications, and reports. The 1951 estimate provides for further development of the National Institute of Mental Health intramural research organization preparatory to the opening of the Clinical Center. It provides for initiation and expansion of neurological research, a new program of research in schizophrenia, and preliminary studies of the effects of cortisone and ACTH in nervous and mental disorders.

2. *Other direct operations.*—These include: (a) review and approval of research and training grants; (b) demonstrations in teaching methods, short courses for practicing physicians, and in-service training; (c) review of State plans and budgets submitted in connection with the State grant-in-aid program, consultative services to States, and demonstrations and field studies in developing preventive and out-patient services; and (d) program direction and administration. The only significant increase proposed for 1951 is for administrative services to be rendered by the National Institutes of Health; a corresponding reduction for reimbursements is shown in the appropriation, "Operating expenses, National Institutes of Health, Public Health Service."

Total obligations.....	2,835,400	16,161,500	8,800,000

PROGRAM AND PERFORMANCE

Heart diseases constitute one of the leading causes of death. The activities financed from this appropriation have three major purposes: (1) to foster and conduct research in the causes of the various diseases of the heart and circulation and in the development of improved methods for their detection, diagnosis, and treatment; (2) to improve teaching in cardiac problems and increase the supply of personnel trained for research and treatment of heart diseases; and (3) to assist in the development and maintenance of detection, diagnostic, and home care services at the local level.

GRANTS

1. *Grants to medical schools and other institutions and to individuals for research and training.*—1950 funds are supporting: 311 research projects, averaging \$11,860 a project; 94 research fellowships, averaging approximately \$3,200; teaching grants of \$14,000 each to 42 recognized 4-year medical schools and to certain other recognized medical and public health schools; and 42 stipends, averaging approximately \$3,600, to graduate physicians for specialized training in cardiovascular diseases. The 1951 estimate provides for continuance of these activities at the 1950 level.

No provision has been made in this appropriation for expanding grants for teaching in the special category of heart diseases. This assumes enactment of proposed

legislation to provide general aid to medical, dental, and public health schools, which would contribute to the strengthening of medical school teaching staffs not only for heart diseases but also for cancer, mental health, and other diseases on an integrated basis. An estimate for this general aid program is included under proposed legislation.

1950 funds are also supporting grants to 22 institutions for the construction of research facilities. The 1951 estimate provides cash to liquidate prior-year commitments but no new cash or contract authority for this special disease category program. This assumes enactment of proposed legislation to provide general aid to medical, dental, and public health schools, including adequate aid for constructing additional facilities for teaching as well as research. An estimate for this general aid program is included under proposed legislation.

2. *Grants to States for detection, diagnosis, and other control activities.*—Grants are made to States, on a formula basis, to find and refer cardiac patients for diagnosis and treatment, to provide services to heart-disease patients in their homes, to furnish training opportunities to physicians and public health workers in cardiac problems, and to supply public information.

DIRECT OPERATIONS

1. *Research.*—Research is being conducted in the development of diagnostic and case-finding instruments, the peripheral vascular system, kidney and electrolyte metabolism, high blood pressure, gerontology, rheumatic heart disease, therapeutics, and epidemiology. The 1951 program provides for further development of the Heart Institute's intramural research organization, preparatory to the opening of the Clinical Research Center.

2. *Other direct operations.*—These include: (a) review and approval of applications for research and training grants; (b) review and approval of State plans and budgets, consultative services to States on heart disease control programs, field studies and demonstrations on improved methods of conducting local control programs; and (c) program direction and administration.

APPROPRIATION TEXT

National Heart Institute: For expenses necessary to carry out the purposes of the National Heart Act, including [grants-in-aid for drawing plans, erection of buildings, and acquisition of land therefor and] the purchase of not to exceed [three] six passenger motor vehicles, [of which one shall be for replacement only, \$10,725,000; and, in addition to the amount appropriated herein, the Surgeon General is authorized, upon the recommendations of the National Advisory Heart Council, to approve applications for research and training grants, including grants for drawing plans, erection of buildings, and acquisition of land therefor, not to exceed a total of \$5,350,000, for periods beyond the current fiscal year, and such grants shall, if approved during the current fiscal year, constitute a contractual obligation of the Federal Government] \$14,150,000, of which not less than \$5,350,000 shall be available exclusively for payment of obligations for research and training grants incurred under authority heretofore granted under this head. (Labor-Federal Security Appropriation Act, 1950.)

Appropriated 1950, \$10,725,000 Estimate 1951, \$14,150,000

* Includes \$95,250 for activities previously carried under "Operating expenses, National Institutes of Health, Public Health Service." The amounts obligated in 1949 and 1950 are shown in the schedule as comparative transfers.

Operating Expenses, Dental Health Activities, Public Health Service—

Total obligations.....	1,733,202	1,934,000	2,140,000

PROGRAM AND PERFORMANCE

The prevalence of dental diseases is widespread. The activities financed from this appropriation have three major purposes: (1) to foster and conduct research in the causes and prevention of dental diseases and in the development of improved methods for their diagnosis and treatment; (2) to increase the supply of personnel trained for dental health work and improve the utilization of

dental health personnel now available; and (3) to assist in the development and maintenance of preventive and clinical programs at the local level.

GRANTS

1. Grants to dental schools and other institutions and to individuals for research and training.—In 1950, this appropriation is supporting grants to non-Federal institutions for 37 research projects averaging \$5,400 and awards to 11 research fellows averaging \$3,100 each. The 1951 estimate would increase the number of research projects to approximately 46 and the number of research fellowships to approximately 24.

DIRECT OPERATIONS

1. Research.—Basic research is being conducted in the fields of bacteriology, pathology, histology, oral and biological chemistry, epidemiology, and biometry. The 1951 estimate provides for expansion of research into the cause and possible cure of transient bacteremia, studies relating to the reattachment of supporting dental tissues destroyed in periodontal disease, and expansion of other studies in dental diseases.

2. Other direct operations.—These include: (a) review of applications for grants and other stipends for research and training; (b) technical assistance to States in the form of consultative services and demonstrations of newly developed or improved methods of controlling dental conditions; (c) coordination and development of dental health resources by developing indices of oral health and the availability of manpower in relation thereto and by developing and evaluating improved clinical methods and control techniques; and (d) program direction and administration. The 1951 estimate provides an increase for studies in the coordination and development of dental health resources. It reflects a decrease in topical fluoride demonstrations in anticipation of declining need for this type of demonstration after the third year of the program.

PROGRAM AND PERFORMANCE

The Public Health Service is currently engaged in a major expansion of its medical research facilities at the National Institutes of Health in Bethesda, Md. The principal building, now in its second year of construction, is the Clinical Center, a research laboratory equipped with 500 research beds for clinical research in cancer, heart, mental, metabolic, and infectious diseases. Its purpose will be to provide a medical center where the best quality of hospital care can be given all types of patients under scientific observation and where laboratory facilities for adjunct studies with animals are immediately accessible. The project also includes auxiliary structures to provide power, incineration, storage, laundry, animal breeding, and shops services for the entire National Institutes of

Health. Appropriations and contract authority for construction are transferred to the General Services Administration.

In 1948, the Congress appropriated \$3,500,000 to acquire additional land and to prepare plans and specifications. The first and main stage of construction with a cost limitation of \$40,000,000 began in 1949; to date \$18,100,000 has been appropriated. The second stage covering most of the auxiliary service structures is being started in the current year with \$3,900,000 appropriated out of the total cost limitation of \$8,600,000. Payment for work completed in 1951 under these two stages will require \$11,100,000.

The 1951 estimate also includes \$1,025,000 cash and \$350,000 contract authority to be transferred to the General Services Administration for construction of the third stage of the program, consisting of housing facilities on the station and a grounds maintenance building. In addition, it includes \$3,000,000 for purchase by the Public Health Service of part of the equipment needed for the Clinical Center and all supporting structures except housing facilities.

The items in each stage of construction are timed to assure the completion of all buildings when the Clinical Center is finished and equipped for operation by the close of 1952.

APPROPRIATION TEXT

Construction of research facilities: For construction of research facilities, to be transferred (except such part as may be necessary for incidental expenses [of] and purchase of equipment by the Public Health Service) to the [Public Buildings Administration, Federal Works Agency] General Services Administration, and to remain available until expended, as follows:

For payment of obligations incurred under authority heretofore granted to enter into contracts for construction of a combined hospital and research building, as authorized under this head in the Federal Security Agency Appropriation Act, 1949, \$13,100,000; and, in addition, contracts may be entered into in an amount not to exceed \$8,200,000 for continuing such construction.

For construction of auxiliary service area structures to provide for supply, storage, animal breeding and housing, incinerator, maintenance and fabrication shops, laundry and dry cleaning, underground storage for chemicals and other combustibles, including necessary distribution facilities and roads and walks, and for procurement and installation of a linear accelerator and cage sterilizing equipment, \$3,900,000; and, in addition, contracts may

be entered into in an amount not to exceed \$4,700,000 toward completion of such construction and procurement at a cost not to exceed \$8,600,000: *Provided*, That the limitations on contract authority and total cost may be exceeded or shall be reduced by an amount equal to the total percentage increase or decrease, if any, in construction costs generally dating from August 1, 1948, as determined by the Federal Works Administrator.]

For payment of obligations incurred under authority heretofore granted to enter into contracts for construction of a combined hospital and research building as authorized under this head in the Federal Security Agency Appropriation Acts of 1949 and 1950, \$7,500,000.

For payment of obligations incurred under authority heretofore granted to enter into contracts for construction of auxiliary service area structures, as authorized under this head in the Federal Security Agency Appropriation Act, 1950, \$3,600,000.

For construction of additional auxiliary structures to provide station quarters for personnel and a grounds maintenance building, including necessary distribution facilities and roads and walks, \$1,025,000; and in addition, contracts may be entered into in an amount not to exceed \$350,000 toward completion of such construction at a cost not to exceed \$1,375,000.

For purchase and installation of additional equipment and furnishings to partially equip and furnish structures heretofore or herein provided under this head (except structures for station quarters), \$3,000,000. (42 U. S. C. 248; 60 Stat. 421; Labor-Federal Security Appropriation Act, 1950.)

PROGRAM AND PERFORMANCE

The 1950 appropriation act provided \$100,000 for developing plans and specifications for the erection of a dental research building on the grounds of the National Institutes of Health in Bethesda, Md. This would be a separate building, in addition to the principal building for the Clinical Center now under construction on these grounds. Review of the space requirements of the National Institutes of Health indicates that the needs of the National Institute of Dental Research can be very adequately accommodated—at least for the immediate future—within the total space now in existence and under construction. In view of this fact, economical budgeting dictates that this building project be postponed until the space is clearly needed.

PROGRAM AND PERFORMANCE

This estimate provides an appropriation and contract authority for transfer to the General Services Administration to acquire a site and construct buildings for the Public Health Service's research and investigation program in Alaska. Plans provide for facilities for research in the medical and biological sciences, an experimental plant for water and sewage treatment problems, headquarters offices, and related facilities. The estimate includes cash for site acquisition, development of detailed plans and drawings, and commencement of construction in 1951, and contract authorization to permit award of contracts in 1951 for completion of the construction in 1952.

APPROPRIATION TEXT

*Construction of Arctic Health Institute: For acquisition of a site in the Territory of Alaska for an Arctic Health Institute, which may be located within the grounds of the University of Alaska, and title to such site may, notwithstanding any limitation in the grant of such grounds to the University, be conveyed by it to the United States, or otherwise acquired by the United States; for preparation of plans, specifications, and drawings for research buildings, necessary accessory buildings related thereto, and necessary living quarters for personnel; and for construction of the aforesaid buildings and quarters, including preparation of site and improvement of grounds, construction of roads and walks, procurement and installation of fixtures and equipment, and of furniture for quarters as provided by regulations; \$975,000 to remain available until expended; and, in addition, contracts may be entered into in an amount not to exceed \$6,325,000 for the completion of such construction at a cost not to exceed \$7,300,000: *Provided*, That the funds and contractual authority herein authorized (except such part as may be necessary for incidental expenses of the Public Health Service) shall be transferred to the General Services Administration.*

PROGRAM AND PERFORMANCE

The funds available in this appropriation provide for pay of commissioned officers of the Regular Corps on general duty, pay to retired officers, death gratuity payments to survivors of officers deceased in line of duty, and tuition for training.

1. *General duty.*—These include commissioned officers assigned to the immediate Office of the Surgeon General, the Division of Commissioned Officers, the regional medical directors and their immediate professional staffs, officers assigned for highly specialized types of training, officers assigned to duties of a temporary or emergency nature, and other officers not assigned to specific operating programs.

2. *Retired officers pay and survivors benefits.*—The 1951 estimate provides for the retirement of eight officers for age and four officers for disability.

3. *Tuition for training.*—It is estimated that in 1951 60 officers will attend institutions for training at average costs of \$600 per annum for tuition and \$100 per annum for books, laboratory equipment, and other incidental expenses.

PROGRAM AND PERFORMANCE

This appropriation finances staff activities in the Office of the Surgeon General, central management and administrative services, development and coordination of nursing resources, and international health activities.

1. *Evaluation of public health problems and methods.*—This includes the development of methods of measuring the nature and extent of health problems and the effective-

ness of health programs, and provision of consultation and assistance on these matters to public and private agencies. Typical studies are: incidence and prevalence of illness, its effects on individuals, families, and populations, and its relationship to social and economic characteristics of the population; need for health personnel and problems in professional health education; and evaluation of group medical practice.

2. *Development and coordination of nursing resources.*—This consists of analyses of regional resources and needs for nursing personnel, studies of improved utilization of hospital personnel, promotion of full utilization of the training facilities of existing schools of nursing, and the development of new schools. The 1951 estimate provides increases in these activities to assist in meeting the present shortage of trained nurse personnel.

3. *International health activities.*—The Service advises and assists the Department of State, the United States representative on the executive board of the World Health Organization, and such agencies as require assistance regarding health conditions, policies, problems, and activities in foreign countries; maintains liaison with other countries on health matters; recruits scientific and technical personnel for special projects being carried on throughout the world; and assists foreign physicians, health workers, and trainees. The 1951 estimate provides increases for this activity to meet increasing work loads connected with World Health Organization activities, technical missions, and other international health activities.

4. *Management and central services.*—This estimate covers expenses of employees serving as staff assistants to the Surgeon General and employees performing central procurement, budget, fiscal, organization and methods, mail and messenger, and personnel services. It also provides for the cost of communication services for headquarters offices and for printing of material having Service-wide implications such as the annual report and Public Health Reports.

OBLIGATIONS BY ACTIVITIES

Expenses, Economic Cooperation Administration, Executive Office of the President (Allocation to Federal Security Agency, Public Health Service)—

NOTE.—Schedules pertaining to this account are printed under Funds Appropriated to the President in the chapter of that title.

Grants for Research and Training Projects Relating to Cancer, Public Health Service—

FUNDS AVAILABLE FOR OBLIGATION	1949 actual	1950 estimate	1951 estimate
Prior year balance available.....	\$1,974,305	\$890,609	
Balance available in subsequent year.....	-890,609		
Total obligations.....	1,083,696	890,609	

PROGRAM AND PERFORMANCE

The appropriation act for the fiscal year 1948 provided that such parts of the amount appropriated to the National Cancer Institute as the Surgeon General determined to be necessary for research and training grants should remain available until expended. The unobligated balance of \$890,609 will be used in 1950 for grants to medical schools and other institutions for 80 research and training projects, averaging about \$11,000 each.

OBLIGATIONS BY ACTIVITIES

Grants to medical schools and other institutions for research and training—1949, \$1,083,696; 1950, \$890,609.

OBLIGATIONS BY OBJECTS

11 Grants, subsidies, and contributions—1949, \$1,083,696; 1950, \$890,609.

Total obligations.....	9,759,565	10,406,863	10,819,791

PROGRAM AND PERFORMANCE

Saint Elizabeths Hospital provides care and treatment for various groups of mentally ill patients who are beneficiaries of the Federal Government. It also cares for mentally ill residents of the District of Columbia, and these patients presently constitute 75 percent of the total load. The District government reimburses the hospital for care of District residents.

1. *Operation and maintenance of hospital.*—Under this activity the hospital provides care and treatment of the mentally ill, conducts research on the causes, prevention, and treatment of mental illness, maintains the hospital buildings, and procures supplies and equipment. This appropriation provides for continuing in 1951 the standard of care and treatment at the present level, an increase in funds having been provided in proportion to the expected increase in patient load. The actual and estimated average daily patient load is shown below.

	1949 actual	1950 estimate	1951 estimate
Federal beneficiaries.....	1,445	1,671	1,728
District of Columbia residents.....	4,953	5,050	5,200
Total.....	6,398	6,721	6,928

2. *Operation of farm.*—The hospital farm provides occupational therapy benefits for the patients. The value of the produce exceeds the cost of operation.

3. *Operation of cafeteria.*—The hospital is authorized to operate a cafeteria for employees and others, and to sell meals at not less than cost. The proceeds are deposited in the Treasury to the credit of the hospital appropriation. The cafeteria served 193,482 meals in 1949. It is estimated that 188,000 meals will be served in 1950 and 200,000 in 1951.

4. *Training program.*—This is to provide a source for medical and nursing staff recruitment by training medical, psychiatric, and dental interns, postgraduate doctors, and student nurses. Actual and estimated trainees are as follows:

	1949 actual	1950 estimate	1951 estimate
Interns and postgraduates.....	34	43	43

PROGRAM AND PERFORMANCE

This is a building now under construction by the General Services Administration, to be completed in 1951. It will house 500 aged and infirm people who have been quartered in facilities not suitable for this type of patient. The total estimated cost is \$3,800,000.

APPROPRIATION TEXT

Construction and equipment, building for the housing, care, and treatment of mentally sick patients: For payment of obligations incurred under authority provided in the Federal Security Agency Appropriation Act, 1949, for completion of a building for the housing, care, and treatment of mentally sick patients, Saint Elizabeths Hospital, **[\$1,800,000] \$100,000**, to remain available until expended: *Provided*, That any part of this amount may be transferred, upon the request of the Federal Security Administrator, to the Public Buildings Administration, Federal Works Agency, General Services Administration. Total obligations.....	25,000	10,000	156,000

PROGRAM AND PERFORMANCE

This appropriation finances major repairs, permanent improvements, or additions to the buildings, grounds, and utilities of the hospital. Funds for the larger projects are transferred to the General Services Administration.

1. *Building repairs and improvements.*—This covers replacement of an incinerator and three elevators, rewiring three patients' buildings, and construction of eight fire exits.

2. *Ground maintenance and improvements.*—This provides for replacement of a section of road, sidewalk, and curbing.

3. *Utility facilities, repairs, and improvements.*—Funds are requested to renovate the water distribution system, increase the trunking capacity of the internal telephone system, and ventilate transformer vaults and steam tunnels.

PROGRAM AND PERFORMANCE

These buildings will provide replacements for the Oaks and Toner Buildings, two badly deteriorated patients' quarters erected in 1890. Plans and specifications are being prepared during the current fiscal year. Construction will begin in 1951 and be completed in 1952 by the General Services Administration. The total estimated cost is \$5,588,000.

APPROPRIATION TEXT

Construction [planning] and equipment of two treatment buildings: For [the preparation of plans and specifications] construction and equipment, including administrative expenses, for two treatment buildings, and demolition and removal of those buildings designated as Oaks and Toner Buildings with their appurtenances and attachments, within the grounds of Saint Elizabeths Hospital, **[\$150,000]** \$1,812,000, to remain available until expended; and, in addition, contracts may be entered into in an amount not to exceed \$3,626,000 toward completion of such work at a total cost not to exceed \$5,588,000: *Provided*, That the appropriation in the Federal Security Agency Appropriation Act, 1950, for preparation of plans and specifications for such buildings, shall be consolidated with this appropriation, to be disbursed and accounted for as one fund which shall be available for all of the foregoing purposes, and any part of [this amount] such consolidated appropriation may be transferred[, upon the request of the Federal Security Administrator,] to the [Public Buildings Administration, Federal Works Agency] *General Services Adminis-*

tration. (24 U. S. C. 161–221; Labor-Federal Security Appropriation Act, 1950.)

Total obligations	626,712	\$630,375	\$684,226

PROGRAM AND PERFORMANCE

Federal credit unions are cooperative associations organized for the purpose of promoting thrift among their members and creating a source of credit for provident and productive purposes. Experience to date has indicated that people in all walks of life can successfully provide satisfactory thrift and credit facilities through credit unions owned and operated by their members. In addition to the general fund appropriation provided for in the 1951 estimate, the Bureau will use the fees collected under its authorizing act for carrying out the Bureau's functions.

1. *Chartering and establishment of Federal credit unions.*—The Bureau investigates and issues charters to eligible groups upon application; advises newly chartered credit unions as to Federal requirements and recommended practices; and assists them to organize, set up their records, and establish their operating policies and procedures.

2. *Examination and supervision of Federal credit unions.*—In 1951 examinations will be made of the financial condition and operating practices of Federal credit unions. In addition, the Bureau will supervise mergers, suspensions, and liquidations; investigate shortages; review and approve amendments to charters and bylaws; and assist the officers of credit unions through procedural manuals, instructional material, and advice on economic conditions and trends.

GROWTH OF FEDERAL CREDIT UNIONS

Year	Number of credit unions	Assets	Loans outstanding	Number of members
1940 actual	3,739	\$72,500,539	\$55,801,026	1,126,222

BUREAU OF OLD-AGE AND SURVIVORS INSURANCE

Expenses, Benefits, Deceased Veterans, World War II, Bureau of Old-Age and Survivors Insurance, Social Security Administration—

FUNDS AVAILABLE FOR OBLIGATION: Appropriation or estimate—1949, \$305,400.

PROGRAM AND PERFORMANCE

Administrative expenses incurred in paying benefits to eligible survivors of veterans of World War II as provided by the 1946 amendments to the Social Security Act are not chargeable to the trust fund. These expenses were appropriated in advance for fiscal year 1949 from general funds. For 1950 and subsequent years, the administrative expenses will be reimbursed to the trust fund on a subsequent basis in the same manner that benefit payments are reimbursed.

OBLIGATIONS BY ACTIVITIES

Processing and certification for payment of claims—1949, \$305,400.

OBLIGATIONS BY OBJECTS

07 Other contractual services (payment to trust account)—1949, \$305,400.

Reimbursement to Federal Old-Age and Survivors Insurance Trust Fund, Social Security Administration—

FUNDS AVAILABLE FOR OBLIGATION: Appropriation or estimate—1949, \$2,974,000; 1950, \$3,604,000; 1951, \$3,944,000.

PROGRAM AND PERFORMANCE

1. *Repayment of benefits paid to survivors of World War II veterans.*—The 1946 amendments to the Social Security Act extend temporary privileges to veterans of World War II in order to make possible the payment of benefits to survivors of those veterans who die within 3 years after their discharge from the armed services. These amendments authorize to be appropriated to the Federal old-age and survivors insurance trust fund from time to time amounts necessary to meet the cost of these additional benefit payments. The present estimate provides for the reimbursement of actual benefit payments made in 1949 and interest lost to the trust fund by reason of these payments.

2. *Conversion of establishment data records.*—This is an appropriation from general funds to reimburse the trust fund for the cost of converting certain of its records to the revised standard classification, thereby making this data available on a comparable basis to a number of Federal agencies. It is a single-year project, highly desirable in making the extensive and valuable economic information contained in the Bureau's records available to Federal statistical services.

OBLIGATIONS BY ACTIVITIES

Description	1949 actual	1950 estimate	1951 estimate
1. Repayment of benefits paid to survivors of World War II veterans:			
(a) Monthly benefit payments	\$1,254,000	\$2,341,000	\$2,904,000
(b) Lump-sum death payments	1,645,000	1,155,000	678,000
(c) Interest	75,000	108,000	112,000
2. Conversion of establishment data records			250,000
Total obligations	2,974,000	3,604,000	3,944,000

OBLIGATIONS BY OBJECTS

11 Grants, subsidies, and contributions—1949, \$2,974,000; 1950, \$3,604,000; 1951 \$3,944,000.

APPROPRIATION TEXT

Reimbursement to Federal old-age and survivors insurance trust fund: For reimbursement to the Federal old-age and survivors insurance trust fund for benefits paid during the fiscal year [1948] 1949 to the survivors of veterans of World War II eligible for benefits as provided under section 210 of the Social Security Act, as amended (42 U. S. C. 410), [\$3,604,000] \$3,694,000, together with \$250,000 to be transferred to said trust fund for converting establishment data records to revised standard industrial classification of nonmanufacturing industries. (Labor-Federal Security Appropriation Act, 1950.)

Appropriated 1950, \$3,604,000

Estimate 1951, \$3,944,000

PROGRAM AND PERFORMANCE

Tabulations of data relative to employers and employees in covered employment are the most readily available sources for statistical information on wages and employment required by various governmental agencies. These working funds represent advance payments for the additional expense of the Bureau of Old-Age and Survivors Insurance for reworking its records to suit the needs of the agencies using the data.

PROGRAM AND PERFORMANCE

The Bureau administers the federally operated old-age and survivors contributory insurance program. Employer and employee contributions are paid into the Federal old-age and survivors insurance trust fund, and benefit payments and administrative costs are paid from the trust fund.

1. *Maintenance of accounts of employee earnings.*—Individual accounts of earnings must be maintained, since the amount of insurance benefits is based upon earnings in covered employment. The work load is not controllable and depends generally on the level of employment.

	1949 actual	1950 estimate	1951 estimate
Reports of employee earnings received.....	190,209,407	180,398,000	187,241,000

2. *Processing and certification for payment of initial claims.*—When the claimants' rights to benefits have been established, the Bureau authorizes the Treasury Department to make the initial benefit payment. This work load increases gradually as the number of insured persons reaching age 65 increases.

	1949 actual	1950 estimate	1951 estimate
New claims received.....	915,615	915,300	933,400

3. *Monthly recertification of awarded claims.*—Beneficiary rolls must be maintained currently so that the Treasury Department can mail the monthly benefit checks promptly. The number of beneficiaries on the rolls has increased constantly and will continue to increase until the program reaches maturity many years hence.

	1949 actual	1950 estimate	1951 estimate
Beneficiaries on rolls at end of year.....	2,868,105	3,218,000	3,565,000

4. *Hearings and appeals.*—Individuals, whose claims for benefits are disallowed, have the right to appeal their cases. This activity includes the expenses of holding hearings on disputed cases and reviewing the decisions of the referees who hold these hearings. The work load relating to this function is relatively stable.

5. *Actuarial services.*—Actuarial studies and estimates are made for long-range planning of the program.

6. *Administration.*—This activity covers executive direction, divisional management, and general services not directly related to program work loads but required to maintain and operate the division of accounting operations, 6 area offices, and 478 field offices. It also includes the division of program analysis responsible for the accumulation, development, and analysis of data directly relating to the program.

7. *Conversion of establishment data records.*—This activity covers the converting of establishment data records to the revised standard classification in order to make certain of the Bureau's records available to Federal statistical services.

Salaries and expenses, Bureau of Old-Age and Survivors Insurance: For necessary expenses, including personal services in the District of Columbia and elsewhere; [purchase of one passenger motor vehicle for replacement only; services as authorized by section 15 of the Act of August 2, 1946 (5 U. S. C. 55a)] and furnishing, repairing, and cleaning of wearing apparel and equipment used by building guards; not more than [\$42,425,800] \$46,238,000 may be expended from the Federal old-age and survivors insurance trust fund: Provided, That of the amount herein made available for expenditure, not more than \$50,000 may be expended without regard to section 322 of the Act of June 30, 1932, as amended (40 U. S. C. 278a), for alterations, repairs, and improvements to the Candler Building in Baltimore, Maryland, which amount, except such part as may be necessary for incidental expenses of the Bureau of Old-Age and Survivors Insurance, may be transferred to the Public Buildings Administration, Federal Works Agency, for such purposes, of which \$250,000 shall be available for converting establishment data records to revised industrial classification of nonmanufacturing industries: Provided further, That any sums received by the Administrator as payment for services performed for any department or agency of the Government by persons whose salaries are paid from the amount made available under this paragraph shall be deposited to the credit of this appropriation for the fiscal year in which such sums are received, and shall be available for the same purposes.

[The first proviso under this head in the Federal Security Agency Appropriation Act, 1950, is amended to read as follows: "Provided, That of the amount herein made available for expenditure, not more than \$50,000 may be expended without regard to section 322 of the Act of June 30, 1932, as amended (40 U. S. C. 278a), for alterations, repairs, and improvements to the buildings occupied by the Bureau of Old-Age and Survivors Insurance in Baltimore, Maryland, and

vicinity, of which amount not more than \$15,000 shall be available for alterations, repairs, and equipment for an employee cafeteria or cafeterias, and the total amount made available in this proviso, except such part as may be necessary for incidental expenses of the Bureau of Old-Age and Survivors Insurance, may be transferred to the Public Buildings Administration, General Services Administration, for such purposes".] (42 U. S. C. 401-410; Labor-Federal Security Appropriation Act, 1950; Supplemental Appropriation Act, 1950.)

PROGRAM AND PERFORMANCE

Grants are made to States that have plans approved by the Federal Security Agency for old-age assistance, aid to dependent children, and aid to the blind. These programs are State-initiated and State-administered. In accordance with the approved plan under the provisions of the pertinent titles of the Social Security Act, each State determines who is eligible for assistance and the amount of assistance to be given. States may, and many do, make payments in excess of the Federal matching maximums, but they must pay all additional amounts from State and local funds. For 1951, the total amount of Federal, State, and local expenditures for assistance and administration is estimated at \$2,330,866,000 of which \$1,200,000,000 represents Federal grants. The increase in Federal funds for 1951 of \$90,000,000 over the amount estimated for 1950 is accounted for primarily by estimated increases in the number of recipients under each program and increases in the average grants to the recipients. The rise in the number of recipients of old-age assistance and aid to dependent children is accounted for, in part, by the continued growth of the population 65 or more years of age and under 18 years of age.

Because the laws of some States require receipt of Federal funds before making available matching amounts, the grants-in-aid are made to the States and become obligations of the Federal Government, prior to the operating period to which they relate. In order to facilitate comparison of the estimated year-to-year changes in the programs, case load and financial data are presented in the tables below for the operating period to which they relate, rather than for the period in which grants become obligations of the Federal Government. A supplemental appropriation of \$52,000,000 for 1950 is estimated to be required because of an increase in the number of recipients, primarily in the old-age assistance program.

1. *Payments to recipients: (a) Old-age assistance.*—The average number of recipients per month is estimated for 1951 at 2,860,000 or 4.4 percent more than for 1950. The average monthly payment is estimated to exceed by \$1.25 the amount for 1950.

SOCIAL SECURITY ADMINISTRATION—Continued

BUREAU OF PUBLIC ASSISTANCE—Continued

Percent from Federal funds.....	52.1	52.8	52.6

2. *Administration: State and local operations.*—The grants to States include 50 percent of the administrative costs which are found by the Federal Security Agency to be necessary for the proper and efficient administration of the State public assistance programs. The \$55,700,000 in Federal grants for this activity for 1951 will provide approximately 50 percent of the salaries and expenses of about 42,000 State and local personnel engaged in administering the public assistance program.

PROGRAM AND PERFORMANCE

The Bureau of Public Assistance administers Federal grants to States for old-age assistance, aid to dependent children, and aid to the blind.

1. *Development of program requirements and standards.*—The work in this area clarifies conditions under which States may use Federal funds in carrying out the purposes of the public-assistance programs. The need for issuance of interpretations and statements of clarification arises as States continue to change their legislative provisions and procedures for carrying out these programs.

2. *Consultative services to States on requirements and program improvement.*—The Bureau provides consultative and technical services to State agencies for the purpose of resolving problems arising from the application of Federal policy to a particular State situation, assuring conformity to Federal requirements and standards and assisting States in developing their programs.

3. *Review and approval of State plans, operations, and grants.*—The Bureau reviews and acts on State plans and amendments resulting from continuous revisions in State programs, conducts an administrative review of State and local operations, takes such action as is necessary to make

grants to States, and collects and analyzes data for use in appraisal of State agency operations and for use by State agencies in analyzing and improving their programs. The administrative review coverage in 1951 is estimated at 200 of the 3,200 local units, approximately the same as in 1950. An increase in activities related to the evaluation of the administration of State and local programs and to work with State agencies in improving their operations is provided in the estimate.

4. *Appraising national program and recommending improvements.*—The Bureau prepares recommendations for administrative and legislative program modifications and interprets to interested organizations and the public generally the public assistance program and its relationship to other phases of social security. Activities related to pending legislation will decrease in 1951; the process of evaluating the program and the development of program recommendations will continue at the previous level.

5. *Administration.*—The 1951 activities comprising direction of the Bureau and provision of administrative services in support of program functions will be maintained at the same level as in 1950.

PROGRAM AND PERFORMANCE

The Children's Bureau under the act of 1912 is responsible for investigating and reporting on matters pertaining to the welfare of children and child life, and, under title V of the Social Security Act, administers grants-in-aid to State agencies for extending and improving maternal and child health and child welfare programs.

1. *Development of program policies and guides.*—The Bureau develops program policies and requirements for

SOCIAL SECURITY ADMINISTRATION—Continued

CHILDREN'S BUREAU—Continued

Salaries and Expenses, Children's Bureau, Social Security Administration—Continued

approval of State plans under the grant-in-aid programs; prepares guides and recommendations for use by public and private organizations in extending and improving services for children; and provides consultative services in specialized fields to national organizations and educational institutions engaged in training professional personnel. The estimate provides for strengthening this activity.

2. *Review of State plans and programs and consultative services to State and local agencies.*—The Bureau reviews and approves State plans under the grant-in-aid programs and the extent and content of services provided under the plans; and provides consultative services to State agencies in regard to developing and carrying out these plans, and to other State and local agencies and organizations, both public and private, concerned with health and welfare programs for children.

3. *Collection and dissemination of information.*—The Bureau prepares and distributes publications on various aspects of child health and welfare; answers requests from parents, professional workers, citizens' groups and others for information; and collects and reports recurrent statistics concerning services to children.

4. *Research in child life.*—The Bureau conducts research in subjects pertaining to child growth and development, develops standards growing out of research, and conducts a clearing house on research projects being undertaken by organizations and individuals.

5. *Administration.*—This includes over-all direction of Bureau activities and administrative services of the Bureau.

PROGRAM AND PERFORMANCE

The Midcentury White House Conference on Children and Youth, to be held the week beginning December 3, 1950, has a fourfold objective: (1) to bring together present knowledge about the status of children, their physical, mental, emotional, and moral development, and identify areas in which further knowledge is needed; (2) to appraise the physical, social, economic, and moral environment in which children are growing up, and recommend ways of improving it; (3) to evaluate present services for children and youth, map the direction in which services should develop, point up ways in which the number of qualified workers can be increased and the skills of these workers sharpened; and (4) to initiate steps for the achievement of the conference recommendations in the coming decade. The appropriation for 1950 for planning for and carrying out the White House Conference on Children and Youth is available until June 30, 1951.

PROGRAM AND PERFORMANCE

The total authorized annual appropriation of \$22,000,000 includes grants to States for (1) maternal and child health services; (2) services for crippled children; and (3) child-welfare services.

1. *Maternal and child-health services.*—An annual appropriation of \$11,000,000 is authorized to enable each State to extend and improve services for promoting the health of mothers and children, especially in rural areas and other areas of special need. The States must provide matching funds for one-half (\$5,500,000) of the amount appropriated; the remainder is provided the States on the basis of 100 percent Federal grants for special needs. The 1951 estimate provides for maintenance of the program at about the 1950 level when it is estimated that the following major services will be provided:

SELECTED MAJOR SERVICES

	Medical services (cases admitted)	Nursing services (visits)	Dental inspections
School children.....	2,100,000	2,500,000	2,200,000
Preschool children.....	420,000	1,400,000	75,000
Infants.....	270,000	1,500,000	
Maternity cases:			
Antepartum.....	160,000	650,000	
Postpartum.....	50,000	470,000	

2. *Crippled children's services.*—The authorized annual appropriation of \$7,500,000 enables each State to extend and improve services for locating crippled children, and providing medical, surgical, corrective, and other care and services, for children who are crippled or who are suffering from conditions which lead to crippling. The

States are required to provide matching funds for half (\$3,750,000) of the amount appropriated; the remainder is distributed to the States on the basis of 100 percent Federal grants for special needs. The estimate provides for maintaining the program at the 1950 level when it is estimated the following major services will be provided:

SELECTED MAJOR SERVICES

	Hospital in-patient care	Convalescent home care	Clinic or physician's services
Number of children.....	32,000	5,000	140,000
Number of days' care or visits.....	1,200,000	460,000	300,000

3. *Child-welfare services.*—The authorized annual appropriation of \$3,500,000 enables the United States to cooperate with State public welfare agencies in establishing, extending, and strengthening, especially in rural areas and other areas of special need, child-welfare services for the protection and care of homeless, dependent, and neglected children, and children in danger of becoming delinquent. The States are required to make some financial contribution but the share is not specified. The 1951 estimate provides for continuation of the program at about the 1950 level when approximately 4,200 full-time child-welfare workers will be employed by the States and Territories. About 30 percent of these workers are being paid in whole or in part from Federal funds. These and other workers paid from State and local funds provide services to approximately 250,000 children.

PROGRAM AND PERFORMANCE

The funds available under this appropriation in 1949 were used to liquidate the emergency maternity and infant-care program. This program provided, through grants to States, maternity and infant care (medical, hospital, and nursing services) to wives and infants of servicemen in the four lowest pay grades and to aviation cadets.

PROGRAM AND PERFORMANCE

The staff of the Office of the Commissioner is engaged in the executive direction, coordination, and development of the social security program and in basic research covering the broader phases of social security.

1. *Direction and coordination of the social security program.*—This includes executive direction, formulation of administrative policies, and coordinating of interprogram activities of the Bureau of Public Assistance, Bureau of Old-Age and Survivors Insurance, the Children's Bureau, and the Bureau of Federal Credit Unions. These activities are being maintained at the 1950 level.

2. *Appraisal and development of the social security program.*—This includes basic social security studies beyond

the immediate scope of any bureau; and the review and coordination of research and statistics work in the bureaus constituting the Social Security Administration. The estimate provides for an increase in this activity to appraise the developments in other governmental and private programs which are related to the social security program and to intensify the review of the research and statistics activities of the bureaus of the Social Security Administration.

APPROPRIATION TEXT

Salaries and expenses, Office of the Commissioner: For expenses necessary for the Office of the Commissioner for Social Security, including personal services in the District of Columbia [and services as authorized by section 15 of the Act of August 2, 1946 (5 U. S. C. 55a); \$257,800]; \$260,700, together with not to exceed \$78,700, \$126,000 to be transferred from the Federal old-age and survivors insurance trust fund. (*Labor-Federal Security Appropriation Act, 1950.*)

Appropriated 1950, \$257,800 Estimate 1951, * \$260,700

* Excludes \$16,825 for activities transferred in the estimates to "Salaries and expenses, Bureau of Employment Security, Department of Labor," pursuant to Reorganization Plan No. 2 of 1949. The amounts obligated in 1949 and 1950 are shown in this schedule as comparative transfers.

Grants to States, next succeeding fiscal year: For making, after May 31 of the current fiscal year, payments to States under titles I, [III,] IV, V, and X, respectively, of the Social Security Act, as amended, and under the Act of June 6, 1933, as amended, for the first quarter of the next succeeding fiscal year, such sums as may be necessary, the obligations incurred and the expenditures made thereunder for payments under each of such titles and under such Act of June 6, 1933, to be charged to the appropriation therefor for that fiscal year.

In the administration of titles I, IV, V, and X, respectively, of the Social Security Act, as amended, payments to a State under any of such titles for any quarter in the period beginning April 1 of the prior year, and ending June 30 of the current year, may be made with respect to a State plan approved under such title prior to or during such period, but no such payment shall be made with respect

to any plan for any quarter prior to the quarter in which such plan was submitted for approval. (*Labor-Federal Security Appropriation Act, 1950.*)

PROGRAM AND PERFORMANCE

The Federal Security Agency was established to bring together the principal agencies operating in educational, health, welfare, and related fields.

1. *General administration and direction.*—This activity includes over-all supervision and direction of the Federal Security Agency and the determination of Agency-wide policies in carrying out the several programs.

2. *Program coordination and development.*—The major function under this activity is to develop and coordinate all program activities of the Agency and enable the Administrator to identify major elements of Agency-wide policy, review programs for effectiveness in the light of legislative intent and general Agency objectives, and to promote collaboration and the prevention of duplication in related activities. The 1951 estimate provides for additional personnel to permit the Administrator to maintain a comprehensive examination of the diversified programs and functions of the Federal Security Agency in their relationship to general economic or social needs.

3. *Field services and State relations.*—The Federal Security Agency established 10 Agency regional offices in 1949 to replace regional offices of its several constituent organizations. Each regional office, under the supervision of a regional director representing the Federal Security Administrator in the region, is charged with the responsibility for execution of Agency policies, coordination, evaluation, and general direction of all Agency programs in the field, together with administrative supervision of the Agency's regional activities. As a result the States and the public now have one central point of contact in each region. This has also resulted in closer coordination between the Agency's varied programs.

There are 22 different grant-in-aid programs in the Federal Security Agency, with complex fiscal operations, policies, and legal requirements. The audit of these programs is made on a test-check basis, and approximately 1,150 audits of State programs are made each fiscal year. State expenditures in the programs covered by the audit aggregate over \$2 billion, of which Federal grants amount to approximately \$1.25 billion. The States are also assisted in complying with merit system statutes under Agency grant-in-aid programs.

The 1951 budget estimates provide no change other than for inclusion of the Public Health Service in the regional office organization by transfers of sums formerly carried in Public Health Service appropriations.

4. *Administrative services.*—The following staff functions are carried at the Agency level to assist and direct the administrative management of the Agency: Budget, fiscal, personnel management, procurement, space, transportation, and administrative methods. No change is proposed in 1951.

5. *Public and congressional relations.*—The Federal Security Agency furnishes information regarding the programs of the Agency to professional groups, congressional committees and individual members of the Congress, and to the citizens through whom and for whom these services operate.

A great portion of the Agency's publications and public information materials are required by law, such as Public Health Reports and Notices of Judgment on violations of the Food, Drug, and Cosmetic Act, or are documents representing the end result of programs required or authorized by law, mainly scientific and technical information resulting from research. Other information materials are those designed to facilitate conformance with law and efficient administration and information for potential or actual beneficiaries of Government services administered by the Agency.

PROGRAM AND PERFORMANCE

This division furnishes central services for the entire Agency in such matters as motor vehicles, space, telephones, tabulating, duplicating, and distributing of Agency materials under the discretion and supervision of the executive assistant to the Administrator. It also performs certain essential administrative services relating principally to pay roll, procurement of supplies and equipment, and travel for the Office of the Administrator and some of the smaller offices, and formulates procedures, establishes standards, and advises all constituent bureaus on procurement, travel, space, and similar administrative service matters. The increase in the 1951 appropriation reflects the consolidation of general housekeeping and administrative operating costs of Public Health Service representatives within the Agency regional office organization, and higher costs for travel, rent of buildings and utilities, supplies and materials, and communications.

PROGRAM AND PERFORMANCE

The Office of the General Counsel acts as legal adviser to the Administrator, the regional directors, and the heads of the constituent units of the Agency.

Expansion is provided in 1951 for the additional legal activities required under the 1949 amendments to the Federal Employees' Compensation Act and for the increasing responsibility of the staff in the interpretation of the Federal statutes and the drafting of regulations under the various laws administered by the Agency.

PROGRAM AND PERFORMANCE

The Federal Property and Administrative Services Act of 1949 (Public Law 152) assigns to the Federal Security Administrator three major responsibilities in the field of surplus property: (1) Determination of surplus personal property needed for educational purposes and allocation of that property among educational agencies and institutions; (2) disposal of real property for educational and public-health purposes, subject to the approval of the Administrator of the General Services Administration; and (3) for insuring compliance with the terms and conditions of transfers made for educational and public-health purposes under Public Law 152 and under prior laws (Surplus Property Act and its amendments).

Under Public Law 152, a supplemental appropriation of \$138,000 is estimated to be required in 1950 to reimburse the Office of Education for work it is now doing in this field and to permit the Federal Security Administrator to take over these functions. In 1951, the Administrator will carry out the program primarily through the operating units of the Federal Security Agency under policies established by him.

PROGRAM AND PERFORMANCE

Under Public Law 402, Eightieth Congress, the Department of State transfers funds to the Federal Security Agency to carry on the program of scientific and educational cooperation with other countries of the world. The responsibilities of the Federal Security Agency and its constituent organizations involve detail of technical personnel to foreign countries, upon request, to furnish consultation in the fields of health, social security, and welfare and the training of specialists and students who are brought to the United States under this program to observe and study methods and procedures in these specialized fields.

PROGRAM AND PERFORMANCE

The Federal Security Agency receives funds from the Department of the Army in connection with the cultural exchange and reorientation programs for occupied areas to cover the costs of maintenance, tuition and travel, and certain administrative costs involved in conducting obser-

vation and training programs for leaders from Germany, Japan, and Austria in the fields of health, welfare, and education. In addition, there are included funds advanced from the National Military Establishment to cover expenses for the President's Committee on Religion and Welfare in the Armed Forces.

PROGRAM AND PERFORMANCE

Proceeds of sales of vehicles, equipment, accessories, and other items, the exchange of which is authorized by law, may be applied in whole or in part payment toward the purchase of similar items. Receipts from this source are set up in a special appropriation account and are available for the replacement of similar items to the end of the fiscal year following the year in which the sale is made; unused balances are adjusted to miscellaneous receipts (5 U. S. C. 118d1).

GENERAL PROVISIONS

SEC. 202. Appropriations under this title available for salaries and expenses shall be available for travel expenses [and, when specifically authorized by the Federal Security Administrator], in accordance with regulations prescribed by the Federal Security Administrator, for expenses of attendance at meetings concerned with the function or activity for which any such appropriation is made.

SEC. 203. Appropriations under this title available for salaries and expenses shall be available for payment of tort claims pursuant to [section 403 of the Federal Tort Claims Act] law (28 U. S. C. 2672).

SEC. 204. Appropriations under this title available for salaries and expenses shall be available for examination of estimates of appropriations in the field, for exchange of books, and for payment in advance when authorized by the Federal Security Administrator for dues or fees for library membership in organizations whose publications are available to members only or to members at a price lower than to the general public.

SEC. 205. Appropriations under this title available for salaries and expenses shall be available for health service programs as authorized by law (5 U. S. C. 150), and such amounts as may be necessary may be transferred to the appropriations of the organizational units operating such programs.

SEC. 206. Appropriations under this title available for salaries and expenses shall be available for printing and binding, including the purchase of reprints.

SEC. 207. Appropriations under this title available for salaries and expenses shall be available for services as authorized by section 15 of the Act of August 2, 1946 (5 U. S. C. 55a).

SEC. [207] 208. None of the funds appropriated by this title to the Social Security Administration for grants-in-aid of State agencies to cover, in whole or in part, the cost of operation of said agencies, including the salaries and expenses of officers and employees of said agencies, shall be withheld from the said agencies of any States which have established by legislative enactment and have in operation a merit system and classification and compensation plan covering the selection, tenure in office, and compensation of their employees, because of any disapproval of their personnel or the manner of their selection by the agencies of the said States, or the rates of pay of said officers or employees.

SEC. 501. No part of any appropriation contained in this Act shall be used to pay the salary or wages of any person who engages in a strike against the Government of the United States or who is a member of an organization of Government employees that asserts the right to strike against the Government of the United States, or who advocates, or is a member of an organization that advocates, the overthrow of the Government of the United States by force or violence: *Provided*, That for the purposes hereof an affidavit shall be considered prima facie evidence that the person making the affidavit has not contrary to the provisions of this section engaged in a strike against the Government of the United States, is not a member of an organization of Government employees that asserts the right to strike against the Government of the United States, or that such person does not advocate, and is not a member of an organization that advocates, the overthrow of the Government of the United States by force or violence: *Provided further*, That any person who engages in a strike against the Government of the United States or who is a member of an organization of Government employees that asserts the right to strike against the Government of the United States, or who advocates, or who is a member of an organization that advocates, the overthrow of the Government of the United States by force or violence and accepts employment the salary or wages for which are paid from any appropriation contained in this Act shall be guilty of a felony and, upon conviction, shall be fined not more than \$1,000 or imprisoned for not more than one year, or both: *Provided further*, That the above penalty clause shall be in addition to, and not in substitution for, any other provisions of existing law. (*Labor-Federal Security Appropriation Act, 1950.*)

PUBLIC HEALTH SERVICE								
Control of communicable diseases						4	\$10,500	To carry out the technical development and epidemic control activities, including air dispersal of insecticides and larvicides.

PROPOSED LEGISLATION

EDUCATION

General aid for operating expenses, elementary and secondary schools.—Pending legislation will provide Federal grants to equalize elementary and secondary educational opportunities in the several States. The grants will be distributed on a variable basis, with a minimum of \$5 per pupil. The purpose of this proposal is to assist the States in improving and expanding our basic elementary and secondary schools, in providing for mounting numbers of enrolled students, and in increasing the number of well-qualified teachers.

If this legislation is enacted, a supplemental appropriation of \$300,250,000 will be submitted for 1951, of which \$250,000 is for administration.

Surveys and emergency construction, elementary and secondary schools.—Pending legislation would provide limited assistance for planning and emergency construction of elementary and secondary schools. Based on this legislation, the budget includes \$5,000,000 in grants for surveys of school facilities, the formulation of State construction programs, and study of the possible ways of financing school construction; \$40,000,000 for emergency construction of elementary and secondary school facilities in those areas where Federal activities have caused a sudden and substantial increase in enrollment; and \$200,000 for administration of this program.

Education of children on Federal properties and in emergency areas.—In many areas school enrollments have increased so much because of Federal activities that the local districts are unable to finance the maintenance and operation of the necessary schools; in some areas the only children attending school are those of Federal employees. Appropriations have been made for several years to departments and agencies to assist in providing education for these children.

Provided authorizing legislation is enacted, it is proposed to appropriate, in 1951, \$7,000,000 for financial assistance to school districts affected by Federal activities. In addition to this sum, the funds which are appropriated to departments and agencies for similar purposes would be transferred to the Federal Security Agency.

General assistance to college students.—Legislation is proposed to provide general assistance to talented students of college age. Assuming enactment of legislation in 1950, \$1,000,000 is included in the 1951 budget to establish the machinery necessary to administer such a program.

VOCATIONAL REHABILITATION

Expansion of vocational rehabilitation program.—Legislation is needed for expansion of the Federal-State vocational rehabilitation program to provide additional opportunities for the rehabilitation of the more severely disabled through sheltered work shops, home employment, the

extension of the business-enterprise program, and the establishment of facilities for special rehabilitation services. If such legislation is enacted, it is estimated that \$4,300,000 will be requested in 1951, of which \$300,000 is for program administration.

HEALTH

Increased aid to local public health services.—Latest available information indicates that little more than one-half of all counties are serviced by full-time local health units, and many of these are inadequately staffed. This means that most counties lack adequate services in one or more of such fundamental phases of public health as public health nursing, control of communicable diseases, sanitation, and public health dentistry. As a start toward meeting this problem, this budget proposes under existing legislation to increase grants to States for general health and, particularly, local health from \$14,200,000 in 1950 (of which an estimated \$6,200,000 is being used for local health services) to \$23,450,000 in 1951. This increase is the maximum permitted by existing law.

In addition, \$5,000,000 is estimated for the first year of operation under legislation now pending in Congress, which would remove the existing limitation and authorize additional grants to States for local health services on a variable matching basis.

Aid to medical education.—The current shortages of doctors, nurses, dentists, and public health personnel indicate the need for Federal aid to encourage expansion of enrollments in accredited schools offering training in these professions. An estimate of \$45,000,000 is included in this budget for the first year of operation under proposed legislation which would provide: (1) premium payments to medical, dental, and public health schools for each student enrolled in excess of its average past enrollment and smaller payments per student based on average past enrollment; (2) grants to medical, dental, and public health schools for construction of additional facilities; (3) grants to States for practical nurse training; and (4) scholarship aid to students in fields in which there is a shortage of qualified applicants, particularly nursing.

Medical care insurance.—Modern medical care is expensive, and the impact of illness on family budgets is often disastrous. Only the upper-income groups can afford the needed medical care, both preventive and curative, which modern science can provide.

It is proposed to meet this problem through medical care insurance. Such a program would require a 2-year starting period before health benefits become available. During that time, a small pay-roll tax of one-half of 1 percent would be levied to accumulate a starting reserve, estimated at \$250,000,000 for 1951, and covered into a trust fund to defray initial administrative and developmental

expenses. These expenses, which would be made directly from the trust fund, are estimated at \$35,000,000 for 1951.

It is contemplated that coverage would be geared into the extended old-age and survivors and disability insurance program which has been recommended.

Health services for school children.—Pending legislation authorizes an annual appropriation of \$35,000,000 for grants to States for health services to children attending school.

SOCIAL SECURITY

Proposed expansion of old-age and survivors insurance program.—Estimates have been included to cover proposed legislation expanding the Federal old-age and survivors insurance program. This legislation would provide an extension of coverage to include some 20,000,000 persons not now covered under the program; it would broaden the insurance coverage to include both permanent and total as well as temporary disability; it would liberalize benefits substantially; it would increase the amount a beneficiary could earn without loss of benefit payments from \$14.99 to \$50 and reduce the qualifying age of women to 60 years; and would also provide a number of other changes of lesser importance.

On the basis of the expanded and liberalized program, it is estimated that benefit payments and administrative

costs would total, in 1951, about \$2,300,000,000. To finance the proposed program currently and provide a reserve for future benefit payments, the tax rate, divided equally between covered employers and employees, would rise to 4 percent as of January 1, 1951, producing a total estimated income of \$5,000,000,000 on a full-year basis.

Extension of public assistance programs.—An item of \$250,300,000 is included under proposed legislation as the part-year cost of extending the Federal-State public assistance programs to include Federal participation in State payments to needy persons who are not covered under the existing law, State payments for medical care for the needy, extension of the assistance programs to Puerto Rico and the Virgin Islands, and equalization of Federal grants as between States on the basis of their relative financial ability. The item also includes an estimated \$300,000 for the additional administrative costs related to expansion of the program.

Increased grants to States for maternal and child welfare.—An item of \$9,500,000 is included under proposed legislation for increased grants to States for maternal and child welfare programs (maternal and child-health services, crippled children's services, and child welfare services) currently operated under title V of the Social Security Act and for the increased administrative and other costs related to the expanded program.

ESTIMATES OF APPROPRIATION

INTRODUCTORY STATEMENT

The Administration was established July 1, 1949, under the Federal Property and Administrative Services Act.

The purpose of the act is to provide the Government an economical and efficient system for the management of Federal property and records, not only by authority of its specific provisions but also by bringing together appropriate authorizations of previous acts and by repealing provisions in conflict with its purpose.

This act transferred to the Administration the functions and activities of the Bureau of Federal Supply of the Department of the Treasury and the Federal Works Agency, each of which was abolished; the National Archives Establishment; the War Assets Administration, for the purpose of liquidation; and a few minor units. The Bureau of Public Roads of the Federal Works Agency was later transferred to the Department of Commerce.

To meet effectively its new and expanded responsibilities the Administration has been organized as a completely integrated administrative unit with its operating programs classified into five Services: Federal Supply and Personal Property Service; Public Buildings and Real Property Service; National Archives and Records Service; Community Facilities Federal-Aid Service; and the integrated Executive Direction and Staff Operations Service.

As appropriations for 1950 were made on the basis of justifications by the several organizationally unrelated agencies for programs in effect prior to the establishment of the Administration, the funds made available to the Administration for that year by authorized transfers did not reflect the requirements for carrying out the new and expanded activities necessary for fulfilling the purpose of the act.

The estimates for 1951 are the first to be submitted by the Administration. With the exception of estimates for specific programs, such as construction and Federal aid, the requirements for initiating the activities which will lay the ground work for eventually bringing about realization of the purpose of the act are provided in the one estimate for "Operating expenses, General Services Administration."

PROGRAM AND PERFORMANCE

The Public Buildings Act of 1949 authorized the appropriation of a total of \$40,000,000 for 2 years for acquisition of sites and preparation of drawings and specifications for the establishment of a shelf of public-building projects for future construction. The authorization provides for the participation of each congressional district in the program.

Present plans for site acquisition call for completing the purchase of 305 parcels of land by the end of fiscal 1950 and 270 in fiscal 1951. The current work schedule through 1951 calls for the completion of designs for 565 projects and beginning of designs for the remaining 10 projects. The estimated construction costs for these 575 projects is \$337,000,000.

PROGRAM AND PERFORMANCE

The Congress authorized a total of \$30,000,000 for the renovation and improvement of public buildings outside the District of Columbia. The authorization limits projects to those costing \$25,000 or more and includes such items as expansion of mail handling facilities, renovation and modernization of marine hospital facilities, improvement of lighting systems, replacing boiler and heating equipment, etc.

It is proposed to accomplish the program over a 3-year period. The appropriation for 1950 will be used to accomplish the most urgent major repair items, together with some renovation and modernization projects of high priority. The program for 1951 contemplates the obligation of an additional \$10,000,000 for this purpose.

PROGRAM AND PERFORMANCE

This appropriation provides for the normal minor items of repair, preservation, and equipment for public buildings outside the District of Columbia under the jurisdiction of the General Services Administration. These structures were erected or purchased at a total cost of approximately \$770,000,000 excluding land, and contain some 96,000,000 gross square feet of floor space. The program for 1951 contemplates the accomplishment, where the cost is less than \$25,000, of minor repair and preservation projects. Beginning in 1950, projects costing \$25,000 or more are provided for under a separate appropriation.

PROGRAM AND PERFORMANCE

The sum of \$6,775,000 was authorized for the acquisition of site, design, and construction of a Federal office building at Nashville, Tenn., for housing Government activities, including the Veterans Administration.

The sites have been acquired and the principal construction contract was awarded in June 1949 for completion in July 1951. The project will be approximately 45 percent complete by June 30, 1950, and substantially complete by June 30, 1951.

PROGRAM AND PERFORMANCE

An initial appropriation of \$200,000 in fiscal 1949 enabled the General Services Administration to proceed with drawings and specifications for building facilities for the Public Health Service at Cincinnati, Ohio, for research and study relating to the control of water pollution.

The program proposes the completion of drawings and specifications prior to June 30, 1950. It is anticipated that the principal construction contract will be awarded about September 1, 1950, for completion in 22 months from October 1, 1950, and be approximately 38 percent financially complete by June 30, 1951. Physical completion is scheduled for July 31, 1952.

Total obligations.....	9,923,348	600,000	1,377,573

PROGRAM AND PERFORMANCE

The funds authorized cover the design and construction of a building for the use of the United States Court of Appeals for the District of Columbia and the District Court of the United States for the District of Columbia. The limit of cost, including a credit to the District of Columbia for the site and funds initially appropriated for design, is \$18,665,000. The limit of cost to the General Services Administration for construction is \$15,875,000. The final costs of this project are now estimated at \$12,000,000, resulting in a savings of \$3,875,000.

Design was completed during the 1949 fiscal year, and the principal construction contract was awarded on May 10, 1949, for completion in 27 months from July 14, 1949. The program proposes approximately 36 percent financial completion by June 30, 1950, and 95 percent financial completion by June 30, 1951. Physical completion of the project is scheduled for October 14, 1951.

PROGRAM AND PERFORMANCE

The purpose of this program is to acquire stocks of raw materials needed for national defense to supplement supplies expected to be available from dependable sources during an emergency period. The program at present includes a total of 69 materials which are determined to be strategic and critical, and which are purchased as required to maintain a balanced supply of materials. In addition to purchases, the program provides for storage in secure locations, the periodic rotation of those materials subject to deterioration, and general administration. By the end of 1951, those phases of the program concerned with re-

fining, beneficiating, packaging, and handling materials acquired as surplus will largely be completed.

Total expenditures for the program, including those for administration, handling, and storage, are expected to rise to \$650 million in 1951 from \$580 million in 1950. Assuming that prices on the average remain unchanged, the new obligational authority of \$500 million recommended for the fiscal year 1951 will enable 78 percent of the present \$3.3 billion objective to be purchased as compared with 62 percent at the end of the fiscal year 1950.

Total obligations.....	1,999,997	7,400,000	8,400,000

PROGRAM AND PERFORMANCE

The funds are for refund payments due war contractors upon approval of claims presented under the provisions of title VII of the Revenue Act of 1943. The indicated funds are to cover net amounts refunded to contractors after calculation of the Federal tax benefit, as well as interest costs which the Tax Court may order to be paid in a few instances.

As of July 1, 1949, there had been received 2,917 claims, aggregating over \$97,000,000. The total program is estimated at 6,000 claims with a gross dollar value of \$226,000,000, resulting in net refunds of \$56,000,000 after calculation of the Federal tax benefit.

In 1951, it is estimated that claims having a gross value of \$35,500,000 will be cleared for payment at a net settlement value of \$8,400,000. Experience over a 2-year period indicates that final payments average 23.5 percent of gross value of claims.

WORK LOAD BY ACTIVITIES

Refund payments (number)—1949, 356; 1950, 950; 1951, 1,000.

Total obligations.....	7,558,451	6,456,300	8,130,500

PROGRAM AND PERFORMANCE

The general supply fund is a revolving fund utilized by the General Services Administration for the purchase of materials and services required by the various Federal agencies and the District of Columbia. It is charged with payments made for services and materials purchased and reimbursed with payments received from the various agencies of the Government to which the services and materials are sold.

Sales to Government agencies fall into two groups: (1) Direct delivery sales, that is, those arising out of purchases made through the fund for direct delivery to ordering agencies; and (2) stores issues, that is, those arising out of items purchased through the fund, stocked, and subsequently issued to agencies upon their requisition. Included in the latter category are sales arising from the operation of a fuel yard, an automotive repair shop, a furniture repair shop, and a typewriter repair shop in the city of Washington.

Any surplus arising out of the operations of the fund, determined as a result of audits made by the General Accounting Office, is returned to the Treasury as miscellaneous receipts.

The actual sales for the fiscal year 1949 and the projected sales for the fiscal years 1950 and 1951, exclusive of interwarehouse transfers, and surplus typewriter sales, follow:

	Stores issues	Direct delivery	Total
Cost of sales:			
1949 actual.....	\$26,626,000	\$63,653,000	\$90,279,000
1950 estimated.....	26,937,000	59,063,000	86,020,000
1951 estimated.....	31,761,000	66,726,000	98,487,000

The direct delivery figures include special sales under the aid-to-China program, amounting to \$11,174,000 and \$2,337,000 in 1949 and 1950, respectively.

Due to the provisions of the Federal Property and Administrative Services Act of 1949, the indirect costs of operating the general supply fund will no longer be recovered from requisitioning agencies in the form of surcharges. It is expected that this practice, which will have the effect of reducing prices, will encourage Government agencies to utilize to a greater extent the services of the general supply fund.

The increase of \$4,000,000 in capital is based on factors such as (1) anticipated increase in the volume of sales due to reduction of surcharges, (2) a determined effort on the part of General Services Administration to improve and expand its supply services, and (3) stocking of many seasonal items.

PROGRAM AND PERFORMANCE

The Congress authorized a total of \$70,000,000 to provide, over a 5-year period, needed and useful public works for the development of the Territory of Alaska, of which approximately 50 percent is recoverable from the Territorial government or other public bodies. Appropriations and contract authority totaling \$5,000,000 were provided to survey the needs of the Territory, develop a program of specific projects, and to initiate construction activities during fiscal year 1950.

The program proposed for 1951 contemplates the letting of construction contracts amounting to \$19,950,000 under the specific projects developed by the 1950 survey. It includes construction of a variety of facilities, such as hospitals, schools, electric and telephone systems, water and sewage systems, etc. Payments for work in place on projects initiated prior to and during 1951 are estimated at \$11,820,000. There now exists a backlog of approved projects for Alaskan development, and some local bodies have already authorized bond issues to finance their portion of the total costs.

Total obligations.....		25,000,000	60,900,000

PROGRAM AND PERFORMANCE

Loans or advances are made to States and other local public bodies for planning, in advance, needed public works and for financing the costs of surveys, engineering investigations, and plans preliminary to the construction of local public works, including schools, other public buildings, sewerage works, water supply systems, etc., such loans or advances being repayable to the Government at the start of construction. Appropriations and contract authority totaling \$25,000,000 were made available in fiscal year 1950 to initiate the 2-year \$100,000,000 program approved to replenish and expand the reserve of local projects planned under title V of the War Mobilization and Reconversion Act of 1944.

Due to the huge backlog of needed community facilities, it is expected that a sufficient volume of applications will be received during fiscal year 1951 to permit the making of advances at the rate of approximately \$5,000,000 per month. Based on prior experience, these advances should result in plans for locally financed public works costing approximately \$1,900,000,000.

Grants to States, Municipalities, Etc., for Plan Preparation, Water Pollution Control, General Services Administration—

FUNDS AVAILABLE FOR OBLIGATION: Appropriation or estimate—1950, \$200,000; 1951, \$1,000,000.

PROGRAM AND PERFORMANCE

Grants to States, municipalities, or interstate agencies are made to aid in financing costs preliminary to the construction of projects for water pollution control. Aid is authorized in an amount equal to one-third of planning costs or \$20,000, whichever is the lesser amount. An appropriation of \$200,000 was provided to initiate the program during fiscal year 1950.

The program authorized is to be completed over a 5-year period ending June 30, 1953, and contemplates an annual appropriation of \$1,000,000. Applications for grants during 1951 are expected to exceed the amount requested.

OBLIGATIONS BY ACTIVITIES

Grants to State and local public bodies—1950, \$200,000; 1951, \$1,000,000.

OBLIGATIONS BY OBJECTS

11 Grants, subsidies, and contributions—1950, \$200,000; 1951, \$1,000,000.

APPROPRIATION TEXT

Grants for plan preparation, water pollution control: For an additional amount for grants to States, municipalities, or interstate agencies to aid in financing the cost of action preliminary to the construction of projects for water pollution control as authorized by section 8 (c) of the Water Pollution Control Act of June 30, 1948 (62 Stat. 1155), **[\$200,000]** \$1,000,000. PROGRAM AND PERFORMANCE

This appropriation provides for the administrative expenses required to carry out functions of the General Services Administration under the Water Pollution Control Act.

The program proposed for 1951 includes development of procedures and program methods for later effectuating the construction loan provisions of the act, processing applications for grants for plan preparation, and general administrative expenses.

PROGRAM AND PERFORMANCE

Funds are authorized for provision, over a period of years, of certain useful and needed public works in order to raise the economic standards in the Virgin Islands over a period of years within a total cost of \$10,000,000. The program was initiated in 1946 and appropriations of \$5,643,942 have been provided, of which all but a minor amount will be obligated by the end of 1950.

The program proposed for 1951 contemplates construction of a large number of urgently needed facilities. It reflects new construction contracts amounting to \$1,168,953 for hospital facilities and \$1,210,750 for school and educational facilities, supplemental contracts for \$254,297 to complete the water-front development planned under a prior appropriation, and \$105,603 for supervision and contingencies. Payments for work in place on projects initiated prior to and during 1951 are estimated at \$1,200,000.

PROGRAM AND PERFORMANCE

These funds will be used for the continued administration of the program for the making of repayable advances to State and local public bodies for public-works planning under title V of the War Mobilization and Reconversion Act of 1944. As of June 30, 1947, when this authority to make advances expired, 7,350 advances, amounting to \$61,700,000, had been approved for the planning of public works, estimated to cost \$2,300,000,000.

The program proposed for 1951 includes expenditures of \$856,000 to complete the remaining planning accounts, representing the final expenditures to be made under the foregoing advances and the collection of repayments of

\$7,000,000 anticipated to result from the placing of approximately 1,000 projects under construction.

PROGRAM AND PERFORMANCE

Funds are required for administrative expenses for the liquidation of activities arising out of operations incident to community facilities and services of various types which were provided in areas affected by defense or war-connected activities.

As of July 1, 1949, there remained 80 projects involving land acquisition litigation, including multiple condemnation proceedings affecting 822 separate parcels of land. Due to usual delays in obtaining court orders, it is anticipated that liquidation activities will continue throughout fiscal year 1951.

APPROPRIATION TEXT

War public works (community facilities) liquidation: For administrative expenses necessary during the current fiscal year for the liquidation of all activities under titles II, III, and IV of the Act of October 14, 1940, as amended (42 U. S. C. 1531-1534, 1541, and 1562), except expenses related to the maintenance, operation and disposal of Federal project properties, and those in connection with the management and disposal of project securities, including personal services and rents in the District of Columbia; printing and binding; and a health service program as authorized by law (5 U. S. C. 150); not to exceed \$175,000 \$50,000 of the unobligated balances of the funds heretofore appropriated for carrying out the provisions of titles II, III, and IV of the Act of October 14, 1940, as amended (42 U. S. C. 1531-1534, 1541, and 1562). (Independent Offices Appropriation Act, 1950.)

PROGRAM AND PERFORMANCE

This appropriation provides for operations and administration of all of the regular activities of the General Services Administration as authorized by the Federal Property and Administrative Services Act of 1949, exclusive of specific programs and projects for site acquisition, design and construction of buildings, Federal-aid programs, and other special purposes which have been authorized by other legislation and which are provided for in other estimates.

The programs on which this estimate is based represent in all but a few activities only the steps preliminary to establishing next year a level of performance necessary to meet the responsibilities imposed by the act.

1. *Public buildings and real property service.*—This service includes the planning, development, and supervision

Operating Expenses, General Services Administration—Continued

of the acquisition, construction, utilization, management, and disposal of buildings and other real property.

(a) *Buildings management in the District of Columbia.*—The Administration manages, operates, maintains, and protects (including repair) 38,406,000 gross square feet of Government-owned space and 1,923,000 net square feet of leased space; joint-use communications facilities; and provides related special services. About 80 percent of these services are financed by direct appropriation and the balance by payments from funds made available to occupying agencies.

(b) *Buildings management outside the District of Columbia.*—A field staff manages, operates, maintains, and protects (excluding repair) 20,347,000 gross square feet of Government-owned space and 8,033,000 net square feet of leased space; joint-use communication facilities; and provides related special services. About 70 percent of these services are financed by direct appropriation and the balance by payments from funds made available to occupying agencies.

(c) *Industrial reserve property management.*—A total of 66 Government-owned industrial plants having a total acquisition cost of \$770,000,000 and 14,080 tons of machine tools and industrial equipment which initially cost \$18,000,000 will be maintained in a stand-by condition.

(d) *Real property acquisition and utilization.*—The Administration supervises all site acquisition, allots and controls the utilization of 86,800,000 square feet of space occupied by Federal agencies, promotes maximum utilization of excess real property throughout executive agencies by assignment or transfer, and surveys the real property-management practices of other executive agencies. For 1951 it is proposed to continue space activities at the current level and to initiate negotiations which will subsequently lead to taking over 95,000,000 square feet of space now under the control of other agencies; to give increasing attention to the field of excess owned or leased property, and to establish policies and relationships for proper utilization thereof; and to reestablish a Federal real property inventory.

(e) *Surplus real property management and disposal.*—In 1951, it is estimated that disposal will be made of 165 of a total of 454 surplus properties; certain of these properties for the time they are in the possession of this Administration will be protected and maintained.

(f) *Real property design supervision.*—This activity provides the nucleus technical staff for supervision over all programs involving design, construction, and remodeling of buildings for which it is estimated that expenditures will total approximately \$125,000,000 in 1951.

2. *Federal supply and personal property service.*—This service includes the planning, development, operation, and supervision of the supply of personal property for the executive establishment and of such nonpersonal services as public utilities and freight traffic, including related functions.

(a) *Establishment of standards.*—This activity includes the research, development, publication, and revision of standard specifications for commodities purchased for and by Federal agencies; and the development, in collaboration with the Munitions Board Cataloging Agency and various civil agencies, of that portion of the new Federal Catalog which will cover items of common use by military and civil agencies as well as those of solely civil agency use. The program for 1951 contemplates keeping abreast of the average annual requests for some 300 new or revised speci-

fications and making a small inroad on the existing accumulated backlog of some 1,400 requests from prior years. In commodity cataloging it is planned to keep the old Federal Catalog up to a current status and to begin on a small scale to build up the development of cataloging activities for items for solely civilian use as well as to participate in the preparation of description patterns and nomenclature of items which have joint military and civilian use.

(b) *Requirements and utilization.*—This activity includes the advance determination for all executive agencies of over-all supply requirements through surveys of their needs, distribution, inventory levels, and personal property management practices, and the establishment of standards therefor; the promotion of maximum utilization of excess property within or between agencies; and the disposal of personal property found to be surplus to the needs of the Government. The program for 1951 provides for the recruitment and training of a minimum number of survey teams to make advance determinations of supply requirements in a few selected agencies. The utilization and disposal program, based on past experience, is estimated to cover 33,000 declarations of surplus involving some 100,000 line items with original acquisition cost of \$150,000,000.

(c) *Purchase and stores operations.*—This activity establishes indefinite-quantity term contracts for commodities commonly used throughout the Government against which agencies place orders to fill their needs from time to time; operates a Nation-wide supply system consisting of strategically located supply centers from which common-use items can be quickly supplied to Federal agencies; and inspects commodities purchased by the various Government agencies against term contracts or by this Administration for its supply centers for reissue to other agencies. For 1951, the program of term contracts in Washington will be revitalized without increasing manpower, but the program as a whole will be strengthened by establishing a small staff in each of 10 regional offices to provide for sectional contracts of interest to local suppliers and small business. In 1951, for the first time, the indirect costs of administering the system of Nation-wide supply centers are to be provided by direct appropriation instead of by a surcharge added to the cost of supplies issued. However, this does not reflect an increase in cost to the Government as a whole, for the reason that the cost has been offset by appropriate deductions from the estimates of other Government agencies. For 1951, the inspection function will be strengthened to a point where reasonable assurance of quality in delivered commodities will be attained.

(d) *Traffic and utilities management.*—This includes the centralized function of securing the most economical transportation of Federal public property by and for all agencies of the executive establishment and the centralized function of enabling all executive agencies to secure the best public utilities services at the lowest possible rates both in Washington and in field locations. For 1951, it is estimated that freight transportation, which will be brought under the surveillance of this activity, will increase from \$72,000,000 to \$164,000,000 and that, with the increased staff, the savings to the Government will increase from \$5,000,000 to \$11,480,000. No significant change in program or staff is contemplated for the management of public utilities, although it is expected that the savings for 1950 and 1951 will approximate \$3,500,000.

3. *National Archives and records service.*—Under this service are grouped the functions of the National Archives Establishment and the management and administration of current and semicurrent records.

(a) *Records management and centers.*—This is a new activity in 1951 designed to improve records management in the Government. Standards will be developed for agency programs, and existing situations will be surveyed to provide the basis for future records management programs and, if necessary, recommendations for additional legislation. Field records centers of some 200,000 cubic feet capacity are proposed to initiate a program that can be subsequently expanded to effectively meet the requirements of a comprehensive program of records management in the field.

(b) *National Archives.*—The program for 1951 provides for continuation of the regular National Archives functions in the care, handling, and custody of the more permanently valuable records of the Government; provision for a full-year program of identifying, describing, and referencing the records of World War II which was initiated in the last half of 1950; and pilot programs to reproduce on noninflammable film photographic records currently on inflammable film; and to microfilm records which can then be destroyed.

(c) *Federal Register.*—The publication of the Federal Register and the United States Government Manual will be continued at the same level as in 1950.

(d) *Franklin D. Roosevelt Library.*—This activity provides for the acquisition, preservation, and servicing of historical material concerning Franklin D. Roosevelt.

4. *Executive direction and staff operations.*—This activity provides for the immediate staff of the Administrator of General Services and the staff service operations of management, budget and fiscal, legal and information, for all of the activities included in the "Operating expense" appropriation item, and the Office of Contract Settlement. The integration and initial centralization of these services begun in 1950, will be continued during 1951. About 30 percent of this activity relates to and is financed by special programs.

OBLIGATIONS BY ACTIVITIES

Description	1949 actual	1950 estimate	1951 estimate
<i>Direct Obligations</i>			
1. Public buildings and real property service:			
(a) Buildings management in the District of Columbia.....	\$33,254,840	\$30,990,000	\$32,590,000

APPROPRIATION TEXT

Operating expenses: For necessary expenses of the General Services Administration not otherwise provided for, including: Operation, maintenance, protection, repair, and improvement of public buildings and grounds to the extent that such buildings and grounds are under the control of the General Services Administration for any of such purposes (including the operation, maintenance, and protection of the District Court Building in the District of Columbia); rental of buildings or parts thereof in the District of Columbia and elsewhere; the restoration of leased premises; moving Government agencies in connection with the assignment, allocation, and transfer of building space; ground rent, which may be paid in advance where required; demolition of buildings; furnishings and equipment; acquisition by purchase or otherwise and disposal by sale or otherwise of real estate and interests therein; payment of sums in lieu of taxes accruing against real property declared surplus by Government corporations under the Surplus Property Act of 1944,

Operating Expenses, General Services Administration—Continued

where legal title to such property remains in the Government corporation; compliance with the provisions of the National Industrial Reserve Act of 1948 (50 U. S. C. 451ff); payment of per diem employees employed in connection with any of the foregoing functions at rates approved by the Administrator of General Services or his designee not exceeding current rates for similar services in the place where such services are employed; arms and ammunition for the guard force; purchase, repair, and cleaning of uniforms for guards and elevator operators; purchase of not to exceed 30 passenger motor vehicles; processing and determining net renegotiation rebates; liquidation of activities under the Act to promote the defense of the United States (55 Stat. 31); scientific, technical and other apparatus and materials for the arrangement, tiling, scoring, repair, editing, processing, duplication and reproduction of photographic and other records (including motion picture and other films and sound recordings) in the custody of the Archivist of the United States and preparation of guides and other finding aids to records of the Second World War; \$84,725,000.

Section 322 of the Act of June 30, 1932, as amended (40 U. S. C. 278a) shall not apply to any lease entered into by, or transferred to, the General Services Administration, for the housing of agencies specifically exempted from the requirements of said section.

The foregoing appropriation shall be credited with (1) advances or reimbursements for salaries and administrative expenses chargeable against other appropriations of the General Services Administration, and such salaries and expenses may be paid from this appropriation; (2) advances or reimbursements for services, quarters, maintenance, or other facilities furnished other agencies on a reimbursable basis; (3) cost of maintenance, upkeep, and repair included as part of rentals received from Government corporations pursuant to law (40 U. S. C. 129); (4) reimbursements for services performed in respect to bonds and other obligations under the jurisdiction of the General Services Administration, issued by public authorities, States, or other public bodies, and such services in respect to such bonds or obligations as the Administrator deems necessary and in the public interest may, upon the request and at the expense of the issuing agencies, be provided from this appropriation; and (5) as respects property transferred to the General Services Administration pursuant to the Act of July 2, 1948 (50 U. S. C. 451ff), (a) advances or reimbursements for necessary utilities and services furnished private occupants of industrial plants, and such utilities and services may be provided at cost from this appropriation; (b) proceeds received from insurance against damage to such property, and such proceeds may, at the direction of the Secretary of Defense, be used to repair or restore the damaged property; and (c) appropriations or funds available to other agencies, and transferred to the General Services Administration, in connection with such property, and such appropriations or funds may, with the approval of the Bureau of the Budget, be so transferred.

Appropriations or other funds available to the General Services Administration shall be available during the current fiscal year for personal services in the District of Columbia; health service programs as authorized by law (5 U. S. C. 150); printing and binding; preparation, shipment, and installation of photographic displays, exhibits, and other descriptive materials; and payment of tort claims pursuant to law (28 U. S. C. 2672). (Federal Property and Administrative Services Act of 1949; Independent Offices Appropriation Act, 1949: Salaries and expenses, Office of Administrator, Federal Works Agency; General administrative expenses, Public Buildings Administration; Salaries and expenses, Public buildings and grounds in the District of Columbia, Public Buildings Administration; Salaries and expenses, public buildings and grounds outside the District of Columbia, Public Buildings Administration; National Industrial Reserve, Public Buildings Administration; Salaries and expenses, National Archives; Salaries and expenses, war records, National Archives; Third Deficiency Appropriation Act, 1949: Administrative expenses, defense aid, liquidation of lend-lease program; Salaries and expenses, surplus property disposal; Treasury and Post Office Departments Appropriation Act, 1950: Salaries and expenses, Office of Contract Settlement; Salaries and expenses, Bureau of Federal Supply; Expenses, Net Renegotiation Rebates, Bureau of Federal Supply.)

Estimate 1951, * \$84,725,000

- * Estimate is for activities previously carried under the following appropriations: "Salaries and expenses, office of administrator, General Services Administration."
- "Salaries and expenses, office of contract settlement, General Services Administration."
- "General administrative expenses, public buildings, General Services Administration."
- "Salaries and expenses, public buildings and grounds in the District of Columbia and adjacent area, General Services Administration."
- "Salaries and expenses, public buildings and grounds outside the District of Columbia, General Services Administration."
- "National industrial reserve, General Services Administration."
- "Salaries and expenses, National Archives, General Services Administration."
- "Salaries and expenses, Federal supply, General Services Administration."
- "Net renegotiation rebates, General Services Administration."
- "Administrative expenses, defense aid, liquidation lend-lease (Allocation to General Services Administration, Federal supply)."
- "Salaries and expenses, surplus property disposal, General Services Administration."
- "Salaries and expenses, war assets (special fund)."

PROGRAM AND PERFORMANCE

A total sum of \$975,000 was provided for the construction and equipment of a building to house the Geophysical Institute at the University of Alaska.

The construction contract was awarded during the 1949 fiscal year and obligations incurred in the total amount of \$745,947. It is estimated that the remaining balance of \$229,053 will be obligated and expended during fiscal 1950 for special equipment, supervision, and miscellaneous expenses.

PROGRAM AND PERFORMANCE

This program, which was begun in the fall of 1946, provided needed educational facilities (other than housing)

out of Federal surpluses to educational institutions furnishing courses of training or education to veterans under the Servicemen's Readjustment Act of 1944. Active acquisitions and transfers of surplus items will have been completed during fiscal year 1950.

The proposed program for 1951, amounting to \$59,900 for final administrative costs and leave payments, to be financed out of remaining balances, will complete this program. Over 5,100 buildings and 108,000,000 individual items of equipment and furniture had been made available to educational institutions under the program by October 31, 1949.

Maintenance and Operation of Schools, General Services Administration—Continued

PROGRAM AND PERFORMANCE

Funds were provided in 1950 to continue for 1 year a program begun in 1941 to provide assistance to local school agencies overburdened financially by defense-incurred school enrollments or reductions in school revenues caused by the acquisition or ownership of land by the United States.

The President has proposed new legislation, to be administered by the Office of Education, for the solution of this problem. This legislation is now under study by the House Committee on Education and Labor. Accordingly, no provision is made in the 1951 budget for extension of this aid by General Services Administration. A small amount financed out of the prior appropriation is estimated to be required in 1951 solely to liquidate the 1950 program.

APPROPRIATION TEXT

For necessary expenses, including personal services in the District of Columbia, printing and binding, services as authorized by section 15 of the Act of August 2, 1946 (5 U. S. C. 55a), and attendance at meetings of organizations of concern to the work of the Bureau, \$1,450,000: *Provided*, That the general supply fund shall be available for (1) procurement for non-Federal agencies for which a Federal agency is authorized to procure; (2) purchase from or through the Public Printer of standard forms and blankbook work for field warehouse stocking and issue, such issues to be chargeable to applicable appropriations and to be reported as the Public Printer may require; (3) printing and binding, purchase of ten passenger motor vehicles for replacement only, and attendance at meetings of organizations of concern to the operation of the general supply fund; and (4) reconditioning and repair of supplies for Government service: *Provided further*, That payments to the general supply fund may be made (1) in advance; (2) by transfer and counter warrants based on itemized invoices at issue prices fixed by the Director; and (3) by vouchers certified by the requisitioning agency on the basis of the Bureau's billing, subject to later adjustment if necessary, and in such cases the certifying officer shall be responsible only for the availability of the funds charged: *Provided further*, That when functions are transferred to the Bureau of Federal Supply, transfers may be made from applicable appropriations or funds to the Bureau of Federal Supply of amounts approved by the Bureau of the Budget as necessary for the proper performance of the functions transferred, including personal services: *Provided further*, That after June 30, 1949, the proceeds of sale of surplus property by the Bureau of Federal Supply shall be covered into the Treasury as miscellaneous receipts, except where reimbursement to an appropriation or fund is authorized by law.

During the current fiscal year, no part of any money appropriated in this or any other Act shall be used during any quarter of such fiscal year to purchase typewriting machines (except bookkeeping and billing machines) at a price which exceeds 90 per centum of the lowest net cash price, plus applicable Federal excise taxes, accorded the most-favored customer (other than the Government, the American National Red Cross, and the purchasers of typewriting machines for educational purposes only) of the manufacturer of such machines during the six-month period immediately preceding such quarter.

No part of any money appropriated by this or any other Act for any agency of the executive branch of the Government (which shall include all departments, independent establishments, and wholly owned Government corporations) shall be used during the current fiscal year for the purchase within the continental limits of the United States of any typewriting machines (except typewriting machines for veterans under public laws administered by the Veterans' Administration) unless the Director of the Bureau of Federal Supply certifies that he is unable to furnish such agency with suitable typewriting machines out of stock on hand. The Director of the Bureau of Federal Supply is authorized and directed at such times as he may determine to be necessary to survey and determine the numbers and kinds of typewriting machines located in the continental limits of the United States which are at any time surplus to the requirements of any agency in the executive branch of the Government (which shall include all departments, independent establishments, and wholly owned Government corporations).

Upon such determination, the Director of the Bureau of Federal Supply is authorized to direct, upon such notice and in such manner as he may prescribe, the head of any such agency to surrender to the Bureau of Federal Supply any and all typewriting machines surplus to its requirements, the costs of packing, shipping, and handling thereof to be charged to the general supply fund. Each such agency shall furnish the Director of the Bureau of Federal Supply such information regarding typewriting machines, wherever located, as he may from time to time request. The Bureau of Federal Supply is authorized and directed to receive, hold, sell, exchange, or supply to any branch of the Government, including the District of Columbia, typewriting machines surrendered to it hereunder. The Director of the Bureau of Federal Supply is authorized to charge each agency to which typewriting machines are supplied hereunder amounts equal to the fair value thereof, as determined by him, and such amounts shall be credited to the general supply fund. (47 Stat. 1517; Treasury and Post Office Departments Appropriation Act, 1950.)

Appropriated 1950, \$1,450,000

NOTE.—Estimate for 1951 for activities previously carried under this title has been transferred in the estimates to "Operating expenses, General Services Administration." The amounts obligated in 1949 and 1950 are shown in the schedule as comparative transfers.

[SURPLUS PROPERTY DISPOSAL]

Salaries and expenses: For expenses necessary for carrying out the provisions of the Federal Property and Administrative Services Act of 1949 (Public Law 152, approved June 30, 1949), relating to excess and surplus property, including personal services in the District of Columbia; allocations to Government agencies for services

rendered in connection with care and handling or disposal of property declared surplus prior to July 1, 1948; not to exceed \$5,000 for payment of claims pursuant to law (28 U. S. C. 2672); not to exceed \$14,000 for a health service program as authorized by law (5 U. S. C. 150); printing and binding; expenses of attendance at meetings concerned with the purposes of this appropriation; acquisition of real property and interests therein, necessary in connection with care and handling or disposal of property; payments to States or political subdivisions thereof of sums in lieu of taxes accruing against real property declared surplus by Government corporations; appraisers at rates of pay or fees not to exceed those usual for similar services; and advances of funds to cashiers and collection officials, upon furnishing bond; fiscal year 1950, \$12,500,000: *Provided*, That the Administration may procure by contract or otherwise and furnish to governmental employees and employees of Government contractors at the reasonable value thereof food, meals, subsistence, and medical supplies, emergency medical services, quarters, heat, light, household equipment, laundry service, and sanitation facilities, and erect temporary structures and make alterations in existing structures necessary for these purposes, when such employees are engaged in the disposal of surplus property, or in the preparation for such disposal, at locations where such supplies, services, equipment, or facilities are otherwise unavailable, the proceeds derived therefrom to be credited to this appropriation: *Provided further*, That in addition to the amount hereinbefore appropriated, and notwithstanding the provisions of any other law, not to exceed \$2,000,000 of the proceeds of the disposal of surplus property subject to a "national security clause" as defined in the National Industrial Reserve Act of 1948 (50 U. S. C. 451), or as imposed pursuant to the Act of August 5, 1947 (10 U. S. C. 1270, 34 U. S. C. 522 (a)), or deductions from proceeds otherwise collectible as a result of the disposal of such property, shall be available for such costs of renovation, restoration, rehabilitation, improvement, and repair of industrial facilities as may be contracted for during the fiscal year 1950 if required for purposes of national defense or for the protection of the public or of private property from the effects of the operation of such facilities: *Provided further*, That appropriations to the War Assets Administration for the fiscal year 1947 shall remain available for expenditure during fiscal year 1950 for obligations incurred during the fiscal year 1947 in respect to industry agents' contracts: *Provided further*, That not to exceed \$762,000 of the appropriations to the War Assets Administration for the fiscal year 1949 shall remain available for accumulated or accrued leave paid after June 30, 1949, to employees of the War Assets Administration separated or furloughed on or before that date: *Provided further*, That the appropriation and authority with respect to the appropriation in this paragraph shall be available from and including July 1, 1949, for the purposes provided in such appropriation and authority. All obligations incurred during the period between August 15, 1949, and the date of enactment of this Act in anticipation of such appropriation and authority are hereby ratified and confirmed if in accordance with the terms thereof. (Third Deficiency Appropriation Act, 1949.)

Appropriated 1950, \$12,500,000

NOTE.—Estimate for 1951 for activities previously carried under this title has been transferred in the estimates to "Operating expenses, General Services Administration." The amounts obligated in 1949 and 1950 are shown in the schedule as comparative transfers.

PROGRAM AND PERFORMANCE

This account provides for centralized and direct expenditures covering personal services and incidental expenses of employees whose time is spread over a number of construction and miscellaneous projects. The account is financed by funds appropriated, transferred, or advanced to the General Services Administration for construction and related activities. The establishment of this permanent account was authorized by Public Law 413, approved June 14, 1946.

The work load, which consists of the preparation of drawings and specifications, supervision of construction, and general office expense, will be increased principally because of the award of contracts for several large public building and special-use projects for which funds have been provided. Appropriations for carrying out the new programs for the acquisition of sites and design of public-building projects and for the renovation and improvement of public buildings, both outside the District of Columbia and the provision of additional funds for construction, have resulted in a substantial increase in activity under this account.

PROGRAM AND PERFORMANCE

The 1946 Independent Offices Appropriation Act appropriated an amount of \$50,000 as a working capital fund for financing the operation of a central blueprinting, photostating, and duplicating service on an Agency-wide

basis, pending reimbursements from the accounts benefited. Surpluses resulting from operations are required to be deposited into miscellaneous receipts of the Treasury. The account is entirely reimbursable, and through June 30, 1949, a cumulative total of \$12,639 had been deposited to the credit of miscellaneous receipts. The program proposes a work load in 1951 similar to that contemplated for 1950.

PROGRAM AND PERFORMANCE

The sum of \$1,850,000 for the construction, including acquisition of site, design, and supervision of construction, of a regional office building at Columbia, S. C., for the Veterans Administration was transferred to the General Services Administration in fiscal year 1948. Title for the site was cleared on October 29, 1948, and drawings and specifications were completed on July 28, 1949.

The construction contract was awarded in October 1949 for completion in 19 months. The program proposes completion of 42 percent of construction in fiscal year 1950 and final completion in fiscal year 1951.

Total obligations.....	912,909	705,898	

PROGRAM AND PERFORMANCE

Aid to disaster-stricken areas by the provision of Federal surplus personal property is authorized when approved by the President. A total of \$2,000,000 was transferred to this account from other funds pursuant to provisions of Public Law 233, Eightieth Congress. All but \$490,898 was utilized by the end of June 1949. An additional transfer potential of \$215,000 remains available, thus increasing the 1950 capacity to \$705,898.

The proposed program for 1950 contemplates the utilization of \$147,000 to complete aid in areas designated by the President on or before June 30, 1949. The balance is retained as a stand-by reserve to meet unforeseen contingencies in 1950.

In 1951, legislation is proposed appropriating \$5,000,000 to the President for disaster relief.

Cafeteria Annex, Saint Elizabeths Hospital (Transfer to General Services Administration)—

FUNDS AVAILABLE FOR OBLIGATION: Transferred from "Cafeteria Annex, Saint Elizabeths Hospital, Federal Security Agency"—1951, \$40,000.

PROGRAM AND PERFORMANCE

The Federal Security Agency proposes to transfer to the General Services Administration authority and appropriations made to it for the design of a cafeteria annex to two existing structures within the grounds of Saint Elizabeths Hospital, Washington, D. C.

The program proposes the completion of drawings and specifications during 1951 to permit award of contract during 1952.

OBLIGATIONS BY ACTIVITIES

Design, supervision, etc.—1951, \$40,000.

PROGRAM AND PERFORMANCE

Community facilities and services of various types were provided in areas affected by defense or war-connected activities incident to World War II. Almost \$494,000,000 was expended for these purposes through June 30, 1949, and \$800,000 is estimated for expenditure during fiscal year 1950. The proposed program for 1951 is a continuance of the liquidation of prior year obligations, most of which are incident to land-acquisition litigation.

OBLIGATIONS BY ACTIVITIES

Description	1949 actual	1950 estimate	1951 estimate
1. Land acquisition litigation	\$439,443		
2. Claims of contractors	314,545		
Total obligations	753,988		

OBLIGATIONS BY OBJECTS

10 Lands and structures—1949, \$753,988.

Conservation of Securities, General Services Administration—

FUNDS AVAILABLE FOR OBLIGATION: Transferred from "Liquidation of public works administration, General Services Administration"—1949, \$4,000.

PROGRAM AND PERFORMANCE

This item provided for conservation of the Federal Government's interest in bonds and other obligations in the custody of the Administrator of General Services, issued for the construction of Public Works Administration projects.

OBLIGATIONS BY ACTIVITIES

Power rate studies—1949, \$4,000.

OBLIGATIONS BY OBJECTS

07 Services performed by other agencies—1949, \$4,000.

Construction and Equipment, Saint Elizabeths Hospital, Federal Security Agency (Transfer to General Services Administration)—

FUNDS AVAILABLE FOR OBLIGATION	1949 actual	1950 estimate	1951 estimate

Total obligations	3,097,812	502,764	110,000

PROGRAM AND PERFORMANCE

The Federal Security Agency transferred to the General Services Administration authorizations and appropriations made to it for the design, construction, and equipment, within the grounds of Saint Elizabeths Hospital, Washington, D. C., of a building for the housing, care, and treatment of mentally sick patients under a limit of cost of \$3,915,000. The principal construction contract was awarded in July 1948. The program proposes completion of the project by December 31, 1950.

OBLIGATIONS BY ACTIVITIES

Description	1949 actual	1950 estimate	1951 estimate
1. Construction	\$3,063,893	\$452,764	100,000

Balance available in subsequent year (contract authorization)			-328,000
Total obligations			5,110,000

PROGRAM AND PERFORMANCE

Funds for the construction of two treatment buildings and the demolition of certain buildings for Saint Elizabeths Hospital are being recommended for 1951 by the Federal Security Agency. If approved, the project will be carried out by transfer of funds to the General Services Administration. The proposed limit of cost of construction is \$5,588,000.

Preparation of drawings and specifications for these buildings were financed under the appropriation "Construction planning, Saint Elizabeths Hospital." The construction program proposes the award of the principal contract in July 1950. The project will be approximately 71 percent financially complete by June 30, 1951, and physically complete about February 29, 1952.

PROGRAM AND PERFORMANCE

The Federal Security Agency proposes the transfer of \$975,000 cash and \$6,325,000 contract authority to the General Services Administration for the acquisition of a site, development of plans and specifications, and the construction of buildings to provide facilities essential to the Public Health Service program in Alaska.

The program for 1951 contemplates the acquisition of the site, completion of plans and specifications, and the award of the construction contract about April 1, 1951. Construction will require approximately 24 months.

PROGRAM AND PERFORMANCE

The Federal Security Agency transferred to the General Services Administration authorizations and appropriations made to it for construction of buildings for Howard University in the District of Columbia. A contract was awarded in fiscal year 1949 for construction of a women's dormitory building. The program for 1950 contemplates award of contracts for an engineering building and a power plant. It is anticipated that in 1951 contracts will be let for the construction of the auditorium-fine arts, dental, law, and administration buildings, a biology building and greenhouse, and a men's dormitory.

PROGRAM AND PERFORMANCE

Funds for the continuation of the expansion of research facilities for the Public Health Service at Bethesda, Md., including design and construction, are appropriated to the Federal Security Agency and transferred to the General Services Administration.

The program for fiscal year 1950 provides for the award of contracts for the construction of the superstructure, including installation of elevators for the main Clinical Research Center, together with the completion of design and award of contracts for the boiler plant, shops and laundry building, animal buildings, linear accelerator and cage sterilizers, and underground storage facilities.

It is anticipated that in 1951 design work will be completed and contracts awarded for the construction of housing facilities, and a grounds maintenance building.

Total obligations.....	152,658	5,177,000	1,175,467

PROGRAM AND PERFORMANCE

Under a limit of cost of \$13,000,000, a program was authorized to: (1) purchase and remodel certain Federal buildings, (2) construct extensions to marine hospitals at San Francisco and Seattle, and (3) design public buildings for future construction.

The purchase portion of the program has been completed. It is contemplated that 20 percent of the remodeling work will be accomplished during each of the fiscal years 1950 and 1951.

The program proposes the award of a contract by January 1, 1950, for the extension and remodeling of the marine hospital at San Francisco for completion in 27 months from February 1, 1950. It is estimated that 10 percent of the expenditure program for this project will be completed by June 30, 1950, and 74 percent completed by June 30, 1951. The schedule proposes physical completion of the project by April 30, 1952.

The cumulative program for design of public buildings for future construction proposes 54 percent financial completion by June 30, 1950, and 88 percent financial completion by June 30, 1951. It is contemplated that the design of all projects will be under way by the end of the 1951 fiscal year.

PROGRAM AND PERFORMANCE

This appropriation provides for the acquisition of site and construction, including design and supervision, for the establishment of a Hospital Center in the District of Columbia. The cost is limited to \$35,000,000, of which \$2,200,000 cash and \$19,500,000 contract authority have been provided to date. As the project is to be located on the present site of the Naval Observatory in Washington, the construction schedule is dependent upon the removal of the Observatory from the site.

The program provides for the completion of tentative and diagrammatic sketches during the latter part of fiscal 1950. Working drawings will be approximately 72 percent complete by June 30, 1951, and entirely completed in the fall of 1951. No construction is anticipated prior to fiscal 1952.

OBLIGATIONS BY ACTIVITIES

Research Facilities, National Institute of Dental Research, Public Health Service (Transfer to General Services Administration)—

FUNDS AVAILABLE FOR OBLIGATION: Transferred from "Research facilities, National Institute of Dental Research, Public Health Service"—1950, \$85,000.

PROGRAM AND PERFORMANCE

The Federal Security Agency transferred to the General Services Administration authorizations and appropriations made to it to design, construct, and equip a building for the National Institute of Dental Research under a limit of cost of \$2,000,000. A transfer of \$85,000 was made to General Services Administration during fiscal year 1950 to provide for the design of this project. Drawings are scheduled for completion early in 1951.

OBLIGATIONS BY ACTIVITIES

PROGRAM AND PERFORMANCE

The unobligated balance of funds originally appropriated for construction of the War Department Building was authorized for obligation toward the design of an extension to that building, located at Twenty-first Street and Virginia Ave. NW., now occupied by the State Department.

The program proposes approximately 37 percent financial completion of drawings and specifications by June 30, 1950, and approximately 47 percent financial completion by June 30, 1951.

OBLIGATIONS BY ACTIVITIES

PROGRAM AND PERFORMANCE

The funds authorized for this item provided for the acquisition of a site and the design and construction of the west central heating plant in Washington. The site was acquired and construction of the plant and installation of two boilers was substantially completed in fiscal year 1949. The 1950 program contemplates the installation of a third boiler, contracted for in 1949.

PROGRAM AND PERFORMANCE

The funds advanced are used to finance the design, construction, renovation, and remodeling of buildings and structures for other Government agencies.

The program for which funds have actually been advanced proposes substantial completion of all projects by June 30, 1951. Based upon past experience, it is estimated that during fiscal year 1951 a total of \$4,423,000 will be advanced from appropriations of other agencies for work to be accomplished by this Administration.

PROGRAM AND PERFORMANCE

Funds derived from rental or operation of project properties are used for the continuing maintenance, operation, repair, disposal, and administration of such properties and related securities, acquired under the act of October 14, 1940, Public Law 849, as amended.

The program for 1951 contemplates the collection of \$1,400,000 in rentals and purchase option payments; the payment into miscellaneous receipts of the Treasury of \$1,600,000 on the exercise of purchase options; the redemption or sale of \$1,000,000 in securities; and collections on the direct sale of properties amounting to \$2,400,000. The latter two items are deposited directly into miscellaneous receipts of the Treasury. Operating and maintenance costs for this program will amount to \$115,428.

OBLIGATIONS BY ACTIVITIES			
Description	1949 actual	1950 estimate	1951 estimate
1. Management of real property and securities.....	\$100,000	\$78,910	\$80,000

PROGRAM AND PERFORMANCE

This account provides for the appropriation of rental deposits received from commercial occupants of the Lafayette Building, Washington, D. C., against which are charged the costs of maintenance, upkeep, and repair of such space. Unobligated balances remaining therein at the close of each fiscal year are covered into miscellaneous receipts of the Treasury.

It is estimated that rental deposits for the 1951 fiscal year will total \$38,400 of which \$36,400 will be covered into miscellaneous receipts of the Treasury (62 Stat. 644).

PROGRAM AND PERFORMANCE

The joint resolution to provide for the establishment and maintenance of the Franklin D. Roosevelt Library (53 Stat. 1062-1066) established a board to be known as the Trustees of the Franklin D. Roosevelt Library and authorized it to accept gifts and bequests of personal property and to hold and administer the same as trust funds for the benefit of the Franklin D. Roosevelt Library (sec. 205 (a), (c)).

Franklin D. Roosevelt Library, Income Account—

Total obligations	74,280	61,000	63,417

PROGRAM AND PERFORMANCE

The board of trustees is authorized to accept gifts and bequests of personal property for the library. The income from any trust funds held by the board are deposited with the Treasurer of the United States, subject to disbursement by the Archivist, except where otherwise restricted by the instrument of gift, in the purchase of equipment for the Franklin D. Roosevelt Library; in the preparation and publication of guides, inventories, calendars, and textual reproduction of material in the library; and in the purchase of historical material for the library. There are also deposited into this account fees collected from visitors and proceeds from the sale of publications and duplicate printed material.

It is proposed, during fiscal year 1951, to expend approximately \$63,000 to provide for (1) the completion of the selection, editing, and preparation for publication of a volume containing selections from Franklin D. Roosevelt's writings, and for the completion of certain guides and indexes to portions of the papers in the library; (2) the printing of 250,000 copies of an 8-page guide to the museum and library for distribution to the visitors of the library; (3) the reproduction of photographic copies of materials in the library for sale to the public; and (4) the acquisition of historical materials and reproductions of sound recordings (53 Stat. 1062-1066).

PROGRAM AND PERFORMANCE

The National Archives Trust Fund Board is authorized to receive and administer gifts or bequests for the benefit of or in connection with the National Archives.

During fiscal year 1949, a gift of \$19,954 was received by the Board from the Rockefeller Foundation. Of this amount, \$10,000 is being used as a revolving fund to finance the furnishing for a fee of positive copies of file microcopies prepared by the National Archives, and the remaining sum of \$9,954 is to be expended by December 31, 1949, in producing basic negative microfilm of research materials.

ESTIMATES OF APPROPRIATION

INTRODUCTORY STATEMENT

The major housing activities of the Federal Government were permanently grouped in the Housing and Home Finance Agency by Reorganization Plan No. 3 of 1947. The Agency includes the Office of the Administrator and three major constituents:

- Home Loan Bank Board, including:
 - Federal Savings and Loan Insurance Corporation.
 - Home Owners' Loan Corporation.
- Federal Housing Administration.
- Public Housing Administration.

The Administrator is responsible for the general supervision and coordination of the functions of these constituents, and serves as chairman of the National Housing Council. Under the terms of title I of the Housing Act of 1949 (Public Law 171, 81st Cong.), the Administrator is responsible for administering the program of slum clearance and community development and redevelopment. Under the Housing Act of 1948, as amended, he is responsible for conducting a comprehensive program of housing research designed to aid in reducing the cost and stabilizing the production of housing. Under the Alaska Housing Act (Public Law 52, 81st Cong.), he is responsible for a program involving loans to the Alaska Housing Authority to be used to facilitate the construction of housing in Alaska. The Administrator has primary responsibility for the administration and liquidation of the war and emergency housing programs conducted under the Lanham and related acts. The Office of the Administrator also serves as a principal point of contact, information, and advice with respect to housing policies and programs for the President, the Congress, and the public.

The Home Loan Bank Board formulates policies and supervises operations of the 11 Federal home-loan banks, the Federal Savings and Loan Insurance Corporation, and the Home Owners' Loan Corporation. Although these subordinate units are grouped under and administered by the Board, separate budget estimates are presented for each (except the Federal home-loan banks, which are mixed-ownership corporations). The Federal home-loan banks provide a central credit reserve for the member thrift and home financing institutions. The Insurance Corporation insures share accounts (up to \$5,000 for each investor) in those savings and loan associations which apply and are approved for insurance. The Home Owners' Loan Corporation, which refinanced the mortgages of more than 1,000,000 distressed urban home owners, has been in liquidation since 1936 when its lending authority expired. The budget program for this Corporation for the fiscal year 1951 provides for the complete liquidation of all home owners' accounts by June 30, 1951.

The Federal Housing Administration carries out the provisions of titles I, II, VI, VII, and VIII of the National Housing Act in insuring notes and mortgages for the repair, improvement, modernization, construction, and purchase of residential property, and for encouraging equity investment in the moderate range of rental housing by guaranteeing a minimum return on such investment. The new title VIII of the act, added by Public Law 211, Eighty-first Congress, extends mortgage insurance assistance to the construction of rental housing on or in areas adjacent to military installations.

The Public Housing Administration administers the program of Federal financial aid in housing families of low

income authorized by the United States Housing Act of 1937 and expanded in size by title III of the Housing Act of 1949 (Public Law 171, 81st Cong.), in addition to operating certain federally owned, nonmilitary, nonfarm housing. Under a delegation from the Administrator of the Housing and Home Finance Agency, and under his supervision, the Public Housing Administration is engaged in the management and liquidation of the public war housing and other temporary public housing programs.

Appropriations are requested in the estimates of the Agency for salaries and expenses of the Office of the Administrator, for salaries and expenses of the United States Housing Act program of the Public Housing Administration, and for annual contributions to local housing authorities for maintenance of the low-rent character of public housing projects. All other activities are financed from corporate or other funds available from operations of the constituent units of the Agency.

OFFICE OF THE ADMINISTRATOR

PROGRAM AND PERFORMANCE

The Office of the Administrator supervises and coordinates the housing programs and functions of the constituent units of the Housing and Home Finance Agency, has direct responsibility for housing research, slum clearance and urban redevelopment, and Alaska housing, and provides for the President and the Congress the primary source of information relating to housing. The Administrator also is responsible for supervision of activities concerned with the management and disposition of publicly financed war and veterans' housing constructed under the Lanham and related acts. Operating responsibility for these latter activities has been delegated to the Public Housing Administration.

1. *Agency-wide program coordination and supervision.*—The Office provides general supervision and coordination of the programs and activities of the Home Loan Bank Board, the Federal Housing Administration and the Public Housing Administration and provides necessary staff assistance and services for the National Housing Council. The Administrator serves as the principal housing official of the Government and spokesman for the Government's housing programs and policies. Because of the small amounts of staff and funds provided for management and disposition of public war and emergency housing, these items are included under this heading in the activities schedule.

2. *Housing research program.*—The program of housing research originally authorized by the Housing Act of 1948 was considerably expanded by title IV of the Housing Act of 1949. The expanded housing research program involves research in five major areas, namely: (1) the capital cost of housing, (2) building codes and local regulations, (3) residential design and construction practices, (4) housing credit and finance, and (5) market analysis and statistics.

During the balance of 1950 and 1951, special emphasis will be placed on surveying existing research activities related to housing being carried out by agencies within and outside the Government to assure that the results of such work are used for the maximum public benefit. Continued use of existing data and complete cooperation with other Government agencies is contemplated to avoid duplication, overlapping, or repetition.

In connection with economic and statistical research, immediate work will be undertaken to improve available data in connection with housing costs and with the basic data on need and supply. These are the areas where the inadequacy of existing information has been particularly troublesome to committees of Congress and others interested in housing policy. Emphasis will also be placed on local housing market analysis, in accordance with the requirements of the Housing Act of 1949.

In connection with architectural and engineering studies, emphasis will be placed on expanding as rapidly as possible detailed knowledge of the performance of various structures and components under controlled conditions as a basis for establishing performance standards and uniform testing procedures necessary for improved and simplified building methods and regulations. A considerable amount of new work will also be undertaken in connection with improvements in the administration of codes, improved design, simplified construction practices, new materials and equipment, and related technical matters.

3. *Slum clearance and urban redevelopment program.*—

Loan commitments.....		\$25,700	\$137,800
Grant commitments.....		\$18,000	\$90,600
Loan disbursements.....		\$10,000	\$55,650

PURPOSE AND FINANCIAL ORGANIZATION

Title I of the Housing Act of 1949 (Public Law 171, 81st Cong.) vested in the Administrator the responsibility for conducting a program of slum clearance and community development and redevelopment. In order to assist local communities in eliminating their slums and blighted areas and in providing a maximum opportunity for the redevelopment of project areas by private enterprise, the Administrator is authorized to make both temporary and definitive loans to local public agencies to enable them to undertake projects for the assembly, clearance, preparation, and sale or lease of land for redevelopment. Advances of funds will be available to finance the planning of local projects, and temporary loans will provide for the acquisition and clearance of land and for the preparation of land for re-use purposes. Loans of this temporary character are repayable when the land in the project area is sold or leased for redevelopment. Long-term loans will be available to refinance those portions of project areas which are leased, and such loans will be secured by the rentals from the leased land.

Title I also authorizes capital grants to defray up to two-thirds of the net project cost, which is defined in the act as the difference between the cost of acquiring and clearing slum areas and the proceeds received as these areas are made available for re-use. No Federal assistance is provided for building construction on the cleared sites, although in connection with the development of open or predominantly open areas provision is made for certain temporary loans for schools or other public facilities necessary to serve the new uses of land in the area.

The act contains an authorization of \$1,000,000,000 in loans and \$500,000,000 in capital grants for the conduct of the program. The loan authorization becomes avail-

able over a 5-year period beginning with \$25,000,000 on July 1, 1949, and increasing by \$225,000,000 on July 1, 1950, and by further amounts of \$250,000,000 on July 1 of the three succeeding years. The authority to enter into contracts for capital grants is limited to five annual increments of \$100,000,000 each, starting with July 1, 1949. Within the gross authorization, however, the President, after receiving the advice of the Council of Economic Advisers, may increase the annual loan or capital grant authorization by not to exceed \$250,000,000 and \$100,000,000, respectively, during any one fiscal year if he finds that such action is in the public interest.

ANALYSIS OF BUDGET PROGRAM

The work load of the slum clearance and urban redevelopment program is expected to accelerate rapidly as operations get under way and accordingly, the 1951 budget request provides for staff increases to handle the larger work load and to continue the organization and establishment of a Division of Slum Clearance and Urban Redevelopment to carry out this program. The increased activity is based upon such factors as (1) available information concerning the status of existing State enabling legislation, (2) information regarding the readiness of cities to undertake redevelopment activities, and (3) specific evidences of interest on the part of a large number of cities which have already made inquiry about program participation.

It is estimated that 70 planning advance and 40 loan and grant contracts will be concluded during the budget year. These contracts will result from the applications received from some 195 cities which are expected to reach the active stage of consideration during 1950 and 1951. In addition, there will undoubtedly be a large number of cities seeking preliminary information, advice, and assistance looking toward later participation in the program. Since this is a new program and no experience is available upon which to base a relationship between case work-load and staff requirements, these estimates are based upon the best available information as to probable program activity and upon the functions imposed by the act on the Administrator.

It should be emphasized that while important Federal functions and responsibilities are concerned with assuring compliance with the requirements of the act and safeguarding the extensive Federal financial interests involved, the primary initiative for undertaking projects, the planning of local programs, and their integration with general city planning and the execution of projects are essentially local responsibilities and local operations.

Administrative expenses for this program are provided in the amount of \$954,000 for 1950 and \$1,973,000 for 1951.

FINANCIAL REVIEW

Although a business-type budget on an accrual basis is presented in accordance with section 106 (a) (2) of the Housing Act of 1949, this program is not provided with capital stock, hence working capital must in effect be borrowed on which interest will be paid to the Treasury.

Disbursement of \$10,700,000 in advance planning and temporary loans in 1950 and \$59,650,000 in 1951, less \$2,200,000 in repayments in the latter year, leave \$68,150,000 outstanding on June 30, 1951. The Government's investment in this program of \$11,003,550 at the close of 1950 and \$70,158,325 at the close of 1951 includes interest-bearing notes amounting to \$11,000,000 and \$70,000,000 at the close of 1950 and 1951, respectively.

PURPOSE AND FINANCIAL ORGANIZATION

The Alaska Housing Act, Public Law 52, Eighty-first Congress, was enacted for the purpose of promoting the settlement and development of Alaska by facilitating the construction of necessary housing within the Territory by placing in operation several financial aids specifically adapted to local needs. The act liberalizes the mortgage-insurance provisions of the National Housing Act to allow

for the higher construction costs prevailing throughout Alaska. The second financial aid is a liberalization and expansion of the operations of the Federal National Mortgage Association in order to facilitate further participation of private capital in this program. Finally, the act authorizes the establishment of a revolving fund of \$15,000,000 (\$10,000,000 of which has been appropriated by the Congress). The Administrator is authorized to use these funds to purchase notes and obligations of the Alaska Housing Authority so as to provide funds for (1) the making of loans to private builders for the construction of housing when adequate private capital is not available; (2) direct construction by the Alaska Housing Authority where housing is urgently needed and when private sponsorship cannot meet the need; and (3) character loans of not more than \$500 each for the improvement of native dwellings in remote areas of the Territory of Alaska.

The act provides that the notes and other obligations issued by the Authority for purchase by the Administrator shall bear interest at a rate determined by the Administrator, with the approval of the Secretary of the Treasury.

OFFICE OF THE ADMINISTRATOR—Continued**4. Alaska housing program—Continued****ANALYSIS OF BUDGET PROGRAM**

Tentative conclusions have been reached concerning the types and amounts of Federal assistance that are needed and feasibly can be made available pursuant to section 3 of the act during 1950 and 1951. The building season in Alaska extends, on the average, from the middle of March until the middle of September. Accordingly each building season will comprise roughly 3 months of one fiscal year and 4 months of the succeeding fiscal year.

The proceeds obtained from the sale of notes by the Authority to the Administrator during 1950 and 1951 will be used by the Authority for the following purposes:

Class A—To make short-term inventory or working-capital loans to private builders unable to obtain such needed assistance from private sources. It is estimated that 40 projects will be undertaken as a result of such loan assistance during 1950 and 1951, of which number approximately 12 will be initiated before June 30, 1950. It is assumed that such projects will average 25 units, with an average loan per unit of \$6,000.

Class B—To make first mortgage loans (including construction advances) to private builders unable to arrange for private financing at reasonable rates. It is estimated that approximately 24 projects will be undertaken with such assistance before June 30, 1951, of which number approximately 8 will be initiated during the balance of the current year. It is assumed that such projects will average 25 units, with an average loan per unit of \$10,000.

Class C—To sponsor directly the construction of dwelling units for sale or rental. Notes in this category will constitute either first-equity or mortgage loans for this purpose.

With respect to sales housing, it is estimated that a total of 6 projects will be undertaken by the Authority before June 30, 1951, of which number only 2 will be

initiated during the balance of the current year, and that such projects will average 25 units at an average cost of \$14,000 per unit.

With respect to rental housing projects, in connection with which the Federal National Mortgage Association will hold first mortgages, it is assumed that 4 projects will be undertaken by the Authority before June 30, 1951, with none being initiated prior to July 1, 1950, and that projects will average 25 units (at a cost per unit of \$14,000), with a first mortgage amount of \$10,800 per unit and an average equity of \$3,200 per unit.

Class D—To make character loans to individuals or cooperatives to improve native dwellings in remote areas of the Territory. Notes outstanding for this purpose may not exceed \$1,000,000, and loans may not exceed \$500 per dwelling. It is estimated that during the current year loans will be made to improve 250 native dwellings and during 1951 an additional 750 units.

Class E—To meet general overhead expense requirements of the Authority in the initial development of the programs authorized by section 3 of the act, as authorized in the Second Supplemental Appropriation Act, 1950. These notes are limited to \$50,000 in the aggregate.

Administrative expenses, amounting to \$75,000 in 1950 and \$76,000 in 1951, are provided from appropriated funds, and are not reflected in the loan revolving fund.

FINANCIAL REVIEW

As of June 30, 1951, the loan revolving fund will have been increased by interest earnings totaling some \$217,000. Allowing for repayments of \$6,160,400, there will remain in the checking account for the fund approximately \$4,000,000 at June 30, 1951, for further disbursements on outstanding loans and for additional loans. The Government's investment of \$10,023,900 at June 30, 1950, and \$10,240,550 at June 30, 1951, includes an expended appropriation of \$10,000,000.

PROGRAM AND PERFORMANCE

Proceeds of sales of vehicles, equipment, accessories, and other items, the exchange of which is authorized by law, may be applied in whole or in part payment for the purchase of similar items. Receipts from this source are set up in a special appropriation account and are available for the replacement of similar items to the end of the fiscal year following the year in which the sale is made; unused balances are adjusted to miscellaneous receipts (5 U. S. C. 118d-1).

HOME LOAN BANK BOARD

INTRODUCTORY STATEMENT

The Home Loan Bank Board, a bipartisan three-man Board, formulates policies and supervises operations of the Federal Home Loan Bank System, the Federal Savings and Loan Insurance Corporation and the Home Owners' Loan Corporation.

The budget program for the Home Loan Bank Board proper for the fiscal year 1951 is being submitted for the first time on a business-type basis. While section 2 of Public Law 895, Eightieth Congress, approved July 3, 1948, provides that all necessary expenses of the Examining Division shall be considered nonadministrative, data relating to its activities are being reflected for informational purposes. All expenses of the Examining Division are met from fees collected from the institutions examined. Business-type budgets also are presented for the Federal Savings and Loan Insurance Corporation and the Home Owners' Loan Corporation.

The estimated net administrative expenses of the Home Loan Bank Board, after giving consideration to the amount of reimbursements which it is anticipated will be received from the Board's Examining Division, the Federal Savings and Loan Insurance Corporation, and the Home Owners' Loan Corporation for services rendered and from other governmental agencies for duplicating work performed in their behalf, are paid from assessments against the 11 Federal home-loan banks in accordance with subsection (b) of section 18 of the Federal Home Loan Bank Act, as amended.

PROGRAM HIGHLIGHTS

Insured institutions examined and supervised.....	2, 691	2, 840	2, 990

PURPOSE AND FINANCIAL ORGANIZATION

The Home Loan Bank Board consists of three members and was created by Reorganization Plan No. 3 of 1947.

In compliance with the Federal Home Loan Bank Act, approved July 22, 1932, and following the national pattern set up for commercial banks within the Federal Reserve System and for Federal land banks, the Federal Home Loan Bank Board established 12 (now 11) Federal home-loan banks. Each bank is strategically located and within the boundaries of its district which covers a number of States, serves local institutions which are members of the bank (savings and loan associations, homestead associations, cooperative banks, savings banks, and insurance companies which are eligible for membership) by making

short- and long-term advances to meet their current and prospective needs.

ANALYSIS OF BUDGET PROGRAMS

The budget program of the Board, excluding the portions thereof which relate to the operations of the Federal Savings and Loan Insurance Corporation and the Home Owners' Loan Corporation, divides primarily into three distinct spheres of operational activity: (1) Supervision of the Federal home-loan banks; (2) supervision of Federal and State-chartered insured savings and loan associations; and (3) examination of Federal and State-chartered insured savings and loan associations.

1. *Supervision of Federal home-loan banks.*—Under the provisions of the Federal Home Loan Bank Act as amended (47 Stat. 725), the Board is required to supervise the banks and is empowered to levy assessments semi-annually upon such banks, to provide for the payment of its estimated expenses. It is also directed to require examinations at least twice annually and reports of condition of all such banks in such form as it shall prescribe.

In supervising the operations of the Federal home-loan banks, the Board requires each bank to submit to it for approval an annual budget covering the bank's expenses, dividend declarations and changes in the rates of interest on advances, members' deposits, and interbank deposits which are not within the rate ceilings prescribed by the Board.

The banks are examined by examiners attached to the staff of the Board's auditor and in accordance with section 202 of the Government Corporations Control Act (31 U. S. C. 857), the financial transactions of the banks are also subject to an annual audit by the Corporation Audits Division of the General Accounting Office.

2. *Supervision of Federal and State-chartered insured savings and loan associations.*—The statutory sources of authority and responsibility of the Home Loan Bank Board for supervision are contained in section 5 of the Home Owners' Loan Act of 1933, as amended (48 Stat. 128), which provides for the chartering and supervision of Federal savings and loan associations, and title IV of the National Housing Act (48 Stat. 1246), which provides for insurance by the Federal Savings and Loan Insurance Corporation of the accounts of Federal associations and of State-chartered savings and loan institutions.

The Board's chief purpose is to prevent the development and continuance in supervised institutions of unsound and unsafe financial practices, and to assure compliance with governing laws and regulations. This involves the study of the financial condition and operations of each insured institution, as disclosed in periodic supervisory examination and other reports, and the correction of unsound conditions or practices.

This work is carried on by the supervisory division under direction of the chief supervisor who is responsible directly to the Board and who conducts the work in the field through the presidents of the several Federal home-loan banks, acting as supervisory agents and dealing directly with the supervised institutions.

The volume and complexity of the work involved is determined by the number, size, and business volume of supervised institutions, and by the stresses put upon individual institutions by their practices and by economic conditions. The 2,490 supervised institutions at June 30, 1946, had assets aggregating \$6,743 million, as compared with the 2,691 institutions which at June 30, 1949, had assets totaling \$10,471 million. The acceleration of their lending activity since the close of the war has resulted in a net increase in their mortgage portfolios of more than

HOME LOAN BANK BOARD—Continued

\$1 billion a year during each of the last 4 fiscal years. The greatly increased loan portfolios, including a relatively large volume of construction financing, the effects of increased costs and competitive factors upon operating margins, and an apparent recent leveling-off of real-estate prices, give some further indication of the current and potential demands upon supervisory facilities.

3. *Examination of Federal and State-chartered insured savings and loan associations.*—The Board's Examining Division is responsible for conducting annual and special supervisory examinations of all Federal savings and loan associations, of State-chartered associations insured by the Federal Savings and Loan Insurance Corporation, and of such noninsured member institutions of the Federal home loan bank system as are not subject to State supervision. The authority for such examinations is contained in section 8 of the Federal Home Loan Bank Act, as amended (47 Stat. 725), section 5 (a) of the Home Owners' Loan Act of 1933, as amended (48 Stat. 128), and section 403 (b) of title IV of the National Housing Act (48 Stat. 1246). The Division also examines and analyzes the financial condition of savings and loan associations which apply for membership in the bank system, for insurance of accounts, or for conversion from State to Federal charter. More than 80 percent of the associations have their audits included with their examinations.

Eligibility examinations emphasize the home-financing policies and practices, character and competence of management and directorate, ability to operate normally in the community and to attract and retain capital.

Special examinations may involve the determination of shortages or investigation of other irregularities.

There is a steadily growing volume of examination work. As of July 1, 1948, there were 2,566 insured savings and loan associations with total assets of \$9.2 billion. On

July 1, 1949, there were 2,691 with assets totaling \$10.5 billion. The Examining Division examines all insured institutions except 173 with aggregate assets of \$502 million which are examined solely by the Illinois and Louisiana State departments. It is estimated that during 1950 and 1951 the number of associations to be examined by the Division will increase at the rate of 150 a year. The aggregate assets of insured institutions will increase at the estimated rate of \$1 billion a year.

There is also an increasing volume of eligibility examinations—made for the purpose of determining an applicant's eligibility for membership, insurance of accounts, or for conversion from State to Federal charter. In 1948 there were 73 of such examinations and in 1949 there were 153. It is estimated that in 1950 there will be 150 eligibility examinations and about the same number in 1951.

The costs of examination and audits are assessed against the institutions examined. The fees are established so as to meet all expenses of the Examining Division, defined as nonadministrative by Public Law 895, Eightieth Congress.

For 1951, it is estimated that \$455,000 will be required for administrative expenses of the Board for direct obligations to be assessed against the 11 Federal home-loan banks. This compares with \$427,500 provided in 1950.

FINANCIAL REVIEW

The Board is not incorporated, thus it has no capital stock issued or outstanding. Its assets consist primarily of cash in the United States Treasury and accounts receivable from the several beneficiaries of the services which it renders. Its liabilities consist essentially of accounts payable and an amount due to the Federal home-loan banks representing assessments made upon them during prior fiscal years to provide necessary working capital.

APPROPRIATION TEXT

Home Loan Bank Board: Not to exceed a total of **[\$427,500]** \$455,000 to be derived from the special deposit account established under the provisions under the head "Federal Home Loan Bank Administration" in the Independent Offices Appropriation Act, 1944, and from receipts of the Federal Home Loan Bank Administration, the Federal Home Loan Bank Board, or the Home Loan Bank Board for the current fiscal year and prior fiscal years, shall be available during the current fiscal year for administrative expenses of the Home Loan Bank Board, including health-service program as authorized by law (5 U. S. C. 150), and the Board may utilize and may make payment for services and facilities of the Federal home-loan banks, the Federal Reserve banks, the Federal Savings and Loan Insurance Corporation, the Home Owners' Loan Corporation, and other agencies of the Government: *Provided*, That all necessary expenses in connection with the conservatorship of institutions insured by the Federal Savings and Loan Insurance Corporation and all necessary expenses (including services performed on a contract or fee basis, but not including other personal services) in connection with the handling, including the purchase, sale, and exchange, of securities on behalf of Federal home-loan banks, and the sale, issuance, and retirement of, or payment of interest on, debentures or bonds, under the Federal Home Loan Bank Act, as amended, shall be considered as non-administrative expenses for the purposes hereof: *Provided further*, That notwithstanding any other provisions of this Act, except for the limitation in amount hereinbefore specified, the administrative expenses and other obligations of the Board shall be incurred, allowed, and paid in accordance with the provisions of the Federal Home Loan Bank Act of July 22, 1932, as amended (12 U. S. C. 1421-1449). (*Independent Offices Appropriation Act, 1950.*)

EXAMINING DIVISION, HOME LOAN BANK BOARD

The Examining Division, organized as a staff unit of the Home Loan Bank Board, is responsible for conducting annual and special supervisory examinations of all Federal savings and loan associations, of State-chartered savings and loan associations which are insured by the Federal Savings and Loan Insurance Corporation, and of such noninsured member institutions of the Federal Home Loan Bank System as are not subject to State supervision. The Division also examines and analyzes the financial condition of savings and loan associations which apply for membership in the Bank System, for insurance of accounts, or for conversion from State to Federal charter.

The institutions examined bear the costs of examination, and the fees charged are calculated to meet all operating expenses of the Division. These expenses were subject to annual authorization of the Congress until the 1949 fiscal year when Public Law 895, Eightieth Congress, approved July 3, 1948, provided that "all necessary expenses in connection with the making of supervisory or other examinations (except examinations of Federal home-loan banks), including the provision of services and facilities therefor, shall be considered as nonadministrative expenses."

As a staff unit of the Board, the Division reimburses the Board for its proportionate share of the Board's administrative expenses.

Insured institutions are required to have an annual audit in addition to the supervisory examination and approximately 80 percent of the associations exercise the option of having the Examining Division expand its examination to include the audit. As of June 30, 1949, all examinations were in a current status, i. e., previous examinations had been made within a 10- to 14-month period. It is anticipated that all examinations will be within a 12-month status by June 30, 1950, and be kept current during fiscal year 1951.

The following table shows, for the fiscal years indicated, data regarding factors principally influencing the Division work program and staffing requirements:

FEDERAL HOME LOAN BANKS (MIXED-OWNERSHIP CORPORATIONS)

[Submitted under the Government Corporation Control Act]

Under the provisions of the Federal Home Loan Bank Act, approved July 22, 1932 (47 Stat. 725), Congress created a reservoir of credit by authorizing the Federal Home Loan Bank Board to establish Federal home-loan banks throughout the country from which home-financing institutions might secure funds to meet the reasonable withdrawal request of their investors and supplement the savings ordinarily received from individual citizens to meet the home-financing needs of their communities. The Federal home-loan banks created under the act, and the building and loan associations and similar institutions which are members of these banks, constitute the Federal Home Loan Bank System. It was designed to stabilize and strengthen institutions promoting private thrift and individual home ownership. It performs substantially the same function in the field of home mortgage credit as the Federal Reserve System performs as a credit reserve for commercial banks, and the Federal land banks perform in the field of farm finance.

The Federal home-loan banks, defined as mixed-ownership corporations by the Government Corporation Control Act of 1945 (Public Law 248, 79th Cong.), obtain their funds from subscriptions to capital stock, the issuance of their own obligations, and deposits of member institutions. The capital stock of the banks consists of subscriptions of the United States Government and of member institutions. The Secretary of the Treasury was authorized by the Congress to subscribe to the capital stock of the Federal home-loan banks up to the total amount of \$125,000,000. The amount thus subscribed and paid in full aggregated \$124,741,000 of which \$22,248,300 had been retired as of June 30, 1949, leaving a Government interest in the banks of \$102,492,700. Ownership of stock was transferred as of July 1, 1947, from the Reconstruction Finance Corporation to the Secretary of the Treasury, under the provisions of Public Law 132, Eightieth Congress. Further retirements of Government stock, based on existing legislation, are estimated at \$10,400,000 during 1950 and \$6,000,000 during 1951. These retirements are reflected as miscellaneous receipts of the Treasury.

Pending legislation, if enacted, will authorize the banks to borrow not to exceed \$1,000,000,000 from the Treasury in case of financial stress. It will also provide for the accelerated retirement of Government-owned stock in the banks, resulting in estimated additional receipts to the Treasury of \$60,000,000 in 1951.

There follows a condensed consolidated statement of the financial condition of the banks as of June 30, 1949.

Corporation's reserve for insurance losses.....	\$105,354	\$121,413	\$139,270
Gross operating income.....	\$14,788	\$16,697	\$18,498

PURPOSE AND FINANCIAL ORGANIZATION

The Federal Savings and Loan Insurance Corporation, a wholly owned Government corporation, created in 1934 pursuant to title IV of the National Housing Act, as amended, insures savings accounts up to \$5,000 in all Federal savings and loan associations and in those State-chartered institutions of the savings and loan type which apply and are approved for insurance.

As of June 30, 1949, the 2,691 insured associations had loss reserves and undivided profits of \$710,000,000 while the Corporation had reserves of \$105,354,411, after providing for all losses and expenses of operation.

The capital stock of the Corporation amounting to \$100,000,000 is held by the Secretary of the Treasury. Upon transfer of this stock from the Home Owners' Loan Corporation as of June 30, 1948, in accordance with the Government Corporations Appropriation Act, 1949, the Treasury Department canceled bonds of the Home Owners' Loan Corporation equivalent to the amount of the stock plus cumulative dividends since June 30, 1935, of \$25,181,749.98. The status of dividends on the capital stock of the Insurance Corporation subsequent to June 30, 1948, has not been determined by the Congress.

The Corporation has authority to issue notes, bonds, debentures, and other obligations. However, the projected program for 1951 does not contemplate the necessity of issuing any such obligations. This authority would not be exercised unless the Corporation should require funds in excess of accumulated reserves and capital for the purpose of meeting its insurance liability.

The Corporation, a part of the Housing and Home Finance Agency, operates under the supervision and direction of the Home Loan Bank Board, which provides certain administrative services and conducts the examination

and supervision of insured institutions. The costs of examinations are borne by the institutions examined while the cost of all other services rendered by the Board are reimbursed by the Corporation.

ANALYSIS OF BUDGET PROGRAMS

All of the Corporation's activity is carried on under authority of title IV of the National Housing Act, as amended (12 U. S. C. 1724 et seq.). The budget program comprises the three following broad operating functions:

1. Underwriting.
2. Prevention of default.
3. Payment of insurance.

Underwriting.—At the end of World War II the downward trend in admissions reversed itself and a marked increase occurred in each successive year. The net gain of 125 insured associations in 1949 was over three and one-half times the increase in the preceding fiscal year. Apparently the public has become increasingly security conscious and no longer views savings insurance as an extraordinary measure of a depression period but as a normal expected service of the modern savings and loan institution.

As of June 30, 1949, there were 2,691 insured institutions with assets of \$10,471,131,000, an increase of almost 14 percent since the beginning of the fiscal year. By June 30, 1951, it is expected that insured associations may increase over \$2,500,000,000 in size to a total asset figure of \$13,000,000,000. During 1949 the Corporation received 142 applications for insurance of accounts. Applications are expected from 150 to 200 institutions in both 1950 and 1951. As a result of this anticipated increase in the number of insured institutions and the steady growth of those presently insured, the insurance liability of the Corporation will aggregate approximately \$11,000,000,000 by June 30, 1951.

Prevention of default.—The Corporation does not contemplate that the entire potential liability will ever become real but it is normal in any insurance operation to expect some losses. The reasonable prevention of default of existing insured institutions has the effect in some cases of avoiding the spreading influence of financial failure, thus holding losses to a minimum. This principle is recognized in title IV of the National Housing Act in which the Corporation is authorized to make loans, to purchase part or all of the assets, or to make a cash grant, whenever it appears judicious to use these measures to eliminate conditions which would result in default of an institution.

During the Corporation's experience to date, the threatened impairment of capital has been removed in 28 insured institutions—3 accompanied by voluntary liquidation, 6 to facilitate merger, and 19 to permit continued independent operation on a sound basis. Communities in which these institutions were located were saved from the harmful effects of financial failure and, in addition, 54,873 investors were protected from losses they would have experienced if the institutions had not been insured. Total disbursements for prevention of default have aggregated \$5,374,125 of which \$475,797 has been recovered, leaving a net loss of \$4,898,328 or 4.13 percent of total income to June 30, 1949.

Although construction and mortgage lending have shown some decrease from the previous year, both are continuing at a relatively high level. However, there are indications of a softening in the real-estate market in some areas. The Corporation is attempting to minimize the effect of adverse influences on the insurance risk by closer coordination with the Supervisory Department of the

Home Loan Bank Board, more intensive analyses of applicants for insurance, and by the compilation and interpretation of financial data for certain areas and specific institutions. In addition more frequent field inspections have been planned of the lending policies and organization of those insured associations experiencing financial problems and of applicants for insurance when the need is indicated. Through these means, many of the conditions, which in the past might have led to an impairment of capital and threatened default, can be discovered and corrected.

Payment of insurance.—If, because prevention of default is neither prudent nor economical, an insured institution is placed in liquidation, the Corporation fulfills its insurance contract by making available to each insured investor, at his option, either (1) a new insured account in an insured institution not in default, or (2) 10 percent of his insured account in cash and the balance of 90 percent in negotiable non-interest-bearing debentures, one-half due within 1 year and one-half within 3 years from the date of default.

Since 1934, the Corporation has provided for liquidation of only seven institutions with aggregate assets of \$9,209,816. Of the 7,705 investors' accounts, amounting to \$7,557,214, over 93 percent had been settled by June 30, 1949. Only 527 account holders have not requested settlement of insurance.

When an insured institution declared in default is a Federal savings and loan association, the Corporation is appointed as receiver for the purpose of liquidation. Payment of insurance takes place in a relatively short period of time—most of the accounts being presented for payment within the first few months and approximately 90 percent in the first year. However, liquidation of the assets requires a longer period of time in order to avoid undue disturbance of the real-estate market, as well as to obtain the maximum recovery from assets of the receivership.

Liquidation of receiverships involves the organization and direction of field staffs, analysis of loan portfolios, appraisal of real estate and loan security, collections, foreclosures, tax studies, insurance coverage, real-estate conditioning, property management and sale, and the final sale of assets and termination of the liquidation.

Administrative expenses.—The authorization of \$635,000 requested for the fiscal year 1951 is based upon the assumption that favorable economic conditions will preclude abnormal demands of insured institutions on the resources and services of the Corporation. Since expenditure requirements for payment of insurance and prevention of default are unpredictable, estimates thereof are omitted from the financial statements and no provision has been made in the requested authorization for the natural increases in costs of administration which accompany such operations. The budget program of the Corporation is designed to preserve the present nucleus of competent and experienced administrative personnel, to permit the Corporation to discover, and to take preventive action to avoid, unfavorable developments as well as to meet the emergency situations as they arise and handle the rapidly increasing flow of applications for insurance of accounts.

FINANCIAL REVIEW

Operating results.—Revenues of the Corporation are derived primarily from insurance premiums collected from insured institutions at an annual rate of one-eighth of 1 percent of insured accounts and creditor obligations, and

from income on investments in United States Government obligations. After deduction of operating costs and provision for losses, earnings are credited to a reserve for insurance losses. All expenses and losses since 1934 have amounted to 8.7 percent of total income and no appropriations from the Treasury have been required.

The projected increases in the insurance liability of the Corporation will result in increases in premium income and income from investments. In the absence of insurance losses or payment of insurance, all receipts in excess of expenses are invested in accordance with law in United States Government obligations or obligations guaranteed as to principal and interest by the United States.

Based upon the projected growth in the number and size of insured institutions, the premium and admission fee income of the Corporation will increase from \$10,254,482 in 1949 to \$13,300,800 in 1951, or 29.7 percent. Interest income is expected to increase from \$4,532,853 in 1949 to \$5,197,300 in 1951, or 14.7 percent.

Assets.—Total assets of the Corporation amounted to \$210,612,263 as of June 30, 1949, an increase of over \$15,000,000 since the beginning of the fiscal year. Investment in Government obligations represented 98 percent or \$206,679,036 of corporate assets. In the absence of insurance losses, by June 30, 1951, total assets are expected to reach \$246,293,878 of which \$241,177,236 will be represented by United States Government obligations.

Liabilities.—The Corporation has no outstanding liabilities except current liabilities. Deferred income represents premiums billed for insurance of accounts to be taken into earnings over the insurance year of each institution.

Investment of U. S. Government.—The capital stock of the Corporation of \$100,000,000 is held by the Secretary of the Treasury. Although Public Law 860, Eightieth Congress, prescribed a formula under which cumulative dividends to June 30, 1948, were determined to be \$25,181,749.98, no specific provision was made as to the future liability of the Corporation for dividends or any other form of return to the Treasury on its capital investment.

Section 404 (a) of the National Housing Act, as amended, requires accumulation of a reserve of 5 percent of all insured accounts and creditor obligations of insured institutions before collection of premiums may be discontinued. As of June 30, 1949, this statutory requirement would have amounted to \$444,511,000. The reserve for insurance losses of the Corporation at that date amounted to \$105,354,411 or 1.18 percent of the insurance liability. Net income of the Corporation of \$16,058,200 in 1950 and \$17,857,100 in 1951 should increase the reserve for insurance losses to \$139,269,711 by June 30, 1951. However, the present rate of growth of insured institutions will produce an insurance liability of \$11,000,000,000 by that date so that the ratio of corporate reserves to this potential will not increase appreciably. For this reason the Corporation does not contemplate returning any earned surplus to the Treasury.

Under present law, any securities issued by the Corporation must be sold in the open market which, during a period of financial stress, may not offer favorable sales conditions. Because of the importance to the public interest of the Corporation's capacity to meet insurance claims promptly, pending legislation, if enacted, will authorize the Corporation to borrow not to exceed \$750 million from the Treasury in case of emergency. Provision for orderly retirement of the Government's stock ownership is also contemplated in the proposed legislation.

APPROPRIATION TEXT

The following corporation is hereby authorized to make such expenditures, within the limits of funds and borrowing authority available to such corporation and in accord with law, and to make such contracts and commitments without regard to fiscal year limitations as provided by section 104 of the Government Corporation Control Act, as amended, as may be necessary in carrying out the programs set forth in the Budget for the fiscal year ending June 30, 1951, for such corporation, except as hereinafter provided:

Federal Savings and Loan Insurance Corporation: Not to exceed **[\$617,500]** \$635,000 shall be available for administrative expenses, including health-service program as authorized by law (5 U. S. C. 150), which shall be on an accrual basis and shall be exclusive of interest paid, depreciation, properly capitalized expenditures, ex-

penses in connection with liquidation of insured institutions, liquidation or handling of assets of or derived from insured institutions, payment of insurance, and action for or toward the avoidance, termination, or minimizing of losses in the case of specific insured institutions, and legal fees and expenses, and said Corporation may utilize and may make payment for services and facilities of the Federal home-loan banks, the Federal Reserve banks, the Home Loan Bank Board, the Home Owners' Loan Corporation, and other agencies of the Government: *Provided*, That notwithstanding any other provisions of this Act, except for the limitation in amount hereinbefore specified, the administrative expenses and other obligations of said Corporation shall be incurred, allowed, and paid in accordance with title IV of the Act of June 27, 1934, as amended (12 U. S. C. 1724-1730). (*Independent Offices Appropriations Act, 1950.*)

PURPOSE AND FINANCIAL ORGANIZATION

The Home Owners' Loan Corporation is a wholly owned Government corporation, organized under the Home Owners' Loan Act of 1933 (Public, No. 43, 73d Cong., approved June 13, 1933, ch. 64, 48 Stat. 128) as amended, as an emergency instrumentality to refinance the mortgages of distressed urban home owners. The Corporation's lending authority expired on June 12, 1936, and since that date its efforts have been devoted to the realization of home-owner accounts and other assets.

The capital stock of the Corporation, amounting to \$200,000,000, was subscribed and paid for and is held by the Secretary of the Treasury.

The Corporation was authorized to issue \$4,750,000,000 of bonds, exclusive of issues for refunding purposes. Of the total bond authorization, \$2,688,215,850 was exchanged for mortgages, \$223,856,710 was invested in shares of savings and loan associations, \$100,000,000 was invested in the capital stock of the Federal Savings and Loan Insurance Corporation, and \$477,380,990 was sold to provide capital. As a matter of policy, all bonds issued for refunding purposes since June 1, 1945, have been sold to the Treasury. As of June 30, 1949, a total of \$3,489,453,550 of bonds had been issued for value and a balance of \$1,260,546,450 remained available. No bonds have been issued for value since December 1940 and the Corporation does not foresee any further charges against its borrowing authority.

ANALYSIS OF BUDGET PROGRAM

From June 12, 1936, the date the last loan was closed, until recently, the Corporation's principal objective has been the orderly realization of assets, the liquidation of liabilities, and operations incidental thereto. This includes advances to borrowers for taxes, insurance, and

maintenance for the protection of the Corporation's interest in the security underlying its loans; the acquisition of properties through foreclosure, where necessary; the maintenance, operation, and sale of acquired properties and the realization of vendee accounts accepted in connection with the disposition of acquired properties. Since payments of principal of loans made by the Corporation are required to be applied to the retirement of the Corporation's bonded indebtedness, realization and liquidation have been of a concurrent nature. The activities of the Corporation fall into three primary classifications: (1) the servicing of active accounts; (2) the termination of accounts through regular payments in full by borrowers; and (3) the termination of accounts by sale or assignment to financial institutions or other investors. A related activity is classified as management and administrative services.

Servicing active accounts.—This comprises all operations in connection with the maintenance of home-owner accounts prior to termination, all transactions related to the investment of corporate funds in shares of savings and loan associations and their realization, the normal liquidation of liabilities including retirement of the Corporation's bonded indebtedness, and all fiscal services and overhead not classified as management and administrative services or costs attributable to the final termination of accounts.

Termination of accounts by regular payments in full.—In recent years of high income the Corporation actively encouraged its borrowers to make payments in advance in order to clear their homes of indebtedness at the earliest possible date. This program was very successful, particularly during the war and the postwar periods. Contributing to this success was the fact that as loans approached maturity many borrowers voluntarily took the opportunity to make final payments in full. As a result the Corporation found that in many States the portfolio had been reduced both by number of accounts and total loan balances to the point where the relation of income to servicing expenses was less favorable. In March 1948 a special program of accelerated liquidation was instituted in those States in which aggregate loan balances owing to the Corporation were \$1,000,000 or less. The mortgagors in those States were circularized by letter requesting that they refinance or pay their accounts in full. This step was followed by the use of field representatives to contact financial institutions in an effort to dispose of, on a State-wide basis, those accounts which the borrowers were unable to pay in full or refinance locally. The following tabulation summarizes the results of this program through August 1949:

	Loans outstanding—			
	At initiation of special program		As of Aug. 31, 1949	
	Number	Amount	Number	Amount
21 States and District of Columbia...	17,314	\$15,875,559	6,396	\$6,318,805

The second phase of the accelerated liquidation program applied to the remaining States and had as its objective the removal from the Corporation's books of accounts with small balances, and bringing current all slow and delinquent accounts. Borrowers in this category were contacted by circular letter and encouraged to pay small loan balances in full, to refinance their mortgages with local financial institutions, or to increase principal pay-

ments so that their loans would be completely amortized by 1951.

Termination of accounts by sale or assignment.—As these programs progressed, valuable experience was obtained on the basis of which the Home Loan Bank Board determined to introduce State-wide liquidation into the larger States and thus advance the date of final realization and liquidation of the Corporation. Authority for the accelerated termination of accounts through sale or assignment is implied in the Independent Offices Appropriation Act, 1950, which provides a specific authorization for the termination or liquidation of accounts carried on the books of the Corporation. Accordingly, in June 1949, the Corporation publicly offered to sell for cash its entire portfolio of loans and installment sales contracts in 1 State, consisting of approximately 40,000 individual accounts with an aggregate balance in excess of \$102,000,000. Pursuant to this offer and acceptance by bid, a contract of sale was executed on September 1, 1949. Assignment of accounts was commenced immediately and, under the terms of the contract, delivery will extend into the 1951 fiscal year.

Contracts have also been signed for additional sales in 7 other States involving 39,349 accounts with loan balances of about \$72,200,000. Accounts in one State were advertised during November 1949 and accounts in another will be advertised during December, on which bids are due December 15 and January 16, 1950, respectively. Delivery schedules will be subject to the Corporation's facilities and the availability of funds for that purpose. The Corporation's budget program anticipates the termination of all the remaining mortgage loans and vendee accounts by the close of 1951.

Administrative expenses.—The budget estimate of \$1,400,000 provides, in addition to management and administrative services, for the servicing of active accounts and for the termination of accounts by regular payments in full. The estimate contemplates an average personnel of 268 and represents a decrease of \$856,000 and 233 in average personnel as compared with actual requirements for the fiscal year 1949. Compared with the estimate for the current year it represents a reduction of \$458,000 and 108 in average personnel.

A separate budget estimate of \$500,000 is provided to meet the expenses of termination of accounts by sale or assignment in connection with the sale of accounts on a State-wide basis. This estimate provides for an average of 150 positions during the budget year and contemplates the sale or assignment of 71,000 accounts.

Provision in the Independent Offices Appropriation Act, 1950, established a limitation of \$300,000 for the current year on expenses incurred in connection with the termination of accounts by sale or assignment. This limitation was predicated upon the anticipated sale or assignment of 60,000 loan and vendee accounts during 1950. It was also based upon the assumption that the cost of terminating accounts by sale or assignment would be no greater than the estimated average of \$5 per account applicable to terminations by regular payments in full. Experience to date has forced the Corporation to revise these estimates. Cost accounting procedures instituted as of July 1, 1949, to control the expenditure of funds under the \$300,000 limitation indicate that the cost of terminating an account by sale or assignment averages approximately \$7.10 per account. The Corporation also estimates on the basis of its experience that it will be possible to accomplish the assignment of 70,000 accounts by the end of the current fiscal year. For these reasons,

HOME LOAN BANK BOARD—Continued**HOME OWNERS' LOAN CORPORATION—Continued**

the Corporation is requesting an increase of \$200,000 in the limitation for the current year, making a total of \$500,000.

FINANCIAL REVIEW

For 1949 the net income after losses and adjustments of valuation reserves amounted to \$12,503,463. Application of this income to the deficit of \$11,035,345, as of the beginning of the 1949 fiscal year, resulted in an earned surplus at June 30, 1949, of \$1,718,118. The net income for 1950 is estimated at \$7,403,000 and for 1951, \$1,094,000. This substantial decrease in estimated net income is due to the realization of the Corporation's principal income-producing assets—mortgage loans and vendee accounts—through termination by payment in full or by sale or assignment, and investments in savings and loan associations, through repurchase.

In 1950 it is estimated that \$206,726,150 of funds will be provided by the realization of assets from the following sources: repayments of principal of loans and vendee accounts, \$186,028,000; sale of investments, \$10,294,150; and \$10,404,000 will be provided by income. Of these funds it is anticipated that \$300,000 will be applied to the retirement of the Corporation's bonds held by the public; \$125,000,000 to the retirement of the remainder of the Corporation's outstanding bonds held by the Treasury; and \$73,000,000 to the reduction of its outstanding stock also held by the Treasury. The balance of the funds will be applied to the acquisition of assets, operating expenses, and to an increase in working capital items other than cash.

In 1951 it is estimated that \$141,839,497 will be provided by the realization of assets from the following sources: repayments of loans and vendee accounts, \$134,818,497; sale of investments, \$4,000,000; and \$3,021,000 from income. Of the total funds provided, it is expected that \$127,000,000 will be used in the retirement of the Corporation's remaining capital stock held by the

Treasury and \$250,000 to retire Corporation bonds held by the public.

Assets.—On June 30, 1949, there were 201,338 mortgage loans and vendee accounts outstanding, amounting to \$319,342,497. It is estimated that during the year 110,000 accounts will be terminated, 40,000 by payment in full and 70,000 by sale or assignment, reducing the total outstanding on June 30, 1950, to 91,338 accounts with balances of \$134,499,497.

Savings and loan associations have been encouraged to repurchase, in advance of callable dates, the Corporation's remaining investments in their institutions and responses to such requests indicate that repayment of the remaining balance of \$4,094,150 will be made in 1950.

As of June 30, 1949, the Corporation held 26 properties, either owned or in process of acquiring title, having a book value of \$54,633. Actual foreclosures are negligible and it is estimated that only 16 properties having a book value of \$33,633 and 10 properties with a book value of \$20,633 will be carried as of June 30, 1950 and 1951, respectively.

Liabilities.—Of a total of \$3,489,453,550 of bonds issued for value, there remained outstanding on June 30, 1949, only \$125,000,000 of bonds held by the Treasury and \$2,317,150 of matured bonds held by the public. It is estimated that all of the bonds held by the Treasury will be retired during 1950.

Investment of United States Government.—On retirement of the remaining bonds outstanding, funds acquired through the realization of assets will be applied to the retirement of capital stock held by the Treasury. It is estimated that \$73,000,000 will be so applied during 1950, reducing the outstanding balance at June 30, 1950, to \$127,000,000, and that this balance will be wholly eliminated by June 30, 1951.

During 1949, the Corporation eliminated the deficit, which, at its peak, amounted to approximately \$136,000,000, including provisions for future losses. It is estimated that earned surplus at June 30, 1951, will be increased to \$12,808,471, represented largely by cash funds in the Treasury.

APPROPRIATION TEXT

The following corporation is hereby authorized to make such expenditures, within the limits of funds and borrowing authority

available to each such corporation and in accord with law, and to make such contracts and commitments without regard to fiscal year limitations as provided by section 104 of the Government Corporation Control Act, as amended, as may be necessary in carrying out the programs set forth in the Budget for the fiscal year ending June 30, 1950, for each such corporation, except as hereinafter provided:

Home Owners' Loan Corporation: Not to exceed **[\$1,823,250]** \$1,400,000 shall be available for administrative expenses, including health-service program as authorized by law (5 U. S. C. 150), which shall be on an accrual basis and shall be exclusive of interest paid, depreciation, properly capitalized expenditures, expenses (including personal services) in connection with the termination or liquidation of accounts carried on the books of the corporation not to exceed **[\$300,000]** \$500,000, expenses (including services performed on a force account, contract, or fee basis, but not including other personal services) in connection with the acquisition, protection, operation, maintenance, improvement, or disposition of real or personal property belonging to said Corporation or in which it has an interest, and legal fees and expenses, and said Corporation may utilize and may make payment for services and facilities of the Federal home-loan banks, the Federal Reserve banks, the Home Loan Bank Board, the Federal Savings and Loan Insurance Corporation, and other agencies of the Government: *Provided*, That, notwithstanding any other provisions of this Act, except for the limitation in amount hereinbefore specified, the administrative expenses and other obligations of said Corporation shall be incurred, allowed, and paid in accordance with the Home Owners' Loan Act of 1933, as amended (12 U. S. C. 1461-1468). (*Independent Offices Appropriation Act, 1950.*)

PURPOSE AND FINANCIAL ORGANIZATION

The Federal Housing Administration was created by the National Housing Act, approved June 27, 1934. It is a noncorporate business-type agency and was made subject to the provisions of the Government Corporation Control Act by the Housing Act of 1948 (Public Law 901, 80th Cong.).

The principal purposes of the Federal Housing Administration are to stabilize the mortgage market, to improve home-financing practices, and to improve housing standards and conditions, through a system of insurance of loans and investments to finance the production, purchase, repair, and improvement of residential structures. As of October 31, 1949, a total of \$17.7 billion of insurance had been written.

The insurance programs administered by the Federal Housing Administration under the several titles of the National Housing Act are: (1) repair and improvement loan insurance—title I; (2) mortgage insurance for small homes and multifamily houses—titles I and II; (3) emergency and special incentive mortgage and loan insurance—title VI; (4) yield insurance on equity investments on rental

housing—title VII; and (5) mortgage insurance on rental housing to serve military installations—title VIII.

Financial organization.—The Federal Housing Administration maintains six insurance funds: (1) the title I insurance fund for the insurance of repair and improvement loans and mortgage loans under title I of the National Housing Act; (2) the mutual mortgage insurance fund covering the insurance of mortgages on one- to four-family dwellings under title II; (3) the housing insurance fund covering insurance of mortgages on multifamily housing projects under title II; (4) the war housing insurance fund covering all insuring operations under title VI; (5) the housing investment insurance fund for operations under title VII; and (6) the military housing insurance fund for operations under title VIII. An additional fund known as the title I housing insurance fund would be set up under proposed legislation to cover the insurance of mortgages on homes for families of low and moderate income, especially in outlying and suburban areas.

All income is credited and all expenses and losses are charged to these funds. Income is derived from insurance premiums, appraisal and miscellaneous fees, and interest on investments in United States Government securities. All Federal Housing Administration insurance programs are income-producing and have been since their inception except for title I on which premiums have been collected only since July 1, 1939, when the National Housing Act was amended to authorize collection of such premiums. Administrative expenses are paid out of income in an amount authorized by the Congress in appropriation acts. Under the provisions of Public Law 387, approved October 25, 1949, operating expenses in connection with the examination and insurance of loans or investments, and the payment of insurance claims, and properly capitalized expenditures have been defined as nonadministrative but subject to a limitation in each fiscal year of 35 percent of the fee and premium income of the previous fiscal year.

The mutual mortgage insurance fund differs from other insurance funds in that, in accordance with section 205 of the National Housing Act, mortgages insured are grouped together with others having similar risk characteristics and maturity dates and the mortgagors in the group receive in the form of dividends any excess of fees and premiums paid over losses and expenses allocable to the group.

ANALYSIS OF BUDGET PROGRAMS

Repair and improvement loan insurance—title I.—This program provides for insurance on loans for the alteration, repair, and improvement of residential and, within certain limitations, nonresidential properties. The loans insured under this program are characteristically short-term, unsecured notes averaging around \$485. The insurance provisions of title I are scheduled to expire in fiscal year 1950; however, proposed legislation would make this insurance authority permanent. Program estimates are set forth below:

	1949 actual	1950 estimate	1951 estimate
Initiation: Loans insured.....	1, 147, 279	1, 400, 000	1, 400, 000
Maintenance of insurance in force—end of year: Insurance in force (notes).....	3, 268, 113	3, 343, 185	3, 332, 316
Settlement:			
Claims.....	46, 517	48, 000	50, 000
Average defaulted notes in process of collection.....	73, 500	100, 000	120, 000

Mortgage insurance on small homes and multifamily housing—titles I and II.—Under this program mortgages are insured on one- to four-family structures and on multifamily housing projects up to 80, 90, or 95 percent of appraised value depending upon the amount and character of the loan involved. Insured mortgages may cover both new and existing property both for rent and for sale, including nonprofit cooperative housing projects. Legislation is proposed which would facilitate construction of housing for families of low and moderate income by the insurance of loans bearing a higher ratio to the mortgaged property in the lower price and rental ranges. Program estimates are as follows:

	1949 actual	1950 estimate	1951 estimate
Initiation:			
Unit applications examined.....	464, 055	553, 000	684, 000
1-4 family inspections made.....	507, 245	795, 400	1, 034, 200
Average multifamily units under inspection.....	90	1, 400	34, 900
Unit mortgages insured.....	200, 577	350, 100	445, 600
Maintenance of insurance in force—end of year: Insurance in force.....	794, 000	1, 080, 000	1, 464, 000
Settlement:			
Unit mortgages terminated.....	84, 200	74, 600	73, 000
Properties acquired (dwelling units).....	14	150	250
Properties on hand (dwelling units).....	10	112	253

Emergency and special-incentive mortgage loan insurance—title VI.—Title VI of the National Housing Act, under which this program operates, was enacted in 1941 to provide special mortgage insurance provisions necessary for the war housing effort. It has been continued during the postwar period to provide veterans' emergency housing and other special-incentive programs designed to meet the postwar economic conditions in the housing field. The one- to four-family mortgage insurance program under title VI (sec. 603) has expired except for authority to insure pursuant to outstanding commitments and in connection with the refinancing of section 603 mortgages heretofore insured under the program. At the present time under title VI, section 608, mortgages are insured on multifamily rental projects up to 90 percent of cost (as distinguished from long-term value). The insurance provisions of section 608 expire by operation of law March 1, 1950. No extension beyond this date is anticipated. Section 609 of title VI provides for insurance of loans for the manufacture of housing by industrial processes and short-term notes incident to the sale of such housing. Section 610 provides for insurance on mortgages executed in connection with the sale by the Government of certain federally owned housing. Section 611 provides for insurance of short-term loans to finance the construction, by modern site-fabrication methods, of groups of 25 or more single-family dwellings. Proposed legislation would increase the usefulness of this section by increasing the ratio of insurable loan to property value. Estimates of operations under this program are set forth below:

	1949 actual	1950 estimate	1951 estimate
Initiation:			
Unit applications examined.....	139, 236	121, 600	40, 600
1-4 family inspections made.....	285, 326	88, 100	-----
Average multifamily units under inspection.....	72, 548	100, 900	103, 600
Unit mortgages and loans insured.....	221, 762	139, 000	70, 650
Maintenance of insurance in force—end of year: Insurance in force (unit mortgage and loans).....	643, 150	724, 949	725, 359
Settlement:			
Mortgages and loans terminated (dwelling units).....	32, 105	60, 044	69, 554

FEDERAL HOUSING ADMINISTRATION—Continued

	1949 actual	1950 estimate	1951 estimate
Settlement—Continued			
Properties acquired (dwelling units) (secs. 603 and 608).....	662	3,000	4,500
Mortgage notes acquired in exchange for debentures.....	10	788	1,197
Properties on hand.....	448		
Mortgage notes on hand (in exchange for properties).....	1,631	1,622	1,784

Yield insurance on equity investment in rental housing—title VII.—This program which provides insurance for investments in rental housing was added by the Housing Act of 1948 (Public Law 901, 80th Cong.). It provides for the insurance of the minimum annual amortization charge and an annual return on the outstanding investment on rental projects. While there has been considerable interest in this new program by large investors, no actual insurance has yet been consummated. It is anticipated, however, that in the fiscal years 1950 and 1951 insurance applications will be processed under the program as indicated in the table below.

	1949 actual	1950 estimate	1951 estimate
Initiation:			
Unit applications examined.....		3,600	8,000
Average dwelling units under inspection.....		700	5,300
Investments insured (in dwelling units).....		2,300	6,200
Maintenance and insurance in force—end of year: Insurance in force (in dwelling units).....		2,300	8,500

Housing at or near military installations—title VIII.—This program, designed to provide rental housing for personnel of the armed services (including civilian personnel) stationed at or near Army, Navy, and Air Force installations, was established by Public Law 211, approved August 8, 1949. The program contemplates meeting a substantial portion of military housing needs through the use of private capital rather than appropriated funds. The estimated volume of operations under this program is set forth below:

	1949 actual	1950 estimate	1951 estimate
Initiation:			
Unit applications examined.....		45,000	100,000
Average dwelling units under inspection.....		3,700	63,200
Unit mortgages insured.....		14,600	79,400
Maintenance of insurance in force—end of year: Insurance in force (in dwelling units).....		14,600	94,000

Administrative expenses.—Administrative expenses amounting to \$5,425,000 in fiscal year 1951 are shown in the following categories in the activities schedule:

1. *Executive direction.*—All expenses of the Office of the Commissioner.

2. *Program direction.*—All expenses of those units of organization in the Washington office which are directly responsible for the operation of the repair and improvement program and the various mortgage insurance programs.

3. *Staff and administrative services.*—Comprise the various services of the Washington office which are incidental to the over-all administration of the agency, such as legal, personnel, budget, statistical, and accounting. Forty-three percent of the cost of these services represents

accounting and auditing work which includes the maintenance of insurance in force estimated at nearly 11 billion dollars by June 30, 1950, and about 13.9 billion dollars by June 30, 1951.

SUMMARY OF ADMINISTRATIVE EXPENSES

	1949 actual	1950 estimate	1951 estimate
1. Executive direction.....	\$72,671	\$73,000	\$73,500
2. Program direction.....	1,362,737	1,448,800	1,462,000
3. Staff and administrative services.....	3,426,379	3,667,506	3,715,730
4. Pay increases.....		118,330	173,770
Total.....	4,861,787	5,307,636	5,425,000

FINANCIAL REVIEW

Income and expenses.—Net income from all insurance operations before adjustment of valuation and operating allowances amounted to \$46,533,827 during 1949. For 1950 and 1951 it is estimated at \$64,140,980 and \$75,352,900, respectively, due mainly to the increased income from fees and insurance premiums resulting from the larger volume of insurance anticipated for both years.

Net increases in valuation and operating allowances during 1949 amounted to \$44,775,324 and are estimated at \$57,645,570 and \$69,196,900 for 1950 and 1951. The major portion of these increases is in the allowance for contingent losses, expenses, and other charges which increased \$32,004,463 in 1949, and is expected to increase \$40,011,407 and \$50,540,200 in 1950 and 1951, respectively.

Financial condition.—The comparative statement of financial condition is a combined balance sheet for all funds.

Assets of all funds total \$237,731,851 as of June 30, 1949, and are estimated to reach \$308,100,062 and \$373,489,612 by the end of 1950 and 1951. The principal assets consist of cash, investments, loans receivable, and acquired security or collateral.

Liabilities totaling \$188,086,676 as of June 30, 1949, consisted of \$168,665,239 operating allowances for future contingent losses, expenses, and other charges; \$14,632,986 debentures payable in connection with the settlement of mortgage insurance claims; and \$4,788,451 current and other liabilities. It is estimated that by the end of 1950 liabilities will total \$247,194,932, of which \$208,676,646 will represent operating allowances for contingent losses, expenses, and other charges; \$32,957,486 debentures payable; and \$5,560,800 current and other liabilities. By the end of 1951 total liabilities are expected to be \$306,554,482, consisting of \$259,216,846 operating allowances; \$40,913,436 debentures payable; and \$6,424,200 current and other liabilities.

The investment of the United States Government comprises paid-in surplus, expended appropriations, and earned surplus (deficit).

Paid-in surplus as of June 30, 1949, amounting to \$15,000,000, consists of the original allocations by the Reconstruction Finance Corporation of \$10,000,000 to establish the mutual mortgage insurance fund and \$5,000,000 to establish the War Housing Insurance Fund as provided by the National Housing Act, as amended.

Net expended appropriations amounted to \$65,423,766 at June 30, 1949, and are estimated to be \$70,190,911 and \$70,067,711 at the close of the next two fiscal years. As of June 30, 1949, these amounts represent \$42,777,931 to meet administrative expenses; \$21,645,835 to pay insurance claims under title I advanced by the Reconstruction

Finance Corporation in the early years pursuant to the provisions of the National Housing Act of June 27, 1934, as amended, and subsequent appropriation acts; and \$1,000,000 appropriated from general funds of the United States Treasury to initiate the Housing Investment Insurance Fund established by the Housing Act of 1948.

The increase in expended appropriations during 1950 results mainly from the appropriation of \$5,000,000 from general funds of the United States Treasury to the Military Housing Insurance Fund established by the amendment to the National Housing Act of August 8, 1949 (Public Law 211, 81st Cong.).

Obligations of the Reconstruction Finance Corporation to the United States Treasury in the amount equivalent to the Corporation's advances to the Federal Housing Administration have been canceled by the Secretary of the Treasury.

The earned surplus (or deficit) consists of the reserved portion, or general reinsurance account, and the unreserved portion, consisting mainly of the deficit in the title I insurance fund and claims account. The total earned deficit of \$30,778,591 at June 30, 1949, is expected to decrease to \$24,285,781 by June 30, 1950, and to \$18,132,581 by June 30, 1951. This results mainly from the expected decline in the deficit of the general reinsurance account from \$11,991,259 at June 30, 1949, to \$5,766,447 by June 30, 1950, and to an earned surplus of \$288,353 by June 30, 1951.

The unreserved deficit of \$18,787,332 at June 30, 1949, is attributable to title I operations from July 1, 1934, to June 30, 1939, during which time the Administration was not authorized to collect insurance premiums on loans insured under this title. This deficit is expected to decrease slightly during 1950 and 1951 as the result of recoveries against title I claims which are for repayment to the United States Treasury.

No recommendation is made at this time for an appropriation to restore the above deficit, in view of the fact that the income from title I operations appears to be sufficient to carry on the current insurance program under this title, and the apparent deficit in the general reinsurance account will probably become a surplus by the end of 1951 as the result of earned income to be credited to that account during 1950 and 1951.

The total investment of the United States Government was \$49,645,175 at June 30, 1949, and is estimated to increase to \$60,905,130 and \$66,935,130 by the end of 1950 and 1951, respectively. The estimated increase during 1950 results from a substantial reduction in the deficit of the reserved surplus (general reinsurance account) by reason of earned income to be credited during the year and from the appropriation of \$5,000,000 to initiate the military housing insurance fund. The larger estimated interest of the United States Government by June 30, 1951, is attributable to the further improvement in the reserved surplus (general reinsurance account) resulting from earnings credited to that account.

SCHEDULE C-1.—Federal Housing Administration: Position with respect to borrowing authority

[Fiscal years ending June 30, 1949, 1950, and 1951]

	1949 actual	1950 estimate	1951 estimate
Outstanding debentures payable at end of year (statement C)	\$12,953,486	\$27,638,486	\$32,673,386
Balance of borrowing authority available	(¹)	(¹)	(¹)
Authorized borrowings	(¹)	(¹)	(¹)

¹ The Federal Housing Administration has no authority to borrow cash. It is authorized by law to issue debentures in exchange for mortgages or properties acquired as a result of default by mortgagors. The amount of debentures so issued is not specifically limited by law but is indirectly restricted by limitations of insurance authority which, by limiting potential insurance liability, have the effect of restricting potential debenture issues.

APPROPRIATION TEXT

The following agency is hereby authorized to make such expenditures, within the limits of funds and borrowing authority available to each such agency and in accord with law, and to make such contracts and commitments without regard to fiscal year limitations as provided by section 104 of the Government Corporation Control Act, as amended, as may be necessary in carrying out the programs set forth in the Budget for the fiscal year ending June 30, 1951, for each such agency, except as hereinafter provided:

Federal Housing Administration: In addition to the amounts available by or pursuant to law (which shall be transferred to this authorization) for the administrative expenses of the Federal Housing Administration in carrying out duties imposed by or pursuant to law, not to exceed **[\$22,500,000] \$5,425,000** of the various funds of the Federal Housing Administration [as follows: (1) the mutual mortgage insurance fund; (2) the housing insurance fund; (3) the account in the Treasury comprised of funds derived from premiums collected under authority of section 2 (f), title I of the National

Housing Act, as amended (12 U. S. C. 1701); (4) the war housing insurance fund; and (5) the housing investment insurance fund] shall be available for expenditure, in accordance with the [provisions of said] *National Housing Act*, [for the administrative expenses of the Federal Housing Administration, including purchase of not to exceed one passenger motor vehicle, for replacement only; not to exceed \$1,500 for periodicals and newspapers; not to exceed \$1,500 for contract actuarial services; and health-service program as authorized by law (5 U. S. C. 150): *Provided*, That necessary expenses of the Administration (including services performed on a contract or fee basis, but not including other personal services) in connection with the acquisition, protection, completion, operation, maintenance, improvement, or disposition of real or personal property of the Administration acquired under authority of titles I, II, VI, and VII of said *National Housing Act*, shall be considered as nonadministrative for the purposes hereof] *as amended (12 U. S. C. 1701): Provided [further]*, That, except as herein otherwise provided, [the administrative] all expenses and [other] obligations[, including nonadministrative expenses,] of [the] said Administration shall be incurred, allowed, and paid in accordance with the provisions of said Act [of June 27, 1934, as amended (12 U. S. C. 1701)]: *Provided further*, That funds available for expenditure shall be available for contract actuarial services (not to exceed \$1,500); health service program as authorized by law (5 U. S. C. 150); and the purchase of two passenger motor vehicles, of which one shall be for replacement only. (*Independent Offices Appropriation Act, 1950.*)

PUBLIC HOUSING ADMINISTRATION

[Submitted under the Government Corporation Control Act]

INTRODUCTORY STATEMENT

The Public Housing Administration is a constituent of the Housing and Home Finance Agency, established by Reorganization Plan No. 3 of 1947. The responsibilities of the Administration may be classified into two groups: direct and delegated. Business-type budgets are submitted for each of the five programs involved.

1. Housing programs for which the Administration is directly responsible are:

(a) *United States Housing Act program.*—This consists of (1) the federally aided low-rent housing program under the United States Housing Act of 1937 (42 U. S. C. 1401); (2) the slum-clearance projects developed by the Public Works Administration under the Emergency Relief Act and the National Industrial Recovery Act; (3) the war housing developed under the defense amendment to the United States Housing Act, Public Law 671 (42 U. S. C. 1501), which authorized the use of low-rent funds to provide housing for defense workers; and (4) the extension to the low-rent housing program provided by the Housing Act of 1949 (63 Stat 413), title III of which authorized the construction of 810,000 locally owned housing units to be spread over a period of 6 years.

(b) *Subsistence homesteads and greentowns program.*—The three greentowns and the residual subsistence homestead projects and securities remaining under the former National Housing Agency pursuant to section 2 (a) (3) of the Farmers Home Administration Act of 1946 (Public Law 731, 79th Cong., approved Aug. 14, 1946) constitute this program which is in the process of liquidation.

2. Housing programs administered under delegated authority from the Housing and Home Finance Administrator are:

(a) *Public war housing program.*—This program involves final settlement of development contract claims as well as management and disposition of public war housing projects under the Lanham and related acts (54 Stat. 872, 1125; 55 Stat. 14, 197, 810).

(b) *Veterans' re-use housing program.*—This program involves the supervision over local management of temporary dwellings for veterans constructed under title V of the Lanham Act (54 Stat. 1125).

(c) *Homes conversion program.*—This program consists of management and disposition activities related to properties leased by the Government and remodeled to produce additional dwelling facilities for war workers under the Lanham Act (54 Stat. 1125).

In addition to the five program budgets outlined above, there is a sixth budget covering in consolidated form the administrative expenses of the Public Housing Administration in performing the necessary functions required in all of these programs. Such expenses are paid from a single administrative expense fund authorized by the Housing Act of 1948 and are distributed on a work-load basis to the various programs.

PURPOSE AND FINANCIAL ORGANIZATION

Pursuant to authority contained in the Housing Act of 1948 (62 Stat. 1268) a single administrative expense budget is presented consolidating funds required for the following five programs administered by the Public Housing Administration:

- United States Housing Act, as amended by the Housing Act of 1949
- Subsistence homesteads and greentowns
- Public war housing
- Veterans' re-use housing
- Homes conversion

Administrative expenses are distributed to the various programs based upon special surveys and analyses during which supervisors report time spent by employees under their jurisdiction, on each activity within the several programs. The results supply reasonably accurate factors for use in apportioning the share of total administrative expenses applicable to each program.

The distribution of costs is shown in the following table:

Statement of sources and application of funds

ANALYSIS OF BUDGET PROGRAMS

The Public Housing Administration is responsible for five separate housing programs: United States Housing Act, subsistence homesteads and greentowns, public war housing, veterans' re-use housing, and homes conversion. Each of these activities is presented in separate budget programs. The several programs are administered by a single integrated organization. A significant feature of the budget program for 1951 is the activity projected in the development of low rent public housing authorized by the Housing Act of 1949 (63 Stat. 413). The budget also estimates the complete liquidation of the homes conversion program, substantial liquidation of the veterans' re-use and the subsistence homesteads and greentowns programs. The administrative functions of the agency break down into three major categories: development, management, and disposition. The budget program for each of these activities is briefly summarized below:

Development.—The Housing Act of 1949 authorizes the start of construction of 135,000 low-rent housing units each year commencing with July 1, 1949. The greatest portion of administrative activity during the development phase of a project occurs prior to actual construction. During this time the Public Housing Administration renders such assistance as is required by the local authorities in every phase of planning a project including examinations and determinations of need, criteria for design and lay-out, selection of suitable sites, economic and efficient utility combinations, reasonableness of development cost, determination of the economic feasibility of the project in terms of potential rental income as against long-range operating expenses and other matters essential to a low-rent housing project. All of this results in the drawing up of a comprehensive contract for financial aid governing the essential responsibilities of the Public Housing Administration and the local housing authority, prior to construction. The Administration also reviews the plans of the local authorities to assure that the proposed project will adequately serve the needs of the community and the potential tenants as well as to protect the interest of the Government and compliance with the terms and conditions of the basic legislation.

In recognition of the volume of preliminary work which must be accomplished in order to initiate construction, progress schedules estimate construction starts of 50,000 units by June 30, 1950, and an additional 125,000 units are expected to be under construction by June 30, 1951. This rate of construction starts is expected to increase

progressively until the goals set forth in the legislation have been attained. In achieving these construction starts preliminary development activity will require that 175,000 units will be initiated in 1950 and an additional 165,000 units in 1951.

Management.—The Public Housing Administration had management responsibilities for 661,665 housing accommodations as of June 30, 1949, relating to locally owned projects developed and operated with Federal financial assistance and to federally owned projects. Management is conducted by local housing authorities who own and operate low-rent housing projects and also lease certain of the federally owned projects. Other projects are operated by sponsoring municipalities and educational institutions. In other instances contract managers (real-estate brokers) are used, and a sizable group of federally owned war housing projects are directly operated by Federal employees. Disposition activities consisting of sales, transfer, and demolition are estimated at 111,068 units in 1950 and 59,384 units in 1951. A large portion of this decrease in management work load results from the transfer of veterans' re-use housing projects to sponsoring local bodies. This decrease in work load is more than offset by the increase in the number of units in the management stage in the United States Housing Act program. The budget program estimates the completion of 70,000 units of low-rent housing initiated under the Housing Act of 1949 and an additional 1,101 units initiated prior to the passage of this legislation.

Disposition.—Disposition activities are contemplated to encompass complete liquidation of the homes conversion program and substantial liquidation of the subsistence homesteads and greentowns program by the end of 1951. This will result in the disposal of 22,731 units. The Independent Offices Appropriation Act of 1950 contains a proviso which authorizes transfer of veterans' re-use housing projects to sponsoring local public bodies where such projects are located on land owned or controlled by them. It is estimated that 64,500 federally financed accommodations and 12,240 nonfederally financed accommodations will be transferred under this proviso. The disposition activities pertaining to these programs will entail negotiations with owners in the cancellation of leases, sales to private purchasers on a negotiated sales basis and review and examination of the final affairs and accounts of the properties involved prior to the liquidation of the Government's interest.

The budget program for disposition of public war housing in 1950 and 1951 totals 70,000 units. This estimate includes the sale of 10,000 permanent and demountable units in 1950 and 20,000 units in 1951. In addition, 20,000 temporary accommodations will be disposed of by sale and demolition in 1950 and an additional 20,000 units in 1951. Included in the disposition of temporary units to be disposed of are the residual dormitory and stopgap accommodations, thus completing this phase of liquidation of the public war housing program.

APPROPRIATION TEXT

The following agency is hereby authorized to make such expenditures, within the limits of funds and borrowing authority available to such agency and in accord with law, and to make such contracts and commitments without regard to fiscal year limitations as provided by section 104 of the Government Corporation Control Act, as amended, as may be necessary in carrying out the programs set forth in the Budget for the fiscal year ending June 30, 1951, for such agency, except as hereinafter provided:

Public Housing Administration: Of the amounts available by or pursuant to law for the administrative expenses of the Public Housing Administration in carrying out duties imposed by or pursuant to law including [not to exceed \$2,329,550 of the] funds [available for administrative expenses for the United States Housing Act program] appropriated by title I of this Act, not to exceed [\$3,054,600] \$19,024,000 shall be available for such expenses, including purchase of not to exceed [five] ten passenger motor vehicles, of which eight shall be for replacement only; expenses of attendance at meetings of organizations concerned with the work of the Administration; and a health-service program as authorized by law (5 U. S. C. 150): *Provided*, That necessary expenses of providing representatives of the Administration at the sites of non-Federal projects in connection with the construction of such non-Federal projects by public housing agencies with the aid of the Administration, shall be compensated by such agencies by the payment of fixed fees which in the aggregate in relation to the development costs of such projects will cover the costs of rendering such services, and expenditures by the Administration for such purpose shall be considered nonadministrative expenses, and funds received from such payments may be used only for the payment of necessary expenses of providing representatives of the Administration at the sites of non-Federal projects or for administrative expenses of the Administration not in excess of the amount authorized by the Congress: *Provided further*, That [the Administrator of the Housing

and Home Finance Agency may relinquish and transfer, pursuant to the same general terms and conditions specified in subsections 505 (a) and (b) of the Act of October 14, 1940, as added by the Act of June 28, 1948 (Public Law 796), title to temporary housing provided for certain veterans and their families under title V of said Act of October 14, 1940, as amended, to any State, county, city, or other public body: *Provided further*, That any application for such relinquishment and transfer shall be filed with the Administrator within one hundred and twenty days after the approval of this Act.] funds made available by the Act of June 29, 1936 (49 Stat. 2035) shall be available for necessary expenses, including administrative expenses, of the Public Housing Administration in carrying out the provisions of the Act of May 19, 1949 (Public Law 65).

[Liquidation of resettlement projects: Not to exceed \$19,800 of the receipts derived from the operation of the projects transferred under section 4 (b) of Reorganization Plan Numbered 3 of 1947 shall be available for necessary expenses in connection with and to facilitate disposition of the suburban resettlement projects known as Greenbelt, Greendale, and Greenhills including services in accordance with section 15 of the Act of August 2, 1946 (5 U. S. C. 55a).] (*The Independent Offices Appropriation Act, 1950.*)

PURPOSE AND FINANCIAL ORGANIZATION

The United States Housing Act of 1937 (42 U. S. C. 1401) created a program of locally owned and operated low-rent housing for families of low income who could not otherwise afford decent, safe, and sanitary dwellings. The basic act authorized loans to local public housing agencies to aid in financing the development of the low-rent-housing projects. The act also authorized the payment to local housing authorities of annual contributions to be appropriated and paid to maintain the low-rent character of the projects. In addition, the act provided for the transfer of the public housing projects started by the Public Works Administration housing division. Subsequently, Public Law 671 (42 U. S. C. 1501), approved June 28, 1940, amended the Housing Act to permit the construction of permanent housing for war workers, subject to conversion to low-rent use after the war emergency.

Title III of the Housing Act of 1949 (63 Stat. 413), approved July 15, 1949, amended the United States Housing Act, and authorized the construction of 810,000 units over a 6-year period. This legislation also increased the borrowing authority of the Public Housing Administration to \$1.5 billion outstanding at any one time, and increased the authorization to contract for the payment of annual contribution to local housing authorities by \$308 million to \$336 million for periods up to 40 years. This additional annual contribution authorization is made available in increments of \$85 million in the first year, \$55 million in each of the next 3 years, and \$58 million in the fifth year, to the total of \$308 million.

PUBLIC HOUSING ADMINISTRATION—Continued**UNITED STATES HOUSING ACT PROGRAM—Continued**

ANALYSIS OF BUDGET PROGRAMS

The major activities under the United States Housing Act program relate to—

(a) The development and financing of low-rent projects; and

(b) The management of projects, including the payment of subsidies in the form of annual contributions appropriated annually by the Congress.

In order to carry out the latter activity there is contained herein a request for an appropriation of \$28 million.

SUMMARY OF PROGRAM

Development and capital financing.—Under the United States Housing Act, low-rent housing activities are primarily a subject for local determination and control. The Federal function is concerned with making capital loans, paying annual contributions, and reviewing local actions for conformity with law. The local function is carried out by local housing authorities, authorized by State laws, and members are appointed by the mayor or other local governing body. The local housing authority must determine the need in its locality for low-rent public housing. After the local authority has demonstrated that there is a need for low-rent housing not being met by private enterprise, the Public Housing Administration makes a small preliminary loan to cover the cost of planning a proposed project. The local governing body must approve the application for this loan. The local housing authority then selects a site, has it appraised, selects architects and engineers to prepare plans, and makes estimates of the cost of building and operating the project. It also enters into a cooperation agreement with its local government providing for tax exemption for the project, payments in lieu of taxes, and elimination of substandard dwellings in the locality.

The cost of the project is limited by law. It must not be elaborate or of extravagant design or materials, and economy must be promoted in construction and administration. The cost of building and equipping new dwellings must not exceed \$1,750 per room, excluding the cost of land and nondwelling facilities. If there is an acute need for low-rent housing in a locality and it cannot be built within this limit except by sacrificing sound standards, not to exceed an additional \$750 per room may be allowed. Financing during the early development period will be of two types; advance loan notes purchased by the Public Housing Administration and temporary loans obtained through the sale of local housing authority's temporary loan notes to private investors. Since the Administration obligates itself, if necessary, to loan sufficient funds to cover the principal and interest on these notes when they mature, the notes have excellent security and are now being sold at interest rates averaging

about 1 percent per year. All temporary loan notes are retired as soon as the project is permanently financed. This is expected to occur about 3 months after start of construction. At permanent financing, the local authority sells long-term bonds secured by the Federal Government's pledge to pay annual contributions. It is expected that substantially all of the permanent bonds will be sold to private investors.

In 1950, the first year of operation of the enlarged low-rent housing program, it is anticipated that 625 projects consisting of 175,000 units will be initiated. Of this number, 100 projects with 50,000 units are expected to start construction by June 30, 1950. During 1951 an additional 825 projects of 165,000 units will be initiated or a total of 1,450 projects comprising 340,000 units initiated by June 30, 1951. Of this number construction will have started on 175,000 units and occupancy reached on 70,000 units by June 30, 1951.

This activity will involve entering into contracts and issuing advance loan notes for approximately \$209 million in 1950, and an additional \$302 million in 1951.

In addition to this activity, supplemental construction work and corrections of war-caused construction deficiencies will be undertaken in the amount of \$3,535,000 in 1950 and \$1,050,000 in 1951. These corrections of deficiencies and supplemental work are required to bring projects up to proper physical standards and to complete work delayed in the past by shortages of materials, labor, and equipment. Replacement of inferior materials will be undertaken only where necessary for safety or livability, or because of failure in operation.

The new legislation permits the financing of low-rent projects at more favorable interest rates and with greater private capital participation. This will facilitate the permanent financing of the low-rent projects which are now in temporary financing and will also permit refunding of projects which are presently permanently financed. The budgetary plans provide for permanent financing of existing projects with a development cost of \$150 million by June 30, 1950. The remaining projects now under temporary financing (having an estimated development cost of \$42 million) are expected to be placed in permanent financing during 1951. It is anticipated that 100 percent private capital participation will be realized in the permanent financing of these projects.

Refunding of projects now permanently financed in order to obtain more favorable interest rates and greater private capital participation is scheduled in 1950 for projects with a development cost of \$50 million. Because of the large volume of permanent financing required on projects initiated under the new legislation in 1951, no additional refunding activity is programmed.

The following table summarizes the financing activities of the Public Housing Administration in 1950 and 1951:

	1950 estimate	1951 estimate
Purchases:		
Advance loan notes.....	\$208,983,800	\$302,000,000
Bonds.....	3,535,000	36,050,000
Total purchases.....	212,518,800	338,050,000
Repayments:		
Advance loan notes.....	84,000,000	240,250,000
Bonds (refundings and retirements).....	40,949,000	1,063,000
Total repayments.....	124,949,000	241,313,000

Management.—As in the case of development operations, in the management of these projects the local housing

authority is required to observe certain requirements and restrictions established under the basic legislation. These are concerned with the eligibility of tenants, rent-income ratios, standards of physical operation and maintenance, and accounting practices. The Public Housing Administration reviews management operations of the local housing authority and audits its books to assure compliance with the act and an orderly and economical operation of their projects. The dwellings are rented to low-income families at rents scaled to what the individual family can pay. Since the rental income from the project is insufficient to cover the cost of operating the housing including amortization and interest, a deficit results. The Federal Government makes up this deficit with a limited cash subsidy in the form of annual contributions. The local government also contributes to achieving low rents through tax exemption.

It is anticipated there will be 520 projects containing 147,741 dwelling units, initiated prior to the enactment of the Housing Act of 1949, which will be eligible for annual contribution payments in 1951. Contributions on the existing projects for 1950 are based upon approved project budgets and recent operating experience. Expense estimates for 1951 are based upon approved 5-year estimates of average annual expense. First annual contributions on new projects will be paid approximately 11½ months after the start of construction. This contribution will be paid in the maximum amount which is 4½ percent of total development cost, less interest charges applicable to the development period of the project at the time the annual contribution is computed which is the end of the project fiscal year, and less any operating income in excess of operating expense occurring prior to that time.

On this basis, it is estimated that \$28,000,000 in annual contributions will be required in 1951; of this amount \$19,212,000 will be required for first contributions for projects initiated in 1950.

The following table shows the major items making up the annual contribution requirements:

	1949 actual		1950 estimate		1951 estimate	
	Per unit month	Amount	Per unit month	Amount	Per unit month	Amount
Total income.....	\$31.82	\$53,250,626	\$32.51	\$54,753,485	\$31.70	\$53,384,556

Unobligated balance of appropriation.....		699,597				
Total annual contribution: Appropriation or estimate.....		4,840,000		6,800,000		28,000,000

• Deduct.

¹ This includes additional payments in lieu of taxes authorized in Housing Act of 1949.

² This amount includes \$251,510 for first contributions on 2 projects initiated prior to the Housing Act of 1949.

The preceding table shows an anticipated increase during 1951 of \$1,988,000, over 1950 for existing program contribution requirements. Several factors are responsible for this increase:

(a) A decline of \$1,369,000 in project operating income at locally owned projects is expected because of the removal of tenants receiving income above established maximum limits and replacement with eligible low-income families.

(b) Permanent financing of low-rent projects which are now temporarily financed will result in an increase in the annual interest and amortization payments on these projects.

The Housing Act of 1949 authorizes an increase in payments in lieu of taxes to permit payments up to 10 percent of shelter rent. Funds for this purpose have not as yet been requested in 1950 but will be later as a request for a supplemental appropriation. The amount of \$1,800,000 has been included in this budget, however, as a preliminary estimate and is reflected in the financial statements as a proposed supplemental request.

The budget for 1951 includes payments in lieu of taxes at the rate of 10 percent of shelter rent.

Administrative expenses.—Administrative expense requirements for this program are estimated at \$6,579,550 for 1950 and \$13,000,000 for 1951. The increase is due to the greatly expanded activity under this program. These administrative expenses are merged with the funds for administrative expenses of the several programs administered by the Public Housing Administration into a single fund. The details of the administrative expense requirements are covered in a separate budget.

FINANCIAL REVIEW

Enactment of the Housing Act of 1949 (Public Law 171), will step up financing activities to permit the construction of 810,000 units within the next 6 years. These activities, plus financing in connection with the existing program, will lead to the following increases in local housing authority obligations held by the Public Housing Administration:

Local housing authority obligations, balance at June 30, 1949, \$284,169,388; June 30, 1950, \$371,739,188; June 30, 1951, \$468,476,188.

These expanding activities will require estimated borrowings from the Treasury of \$89,000,000 in 1950 and an additional \$94,000,000 in 1951. These additional borrowings are primarily responsible for the change in the net investment of the United States Government from \$484,968,551 in 1949 to \$665,506,411 in 1951.

Payments to the United States Treasury will increase as a result of greater interest expense on the additional borrowings. These payments are expected to be as follows:

Interest expense, 1949, \$6,605,988; 1950, \$6,908,750; 1951, \$8,658,750.

These expenses are financed by interest income received on local housing authority obligations.

The statement of income, expenses, and analysis of earned surplus shows that a net loss of \$4,602,744 occurred in 1949 as compared with an estimated loss of \$13,695,336 in 1950 and \$39,797,809 in 1951. These deficits result for the following reasons:

(1) Inclusion of interest and depreciation charges on federally owned projects.

(2) Inclusion of appropriated funds in expenses. These funds, which consist of annual contributions and administrative expenses, will increase to \$41,000,000 in 1951.

Mortgages on greentown projects.....		2	67

PURPOSE AND FINANCIAL ORGANIZATION

The subsistence homestead and greentowns program, consisting of assets with a book value of \$62,770,743 transferred to the Public Housing Administration, is operated under the terms of the Bankhead-Black Act of 1936 (40 U. S. C. 431). The program was originated as one of the initial experimental endeavors of the Government to develop higher standards of housing for both rural nonfarm and urban American families coincidentally with the establishment of a work relief program to help alleviate the economic depression of the period.

The act of June 29, 1936 (49 U. S. C. 433, 7 id. 1017), made operating receipts from the program available for operation, maintenance, and administration of such projects. Operating revenues further were made available in annual authorizations for necessary expenditures to facilitate disposition of the three greentown projects (5 U. S. C. 55a). A continuation of this authorization is requested.

ANALYSIS OF BUDGET PROGRAM

Management.—With the beginning of 1950 the only federally owned dwelling units are the 3 greentown projects consisting of 2,248 units and 24 units at 5 former sub-

PUBLIC HOUSING ADMINISTRATION—Continued**SUBSISTENCE HOMESTEAD AND GREENTOWNS PROGRAM—Continued**

sistence homestead project sites. These 24 units are under sales contract with the occupants. This is the current result of a planned program of liquidation of a program originally consisting of 2,272 dwelling units in greentown projects and 3,147 in subsistence homestead projects.

The subsistence homestead dwelling units remaining in the program during 1950 and 1951 are expected to continue payments for expense, rent, and purchase price in accordance with the terms of the sales contract.

During 1950, the last year of anticipated Government ownership for two of the greentowns projects, it is expected that a net project operating income of \$150,900 will be earned. In 1951, when Greenbelt is to be sold, it is expected that the 6 months of operation of this project will result in a net operating loss of \$14,980. This loss, however, is attributable to terminal-leave payments of \$25,500 to be made to project employees and \$30,000 for payment of taxes on vacant land remaining from the sales of the projects. These expenses will accrue after revenues from the projects will have ended, but sufficient funds from operations will be available to meet them. Consequently during the period of active operation, the Greenbelt project will in effect show a net operating income of \$40,520.

Disposition.—Subsistence homestead: Disposition activities during 1950 and 1951 are expected to result in a decrease of 24 mortgages, mortgage contracts, and sales contracts of various types, reducing their number to 38 as of June 30, 1951, consisting of 10 dwelling units under sales contract and 28 units on which there are Government-held mortgages.

Greentowns projects: Enactment of Public Law 65, Eighty-first Congress (63 Stat. 68), authorizing the sale of the three greentown projects by negotiation, has necessitated restudy of sales plans and the consideration of applications from veteran nonprofit groups seeking to qualify under the law. Applications have been received and negotiations for sale are under way for the projects at Greenhills, Ohio, and Greendale, Wis. It is expected that the developed portion of Greenhills and all of Greendale will be sold by March 31, 1950. The sale of the project at Greenbelt, Md., because of its size, character, and probable sales price, presents special problems but a sales plan and prices are expected to be made public in 1950. The developed portions of Greenbelt will be sold by December 31, 1950, in approximately 65 blocks consisting of integral groups of buildings. This sale will necessitate the dedication of roads and recreation areas valued at \$1,126,000 and transfer of certain undeveloped

lands for public parks. Sales of developed portions of the greentown projects are expected to be on the basis of 10 percent cash down payment, the balance to be secured by 25-year first mortgages with interest at 4 percent per annum.

In addition to the sale of the developed portions of Greenbelt, there would remain in 1951 approximately 5,500 acres of undeveloped land suitable generally for agricultural and industrial purposes. Sale of this land is expected by the end of 1951.

Administrative expenses.—The administrative expense requirements for this program are estimated at \$117,000 for 1950 and \$32,000 for 1951. This cost of administration is related to size of the program and the budget plan of activity and is comparable to the expense experienced in 1949. The administrative expense funds are merged with the funds for administrative expenses of the several programs administered by the Public Housing Administration into a single fund. The details of the administrative expense requirements are covered in a separate budget.

FINANCIAL REVIEW

During 1949, 1950, and 1951, it is expected that property with a total cost of \$30,507,390 will be disposed of as follows:

	1949 actual	1950 estimate	1951 estimate
Cost of property disposed of.....	\$1,249,685	\$17,308,814	\$11,449,647
Assets transferred.....	334,244	165,000	-----
Total cost of property disposed of...	1,583,929	17,473,814	11,449,647

As of June 30, 1951, it is expected that of the \$62,770,743 of assets originally transferred from the Farmers' Home Administration to the Public Housing Administration there will remain only \$11,488,991 of assets to be liquidated of which \$11,390,968 will be long-term mortgages and the remainder, \$98,023, real property under sales contract. Transfers of assets to other agencies and programs will account for another \$1,762,447 and \$15,582,849 will be the total sum deposited to the United States Treasury as a partial repayment on the investment of the Government. The remainder of the \$62,770,743 will consist of cash and working capital amounting to \$1,088,523 and a deficit of \$32,847,933.

It may be reasonably expected that mortgages and sales contracts will be paid in full so that at final liquidation about \$28 million will have been deposited with the Treasury as a partial repayment of the Government's investment. The \$28 million does not take into account substantial interest earnings on outstanding mortgages.

STATEMENT A.—Subsistence homestead and greentowns program: Statement of sources and application of funds

[Fiscal years ending June 30, 1949, 1950, and 1951]

Increase (—) or decrease in cash accounts (cash with U. S. Treasury).....	2,434,534	—882,083	\$63,517
Less deposits of special fund receipts.....	—1,394,603		
Net effect on budgetary expenditures.....	1,2,727,347	1,148,498	1,63,517

¹ Checking account expenditures include payments to the general fund of the Treasury as follows: 1949, \$3,366,854; 1950, \$1,298,101; 1951, \$2,710,048.

NOTE.—Public Law 266 authorized Public Housing Administration to convert from an appropriation basis to a checking account basis. Effect has been given to "1949 actual" on a checking account basis in order that the 3 years may be shown comparably. The gross elements of expenditures and receipts are shown to correspond with Treasury published statements.

PUBLIC WAR HOUSING PROGRAM

PROGRAM HIGHLIGHTS

	1949 actual	1950 estimate	1951 estimate
Average number of dwelling units in program, available for occupancy.....	316,548	295,346	268,858
Management operations (total for all federally operated and leased projects):			
Project income.....	\$127,527,323	\$120,344,600	\$110,591,200
Project expense.....	95,630,433	90,309,662	82,471,900
Public Housing Administration administrative expense.....	1,250,000	2,651,000	2,846,900
Net operating income (statement B).....	29,387,890	27,383,938	25,272,400
Disposition operations: Total dwelling units disposed of.....	35,522	30,000	40,000
Total sales (statement B).....	\$26,625,833	\$25,435,700	\$48,835,200

¹ Adjusted to \$3,022,535 after June 30, 1949, to reflect actual distribution of administrative expense.

PURPOSE AND FINANCIAL ORGANIZATION

The public war housing program was carried out during the defense and war periods as one means of alleviating an acute shortage of accommodations for workers in essential war industries. The housing still in use serves the needs of veterans, servicemen and their families, and certain defense workers, pending disposition in accordance with the basic legislation. No new projects have been authorized since 1945.

This housing was constructed with funds appropriated under the act of October 14, 1940 (42 U. S. C. 1521) (Lanham Act) and related acts. Expenses of operation, maintenance, and disposition or removal are paid from rental and other project income.

ANALYSIS OF BUDGET PROGRAMS

The disposition accomplishment and the remaining size of the public war housing program as of the end of each fiscal year are shown in the following table:

	Actual, June 30, 1949		Estimate, June 30, 1950		Estimate, June 30, 1951	
	Projects	Units	Projects	Units	Projects	Units
Available for occupancy:						
Permanent.....	296	78,773	273	72,973	227	61,373
Demountable.....	137	57,204	128	53,004	110	44,604
Temporary.....	709	169,699	639	159,833	591	147,361
Total.....	1,142	305,676	1,040	285,810	928	253,338

Demountable.....	37	5,329	9	4,200	18	8,400
Temporary.....	102	22,270	139	20,000	89	20,000
Total.....	178	35,522	171	30,000	153	40,000

Management.—Management of the projects in the public war housing program is by direct operation by the Federal Government, using Federal employees, or by leased operation under which the projects are operated by local housing authorities under lease agreements which provide for return to the Government of all net income remaining after payment of approved operating costs. As of June 30, 1949, 35 percent of all projects were federally operated and 65 percent were leased.

The following table shows the number of projects and dwelling units in active management status as of the end of each fiscal year:

	Actual, June 30, 1949		Estimate, June 30, 1950		Estimate, June 30, 1951	
	Projects	Units	Projects	Units	Projects	Units
Federally operated:						
Family dwellings.....	385	104,250	364	98,192	331	88,107
Dormitories.....	2	850	2	850		
Stop-gap.....	19	1,851				
Total.....	406	106,951	366	99,042	331	88,107

PUBLIC HOUSING ADMINISTRATION—Continued

PUBLIC WAR HOUSING PROGRAM—Continued

	Actual, June 30, 1949		Estimate, June 30, 1950		Estimate, June 30, 1951	
	Projects	Units	Projects	Units	Projects	Units
Leased:						
Family dwellings.....	690	191,623	653	181,286	597	165,231
Dormitories.....	15	5,078	15	5,078	-----	-----
Stop-gap.....	31	2,024	6	404	-----	-----
Total.....	736	198,725	674	186,768	597	165,231
Total active program.....	1,142	305,676	1,040	285,810	928	253,338

The estimates of income and expense projected for 1950 and 1951 were computed after a thorough review, approval, and consolidation of operating budgets submitted by each project for 1950. No significant change in average income and expense per unit is anticipated as between the two years. Slight increases are expected to occur (1) on leased projects because of the adoption of employee retirement plans by local housing authorities, and (2) on federally operated projects because of pay increases resulting from the enactment of Public Law 429. Total dollar income and expense will, of course, be substantially reduced because of scheduled deprogramming and disposition.

The amounts shown for "project income" and "project expense" in the table of program highlights above include gross income and gross expense for all federally operated and leased projects in order to provide a proper comparison. Statement B reports income and expense for federally operated projects only and shows the net income returned to the Government by leased projects.

Disposition.—The budgetary program contemplates the disposition of 30,000 units in 1950 and 40,000 units in 1951. The following table shows the volume, proceeds, costs, and value of disposition operations undertaken by fiscal years:

	1949 actual	1950 estimate	1951 estimate
Number of dwelling units disposed of:			
Permanent family dwellings.....	7,923	5,800	11,600
Demountable family dwellings.....	5,329	4,200	8,400
Temporary family dwellings.....	6,945	8,000	11,323
Dormitory units.....	10,577	6,000	7,390
Stop-gap units.....	4,748	6,000	1,287
Total.....	35,522	30,000	40,000
Total proceeds from sales.....	\$26,625,833	\$25,435,700	\$48,835,200
Total direct disposition expense, including demolition costs.....	-733,110	-513,900	-1,145,000
Public Housing Administration administrative expense.....	1-3,517,000	-1,644,000	-2,487,100
Net proceeds from sales.....	22,375,723	23,277,800	45,203,100
Total value of housing disposed of.....	62,663,527	84,146,000	134,326,700

¹ Adjusted to \$1,996,000 after June 30, 1949, to reflect actual distribution of administrative expense.

Permanent and demountable projects: The budget program for 1950 anticipates the sale of 10,000 permanent and demountable dwelling units, with 20,000 additional units scheduled for 1951. Most of these units will be sold for cash, largely because of the availability of Federal Housing Administration mortgage insurance. However, there are some projects which do not meet Federal Housing Administration insurance requirements for such reasons

as noncompliance with technicalities of local zoning and building codes. There are also cases where prospective buyers cannot obtain private financing even though Federal Housing Administration insurance has been approved. When projects cannot be sold for cash, the Public Housing Administration is faced with the alternatives of selling to speculators at a substantial loss to the Government or taking mortgage loan notes. Where such conditions exist, the facts are submitted to the Administrator of the Housing and Home Finance Agency for approval before entering into mortgage sales. The budget contemplates that (1) a maximum of 25 percent of sales will be on this basis during each of the 2 years, and (2) term sales will be on the basis of cash down payments of 10 percent, with the remainder secured by a mortgage payable over a 25-year period with 4½ percent interest.

Project utility systems and community facilities will be sold with the projects wherever possible. If sales cannot be effected, the water and sewer systems, electrical and gas distribution lines, streets, and other public spaces and facilities will be dedicated to local communities. The budget contemplates dedication of facilities having asset values of \$5,687,500 in 1950 and \$9,124,100 in 1951.

Temporary projects: Legal requirements governing disposal of temporary war housing differ from those affecting permanent war housing. Section 313 of the Lanham Act provides that temporary structures are to be removed when their emergency usefulness is ended.

Under the provisions of the Lanham Act, as amended, temporary war housing must be removed by January 1, 1951, unless the Administrator of the Housing and Home Finance Agency, in consultation with the community concerned, finds that the projects are needed for housing purposes for a longer period. In such cases, he may extend their use for yearly periods and must report such exceptions to Congress.

The Public Housing Administration has followed the policy of terminating and removing temporary projects wherever possible. The continuing housing shortage, however, has produced an urgent need in many localities for the continued use of temporary housing, thus preventing the removal of any substantial number of such projects from the workload. All available indications are that, as a result of this continued need, a high proportion of the temporary projects will continue to be required beyond January 1, 1951. These cases will have to be individually reviewed and evaluated prior to the statutory dead line.

The budget contemplates disposition and removal during 1950 of about 11 percent of the temporary dwelling units on hand as of June 30, 1949. Most of these units were then in a deprogrammed, or inactive, status. An additional 11 percent of the temporary units are scheduled for disposition and removal during 1951, including final liquidation of all dormitory and stop-gap accommodations.

Administrative expense.—The administrative expense requirements for this program are estimated at \$4,305,000 for 1950 and \$5,334,000 for 1951. This cost of administration, which is related to the size of the program and the budget plan of activity, is comparable to the expense experienced in 1949. The administrative expense funds are merged with the funds for administrative expenses of the several programs administered by the Public Housing Administration into a single fund. The details of the administrative expense requirements are covered in a separate budget.

FINANCIAL REVIEW

In summary the results of management and disposition operations for each of the three fiscal years are as follows:

	1949 actual	1950 estimate	1951 estimate
Net income from management operations	\$29,387,890	\$27,383,938	\$25,272,400
Net proceeds from disposition operations	22,375,723	23,277,800	45,203,100
Less: Total cost of property disposed of	-62,663,527	-84,146,000	-134,326,700
Net deficit (statement B)	10,899,914	33,484,262	63,851,200

The budget contemplates payments to the general fund of the Treasury amounting to \$55,838,276 in 1950 and \$55,345,600 in 1951. The net investment of the Federal Government at the end of 1951 is estimated at \$984,093,437.

The development cost of the emergency war housing program constructed by the Public Housing Administration, or received by transfer from other agencies, amounted to \$1,704,695,488. This expenditure produced

federally owned revenue-earning assets which, as of June 30, 1949, had earned about \$275,000,000 for the Government, exclusive of the write-off of asset values of projects disposed of. Net income from management operations and net proceeds from disposition of war housing are expected to increase this amount to \$396,000,000 at the end of 1951. Exclusive of the transfer of properties, valued at \$167,136,839 to other Federal agencies, this estimated net return represents 26 percent of the total development cost of the program under the jurisdiction of the Public Housing Administration.

It should be noted that there remained on the books as of June 30, 1949, properties having a cost value of \$1,149,236,713. Much of this property represents temporary housing which has a low salvage value, and accordingly there is no possibility of achieving full recapture of all development costs before the program is completely liquidated. However, the estimated return of 26 percent of invested capital as of June 30, 1951, will increase substantially as the remaining assets are liquidated.

Net return to Public Housing Administration from management and from properties transferred to local bodies.....	\$9,692,555	\$6,423,544	\$1,963,590

PURPOSE AND FINANCIAL ORGANIZATION

The veterans' re-use housing program was undertaken to alleviate the housing difficulties of servicemen, veterans and their families, including veterans attending educational institutions, by the relocation and re-use of surplus Federal structures as temporary housing. The program is conducted under authority of title V of the Lanham Act as amended, and approximately \$445.7 million was allotted to the Public Housing Administration for development purposes. Funds derived from the operation of the projects are available for expenses of operation and maintenance, for disposition and removal of the projects, and for administrative expenses. Unobligated balances of operating funds are deposited quarterly to the Treasury (60 Stat. 9).

ANALYSIS OF BUDGET PROGRAMS

Development.—Construction is completed and all that remains in this activity is the final settlement of contractors' claims anticipated to be completed during 1950 involving an expenditure of \$1,418,779.

Management.—Housing projects are managed by the participating local bodies. Public Housing Administration management functions are only of an advisory nature. Federally financed projects, which provide for return of net operating income to the Government, require annual audits to ascertain compliance with the contracts. Projects developed by local bodies without Federal funds return no income to the Government.

The average number of federally financed units and per unit per month net return, by type of accommodation, for 1949, 1950, and 1951 are shown as follows:

AVERAGE NUMBER OF UNITS AND NET RETURN PER UNIT PER MONTH

Type of accommodation	1949 actual ¹		1950 estimate		1951 estimate	
	Average units	Net return	Average units	Net return	Average units	Net return
Family dwellings.....	82,965	\$8.84	60,620	\$8.57	22,871	\$6.74
Dormitories.....	3,248	.93	2,671	.89	1,946	.71
Trailers.....	3,099	2.35	2,229	2.29	496	1.79

¹ Represents per unit per month net return for fiscal year 1949 on federally financed projects remaining in the program on June 30, 1949.

PUBLIC HOUSING ADMINISTRATION—Continued**VETERANS' RE-USE HOUSING PROGRAM—Continued**

The federally financed units are distinguished from the total units in the program presented in the Program Highlights. The net return, for accounting purposes, is reflected as net return from disposition in the financial statements.

The anticipated reduction in the net return per unit per month for 1950 and 1951 is due to: (1) the temporary type of construction which will result in increased operating and maintenance costs each year, and (2) the anticipated transfers, which will result from the proviso in the Independent Offices Appropriation Act, 1950, authorizing sponsoring local public bodies to acquire full ownership of projects on land which they own or control, as it is expected that applications by local bodies for transfers will be made generally for the better projects. Operations indicate estimated net returns as follows:

NET RETURN TO PUBLIC HOUSING ADMINISTRATION

	Fiscal years—		
	1949	1950	1951
Management: Net operating income (statement B).....	\$78,473	\$98,214	\$98,430
Disposition: Net return from properties transferred to local bodies (statement B).....	9,614,082	6,325,330	1,870,160
Net return to Public Housing Administration.....	9,692,555	6,423,544	1,968,590

The substantial decrease in total estimated earnings in 1951 is attributable to the anticipated transfers to local public bodies which are expected to cause a 72-percent reduction in the number of units from which net return is made to the Public Housing Administration.

Disposition.—The McGregor Act (62 Stat. 1062) authorized colleges and universities operating veterans' projects on lands owned or controlled by them to acquire complete ownership and control without monetary consideration, and during 1949 transfers were made for 89,706 federally financed and 35,278 nonfederally financed accommodations.

The Independent Offices Appropriation Act, 1950, permits transfers to local public bodies under similar conditions. On June 30, 1949, 71,674 federally financed and 13,595 nonfederally financed accommodations were eligible for transfer. It is expected that by September 30, 1950, transfers will be made for 64,500 federally financed accommodations and 12,240 nonfederally financed accommodations. The estimate assumes that units remaining in the program after completion of transfers will be in areas of critical housing shortages and that on annual examination, in accordance with the provisions of section 313 of the Lanham Act, the Administrator of the Housing and Home Finance Agency, after consultation with the

local communities involved, will find that continued operation of this housing is needed.

Administrative expenses.—The administrative expense requirements for this program are estimated at \$843,050 for 1950 and \$265,000 for 1951. This cost of administration, which is related to the size of the program and the budget plan of activity, is comparable to the expense experienced in 1949. The administrative expense funds are merged with the funds for administrative expenses of the several programs administered by the Public Housing Administration into a single fund. The details of the administrative expense requirements are covered in a separate budget.

FINANCIAL REVIEW

As of June 30, 1949, development appropriations totaled \$445,751,035, including \$3,928,813 of unexpended funds. Final expenditures in 1950 are expected to be \$1,633,844, and \$2,394,969 of unexpended funds will be returned to the Treasury so that final direct development expenditures for the program will total \$443,356,066. In addition, assets transferred from other Government agencies will bring the total investment of the Government to re-use surplus housing for veterans' needs to \$451,198,806. Ownership to all but \$15,369,435 of the investment of the Government will have been transferred to the local sponsoring bodies by June 30, 1950.

The cumulative return to Public Housing Administration of earnings in excess of operating costs by the local sponsoring bodies and net operating income amounted to \$30,886,252 on June 30, 1949. Operations during 1950 and 1951 are expected to bring this amount to \$39,278,386 as follows:

ESTIMATED CUMULATIVE NET RETURN TO PUBLIC HOUSING ADMINISTRATION

	Actual cumulative as of June 30, 1949	1950 estimate	1951 estimate	Estimated cumulative as of June 30, 1951
Net operating income.....	\$721,299	\$98,214	\$98,430	\$917,943
Net return from properties transferred to local bodies.....	30,164,953	6,325,330	1,870,160	38,360,443
Total.....	30,886,252	6,423,544	1,968,590	39,278,386

After 1951, because of the reduction in the total program (approximately 82 percent) primarily due to transfers effected under Public Law 796, Eightieth Congress, approved June 28, 1948, and the expected transfers under the proviso in the Independent Offices Appropriation Act, 1950, the net income from properties transferred to local bodies will no longer be a significant factor. The deficit shown for this program is due to the difference between the cost of the property transferred to local bodies and the net income derived from the operation by local bodies of the projects. During 1951, deposits to the general fund of the Treasury will amount to \$6,158,860, bringing cumulative deposits to the general fund of the Treasury as of June 30, 1951, to \$33,011,737.

¹ Checking account expenditures include payments to the general fund of the Treasury as follows: 1949, \$13,033,057; 1950, \$9,085,693; 1951, \$6,158,860.

NOTE.—Public Law 266 authorized the Public Housing Administration to convert from an appropriation to a checking account basis. Effect has been given to "1949 actual" on a checking account basis in order that the 3 fiscal years may be shown on a comparable basis. The gross elements of expenditures and receipts are shown to correspond with Treasury published statements.

PURPOSE AND FINANCIAL ORGANIZATION

The homes conversion program, budgeted for complete liquidation by the end of 1951, originated under the provisions of the Lanham Act (42 U. S. C. 1521). Its purpose was to provide needed living accommodations for in-migrant war workers and their families in those critical production areas where other housing was not readily available, by leasing existing structures and remodeling them to provide additional dwelling units.

Development operations were started by the Home Owners' Loan Corporation in calendar year 1942 and consisted of negotiating leases on suitable structures and remodeling them into apartments. The leases generally were for 7 years, with the right on the part of the Government to cancel on 30 days' notice. The initial conversion was financed entirely from appropriated funds and the whole amount capitalized. A total of 8,842 leaseholds with 49,565 dwelling units were provided at a total cost of \$90,119,907, excluding \$193,965 of assets transferred from other programs.

Development activities were largely completed prior to the transfer of this program to the Public Housing Administration. Management responsibilities were transferred to the Public Housing Administration on August 1, 1944, and on January 1, 1945, responsibility for completion of the residual development activity was transferred.

The homes conversion program was instrumental in inducing war workers into critical manufacturing areas and the dwelling units were later used to house returning veterans and their families. In most cases, they now continue as an addition to the supply of moderate rental units in the permanent housing market.

Section 303 of the act authorizes the use of operating income for property operations, disposition, and administrative costs. Operating income is adequate to meet these expenses and permit a substantial return to the United States Treasury.

ANALYSIS OF BUDGET PROGRAMS

Management.—Properties in this program are managed by some 350 real estate management brokers who operate and maintain the properties and collect the rents from which they pay operating and maintenance costs and retain a commission stipulated by contract. The net revenue is remitted to the Public Housing Administration and payments for rentals, taxes and insurance are made directly by the Administration. The income, expense, and net return to the Government from operations is projected during 1950 and 1951 at the level experienced during 1949 for the average unit for each month of operations. The

total income and expense of program operations decrease substantially due to the decreasing size of the program occasioned by the anticipated complete liquidation of the Government's interest by June 30, 1951. The operating income and expense experienced in 1949 for the average unit per month were:

Operating income per unit per month.....	\$42.12
Operating expense per unit per month.....	33.64
Net income before depreciation, losses, and charge offs, per unit month.....	8.48

Disposition.—As of June 30, 1949, 64 percent of the 8,842 leaseholds, consisting of 49,565 dwelling units, originally held by the Government had been canceled, yielding a total of \$8,727,000. This substantial progress in liquidating the Government's interest in the program resulted from a program of negotiating leasehold terminations with the property owners whenever satisfactory settlement could be obtained. Due to budgetary restrictions in 1950 this acceleration had to be substantially curtailed. The leaseholds were generally for periods of 7 years and this period will expire on some of the present leaseholds in November 1949 and additional leaseholds will expire each month thereafter, which together with 120 prior cancellations will terminate 1,144 leaseholds in 1950, and 1,964 in 1951, leaving 68 leaseholds unexpired as of June 30, 1951. The budget program provides for negotiating terminations of these leases prior to the end of 1951 in order that liquidation of the entire program can be accomplished in this budget period. The terms of the lease provide for restoration, and redecoration of the properties at the time the lease expires. Since the agency has had limited experience with this problem, it is difficult to anticipate the extent to which the Government will be subjected to claims for compliance with these terms and the cost which will be incurred. The budget assumes that claims will be made on 100 units in 1950, and on 200 units in 1951 in amounts of \$10,000 and \$20,000, respectively.

Administrative expenses.—Administrative expense requirements for this program are estimated at \$460,000 for 1950 and \$393,000 for 1951, and are related to the size of the program and the budget plan of activity. The administrative expense funds are merged with the funds for administrative expenses of the several programs administered by the Public Housing Administration into a single fund. The details of the administrative expense requirements are covered in a separate budget.

FINANCIAL REVIEW

The original investment of the Government was \$90.3 million, and this amount has been reduced yearly by net operating income, amortization, and charge-offs, and will be completely liquidated at the close of 1951.

The result of the program operations (before amortization, depreciation, losses, and charge-offs) is as follows:

	Cumulative to June 30, 1949	Fiscal year 1950	Fiscal year 1951	Total June 30, 1951
Management operations:				
Gross income.....	\$105,911,615	\$9,946,813	\$3,121,500	\$118,979,928
Operating expenses.....	83,460,630	8,271,400	2,612,300	94,344,330
Net income.....	22,450,985	1,675,413	509,200	24,635,598
Disposition operations:				
Proceeds.....	8,726,721	175,000	170,000	9,071,721
Expenses.....	1,324,690	193,000	330,200	1,847,890
Net income.....	7,402,031	(18,000)	(160,200)	7,223,831
Entire program: Net income.....	29,853,016	1,657,413	349,000	31,859,429

Payments to the general fund of the Treasury for 1951 are estimated to be \$496,596.

PROGRAM AND PERFORMANCE

The funds in this account, derived from the rental or operation of housing property, and also from the disposition or removal of such property represented by the return of net proceeds by local bodies to Public Housing Administration, are made available by the act of October 14, 1940, for expenses of operation and maintenance and of disposition or removal, including necessary administrative expenses. The unobligated balances of these funds at the close of the fiscal year are covered into miscellaneous receipts (60 Stat. 9).

The Independent Offices Appropriation Act, 1950 (Public Law 266) authorizes the Public Housing Administration to change its accounting system from an appropriation account to a checking account system. Pursuant to this authority the entire balance of unexpended funds will be transferred to a checking account in 1950.

Trust account:

Liquidation of Deposits, Reserve for Maintenance and Repairs, Lease and Purchase Agreements, Public Housing Administration—

FUNDS AVAILABLE FOR OBLIGATION: Prior year balance available—1949, \$6.

PROGRAM AND PERFORMANCE

The funds in this trust account are obtained by the deposit of payments made by occupants of subsistence homestead dwelling units under a sales agreement. The funds are to insure the proper maintenance of the properties during the unexpired term of the sales contract. Upon cancellation of a sales contract, the deposits previously made are returned to the depositor.

The Independent Offices Appropriation Act, 1950 (Public Law 266) authorizes the Public Housing Administration to change its accounting system from an appropriation account to a checking account system. Pursuant to this authority, the entire balance of unexpended funds will be transferred to a checking account in 1950.

OBLIGATIONS BY ACTIVITIES

Disposition—1949, \$6.

Statement of proposed obligations for purchase and hire of passenger motor vehicles for the fiscal year 1951

HOUSING AND HOME FINANCE AGENCY

Appropriation	Motor vehicles to be purchased		Old vehicles to be exchanged		Net cost of vehicles to be purchased	Old vehicles still to be used	Cost of hire of motor vehicles	Public purpose and users
	Number	Gross cost	Number	Allowance (estimated)				
OFFICE OF THE ADMINISTRATOR								
Salaries and expenses, Office of Administrator, Housing and Home Finance Agency.	1	\$1,400	1	\$700	\$700	3		For substantially increased staff members on official business.

Salaries and expenses, Public Housing Administration, Housing and Home Finance Agency.	10	14,000	8	4,000	10,000	27		For use of officers and employees in the central and field offices in the transaction of official business.
Total, Housing and Home Finance Agency.	13	18,200	10	5,000	13,200	31		

PROPOSED LEGISLATION

The budget programs submitted for the Agency include the effect of legislative proposals which would continue activities presently authorized by the National Housing Act and would modify them to provide greater incentive for the production of housing in the lower-cost sales and lower-rental brackets. The Federal Housing Administration will realize additional net income of \$4,899,240 for 1950 and \$12,732,750 for 1951 from these activities.

The Agency budget programs and financial statements do not, however, take account of new activities provided for in legislation proposed as follows:

Cooperative housing for middle-income families.—Legislation is proposed to provide technical and financial assistance to cooperative and other nonprofit corporations to meet the housing needs of families of middle income. Appropriations of \$35 million and a public debt authorization of \$25 million for 1951 are tentatively estimated for this program.

Stand-by borrowing authority, Federal home-loan banks (mixed-ownership corporations).—Legislation is proposed for 1950 to provide stand-by borrowing authority from the Treasury of \$1 billion, and for accelerated retirement in the budget year of the Government's investment in the banks which, as of June 30, 1949, amounted to \$102,492,700.

Stand-by borrowing authority, Federal Savings and Loan Insurance Corporation.—Legislation is proposed for 1950 to provide stand-by borrowing authority from the Treasury of \$750 million and for the orderly retirement beginning in 1952 of the Government-owned capital stock of \$100 million.

Disposition program, Public Housing Administration.—Legislation is proposed to accelerate the disposition of emergency war housing. This would not materially affect net budgetary expenditures in 1951.

DEPARTMENT OF AGRICULTURE

PROGRAM AND PERFORMANCE

The Office of the Secretary is responsible for over-all planning and administration of the agencies which carry out programs and work assigned to the Department by the Congress. It provides leadership, direction, and coordination of the programs and is also responsible for proper organization of the Department, establishment of policies, and provision for services which are required on an over-all departmental basis.

In meeting these responsibilities, the Secretary, Under Secretary, and Assistant Secretary are assisted by the staff Offices of Personnel, Budget and Finance, Plant and Operations, and Hearing Examiners.

1. *General administration.*—The Secretary of Agriculture, the Under Secretary, the Assistant Secretary, and their staffs have responsibility for developing over-all policy to meet changing conditions and for interpreting and executing policies formulated by the Congress. This includes continuing direction of Department activities, leadership in development of programs to insure maximum efficiency and economy of departmental operations, coordination of activities within the Department and with related activities in other departments, participation in interdepartmental programs, leadership and participation in international organizations, and continued participation in world programs.

2. *Personnel administration and service.*—The Office of Personnel administers for the Secretary the personnel management activities of the Department. These activities include classification, job evaluation, salary and wage administration, recruitment, placement, retirement, separation, leave, safety, employee relations, training, organization, discipline, investigations, and health.

3. *Budgetary and financial administration and service.*—The Office of Budget and Finance serves as a staff agency of the Secretary in carrying out departmental functions relating to over-all administration of the budgetary, procurement, and fiscal affairs of the Department. It has responsibility for providing leadership and coordination of these activities throughout the Department, including the acquisition and distribution of funds; accounting; auditing; budgetary and financial reporting; budget, fiscal, and procurement organization and management; purchasing, warehousing, utilization, and disposal of administrative and operating supplies and equipment; and related activities. The Office also has responsibility for formulating and promulgating departmental policies and procedures relating to such functions, including the review and evaluation of program and legislative proposals for budgetary, financial, and related implications, and, in cooperation with staff and program agencies, for obtaining improvements in the management and operation of work programs administered by the Department.

4. *General operations.*—The Office of Plant and Operations is responsible for the housing of Department activities; communications and records management services and programs; technical and engineering advisory services pertaining to the acquisition, utilization, and maintenance of equipment involving the application of engineering principles; general coordination of technical operations in connection with aerial photographic, planimetric, topographic, cadastral, and mosaic mapping projects and liaison with the Department of Defense and the Bureau of the Budget on mapping and aerial survey operations; administrative and budgetary service functions for the Office of the Secretary; and certain departmental services in the District of Columbia, including telephone and telegraph, photographic, duplicating, addressing and mailing, central storage and distribution of supplies and forms, motor transport and service garage, and Department post office.

5. *Office of Hearing Examiners.*—The hearing examiners hold quasi-legislative hearings upon request of the administrative agencies of the Department and quasi-judicial hearings on disciplinary complaints filed by the Department against individuals, and on petitions filed by private parties asking relief from some action of the Department or its agencies.

Hearings are held under the Agricultural Marketing Agreement Act of 1937, the Packers and Stockyards Act, the Commodity Exchange Act, the Perishable Agricultural Commodities Act, the Sugar Act of 1948, and the Anti-Hog-Cholera Serum and Hog-Cholera Virus Act of 1935. The hearings are both rule making and adjudicatory.

PROGRAM AND PERFORMANCE

The Department of Agriculture Appropriation Act, 1944, established a working capital fund of \$400,000, without fiscal year limitation, for financing, on a reimbursable basis, central duplicating, photographic, tabulating, motor-transport, and supply services for the Department, and such other services as the Secretary, with the approval of the Director of the Bureau of the Budget, determines may be performed more advantageously as central services. Advances are made from this fund for operation of these services, pending reimbursement from applicable funds of bureaus and agencies at rates so computed as to make the services completely self-sustaining and maintain the integrity of the original fund. It is anticipated that the volume of work to be financed from this fund will continue for 1951 at about the same level as for 1950 (5 U. S. C. 542-1).

OBLIGATIONS BY ACTIVITIES

For financing, on a reimbursable basis, central duplicating, photographic, tabulating, motor-transport, supply and other services—1949, \$1,384,629; 1950, \$1,469,557; 1951, \$1,488,861.

PROGRAM AND PERFORMANCE

The Department of Agriculture assists the Department of State in carrying out the terms of the United States Information and Educational Act of 1948. At the request of the Department of State and with funds furnished by that Department, training and advice in fields such as agricultural collaboration, rubber development, and agricultural statistics and income are provided to suitable nationals of participating governments. This assistance is given in the United States and abroad.

PROGRAM AND PERFORMANCE

These funds are available for emergency loans to farmers and stockmen suffering production disasters in accordance with provisions of Public Law 38 (April 6, 1949). Upon determination by the Secretary of Agriculture that any area or region has suffered a production disaster causing a need for agricultural credit not readily available from commercial banks, cooperative lending agencies, or other responsible sources, loans are made for periods consistent with the borrowers' ability to repay at a 3-percent interest rate. Loans are also made at 3-percent interest to bona fide fur farmers unable to obtain necessary credit from other sources to enable them to carry on their present fur farming operations. Loans to fur farmers were first authorized in accordance with provisions of title II of Public Law 860 (June 30, 1948).

To September 15, 1949, the principal disaster-loan activity has been as follows: (1) In 5 Western States suffering heavy livestock losses resulting from the blizzards during the early months of 1949; (2) in the citrus areas of Texas and California occasioned by the freeze damage during the winter of 1948-49; (3) in the drought-stricken areas in the Northeastern States and Wisconsin; (4) in Kansas due to heavy rains and wet weather damage to the 1949 wheat crop; and (5) in Florida as a result of the hurricane which occurred during the month of August 1949. In all, disaster or fur loans have been made in 26 States.

From the effective date of the act (April 6, 1949) to October 31, 1949, there have been 1,872 production disaster loans amounting to \$5,217,718. Notwithstanding the recent initiation of this program, collections during the same period have been \$47,777 in principal and interest. In addition, during the same period, 84 loans were made to fur farmers aggregating \$770,106, with collections of \$18,527 in principal and interest.

Total obligations.....	13,561,528	19,175,000	19,290,000

PROGRAM AND PERFORMANCE

The Research and Marketing Act of 1946 provides for expansion of research and marketing services in which the Department of Agriculture, the State agricultural experiment stations, the cooperative State agricultural extension services, the State departments of agriculture and bureaus of markets, and other public and private agencies are cooperating in solving agricultural problems, with relatively more emphasis on more effective marketing of agricultural commodities.

The Secretary is required to establish a national advisory committee of 11 members, 6 of whom represent producers or their organizations, to consult with the Secretary and other appropriate officials of the Department concerning research and service work authorized by the act, and to assist in obtaining the cooperation of producers, farm organizations, industry groups, and Federal and State agencies. The act also provides for the establishment, by the Secretary, of appropriate committees including representatives of producers, industry, Government, and science, to assist in effectuating specific research and service programs. Committees have been established under this authority to advise the Department on the principal agricultural commodities and in functional or cross-commodity areas such as cold storage, foreign trade, and transportation.

1. *Payments to States for research at agricultural experiment stations.*—Grants are made to States for research into the basic laws and principles relating to agriculture in its broadest aspects by the State agricultural experiment stations. Seventy-two percent of the payments are made in accordance with a formula in the basic act which takes into consideration rural and farm population and the need for research in small States. These payments must be matched by State funds. Twenty-five percent is paid to the States for carrying on regional cooperative research projects involving two or more States working together on problems of common interest. Most of the research under this section is cooperative with research agencies of the Department. Three percent is made available to the Office of Experiment Stations, Department of Agriculture, for administration of research under this section. The regional cooperative research projects are recommended by a committee of nine persons elected

by and representing the State agricultural experiment stations, and are approved by the Secretary of Agriculture.

2. *Utilization research on agricultural commodities.*—Research under this section is aimed at developing new and expanded uses for agricultural products and is conducted by agencies of the Department and by public or private organizations or individuals under special contracting authority.

3. *Research other than utilization.*—All work undertaken by agencies of the Department with these funds is carried on in cooperation with State agricultural experiment stations or with agencies mutually agreeable to the Department of Agriculture and the experiment stations. The research is concerned primarily with production problems and regional marketing problems.

4. *Marketing research and services.*—This activity provides for research, service, and educational work in marketing. Funds are allotted directly to agencies of the Department for specified projects, or to State agencies on a matching-fund basis for carrying on projects under cooperative agreements, and are used under contract or cooperative agreements with public or private agencies, institutions, organizations, or individuals.

The proposed program for 1951 provides for continuation of these activities at the same level as in 1950.

APPROPRIATION TEXT

To enable the Secretary to carry into effect the provisions of the Act of August 14, 1946, as amended (7 U. S. C. 427, 427h-427j, 1621-1629), including in addition to the objects for which funds are available for such Act of August 14, 1946, and under title I of the Bankhead-Jones Act, as amended, personal services in the District of Columbia; over-all administration, planning, and coordination of research under section 10 pursuant to the provisions of section 10 (c); and necessary expenses for carrying out the provisions of title III of the Act, as follows:

For payments to States, Territories, and Puerto Rico for agricultural experiment stations pursuant to section 9 of the Bankhead-Jones Act approved June 29, 1935, as amended by the Act of August 14, 1946, \$5,000,000;

For research on utilization and associated problems pursuant to section 10 (a) of said Act, **[\$5,000,000]** \$5,117,000;

For cooperative research other than research on utilization of agricultural commodities and the products thereof, pursuant to section 10 (b) of said Act, **[\$3,000,000]** \$3,071,000;

For the improvement and development, independently or through cooperation among Federal and State agencies, and others, of a sound and efficient system for the distribution and marketing of

RESEARCH AND MARKETING ACT OF 1946—Con.**Research and Marketing Act of 1946, Department of Agriculture—Continued**

agricultural products pursuant to the "Agricultural Marketing Act of 1946" (title II of the Act of August 14, 1946), **[\$6,000,000]** \$6,102,000;

In all, **[\$19,000,000]**, of which not less than \$45,000 shall be available for work under Title II for the development of new and expanded market outlets for oilseeds, fats and oils and their products, and not less than \$180,000 shall be used under section 10 (a) for additional research on fats and oils, of which latter sum not less than \$45,000 may be used for contracts with public or private agencies as authorized by the said Act of August 14, 1946] **\$19,290,000**; *Provided*, That no part of this appropriation shall be used for beginning construction of any building costing in excess of \$15,000, *except that a poultry breeding house may be constructed at Purdue University at a cost to this appropriation of not to exceed \$29,000*; *Provided further*, That the Secretary may make available to any bureau, office, or agency of the Department such amounts from this appropriation as may be necessary to carry out the functions for which it is made (but amounts made available to the Office of the Secretary, Office of the Solicitor, and Office of Information shall not exceed those which the [Director of the] Bureau of the Budget, after a hearing thereon with representatives of the Department, shall determine), and any such amounts shall be in addition to amounts transferred or otherwise made available to other appropriation items of the Department: *Provided further*, That no part of this appropriation shall be available for work relating to fish or shellfish or any product thereof, except for the support of equitable transportation rates before Federal agencies concerned with such rates and for development of foreign markets. (*Department of Agriculture Appropriation Act, 1950.*)

PROGRAM AND PERFORMANCE

The Solicitor's Office, as the law office of the Department of Agriculture, performs all of the legal work arising from the activities of the Department. The Associate Solicitor on Litigation represents the Department in certain classes of cases before the United States circuit courts of appeals. Criminal cases arising in connection with the programs of the Department are reviewed for the purpose of referring

them to the Department of Justice. The Office of the Solicitor also represents the Department in administrative proceedings for the promulgation of rules having the force and effect of law, and in quasi-judicial hearings held in connection with the administration of various programs.

1. *Agricultural credit.*—Legal services are provided for the Farm Credit Administration, including coordination of the legal work of the banks and corporations comprising the cooperative farm credit system. Legal services are also provided for the Farmers Home Administration in connection with direct loans and insuring of loans by private lenders to farmers for the purchase, enlargement, or development of family-size farms, loans for farm operating expenses and for water facilities in 17 Western States and the disposition of any properties acquired as the result of these programs. Increased legal services will be required in the fiscal year 1951 in connection with the insured mortgage, farm ownership, and water facilities loans programs of the Farmers Home Administration and the farm housing program authorized by title V of the Housing Act of 1949.

2. *Commodity credit, production, and adjustment programs.*—Legal services are provided in connection with price support activities, disposal of agricultural surplus, national school-lunch program, agricultural conservation, farm-marketing quotas, crop insurance, Sugar Act programs, contract settlement, wartime facilities acquired and international trade and commodity agreements, including the international wheat agreement. The Solicitor serves as general counsel for both the Commodity Credit Corporation and the Federal Crop Insurance Corporation. Increased legal work will be required in the fiscal year 1951 relative to the marketing quota programs and the Federal Crop Insurance Corporation.

3. *Lands, forestry, research, and general legal services.*—Legal and abstracting services are provided in connection with the acquisition and exchange of forest lands, operation and management of the national forests, soil-conservation districts and other public lands, flood control, and agricultural research projects. General legal services for the Department such as drafting legislation, claims adjudication and litigation, prosecution of patents and patent appeals and interferences, land condemnation suits, trespass litigation as well as legal matters relating to personnel and general departmental administration are also provided. Increased legal activities will be required in the fiscal year 1951 in connection with the forest land acquisition program, claims, soil conservation, and flood-control programs.

4. *Marketing and regulatory laws.*—Legal services are provided in connection with the enforcement of the numerous animal and plant quarantine acts and the statutes relating to the marketing and distribution of agricultural commodities involving formal and informal rule making and adjudicatory administrative proceedings as well as litigation in the courts. The Solicitor represents the Secretary in proceedings before the Interstate Commerce Commission involving freight rates on farm commodities and in appeals from the decisions of the Commission to the courts. In 1951, additional legal work will be necessary relative to work on freight rates, marketing orders and agreements, and extension of mandatory posting and regulation of stockyards.

5. *Rural electrification and telephone programs.*—Legal services are provided in connection with the extensive rural electrification program, including review and approval of security documents supporting all loans made; review and approval of contracts for construction and

other purposes executed by federally financed electric cooperatives; and participation in litigation before State power regulating bodies and in the courts. In addition, legal services are provided in connection with the rural telephone loan program authorized by Public Law 423, Eighty-first Congress. Both the electrification and telephone programs will require additional legal work in the fiscal year 1951; funds for the latter will be requested in a supplemental appropriation.

PROGRAM AND PERFORMANCE

The Office exercises general supervision and coordination of information activities within the Department, involving publications, printed reports, exhibits, motion pictures, radio and television activities. A slightly increased program is proposed for 1951 to provide funds incident to the Department's marketing quota and farm housing programs, and for the printing of the Yearbook of Agriculture.

Publications reporting on the results of scientific research or conveying information which will aid American agriculture are distributed through Members of Congress, the Federal-State Cooperative Extension Service, and in response to direct requests. These publications consist of farmers' bulletins, leaflets, technical bulletins, reports, program aids, and periodicals. The Office edits the manuscripts for such publications, arranges for illustrations, determines distribution, and procures printing services. Distribution work entails control of inventory stocks of publications and response to nearly 900,000 inquiries a year.

General publications are compiled on agricultural developments and service is given to national publications and writers. The annual Yearbook of Agriculture, compiled and edited by the Office, is a complete treatise of available information on a subject of major importance. This Office edits also the annual report of the Secretary of Agriculture which analyzes agricultural trends and discusses major questions of agricultural policy. It supplies special articles and reports, as well as general background information on agriculture, frequently requested by national magazines, encyclopedic annuals, and trade publications.

Exhibits explaining new agricultural developments of major interest to farmers are supplied to some 35 large State and interstate fairs requesting this material each year. Technical assistance and production facilities are also extended to Department agencies for the preparation of small exhibits for limited use. In addition, the Office provides motion picture review and projection service for the Department and supervises distribution of films through 72 cooperating State film libraries for the use of Extension agents and Department field officers. Its studio and laboratory facilities produce color and sound

pictures requested and financed by Department agencies in disseminating research and program information.

The Department's activities require the editing and release of about 2,800 current releases, and crop, price, and market reports. Services to press associations, daily newspapers, and farm publications include a daily and weekly background letter to meet requests from farm paper editors, a weekly science digest for scientific editors and writers, and a weekly letter for women's page editors on current developments on food and home management. Radio is used to reach farmers through local radio farm program directors and extension editors, and to broadcast regular weekly programs on major networks, time for which is made available without cost to the Federal Government.

SALARIES AND EXPENSES

For necessary expenses in connection with the publication, indexing, illustration, and distribution of bulletins, documents, and reports, the preparation, distribution, and display of agricultural motion and sound pictures, and exhibits, and the coordination of informational work in the Department, **[\$1,248,728]** \$1,290,800, together with such amounts from other appropriations or authorizations as are provided in the schedules in the Budget for the current fiscal year for such expenses, which several amounts or portions thereof, as may be determined by the Secretary, not exceeding a total of **[\$15,505]** \$16,200 shall be transferred to and made a part of this appropriation, of which total appropriation amounts not exceeding those specified may be used for the purposes enumerated as follows: For personal services in the District of Columbia, **[\$544,130]** \$585,982; for preparation and display of exhibits, **[\$106,425]** \$109,959; and the preparation, distribution, and display of motion and sound pictures, **[\$57,600]** \$58,700; for farmers' bulletins, which shall be adapted to the interests of the people of the different sections of the country, an equal proportion of four-fifths of which shall be delivered to or sent out under the addressed franks furnished by the Senators, Representatives, and Delegates in Congress, as they shall direct (7 U. S. C. 417) and [for reprinting the 1948 Department of Agriculture Yearbook, "Grass", for the use of the Senate and the House of Representatives, respectively, in the ratio of one hundred and ten thousand to three hundred and sixty thousand copies (of which not to exceed \$156,674 shall be available for the yearbook reprint for such use), and including \$166,054 for the preparation, printing, and distribution of a homemakers' food and nutrition handbook, of which \$10,000 shall be transferred to the appropriation "Salaries and expenses, Human Nutrition and Home Economics, Agricultural Research Administration", for the preparation of such handbook, \$615,728: *Provided*, That four hundred thousand copies of the homemakers' food and nutrition handbook shall be for the use of the Department and the remainder shall be for the Senate and the House of Representatives, respectively, in the same ratio as farmers' bulletins] *not less than two hundred thirty thousand eight hundred and fifty copies for the use of the Senate and House of Representatives of part 2 of the annual report of the Secretary (known as the Yearbook of Agriculture), as authorized by section 73 of the Act of January 12, 1895 (44 U. S. C. 241), \$611,128: Provided further*, That if the total amounts of the appropriations or authorizations for the current fiscal year from which transfers to this appropriation are herein authorized shall at any time exceed or fall below the amounts estimated, respectively, therefor in the Budget for such year, the amounts transferred or to be transferred therefrom to this appropriation and the amount which may be expended for personal services in the District of Columbia shall be increased or decreased in such amounts as the [Director of the] Bureau of the Budget, after a hearing thereon with representatives of the Department, shall determine are appropriate to the requirements as changed by such reductions or increases in such appropriations or authorizations: *Provided further*, That when and to the extent that in the judgment of the Secretary agricultural exhibits and motion and sound pictures relating to the authorized programs of the various agencies of the Department can be more advantageously prepared, displayed, or distributed by the Office of Information, as the central agency of the Department therefor, additional funds not exceeding \$300,000 for these purposes may be transferred to and made a part of this appropriation, from the funds applicable, and shall be available for the objects specified herein, including personal services in the District of Columbia: *Provided further*, That in the preparation of motion pictures or exhibits by the Department, not exceeding a total of \$10,000 may be used for employment pursuant to the second sentence of section 706 (a) of the Department of Agriculture Organic Act of 1944 (5 U. S. C. 574), said Act being elsewhere herein referred to as the Organic Act of 1944, as amended by section 15 of the Act of August 2, 1946 (5 U. S. C. 55a): *Provided further*, That no part of this appropriation shall be used for the establishment or maintenance of regional or State field offices or for the compensation of employees in such offices except that not to exceed \$10,000 may be used to maintain the San Francisco radio office. (*Department of Agriculture Appropriation Act, 1950.*)

Annual definite appropriation:

Appropriated 1950, **\$1,248,728** Estimate 1951, **\$1,290,800**

* Includes \$15,535 for activities previously carried under "Salaries and expenses, farm housing, Department of Agriculture."

OFFICE OF INFORMATION—Continued

Allotment to Office of Information from "Research and Marketing Act of 1946, Department of Agriculture"

NOTE.—The following schedule covers obligations under an allotment from the appropriation "Research and Marketing Act of 1946, Department of Agriculture."

PROGRAM AND PERFORMANCE

The library procures and preserves all information concerning agriculture which can be obtained by means of books, periodicals, and other issues. Under a cooperative arrangement with the Library of Congress, the Department Library also serves as the National Agriculture Library. It collects current and historical published material and organizes it for maximum service to the Department and the public.

The library makes available to the research workers of the Department and the State agricultural colleges, as well as to the general public, through reference services, loans of publications, bibliographical services, and photo reproductions, the agricultural knowledge of the world that is contained in published literature.

There are six branch libraries with general collections serving the Department in designated geographical areas and seven specialized field branches serving major field research installations of the Department.

1. *Acquisition of publications and preparation for use.*—The library on June 30, 1949, had about 1,000,000 volumes on agriculture and related subjects to which will be added about 55,000 volumes in 1950 and about the same in 1951. In addition, the library receives annually about 350,000 separate issues of periodicals, many of which are later bound into volumes.

2. *Bibliographical services.*—These consist of comprehensive general and special lists of literature dealing with agricultural subjects. A general bibliography is issued monthly which during the fiscal year 1949, contained 82,269 references. Definitive subject bibliographies are prepared to meet special needs of the Department as they arise.

3. *Reference and circulation services.*—Inquiries are answered by mail, personal visits, and telephone and loans of books, periodicals, and other publications are made. During the fiscal year 1949, the library answered 202,246 reference questions and made 1,464,865 loans of books, and other publications, a total of 1,667,111 units. In the fiscal year 1949 a total of 13,400 volumes were bound; about the same number will be bound in 1950 and 1951.

During the fiscal year 1949 receipts from the sale of bibliographies and photographic reproductions of library materials amounted to \$47,216, and are estimated to amount to \$40,840 in 1950 and \$41,130 in 1951.

PROGRAM AND PERFORMANCE

The Bureau performs economic and statistical research on numerous aspects of American agriculture and maintains regularly recurring statistical series or estimates such as (1) farmers' cash receipts and expenditures; (2) gross and net farm income; (3) indexes of farm production and marketings; (4) estimates of per capita food consumption; (5) changes in land values and volume of sales; (6) farm tax rates and interest paid; (7) valuation of livestock and farm equipment; (8) costs and returns by types of farms; and (9) estimates of farm population, migration to and from farms, and county indexes of levels of living. The Bureau also carries on research studies and analyses, as indicated below, and performs a large volume of service work for other Department agencies, for congressional committees, other legislative bodies, and the public.

1. *Economics of production.*—These studies include research and statistical series relating to the ownership, valuation, financing, organization and operation of farms, and to the use of labor, equipment, land and water in their broader economic aspects. Research also is conducted to provide information that will aid farmers in making production decisions that will result in effective use of labor, land, and other resources in agriculture; production of farm commodities of various kinds in the quantities desired by the consuming public, and larger returns for farmers and their families.

The work covers research on (1) classification and analysis of farms by size and type of farming and the effect of these and other factors on farmers' costs and returns and on total farm output of different products; (2) efficiency of use of labor, equipment, land, and water; (3) inventory and analyses of the use of land resources; (4) the introduction of new and improved techniques, and their effects on differences in production opportunities and efficiency of farm production; and (5) farm valuation and debt, taxation, tenure, risk, insurance, and related problems affecting agricultural production and income. The program for 1951 provides for more adequate research on farm costs and returns from farming.

2. *Prices, income, and marketing.*—Statistical and economic analyses are made relating to the production, marketing, and consumption of agricultural products. These studies establish measures of income to farmers, the demand for agricultural products, parity prices, parity income, marketing charges, and analyze the economic situation and outlook for farm products.

Statistical data and interpretative analyses are made available to farmers through the Federal-State cooperative extension service and other agencies, and are available to Federal agencies for consideration in carrying out programs such as agricultural price supports, soil conser-

vation, and production adjustments. Data are published relating to transportation, processing, and marketing charges, with analysis as to factors affecting them, which show the relation of the prices consumers pay to prices farmers receive for their products and provide a better understanding of the significant factors in costs of distribution. The program for 1951 includes the preparation of estimates, by States, of gross farm income, farm production expenses, and net farm income.

3. *Farm population and manpower.*—These studies have to do primarily with farm people—how many there are, where they live, how many are in the farm work force, what their standards of living are, and the factors which underlie the success of farm programs. Statistical series are maintained which keep the country informed on the changes taking place in the agricultural economy with respect to farm population and the farm labor force. Analyses are made of the levels and standards of living of farm people, the difference between rural and urban levels, and ways in which agricultural activities and services may be improved.

4. *Farm housing and construction.*—Economic research is conducted, in carrying out title V of the Housing Act of 1949, on (1) national farm housing needs, (2) progress being made in meeting such needs, (3) methods of reducing the costs of financing the construction of farm houses and other farm buildings, (4) the size of investment in housing and other farm buildings which can be supported by farms of different sizes, types, and income potentialities, and (5) effects of farmers' circumstances and preferences with respect to types and quality of housing. The 1951 estimates include a nominal additional sum for research in this general field.

PROGRAM AND PERFORMANCE

The Bureau gathers basic current data needed to make the official estimates of production of crop and livestock products, covering prices, stocks, values, and many other types of information, including farm construction. Approximately 500 national reports are issued annually and special surveys are also made from time to time for the information of farmers, processors and marketers of agricultural products, and the consuming public.

An increased program is proposed for 1951 for (1) strengthening farm price work, including a survey of farmers' expenditures for production purposes in order to provide adequate statistical data for the construction of an improved prices paid, or "parity" index, and to assist

in strengthening farm income and expenditure estimates; and (2) for additional work in the field of farm housing.

Most of the sample data upon which estimates of production, stocks, utilization and prices are based are collected by mail through 41 State field offices, from voluntary crop, livestock, and price reporters, responding to questionnaires prepared in the Bureau. In addition, commercial marketings, shipments, volume processed or handled, and other commercial check data, as well as annual assessors' State farm census data in 12 States, are used in making agricultural estimates. Field statisticians make general observations of crops during the growing season, and maintain personal contacts with well-informed growers, livestock producers, and other "key" people who buy or handle farm products, or extend credit to farmers. In 36 States the crop and livestock work is carried on through cooperative arrangements with some State agency.

Through cooperation with the Post Office Department, rural mail carriers assist three times a year in distributing and collecting crop acreage and livestock schedules which are filled out by farmers. The various State data collected and summarized by the field offices are reviewed and assembled by the crop reporting board in Washington and prepared for national reports and releases. The data on crops and livestock provide basic information which all other department agencies use in their work in connection with parity prices, acreage allotments, crop insurance rates, and related subjects.

APPROPRIATION TEXT

Crop and livestock estimates: For collecting, compiling, abstracting, analyzing, summarizing, interpreting, and publishing data relating to agriculture, including crop and livestock estimates, acreage, yield, grades, staples of cotton, stocks, and value of farm crops and numbers, grades, and value of livestock and livestock products on farms, production, distribution, and consumption of turpentine and rosin pursuant to the Act of August 15, 1935 (5 U. S. C. 556b), and for the collection and publication of statistics of peanuts as provided by the Act approved June 24, 1936, as amended May 12, 1938 (7 U. S. C. 951-957), **[\$2,646,900]** and data on farm construction as provided by Title V of the Housing Act of 1949 (Public Law 171), **\$3,356,500**: Provided, That no part of the funds herein appropriated shall be available for any expense incident to ascertaining, collating, or publishing a report stating the intention of farmers as to the acreage to be planted in cotton, or for estimates of apple production for other than the commercial crop. (7 U. S. C. 411a, 411b, 475-476; Department of Agriculture Appropriation Act, 1950.)

Appropriated 1950, \$2,646,900 Estimate 1951, " \$3,356,500

* Includes \$185,000 for activities previously carried under "Salaries and expenses, farm housing, Department of Agriculture." The amount obligated in 1950 is shown in the schedule as a comparative transfer.

Allotment to Bureau of Agricultural Economics from "Administrative expenses, section 392, Agricultural Adjustment Act of 1938"

NOTE.—The following schedule covers obligations under an allotment from the appropriation "Administrative expenses, section 392, Agricultural Adjustment Act of 1938," which is shown under Production and Marketing Administration.

PROGRAM AND PERFORMANCE

This Office collects, interprets, and disseminates economic data and other information on foreign production and consumption of farm products. Information obtained is used to advise American farmers and business organizations handling farm products of important developments abroad that affect their interests, and to provide Congress, other agencies of Government, and United States representatives at international conferences with information helpful in determining questions of policy concerning agricultural affairs of the Nation.

Economic fact-finding and fact-interpreting activities of the Office relate to (1) commodities of interest to American agriculture wherever found in the world, and (2) the agricultural situation generally within a specific country. Through systematic, regular, and special reports from agricultural attachés at posts abroad and from specialists on assignment in other countries, and also by exchange of information with foreign governments and with international agricultural organizations, the Office obtains current facts on crop and livestock production and marketing developments abroad, foreign price trends, stocks, imports and exports, consumer purchasing power, and such other developments as economic policies and programs of foreign governments.

Increased efforts are planned for 1951 to deal with the growing complexity of international relations as agricultural commodities scarce in recent years come into plentiful supply and as new financial and trade policies affect commerce between nations.

OBLIGATIONS BY ACTIVITIES

Description	1949 actual	1950 estimate	1951 estimate
<i>Direct Obligations</i>			
1. Foreign agricultural production and consumption and its effect on United States agriculture	\$248,100	\$242,200	\$246,600

PROGRAM AND PERFORMANCE

Payments are made to States to finance a Nation-wide educational system of cooperative extension work in agriculture and home economics for improving the economic welfare, nutrition, and health, and family and community life of people by helping them to help them-

selves. Efforts increasing the technical knowledge of rural people for more efficient farms, better homes, and higher standards of living is the basic aim of extension work. Under the several authorizing acts, funds appropriated are distributed to each State, Alaska, Puerto Rico, and Hawaii, partly on the basis of prescribed amounts and partly on the basis of the rural population, the farm population, and, within limitations, as the Secretary may determine. It is a cooperative service, deriving its finances from four sources, comprised of Federal appropriations, 45 percent; State appropriations, 31 percent; county appropriations, 21 percent; and other local sources, 3 percent.

These funds are used within the States for the employment of county agents, home demonstration agents, 4-H Club agents, State specialists, and others, who make available to rural people in their localities, through demonstrations, farm and home visits, individual counseling, group meetings, farm tours, publications, visual aids, radio and other educational media, the results of agricultural and home economic research conducted by the Department, the State agricultural colleges, experiment stations, and other agencies. The work of the county agricultural agents constitutes the major activity under the program in most States, and includes such activities as increasing the productivity of the land; conserving soil, water, and forest resources, improving rotations of farm crops, and livestock breeding and management practices; economizing in the use of labor; and promoting better marketing plans and procedures for all farm products. Another major activity involves the 4-H Club work which includes the training of head, heart, hands, and health of rural young people through community clubs which now have 1,829,250 members. Home demonstration work involving food and nutrition, family economics, home management, clothing and textiles, parent and family life education, housing and house furnishings, and consumer education is also conducted with homemakers.

Increased appropriations recommended for 1951 will be devoted in large part to the furnishing of housing information, advice, and assistance for farm families, and in a smaller degree to additional payments to Alaska and Puerto Rico in accordance with legislation enacted by the first session of the Eighty-first Congress.

Not more than 2 percent of the appropriation for payments to States pursuant to section 23, title II, of the Bankhead-Jones Act is available for expenses of the Federal Extension Service. This amount is used for the same general purposes set forth under "Salaries and expenses, Extension Service."

APPROPRIATION TEXT

PAYMENTS TO STATES, HAWAII, ALASKA, AND PUERTO RICO

For payments to the States, Hawaii, Alaska, and Puerto Rico, for cooperative agricultural extension work as follows:

Capper-Ketcham, Bankhead-Jones, and related Acts: Capper-Ketcham Act, the Act approved May 22, 1928 (7 U. S. C. 343a, 343b), \$1,480,000; Bankhead-Jones Act, section 21, title II, of the Act approved June 29, 1935 (7 U. S. C. 343c), \$12,000,000; Bankhead-Jones Act, section 23, title II, of the Act approved June 29, 1935, as amended by the Act of June 6, 1945 (7 U. S. C. 343d-1), \$12,500,000; additional extension work, the Act approved April 24, 1939, as amended (7 U. S. C. 343c-1), \$555,000; Alaska, the Act approved February 23, 1929 (7 U. S. C. 386c), extending the benefits of the Smith-Lever Act to the Territory of Alaska, \$13,950, and [section 3 of the Act approved June 20, 1936 (7 U. S. C. 343e), extending the benefits of the Capper-Ketcham Act to the Territory of Alaska, \$10,000] the Act approved October 27, 1949 (Public Law 417), extending to the Territory of Alaska the benefits of the Capper-Ketcham Act and sections 21 and 23 of title II of the Bankhead-Jones Act, \$42,150; Puerto Rico, section 3 of the Act of March 4, 1931 (7 U. S. C. 336f), authorizing extension of the Capper-Ketcham Act to Puerto Rico, \$31,348, the Act approved August 28, 1937 (7 U. S. C. 343f-343g), extending the benefits of section 21 of the Bankhead-Jones Act to Puerto Rico, \$408,000, and the Act approved October 26, 1949 (Public Law 406), extending the benefits of section 23 of title II of the Bankhead-Jones Act to Puerto Rico, \$101,090; and section 506a of title V of the Housing Act of 1949 (Public Law 171), \$725,000; in all, [Capper-Ketcham, Bankhead-Jones, and related Acts,

\$26,966,950] Payments to States, Hawaii, Alaska, and Puerto Rico, \$27,856,538. (Department of Agriculture Appropriation Act, 1950.)

Appropriated 1950, \$26,966,950 Estimate 1951, * \$27,856,538

* Includes \$725,000 for activities previously carried under "Salaries and expenses, farm housing, Department of Agriculture." The amount obligated in 1950 is shown in the schedule as a comparative transfer.

PROGRAM AND PERFORMANCE

The Federal Extension Service provides leadership for a Nation-wide system of education for rural people in cooperation with extension agencies of the several States and Territories, exercised in an ever-widening range of subject matter and through progressive techniques of instruction. Through the educational service rendered, people are kept informed of the practical results of research work in agriculture and home economics conducted by the Department, the State agricultural colleges, experiment stations, and other agencies.

A slightly larger program is proposed for 1951 to furnish additional technical advice and assistance relating to farm housing and other farm buildings.

1. *General administration and business service.*—This item includes the development of programs, policies, procedures, and general business operations.

2. *Review and analysis of State budgets, projects and plans, and examination of State expenditures from Federal payments.*—State budgets, projects, and annual plans for extension work are reviewed and analyzed; Federal funds are allocated to the individual States; and State expenditures are examined for compliance with requirements of law.

3. *Planning and coordination of State and county extension work.*—The Service supervises activities carried on by the State and county extension forces, and coordinates educational activities of the several States as they relate to national or regional agricultural programs.

4. *Development of technical subject matter for use by State extension forces.*—Cooperative programs between the Extension Service and agencies of the Department are developed to provide State and county extension forces with results of research and information regarding national programs for agriculture. State extension services are aided by adapting subject matter in a broad range of agricultural technology to the needs of rural people.

EXTENSION SERVICE—Continued

Salaries and Expenses, Extension Service—Continued

Administration and coordination of extension work—Continued

5. *Field studies of extension work, and the training of extension workers.*—Teaching methods and procedures are evaluated in relation to objectives, and short periods of in-service training are conducted for the continuous improvement of extension personnel at all levels of organization.

6. *Preparation and distribution of visual material and extension literature to Department and State extension forces.*—Programs are developed for visual and information aids for educational use by State and county extension forces, including the distribution of slide films, movies, photographs, charts, publications, and other written materials.

7. *Program development and coordination of extension agricultural economics.*—States are assisted in developing and improving their educational programs on special problems in connection with agriculture and rural life, in incorporating economic research findings into State economics programs, and in developing regional or national economics analyses in teaching form.

SALARIES AND EXPENSES

Administration and coordination of extension work: For expenses necessary to administer the provisions of the Smith-Lever Act, approved May 8, 1914 (7 U. S. C. 341-348), and Acts amendatory or supplementary thereto, and to coordinate the extension work of the Department and the several States, Territories, and insular possessions, **[\$885,500] \$958,200**, of which not to exceed **[\$681,200] \$784,700** may be expended for personal services in the District of Columbia. (5 U. S. C. 511-512; Department of Agriculture Appropriation Act, 1950.)

Appropriated 1950, **\$885,500**

Estimate 1951, **\$958,200**

* Includes \$50,000 for activities previously carried under "Salaries and expenses, farm housing, Department of Agriculture." The amount obligated in 1950 is shown in the schedule as a comparative transfer.

Allotment to Extension Service from "Bankhead-Jones Act, section 23, title II (act of June 29, 1935), as amended by the act of June 6, 1945, Public Law 76"

NOTE.—The following schedule covers obligations under an allotment from the appropriation "Payments to States, Hawaii, Alaska, and Puerto Rico for cooperative agricultural extension work."

Cooperative Agricultural Extension Work—

FUNDS AVAILABLE FOR OBLIGATION: Appropriation or estimate—1949, \$4,704,710; 1950, \$4,704,710; 1951, \$4,704,710.

PROGRAM AND PERFORMANCE

Payments are made to the States to aid in diffusing among the people of the United States, and to encourage the application of, useful and practical information on subjects relating to agriculture and home economics. Cooperative extension work consists of the giving of instruction and practical demonstrations in agriculture and home economics to persons not attending or resident in the State colleges of agriculture. For a more complete description of this work see statement under "Payments to States, Hawaii, Alaska, and Puerto Rico for cooperative agricultural extension work."

Under the provisions of this act, \$10,000 is appropriated annually for payments to each State, Hawaii, and Puerto Rico; the remainder of the appropriation is distributed on the basis of rural population and matched by the receiving jurisdiction.

OBLIGATIONS BY ACTIVITIES

Payments for cooperative agricultural extension work—1949, \$4,704,710; 1950, \$4,704,710; 1951, \$4,704,710.

OBLIGATIONS BY OBJECTS

11 Grants, subsidies, and contributions—1949, \$4,704,710; 1950, \$4,704,710; 1951, \$4,704,710.

PROGRAM AND PERFORMANCE

This office coordinates all research activities (other than economic) of the Department, administers the Research and Marketing Act of 1946, and directs the Agricultural Research Administration, which includes seven research bureaus and the Agricultural Research Center, Beltsville, Md.

1. *Administration and over-all direction of the Agricultural Research Administration.*—The Agricultural Research Administrator plans, coordinates, and directs the research, control, and regulatory programs of the Agricultural Research Administration; administers, through the Office of Experiment Stations, the program of research grants to the State agricultural experiment stations; coordinates research activities of the Department; develops, in cooperation with directors of State and Territorial agricultural experiment stations, an integrated agricultural research program; advises other agencies of the Department and the Secretary regarding research plans and programs; and develops research to meet the needs of other Department programs.

2. *Supervision of maintenance, operation, and furnishing of facilities and services at the Agricultural Research Center.*—The Center is comprised of 12,000 acres of land and extensive facilities used for research conducted by agencies of the Department. It involves two types of operation: (1) Over-all supervision and general services, such as maintenance of buildings and roads and clearance of land, which are provided for by direct appropriation; and (2) special services for agencies conducting research at the Center and for which reimbursement is made. The 1951 program contemplates strengthening maintenance work and establishing information and guide services at the Center for visiting agricultural leaders, such as county agents, extension workers, and other groups representative of agricultural interests.

3. *Replacement of granary building and inventory destroyed by fire.*—In September 1949, a fire completely destroyed the granary warehouse and stores at the Center and caused extensive damage to the grinding and mixing mill, grain elevators, and processing and bagging equipment. An appropriation of \$150,000, provided by the Second Supplemental Appropriation Act, 1950, will permit the Department to meet the cost of replacing the structure, including architectural and other expenses.

APPROPRIATION TEXT

Salaries and expenses: For necessary expenses of the Office of Administrator, including [the salary of the Administrator at \$10,330 per annum, and] personal services in the District of Columbia, [and for] the purchase of one passenger motor vehicle, and the maintenance, operation, and furnishing of facilities and services at the Agricultural Research Center, [\$414,400] and not to exceed \$5,000 for extension of the solvents storage building, \$475,000: Provided, That the appropriation current at the time services are rendered may be reimbursed (by advance credits or reimbursements based on estimated or actual charges) from applicable appropriations, to cover the charges, including handling and other related services, for equipment rentals (including depreciation, maintenance, and repairs); for services, supplies, equipment, and materials furnished, stores of which may be maintained at the Center, and for building construction, alteration, and repair performed by the Center in carrying out the purposes of such applicable appropriations and the applicable appropriations may also be charged their proportionate share of the necessary general expenses of the Center not covered by this appropriation]: Provided further, That of the several appropriations of the Agricultural Research Administration, not to exceed \$15,000 shall be available for employment pursuant to the second sentence of section 706 (a) of the Organic Act of 1944 (5 U. S. C. 574), as amended by section 15 of the Act of August 2, 1946 (5 U. S. C. 55a): Provided further, That the several appropriations of the Agricultural Research Administration shall be available for the construction, alteration, and repair of buildings and improvements: Provided, however, That unless otherwise provided, the cost of constructing any one building (excepting headhouses connecting greenhouses) shall not exceed \$5,000, the total amount for construction of buildings costing more than \$2,500 each shall be within the limits of the estimates submitted and approved therefor, and the

cost of altering any one building during the fiscal year shall not exceed \$2,500 or 2 per centum of the cost of the building as certified by the Research Administrator, whichever is greater.

[BUILDINGS AND FACILITIES]

[For replacement of a granary building, equipment, and inventory at the Agricultural Research Center, including architectural and other costs in connection therewith, \$150,000.] (5 U. S. C. 511-512, 673; Second Supplemental Appropriation Act, 1950; Department of Agriculture Appropriation Act, 1950.)

Total obligations.....			1,500,000

PROGRAM AND PERFORMANCE

For efficient operation of the Center, the Agricultural Research Administration maintains a staff which performs work on a reimbursable basis for other units using facilities of the Center. Activities include a mechanical shop service for maintenance, construction, and repair of structures and equipment; farm operations for experimental and forage crops; procurement in wholesale quantities of basic grains and concentrates for processing livestock and poultry feed according to experimental and research formulas; operation of central heating plants; purchase of electric power delivered to substation and distributed over power lines maintained and owned by the Center; operation of wells, pumping stations, and pipe lines for water supply; furnishing janitor and guard service; operation of central switchboard and telephone service; operation of automotive repair shop and motor transport, construction equipment, and farm machinery pools; engineering service unit for making surveys, and

preparation of plans and specifications; and centralized purchasing of supplies, equipment, and services as requested by the bureaus of the Department.

The working capital fund which would be established in 1951 for more efficient financing of reimbursable operations and to simplify accounting work, would be utilized for services, supplies, equipment, and materials furnished bureaus pending receipt of reimbursement from appropriations of the bureaus properly chargeable with such expenditures. The integrity of the fund would be maintained at all times in the form of cash, inventory stocks on hand, or accounts receivable.

APPROPRIATION TEXT

Working capital fund, Agricultural Research Center: For the establishment of a working capital fund, to be available without fiscal year limitation, for expenses necessary for furnishing facilities and services by the Agricultural Research Center to Government agencies, \$400,000. Said fund shall be reimbursed from applicable appropriations or other funds to cover the charges for such facilities and services, including handling and related charges, for equipment rentals (including depreciation, maintenance, and repairs), for supplies, equipment and materials, stores of which may be maintained at the Center, and for building construction, alterations, and repair, and applicable appropriations or other funds may also be charged their proportionate share of the necessary general expenses of the Center not covered by the annual appropriation.

Total obligations.....	1,278,856	1,262,600	1,272,800

PROGRAM AND PERFORMANCE

Allotments by the Secretary to agencies of the Department provide (1) for the operation of special research laboratories and facilities in major agricultural regions of the United States, (2) for conduct of special research projects, and (3) for the administration of payments to States, Hawaii, Alaska, and Puerto Rico pursuant to title I of the Bankhead-Jones Act, for conduct of research at the State Agricultural Experiment Stations.

1. *Special research laboratories in major agricultural regions.*—Nine regional laboratories provide a joint Federal-State experiment station attack on problems of regional and national scope, at the locations and in the fields of work indicated below:

Charleston, S. C.: Selection and breeding of new and improved vegetable varieties and breeding stocks for the Southeast.

State College, Pa.: Pasture improvement research applicable in the Northeast.

Urbana, Ill.: Selection and breeding of improved soybean varieties and strains for industrial utilization, and development of disease resistance.

Ames, Iowa: Improvement of swine through the application of breeding methods.

Dubois, Idaho: Breeding of sheep for western ranges superior in hardiness, yield, and quality of wool and lambs produced.

Auburn, Ala.: Development of methods for controlling animal diseases and parasites for which practical measures have not as yet been devised.

East Lansing, Mich.: Research on viability in poultry; determining the causes of lymphomatosis in poultry and discovering techniques for prevention and control.

Riverside, Calif.: Basic salinity research on reactions of crop plants and the soil to differing concentrations of the various salt constituents, the amount of irrigation water which should be applied to soils to avoid harmful salt concentrations, and the trend of salinity conditions in areas where such problems exist.

Ithaca, N. Y.: Basic plant, soil, and nutrition research concerning the effects upon plant nutrition of various mineral elements and growth factors in the soil, and the effect of these elements and factors on animal and human nutrition.

2. *Special research projects.*—Special research projects are primarily studies basic to agriculture in its broadest aspects. The solution of many problems requires research of a basic or fundamental character before further progress can be made. Promising ideas are investigated and if the studies yield information justifying further research the Department then carries out with other funds the more applied research necessary to develop practical solutions. Examples of projects currently active are: factors causing shifts in poultry production between regions; effects of light on the regulation of growth and development of plants; crossbreeding investigations with dairy cattle; and relation of hormones to egg production in the hen.

3. *Administration of payments to States.*—Title I of the Bankhead-Jones Act makes available not to exceed 2 percent of the special research fund for administration of the payments to States authorized by the act. For a more detailed discussion see the Office of Experiment Stations.

AGRICULTURAL RESEARCH ADMINISTRATION— Continued

RESEARCH ON STRATEGIC AND CRITICAL AGRICULTURAL MATERIALS—Continued

Research on Strategic and Critical Agricultural Materials, Department of Agriculture—Continued

PROGRAM AND PERFORMANCE

The Strategic and Critical Materials Stock Piling Act authorizes and directs the Department to make scientific, technologic, and economic investigations of the feasibility of developing domestic sources of supplies of any agricultural material or substitutes for such materials determined by the Munitions Board to be strategic and critical. Proposed investigations are discussed with the Munitions Board before initiation, and work is undertaken only on recommendation of the Board.

1. *Research on domestic production of natural rubber.*—Rubber production investigations are carried on to test means of quickly and inexpensively establishing field stands of guayule, a rubber-producing shrub, the testing and hybridization of new strains to increase the yield of natural rubber, the development of the best methods of recovering rubber from the guayule plant, and the desiccation of such rubber to improve quality.

2. *Investigations of domestic production of vegetable tannins.*—These studies deal with the possible production in the United States of crops from which tannin materials can be derived. It is proposed to strengthen this work in 1951 in connection with studies on large-scale extraction of tannin from the canaigre plant, and other domestic sources.

3. *Investigations on vegetable oils.*—The work on strategic vegetable oils concerns improvements in the production of the castor-bean plant.

4. *Investigations on hard fiber plants for cordage.*—This work involves the domestic production of hard fibers, such as sansevieria, that can be used for lines and ropes on naval vessels. It is planned in 1951 to undertake studies on hemp seed storage and hemp production.

Total obligations.....	434,943	678,800	316,200

PROGRAM AND PERFORMANCE

This appropriation provides for the Federal share of research carried on jointly by the Federal Government and the Agricultural Experiment Station of the Territory of Alaska. A joint director coordinates and administers the two research programs to provide for a consolidated attack on problems and needs of Alaskan agriculture. Research work includes soil analysis, horticulture, animal husbandry, agricultural economics, agricultural engineering, and field crop improvement studies.

Basic soil-survey work has been confined to a small part of the Matanuska Valley. The 1951 estimates provide for extension of soil survey activities to the Tanana Valley. The work in agricultural economics has related to farm management studies but will be extended in 1951 to include marketing problems. In animal husbandry, progress is being made in dairy breeding, fur farming, and dairy cow management. Chemical and pathological services also will be undertaken in 1951. Plant breeding work on field crops will be intensified to introduce changes in many of the crop varieties now grown in Alaska.

Total obligations.....	7,406,020	7,406,208	7,416,208

PROGRAM AND PERFORMANCE

This appropriation is allotted to the State agricultural experiment stations of the land-grant colleges in each of the States, Hawaii, Alaska, and Puerto Rico to enable these stations to undertake agricultural research on the production, manufacture, preparation, use, distribution, and marketing of agricultural products, including such investigations and experiments as have for their purpose (1) the establishment and maintenance of a permanent and efficient agricultural industry, and (2) the development and improvement of the rural home and rural life.

The research programs of the individual State institutions are aimed largely at the solution of numerous local problems. The institutions retain a high degree of autonomy and the States are contributing about \$4 to each \$1 contributed by the Federal Government.

Under the Hatch, Adams, and Purnell Acts equal amounts (\$90,000) are distributed to each of the States and Territories with the exception of the Alaska station which received \$42,500 in 1950. Under title I of the Bankhead-Jones Act the funds appropriated are distributed primarily on the basis of relative rural population.

The additional funds recommended for 1951 will be used for plant pathology research in the Tanana Valley of Alaska.

OBLIGATIONS BY ACTIVITIES

Payments to agricultural experiment stations--1949, \$7,406,020; 1950, \$7,406,208; 1951, \$7,416,208.

APPROPRIATION TEXT

PAYMENTS TO STATES, HAWAII, ALASKA, AND PUERTO RICO

For payments to the States, Hawaii, Alaska, and Puerto Rico to be paid quarterly in advance, to carry into effect the provisions of the following Acts relating to agricultural experiment stations:

Hatch, Adams, Purnell, Bankhead-Jones, and related Acts: Hatch Act, the Act approved March 2, 1887 (7 U. S. C. 362, 363, 365, 368, 377-379), \$720,000; Adams Act, the Act approved March 16, 1906 (7 U. S. C. 369), \$720,000; Purnell Act, the Act approved February 24, 1925 (7 U. S. C. 361, 366, 370, 371, 373-376, 380, 382), \$2,880,000; Bankhead-Jones Act, title I of the Act approved June 29, 1935 (7 U. S. C. 427-427g), \$2,863,708; Hawaii, the Act approved May 16, 1928 (7 U. S. C. 386-386b), extending the benefits of certain Acts of Congress to the Territory of Hawaii, \$90,000; Alaska, the Act approved February 23, 1929 (7 U. S. C. 386c), extending the benefits of the Hatch Act to the Territory of Alaska, \$15,000, and the provisions of section 2 of the Act approved June 20, 1936 (7 U. S. C. 369a), extending the benefits of the Adams and Purnell Acts to the Territory of Alaska, [\$27,500] \$37,500; Puerto Rico, the Act approved March 4, 1931, as amended (7 U. S. C. 386d-386f), extending the benefits of certain Acts of Congress to Puerto Rico, \$90,000; in all, payments to States, Hawaii, Alaska, and Puerto Rico, [\$7,406,208] \$7,416,208. (7 U. S. C. 427d; Department of Agriculture Appropriation Act, 1950.)

Appropriated 1950, \$7,406,208 Estimate 1951, \$7,416,208

PROGRAM AND PERFORMANCE

The Office administers the payments to States for research in agriculture and rural life made available to

AGRICULTURAL RESEARCH ADMINISTRATION— Continued

OFFICE OF EXPERIMENT STATIONS—Continued

Salaries and Expenses, Experiment Stations, Agricultural Research Administration—Continued

Administration of grants and coordination of research with States—Continued

the experiment stations of the States, Hawaii, Alaska, and Puerto Rico.

In administering these Federal grants, the Office evaluates and approves new and revised research proposals, reviews and approves annual programs and budget allotments, and examines in the field the work and expenditures of each experiment station. It certifies each experiment station as to its eligibility to receive Federal-grant funds and prepares an annual report to Congress covering the work and expenditures of the agricultural experiment stations.

The Office participates in the planning and coordination of research among the State experiment stations and between the stations and the Department of Agriculture. General administrative direction and supervision of the Federal Experiment Station in Puerto Rico is also a responsibility of the Office.

SALARIES AND EXPENSES

Administration of grants and coordination of research with States: For necessary expenses, including not to exceed **[\$192,225] \$204,350** for personal services in the District of Columbia, to enforce the provisions of the Acts approved March 2, 1887, March 16, 1906, February 24, 1925, May 16, 1928, February 23, 1929, March 4, 1931, and June 20, 1936, and Acts amendatory thereto (7 U. S. C. 361-363, 365-383, 386-386f), relative to their administration and for the administration of an agricultural experiment station in Puerto Rico, **[\$231,850] \$238,450**; and the Secretary shall prescribe the form of the annual financial statement required under the above Acts, ascertain whether the expenditures are in accordance with their provisions, coordinate the research work of the State agricultural colleges and experiment stations in the lines authorized in said Acts with

research of the Department in similar lines, and make report thereon to Congress. (*Department of Agriculture Appropriation Act, 1950.*)

Appropriated 1950, \$231,850

PROGRAM AND PERFORMANCE

The investigations of this station, located at Mayaguez, deal primarily with tropical and subtropical crops of strategic or economic importance to the continental United States, although many of the research findings have application in Puerto Rico and other tropical areas. For example, cultural and breeding investigations are carried out on quinine and rotenone producing crops, numerous food crops including sweetpotatoes, tomatoes, mangoes, papayas and avocados, and on specialty crops such as vanilla, bamboo and various spices. Field trials are supplemented by laboratory experiments on chemical and physiological phases of the problems. The introduction, propagation and primary evaluation of promising tropical plant materials from all over the world is an important phase of the station program. Planting materials from the extensive collection maintained are widely disseminated for testing in other areas. Large numbers of superior rubber varieties, wild tropical cottons and other potentially valuable plant breeding materials are maintained for use in the research programs of other research agencies of the Department.

A small increase is requested for 1951 for necessary repairs and alterations to the physical research facilities at the station.

PROGRAM AND PERFORMANCE

This research involves all classes of farm livestock (except dairy cattle), poultry, and fur-bearing animals and is conducted at 10 Federal field stations and in cooperation with other Federal agencies, State agricultural experiment stations, State extension services, and others. The purpose of these investigations is to develop (1) superior strains and crossbred types of beef cattle; (2) strains of hogs with capacity for rapid growth and economy of gain, high fertility, and quality of carcass; (3) types of sheep that are most efficient in producing high quality meat and wool; (4) improved types of horses; and (5) strains of chickens and turkeys that excel in egg and meat production. Research is also conducted on the nutritive requirements of livestock to furnish a basis for improved rations, and on the efficient utilization of feed and forage in the production of meat, eggs, wool, fur, and other livestock products.

An increased program is proposed for 1951 to place the research program on a more effective operating basis including repairs, reconditioning and replacement of facilities and equipment at field stations.

On-the-farm problems of animal husbandry to which attention is directed include the following: (a) Improvement in breeding performance of both pure-bred stock and of grade stock used for market production; (b) increasing production and improving product quality through use of improved rations and adequate supplementation; (c) raising production levels through better management by development of more adequate equipment for housing livestock, by using methods of more efficient utilization and better conservation of range resources, and by using procedures which give better control of diseases and parasites; (d) improvement in quality of animal products through application of results from evaluation of differences in meat quality, eggs, fibers, etc., to support breeding and nutrition programs designed to improve quality of animals and poultry; and (e) application of known facts in

breeding and disease control and the collection of production data to assist breeders through the national poultry and turkey improvement plans which extend to more than 5,000 hatcheries.

PROGRAM AND PERFORMANCE

Research is conducted on infectious, noninfectious, and parasitic diseases of all farm livestock, poultry; and domestic fur animals through laboratory and field investigations in cooperation with State agricultural experiment stations and other governmental agencies.

The program is designed to develop practical methods of control of diseases by (1) development of rapid, specific, laboratory, and field tests for precise diagnosis of diseases, and for increasing the accuracy of tests now in use; (2) determination of the mode of transmission of external and internal parasites; (3) experimentation with chemicals, drugs, and vaccinal agents for prevention and control of diseases and parasites; and (4) the development of control measures by management procedures to prevent spread or perpetuation of diseases and parasites. Research is under way on such diseases as brucellosis and tuberculosis of livestock, mastitis of cattle, hog cholera, swine influenza, swine erysipelas, stock poisoning by plants, pullorum and Newcastle disease of poultry, fowl pox and the like. It also includes work on internal and external parasites of livestock and poultry such as worms, grubs, and sheep ticks.

An increase is proposed for 1951 primarily to place the research program on a more effective operating basis, including repairs, reconditioning, replacement and construction of buildings and facilities.

OBLIGATIONS BY ACTIVITIES

PROGRAM AND PERFORMANCE

To protect the livestock industry, including poultry, measures are devised to exclude from this country communicable diseases of foreign origin, to prevent the spread of diseases through interstate shipments of livestock and distribution of impure or impotent veterinary biologics, and to control and eradicate livestock diseases in the field. This work includes the certification of imported purebred animals for free entry, the inspection and certification of animals for export, and the inspection of vessels in which they are to be shipped, including accommodations, in order to assure their humane handling and safe transport. Administration of the 28-hour law involves measures designed to provide for humane handling of livestock in interstate commerce.

An increased program is proposed for 1951 to enable the Bureau to strengthen its inspection forces at seaports and airports, to provide facilities at ports of entry on the Canadian border, and to meet increasing demands for testing of commercially produced pullorum antigen to assure a standard product for combating pullorum disease of poultry.

The exclusion of communicable diseases of foreign origin, particularly such dangerous maladies as foot-and-mouth disease and rinderpest, not now existing in the United States, is accomplished through the inspection of imported animals at ports of entry, including quarantines when necessary, the proper disposition of prohibited garbage or meat on incoming ships or planes, and the supervision and control of the importation of animal products, including hides, skins, animal casings, glands, hay, straw, and related matter, which might harbor dangerous diseases.

Control and eradication of livestock diseases, such as tuberculosis, brucellosis, scabies of cattle and sheep, cattle fever ticks, and hog cholera are carried on in cooperation with State agencies. Indemnities are paid when reactors to the tests for tuberculosis and brucellosis are condemned, subject to certain legal and administrative restrictions.

The volume of inspections and examinations annually are shown in the following table:

Animal disease control and eradication: For the control and eradication, including inspections and quarantines, of tuberculosis and paratuberculosis of animals, avian tuberculosis, Bang's disease of cattle, scabies in sheep and cattle, southern cattle ticks, hog cholera and related swine diseases, and dourine in horses, and inspection and quarantine work; for supervision of the transportation of livestock, including administration of the twenty-eight-hour law; for inspection of vessels; and for carrying out the provisions of the Act of March 4, 1913 (21 U. S. C. 151-158), relating to veterinary biological products, \$8,104,000, including not to exceed \$40,000 for the acquisition of land and construction of four buildings for inspection of livestock at Canadian border ports of entry: Provided, That no payment hereunder as compensation for any cattle condemned for slaughter for tuberculosis, paratuberculosis, or Bang's disease shall exceed (1) \$25 for any grade animal or \$50 for any purebred animal, (2) one-third of the difference between the appraised value and the value of salvage thereof, or (3) the amount paid or to be paid by the State or other cooperating agency, and no payment hereunder shall be made for any animal if at the time of test or condemnation it shall belong to or be upon the premises of any person, firm, or corporation to which it has been sold, shipped, or

delivered for slaughter: Provided further, That inspection service shall be maintained at all stockyards having such service during the current fiscal year. (7 U. S. C. 396, 430; 21 U. S. C. 101-105, 114a, 131; 45 U. S. C. 71-74; 19 U. S. C. 1201.)

PROGRAM AND PERFORMANCE

Federal meat inspection is undertaken to assure clean and wholesome meat for human consumption. It includes (1) inspection of cattle, sheep, goats, swine, and horses prior to slaughter, and of their carcasses at the time of slaughter, to eliminate diseased or unfit meat; (2) inspection at all stages of preparation to assure sanitary handling of meat and meat food products; and (3) enforcement of measures that insure informative labeling. The meat inspection service also includes inspection of meats and meat food products offered for importation and certification of these products for exportation. Laboratory examinations are made of carcasses or parts in unusual cases and of ingredients or preservatives. Research is conducted on problems relating to meat inspection. Meat and meat food products are examined for compliance with specification requirements of other governmental purchasing agencies, for which reimbursements are received.

This appropriation is reimbursed by meat-packing establishments for the cost of overtime work performed at the request of such establishments. Amounts collected in this manner approximate \$2,000,000 annually.

The volume of inspections and examinations performed annually is indicated by the following table:

	NUMBER OF UNITS

Total obligations	459,780		

PROGRAM AND PERFORMANCE

The Agriculture Remount Service was discontinued at the end of fiscal year 1949 and its liquidation was completed December 31, 1949. The sum of \$50,000 was provided for this purpose in the Department of Agriculture Appropriation Act, 1950, under the subappropriation "Animal husbandry."

Originally established in 1921 within the War Department and generally known as the Army Remount Service, this horse-breeding program was transferred to the Department of Agriculture on July 1, 1948. Following the transfer, the activity was carried on at four breeding and stallion distribution stations in the field. The program was similar to that of the Department of the Army and was designed to improve the quality of light horses on ranches and farms of the country. Stallions of known producing ability were made available to volunteer agents in local communities who cared for the horses and used them for breeding to mares of private owners of the locality.

PROGRAM AND PERFORMANCE

The objective of this program is the maintenance of adequate supplies of hog-cholera virus and anti-hog-cholera serum for the protection of swine producers. The Secretary of Agriculture has entered into a marketing agreement with the manufacturers and other handlers of these products which provides for the maintenance of adequate stocks. A marketing order issued by the Secretary provides regulations to prevent undue and excessive fluctuations in price, unfair methods of competition, and unfair trade practices. A control agency representing the industry administers the program. The work conducted under this account includes reviewing the acts of the control agency, assembling data on production, sales, and prices, conducting investigations and the like.

Since the inception of this work, expenses of the Bureau have been financed by allotments from the appropriation made by section 12 (a) of the Agricultural Adjustment Act (7 U. S. C. 612).

PROGRAM AND PERFORMANCE

Foot-and-mouth disease is a highly contagious disease which affects ruminant animals and swine. Although the disease has entered the United States several times and continues to be a dire threat to the Nation's livestock industry, there has been no outbreak since 1929.

Following the discovery of foot-and-mouth disease in Mexico on December 26, 1946, protective measures in the United States, mainly for the patrol of the Mexican-United States border to prevent entry into this country of animals susceptible to foot-and-mouth disease or products or materials which might harbor the virus, were placed into effect or intensified, and a joint program for the control and eradication of the disease in Mexico was undertaken with that Government.

Due to the unpredictable course of the disease, the Department has been authorized to transfer from any funds available to the Department amounts necessary to finance the program. Repayments of these transfers have been made from supplemental appropriations approved by the Congress when the costs of the program have been determined. Continuation of this method of financing is proposed for 1951.

Current activities include:

1. *Cooperation with Mexico in control and eradication.*—This involves (a) quarantine restrictions to confine the area of the foot-and-mouth disease, (b) vaccine production and repeated vaccination of animals in the quarantined area to sustain resistance to the disease, (c) inspection to detect infected animals, (d) slaughter of infected animals

and those directly exposed, and (e) sanitary measures which include disinfection of trucks, cars, and other vehicles at centers of infection.

2. *Enforcement of Mexican border quarantine.*—Vigilant patrol is necessary along 1,900 miles of border to prevent importation of ruminants and swine from Mexico or entry of materials that might harbor the virus.

3. *Inspection at public stockyards and in the field.*—Increased inspection coverage provides means to detect immediately any possible introduction of foot-and-mouth disease into the United States.

4. *Short-term research.*—Study of foot-and-mouth disease has been undertaken in Europe, utilizing foreign laboratory facilities to acquire information for use in Mexico.

5. *Purchases and sales costs of Mexican canned meat and meat products.*—Mexico lost an export market for about 500,000 animals annually with the closing of the United States border. Resulting congestion of the animal population increased the hazards of contagion in Mexico. As a further defensive measure in the eradication program, the United States agreed to purchase Mexican meat produced in northern Mexico and canned under adequate inspection for disposal in foreign markets. It is contemplated that the scale of the meat-purchase program will be reduced in 1950.

APPROPRIATION TEXT

ERADICATION OF FOOT-AND-MOUTH AND OTHER CONTAGIOUS DISEASES OF ANIMALS

For expenses necessary, including personal services in the District of Columbia, in the arrest and eradication of foot-and-mouth disease, rinderpest, contagious pleuropneumonia, or other contagious or infectious diseases of animals, or European fowl pest and similar diseases in poultry, including the payment of claims growing out of past and future purchases and destruction of animals (including poultry) affected by or exposed to, or of materials contaminated by or exposed to, any such disease, wherever found and irrespective of ownership, under like or substantially similar circumstances, when such owner has complied with all lawful quarantine regulations; and for foot-and-mouth disease and rinderpest programs undertaken pursuant to the provisions of the Act of February 28, 1947 (21 U. S. C. Supp. [1] II, 114b-114d), and the Act of May 29, 1884, as amended (7 U. S. C., 391; 21 U. S. C., 111-122), including expenses in accordance with section 2 of said Act of February 28, 1947, the Secretary may transfer from other appropriations or funds available to the bureaus, corporations, or agencies of the Department such sums as he may deem necessary, to be available only in an emergency which threatens the livestock or poultry industry of the country, and any unexpended balances of funds transferred under this head in the next preceding fiscal year shall be merged with such transferred amounts: *Provided, That, except for payments made pursuant to said Act of February 28, 1947, the payment for such animals hereafter purchased may be made on appraisal based on the meat, egg-production, dairy, or breeding value, but in case of appraisal based on breeding value no appraisal of any such animal shall exceed three times its meat, egg-production, or dairy value, and, except in case of an extraordinary emergency, to be determined by the Secretary, the payment by the United States Government for any such animals shall not exceed one-half of any such appraisements: Provided further, That poultry may be appraised in groups when the basis for appraisal is the same for each bird. (21 U. S. C. 114a; Department of Agriculture Appropriation Act, 1950; Third Deficiency Appropriation Act, 1949.)*

PROGRAM AND PERFORMANCE

For the conduct of comprehensive research on foot-and-mouth disease, affecting ruminant animals and swine, the Congress has authorized the Secretary of Agriculture to establish adequate laboratory facilities, stipulating as a precautionary measure that they be located on a coastal island separated from the mainland by deep navigable waters (21 U. S. C. Supp. II, 113a). Control measures and preventive treatments for this dangerous disease would be investigated and studies made of its nature, cause, diagnosis, and course of infection.

The Second Deficiency Appropriation Act, 1949 (June 23, 1949), provided \$500,000 for preparing plans and specifications for the laboratory facilities and for acquiring an option on the site recommended. Total costs

would be limited to \$25,000,000. The act directed the Secretary to submit, with his estimate for construction of the facilities, detailed information concerning the proposed location and estimated costs. Plans and specifications are being prepared by the General Services Administration in cooperation with the Bureau of Animal Industry, and it is anticipated that construction estimates will be submitted to Congress late in the fiscal year 1950.

OBLIGATIONS BY ACTIVITIES

Preparation of plans and specifications for laboratory facilities—1950, \$500,000.

PROGRAM AND PERFORMANCE

Under authority of title II of the act of August 14, 1946 (7 U. S. C. 1622h), the Secretary provides inspection and certification of canned animal foods upon application by processing establishments. This service is financed by fees which are deposited in the Treasury in a special trust fund and which are made available for the payment of expenses incurred in performing services under cooperative agreements.

Inspection and certification, under this voluntary arrangement, extends to canned foods for dogs, cats, foxes, and similar animals. Canned animal foods are inspected to determine whether they are prepared under sanitary conditions from a combination of fit ingredients which contain the required elements in sufficient amounts to meet the nutritional requirements for which the product is certified. Certification is for a maintenance diet.

Comparative transfer from "Printing and binding, Department of Agriculture".....	27,099		
Total obligations.....	1,145,038	1,116,000	1,371,000

PROGRAM AND PERFORMANCE

The Bureau conducts research to improve the producing efficiency of dairy cows and the quality of dairy products, determine the nutritional requirements of dairy cattle and the nutritive value of feeds, and extend the use of milk and its byproducts in foods.

It also enforces Federal regulations relating to process butter and demonstrates dairy practices beneficial to specific regions of the United States, such as the irrigated regions of the Northwest, the Great Plains regions, the Coastal Plain region of the Atlantic seaboard, and the bluegrass region of Tennessee, Kentucky, Alabama, and Mississippi.

An increased program is proposed for 1951 chiefly to strengthen the research program including physical improvements at field stations and to construct housing facilities for dairy employees at the Agricultural Research Center at Beltsville, Md.

1. *Dairy cattle breeding, feeding, and management.*—Research is conducted to devise better methods of breeding, feeding, managing, testing, and judging dairy cows; to determine the relationship of conformation, internal anatomy, and mammary development to producing capacity; and to demonstrate the effectiveness of approved breeding practices in increasing milk-producing capacity by placing superior sires in herds of dairy farmers and in artificial breeding associations.

2. *Nutrition and physiology.*—Research is conducted to determine the nutritional value of milk and its relation to the nutrition of the dairy cow; the nutritional requirements for animals of various ages; the value of different feeds and feeding regimes; the physiological processes affecting the general economic usefulness of dairy cattle; and the relation of diet to these processes.

3. *Dairy herd improvement investigations.*—Continuous application of research results to farmers' herds is tested by analyzing production data pertaining to individual animals and families of animals maintained by dairy herd improvement associations. This is done in cooperation with State extension dairymen who work with 36,000 farmers in nearly 1,800 associations which supply records at their own expense on approximately 950,000 cows as to milk production, feed cost, and income realized.

4. *Dairy products research.*—Research is conducted in the manufacture of milk products and byproducts and

the effect of variations in processing methods on the chemical and physical properties of milk and milk products for food uses.

5. *Administration and enforcement of the Process Butter Act.*—Regulations are issued and enforced relating to the manufacture of process butter.

6. *Construction of housing facilities.*—Construction of housing facilities at Beltsville, Md., will serve dairy personnel required to work irregular hours of duty and for whom other housing is not readily available.

PROGRAM AND PERFORMANCE

Research is conducted on the principal farm crops, including cereal, cotton, forage, sugar, tobacco, and other field crops, which provide the major sources of the Nation's food, feed, fiber, and soil-improving crops. To increase efficiency and reduce costs of crop production, insure ample supplies of high-quality food and feed crops for an increasing population, and provide fibers and other raw materials produced on farms in the quantities and kinds needed by industry, the research is directed to (1) breeding, selecting, and testing to improve yield and quality of varieties, (2) developing control methods for crop diseases, weeds, and other hazards, and (3) devising cultural practices giving optimum crop yields and quality at minimum cost.

The investigations consist primarily of field, greenhouse, and laboratory experiments conducted in cooperation with State agricultural experiment stations, various Federal agencies, crop-improvement associations, and others. Because of the diverse crop, soil, climatic, and other problems, the work is conducted at 99 locations in 38 States. Results are made available to farmers and others through increase and distribution of the improved varieties, and by dissemination of information through the Federal-State cooperative extension service, publications, the agricultural press, and correspondence in reply to direct inquiries.

During the past year, improved varieties of corn and other cereals, cotton, forage, sugarcane, sugar beets, and tobacco were released for commercial production. Scientists were making progress with the use of hybrid vigor in crops. Further improvement in chemical treatments for the control of weeds and disease with reduced labor requirements was attained.

The 1951 program provides for placing the research program on a more effective operating basis, including necessary repairs and reconditioning of physical facilities at field stations.

Total obligations.....	2,614,688	2,413,580	2,649,950

PROGRAM AND PERFORMANCE

Research is conducted on (1) the production and improvement of fruit, vegetable, nut, and ornamental crops, (2) diseases and deterioration involved in handling, processing, transportation, and storage of fruits and vegetables, (3) the introduction and testing of new plant materials, and (4) the control of nematodes causing crop damage.

The objective of this research is to increase efficiency and reduce costs of crop production, and to insure ample food supplies of high quality for an increasing population. These objectives are sought by (1) breeding, selecting, and testing to improve yield, quality, and resistance to disease and climatic hazards, (2) developing more efficient production practices, including fertilization, cultivation, pruning, spraying, and harvesting, (3) developing and testing more effective and economical materials and methods for controlling diseases and nematodes, (4) devising the most efficient and economical methods of packing, shipping and storing fresh produce to prevent waste and to provide for its delivery in prime condition to the ultimate consumer, and (5) introducing new plants and strains from all parts of the world valuable as new crops or for breeding varieties superior to those now grown.

The investigations consist primarily of field, laboratory, greenhouse, and packing, transportation and storage experiments conducted in cooperation with State agricultural experiment stations, various Federal agencies, growers, shippers and others. Because of the diverse crops and wide range of climatic and soil conditions, the work is conducted at approximately 76 locations in 33 States and 1 foreign country.

The results of the work are made available to farmers and others through release of improved varieties and by dissemination of information through the Federal-State extension service, the agricultural press, publications, and correspondence in reply to direct inquiries. Progress during the past year has included the release of improved varieties, and the development of improved production practices and disease control methods.

For 1951 an increase is proposed primarily to restore research work curtailed because of higher operating costs, including necessary repairs and reconditioning of physical facilities at field stations.

PROGRAM AND PERFORMANCE

Research is conducted on diseases of trees and forest products through field surveys, tests, and laboratory investigations to determine means of reducing the tremendous annual losses from disease. The research consists primarily of (1) identifying forest diseases and determining their life cycles, and the alternate host plants, if any, (2) developing effective and economical disease control methods and management practices, (3) developing treatments which will prevent decay in lumber and wood products, (4) improving methods of inspection and grading to avoid deteriorated wood without needless rejection of valuable material, and (5) breeding, selecting, and testing tree varieties resistant to specific diseases. The work is conducted at 21 locations, mostly in cooperation with the Forest Service and other governmental bureaus and agencies, State agricultural experiment stations, municipalities, nurserymen, and others. Results of the work are made available through direct contact, the Federal-State extension service, publications, the press, and correspondence.

Progress during the past year includes (1) the development of better methods for rapidly propagating disease-resistant elm trees, (2) the development of methods for controlling fusiform rust in southern pines, (3) important advances in studying the cause of little-leaf disease of pine, and (4) initiation of investigations of the pole-blight disease of western white pine.

In 1951 it is proposed to place the research program at two field locations on a more effective operating basis and provide for necessary repairs and reconditioning of physical facilities.

PROGRAM AND PERFORMANCE

Research is conducted to improve and maintain productivity of the soils of the United States. The program is closely integrated with the soils work of State agricultural experiment stations and with the research of the Soil Conservation Service. There is also cooperation with other Federal agencies, including the Bureau of Reclamation and Tennessee Valley Authority. The results are made available to farmers and others through the Federal-State cooperative extension service, the Soil Conservation Service, and the agricultural conservation program of the Department, as well as publications, the agricultural press, and correspondence.

The program for 1951 contemplates placing the research on a more effective operating basis, including necessary repairs and reconditioning of physical facilities and provides for additional soil management investigations and facilities at the new Southwest Irrigation Field Station at Brawley, Calif. To liquidate a contract authorization in the sum of \$100,000 for the fiscal year 1950, it is anticipated that a supplemental estimate will be recommended to Congress late in that year.

1. *Soil improvement, management, and irrigation investigations.*—Studies of fertilization, liming, tillage, crop rotation, and other production practices are conducted at 39 field locations in dry-land, humid, and irrigated regions. The studies are supported by basic laboratory investigations into soil-plant relationships, including studies of tilth, moisture, fertility, and soil organisms.

2. *Fertilizers and their improvement.*—Research is conducted on the chemistry and processes of producing fertilizers, liming materials, and soil amendments to improve their properties, efficiency, and availability to plants. Farmers now use annually approximately 46,000,000 tons of these materials at a retail cost of around \$750,000,000.

3. *Soil classification for crop production.*—Surveys are made to classify soils in a national system, and soil maps and reports are published for use in recommending and applying soil and crop management practices on individual farms and for numerous land-use programs of Federal and State agencies. So far about half of the Nation's 3,070 counties have been reported in detail.

4. *Construction or acquisition of buildings, facilities, and equipment at new Southwest Irrigation Field Station, Brawley, Calif.*—Authority to establish this new field station was contained in the Department of Agriculture Appropriation Act, 1949, and subsequent acts. Eighty acres of land have been acquired and an adjoining 53-acre tract leased. Construction of buildings and facilities which will cost approximately \$300,000 is in progress and will be completed with 1951 funds.

PROGRAM AND PERFORMANCE

Agricultural engineering research undertakes to develop more efficient farming operations, reduce farm labor requirements, improve the condition and quality of farm products, and promote better farm living and working conditions. The investigations are usually conducted in cooperation with State agricultural experiment stations, various Federal agencies, commercial suppliers of services and equipment, and others.

1. *Farm machinery.*—Studies are made to improve farm machinery, equipment, and mechanical methods for planting, cultivating, fertilizing, and harvesting farm crops and for combating their insect pests and diseases.

2. *Farm structures and related investigations.*—Plans are developed for more effective barns and animal shelters, better structures for storing crops on the farm, and improved design of farm houses. It is proposed in 1951 to accelerate the development of plans and specifications for farm houses and buildings and to conduct research on methods of reducing costs of construction on the farm.

3. *Mechanical processing of farm products.*—Improved types of equipment and methods are developed for handling and processing products on the farm or at local cooperative processing plants.

4. *Farm electrification investigations.*—A slightly increased program is proposed in 1951 for strengthening the research in the development and adaptation of electrical equipment for farm use in order to decrease farm labor requirements, improve living standards, and improve the quality and quantity of farm products.

PROGRAM AND PERFORMANCE

The National Arboretum was established by Congress in 1927, and occupies a site in the District of Columbia. The extensive collection of living plants, from this country and abroad, provides not only valuable material for breeding with native species to develop improved strains of trees, shrubs, and flowers for parks, boulevards, and other landscape uses, but also for study by students and scientists.

Long-term development of the property was planned in cooperation with the National Arboretum Advisory Council, representing public and private organizations and institutions interested in botany, forestry, floriculture, and related fields. Basic landscaping has been undertaken, numerous plant materials have been added to the nurseries, and transplanting of collections to permanent locations on the grounds is in progress. In 1951 no new major construction is contemplated, and funds are provided primarily for operating and maintaining existing facilities.

BUREAU OF ENTOMOLOGY AND PLANT QUARANTINE

Salaries and Expenses, Entomology and Plant Quarantine, Agricultural Research Administration—

APPROPRIATION TEXT

SALARIES AND EXPENSES

For expenses necessary for investigations, experiments, demonstrations, and surveys for the promotion of economic entomology,

for investigating and ascertaining the best means of destroying insects and related pests injurious to agriculture, for importing useful and beneficial insects and bacterial, fungal, and other diseases of insects and related pests, for investigating and ascertaining the best means of destroying insects affecting man and animals, and the best ways of utilizing beneficial insects, for carrying into effect the provisions of the Plant Quarantine Act of August 20, 1912, as amended (7 U. S. C. 151-167), the Honey Bee Act (7 U. S. C. 281-283), the Insect Pest Act (7 U. S. C. 141-144), the Mexican Border Act (7 U. S. C. 149), and the Organic Act of 1944 (7 U. S. C. 147a), as amended, authorizing the eradication, control, and prevention of spread of injurious insects and plant pests; including the operation and maintenance of airplanes and the purchase of not to exceed [four] three, and not to exceed [\\$802,000] \$934,500 for personal services in the District of Columbia, as follows: (5 U. S. C. 511-512—establishing the Department of Agriculture; 563-564. The foregoing citations apply to all appropriation items under the Bureau which are not based upon specific legislative authority either incorporated in the language of the item or cited immediately thereunder; 7 U. S. C. 145-148a, 148c-e; 16 U. S. C. 581c; Public Res. 47, approved May 21, 1928; Public Res. 42, approved Feb. 8, 1930; Department of Agriculture Appropriation Act, 1950.)

PROGRAM AND PERFORMANCE

Scientific investigations are made of insects for control of those which are injurious, for utilization of those which are beneficial, and for better management of those (such as the honey bee) which produce useful products. Insecticides are also studied and new products developed and tested. Laboratory and field work is carried on in practically every State and Territory, in Panama, and in certain foreign countries. Most activities are in cooperation with State colleges, agricultural experiment stations, other agencies of the Federal Government, associations, growers, livestock owners, and beekeepers.

An increased program is proposed in 1951 to strengthen research activities at selected locations, to intensify work on insects affecting man and animals, and to adjust the compensation of certain professional personnel by reallocating positions.

The availability of new insecticidal materials such as DDT, benzene hexachloride, toxaphene, and chlordane, and formulations based on these and other materials means that farmers require information on appropriate uses, safety, time and method of application, and dosage. Aerosols and other methods for applying the small quantities required of these powerful insecticides for use

indoors, as well as on crops and forests, have been developed. Some of these methods have made possible the control of such insect defoliators as tussock moth, gypsy moth, and budworm. A method has been developed for synthesizing compounds similar in chemical structure and insecticidal properties to the natural pyrethrins. Effectiveness of the synthetic compounds against many species of insects and their safety to warm-blooded animals are being studied.

Results of bee-breeding and management investigations are being applied by beekeepers to markedly increase honey production and pollination of crops.

OBLIGATIONS BY ACTIVITIES

Description	1949 actual	1950 estimate	1951 estimate

PROGRAM AND PERFORMANCE

Thirteen programs designed to protect agriculture from destructive insects and plant diseases are carried on in cooperation with appropriate governmental agencies, local communities and individuals. One concerns eradication of Hall scale, an introduced insect known to occur in two small areas in California. Another involves cooperation with Mexico in the control of citrus blackfly to reduce the hazard in order that it may not enter the United States. Activities on the Mexican fruitfly, Japanese beetle, white-fringed beetle, pink bollworm, and *Thurberia* weevil deal

with insects which occur in limited areas and are designed to prevent their spread into uninfested sections. Work on peach mosaic, phony peach, and black stem rust (barberry eradication) protects important crops from destructive diseases and prevents dissemination into new areas. Another program combats infestations of sweetpotato weevil in areas where most of the Nation's sweetpotatoes are grown. Control of the golden nematode prevents the spread of this potential threat to potato production from a limited, infested area on Long Island, N. Y.

Transit inspection of plants and plant materials at important transportation centers provides a second line of defense in the enforcement of plant quarantine regulations needed to prevent spread of the foregoing and other destructive plant pests.

Activities in connection with these programs include inspections to detect and appraise infestations, inspections to determine if regulated articles are free of pests, certification of those which can be safely moved into uninfested areas, supervision of treatments that are required by plant quarantines, the applications of pesticides, and other methods of combating infestations.

APPROPRIATION TEXT

Insect and plant-disease control: For carrying out operations or measures to eradicate, suppress, control, or to prevent or retard the

spread of Japanese beetle, sweetpotato weevil, Mexican fruitflies, phony peach and peach mosaic, cereal rusts, pink bollworm and *Thurberia weevil*, [and the] golden nematode, *citrus blackfly*, *white-fringed beetle*, and the *Hall scale*, including the enforcement of quarantine regulations and cooperation with States to enforce plant quarantines as authorized by the Plant Quarantine Act of August 20, 1912, as amended (7 U. S. C. 151-167), and including the establishment of such cotton-free areas as may be necessary to stamp out any infestation of the pink bollworm as authorized by the Act of February 8, 1930 (46 Stat. 67), and for cooperation with States in the compensation of growers for losses resulting from the destruction of or for not planting potatoes and tomatoes on lands infested or exposed to infestations of the golden nematode for the purpose authorized by the Golden Nematode Act (Public Law 645, [Eightieth Congress,] approved June 15, 1948), and for the enforcement of domestic plant quarantines through inspection in transit, including the interception and disposition of materials found to have been transported interstate in violation of Federal plant quarantine laws or regulations, and operations under the Terminal Inspection Act (7 U. S. C. 166), [\$3,564,000] \$4,752,000: *Provided*, That no part of this appropriation shall be used to pay the cost or value of trees, farm animals, farm crops, or other property injured or destroyed, except potatoes and tomatoes as authorized under the Golden Nematode Act: *Provided further*, That, in the discretion of the Secretary, no part of this appropriation shall be expended for the control of sweetpotato weevil in any State until such State has provided cooperation necessary to accomplish this purpose, or for barberry eradication until a sum or sums at least equal to such expenditures shall have been appropriated, subscribed, or contributed by States, counties, or local authorities, or by individuals or organizations for the accomplishment of this purpose, or with respect to the golden nematode except as prescribed in section 4 of the Golden Nematode Act. (7 U. S. C. 141-144, 147a; Public Res. 47, approved May 21, 1928; Act of June 17, 1949, Public Law 106; Department of Agriculture Appropriation Act, 1950.)

Appropriated 1950, \$3,564,000 Estimate 1951, a \$4,752,000

* Includes \$1,089,000 for activities previously carried under appropriations as follows: "Salaries and expenses, entomology and plant quarantine, Agricultural Research Administration," citrus blackfly..... \$97,000 "Control of emergency outbreaks of insects and plant diseases"..... 992,000 The amounts obligated in 1949 and 1950 are shown in the schedule as comparative transfers.

Foreign plant quarantines:

PROGRAM AND PERFORMANCE

Protective measures prohibiting, regulating, or controlling entry of plants and other commodities are carried out to prevent the introduction from abroad of insect pests and plant diseases detrimental to United States agriculture. Complementary to this work, a service is rendered to American exporters of plants and plant products by providing certificates attesting the sanitary condition of such material, as required by various foreign countries.

An increased program is proposed for 1951 for strengthening the inspection service at several ports of entry, especially in areas where the likelihood of introduction of the oriental fruitfly and citrus blackfly is great, and for control measures at and around airfields and docks in Hawaii to reduce the hazard of introducing the oriental fruitfly into the mainland.

Principal activities include issuance of permits required as a condition of entry of various kinds of plants and plant

products; inspections of carriers, including aircraft entering the country; inspections of cargoes, crew quarters, passengers' baggage, and mail to determine compliance with various plant quarantines and regulatory orders and freedom from destructive insect pests and plant diseases; treating or supervising treatment of commodities offered for import when required to prevent entry of plant pests; and making inspections in Hawaii and Puerto Rico of aircraft and their cargo to certify freedom of pests, thus permitting prompt clearance on arrival at ports on the mainland of the United States.

The various activities are carried on with the assistance and close cooperation of the Bureau of Customs, the Immigration and Naturalization Service, the Post Office Department, and the Public Health Service. The operating rules of these agencies include requirements which provide that their inspectors and employees aid in enforcement of plant quarantine regulations. Operations are closely integrated with those performed by State, Territorial, and insular plant quarantine services, and their employees aid in carrying out certain activities. Plant quarantine inspectors are stationed at ports of entry on the mainland, especially those on the border, and also in Hawaii, Puerto Rico, and Alaska.

APPROPRIATION TEXT

Foreign plant quarantines: For operations against the introduction of insect pests or plant diseases into the United States, including the enforcement of foreign-plant quarantines and regulations promulgated under sections 5 and 7 of the Plant Quarantine Act of August 20, 1912, as amended (7 U. S. C. 151-167), the Insect Pest Act of 1905 (7 U. S. C. 141-144), and the Mexican Border Act of 1942 (7 U. S. C. 149), for enforcement of domestic-plant quarantines as they pertain to Territories of the United States and enforcement of regulations governing the movement of plants into and from the District of Columbia promulgated under section 15 of the Plant Quarantine Act of August 20, 1912, as amended, and for inspection and certification of plants and plant products to meet the sanitary requirements of foreign countries, as authorized in section 102 of the Organic Act of 1944 (7 U. S. C. 147a), [\$2,325,000] \$2,618,000. (7 U. S. C. 281-282; Department of Agriculture Appropriation Act, 1950.)

Appropriated 1950, \$2,325,000 Estimate 1951, \$2,618,000

PROGRAM AND PERFORMANCE

Flexible year-to-year programs are conducted to combat incipient and emergency outbreaks of insects and plant diseases that present serious threats to agriculture. The various activities are in general handled on a crop season basis, and usually involve cooperative effort by Federal and State agencies, local communities, and individual farmers.

Through inspection surveys the Bureau endeavors to locate destructive pests and appraise the status of infestation. Depending upon the type of threat that may exist, the Bureau may (1) advise farmers how and when to use protective insecticides; (2) inform industry of potential needs for insecticide materials; (3) undertake small-scale measures to suppress or eradicate known outbreaks; and (4) organize large-scale control efforts on a cooperative basis within affected areas.

1. *Grasshopper and Mormon cricket control.*—During the 1949 crop season grasshoppers heavily infested rangelands of Montana and Wyoming and threatened to migrate to important crop-producing areas. More than 3,000,000 acres were treated by spreading of poison bait and chemical formulations, with costs distributed as follows: Federal, 50 percent; States, 25 percent; counties, 15 percent; private contributions, 10 percent. In addition farmers were guided in applying chemical insecticides on approx-

imately 2,800,000 acres in cropland areas. The increased program proposed for 1951 involves the purchase of reserve supplies of pesticides and educational work with farmers on methods of application.

2. *General surveys.*—Information is developed on the status and distribution of important pests, such as those attacking cotton, deciduous fruits, vegetable and specialty crops, and used to prevent crop losses. This work will be broadened and intensified in 1951.

3. *Other control and survey work.*—Control programs are also directed toward chinch bugs, citrus canker, and fire ants prevalent in some localities.

OBLIGATIONS BY ACTIVITIES

PROGRAM AND PERFORMANCE

The Bureau conducts research in the field of chemistry and related physical sciences on problems related to the utilization of agricultural commodities, residues, and by-products in food, feeds, drugs, and nonedible products.

Research is conducted at four regional research laboratories to develop new and expanded industrial and food uses for the principal farm commodities of their respective regions:

Southern laboratory, New Orleans, La.—Cotton, peanuts and other oilseeds, and sweetpotatoes.

Western laboratory, Albany, Calif.—Fruits, vegetables, poultry products, alfalfa, and wheat.

Eastern laboratory, Wyndmoor, Pa.—Apples and other fruits, vegetables, tobacco, milk products, animal skins, hides and tanning materials, animal fats, and oils.

Northern laboratory, Peoria, Ill.—Corn, wheat, and other cereals, such as oats, rye and barley, soybeans and other oilseeds, and agricultural residues.

In 15 smaller field stations, applied research is being directed toward the problems of utilizing the products and byproducts of pine gum, tung nuts, sugar plants, citrus and other fruits, and vegetables. Fundamental research is conducted on the nature and control of enzyme action, on the toxic and other physiological effects of substances that might be considered for medicinal uses or that contaminate or exist in foods and feeds, on substances that exhibit special biological activity in or toward plants, and on the survival of pathogenic micro-organisms in processed foods.

1. *Cereal and forage crops utilization investigations.*—Experiments are conducted to develop from grains such materials and products as may be utilized immediately in industrial or other uses, and also to discover broader uses which would tend to alleviate possible surpluses. Major attention is directed toward improving methods for producing motor fuels from grains and testing results of their use. Other major lines of study are (1) relation between the oil and vitamin content of grains and their breeding; (2) improved methods for the milling of grains; (3) conversion of grains and starches to sugars or sirups; (4) modification of starch, corn sugar, and protein to yield industrial products (adhesives, fibers, films, and resins); and (5) development of new industrial fermentations for converting grains to chemicals, drugs, vitamins, and food products. Research on forage crops concerns the development and evaluation of alfalfa food and feed concentrates and the isolation and characterization of the constituents of alfalfa.

2. *Cotton and other fiber crops utilization investigations.*—Investigations on cotton deal with (1) determination of cotton fiber structure and properties, and their relation to the processing behavior and to the quality and uniformity of the resulting yarns and fabrics; (2) new or improved machinery and methods for processing lint cotton; (3) new or improved cotton products for specific industrial, clothing, and household applications; (4) chemical processing of cotton to impart or improve desirable properties; and (5) production of chemical derivatives of cellulose from cotton linters.

3. *Fruit and vegetable utilization investigations.*—Research is conducted (1) to enhance the yield and quality of these commodities processed by established methods; (2) to devise new processing methods; (3) to obtain new types of food products; and (4) to increase the value of byproducts from processing residues, and avoid disposal problems. The perishable nature of fruits and vegetables requires that preservation methods and new uses be de-

veloped for that part of the annual crop that cannot rapidly be absorbed in the fresh market.

4. *Oilseed utilization investigations.*—These investigations include a study of changes during storage to prevent deterioration; and development of new methods for processing oilseeds to lower costs, increase yields, and improve the quality of edible and industrial products. Attention is given to improvement of the quality of refined and hardened oils for food use and to the chemical modification of oils to meet special industrial requirements.

5. *Sugar and special plants utilization investigations (including pine gum, tobacco, tanning materials, and wild plants).*—Research on cane sugar seeks to improve methods for processing sugarcane, cane juice and molasses, clarifying cane juice, and the utilization of byproducts. Research is being conducted on new and improved methods and equipment for processing pine tree gum to yield oleoresin, turpentine, and rosin. Basic chemical studies are conducted on tobacco to create new and improved insecticides from nicotine and to develop methods for the recovery of nicotine from high-nicotine varieties. Studies are made of tannin extraction, utilization of byproducts, and the leather tanning quality of the materials.

6. *Poultry, dairy, and animal products utilization investigations.*—Research on poultry includes development of better methods for preserving eggs and poultry and for utilizing their byproducts. New nonfood uses for milk and milk products are being developed, such as new outlets for skim milk and whey. Lactic acid derivatives having plasticizing properties are being prepared and evaluated as the base of lactoprene, a new type of synthetic rubber. To expand the use of animal fats and oils, methods are being developed to delay rancidification and to prepare pure fatty acids and their derivatives for industrial chemical use, as emulsifiers, soaps, and lubricating oils.

7. *Agricultural residues utilization investigations.*—The three chief constituents of agricultural residues are cellulose, hemicellulose, and lignin on which research is conducted to extend their use in the manufacture of fine and specialty papers, box and building boards, filters, extenders for adhesives and plastics, soft-grit blasting materials, and industrial chemicals.

APPROPRIATION TEXT

Salaries and expenses: For expenses necessary for investigations, experiments, and demonstrations established under the provisions of section 202 (a) to 202 (e), inclusive, of title II of the Agricultural Adjustment Act of 1938 (7 U. S. C. 1292); for the development of new and extended food, feed, and industrial uses for agricultural commodities, both plant and animal, and potential replacement crops, and processing, biological, chemical, physical, pharmacological, toxicological, and technological investigations thereof, including personal services in the District of Columbia, \$5,807,000: Provided, That not to exceed \$25,000 shall be available for the alteration to buildings of the Naval Stores Station at Olustee, Florida. (5 U. S. C. 511-512—establishing Department of Agriculture; 524—establishing Bureau of Chemistry; 563-564, 565a; Department of Agriculture Appropriation Act, 1950.)

Estimate 1951, * \$5,807,000

* Estimate is for activities previously carried under appropriations as follows: "Salaries and expenses, agricultural and industrial chemistry, Agricultural Research Administration":
 Agricultural chemical and naval stores investigations..... \$659,433
 Regional research laboratories..... 5,147,567
 The amounts obligated in 1949 and 1950 are shown in the schedule as comparative transfers.

Agricultural chemical and naval stores investigations:

Synthetic Liquid Fuels Project (Transfer to Agriculture, Agricultural and Industrial Chemistry)—

FUNDS AVAILABLE FOR OBLIGATION	1949 actual	1950 estimate	1951 estimate
Prior year balance available.....	\$55,602	\$81,860	
Transferred from "Synthetic liquid fuels, Bureau of Mines, Department of the Interior".....	100,000		\$115,000
Total available for obligations.....	155,602	81,860	115,000
Balance available in subsequent year.....	-81,860		
Total obligations.....	73,742	81,860	115,000

PROGRAM AND PERFORMANCE

The synthetic liquid fuels project is financed by funds transferred from the Bureau of Mines, Department of the Interior. Its purpose is to produce synthetic liquid motor fuels from agricultural residues and to prepare plans, design equipment, and make industrial-scale lay-outs based on data from operations conducted on a semi-industrial scale.

Experiments involve processes for hydrolyzing agricultural residues (plant materials generally, corncobs, faulty grains, and the like) to make sugars for conversion to various types of liquid fuels by fermentation. Pilot-plant operations are conducted to develop practical equipment and procedure with the ultimate aim of industrial application of these research findings. To be acceptable, processing costs must be economical and competitive with other methods of production from other materials.

The work on manufacture of automotive fuels from agricultural residues indicates that further necessary economies are possible. In 1951, present equipment and processes will be modified to eliminate some processing steps and to increase efficiency in others to attain more economical production.

PROGRAM AND PERFORMANCE

The Bureau conducts research in food, human nutrition, housing, and other related phases of home economics, independently and in cooperation with other bureaus of the Department, other Federal agencies, and with agricultural experiment stations and other research institutions in the States. The findings are of value (a) to educators for advising homemakers with respect to selection, use and care of goods, and on home-management problems; (b) to producers for their understanding of family needs and wants; and (c) to public leaders for development of educational and other programs.

In addition to its research function the Bureau coordinates nutrition services available to the public through programs of Federal, State, and other agencies.

The increase proposed for 1951 provides for a study of the amounts and distribution of rural family living expenditures, to provide a basis for determining trends in consumption, estimating market potentials, evaluating changes in the welfare of rural families, and for planning educational and other programs.

1. *Food and nutrition investigations.*—Human food and nutritional requirements, the composition and nutritive value of various foods, and methods and principles underlying satisfactory food preparation and preservation in the home are studied.

2. *Family economics investigations.*—Household buying problems are studied, as well as the adequacy and relative economy of the food, clothing, and other goods and services, purchased and home-produced, that are consumed by various population groups, particularly the major items of household expenditure which serve as indicators of farm family living standards.

3. *Textiles and clothing investigations.*—Studies are conducted of the chemical and physical properties of fabrics in relation to selection, care, reconditioning, and use in the home; technical problems pertaining to quality of clothing and household textile articles; and problems of design and sizing in relation to function.

4. *Housing and household equipment investigations.*—Studies to improve the design of rural houses for comfortable family living and efficient work, and studies of the operating characteristics and performance-in-use of household equipment are carried on.

CONTROL OF FOREST PESTS

Control of Forest Pests, Department of Agriculture—

APPROPRIATION TEXT

For expenses necessary for carrying out operations, measures, or surveys necessary to eradicate, suppress, control, or to prevent or retard the spread of insects or diseases which endanger forest trees on any lands in the United States, and for such quarantine measures relating thereto as may be necessary pursuant to the Plant Quarantine Act of August 20, 1912, as amended (7 U. S. C. 151-167), including personal services in the District of Columbia [and], the purchase (not to exceed four) and operation and maintenance of airplanes, and construction and alteration of necessary buildings: *Provided, That the cost of constructing or purchasing any one building and site (except one building at Greenfield, Massachusetts to cost not to exceed \$23,500), exclusive of the cost of constructing a water supply or sanitary system and connecting the same with any such building, shall not exceed \$10,000, and the cost of altering any one building during the fiscal year shall not exceed \$2,500, as follows: (Department of Agriculture Appropriation Act, 1950.)*

PROGRAM AND PERFORMANCE

In cooperation with State and local agencies, quarantine measures are enforced to prevent the spread of the gypsy moth and the brown-tail moth through the movement of articles that may carry them into noninfested areas. These insects are destructive to forest, shade, and fruit trees and are well established in the New England area and eastern New York. The work involves inspection and certification of numerous articles such as quarry products, forest products, and nursery stock, to permit safe movement throughout the country. In addition, surveys and control operations are directed toward (1) the eradication of the gypsy moth in extensive areas of timberland along the western border of the generally infested area, (2) the eradication of outlying or isolated infestations in previously treated areas or elsewhere, and (3) the suppression of infestation at points within the generally infested area by assisting State and local agencies to organize and execute community-wide suppressive programs.

Complete suppression of these pests appears possible through the use of DDT and the development of equipment for applying spray by aircraft. Since 1946 more than a million acres in Pennsylvania, New York, and Massachusetts have been treated effectively with DDT applied by aircraft and by new types of ground machines.

PROGRAM AND PERFORMANCE

This item provides for the control of insects and plant diseases which injure or destroy forest resources. Operations include (1) surveys to detect and appraise the presence and potential danger of such pests, and (2) suppressive measures in cooperation with one or more of the several land-managing agencies that may be involved. Where the work is done on federally owned lands the operations are usually conducted by the agency responsible for the management of the land, under the technical leadership of Department specialists familiar with the

CONTROL OF FOREST PESTS—Continued**Control of Forest Pests, Department of Agriculture—Continued**

Forest Pest Control Act—Continued

pest concerned. Where the pest occurs on State or privately owned lands control operations are carried out cooperatively, using in part funds provided by the States and the individuals concerned.

Although authorization for undertaking programs of this nature is recent, several highly effective operations have been carried out. Valuable stands of spruce and balsam fir in Oregon, totaling approximately 300,000 acres of mixed-ownership lands were protected from the spruce budworm in 1949 and, in the same year, an epidemic infestation of the Black Hills bark beetle, threatening extensive stands of valuable ponderosa pine in Colorado, was suppressed in a substantial area of mixed-ownership lands. Detection and appraisal surveys provide basic facts necessary to conduct control projects, and thus prevent excessive losses.

PROGRAM AND PERFORMANCE

This program provides for the protection of white pine trees from the blister rust disease which causes extensive damage to mature stands of white pine and is fatal to young trees. It cannot transfer from one pine to another but requires ribes (currant and gooseberry bushes) as intermediate hosts. The stage of the disease which lives on ribes is fragile and short-lived. By removing these shrubs from areas where white pines grow, and from a protective belt around the timber stands, these valuable trees can be protected from the disease.

An increased program on a total of approximately 300,000 acres is proposed for 1951 to intensify ribes eradication work on national forest lands in the Pacific Northwest and for cooperative work on State and private lands where the work is jointly financed.

Control work on federally owned lands is carried out by the agency responsible for the management of the land. That on State and privately owned lands is carried out cooperatively, leadership for the operations being assigned to the Bureau of Entomology and Plant Quarantine. The Bureau is also responsible for technical leadership and supervision of operations on all lands, for the surveys that indicate when and where control work should be done, and enforcement of the Federal plant quarantine which prevents reinvasion of protected areas.

Since the cooperative program was initiated in 1919 ribes have been removed completely from 12.7 million acres, where little additional work is needed to safeguard the growth of white pine. Approximately 14.8 million acres require further intensive work, including about 4.1 million acres where no ribes eradication has yet been done.

PROGRAM AND PERFORMANCE

This appropriation provides for the leadership, coordination, planning, and control of the work programs of the Forest Service, including certain service and facilitating operations which are necessary in the central office relating to finance and fiscal control, personnel management, information and education, procurement, and drafting, as well as for the necessary inspection of field operations.

The primary functions of the Forest Service involve three major responsibilities: (1) The protection, management, development, and utilization of more than 180,000,000 acres of land in national forests in the United States, Alaska, and Puerto Rico, equivalent to approximately 10 percent of the area of the continental United States; (2) the encouragement of good forest practices, including the

FOREST SERVICE—Continued

Salaries and Expenses, Forest Service—Continued

General administrative expenses—Continued

protection of forests, on 439,000,000 acres of State and private forest lands; and (3) forest and range research for forest and open range lands.

In administering these three broad fields of activity, the Forest Service operates through approximately 1,000 field headquarters and in cooperation with numerous Federal, State, and local agencies. Under these conditions there must be a constant flow of policy and procedural information and instructions from the central office to the field. There must also be frequent inspection of operations by representatives of the central office.

PROGRAM AND PERFORMANCE

The Service manages, protects, and develops the national forests to insure that their timber, water, range, recreation, wildlife, and other resources are developed and utilized in such ways as to best serve the Nation. To effect the multiple purposes of management of all resources on the approximately 180,000,000 acres of publicly owned lands within the national forests (an area equivalent to about 10 percent of the continental United States), the following major functions are performed:

1. *Sale of mature timber stumpage and of immature timber from thinnings and improvement cuttings in young stands.*—There are approximately 79,000,000 acres of commercial or potentially commercial forest land in the national forests containing about 600 billion board feet of timber. Timber products from national forests are now equal to about 10 percent of the total national saw-timber production. About one-third of the remaining saw timber in the United States is on the national forests, which represent approximately one-sixth of the total commercial forest land. About 3.8 billion board feet are now being cut annually. The stumpage value of the timber cut from the national forests in fiscal year 1949 was \$28,749,007. The present allowable cut on a sustained-yield basis is slightly over 6 billion board feet annually.

Except for small sales to local settlers, and in a few special situations, all timber cut from the national forests is disposed of under a competitive bidding procedure.

2. *Leasing of grazing privileges and the administration of such grazing permits on national forest range lands.*—About 80,000,000 acres of the 180,000,000 acres in the national forests are grazed by domestic livestock under permit. Permits are issued to about 28,000 persons annually. Receipts in the fiscal year 1949 amounted to \$3,275,000. Resident settlers and stockmen owning dependent ranch property receive first consideration to the granting of grazing permits. The forage resource must be managed in such a way as to allow its fullest use consistent with permanent maintenance and sustained yield. Increased emphasis will be placed in 1951 on the improvement of conditions on national forest ranges.

3. *Management of the wildlife habitat to obtain optimum wildlife and fish populations consistent with other uses of the land and with the needs of hunters and fishermen.*—About 70 percent of the big-game population of the West is on the national forests. There were 1,690,000 hunters and 3,320,000 fishermen on the national forests in the calendar year 1948, which is an increase of 18 percent in the past 3 years. The Forest Service program involves the maintenance and improvement of wildlife habitat to obtain the maximum production consistent with other land uses, and the proper utilization of the wildlife crop. In the fiscal year 1951, emphasis will be placed on (1) increased cooperation with the States directed toward the reduction of big-game populations in overstocked areas, and (2) the

development of increased game and fish populations in understocked forests and streams.

4. *Coordination of management of all resources so as to minimize any deleterious effect upon the quality and quantity of water production from the watershed lands.*—Some what more than 13 percent of the total water yield of the United States originates from the high watersheds of the national forests. It is essential that all resources be properly handled in an integrated plan of management so as to increase the quality and quantity of water production and minimize the damages from siltation, floods, and soil erosion.

5. *Sanitation, policing, and administration of campgrounds, picnic areas, and other public use recreation areas.*—There are about 5,000 developed camp and picnic grounds on the national forests. Public use of the national forests exceeded 24,000,000 visits in 1948 and has been increasing at an annual rate of about 3,000,000 visits for the past 3 years. The developed areas, aside from a service to the public, are necessary in the protection of the forests from fire, the forests and streams from pollution, and the well-being and health of the forest users themselves. The program proposed for 1951 will provide intensified sanitation and policing of the recreation developments.

6. *Management of other land uses.*—Special land rentals and uses of national forest lands include rights-of-way for roads, telephone and transmission lines, summer-home sites, pastures, corrals, and sawmills. There were 47,446 special uses of this kind in effect on June 30, 1949. The number of permits increases at the rate of about 2,000 per year. Oil, gas, and mineral applications (not included in the 47,446 permits) have increased rapidly in recent years. Income from the revenue-producing land activities in 1949 was \$785,350, and is estimated at \$850,000 in 1951. An increased program is proposed for 1951 to administer the new uses and to expedite action on mineral applications.

7. *Maintenance of existing improvements such as fire towers, telephone lines, range fences, and water developments, campgrounds, offices, and residences, which are necessary in the protection and administration of the forests.*—The national forests are generally located in the most inaccessible and least developed sections of the country. It has therefore been necessary to provide housing for many employees and telephone and radio communication for reporting forest fires and for other administrative uses. There are over 60,000 miles of telephone line in the national-forest system. Barns, warehouses, and garages have been constructed for housing pack animals, motor vehicles, and equipment; and lookout towers are constructed for the detection of forest fires. A total of 2,910 lookout towers and observatories receive regular maintenance so that they will not become unsafe.

Thousands of miles of range fences have been necessary for controlling range livestock. Public facilities such as fireplaces, water systems, benches, tables, garbage pits, and latrines have been constructed as a result of the recreational use of the forests. The investment in the above and many other miscellaneous improvements is about \$110,000,000. The 1951 program contemplates essential maintenance of the higher priority improvements, such as lookout towers, telephone lines, fences, water developments, and campground facilities.

8. *Prevention and suppression of forest fires.*—There were 8,435 fires on the national forests in calendar year 1948 resulting in a burned area of 176,822 acres or 0.1 percent of the area protected. The number of fires and area burned in 1949 were considerably in excess of 1948.

Efficient fire suppression work requires a strong, well-trained, presuppression organization to catch the fires promptly while they are small. This reduces the major conflagrations which are costly from the standpoint of direct cash outlay for suppression and damage to forest resources.

9. *Replacement and construction of new improvements.*—Many of the physical plant facilities require replacement due to age. In addition to replacement, housing for employees in isolated areas, rebuilding of telephone lines, as well as improvements for fire control and camp grounds are necessary. An increased program of constructing such improvements is contemplated in 1951.

10. *Reforestation of cut-over, burned-over, and denuded acreage and the care of plantations.*—Through the fiscal year 1949, a total of 1,314,000 acres of national forest lands has been planted to trees. The acreage planted in 1949 was 44,000 acres and is estimated at 40,000 acres in 1950. In 1951, seed collection, nursery production, and plantation care will be accelerated and 50,000 acres will be planted.

11. *Revegetation of range lands on which the grass cover has been depleted and erosion is resulting therefrom.*—Included in the 80,000,000 acres of range lands are about 4,000,000 acres which require reseeding to range grasses to restore their productivity. Only 277,000 acres have been reseeded through 1949. A total of 74,000 acres were reseeded in fiscal year 1949, and about 70,000 acres will be reseeded in 1950. In 1951, acreage to be planted will be approximately 120,000.

APPROPRIATION TEXT

National forest protection and management: For the administration, protection, use, maintenance, improvement, and development of the national forests, including the establishment and maintenance of forest tree nurseries, including the procurement of tree seed and nursery stock by purchase, production, or otherwise, seeding and tree planting and the care of plantations and young growth; the operation and maintenance of aircraft and the purchase of not to exceed [four] three; the maintenance of roads and trails and the construction and maintenance of all other improvements necessary for the proper and economical administration, protection, development, and use of the national forests, including experimental areas under Forest Service administration, except that where direct purchases will be more economical than construction, improvements may be purchased; the construction (not to exceed \$15,000 for any one structure), equipment, and maintenance of sanitary and recreational facilities; timber cultural operations; development and application of fish and game management plans; propagation and transplanting of plants suitable for planting on semiarid portions of the national forests; estimating and appraising of timber and other resources and development and application of plans for their effective management, sale, and use; examination, classification, surveying, and appraisal of land incident to effecting exchanges authorized by law and of lands within the boundaries of the national forests that may be opened to homestead settlement and entry under the Act of June 11, 1906, and the Act of August 10, 1912 (16 U. S. C. 506-509), as provided by the Act of March 4, 1913 (16 U. S. C. 512); investigation and establishment of water rights, including the purchase thereof or of lands or interests in lands or rights-of-way for use and protection of water rights necessary or beneficial in connection with the administration and public use of the national forests; and all expenses necessary for the use, maintenance, improvement, protection, and general administration of the national forests, [\$26,300,000] \$30,270,500, of which not to exceed [\$25,000] \$125,000 shall be available for the purchase of [one] five nursery [site] sites, and [the limit of cost for not to exceed one building constructed at Horseshoe Organization Camp, West Virginia, shall be \$22,500: Provided, That appropriations for the Forest Service shall be available hereafter for the correction of inductive interference on Forest Service telephone lines caused by transmission lines constructed by organizations financed by loans from the Rural Electrification Administration] not to exceed \$5,000 shall be available for the purchase of administrative sites. (16 U. S. C. 471-583i; Department of Agriculture Appropriation Act, 1950.)

Appropriated 1950, \$26,300,000

PROGRAM AND PERFORMANCE

This appropriation covers emergency fire control expenditures in the national forests. Ordinarily expenditures are not made from these funds until forest fires have actually started, or except when fire conditions become so critical that the regular protective organization, which is financed from the appropriation "National forest protection and management," is unable to cope with the situation and when, therefore, the temporary employment of additional persons will reduce expenditures for fire fighting.

Because of the impossibility of determining definitely in advance the amount of funds required during any fiscal year for fighting forest fires, a nominal sum of \$100,000 is carried in the annual appropriation act, this sum to be supplemented to the extent actually required by the temporary use of funds appropriated for the general expenses of the Forest Service. After the close of the summer fire season each year, a supplemental appropriation is made to reimburse the general expense appropriations, and to provide the estimated amount required for emergency fire fighting during the balance of the fiscal year. Forest fire appropriations for the past 10 years have averaged about \$2,966,000. For 1950, it is estimated that a supplemental appropriation of \$6,600,000 will be required to meet fire-control expenditures, and for 1951, \$5,000,000 is estimated for the same purpose.

OBLIGATIONS BY ACTIVITIES

Fire suppression—1949, \$3,268,385; 1950, \$150,000; 1951, \$150,000.

PROGRAM AND PERFORMANCE

Research is conducted to provide private and public land managers and owners with a sound basis for protection and management of timber, range, and watershed lands.

1. *Forest and range research.*—Studies are conducted at 12 regional forest experiment stations, which administer the programs on over 100 experimental forests, ranges, and watersheds to develop techniques that will (1) maintain a sustained yield of products at the lowest possible cost on lands devoted to production of wood; (2) increase and maintain forage on, and obtain efficient use of, range lands for maximum production of livestock without damage to soil, watershed, or other values; and (3) assure the maximum regular flow of usable water from forest and range lands, stabilize soils, and contribute generally to a reduction of flood and sedimentation damages.

2. *Forest fire control.*—Investigative work aimed at reducing damage and costs from forest fires is carried on at six regional forest experiment stations. The principal lines of work are (1) fundamental studies of fire behavior to improve the understanding and skill of fire fighters; (2) studies of forest fire damage in all its aspects to provide a sounder basis for financing protection to the degree needed in each locality; (3) rating the day-to-day changes in fire danger to improve efficiency in management of the fire organization; (4) study of water, wetting agents, and chemicals to increase efficiency of fire fighting; (5) study of aerial methods in fire control as a means of increasing effectiveness; and (6) study of application of scientific developments in other fields to solve problems in forest fire control. In 1951 additional work will include special

studies on the problem of anticipating the point at which fires reach the "blow-up" stage and become dangerous to the lives of fire fighters, and on zoning forest fuels according to their inflammability.

PROGRAM AND PERFORMANCE

Forest products investigations aid in protecting and enhancing the value and utility of forest products. The work of the forest products laboratory, the results of which have Nation-wide application, is directed toward (1) the improved serviceability and satisfaction of forest products to users; (2) the reduction and utilization of unavoidable waste; (3) the profitable utilization of low-quality wood and unpopular species; (4) the development of new and useful products from wood; (5) the reduction of costs in logging, in manufacture, and in the utilization of wood products; (6) the development of the basic knowledge and discoveries upon which the application of research to specific problems must depend; and (7) the dissemination of findings to meet the needs of the forest owner, the primary manufacturer, the wood fabricator, and the ultimate consumer of wood commodities.

1. *Forest products laboratory—(a) Conditioning and protection of wood products.*—Research is conducted to develop the best ways to season lumber as quickly and cheaply as possible; to protect wood against deterioration and damage by decay, insects, and fire; to develop suitable gluing techniques; to improve painting procedures for wood; and to develop suitable methods for manufacturing veneer from unpopular species.

(b) *Properties investigations and wood products development.*—Research is conducted on problems relating to the strength of wood in both natural and modified forms; structural grading of timber and working stresses; timber design; development and construction of containers to bring about a more efficient use of forest products and to reduce losses and damages in transit and storage; on problems in the harvesting and conversion of the timber crop, including the fundamental mechanics of wood cutting and on the relation of growth conditions to wood quality and of wood structure to strength and other properties.

(c) *Pulp and paper.*—Research is directed toward obtaining more economic production, higher yield, and better pulp quality from native woods including low-grade wood and wood waste and those species now little used or unused.

(d) *Chemically converted and derived products investigations.*—Research is conducted toward extending the fundamental knowledge of the chemistry of wood and its conversion by chemical methods into useful products including the production from wood wastes of such products as molasses and high protein fodder yeast, finding uses for lignin and hemicelluloses, and the development of plastics and board materials from wood residues.

2. *Forest utilization service.*—This service operates in various forest regions of the country to aid in circulating the Laboratory's findings, to assist in their prompt appli-

cation, and to bring problems typical of the various forest regions to the Laboratory for attention and solution.

PROGRAM AND PERFORMANCE

Forest resources investigations are conducted to inventory and appraise the timber and other wood product resources of the United States, and to work out possible solutions to the varied economic problems of supply, production, and utilization, which are associated with management of these resources. The chief activity is the Nationwide survey of forest resources, the purpose of which is to determine the area and condition of forest lands, the volume and quality of standing timber, ownership of timber resources, annual growth of new timber crops, annual depletion of timber by cutting and destructive agencies, potential requirements for the varied timber products obtained from United States forests, and other information essential to adequate appraisal of the timber supply situation. The appraisal of such resource data, together with related information on economic factors influencing use of forest resources, provides a factual basis for guidance of national and State policies in forestry affairs, of wood-using industries, and forest land owners.

An increased program is proposed for the fiscal year 1951. Plans provide for initial surveys of about 50 million acres of forest land and resurveys of approximately 30 million acres.

On July 1, 1949, about three-fifths of the forest land had been initially inventoried in the field, and one-third of the area needing resurvey had been covered.

Related investigations of requirements for forest products for such uses as residential and nonresidential construction, shipping, and manufacturing will likewise be expanded to provide information essential for establishment of timber growth goals and long-term forest policies. As in previous years, special studies will also be made to appraise varied forest economic problems and to investigate economic factors which influence local, regional, and international policies relating to forestry and forest products.

PROGRAM AND PERFORMANCE

Forest development roads and trails provide transportation routes essential for the protection and management of

FOREST SERVICE—Continued

Forest Development Roads and Trails, Department of Agriculture—Continued

180 million acres of national forest land. These roads and trails are built and maintained primarily to serve the Federal property rather than for intercommunity or cross-country travel. The roads are generally earth or gravel surfaced and considerably below highway standards in other respects. Horse and foot trails supplement the road system and are primarily for protection against forest fires, but are extensively used by hunters, fishermen, stockmen, and miners. The existing system consists of approximately 106,000 miles of roads and 129,000 miles of trails.

Plans for the fiscal year 1951 provide for maintenance to preserve the investment and to provide roads and trails of standards consistent with existing traffic. Maintenance will include the replacement of about 300 bridges and of the gravel surfacing on about 500 miles of roads, as well as the normal work, such as grading of road surfaces, replacement of wash-outs, and removal of slides. Approximately \$8,150,000 will be expended for maintenance and the remainder will be used for improvement and new construction, primarily for roads to presently inaccessible areas of national forest timber.

PROGRAM AND PERFORMANCE

Assistance is furnished the States in preventing and suppressing forest fires on private and State-owned lands. These non-Federal lands comprise nearly three-fourths of this Nation's commercial forest area. They are our most productive and accessible forest lands and produce 90 percent of all timber cut.

Financial cooperation in fire control with 43 States and Hawaii includes special services to States in training in the best fire-fighting techniques; procurement and development of better fire tools, motorized equipment, radio, and the like; and spearheading Nation-wide efforts to reduce the number of man-caused fires. Ninety percent of all forest fires are man-caused and, therefore, are preventable. The status of protection on non-Federal areas on January 1, 1949, was:

	Million acres
Needing protection.....	439
Now protected.....	339.5
Unprotected.....	99.5

Eleven and one-half million acres of private forest land were added to the protected area during the calendar

year 1948. That year the acreage burned on protected areas was held to 0.58 percent as against an estimated 14.35 percent on unprotected lands. The average area burned on protected areas was reduced from 39¼ acres per fire in 1947 to 32 acres in 1948 as a result of more prompt and effective suppression action. In 1948, 5,226 prosecutions were made by the 43 cooperating States for violation of State fire laws—90 percent of which resulted in convictions.

In the fiscal year 1949, a total of \$28,302,867 was expended on this cooperative program; 61 percent by the States and counties, 8 percent by private owners, and 31 percent by the Federal Government. Federal cooperation under this program will be increased in the fiscal year 1951.

PROGRAM AND PERFORMANCE

This program, carried on in cooperation with the States, encourages private timber growing through reforestation of denuded areas and good management of woodlands. Of the 345 million acres of commercial forest land in private ownership, the Forest Service estimates 62 million acres are so badly denuded as to require replanting, and on 200 million acres private cutting practices are too poor to assure future crops of timber.

The program centers primarily on small forest properties for two reasons: (1) 76 percent of the total acreage of private commercial forest land is in small holdings averaging only about 62 acres each and owned by more than 4,000,000 different individuals; and (2) present cutting practices are poorest on these small forest properties, and their owners do not have the technical knowledge or skills necessary to put their woodlands in productive condition.

1. *Cooperation with States in procurement, production, and distribution of forest-tree and shrub seeds and plants.*—To assist and encourage woodland owners to plant trees, nursery stock is provided at less than cost. The States grow or purchase the trees, and the Federal participation consists of small financial reimbursement to the States. In the 25 years since the beginning of this program about 1½ million acres of successful plantations have been established on farms. The demand for low-cost forest tree planting stock has greatly exceeded the supply. The increased program proposed for 1951 would provide about one-half billion trees or enough for 500,000 acres.

2. *Cooperation with States and private forest owners in forest management service work.*—In cooperation with State foresters plans for 1951 provide for about 200 farm woodland management projects to aid small woodland owners in applying good management to their timber holdings. In each project a forester assists woodland owners in technical timber management and marketing problems which they cannot do themselves. In 1948, a total of 14,220 individual small owners were helped to apply improved management practices on 1,399,971 acres of woodland. No change in the level of activities under this item is contemplated in the fiscal year 1951.

3. *Cooperation with States in farm forestry extension.*—As a part of State Agricultural Extension Services, forestry specialists operating mainly through county agricultural agents carry out forestry educational work among farmers to do those parts of the job which they themselves can do. The work includes group demonstrations, meetings, training schools, development of subject matter and visual-aid materials, press and radio releases on tree planting, woodland management, marketing and utilization of farm woodland crops, and wood preservation. In 1948 this work was carried on in 2,381

APPROPRIATION TEXT

FARM AND OTHER PRIVATE FORESTRY COOPERATION

To enable the Secretary through the Forest Service to advise timberland owners and associations, wood-using industries or other appropriate agencies in the application of forest management principles to federally owned lands leased to States and to private forest lands, so as to attain sustained-yield management, the conservation of the timber resources, the productivity of forest lands, and the stabilization of employment and economic continuance of forest industries, and to carry into effect, through such agencies of the Department as he may designate, the provisions of the Cooperative Farm Forestry Act, approved May 18, 1937 (16 U. S. C. 568b), (not to exceed **[\$950,534] \$785,034**) and the provisions of sections 4 (not to exceed **[\$83,700] \$1,074,600**) and 5 (not to exceed **[\$65,766] \$215,766**) of the Act approved June 7, 1924 (16 U. S. C. 567-568), and Acts supplementary thereto; [in all, not to exceed **\$1,100,000] \$2,075,400**, of which not to exceed **[\$64,653] \$68,470** may be expended for personal services in the District of Columbia. (16 U. S. C. 564, 568a, 581; Act of Oct. 26, 1949, Public Law 392; Department of Agriculture Appropriation Act, 1950.)

Appropriated 1950, **\$1,100,000** Estimate 1951, **\$2,075,400**

*Excludes \$24,600 for activities transferred in the estimates to "Salaries and expenses, Forest Service, forest and range management investigations." The amounts obligated in 1949 and 1950 are shown in the schedule as comparative transfers.

Acquisition of Lands for National Forests, Department of Agriculture—

Comparative transfer from "Printing and binding, Department of Agriculture"	1,000		
Total obligations	487,955	401,000	700,000

PROGRAM AND PERFORMANCE

Lands for national forests are acquired to protect the watersheds of navigable streams and to increase the production of timber. The National Forest Reservation Commission, composed of the Secretaries of the Army, Interior, and Agriculture, two Senators, and two Representatives, has established 78 national forest purchase units in 33 States, located mainly in the East and in localities where rehabilitation of the lands through private enterprise seemed questionable. It is planned to acquire, within these purchase units, only lands most valuable for watershed protection and timber production.

One-half of the needed forest land within established national forest purchase units has been acquired, leaving 23 million acres of similar forest land to be acquired. The present value of all forest lands purchased under this authorization to date, about \$180,000,000, is estimated to be twice their cost, including the expense of acquisition.

The proposed program for 1951 will permit acquisition of additional tracts and acreage in the interest of watershed protection, timber production, and attendant public forest land values.

APPROPRIATION TEXT

ACQUISITION OF LANDS FOR NATIONAL FORESTS

Weeks Act: For the acquisition of forest lands under the provisions of the Act approved March 1, 1911, as amended (16 U. S. C. 513-519, 521), **[\$401,000]**, to be available only for payment toward the purchase price of any lands acquired, including the cost of surveys in connection with such acquisition **[\$700,000]**, of which not to exceed **\$18,480** may be expended for personal services in the District of Columbia: *Provided*, That no part of such funds shall be used for the purchase of lands in the counties of Adair, Cherokee, and Sequoyah, in the State of Oklahoma, without the specific approval of the Board of County Commissioners of the county in which such lands are situated. (*Department of Agriculture Appropriation Act, 1950.*)

Appropriated 1950, **\$401,000** Estimate 1951, **\$700,000**

Acquisition of Forest Land, Superior National Forest, Minn.—

FUNDS AVAILABLE FOR OBLIGATION: Appropriation or estimate—1950, \$75,000; 1951, \$200,000.

PROGRAM AND PERFORMANCE

Forest lands are acquired in order to preserve the wilderness conditions of a part of the Superior National Forest in Minnesota, which contains one of the most outstanding combinations of lakes, islands, and primeval forest conditions of any area in the United States. Preservation of the wilderness conditions of this area necessitates consolidated public ownership and hence the acquisition of privately owned land within the area. There are approximately 43,000 acres of privately owned land within the specified area, of which 40,000 acres are planned for purchase.

PROGRAM AND PERFORMANCE

Certain counties in California, Nevada, and Utah have consented to the use of all or portions of the national forest receipts they would normally receive for their road and school funds for the purchase by the Government of privately owned lands within the national forests to aid in the control of soil erosion and flood damage. Since 1935 the Congress has enacted seven laws authorizing the purchase of such land in nine national forests in the aforementioned States. Thus far, 122,895 acres have been acquired and the purchase of an additional 460,300 acres is considered necessary to meet the objectives of the program. Provision is made in the 1951 budget for the continuation of this program on the same level as authorized in the fiscal years 1949 and 1950.

PROGRAM AND PERFORMANCE

Three supplemental appropriations were made in the fiscal years 1948, 1949, and 1950 to repair damage to national forest improvements caused by the floods of May and June 1948 in the Pacific Northwest and the floods of June 1949 in Virginia, West Virginia, Georgia, and North Carolina. The major portion of these appropriations is used for the reconstruction, replacement, and repair of roads, bridges, and trails. Smaller amounts are used for repair of telephone lines, fences, campgrounds, and buildings.

PROGRAM AND PERFORMANCE

Funds are advanced to the Forest Service by other Government agencies and by agencies within the Department of Agriculture for work which the Forest Service is equipped to perform.

OBLIGATIONS BY ACTIVITIES

Description	1949 actual	1950 estimate	1951 estimate
<i>Direct Obligations</i>			
1. Research and consulting services on sandwich materials, aircraft cargo floor panels, packaging and container problems, glues, plastics, core and bonding materials (Department of the Air Force)	\$174,971	\$90,216	
2. Restoration of damaged national forest lands at Camp Livingston, Camp Claiborne and Breezy Hill Artillery Range, Louisiana (Department of the Army)	93,347	49,916	
3. Research on glues for plywood and furniture, fiberboard in shipping containers, packaging and container problems, and nitration of cellulose (Department of the Army)	48,015	28,088	
4. Research on plywood, glues, laminated plastics, sandwich construction, core and bonding materials, packaging and container materials (Department of the Navy)	130,993	114,161	
5. Studies of stress concentration in non-isotropic materials, of effects of high and low temperatures on the properties of adhesives, of the strength and bonding of cellular cores for sandwich construction (National Advisory Committee on Aeronautics)	26,470	26,037	
6. Protection of Department of the Interior lands within National Forests (Department of the Interior)	82,895	1,907	
7. Reconstruction or relocation of National Forest improvements damaged or destroyed by activities of Department of Interior agencies (Department of the Interior)	12,555	10,611	
8. To cover cost of fire protection and for maintenance of smoke jumpers for use on forest fires on park-service land (Department of the Interior)	7,848	7,095	
9. Production of tree planting stock (Department of the Interior)	228	881	
10. Investigation of applications, and construction, maintenance and improvement of access roads to sources of raw materials (Department of Commerce, Public Roads Administration)	383	2,593	
11. Supervision of forest highway program (Department of Commerce, Public Roads Administration)	92,474	107,522	
12. Investigation and supervision of Federal Power Commission projects (Federal Power Commission)	2,145	3,597	
13. Program of investigations and research on building materials and systems (Housing and Home Finance Agency)	66,094	25

Permanent indefinite appropriation, general account:

Payments to School Funds, Arizona and New Mexico, Act June 20, 1910—

FUNDS AVAILABLE FOR OBLIGATION: Appropriation or estimate—1949, \$57,096; 1950, \$61,000; 1951, \$61,000.

PROGRAM AND PERFORMANCE

Each of the States of Arizona and New Mexico are reimbursed, as income for their common-school fund, in such proportion of the gross proceeds of all the national forests within those States as the area of land granted to the States for school purposes within the national forests bears to the total area of all national forests within the States. As soon after close of the fiscal year as the receipts from national forests and the area of school lands in the States of Arizona and New Mexico are determined, the payments are made to the States (act of June 20, 1910, 36 Stat. 562, 573).

OBLIGATIONS BY ACTIVITIES

Payments to school funds, Arizona and New Mexico, national forest fund—1949, \$57,096; 1950, \$61,000; 1951, \$61,000.

OBLIGATIONS BY OBJECTS

11 Grants, subsidies, and contributions—1949, \$57,096; 1950, \$61,000; 1951, \$61,000.

APPROPRIATION OR ESTIMATE

Appropriated (estimate) 1950, \$61,000 Estimate 1951, \$61,000

Permanent indefinite appropriations, special accounts:

Payments to States and Territories from the National Forests Fund—

FUNDS AVAILABLE FOR OBLIGATION: Appropriation or estimate—1949, \$5,983,424; 1950, \$7,719,490; 1951, \$7,500,000.

PROGRAM AND PERFORMANCE

In accordance with various statutes, 25 percent of all money received from the national forests, with minor exceptions, during any fiscal year is paid to the States and Territories in which the forests are located, for the benefit of public schools and public roads of the county or counties in which such national forests are situated. The amount of this appropriation varies each year in direct proportion to national forest receipts during the previous fiscal year (16 U. S. C. 500).

OBLIGATIONS BY ACTIVITIES

Payments to States and Territories from the national forests fund—1949, \$5,983,424; 1950, \$7,719,490; 1951, \$7,500,000.

OBLIGATIONS BY OBJECTS

11 Grants, subsidies, and contributions—1949, \$5,983,424; 1950, \$7,719,490; 1951, \$7,500,000.

APPROPRIATION OR ESTIMATE

Appropriated (est.) 1950, \$7,719,490 Estimate 1951, \$7,500,000

Total obligations.....	1,806,372	3,314,500	3,227,500

PROGRAM AND PERFORMANCE

Ten percent of moneys received from activities of the national forests during each fiscal year is available at the end thereof to the Secretary of Agriculture for the construction and maintenance of roads and trails within the national forests in the States from which such proceeds are derived (act of Mar. 4, 1913, 16 U. S. C. 50).

PROGRAM AND PERFORMANCE

All moneys received as contributions for cooperative work in forest investigations, the protection and improvement of the national forests, and the protection, reforestation, and administration of private lands are covered into the Treasury and constitute a trust fund. Such contributions include deposits received from timber purchasers to cover the cost to the United States of (1) disposing of brush and other debris resulting from cutting operations in sales of national forest timber; (2) sale-area betterment through planting, sowing, and timber stand

improvement; and (3) scaling services requested by purchasers in addition to those required by the Forest Service. This trust fund is appropriated and made available until expended, as the Secretary of Agriculture may direct, for expenses of the Forest Service in this work. Except for deposits by purchasers of national forest timber under 16 U. S. C. 576b, this fund is also available for refunds to the contributors of amounts paid in by them in excess of their share of the cost of such expenses (16 U. S. C. 490, 498, 572, 572a, 576b, 581; 31 U. S. C. 725s).

PROGRAM AND PERFORMANCE

Flood-control activities of the Department are directed toward the reduction of damages caused by floodwaters and sediment. The principal benefits accrue in the upstream areas and along tributary streams, but downstream reaches also benefit. About 75 percent of all floodwater and sediment damage is caused by the frequent floods on relatively small tributary streams.

Activities undertaken are of two types: (1) The examination and survey of watersheds and the preparation of reports setting forth the watershed conditions and recommending improvement programs; and (2) the installation of measures in the improvement programs approved by the Congress.

After review within the Department, by other concerned Federal agencies, and by the appropriate States, watershed survey reports are transmitted to the Congress for consideration. After the recommended programs are approved by the Congress, the Department then proceeds to install the authorized measures,

Floodwater and sediment damages are prevented or reduced by appropriate combinations of improvement measures, designed and installed on a subwatershed basis. These facilitate and increase the infiltration and storage of rainfall in the soil, and retard and control run-off so that it causes a minimum of flooding and of erosion from the surface, in gullies, and from stream banks on its way to the main river channels. The measures are complementary to the main-stream flood-control structures and works constructed by the Corps of Engineers and other agencies. They provide flood protection to upstream areas, reduce the volume of sediment that is deposited in river channels and main-stream reservoirs and reduce the peaks of main-stream floods.

In general, the measures which provide conservation benefits and help to increase production are installed by landowners and operators with technical assistance, some materials, such as grass seed, and the use of certain equipment, such as specially designed seed drills being provided by the Department. Measures which principally benefit downstream areas and communities are installed primarily at public (Federal, State, and the like) expense and, when installed on nonpublic lands, are maintained by landowners and other local interests. Measures on publicly owned lands are installed and maintained at public expense.

Preliminary examination or survey work was in progress on 62 watersheds in 1949, is scheduled for 64 watersheds in 1950, and is proposed for 41 individual or groups of watersheds in 1951. In the same year the Department proposes to initiate the preparation of a comprehensive agricultural plan for the development, use, and conservation of land, water, and forest resources, and for flood control in the Columbia Basin area. Acceleration of the works of improvement now in process of installation on 11 watersheds, for which programs have been approved by the Congress, is proposed for 1951.

APPROPRIATION TEXT

Flood control: For expenses necessary, in accordance with the Flood Control Act, approved June 22, 1936 (Public Law 738, Seventy-fourth Congress; 33 U. S. C. 701a), as amended and supplemented, to make preliminary examinations and surveys, and to perform works of [improvements, \$9,500,000] improvement, and to plan the agricultural phases of the development of the Columbia Basin area in accordance with the provisions of laws relating to the activities of the Department, including not to exceed [\$161,500] \$202,000 for personal services in the District of Columbia, [to be immediately available and] to remain available until expended, \$11,700,000, with which shall be merged the unexpended balances of funds heretofore appropriated or transferred to the Department for flood-control purposes: *Provided*, That no part of such funds shall be used for the purchase of lands in the Yazoo and Little Tallahatchie watersheds without specific approval of the county board of supervisors of the county in which such lands are situated, nor shall any part of such funds be used for the purchase of lands in the counties of Adair, Cherokee, and Sequoyah, in the State of Oklahoma, without the specific approval of the Board of County Commissioners of the county in which such lands are situated: *Provided further*, That the Secretary is hereby empowered to substitute other suitable measures and procedures in the Little Tallahatchie and Yazoo River watersheds in lieu of acquisition of land in those watersheds as originally contemplated. (Act of June 22, 1936 (Public Law 738, Seventy-fourth Congress), as amended and supplemented; Act of May 15, 1862 (5 U. S. C. 511-514); and other acts relating to the Department, including the Act of Apr. 27, 1935 (16 U. S. C. 590a); Act of June 29, 1935 (7 U. S. C. 427); Act of Feb. 29, 1936, as amended (16 U. S. C. 590i); Act of May 20, 1936 (7 U. S. C. 902); Act of July 22, 1937 (7 U. S. C. 1011); Department of Agriculture Appropriation Act, 1950.)

Annual definite appropriation:

Appropriated 1950, **\$9,500,000** Estimate 1951, **\$11,700,000****SOIL CONSERVATION SERVICE****Salaries and Expenses, Soil Conservation Service—****APPROPRIATION TEXT**

For expenses necessary to carry out the provisions of the Act approved April 27, 1935 (16 U. S. C. 590a-590f), which provides for a national program of erosion control and soil and water conservation, including not to exceed [\$983,000] \$1,004,000 for personal services in the District of Columbia, furnishing of subsistence to employees, operation and maintenance of aircraft, and the purchase and erection or alteration of permanent buildings: *Provided*, That the cost of any building purchased, erected, or as improved, exclusive of the cost of constructing a water supply or sanitary system and connecting the same with any such building, shall not exceed \$2,500 except where buildings are acquired in conjunction with land being purchased for other purposes and except for eight buildings to be constructed at a cost not to exceed \$15,000 per building: *Provided further*, That no money appropriated in this Act shall be available for the construction of any such building on land not owned by the

Government: *Provided further*, That in the State of Missouri where the State has established a central State agency authorized to enter into agreements with the United States or any of its agencies on policies and general programs for the saving of its soil by the extension of Federal aid to any soil conservation district in such State, the agreements made by or on behalf of the United States with any such soil conservation district shall have the prior approval of such central State agency before they shall become effective as to such district, as follows: (5 U. S. C. 511-512—establishing the Department of Agriculture; 565a; 7 U. S. C. 1387; 16 U. S. C. 590a-590f—establishing the Soil Conservation Service; 590q-1. The foregoing citations apply to all appropriation items under the Soil Conservation Service; Department of Agriculture Appropriation Act, 1950.)

PROGRAM AND PERFORMANCE

Studies are conducted to determine the character, causes, effects, and extent of soil and water loss and to develop, adapt, and improve conservation farming practices and methods which will adequately protect agricultural land and related water resources.

Development and improvement of soil and water conservation practices is accomplished by (a) laboratory and plot work to develop basic information, (b) experiment station field scale trials of practices, and (c) the adaptation and testing of practices for application over extensive areas in close cooperation with the staff working on the planning and application of conservation practices on the land. As successful practices are developed, they are incorporated into the regular soil and water conservation programs of the Service. This work is conducted in cooperation with the State agricultural experiment stations and other Department of Agriculture agencies and is correlated with the program of the Agricultural Research Administration.

1. *Erosion control investigations.*—Included in these studies are (1) the development of agronomic and vegetative means of controlling erosion, improving productivity, and conserving soil moisture; (2) development of improved tillage techniques, studies of the effect of farm crops, cropping systems, climate, and wind upon soil erosion and water loss, and development of control measures; (3) studies of crops and cropping methods which are adapted to areas that are too steep for ordinary farming and upon which erosion conditions are so critical that specialized protective measures are required; and (4) investigations of the effects of conservation farming upon the farmer's income and living standards.

2. *Drainage and water control investigations in humid areas.*—These studies include (1) the development and improvement of farm drainage methods, structures, and construction equipment; (2) work on various factors which

affect rates of surface run-off and flood flows; and (3) the development of engineering and mechanical controls of run-off, erosion, and siltation.

3. *Irrigation and water conservation investigations in western areas.*—This work includes (1) the development of engineering principles and methods of controlling and conserving irrigation water supplies and preventing erosion, siltation, and accumulation of alkali; (2) development and improvement of farm irrigation systems and structures; (3) development of efficient water utilization practices; and (4) snow survey investigations and analyses to determine available irrigation water supplies.

4. *Water regulation investigations to conserve the soil and reduce fire hazards in the Everglades region of Florida.*—These investigations include (1) the development and improvement of water management facilities and farming practices necessary to conserve the soil and water resources of the Everglades; (2) development of fire prevention practices; (3) making of topographic and land-use capability surveys; and (4) studies of run-off, seepage, and evaporation.

PROGRAM AND PERFORMANCE

The Soil Conservation Service carries out a program of planning and establishing soil and water conservation measures cooperatively on private agricultural land in conservation districts. These districts are local units of government organized under State laws and responsible to the landowners and operators in the districts and to the State legislatures. They are formed only in response to the petition and favorable referendum vote of the landowners and operators who are carrying on agricultural operations within the proposed district boundaries.

Technical and other assistance is rendered to conservation districts in the 48 States, Alaska, Hawaii, Puerto Rico, and the Virgin Islands in developing and carrying out locally adapted programs of soil and water conservation. This assistance includes (a) the making of conservation surveys to determine the use capabilities and conservation needs of each acre of farm and ranch land; (b) technical assistance in developing and applying conservation farm plans which allow for the best possible use of the farmer's land, labor, equipment, and financial resources; (c) the loan of special equipment which is needed to establish some conservation practices but which is not otherwise readily available; (d) the grant of limited quantities of trees, new or improved strains of grass or legume seed, and other conservation plant materials; and (e) stream-flow forecasts (developed from snow surveys) which serve as a basis for efficient seasonal utilization of water available for irrigation and other purposes in the Western States. It is estimated that approximately 2,464 conservation districts covering 90 percent of the total land

SOIL CONSERVATION SERVICE—Continued

Salaries and Expenses, Soil Conservation Service—Continued

Soil conservation operations—Continued

area of the United States will have been organized and will request assistance by the end of the fiscal year 1951.

In cooperation with other Federal and State agencies, limited technical assistance is also given to farmers and ranchers outside conservation districts.

APPROPRIATION TEXT

Soil conservation operations: For carrying out preventive measures to conserve soil and water, including such special measures as may be necessary to prevent floods and the siltation of reservoirs, and including the improvement of farm irrigation and land drainage, the establishment and operation of conservation nurseries, the making of conservation plans and surveys, and the dissemination of information, **[\$50,773,800] \$52,047,000: Provided,** That no part of this appropriation may be expended for soil and water conservation operations in demonstration projects. (*Department of Agriculture Appropriation Act, 1950.*)

Appropriated 1950, \$50,773,800 Estimate 1951, * \$52,047,000

* Excludes \$201,500 for activities transferred in the estimate to "Salaries and expenses, plant industry, soils, and agricultural engineering, Agricultural Research Administration," soils, fertilizers, and irrigation. The amounts obligated in 1949 and 1950 are shown in the schedule as comparative transfers.

Allotment to Soil Conservation Service from "Flood control, Department of Agriculture"

NOTE.—The following schedule covers obligations under an allotment from the appropriation "Flood control, Department of Agriculture."

PROGRAM AND PERFORMANCE

During the period 1938 to 1942, the Government acquired lands which had been in cultivation but which had become submarginal or unsuitable for cultivation because of location, natural infertility, loss of productivity through misuse, or other physical factors. These lands are being treated according to their use capability and needs in order to prevent further damage, achieve proper land use, and improve the agricultural economy of the communities affected. The Service administers 74 separate project areas, which cover 6,950,000 acres in 31 States. In addition, it administers the leases on 33 other areas covering 362,749 acres, which are managed by State agencies. Also included in the work carried on under this item is the settlement of certain boundary-dispute claims on the Sebastian-Martin grant lands in New Mexico.

1. *Land development.*—This work consists of applying conservation measures which will improve and maintain agricultural production on range and cultivated lands in order that the developed area may be used by local farmers and ranchers.

The following table shows estimated amounts of some of the more important items of development work accomplished in 1949 and planned for the fiscal years 1950 and 1951:

Type of work	Unit	Estimated completion		
		Fiscal year 1949	Fiscal year 1950	Fiscal year 1951
Seeding range and pasture	Acres	44,765	40,000	69,000
Seed bed preparation	do.	11,331	14,000	18,400
Liming	do.	514	1,000	1,400
Fertilizing	do.	2,568	2,800	4,300
Mowing and brushing	do.	7,375	6,500	10,800
Fencing	Miles	736	600	750
Stock water source	Number	131	100	130
Tree planting	Acres	2,611	4,000	4,000
Fireguards	Miles	104	150	150
Roads and trails	do.	52	40	40
Administrative buildings	Number	6	5	5

2. *Management of land and facilities.*—Included hereunder are various management and maintenance measures such as the repair and upkeep of structures and facilities; the handling of permits for use of the land; and fire detection and suppression. Recreational facilities are handled through concessionaires' contracts.

Revenue from the use of lands administered by the Service amounted to nearly a million dollars in the calendar year 1948, 25 percent of which was paid to the counties in which the lands are located to be used for school and road purposes.

Out of the possible 75 claims that may develop on the Sebastian-Martin grant lands which are now a part of the grant lands land utilization project, 27 parcels have been returned to private ownership and 24 others are now in process of determination as to eligibility for return.

It is planned in 1951 to survey and mark the boundaries of land-utilization projects administered by the Forest Service, where the surveys have not been made or where resurvey and remarking is necessary due to the appearance of flaws in title and the deterioration of previous boundary markers.

PROGRAM AND PERFORMANCE

The water conservation and utilization program is carried on cooperatively, on approved projects, with the Bureau of Reclamation which has responsibility for the construction of the primary water supply features, such as dams, reservoirs, and principal canals. The Service is responsible for developing efficient irrigation farming units for qualified farm families, which includes (a) the acquisition of such lands as are needed to readjust land ownership and operating unit patterns; (b) development of irrigable project lands for efficient use of water; (c) selection of qualified farm families as settlers, leasing of land for farming purposes prior to disposal, and consummation of the sale of farms; and (d) furnishing of technical guidance to farm operators in matters of efficient irrigation farming and soil conservation.

Of the 19 projects authorized for development, 4 are inactive, 5 have been completed, 3 are scheduled to be completed during the fiscal year 1950, and 7 are in various stages of completion.

The proposed program for 1951 contemplates continuation of development work at the same level as in 1950 on two of the projects and at an accelerated rate on two other projects in order to complete them as soon as possible.

1. *Land development.*—This covers detailed land classification, topographic surveys, clearing and land leveling, subdividing land into economic-sized farm units, and the construction of farm ditches, laterals, drains, and other water-control structures.

2. *Land management, settlement, and technical guidance.*—This work consists of protection and management of Government-owned lands and facilities and leasing of the farming units prior to development and disposal to private farmers. The selling price of the completed farm units is based on the earning power of the land and is calculated to return to the Federal Treasury an amount not less than the reimbursable cost of development with interest at 3 percent over a 40-year amortization period.

APPROPRIATION TEXT

WATER CONSERVATION AND UTILIZATION PROJECTS

For expenses necessary to carry into effect the functions of the Department under the Acts of May 10, 1939 (53 Stat. 685, 719), October 14, 1940 (16 U. S. C. 590y-z-10), as amended and supplemented, and June 28, 1949 (Public Law 132), relating to the construction, operation, and maintenance of water conservation and utilization projects, including personal services in the District of Columbia, to remain available until expended, \$969,900, which sum shall be merged with the unexpended balances of funds heretofore appropriated or transferred to said Department for the purposes of said Act.

Estimate 1951, \$969,900

Total obligations.....	22,232	50,832	107,977

PROGRAM AND PERFORMANCE

This program is concerned with the development by the Soil Conservation Service of irrigated and irrigable land on authorized projects for efficient application and use of irrigation water and is carried on in conjunction with similar work performed under the water conservation and utilization projects program. The work is financed from unobligated balances of funds that were appropriated to the Department of the Interior in the fiscal year 1939 and transferred to the Department of Agriculture for carrying on this work.

The program proposed for 1951 contemplates the use of the remaining balances of funds for continuation of development work on the Buford-Trenton, N. Dak., and the Rapid Valley, S. Dak., water conservation and utility projects.

Permanent indefinite appropriation, special account:

Payments Due Counties and Refunds, Submarginal Land Program, Farm Tenant Act—

FUNDS AVAILABLE FOR OBLIGATION: Appropriation or estimate—1949, \$266,168; 1950, \$247,500; 1951, \$243,500.

PROGRAM AND PERFORMANCE

These funds consist of revenues received during each calendar year from the use of submarginal lands held by the Secretary of Agriculture under title III of the Bankhead-Jones Farm Tenant Act, approved July 22, 1937. Payment of 25 percent of the net revenues received is made to the counties in which such land is situated, on the condition that they be used for school or road purposes, or both. Any excess amounts received for the use of such lands are refunded from this appropriation. The funds appropriated remain available for these purposes until expended.

PROGRAM AND PERFORMANCE

The agricultural conservation program is designed to conserve and maintain national agricultural resources by encouraging and assisting farmers in carrying out on their farms approved soil and water conservation practices over and above those which would be performed without such assistance.

This program, which is voluntary, is available to all farmers in the 48 States, Alaska, Hawaii, Puerto Rico, and the Virgin Islands. It is based upon conservation needs which are estimated on the basis of the physical characteristics of the land, climatic conditions, crops, and the extent of particular practices needed to prevent wind and water erosion, to conserve water for agricultural use and improve its utilization, and to maintain and improve soil fertility. Funds available for assistance are distributed among the States and insular possessions on the basis of their conservation needs.

Financial and other assistance is offered on individual farms for those practices which represent an orderly progress toward the accomplishment of conservation farming. Assistance, which averages less than 50 percent of the cost to the farmer of carrying out the practices, is in the form of materials, services, and reimbursement payments on approved conservation practices. Practices for which assistance is offered generally fall into four major classes: (1) Construction practices such as terracing to prevent erosion, leveling land to permit more efficient use of irrigation water; (2) establishing pastures of perennial grasses and other permanent cover; (3) growing annual cover crops, such as winter or annual legumes, to replace humus in the soil and to provide a cover to protect the land from wind or water erosion; and (4) applying minerals, such as lime and phosphate, to pasture and hay-land sods to aid in establishing cover that is essential in a sound system of farming.

The program is administered locally by farmer-elected county and community committees. Members of these committees are farmers operating in the communities they represent. The committees also assist in the formulation of the program, thus assuring a program consistent with local needs.

The 1950 crop year program, which will be financed from the appropriation for the fiscal year 1951, is similar to previous programs and is based upon recommendations of farmers, local and State committeemen, and soil and

CONSERVATION AND USE OF AGRICULTURAL LAND RESOURCES—Continued

Conservation and Use of Agricultural Land Resources, Department of Agriculture—Continued

crop specialists of the Federal and State agencies. Emphasis has been placed on the proper use of land which will be taken out of soil-depleting crops as a result of marketing quotas and acreage allotments. In addition, assistance will be offered for increasing seed production acreages of perennial range and pasture grasses or pasture legumes which usually are not grown commercially for seed or are grown only to a limited extent in relation to needs. It is anticipated that approximately 3,100,000 farmers will participate in the 1950 program, an increase of about 7 percent over the 1949 program, and that the volume and extent of practices carried out will increase materially.

In addition to making provision for meeting the costs of the 1950 program, the estimates propose an authorization for the formulation of a 1951 program at the same level as that for the previous year.

11 Grants, subsidies, and contributions—1949, \$149,041,175; 1950, \$230,994,818; 1951, \$257,735,496.

APPROPRIATION TEXT

To enable the Secretary to carry into effect the provisions of sections 7 to 17, inclusive, of the Soil Conservation and Domestic Allotment Act, approved February 29, 1936, as amended (16 U. S. C. 590g-590q), including personal services in the District of Columbia; not to exceed \$6,000 for the preparation and display of exhibits, including such displays at State, interstate, and international fairs within the United States; [and for the replacement of one passenger motor vehicle for use of the Production and Marketing Administration; \$257,043,439] \$285,000,000, to remain available until December 31 of the next succeeding fiscal year for compliance with the program of soil-building practices and soil- and water-conserving practices authorized under this head in the Department of Agriculture Appropriation Act, [1949] 1950, carried out during the period July 1, [1948] 1949, to December 31, [1949] 1950, inclusive: *Provided*, That not to exceed [\$25,846,439] \$27,430,752 of the total sum provided under this head shall be available during the current fiscal year for salaries and other administrative expenses for carrying out such program, the cost of aerial photographs, however, not to be charged to such limitation; but not more than [\$5,200,000] \$5,354,000 shall be transferred to the appropriation account, "Administrative expenses, section 392, Agricultural Adjustment Act of 1938": *Provided further*, That payments to claimants hereunder may be made upon the certificate of the claimant, which certificate shall be in such form as the Secretary may prescribe, that he has carried out the conservation practice or practices and has complied with all other requirements as conditions for such payments and that the statements and information contained in the application for payment are correct and true,

to the best of his knowledge and belief, under the penalties of title 18, United States Code: *Provided further*, That none of the funds herein appropriated or made available for the functions assigned to the Agricultural Adjustment Agency pursuant to the Executive Order Numbered 9069, of February 23, 1942, shall be used to pay the salaries or expenses of any regional information employees or any State information employees, but this shall not preclude the answering of inquiries or supplying of information at the county level to individual farmers: *Provided further*, That such amount shall be available for salaries and other administrative expenses in connection with the formulation and administration of the [1950] 1951 program of soil-building practices and soil- and water-conserving practices, under the Act of February 29, 1936, as amended (amounting to [\$300,000,000, of which not to exceed \$15,000,000 may be used for acreage allotments and marketing quotas] \$285,000,000, including administration, and formulated on the basis of a distribution of the funds available for payments and grants among the several States in accordance with their conservation needs as determined by the Secretary, except that the proportion allocated to any State shall not be reduced more than 15 percent from the [1946] distribution for the next preceding program year, and no participant shall receive more than \$2,500); but the payments or grants under such programs shall be conditioned upon the utilization of land with respect to which such payments or grants are to be made in conformity with farming practices which will encourage and provide for soil-building and soil- and water-conserving practices in the most practical and effective manner and adapted to conditions in the several States, as determined and approved by the State committees appointed pursuant to section 8 (b) of the Soil Conservation and Domestic Allotment Act, as amended (16 U. S. C. 590h (b)), for the respective States: [*Provided further*, That the Secretary may, in his discretion, from time to time transfer to the General Accounting Office such sums as may be necessary to pay administrative expenses of said office in auditing payments under this head:] *Provided further*, That the county agricultural conservation committee in any county with the approval of the State committee may allot not to exceed 5 percent of its allocation for the agricultural conservation program to the Soil Conservation Service for services of its technicians in formulating and carrying out the agricultural conservation program and the funds so allotted shall be utilized by the Soil Conservation Service for technical and other assistance in such county: *Provided further*, That such amounts shall be available for the purchase of seeds, fertilizers, lime, trees, or any other farming materials, or any soil-terracing services, and making grants thereof to agricultural producers to aid them in carrying out farming practices approved by the Secretary under programs provided for herein: *Provided further*, That no part of any funds available to the Department, or any bureau, office, corporation, or other agency constituting a part of such Department, shall be used in the current fiscal year for the payment of salary or travel expenses of any person who has been convicted of violating the Act entitled "An Act to prevent pernicious political activities", approved August 2, 1939, as amended, or who has been found in accordance with the provisions of title 18, United States Code, section 1913, to have violated or attempted to violate such section which prohibits the use of Federal appropriations for the payment of personal services or other expenses designed to influence in any manner a Member of Congress to favor or oppose any legislation or appropriation by Congress except upon request of any Member or through the proper official channels. (*Department of Agriculture Appropriation Act, 1950.*)

PROGRAM AND PERFORMANCE

This account has been established, pursuant to the Agricultural Adjustment Act of 1938, to facilitate the administration of programs assigned the Production and Marketing Administration. Funds available to that agency are transferred to this account in amounts estimated by the Secretary to be required in the Washington and State offices for carrying out such programs. The amounts so transferred are within the limitations established for administrative expenses under the respective appropriations from which such transfers were made.

PROGRAM AND PERFORMANCE

This account has been established, pursuant to the Agricultural Adjustment Act of 1938, to facilitate administration of programs assigned to Production and Marketing Administration county committees. Funds available to the Production and Marketing Administration are transferred to this account in amounts estimated by the Secretary to be required by the committees for carrying out the programs assigned to them.

OBLIGATIONS BY ACTIVITIES

PROGRAM AND PERFORMANCE

The sum of \$100,000,000 was appropriated, to remain available until expended, in accordance with the provisions of section 12 (a), title I, of the act of May 12, 1933, as amended (7 U. S. C. 612), to be available to the Secretary for administrative expenses under this title and the provisions of the Agricultural Marketing Agreement Act of 1937 (7 U. S. C. 608c-608d), and for payments authorized to be made under section 8.

It is anticipated that a small unobligated balance will be returned to the surplus fund of the Treasury during the fiscal year 1951.

PROGRAM AND PERFORMANCE

Acreage allotment and marketing quota programs are designed to assist in stabilizing the agricultural economy by preventing violent fluctuations in supplies, marketings, and prices of the basic commodities, wheat, cotton, corn, rice, tobacco, and peanuts.

Acreage allotments.—Production of the basic commodities in excess of needs not only results in the piling up of unmanageable surpluses but is a wasteful use of the Nation's agricultural soil and related water resources. Acreage allotments provide a fair means of making needed adjustments in crop production without sudden and extreme shifts in acreage, since they assign each grower his fair share of the responsibility of adjusting production to the prospective market. Acreage allotments do not constitute an enforced limitation on production; but if growers stay within their allotments, other control measures may not be required.

When it becomes necessary to make adjustments in production to prevent the accumulation of burdensome supplies, a determination is made of the number of acres which, based on normal or average yields, will supply the needs of domestic consumption, exports, and adequate reserves. Farmer-elected county committeemen, with the assistance of local committeemen, apportion the acreage available for allotment among eligible farms.

Under the Agricultural Adjustment Act of 1938, as amended, acreage allotments are required to be established when quotas are in effect and may be established even though marketing quotas are not proclaimed.

Marketing quotas.—Marketing quotas provide a means whereby farmers can effectively adjust marketings in line with demands so as to obtain fair prices and a fair share of the market available for the commodities they produce.

When it becomes necessary to make adjustments in marketings of the basic commodities, a determination is made of the amount needed to be produced which, when added to the supplies on hand, will provide a normal supply. The number of acres required to produce the normal supply is established, and the production from this acreage approximates the national marketing quota.

Within a specified time after proclamation of the national marketing quota a referendum is held of farmers engaged in the production of the commodity for which a quota is proclaimed. Quota programs become effective only if approved by two-thirds of the growers voting in a referendum.

If marketing quotas are in effect, the farmer who complies with the farm acreage allotment may market the entire amount of the commodity produced on the allotted acreage without penalty.

Marketing quotas are in effect on the 1949 crop of tobacco and peanuts. Present indications are that, in addition to tobacco and peanuts, quota programs will be

in operation on the 1950 corn, rice, and cotton crops and on the 1951 wheat crop.

PROGRAM AND PERFORMANCE

The sugar program is designed to protect the welfare of consumers and of those engaged in the domestic sugar-producing industry by assuring a supply of sugar at prices which will not be excessive to consumers and which will fairly and equitably maintain and protect the sugar industry of the United States.

Quotas and allotments.—Estimates of annual sugar-consumption requirements are developed for the continental United States and insular areas; quotas are established and prorated for domestic sugar-producing areas, Cuba, the Republic of the Philippines, and other foreign countries; when necessary, marketing allotments are established to afford each processor an opportunity to market his fair share of the area's quota and to avoid dis-

orderly marketing; and control is exercised over established quotas and marketing allotments.

Production controls.—Present production trends indicate that for the first time in a number of years it may be necessary to restrict sugar production on the 1951 sugar beet and mainland sugarcane crops, and possibly on the 1950 mainland cane crop. A program has already been planned for the 1949-50 Puerto Rican crop, and a similar program will be needed in the following year. The act provides that if production in any area will be greater than the quantities necessary to fill quotas and provide a normal carry-over inventory, restrictive proportionate shares, expressed in acres or sugar, shall be established. A restrictive program is designed to result in the production of sugar to meet the quota and provide a normal carry-over for the area. The quota for the area is divided among individual growers, and, as one of the conditions for payments, production must not exceed the proportionate share.

Wages and prices.—Fair and reasonable wages and prices are established, based on data obtained through surveys, investigations, and public hearings; terms and conditions of contracts between laborers and producers and between producers and processors also are established; standards of compliance with fair wage and price determinations are developed; and cost studies are conducted to determine comparative costs of production, returns, and profits to producers and processors and returns to laborers.

1. *Payments to sugar producers.*—Payments are made to sugarbeet and sugarcane producers who meet specified conditions of production, marketing, and employment. Special payments are also made for bona fide abandonment of planted acreage and crop deficiencies on harvested acreages.

2. *Operating expenses.*—This includes salaries and expenses of departmental and field personnel engaged in carrying out the provisions of the Sugar Act. The bulk of these operating expenses are incurred by the Production and Marketing Administration State and county offices for establishing production controls, making payments to sugar producers, and checking compliance with the act. Departmental personnel are primarily engaged in determining sugar consumption, requirements, establishing quotas and allotments, making fair wage and price determinations, establishing production and marketing controls where necessary, and formulating over-all policies and procedures in connection with the administration of the act.

An increased program is proposed for the 1950 sugar crop for additional payments to sugar producers resulting from increased production, for additional work in connection with restrictive proportionate shares incident to the 1951 sugar crop, and for the marketing allotment work in the 1950 and 1951 marketing years.

PROGRAM AND PERFORMANCE

Section 32 of the Agricultural Adjustment Act, as amended (7 U. S. C. 612e), appropriates an amount equal

to 30 percent of the customs receipts during each calendar year for use in the following fiscal year for the removal from the market of agricultural surpluses, and for the administration of marketing agreements and orders. The method for handling surpluses is determined at the time the need arises and is based upon the most effective means of relieving the market and utilizing the commodities through existing outlets or by developing new outlets.

1. *Direct Government purchases.*—The method most commonly used for preventing price collapses of perishable commodities and their ultimate waste is direct Government purchases for distribution to schools, institutions, and welfare agencies.

2. *Encouragement of exportation.*—This method is also used in disposing of surplus agricultural commodities. Differential payments are made to exporters to enable them to purchase surplus commodities on the domestic market and sell them on the world market at competitive world prices. In addition, under the provisions of the Foreign Assistance Act of 1948, these funds may be used to encourage exports of commodities purchased under Commodity Credit Corporation price support programs.

3. *Domestic utilization.*—Use of surplus agricultural products is further encouraged through programs which divert the surplus commodity to byproducts or new uses. Through this method of surplus removal, prices are not only maintained during the period of emergency surpluses, but new markets for the commodity are encouraged and established.

4. *Increased domestic utilization.*—Use of locally produced commodities is encouraged through supervisory assistance to food-preservation centers and school kitchen and institutional canneries on the preservation of surplus perishable foods for year-around use. Greater consumption of abundant foods is also promoted through the food trade, radio, and the press, thereby reducing the need for direct Government removal of surpluses or price support operations.

5. *Marketing agreements and orders.*—These serve to strengthen prices by establishing and maintaining orderly marketing conditions. These agreements and orders are in effect for milk, tree fruits, tree nuts, and vegetables. Milk marketing agreements establish minimum prices—depending on use—that handlers or distributors are required to pay producers. For tree fruits, tree nuts, and vegetables, marketing agreements designate the quantity, quality, and rate of shipment from the producing area to all markets, but not the price. These agreements constitute voluntary arrangements and are put into effect upon request from the industry only after extensive hearings, investigations, and referenda among producers. The administration of the program at the local level is financed by assessments upon handlers.

In accordance with the Agricultural Act of 1949, this appropriation will be used principally and, insofar as practicable, for surplus disposal operations in connection with perishable agricultural commodities.

It is anticipated that there will be a substantial reduction in custom receipts during the calendar year 1949, upon which the 1951 estimate is based, and that a total of approximately \$110,000,000 will be available for the foregoing purposes during the fiscal year 1951, a decrease of about \$15,000,000 below funds available in 1950.

PROGRAM AND PERFORMANCE

The national school lunch program is designed to improve the health and well-being of the Nation's children and broaden the market for agricultural food commodities.

Federal assistance, in the form of both funds and food, is provided to States and Territories for use in serving nutritious midday meals to children attending schools of high-school grades and under. Each State's portion of the total funds available is determined by means of a formula provided in the act. This formula takes into account the number of school children age 5 to 17 in the State and the relationship between the per capita income of the State and the average United States per capita income.

Federal funds paid to any State must be matched from sources within the State. The requirement for 1950 is one State dollar for each Federal dollar. In 1951, States must contribute \$1.50 for each Federal dollar.

The program in each State is operated according to the terms of an agreement entered into by the State educational agency (which administers the program) and the Department of Agriculture. Schools make application to the State agency and, if accepted for participation in the program, are reimbursed for a part of the food cost of each meal served.

In addition to the cash assistance, food is purchased and distributed to schools. In making these purchases, consideration is given to (1) the current market supply to assure that the more abundant foods are purchased, and (2) the nutritional value of the foods in order that they may assist in meeting the minimum nutritional requirements of the regulations governing the program. In addition, the national school lunch program provides the largest single outlet for surplus commodities purchased under the authority of section 32 of the Agricultural Adjustment Act, as amended.

On the basis of 1949 accomplishments, it is estimated that approximately 1,213,000,000 meals will be provided to an average of about 6,700,000 children in the fiscal years 1950 and 1951.

PROGRAM AND PERFORMANCE

The market news service, which is carried out cooperatively with 37 States and Hawaii, provides timely and reliable market information to farmers, consumers, and handlers of farm commodities. Information provided includes periodic reports on market prices, supply, demand, commercial movement, location, disposition, quality, and condition of specified agricultural commodities.

To secure this information, market news reporters interview buyers and sellers at markets during trading hours daily. They inspect records, observe transactions, collect reports of rail and truck unloads, warehousemen's stocks in storage, and make numerous contacts with other groups. The reports are issued in major producing and distributing centers through permanent and seasonal offices maintained in about 85 cities and towns.

Every available means of disseminating the market information is used—mail, press, radio, telephone, telegraph, bulletin board, and trade and farm publications of various kinds. In 1949, more than 28 million mimeographed reports were distributed; from 1 to 14 broadcasts were made daily (without cost to the Federal Government) over each of 1,147 different radio stations; and reports were reprinted regularly in more than 1,200 daily newspapers and in many weekly, semimonthly, and monthly farm papers.

The program for 1951 contemplates the establishment of a reporting service on truck shipments and the initiation or improvement of the service at 28 points and areas which report on livestock, fruits, vegetables, dairy, poultry, grain, and feed.

Total obligations	1,326,004	1,424,895	1,433,300

PROGRAM AND PERFORMANCE

An impartial, unbiased inspection and grading service is provided producers and dealers, upon request, to ascertain the quality of farm products. The quality of a product is indicated by an easily recognized official stamp or through the use of an official certificate.

In addition to its influence on producer returns, quality identification (1) enables producers and dealers to move to each market or outlet the grade of product desired; (2) encourages the production of higher quality products resulting in less waste in marketing; and (3) facilitates the settlement of disputes among buyers, sellers, carriers, and others.

This service is generally performed under about 180 cooperative agreements in effect with State or private agencies. Inspectors and graders are federally employed or federally licensed and supervised. They examine the commodity at receiving markets, shipping points, public warehouses, packing establishments, processing plants, or mills and by certificate or other means identify the class, quality, or condition of the product.

Fees are charged for inspection and grading work done under the authority of this item. Fees for commercial work performed under cooperative agreements are used to pay for salaries and other expenses of the inspection force. (See also “Expenses and refunds, inspection and grading of farm products.”) Revenue for commercial work not under cooperative agreement is deposited in the Treasury. In 1949, more than 95 percent of the total Federal cost of the service was covered by fees.

PROGRAM AND PERFORMANCE

Research and other activities under this appropriation are designed to point the way to an efficient marketing system needed to move large quantities of products from farm to consumer and deliver these goods in as good condition as possible with reasonable marketing costs. This work provides the basis for many of the marketing service and regulatory activities and includes the development of (1) standards and grades for commodities that will facilitate uniform and objective determination of quality and condition; (2) improved distribution methods and techniques; and (3) basic principles for improvement of transportation, storage and marketing facilities.

Work on transportation which vitally affects returns to farmers and costs to consumers is aimed at preventing unjustly high or discriminatory freight rates on farm commodities by informal discussions with carriers and formal hearings before the Interstate Commerce Commission.

Other activities include fiber and spinning tests of cotton samples submitted by cotton breeders and others to determine the cotton's suitability for use in various manufactured products. It is anticipated that 40 percent more tests will be made in 1951 than the 55,000 estimated for 1950. The additional samples submitted for tests result from increased interest in cotton quality improvement as a means of meeting competition from synthetic fibers. Fees are charged for the cotton testing service. Such collections are deposited in the Treasury and amounted to \$30,271 in 1949, or approximately 60 percent of that part of the appropriation for this purpose.

APPROPRIATION TEXT

Marketing farm products: For acquiring and diffusing among the people of the United States useful information relative to the needed supplies, standardization, classification, grading, preparation for market, handling, transportation, storage, and marketing of farm and food products, including the demonstration and promotion of the use of uniform standards of classification of American farm and food products throughout the world, for making analyses of cotton fiber as provided by the Act of April 7, 1941 (7 U. S. C. 473d), for carrying out the provisions of section 201 (a) to 201 (d), inclusive, of title II of the Agricultural Adjustment Act of 1938 (7 U. S. C. 1291), [and for coordinating nutrition services made available by Federal, State, and other agencies,] including not to exceed \$10,000 \$25,000 for employment at rates not to exceed \$100 per diem, pursuant to the second sentence of section 706 (a), of the Organic Act of 1944 (5 U. S. C. 574), as amended by section 15 of the Act of August 2, 1946 (5 U. S. C. 55a), and not to exceed \$20,000 for transportation and other necessary expenses including not to exceed \$10 per diem of persons serving without compensation while away from their homes or regular places of business; purchase of one passenger motor vehicle for use in the District of Columbia for replacement only; and not to exceed \$150 for newspapers, \$1,152,500 \$1,187,000: Provided, That the Secretary may make available to any bureau, office, or agency of the Department such amounts from this appropriation as may be necessary to carry out the functions for which this appropriation is made, and any such amounts shall be in addition to amounts transferred or otherwise made available to appropriation items in this Act. (5 U. S. C. 541b; 7 U. S. C. 415a, 415e, 423, 581-589; Department of Agriculture Appropriation Act, 1950.)

Appropriated 1950, \$1,152,500 Estimate 1951, * \$1,187,000

* Excludes \$30,300 for activities transferred in the estimates to "Salaries and expenses, human nutrition and home economics, Agricultural Research Administration." The amounts obligated in 1949 and 1950 are shown in the schedule as comparative transfers.

PROGRAM AND PERFORMANCE

Tobacco growers are furnished a service by which they are able to obtain returns for their tobacco commensurate with its quality. The program includes (1) establishing United States standards of quality within each of the different classes and types of tobacco; (2) inspecting and certifying, without charge, for farmers the grades of their tobacco according to official standards at auction markets designated after approval by two-thirds of those voting in a grower referendum; (3) making available for farmers and others reports on current average selling prices of tobacco by grade, other market information, and inventories by class and type; and (4) assisting farmers in sorting and preparing tobacco for market, including demonstrations of grades at farms and schools, exhibits at county fairs and farm conventions, and bulletins on the preparation of tobacco for market.

For each inspected tobacco auction sale there is a group of buyers representing different companies bidding for the tobacco and a group of tobacco graders (averaging three) for each set of buyers. In 1949, nearly 2 billion pounds of tobacco were inspected at 155 auction markets with 218 sets of buyers. No significant change in the volume of these activities is contemplated in the fiscal years 1950 and 1951.

PROGRAM AND PERFORMANCE

The Cotton Statistics, Classing, Standards, and Futures Acts serve and safeguard the interests of cotton farmers, ginners, merchants, spinners, and the ultimate consumers of cotton. Official cotton quality standards must be used as a basis for all transactions in interstate and foreign commerce when cotton and linters are sold by grade.

The services authorized by the acts include: (1) Preparing and distributing official United States standards for measuring the quality of cotton; (2) providing a classing service to identify the quality of cotton according to established standards so that returns to producers and others will be commensurate with quality; (3) collecting, preparing and disseminating, primarily for farmer members of organized cotton improvement groups, current

PRODUCTION AND MARKETING ADMINISTRATION—Continued

MARKETING SERVICES—Continued

Salaries and Expenses, Marketing Services—Continued

Cotton Statistics, Classing, Standards, and Futures Acts—Con. and timely market news on supplies, demand, and prices; and (4) preparing and distributing periodic reports on the quality of the cotton for the current crop and the amount carried over from previous crops.

Classing is performed by persons federally employed or federally licensed and supervised. Classing service is on a fee basis, except when performed for farmers who are members of organized cotton improvement groups and under the law are entitled to a free classing service. In 1949, revenues from fees and sale of samples amounted to \$1,325,488, which was deposited in the Treasury.

In 1950, about 10,800,000 classings are expected to be performed by Federal employees and approximately 4,000,000 by licensed classers. About 10,100,000 classings by Federal employees are anticipated in 1951.

PROGRAM AND PERFORMANCE

This work involves the enforcement of 11 regulatory laws designed primarily to protect farmers and others from financial loss or personal injury resulting from deceptive, careless, and fraudulent marketing practices. The specific activities and the problems to be solved vary in their details for each act, but the method of administering each follows the same general pattern and includes two or more of the following activities: (1) Licensing or registration; (2) supervision of operations of licensees to assure compliance with the acts; (3) collection and testing of samples; (4) development of standards of quality; (5) settlement of disputes; (6) handling of violations; and (7) collection of fees and charges.

Fees and charges authorized by the regulatory laws resulted in revenue of about \$435,000 for deposit in the Treasury in 1949. Revenue in 1950 and 1951 is expected to approximate the same amount.

Activities and the need for activity under these laws have generally expanded substantially in recent years because of the increase in production and marketing of farm products and an increasing recognition on the part of producers and handlers of the importance of these regulations. Activities under this item are shown under the following projects:

1. *Perishable Agricultural Commodities, Produce Agency, and Standard Container Acts.*—The purpose of these acts is to assure equitable treatment to farmers and others in the marketing of fresh and frozen fruits and vegetables by requiring that handlers give the farmers a true and correct accounting for commodities sent to the handler for sale in the market; that both seller and buyer live up to the terms of the contract; that no false or misleading statements be made for fraudulent purposes; that produce be paid for promptly; that goods must not be misbranded; and to bring about standardized sizes and capacities of baskets and hampers used in the marketing of fruits and vegetables. About 26,000 licenses are now in effect and complaints average about 55 per week. This estimate

does not contemplate any significant change in the level of this activity in 1950 or 1951.

2. *United States Grain Standards Act.*—This act provides that official United States grain standards of quality must be used as a basis for all transactions in interstate and foreign commerce when grains are sold by grade and move from or to any one of the 140 established inspection points, and requires that the standards be applied by nonfederally employed inspectors who may not have any financial interest in any grain business. Such inspectors must be federally licensed and supervised to assure uniform interpretation of the standards. Federal inspectors resample and regrade the grain in case of appeals from licensed inspectors' grades.

Greatly increased production and marketing of grain in recent years has resulted in a steadily increasing number of inspections performed. In 1949 these inspections totaled over 2,300,000, about 5½ percent of which were checked by Federal supervisors compared with 6½ percent in 1947. No significant change is expected in this activity in 1950 and 1951. The number of appeals requested in 1949 increased substantially. Many appeals were not formally requested and many of those which had been later withdrawn because of the Department's lack of facilities to perform this service. The increased program proposed in 1951 will enable the Department to provide a more adequate appeal service to which the public is entitled under the act.

3. *United States Warehouse Act.*—Its purpose is to provide safe storage of agricultural commodities for farmers and other users of public warehouses, and to assure the integrity of warehouse receipts as universally accepted high-grade collateral to be used in obtaining credit at reasonable interest rates.

On June 30, 1949, there were 1,372 warehouses licensed under the act and during the 1949 fiscal year an average of 2.3 inspections per warehouse were made to assure compliance by licensees. By June 30, 1951, over 1,500 warehouses are expected to be licensed but periodic inspections will probably average less than 2 per year.

4. *Federal Seed Act.*—This act protects farmers and other seed users by requiring that agricultural and vegetable seeds shipped in interstate commerce must be accurately and completely labeled, that the weed seed content be below prescribed percentages, that the seed must not be adulterated, and that no seed shall be imported until the Department has determined that it complies with the act.

Import actions increased from 5,800 in fiscal year 1948 to 8,300 in 1949. Present indications are that import actions will reach about 9,500 in 1950 and may increase still further in 1951. This substantial increase in import work—mandatory under the act—resulted in a reduction from 4,400 in 1948 to 2,500 in 1949 in the number of seed samples tested in connection with interstate shipments and will, of necessity, further reduce this activity in 1950. However, the increased program proposed in 1951 will return this seed-testing activity to about the 1949 level.

5. *Packers and Stockyards Act.*—This act is designed to assure livestock producers and others reasonable stockyard facilities and services at fair rates and to eliminate unfair trade practices at public livestock markets, and provides for the regulation of packers engaged in interstate commerce and of certain designated poultry markets. By June 30, 1949, activities were being supervised at 207 yards. During 1950 this supervision will be extended to about 100 additional yards and by June 30, 1951, is expected to be extended to all of the approximately 600 eligible stockyards.

6. *Naval Stores Act.*—This act protects the public against the sale of adulterated or mislabeled turpentine and misgraded and mislabeled rosin. Approximately 80 percent of the total production of gum rosin and 30 percent of the gum turpentine was inspected at point of production under this act during fiscal year 1949. A total of 135 samples were collected from lots shipped in interstate commerce, of which 13 were found to be in violation of the act. No significant changes in this activity are anticipated in 1950 or 1951.

7. *Federal Insecticide, Fungicide, and Rodenticide Act.*—This act safeguards agricultural producers and other users of economic poisons—insecticides, herbicides, fungicides, rodenticides and disinfectants—from injury to crops, livestock, and themselves, or loss through ineffective products. Before an economic poison may be sold in interstate commerce it must be submitted to the Department for registration to indicate its compliance with requirements of the act.

During fiscal year 1949, a total of 11,700 registrations were issued; 16,000 letters of criticism were written in connection with products submitted for registration; 1,550 samples were collected in interstate commerce for enforcement purposes; 236 actions were taken on violations; and some work was done in developing adequate methods for testing economic poisons. Over one-third of the facilities under this project in that year were used on registration work. Substantially less work will be necessary on this phase of activities in future years which will permit the shifting of much needed facilities to enforcement work and for the development of testing methods.

PROGRAM AND PERFORMANCE

Funds were appropriated to enable the Secretary of Agriculture to make parity payments to producers on the 1939 wheat, cotton, corn (in the commercial corn-producing area), rice, and tobacco crops, such funds to be available until expended.

Operations under this account are now limited to payment or adjustment of claims made by producers.

PROGRAM AND PERFORMANCE

This program was originally established in 1943 to provide an adequate supply of workers for the production and harvesting of agricultural commodities essential to the prosecution of the war. The emergency farm labor recruitment and placement phases of the program expired December 31, 1947. The unobligated balance of funds is available for the liquidation and disposal of any remaining farm labor supply centers, labor homes, labor camps or facilities. It is anticipated that all facilities will be disposed of during the fiscal year 1950, after which the unobligated balance will be available for return to the surplus fund of the Treasury.

PROGRAM AND PERFORMANCE

Under the authority of the appropriation "Market inspection of farm products," the Naval Stores Act, and title II of the Research and Marketing Act of 1946 the Secretary of Agriculture provides an inspection and grading service for farm products, upon the application of interested parties. This service is supported in part by the appropriations "Market inspection of farm products," and "Marketing regulatory acts," and in part by the fees charged for the service.

This schedule reflects the amount of fees received which are held in special trust accounts for the payment of salaries and other expenses necessary to providing the service (7 U. S. C. 91-99, 1621-1627).

PROGRAM AND PERFORMANCE

This fund is advanced by Commodity Credit Corporation for the payment of salaries and other expenses in connection with the classification of cotton, and the grading of wool or mohair offered for loan or purchase to Commodity Credit Corporation.

All cotton, wool, or mohair tendered to the Commodity Credit Corporation for loan or purchase under the price support programs is required to be graded or classed. This is necessary because the actual support value of a given lot of a particular commodity is dependent on the grade or class of that particular lot.

These advances are made to cover the costs of such grading and classing as requested by the Corporation.

In fiscal year 1950 it is expected that about 1,700,000 bales of cotton will be classed and the grade of approximately 130,000,000 pounds of wool and mohair will be determined under this item. The program for 1951 anticipates a continuation of the work on wool and mohair at a slightly higher level, but a substantial reduction in cotton classings under this item.

PROGRAM AND PERFORMANCE

This fund was advanced from Commodity Credit Corporation funds to cover expenses incurred in inspecting, sampling, sealing, testing, and other work incident to making loans on agricultural commodities under the commodity-loan and purchase-agreement programs. Moisture tests are final factors in determining grades and therefore loan eligibility of the harvested crop offered as collateral security. The use of this account was discontinued as of September 30, 1949, and activities of this nature will hereafter be carried on under a newly established special deposit account.

PROGRAM AND PERFORMANCE

This trust account was established to handle funds collected under Marketing Agreement No. 27 entered into by certain members of the distilled-spirits industry and the Secretary of Agriculture. It is not anticipated that any obligations will be incurred under this fund in fiscal year 1951.

Undistributed Cotton Price Adjustment Payments—

FUNDS AVAILABLE FOR OBLIGATION: Appropriation or estimate—1949, \$147; 1950, \$200; 1951, \$200.

PROGRAM AND PERFORMANCE

The 1935 cotton price adjustment payment for a farm was made to one person in trust for all producers on such farm who were entitled to share in the payment. In the event the trustee could not for any reason make distribution to any person entitled to share in the payment, this person's share was required to be refunded to the United States to be deposited into this trust fund until the time when proper distribution could be made.

OBLIGATIONS BY ACTIVITIES

Payments to producers—1949, \$147; 1950, \$200; 1951, \$200.

OBLIGATIONS BY OBJECTS

13 Refunds, awards, and indemnities—1949, \$147; 1950, \$200; 1951, \$200.

Total obligations.....	570,223	567,800	675,000

PROGRAM AND PERFORMANCE

The purpose of the Commodity Exchange Act is to prevent price manipulation and corners and to insure fair practice and honest dealing on commodity exchanges. Enforcement of the act requires supervision over 18 commodity exchanges designated as "contract markets" and is a continuing process involving:

1. *Licensing.*—Included under this head are (a) designation of commodity exchanges as contract markets; (b) annual registration of futures commission merchants and floor brokers; and (c) constant review of exchange rules and regulations.

2. *Supervision of futures trading.*—This category embraces (a) compilation, audit, tabulation and review of trade reports and current market analyses; (b) enforcement of speculative limits; (c) review of market news and letters; (d) maintenance of a quotation and ticker service; (e) analysis of cash commodity transactions; (f) cooperative activities with control committees of contract markets; (g) observance of floor trading; and (h) compilation and publication of market information.

3. *Audits.*—The prevention of misuse of customers' funds involves (a) audit and examination of books of futures commission merchants, and (b) analysis of brokers' financial statements.

4. *Investigations.*—Included in this work are (a) investigation of complaints and alleged and apparent violations; (b) special trade practice audits and surveys; (c) investigation of delivery practices; and (d) preparation and presentation of evidence of violations in administrative hearings and judicial proceedings.

5. *Establishment of speculative limits.*—This involves (a) detailed analyses of the operations of large traders in egg, soybean, wool top, and cottonseed oil futures in relation to price movements and price effects; (b) the holding of public hearings by the Commodity Exchange Commission regarding proposed limits; (c) review and evaluation

of evidence for and against proposed limits; and (d) the final determination and promulgation by the Commission of speculative trading and position limits.

During the fiscal year 1949, the work program emphasized basic enforcement activities. Transactions (purchases and sales in terms of contract units) in regulated commodities on exchanges under supervision totaled 7,273,000 with an estimated value of \$33,000,000,000. The number of special accounts (traders whose open contracts exceed a specified amount) reporting daily averaged 629. Trade practice surveys of all trading during 1 week on the New York and New Orleans Cotton Exchanges and three special surveys and calls designed to furnish detailed information regarding the composition of the futures markets in wheat, corn, soybeans, cottonseed oil, and wool tops were completed. This estimate contemplates a moderate increase in the level of activities during the fiscal year 1951.

Total obligations	115,119,630	156,746,700	195,090,000

PROGRAM AND PERFORMANCE

The Farmers' Home Administration (1) makes direct loans to farmers and insures loans to farmers for the purchase, enlargement, or development of family-size farms; (2) makes loans for farm operating expenses; (3) makes loans for water facilities in the arid and semiarid areas in 17 Western States; and (4) under the Housing Act of 1949, makes loans and grants for the improvement of dwellings and other farm buildings. Loans are made only to farmers unable to secure credit from other sources at reasonable rates. A county committee of three members, two of whom are farmers, must approve all these loans.

1. *Farm ownership loans.*—Direct farm ownership loans for the purchase or improvement of family-type farms are made to tenants, sharecroppers, farm laborers, owners of inadequate or underimproved farms, and eligible veterans up to the full normal value of the farm at 4-percent interest amortized over a period of not to exceed 40 years. Public Law 361, Eighty-first Congress, authorizing loans to homestead entrymen on public lands and those contracting for purchase of other lands of the United States on reclamation projects will bring about a substantial increase in the number of loans in the fiscal year 1951.

Loans for the purchase or improvement of family-type farms made by private lenders to eligible applicants are insured in amounts up to 90 percent of the normal value of such farms. Amortization is spread over a 40-year period at a 3-percent interest rate, plus one-half of 1 percent toward administrative expenses. The Administration services these loans, makes collections, and pays the lender.

The purpose of both direct and insured mortgage loans is to promote more secure occupancy of farms and farm homes; to correct the economic instability resulting from some present forms of farm tenancy; to preserve the family-type farm in America; and to correct maladjustments of population to the land.

NUMBER OF INITIAL LOANS

Type	1949 actual	1950 estimate	1951 estimate
Direct farm ownership loans	1,906	2,000	2,625
Insured mortgage loans	1,181	2,200	3,450

2. *Production and subsistence loans.*—In order that they may have opportunity for productive employment on the land and thus improve their economic situation, loans are made to provide reasonable farm and home operating credit and practical supervision to eligible farmers or stockmen, including veterans, who are unable to obtain

FARMERS' HOME ADMINISTRATION—Continued**Farmers' Home Administration, Department of Agriculture—Con.**

necessary assistance from any other source. Loans are made for the purchase of livestock, feed, seed, farm equipment and other farm needs in amounts up to \$3,500 for 1 to 5 years, at an interest rate of 5 percent. It is estimated that about 109,000 farmers will receive production and subsistence loans in 1950 and 1951. This is an increase of 8,368 loans over 1949 when 100,632 loans were made.

3. *Water facilities loans.*—Loans are made to provide, together with technical guidance, for the effective development and utilization of the limited water supplies available for agricultural use in the arid and semiarid areas of 17 Western States, thereby increasing production and improving the welfare and security of farm families. Loans are made to farmers and groups of farmers for the installation of ponds, reservoirs, wells, check dams, pumping installations, and other facilities for the effective use of water, such loans being available in amounts not in excess of \$100,000 for periods up to 20 years at 3 percent interest. The increase in the estimated number of loans in 1951 is due largely to loans to be made to persons making a homestead entry on public land or contracting for the purchase of other land of the United States in reclamation projects, as authorized by Public Law 361, Eighty-first Congress.

NUMBER OF INITIAL LOANS

	1949 actual	1950 estimate	1951 estimate
Individuals.....	759	1,335	2,135
Groups.....	8	25	25

4. *Farm housing and other farm buildings.*—(a) *Building loans.*—Loans are made to farm owners to provide them, their tenants, lessees, sharecroppers, and laborers with decent, safe, and sanitary living conditions and adequate farm buildings. Such loans are for periods up to 33 years at 4 percent interest to farm owners to enable them to construct, improve, alter, repair, or replace dwellings and other farm buildings on their farms. It is estimated that about 12,400 loans will be made in 1950 and about 26,400 in 1951, an increase of 14,000.

(b) *Enlargement and development loans.*—Loans for farm enlargement and development are made to farm owners applying for farm housing loan or grant assistance. These loans are made in connection with other farm housing loans or grants and are designed to provide the applicant sufficient income to support decent, safe, and sanitary housing and other farm buildings. Farm enlargement and development loans are made for periods up to 33 years at 4 percent interest. It is estimated that 3,000 such loans will be made in 1950 and about 7,000 in 1951.

(c) *Repair and improvement grants.*—Grants alone or grants in combination with loans are made to farm owners for minor improvements to dwellings and other farm buildings in order to make such buildings safe and sanitary and to remove hazards to the health of the occupant, his family, or the community. Such grants may not exceed \$500 and may be made only to owner occupants unable to repay loans for the cost of needed construction and repair. About 1,000 grants alone and 1,300 grants in combination with loans will be made in 1950. In 1951 it is estimated that about 2,500 grants alone and 4,500 grants in combination with loans will be made.

5. *Salaries and expenses.*—County supervisors are responsible for reviewing loan applications, securing the

approval of the county committee, and making the loans. Appraisers and engineers working on a State-wide basis assist county supervisors in making direct and insured farm ownership, water facilities, and farm housing loans. Farm and home plans are prepared by the borrower and the county supervisor for most loans. These farm and home plans provide the borrower with a sound working basis.

County office personnel are directly responsible for collecting and servicing outstanding loans. Borrowers with loans outstanding are classified for servicing purposes as either "active" or "collection-only." On-the-farm supervision is provided all "active" borrowers, as needed, during the life of the loan. Many borrowers are undertaking major adjustments in their farm and home operations, and this supervision and guidance represents the most important element in the loan servicing process. "Collection-only" borrowers are no longer being given farm and home supervision and their accounts are serviced only for purposes of collection. The compromise, adjustment, or cancellation of debts owed the Government, as authorized by law, is extensive, involving 106,534 borrowers in 1949 and an estimated 130,000 and 135,000, respectively, in the fiscal years 1950 and 1951.

Collections.—Principal and interest collections in 1950 and 1951 on loans made by the Farmers' Home Administration and its predecessor agencies are expected to be somewhat less than in 1949. This reduced volume of collections is due primarily to (1) a reduction in the amount of funds available for loans in recent years; (2) heavy pay-off in recent years of relatively good farm income; and (3) increased age of loans made by predecessor agencies. The following table shows the actual collections (principal and interest) in 1949 and the estimated collections in 1950 and 1951:

	1949 actual	1950 estimate	1951 estimate
Direct farm ownership loans.....	\$25,900,895	\$25,500,000	\$25,000,000

APPROPRIATION TEXT

For expenses necessary, including personal services in the District of Columbia, to carry into effect the provisions of titles I, II, and the related provisions of title IV of the Bankhead-Jones Farm Tenant Act, as amended (7 U. S. C. 1000-1032), the Farmers' Home Administration Act of 1946 (7 U. S. C. 1001, note; 31 U. S. C. 82h; 12 U. S. C. 371; 35 U. S. C. 535; 60 Stat. 1079, 1080); the Act of July 30, 1946 (40 U. S. C. 436-439), and; the Act of October 19, 1949 (Public Law 361); the Act of August 28, 1937, as amended (16 U. S. C. 590r-590x, 590z-5), for the development of facilities for water storage and utilization in the arid and semiarid areas of the United States; and the provisions of title V of the Housing Act of 1949 relating to financial assistance for farm housing (Public Law 171, approved July 15, 1949), as follows:

Loans: For loans (including payments in lieu of taxes and taxes under section 50 of the Bankhead-Jones Farm Tenant Act, as amended, and advances incident to the acquisition and preservation of security of obligations under the foregoing several authorities): Title I and section 43 of title IV (including payments in lieu of taxes and taxes under section 50), \$15,000,000 of the Bankhead-Jones Farm Tenant Act, as amended, \$20,000,000; title II of said Act, \$85,000,000; the Act of August 28, 1937, \$3,000,000; \$5,000,000: Provided, That not to exceed the foregoing several amounts shall be borrowed in one account from the Secretary of the Treasury on the request of the Secretary of Agriculture, at such rate of interest as may be determined by the Secretary of the Treasury, but not in excess of 3 per centum per annum; and the Secretary of the Treasury is hereby authorized and directed to lend such sums to the Secretary upon the security of any obligations of borrowers from the Secretary under the provisions of said Acts: Provided further, That the Secretary may utilize proceeds from payments of principal and interest under such Acts to repay the Secretary of the Treasury the amounts borrowed therefrom for the purposes of such Acts: Provided further, That for the purpose of making loans pursuant to [this paragraph] the foregoing authority, the Secretary of the Treasury is authorized to use as a public-debt transaction the proceeds from the sale of any securities issued under the Second Liberty Bond Act, as amended, and the purposes for which securities may be issued under that Act are extended to include such loans to the Secretary: Provided further, That repayments to the Secretary of the Treasury on such loans shall be treated as a public-debt transaction; and title V of the Housing Act of 1949 (except loans under 504 (b)), to be borrowed from the Secretary of the Treasury in accordance with the provisions of section 511 of said Act, \$50,000,000, to remain available until expended.

Grants and loans: For grants for the purpose of section 504 (a) and for loans under section 504 (b) of the Housing Act of 1949, \$5,000,000, to remain available until expended.

Salaries and expenses: For the making, servicing, and collecting of loans, insuring, and insured mortgages, the servicing and collecting of loans made under prior authority, and the liquidation of assets transferred to Farmers' Home Administration pursuant to the Farmers' Home Administration Act of 1946, \$23,649,000 and the extension of financial assistance under the Housing Act of 1949, including personal services in the District of Columbia, \$30,000,000, together with a transfer to this appropriation item of not to exceed \$40,000

\$80,000 of the fees and administrative expense charges made available by subsections (d) and (e) of section 12 of the Bankhead-Jones Farm Tenant Act, as amended. (Department of Agriculture Appropriation Act, 1950.)

Appropriated 1950, \$23,649,000 Estimate 1951, \$35,000,000

* Includes \$9,637,000 for activities previously carried under appropriations as follows: "Grants and loans, farm housing, Department of Agriculture" \$5,000,000 "Salaries and expenses, farm housing, Department of Agriculture" 4,637,000 The amounts obligated in 1950 are shown in the schedule as comparative transfers.

PROGRAM AND PERFORMANCE

This account has been established pursuant to sections 11 (a) and 12 (e) (2) of the Farmers' Home Administration Act of 1946, approved August 14, 1946 (Public Law 731), which authorized the appropriation of not to exceed \$25,000,000 for the establishment of such fund. The sum of \$1,000,000 was provided in the Department of Agriculture Appropriation Act, 1948, as an initial appropriation, which is supplemented by initial and annual charges collected from insured mortgagors and such initial fees for inspection, appraisal, and other charges as the Secretary of Agriculture finds necessary. One-half of the initial and annual charges collected from insured mortgagors as the premium for insurance and such amounts as shall be appropriated under section 11 (a) are available for payments with respect to insured mortgages under sections 12 and 13 of said act. The other one-half of the initial and annual charges shall be administrative expense charges, and together with such initial fees for inspection, appraisal, and other charges as the Secretary may determine are available for administrative expenses in carrying out the provisions of said act relating to mortgage insurance.

OBLIGATIONS BY ACTIVITIES

Payment of delinquent installments to mortgagees—1949, \$1,141; 1950, \$11,000; 1951, \$16,000.

OBLIGATIONS BY OBJECTS

16 Investments and loans—1949, \$1,141; 1950, \$11,000; 1951, \$16,000.

PROGRAM AND PERFORMANCE

These funds were made available to June 30, 1949, by the Second Deficiency Appropriation Act, 1948, to provide assistance to farmers whose property was destroyed or damaged by floods in the calendar year 1948. The First Deficiency Act, 1949, extended the availability of these funds to June 30, 1950, and included storms and other natural calamities occurring in either of the calendar years 1948 and 1949 as purposes for which loans could be made. Administrative expenses were limited to 4 percent of the amount of loans made.

PROGRAM AND PERFORMANCE

These funds are held in trust with the Department of Agriculture for use within the respective States for rural rehabilitation purposes. The various trusts were created under individual agreements with 43 State rural rehabilitation corporations. These corporations were originally established in the various States through grants made by the Federal Emergency Relief Administration. The only rural rehabilitation purpose to which these funds are now devoted is in the form of operating loans to farmers and stockmen. The liquidation of the trusts and disposition of the assets on hand is dependent upon legislation pending in the Congress (5 U. S. C. 67, 563).

PROGRAM AND PERFORMANCE

The Administration makes loans for electric distribution and generation and transmission systems to provide electric service to farms and nonfarm rural establishments. Such loans have been made primarily to cooperative associations of farmers, of which there were 966 on June 30, 1949. The loans must be self-liquidating within a period not to exceed 35 years and bear interest at the rate of 2 percent per annum. Loans are also made at 2 percent interest for shorter periods for financing consumer wiring and the acquisition and installation of electrical and plumbing appliances and equipment.

Fifty percent of the funds made available for loans in any given year is reserved for loans in the various States on the basis of the proportion that each State's unelectrified farms bear to the total number of farms in the country without central station electric service. The other 50 percent may be loaned at the discretion of the Administrator, but not more than 10 percent may be loaned in any one State or Territory. Significant data relative to the scope and progress of the program are as follows:

	1949 actual	1950 estimate	1951 estimate
Total loans, accumulative (since 1935)	\$1,830,318,858	\$2,230,000,000	\$2,630,000,000
Total advances on approved loans, accumulative	\$1,272,428,526	\$1,662,000,000	\$2,087,000,000
Loans, annual	\$448,859,597	\$400,000,000	\$400,000,000
Advances, annual	\$321,286,868	\$390,000,000	\$425,000,000
Amount of principal repaid, accumulative	\$117,933,472	\$138,500,000	\$160,500,000
Amount of interest paid, accumulative	\$84,654,021	\$100,000,000	\$117,000,000
Value of construction work in progress (end of year)	\$979,000,000	\$1,220,000,000	\$1,160,000,000
Miles energized, accumulative	839,685	1,020,000	1,210,000
Consumers connected, accumulative	2,778,180	3,300,000	3,850,000
Miles energized, annual	173,529	180,000	190,000
Consumers connected, annual	514,311	522,000	550,000

The level of operations is steadily increasing because of the cumulative effect of loans made in previous years. Now being felt are the problems which result from the increase in construction and operating volume.

Pursuant to Public Law 423, approved October 28, 1949, loans are also made for providing extension or improvement of telephone service in rural areas. These loans may be made to suppliers of rural telephone service, including commercial, mutual, or cooperative organizations, for the improvement, expansion, construction, acquisition, and operation of telephone facilities. The loans bear interest

at the rate of 2 percent per annum and must be liquidated within a period not to exceed 35 years. Funds were provided in the Supplemental Appropriation Act, 1950, to develop and initiate the new program. As soon as program plans have been more fully formulated, a supplemental estimate for 1950 and a budget amendment for 1951 will be submitted to Congress for consideration.

1. *Loan analysis and system development activities.*—Studies are made to determine economic feasibility including, where necessary, actual field appraisal of the rural areas involved in order properly to appraise loan applications. Since the program goal is to extend electricity to as many rural people as practicable, it is strongly recommended that borrowers follow a policy of area coverage. The Administration assists them in determining optimum boundaries, surveying their areas, locating or establishing power sources where necessary, and in general developing rural power systems that will assure adequate, dependable electric service to the maximum number of users on an economically sound basis.

The security of these loans depends upon the successful functioning of its cooperative borrowers as enterprises controlled by, and operated for, the benefit of their members. Assistance is given to borrowers in helping their consumers obtain maximum benefits from electric service—both through efficient use of electricity and through understanding of, and participation in, the affairs of their cooperatively owned enterprises.

2. *Construction and technical operating assistance.*—To assure that the facilities are designed and constructed properly and that the loan funds are expended in accordance with the purposes of the loans, the Administration engineers review and approve the design of facilities, engineering service contracts, construction contracts, check progress of construction, and approve completed construction. These activities assure that the construction conforms to engineering standards and is adequate to meet the needs of the rural consumers.

Most of the borrowers operate only distribution systems and purchase their power wholesale from commercial companies, public agencies, and municipalities. Problems relating to inadequate power supply in many areas have become increasingly pressing as the rural distribution systems have expanded and the use of electricity for farm production and in rural homes has grown. These problems are being dealt with through assisting borrowers in locating sources of power and in wholesale rate negotiations as necessary. If no source of adequate power exists or if a saving can be effected by means of a generating or transmission installation, loans may be made for such facilities. If such a loan is made, the Administration approves engineering and construction, as in the case of distribution facilities. The Administration is frequently called upon to provide assistance in solving technical operating problems including the handling of systematic maintenance of plants and lines and the study of voltage trends, to assure continuous, dependable, adequate service to rural consumers.

3. *Business management assistance.*—Business management assistance is furnished to cooperative borrowers on a selective basis of need or where it serves to protect the Federal loans. Particular attention is given to borrowers who are delinquent in their payments of principal and interest, who have unusually difficult management problems, or who have adverse financial trends. In addition, at the time that a manager begins his duties as executive head of the borrower's organization, he is provided direct assistance because of the wide range of prob-

lems he faces, many of which are not paralleled in usual management experience.

4. *Auditing, loan accounting, and collecting.*—These functions include: (a) maintenance of all accounting records concerned with loan funds; (b) examination and approval of requisitions for advances of loan funds; (c) computation and recording of principal and interest billings and collections; (d) assistance to borrowers in establishing proper books of account and maintaining sound accounting practices; and (e) auditing of borrowers' accounting records. To reduce the work load of this activity, the more firmly established borrowers—representing roughly 20 percent of the total number—have since 1948 been asked to employ certified public accountants for auditing their general accounts. The Administration has continued to audit all borrowers' construction fund accounts.

5. *Technical standardization.*—The progress of rural electrification has been aided substantially by the encouragement and development of improved and standardized methods and devices in the field of power system design, construction, and operation. Such standards, which include the type pole-line assemblies used, have proved essential to economical construction, operation, and use of electric facilities in rural areas. The work includes analysis and investigation of materials and equipment used, or proposed to be used, by the Administration's borrowers and the evaluation of the performance of power system equipment under actual service conditions. Projects of the technical activity are concerned, for example, with such problems as methods of preventive maintenance for the rural systems. On these and numerous other technical problems, the Administration not only serves as a clearing house for information but in some cases stimulates and coordinates research and development by other agencies.

PROGRAM AND PERFORMANCE

This trust account has been established to refund to farmers and others any excess amounts deposited into the Treasury for the purchase of aerial or other photographs, mosaics, and maps which have been obtained in connection with the authorized work of the Department. By the act of February 16, 1938, the Department is authorized to sell these reproductions at not less than their estimated cost. Funds received for the purchase of such reproductions are deposited into the Treasury, and when the actual costs are determined, the amounts deposited in excess of such costs are refunded to the purchasers from this account (7 U. S. C. 1387).

OBLIGATIONS BY ACTIVITIES

Refund of excess deposits—1949, \$1,119; 1950, \$1,100; 1951, \$1,029.

GENERAL PROVISIONS

APPROPRIATION TEXT

SEC. 301. Within the unit limit of cost fixed by law the lump-sum appropriations and authorizations made for the Department under this Act shall be available for the purchase of passenger motor vehicles, and for the hire of such vehicles, necessary in the conduct of the work of the Department outside the District of Columbia, but the number of such vehicles purchased or otherwise acquired for all the activities of the Department for which appropriations and authorizations are made under such Act shall not exceed [two-thirds of] the total number indicated for purchase by the Department under the statements of proposed [expenditures] obligations for purchase and hire of passenger motor vehicles in the Budget: *Provided*, That any such number shall be increased proportionately (as nearly as may be) as the amount appropriated or made available under the particular heading involved may exceed the budget estimate].

SEC. 302. Provisions of law prohibiting or restricting the employment of aliens shall not apply to (1) the temporary employment of translators when competent citizen translators are not available; (2) employment in cases of emergency of persons in the field service of the Department for periods of not more than sixty days; and (3) employment under the appropriation for the Office of Foreign Agricultural Relations.

SEC. 303. Appropriations and authorizations made in this Act shall be available for health service programs as authorized by law (5 U. S. C. 150).

SEC. 304. Funds available to the Department during the current fiscal year shall be available for the payment of *tort* claims pursuant to [section 403 of the Federal Tort Claims Act] law (28 U. S. C. 2672).

SEC. 305. No part of any appropriation contained in this Act, or of the funds available for expenditure by any corporation included in this Act, shall be used to pay the salary or wages of any person who engages in a strike against the Government of the United States or who is a member of an organization of Government employees that asserts the right to strike against the Government of the United States, or who advocates, or is a member of an organization that advocates, the overthrow of the Government of the United States by force or violence: *Provided*, That such administrative or supervisory employees of the Department as may be designated for the purpose by the Secretary are hereby authorized to administer the oaths to persons making affidavits required by this section, and they shall charge no fee for so doing: *Provided further*, That for the purposes hereof an affidavit shall be considered *prima facie* evidence that the person making the affidavit has not contrary to the provisions of this section engaged in a strike against the Government of the United States, is not a member of an organization of Government employees that asserts the right to strike against the Government of the United States, or that such person does not advocate, and is not a member of an organization that advocates, the overthrow of the Government of the United States by force or violence: *Provided further*, That any person who engages in a strike against the Government of the United States or who is a member of an organization of Government employees that asserts the right to strike against the Government of the United States, or who advocates, or who is a member of an organization that advocates, the overthrow of the Government of the United States by force or violence and accepts employment the salary or wages for which are paid from any appropriation or fund contained in this Act shall be guilty of a felony and, upon conviction, shall be fined not more than \$1,000 or imprisoned for not more than one year, or both: *Provided further*, That the above penalty clause shall be in addition to, and not in substitution for, any other provisions of existing law: *Provided further*, That nothing in this section shall be construed to require an affidavit from any person employed for less than sixty days for sudden emergency work involving the loss of human life or destruction of property, the payment of salary or wages may be made to such persons from applicable appropriations for services rendered in such emergency without execution of the affidavit contemplated by this section.

SEC. 306. Limitations on amounts to be expended for personal services under appropriations in this Act shall not apply to lump-sum leave payments pursuant to the Act of December 21, 1944 (5 U. S. C. 61b-e).

SEC. 307. Funds available to the Department of Agriculture may be used for printing and binding, including the purchase of reprints of scientific and technical articles. (Department of Agriculture Appropriation Act, 1950.)

PURPOSE AND FINANCIAL ORGANIZATION

A statement describing in detail the creation, purposes, authorities, and financial structure of the Corporation under its Delaware charter was contained in the budgets for the fiscal years 1947 and 1948. In accordance with the provisions of the Government Corporation Control Act, a Federal charter was granted the Corporation by the Commodity Credit Corporation Charter Act (Public Law 806, 80th Cong., approved June 29, 1948). Under section 16 of that act, all assets, liabilities, and obligations of the Delaware Corporation were transferred to the newly created Federal Corporation on July 1, 1948. The Delaware Corporation was dissolved on September 15, 1948.

The Corporation engages in buying, selling, lending, and other activities with respect to agricultural commodities, the products thereof, foods, feeds, and fibers, for the purpose of stabilizing, supporting, and protecting farm income and prices, assisting in the maintenance of balanced and adequate supplies of such commodities, and facilitating the orderly distribution thereof.

These purposes involve not only the general activities of the Corporation, such as the price support and supply programs, but also specific operations directed by the Congress, such as operations to obtain the benefits and fulfill the obligations of the United States under the International Wheat Agreement, and the advancing of funds for other specified departmental activities.

The Corporation has an authorized capital stock of \$100,000,000, all of which is held by the United States. In addition, the Corporation has the authority to borrow \$4,750,000,000 on the credit of the United States. On June 30, 1949, borrowings outstanding amounted to \$1,678,352,994. A statement of the Corporation's financial condition is shown immediately following the narrative material (statement C).

Public Law 85, Eighty-first Congress, approved June 7, 1949, amended the Charter Act to provide among other things that:

1. The Corporation shall have power to acquire personal property necessary to the conduct of its business but shall not have power to acquire real property or any interest therein except that it may (a) rent or lease office space necessary for the conduct of its business and (b) acquire real property or any interest therein for the purpose of providing storage adequate to carry out effectively and

efficiently any of the Corporation's programs, or of securing or discharging obligations owing to the Corporation, provided that no refrigerated cold-storage facilities shall be constructed or purchased except with funds specifically provided by Congress for that purpose.

2. The Commodity Credit Corporation is authorized, upon terms and conditions prescribed or approved by the Secretary of Agriculture, to accept strategic and critical materials produced abroad in exchange for agricultural commodities acquired by the Corporation.

3. The management of the Corporation shall be vested in a board of directors subject to the general supervision and direction of the Secretary. The Secretary shall be an ex officio director and shall serve as chairman of the board. The board shall consist of six members (in addition to the Secretary of Agriculture), who shall be appointed by the President by and with the advice and consent of the Senate.

4. In addition to the board of directors, there shall be an advisory board reflecting broad agricultural and business experience in its membership and consisting of five members who shall be appointed by the President, and who shall serve at the pleasure of the President. Not more than three of such members shall belong to the same political party.

5. The Secretary shall appoint such officers and employees as may be necessary for the conduct of the business of the Corporation, define their authorities and duties, delegate to them such of the powers vested in the Corporation as he may determine, and require that such of them as he may designate be bonded and fix the penalties therefor.

Title I of the Agricultural Act of 1948 (Public Law 897, 80th Cong., approved July 3, 1948) continued, with some modifications, the price support policies that were in effect in prior years through the calendar year 1949 in the case of nonbasic commodities, and through June 30, 1950, in the case of basic commodities and wool. The Agricultural Act of 1949 (Public Law 439, 81st Cong., approved Oct. 31, 1949), which superseded title II of the Agricultural Act of 1948, established the price support policies which are effective with respect to those agricultural commodities for which the marketing year or season commences on or after January 1, 1950, except to the extent that the Secretary may elect to place its provisions in effect at an earlier date without reducing the level of price support under operations already undertaken or announced.

The Economic Cooperation Act of 1948 (Public Law 472, 80th Cong., approved Apr. 3, 1948) established policies concerning the disposition of commodities acquired by the Corporation in its price support program for foreign recovery purposes. The provisions of these acts and the effects thereof are discussed under the price support program.

ANALYSIS OF BUDGET PROGRAMS

The budget of the Corporation for the fiscal year 1951 is based on six types of programs carried out under its charter and other statutory authority. These programs are:

1. Price support program.
2. Supply program.
3. Foreign purchase program.
4. Commodity export program.
5. Storage facilities program.
6. Loan to Secretary of Agriculture for agricultural conservation purposes.

In order to provide adequate storage to carry out its price support program, it was necessary to expand the Corporation's storage operations under the price support program during the fiscal year 1950. Due to the extent of the increase in and the importance of this storage operation, it has been determined that a new budgetary program should be established as of July 1, 1950; this program has been designated as the storage facilities program. For comparability, the storage activities for the fiscal years 1949 and 1950 have been shown under this program in the financial statements and supporting schedules rather than under the price support program.

Basically the programs carried out by the Corporation are not entirely independent, since, in carrying out a primary objective of one program, the objective of another program may also be fully or partially attained. For example, purchases under the supply program may materially reduce the surplus of an individual agricultural commodity and in some instances make it unnecessary to carry out a price support operation in connection with that commodity under the price support program. Commodities acquired under the price support program may be used to meet supply requirements or in a commodity export operation; if such commodities were not so disposed of, they would have to be held by the Corporation until other suitable outlets could be developed.

In addition to the programs carried out by the Corporation, the Secretary of Agriculture under the authority of Public Law 271, Eightieth Congress, approved July 30, 1947, has determined that Corporation funds should be transferred to the appropriation for the eradication of foot-and-mouth and other contagious diseases of animals. It is anticipated that the Corporation will be fully reimbursed for all transfers of funds from sales proceeds of canned meat procured in Mexico from funds so transferred and from appropriations made for the eradication of foot-and-mouth disease. As of October 31, 1949, transfers under this authority amounted to \$111,695,000; reimbursements amounting to \$83,412,704 have been applied as a credit against the transfers made. These reimbursements consisted of sales proceeds in the amount of \$24,012,704 and total payments of \$59,400,000 from appropriations made to the Secretary of Agriculture.

BASIC ASSUMPTIONS

Budget estimates for operations of the Corporation during the fiscal years 1950 and 1951 reflect a continuation of high production and domestic consumption levels and a continued need for large quantities of food and agricultural products in foreign countries. The 1951 budget is based on the anticipation that the 1950 production will continue above prewar levels but will be somewhat lower than the record and near record crops of 1948 and 1949 due to reduced acreage and yields somewhat below the recent record yields. Reductions in acreage are based on the assumption that acreage allotments or marketing quotas will be in effect for all basic crops and that acreage allotments will be in effect for some crops of nonbasic commodities. It is also assumed that total agricultural production of 1949 and 1950 crops in western Europe will be somewhat below prewar levels and that food imports into western Europe from eastern Europe will increase slightly.

It is also assumed that national income and industrial activity will decrease slightly below 1949 levels in the

COMMODITY CREDIT CORPORATION—Continued

fiscal year 1950 and that the 1951 fiscal year levels will be maintained very close to the 1949 levels. It is assumed that foreign demand for United States farm products in the fiscal year 1950 will be slightly below the fiscal year 1949 level and that this downward trend will be continued in the fiscal year 1951. In view of the unusually high levels of production achieved in the 1949 crop year and the assumed relatively high production during the 1950 crop year, agricultural prices may trend slightly downward; it has been assumed, however, that the general level of agricultural prices will be near parity.

The Corporation has discontinued the procurement under its supply program of many types of food and agricultural products in accordance with its policy of returning the domestic procurement of such commodities to commercial channels as rapidly as practicable. Commodities obtained as a result of price support activities will be used to a large extent in meeting the requirements of foreign countries; it is assumed, however, that the Corporation will be required to procure a limited number of commodities under its supply program to meet the needs of the occupied areas and the Economic Cooperation Administration in the fiscal year 1951. In exporting commodities obtained as a result of price support activities as well as supply program commodities, the Corporation uses normal channels of trade to the maximum extent practical.

Much of the procurement of agricultural commodities and products in foreign countries has been returned to commercial channels. It is assumed, however, that during the fiscal year 1951 it will still be necessary for the Corporation to procure some commodities, mostly sugar, in foreign countries for the Economic Cooperation Administration and to meet Army requirements for feeding of the occupied areas.

In considering these estimates, it should be recognized that it is very difficult to estimate requirements for the year beginning July 1, 1950, and ending June 30, 1951. Not only are they dependent upon weather conditions and the volume of agricultural production in this country but also upon weather and agricultural production in foreign countries, economic conditions generally, food needs in the occupied areas and other foreign countries, availability of dollar exchange, and many other complex and unpredictable factors. The effects of these factors on the volume of operations of the Corporation have been discussed in detail in prior budgets.

PRICE SUPPORT PROGRAM

The Commodity Credit Corporation supports the prices of agricultural commodities to producers. The purpose of this program is to protect and stabilize farm income and prices by assuring farmers a minimum price or by removing and disposing of burdensome surpluses. In some instances, support prices may be established at levels designed to obtain the expanded production of those agricultural commodities needed to meet domestic and foreign requirements. The Corporation carries out its price support program under its charter powers to support the prices of agricultural commodities (sec. 5a) and to remove and dispose of or aid in the removal or disposition of surplus agricultural commodities (sec. 5d). The price support program is carried out in conformity with legislation which, among other things, directs that these charter powers be used by the Secretary of Agriculture to support the price of certain agricultural commodities at or within prescribed levels.

Price support operations during fiscal year 1951 will be carried out under the Agricultural Act of 1949, which provides, among other things, that:

1. A new parity price formula shall be used, but, for the first 4 years, parity for the basic commodities shall be the higher of prices calculated by the old formula and the new formula.

2. There shall be mandatory price support for the 1950 crops of the basic commodities at 90 percent of parity if marketing quotas or acreage allotments are in effect; if marketing quotas are disapproved, no price support shall be available on tobacco, and price support shall be mandatory at 50 percent of parity on the other basic commodities.

3. There shall be mandatory price support for wool (including mohair); tung nuts; honey; early, intermediate, and late Irish potatoes; milk, butterfat, and the products of milk and butterfat; the minimum level of support varying among commodities.

4. Price support shall be discretionary for other agricultural commodities.

5. The Commodity Credit Corporation shall establish sales policies for basic agricultural commodities and storable nonbasic commodities which will not deter manufacturers, processors, and dealers from carrying normal inventories and shall not sell such commodities domestically at prices below the current support price, plus 5 percent, and plus reasonable carrying charges, unless the sale falls within one or more of the specific exceptions stated in the act. There is, in addition, a special section authorizing disposition (including donations) of food commodities which are threatened with deterioration or spoilage.

In carrying out its price support program, the Corporation observes its general policy of utilizing normal trade facilities to the fullest practicable extent consistent with the fulfillment of the Corporation's purposes and the effective and efficient conduct of its business. Thus, when loans are made to farmers, the Corporation makes use of local banks, cooperatives, and other private lending agencies by entering into contracts with such lending agencies under which the Corporation agrees to take over loans made in accordance with the Corporation's program on or before maturity upon request of the lending agencies. Service agreements are also entered into under which cooperative associations, banks, and other agencies may make and service loans as direct agents of the Corporation and be reimbursed for such services on a fee basis.

Section 112 (e) of the Foreign Assistance Act of 1948 (Public Law 472, 80th Cong., approved Apr. 3, 1948) provides that surplus commodities acquired by the Corporation through price support operations and determined by the Secretary of Agriculture to be available for use in furnishing assistance to foreign countries shall be used to the maximum extent practicable in furnishing assistance or relief to foreign countries. The Corporation is directed to sell such commodities at cost or, if lower, the domestic market price at the time and place of delivery. Section 112 (f) of the same act authorizes the Secretary of Agriculture to pay not to exceed 50 percent of such sales price from funds appropriated to carry out the purposes of section 32 of Public Law 320, Seventy-fourth Congress (7 U. S. C. sec. 612e), as amended. Section 411 of the Agricultural Act of 1949 provides, however, that section 32 funds shall be used principally for commodities other than basic and designated nonbasic commodities. During the fiscal year 1949, sales of peanuts, eggs, flaxseed, and dried fruits were made for foreign aid programs under this act. It is estimated that additional sales of commodities

will be made in the fiscal years 1950 and 1951 under these provisions.

Loans and purchases.—In the fiscal year 1949, the Corporation handled the largest volume of price support activities in any one single year since its inception primarily as a result of the record and near record 1948 crops. During this fiscal year loans made were valued at \$2,169,215,683; total purchases amounted to \$887,995,169, of which approximately \$165,000,000 represented deliveries under purchase agreements. An indicated high level of production of 1949 crops together with the large 1948 crop carry-overs are the basis for the continued high level of price support activities estimated for the fiscal year 1950.

The decrease in price support loans and purchases estimated for the fiscal year 1951 is based primarily on the decrease in production to be secured through acreage allotments and marketing quotas. Thus, it is estimated that loans made in the fiscal year 1951 will be valued at \$1,892,554,000 and that total purchases will amount to \$532,721,000.

Purchase agreements.—Purchase agreements permit producers to secure price support guarantees without the necessity of taking out a loan. These agreements now provide that the Corporation will purchase such quantities of eligible commodities as the producer elects to deliver within the maximum quantity stated in the agreements. These agreements are available during the same period that loans are available and the producer must declare his intention to deliver under the purchase agreement within the 30-day period preceding the loan maturity date. These purchase agreements have been made available for grains including in addition to the food and feed grains, rice, flaxseed, soybeans, peas, beans, and seeds.

During the fiscal year 1949 purchase agreements were executed covering commodities valued at \$622,034,817; it is estimated that purchase agreements will be executed on commodities valued at about \$490,000,000 in the fiscal year 1950 and \$400,000,000 in the fiscal year 1951. Deliveries of commodities covered by purchase agreements amounted to approximately \$165,000,000 in the fiscal year 1949 and it is estimated that producers will elect to deliver commodities valued at approximately \$273,000,000 in the fiscal year 1950 and \$220,000,000 in the fiscal year 1951.

Commodity stocks.—Price support commodity stocks on hand at the beginning of the fiscal year 1949 amounted to \$149,719,037. These had been increased to \$1,081,764,474 at the end of the fiscal year 1949 due primarily to the acquisitions of wheat, flaxseed, barley, beans, eggs, soybeans, and grain sorghums. It is estimated that price support inventories will increase from \$1,081,764,474 to \$2,193,691,000 during the fiscal year 1950. These estimated increases in inventories are due primarily to heavy collateral acquisitions from the large 1948 corn and cotton crops and purchases of flaxseed and dairy products. The inventory as of June 30, 1951, is estimated to be \$3,064,178,000. It is anticipated that collateral acquisitions from the large 1949 corn and cotton crops and the 1950 crop of wheat will be the principal reason for these increased inventory holdings.

SUPPLY PROGRAM

Under its supply program the Corporation procures foods, agricultural commodities and products thereof, and related materials for the purpose of supplying the requirements of United States Government agencies, foreign

governments, relief and rehabilitation agencies, and to meet domestic requirements. Foods, agricultural commodities and products thereof are procured under this program or aid is given in procurement thereof in order to facilitate distribution or to meet anticipated requirements during the periods of short supply. The Corporation, under this program, may also make available materials and facilities required in connection with the production and marketing of agricultural commodities.

The supply program is carried out under the authority contained in the Corporation's charter, particularly sections 5 (b) and 5 (c) thereof.

Operations under the Supply Program are conducted by the Corporation in accordance with procedures and policies reasonably calculated to assure the Corporation against loss. In this connection, the Congress by section 4 of the act of July 16, 1943 (15 U. S. C., 1940 ed., supp. V, 713a-9) specifically required that the Corporation be fully reimbursed for services performed, losses sustained, and operating costs incurred for commodities purchased or delivered to or on behalf of any other Government agency. Supply program participants are usually required to advance funds in an amount equal to the estimated costs of the commodities to be procured by the Corporation.

The volume of purchases under the supply program is expected to decrease substantially during the fiscal years 1950 and 1951; thus, supply program purchases which amounted to \$1,068,923,753 in fiscal year 1949 are estimated to amount to \$260,557,000 in 1950 and \$179,807,000 in 1951. These large reductions are based on the assumptions that foreign requirements will continue to decline, that commodities obtained as a result of price support operations will be used to meet the major portion of such requirements in both fiscal years and that the volume of commercial exports will increase.

FOREIGN PURCHASE PROGRAM

Under its foreign purchase program, the Corporation purchases abroad such foods, agricultural commodities and products thereof, and related facilities as are needed to meet both foreign and domestic requirements. These purchases have, in the past, consisted largely of commodities in short supply, notably certain fats and oils, sugar, and rice. Most of the purchases implemented the allocations of agricultural commodities in short world supply made by the International Emergency Food Committee. This program is carried out pursuant to the Corporation's charter authority, particularly sections 5 (b) and 5 (c) thereof.

Purchases of agricultural commodities and products in foreign countries amounted to \$120,625,621 during the fiscal year 1949, as compared to an estimated \$48,610,000 during the fiscal year 1950 and an estimated \$41,640,000 during the fiscal year 1951. The sharp decrease in estimated purchases for the fiscal year 1950 reflects the anticipated return of a substantial portion of foreign procurement activities to commercial trade channels. The anticipated procurement of fats and oils, and sugar during the fiscal year 1951 is based on the assumption that it may be necessary to purchase these commodities to meet the requirements of the Department of the Army and Economic Cooperation Administration.

COMMODITY EXPORT PROGRAM

Under its commodity export program, the Corporation may export, cause to be exported or aid in the develop-

COMMODITY CREDIT CORPORATION—Continued

ment of export markets for agricultural commodities and products. The purpose of the program is to retain and expand foreign markets for agricultural commodities and products thereof produced in the United States and to aid in the disposal of agricultural commodities and products thereof excess to domestic needs. This program is carried out under the authority contained in the Corporation charter, particularly sections 5 (d) and 5 (f).

Public Law 85, Eighty-first Congress, approved June 7, 1949, authorized the Corporation, among other things, to accept strategic and critical materials produced abroad in exchange for agricultural commodities acquired by the Corporation. It is anticipated that the Corporation will exchange the agricultural commodities for strategic and critical materials needed by the Munitions Board of the National Military Establishment; it is also anticipated for the purposes of these estimates that such materials will be turned over immediately to the Board; but the operation is not necessarily limited to strategic materials which the Board is prepared to accept for stockpiling. It has been assumed that the value of the strategic or critical materials established by the Secretary of the Treasury will be equal to the Corporation's investment in the agricultural products traded for such materials; if the Secretary of the Treasury sets a lower value on the strategic or critical materials than the value of the investment in the agricultural products, the Corporation will incur some losses.

With the approval of the International Wheat Agreement on June 13, 1949, the United States guaranteed to supply about 168 million bushels of wheat or wheat products expressed in terms of wheat to participating nations at prices not in excess of \$1.80 per bushel, Port Arthur basis.

Section 2 of the International Wheat Agreement Act of 1949 requires the President, acting through the Commodity Credit Corporation, to make available such quantities of wheat and wheat flour to importing countries, and at such prices, as may be necessary to exercise the rights, obtain the benefits, and fulfill the obligations of the United States and to achieve the benefits under the International Wheat Agreement.

The International Wheat Agreement Act of 1949 contemplates that appropriations will be made to cover the net cost to the Commodity Credit Corporation of carrying out the functions under that statute. In order that the implementation of the wheat agreement may not be impeded by delays in the making of appropriations or by the insufficiency of any appropriation made or of the payments therefrom, the Commodity Credit Corporation is expressly authorized to proceed in advance of such appropriations or payments and to utilize its capital funds and other assets in so doing.

Since the exact cost of operations under the agreement cannot be determined until the end of any fiscal year, the act authorizes the Corporation to use its general borrowing authority to pay current obligations and then request repayment for these costs from appropriations made specifically to cover the costs of the International Wheat Agreement. Pending such reimbursement, the Corporation is authorized to establish the net costs of operations under the agreement as a receivable. Such net costs would include, among other proper charges, the following:

1. For wheat acquired by the Corporation under the price support program and sold pursuant to the wheat

agreement, the amount by which the domestic market price exceeds the sales price for such wheat. The Corporation would not include as part of its net cost under the wheat agreement the amount by which its cost of wheat acquired under the price support program exceeds domestic market price.

2. For wheat or wheat flour acquired by the Corporation under its supply program and sold pursuant to the wheat agreement, the amount by which the cost to the Corporation exceeds the sales price for such wheat or wheat flour.

3. Payments made by the Corporation to exporters for wheat or wheat flour purchased on the open market and sold pursuant to the International Wheat Agreement.

4. Administrative expenses incurred by the Corporation in implementing the wheat agreement.

These estimated net costs for the fiscal years 1950 and 1951 amounting to \$82,385,000 and \$76,030,000, respectively, are shown in the statement of financial condition as "accounts receivable—International Wheat Agreement."

STORAGE FACILITIES PROGRAM

The Commodity Credit Corporation first acquired grain storage facilities in 1939 as a means of properly caring for grain delivered in settlement of loans made to producers. As the total carry-over of grain decreased during the war years, the need for these structures decreased and the Corporation sold storage bins, many of which were purchased by producers for use in storing commodities on the farms. The large increase in agricultural production during the war years was not accompanied by comparable increases in commercial storage. Moreover, the Federal charter initially granted to the Corporation placed restrictions upon the Corporation's authority which prevented it from expanding its storage facilities. Under these circumstances, adequate storage for increased stocks was not available when the record 1948 crops were harvested. In many instances these 1948 crop commodities were sold by producers at less than support level because of the inability of the producers to obtain adequate storage. The Corporation is acquiring or has under its control a significant portion of several 1948 crops which were placed under price support. The latest crop reports indicate that a high level of production will be continued in 1949 and that additional quantities of price support commodities will be acquired.

Public Law 85, Eighty-first Congress, approved on June 7, 1949, removed, with certain exceptions, the restrictions on acquiring additional storage facilities and, in order to encourage the storage of grain on farms, also provided for the making of storage facility loans to farmers. Accordingly, the Corporation expanded its storage operations in order to make the price support program fully effective. While these operations are now being conducted under the price support program, it is proposed that they be classified under a new budgetary program as of July 1, 1950, because of the importance and magnitude of the operations. Storage operation costs and income of the fiscal years 1949 and 1950 are shown under the new storage facilities program classification in this budget for purposes of comparison.

Under its storage facilities program, the Corporation may: (1) Purchase and maintain granaries and equipment for care and storage of Commodity Credit Corporation owned or controlled grain; (2) make loans for the construction or expansion of farm storage facilities; (3) provide storage use guarantees to encourage the con-

struction of commercial storage facilities; and (4) undertake such other operations as may be necessary to provide storage adequate to carry out effectively and efficiently the Corporation's programs.

As it is required to do by statute, the Corporation conducts its storage facilities program subject to the following restrictions: (1) No interest is acquired in real property in order to provide storage facilities unless it is determined that existing privately owned facilities for the storage of the commodity in the area concerned are not adequate; and (2) to the maximum extent practicable, consistent with the fulfillment of the Corporation's purposes and the effective and efficient conduct of its business, the Corporation utilizes the usual and customary channels, facilities, and arrangements of trade and commerce in the warehousing of its commodities.

It is estimated that the following storage capacity will be available as a result of the Corporation's operations:

	As of June 30, 1949	Increase dur- ing fiscal year 1950	Increase dur- ing fiscal year 1951	Total, June 30, 1951
Commodity Credit Corporation-owned bins and granaries.....	<i>Bushels</i> 45,000,000	<i>Bushels</i> 300,000,000	<i>Bushels</i> 50,000,000	<i>Bushels</i> 395,000,000
Increase in farm storage under loan operation.....	4,000	100,000,000	100,000,000	200,004,000
Increase in storage through storage use guarantees.....	-----	300,000,000	300,000,000	600,000,000

It has been indicated to the Corporation that a considerable number of storage structures have been purchased or erected by farmers since July 1, 1949, without obtaining a loan from the Corporation for such purpose. The storage operations carried out by the Corporation have aided the farmers who have acquired the storage in this manner, since it encouraged manufacturers and dealers to make bins readily available and to extend credit to farmers. The extent to which private storage facilities are constructed with or without the encouragement of storage use guarantees will affect the nature and extent of the operations of the Corporation under the storage facilities program.

LOAN TO THE SECRETARY OF AGRICULTURE FOR AGRICULTURAL CONSERVATION PURPOSES

Section 391 (c) of the Agricultural Adjustment Act of 1938, as amended (7 U. S. C. 1391), requires the Corporation to loan to the Secretary of Agriculture during each fiscal year such sums, not to exceed \$50,000,000 as the Secretary estimates will be required to make advances pursuant to the applicable provisions of sections 8 and 12 of the Soil Conservation and Domestic Allotment Act, as amended. These loans are used to purchase conservation materials during the period from January 1 to June 30 of each year. Repayment of such loans is directed to be made during the succeeding fiscal year from funds appropriated to carry out sections 7 to 17 of such act, with interest at a rate determined by the Secretary, but not less than the cost of money to the Corporation. In accordance with the terms of this act a loan of \$24,000,000 was made in the fiscal year 1949 and it is estimated that a loan of \$10,000,000 will be made in each of the fiscal years 1950 and 1951. It is also estimated that these loans will be repaid in full.

ADMINISTRATIVE EXPENSES

Administrative expenses cover the costs of the general supervisory and operating staff engaged in carrying out

the programs of the Corporation. Estimated costs of the audit of the Corporation's accounts by the General Accounting Office and rental costs for the proportionate share of the office space in Government-owned buildings occupied by personnel of the Production and Marketing Administration, based on services performed for the Corporation, are included as administrative expenses. There are not included in administrative expenses, however, necessary expenses (including special services performed on a contract or fee basis, but not including other personal services) in connection with the acquisition, operation, maintenance, improvement, or disposition of any real or personal property belonging to the Corporation or in which it has an interest. Such expenses are treated as nonadministrative expenses as provided in the language carried annually in the appropriation act making corporate funds available for administrative expenses. The language proposed in the budget program for the fiscal year 1951 authorizing expenditures for administrative expenses of the Corporation contemplates that the Corporation will, consistent with its established practice, treat as nonadministrative expense all expenses of the types which have been so treated during the 1949 and 1950 fiscal years. In accordance with the change in policy discussed in the budget for the fiscal year 1948, expenditures for administrative equipment purchased are capitalized and are not charged against the administrative limitation. Expenditures for the purchase and hire of passenger motor vehicles are, however, charged against the administrative expense limitation. It is also contemplated that administrative expenses will be accounted for on an obligation basis as has been the case in the current and prior years.

The administrative services are performed for the Corporation by the employees of the Production and Marketing Administration, and the Corporation assumes its equitable share of Production and Marketing Administration personnel and other costs. In addition, the Corporation utilizes the services of other agencies when it is advantageous to do so. The Corporation is fully reimbursed for all administrative expense incident to supply program activities undertaken for Government agencies, foreign governments, private relief agencies, and others. Such reimbursements provide for all of the Corporation's administrative expenses resulting from the supply program, including expenses of liquidation, and are generally obtained through a mark-up on invoices evidencing sales under that program. Such reimbursements are credited on the books of the Corporation to an account which in turn is used to defray all of the administrative costs of the supply program including expenses of liquidating all phases of the program as they are incurred by the Corporation. Amounts, if any, found to be in excess of needs are transferred to the general income of the Corporation from time to time.

The actual expenses for the fiscal year 1949 and the estimates for the fiscal years 1950 and 1951 are reflected in the schedule, "Administrative expenses, Commodity Credit Corporation" on page 518; the estimates for the fiscal year 1951 include a limitation of \$16,750,000 for costs of administration exclusive of reimbursements for services performed.

The requested administrative funds are based on the character and volume of operations reflected in the program estimates. If any other functions or programs are assigned to the Corporation or if the volume of operations substantially exceeds the budget estimates, additional administrative funds may be required.

COMMODITY CREDIT CORPORATION—Continued

FINANCIAL REVIEW

The Corporation's total assets increased from \$1,200,707,788, as of June 30, 1948, to \$2,443,858,307 as of June 30, 1949, as a result of large-scale price support operations. The assumed continuation of a high level of price support operations in the fiscal years 1950 and 1951 is the basis of the estimated total assets of \$3,307,231,095 as of June 30, 1950, and \$3,586,000,000 as of June 30, 1951.

This large-scale acquisition of assets is reflected in the actual and estimated increases in the Corporation's outstanding borrowings and obligations. Thus the Corporation's borrowings from the United States Treasury and private banks increased from \$476,250,049 as of June 30, 1948, to \$1,678,352,994 as of June 30, 1949; and it is estimated that total borrowings will increase to \$2,907,000,000 as of June 30, 1950, and to \$3,327,000,000 as of June 30, 1951. The Corporation's direct and contingent obligations (principally loans held by banks and purchase agreements) not covered by borrowings decreased from \$1,089,278,709 as of June 30, 1949, to an estimated \$959,731,095 as of June 30, 1950, and an estimated \$615,700,000 as of June 30, 1951. It should be noted, however, that the Corporation's borrowings and obligations represent in the main investments and guarantees. Historically, the major portion of loans made or guaranteed have been repaid by producers, and the major portion of commodities purchased or obtained in settlement of loans have been sold into export or domestic channels. The true measure of the "cost" of the Corporation's activities, then, is the losses sustained rather than the amount of guarantees and investments made.

Effect on budgetary expenditures.—The Corporation's activities resulted in a net budgetary expenditure of \$1,652,992,732 in the fiscal year 1949. It is estimated that net budgetary expenditures will total \$1,555,504,945 in the fiscal year 1950 and \$925,761,500 in the fiscal year 1951.

Operating results.—The Corporation's net loss for the fiscal year 1949 amounted to \$169,279,128. It is estimated that the net loss for the fiscal year 1950 will amount to \$510,500,000 and that the net loss for the fiscal year 1951 will amount to \$308,500,000.

In accordance with the Corporation's established policy, price support losses for the fiscal year 1949 in the amount of \$429,754,997 were charged against the reserve for postwar price support. This charge exhausted the \$500,000,000 reserve for postwar price support which was paid to the Corporation on March 20, 1946, in accordance with the terms of the First Supplemental Appropriation Rescission Act, 1946 (Public Law 301, 79th Cong., approved Feb. 18, 1946).

The Corporation's surplus as of June 30, 1948, amounting to \$47,707,007, together with a net adjustment of \$1,236,003, recommended by the United States Treasury appraisal committee, was returned to the Treasury on June 30, 1949. This payment was made pursuant to the act of March 8, 1938.

Loans.—Most of the loans made by the Corporation for price support purposes are nonrecourse loans to farmers and to cooperative marketing associations and are secured by the pledge of agricultural commodities. Loans to potato producers and to peanut shellers are recourse loans. Some loans are made direct by the Corporation, but most loans are made through lending agencies, generally commercial banks in farm areas. The loans bear interest at

3 percent. The Corporation stands ready to purchase at any time any of its commodity loans held by private lending agencies if the loan papers are in proper order.

Loans to producers secured by chattel or real estate mortgages on newly constructed farm storage facilities are made by approved lending agencies or direct by the Corporation. These loans bear interest at 4 percent and may be paid in five annual installments. The Corporation guarantees the loans made by lending agencies and is obligated to purchase such loans in default more than 12 months.

Loans are reflected in the accounts of the Corporation at the unpaid balance, but reserves are provided, when required, to reflect the amount of estimated losses upon disposition of the balances due or collateral acquired.

Commodities owned.—Commodities owned by the Corporation are divided into two broad classifications: (1) Commodities acquired as a result of price support operations; (2) commodities purchased under the Corporation's supply and foreign purchase programs. The use and economic effect of these two types of inventories are, however, interrelated. Commodities acquired under the price support program may be used to meet supply requirements and commodities purchased under the supply program may effectively reduce or eliminate the necessity for price support operations.

Inventories are recorded at cost including storage, transportation, and accessorial expenses. Due to the varied nature of the many commodities included in the inventory and the related trade practices in storing and handling, the cost is determined by the "first-in, first-out" method for some commodities and by the "average cost" or "individual lot cost" method for other commodities. In each case a consistent practice is followed from period to period.

The Corporation acquires price support commodities by purchase or by forfeiture of commodities pledged or mortgaged as loan collateral. In some instances (e. g., cotton) forfeited loan collateral commodities are "pooled" for the account of producers. Under the pooling arrangement producers have an equitable interest in any net proceeds resulting from the sale of such commodities.

Inventory valuation reserves are established to reduce inventories to the estimated realizable value based on all known factors including ultimate disposition.

Investment of United States Government.—The Corporation's operations are financed by capital funds and borrowings from the United States Treasury, or, with approval of the Secretary of the Treasury, from private lending agencies and, in the case of most of the Corporation's loan operations, by arrangements under which the loans are made by local banks, cooperatives, and other private lending agencies upon the Corporation's agreement to take over the loans on demand. Daily reports of disbursements and receipts are received from the Federal Reserve banks which act as fiscal agents for the Corporation. If daily disbursements exceed daily receipts, a loan in the amount of such excess is obtained from the United States Treasury; if receipts exceed disbursements, the excess is applied as a repayment against the Corporation's loan balance. In compliance with section 7 of the Federal Charter of the Corporation, interest is being paid at the rate of 2 percent to the United States Treasury on the capital of the Corporation. The interest rate on borrowings from the United States Treasury is 1.25 percent. These interest rates which have been established by the United States Treasury are at levels which reimburse the Treasury for its borrowing costs considering the type of borrowings

involved. Funds are borrowed from private lending agencies when, in addition to obtaining funds, the Corporation desires to utilize the facilities of such lending agencies in carrying out a particular operation. All borrowing agreements with private lending agencies are approved by the Secretary of the Treasury.

Present indications are that the borrowing authority of \$4,750,000,000 is adequate to cover all of the Corporation's obligations in the fiscal year 1950. The budget estimates indicate, however, that the borrowing authority will not be adequate to finance the Corporation's operations in the fiscal year 1951. The amount of the increase in borrowing authority required will depend on such unpredictable factors as weather conditions, crop yields, and foreign demand, as well as the levels of domestic economic activities and domestic demand. In view of the possible impact of changes in these factors on price support requirements, the Corporation anticipates that it will be necessary to request an increase of \$2,000,000,000 in borrowing authority in the fiscal year 1950 in order to assure farmers that sufficient funds will be available to cover unforeseen contingencies as well as the estimated requirements based on the budget assumptions.

RESTORATION OF CAPITAL

The act of March 8, 1938 (5 Stat. 107), provided that as of March 31 of each year an appraisal of all the assets and liabilities of the Corporation for the purpose of determining the net worth of the Corporation shall be made by the Secretary of the Treasury. The legislation provided

a basis for evaluating the assets. The act further provided that, should such appraisal establish the net worth of the Corporation as less than \$100,000,000, the Secretary of the Treasury, on behalf of the United States, shall restore the amount of such capital impairment by a contribution to the Corporation in the amount of such impairment; if the appraisal establishes the net worth of the Corporation as more than \$100,000,000, the amount of the surplus is paid to the United States Treasury. The act of April 12, 1945 (59 Stat. 50), changed the date of appraisal from March 31 to June 30, beginning with June 30, 1945. A summary of the actual and estimated capital impairment, restoration of capital by the Secretary of the Treasury, and payments to the Treasury by the Delaware and Federal Corporations is given in schedule C-3.

The Corporation's books show a deficit of \$170,515,131 as of June 30, 1949, consisting of \$169,279,128, the net loss for the fiscal year 1949, and \$1,236,003 resulting from the net adjustments based on the Secretary of the Treasury's appraisal of the Corporation's assets and liabilities as of June 30, 1948. The 1951 budget carries language authorizing the Secretary of the Treasury to restore the amount of this capital impairment. The actual amount of the restoration, however, will depend upon the impairment established by the Secretary of the Treasury which will be subsequently submitted to the Congress. For budget preparation purposes, it is assumed that the impairment will be the same as the deficit of \$170,515,131 as shown on the books as of June 30, 1949, and the financial statements (statements A and C) have been prepared on this basis.

STATEMENT A.—Commodity Credit Corporation: Statement of sources and application of funds

[Fiscal years ending June 30, 1949, 1950, and 1951]

	1949 actual	1950 estimate	1951 estimate

1951.....	⁴ 308, 500, 000			989, 515, 131
Total under Federal Charter (estimate)	989, 515, 131			

¹ This amount is cumulative from Oct. 17, 1933, as no appraisals were made prior to Mar. 31, 1938.² The act of Mar. 8, 1938 (U. S. C., 1940 ed., supp. III, title 15, sec. 713-A-1), as amended by the act approved Apr. 12, 1945, changed the date of appraisal to June 30 of each year. Therefore, the impairment as of June 30, 1945, covers a 15-month period.³ Includes \$2,104,192,301 losses due to subsidy program to June 30, 1948; less \$2,235,782 recoveries in fiscal year 1949; net subsidy losses, \$2,101,956,519, to June 30, 1949.⁴ Represents estimated losses only. (See statement B.)**Administrative Expenses, Commodity Credit Corporation—**

APPROPRIATION TEXT

The following corporation is hereby authorized to make such expenditures, within the limits of funds and borrowing authority available to such corporation and in accord with law, and to make such contracts and commitments without regard to fiscal year limitations as provided by section 104 of the Government Corporation Control Act, as amended, as may be necessary in carrying out the programs set forth in the Budget for the fiscal year 1951 for such corporation, except as hereinafter provided:

Commodity Credit Corporation: Nothing in this Act shall be so construed as to prevent the Commodity Credit Corporation from carrying out any activity or any program authorized by law: *Provided*, That not to exceed **[\$12,000,000]** \$16,750,000 shall be available for administrative expenses of the Corporation [and not to exceed \$400 for periodicals, maps, and newspapers]: *Provided further*, That all necessary expense (including legal and special services performed on a contract or fee basis, but not including other personal services) in connection with the acquisition, operation, maintenance, improvement, or disposition of any real or personal property belonging to the Corporation or in which it has an interest, including expenses of collections of pledged collateral, shall be considered as nonadministrative expenses for the purposes hereof: *Provided further*, That the Secretary of the Treasury is hereby authorized and directed to discharge \$170,515,131 of the indebtedness of the Commodity Credit Corporation to the Secretary of the Treasury by canceling notes in such amount issued by the Corporation to the Secretary of the Treasury pursuant to section 4 of the Act of March 8, 1938, as amended (15 U. S. C. 713a-4). (7 U. S. C. 1282, 1301, 1302, 1385, 1391c; 15 U. S. C. 712a, 713a6-9, 714-714o; 31 U. S. C. 841, 846-852, 866-868c, 869; 50 U. S. PURPOSE AND FINANCIAL ORGANIZATION

The Federal Crop Insurance Corporation was created to alleviate the economic distress caused by crop failures due to unavoidable causes (7 U. S. C. 1501-1519). All insurance programs are being conducted on a gradual expansion basis to develop the experience necessary to operate successful national programs.

Capital funds.—The Federal Crop Insurance Act provides that the Corporation shall have a capital stock of \$100,000,000 (7 U. S. C. 1504, 1504a) subscribed by the United States of America. Purchase of the full amount of the capital stock authorized was completed by the Secretary of the Treasury in fiscal year 1948. Public Law 268, approved August 25, 1949, cancels outstanding receipts for capital stock in excess of \$27,000,000. This cancellation, in effect, writes off as program development costs the \$72,865,710 capital impairment incurred during crop years 1939 through 1947 when high coverage insurance was offered on a national basis. It is not expected that the present low coverage type of insurance offered on an experimental basis in a limited number of counties be set up so as to recover those costs incurred under a national program. Elimination of the national program deficit makes it possible to develop and judge the new program on its own merits. The authorized capital stock remains at \$100,000,000 of which \$73,000,000 is unissued.

ANALYSIS OF BUDGET PROGRAMS

The insurance program for crop years 1950 and 1951 has as its main objectives the securing of an adequate and properly distributed participation level, the refinement of rates and coverages, and the expansion of the program to additional counties as provided in Public Law 268, Eighty-first Congress. The attainment of these objectives will give representative experience, spread risks, avoid adverse selectivity, and keep unit costs low. The 1950 insurance program will be offered in 637 counties on wheat, cotton, flax, corn, tobacco, beans, and multiple crops. The program will be expanded in 1951 to include an additional 240 counties. It is estimated that 290,000 contracts will be in force in crop year 1950 and 434,300 in crop year 1951.

The insurance program falls into two broad types of coverage; namely, commodity and monetary. Commodity insurance guarantees production in bushels or pounds of the commodity, and is being used as the higher

FEDERAL CROP INSURANCE CORPORATION—Con.

coverage type designed to provide protection approximating the investment in the crop. Monetary insurance, guaranteeing an amount in dollars, is a lower premium and lower coverage type offered to farmers who feel they can absorb greater losses but require protection for out-of-pocket costs. Individual crop programs are developed for each type of coverage and variations are being tried in an attempt to discover the most acceptable and workable form of insurance.

An insurance policy covering a single crop is used in the greater number of counties. The Corporation realizes that in general farming areas where farm income is diversified the insurance of a single crop does not provide the most satisfactory insurance. Consequently, it has developed a multiple crop insurance policy which will cover a number of crops combined. Under this policy the coverage for all crops insured on the farm is combined and a loss under the policy arises only when the value of the total production of the insured crops does not equal the combined coverage. The farmer benefits from the more comprehensive coverage and the lower premium rates resulting from combined coverage; the Corporation assumes less potential liability through the greater spread of risk. Experience in crop years 1948 and 1949 indicated the multiple crop policy had merit. It is, therefore, being extended to a total of 50 counties in 1950 and is being expanded to include over 30 field and vegetable crops. Wheat, cotton, flax, corn, tobacco, beans, oats, barley, peanuts, and soybeans were insured under the 1949 multiple crop policy. Grain sorghums, hay, vetch, rye grasses, Austrian peas, buckwheat, potatoes, and tomatoes are included in the policies sold in the 1950 crop year winter multiple crop counties. Of the additional commodities to be included in the spring multiple crop policy, those already selected are alfalfa, broomcorn, sweet corn, green peas, sweetpotatoes, rice, rye, strawberries, sugar beets, sugarcane, and sweetclover. An additional 25 counties will be added to the program in 1951.

Premium rates will be refined and coverages constantly revised to avoid overinsurance. This is essential to comply with the provision of the act which limits the insurance coverage generally to the level of the investment in the crop. In meeting this provision, the Corporation is securing cost of production and farming practice data and will expand this activity in 1950 and 1951.

Program administration.—The crop insurance programs are developed and analyzed mainly in the headquarters office and are administered in the field through 30 State offices and through cooperative agreements with the County Agricultural Conservation Associations of the Production and Marketing Administration. Program accounting and contract servicing functions are performed by the branch office in Chicago. The Federal Crop Insurance Act (7 U. S. C. 1516a) authorizes annual appropriations by Congress of not to exceed \$12 million for any fiscal year to cover the administrative and operating expenses of the Corporation. The total estimated administrative expenses for fiscal year 1951 are \$7,450,000.

FINANCIAL REVIEW

Program improvements and favorable weather conditions enabled the Corporation to show a net profit of

\$5,783,712 for fiscal year 1949. The wheat crop was severely damaged in many areas in crop year 1949 resulting in the lowest average yield per acre during the last 10-year period. Wheat comprises about 65 percent of total insurance in force for crop year 1949 on which there will be an estimated loss of \$3,482,100. All other commodities will show premium surpluses leaving a net loss of \$1,677,338 for fiscal year 1950. After including the 1949 crop-year experience all commodities still have a premium surplus. This situation, which is in accordance with sound insurance principles, is the result of accumulating surplus reserves in good crop years to absorb losses during below-average crop years. It is impossible to predict crop conditions for the 1950 crop year. A net profit of \$2,166,900 is estimated for fiscal year 1951, based on the assumption that 90 percent of the premiums earned will be paid out in indemnities. This assumption is predicated on the structure of premium rates which are so established as to provide a 10-percent reserve for unforeseen losses.

The following table gives a summary of insurance operations for fiscal years 1949, 1950, and 1951.

Summary of insurance operations

Net accounts receivable are expected to increase in 1951 over 1950. While firmer collection policies and discount incentives for prepayment of premiums are expected to

hold receivables to the lowest possible amount, the expansion of the insurance program in crop year 1950 will result in an increase in the volume of accounts. With collections estimated at 90 percent of premiums earned, the larger volume of business will tend to increase receivables.

The allowance for uncollectible accounts is composed of estimated bad debts for crop years prior to 1948 and one-half of 1 percent of insurance premiums for 1948 and subsequent years. The large allowance results mainly from the unfavorable collection experience encountered in those counties where the program could no longer be offered following the 1947 crop year. About 49 percent of the outstanding accounts as of June 30, 1948,

have been collected by special collectors, and with the assistance of the Department of Justice and the Solicitor's Office of the Department of Agriculture. Efforts to collect the remaining balance are being continued.

The Corporation is in a sound financial condition. The total earned surplus, estimated at \$4,106,374 on June 30, 1950, and \$6,273,274 on June 30, 1951, is fully reserved.

The total investment of the United States Government is estimated to be \$31,106,374 on June 30, 1950, and \$33,273,274 on June 30, 1951, consisting of \$27,000,000 non-interest-bearing capital stock and fully reserved earned surplus.

NOTE.—Administrative expenses are not included as operating expenses for the reason that premium income is not intended to cover such expenses. The premium rates established do not include any provision for recovering the cost of administering the program which is in accordance with the provisions of the Federal Crop Insurance Act, as amended. Funds required for administrative expenses are provided by the Congress through annual appropriations. Such expenses are estimated to be \$54,167,078 from date of organization through June 30, 1949.

APPROPRIATION TEXT

ADMINISTRATION OF FEDERAL CROP INSURANCE ACT

Operating expenses: For operating and administrative expenses, [and not to exceed \$700 for newspapers, \$4,054,000] \$7,450,000. (7 U. S. C. 1501-1519; Public Law 268, Aug. 25, 1949; 31 U. S. C. 841, 846-852, 866-868c, 869; Department of Agriculture Appropriation Act, 1950.)

Annual definite appropriation:

Appropriated 1950,^a \$5,054,000 Estimate 1951, \$7,450,000

^a Includes \$1,000,000 appropriated in the Second Supplemental Appropriation Act, 1950.

APPROPRIATION TEXT

The following corporation is hereby authorized to make such expenditures, within the limits of funds and borrowing authority available to such corporation and in accord with law, and to make such contracts and commitments without regard to fiscal year limitations as provided by section 104 of the Government Corporation Control Act, as amended, as may be necessary in carrying out the programs set forth in the Budget for the fiscal year 1951 for such corporation, except as hereinafter provided:

Federal Crop Insurance Corporation. (Department of Agriculture Appropriation Act, 1950.)

¹ Excludes \$12,200 in assessments due to abolishment of the Regional Agricultural Credit Corporation of Washington, D. C. (Public Law 38, 81st Cong.).

PROGRAM AND PERFORMANCE

The Farm Credit Administration provides a coordinated credit system for agriculture through farm credit banks and corporations which make long- and short-term credit available to farmers and farmers' cooperatives. It also provides research and technical assistance to farmers' cooperatives. This work is accomplished, under the executive direction of the Governor, by supervision and examination of and by furnishing facilities and services to farm credit banks and corporations, and through research and technical assistance to farmers' cooperatives. In 1951 the supervision, examinations, and services to farm credit banks and corporations and farmers' cooperatives will be maintained at approximately the same level as that authorized for 1950.

The Administration obtains its funds for administrative expenses from two principal sources: (a) Direct appropriation and (b) assessments against farm credit banks and corporations. The distribution of costs between appropriated funds and assessable funds and the participation by the banks and corporations subject to assessment are in proportion to the services rendered, such services being measured by a comprehensive cost analysis.

1. *Supervision and examination of and facilities and services to farm-credit banks and corporations.*—The Administration supervises and examines (annually) the following institutions: (a) 12 Federal land banks (wholly farmer-owned); (b) 12 production credit corporations (wholly Government-owned); (c) 13 banks for cooperatives (mixed ownership); (d) 12 Federal intermediate credit banks (wholly Government-owned); (e) 1 Federal Farm Mortgage Corporation (wholly Government-owned); (f) 1,230 national farm loan associations; and (g) 503 production credit associations.

In addition, the Administration furnishes facilities and services, such as preparation and distribution of reports,

preparation and submission of budgets, custody of collateral for bonds and debentures, credit research, development of appraisal standards and policies, and development and distribution of information on farm-credit problems, and assists the various banks and corporations in arranging their financing and investments.

2. *Research and technical assistance, including facilities and services to farmers' cooperatives.*—The Administration carries on research and conducts studies relating to the operations of farmers' cooperative associations. It also furnishes facilities and renders technical assistance to these associations. One of the main purposes of the program is to improve existing methods of operation and practices and develop new ones in the cooperatives organized for producing, processing, warehousing, manufacturing, storage, purchasing, credit, financing, insurance, and for other types of service to farmer members. In carrying out its program the Administration develops and distributes the results of its research and studies to farmers' cooperatives generally. Incident to its research program the Administration works closely with State and Federal agricultural research and extension groups and participates in farm cooperative conferences called by agricultural colleges and similar agencies.

PROGRAM AND PERFORMANCE

The Farm Credit Administration is authorized to estimate the cost of examination and administrative super-

vision of the banks, corporations, and other organizations under its jurisdiction and to assess on an equitable basis and collect in advance such estimated cost. The amounts so collected are made available by the Department of Agriculture appropriation act each year to be advanced by transfer and counter warrant to the "Salaries and expenses" appropriation of the Farm Credit Administration. Any excess of collections over costs properly chargeable to each organization assessed is required by law to be refunded to the assessed organization (12 U. S. C. 832, Public Law 146, 81st Cong.).

Earned surplus.....	\$62,661,031	\$50,381,081	\$52,261,881

PURPOSE AND FINANCIAL ORGANIZATION

The Federal Farm Mortgage Corporation was established pursuant to the provisions of the Federal Farm Mortgage Corporation Act (48 Stat. 344) for the following purposes: (1) To provide funds for the making of loans to farmers by the Land Bank Commissioner pursuant to

the provisions of section 32 of the Emergency Farm Mortgage Act of 1933 (48 Stat. 48); (2) to make funds available to the Federal land banks to assist in financing during periods of emergency; and (3) to make loans to joint stock land banks (12 U. S. C. 1020d). The Commissioner's lending authority expired July 1, 1947.

Section 3 of the Federal Farm Mortgage Corporation Act (12 U. S. C. 1020b) provided capital stock of \$200,000,000, subscribed by the Governor of the Farm Credit Administration on behalf of the United States. Under subsequent statutory authority the Corporation has repaid into a revolving fund in the Treasury of the United States \$199,990,000. The outstanding capital stock of \$10,000 will remain unchanged during the fiscal years 1950 and 1951.

With the approval of the Secretary of the Treasury the Corporation had authority to issue and have outstanding at any one time bonds, unconditionally guaranteed both as to principal and interest by the United States, in the aggregate amount not to exceed \$2,000,000,000. The Corporation has issued no bonds to the public since approval of the Public Debt Act of 1941; however, when necessary it has sold short-term bonds to the Treasury of the United States. The authority of the Corporation to issue bonds has been reduced to \$500,000,000.

The services and facilities of the Farm Credit Administration (central office), Federal land banks, and national farm loan associations are utilized to carry out the functions of the Corporation.

ANALYSIS OF BUDGET PROGRAM

In appraising the budgetary requirements of the Corporation for the fiscal year 1951 consideration must be given to the effect that the economic conditions may have upon its principal activity, that of liquidating its assets.

Administrative expenses.—Administrative expenses represent reimbursements to the Federal land banks as agents of the Corporation in servicing its assets, payment to the United States Treasury and the Federal Reserve banks for expenses in handling bond transactions and checking accounts for the Corporation, cost of audit by the General Accounting Office, and miscellaneous items. Total administrative expenses for the fiscal year 1949 amounted to \$1,757,477 whereas these expenses for the fiscal years 1950 and 1951 are estimated at \$1,500,000 and \$1,280,000, respectively, reflecting decreases of \$257,477 and \$220,000.

FINANCIAL REVIEW

Income.—Operating income of the Corporation for the fiscal year 1949 was \$4,105,811, and for the fiscal years 1950 and 1951 is estimated to be \$3,092,600 and \$2,430,700, respectively, with net income of \$7,688,605 in 1949, \$2,720,050 in 1950, and \$1,880,800 in 1951 after adjustments to valuation allowances.

Expense.—Total expenses of the Corporation for the fiscal year 1949 were \$1,974,904; comparable expenses for 1950 and 1951 are estimated to be \$1,714,850 and \$1,441,700, respectively.

Earned surplus.—Earned surplus at June 30, 1949, was \$62,661,031 after the payment of a dividend to the United States Treasury of \$68,000,000. Hereafter, it is recommended that the Corporation be permitted to defer the payment of dividends until after the close of the fiscal year. Its policy, however, will be to pay dividends during the year to the extent that funds in excess of operating requirements are available. It is estimated that the earned surplus at June 30, 1950, will be \$50,381,081 after

FARM CREDIT ADMINISTRATION—Continued**FEDERAL FARM MORTGAGE CORPORATION—Continued**

the payment of a dividend of \$15,000,000. It is not feasible to estimate a dividend payment in 1951 although a balance of earned surplus of \$52,261,881 is anticipated.

Loans receivable.—Mortgage loans, purchase-money mortgages, sales contracts, etc., outstanding as of June 30, 1949, amounted to \$69,780,404. It is estimated that liquidation during the fiscal years 1950 and 1951 will reduce the outstanding loan balances to \$54,504,304 and \$43,728,304; however, the rate of liquidation is dependent to a large extent upon farm commodity prices and agricultural conditions.

Bonds payable.—The Corporation had funds on deposit with the United States Treasury for the liquidation of all

matured bonds held by the public at June 30, 1949, amounting to \$1,187,900 and matured interest thereon of \$126,978. As of that date there were outstanding unmatured bonds held by the Treasury of the United States in the amount of \$500,000. Although it is proposed that authority to borrow up to \$500,000,000 be continued, it is not contemplated that the Corporation will be required to borrow funds during the fiscal years 1950 and 1951.

Investment of United States Government.—At June 30, 1949, the Government's investment in the Corporation was \$63,171,031 which represented a decrease of \$59,811,395 from the previous year. It is expected that at June 30, 1950 and 1951 the Government investment will amount to \$50,391,081 and \$52,271,881, respectively.

PROGRAM AND PERFORMANCE

This is a revolving fund created through the repayment of capital stock of the Corporation and held in the Treasury of the United States, available for resubscription of the capital of Corporation. The fund is available for resubscription of capital on call by the Governor of the Farm Credit Administration with the approval of the Secretary of the Treasury when in the judgment of the directors of the Corporation additional capital is necessary (12 U. S. C. 1020b). However, since it appears unlikely that it will be necessary to increase the capitalization of the Corporation, it is recommended that the balance of \$199,990,000 in the revolving fund be carried to the surplus fund of the Treasury.

APPROPRIATION TEXT

The following corporation is hereby authorized to make such expenditures, within the limits of funds and borrowing authority available to such corporation and in accord with law, and to make such contracts and commitments without regard to fiscal year limitations as provided by section 104 of the Government Corporation Control Act, as amended, as may be necessary in carrying out the programs set forth in the Budget for the fiscal year 1951 for such corporation, except as hereinafter provided:

Federal Farm Mortgage Corporation: Not to exceed **[\$1,500,000]** \$1,280,000 (to be computed on an accrual basis) of the funds of the Corporation shall be available for administrative expenses, including employment on a contract or fee basis of persons, firms, and corporations for the performance of special services, including legal services, and the use of the services and facilities of Federal land banks, national farm loan associations, Federal Reserve banks, and agencies of the Government as authorized by the Act of January 31, 1934 (12 U. S. C. 1020-1020h); and said total sum shall be exclusive of services and facilities furnished and examinations made by the Farm Credit Administration central office, interest expense, and expenses in connection with the acquisition, operation, maintenance,

improvement, protection, or disposition of real or personal property belonging to the Corporation or in which it has an interest: *Provided*, That promptly after June 30 of each fiscal year all cash funds in excess of the estimated operating requirements for the current fiscal year shall be declared as dividends and paid into the general fund of the Treasury: *Provided further*, That the aggregate amount of bonds the Corporation may issue and have outstanding at any one time shall not exceed \$500,000,000. (*Department of Agriculture Appropriation Act, 1950.*)

REDUCTION IN APPROPRIATION

Amounts available from appropriations are hereby reduced in the sums hereinafter set forth, such sums to be carried to the surplus fund and covered into the Treasury immediately upon the approval of this act:

An amount of \$199,990,000 in the revolving fund held in the Treasury available to the Governor, Farm Credit Administration, as authorized by the Federal Farm Mortgage Corporation Act, as amended (12 U. S. C. 1020b), for resubscriptions to the capital stock of the Federal Farm Mortgage Corporation. (*Department of Agriculture Appropriation Act, 1950.*)

PURPOSE AND FINANCIAL ORGANIZATION

The 12 Federal intermediate credit banks, organized in 1923 (12 U. S. C. 1021-22), serve as banks of discount for agriculture and do not make loans directly to individuals or accept deposits of funds otherwise than as collateral security. Each bank operates under the direction of a board of directors, composed of the members of the district farm credit board (12 U. S. C. 640b and 640d). The banks are supervised by the Intermediate Credit Commissioner, who is responsible to the Governor of the Farm Credit Administration (12 U. S. C. 638; E. O. 6084, March 27, 1933).

The Government's present capital investment in the banks is \$60,500,000, consisting of \$5,000,000 of paid-in capital for each of the 12 banks and \$500,000 of paid-in surplus supplied to 1 of the banks in June 1948, out of the revolving fund of \$40,000,000 created by section 15a of the Federal Farm Mortgage Corporation Act (12 U. S. C. 1131i (e)).

ANALYSIS OF BUDGET PROGRAM

Lending program.—The operations of the banks continue to reflect an upward trend in the volume of loans and discounts. The volume of business expected in 1951 amounts to \$1,838,946,000, an increase of 5.5 percent over the estimated amount for 1950 and 14.2 percent over the volume actually handled in 1949. Among factors contributing to the current trend are a substantial decline in farm product prices with continued high production costs, increased mechanization of farm operations, an increase in the number of new borrowers, and prospects for larger carry-overs and renewals.

FARM CREDIT ADMINISTRATION—Continued**FEDERAL INTERMEDIATE CREDIT BANKS—Continued**

Financing program.—To finance their lending operations during 1951 the banks expect to issue \$1,057,110,000 of consolidated collateral trust debentures and to borrow \$60,500,000 from commercial banks for short periods. The United States assumes no liability for the debentures or other obligations of the Federal intermediate credit banks (12 U. S. C. 1043).

Administrative expenses.—Administrative expenses, which are payable out of income and amounted to \$1,292,858 in 1949, are estimated at \$1,423,000 for 1950 and \$1,496,000 for 1951, an increase of \$73,000. Included in these amounts are pay increases of \$34,000 for 1951 and \$25,000 for 1950. A supplemental authorization will be requested for the latter amount. Of the \$73,000 increase, \$50,359 is budgeted for additional salary costs, including eight additional employees (on a net man-year basis), or an average of less than one additional employee per bank. Other essential expenses are expected to increase \$22,641.

FINANCIAL REVIEW

Income.—Interest income from loans and discounts, United States securities, and other sources was \$11,685,020 in 1949, and it is anticipated that \$13,535,600 in 1950 and \$14,516,700 in 1951 will be derived from these activities. On June 30, 1949, the lending rate of 10 of the banks was 2 percent per annum (2½ percent in Puerto Rico), while the rate of the other 2 banks was 2¼ percent. No changes in lending rates are contemplated in 1950 and 1951 unless rates in the money markets change materially. The net income for 1949 was \$1,637,663 and it is estimated that \$1,689,100 in 1950 and \$1,774,000 in 1951 will be realized.

Interest costs.—Interest and other costs on borrowed money were \$8,688,606 in 1949 and are estimated to be \$10,151,800 in 1950 and \$10,963,600 in 1951. These amounts represent an average annual cost of money obtained from the sale of debentures of 1.67 percent in 1949, and an estimate of 1.75 percent in 1950 and 1951. Interest costs are affected by general money market conditions and are subject to considerable fluctuation.

Earned surplus.—The distribution of net income of the banks is provided by law (12 U. S. C. 1072). Out of such income, \$595,000 was transferred in 1949 to reserve for contingencies and it is expected that \$880,000 and \$900,000 will be transferred to this reserve in 1950 and 1951. A 25-percent franchise tax of \$260,666 was paid in 1949 and payments of \$202,300 and \$218,500 in 1950 and 1951 are anticipated. Total franchise taxes paid by the banks from organization to June 30, 1949, aggregate

\$7,619,522. The balance of net income is carried to unreserved surplus. The total earned surplus is to be retained in the system as contemplated by law. These surplus reserves, together with paid-in capital and paid-in surplus, form the capital structure on which the issuance of securities is based.

Loans and discounts.—Loans and discounts outstanding on June 30, 1949, amounted to \$643,602,436. No loss to the intermediate credit banks on these loans and discounts is in prospect. It is estimated that loans and discounts outstanding will amount to \$697,468,436 on June 30, 1950, and \$745,565,436 on June 30, 1951.

Investments.—The banks held \$45,054,439 (par value \$44,653,600) of United States securities at June 30, 1949, and it is estimated that holdings of this nature will be \$45,019,039 at June 30, 1950, and \$44,983,639 at June 30, 1951. These investments are an important factor in enabling the banks to obtain funds in the investment markets at reasonable rates. They are used from time to time as collateral for debentures and to secure short-term bank borrowings.¹

Liabilities.—The greater portion of the banks' liabilities consists of unmatured debentures and notes payable. At June 30, 1949, there was outstanding \$605,540,000 of such liabilities, representing an increase of \$77,215,000 over the balance at the end of the previous year. It is expected that the outstanding balances of these liabilities will be \$660,460,000 and \$708,773,000 at June 30, 1950, and 1951, representing increases of \$54,920,000 and \$48,313,000, respectively.

Investment of United States Government.—No change in the amount of paid-in capital funds invested in the banks is contemplated in 1950 or 1951, although the debt-to-capital ratio is the highest in the history of the system. In the event that additional capital is needed to meet the credit needs of eligible borrowers, the revolving fund in the United States Treasury, established for that purpose, is available for subscription to additional capital stock or paid-in surplus by the Governor of the Farm Credit Administration (with the approval of the Secretary of the Treasury).

Borrowing authority.—The aggregate amount of debentures and other similar obligations which any Federal intermediate credit bank may have outstanding may not exceed 10 times its surplus and paid-in capital (12 U. S. C. 1041). At June 30, 1949, the ratio of outstanding debentures and notes payable to the capital and surplus of the system was 6.3 to 1, which is the highest ratio ever attained. The point at which buyer resistance may develop, with resulting higher interest cost, will depend to a considerable extent upon the money markets and general economic conditions affecting agriculture.

APPROPRIATION TEXT

The following corporations are hereby authorized to make such expenditures, within the limits of funds and borrowing authority available to such corporations and in accord with law, and to make such contracts and commitments without regard to fiscal-year limitations as provided by section 104 of the Government Corporation Control Act, as amended, as may be necessary in carrying out the programs set forth in the budget for the fiscal year 1951 for such corporations, except as hereinafter provided:

Federal intermediate credit banks: Not to exceed **[\$1,398,000]** **\$1,496,000** (to be computed on an accrual basis), of the funds of the banks shall be available for administrative expenses, including the purchase of not to exceed **[two]** *one* passenger motor **[vehicles]** *vehicle* for replacement only, services performed for the banks by other Government agencies (except services and facilities furnished and examinations made by the Farm Credit Administration central office, and services performed by any Federal Reserve bank and by the United States Treasury in connection with the financial transactions of the banks); and said total sum shall be exclusive of interest expense, legal and special services performed on a contract or fee basis, and expenses in connection with the acquisition, operation, maintenance, improvement, protection, or disposition of real or personal property belonging to the banks or in which they have an interest. PROGRAM AND PERFORMANCE

This is a revolving fund available for investment in capital stock and/or paid-in surplus of the Federal intermediate credit banks.

The fund is made available on call by the Governor of the Farm Credit Administration with the approval of the Secretary of the Treasury (12 U. S. C. 1131i (e)).

PRODUCTION CREDIT CORPORATIONS

[Submitted under the Government Corporation Control Act]

PURPOSE AND FINANCIAL ORGANIZATION

The production credit system was organized pursuant to the Farm Credit Act of 1933 (12 U. S. C. 1131 et seq.) to provide permanent short-term credit facilities for farmers and stockmen. The system includes in each of the 12 farm credit districts a production credit corporation established to organize, provide supplemental capital for, and supervise the local production credit associations.

Each of the 12 corporations operates within its own financial structure under its district board of directors.

A revolving fund of \$120,000,000 was established in the United States Treasury in 1933 for the capitalization of the production credit corporations (12 U. S. C. 1131i) and was reduced to \$90,000,000 in 1949 (Public Law 860, 80th Cong.). Of this latter amount, it is expected that \$39,235,000 will be utilized by the corporations at June 30, 1951, for their paid-in capital. The paid-in capital of the corporations and most of their surplus (12 U. S. C. 1131c) is invested in class A stock of production credit associations and in United States bonds.

ANALYSIS OF BUDGET PROGRAMS

Organizing production credit associations.—Production credit associations have been established to serve all of the continental United States and Puerto Rico. A typical association serves about five or six counties, with two field offices in addition to its main office.

Providing supplemental capital for production credit associations.—At December 31, 1934, the production credit corporations held 95 percent of the capital stock of all the associations, as compared with 29 percent at June 30, 1949. At the latter date, farmers and stockmen had purchased and held over \$60,000,000 of capital stock, or 71 percent of the total. Over 10 percent of all the associations are wholly owned by farmers and stockmen, and the progress of other associations toward this objective continues at an accelerated rate. It is anticipated that at June 30, 1951, the production credit corporations will hold about \$16,000,000 of capital stock of the associations and will hold United States bonds of about \$39,000,000 available for immediate use in providing supplemental capital to associations, at least temporarily, in case of need.

Supervising production credit associations.—The present work load of the corporations results primarily from their supervision of the production credit associations. This is accomplished largely through the development of general policies and procedures for the associations and through leadership, training, counsel, and guidance for their directors and officers in credit, management, member relations, operations, and finance. An important objective is to maintain the soundness and dependability of these cooperative associations which farmers and stockmen are utilizing for over a billion dollars of short-term credit annually. More specifically, the supervision is directed at (1) sound and constructive credit service to farmers, (2) efficient and economical operations of the local associations, (3) convenient service throughout the associations' territories, and (4) an adequate financial structure and eventual complete local ownership for each association.

In the supervision of the associations the corporations make a thorough review at least annually of credit policies and practices, make periodic operating reviews and audits, and carry out a continuing training program for association directors and officers.

The operations of the system have been carried on largely in a long period of generally rising or high farm prices and, in recent years, unusually favorable agricultural production conditions. With the present trend toward lower farm prices, net farm income is decreasing. Spotted areas of unfavorable crop and livestock conditions

FARM CREDIT ADMINISTRATION—Continued**PRODUCTION CREDIT CORPORATIONS—Continued**

have appeared, and credit conditions are generally tighter. In periods of economic adjustment of this nature, the associations must be particularly careful in the analysis of applications for loans in order to soundly extend needed credit to their member stockholders and other qualified applicants. Effective supervision of the associations in the early stages of this period of price adjustment is likely to avoid the development of serious and costly situations later on.

Each of the corporations, on the average supervises the associations in four States. The total personnel for the 12 production credit corporations as estimated for 1951 is 180, or an average of 15 per corporation. The combined administrative expenses amounted to \$1,309,847 in 1949 and are estimated at \$1,353,000 for 1950 and \$1,358,000 for 1951, an increase of \$5,000. Included in these amounts are pay increases of \$30,000 for 1951 and \$25,000 for 1950. A supplemental authorization will be requested for the latter amount.

FINANCIAL REVIEW

Annual repayments to the revolving fund, starting in 1944, together with the \$30,000,000 payment to the surplus fund of the United States Treasury during 1949, had reduced the paid-in capital of the corporations from \$120,000,000 to \$46,235,000 at June 30, 1949. The Government's capital investment is expected to be further reduced to \$39,235,000 by a payment of \$4,000,000 to the revolving fund in 1950 and a payment of at least \$3,000,000 in 1951. At June 30, 1949, the surpluses of the corporations aggregated \$17,140,663. The surpluses of the corporations not only safeguard the Government's investment but directly influence the amount of paid-in capital required. With the reduction in 1949 in the amount of United States bonds held by the corporations, losses aggregating \$557,500 and \$555,000 are estimated for 1950 and 1951, respectively.

The major portion of the purchases and sales of securities estimated for 1950 and 1951 result from the gradual reduction of the corporations' liability under bond repurchase agreements with the associations.

APPROPRIATION TEXT

The following corporations are hereby authorized to make such expenditures, within the limits of funds and borrowing authority available to such corporations and in accord with law, and to make such contracts and commitments without regard to fiscal year limitations as provided by section 104 of the Government Corporation Control Act, as amended, as may be necessary in carrying out the programs set forth in the Budget for the fiscal year 1951 for such corporations, except as hereinafter provided:

Production credit corporations: Not to exceed **[\$1,328,000]** \$1,358,000 (to be computed on an accrual basis) of the funds of the corporations shall be available for administrative expenses, including the purchase of **[one]** ten passenger motor **[vehicle]** vehicles for replacement only, and services performed for the corporations by other Government agencies (except services and facilities furnished and examinations made by the Farm Credit Administration central office); and said total sum shall be exclusive of interest expense, legal and special services performed on a contract or fee basis, and expenses in connection with the acquisition, operation, maintenance, improvement, protection, or disposition of real or personal property belonging to the corporations or in which they have an interest. PROGRAM AND PERFORMANCE

This is a revolving fund created for the purpose of capitalizing the production credit corporations.

This fund is available for investment in the capital stock of the 12 production credit corporations on call by the Governor of the Farm Credit Administration upon his approval of requests by the boards of directors of the corporations (12 U. S. C. 1131b).

REGIONAL AGRICULTURAL CREDIT CORPORATION OF WASHINGTON, D. C.

[Submitted under the Government Corporation Control Act]

The regional agricultural credit corporations were established pursuant to section 201e of the Emergency Relief and Construction Act of 1932 (12 U. S. C. 1148) to make loans to farmers and stockmen for agricultural purposes. Originally there were 12 regional agricultural credit corporations, 1 in each Federal land bank district. These corporations were supervised and controlled by the Reconstruction Finance Corporation until May 27, 1933, when such supervision and control was transferred to the Farm Credit Administration. Pursuant to the authority contained in the Farm Credit Act of 1937 (12 U. S. C. 1148c), the 12 corporations were merged into a single corporation, the Regional Agricultural Credit Corporation of Washington, D. C.

The capital stock of the regional agricultural credit corporations was subscribed and paid for by the Reconstruction Finance Corporation (12 U. S. C. 1148). The stock was held by the Reconstruction Finance Corporation until March 22, 1938, when it was transferred to the Secretary of the Treasury. The maximum capital stock of the 12 corporations issued and outstanding amounted to \$44,500,000, of which only \$100,000 was outstanding at April 15, 1949, the balance of \$44,400,000 being deposited in a revolving fund in the United States Treasury. Administrative expenses of the corporations through June 30, 1947, were paid by advances amounting to \$21,960,000 by the Reconstruction Finance Corporation, which were reflected on the Corporation's books as paid-in surplus (12 U. S. C. 1148). In November 1947, \$12,500,000, and April 1949, \$260,241.24, total \$12,760,241.24 of the foregoing amount was deposited into miscellaneous receipts of the Treasury, thereby reducing the paid-in surplus to \$9,199,758.76.

FARM CREDIT ADMINISTRATION—Continued
REGIONAL AGRICULTURAL CREDIT CORPORATION OF
WASHINGTON, D. C.—Continued

Public Law 38, Eighty-first Congress, approved April 6, 1949, abolished the Regional Agricultural Credit Corporation of Washington, D. C., transferred its functions to the Secretary of Agriculture, and under section 1 (d) provided that:

“All assets, funds, contracts, property, claims, and rights, all records, and all liabilities of the Corporation are

hereby transferred to the Secretary. The revolving fund created by section 84 of the Farm Credit Act of 1933, as amended (12 U. S. C. 1148a), shall be available to the Secretary for the performance of the functions specified in paragraphs (a) (1), (2), and (3) of the section, including administrative expenses in connection therewith. * * *

Pursuant to the foregoing authority, the assets of the Corporation were transferred to the Secretary of Agriculture effective April 16, 1949.

DEPARTMENT OF AGRICULTURE MIXED-OWNERSHIP CORPORATIONS**FEDERAL LAND BANKS**

At a time of national economic distress the Congress, by an amendment to the Federal Farm Loan Act, approved January 23, 1932 (12 U. S. C. 698), provided for subscription by the Secretary of the Treasury on behalf of

the United States of \$125,000,000 of capital stock in the 12 Federal land banks. This \$125,000,000 has all been repaid and now constitutes a revolving fund available for subscription to capital stock by the Secretary of the Treasury upon application by any Federal land bank, made with the approval of the Farm Credit Administration.

The Federal Farm Loan Act contemplates a cooperative farm mortgage loan system supervised by the Federal Government, but to be owned and operated by the farmers who use the services of the system. This objective has been kept constantly in mind by the Federal land banks, and they are now completely owned by the farmers who use them. The Federal land-bank system as a farmers' cooperative-credit system aims to operate on its own resources even under periods of agricultural distress and its interest rate and other operating policies are designed to make this possible insofar as conditions can be foreseen and met by prudent business practices.

The Federal land banks and national farm loan associations are in a greatly strengthened net worth position. Experience has demonstrated there are numerous steps the banks can take to effectively meet operating problems which are limited to individual districts, including inter-bank assistance. Therefore the banks consider they have sufficient resources, financial and otherwise, to enable them to carry their worthy members and prospective members through any periods of distress except perhaps an economic emergency of a Nation-wide character in which the banks might be called upon again to finance outstanding farm mortgage debt to the extent of over-taxing their own resources. In view of all these circumstances and the apparent remoteness of any such emergency as mentioned above, it is recommended that the amount of \$125,000,000 in the revolving fund be covered into the surplus fund of the Treasury.

The Department of Agriculture Appropriation Act, 1950 (Public Law 146, 81st Cong.), contained a provision which required that the total amount of \$189,000,000 in this revolving fund appropriated to the Office of the Secretary, Treasury Department, be carried to the surplus fund and covered into the Treasury.

Balance available in subsequent year.....	-125,000,000
Carried to surplus fund.....	-125,000,000
Total obligations.....

Under an amendment to the Federal Farm Loan Act, the Secretary of the Treasury, on behalf of the United States, subscribed to \$125,000,000 of capital stock of the 12 Federal land banks. Funds repaid by the 12 banks are deposited in this revolving fund, available for further subscription to the stock of any of the 12 Federal land banks, on the request of the directors thereof, made with the approval of the Farm Credit Administration. These funds may be made available on call by the Secretary of the Treasury upon request of the board of directors of any land bank with the approval of the Farm Credit Administration (12 U. S. C. 698).

APPROPRIATION TEXT

REDUCTION IN APPROPRIATION

Amounts available from appropriations are hereby reduced in the sums hereinafter set forth, such sums to be carried to the surplus fund and covered into the Treasury immediately upon the approval of this Act:

The total amount of \$125,000,000 in the revolving fund appropriated to the Office of the Secretary, Treasury Department, as authorized by the Federal Farm Loan Act, as amended (12 U. S. C. 698), for subscriptions to the capital stock of the Federal land banks. (Department of Agriculture Appropriation Act, 1950.)

BANKS FOR COOPERATIVES

The Farm Credit Act of 1933, as amended, provides that capital funds required by the banks for cooperatives would be obtained from the revolving fund of the Agricultural Marketing Act (12 U. S. C. 1134b-1134i) and from cooperatives obtaining loans from the banks (12 U. S. C. 1134k). Present provisions of the law (12 U. S. C. 1134k) make it mandatory that capital stock in the bank for cooperatives owned by a cooperative association which has paid its indebtedness to the bank must be retired and canceled upon request by the association. Because of this requirement the amount of capital stock in the banks owned by farmers' cooperatives ordinarily varies with the amount of loans outstanding and has never constituted more than a comparatively small part of the capital needs of the banks. As of June 30, 1949, stock owned by cooperatives and deposits of cooperatives in the guaranty fund totaled \$13,916,300 or only 7.23 percent of the total capital stock of the banks.

The desirability of eventual ownership of the banks for cooperatives by the agricultural cooperatives of the country has been recognized for a number of years. After long consideration a bill to accomplish this objective was introduced in both Houses during the Eightieth Congress. Hearings were held by both Houses and the bill reported out by the House Committee on Agriculture. No final action was taken on the bill by the Eightieth Congress. A similar bill was introduced in the House of Representatives during the Eighty-first Congress, passed by the House of Representatives, and is now before the Senate Committee on Agriculture and Forestry. This proposed legislation provides for the eventual retirement of the capital stock in the banks owned by the Federal Government through (1) the purchase of stock by cooperatives in relation to the amount of interest paid on loans from the banks, (2) the issuance of stock in the form of patronage dividends, and (3) the direct sale of stock to cooperatives.

Statement of proposed obligations for purchase and hire of passenger motor vehicles for the fiscal year 1951

DEPARTMENT OF AGRICULTURE

Appropriation	Motor vehicles to be purchased		Old vehicles to be exchanged		Net cost of vehicles to be purchased	Old vehicles still to be used	Cost of hire of motor vehicles	Public purpose and users
	Number	Gross cost	Number	Allowance (estimated)				
OFFICE OF THE SECRETARY								
Salaries and expenses, Office of the Secretary.	1	\$1,400	1	\$400	\$1,000	3		Personal transportation, on official business, of the Secretary of Agriculture and members of his staff, Washington, D. C.
BUREAU OF AGRICULTURAL ECONOMICS								
Salaries and expenses, Bureau of Agricultural Economics: Economic investigations.....	1	1,400	1	400	1,000	9	\$200	For use of research specialists engaged in field work on farm management and land use problems at various points throughout the United States.
Crop and livestock estimates.....	7	9,800	7	2,800	7,000	28	300	For use of statisticians in charge of the preparation of crop and livestock estimates in important agricultural areas.
Total, Bureau of Agricultural Economics.	8	11,200	8	3,200	8,000	37	500	
AGRICULTURAL RESEARCH ADMINISTRATION								
OFFICE OF ADMINISTRATOR								
Salaries and expenses, Office of Administrator, Agricultural Research Administration.	3	4,200	3	1,200	3,000	6		For transportation of the Research Administrator and members of his staff on official business in the District of Columbia and for use of officials in supervising and inspecting the maintenance and operation of the Agricultural Research Center, Beltsville, Md., an area of approximately 11,700 acres.
SPECIAL RESEARCH FUND								
Special research fund, Department of Agriculture.	1	1,400	1	400	1,000	10		For use by directors and technical assistants in planning and carrying forward the work of the research laboratories and research projects of the Department under title I of the act approved June 29, 1935, as amended.
RESEARCH ON STRATEGIC AND CRITICAL AGRICULTURAL MATERIALS								
Research on strategic and critical agricultural materials, Department of Agriculture.	1	1,400	1	400	1,000	3		For use by technical workers and their assistants in planning and carrying forward the work of the Department on agricultural materials determined to be strategic and critical pursuant to sec. 7 (b) of the Stock Piling Act.
RESEARCH ON AGRICULTURAL PROBLEMS OF ALASKA								
Research on agricultural problems of Alaska, Department of Agriculture	1	1,400	1	400	1,000			For use of director and technical assistants in connection with planning and carrying forward the research program on agricultural problems of Alaska.

Statement of proposed obligations for purchase and hire of passenger motor vehicles for the fiscal year 1951—Continued

DEPARTMENT OF AGRICULTURE—Continued

Appropriation	Motor vehicles to be purchased		Old vehicles to be exchanged		Net cost of vehicles to be purchased	Old vehicles still to be used	Cost of hire of motor vehicles	Public purpose and users

AGRICULTURAL RESEARCH ADMINISTRATION—Continued								
BUREAU OF ANIMAL INDUSTRY								
Salaries and expenses, animal industry, Agricultural Research Administration:								
Animal husbandry.....	4	\$5,600	4	\$1,600	\$4,000	17		Travel by officials of experiment stations at Brooksville, Fla.; Dubois, Idaho; Falfurrias, Tex.; Middlebury, Vt.; Miles City, Mont.; Jeanerette, La.; and Beltsville, Md.; in surrounding territory and the more remote parts of the stations. Travel by officials in the areas around stations at Salina, Utah; Ames, Iowa; Albuquerque, N. Mex.; Angleton, Tex.; and Beltsville, Md., on work relating to research on animal diseases and parasites.
Diseases of animals.....	1	1,400	1	400	1,000	16		
Animal disease control and eradication.	95	133,000	95	38,000	95,000	565		
Meat inspection.....	5	7,000	5	2,000	5,000	63		
Eradication of foot-and-mouth disease.	(¹)		(¹)			177		
Total, Bureau of Animal Industry.	105	147,000	105	42,000	105,000	738		
BUREAU OF DAIRY INDUSTRY								
Salaries and expenses, dairy industry, Agricultural Research Administration.	1	1,400	1	400	1,000	3		For use of officials of the Bureau located in the field for official travel to towns adjacent to official stations to purchase supplies, to farms in vicinity of station to inspect cooperative experiments.
BUREAU OF PLANT INDUSTRY, SOILS, AND AGRICULTURAL ENGINEERING								
Salaries and expenses, plant industry, soils, and agricultural engineering, Agricultural Research Administration:								
Field crops.....	9	12,600	9	3,600	9,000	47	Automobiles used by technical workers, their assistants, and cooperators in localities where public transportation is inadequate or nonexistent; conducting field experiments with grains, cotton, grasses, forage, fiber, rubber, fruit, vegetable, and other plants; forest and shade trees; soil management, fertilization, irrigation, and classification; farm equipment, mechanical processing of farm products, and related plant, soil, and agricultural engineering research.	
Fruit, vegetable, and specialty crops.	11	15,400	11	4,400	11,000	50		
Forest diseases.....	2	2,800	2	800	2,000	15		
Soils, fertilizers, and irrigation.	7	9,800	7	2,800	7,000	42		
Agricultural engineering.....	3	4,200	3	1,200	3,000	14		
National Arboretum.....						1		
Total, Bureau of Plant Industry, Soils, and Agricultural Engineering.	32	44,800	32	12,800	32,000	169		
BUREAU OF ENTOMOLOGY AND PLANT QUARANTINE								
Salaries and expenses, entomology and plant quarantine, Agricultural Research Administration:								
Insect investigations.....	22	30,800	22	6,600	24,200	93	For travel by entomologists, pathologists, supervisors, and inspectors engaged in research, control, quarantine, and survey activities on the various projects.	
Insect and plant disease control.	22	30,800	22	6,600	24,200	80		
Foreign plant quarantines.....	7	9,800	7	2,100	7,700	58		
Total, salaries and expenses.....	51	71,400	51	15,300	56,100	231		
Control of emergency outbreaks of insects and plant diseases.	12	16,800	12	3,600	13,200	26		
Total, Entomology and Plant Quarantine.	63	88,200	63	18,900	69,300	257		
BUREAU OF AGRICULTURAL AND INDUSTRIAL CHEMISTRY								
Salaries and expenses, agricultural and industrial chemistry, Agricultural Research Administration.	1	1,400	1	150	1,250	10		For travel by officials of the Fruit and Vegetable Chemistry Laboratory, Pasadena, Calif., in making field trips throughout the States of California, Nevada, Utah, Arizona, and New Mexico; for travel of officials of the United States Citrus Products Station, Winter Haven, Fla.; for the travel of officials of the Division of Biologically Active Chemical Compounds, Beltsville, Md., to the Eastern Regional Research Laboratory, Wyndmoor, Pa., and other points in the States of Maryland, Delaware, New Jersey, Pennsylvania, Virginia, and North Carolina, and for travel by officials of Naval Stores Station, Olustee, Fla., throughout naval stores producing area in pine regions of the South; for travel by station officials throughout the areas served by the New Orleans, La., Albany, Calif., Wyndmoor, Pa., and Peoria, Ill., regional research laboratories.
Total, Agricultural Research Administration.	208	291,200	208	76,650	214,550	1,196		

¹ Subject to the development of the 1951 program.

Statement of proposed obligations for purchase and hire of passenger motor vehicles for the fiscal year 1951—Continued

DEPARTMENT OF AGRICULTURE—Continued

Appropriation	Motor vehicles to be purchased		Old vehicles to be exchanged		Net cost of vehicles to be purchased	Old vehicles still to be used	Cost of hire of motor vehicles	Public purpose and users
	Number	Gross cost	Number	Allowance (estimated)				
CONTROL OF FOREST PESTS								
Control of forest pests, Department of Agriculture:								
Gypsy and brown-tail moths.....	4	\$5,600	4	\$1,200	\$4,400	16		For travel by supervisors, inspectors, and technical personnel directing control activities on the various projects.
White pine blister rust:								
Bureau of Entomology and Plant Quarantine, Forest Service.....	9	12,600	9	2,700	9,900	59		Do.
Department of the Interior.....						2		Do.
Department of the Interior.....						6		Do.
Total, control of forest pests.....	13	18,200	13	3,900	14,300	83		
FOREST SERVICE								
Salaries and expenses, Forest Service:								
General administration expenses.....						1		Used for transportation of employees of chief's office on official business in the District of Columbia.
National forest, protection and management.....	112	156,800	112	33,600	123,200	487	\$2,000	Used by forest officers engaged in protection, management, utilization, and development of national forests.
Forest and range management investigations.....	15	21,000	15	4,500	16,500	113		Used by technicians employed at experimental forest and ranges and by those engaged on research projects directed from experiment station headquarters.
Forest products.....	1	1,400	1	300	1,100	8		Used by field employees assigned to forest utilization units, and to forest products laboratory.
Forest resources investigations.....	2	2,800	2	600	2,200	70		Used by individuals and crews assigned to comprehensive forest survey.
Farm and other private forestry co-operation.....	2	2,800	2	600	2,200	19		Used by foresters engaged in the task of improving forest practices on private forest land.
Acquisition of lands for national forests.....						10		Used by land examiners and survey crews engaged in the purchase of forest land.
Forest development roads and trails.....	14	19,600	14	4,200	15,400	50	1,000	Used by regional office engineering staff in directing and inspecting road construction and maintenance.
Total, Forest Service.....	146	204,400	146	43,800	160,600	758	3,000	
FLOOD CONTROL								
Flood control, Department of Agriculture:								
Forest Service.....	2	2,800	2	600	2,200	21		Used by project personnel engaged in surveys and in the installation of works of improvement on authorized flood control projects.
Soil Conservation Service.....	20	28,000	20	6,000	22,000	108		Do.
Total, flood control.....	22	30,800	22	6,600	24,200	129		
SOIL CONSERVATION SERVICE								
Salaries and expenses, Soil Conservation Service:								
Soil conservation research.....	10	14,000	10	3,000	11,000	90		For use of technical personnel to make inspection trips to outlying experimental project areas, to supervise the installation of experimental work, to collect data, and to service scientific instruments.
Soil conservation operations.....	305	427,000	325	97,500	329,500	936		For transportation of field technicians engaged in conservation district activities and for transportation of technicians, inspectors, and surveyors within districts, between districts, and on planning work in areas outside districts.
Land utilization and retirement of submarginal land, Department of Agriculture (Soil Conservation Service).....	10	14,000	10	3,000	11,000	30		For use of specialists and technicians engaged in the improvement, management, and protection of land acquired throughout the United States pursuant to the provisions of title III of the Bankhead-Jones Farm Tenant Act.
Water conservation and utilization projects, Department of Agriculture (Soil Conservation Service).....	5	7,000	5	1,500	5,500	26		For use of project personnel in connection with the planning, development, operation, and management of water conservation and utilization projects.
Total, Soil Conservation Service.....	330	462,000	350	105,000	357,000	1,082		
PRODUCTION AND MARKETING ADMINISTRATION								
Administrative expenses, section 392, Agricultural Adjustment Act of 1938.....	1	1,400	1	400	1,000	3		For travel of field representatives to the recipient agencies throughout Puerto Rico in connection with the school lunch and direct distribution programs; and 1 car in the District of Columbia for transportation of officials of the Production and Marketing Administration on official business.
MARKETING SERVICES								
Salaries and expenses, marketing services:								
Market news service.....	3	4,200	3	1,200	3,000	9		For the use of market reporters in gathering and disseminating news of market conditions for various farm crops and livestock in important market and producing areas.
Market inspection of farm products.....	10	14,000	10	4,000	10,000	32		For the use of inspectors and graders engaged in inspection and grading of farm products throughout the United States.
Marketing farm products.....	1	1,400	1	400	1,000	8		For the use of employees of the cotton-ginning laboratory at Stoneville, Miss., in contacting cooperating cotton-ginners, cotton plantations, and cotton compress operators; for the use of agricultural economists, cotton technologist, and ginning technicians in studying marketing methods and cotton ginning; and 1 car in the District of Columbia for use on official business by all officials of the Production and Marketing Administration and their staff.

Statement of proposed obligations for purchase and hire of passenger motor vehicles for the fiscal year 1951—Continued

DEPARTMENT OF AGRICULTURE—Continued

Appropriation	Motor vehicles to be purchased		Old vehicles to be exchanged		Net cost of vehicles to be purchased	Old vehicles still to be used	Cost of hire of motor vehicles	Public purpose and users
	Number	Gross cost	Number	Allowance (estimated)				
PRODUCTION AND MARKETING ADMINISTRATION—Continued								
MARKETING SERVICES—continued								
Salaries and expenses, marketing services—Continued								
Tobacco acts.....	4	\$5,600	4	\$1,600	\$4,000	13		For the use of inspectors and supervisors in inspecting and grading tobacco sold on auction markets and providing technical assistance to farmers in preparing tobacco for market.
Cotton statistics, classing, standards, and futures acts.	6	8,400	6	2,400	6,000	32		For the use of employees in traveling to cotton gins, supervising cotton classers, collecting cotton samples, and in gathering data on market conditions, supplies, and prices.
Marketing regulatory acts.....	35	49,000	35	14,000	35,000	118		For the use of (1) marketing specialists in investigating complaints and violations and checking establishments for compliance with license provisions under Perishable Agricultural Commodities Produce Agency and Standard Container Acts; (2) supervisors and samplers in grain grading work under United States Grain Standards Act; (3) warehouse examiners in the inspection of licensed warehouses and warehouses applying for license under the United States Warehouse Act; (4) marketing specialists inspecting posted stockyards and designated live poultry markets under the Packers and Stockyards Act; (5) inspectors in grading naval stores under Naval Stores Act; (6) inspectors in checking establishments where insecticides, fungicides, and rodenticides are prepared, stored, or sold for compliance and collecting samples for testing under the Insecticide, Fungicide, and Rodenticide Act.
Total, marketing services.....	59	82,600	59	23,600	59,000	212		
Expenses and refunds, inspection and grading of farm products.	25	35,000	25	10,000	25,000	66		For the use of inspectors engaged in inspecting and grading farm and food products, paid from funds advanced by producers for whom services are performed.
Commodity Credit Corporation.....	6	8,400			8,400	6		For use by Federal employees for travel to warehouses, storage facilities, and piers to inspect the packing conditions, markings, and related operations in receipt, storage, and shipment of commodities owned or controlled by the Corporation.
Supply operations (cash paying governments, Economic Cooperation Administration, and other similar programs).			6	(?)		5		For use by Federal employees for travel to warehouses, storage facilities, and piers to inspect the packing conditions, markings, and related operations in receipt, storage, and shipment of commodities owned or controlled by the Corporation.
Total, Production and Marketing Administration.	91	127,400	91	34,000	93,400	292		
FARMERS' HOME ADMINISTRATION								
Farmers' Home Administration, Department of Agriculture.	10	14,000	10	4,000	10,000	38		One vehicle is assigned to the Washington office for transportation of Departmental personnel to and from other Government offices and elsewhere on official business. 47 vehicles are used in the field by officials in assisting and advising county supervisors in the investigation of applications, making loans, rendering of farm and home management assistance to borrowers, and collecting and servicing loans under the various loan programs.
FARM CREDIT ADMINISTRATION								
Salaries and expenses, Farm Credit Administration.	1	1,400	1	400	1,000	1		1 passenger car for official transportation of the Governor and 1 passenger car for transporting Farm Credit Administration officials in Washington and making special deliveries to and from other Government buildings.
FEDERAL INTERMEDIATE CREDIT BANKS								
Administrative expenses, Federal intermediate credit banks.	1	1,400	1	100	1,300	6	\$700	Used by officers and employees of the banks for necessary travel in connection with the making of new loans and discounts, and the servicing of outstanding loans and discounts, principally for travel between points which cannot be reached advantageously or economically by common carrier.
PRODUCTION CREDIT CORPORATIONS								
Administrative expenses, production credit corporations.	10	14,000	10	4,000	10,000	34		Used by officers and field employees of the corporations for necessary travel in connection with the supervisory responsibilities of the corporations over the production credit associations, principally travel to association offices and as required to other points of duty including the farms of association directors, applicants for loans, and borrowers.
Total, Farm Credit Administration.	12	16,800	12	4,500	12,300	41	700	
Total, Department of Agriculture.	841	1,177,400	861	282,050	895,350	3,659	4,200	

² These 6 vehicles are to be disposed to offset the purchases made by Commodity Credit Corporation, and the proceeds from the sale of such vehicles will be deposited into the Miscellaneous Receipts fund of the Treasury.

Statement of proposed obligations for purchase, maintenance, and operation of aircraft for the fiscal year 1951

DEPARTMENT OF AGRICULTURE

Appropriation	Aircraft to be purchased		Aircraft to be exchanged		Net cost of aircraft to be purchased	Old aircraft still to be used	Cost of maintenance and operation of aircraft	Public purpose and users
	Number	Gross cost	Number	Allowance (estimated)				
AGRICULTURAL RESEARCH ADMINISTRATION								
BUREAU OF ENTOMOLOGY AND PLANT QUARANTINE								
Salaries and expenses, entomology and plant quarantine, Agricultural Research Administration:								
Insect investigations.....						8	\$16,000	For experimentation in the application of insecticides to crops and forests. For use in the application of insecticides for the suppression of destructive insects attacking crops and forested areas.
Insect and plant-disease control..	3	\$6,000	2	\$1,000	\$5,000	3	18,000	
Total, salaries and expenses....	3	6,000	2	1,000	5,000	11	34,000	For application of insecticides for the suppression of emergency and incipient outbreaks of insects.
Control of emergency outbreaks of insects and plant diseases.	3	6,000	2	1,000	5,000	5	28,000	
Total, Bureau of Entomology and Plant Quarantine.	6	12,000	4	2,000	10,000	16	62,000	
FOREST SERVICE								
Salaries and expenses, Forest Service: National forest protection and management.	3	45,000	2	2,000	43,000	15	28,800	Used for transportation of men and supplies including "smoke-jumpers," to inaccessible areas, for reconnaissance of large fires, and for detection services in remote areas and after lightning storms.
CONTROL OF FOREST PESTS								
Control of forest pests, Department of Agriculture:								
Gypsy and brown-tail moths....	2	4,000	2	1,000	3,000	6	26,100	For use in the application of insecticides for the suppression of destructive insects attacking forested areas.
Forest Pest Control Act.....	2	20,000			20,000	2	10,000	
Total, control of forest pests....	4	24,000	2	1,000	23,000	8	36,100	
Total, Department of Agriculture.	13	81,000	8	5,000	76,000	39	128,900	

PROPOSED LEGISLATION

Strengthen Commodity Exchange Act.—There is presently pending legislation to strengthen the Commodity Exchange Act for more effective regulation of speculation and prevention of abusive trading practices on commodity exchanges. Subject to its enactment, an estimate of \$780,000 for 1951 is included in this budget.

Increase in borrowing authority, Commodity Credit Corporation.—Legislation increasing the borrowing authority of the Commodity Credit Corporation from \$4,750,000,000 to \$6,750,000,000 will be proposed in the fiscal year 1950. This matter is discussed under the title "Commodity Credit Corporation."

DEPARTMENT OF COMMERCE

Comparative Summary of Appropriations and Appropriation Estimates

Bureau or subdivision	Appropriations for 1950			Estimate of appropriation for 1951	Increase (+) or decrease (-), 1951 over 1950
	Presently available	Supplementals required (forecast)	Total		
GENERAL AND SPECIAL APPROPRIATIONS					
Annual definite appropriations:

PROGRAM AND PERFORMANCE

The Office of the Secretary includes the Secretary and the personnel who advise and assist him in his duties and responsibilities as head of the Department of Commerce. This Office also provides administrative services for the Bureau of Foreign and Domestic Commerce and several small segments of the Department.

1. *Executive direction of the Department.*—This covers the work of the Secretary, the Under and an Assistant Secretary, and their immediate administrative and secretarial personnel. The uninterrupted incumbency of the positions of Under Secretary and Assistant Secretary, in contrast to the vacancies in these positions since May 1948, explains the 1950 and 1951 increase.

2. *Departmental staff services.*—Staff assistance in the general management and administration of the Department is furnished by the Office of the Solicitor, the Office of Program Planning, the Office of Publications, and by the Executive Assistant to the Secretary responsible for the direction of the Department's administrative activities, including budget and personnel administration. The increase for 1951 is due mainly to the Department's increased emphasis on transportation matters, reflected in part by the transfer of the Public Roads Administration to the Department.

3. *Health program.*—The estimate of \$100,000 plus the funds included in the various appropriations of the Department will provide an employee health program for departmental employees.

4. *Administrative services.*—These include centralized accounting, personnel, and general administrative services which are furnished the Office of the Secretary, the Office of Technical and Scientific Services, and the Bureau of Foreign and Domestic Commerce.

PROGRAM AND PERFORMANCE

The Office of Technical Services collects and catalogs valuable technical data emanating primarily from Government research and makes this information available upon

request to business, industry, and the general public. The following examples indicate the breadth of research information encompassed: Clothing, foods, lubricants, isotopes, plastics, radio, synthetic rubber, textiles. The program increase requested for 1951 is to make available to business unclassified information developed by the Atomic Energy Commission.

PROGRAM AND PERFORMANCE

The Department of Commerce assists the Department of State in carrying out the terms of the United States Information and Educational Act of 1948. At the request of the Department of State and with funds furnished by that Department, training and advice in aeronautics, meteorology, geodesy, census and statistical methods, highway construction and maintenance, and national income and balance of payments analysis are provided to suitable nationals of participating governments. This assistance is given in the United States and abroad.

PROGRAM AND PERFORMANCE

The Air Coordinating Committee is an interdepartmental committee responsible for coordinating Federal aviation policy. It develops and recommends integrated policies and actions for adoption by the participating agencies or by any other United States Government agencies concerned. To the extent permitted by law, the Air Coordinating Committee coordinates the activities of such agencies. This committee also advises the President on major aviation policy and furnishes the Department of State with recommended policy directives and instructions for the guidance of the United States representative to the International Civil Aviation Organization. Member agencies with voting rights contribute equally for maintaining a staff to service this committee's functions.

PROGRAM AND PERFORMANCE

The proceeds of sales of vehicles, equipment, accessories, and other items, the exchange of which is authorized by law, may be applied in whole or in part payment for the purchase of similar items. Receipts from this source are set up in a special appropriation account and are available for the replacement of similar items to the end of the fiscal year following the year in which the sale is made; unused balances are adjusted to miscellaneous receipts (5 U. S. C. 118d-1).

OBLIGATIONS BY ACTIVITIES

Purchase of equipment—1949, \$156,684; 1950, \$129,666; 1951, \$96,000.

OBLIGATIONS BY OBJECTS

Total obligations.....	110,725	107,500	109,000

PROGRAM AND PERFORMANCE

The Bureau maintains card files, microfilm, and conducts correspondence involved in supplying evidence as to age, place of birth, and citizenship to the general public upon request and for the purpose of assisting in establishing eligibility for assistance under social security programs. The direct cost of furnishing this data is supported by fees covered into a trust account. In 1949, 110,660 requests were answered; it is estimated that 110,000 will be handled in each of the fiscal years 1950 and 1951.

PROGRAM AND PERFORMANCE

The Bureau collects and distributes current statistical information on the volume of production of the principal manufactured commodities; dollar volume of wholesale and retail trade; volume of inventories held in the channels of production and distribution; official reports on the quantities, values, and shipping weights of United States

BUREAU OF THE CENSUS—Continued

Current Census Statistics, Bureau of the Census—Continued

imports and exports including port-to-port cargo movements and the participation of American and foreign-flag vessels; statistical measures on revenue, debt, expenditures, and employment of State and local governments; and current changes in the size and characteristics of the country's population, labor force, and housing supply. In addition, statistical summaries such as the Statistical Abstract of the United States and special reports representing authoritative compilations of national and local series are provided. It is proposed in 1951 to undertake an annual survey of manufacturers, to strengthen industrial and business statistics and to prepare for the 1952 decennial census of State and local governments.

PROGRAM AND PERFORMANCE

These funds cover the planning and preparatory work; enumeration, compilation, analysis, and publication of information collected in the general census of population, agriculture, irrigation, drainage, unemployment, and housing to be taken during the last quarter of fiscal year 1950. A temporary field organization of over 160,000 employees will be required to collect the statutory data on approximately 154,000,000 persons, 46,000,000 dwelling units, and 6,300,000 farms. A temporary staff which will reach a peak of about 8,500 employees will be required to tabulate, edit, and publish detailed reports on the subjects covered by this general census. The estimated cost of the census, including preliminary planning, will be approximately \$92,000,000 of which \$52,761,000 has already been appropriated. The census will be completed by December 31, 1952. The request for 1951 will provide for processing and compiling the information to be collected during the current fiscal year.

PROGRAM AND PERFORMANCE

The 1948 census of business estimated to cost \$13,225,136 will provide data on the number of establishments, sales, inventories, credit, employment, pay roll and related data on the wholesale, retail, and service trades. Selected data will be furnished for each county and for each city of more than 2,500 population. This project will be in the final stages of tabulation and publication during the fiscal year 1951.

Total obligations	2,115,638		

PROGRAM AND PERFORMANCE

The 1947 census of manufactures costing \$4,157,044 is now complete and final publications will be available in fiscal year 1950. These publications will include statistics on employment, wages, and value added for all industries by industry and geographic region. Statistics on the production of about 6,000 leading commodities, as well as selected information on plant and equipment expenditures, materials consumed, etc., will be presented by major industry groups and geographic region.

PROGRAM AND PERFORMANCE

The Bureau performs special statistical work, at cost, for individuals and firms requesting such data. In addition, the Bureau furnishes age and citizenship data from census schedules on a fee basis. These fees range from \$1 to \$3 depending on the type of handling required. Funds received for these purposes are used to pay the salaries of special temporary employees and for related expenses.

CIVIL AERONAUTICS ADMINISTRATION

INTRODUCTORY STATEMENT

The Civil Aeronautics Administration is the agency of the Federal Government responsible for providing aeronautical services for the public and industry in the field of civil aviation. These services include controlling air traffic; certifying as to the airworthiness of airmen and aircraft; developing and installing improved aids to air navigation; administering a Federal grant-in-aid program for a national system of airports; and related activities including the operation of Washington National Airport.

Total obligations	88,388,264	97,153,149	105,766,000

PROGRAM AND PERFORMANCE

This appropriation provides for the major operating programs authorized by the Civil Aeronautics Act of 1938 and subsequent legislation. These include the operation and maintenance of navigation facilities serving 60,000 miles of primary air routes and of landing aids at terminal airports; and the enforcement of the civil air regulations promulgated by the Civil Aeronautics Board to insure safety in the manufacture, maintenance, and operation of aircraft.

1. *Operation and maintenance of airway facilities.*—The Federal airways system, maintained and operated on a 24-hour daily basis, provides the following services to aviation: (a) radio range stations, markers, homing beacons and light beacons for the safe navigation of aircraft, and instrument landing systems, precision approach radar, and approach light lanes to safeguard aircraft landings under adverse weather conditions; (b) intermediate landing fields to reduce distances between landing areas along airways, thereby reducing operational hazards; (c) airport traffic control towers, air route traffic control centers, and airport surveillance radar for safe, orderly, and efficient separation of aircraft in flight; (d) aeronautical communications stations for collection and dissemination of airway weather information and for two-way communication with aircraft in flight; and (e) auxiliary facilities, such as teletype and interphone communications circuits, power plants, monitoring devices, remote receiving and control devices, and operational quarters.

The increase will provide \$4,316,000 to continue on a full-year basis the operation of air navigation facilities authorized for the current year, and \$620,000 to operate facilities which will be commissioned during 1951. The balance of \$2,223,000 is for extending present types of services to additional areas, improving the services now rendered to increase the efficiency and reliability of flight operations, and implementing new legislation.

2. *Aviation safety.*—This program includes the inspection and certification of (a) aircraft for airworthiness; (b) airmen for competency and physical fitness; (c) operators of aircraft to ensure safe operating practices; and (d) air agencies, such as flight and mechanic schools, to ensure competency.

3. *Airport development.*—Periodic examinations are made of airports to (a) gather facility data for planning purposes and for dissemination to the aviation public; and (b) ensure compliance with the terms and conditions under which airports were transferred to cities and other local agencies as surplus to military needs or under which grants of Federal funds and equipment have been made. Also, advisory services are rendered to airports on their engineering, operating, and management problems. This

CIVIL AERONAUTICS ADMINISTRATION—Con.

Salaries and Expenses, Civil Aeronautics Administration—Con.

program is designed to encourage the continued operation of some 6,200 public, commercial, and private airports.

4. *Fostering of aviation.*—The Administration fosters personal and industrial flying by encouragement of aviation education activities, promotion of an air-marking program to facilitate flight operations in small aircraft, publication of flight facility data and other information on aviation, and stimulation of production of improved types of industrial, agricultural, and personal aircraft.

5. *Administration.*—This activity includes executive direction, staff services, and general housekeeping and common operating services. The amount requested will permit continuing the 1950 operating level on an annual basis.

APPROPRIATION TEXT

Salaries and expenses: For necessary expenses of the Civil Aeronautics Administration in carrying out the provisions of the Civil Aeronautics Act of 1938, as amended (49 U. S. C. 401), and other Acts incident to the enforcement of safety regulations; maintenance and operation of air navigation facilities and air traffic control; furnishing advisory service to States and other public and private agencies in connection with the construction or improvement of airports and landing areas; and the disposal of surplus airports; including personal services in the District of Columbia; hire of aircraft (not exceeding **[\$395,000] \$445,000**); the operation and maintenance of eighty-five aircraft; printing and binding; contract stenographic reporting services; fees and mileage of expert and other witnesses; examination of estimates of appropriations in the field; purchase (not to exceed **[forty] twenty**, for replacement only) and hire of passenger motor vehicles; purchase and repair of skis and snowshoes; and salaries and traveling expenses, together with tuition (not to exceed \$20,000) and other contractual expenses in connection therewith, of employees detailed to attend courses of training conducted by the Government or other organizations serving aviation; **[\$94,402,105] \$104,250,000**, and the Departments of the Air Force, Army and Navy, are authorized to transfer to the Civil Aeronautics Administration without charge, subject to the approval of the Bureau of the Budget, aircraft (for replacement only), aircraft engines, parts, flight equipment, and hangar, line, and shop equipment surplus to the needs of such Departments: *Provided*, That there may be credited to this appropriation, funds received from States, counties, municipalities, and other public authorities for expenses incurred in the maintenance and operation of airport traffic control towers.

The appropriation under this head in the Department of Commerce Appropriation Act, 1950, shall be available for expenses necessary in connection with facilities on the Islands of Wake, Canton, and Midway, as authorized by section 10 of the International Aviation Facilities Act of June 16, 1948 (Public Law 647). (49 U. S. C. 401-680; 49 U. S. C. 171-184; 50 U. S. C. App. 1622 (g), Convention on International Civil Aviation Treaty, dated Apr. 4, 1947; Act of June 16, 1948, Public Law 647; Third Deficiency Appropriation Act, 1949; Departments of State, Justice, Commerce, and the Judiciary Appropriation Act, 1950.)

PROGRAM AND PERFORMANCE

This appropriation finances the construction of a network of airways facilities, including navigation and landing aids (both electronic and visual), intermediate landing fields, traffic control centers and towers, and communications stations, along the primary air routes and at important airports to improve the safety and reliability of all-weather flight operations. This network extends throughout the continental United States and the territories and possessions. The 1951 estimate includes new program authorization in the amount of \$40,000,000, consisting of \$14,000,000 in cash and \$26,000,000 in contract authority.* The additional amounts of \$26,500,000 in cash and \$3,461,500 in contract authority provide, respectively, for liquidation of obligations incurred under prior-year contract authority and for completion of a deferred portion of the 1950 program. Of the amount requested for new program, \$25,157,936 is for continuing implementation during 1951 of the common transition system, recommended by the Radio Technical Commission for Aeronautics; this system includes such aids as precision approach and surveillance radar, instrument landing systems (ILS), distance measuring equipment, and omni-directional radio ranges. The new program also includes \$14,842,064 for the improvement of existing facilities and services, particularly in areas of high traffic density. Work of this type covers projects for (a) the relocation, modernization, and improvement of traffic control centers, airport traffic control towers, and communications stations; (b) relocation and improvement of existing air navigation and landing aids; (c) construction of housing in remote areas; and (d) maintenance repairs to intermediate landing fields.

CIVIL AERONAUTICS ADMINISTRATION—Con.

Technical Development and Evaluation, Civil Aeronautics Administration—Continued

PROGRAM AND PERFORMANCE

Under this appropriation, the Administration maintains at Indianapolis, Ind., a laboratory for testing and evaluating aeronautical devices and instruments, including radio aids to air navigation and airways and airport facilities. Development work, in general, is confined to improving and adapting to aeronautical needs products already fabricated.

1. *Development of improved aeronautical facilities through service testing and evaluation.*—The 1951 program will permit developmental and evaluation activities and studies relating to aircraft power plants, instruments, and appliances; soil moisture, runway paving, and other airport problems; and aids to air navigation and traffic control and other airway facilities.

2. *Administration.*—This includes executive direction and general housekeeping services.

Total obligations.....	1,376,687	1,469,000	1,550,000

PROGRAM AND PERFORMANCE

The Washington National Airport is operated by the Administration to provide air terminal facilities for the Nation's Capital and to serve as a model for airport management. In 1951, the airport revenues are expected to total \$1,512,800. This represents an estimated increase in revenues of \$209,300 resulting from Government ownership of fueling facilities and increased landing fee rates.

1. *Maintenance, operation, and protective services.*—No change in program level is proposed, but purchase of an improved-type crash truck is planned.

2. *Administration.*—This covers the airport's administrative and general housekeeping services.

PROGRAM AND PERFORMANCE

Under the Federal Airport Act of 1946, grants-in-aid are made to local sponsors for projects at airports which are part of a national airport system capable of meeting the needs of civil aviation and nontactical military air operations. Available funds are apportioned among the several States on a population-area basis. The actual construction work is conducted by the States, counties, and municipalities to which grants are made. In 1951 work is scheduled on some 425 airports.

1. *Grants for construction of airports.*—Of the \$36,700,000 in contract authorization requested for fiscal year 1951, grants in the amount of \$25,000,000 are planned for 86 airports having a sufficient volume of traffic to warrant the operation of an airport traffic control tower. The balance will be allocated primarily to locations that have been certificated for air transport service but that are now receiving only limited service or no service at all because of inadequate facilities.

2. *Administration of grants and claims.*—Within this activity provision is made for staff required to administer this program and the claims program under section 17 of the Federal Airport Act.

PROGRAM AND PERFORMANCE

The Federal Airport Act authorizes reimbursement to public agencies for the necessary rehabilitation or repair of public airports which have been substantially damaged by Federal agencies. Twenty-four claims have been certified by the Administrator to Congress in the amount of \$2,705,628, and work is now under way on 14 airports.

OBLIGATIONS BY ACTIVITIES

Rehabilitation and repair of public airports damaged by Federal agencies—1950, \$2,705,628.

OBLIGATIONS BY OBJECTS

13 Refunds, awards, and indemnities—1950, \$2,705,628.

PROGRAM AND PERFORMANCE

This appropriation provides for the construction of public airports at Anchorage and Fairbanks, Alaska. Work is now substantially ahead of schedule, with completion of both airports expected before the close of fiscal year 1951. The appropriation requested for 1951 is to liquidate prior-year contract authority. Legislation is pending in Congress to raise from \$13,000,000 to \$17,000,000 the ceiling on the cost of construction of these airports. To date \$12,500,000 has been appropriated and a supplemental estimate for 1950 in the amount of \$4,500,000 has been included in the budget for implementation of this legislation.

PROGRAM AND PERFORMANCE

This appropriation finances a program recommended by the Radio Technical Commission for Aeronautics for the development of a system of aids to air navigation and traffic control to meet the common needs of civil aviation and military nontactical air operations. The work involves research, experimentation, and development of new devices required for safety and regularity of flight under all-weather conditions and for joint use of Federal facilities by civil and military aircraft.

1. *Research and development on airways facilities.*—The program is divided into transition and ultimate phases. The transition program consists primarily of completing the development of several traffic control aids, such as airport time utilization equipment and airport surface detection equipment, on which development is already well advanced and which are planned to be placed in operation by 1953. The ultimate, or long-range, program is scheduled to extend through 1959. It includes the further development of existing navigation and traffic control aids and the development of new-type aids, requiring extended basic research and the application of the latest scientific discoveries and techniques.

In 1951 progress will be made on both phases of the program. Contracts will be let to complete the development of the remaining components of the transition program. On the ultimate program a number of basic studies will be undertaken, extending over a period of years, and certain initial developmental contracts will be completed.

2. *Administration.*—Within this activity provision is made for a small technical staff and the over-all administration of the program.

PROGRAM AND PERFORMANCE

Through the Philippine rehabilitation program the United States is aiding the Philippine Republic to recover from World War II damages. The Administration is responsible for that part of the program, coordinated by the Department of State, which deals with the establishment, maintenance, and operation of air navigation facilities and related training of Philippine nationals. This work is expected to be completed by June 30, 1950.

PROGRAM AND PERFORMANCE

In connection with its regular activities, the Administration provides various reimbursable services to other Federal agencies, principally the Departments of the Navy and the Air Force. These services include the establishment, maintenance, and operation of air navigation and traffic-control facilities, the development and testing

of aeronautical equipment, and administrative supervision of the Landing Aids Experiment Station, Arcata, Calif.

PROGRAM AND PERFORMANCE

The Civil Aeronautics Board regulates the economic aspects of United States civil air transportation, promulgates safety rules and standards, investigates and analyzes aircraft accidents, and participates in the development of international air transportation.

1. *Executive direction.*—The members of the Board, together with their immediate supporting staffs, carry out the duties and functions devolving upon the Civil Aeronautics Board under the Civil Aeronautics Act of 1938, as amended.

2. *Economic regulation.*—This activity includes the following: Adjudication of mail-rate proceedings; establishment or approval of passenger and property tariffs and rates; processing of petitions for new and additional air routes and services together with conduct of studies directed toward the improvement and modernization of the air-route pattern; handling matters involving inter-carrier relationships; enforcement of the economic regulatory provisions of the act; negotiation and implementation of international air transport agreements; and other related functions, including promulgating economic regulations, handling appeals from Board decisions in the courts, and preparing reports on proposed legislation affecting civil aviation.

The conversion of the mail-rate structure to a permanent basis will continue to be a major objective of the Board during 1951. The increased program provides for expansion in the critical areas of mail and commercial rates, routes, and enforcement, for the purposes of reducing backlogs and of undertaking air-line cost studies and other investigations affecting the stabilization of the air transportation industry.

3. *Safety regulation.*—This activity includes promulgation of the Civil Air Regulations and adjudication of complaints alleging violations of these regulations. In 1951 the Board proposes to continue the current year's program of revision of the Civil Air Regulations and the

integration of United States standards and practices with those adopted by the International Civil Aviation Organization.

4. *Accident investigation and analysis.*—The Board investigates all civil aircraft accidents to the extent necessary to determine their probable cause; conducts investigations of potential aeronautical hazards; and recommends and institutes such preventive measures as may be deemed appropriate to reduce the ratio of accidents and increase safety in air transportation. In 1951 it is proposed to intensify the current program of accident-prevention work by a more comprehensive study of the factors which contribute to the cause of accidents and to effect a greater exchange of safety data between the Board, aircraft manufacturers, and aircraft operators.

5. *Administration.*—This activity embraces administrative and service functions performed for the entire Board.

APPROPRIATION TEXT

Civil Aeronautics Board, salaries and expenses: For necessary expenses of the Civil Aeronautics Board, including personal services in the District of Columbia; contract stenographic reporting services; employment of temporary guards on a contract or fee basis [without regard to section 3709 of the Revised Statutes, as amended]; salaries and traveling expenses of employees detailed to attend courses of training conducted by the Government or industries serving aviation; expenses of examination of estimates of appropriations in the field; purchase (not to exceed five for replacement only) and hire of passenger motor vehicles; hire, operation, maintenance, and repair of aircraft; and printing and binding; [\$3,620,500] \$4,323,000: Provided, That the Departments of the Army, Navy, and Air Force are authorized to transfer to the Civil Aeronautics Board without charge, subject to the approval of the Bureau of the Budget, aircraft (for replacement only), aircraft engines, parts, and accessories surplus to the needs of such Departments. (49 U. S. C. 401-683; Act of June 3, 1948, Public Law 597; Departments of State, Justice, Commerce, and the Judiciary Appropriation Act, 1950.)

PROGRAM AND PERFORMANCE

This appropriation provides for the operation of the Washington office of the Coast and Geodetic Survey. Volume of work is governed by the actual demand for the Bureau's products and services. This demand is continually increasing owing to the need for new charts for navigation in Alaskan waters and for general use in aviation, and the increasing needs of other agencies for geodetic control data and other information. The increase in 1951 is to meet a part of this greater work load.

1. *Charting aids for marine and air navigation.*—This activity includes planning and supervision of field surveys and the compilation, printing, and distribution of nautical and aeronautical charts and other publications, essential for the safe navigation of ships in our coastal waters and of planes flying over our land and water areas. The number of different charts and maps cataloged and available for sale and issue, including all new, revised, and reconstructed charts and maps, are as follows:

Cumulative number of charts available for distribution	1949 actual	1950 estimate	1951 estimate
Nautical charts.....	907	912	920
Aeronautical and airport and radio facility charts.....	905	920	950
Airport obstruction plans and coastal topographic maps.....	1,281	1,374	1,420
Other charts (distribution only).....	2,063	2,063	2,063

The work load for this activity is illustrated by the number of charts and maps printed and distributed as tabulated below:

Charts printed and distributed	1949 actual	1950 estimate	1951 estimate
Nautical charts.....	816,759	800,000	800,000
Aeronautical and airport and radio facility charts.....	16,337,414	18,000,000	19,000,000
Coast pilots, tide tables, and current tables.....	108,365	117,000	127,000

2. *Geodetic control.*—This activity includes planning and supervision of geodetic control surveys, and computation and adjustment of the results thereof to provide basic data for navigational charting, topographic mapping, flood control and other conservation and development projects, highway and railroad construction, and other engineering purposes. The latitudes and longitudes of 6,167 positions were determined in 1949 and the estimate for 1951 is 6,500. The elevations of 4,571 bench marks were determined in 1949 as compared to an estimate for 1951 of 4,800.

3. *Earthquake investigation.*—Earthquakes are investigated to determine their location and severity and to obtain engineering data for the design of earthquake resistive structures. Work load depends upon the number and severity of earthquakes which occur. Annually about 350 earthquakes are located of which 130 are strong earthquakes accurately located.

4. *Administration.*—Activity includes administrative services, operation of Bureau's technical library, and secretary and clerical employees serving the Director and his aides. The Director and aides are paid from "Pay and allowances, commissioned officers," and are included in cost of executive direction under that appropriation.

PROGRAM AND PERFORMANCE

This appropriation finances the extensive field surveys required to secure data for navigational charts, establish geodetic control, and investigate earthquakes. Coastal hydrographic and topographic surveys will be conducted in Arctic and Alaskan waters and shore areas and in limited shore and offshore sectors of the United States. The 1951 program will provide for increased geodetic control survey operations in the Missouri Valley and Alaska and for the reactivation of one large survey vessel for hydrographic operations in Alaska.

1. *Charting aids for marine and air navigation.*—Hydrographic, topographic, tide, current, magnetic, and aeronautical surveys are made to secure information for the production of nautical and aeronautical charts and related publications. Surveys are accomplished through operation of survey ships, tide stations, magnetic observatories, and shore units engaged in inshore hydrographic surveys, obtaining and interpreting aerial photographs for topographic mapping, field checking aeronautical charts, and other activities. In 1949, 63,500 miles of water depths were measured and 76,000 will be measured in 1951. In square miles the hydrography completed in 1949 was 29,738 and the estimate for 1951 is 40,000.

2. *Geodetic control.*—Surveys to determine latitude and longitude of monumented stations and elevations of bench marks provide necessary basic data for charting and mapping and for the economical and efficient planning of many engineering projects. They are carried on by mobile field units using trucks and, in isolated regions, chartered airplanes for transportation. The Coast and Geodetic Survey acts as a central agency in providing basic control data for all other Government agencies. Projects are integrated with those of other agencies under priorities established by conference. In 1949, 78,185

square miles of these basic surveys were completed. It is estimated that 76,000 and 85,000 square miles will be surveyed in 1950 and 1951, respectively.

3. *Earthquake investigation.*—The Bureau operates 11 seismograph stations and collaborates with 15 universities for the location of distant earthquakes; operates 61 strong-motion stations in the seismic area of the Western States, and field investigates an average of 8 severe earthquakes annually.

4. *Construction projects.*—Quarters for observers at magnetic and seismological observatories in remote locations and a building for absolute magnetic measurements in Alaska will be constructed in 1951.

PROGRAM AND PERFORMANCE

This appropriation provides for the pay and allowances of the Bureau's corps of commissioned officers, on the active and retired lists. Efficient conduct of the Bureau's operations requires the services of a permanent force of engineers with extensive experience and training in work which is highly specialized. On account of the marine operations involved, they must also be proficient in general ship operation, seamanship, and navigation.

These officers are assigned to and are responsible for the operation of ships engaged in coastal surveys, the direction and execution of other classes of surveys, and administrative and other duties in the Bureau's Washington office.

APPROPRIATION TEXT

Pay, commissioned officers: For pay and allowances prescribed by law for not to exceed one hundred and seventy-one commissioned officers on the active list and of officers retired in accordance with existing law, including payment of six months' death gratuity as authorized by law, **[\$1,310,000]** \$1,515,000. (5 U. S. C. 591, 597; 33 U. S. C. 851, 852, 853a-853r, 854-858, 860-865, 870, 874, 883a-883i; Departments of State, Justice, Commerce, and the Judiciary Appropriation Act, 1950.)

Appropriated 1950, **\$1,310,000** Estimate 1951, **\$1,515,000**

The foregoing appropriations for the Coast and Geodetic Survey shall be available for the purchase of not to exceed **[ten] seven passenger motor vehicles [known as station wagons and suburban carry-alls]**, of which five shall be for replacement only, and (not to exceed \$25,000) for services as authorized by section 15 of the Act of August 2, 1946 (5 U. S. C. 55a). (Departments of State, Justice, Commerce, and the Judiciary Appropriation Act, 1950.)

Payments, Armed Forces, Leave Act of 1946 (Allocation to Commerce, Coast and Geodetic Survey)—

FUNDS AVAILABLE FOR OBLIGATION: Allocation from "Armed Forces Leave Act of 1946," Executive Office of the President—1950, \$70,000.

This allocation provides for the payment of commissioned officers of the Coast and Geodetic Survey on active duty on September 1, 1946, for accumulated leave in accordance with the provisions of the Armed Forces Leave Act of 1946 (Public Law 704) as amended by Public Law 239, Eighty-first Congress.

OBLIGATIONS BY ACTIVITIES

Payments, armed forces leave—1950, \$70,000.

OBLIGATIONS BY OBJECTS

01 Personal services—1950, \$70,000.

Salaries and Expenses, Philippine Rehabilitation, Department of State (Transfer to Commerce, Coast and Geodetic Survey)—

PROGRAM AND PERFORMANCE

The Bureau participates in the formulation of Government policies affecting domestic and international trade; collects and distributes economic data, and analyzes national business trends.

1. *Analysis of national economic trends.*—Basic indicators of the condition of the national economy and current analyses of business trends are prepared and distributed to the public. Increases are proposed for 1951 to fill in statistical gaps on distribution of income by geographic areas, estimates of the number and income of families, and forecasts of industrial plant expansion and business finances.

2. *Promotion of industry and trade.*—This activity includes the analysis, interpretation, and dissemination for market research and related purposes of information on the production, demand, and distribution of commodities in domestic and foreign trade; the preparation of materials on factors to be considered in the establishment and operation of businesses; the analysis of trade restrictions and regulations of foreign nations; and the collection and analysis of foreign commercial and economic information, by country and by commodity. The Bureau proposes to increase transportation research and to provide technical and advisory services to State and local economic development agencies in 1951.

3. *Administration.*—The Assistant Secretary for the Bureau of Foreign and Domestic Commerce is responsible to the Secretary for the direction of the policies and supervision of the programs of the Bureau. These funds

provide for the salaries and expenses of the Assistant Secretary and his staff.

BUREAU OF FOREIGN AND DOMESTIC COMMERCE—Continued

Field Office Service, Bureau of Foreign and Domestic Commerce— Continued

PROGRAM AND PERFORMANCE

The 13 regional and 28 district offices of the Department of Commerce are the means through which the information and services of the Department are made available to the business community. The field offices also gather information on local business conditions for use of the Department and other agencies of Government. This activity will be carried on at the same level in 1951.

1. *Promotion of industry and trade.*—The field offices utilize the complete facilities of the constituent units of the Bureau of Foreign and Domestic Commerce, the Census Bureau, and the American Foreign Service. The foreign trade services cover all phases of export and import operations, including guidance on regulations and restrictions in effect here and abroad. In domestic trade the field offices provide assistance on marketing and distribution problems, current economic trends, and commercial and industrial information.

2. *Administration.*—The administration of the field offices is conducted by a director of the field service with the aid of necessary staff and administrative employees.

PROGRAM AND PERFORMANCE

Export controls were originally instituted to protect the domestic economy by limiting exports of scarce materials. With the constant improvement of the domestic supply situation the program emphasis has shifted from control of items in short supply to control of exports of commodities of a strategic nature. National security considerations require the continuation of controls for a limited number of commodities on a world-wide basis. Funds are provided for transfer to the Bureau of Customs for policing shipments at the point of export.

PROGRAM AND PERFORMANCE

The Patent Office administers patent and trade-mark laws governing the granting of patents for invention and the registration of trade-marks. The 1951 program is to be continued at the same staff level of operations as authorized for 1950. Receipts from filing and issue fees, sale of patent copies, and other sources were \$5,202,000 in 1949, and are estimated to be \$5,600,000 in 1950 and \$6,000,000 in 1951.

ESTIMATED MATURITY OF ALLOWED APPLICATIONS INTO PATENT AND TRADE-MARK ISSUANCES

	1949 actual	1950 estimate	1951 estimate

Renewed.....	4,735	4,500	4,000
Republished.....	20,819	5,000	3,000

1. *Executive direction.*—The funds for this activity are to pay the salaries and expenses of the Commissioner, Assistant Commissioners, and their immediate staff, responsible for determining policy, prescribing rules of practice, and directing operations of the Office.

2. *Legal counsel, appeals, and interferences.*—Legal and quasi-judicial facilities are provided for disposition of

PATENT OFFICE—Continued

Salaries and Expenses, Patent Office—Continued

patent and trade-mark cases in appeal or interference proceedings within the Office, for representation of the Commissioner before the Federal courts, and for the prosecution of proceedings for disbarment and suspension of attorneys and agents from practice before the Patent Office.

3. *Patent examining operation.*—Patent applications are examined to determine the patentability of claimed inventions. The heavy influx of applications during and immediately after the war created a tremendous backlog of work. The program for 1951 provides for further liquidation of the backlog through continued emphasis on stabilizing the examiner force and increasing the average per capita production. Work-load figures are:

	Patents, excluding designs		
	1949 actual	1950 estimate	1951 estimate
New applications received.....	66,292	66,000	66,000
Applications disposed of.....	67,935	79,000	86,800
Applications pending—end of year.....	232,171	219,171	198,371

4. *Trade-mark examining operation.*—Trade-mark applications are examined to determine the registrability of marks. Applications for renewal and republication of marks are expected to be on a current basis in 1951, with a volume of about 4,000 renewals and 3,000 republications. Work-load figures on registrations are:

	1949 actual	1950 estimate	1951 estimate
New applications received.....	20,141	20,000	20,000
Applications disposed of.....	23,054	24,000	25,000
Applications pending—end of year.....	42,553	38,553	33,553

5. *Patent and trade-mark services.*—This activity provides for issuance and publication of patents and trade-marks; services pertaining to their sale, distribution, storage, and reproduction; preparation and sale to the public of photographic copies of documents and records; recording of assignments; maintenance of a scientific library and search room; registering patents available for license or sale; and related services to facilitate the examination process or to meet requirements of the interested public. Owing to increased printing costs a supplemental estimate of \$190,000 for 1950, not reflected in the financial schedules, may be required. Provision is made in the budget year for these higher costs plus the additional amount incident to an increase of almost 20 percent in patent issues.

6. *Staff and administrative services.*—This activity comprises services for conducting the business administration functions of the Office.

BUREAU OF PUBLIC ROADS

INTRODUCTORY STATEMENT

The Bureau of Public Roads administers the Federal-Aid Highway Act through which funds are made available to the States for a cooperative program for improvement of primary, secondary, and urban highways. Federal aid to the States for the improvement of highways has been in effect since 1916. The current Federal-aid program is financed largely from funds authorized by the Federal-Aid Highway Acts of 1944 and 1948. The Bureau also cooperates with the Forest Service, National Park Service, and other Federal agencies in the development of programs for major highway improvements in the national forests, parks, and other Federal areas and is responsible for plans and surveys, location, design, and construction of highway projects in the areas.

APPROPRIATION TEXT

General administrative expenses: For the employment of persons and means, including rent, advertising (including advertising in the city of Washington for work to be performed in areas adjacent thereto), *printing and binding*, purchase of periodicals, purchase of one hundred passenger motor vehicles for replacement only, health service program as authorized by law (5 U. S. C. 150), and the preparation, distribution, and display of exhibits, in the city of Washington and elsewhere for the purpose of conducting research and investigational studies, either independently or in cooperation with State highway departments, or other agencies, including studies of highway administration, legislation, finance, economics, transport, construction, operation, maintenance, utilization, and safety, and of street and highway traffic control; investigations and experiments in the best methods of road making, especially by the use of local materials; studies of types of mechanical plants and appliances used for road building and maintenance, and of methods of road repair and maintenance suited to the needs of different localities; for maintenance and repairs of experimental highways; for furnishing expert advice on these subjects; for collating, reporting, and illustrating the results of same; and for preparing, publishing, and distributing bulletins and reports; to be paid from any moneys available from the administrative funds provided under the Act of July 11, 1916, as amended (23 U. S. C. 21), or as otherwise provided.

In carrying out the provisions of "An Act to provide that the United States shall aid the States in the construction of rural post roads, and for other purposes", as amended and supplemented (23 U. S. C. 1-117), none of the money appropriated for the work of the Bureau of Public Roads [Administration] during the current fiscal year shall be paid to any State on account of any project on which convict labor shall be employed, except this provision shall not apply to convict labor performed by convicts on parole or probation: *Provided*, That during the current fiscal year, whenever performing authorized engineering or other services in connection with the survey, construction, and maintenance, or improvement of roads for other Government agencies, cooperating foreign countries and State cooperating agencies the charge for such services may include depreciation on engineering and road-building equipment used, and the amounts received on account of such charges shall be credited to the appropriation concerned: *Provided*

Further, That during the current fiscal year the appropriations for the work of the Bureau of Public Roads [Administration] shall be available for meeting the expenses of warehouse maintenance and the procurement, care, and handling of supplies, materials, and equipment stored therein for distribution to projects under the supervision of the Bureau of Public Roads [Administration], and for sale and for distribution to other Government activities, cooperating foreign countries and State cooperating agencies, the cost of such supplies and materials or the value of such equipment (including the cost of transportation and handling) to be reimbursed to appropriations current at the time additional supplies, materials, or equipment are procured, from the appropriation chargeable with the cost or value of such supplies, materials, or equipment: *Provided further*, That the appropriations available to the Bureau of Public Roads [Administration] may be used in emergency for medical supplies and services and other assistance necessary for the immediate relief of employees engaged on hazardous work under that [Administration] Bureau, and for temporary services as authorized by section 15 of the Act of August 2, 1946 (5 U. S. C. 55a), but at rates for individuals not in excess of \$50 per diem: *Provided further*, That not to exceed \$3,000,000, to be derived from the administrative funds provided under the Act of July 11, 1916, as amended or supplemented (23 U. S. C. 21), shall be available until expended for continuing the construction of a laboratory, on a site already acquired, for permanent quarters for the testing and research work of the Bureau of Public Roads.

For all necessary expenses to enable the President to utilize the services of the Bureau of Public Roads [Administration] in fulfilling the obligations of the United States under the Convention on the Pan-American Highway Between the United States and Other American Republics, signed at Buenos Aires, December 23, 1936, and proclaimed September 16, 1937 (51 Stat. 152), for the continuation of cooperation with several governments, members of the Pan American Union, in connection with the survey and construction of the Inter-American Highway as provided in public resolution, approved March 4, 1929 (Public Resolution 104), as amended or supplemented, and for performing engineering service in pan-American countries for and upon the request of any agency or governmental corporation of the United States, \$100,000 to be derived from the administrative funds provided under the Act of July 11, 1916, as amended or supplemented (23 U. S. C. 21), or as otherwise provided. (23 U. S. C. 1-117 and 25 U. S. C. 318b—Federal Highway Act and miscellaneous highway legislation; the foregoing citations apply to all appropriation items under the Bureau in addition to any legislative authority cited therein; Independent Offices Appropriation Act, 1950.)

PROGRAM AND PERFORMANCE

1. *Grants for construction.*—The purpose of the regular Federal-aid program is the improvement of highways on the Federal-aid primary, secondary, and urban highway systems in cooperation with the State highway depart-

BUREAU OF PUBLIC ROADS—Continued

Federal-Aid Post-War Construction Program, Bureau of Public Roads—Continued

ments. The authorizations of appropriations for the Federal-aid postwar construction program were made under the Federal-Aid Highway Acts of 1944 and 1948. The 1944 act authorized the sum of \$500,000,000 annually for each of the three successive postwar fiscal years (1946-48). The Federal-Aid Highway Act of 1948 provided for continuing the program in accordance with the provisions of the 1944 act and an apportionment of \$450,000,000 in each of the fiscal years 1949 and 1950.

In general, all funds are required to be matched by the States as provided in previous highway legislation except that railway-highway grade crossing projects costing not more than 10 percent of the amounts apportioned to any State may be financed from Federal funds without State participation.

The acts provide that each annual authorization shall be available for expenditure as follows: 45 percent for projects on the Federal-aid primary system, 30 percent for projects on the Federal-aid secondary system, and 25 percent for projects on the Federal-aid urban system. As of June 30, 1949, a total of 42,105 miles and 5,377 bridges on the three systems had been completed at a cost of \$1,261,712,000 of which \$640,799,000 was the Federal share. Work is under contract or plans approved for 19,525 miles and 3,640 bridges estimated to cost \$1,245,431,000 of which \$611,341,000 is Federal funds.

A total of \$28,000,000 has been authorized for the repair and reconstruction of roads and bridges on the Federal-aid highway systems which have been damaged or destroyed by floods, hurricanes, or landslides. Payments for this work are made from the Federal-aid postwar construction fund which is later restored by direct appropriation for this expense. The work is carried on in cooperation with the State highway departments in the same manner as regular Federal-aid highway work. A total of \$10,288,854 has been appropriated for this purpose to date. The budget provides for an additional restoration of \$6,000,000.

The act of July 29, 1946, provided not to exceed \$10,000,000 to reimburse any Federal agency for additional expenditures that it may be required to incur because of the design and construction of a dam so that it will serve as a public highway. Reimbursements to agencies for work done in accordance with the provisions of this act are made from Federal-aid postwar highway funds. Highways across dams have been approved utilizing \$4,073,375 of the authorization.

The appropriations to date under the above authorizations total \$1,236,509,000. The budget estimate for 1951 of \$426,000,000 covers the unappropriated balance of the 1948 authorization and \$156,509,000 of the 1950 authorization and \$6,000,000 reimbursement for repair and reconstruction of roads and bridges as described above. The 1951 program providing for approval of projects involving \$444,000,000 of Federal funds approximates the annual rate authorized by Congress.

Proposed legislation is included in the budget for an authorization of \$500,000,000 for fiscal year 1952 to be apportioned to the States in fiscal year 1951.

2. *Construction of testing and research laboratory.*—The Bureau of Public Roads as a related part of its administration of the Federal-aid highway construction program conducts research in soils, bituminous materials and other

materials used in highway construction. The physical plant for conducting this research is now located at Abingdon, Va. The cost was financed from savings in administrative funds.

When the Washington National Airport was constructed, the Abingdon site and the laboratory buildings were transferred to the jurisdiction of the Civil Aeronautics Administration with the provision for Public Roads to retain a minimum amount of space for its research and testing activities until a new site could be acquired and laboratory buildings erected. A site was acquired at Langley and the construction of a plant to replace the laboratory facilities at Abingdon started with funds made available by Public Works allotments and an appropriation of \$1,000,000 in the Independent Offices Appropriation Act, 1949, shown under the appropriation title "Testing and research laboratory, Bureau of Public Roads." The 1951 estimates provide for completion of the facilities with savings from administrative funds.

3. *Administration.*—The administrative, engineering, and research expenses of Public Roads are provided for by deductions of 3¼ percent from the Federal-aid authorizations at the time of the apportionment. The expenses cover the salaries, travel, and other expenses of personnel in the Washington and field offices in connection with the review and inspection of approximately 10,000 individual projects in all stages from initial programing to completion.

OBLIGATIONS BY ACTIVITIES

Description	1949 actual	1950 estimate	1951 estimate
<i>Direct Obligations</i>			
1. Grants for construction:			
(a) Primary highways.....	\$173,189,396	\$190,000,000	\$200,000,000
(b) Secondary roads.....	97,911,886	127,000,000	135,000,000
(c) Urban arterial routes.....	72,414,714	108,000,000	109,000,000
(d) Flood damage restoration.....	5,004,782	4,300,000	945,671
(e) Dam and bridge design and construction.....	333,792		
2. Construction of testing and research laboratory.....			3,000,000
3. Administration.....	9,147,876	10,118,000	10,420,000
4. Pay increases.....		167,000	250,000
Total direct obligations.....	358,002,446	439,585,000	458,615,671
<i>Reimbursable Obligations</i>			
3. Administration.....	191,096	80,000	80,000
Total obligations.....	358,193,542	439,665,000	458,695,671

OBLIGATIONS BY OBJECTS

Object classification	1949 actual	1950 estimate	1951 estimate
Total number of permanent positions.....	1,917	1,975	1,975
Average number of all employees.....	1,785	1,850	1,900
01 Personal services:			
Permanent positions.....	\$7,843,324	\$8,334,000	\$8,706,000
Part-time and temporary positions.....	27,494	30,000	30,000
Regular pay in excess of 52-week base.....	29,670	33,000	
Payment above basic rates.....	33,357	30,000	30,000
Pay increases:			
Public Law 359.....		3,323	4,670
Public Law 429.....		163,677	245,330
Total personal services.....	7,933,845	8,594,000	9,016,000
02 Travel.....	319,769	450,000	475,000
03 Transportation of things.....	28,491	43,000	43,000
04 Communication services.....	75,231	80,000	80,000
