Balance available in subsequent year (contract authorization).....	-7,351,163		
Total obligations.....	8,043,736	7,351,163	

PROGRAM AND PERFORMANCE

This appropriation provides for the elimination of hazards at railroad-highway crossings by the construction of grade separations, installation of flashing lights, and relocation of highways. This work is now largely carried on under the Federal-aid postwar highway authorization but there remains unappropriated \$10,000,000 of the specific prewar authorizations for the elimination of grade crossings. It is anticipated that the remaining balance of these authorizations amounting to \$7,351,163 will be placed under contract by the States in 1950. Because of the character of the work, construction of some projects will extend into 1952 and an appropriation of \$5,000,000 will provide sufficient funds to reimburse the States for work accomplished to June 30, 1951.

The active program as of October 1, 1949, provided for the elimination of 55 highway-railway crossings, the reconstruction of 17 highway-railroad grade separation structures, and the protection of 219 crossings by protective devices involving the use of \$24,371,019 of grade-crossing funds.

OBLIGATIONS BY ACTIVITIES

Grants for construction providing elimination of grade crossings—1949, \$8,043,736; 1950, \$7,351,163.

OBLIGATIONS BY OBJECTS

11 Grants, subsidies, and contributions—1949, \$8,043,736; 1950, \$7,351,163.

APPROPRIATION TEXT

Elimination of grade crossings: For the elimination of hazards to life at railroad grade crossings, including the separation or protection of grades at crossings, the reconstruction of existing railroad grade-crossing structures, and the relocation of highways to eliminate grade crossings, to remain available until expended, \$5,000,000, which sum is a part of the amount authorized to be appropriated for the fiscal year 1943 by section 5 of the Act approved September 5, 1940 (54 Stat. 869).

Estimate 1951, \$5,000,000

PROGRAM AND PERFORMANCE

1. Construction of forest highways.—Appropriations of forest-highway funds provide for the survey, construction, reconstruction, and maintenance of roads on the forest-highway system. The forest-highway system is composed of roads of primary importance to the States, counties, and communities within, adjoining or adjacent to the national forests. The principal forest highways are located on the Federal-aid and State systems of highways and are a part of the national highway transportation system.

The Federal-Aid Highway Acts of 1944 and 1948 authorized to be appropriated a sum of \$90,000,000 for forest highways which has been apportioned among the States. Appropriations to date under the authorization total \$45,100,000, of which \$22,500,000 was appropriated for the fiscal year 1950.

The forest-highway program, under construction or for which plans have been approved, at the beginning of the fiscal year 1950 provided for the improvement of 700 miles of highways requiring \$28,995,000 of forest-highway funds. Approximately the same volume of construction is planned for 1951. The deferment of construction during the war and for several years following the war has created an immense backlog of improvements to be undertaken.

Proposed legislation is included in the Budget for an authorization of \$20,000,000 for fiscal year 1952 to be apportioned to the States in fiscal year 1951.

2. Administration.—General administration, supervision, and planning of the forest-highway program is conducted in large part by the personnel that handles the regular Federal-aid program. The projects to be included in a program of construction are jointly recommended by officials of the State highway departments, regional foresters of the Forest Service and division engineers of Public Roads. The large majority of the employees paid from forest-highway funds are directly engaged on field surveys, design, and supervision of construction operations. Salaries and other expenses that are not attributable to a specific project are classed as administration.

BUREAU OF PUBLIC ROADS—Continued**Inter-American Highway, Bureau of Public Roads—Continued**

PROGRAM AND PERFORMANCE

This item represents the supervision and engineering expense for continuing the construction of the Inter-American Highway. The full amount of the authorization of \$20,000,000 has been appropriated and to a large extent expended. Within the limit of available funds construction of the highway is proceeding in Guatemala and Nicaragua.

At present, the highway is not passable by motor vehicles over its entire length. There are three large unimproved gaps over which travel is not possible. One is about 80 miles long in southern Mexico and western Guatemala; another is in northern Costa Rica about 65 miles in length; and the third, about 150 miles long, is in southern Costa Rica and northern Panama. Over the balance of the route there are short sections where travel may be impossible in wet weather and other sections which are narrow with steep grades and sharp curves.

Proposed legislation for an authorization of \$8,000,000 for the fiscal year 1951 is included in the budget.

PROGRAM AND PERFORMANCE

The Independent Offices Appropriation Act, 1943, provided for the use of the unexpended balances of Mount Vernon Memorial Highway funds for acquiring such additional land adjacent to the Mount Vernon Memorial Highway as necessary for the protection and preservation of the memorial character of the highway. Two tracts of land were acquired in the fiscal year 1949 at a cost of \$47,411, leaving a balance of \$17,133 available for the remaining tract yet to be acquired.

OBLIGATIONS BY ACTIVITIES

BUREAU OF PUBLIC ROADS—Continued**Salaries and Expenses, Philippine Rehabilitation, Department of State (Transfer to Department of Commerce, Bureau of Public Roads)—Continued****PROGRAM AND PERFORMANCE**

In cooperation with the Department of State and the Philippine Republic, the Bureau of Public Roads is supervising a highway program in the Philippine Islands providing for the rehabilitation and restoration of highways and bridges destroyed or damaged during the war. A total of \$40,000,000 has been appropriated or contract authority provided for such purposes. At the beginning of the current fiscal year approximately \$33,000,000 has been committed for the rehabilitation of roads and bridges. The commitments cover the improvement of 375 miles of roads and streets and the repair and reconstruction of 224 bridges. As provided in the Philippine Rehabilitation Act, 10 Filipino engineers were selected from the regularly employed staff of the Philippine Bureau of Public Works and brought to the United States for training in modern construction, maintenance, and highway traffic engineering practices under the supervision of Public Roads.

PROGRAM AND PERFORMANCE

Funds for continuing the construction of the testing and research laboratory of Public Roads at Langley, Va., were provided by an appropriation of \$1,000,000 in the Independent Offices Appropriation Act, 1949. This activity for the fiscal year 1951 is carried in the budget estimates under the appropriation, "Federal-aid postwar construction program."

OBLIGATIONS BY ACTIVITIES

Construction of testing and research laboratory—1949, \$552,083; 1950, \$447,917.

OBLIGATIONS BY OBJECTS

10 Lands and structures—1949, \$552,083; 1950, \$447,917.

PROGRAM AND PERFORMANCE

This item covers the rehabilitation or repair of roads, highways, and bridges in the Territory of Hawaii which were damaged by the armed services or contractors in connection with the prosecution of the war or national defense and for the restoration or reconstruction of highways and bridges which were damaged or destroyed by the seismic waves in April 1946. A total of \$10,000,000 has been authorized for this program, of which \$8,000,000 has been appropriated and contract authority provided for the remaining \$2,000,000.

At the beginning of 1950, 155 miles of the total program of 208 miles for restoration of roads due to war damage had been completed. A large portion of the seismic wave damage program is the relocation and reconstruction of a road of approximately 40 miles in length from Honokoa to Hilo on the Hamakua coast. Of the \$10,000,000 authorized, \$9,143,338 has been programmed for construction of projects, leaving a balance of \$856,662 available for additional work. Sufficient funds have been appropriated to pay the Territory for work to be done to June 30, 1951.

OBLIGATIONS BY ACTIVITIES

Grants for highway construction—1949, \$4,110,212; 1950, \$2,500,000; 1951, \$2,655,762.

PROGRAM AND PERFORMANCE

1. *Construction of highways.*—Funds for this activity have been advanced by other Government agencies for the construction of highways, including engineering and surveys. The principal projects consist of major forest road construction, Turnagain Arm project in Alaska, and engineering and surveys of highways in the interior of Alaska, national park roads and parkways.

2. *Administrative services.*—This activity consists of microfilming of records in connection with various programs of the Bureau of Community Facilities.

PROGRAM AND PERFORMANCE

Obligations of this item in 1949 and 1950 cover work done with funds transferred from the Housing and Home Finance Agency through the Forest Service and the Re-

construction Finance Corporation for access roads to timber areas; also, highway work done with funds advanced from the Forest Service which come from contributions by other than Federal agencies.

OBLIGATIONS BY ACTIVITIES

Construction of highways—forest roads—1949, \$348,302; 1950, \$50,636.

NATIONAL BUREAU OF STANDARDS

APPROPRIATION TEXT

For expenses necessary in carrying out the provisions of the Act approved March 3, 1901 (5 U. S. C. 591, 597; 15 U. S. C. 271-278), and Acts supplementary thereto affecting the functions of the Bureau and the functions set forth under the Bureau of Standards in the "Department of Commerce Appropriation Act, 1935", including personal services in the District of Columbia; rental of laboratories in the field; [construction of working quarters in the field when suitable facilities are not otherwise available and living quarters at remote localities;] repairs and alterations to buildings and other plant facilities, and not to exceed \$700,000 for improvements to buildings, grounds, and other plant facilities including construction of minor buildings and other facilities in the District of Columbia and in the field to house special apparatus or material which must be isolated from other activities; building of temporary experimental structures; expenses of the visiting committee; demonstration of the results of the Bureau's work by exhibits or otherwise as may be deemed most effective; purchase, repair, and cleaning of uniforms for guards; purchase of not to exceed five passenger motor vehicles for replacement only; printing and binding; not to exceed \$100,000 for services as authorized by section 15 of the Act of August 2, 1946 (5 U. S. C. 55a); and purchase of reprints from trade journals or other periodicals of articles prepared officially by Government employees, as follows: (5 U. S. C. 591-597; 15 U. S. C. 271-278; Departments of State, Justice, Commerce, and the Judiciary Appropriation Act, 1950.)

PROGRAM AND PERFORMANCE

The National Bureau of Standards conducts a program comprising fundamental research in physics, chemistry, mathematics, and engineering, and the development of testing techniques and testing. An important phase of

the program is concerned with the maintenance and development of national standards of physical measurement in terms of which all working standards in research laboratories and industrial operations are calibrated. Research is carried on leading to the improvement in such standards and methods of measurement and for development of improved methods of testing materials, mechanisms, and structures. The program includes determination of physical constants and properties of materials when such data are of importance to educational, scientific, engineering, manufacturing, and commercial interests; tests and calibration of standard measuring apparatus and reference standards; advisory services to Government agencies on scientific and technical problems; and the development of devices to serve special needs of the Government.

These activities encompass research and testing in the fields of electricity, optics, metrology, heat and power, atomic, nuclear, and molecular physics, chemistry, mechanics, applied mathematics, electronics, and others, and include development of commodity standards and building technology. This program will be continued in 1951 at approximately the same level as in 1950, except for an increase in the atomic and nuclear research program.

PROGRAM AND PERFORMANCE

The Central Radio Propagation Laboratory conducts research on the propagation and characteristics of radio waves at all frequencies. It develops techniques and methods for applying the results of this research to practical problems of specific radio systems. It serves as a central repository and disseminating center for propagation information collected from other agencies throughout this country and the rest of the world, conducts research in methods of measuring quantities at all radio frequencies, develops and maintains the primary national standards for such measurement, and devises techniques of measurement and calibration involved in the development of secondary standards.

A network of 14 radio propagation field stations is maintained by this laboratory, extending over the American continents and the Pacific area; 7 stations are operated directly and the remainder under contracts with other laboratories. The laboratory also operates Station WWV at Beltsville, Md., and experimental Station WWVH at Maui, T. H., for continuous broadcasting of time and frequency standards. The laboratory assists and cooperates with other agencies in the solution of their radio propagation problems. This program will be continued in 1951 at approximately the same level as in 1950.

PROGRAM AND PERFORMANCE

These funds provide for administration of the Bureau, including maintenance and operation of the physical plant, and supervision of the instrument, glass-blowing and woodworking shops. Administrative costs include expenses of the Office of the Director, and budget, management, personnel, and other administrative services. The Bureau's physical plant includes 20 major and numerous minor laboratory buildings within an area of 68 acres. Maintenance and operation costs cover expenses involved in maintenance, repair and protection of buildings, and maintenance of grounds and operation of the power plant. Funds requested for improvement of physical plant are required to continue a general rehabilitation program for which funds were provided in 1948 and subsequent years. Operations in 1951 will remain at approximately the 1950 level.

Total obligations.....			6,375,000

PROGRAM AND PERFORMANCE

This account provides for the acquisition of sites, the preparation of drawings and specifications and the construction and equipping of a radio laboratory and a guided missiles laboratory. Construction of these buildings was authorized at a cost of \$4,475,000 for the radio laboratory and \$1,900,000 for the guided missiles laboratory by Public Laws 366 and 386, Eighty-first Congress. The appropriation of \$700,000 is proposed for 1951 to provide for the cost of plans and site acquisition and a contract authorization of \$5,675,000 is proposed for construction work to be accomplished in subsequent years.

PROGRAM AND PERFORMANCE

The basic purpose of the Weather Bureau is to collect, process, and disseminate weather and hydrologic information, past, present, and future required for public safety and national welfare. Observations and studies are made for (a) forecasting the weather and the stages of rivers, (b) gathering and processing climatological records, (c) the discovery of laws governing atmospheric phenomena, and (d) an information service to meet the needs of agriculture, commerce, industry, public utilities and all forms of transportation.

1. *General weather services.*—The objectives of this program are accomplished through strategically located field stations which make weather observations and render weather forecasting and informational services. Forecasting activities include: weather forecasts and warnings for all United States territory, adjacent oceans, and the Great Lakes; hurricane forecasts and warnings for the Gulf and Atlantic Coast; horticultural forecasts for the protection of fruit and truck crops with emphasis on the fruit frost service in Florida and the Pacific Coast States; fire-weather forecasts and warnings in cooperation with the United States and State forest services; and aviation weather forecasts contributing to planning, operation, and control of domestic and international aviation.

Informational services embrace the collection, analysis and reporting of day-to-day weather conditions, for the United States, its possessions, and the oceans, and similar information on past weather in the form of climatological digests.

International cooperation is fostered in order to exchange weather data in the standardized form best serving international air and ocean commerce, and the forecasting of storms and cold waves that affect the United States.

The number of field stations will be increased in 1951 from 387 to 391 to provide weather service at 4 new locations, principally for aviation, and the fire-weather service will be extended to new areas.

2. *River and flood forecast and warning service.*—A continuous watch on river stages and water supply factors is maintained by 86 field stations. River and flood forecasts are issued as appropriate to protect life and property, to assist in the planning and operation of dams, locks, and other water control structures, and to serve reclamation and irrigation projects. The service will be carried on at approximately the same level in fiscal year 1951.

3. *Research.*—Includes testing and evaluation of the basic theoretical assumptions used in forecasting, practical studies for improving the accuracy of short-range and long-range forecasts, and research to develop an improved knowledge of the physical processes at work in the atmosphere. The increase for 1951 will provide for preparation and publication of Northern Hemisphere weather maps.

4. *Administration.*—Includes executive direction, staff work, and common services such as fiscal, procure-

PROGRAM AND PERFORMANCE

The purpose of the Philippine rehabilitation program is to reestablish an adequate weather service in the Philippines and to provide a nucleus of professionally trained personnel for permanent future operation of this service. Since inception of this program in fiscal year 1947, the number of operating weather stations has grown to 45; this number will be increased to 47 in 1950. Plans call for termination of the program at the close of fiscal year 1950.

PROGRAM AND PERFORMANCE

This account provides for conducting special meteorological services for other governmental agencies at points where the Weather Bureau would not normally maintain facilities and the conduct of studies and preparation of statistical reports. Such studies serve various needs, the principal of which are: (1) preliminary surveys associated with major construction programs related to water use or

flood control, and (2) the day-to-day operation of flood control and irrigation projects.

PURPOSE AND FINANCIAL ORGANIZATION

The Inland Waterways Corporation was created by act of Congress, June 3, 1924 (49 U. S. C. 151) and was operated under the direction and supervision of the Secretary of War until its transfer to the Department of Commerce in 1939.

The Corporation's chief purpose and objective is to demonstrate the feasibility of water transportation on the inland rivers and to extend the benefits of this service to the people of the United States. The Corporation, operating under the trade name Federal Barge Lines, provides the most complete common-carrier barge service offered on the Mississippi, Illinois, Missouri, and Warrior Rivers. All types of freight, except livestock and perishables, are transported on 3,300 miles of inland rivers with 21 boats and 254 barges. Operations are conducted through numerous private terminals as well as through 21 general merchandise facilities. A railroad switching facility operating between Port Birmingham and Ensley, Ala., serves that industrial area and provides a connecting link between the Corporation's facilities and trunk-line railroads serving the Southeast.

The Corporation executes the stated policy of Congress to provide transportation services on the Mississippi, Illinois, Missouri, and Warrior Rivers until (a) there shall have been completed navigable channels as authorized by Congress; (b) terminal facilities shall have been provided on such rivers reasonably adequate for joint rail and water service; (c) there shall have been published and filed under the provisions of the Interstate Commerce Act, as amended, such joint tariffs with rail carriers as shall make generally available the privileges of joint rail and water transportation upon terms reasonably fair to both rail and water carriers; and (d) private persons, companies, or corporations engage in, or are ready to engage in, common carrier service on such rivers. The Corporation has no specified term of existence. Enabling legislation provides, however, that as soon as the foregoing conditions shall have been met the facilities of the Corporation may be sold or leased to private enterprise when such transfer can be made to the best advantage of the Government (49 U. S. C. 153).

The Corporation is managed by the officers appointed by the Secretary of Commerce who also selects the Chairman and six members of an advisory board. Statutory provisions require that board members be chosen from "individuals prominently identified with commercial or business interests in territory adjacent to the operations of the Corporation." Each member serves for 5 years with no salary except per diem and reimbursement for travel and expenses when engaged on Corporation business.

The Corporation's originally authorized capital stock of \$5,000,000 was increased in 1928 to \$15,000,000 (49 U. S. C. 152). All of the capital stock has been appropriated, although there is legislation pending in Congress which would provide an increase in the authorized capital stock. The Corporation has no authority to issue bonds or to incur other long-term debts. Transferred property, appraised at \$12,298,189, represents the value of equipment and facilities turned over by the War Department when the Corporation was chartered.

ANALYSIS OF BUDGET PROGRAMS

The budget program of the Inland Waterways Corporation for the fiscal year 1951 consists of (1) common carrier operations, (2) capital replacement program, and (3) lending activities. The level at which the various activities of the Corporation are projected for the fiscal years 1950 and 1951 is slightly below that of 1949.

COMMON CARRIER OPERATIONS

The operations of the Corporation include (1) water-line on two river segments, the Mississippi and Warrior, and (2) railroad. Service on the Mississippi division includes the Mississippi River between Minneapolis and St. Paul, Minn., and New Orleans, La.; the Missouri River between Omaha, Nebr., and St. Louis, Mo.; and the Illinois River between Chicago, Ill., and St. Louis, Mo. The Warrior River service extends from New Orleans, La., to Mobile and Port Birmingham, Ala. The railroad operation provides a connecting water-rail service to Birmingham, Ala., and the Southeast.

Fiscal year 1949 was one of the best since calendar year 1938. In preparing budget estimates for fiscal year 1949, some of the natural unpredictable factors, such as floods, high and low water, and ice conditions, were considered as well as the deteriorated condition of floating equipment owned by the Corporation. However, the

tremendous increase in export grain and increased tonnage in other commodities, combined with extremely favorable operating conditions, resulted in revenue freight totaling 2,705,314 tons. This represents an increase of 587,414 tons over the revised 1949 estimate and 653,830 tons above the actual for fiscal year 1948. The Mississippi division carried 2,617,433 tons and the Warrior division, 87,881 tons. Railroad tonnage totaled 1,226,143 in fiscal year 1949, an increase of 273,638 tons over the actual for fiscal year 1948.

The temporary embargoes on less-than-bargeload merchandise traffic, in effect during the first half of fiscal year 1949, retarded the return of merchandise traffic to the river. In the latter half of the year, however, a considerable increase over 1948 was noted. Bulk traffic continued to move at satisfactory levels, at times the traffic exceeding the capacity of equipment owned by the Corporation.

The budget estimates for 1950 and 1951 are based on an anticipated water-line tonnage of 2,313,400 single-count tons, of which 2,215,000 tons will be carried on the Mississippi division and 98,400 tons on the Warrior division. Railroad traffic is estimated to be 1,238,600 tons. This estimate contemplates a decrease of 402,433 tons from the 1949 actual on the Mississippi division due to the uncertainty of the export grain movement, the loss of some sulfur and oil tonnage, the operation of deteriorated and obsolete equipment, and estimated average operating conditions instead of the extremely favorable conditions encountered in fiscal year 1949. Tonnage on the Warrior and Railroad divisions is increased slightly in anticipation of additional iron ore being imported from Europe and South America. Revenue freight tonnage shown below, by divisions, contains duplications inasmuch as some traffic moves over more than one division.

Division	1949 actual	1950 estimate	1951 estimate
	<i>Tons</i>	<i>Tons</i>	<i>Tons</i>
Lower Mississippi River.....	2,013,362	1,522,300	1,522,300
Upper Mississippi River.....	651,310	640,000	640,000
Illinois River.....	606,838	530,700	530,700
Missouri River.....	47,356	119,200	119,200
Warrior River.....	87,881	98,400	98,400
Railroad.....	1,226,143	1,238,600	1,238,600

Based on the single-count tonnage estimates, transportation revenue for fiscal years 1950 and 1951 will average \$3.84 per ton, as compared with expenses averaging \$4.85 per ton in 1950 and \$4.93 in 1951.

The long-contested joint barge-rail rate case (I. C. C. docket 26712) has been settled and a decision rendered by the Interstate Commerce Commission in July 1949 provides for the establishment of joint rates with rail carriers by November 1, 1949. This decision will be tested in the courts by the railroads. If the Commission's decision is affirmed, there should be a material increase in the merchandise tonnage offered for river transportation.

All operating economies possible are being effected, such as decreased turn-around time for boats, through tows of bulk traffic, and the leasing of terminal facilities to private operators at all locations except Mobile, Ala., and Dubuque, Iowa, to promote greater local interest and reduce handling charges. Without new floating and terminal equipment, further operating economies will be extremely limited unless service is suspended on segments of the system.

CAPITAL REPLACEMENT PROGRAM

Capital improvements during fiscal year 1949 totaled \$274,173 and included improvements to boats and barges, conversion of one boat from steam to Diesel, cranes for the St. Louis terminal, and shop and stores facilities at St. Louis. Replacement of obsolete and deteriorated floating equipment or the development of modern terminal handling equipment cannot be attempted because of lack of funds. The present program anticipates an expenditure of \$150,000 in fiscal year 1950 and the same amount in fiscal year 1951. With the exception of radar equipment and tow-boat servicing facilities estimated at \$125,000, these amounts should take care of the minimum operating requirements.

Legislation is pending to increase the capital stock of the Corporation. While the Corporation's statements do not reflect any increase in its capital stock, \$3,000,000 is included under proposed legislation for this item in 1951. Until such time as this additional stock is authorized, no appropriation can be obtained to replace the obsolete floating equipment now in operation. Without modern, efficient equipment, successful operation of the Corporation does not appear possible.

LENDING ACTIVITIES

The Corporation is authorized to make loans to States, municipalities, and transportation companies that will contribute to the improvement of transportation facilities along the inland waterways (49 U. S. C. 141). As of June 30, 1949, there was one loan outstanding of \$105,568 to the city of New Orleans. No new loans are contemplated for fiscal years 1950 and 1951.

ADMINISTRATIVE EXPENSES

The Corporation is subject to the regulations of the Interstate Commerce Commission and administrative expenses for water and railroad operations for 1951 are those set forth under the title "General expenses" in the Commission's uniform system of accounts for carriers by water.

Administrative expenses in fiscal year 1949 were \$471,899 as compared with estimated expenses in 1950 and 1951 of \$522,000 and \$542,000, respectively. In fiscal year 1949 an unexpended balance of \$26,901 remained out of the original authorization of \$498,800.

FINANCIAL REVIEW

Many factors combined to make fiscal year 1949 the best year since 1938, including: the greatest grain movement in the history of the Corporation; the lack of continued low or high water; the mildest winter in years; the absence of major work stoppages in the coal fields; and the gradual transition in the middle of the year from a seller's market to a buyer's market, which stimulated the movement of merchandise traffic.

Income, which totaled \$10,212,893 in 1949, is estimated to be \$9,209,800 and \$9,209,300 in 1950 and 1951, respectively. Transportation revenue represents the major portion of the estimated reduction due largely to the uncertainty of the south-bound grain movement for export, the faltering tonnage of sulfur due to declining industrial production, and assumption of average river conditions throughout the year. Revenue from terminal

INLAND WATERWAYS CORPORATION—Continued

operations and rent revenue were decreased because the leasing of terminal facilities by private operators precluded these sources of income, except at those terminals operated by the Corporation. These two factors, combined with the deteriorated condition of barges owned by the Corporation, preclude any optimistic estimates of income for fiscal year 1951.

Expenses for fiscal year 1951 are estimated at \$11,441,700 as compared with \$10,777,781 in 1949 and \$11,251,200 in 1950. The cost of maintaining present floating equipment, especially barges, is constantly increasing. Because of the condition of these barges, claims are mounting and the cost of cargo insurance has increased. It is entirely possible that insurance underwriters will refuse to insure cargo, except in specified barges, in the near future, although there is some indication that the barges might be used for deck cargo only. This would affect 102 barges, all of which are used in carrying merchandise freight. Depreciation charges have been increased in

accordance with the recommendations of the General Accounting Office.

The deficit at the beginning of fiscal year 1949 was \$14,539,770 to which is added the loss for fiscal year 1949 of \$564,888 and expenses affecting prior years totaling \$550,590. To be deducted is the sum of \$2,078,894 which represents depreciation adjustments. Net losses in 1950 and 1951 of \$2,041,400 and \$2,232,400, respectively, increase the deficit to \$17,850,154 as of June 30, 1951.

It is evident that some decision as to the rehabilitation of deteriorated and obsolete equipment should be made during fiscal year 1950. The original authorization of \$15,000,000 has been appropriated and profitable operation of the Corporation does not appear possible under existing conditions.

The Government's investment consists of capital stock, property transferred without reimbursement, and the accumulated deficit from operations. The total investment at June 30, 1949, was \$12,721,835 and is anticipated to be \$11,680,435 and \$9,448,035 at June 30, 1950, and 1951, respectively.

Total, Department of Commerce.						109	2,511,533	

¹ Does not include \$445,000 for hire of aircraft.

PROPOSED LEGISLATION

Forest highways, Alaska, Bureau of Public Roads, Department of Commerce.—Provided authorizing legislation is enacted, an appropriation of \$2,888,000 and contract authority of \$4,364,000 will be requested for the reconstruction and construction of roads in southeastern Alaska to adequately serve present and potential traffic. Plans of the Forest Service for the sale of pulp timber and the establishment of pulp mill plants at Ketchikan, Sitka, and Juneau with the resulting large increase in population will intensify the traffic situation. To accommodate the increased population, the Forest Service plans to open up additional areas for home sites which will require construction of new roads.

Rama Road, Republic of Nicaragua, Bureau of Public Roads.—Provided authorizing legislation is enacted, con-

tract authority of \$8,000,000 for fiscal year 1951 will be requested for the continuation of the construction of the Rama Road to provide Nicaragua with a port on the Caribbean Sea.

Other.—In addition proposed legislation extending existing programs is discussed under the following titles:

Construction of public airports, Territory of Alaska, Civil Aeronautics Administration.

Federal-aid postwar construction program, Bureau of Public Roads.

Forest highways, Bureau of Public Roads.

Inter-American Highway, Bureau of Public Roads.

Inland Waterways Corporation.

INTRODUCTORY STATEMENT

The Department of Defense, under the 1949 amendments of the National Security Act, includes the three military departments—the Department of the Army, the Department of the Navy including the Marine Corps, and the Department of the Air Force—and the Office of the Secretary of Defense and its associated agencies.

In enacting the Military Appropriations Act of 1950—the first unified military appropriation act to cover the entire Department of Defense—the Congress specified certain savings to be achieved within the appropriations made. Furthermore, the act directs the Secretary of Defense to present recommendations for other savings to this session of Congress. The results of action taken by the Secretary are reflected in the estimated obligations shown below in the revised 1950 estimates.

The extensive revision of these estimates will not only result in the absorption, within the total appropriations made, of in excess of \$400 million for items not initially budgeted, such as the recent military and civilian pay increases, but also in reserves which will limit obligations to \$13 billion, approximately \$1 billion less than the obligational authority approved for 1950.

There has been substantial progress in the past year in a number of fields which have a direct influence on budgetary requirements. Interservice cooperation to secure maximum joint use of facilities has been productive of increased efficiency and has contributed to the reduction in civilian employment as well as in the numbers of military personnel throughout the Department.

Certain reductions have come about by changes in occupation responsibilities. Other reductions were the result of adjustments in the military manpower of the military departments. These adjustments take into account the advance in training and organization of civilian reserve components which has increased their readiness to aid in meeting emergencies promptly.

As a result of reducing the cost of overhead and the support type activities, it has been possible to increase the effectiveness of our military forces by providing increased amounts for aircraft and other modern weapons, communication and detection devices, and other combat and technical equipment for strategic and tactical air operations, for improvement of Army mobile forces, and for further modernization of the Navy's antisubmarine warfare forces.

The program for 1951 will support an average of 1,506,501 man-years for military personnel of the Armed Services, and an average of approximately 725,000 civilian employees for general administration and logistical support of these forces.

In the Army's estimates for 1951, 630,000 man-years are estimated for officers and enlisted personnel on active duty. This will maintain the strength planned for June 30, 1950, subject to such changes as may be necessary as a result of the consolidation of all sea transport services in the Department of the Navy. The total effectiveness of the Army will be increased during 1951 by a higher level of training for the National Guard with an average strength of 350,000 and an Organized Reserve of 255,000 in drill-pay status.

The Navy estimates are based upon 386,064 man-years for military personnel during 1951 for the active Navy and 74,437 for the Marine Corps, including personnel on continuous active duty in support of Reserve activities. These naval forces will provide the necessary personnel for

the shore establishment and will man an active fleet of 238 major combatant ships and 414 supporting vessels, exclusive of district and harbor craft. The active inventory of Regular Navy and Marine Corps aircraft is projected to average 5,900 in 1951. Training will be provided for an average total strength of 255,622 Naval and Marine Corps Reserves in drill-pay status.

The Air Force in 1951 would be continued at present strength, with a total of 416,000 man-years provided in the estimates for officers and enlisted personnel on active duty. Its combat forces will be organized in general along the lines provided in the revised 1950 program. The active inventory of all types of aircraft is contemplated at 8,800 airplanes. The Air National Guard will be maintained at an average strength of 49,500 officers and men which is expected to be attained by June 30, 1950; the Regular Air Force will also be backed by 68,627 Reserve personnel in organized units or selected mobilization assignments receiving training in drill-pay status.

Procurement projected in the estimates for 1951 would substantially further the program for modernization of combat equipment of all the military services. Of the nearly \$2.8 billion estimated for procurement, \$2 billion will be for aircraft, \$157 million more than in the 1950 revised program. In other procurement projects, emphasis is placed on providing the most modern weapons, communication and detection devices, and other combat and tactical equipment for Army mobile forces and for Navy antisubmarine warfare. No new program for naval shipbuilding is herein proposed; the funds requested in 1951 are for payment of construction to be completed under building programs of prior years.

In other military requirements, programs for 1951, as reflected in these estimates, would maintain research and development and industrial mobilization at approximately the current level of operations.

Pending legislation would authorize additional construction of permanent defense facilities; the budget provides a contingency item of \$300 million in new obligational authority to initiate construction on some of these projects during 1951. Current housing shortages at many military installations will be relieved without construction appropriations by private enterprise operating under the terms of Public Law 211 which authorizes the Federal Housing Administration to insure mortgages on housing construction for defense personnel at or near military installations.

Improvements in the budget structure, looking toward the development of a performance presentation within the near future, are primarily responsible for changes proposed in appropriation language and structure in the budget estimates which follow. The Department of the Navy appropriation structure is substantially revised, a major step in the development of performance budgeting for the Department of Defense.

In addition to the national defense programs previously mentioned, the Department of Defense conducts certain civil functions. In 1951 these functions are estimated to require \$1.5 billion including \$798 million primarily for flood control and river and harbor work under the Corps of Engineers, \$320 million for government and relief in occupied areas, and \$356 million for retired pay of officers and enlisted men. The latter amount includes \$78.3 million for payments to Reserve officers retired for disability, previously included in the estimates for the Veterans Administration.

Statement of proposed obligations for purchase and hire of passenger motor vehicles for the fiscal year 1951

DEPARTMENT OF DEFENSE

Appropriation	Motor vehicles to be purchased		Old vehicles to be exchanged		Net cost of vehicles to be purchased	Old vehicles still to be used	Cost of hire of motor vehicles	Public purpose and users

PROGRAM AND PERFORMANCE

The Secretary of Defense is the principal assistant to the President in all matters relating to the Department of Defense and, under the direction of the President and subject to the provisions of the National Security Act and its amendments, has direction, authority, and control over the Department. The Secretary, assisted by his immediate staff, sets the objectives, determines the policies, and formulates the basic programs of the Department and supervises its operations. The Joint Chiefs of Staff and the Joint Staff, the Armed Forces Policy Council, the Munitions Board, and the Research and Development Board perform specific statutory functions and in their assigned fields advise and assist the Secretary in the performance of his functions.

The principal objective of the Department of Defense is to provide a sufficiency of defense for the United States measured against both the security needs of the Nation and the strength of the entire economy. Increased emphasis is being placed on the development of a sound organization and management structure for the Department and on achieving economy and efficiency in all its operations based on improved short-range and long-range planning. Industrial-logistic readiness measures will be continued at substantially the present level. The techniques and procedures initiated this year for coordinating research and development with stated strategic objectives and technical promise will be refined and further improved in order to bring into closer balance the over-all relative importance of projects and to eliminate undesirable duplications among these projects.

With the pattern established this year for the development of an integrated budget based on coordinated military planning, added emphasis is being directed toward improving current procedures and implementing the various budget and fiscal reforms authorized under title IV of the amendments to the National Security Act. The procedures for developing a single legislative program for the entire Department of Defense are being further improved, and efforts are being made to achieve greater uniformity in the basic legislative authority of the military departments. Initial steps in the field of personnel policies have provided a framework for the development of an integrated personnel policy for the Department of Defense.

In addition, programs which are being emphasized include weapons evaluation, medical services, civilian components, politico-military affairs, domestic security matters (such as defense against unconventional forms of warfare), civil defense responsibilities within the Department of Defense, liaison with other Government agencies, and application of atomic energy for military purposes.

Total obligations.....	6,232,107	6,971,000	5,900,000

PROGRAM AND PERFORMANCE

Funds provided under this appropriation are expended in settlement of claims, as authorized by law, filed against the Government as a result of operations of the Department of Defense.

This program consolidates the estimated requirements of the Departments of Army, Navy, Air Force, and Office of the Secretary of Defense for military and civilian personnel claims for private property lost, destroyed, abandoned or damaged in the military service, including loss of or damage to personal or household goods during shipment between official stations, Federal tort claims, payment of claims compromised by the Attorney General, repayments of erroneous collections and other miscellaneous claims.

OBLIGATIONS BY ACTIVITIES

Description	1949 actual	1950 estimate	1951 estimate
1. Military and civilian personnel claims.....	\$1,287,027	\$2,176,236	\$1,770,000
2. Federal tort claims.....	2,114,913	2,730,608	2,396,000
3. Other claims.....	2,381,131	564,156	489,000
4. Compromise settlements.....	349,036	1,360,000	1,100,000
5. Repayments of erroneous collections.....	100,000	140,000	145,000
Total obligations.....	6,232,107	6,971,000	5,900,000

OBLIGATIONS BY OBJECTS

13 Refunds, awards, and indemnities—1949, \$6,232,107; 1950, \$6,971,000; 1951, \$5,900,000.

APPROPRIATION TEXT

For payment of claims by the Office of the Secretary of Defense, the Army (except as provided in appropriations for civil functions admin-

istered by the Department of the Army), Navy, Marine Corps, and Air Force, as authorized by law (5 U. S. C. 946; 28 U. S. C. 2672; 31 U. S. C. 222c, 222e, 223b, 223d, 224d; 34 U. S. C. 600; 35 U. S. C. 91; 39 U. S. C. 135; 46 U. S. C. 797; Act of November 15, 1945, 59 Stat. 582; claims (not to exceed \$1,000 in any one case) for damages to or loss of private property incident to the operation of Army and Air National Guard camps of instruction, either during the stay of units of said organizations at such camps or while en route thereto or therefrom; claims, as authorized by law, for damage to property of railroads under training contracts; and repayment of amounts determined by the Secretary of the Army, the Secretary of the Navy, or the Secretary of the Air Force, or officers designated by them, to have been erroneously collected from military and civilian personnel of the Departments of the Army, Navy, and Air Force or from States, Territories, or the District of Columbia, or members of National Guard units thereof; \$5,900,000.

Estimate 1951, \$5,900,000

Estimate is for activities previously carried under appropriations as follows:	
"Claims, Department of the Air Force".....	\$2,440,000
"Payment of claims under specified acts, Navy".....	850,000
"Contingencies of the Army".....	2,750
"Field exercises".....	33,000

PROGRAM AND PERFORMANCE

Funds provided under this appropriation are expended for the pay, as authorized by law, of military personnel on the retired lists of Army, Navy, Marine Corps, and Air Force. The program reflects a consolidation of the retired lists of Army, Navy, Marine Corps, and Air Force,

including the Navy and Marine Corps fleet reserves and reserve personnel of the Army and Air Force retired for disability which were heretofore certified to the Veterans Administration for payment. The following tabulation shows for each of the fiscal years concerned the estimated average number of personnel on the retired lists:

	1949 actual	1950 estimate	1951 estimate

PROGRAM AND PERFORMANCE

This appropriation provides for the following activities as may be approved by the Secretary of the Army.

1. *Congressional travel.*—The expenses of Senators and Representatives examining military estimates in the field are paid from this account.

2. *Travel, Department of the Army.*—The traveling expenses of the Secretary and other top officials of the Army are included in this item.

3. *Public information activities.*—Newspapers, magazines, reference books, transcriptions, and similar matter are purchased for Army areas, overseas commands, Army Field Forces, and the United States Military Academy.

4. *Provost Marshal General activities.*—Expenses of the staff which investigates crimes within the military establishment are included in this item.

5. *Inter-American Defense Board.*—The Chairman of the United States delegation and other members of the Board as designated by him hold luncheons, receptions, and other social functions in honor of foreign delegates and advisers of the Board and their families, which are provided for under this item.

6. *Conference reports.*—Reporter services before the Board of Contract Appeals, fees and mileage of Government witnesses, and the taking of depositions are provided under this item.

7. *Miscellaneous current expenses.*—Expenses incident to official entertainment of distinguished civilians and emergency expenditures not otherwise provided for are covered here.

8. *Extraordinary military expenses.*—These expenses are incurred as approved by the Secretary of the Army.

Unobligated balance, estimated savings (available for administrative reappropriation in subsequent years).....		-1,000,000	
Total obligations.....			

PROGRAM AND PERFORMANCE

The Army management fund was created under title IV of the National Security Act amendments of 1949 for the purpose of facilitating the economical and efficient conduct of operations which are financed by two or more appropriations within the Department of the Army. The fund will also be used to facilitate the conduct of joint operations financed by one or more Army appropriations and one or more appropriations of the other departments within the Department of Defense.

The corpus of the fund consists of the sum of \$1,000,000 transferred from the appropriation, "Ordnance service and supplies, Army," pursuant to the act,

Assistance to Greece and Turkey, Executive Office of the President (Allocation to Army)—

Total obligations.....	225,503,751	49,028,119	

PROGRAM AND PERFORMANCE

The Department of the Army has the mission of assisting Turkey in developing sufficient military strength to deter outside aggression and of providing Greece with military aid sufficient to prevent dissident elements from achieving dominance. The estimate for 1950 is an interim request primarily for the first quarter. After November 6, 1949, assistance to Greece and Turkey became a part of the mutual defense assistance program.

1. *Supplies and equipment.*—This provided ammunition, small arms, artillery, tanks, and combat vehicles, and other supplies necessary for support of the Greek National Army and spare parts for equipment furnished Turkey in previous years under the aid program. This also provided for the rehabilitation and reconstruction of railways, highways, and port facilities in Turkey during 1948 and 1949 only.

2. *Operating expenses of missions.*—These funds provided for payment of the salaries and expenses of departmental personnel and salaries, allowances, and expenses of missions.

3. *Training expenses.*—This provided technical and tactical training to insure proper maintenance and efficient use of the equipment provided.

PROGRAM AND PERFORMANCE

Field exercises are the means by which individual units are welded into a coordinated military team by the practical application of the lessons taught in service schools, on firing ranges and obstacle courses, and in individual and unit training. Maximum possible participation of personnel and units of the reserve components are included in field exercises, with such participation increasing in proportion to the advancement of reserve component

GENERAL STAFF CORPS—Continued

Special Field Exercises, Army—Continued

unit training. Funds provided under this appropriation represent the extra cost involved in staging the exercises and only nonstandard items of materials not issued through regular channels of supply are purchased from this account.

1. *Department of the Army exercises.*—This program, developed at departmental level, consists of Army-wide exercises, and, for 1951, includes 14 exercises. An estimated 108,000 Regular Army troops will participate in 1951, as compared to 35,250 troops in similar exercises in 1949 and 71,000 troops in 1950. A large proportion of the General Reserve troop strength will receive training in these exercises. The 1951 program includes one or more exercises involving each of the following types of special operations, over and above conventional training: Air-borne, air-transported, and coordinated Army-Air Force operations; arctic; amphibious (both ship-to-shore and shore-to-shore); Armor-Infantry-Air Force teamwork; jungle; and mountain.

2. *Local exercises, zone of the interior and oversea commands.*—Under these programs the Army Area, Technical Service, and oversea commanders deploy their own units in the field in furtherance of their assigned training missions.

PROGRAM AND PERFORMANCE

To promote military collaboration with Latin-American countries, a program of standardization of organization, training, and equipment has been undertaken by the Department of the Army.

1. *Representation.*—This fund provides for the official entertainment of Latin-American officials by members of United States Army missions, the Joint Brazil-United States Military Commission, and by the Caribbean Command.

2. *Training.*—Training aids and materials are provided for United States Army missions and the training center maintained in Panama for Latin-American military personnel.

3. *Translation and publication.*—Selected military training publications and the publication Military Review are translated into Spanish and Portuguese.

4. *Tours of Latin-American officers.*—High-ranking Latin-American officials are shown leading industrial and military installations in the United States.

5. *Additional allowances at missions.*—Cost-of-living allowances are paid to members of United States Army

missions in Latin America when these are not paid by the host government.

PROGRAM AND PERFORMANCE

This subappropriation provides for two types of requirements, (1) pay and allowances of military personnel, and (2) compensation of civilian personnel at military headquarters other than the departmental offices.

1. *Military personnel.*—Includes pay and allowances of all military personnel on extended active duty who are engaged in Army activities, as well as pay and commuted rations of cadets at the military academy. This is the only Army appropriation providing funds for the payment of military personnel except Army National Guard, Organized Reserves, and Reserve Officers’ Training Corps, which provide for the pay of reservists and cadets on duty while undergoing training. The personal service costs in other appropriations of the Army are for civilian personnel only.

Also included in this appropriation are funds for the payment of interest on soldiers’ deposits; expenses of military courts, boards, and commissions; expenses inci-

dent to the apprehension of deserters; and funds for the payment of authorized donations to discharged prisoners. Related costs not included here are the food and clothing expenses for enlisted personnel contained in the appropriation “Quartermaster service, Army.”

The 1951 estimates for military pay and allowances reflect two major changes, namely a reduction in strength and an increase in statutory pay rates authorized by the Career Compensation Act of 1949. The average strength in 1949 and the planned strengths for 1950 and 1951 are shown in the following table:

	AVERAGE NUMBER		
	1949 actual	1950 estimate	1951 estimate
Officers (excluding nurses)	70,440	70,561	69,000
Nurses and Women’s Medical Specialist Corps	4,321	4,502	4,650
Cadets, U. S. Military Academy	2,360	2,397	2,400
Enlisted personnel	560,056	565,124	556,350
Philippine Scouts	19,731	562	
Total	656,908	643,146	632,400

2. *Civilian personnel.*—Includes the compensation of civilian employees at military headquarters, and contract surgeons. The 1951 program reflects reductions commensurate with the decrease in military strength. It includes approximately \$2.4 million for common services furnished to the Air Force.

APPROPRIATION TEXT

Pay of the Army: For pay and allowances (except commuted rations for enlisted personnel) of cadets and all other personnel of the Army of the United States, including pay of Reserve officers and officers of the National Guard of the United States ordered to active duty under the provisions of section 515d of the Officer Personnel Act of 1947, and section 37a and the fourth paragraph of section 38 of the National Defense Act, as amended on active duty (other than personnel of the Reserve components, including the National Guard, on active duty while undergoing Reserve training); pay of civilian employees at military headquarters; [allowances for quarters for enlisted men on duty where public quarters are not available;] interest on soldiers' deposits; payment of life insurance premiums authorized by law; [payment of exchange fees and exchange losses incurred by disbursing officers or their agents; repayment of amounts determined by the Secretary of the Army, or officers designated by him, to have been erroneously collected from military and civilian personnel in and under the Department of the Army; and losses in the accounts of Army disbursing officers in accordance with the Acts of December 13, 1944 (31 U. S. C. 95a), December 23, 1944 (50 U. S. C. 1705-1707), and July 26, 1947 (Public Law 248); \$1,448,350,000, of which not to exceed \$47,000,000 may be transferred to the appropriation "Finance Service, Army, 1949", and which shall also be available to pay mustering-out payments, as authorized by the "Mustering-Out Payment Act of 1944", as amended (38 U. S. C. 691-691g), to persons who were or may be denied such payments because they were discharged from the Army to enter the United States Military Academy or the United States Naval Academy and subsequently were discharged from either academy because of physical disability;] expenses of military courts, boards and commissions; expenses of apprehension and delivery of deserters, escaped military prisoners, and soldiers absent without leave, including payment of rewards, in the discretion of the Secretary of the Army, not exceeding \$25 in any one case, to civil officers and citizens, costs of confinement of military prisoners in nonmilitary facilities, donations of not to exceed \$25 to each civilian prisoner upon each release from an Army prison and each soldier discharged otherwise than honorably upon each release from confinement under court-martial sentence, and donations of not to exceed \$10, as authorized by law, to each person discharged for fraudulent enlistment; \$1,448,660,000: Provided, That section 212 of the Act of June 30, 1932 (5 U. S. C. 59a), shall not apply to retired military personnel on duty at the United States Soldiers' Home: Provided further, That [hereafter no officer of the Army shall be entitled to receive an addition to his pay in consequence of the provisions of the Act approved May 11, 1908 (10 U. S. C. 803)] the duties of librarian at the United States Military Academy may be performed by an officer of the Regular Army retired from active service, and detailed on active duty for that purpose. PROGRAM AND PERFORMANCE

This subappropriation provides for expenses, not otherwise provided for, incident to the transportation of military personnel and civilians employed by the Department of the Army.

1. *Permanent change of station and troop movement travel.*—This provides for travel incident to the maintenance of occupation forces and overseas garrisons, and to the training and deployment of the general Reserve units and supporting troops within the zone of the interior. The major requirements for permanent change of station travel in 1951 are:

(a) Travel of officers and enlisted personnel to and from overseas areas, including authorized transportation of dependents and household goods.

FINANCE DEPARTMENT—Continued

Finance Service, Army—Continued

Travel of the Army—Continued

(b) Travel of officers entering upon active duty and being released from active duty, including authorized transportation of dependents and household goods.

(c) Travel incident to the training and deployment of new enlistees and for return to home of enlisted personnel upon discharge.

(d) Travel of approximately 10,500 officers and enlisted men to schools of over 5 months' duration.

(e) Commercial transportation of approximately 8,100 military personnel and Department of the Army civilians and their dependents to and from certain oversea areas not serviced by Government transportation facilities.

2. *Temporary duty travel.*—This is travel in connection with administrative and operational activities of the Department of the Army such as travel in connection with investigations, inspections, schools, safety programs, industrial mobilization, recruiting, audits, intelligence, and counterintelligence, and security courier service. Included also are staff travel in connection with research and development and financial management activities, travel of military attachés and military mission personnel, escort guards for prisoners, attendants accompanying patients, and other medical activities.

APPROPRIATION TEXT

[APPREHENSION OF DESERTERS]

[For the apprehension, securing, and delivering of soldiers absent without leave and of deserters, including escaped military prisoners, and the expenses incident to their pursuit; and no greater sum than \$25 for each deserter or escaped military prisoner shall, in the discretion of the Secretary of the Army, be paid to any civil officer or citizen for such services and expenses; for expenses incident to confinement of military prisoners in nonmilitary facilities; for a donation of not to exceed \$10 to each civilian prisoner upon each release from an Army prison and each soldier discharged otherwise than honorably upon each release from confinement under court-martial sentence; and for a donation of not to exceed \$10 to each person discharged for fraudulent enlistment as authorized by law, \$200,000;] (10 U. S. C. 1431, 1460; National Military Establishment Appropriation Act, 1950.)

Appropriated 1950, \$200,000

NOTE.—Estimate of \$200,000 for activities previously carried under this title has been transferred in the estimates to "Finance service, Army," pay of the Army. The amounts obligated in 1949 and 1950 are shown in the schedule as comparative transfers.

Finance service:

Total obligations	29,294,174	29,512,851	29,500,000

PROGRAM AND PERFORMANCE

This subappropriation provides for compensation, not otherwise provided for, of civilian personnel engaged in disbursing, budget, fiscal, statistical, audit, and other management activities incident to the administration of the Army; and for certain miscellaneous disbursing expenses of the Finance Department.

1. *Field employees of the Finance Department.*—These are engaged in the administration, supervision, and operation of Finance Department functions. The major portion of these funds are for personnel at installations under the direction of the Chief of Finance, which include the Army Finance Center, St. Louis, and 23 disbursing offices located throughout the United States and at various overseas commands. Funds are provided also for civilian personnel engaged in disbursing, fiscal, budget, and cost accounting activities at military posts, camps, and stations.

The Army Finance Center maintains a central accounting service for all Army and Air Force funds; makes allotment and insurance payments for military and certain civilian personnel of the Departments of the Army and Air Force and other special payments as designated by the Chief of Finance; maintains the central archives for Army and Air Force disbursing records; administers

soldiers' deposit accounts; and administers all training activities of military personnel of the Finance Department. During 1950, the Army and Air Force adopted a new system of paying military personnel under which the Center provides a central control and review of all individual pay records and prepares budgetary analyses therefrom.

The various finance offices provide normal receipt and disbursement service within their area, including payments to the National Guard and Organized Reserves for active and inactive duty training pay. In addition, the office at Washington acts as a central disbursing office for the Army and Air Force in paying all retired military personnel and all transportation vouchers.

2. *Field employees of the Army Audit Agency and audit agencies, oversea commands.*—These are engaged in audit activities on behalf of the Department of the Army. The largest part of the program is the audit of industrial, research, and construction contracts of the Department of Defense for the purposes of verifying costs under cost-reimbursement contracts and of making renegotiation studies of fixed-price contracts. This Agency also audits all military property and sales accounts, industrial property accounts, receipts and disbursements of the Alaskan Communication System and of the American National Red Cross, and other miscellaneous accounts, as directed by the Secretary of the Army.

3. *Field employees of the Office of Comptroller.*—These are engaged in improving and expediting the use of modern management techniques in the business administration of the Army at command headquarters, where, during the past year, the comptroller functions have been centralized for greater efficiency of operation. The major functions are: Preparation of budget estimates and directives; development of fiscal and finance policies; development and initiation of internal accounting and auditing procedures, and cost analysis and reporting control systems; development of improved organization, methods, and procedures; and preparation of recommendations for more efficient utilization of manpower.

4. *Miscellaneous financial activities.*—These include the payment of exchange fees and exchange losses incurred by disbursing officers or their agents in handling foreign currencies and adjustments for relief of disbursing officers for certain types of losses.

PROGRAM AND PERFORMANCE

This covers expenses and losses incurred in connection with loans, guaranties, and commitments through Federal Reserve banks, the Reconstruction Finance Corporation, and other establishments to contractors who were engaged in work appropriate for the prosecution of World War II, pursuant to Executive Order 9112. No additional funds are estimated for 1951, since it is believed that the unexpended balance is sufficient to cover outstanding contracts (50 App. U. S. C. 1107; 31 U. S. C. 725s).

OBLIGATIONS BY ACTIVITIES

Payments to Federal Reserve banks for expenses incurred as fiscal agents of the United States for the Department of the Army pursuant to Executive Order 9112—1949, \$691; 1950, \$600.

OBLIGATIONS BY OBJECTS

07 Other contractual services—1949, \$691; 1950, \$600.

APPROPRIATION OR ESTIMATE

Appropriated (estimate) 1950, \$200

Special account:

Sales of Surplus Property, Foreign Areas, Clearing Account, Army—
FUNDS AVAILABLE FOR OBLIGATION: Prior year balance available—1949, \$8,774,005.

PROGRAM AND PERFORMANCE

This account was established for the purpose of crediting to it all proceeds from the sale of surplus property in foreign areas. These proceeds included both American dollars and foreign currencies. Clearance of the account in the case of foreign currencies was effected by proper disbursements therefrom, including refunds to depositors. Dollar proceeds of sales of surplus property in excess of current requirements for refunds and reimbursements were transferred monthly to miscellaneous receipts. The account is no longer available except to clear transactions which occurred prior to July 1, 1947 (50 App. U. S. C. 1611-1646; National Military Establishment Appropriation Act, 1950).

OBLIGATIONS BY ACTIVITIES

Proceeds from the sale of surplus property in foreign lands—1949, \$8,774,005.

OBLIGATIONS BY OBJECTS

13 Refunds, awards, and indemnities—1949, \$8,774,005.

Total, Finance Department, general and special appropriations:

Appropriated 1950, \$1,552,043,378 Estimate 1951, \$1,559,160,000

Estates of Deceased Personnel, Department of the Army—Con.**PROGRAM AND PERFORMANCE**

Proceeds from sale of the estates and effects of deceased personnel are held in trust for the payment of claims (Decision of Comp. Gen., Apr. 3, 1931, A-35988; 31 U. S. C. 725s).

OBLIGATIONS BY ACTIVITIES

For payment of claims for the proceeds derived from the estates of deceased personnel, Department of the Army—1949, \$9,441; 1950, \$10,000; 1951, \$10,000.

OBLIGATIONS BY OBJECTS

13 Refunds, awards, and indemnities—1949, \$9,441; 1950, \$10,000; 1951, \$10,000.

APPROPRIATION OR ESTIMATE

Appropriated (estimate) 1950, **\$10,000** Estimate 1951, **\$10,000**

Estates of Deceased Soldiers, Regular Army—

FUNDS AVAILABLE FOR OBLIGATION: Appropriation or estimate—1949, \$137,503; 1950, \$138,000; 1951, \$138,000.

PROGRAM AND PERFORMANCE

Funds in the account are the net proceeds of the sales of unclaimed effects of deceased soldiers who died in military hospitals, including effects of deceased inmates of the United States Soldiers' Home. Funds are held in the account for three fiscal years subsequent to death of the soldier, and are available for settlement of claims of heirs or legal representatives of the deceased. Unclaimed balances of individual accounts are then transferred to "Soldiers' Home, permanent fund" (10 U. S. C. 1584-1584b; 31 U. S. C. 725s).

OBLIGATIONS BY ACTIVITIES

Settlement of claims for proceeds of estates of deceased soldiers of the Regular Army—1949, \$137,503; 1950, \$138,000; 1951, \$138,000.

OBLIGATIONS BY OBJECTS

13 Refunds, awards, and indemnities—1949, \$137,503; 1950, \$138,000; 1951, \$138,000.

APPROPRIATION OR ESTIMATE

Appropriated (estimate), 1950, **\$138,000** Estimate 1951, **\$138,000**

Expenses, Preparatory Commission for International Refugee Organization, Department of the Army—

FUNDS AVAILABLE FOR OBLIGATION: Appropriation or estimate—1949, \$10,583,100; 1950, \$7,500,000.

PROGRAM AND PERFORMANCE

Advances of funds are made by the Preparatory Commission for the International Refugee Organization to enable the Department of the Army to furnish or procure supplies or services in accordance with agreements between the governments, signatory to the constitution of the Organization (31 U. S. C. 725s).

OBLIGATIONS BY ACTIVITIES

Expenses in connection with the Preparatory Commission for the International Refugee Organization to carry out agreements between that Commission and the Department of the Army—1949, \$10,583,100; 1950, \$7,500,000.

OBLIGATIONS BY OBJECTS

08 Supplies and materials—1949, \$10,583,100; 1950, \$7,500,000.

APPROPRIATION OR ESTIMATE

Appropriated (estimate), 1950, **\$7,500,000**

Funds of Alien Civilian Employees for Transfer Overseas, Department of the Army—

FUNDS AVAILABLE FOR OBLIGATION: Appropriation or estimate—1949, \$2,165; 1950, \$2,000; 1951, \$2,000.

PROGRAM AND PERFORMANCE

These are funds of enemy alien civilian employees transported to the United States under employment contracts with the Department of the Army, which funds may be deposited for transmission to overseas dependents of these employees (31 U. S. C. 725s).

OBLIGATIONS BY ACTIVITIES

Payments to overseas dependents of deposits made by enemy alien civilian employees transported to the United States under employment contracts—1949, \$2,165; 1950, \$2,000; 1951, \$2,000.

OBLIGATIONS BY OBJECTS

13 Refunds, awards, and indemnities—1949, \$2,165; 1950, \$2,000; 1951, \$2,000.

APPROPRIATION OR ESTIMATE

Appropriated (estimate) 1950, **\$2,000** Estimate 1951, **\$2,000**

Funds of Civilian Internees and Prisoners of War, Department of the Army—

FUNDS AVAILABLE FOR OBLIGATION: Appropriation or estimate—1949, \$1,638.

PROGRAM AND PERFORMANCE

Funds in the account represent amounts withheld from, or deposited by, interned civilians and enemy prisoners of war, together with moneys belonging to their estates at the time of death or determination of mental incompetency, to be used for payment of claims (31 U. S. C. 725s).

OBLIGATIONS BY ACTIVITIES

Payments of funds to civilian internees and prisoners of war—1949, \$1,638.

OBLIGATIONS BY OBJECTS

13 Refunds, awards, and indemnities—1949, \$1,638.

Kermit Roosevelt Fund—

FUNDS AVAILABLE FOR OBLIGATION: Appropriation or estimate—1949, \$6,044; 1950, \$4,000; 1951, \$4,000.

PROGRAM AND PERFORMANCE

Deposits represent the proceeds of money and property tendered by Mrs. Kermit Roosevelt for the purpose of fostering a better understanding and a closer relationship between the military forces of the United States and those of the United Kingdom through lectures, courses of instruction, or other comparable applications (5 U. S. C. 224-228).

OBLIGATIONS BY ACTIVITIES

For transactions regarding administration of funds received by trustees of Kermit Roosevelt fund—1949, \$6,044; 1950, \$4,000; 1951, \$4,000.

OBLIGATIONS BY OBJECTS

13 Refunds, awards, and indemnities—1949, \$6,044; 1950, \$4,000; 1951, \$4,000.

APPROPRIATION OR ESTIMATE

Appropriated (estimate) 1950, **\$4,000** Estimate 1951, **\$4,000**

Pay of the Army, Deposit Fund—

FUNDS AVAILABLE FOR OBLIGATION: Appropriation or estimate—1949, \$21,686,039; 1950, \$18,000,000; 1951, \$18,000,000.

PROGRAM AND PERFORMANCE

Deposits represent savings of enlisted men held in trust during the period of their enlistment. Repayments are made to the enlisted men upon discharge or to the heirs

or representatives of deceased depositors. The account is exempt from liability for a soldier's debts; it is not subject to forfeiture by sentence of court martial, but is forfeited by desertion (10 U. S. C. 906; 31 U. S. C. 725s).

OBLIGATIONS BY ACTIVITIES

Repayment of soldiers' deposits—1949, \$21,686,039; 1950, \$18,000,000; 1951, \$18,000,000.

OBLIGATIONS BY OBJECTS

13 Refunds, awards, and indemnities—1949, \$21,686,039; 1950, \$18,000,000; 1951, \$18,000,000.

APPROPRIATION OR ESTIMATE

Appropriated (est.) 1950, \$18,000,000 Estimate 1951, \$18,000,000

Personal Funds of Military and Civilian Personnel Located Overseas—

FUNDS AVAILABLE FOR OBLIGATION: Appropriation or estimate—1949, \$2,004.

PROGRAM AND PERFORMANCE

Provides for deposits of personal funds of military and civilian personnel located overseas.

OBLIGATIONS BY ACTIVITIES

Personal funds of military and civilian personnel located overseas—1949, \$2,004.

OBLIGATIONS BY OBJECTS

13 Refunds, awards, and indemnities—1949, \$2,004.

Purchase of United States Savings Bonds, Overseas, Department of the Army—

FUNDS AVAILABLE FOR OBLIGATION: Appropriation or estimate—1949, \$1,158,450; 1950, \$1,200,000; 1951, \$1,200,000.

PROGRAM AND PERFORMANCE

Cash collections are received from military and civilian personnel overseas and from tactical organizations in the United States for the purchase of United States savings bonds (31 U. S. C. 725s).

OBLIGATIONS BY ACTIVITIES

Purchase of United States savings bonds, overseas—1949, \$1,158,450; 1950, \$1,200,000; 1951, \$1,200,000.

OBLIGATIONS BY OBJECTS

13 Refunds, awards, and indemnities—1949, \$1,158,450; 1950, \$1,200,000; 1951, \$1,200,000.

APPROPRIATION OR ESTIMATE

Appropriated (est.) 1950, \$1,200,000 Estimate 1951, \$1,200,000

Refund of Unapplied Balances of Class A Pay Reservations of Mentally Incompetent and Deceased Employees, United States Savings Bonds, Department of the Army—

FUNDS AVAILABLE FOR OBLIGATION: Appropriation or estimate—1949, \$3,518; 1950, \$3,500; 1951, \$3,500.

PROGRAM AND PERFORMANCE

These deposits represent the unapplied balances of pay reservations for United States savings bonds held by a disbursing officer for the account of mentally incompetent or deceased civilian employees of the Department of the Army (decision of Comp. Gen., Aug. 11, 1943, A-51624; 31 U. S. C. 725s).

OBLIGATIONS BY ACTIVITIES

Refund of unapplied balances of class A pay reservations of mentally incompetent and deceased employees of the Department of the Army—1949, \$3,518; 1950, \$3,500; 1951, \$3,500.

OBLIGATIONS BY OBJECTS

13 Refunds, awards, and indemnities—1949, \$3,518; 1950, \$3,500; 1951, \$3,500.

APPROPRIATION OR ESTIMATE

Appropriated (estimate) 1950, \$3,500 Estimate 1951, \$3,500

Refund of Unapplied Balances Under Class B Allotments, United States Savings Bonds, Department of the Army—

FUNDS AVAILABLE FOR OBLIGATION: Appropriation or estimate—1949, \$3.

PROGRAM AND PERFORMANCE

These deposits represent the unapplied balances of pay reservations for United States savings bonds of military and civilian personnel serving with the Army outside the continental limits of the United States. No additional deposits are anticipated (31 U. S. C. 725s).

OBLIGATIONS BY ACTIVITIES

Return of unapplied class B allotment balances—1949, \$3.

OBLIGATIONS BY OBJECTS

13 Refunds, awards, and indemnities—1949, \$3.

Relocation of Refugees, Intergovernmental Committee—

FUNDS AVAILABLE FOR OBLIGATION: Appropriation or estimate—1949, \$17,761,876; 1950, \$27,247,000; 1951, \$13,500,000.

PROGRAM AND PERFORMANCE

Funds in this trust account are derived from advance payments by the International Refugee Organization of the United Nations for the transportation of refugees on Army-operated vessels from Europe to North and South America and other locations, as authorized by the act of July 1, 1947 (22 U. S. C. 289-289d; 31 U. S. C. 725s).

OBLIGATIONS BY ACTIVITIES

Relocation of refugees—1949, \$17,761,876; 1950, \$27,247,000; 1951, \$13,500,000.

OBLIGATIONS BY OBJECTS

13 Refunds, awards, and indemnities—1949, \$17,761,876; 1950, \$27,247,000; 1951, \$13,500,000.

APPROPRIATION OR ESTIMATE

Appropriated (est.) 1950, \$27,247,000 Estimate 1951, \$13,500,000

Return of Proceeds of Undelivered Liberty Loan Bonds Belonging to Subscribers Whose Whereabouts Are Unknown—

FUNDS AVAILABLE FOR OBLIGATION: Appropriation or estimate—1949, \$70.

PROGRAM AND PERFORMANCE

Provides for deposits of proceeds of undelivered Liberty Loan Bonds of subscribers whose whereabouts are unknown.

OBLIGATIONS BY ACTIVITIES

Return of proceeds of undelivered Liberty Loan Bonds belonging to subscribers whose whereabouts are unknown—1949, \$70.

OBLIGATIONS BY OBJECTS

13 Refunds, awards, and indemnities—1949, \$70.

Total obligations.....	7,974,491	8,227,821	8,515,000

PROGRAM AND PERFORMANCE

This subappropriation provides for the development and application of a comprehensive information and education program for the entire Department of Defense, for the execution of the troop information and education program within the Army, and the administration of an athletic and recreational program for the personnel of the Army.

1. *The Armed Forces information and education program.*—This item includes the planning, organization, and provision of common services to the Army, Navy, and Air Force. Such services include the Armed Forces Radio Service, the United States Armed Forces Institute, the Armed Forces Press Service, and the Armed Forces Information School.

2. *The Army troop information and education program.*—This covers the provision of group educational opportunities, radio materials, and guidance, leadership, and facilities for the execution of educational and informational programs for Army troops in all areas.

3. *Special services.*—This item is to provide for a well-rounded, off-duty athletic and recreational program of the enlisted personnel of the Army, including the administration of service clubs, the provision of athletic and other recreational programs, and the operation of libraries.

PROGRAM AND PERFORMANCE

This subappropriation provides food for enlisted personnel of the Army and for authorized civilian personnel.

1. *Provisions and ration savings.*—Subsistence supplies are purchased to be issued as rations to enlisted personnel, and to civilian employees whose contracts of employment provide for subsistence at Government expense. Service contracts are made for packing subsistence for export.

The estimate for 1951 is based on ration costs of \$0.90 per day per person for the Zone of Interior and \$1.01 for Overseas Commands. These costs are projected on the assumption that prices in 1951 will average 7½ percent less than the July 1949 level.

Categories of personnel on which the 1951 estimate is based are generally the same as in previous years except that the provision for feeding German and Austrian civilians performing work at Army and Air Force stations overseas has been greatly reduced.

2. *Commissary equipment.*—This covers procurement of specialized equipment such as display and frozen food cases, computing machines, and cash registers, required in the operation of subsistence sales commissaries. The estimate reflects the closing of 15 commissaries, reducing to 225 the number to be maintained.

3. *Commutation of rations.*—Cash in lieu of rations is paid to enlisted personnel not in a travel status when on detached service or recruiting duty, when authorized to mess separately and when on furlough. In addition, meals are furnished under contracts to enlisted personnel, and to recruits and applicants for enlistment.

4. *Care and preservation of subsistence.*—Ice is purchased for preservation of subsistence supplies, for issue to organizations of enlisted men, for cooling drinking water, and for medical use. This estimate also finances service contracts for commercial cold storage of perishable subsistence supplies, miscellaneous expenses required for the care, preservation, and reconditioning of subsistence supplies, and the roasting of coffee by contract.

APPROPRIATION TEXT

SUBSISTENCE OF THE ARMY

For purchase of subsistence supplies for issue as rations to troops, including retired enlisted men when ordered to active duty, civil employees when entitled thereto, hospital matrons, applicants for enlistment while held under observation, general prisoners of war, and general prisoners at posts; ice for issue to organizations of enlisted men and for cooling drinking water [at such places as the Secretary of the Army may determine,] and for preservation of stores; subsistence of the masters, officers, crews, and employees of the vessels of the Army Transport Service; meals for recruiting parties and applicants for enlistment while under observation; sales to officers, including members of the Officers' Reserve Corps while on active duty, and enlisted men of the Army; payment of [the regulation] allowances of commutation in lieu of rations to enlisted men [on furlough and to enlisted men when stationed at places where rations in kind cannot be economically issued, including retired enlisted men when ordered to active duty; payment of the regulation allowance of commutation in lieu of rations] as authorized by law; commuted rations for enlisted men, applicants for enlistment while held under observation, civilian employees who are entitled to subsistence at public expense, and general prisoners while sick in hospitals, to be paid to the surgeon in charge; advertising; for subsistence of supernumeraries necessitated by emergent military circumstances; prizes to be established by the Secretary of the Army for enlisted men of the Army who graduate from the Army schools for bakers and cooks; and for other necessary expenses incident to the purchase, testing, care, preservation, issue, sale, and accounting for subsistence supplies for the Army; in all, [\$255,000,000] \$161,533,000: *Provided*, That none of the funds appropriated in this title shall be used for the payment of any subsidy on agricultural or other products: *Provided further*, That no part of this or any other appropriation contained in this Act shall be available for the procurement of any article of food or clothing not grown or produced in the United States or its possessions, except to the extent that the Secretary of the Army shall determine that a satisfactory quality and sufficient quantity of any articles of food or clothing grown or produced in the United States or its possessions cannot be procured as and when needed at United States market prices and without unduly increasing future United States market prices and except procurements by vessels in foreign waters and emergency procurements or procurements of highly perishable foods by establishments located outside the continental United States, except the Territories of Hawaii and Alaska, for the personnel attached thereto: *Provided further*, That notwithstanding the provisions of the foregoing proviso, the Secretary of the Army is authorized to purchase from the Commodity Credit Corporation any food products owned and stored by such Corporation which the Secretary determines to be of a satisfactory quality for the use of the Military Establishment, or for civilian feeding in occupied areas; (10 U. S. C. 72, 72a; *National Military Establishment Appropriation Act, 1950*.)

Appropriated 1950, ^a \$242,372,534 Estimate 1951, ^b \$161,533,000

^a The appropriation was reduced to this amount by sec. 702 of the National Military Establishment Appropriation Act, 1950.

^b Includes \$1,737,487 for activities previously carried under appropriations as follows:
 "Medical and hospital department, Army"..... \$21,097
 "Army National Guard"..... 1,716,390
 Excludes \$375,090 for activities transferred in the estimates to "Quartermaster service, Army," incidental expenses. The amounts obligated in 1949 and 1950 are shown in the schedule as comparative transfers.

PROGRAM AND PERFORMANCE

This subappropriation provides for procurement of miscellaneous general supply items. Prices used in the computation of this estimate are equal to or lower than the latest contract prices as of July 1, 1949, and are generally lower than prices budgeted for the fiscal years 1949 and 1950.

1. *Industrial mobilization planning.*—This covers the pay of civilian employees, supplies, equipment, travel, and contractual services required in connection with industrial preparedness studies and industrial mobilization planning as directed by the Munitions Board of the Department of Defense.

2. *Animals.*—Horses, mules, and dogs are purchased in connection with Army training, sentry duty, and other activities, as are forage, including dog food and animal equipment.

3. *Office supplies.*—Stationery, sundry office supplies, office machines, furniture, and filing equipment are purchased. Office equipment and machines are rented, including electric accounting machines and postage machines and meters.

Items included in this estimate are required to balance stocks in order to meet issue requirements authorized by allowance tables of equipment and supplies.

4. *Other regular supplies.*—These are sanitary supplies and equipment, cooking and mess equipment, including refrigerators and kitchen ranges, and miscellaneous general supplies and equipment. In addition, furniture is purchased for commissioned and noncommissioned officers' quarters.

5. *Warehouse equipment.*—This includes dunnage, prefabricated bins and shelving, pallets, equipment for packing and crating, and spare parts when purchased with end-items or for depot stock.

6. *Fixed bakery equipment.*—This is replacement machinery and equipment for existing garrison bakeries and central pastry bakeries. Replacement requirements are based on an average life of 13 years, with appropriate adjustments to compensate for the preponderance of relatively new equipment now in use.

7. *Special quartermaster equipment.*—This includes special equipment, such as mobile laundries and bakeries, and all items of materials handling equipment for the Army except those used by Corps of Engineers for new construction and those used by other technical services for functions of manufacturing, research, development, and testing. Also included are spare parts for such Army equipment and, in addition, spare parts for depot maintenance of Air Force materials handling equipment.

8. *Supplies for handling liquid fuels and lubricants.*—Containers, pumps, hose, and other supplies and equipment used in the handling of petroleum products are purchased, as are items of laboratory equipment.

9. *Liquid fuels and lubricants.*—This provides for the purchase, with few exceptions, of all liquid motor fuels and lubricants for the Army, including aviation fuels and lubricants used by the Army but exclusive of requirements for new construction, civil functions, the United States Military Academy, fuel for heating and for operation of utilities, and fuel for operation of vessels and railway equipment. This activity also provides for certain contractual storage requirements of petroleum products.

10. *Field printing activities.*—This covers the purchase of all supplies and equipment required in the operation of Army field printing plants and certified duplicating units. Quartermaster requirements of printing to be procured from commercial sources and contractual requirements for copyrights and reproducibles for all Army plants are also included.

11. *Packing and crating.*—This provides for standard items for which Army-wide responsibility has been specifically assigned to the Quartermaster Corps, together with supplies and contractual services for packing and crating Quartermaster property at Quartermaster and general depots.

12. *Special quartermaster supplies and services.*—Contractual services are required for commercial photostatic and reproduction work, dry storage, and preparation of supply catalog descriptions of equipment. In addition, miscellaneous periodicals, reference books, Federal specifications, lawbooks for field judge advocates, and safety publications and materials are purchased.

13. *Quartermaster Corps training activities.*—Special supplies and equipment are purchased for Quartermaster training activities conducted at the Quartermaster School at Camp Lee, Va., the Subsistence School, Chicago, Ill., seven Army food-service schools in the United States and six Army food-service schools located overseas.

APPROPRIATION TEXT

REGULAR SUPPLIES OF THE ARMY

For supplies, services, and other expenses, not otherwise provided for, incident to the design, development, procurement, manufacture, care, protection, alteration, repair, maintenance, installation, storage and issue of Quartermaster Corps supplies, materials, and equipment (exclusive of fixed installations in buildings otherwise provided for), including petroleum and other products, market reports and personal services; [for] supplies and equipment for troops and general service schools; [for] operation of field printing plants not otherwise provided for and contract printing and binding; [for] purchase, subsistence, and care of animals required in connection with Army training and other activities; [for straw for soldiers' bedding; for] expenses incident to raising and harvesting forage on military reservations, including, when specifically authorized by the Secretary of the Army, the cost of irrigation; [\$115,000,000] \$109,750,000; (10 U. S. C. 72, 1334; National Military Establishment Appropriation Act, 1950.)

Appropriated 1950, * \$109,254,420 Estimate 1951, † \$109,750,000

* The appropriation was reduced to this amount by sec. 702 of the National Military Establishment Appropriation Act, 1950.

† Includes \$1,889,039 for activities previously carried under appropriations as follows:

"Contingencies of the Army".....	\$64,320
"Transportation service, Army".....	113,762
"Signal service of the Army".....	198,830
"Medical and hospital department, Army".....	804
"Engineer service, Army".....	48,700
"Ordnance service and supplies, Army".....	1,461,243
"Chemical service, Army".....	1,433

Excludes \$5,241,433 for activities transferred in the estimates as follows:

"Contingencies of the Army".....	\$326,100
"Quartermaster service, Army," incidental expenses of the Army.....	1,342,339

PROGRAM AND PERFORMANCE

This subappropriation covers the procurement of clothing and equipage; clothing allowances; Quartermaster maintenance, salvage, alteration, and reclamation activities; and the operation of laundries and dry-cleaning plants.

1. *Purchase of clothing and equipage.*—This includes personal and organizational clothing and equipment, barrack equipment, and toilet articles. The estimate also finances the payment of clothing allowances due enlisted men; the purchase of citizens' outer clothing to be issued to soldiers discharged other than honorably, and barbers' and tailors' supplies for use of general prisoners confined at military posts without pay and allowances.

The unusually large decrease in the estimate from the 1950 amount is due to the availability of stocks to meet 1951 requirements, and a reduction in requirements resulting from placing enlisted men on a monetary allowance basis.

2. *Maintenance, salvage, alteration, and reclamation activities.*—This covers contractual services, the payment of civilian employees, and the purchase of supplies and equipment incident to maintenance, alteration, and reclamation of Quartermaster property. In addition, provision is made for personnel connected with salvage activities of the Army and with depot maintenance of materials handling equipment of the Departments of the Army and Air Force.

Funds requested for 1951 reflect, in addition to normal activities, the cost of repair of items now in depot stocks, large quantities of which have been found to be unserviceable.

3. *Operation of laundries and dry-cleaning plants.*—This provides for the payment of civilian employees in quartermaster laundries and dry-cleaning plants, for the purchase of supplies and equipment for these plants, and for the payment of contractual services for laundering and dry cleaning of personal and organizational clothing, barrack equipment, and hospital clothing and linens.

Collections for personal laundry service furnished to individuals are deposited to miscellaneous receipts and

equal more than 60 percent of the funds estimated for the operation of laundries and dry-cleaning plants.

APPROPRIATION TEXT

CLOTHING AND EQUIPAGE

For cloth, woollens, materials, and for the purchase and manufacture of clothing for the Army, including retired enlisted men when ordered to active duty, for issue and for sale; [for payment of] commutation of clothing due to warrant officers of the mine-planter service and to enlisted men; [for] altering and fitting clothing and washing and cleaning when necessary, including laundry work for enlisted men while patients in a hospital; [for] operation of laundries, existing or now under construction, including purchase and repair of laundry machinery therefor; [for the] authorized issues of articles for use of general prisoners confined at military posts without pay or allowances, and for applicants for enlistment while held under observation; [for] equipment and repair of equipment of existing dry-cleaning plants, salvage and sorting storehouses, hat-repairing shops, shoe-repair shops, clothing-repair shops, and garbage-reduction works; [for] equipage, including animal-drawn passenger-carrying vehicles; issue of toilet kits to recruits upon their first enlistment; [for] expenses of packing and handling and similar necessities; [for a suit of] citizens' outer clothing and an overcoat, when necessary, the cost of all not to exceed \$30, to be issued each person upon each release from an Army prison, each soldier discharged otherwise than honorably, to each enlisted man convicted by civil court for an offense resulting in confinement in a penitentiary or other civil prison, and to each enlisted man ordered interned as an alien enemy, or, for the same reason, discharged without internment; [\$192,000,000, of which \$25,000,000 is for payment of obligations incurred pursuant to authority granted under

this head in the Military Functions Appropriation Act, 1949] \$95,580,000; (10 U. S. C. 72; National Military Establishment Appropriation Act, 1950.)

Appropriated 1950, ^a \$175,097,252 Estimate 1951, ^b 95,580,000

^a The appropriation was reduced to this amount by sec. 702 of the National Military Establishment Appropriation Act, 1950.

^b Includes \$3,235,478 for activities previously carried under appropriations as follows:

PROGRAM AND PERFORMANCE

This subappropriation covers the payment of civilian personnel engaged in supply operations and provides for miscellaneous activities of the Quartermaster Corps and certain other agencies.

1. *Overhead personnel.*—This includes civilian employees required for inspection, storage, handling, and issue of Army and Air Force supplies in quartermaster and general depots, employees engaged in quartermaster activities in Army areas and overseas commands, and employees in offices of military attachés overseas. In-

creased employment in depots is required in 1951 for cataloging, for the surveillance inspection program to withdraw unserviceable items from depot stocks for reclamation, and for base maintenance activities in engineer sections of general depots.

2. *Disposition of remains.*—Burial expenses are provided for Army personnel who die in the United States or overseas, and also costs of embalming service and mortuary supplies of Air Force personnel dying overseas.

3. *Incidental operating expenses.*—This covers the rental of post-office boxes and the purchase of postage stamps, except for parcel post, for all mail of the Army requiring postage, such as mail matter to and from certain foreign countries and registered, special delivery, and air mail. Miscellaneous expenses properly chargeable to appropriated funds upon specific approval of the Quartermaster General but not provided for in other appropriations are also included.

4. *Chaplains' activities.*—The Chief of Chaplains purchases necessary chapel equipment and religious supplies, such as altar covers, communion sets, crosses, music, and prayer books.

5. *Recruiting expenses.*—Advertising and miscellaneous expenses are met in connection with recruiting activities, including the payment of civilian personnel at recruiting stations and the costs of special supplies and services for the Army and Air Force Recruiting Service and the Recruiting Publicity Bureau.

6. *Education of dependents.*—This provides for expenses of primary and secondary schooling for dependents of military and civilian personnel of the Department of Defense residing on military installations when the Secretary of the Army finds that schools, if any, available in the locality are unable to provide adequately for the education of such dependents. The increase in funds in 1951 is primarily due to an increase in the number of dependents to be provided for. Eligible dependents in Germany, Austria, and the Ryukyus are provided for in this appropriation for the first time. The maximum provision per child is limited to \$140 in the United States, but an average of \$200 per child is estimated in foreign areas.

7. *Research and development.*—This provides for Quartermaster Corps research and development in connection with supplies and equipment used by the Armed Forces. Army-wide projects under the Operations Research Office, Department of the Army, and personnel research projects under The Adjutant General are also included.

APPROPRIATION TEXT

INCIDENTAL EXPENSES OF THE ARMY

Postage; [hire of laborers in the Quartermaster Corps, including the care of officers' mounts when the same are furnished by the Government; compensation of clerks and other employees of the Quartermaster Corps, and clerks, foremen, watchmen, and organist for the United States Disciplinary Barracks] *personal services*; incidental expenses of recruiting; for activities of chaplains (excluding ritual garments and personal services); [for the operation of coffee-roasting plants; for maintenance of Quartermaster branch depots, including utilities;] for tests and experimental and development work and scientific research, not otherwise provided for, including that to be performed by the Bureau of Standards for the Quartermaster Corps; for inspection service and instruction furnished by the Department of Agriculture which may be transferred in advance; for such additional expenditures as are necessary and authorized by law in the movements and operation of the Army and at military posts, and not expressly assigned to any other departments; [for supplies, services, and other expenses essential in conducting instruction of the Army in tactical or special activities and in the operation of Arm and Service Boards not otherwise provided for;] for burial of the dead as authorized by Acts of May 17, 1938 (10 U. S. C. 916-916d), and July 8, 1940 (5 U. S. C. 103a), including remains of personnel of the Army of the United States who die while on active duty, including travel allowances of attendants accompanying remains, communication service, transportation of remains, and acquisition by lease or otherwise of temporary burial sites; [**\$104,900,000**] **\$104,065,000**. (10 U. S. C. 72; *National Military Establishment Appropriation Act, 1950*.)

Appropriated 1950, **\$99,586,215** Estimate 1951, **\$104,065,000**

* The appropriation was reduced to this amount by sec. 702 of the National Military Establishment Appropriation Act, 1950.

^b Includes \$3,768,258 for activities previously carried in the estimates under appropriations as follows:

"Contingencies of the Army".....	\$233,396
"Finance service, Army," pay of the Army.....	482,400
"Quartermaster service, Army":	
Subsistence of the Army.....	375,090
Regular supplies of the Army.....	1,342,369
Clothing and equipage.....	1,326,403
"Engineer service, Army".....	1,308,580
"Government and relief in occupied areas".....	3,700,000
Excludes \$5,393,608 for activities transferred in the estimates to appropriations as follows:	
"Contingencies of the Army".....	\$1,500
"Finance service, Army," pay of the Army.....	185,000
"Quartermaster service, Army," welfare of enlisted men.....	685,284
"Transportation service, Army".....	485,000
"Signal service of the Army".....	96,198
"Medical and hospital department, Army".....	125,220
"Engineer service, Army".....	448,211
"Ordnance service and supplies, Army".....	907,778
"Army training".....	2,464,417

The amounts obligated in 1949 and 1950 are shown in the schedule as comparative transfers.

Total, Quartermaster Service, Army, annual definite appropriations:

Appropriated 1950, **\$632,877,109** Estimate 1951, **\$479,383,000**

PROGRAM AND PERFORMANCE

The mission of the Transportation Corps is to arrange for the movement of Army and Air Force personnel and matériel and to provide transportation facilities for such movements. The 1951 program includes the cost of deep-sea transportation for Army and Air Force personnel and matériel, which will be furnished by the Military Sea Transport Service. The 1951 program is based on the projected strength and deployment of the Army and Air Force and on unit costs which, in general, are fixed by the transportation industry.

1. *Industrial mobilization and procurement planning.*—This covers the procurement of industry preparedness measures and planning for industrial mobilization requirements, as directed by the Munitions Board of the Department of Defense. The 1951 program is designed to keep plans prepared in prior years up to date.

2. *Procurement of marine, railway, and materials handling equipment.*—This finances the procurement of transportation equipment for Army organizational units and for Army supply services. The program for 1951 is lower because procurement will be confined to filling shortages for organizational units and the replacement of 50 boxcars.

3. *Supply pipe line and distribution stocks.*—This covers procurement of marine and railway spare parts and supplies over and above normal consumption requirements to fill depot stocks and pipe-line shortages. The 1951 program will complete the filling of stock shortages, the major part of which was undertaken in the 1950 program.

4. *Movements control services.*—This provides for the pay of civilian personnel stationed throughout the world in Army installations to prepare transportation documents and arrange for the movements of personnel and freight. It also includes supplies and publications incidental to traffic and personnel movements and accompanying charges such as refrigeration service, switching, and drayage.

5. *Commercial transportation except ocean.*—This provides for the commercial freight charges for the movement of an estimated 2.3 million short tons of matériel in the United States and 0.6 million short tons within overseas commands of the Army. The charges for 1951 are lower than those for 1950 because of a reduction in the tonnage to be moved.

6. *Commercial ocean transportation.*—This finances all ocean transportation of Army and Air Force dry cargo except that carried in Army-owned vessels and reimbursement to the Navy for the movement of Army and Air Force bulk petroleum products. Total tonnages to be moved will be approximately the same in 1950 and 1951 but a greater proportion of the total will be carried in private ships in 1951. As a result, commercial ocean transportation costs will rise in 1951, but related decreases occur in the activities "Operation and repair of Army transports" and "Operation of field installations" below.

7. *Highway transport service.*—This provides for the pay of civilian personnel engaged in the supervision, operation, and operator-performed maintenance of Army administrative vehicles. Not included in this activity are fuel, spare parts and shop maintenance costs for administrative vehicles. About 30,000 vehicles will be operated in the United States and 27,000 vehicles overseas in 1950 and 1951.

8. *Military railway service.*—This provides for the administration, operation, maintenance, and overhaul of Army military railway equipment and for overhaul of Air Force military railway equipment. Equipment to be operated will decline from 8,549 pieces in 1950 to 8,319 in 1951.

9. *Operation and repair of Army transports.*—This provides for the pay of civilian crews aboard and for the operation and repair in 1951 of 52 transports based in the United States and 19 transports based overseas. The 1951 program is lower because a higher proportion of Army and Air Force cargo will be shipped by commercial means. As a result, the total number of transports to be operated will decline from 83 in 1950 to 71 in 1951.

10. *Operation and repair of floating equipment.*—This provides for the pay of civilian crews aboard and the operation and repair of 1,754 small Army vessels such as tugs, barges, and freight supply ships engaged in lighterage, ferry and tug service, transport berthing and short shuttles of cargoes and personnel in the United States and overseas. About 50 fewer pieces of equipment will be operated in 1951 than in 1950.

TRANSPORTATION CORPS—Continued

Transportation Service, Army—Continued

11. *Operation of field installations.*—This activity finances the cost of operation of four ports of embarkation in the United States and port operations in overseas theaters, marine repair shops, and Transportation Corps depots. The program for 1951 is lower than in 1950 because of a reduction in the volume of Government operation and an increase in ocean transportation by commercial means.

12. *Education and training.*—This activity provides for the training of organizational units and of individuals in the Army in the several technical fields of transportation, for the procurement of training aids, and for the preparation of training literature for the Army and the Army civilian components.

13. *Research and development.*—This covers the cost of design, research, and development projects in transportation and transportation equipment.

APPROPRIATION TEXT

For expenses necessary for the transportation of Army supplies, equipment, funds of the Army, including packing, crating, and unpacking; maintenance and operation of transportation facilities and installations, including the purchase, construction, alteration, operation, lease, repair, development, and maintenance of and research in transportation equipment, including boats, vessels, and railroad equipment; personal services in the District of Columbia; procurement of supplies and equipment; printing and binding; communication service; maps, wharfage, tolls, ferriage, drayage, and cartage; conducting instruction in Army transportation activities; \$332,000,000: *Provided*, That \$32,000,000 of the unexpended balance of the appropriation "Transportation service, Army, 1949", shall remain available until June 30, 1950, and shall be merged with the appropriation "Transportation service, Army", made by this Act \$308,150,000: *Provided [further]*, That during the current fiscal year the cost of transportation from point of origin to the first point of storage or consumption of supplies, equipment, and material in connection with the manufacturing and purchasing activities of the Quartermaster Corps may be charged to the appropriations from which such supplies, equipment, and material are procured: *Provided further*, That vessels under the jurisdiction of the Maritime Commission, the Department of the Army, or the Department of the Navy may be transferred or otherwise made available without reimbursement to any of such agencies upon the request of the head of one agency and the approval of the agency having jurisdiction of the vessels concerned. (5 U. S. C. 189c, 946; 10 U. S. C. 1863; 50 U. S. C. App. 766; National Military Establishment Appropriation Act, 1950.)

Annual definite appropriation:

Appropriated 1950, * \$305,602,009 Estimate 1951, ^b \$308,150,000

* The appropriation was reduced to this amount by sec. 702 of the National Military Establishment Appropriation Act, 1950.

^b Includes \$2,218,000 for activities previously carried under appropriations as follows:

"Contingencies of the Army".....	\$1,110,000
"Finance service, Army," pay of the Army.....	13,000
"Quartermaster service, Army," incidental expenses of the Army.....	485,000
"Engineer service, Army".....	610,000
Excludes \$1,662,923 for activities transferred in the estimates as follows:	
"Contingencies of the Army".....	\$150,500
"Quartermaster service, Army":	
Regular supplies of the Army.....	113,762
Clothing and equipage.....	105,579
"Signal service of the Army".....	15,820
"Engineer service, Army".....	862,860
"Ordnance service and supplies, Army".....	308,234
"Chemical service, Army".....	1,168
"Claims, Department of Defense".....	105,000

The amounts obligated in 1949 and 1950 are shown in the schedule as comparative transfers.

PROGRAM AND PERFORMANCE

The Signal Corps has the mission of research, development, design, procurement, installation, operation, maintenance, and storage of communication facilities, equipment and supplies, and of training films for the Army. Activities are projected at approximately the 1950 level except as noted below.

1. *Industrial mobilization planning.*—This activity provides for preservation of reserve tools, contracts for industry preparedness measures, cataloging, standardization

of supplies and equipment, and mobilization requirements planning as directed by the Munitions Board of the Department of Defense.

2. *Procurement of organizational supplies and equipment.*—This covers procurement of all signal matériel for organizational units in the Army, first-destination transportation costs of such matériel, and pay and travel of civilian personnel engaged in procurement and inspection. Increases in 1951 are to accelerate service testing of new equipment and the equipping of certain tactical units in the Army.

3. *Radio and radar for Army boats.*—This provides for the procurement, installation, and maintenance of radio and radar supplies and equipment on Army boats.

4. *Construction of fixed-wire communication systems.*—This provides for the construction and major rehabilitation of Army-owned fixed-wire communication systems.

5. *Construction of radio systems.*—This provides for the construction and major rehabilitation of Army-owned radio networks and for guard, train dispatching, and special point-to-point radio installations.

6. *Operation of Signal Corps activities.*—This provides for the operation of Signal Corps depots, repair shops, and supply control points and for civilian personnel engaged in maintaining signal supplies and equipment at Army posts, camps, and stations. The 1950 work load of 120,100 tons handled, 14,000 items repaired, and 79,500 tons reclassified compares with an estimated work load of 130,000 tons handled, 13,300 items repaired, and 56,200 tons reclassified in 1951. An over-all decrease of 230 employees will result from these work-load changes.

7. *Maintenance and operation of fixed-wire communication systems.*—This finances the operation, maintenance, and repair of Army-owned fixed-wire communication systems.

8. *Maintenance and operation of radio systems.*—This finances the operation, maintenance, and repair of Army-owned fixed radio systems.

9. *Commercial communications.*—This covers the cost of commercial tolls for telephone, telegraph, and teletype services and for the rental of commercially owned communications equipment leased by the Army.

10. *Photographic service.*—This finances the production, procurement, reproduction, distribution, and exhibition of still- and motion-picture training films.

11. *Education and training.*—This provides for the operation of Signal Corps schools, procurement of training aids and supplies, and the production and distribution of training literature to the Army and the civilian components of the Army. Approximately 16,000 officers and enlisted men will be trained in the schools during 1950 and the same number in 1951.

12. *Research and development.*—This finances the investigation, research, development, and modification of Signal Corps supplies and equipment and the operation of Signal Corps research facilities.

SIGNAL SERVICE OF THE ARMY

Purchase, equipment, operation, *installation* and repair of military telegraph, telephone, radio, cable, [and] signaling, and *aircraft warning* systems; signal equipment and stores, heliographs, signal lanterns, flags, and other necessary instruments; wind vanes, barometers, anemometers, thermometers, and other meteorological instruments; photographic and cinematographic work performed for the Army by the Signal Corps; [motorcycles, motor-driven and other vehicles for technical and official purposes in connection with the construction, operation, and maintenance of communication or signaling systems, and supplies for their operation and maintenance;] maps for use of the Signal Corps and in the office of the Chief Signal Officer; telephone apparatus, including rental and payment for commercial, exchange, message, trunk-line, long-distance, and leased-line telephone service [at or connecting any post, camp, cantonment, depot, arsenal, headquarters, hospital, aviation station, or other office or station of the Army], excepting telephone service for the various bureaus in the District of Columbia; [electric time service;], and the rental of commercial telegraph lines and equipment, and their operation, at or connecting any [post, camp, cantonment, depot, arsenal, headquarters, hospital, aviation station, or other office or station of the] Army facility, including payment for official individual telegraph messages transmitted over commercial lines; electrical installations and maintenance thereof [at military posts, cantonments, camps, and stations of the Army], *electric time service*, fire control and direction apparatus, and matériel for Field Artillery; salaries of civilian employees, including those necessary as instructors at vocational schools; supplies, general repairs, reserve supplies, and other expenses connected with the collection and transmitting of information for the Army by telegraph or otherwise; experimental investigation, research, purchase, and development, or improvements in apparatus, and maintenance of signaling and accessories thereto, including machines, instruments, and other equipment for laboratory and repair purposes; [lease, alteration, and repair of such buildings required for storing or guarding Signal Corps supplies, equipment, and personnel when not otherwise provided for,

including the introduction of water, electric light and power, sewerage, grading, roads and walks, and other equipment required; for all expenses, not otherwise provided for, incident to the preparation of plans, and construction, purchase, installation, equipment, maintenance, repair, and operation of aircraft warning service systems, and their accessories, including purchase of lands and rights-of-way, acquisition of leaseholds and other interests therein, and temporary use thereof; \$200,000,000, of which \$50,000,000 is for liquidation of obligations incurred pursuant to authority granted under this head in the Military Functions Appropriations Act, 1949: *Provided*, That the sum of \$402,000 of the appropriation "Signal Service of the Army", 1942-1946, and \$3,520,000 of the appropriation "Signal Service of the Army", 1947, shall remain available until June 30, 1950, for the payment of obligations incurred under contracts executed thereunder prior to July 1, 1946, and July 1, 1947, respectively] \$157,550,000. (10 U. S. C. 212; National Military Establishment Appropriation Act, 1950.)

Annual definite appropriation:

Appropriated 1950, * \$197,062,137 Estimate 1951, * \$157,550,000

* The appropriation was reduced to this amount by sec. 702 of the National Military Establishment Appropriation Act, 1950.

Includes \$255,226 for activities previously carried under appropriations as follows:

"Contingencies of the Army"	\$46,410
"Quartermaster service, Army," incidental expenses of the Army	96,198
"Transportation service, Army"	15,820
"Engineer service, Army"	73,498
"Ordnance service and supplies, Army"	23,300

Excludes \$768,223 for activities transferred in the estimates as follows:

"Contingencies of the Army"	\$372,000
"Quartermaster service, Army," regular supplies of the Army	198,830
"Engineer service, Army"	140,331
"Ordnance service and supplies, Army"	50,000
"Chemical service, Army"	7,062

The amounts obligated in 1949 and 1950 are shown in the schedule as comparative transfers.

Total reimbursable obligations.....	4,710,726	5,225,048	10,569,000
Total obligations.....	63,914,643	67,388,026	67,230,000

PROGRAM AND PERFORMANCE

This appropriation finances most of the cost of the civilian personnel and the cost of medical supplies and equipment necessary for maintaining the health of the Army, including the operation of 18 general hospitals, 59 station hospitals, and 208 dispensaries throughout the world. General hospital care is provided for Air Force personnel by the Army without reimbursement. In those areas where facilities of the Department of the Navy and Veterans Administration are inadequate, their patients are cared for in Army hospitals at the interdepartmental reimbursement rate set by the Bureau of the Budget. Retired military personnel and dependents of military personnel are also provided medical and hospital care at Army hospitals and dispensaries, when facilities are available, at rates established by Army regulations. The size of the health program depends primarily on the strength of the Army, which is estimated to decline by 3.7 percent from 1949 to 1951. The anticipated shortage of military medical and dental officers in 1951 results in an increase in the number of civilian doctors and dentists paid from this appropriation from 166 in 1949 to 711 in 1951. This appropriation does not include civilian personnel, supplies, equipment, and services furnished by other technical services of the Army for the maintenance and operation of health facilities, nor is any pay of military personnel included.

1. *Procurement of standard supplies and equipment.*—Standard technical health supplies and equipment required by all Army facilities are purchased centrally under this activity.

2. *Procurement of nonstandard supplies and equipment.*—Nonstandard items of health supplies and equipment required by Army facilities are financed by this activity. Nonstandard items are used primarily by Army hospitals in the United States.

3. *Operation of recruiting stations.*—Physical examinations of Army and Air Force enlistees are performed by civilian physicians paid on a fee basis with the aid of civilian technicians and contract laboratory and X-ray services. It is estimated that 593,000 examinations will be given in 1951 as compared to 804,000 in 1949.

4. *Operation of medical centers and general hospitals.*—Funds are provided in 1951 for civilian personnel for the operation of 11 general hospitals in the zone of interior and 7 general hospitals in overseas commands whose combined capacity is 22,150 beds. The reduction in average daily patient load shown below results from a reduction in the strength of the Army and Air Force, increased utilization of Navy hospitals by Army and Air Force patients, and the opening of new Veterans Administration hospitals which reduces the number of Veterans Administration patients. The salaries of civilian personnel engaged in operating the bedside radio systems in general hospitals have been transferred to this appropriation in 1951.

Type of patients in general hospitals	1949 actual	1950 estimate	1951 estimate
Army and Air Force.....	10,744	9,800	9,580
Dependents.....	2,264	1,910	2,008
Veterans Administration, Navy, and others.....	2,852	2,725	2,026
Total average daily patient load.....	15,860	14,435	13,614

5. *Operation of station hospitals.*—The 1951 estimate provides funds for civilian personnel for the operation of

MEDICAL DEPARTMENT—Continued**Medical and Hospital Department, Army—Continued**

31 station hospitals in the zone of interior and 28 station hospitals in overseas commands with a total capacity of 12,620 beds. The reduction in average daily patient load shown below results from the reduction in the strength of the Army and the increased utilization of Navy hospitals for Army patients.

Type of patients in station hospitals	1949 actual	1950 estimate	1951 estimate
Army and Air Force.....	6,772	6,620	6,575
Dependents.....	1,821	1,720	1,717
Veterans Administration, Navy, and others.....	181	120	106
Total average daily patient load.....	8,774	8,460	8,398

6. *Operation of other medical professional services.*—This activity provides civilian employees for the operation of 115 dispensaries in the zone of interior and 93 dispensaries in overseas commands, 20 Medical Department laboratories, veterinary services, malaria control in the Canal Zone, medical sections of field headquarters, civilian employee health services for field installations, manufacture of biologicals, and the Armed Forces Institute of Pathology. This activity also includes funds for reimbursing other Federal agencies and civilian institutions for the medical care and hospitalization of Army personnel in localities where Army medical facilities are not available. The increase in the average daily patient load of Army patients in Navy hospitals shown below reflects further joint use of Armed Forces facilities.

Average daily patient load of Army patients in—	1949 actual	1950 estimate	1951 estimate
Navy hospitals.....	83	650	800
Other Federal hospitals.....	98	98	58
Total.....	181	748	858

7. *Operation of procurement office.*—One-third of the cost of operation of the Armed Services Medical Procurement Agency is paid by the Army; the remainder is financed by reimbursements from the Navy and Air Force. This activity also includes the costs of operating the stock control branch of the Surgeon General's Office.

8. *Operation of depots.*—The savings in 1951 from the contemplated unification of the Army's eight medical depots and six medical sections of general depots with the Navy's two medical depots is offset by such increased operating costs as within-grade promotions for civilian personnel. The Army's medical depots also serve the Air Force.

9. *Industrial mobilization planning.*—The Army pays one-third of the cost of operation of the joint Army, Navy, and Air Force medical industrial mobilization planning activities, under the over-all industrial mobilization plan of the Department of Defense. Reimbursements are received from the Navy and Air Force for their share of the cost of this activity.

10. *Education and training.*—In 1951, 2,887 officers and enlisted men will receive training at 2 Medical Department schools located at Washington, D. C., and Fort Sam Houston, Tex. The tuition of 456 Medical Department personnel attending civilian institutions has been transferred to this appropriation in 1951. This activity also

includes the Army Medical Library and the employment of consultants to serve as instructors and professional advisors in general and station hospitals.

11. *Research and development.*—This research is directly related to medical practice and maintenance of health under conditions imposed during war. Forty percent of the 1951 funds are for research performed in Army facilities; the remainder is for contracts with other Federal and non-Federal institutions. One-third of the development work of the Engineering Research Division of the Armed Forces Medical Procurement Agency is paid by the Army and two-thirds is financed by reimbursements from the Navy and Air Force. The increase in fund requirements in 1951 over 1949 is primarily for medical research in the fields of radiological warfare, preventive psychiatry, and infection prevention and control, and for the recently activated Army Hepatic and Metabolic Center.

APPROPRIATION TEXT

For the manufacture and purchase of medical and hospital supplies for military posts, camps, hospitals, hospital ships and transports, and supplies required for mosquito destruction in and about military posts in the Canal Zone; operation of the Army Medical Library and Museum under the direct supervision of the Surgeon General; purchase of veterinary supplies and hire of veterinary surgeons; expenses of medical supply depots and maintenance of branch depots; medical care and treatment of patients when entitled thereto by law, regulation, or contract, including their care, treatment, and subsistence in private hospitals, whether on duty or on furlough or on leave of absence except when elective medical treatment has been obtained by such personnel in civilian hospitals or from civilian physicians or dentists; medical care and treatment of authorized personnel of any country whose defense the President deems vital to the defense of the United States when such care and treatment cannot be obtained from medical units of their own country; care and treatment of epidemic and contagious diseases in the Army or at military posts or stations, including measures to prevent the spread thereof, and the payment of reasonable damages, not otherwise provided for, for bedding and clothing injured or destroyed in such prevention; pay of male and female nurses, not including the Army Nurse Corps, and of cooks and other civilians employed for the proper care of patients, under such regulations fixing their number, qualifications, assignments, pay, and allowances as shall have been or shall be prescribed by the Secretary of the Army; pay of internes; pay of civilian physicians employed to examine physically applicants for enlistment and enlisted men and to render other professional services from time to time under proper authority; pay of other employees of the Medical Department; payment of express companies and local transfers employed directly by the Medical Department for the transportation of medical and hospital supplies, including bidders' samples and water for analysis; supply of Army and Navy Hospital at Hot Springs, Arkansas; advertising, and other necessary miscellaneous expenses of the Medical Department; \$68,031,000, including tuition and fees of military and civilian personnel at civilian educational institutions; \$56,661,000. (10 U. S. C. 81; National Military Establishment Appropriation Act, 1950.)

Annual definite appropriation:

Appropriated 1950, **\$65,048,856** Estimate 1951, **\$56,661,000**

* The appropriation was reduced to this amount by sec. 702 of the National Military Establishment Appropriation Act, 1950.

^b Includes \$1,906,395 for activities previously carried under appropriations as follows:

"Contingencies of the Army".....	\$53,578
"Quartermaster service, Army":	
Welfare of enlisted men.....	158,282
Incidental expenses of the Army.....	125,220
"Engineer service, Army".....	1,558,717
"Army National Guard".....	10,598

Excludes \$678,671 for activities transferred in the estimates as follows:

"Contingencies of the Army".....	\$127,000
"Quartermaster service, Army":	
Subsistence of the Army.....	21,097
Regular supplies of the Army.....	804
Clothing and equipage.....	88,773
"Engineer service, Army".....	81,730
"Construction of aircraft and related procurement, Department of the Air Force".....	18,267
"Maintenance and operations, Department of the Air Force".....	211,000
"Research and development, Department of the Air Force".....	130,000

The amounts obligated in 1949 and 1950 are shown in the schedule as comparative transfers.

PROGRAM AND PERFORMANCE

This appropriation provides for the engineer military requirements of the Army, including the cost of maintaining Army installations and facilities and furnishing engineer equipment. These costs are based on the promulgated strength of the Army and the projected price levels of supplies, services, and materials.

1. *Industrial mobilization and procurement planning.*—The Corps of Engineers participates in the over-all industrial mobilization plan of the Department of Defense. The program for 1951 contemplates that the Corps of Engineers' portion of the plan will progress to 16 percent of completion.

2. *Procurement of engineer military supplies and equipment.*—The increase in this program is to correct supply deficiencies accruing from previous years and to permit equipping the Army in accordance with approved tables of allowances.

3. *Army repairs and utilities.*—In 1951, the Corps of Engineers will maintain structures, grounds, roads, and utilities systems at 201 Army installations in the zone of the interior and 7 oversea commands. Compared to 1950, the program assumes the deactivation of three camps and two depots, allows for the same level of requirements for utilities and other services, and provides a somewhat higher standard of maintenance and repair. Deferred maintenance projects amounting to approximately \$14,000,000 have been included.

4. *Real estate activities.*—The Corps of Engineers processes the acquisition (by purchase, lease, or otherwise), manages, and disposes of real estate in both the continental United States and overseas. Approximately 1,600 leases are renewed annually for the Army, and certain real estate services are performed for the Air Force.

5. *Construction not requiring legislative authorization.*—No funds have been budgeted for 1951. During 1950, as in 1949, a moderate amount is being programmed for temporary construction in occupied areas, utilizing labor and materials available from the local economy. In addition, the 1950 program includes conversion of barracks

to temporary family quarters pending permanent construction.

6. *Repair and maintenance of engineer military equipment.*—The funds provided in 1951 will operate 21 depot repair shops, accomplish repair by contract of engineer military equipment, provide for the central procurement of repair parts, and perform field maintenance. The 1950 program includes maintenance and repair of engineer military equipment to meet current requirements.

7. *Storage and issue of engineer military supplies and equipment.*—The Corps of Engineers operates 6 engineer depots and 14 engineer sections of general depots located in the zone of interior and oversea commands. The funds requested for 1951 provide for the receiving, storing, in-storage care and preservation, and preparing for shipment of engineer military supplies and equipment.

8. *Engineer operations.*—Funds are provided for master planning, design of special projects, development of design criteria, design and tests of protective construction, surveys and estimates for Army and Air Force, and preparation of a history of World War II Engineer operations.

9. *Military surveys and maps.*—This project provides for engineer intelligence, certain mapping and engineer-geodetic requirements of the Department of Defense. Long-range programs for surveying and mapping strategic areas are carried out.

10. *Operation of engineer schools.*—This project provides funds for the Engineer School, Fort Belvoir, Va., and for overseas engineer schools. At Fort Belvoir, approximately 9,600 officers and enlisted men will be trained in the latest military engineering principles and technical skills; research in training methods and the development of engineer doctrine will be carried on; and training publications, training aids, and extension courses will be prepared. The overseas engineer schools train enlisted and civilian personnel as required for the performance of engineer services.

11. *Engineer field training.*—This project provides funds for the training of engineer units in the zone of the interior. Personnel funds available under this project are used for the employment of civilian mechanical advisers to assist military personnel in maintenance and repair techniques for all engineer heavy equipment. Other funds provide for the local purchase of training materials not otherwise obtainable, permitting flexibility and realism in unit training. These activities in 1951 will be on a comparable basis to 1949 and 1950.

12. *Research and development.*—The Corps of Engineers' responsibilities in research and development extend over 30 basic fields comprising both engineer equipment and items for other services. During 1949, 241 projects were active and 8 items were completed. The 1950 program includes 235 projects, of which 35 are scheduled for completion. The 1951 program has been designed to conform to the recently established Research and Development Board master plan and will include 171 projects.

APPROPRIATION TEXT

ENGINEER SERVICE, ARMY

For Engineer Service, Army, to be accounted for as one fund, as follows—

Engineer Service: For the design, development, procurement, manufacture, maintenance, alteration, repair, installation, storage, and issue of engineer equipment, instruments, appliances, supplies, materials, tools and machinery required in the equipment and training of troops and in military operations, including military surveys; operation and maintenance of the Engineer School, including compensation of civilian lecturers, and purchase and binding of scientific and professional books, pamphlets, papers, and periodicals; procurement, preparation, and reproduction of maps and similar data for military purposes; expenses incident to the Engineer Service in military and training operations, including military surveys, engineering planning, investigation and design, administration of real estate, and research and development of improved methods in such operations, rental of storehouses and grounds, and repair and alteration of buildings, including heat, light, power, water, and communication service, not otherwise provided for and expenses of railroad construction, including purchase or lease of equipment and materials; and the acquisition of lands, rights-of-way thereon, and other interests therein and temporary use thereof; payment of deficiency judgments and interest thereon arising out of condemnation proceedings heretofore instituted, and expenses of utilities

relocation not otherwise provided for; \$125,000,000;] (10 U. S. C. 181; National Military Establishment Appropriation Act, 1950.)

Appropriated 1950, * \$116,702,830

* The appropriation was reduced to this amount by sec. 702 of the National Military Establishment Appropriation Act, 1950.

BARRACKS AND QUARTERS, ARMY

For expenses necessary for the maintenance, installation, repair, operation, protection, and rental of buildings, structures, grounds, utilities, flying fields, fortifications, and appurtenances thereto, or other facilities required for military use including the procurement of supplies, equipment, fuel, printing, binding, communication services, at the seat of government and elsewhere; manufacture, procurement, purchase, storage, issue, and transportation (including research, planning, design, development, inspection, tests, and the handling) of water, gas, electricity, fuel, tools, machinery, and equipment; construction of additions and extensions to and alterations, improvements, and rehabilitations of existing facilities; the furnishing of heat and light for buildings erected at private cost in the operation of the Act approved May 31, 1902 (10 U. S. C. 1346), and buildings on military reservations, authorized by Department of the Army regulations to be used for a similar purpose; and expenses of packing and crating and unpacking and uncrating of equipment, material, supplies, baggage, and goods not otherwise provided for, \$187,732,269: Provided, That the amounts to be assessed and collected from nonmilitary interests on the Fort Monroe Military Reservation, Virginia, for expenditure in the maintenance, repair, and operation of wharves, roads, sewerage systems, and other utilities at said reservation shall be fixed by the Secretary of the Army during the current fiscal year, in proportion to the service rendered to such nonmilitary interests: Provided further, That in administering the provisions of 43 U. S. C. 315q, payments of rentals may be made in advance: Provided further, That no part of the funds appropriated in this Act for the Army, except for "Contingencies of the Army", "Military Construction", "Army National Guard" and "Organized Reserves", shall be available for construction of a permanent nature of an additional building or an extension or addition to an existing building, the cost of which in any case exceeds \$30,000: Provided further, That none of the Army appropriations in this Act, except for "Contingencies of the Army", "Engineer Service, Army", "Military Construction", "Army National Guard" and "Organized Reserves" shall be available for construction of a temporary nature of an additional building or an extension or addition to an existing building, the cost of which in any case exceeds \$30,000: Provided further, That the monthly rental rate to be paid out of this appropriation for stabling any animal shall not exceed \$15: Provided further, That the sum of \$9,300,000 of the appropriation "Engineer Service, Army", fiscal year 1947, shall remain available until June 30, 1950, for the payment of obligations incurred under contracts executed thereunder prior to July 1, 1947.] (10 U. S. C. 72; National Military Establishment Appropriation Act, 1950.)

Appropriated 1950, * \$184,976,037

* The appropriation was reduced to this amount by sec. 702 of the National Military Establishment Appropriation Act, 1950.

For expenses necessary for the procurement, manufacture, maintenance, and issue of utilities, engineer supplies, materials, and equipment; procurement, preparation, and reproduction of maps and similar data for military purposes; military surveys, engineering planning, and investigation and design; expenses incident to military and training operations, including operation of the Engineer School; personal services; travel and transportation; rentals, maintenance, installation, alteration, repair, protection, and operation of buildings, grounds, and other facilities, including appurtenances thereto; administration of real estate, acquisition of easements, rights-of-way, or other similar interests in and temporary use of lands, and, in administering the provisions of 43 U. S. C. 315q, rentals may be paid in advance; payment of deficiency judgments and interest thereon arising out of condemnation proceedings; relocation of utilities not otherwise provided for; utility services for buildings erected at private cost, as authorized by law (10 U. S. C. 1346), and buildings on military reservations authorized by Department of the Army regulations to be used for a similar purpose; and expenses of packing, crating, unpacking, and uncrating of supplies, materials, equipment, and baggage not otherwise provided for; \$309,170,000: Provided, That the amounts to be assessed and collected from nonmilitary interests on the Fort Monroe Military Reservation, Virginia, for expenditure in the maintenance, repair, and operation of wharves, roads, sewerage systems, and other utilities at said reservation shall be fixed by the Secretary of the

PROGRAM AND PERFORMANCE

The 1950 funds provide for continuing the acquisition and construction of facilities for the Department of the Army, together with certain work for the Department of the Air Force, as authorized by acts of Congress. The program is comprised of top priority items of troop and family housing, research and development facilities, and

technical, operational, and industrial facilities required in the continental United States to support: (1) the field forces and (2) the technical services and commands. In the oversea areas the program is of similar character, and includes funds for the further development of Alaskan military installations by providing additional housing, port facilities, expansion of utility systems, and other operational requirements. Also included are funds to provide for the expansion of military installations on the island of Okinawa and to replace facilities on that island destroyed by recent typhoons.

No funds have been provided under this appropriation title in 1951, as additional appropriations are contingent upon the enactment of authorizing legislation now pending before the Congress. A Department-wide construction program for the Department of Defense is provided as a contingency item in 1951.

APPROPRIATION TEXT

[MILITARY CONSTRUCTION, ARMY]

For construction, installations, and equipment of temporary or permanent public works, military installations and facilities, as authorized by the Act of June 12, 1948 (Public Law 626), without regard to sections 1136 and 3734, Revised Statutes, as amended, including hire of passenger motor vehicles; payment of claims under the Act of July 3, 1943 (31 U. S. C. 223b), and pursuant to section 403 of the Federal Tort Claims Act of August 2, 1946 (28 U. S. C. 2672); \$85,706,120, of which \$75,000,000 is for payment of obligations incurred pursuant to authority granted under this head in the Military Functions Appropriation Act, 1949, to remain available until expended. (10 U. S. C. 181b; 62 Stat. 375; National Military Establishment Appropriation Act, 1950.)

[Not to exceed \$600,000 of funds appropriated under this heading in the Military Functions Appropriation Act, 1949, are hereby made

available for transfer to the Bureau of Reclamation, Department of the Interior, to be available until expended, for the repair and reconstruction of the desilting basin and appurtenant works of the Gila project, Arizona, at Imperial Dam.]

For an additional amount for "Military construction, Army", for carrying out the purposes of H. R. 6303, Eighty-first Congress, to remain available until expended, \$32,000,000, of which \$1,545,000 shall be available for transfer to the appropriation "Engineer Service, Army", fiscal year 1950; and, in addition, the Secretary of the Army is authorized to enter into contracts for the purposes of this appropriation in an amount not to exceed \$48,363,700: *Provided*, That the same purposes applicable to this appropriation as contained in the National Military Establishment Appropriation Act, 1950, shall apply: *Provided further*, That this paragraph shall be effective only upon enactment into law, during the first session of the Eighty-first Congress, of H. R. 6303.] (Second Supplemental Appropriation Act, 1950.)

Appropriated 1950, * \$117,177,044

* The appropriation of \$85,706,120 was reduced to \$85,177,044 by sec. 702 of the National Military Establishment Appropriation Act, 1950, and was increased \$32,000,000 by the Second Supplemental Appropriation Act, 1950.

PROGRAM AND PERFORMANCE

The mission of the Ordnance Department is to develop, design, procure, store, maintain, and supply ordnance supplies and equipment to the Army. The general program is projected at approximately the 1950 level with increases for the rebuild of unserviceable equipment and for research and development.

1. *Maintenance of mobilization facilities and industrial mobilization planning.*—This provides for the maintenance of stand-by plants, inactive portions of arsenals, reserve tools and production equipment, contracts for industry preparedness measures, and industrial mobilization planning as directed by the Munitions Board of the Department of Defense.

2. *Cataloging (Munitions Board) and standardization.*—This finances the continued compilation of the ordnance part of a uniform Department of Defense cataloging system and the preparation, revision and distribution of ordnance standards, joint Army-Navy standards, and drafting room regulations.

3. *Procurement of ammunition.*—This provides for the procurement of ammunition for combat training of the Army, saluting, proof-testing of weapons, and extended service testing of new weapons under simulated combat conditions.

4. *Procurement of artillery.*—This provides for new artillery pieces and fire-control equipment for the active Army and equipment for extended service test.

5. *Procurement of small arms.*—This covers newly developed small arms for extended service test.

6. *Procurement of tanks and combat vehicles.*—This finances the partial replacement of obsolete tanks with new and improved models, new prime movers for anti-aircraft artillery, new items of arctic equipment for support of planned training maneuvers, and newly developed tracked vehicles for extended service test.

7. *Procurement of other motor vehicles.*—This finances the partial replacement of organizational motor transport with new vehicles, new arctic type equipment for training maneuvers, newly developed trucks for extended service test, and trailers to fill a shortage in the active Army.

8. *Procurement of Army aircraft.*—This provides for procurement of observation aircraft for extended service test, and aircraft targets and launchers for training of artillery.

9. *Preservation of ordnance matériel.*—This activity provides for the maintenance of ordnance matériel in the hands of troops and in storage, the rebuild and modification of unserviceable equipment, and the procurement of spare parts required for the maintenance, rebuild and modification of ordnance matériel.

10. *Preservation of ammunition.*—This finances the periodic surveillance and the maintenance of ammunition and ammunition components for safe storage and usage, and the renovation and modification to meet current issue demands of the active Army and Air Force.

11. *Current expenses of the Ordnance Department.*—This activity provides for the receipt, storage and issue of ordnance supplies and ammunition at ordnance installations, in Army areas and overseas commands. It further provides for custodial and utility services, preparation of ordnance technical manuscripts, and operation of a field printing plant and ordnance district procurement offices. This activity is in support of both the Air Force and the Army.

12. *Maintenance of Army aircraft.*—This provides for the procurement of spare parts and accessories required for maintenance of liaison aircraft in use by the Army.

13. *Army training aids.*—This finances the development, procurement, and distribution of ordnance training aids for use in Army training programs other than in schools operated by the Ordnance Department itself.

14. *Ordnance military training.*—This finances the operation of Ordnance Department schools and the preparation and conduct of extension courses in ordnance activities. It provides for projects of the Ordnance Board such as revision of technical and field manuals, Tables of Organization and Equipment, and development of the stock-control system.

15. *Research and development.*—This finances the research and development of ordnance equipment and supplies, procurement of experimental matériel and the operation of research and test facilities.

APPROPRIATION TEXT

ORDNANCE SERVICE AND SUPPLIES, ARMY

For manufacture, procurement, storage, and issue, including research, planning, design, development, inspection, test, alteration, maintenance, repair, and handling of ordnance material and aircraft, together with the machinery, supplies, and services necessary thereto; supplies and services in connection with the general work of the Ordnance Department, comprising police and office duties, rents, tolls, fuel, light, water, advertising, stationery, typewriting and computing machines, including their exchange, and furniture, tools, and instruments of service; instruction, training, and other incidental expenses of the ordnance service; purchase and hire of passenger motor vehicles; ammunition for military salutes at Government establishments and institutions to which the issues of arms for salutes are authorized; services, material, tools, and appliances for operation of the testing machines and chemical laboratory in connection therewith; publications for libraries of the Ordnance Department, including the Ordnance Office: *Provided*, That, notwithstanding the provisions of any other law not more than **[\$22,500,000]** \$15,000,000 of the amounts received by the Department of the Army during the current fiscal year as proceeds from the sale of scrap or salvage material shall be available for expenses of transportation, demilitarization, and other preparation for sale or salvage of military supplies, equipment, and matériel: *Provided further*, That a report of receipts and disbursements under this limitation shall be made quarterly to the Appropriation Committees of the Congress; **[\$730,000,000]**, of which \$70,000,000 is for liquidation of obligations incurred pursuant to authority granted under this head in the Military Functions Appropriation Act, 1949: *Provided further*, That the sum of \$5,000,000 of the appropriation "Ordnance service and supplies, Army", 1942-1946, shall remain available until June 30, 1950, for the payment of obligations incurred under contracts executed thereunder prior to July 1, 1946] **\$636,360,000**. (10 U. S. C. 192; 50 U. S. C. 78; National Military Establishment Appropriation Act, 1950.)

Annual definite appropriation:

Appropriated 1950, **\$730,000,000** Estimate 1951, **\$636,360,000**

Includes \$5,624,866 for activities previously carried under appropriations as follows:			
"Contingencies of the Army".....			\$210,609
"Quartermaster service, Army":			
Regular supplies of the Army.....		660,000	
Clothing and equipage.....		5,529	
Incidental expenses of the Army.....		907,778	
"Transportation service, Army".....		308,234	
"Signal service of the Army".....		50,000	
"Engineer service, Army".....		1,482,716	
"Construction of aircraft and related procurement, Department of the Air Force".....		2,000,000	
Excludes \$18,386,064 for activities transferred in the estimates as follows:			
"Contingencies of the Army".....		754,500	
"Quartermaster service, Army":			
Regular supplies of the Army.....		1,461,243	
Clothing and equipage.....		2,913,142	
"Signal service of the Army".....		23,300	
"Engineer service, Army".....		13,233,879	
The amounts obligated in 1949 and 1950 are shown in the schedule as comparative transfers.

PROGRAM AND PERFORMANCE

The mission of the Chemical Corps is to study and investigate toxicological warfare, to give technical super-

vision to Army training in toxicological warfare and to develop, manufacture, procure, and supply toxicological supplies and equipment to the Army.

1. *Industrial mobilization and procurement planning.*—This provides for the maintenance of stand-by plants, arsenal lines, and proving grounds and reserve tools, contracts for industry preparedness measures, cataloging, standardization of supplies and equipment, and industrial mobilization planning, as directed by the Munitions Board of the Department of Defense.

2. *Procurement and manufacture.*—This finances commercial procurement and manufacture (in Government arsenals) of all Chemical Corps matériel for the equipment of organizational units in the Army, first destination transportation costs of such matériel, travel of all personnel, and pay of civilian personnel engaged in procurement and inspection.

3. *Maintenance and operation of facilities.*—This covers overhead costs, such as personnel and fiscal administration, maintenance of production tools, provision of utility services and internal security at active Chemical Corps facilities.

4. *Preservation and maintenance of matériel.*—This provides for the inspection, surveillance, and rework of ammunition and equipment stored in Chemical Corps depots and for spare parts issued to maintain Chemical Corps equipment in the hands of troops. The increase projected for 1951 is to provide spare parts no longer available from stocks procured during the war.

5. *Distribution of supplies and equipment.*—This provides supplies and equipment and pay of civilian employees engaged in the operation of Chemical Corps depots.

6. *Education and training.*—This provides for the operation of Chemical Corps schools, procurement of training aids and supplies, and the production and distribution of training literature to the Army and the civilian components of the Army. The increase projected for 1951 will provide new training courses in fields in which no courses previously have been offered and will cover increased enrollments in extension courses for the civilian components.

7. *Research and development.*—This finances investigation, research, development, and modification of supplies and equipment for toxicological warfare and operation of toxicological research facilities.

PROGRAM AND PERFORMANCE

This appropriation provides for the costs of operating service schools (except schools of the technical services), for educational training, and for testing of equipment for use by field army units.

1. *Office, chief, Army Field Forces.*—This provides for civilian employees in the field operating agency which supervises Army training in the zone of the interior.

2. *Joint service schools.*—The National War College and the Industrial College of the Armed Forces are operated to train students drawn from the Army, Navy, Air Force, and from other Government agencies. A total of 235 students is planned in these two colleges in 1951.

3. *Tuition of military and civilian personnel.*—In 1951, it is planned to train 989 military personnel at civilian schools in specialized fields not covered by the service schools as compared to 1,214 trained in 1949 and 910 in 1950.

4. *Army service schools.*—Through resident instruction and extension courses, service schools furnish basic and advanced training to Regular Army personnel, members of the reserve components, and personnel of other services. The following table reflects the training program proposed for 1951 compared to 1949 and 1950:

	Fiscal year 1949		Fiscal year 1950		Fiscal year 1951	
	Resident	Non-resident	Resident	Non-resident	Resident	Non-resident
Command and general staff.....	1,069	7,272	1,250	11,000	4,350	14,000
Infantry.....	18,607	8,454	13,440	11,000	13,440	14,000
Artillery.....	5,045	9,305	5,198	12,000	5,198	15,000
Armored.....	2,793	1,794	2,610	2,600	2,610	3,500

Chaplain.....	350	973	420	1,300	420	1,600
Counter Intelligence Corps.....	3,684	-----	4,460	-----	4,460	-----
Military police.....	5,610	6,601	6,830	8,500	6,830	10,000
Strategic intelligence.....	75	-----	75	-----	75	-----
Army language.....	1,258	-----	1,000	-----	1,000	-----
Physical training and athletic director course.....	725	-----	480	-----	480	-----
Total.....	49,191	62,378	46,215	91,900	49,315	115,100

5. *Army field forces boards.*—These boards prepare military performance characteristics for all weapons and equipment used by a field army, collaborate with technical services during design and engineering phases, and conduct user tests of service test models. The funds for 1951 are for the operation of four boards and the arctic test branch.

6. *Training aids.*—Funds are requested for the local fabrication, construction, procurement, storage, and issue of aids for all components of the Army, with particular emphasis on providing training aids for combat units and the establishment of a training aid center in each army area.

PROGRAM AND PERFORMANCE

The United States Military Academy at West Point, N. Y., has the mission of instructing and training the

Corps of Cadets in order to provide the cadets with a balanced, liberal education and with a broad, basic military education which will qualify them for performing the technical duties of junior officers. The academic instruction provided at the undergraduate level leads, upon graduation, to a bachelor of science degree in engineering. The estimate provides for an average enrollment of 2,400 cadets.

1. *Maintenance, United States Military Academy.*—The maintenance of buildings, and the appurtenant grounds, roads, monuments, and docks, including the field training facility at Camp Buckner, are included under this item. The 1951 estimates provide for a continuation of the normal maintenance program and for a number of special projects which will reduce the backlog of preventive maintenance accumulated during the war and during the postwar period.

2. *Maintenance, Stewart Field.*—The Academy bears a proportionate share of maintenance costs of facilities used by the Military Academy Preparatory School at this Air Force base.

3. *Operation, United States Military Academy.*—Provides for the support of the academic and administrative activities, including over-all administration of the post of West Point and the Corps of Cadets and expenses for the operation of the 12 academic departments.

For 1951 the estimate for commutation of cadet rations has been transferred from this appropriation to Pay of the Army.

PROGRAM AND PERFORMANCE

This appropriation provides facilities, supplies, and equipment, and pay and allowances essential to accomplish the training required to make the Army National Guard an effective civilian component of the Armed Forces.

In 1951, it is expected that there will be approximately 5,000 federally recognized units in the United States, Hawaii, Puerto Rico, and Alaska, including 25 Infantry divisions, 2 armored divisions, 20 regimental combat teams and other combat and service units. The average strength in 1951 will consist of 31,400 officers and 318,600 enlisted personnel, or a total of 350,000 which is expected to be reached during the current fiscal year.

1. *Procurement of supplies and equipment.*—This covers requirements for procurement of technical service supplies and equipment including ammunition motor vehicles, clothing, and other items.

2. *Construction of facilities and target ranges.*—The construction program in 1951 will provide for 45 motor vehicle storage buildings, 14 liaison aircraft hangars, 2 maintenance shops, and 24 target ranges, as well as for the improvement of field training facilities at 8 different locations.

3. *Maintenance and preparation of facilities.*—This provides for the costs involved in the activation, rehabilitation, furnishing of utilities, and closing of Federal facilities used for National Guard summer training. In addition, funds are provided for a part of the repairs and utilities costs for National Guard State facilities and target ranges.

4. *Pay of National Guard officers on active duty.*—This provides only for the pay and allowances of five officers while on temporary active duty with the General Staff committee on National Guard policy.

5. *Pay of civilian employees.*—This covers the pay of civilian employees in the offices of United States property and disbursing officers, including State maintenance officers, employees serving as caretakers for military property, and as rangekeepers, and administrative assistants for National Guard organizations. Provision is made for approximately 12,624 man-years of employment which is substantially the same as in 1950.

6. *Miscellaneous operating expenses.*—This covers office supplies, communications services, renovation of uniforms for stock, and field printing for Army National Guard units.

7. *Transportation of property.*—This expense is for the packing, crating, and shipment of equipment and supplies from technical service depots of the Army and from State warehouses to National Guard units.

8. *Modification, repair, and maintenance of equipment.*—This covers the cost of rehabilitation of equipment prior to issue to the National Guard as well as for the cost of base maintenance of equipment in use. Substantial quantities of World War II combat equipment will continue to be overhauled for issue to meet field training requirements of the National Guard.

9. *Fuels and lubricants.*—This provides for administrative, operating, and training requirements incident to both armory training and summer camps.

10. *Travel—temporary duty.*—Travel by Army and National Guard personnel for the supervision, inspection, and training of the Guard is covered by this item.

11. *Public information program expenses.*—This provides for the cost of publicity to assist the States in obtaining enlistments and reenlistments of personnel in the National Guard.

CIVILIAN COMPONENTS—Continued

Army National Guard—Continued

12. *Field training expenses.*—This covers pay and allowances and other expenses of personnel attending 15-day summer training camps. It also includes the transportation of Regular Army troops and their equipment to National Guard camps for demonstration and instructional purposes.

13. *Army schools.*—In order that specialists may receive advanced training, provision has been made for approximately 1,200 officers and 3,500 enlisted men to attend courses at Army schools which will be of 80 to 90 days' duration.

14. *Armory drill expenses.*—This provides for drill pay in 1951 for 48 drills for a total strength of 350,000, as compared to an average of 325,000 planned in 1950.

15. *Training aids.*—This provides for the procurement of publications, working models, target airplanes, and other items which aid in the instruction and training of National Guard units.

16. *Salaries, National Guard Bureau.*—This provides for the salaries of all civilian employees in the National Guard Bureau, except the employees in the air division who are paid from Air Force funds.

PROGRAM AND PERFORMANCE

The mission of the Army Organized Reserve Corps is to provide, in the event of emergency, units effectively organized, trained, and equipped for rapid mobilization, expansion, and deployment in the Army of the United States, and trained individuals available for designated mobilization assignments and other requirements for the expansion of the regular forces.

The 1951 program provides for a total strength of 255,000 (73,500 officers and 181,500 enlisted personnel) to be authorized to receive inactive duty pay for attendance at drills or performance of equivalent duties and to receive 15 days' field training. The number of active enlisted personnel assigned to units at the present time is about 90,000 less than the average strength provided for in 1951. Inactive-duty training without pay will be provided for an estimated 55,000 additional officers in training units, while a total of 120,000 reservists are expected to be enrolled in extension courses. Provision is made for active-duty training of a reasonable proportion of the active Reserve personnel who are not assigned to organized units participating in paid drills.

1. *Supplies and equipment.*—This includes allowances for individual clothing and equipment for Organized Reserve personnel and for organizational matériel, ammunition, supplies, and equipment. This will also provide for required repair and overhaul of heavy equipment by the Regular Army prior to its issuance to Organized Reserve units.

2. *Construction.*—This provides for a continuance of the armory construction program which was commenced in 1950. The 1950 program calls for the building of approximately 43 training centers; the 1951 allowance

will cover the construction of approximately 80 additional training centers.

3. *Rents and utilities.*—This includes the costs of rents and utility services at Organized Reserve installations; of initial alterations and restoration of leased facilities; and of the preparation, operation, and closing of summer camps.

4. *Temporary-duty travel.*—Travel expenses are provided in connection with the conduct and administration of Organized Reserve training, including conferences for instructors, travel by instructional groups, special audits, and inspections.

5. *Administrative and operating expenses.*—This includes day-to-day operating costs of the Army Reserve program, as well as maintenance and operating expenses in connection with active-duty training. It covers administration of Army extension courses for reservists, printing and reproduction, medical and hospital expenses, cleaning and repair of uniforms prior to issue, care and upkeep of equipment, salaries of civilian personnel, general operating expenses incident to the conduct of summer camps, and the cost of packing and transporting supplies and equipment. Funds are also provided to assist in expenses of programs for the recruitment and reenlistment of enlisted reservists.

6. *Active-duty training.*—This provides active-duty pay for 15 days of field training in 1951 for 66,450 officers and 90,750 enlisted personnel, which includes the estimated numbers of those assigned to organized units participating in paid drills who will be able to attend field training and approximately 15,000 other officers of the active reserve. Provision also is made for the attendance of an additional 12,900 officers and 10,000 enlisted personnel at service and army area schools for periods ranging from 15 to 90 days. The estimated total of 180,100 to receive active-duty training in 1951 compares to 72,743 who received such training in 1949.

7. *Reserve-duty training.*—This provides for payment of drill pay in 1951 for an aggregate average strength of 255,000, as compared to 230,000 planned for in 1950. The numbers included in 1951 are as follows:

Type	Number of drills	Officers	Enlisted	Total
Class A units.....	48	1,700	15,300	17,000
Class B units.....	24	56,800	166,200	223,000
Mobilization assignment individuals.....	10	15,000	-----	15,000
Total.....	-----	73,500	181,500	255,000

8. *Miscellaneous training.*—This provides funds for such purposes as rental of aircraft for training of 1,018 liaison pilots on the basis of 80 hours of flying time per year and certain limited expenses of conducting training for reservists who are in a nonpay status.

APPROPRIATION TEXT

ORGANIZED RESERVES

For pay and allowances, not otherwise provided for, of members of the Organized Reserve Corps on duty in accordance with law; mileage, actual and necessary expenses, or per diem in lieu thereof, at rates authorized by law, and transportation of temporary change of station baggage incurred by officers and enlisted men of the Regular Army and Organized Reserve Corps personnel traveling on duty in connection with the Organized Reserve Corps and for travel of dependents, and transportation of other effects as authorized by law of such personnel ordered to make a permanent change of station for duty in connection with the Organized Reserve Corps; personal services; pay, transportation, subsistence, clothing, and medical and hospital treatment of enlisted members of the Organized Reserve Corps; conducting correspondence or extension courses for instruction of members of the Organized Reserve Corps, including necessary supplies, procurement of maps and textbooks; transportation and traveling expenses of employees; purchase of training manuals, including Government publications and blank forms; establishment, maintenance, and operation of Organized Reserve Corps headquarters, installations, aviation facilities and camps for training of the Organized Reserve Corps; alterations and additions to present structures; transportation and erection of temporary structures; construction and maintenance of buildings, structures, rifle ranges and facilities, including acquisition of land, rights pertaining thereto, leasehold and other interests therein and temporary use thereof; arms, equipment, supplies, and matériel (not otherwise provided for) required to arm and equip Organized Reserve Corps organizations; purchase (not to exceed two hundred) and hire of passenger motor vehicles and hire and purchase of aircraft; miscellaneous expenses incident to the administration of the Organized Reserve Corps; expenses incident to the use, including upkeep costs, of supplies, equipment, and matériel furnished from stocks under the control of the Department of the Army;

medical and hospital treatment of members of the Organized Reserve Corps who suffer injury or contract disease in line of duty, as provided by the Act of June 15, 1936 (10 U. S. C. 455 a-d), and such other purposes in connection therewith as are authorized by the said Act, including pay and allowances, subsistence, transportation, and burial expenses; in all, \$115,000,000.]

For pay, allowances, clothing, subsistence, transportation (including mileage, actual and necessary expenses, or per diem in lieu thereof), and medical and hospital treatment and related expenses, as authorized by law, for personnel of the Organized Reserve Corps while on active duty undergoing Reserve training or while performing drills or equivalent duty; maintenance, operation, repair, and other necessary expenses of facilities for the training and administration of the Organized Reserve Corps; construction of buildings, structures, rifle ranges, and facilities, including alterations and additions thereto, and acquisition of land, rights pertaining thereto, leasehold, and other interests therein and temporary use thereof; personal services; expenses of temporary-duty travel in connection with activities of the Organized Reserve Corps; transportation of things; purchase (not to exceed two hundred) and hire of passenger motor vehicles and aircraft; supplies, services, matériel, and equipment, not otherwise provided for, necessary to train and equip the Organized Reserve Corps; and expenses of modification, issue, maintenance, and use of supplies, matériel, and equipment, which may be furnished without reimbursement from Army stocks; \$110,000,000. (10 U. S. C. 37, 369a, 422; 37 U. S. C. 103, 114; National Military Establishment Appropriation Act, 1950.)

Appropriated 1950, \$115,000,000 Estimate 1951, \$110,000,000

* Excludes \$950,000 for activities transferred in the estimates to "Finance service, Army," travel of the Army. The amounts obligated in 1949 and 1950 are shown in the schedule as comparative transfers.

None of the funds appropriated elsewhere in this Act, except for printing and binding, field exercises, and for pay and allowances of officers and enlisted men of the Army of the United States, and for mileage, reimbursement of actual traveling expenses, or per diem allowances in lieu thereof, and travel of dependents or reimbursement therefor, as authorized by law, to Reserve officers on extended active duty, shall be used for expenses in connection with the Organized Reserve Corps, but available supplies and existing facilities at military posts shall be utilized to the fullest extent practicable.]

The pay and allowances of such additional officers and nurses of the Medical Reserve Corps as are required to supplement the like officers and nurses of the Regular Army in the care of beneficiaries of the United States Veterans' Administration treated in Army hospitals may be paid from the funds allotted to the Department of the Army by that Administration under existing law. (National Military Establishment Appropriation Act, 1950.)

PROGRAM AND PERFORMANCE

The primary purpose of the Army Reserve Officers' Training Corps program is to produce a continuing flow of junior commissioned officers into the Organized Reserve Corps and the Regular Army. Units of the senior division are at colleges and comparable schools and of the junior division, at secondary schools.

In 1950 the program is being administered at 171 civilian colleges, 47 military colleges and schools, and 103 secondary schools. Units of the senior division are expected to be activated in 1951 at about 50 additional institutions. It is estimated that in 1951 enrollments in the senior division will total 120,500 and in the junior division 60,000. This compares with an initial enrollment of 105,173 and 55,433 in the senior and junior divisions, respectively, for the current academic year. The 1951 estimate includes the funds required to complete the 6 weeks' training camp in the summer of 1951, which extends into the following fiscal year. Accordingly, provision is made for the appropriation to remain available for obligation through the fiscal year 1952.

1. *Pay and allowances of students at institutions.*—Advanced course students are provided commutation in lieu of subsistence at a rate of 90 cents per day; all students are furnished uniforms or commutation in lieu thereof.

2. *Operating expenses at institutions.*—This includes the procurement, maintenance, and operation of equipment; renovation of uniforms; procurement of supplies and materials, including training aids; and administrative expenses.

3. *Pay and allowances of students at Army ROTC summer camps.*—The estimate provides for 11,500 advanced course students to attend training camps during the summer of 1950 and 14,000 during the summer of 1951. Advanced students receive the pay of a recruit while at camp, as well as travel pay to and from the camps.

4. *Operating expenses of summer camps.*—Funds are requested in 1951 to operate 18 summer camps and will provide for pay of temporary civilian employees, travel of Army personnel to and from camps, preparation, operation, and closing of camps, maintenance, operation, and servicing of equipment, procurement and renovation of clothing and individual equipment, organizational laundry, procurement of training supplies and ammunition, hospitalization, subsistence, and certain other necessary services.

5. *Commercial transportation of things.*—Supplies and equipment are shipped from Army depots to and from camps and institutions.

APPROPRIATION TEXT

ARMY RESERVE OFFICERS' TRAINING CORPS

For the procurement, maintenance, and issue, under such regulations as may be prescribed by the Secretary of the Army to institutions at which one or more units of the Reserve Officers' Training Corps are maintained, of such public animals, means of transportation, supplies, tentage, equipment, and uniforms as he may deem necessary, including cleaning and laundering of uniforms and clothing at camps; and to forage, at the expense of the United States, public animals so issued, and to pay commutation in lieu of uniforms at a rate to be fixed annually by the Secretary of the Army; transporting said animals and other authorized supplies and equipment from place of issue to the several institutions and training camps and return of same to place of issue when necessary; purchase of training manuals, including Government publications and blank forms; for the establishment and maintenance of camps for the further practical instruction of the members of the Reserve Officers' Training Corps, and for transporting members of such corps to and from such camps or other places designated by the Secretary of the Army, and to subsist them while traveling to and from such camps and while remaining therein so far as appropriations will permit, or, in lieu of transporting them to and from such camps and subsisting them while en route, to pay them travel allowance at the rate of 5 cents per mile for the distance by the shortest usually traveled route from the places from which they are authorized to proceed to the camp and for the return travel thereto, and to pay the return travel pay in advance of the actual performance of the travel, or to pay commutation in lieu of subsistence at camps at rates fixed by the Secretary of the Army; expenses incident to the use, including upkeep costs, of supplies, equipment, and matériel furnished in accordance with law from stocks under the control of the Department of the Army; pay for students attending advanced camps at the rate authorized by law; payment of commutation of subsistence to members of the senior division of the Reserve Officers' Training Corps, at a rate not exceeding the cost of the garrison ration prescribed for the Army, as authorized in the Act approved June 3, 1916, as amended by the Act approved June 4, 1920 (10 U. S. C. 387); medical and hospital treatment of members of the Reserve Officers' Training Corps, who suffer personal injury or contract disease in line of duty, and for other expenses in connection therewith, including pay and allowances, subsistence, transportation, and burial expenses, as authorized by the Act of June 15, 1936 (10 U. S. C. 455a-d); mileage, traveling expenses, or transportation, for transportation of dependents (including dependents of retired officers, warrant officers, and enlisted men of the first three grades, and enlisted men of the Regular Army Reserve, ordered to active duty and upon relief therefrom), and for packing, crating and unpacking, and transportation of baggage (including baggage of retired officers, warrant officers, and enlisted men of the first three grades, and enlisted men of the first three grades of the Regular Army Reserve ordered to active duty and upon relief therefrom) for officers, warrant officers, and enlisted men traveling on duty pertaining to or on detail to or relief from duty with the Reserve Officers' Training Corps; purchase (not to exceed thirty) and hire of passenger motor vehicles; procurement and issue as provided in section 55c of the Act approved June 4, 1920 (10 U. S. C. 1180), and in section 1225, Revised Statutes, as amended, under such regulations as may be prescribed by the Secretary of the Army, to schools and colleges, other than those provided for in section 40 of the Act above referred to, of such arms, tentage, and equipment, and of ammunition, targets, and target materials, including the transporting of the same, and the overhauling and repair of articles issued as the Secretary of the Army shall deem necessary for proper military training in said schools and colleges; \$25,000,000: *Provided*, That uniforms and other equipment or material issued to the Reserve Officers' Training Corps in accordance with law shall be furnished from surplus or excess stocks of the Department of the Army without payment from this appropriation, except for actual expense incurred in the manufacture or issue: *Provided further*, That in no case shall the amount paid from this

CIVILIAN COMPONENTS—Continued

PROGRAM AND PERFORMANCE

The National Board for the Promotion of Rifle Practice was established under section 113 of the National Defense Act, as amended, for the purpose of promoting and assisting marksmanship practice among citizens of the United States.

1. *Administration*.—This activity includes civilian administrative services and the travel of Board members.

2. *Civilian rifle clubs*.—Assistance is provided to 3,325 clubs and schools. In 1951, 116,000 civilians will be loaned arms and equipment and be supplied with a limited quantity of ammunition, targets, and supplies for target practice.

3. *Approval of sales*.—Arms, ammunition, targets, and supplies for target practice are sold by the Army Ordnance Department to members of the National Rifle Association, after approval by the director of civilian marksmanship. It is expected that 95,000 sales will be completed in 1951 valued at \$2,000,000. In 1949, 110,989 sales were approved, with a value of \$2,056,026.

PROGRAM AND PERFORMANCE

This office establishes and controls policies for the entire Department of the Army. It is responsible for the administration of civilian personnel policies. Various boards and committees engaged in special activities are staffed by this office. Certain administrative services are furnished, including the procurement and supply of office equipment, the operation of a central library and telephone switchboard and the administration of a health service program for civilian employees.

PROGRAM AND PERFORMANCE

The Chief of Staff is the principal military adviser to the Secretary of the Army and commands all components of the Army of the United States. In addition to the immediate Office of the Chief of Staff there are several General and Special Staff divisions which perform the following functions:

The Chief of Information provides public information, supervises the courses of general education for military personnel, and provides legislative liaison with Congress. The Army Comptroller administers budget and financial matters for the Department. The Plans and Operations Division plans the strategic operations of the Army. The Personnel and Administration Division procures officer and enlisted personnel and manages their careers. The Intelligence Division collects, evaluates, and disseminates pertinent military intelligence. The Organization and Training Division establishes the organization of the Army and determines training policies. The Logistics Division plans and directs the execution of the Army’s logistical program. The Executive for Reserve and Reserve Officers’ Training Corps Affairs coordinates the program of these civilian components. The Historical Division prepares histories and directs other historical activities of the Department.

PROGRAM AND PERFORMANCE

The Office of the Judge Advocate General administers the system of military justice throughout the Army and renders legal services to the Army establishment. The work includes review of courts martial, review of petitions for new trials, review of criminal records, and the publication of war crimes trial proceedings. In the area of general law, the office controls and coordinates patent copy-right and trade-mark activities. The office also processes claims and appeals, drafts private relief legislation, and coordinates litigated cases.

PROGRAM AND PERFORMANCE

This office is responsible for maintaining the strength of the Army at the highest possible peak of efficiency by reducing health hazards, applying disease-prevention measures, and providing medical care and hospitalization for sick and injured personnel. The Surgeon General's office has direct command and administrative supervision over 2 medical centers, 11 general hospitals, 3 medical depots, the Armed Forces Institute of Pathology, the Army Medical Library, and medical schools and laboratories, all in the zone of interior. It has professional supervision over general and station hospitals overseas, station hospitals in the zone of interior, overseas medical depots, medical sections of general depots, and medical units with troops. Current statistics are collected and analyzed on health and medical activities in the Army world wide. Medical research and development work and the training of Medical Department military personnel are planned and supervised.

PROGRAM AND PERFORMANCE

This appropriation provides for miscellaneous expenses of departmental activities at the seat of government and for printing and reproduction for the Department of the Army at the seat of government.

1. *Miscellaneous expenses at the seat of government.*—This item includes office supplies, furniture, typewriters, equipment, communication services, repair and rental of equipment, and miscellaneous repairs and services as required at the seat of government by the Department of the Army.

2. *Printing and reproduction.*—Printing and reproduction of items for departmental use and for Army-wide distribution are included under this head. Work for more limited distribution in the field is accomplished with funds made available for field printing and reproduction under other appropriations.

Total obligations.....	7,553,072	4,500,000	6,564,000

PROGRAM AND PERFORMANCE

This appropriation covers the procurement of headstones, the construction, operation, and maintenance of national cemeteries in the United States and its possessions, and upkeep of one park, soldiers' lots, Confederate cemeteries, and certain monuments.

1. *Procurement of headstones.*—This covers procurement of 95,000 headstones in 1951 as compared to 87,000 in 1950 and 134,000 in 1949. The average price of \$15.63 in 1951 is \$3.09 less than was estimated for 1950. Included in the number required is an estimated carry-over of 23,800 for which funds are not available in 1950.

2. *Construction at national cemeteries, including acquisition of land.*—Expansion of six existing national cemeteries, due to need for additional burial space, and the erection of memorials in Hawaii, Puerto Rico, and Alaska to those dead of World War II whose bodies have not been re-

covered or identified, cause an increase in the 1951 estimate.

3. *Utility service and maintenance and repair of buildings and grounds.*—This activity is lower in 1951 due to a reduction in nonrecurring expenses for repair of buildings and grounds.

4. *Operating expenses of national cemeteries, including interments.*—The increase in 1951 over 1950 is due to additional personnel, supplies, and equipment required for the new cemetery at Portland, Oreg., and for expansion of existing cemeteries.

APPROPRIATION TEXT

Cemeterial expenses: For maintaining and improving national cemeteries, including personal services and fuel for superintendents; purchase of grave sites; maintenance of the Arlington Memorial Amphitheater, chapel, and grounds in the Arlington National Cemetery, and that portion of Congressional Cemetery to which the United States has title and the graves of those buried therein, including Confederate graves, and the burial site of Pushmataha, a Choctaw Indian chief; repair to roadways but not to more than a single approach road to any national cemetery; for headstones or markers for unmarked graves of [soldiers, sailors, and marines] members of the armed forces under the Act of July 1, 1948 ([Public Law 871] 24 U. S. C. 279a, b), and civilians interred in post cemeteries; for maintenance of monuments, tablets, roads, fences, and so forth, made and constructed by the United States in Cuba and China to mark the places where American soldiers fell; maintenance of the Confederate Mound in Oakwood Cemetery at Chicago, the Confederate Stockade Cemetery at Johnstons Island, the Confederate burial plats owned by the United States in Confederate Cemetery at North Alton, the Confederate Cemetery, Camp Chase, at Columbus, the Confederate Cemetery at Point Lookout, and the Confederate Cemetery at Rock Island; and for maintenance of graves used by the Army for burials in commercial cemeteries; [\$4,500,000] \$6,564,000: *Provided*, That no railroad shall be per-

mitted upon any right-of-way which may have been acquired by the United States leading to a national cemetery, or to encroach upon any roads or walks constructed thereon and maintained by the United States: *Provided further*, That no part of this appropriation shall be used for repairing any roadway not owned by the United States within the corporate limits of any city, town, or village. (5 U. S. C. 78; 24 U. S. C. 271, 273, 274-276, 278, 283, 288, 290; Civil Functions Appropriation Act, 1950.)

Appropriated 1950, \$4,500,000

PROGRAM AND PERFORMANCE

This program includes the recovery, identification, and final disposition of the remains of those members of the armed services who died abroad during World War II. Of the total fatalities numbering 358,967, it is estimated that at the completion of the program, 279,000 remains will be recovered and 79,967 declared nonrecoverable.

As of September 1949, 278,968 remains have been recovered and final disposition has been completed on 257,207. Of this total, 95,533 will remain overseas and 161,674 have been returned to the United States. 14,800 additional remains will be interred overseas and 7,000 additional remains will be returned to the United States.

Four overseas cemeteries formerly maintained under this appropriation have been turned over to the American Battle Monuments Commission and it is estimated that the remaining 10 will be transferred prior to June 30, 1950.

It is expected that this program will be completed early in 1952.

Entombment of an Unknown American Serviceman of World War II—

FUNDS AVAILABLE FOR OBLIGATION: Appropriation or estimate—1951, \$1,000,000.

PROGRAM AND PERFORMANCE

The act of June 24, 1946, authorized the return of an unknown American who lost his life while serving overseas in the armed forces of the United States during the Second World War and the burial of the Unknown in a tomb in the Arlington Memorial Amphitheater area.

Preliminary plans for the tomb and alterations to the Amphitheater have been approved by the Fine Arts Commission and the Arlington Memorial Amphitheater Commission.

This appropriation covers expenses incident to the selection of the Unknown, ceremonies attending the selection in various areas, and the final selection and entombment in the United States, and the necessary construction and alteration in the Amphitheater in Arlington National Cemetery.

PROGRAM AND PERFORMANCE

The Alaska Communication System has the mission of providing telegraph and telephone service to and from the Territory of Alaska and between the cities and communities within Alaska. For 1949, the dollar value of military and commercial traffic handled was \$5,702,823; for 1950, the estimated value is \$6,058,750. In 1951, it is anticipated that the dollar value of traffic will reach \$6,333,750. The increase in work load requires the addition of 10 civilian employees in 1951.

1. *Construction of telephone, telegraph, and cable systems.*—This provides for the construction of telephone, telegraph, and cable systems, including procurement of the related equipment. The 1951 program is lower than the 1950 program and will complete the procurement and moving of equipment into buildings erected with 1949 military construction funds.

2. *Construction of radio systems.*—This provides for the construction of radio systems including procurement of the related equipment. The 1951 program will complete the procurement and moving of equipment into five new buildings constructed with 1949 military construction funds.

3. *Maintenance of the communication system.*—This covers the maintenance, repair, and minor rehabilitation of technical facilities of the System including telephone, telegraph, cable, and radio systems. The maintenance program is based on the 1950 level with the addition of 10 civilian employees and provision for increased spare-parts requirements.

4. *Maintenance of buildings and appurtenances.*—This provides for the maintenance, repair, and alteration of buildings, grounds, roads, walks, fences, and utilities on approximately the same level as 1950.

5. *Operation of the System.*—This finances the expenses incident to the operation of the Alaska Communication System exclusive of military pay, allowances, subsistence, and medical care. The program for operation of the System calls for a 10-percent increase of fuel oil for heating and power in new buildings and the initiation of a 10-year program of replacement of worn-out equipment.

PROGRAM AND PERFORMANCE

This appropriation provides for design, supervision, and construction of housing for personnel and of buildings for operation of the Alaska Communication System. The program envisages accomplishment of the second year's increment of a construction plan. The first year of the program, which will be completed in 1951, was financed in the 1949 appropriation for "Military construction, Army."

OBLIGATIONS BY ACTIVITIES

Construction of buildings, quarters, and utilities—1949, \$1,371,265; 1950, \$788,283; 1951, \$3,000,000.

OBLIGATIONS BY OBJECTS

10 Lands and structures—1949, \$1,371,265; 1950, \$788,283; 1951, \$3,000,000.

APPROPRIATION TEXT

CONSTRUCTION

For construction, installation, and equipment of temporary or permanent public works, including buildings, facilities, appurtenances and utilities, at stations of the Alaska Communication System,

as authorized by Act of October 27, 1949 (Public Law 414), without regard to sections 1136 and 3734, Revised Statutes, as amended, including hire of passenger motor vehicles; payment of claims as authorized by law (28 U. S. C. 2672); \$3,000,000, to remain available until expended: Provided, That this appropriation shall not be available for construction of family quarters at (1) a cost per family unit in excess of \$23,000 for construction, including kitchen range, refrigerator, telephone, architectural and engineering services, and all contingencies; nor at (2) a cost per family unit in excess of \$5,000, for site development and outside utilities, including architectural and engineering services therefor and all contingencies.

Estimate 1951, **\$3,000,000**

* Estimate is for activities previously carried under "Military construction, Army." The amounts obligated in 1949 and 1950 are shown in the schedule as comparative transfers.

Total, Signal Corps, Alaska Communication System, definite appropriations:

Appropriated 1950, **\$3,000,000** Estimate 1951, **\$6,100,000**

CORPS OF ENGINEERS

INTRODUCTORY STATEMENT

The Corps of Engineers, under the supervision of the Secretary of the Army, is responsible for maintenance and improvement of the rivers and harbors of the Nation in the interest of navigation, control of floods, related hydroelectric power development, and allied water uses. The Corps is also responsible for the protection and preservation of the navigable waters.

APPROPRIATION TEXT

RIVERS AND HARBORS AND FLOOD CONTROL

To be immediately available and to: The following appropriations for rivers and harbors and flood control shall be expended under the direction of the Secretary of the Army and the supervision of the Chief of Engineers, and **to:** shall remain available until expended: *Provided*, That the services of such additional technical and clerical personnel as the Secretary of the Army may deem necessary may be employed only in the Office of the Chief of Engineers, to carry into effect the various appropriations for rivers and harbors and flood control, surveys, and preparation for and the consideration of river and harbor and flood-control estimates and bills, to be paid from such appropriations: *Provided further*, That the expenditures on this account for the current fiscal year shall not exceed **\$1,450,000**, and the Secretary of the Army shall each year, in the Budget, report to Congress the number of persons so employed, their duties, and the amount paid to each **\$1,600,000**: *Provided further*, That the various appropriations for rivers and harbors and flood control may be used for the purchase **to** (for replacement only) in the current fiscal year of five hundred passenger motor vehicles (of which four hundred and fifty-three shall be for replacement only) and **ten** motorboats (to be acquired from surplus stock where practicable) and the purchase (not to exceed five, to be acquired from surplus stocks where practicable), maintenance, repair, and operation of aircraft.

¹ All uncompleted projects for which construction funds have been appropriated.

In the calendar year 1948, commerce on this system established a record of 794 million tons, an increase of 34 million tons above the previous 1947 record. The requested appropriation for construction in 1951 provides (1) \$149.5 million for the continuation of 56 projects which will require an additional \$1,403 million for their completion, and (2) \$1.3 million for the completion of 4 projects costing \$9.9 million. The following table indicates the construction funds appropriated for each year and the completion status for several of the larger projects:

Project	1949		1950		1951

The current program for hopper dredge replacement is now nearing completion. Four dredges, each of 3,000 cubic-yards capacity, were completed in 1947, and a fifth dredge of 8,000 cubic-yards capacity, for use in the New York Harbor area, is scheduled for delivery in December 1949, which completes the program.

2. *Planning.*—Design studies and contract plans and specifications are prepared to establish project features and cost estimates and to place the projects in readiness for construction.

Advance planning has been essentially completed on 105 projects estimated to cost \$644 million. During 1951 advance planning activities will proceed on 13 projects having a total estimated cost of \$554 million.

CURRENT EXPENSES

1. *Operation and maintenance of projects.*—The Corps of Engineers is responsible for the maintenance and preservation of navigable waters. A general curtailment in maintenance activities during the war years and an increased use of the Nation's waterways since the war, together with the use of deeper draft vessels, have resulted in greater wear and tear on lock and guide walls and emphasized the need for maintaining the project dimensions of the Nation's waterways.

The estimate for 1951 is intended to take care of normal maintenance, which consists of dredging channels to meet the needs of navigation, and of the operation and care of locks and dams, and also to reduce the backlog of maintenance, deferred during the war years, on these Government-owned structures. The estimate provides \$53 million for operation and maintenance of 400 channels and harbors, \$23.5 million for the operation and care of 488 locks and dams, and \$1.5 million for the operation and care of the Fort Peck and Bonneville multiple-purpose dam and reservoir projects.

2. *Operation and maintenance, special.*—After abandonment by the owner, the Corps of Engineers is responsible for the marking and removal of wrecks, sunken vessels, and other obstructions which are a menace to safe navigation. The facilities of the United States Coast Guard are usually utilized for the marking of such obstructions to navigation and the Coast Guard is reimbursed by the Corps of Engineers for the expense therefor. The 1951 program is based on past experience in the removal of the most serious obstructions to navigation and, in addition, the removal of existing wrecks in navigable waters which accumulated during the war years and are a menace to navigation.

The Chief of Engineers is authorized to allot not to exceed \$300,000 of funds available annually for the protection, clearing, and straightening of channels of navigable waters and their tributaries when, in his opinion, such work is advantageous to navigation and flood control. In 1951 the entire sum is estimated to be required.

3. *Examinations and surveys.*—Preliminary examinations and surveys, as authorized by acts of Congress,

or reviews thereof, as authorized by resolutions of appropriate congressional committees, are made for the purpose of determining the necessity of proposed improvements in regard to the economic needs for navigation and related water uses. The examinations are made to determine whether a detailed study is justified. If the examination report is favorable, detailed survey reports are made to determine: (1) The plan for improvement which is most feasible from the standpoint of utility and regional planning, (2) the estimated cost and the benefits to be derived from the project, and (3) the local cooperation which will be required. Examination and survey reports are developed in cooperation with other interested Federal agencies and the affected States.

The Beach Erosion Board is responsible for conducting in cooperation with States and local agencies investigations of specific beach-erosion and shore-protection problems; preparation of reports based on such studies, together with plans of remedial work and recommendations as to the extent of Federal participation; and conducting general investigations to determine means for shore-erosion prevention and the restoration and development of beaches. The estimate for 1951 includes \$200,000 for 42 cooperative studies and \$280,000 for 8 general investigations and for the construction of a cover for a model basin at Washington, D. C.

The survey of the northern and northwestern lakes constitutes the charting of the Great Lakes and their connecting channels having a total water surface area of 95,000 square miles and a shore line of more than 8,300 miles. This program serves the dual purpose of furnishing charts to lake navigators and of determining necessary improvements. The estimate for 1951 is predicated generally on the continuation of work on approximately the same scale as is being accomplished during fiscal year 1950 with a slight increase in the amount for revisory surveys.

SUMMARY OF EXAMINATION AND SURVEY ACTIVITIES

	1949 actual	1950 estimate	1951 estimate
River and harbor investigations:			
Completed (reports prepared).....	128	130	165

Initiated.....	8	13	24
General:			
Completed (reports prepared).....	0	6	0
Continued.....	6	5	6
Initiated.....	5	1	2

4. *Regulation.*—Permits for hydraulic mining operations and investigations of mines operating under existing permits will be carried on by the California Debris Commission.

In order to prevent illegal deposits in New York Harbor, the Corps specifies disposal areas, maintains patrols, and issues notices of the laws and regulations pertaining to the harbor. Approximately 3,600 permits for the disposal of 33.4 million cubic yards of dredged material and refuse are issued annually.

In addition, miscellaneous inspections and investigations are made, permits are issued, and harbor lines are established to protect and preserve navigable waters. The estimate also includes \$500,000 for the collection of commercial statistics on navigation.

5. *Administration.*—This provision is for services of such technical and clerical personnel in the Office, Chief of Engineers, as are necessary for the execution of the various appropriations for rivers and harbors, including

direction of the preparation of examination and survey reports and supervision of the design, construction, and maintenance and operation of authorized projects. The work also includes the analysis and preparation of comments by the Department of the Army on pertinent legislation referred to the Secretary of the Army.

The River and Harbor Board reviews all reports on authorized examinations and surveys of river and harbor and flood control projects prior to completion of the report of the Chief of Engineers; it also compiles statistical data received from the field offices on water-borne commerce. The estimate for 1951 includes \$50,000 for compilation of data on commercial statistics and \$40,000 for printing of the port series reports and survey documents.

The Beach Erosion Board reviews all preliminary examination and survey reports on beach erosion control and shore protection projects and supervises technical investigations and studies for determining the most suitable methods for protection, restoration, and development of beaches.

APPROPRIATION TEXT

RIVERS AND HARBORS

Maintenance and improvement of existing river and harbor works; for the preservation and maintenance of existing river and harbor works, and for the prosecution of such projects heretofore authorized as may be most desirable in the interests of commerce and navigation; for surveys of northern and northwestern lakes and other boundary and connecting waters as heretofore authorized, including the preparation, correction, printing, and issuing of charts and bulletins, and the investigation of lake levels; for prevention of obstructive and injurious deposits within the harbor and adjacent waters of New York City; for expenses of the California Débris Commission in carrying on the work authorized by the Act approved March 1, 1893, as amended (33 U. S. C. 661, 678, and 683); for removing sunken vessels or craft obstructing or endangering navigation as authorized by law; for operating and maintaining, keeping in repair, and continuing in use without interruption any lock, canal (except the Panama Canal), canalized river, or other public works for the use and benefit of navigation belonging to the United States; for payment annually of tuition fees of not to exceed [one hundred] seventy-six student officers of the Corps of Engineers at civil technical institutions under the provisions of section 127a of the National Defense Act, as amended (10 U. S. C. 535); for examinations, surveys, and contingencies of rivers and harbors; for the execution of detailed investigations and the preparation of plans and specifications for projects heretofore or hereafter authorized; for examination of estimates of appropriations in the field; for printing and binding and office supplies and equipment required in the Office of

the Chief of Engineers to carry out the purposes of this appropriation, including such printing, either during a recess or session of Congress, of surveys authorized by law, and such surveys as may be printed during a recess of Congress shall be printed, with illustrations, as documents of the next succeeding session of Congress; \$240,714,000: *Provided*, That no part of this appropriation shall be expended for any preliminary examination, survey, project, or estimate not authorized by law; \$197,489,690, of which sum the amount of \$34,270 shall be expended for a small boat harbor at Hastings, Minnesota: *Provided further*, That of the amount herein appropriated, \$478,520 shall be for repayments of advances made under the provisions of section 11, Act of March 3, 1925 (Public Law 585, Sixty-eighth Congress, 43 Stat. 1197); *Provided further*, That from this appropriation the Secretary of the Army may, in his discretion and on the recommendation of the Chief of Engineers based on the recommendation by the Board of Rivers and Harbors in the review of a report or reports authorized by law, expend such sums as may be necessary for the maintenance of harbor channels provided by a State, municipality, or other public agency, outside of harbor lines and serving essential needs of general commerce and navigation, such work to be subject to the conditions recommended by the Chief of Engineers in his report or reports thereon: *Provided further*, That not to exceed \$5,000 of the amount herein appropriated shall be available for the support and maintenance of the Permanent International Commission of the Congresses of Navigation and for the payment of the expenses of the properly accredited delegates of the United States to the meeting of the Congresses and of the Commission: *Provided further*, That from this appropriation not to exceed [\$1,200,000] \$3,020,000 shall be available for transfer to the Secretary of the Interior for expenditure for the purposes of and in accordance with the provisions of the Act of August 8, 1946 [(60 Stat. 932)] (16 U. S. C. 756), and the Act of August 14, 1946 [(60 Stat. 1080)]: *Provided further*, That the maintenance funds appropriated herein under this heading may be used for realignment of the authorized channel of the Hudson River in the vicinity of Kingston, New York, at an estimated cost of \$400,000: *Provided further*, That all land owned by the United States described as parcels 10, 16, 17, and 36 on the War Assets Administration tract map of Marinship yard containing approximately 60 acres, together with the buildings, improvements, and facilities thereon, which comprise part of the Marinship facilities, Marin County, California, and now under the control and jurisdiction of the War Assets Administration, is hereby transferred, without reimbursement of funds, to the jurisdiction of the Department of the Army for use by the Corps of Engineers of that Department. (16 U. S. C. 661-666). (10 U. S. C. 535; 33 U. S. C. 1, 5, 414-415, 441, 451, 540, 541; Civil Functions Appropriation Act, 1950.)

Balance available in subsequent year	-3,129,979		
Total obligations	1,212,000	3,130,079	1,000,000

PROGRAM AND PERFORMANCE

This appropriation provides for the alteration of railroad bridges found to be unreasonable obstructions to navigation. The work is performed by the bridge owner who is required to contribute a portion of the cost proportionate to benefits derived by him (such as for increased carrying capacity) while the United States bears the portion attributable to the necessities of navigation. In 1951, it is expected that the alteration of Norfolk & Portsmouth Belt Line Railroad Co. bridge over Elizabeth River at Norfolk, Va., will be initiated.

¹ All uncompleted projects for which construction funds have been appropriated.

The requested appropriation for construction in 1951 provides \$440.8 million for the continuation of 91 projects whose total estimated cost is \$2,806.3 million and will require future appropriations of \$1,300.5 million for their completion; \$17.1 million for completion of 31 projects whose total estimated cost is \$130 million; and \$3 million for other construction activities authorized by law. The following table indicates the construction funds appropriated for each year and the completion status for several of the larger projects:

Project	1949		1950		1951	
	Funds allotted	Per cent completed	Funds allotted	Per cent completed	Funds requested	Per cent completed
Bull Shoals Reservoir, Ark.	\$14,000,000	38	\$12,777,500	55	\$18,000,000	79

CORPS OF ENGINEERS—Continued

Flood Control, General—Continued

2. *Planning.*—Design studies and contract plans and specifications are prepared to establish project features and cost estimates and to place the project in readiness for construction.

Advance planning has been essentially completed on 46 projects estimated to cost \$310 million. During 1951 advance planning activities will proceed on 68 projects having a total estimated cost of \$1,081 million.

CURRENT EXPENSES

1. *Operation and maintenance.*—Maintenance on flood control and multiple-purpose projects is generally limited to dams and reservoirs except for certain levee and channel improvements constructed under section 2 of the 1938 Flood Control Act where maintenance is a Federal responsibility. The completion of reservoirs increases the annual maintenance requirements for the national flood-control program. In the budget year seven flood-control reservoirs, two multiple-purpose reservoirs, and seven local flood-protection projects are included for the first time. The estimate for 1951 provides \$2.4 million for the operation and maintenance of 58 flood-control reservoirs, \$1.4 million for the operation and maintenance of eight multiple-purpose reservoirs, and \$0.7 million for the maintenance of 34 local protection projects.

2. *Preliminary examinations, surveys, and miscellaneous study programs.*—Preliminary examinations and surveys, as authorized by acts of Congress, or reviews thereof, as authorized by resolutions of appropriate congressional committees, are made for the purpose of determining the necessity of proposed improvements in regard to the economic needs for flood control and related water uses. The examinations are made to determine whether a detailed study is justified. If the examination is favorable, detailed survey reports are made to determine (1) the plan for improvement which is most feasible from the standpoint of utility and regional planning, (2) the estimated cost and the benefits to be derived from the projects, and (3) the local cooperation which will be required. Examination and survey reports are developed in cooperation with other interested Federal agencies and the affected States.

SUMMARY OF EXAMINATION AND SURVEY ACTIVITIES

	1949 actual	1950 estimate	1951 estimate
Investigation:			
Completed (reports prepared).....	32	64	95
Continued.....	678	679	679
Initiated.....	65	95	68

3. *Emergency repairs.*—The work consists of the repair, restoration, and general strengthening of levees and other flood-control works threatened or destroyed by flood.

4. *Administration.*—This provision is for services of such technical and clerical personnel in the Office, Chief of Engineers, as are necessary for the execution of the various appropriations for flood control, including direction of the preparation of preliminary examination and survey reports, and supervision of the design, construction, and maintenance and operation of authorized projects. The work also includes the analysis and preparation of comments by the Department of the Army on pertinent legislation referred to the Secretary of the Army.

APPROPRIATION TEXT

FLOOD CONTROL

Flood control, general: For the construction and maintenance of certain public works on rivers and harbors for flood control, and for other purposes, in accordance with the provisions of the Flood Control Act, approved June 22, 1936, as amended and supplemented, including printing and binding, and office supplies and equipment required in the Office of the Chief of Engineers to carry out the purposes of this appropriation, and for preliminary examinations, surveys, and contingencies in connection with the flood control, **[\$366,330,400: Provided, That of the amount herein appropriated, \$650,000 shall be for repayments of advances made under the provisions of the Act of October 15, 1940 (Public Law 857, Seventy-sixth Congress)] \$478,447,000: Provided [further], That funds appropriated herein may be used for flood-control work on the Salmon River, Alaska, as authorized by law: Provided further, That funds appropriated herein may be used to execute detailed surveys, and prepare plans and specifications, necessary for the construction of flood-control projects heretofore or hereafter authorized or for flood-control projects considered for selection in accordance with the provisions of section 4 of the Flood Control Act approved June 28, 1938, and section 3 of the Flood Control Act approved August 18, 1941 (55 Stat. 638): Provided further, That the expenditure of funds for completing the necessary surveys shall not be construed as a commitment of the Government to the construction of any project [: Provided further, That of the amount herein appropriated \$500,000 shall be used for the Red Run (Clinton River) Michigan project: Provided further, That funds allocated to the Garrison Reservoir project may be expended for acquisition of any property within the incorporated village of Van Hook, and the adjacent area known as Legion Park, North Dakota.]**

For the completion of interior drainage facilities at Mandan, North Dakota, as a part of the local flood protection project authorized by the Flood Control Act of 1946 (Public Law 526, Seventy-ninth Congress, second session), fiscal year 1950, \$76,000, to remain available until expended.] (33 U. S. C. 701-701n, 705; Civil Functions Appropriation Act, 1950; Third Deficiency Appropriation Act, 1949.)

PROGRAM AND PERFORMANCE

This appropriation provides for the repair, restoration, and strengthening of flood-control structures threatened or destroyed by floods. Local interests are required to maintain and operate the completed works and provide all necessary lands, easements, and rights-of-way without cost to the United States. A supplemental of \$5,000,000, for 1950, has been included in the budget to cover an anticipated shortage of funds prior to the end of that year.

PROGRAM AND PERFORMANCE

MAJOR CAPITAL OUTLAY

Construction.—This project provides for protection from floods of the Lower Mississippi Valley from Cape Girardeau, Mo., to the Gulf of Mexico. The Mississippi River Basin drains approximately 41 percent of the area of the United States. This project includes the main alluvial stream, the basins of the St. Francis, Yazoo, Tensas, Atchafalaya Rivers and Bayou LaFourche and the alluvial lands around Lake Pontchartrain. The adopted plan calls for raising about 1,600 miles of existing levees along the

CORPS OF ENGINEERS—Continued

Flood Control, Mississippi River and Tributaries—Continued

main river and strengthening them, for enlarging or constructing some 1,700 miles of levees on tributaries and in side basins, for three floodways and one large spillway, for extensive channel improvements and bank stabilization on the main river, for dredging of the main river to provide a navigation channel 12 feet deep and 300 feet wide from Baton Rouge, La., to Cairo, Ill., and for five flood-detention reservoirs on minor tributaries.

The total authorization for flood control and improvement of the lower Mississippi River in its alluvial valley is \$1,038 million, of which \$627 million had been appropriated up to June 30, 1949.

The main river levees are about 70 percent complete and the main river-bank stabilization is nearly 50 percent complete. Progress on the side basins and on minor tributaries varies from work not yet started to 60 to 70 percent completion of units that have been under way for several years. With the expenditure of funds requested the main river levees will be 76 percent complete and main river-bank stabilization will be 54 percent complete. These funds will also permit progress in the side basins and minor tributaries sufficient to materially advance certain features that have been underway for some years.

CURRENT EXPENSES

1. *Maintenance.*—The estimate for 1951 is intended to take care of normal maintenance of work already in place on the main river and in the side basins and tributaries.

2. *Administration.*—This item covers services of such technical and clerical personnel in the Office, Chief of Engineers, as are necessary for the execution of this project, including planning, construction, and maintenance features.

PROGRAM AND PERFORMANCE

This flood-control project is designed to provide protection to approximately 800,000 acres of land in the highly developed Sacramento River valley, including the cities of Sacramento and Marysville and other communities. The project includes reconstruction of old levees, construction of new levees, and related works, channel improvement, and bank protection measures.

Work accomplished includes 70 million cubic yards of material placed in levees, five weirs constructed, and channel improvements. A total of \$39,795,000 has been appropriated for this work. The appropriation requested for 1951 will enable completion of all remaining work authorized prior to the Flood Control Act of 1944.

PROGRAM AND PERFORMANCE

Under the Philippine Rehabilitation Act, \$17,880,000 was appropriated for rehabilitation of port and harbor facilities in the Philippines. During the fiscal year 1949, Davao Wharf and two items of paving in Manila Harbor were completed. Construction at the Ports of Davao, Cebu, Iloilo, Pulupandan, Cagayan, Iligan, Jolo, Zamboanga, Tobacco, Masbate, and Nasugbu will be completed in 1950. Work at the Port of Manila will be continued during 1951 using 1950 balances.

PROGRAM AND PERFORMANCE

Fifty percent of the proceeds from certain licenses issued by the Federal Power Commission for constructing, operating, and maintaining dams, conduits, reservoirs, etc., are appropriated for maintenance and operation of Federal dams and other navigation structures and for improvement of navigable waters. Moneys derived from such appropriations each year are available until expended and will be used during the budget year to supplement funds available under the title "Maintenance and improvement of existing river and harbor work" (16 U. S. C. 810; 31 U. S. C. 725c).

OBLIGATIONS BY ACTIVITIES

Maintenance and operation of dams and other improvements of navigable waters—1949, \$305,573; 1950, \$152,665; 1951, \$150,000.

PROGRAM AND PERFORMANCE

In the Flood Control Act, June 28, 1938, as amended, 75 percent of the moneys received from lease of Federal lands acquired in connection with flood-control reservoirs is appropriated for the benefit of the public schools and roads of the county or counties in which such property is located. Payments are made to the States involved during the fiscal year following that in which the funds were received.

OBLIGATIONS BY ACTIVITIES

Payments to States from leases of land in flood-control reservoir areas—1949, \$236,802; 1950, \$418,601; 1951, \$400,000.

OBLIGATIONS BY OBJECTS

UNITED STATES SOLDIERS' HOME

Permanent indefinite appropriation:

Payment of Interest on Soldiers' Home Permanent Fund—

FUNDS AVAILABLE FOR OBLIGATION: Appropriation or estimate—1949, \$885,370; 1950, \$1,160,000; 1951, \$1,500,000.

PROGRAM AND PERFORMANCE

The act of March 3, 1883, as amended, appropriates, out of any money not otherwise appropriated, an amount representing interest at the rate of 3 percent per year on the balance of the Soldiers' Home permanent fund held in trust by the Treasury. Payments of the amounts so appropriated are made quarterly to the Soldiers' Home permanent fund (24 U. S. C. 46, 46 (a); 31 U. S. C. 725s).

OBLIGATIONS BY ACTIVITIES

Payment of interest—1949, \$885,370; 1950, \$1,160,000; 1951, \$1,500,000.

Balance carried forward.....	35,248,590	46,236,559	53,194,069

PROGRAM AND PERFORMANCE

The Soldiers' Home permanent fund consists of trust account receipts from court-martial fines, forfeitures by desertion, effects of deserters and of escaped military prisoners, withheld pay of the Army, bequests, effects of persons dying while subject to military law, collections from retired soldiers, escheatments, miscellaneous sales, interest on Soldiers' Home permanent fund, and transfers made from trust fund appropriation account "Estates of deceased soldiers, Regular Army." The receipts and the balance are available for obligation and expenditure only when appropriated by annual acts of Congress (24 U. S. C. 44, 45; 31 U. S. C. 725s).

Total obligations.....	2,643,614	2,448,000	2,395,000

PROGRAM AND PERFORMANCE

The United States Soldiers' Home was established to provide a home and other authorized benefits for the relief and support of certain old, invalid, or disabled soldiers of the Regular Army of the United States. Funds for maintenance and operation of the Home are appropriated from the Soldiers' Home permanent fund and not from the general fund of the Treasury.

1. *Hospital activities.*—As a part of the Home, there is maintained a hospital which will care for a daily average of 332 patients during 1951. In addition, 60 patients will receive specialized care in other Government hospitals.

2. *Domiciliary activities.*—Approximately 1,100 members of the Home will be cared for in domiciliary barracks. This represents operation at virtually 100 percent of the present capacity of the Home.

3. *Farm activities.*—A dairy and chicken farm is operated which produces a large part of the milk, cream, butter, and eggs consumed at the Home.

4. *Administration.*—Responsibility for administration of the Home is vested in a Board of Commissioners composed of the following officers of the Army, ex officio: The Adjutant General, the Judge Advocate General, the Quartermaster General, the Surgeon General, the Chief of Engineers, the Chief of Finance, and the Governor of the Home, the latter selected by the President of the United States.

5. *Permanent improvements.*—No appropriation for permanent improvements is included in the 1951 budget document, pending completion of negotiations affecting various phases of the Soldiers' Home operations including construction of a hospital on the Soldiers' Home site for the joint use of the Soldiers' Home and the Veterans Administration.

PROGRAM AND PERFORMANCE

The Department of the Army is responsible for the attainment of United States objectives in connection with occupied areas. These objectives include the prevention of disease and unrest among the civilian populations, as required by the terms of the Hague Convention and the rules of land warfare, and the promotion of economic recovery leading to eventual self-support of the occupied areas.

The 1949 program provided requirements for Germany, Japan, the Ryukyus, Austria, and Korea. Responsibility for administration of the program in Korea was transferred to the Economic Cooperation Administration January 1, 1949.

The 1950 program provided for Japan, the Ryukyus, Austria, and Germany. Responsibility for administration of the program in Germany was transferred on October 16, 1949, to the Department of State and the Economic Cooperation Administration.

The estimated requirement of \$320,000,000 in 1951 for the remaining areas of responsibility are shown as an anticipated supplemental under "Civil functions, Department of Defense." Details will be submitted at a later date.

1. *Economic aid.*—This covers requirements of all goods and services which must be furnished to meet basic relief needs and to maintain the momentum of economic recovery. The progressive reductions in the amount and cost of economic aid furnished reflect the increasing ability of these areas to support themselves from their own resources.

(a) *Grain, food, and kindred products.*—This covers requirements for the purchase of basic foodstuffs for the civilian populations to supplement those foods which are produced domestically or which cannot be secured from the proceeds of exports. These areas have been traditionally large importers of foods and can provide for minimum needs only through the expansion of exports.

(b) *Fertilizer materials and seeds.*—These are needed to maximize domestic production of foods. Fertilizers and seeds furnished in prior years have already greatly increased the level of domestic food production; in addition, the rehabilitation of the nitrogenous fertilizer industry in Japan has made it possible to increase substantially the domestic supply of this basic plant food. It is expected that Japan will be independent of nitrogenous fertilizer imports by the end of 1951, although large quantities of potash and phosphate rock will still be imported.

[GOVERNMENT AND RELIEF IN OCCUPIED AREAS]—Continued

Government and Relief in Occupied Areas, Department of the Army—Continued

(c) *Petroleum and petroleum products.*—Domestic resources furnish only a small portion of the total petroleum products needed. Substantial imports are therefore required for the use of the civil population, for the operation of essential utilities, for fishing fleets, and for certain industrial plants. Progressively it will be possible to reduce substantially the cost of the import program financed under this activity, as a result of the rehabilitation of domestic refining capacity and by financing imports from proceeds of export sales.

(d) *Raw and semifinished industrial materials.*—Industrial recovery requires that the most important resources—skilled industrial labor force and a highly industrialized economy—be converted into export earnings for the purchase of basic foods and raw materials. A great variety of basic raw materials are therefore required, and this activity provides for only those materials which cannot be procured with proceeds of exports.

(e) *Industrial machinery, repair and replacement parts, supplies, and service equipment.*—This is a requirement in the Ryukyu Islands. The items included are machinery for the rehabilitation of small manufacturing industries, materials and equipment for the repair and replacement of fishing and water transportation craft, equipment for the restoration of power and communication facilities, and equipment for police, fire, public health, and other governmental activities which are being established under the sponsorship of Military Government.

(f) *Transportation of commodities.*—This activity provides for the transportation of supplies as enumerated above. Current plans call for a partial restoration of a Japanese merchant marine, particularly of those vessels of a size and speed required for ocean transportation. It is expected that an increasing proportion of the cargoes purchased with the proceeds of Japanese exports and some of the cargoes financed under this appropriation will be carried in Japanese vessels in subsequent years.

2. *Administration and reorientation.*—This section includes requirements for the maintenance of Military Government in occupied areas including Austria and Trieste, and for the support in those areas, with the exception of Trieste, of reeducation and reorientation programs. Expenditures for these purposes have been progressively decreased reflecting the growing measure of responsibility assumed by the local civilian governments. This section also includes requirements for the education of dependent children of United States personnel, both civilian and military.

(a) *Administration.*—This includes pay of civilian employees at headquarters and in the field, travel, including temporary duty and permanent change of station, and incidental operating expenses.

(b) *Reorientation.*—This activity covers requirements of a program designed to eradicate in the ex-enemy countries all tendencies toward militarism and extreme nationalism and to instill in the populations an appreciation of the ideals and practices of democratic governments. It provides also for the interchange of persons program whereunder a small number of students and leaders from the occupied areas are brought to the United States to observe and study United States customs, ideals, and institutions.

(c) *Education of dependents.*—This activity provides for the pay of teachers and other expenses in connection with providing schooling for the dependents of United States personnel in the respective areas, both military and civilian.

APPROPRIATION TEXT

[For expenses, not otherwise provided for, necessary to meet the responsibilities and obligations of the United States in connection with the government or occupation of certain foreign areas, including personal services in the District of Columbia and elsewhere and, subject to such authorizations and limitations as may be prescribed by the head of the department or agency concerned, tuition, personal allowances (not to exceed \$10 per day), travel expenses (not to exceed those authorized for like United States military or civilian personnel), and fees incident to instruction in the United States or elsewhere of such persons as may be required to carry out the provisions of this appropriation; travel expenses and transportation; services as authorized by section 15 of the Act of August 2, 1946 (5 U. S. C. 55a), at rates not in excess of \$50 per diem for individuals; health service program as authorized by law (5 U. S. C. 150); payment of claims pursuant to law (28 U. S. C. 2672); translation rights, photographic work, educational exhibits, and dissemination of information, including preview and review expenses incident thereto; expenses incident to the operation of schools for American children; printing and binding; purchase and hire of passenger motor vehicles and aircraft; repair and maintenance of buildings,

utilities, facilities, and appurtenances; contingencies for the United States commanders, commissioners, or other administrators of foreign areas, to be expended in their respective discretions (not exceeding amounts authorized or approved by the head of the department or agency concerned); such minimum supplies for the civilian populations of such areas as may be essential to prevent starvation, disease, or unrest, prejudicial to the objectives sought to be accomplished; and such supplies, commodities, and equipment as may be essential to carry out the purposes of this appropriation; \$912,500,000, of which not to exceed \$42,500,000 shall be available for administrative expenses: *Provided*, That the general provisions of the appropriation Act for the fiscal year 1950 for the military functions of the Department of the Army shall apply to expenditures made by that Department from this appropriation: *Provided further*, That expenditures from this appropriation may be made outside continental United States, when necessary to carry out its purposes, without regard to sections 355, 1136, 3648, and 3734, Revised Statutes, as amended, civil service or classification laws, or provisions of law prohibiting payment of any person not a citizen of the United States: *Provided further*, That expenditures from this appropriation may be made, when necessary to carry out its purposes, without regard to section 3709, Revised Statutes, as amended, and the Armed Services Procurement Act of 1947 (Public Law 413, Eightieth Congress): *Provided further*, That expenditures may be made hereunder for the purposes of economic rehabilitation in the occupied areas in such manner as to be consistent with the general objectives of the Economic Cooperation Act of 1948, as amended: *Provided further*, That funds appropriated hereunder and unexpended at the time of the termination of occupation by the United States, of any area for which such funds are made available, may be expended by the President for the procurement of such commodities and technical services, and commodities procured from funds herein or heretofore appropriated for government and relief in occupied areas and not delivered to such an area prior to the time of the termination of occupation, may be utilized by the President, as may be necessary to assist in the maintenance of the political and economic stability of such areas: *Provided further*, That before any such assistance is made available, an agreement shall be entered into between the United States and the recognized government or authority with respect to such area containing such undertakings by such government or authority as the President may determine to be necessary in order to assure the efficient use of such assistance in furtherance of such purposes: *Provided further*, That such agreement shall, when applicable, include requirements and undertakings corresponding to the requirements and undertakings specified in sections 5, 6, and 7 of the Foreign Aid Act of 1947 (Public Law 389, approved December 17, 1947): *Provided further*, That funds appropriated hereunder may be used, insofar as practicable, and under such rules and regulations as may be prescribed by the head of the department or agency concerned, to pay ocean transportation charges from United States ports, including territorial ports, to ports in Japan and the Ryukyus for the movement of supplies donated to, or purchased by, United States voluntary nonprofit relief agencies registered with and recommended by the Advisory Committee on Voluntary Foreign Aid or of relief packages consigned to individuals residing in such countries: *Provided further*, That under the rules and regulations to be prescribed, the head of the department or agency concerned shall fix and pay a uniform rate per pound for the ocean transportation of all relief packages of food or other general classification of commodities shipped to Japan or the Ryukyus regardless of methods of shipment and higher rates charged by particular agencies of transportation, but this proviso shall not apply to shipments made by individuals to individuals: *Provided further*, That the President may transfer to any other department or agency any function or functions provided for under this appropriation, and there shall be transferred to any such department or agency such unobligated balances of this appropriation and, without reimbursement and without regard to the appropriation from which procured, such property as the Director of the Bureau of the Budget shall determine to relate primarily to any function or functions so transferred; and any funds so transferred may be expended either under the authority contained herein or under the authority governing the activities of the department or agency concerned: *Provided further*, That when the Department of the Army, under the authority of the Act of March 3, 1911, as amended (10 U. S. C. 1253), furnishes subsistence supplies to personnel of civilian agencies of the United States Government serving in Germany, payment therefor by such personnel shall be made without regard to the 10 per centum additional charge required by said Act, but payment for subsistence supplies by such personnel shall be at the same rate as is paid by civilian personnel of the Department of the Army serving in Germany. (Foreign Aid Appropriation Act, 1950.)

Annual definite appropriation:

Appropriated 1950, \$912,500,000

[SEC. 202. During the fiscal year ending June 30, 1950, the Department of the Army is authorized to operate the Morgantown Ordnance Works at Morgantown, West Virginia, the Ohio River Ordnance Works at West Henderson, Kentucky, and the San Jacinto Ordnance Works at San Jacinto, Texas, and to use the appropriation herein made for Government and Relief in Occupied Areas for the production of anhydrous ammonia for the manufacture of nitrogenous fertilizer materials or nitrogenous compounds for its use in the occupied countries and for sale for use in the Republic of South Korea. From the proceeds of materials sold there shall be credited to the appropriation for "Government and relief in occupied areas" an amount equivalent to the cost of production of such materials and any balance to miscellaneous receipts of the Treasury. Section 205 of Public Law 793, Eightieth Congress, and any other laws in conflict herewith are repealed effective June 30, 1949.] (Foreign Aid Appropriation Act, 1950.)

PROGRAM AND PERFORMANCE

This is a revolving fund authorized under Public Law 820, Eightieth Congress. It provides for the purchase of agricultural commodities and raw materials to be processed in occupied areas and sold. The Secretary of the Army is authorized to issue notes for purchase by the Secretary of the Treasury, not to exceed in the aggregate outstanding at any time \$150,000,000. Payments and repayments are treated as public debt transactions of the United States. Repayment to the fund of principal and interest, is required within 15 months.

The fund has been used for procurement of raw cotton for processing in Japan. No new credits will be extended by the Treasury in 1950 or in 1951 and all presently outstanding notes are expected to be repaid early in 1951.

OBLIGATIONS BY ACTIVITIES

Purchase of cotton—1949, \$29,000,000.

OBLIGATIONS BY OBJECTS

08 Supplies and materials—1949, \$29,000,000.

THE PANAMA CANAL

INTRODUCTORY STATEMENT

The Panama Canal maintains and operates the Canal and administers all civil affairs in the Panama Canal Zone.

The activities of the Canal are financed in part by three separate appropriations, namely, "Maintenance and operation," "Sanitation," and "Civil government," and in part by funds received for services rendered, and materials furnished. The latter funds do not include tolls and profits from business operations deposited directly into the Treasury as miscellaneous receipts. The toll charges amounted to \$20,635,016 in fiscal 1949 and are estimated at \$22,500,000 for each of the years 1950 and 1951.

APPROPRIATION TEXT

For every expenditure requisite for and incident to the maintenance, [and] operation, sanitation, and civil government of the Panama Canal and Canal Zone, and construction of additional facilities, including printing and binding; personal services in the District of Columbia []; purchase (not to exceed [twenty-four] thirty in the current fiscal year for replacement only), and hire of passenger motor vehicles; [claims for damages to vessels, cargo, crew, or passengers, as authorized by section 10 of title 2, Canal Zone Code, as amended (54 Stat. 387); claims for losses of or damages to property arising from the conduct of authorized business operations; claims for damages to property arising from the maintenance and operation, sanitation, and civil government of the Panama Canal, and construction of additional facilities;] payment of tort claims pursuant to [section 403 of the Federal Tort Claims Act] law (28 U. S. C. 2672); acquisition of land and land under water, as authorized in the Panama Canal Act; [expenses incurred in assembling, assorting, storing, repairing, and selling material, machinery, and equipment heretofore or hereafter purchased or acquired for the construction of the Panama Canal which are unserviceable or no longer needed, to be reimbursed from the proceeds of such sale;] expenses incident to conducting hearings and examining estimates for appropriations on the Isthmus; expenses of attendance (not to exceed \$10,000), when authorized by the Governor, at meetings of organizations concerned with activities pertaining to the Panama Canal; [expenses incident to any emergency arising because of calamity by flood, fire, pestilence, or like character not foreseen or otherwise provided for herein;] not to exceed \$2,000 for travel and subsistence expenses of [members of the police and fire forces] employees of the Panama Canal incident to their special training [in the United States; purchase, construction, repair, replacement, alteration, or enlargement of buildings, structures, equipment, and other improvements,] as authorized by law (63 Stat. 600); to be available until expended, as follows: (48 U. S. C. 1305; 53 Stat. 1409-1410; Civil Functions Appropriation Act, 1950.)

Maintenance and Operation, Panama Canal—

Total obligations.....	53, 772, 022	56, 165, 456	52, 446, 324

PROGRAM AND PERFORMANCE

This appropriation provides for the top management requirements of the Panama Canal, its ship-transit operations, certain general service and business-type operations carried on as adjuncts to Canal operations, and improvements and betterments for the entire Panama Canal.

1. *Management.*—The Governor's office and the offices of the engineer of maintenance and of the director of finance and budget officer carry out the functions of management and executive direction on the Isthmus for the Panama Canal and the Panama Railroad Company. After strengthening the staff in 1950 by the employment of additional specially qualified personnel, these offices will continue at that same level in 1951.

2. *Canal operation and maintenance.*—The actual operation of conducting ships through the Canal, operation of the locks, dredging of the Canal, and similar work are performed under this activity. An increase of approximately \$1 million in 1951 over 1950 is due to the quadrennial overhauling of the Atlantic locks.

The traffic of ships through the locks in fiscal year 1949 averaged 504 toll-paying and 107 toll-free vessels each month, and an average of 502 ships docked, shifted, or moored at the harbor terminals. A slight increase in traffic is anticipated in 1950 and 1951.

3. *Administrative and general services.*—Included in this activity is the office of the general counsel, the division of personnel administration, the department of finance, the office of general correspondence and records, and The Panama Canal offices in the United States.

Under general services are included such items as care of public buildings, grounds, highways, and sewers.

4. *Business operations.*—Certain operations of a business nature such as the operation of the electric power system, the water system, the mechanical division which operates a shipyard at each end of the Canal, wharves and piers require no appropriation as charges are made for services rendered. The net profit, covered into the Treasury as miscellaneous receipts, in 1949, amounted to \$1,582,458 and is estimated at \$845,370 in 1950 and \$949,391 in 1951. The total volume of business operations was \$37,370,389 in 1949 and is estimated at \$37,184,943 for 1950 and \$34,265,780 in 1951.

5. *Improvements and betterments (public works).*—In addition to all improvements and betterments of the entire Panama Canal, this activity also provides for such work as the continuation of the construction of improvements at Gorgas Hospital. It is proposed to submit a supplemental estimate of \$4,000,000 in 1951 to initiate an intensive housing program.

PROGRAM AND PERFORMANCE

Funds under this appropriation were authorized in 1939 for the construction of a third set of locks. Additional funds were authorized in 1945 for studies of the means of increasing the capacity and security of the Panama Canal which were completed in the fiscal year 1949. Sufficient funds were available in 1950 to maintain the engineering work, supervision, records, custody of plants and properties, and disposal of properties under the "Maintenance and operation" appropriation of the Panama Canal by reimbursement from this appropriation. In 1951 this work will be included under the "Maintenance and operation" appropriation.

PROGRAM AND PERFORMANCE

The erection in the Canal Zone of a suitable memorial to Maj. Gen. George W. Goethals was authorized by an act of Congress approved August 23, 1935. The expenditure authorization was \$160,000. Some funds were expended for plans, and at present there is a bill in Congress authorizing an additional \$140,000 in order to provide sufficient funds to carry out the purpose of erecting this memorial.

OBLIGATIONS BY ACTIVITIES

Construction of a memorial—1951, \$156,509.

OBLIGATIONS BY OBJECTS

10 Lands and structures—1951, \$156,509.

Repatriation of Unemployed Aliens, Panama Canal—

Prior year balance available	\$43,853	\$21,322	
Balance available in subsequent year	-21,322		
Total obligations	22,531	21,322	

PROGRAM AND PERFORMANCE

The repatriation of aliens was commenced in the fiscal year 1935 with an appropriation of \$150,000 for this purpose. At the close of fiscal year 1949 a total of \$128,678 had been expended, leaving a balance of \$21,322 from the original appropriation to be expended in the fiscal year 1950. Obligations for these repatriations amount to \$22,531 in the fiscal year 1949 and are estimated to be \$21,322 for the year 1950. The total estimated number of aliens to be repatriated during fiscal year 1951 is 475.

Funds under this appropriation will be exhausted in fiscal year 1950 and will be provided in 1951 under the

PROGRAM AND PERFORMANCE

Pursuant of article VII of the 1903 Treaty with the Republic of Panama, contract was entered into in 1907 between the Isthmian Canal Commission (Panama Canal) and the Republic of Panama, under which the Commission constructed the water distribution and sewage systems, as well as some paving in the cities of Panama and Colon, in order to provide necessary utilities for those cities. The Panama Canal has maintained the water and sewage systems and pavements, and extends and improves them on properly authorized and approved requests by the Republic of Panama. The Canal has collected the water rentals from the water consumers and applies the proceeds thereof to cover the cost of the water; maintenance, extension, and improvement of the systems; amortization of the investment; and interest at the rate of 2 percent on the unamortized balance. By congressional authorization and Executive Order 9551 the water and sewage systems in Panama and Colon were transferred to the Republic of Panama, effective January 1, 1946. The surplus from proceeds as of that date has been applied to extending and improving water and sewage systems and paving in the cities of Panama and Colon, and the small balance remaining for these purposes is shown below under the heading "Paving of streets and extension of water and sewage systems."

OBLIGATIONS BY ACTIVITIES

Paving of streets and extension of water and sewage systems—1949, \$356,358; 1950, \$379,734; 1951, \$50,000.

GENERAL PROVISIONS

SEC. 2. 【No part of any appropriation contained in this Act shall be used directly or indirectly, except for temporary employment in case of emergency, for the payment of any civilian for services rendered by him on the Canal Zone while occupying a skilled, technical, clerical, administrative, executive, or supervisory position unless such person is a citizen of the United States of America or of the Republic of Panama: *Provided, however,* (1) That, notwithstanding, *Notwithstanding* the provision in the Act approved August 11, 1939 (53 Stat. 1409), limiting employment in [the above-mentioned] certain positions to citizens of the United States [from and after the date of approval of said Act], citizens of Panama may be employed in such positions; (2) that at no time shall the number of Panamanian citizens employed in the above-mentioned positions exceed the number of citizens of the United States so employed, if United States citizens are available in continental United States or on the Canal Zone; (3) that nothing in this Act shall prohibit the continued employment of any person who shall have rendered fifteen or more years of faithful and honorable service on the Canal Zone; (4) that in the selection of personnel for skilled, technical, administrative, clerical, supervisory, or executive positions, the controlling factors in filling these positions shall be efficiency, experience, training, and education; (5) that all citizens of Panama and the United States rendering skilled, technical, clerical, administrative, executive, or supervisory service on the Canal Zone under the terms of this Act (a) shall normally be employed not more than forty hours per week, (b) may receive as compensation equal rates of pay based upon rates paid for similar employment in continental United States plus 25 per centum; (6) this entire section shall apply only to persons employed in skilled, technical, clerical, administrative, executive, or supervisory positions on the Canal Zone directly or indirectly by any branch of the United States Govern-

GENERAL PROVISIONS—Continued

ment or by any corporation or company whose stock is owned wholly or in part by the United States Government: *Provided further*, That the President may suspend from time to time in whole or in part compliance with this section if he should deem such course to be in the public interest.]

SEC. 3. No part of any appropriation contained in this Act, or of the funds made available for expenditure by any corporation included in this Act, shall be used to pay the salary or wages of any person who engages in a strike against the Government of the United States or who is a member of an organization of Government employees that asserts the right to strike against the Government of the United States, or who advocates, or who is a member of an organization that advocates, the overthrow of the Government of the United States by force or violence: *Provided*, That for the purposes hereof an affidavit shall be considered prima facie evidence that the person making the affidavit has not contrary to the provisions of this section engaged in a strike against the Government of the United States, is not a member of an organization of Government employees that asserts the right to strike against the Government of the United States or that such person does not advocate, and is not a member of an organization that advocates, the overthrow of the Government of the United States by force or violence: *Provided further*, That any person who engages in a strike against the Government of the United States or who is a member of an organization of Government employees that asserts the right to strike against the Government of the United States, or who advocates, or who is a member of an organization that advocates, the overthrow of the Government of the United States by force or

violence and accepts employment the salary or wages for which are paid from any appropriation or fund contained in this Act shall be guilty of a felony and, upon conviction, shall be fined not more than \$1,000 or imprisoned for not more than one year, or both: *Provided further*, That the above penalty clause shall be in addition to, and not in substitution for, any other provisions of existing law.

SEC. 4. The Governor of the Panama Canal and the Chief of Engineers, Department of the Army, are authorized to employ services as authorized by section 15 of the Act of August 2, 1946 (5 U. S. C. 55a), in amounts not exceeding ~~[\$6,000]~~ \$50,000 for the Panama Canal and not exceeding \$150,000 for the Corps of Engineers, Department of the Army: *Provided*, That the rates for individuals shall not exceed \$100 per diem.

SEC. 5. Appropriations for civil functions of the Department of the Army may be used for the payment of claims [under the Act of July 3, 1943, and section 403 of the Federal Tort Claims Act] pursuant to law (31 U. S. C. 223c; 28 U. S. C. 2672); examination of estimates of appropriations in the field; and for health programs as authorized by law (5 U. S. C. 150). (*Civil Functions Appropriation Act, 1950.*)

Total reimbursable obligations.....	10,695,679	11,995,913	9,526,000
Total obligations.....	1,206,980,117	1,251,647,723	1,163,330,000

PROGRAM AND PERFORMANCE

This appropriation finances the pay, subsistence, cash allowance for clothing, permanent change of station travel, and other monetary allowances of all officers and enlisted personnel on continuous active duty. The average strength in 1949 and planned strengths for 1950 and 1951 are shown in the following table:

	Average number		
	1949 actual	1950 estimate	1951 estimate
Officers (excluding nurses).....	45,269	44,257	42,764
Nurses.....	2,009	2,112	2,006
Enlisted personnel.....	390,624	368,215	339,823
Total.....	437,902	414,584	384,593

The actual strength on July 1, 1949, was 444,217. It is planned to reduce total strength to 393,893 by July 1, 1950, and to 373,303 by June 30, 1951.

The decrease in the estimate for 1951 is due primarily to the reduction in personnel, but is partly offset by increases in statutory pay rates authorized by the Career Compensation Act of 1949.

PROGRAM AND PERFORMANCE

The Naval Reserve consists of Organized and Volunteer components. This appropriation provides funds for the

MILITARY PERSONNEL, NAVAL RESERVE—Con.**Military Personnel, Naval Reserve—Continued**

pay and allowances, subsistence, clothing, and travel of Naval Reserve organized and volunteer personnel engaged or participating in prescribed programs of Naval Reserve training. It does not cover pay or other expenses of reservists who are on continuous active duty. Included are funds for drill and command pay, with authorized allowances, of the Organized Reserve; authorized training-duty pay and subsistence of organized and volunteer reservists with appropriate allowances; travel of organized and volunteer reservists in connection with their training assignments; and for prescribed clothing issues or allowances.

The average authorized strength projected for the Organized Reserve in 1951 is 29,225 officers and 175,625 enlisted personnel, or an aggregate of 204,850. This compares to a planned average strength of 182,306 for 1950. In addition, allowance is made for active-duty training of 10,000 officers and 5,000 enlisted personnel of the Volunteer Reserve.

PROGRAM AND PERFORMANCE

This appropriation provides for the pay and allowances, subsistence, clothing, and travel of candidates for appointment as commissioned officers for career or short-term service in the Navy, including midshipmen at the Naval Academy, aviation midshipmen, reserve officer candidates, aviation cadets, and regular and contract enrollees in the Naval Reserve Officers' Training Corps. The 1951 estimate includes funds to complete training programs scheduled throughout the summer of 1951, which extends into the following fiscal year. Accordingly, provision is made for the appropriation to remain available for obligation through the fiscal year 1952.

The average number of candidates provided for compared with the number for 1949 and 1950 is as follows:

	1949 actual	1950 estimate	1951 estimate
Naval Academy midshipmen.....	3,244	3,383	3,578
NROTC midshipmen.....	5,286	6,749	7,195
NROTC contract students.....	3,639	4,443	6,680
Students in the naval aviation college program.....	187	82	370
Aviation midshipmen.....	2,037	1,143	244
Aviation cadets.....	234	998	1,227
Reserve officer candidates.....	0	1,850	2,500
Total.....	14,627	18,648	21,794

1. *Pay and allowances.*—Pay and allowances for midshipmen and student members of the several officer-candidate programs listed above are provided at statutory rates.

2. *Subsistence.*—This estimate provides for subsistence in kind during summer training and cruises computed on basis of cost of the appropriate ration ashore or afloat.

3. *Travel.*—This estimate covers cost of transportation and per diem for officer candidates traveling between home, college, and places of training.

4. *Individual clothing.*—Prescribed allowances for uniforms are provided for all candidates.

5. *Other individual military personnel costs.*—Provision is made for payment of premiums on \$10,000 national service life insurance for officer candidates engaged in flight training.

PROGRAM AND PERFORMANCE

This appropriation provides for the recruiting of regular and reserve personnel, the support of recreational and morale programs, the operation and administration of individual and group training, maintenance and operation

of required facilities, the conduct of applied personnel research, and related departmental administration.

1. *Training, Navy.*—This program covers the individual and group training and instruction of naval personnel, ranging from indoctrination of recruits to technical and specialized instruction, and the postgraduate training of officers. It also provides for maintenance and operation of the Naval War College, general line schools, service schools for officers and enlisted personnel, training centers, and the Naval Officers' Training Corps units.

Comparative data on training loads are shown below:

	1949 actual	1950 estimate	1951 estimate
Officers:			
Service schools and colleges.....	6,793	7,958	8,208
Civilian institutions.....	1,426	1,255	1,195

Naval aviation college program:			
Regular.....	187	2	0
Special.....	0	80	370
Reserve officer candidates.....	0	1,980	2,500

2. *Training, Naval Reserve.*—This activity provides for the administration of the Naval Reserve program, and for maintenance and operation of Naval Reserve training facilities, except air installations. The 1951 program represents, in general, a continuance of the 1950 plan.

3. *Naval Academy.*—This activity finances the maintenance and operation of the Naval Academy, Annapolis, Md., excepting pay and allowances of midshipmen. The 1951 program will provide normal maintenance, procure necessary supplies and equipment for approximately 200 additional midshipmen expected to be enrolled, and continue the program of replacing worn-out furniture in midshipmen's rooms. Provision is made for a number of necessary improvements and repairs.

4. *Personnel support.*—This program provides for recreational and morale-building activities for naval personnel, including ship and station libraries, motion pictures afloat and in remote areas, and chaplains' supplies and equipment. Provision is made also for the operation of personnel accounting machine installations and of other activities, including appropriate offices in the district headquarters.

5. *Other personnel facilities and procurement of military personnel.*—Funds are included for the procurement of military personnel, and for the maintenance and operation of approximately 422 recruiting stations and 17 naval officer procurement offices, the Naval Home for an estimated 285 beneficiaries, one disciplinary barracks, 2 retraining commands, and 9 receiving stations.

6. *Research and development.*—The applied personnel research program is for the purpose of developing more effective methods for utilizing human resources as related to military requirements.

7. *Departmental administration.*—Administration of the foregoing programs, together with the maintenance and administration of naval personnel records, are centralized in the Bureau of Naval Personnel.

PROGRAM AND PERFORMANCE

This appropriation finances the pay and allowances, subsistence, individual clothing, permanent change of station travel and other monetary allowances of all officers and enlisted personnel on continuous active duty. The average strength in 1949 and the planned strengths in 1950 and 1951 are shown in the following table:

	Average number		
	1949 actual	1950 estimate	1951 estimate
Officers.....	7,196	7,213	7,317
Enlisted personnel.....	80,062	74,474	67,120
Total.....	87,258	81,687	74,437

The actual strength on July 1, 1949, was 85,956. It is planned to reduce total strength to 76,912 by July 1, 1950, and to 71,862 by June 30, 1951.

The decrease in the estimate for 1951 is due primarily to the reduction in personnel, but is partly offset by increases in statutory pay rates authorized by the Career Compensation Act of 1949.

PROGRAM AND PERFORMANCE

The Marine Corps Reserve consists of Organized and Volunteer components. This appropriation provides funds for the pay and allowances, subsistence, clothing, and travel of the organized and volunteer personnel of the Marine Corps Reserve and officer candidate trainees engaged or participating in prescribed programs of Marine Corps Reserve training. It does not cover salaries or other expenses of reservists who are on continuous active

duty. Included are funds for drill and command pay, with authorized allowances, of the Organized Reserve; authorized training duty pay and subsistence of organized and volunteer reservists and officer candidate trainees, with appropriate allowances; travel of organized and volunteer reservists and officer candidates in connection with their training assignments; and for prescribed clothing issues or allowances.

The average authorized strength projected for the Organized Reserve in 1951 is 3,716 officers and 47,056 enlisted personnel, or an aggregate of 50,772. This compares to a planned average strength of 48,452 for 1950. In addition, allowance is made for active-duty training of 2,000 officers and 1,500 enlisted personnel of the Volunteer Reserve.

PROGRAM AND PERFORMANCE

This appropriation provides for the maintenance and operation of all Marine Corps activities except Regular and Reserve military personnel requirements and air facilities for the Reserve.

1. *Maintenance and operation of Marine Corps facilities.*—This activity provides for the maintenance and operation of Marine barracks, depots of supplies, recruit depots, Marine Corps schools, and other types of supporting installations.

2. *Maintenance and operation of Marine Corps Reserve facilities (except air).*—Housing and facilities, including training equipment, are operated and maintained for 173 Reserve units.

3. *General expenses, Marine Corps personnel.*—Provision is made for items of a general housekeeping nature such as camp and garrison equipage and supplies; equipment for test by the Marine Corps Equipment Board; compensation of civilian personnel; supplies for military schools and tuition at civilian schools; expenses of the recruiting service; expenses of the Marine Corps Reserve; welfare and recreation equipment; and the replenishment, repair, and maintenance of electronics equipment.

4. *Marine Corps ordnance and ammunition.*—This activity finances the procurement of standardized and prototype weapons and ammunition, and provides for the maintenance of all ordnance equipment and ammunition.

5. *Industrial mobilization.*—The Marine Corps will continue planning for industrial mobilization in accordance with the program and objectives established by the Department of Defense.

6. *Cataloging.*—The program entails the description of items peculiar to the Marine Corps, and the cross-servicing of items procured from Army or Navy sources.

7. *Departmental administration.*—Administration of the foregoing programs, and the maintenance and administration of Marine Corps personnel records, are centralized in headquarters, Marine Corps.

Total obligations	611,160,334	524,759,800	539,332,000

PROGRAM AND PERFORMANCE

Naval aviation consists of Navy and Marine Corps combat, service, and training forces, and includes land-based naval aviation, air transport essential for naval operations, all air weapons and air techniques, naval air stations, and other field facilities. This appropriation provides for its direct financial support.

1. *Flight operations, Regular Navy.*—A program of 1,936,000 flight hours is financed in 1951 compared to 1,956,000 hours in 1950 and 2,152,000 hours in 1949. Funds are provided for the support of an average of 4,389 operating aircraft during 1951, as compared with 5,200 in 1950 and 5,466 in 1949. The 1951 program anticipates an increase in the number of hours flown per aircraft.

2. *Flight operations, Naval Reserve.*—Naval and Marine Corps Reserve flight operations in 1951 are programed on an average operating strength of 1,844 aircraft, compared with 2,185 in 1950. Nearly 664,000 flying hours are scheduled for 1951 which, while maintaining the approximate 1950 level, contemplates an improvement in aircraft utilization. Both the 1950 and 1951 estimates provide about 80 hours of first pilot time a year.

3 and 4. *Aircraft overhaul, Regular Navy and Naval Reserve.*—A comparison of work loads and average unit costs in 1949, 1950, and 1951 is presented in the following table:

	Regular Navy			Naval Reserve		
	1949	1950	1951	1949	1950	1951
Aircraft overhauls:						
Number	3,842	3,056	2,085	1,074	1,199	921
Unit cost	\$19,850	\$20,715	\$27,652	\$15,819	\$16,961	\$20,053
Engine overhauls:						
Number	2,951	8,164	10,250	1,763	2,114	2,231
Unit cost	\$2,517	\$3,349	\$4,342	\$2,898	\$3,340	\$3,609

5 and 6. *Station operations, Regular Navy and Naval Reserve.*—The number of stations in the aviation shore establishment for the Regular Navy and Marine Corps will be reduced from 55 in 1950 to 47 in 1951. The number of the Naval Reserve air stations will be the same in both years. The following table summarizes the number of stations by type:

	1949	1950	1951
Regular Navy:			
Continental stations:			
Fleet support stations	23	22	17
Training stations	7	7	7
Research and development stations	4	4	5
Miscellaneous facilities	7	5	5
Extra-continental stations	24	17	13
Total Regular Navy	65	55	47
Naval Reserve stations	22	21	21
Total air facilities	87	76	68

7. *Alteration and replacement of facilities.*—In 1951 this activity will provide for a number of major repair projects and necessary minor replacements of facilities at installations of the aviation shore establishment.

8. *Research and development.*—The aeronautical research and development program of the Navy is financed by this activity. The program, which is conducted by contract and in Navy laboratories, is primarily concerned with the development of new and improved types of aircraft, guided missiles, and related equipment.

9. *Industrial mobilization.*—This activity is programed at about the same level in 1951 as in 1950. The trend is toward greater emphasis upon direct-action industrial preparedness measures, with a corresponding reduction of planning and resources studies, and machine-tool acquisition and preservation. The program for maintenance of stand-by plants remains level for the 2 years.

10. *Supporting aeronautical equipment, matériel, and services.*—This activity supports aircraft operations by procurement of matériel and supplies such as weather instruments, synthetic training devices, submarine detection matériel, flight clothing, technical publications, and photographic equipment. Evaluation of newly developed electronic equipment, maintenance of shipboard catapults and arresting gear, and the salaries and expenses of field personnel engaged in the inspection of newly procured airplanes and equipment are included.

11. *Departmental administration.*—Administration of the foregoing activities is centered in the Bureau of Aeronautics.

OBLIGATIONS BY ACTIVITIES

Description	1949 actual	1950 estimate	1951 estimate
<i>Direct Obligations</i>			
1. Flight operations, Regular Navy	\$86,123,974	\$73,483,349	\$82,467,000

APPROPRIATION TEXT

For expenses necessary for maintenance, operation, and modification of aircraft; maintenance, operation, and lease of air stations and facilities, testing laboratories, fleet and other aviation activities; procurement of services, supplies, special clothing, tools, materials, and equipment, including rescue boats; research and development; industrial mobilization; aerological services, supplies, and equipment for the Navy and Marine Corps; and departmental salaries; \$536,796,000: Provided, That the unexpended balances of the appropriations for "Aviation, Navy, 1947" and "Aviation, Navy, 1948" shall remain available until June 30, 1951, for the liquidation of contract obligations incurred thereunder during the fiscal years 1947 and 1948, respectively, for aircraft equipment and research and development.

Estimate 1951, * \$536,796,000

* Estimate is for activities previously carried under appropriations as follows:	
"Maintenance, Bureau of Yards and Docks".....	\$587,000
"Construction of aircraft and related procurement, Navy".....	3,900,000
"Aviation, Navy".....	510,105,000
"Salaries, Bureau of Aeronautics".....	3,365,000
"Medical Department, Navy".....	112,000
"Transportation of things, Navy".....	122,000
"Pay, Marine Corps".....	3,000
"Maintenance, Bureau of Ships".....	2,366,000
"Maintenance, Bureau of Supplies and Accounts".....	15,681,000
"Welfare of naval personnel".....	93,000
"Miscellaneous expenses, Navy".....	53,000
"Contingent expenses, Navy Department".....	67,000
"Transportation and recruiting naval personnel".....	342,000

The amounts obligated in 1949 and 1950 are shown in the schedule as comparative transfers.

PROGRAM AND PERFORMANCE

This appropriation finances the procurement of new aircraft, including pilotless types, ordnance for new aircraft, and technical equipment for service training. It also provides for the modernization of aircraft in inventory. The estimate contemplates the use of \$124,797,000 of contract authority (in lieu of new contract authority in 1951) which was granted in 1950 but which will not be obligated in 1950.

1. *Piloted aircraft procurement.*—Annual procurement requirements for piloted aircraft are based on the planned numbers of active aircraft, considering such factors as aircraft losses, obsolescence, and normal service life. The estimate is based on a projection of the 1951 operating strength of 4,367 airplanes and 22 airships for the Regular Navy and Marine Corps, and an average of 1,840 airplanes and 4 airships for air reserve components. The 1951 program, which will provide 769 new aircraft weighing about 8.1 million airframe pounds, continues the modernization of naval aircraft. The 1950 program provides 768 aircraft having an estimated airframe weight of 6.9 million pounds. Because of the time elapsing between appropriation of funds and delivery of aircraft, it is estimated that approximately 1,100 airplanes weighing 11 million airframe pounds will, under present procurement plans, be delivered subsequent to June 30, 1951, from authorizations provided prior to that date.

2. *Pilotless aircraft procurement.*—Pilotless aircraft are of two general types: guided missiles designed to be used as weapons of offense or defense, and remotely controlled target aircraft, which are used for gunnery training and for the development of combat techniques. The guided missiles to be procured in 1951 will be used for testing and evaluation against aircraft, surface vessels, and ground targets. In the target aircraft category, the 1951 program will emphasize higher-speed models to simulate the performance of advanced aircraft likely to be encountered in actual warfare.

3. *Technical equipment for service training.*—Specialized equipment for training personnel in the maintenance and operation of each new model of aircraft and aviation equipment is necessary before the aircraft or equipment can be introduced into fleet units. The estimate for 1951 contemplates procurement of equipment which will give greater emphasis to advanced specialized training.

4. *Aircraft modernization.*—Because of rapid technological developments in the field of electronics, specialized equipment in certain combatant aircraft has become obsolete before the plane itself nears the end of its service life. The 1951 estimate, by providing newly developed electronic equipment for installation in existing aircraft, will increase their capability to perform antisubmarine warfare missions.

5. *Ordnance for new aircraft.*—This activity provides ordnance and related equipment, spares, and spare parts for new aircraft.

APPROPRIATION TEXT

【For new construction and procurement of aircraft and equipment, spare parts and accessories therefor, including expansion of public plants or private plants (not to exceed \$500,000), and government-owned equipment and installation thereof in public or private plants, and for the employment of personnel in the Bureau of Aeronautics necessary for the purposes of this appropriation, to remain available until expended, \$523,070,000, of which \$418,000,000 is for liquidation of obligations incurred under authority heretofore granted to enter into contracts for the foregoing purposes; and in addition, the Secretary of the Navy is authorized to enter into contracts for the purposes of this appropriation in an amount not to exceed \$576,546,000.】 *For construction, procurement, and modernization of aircraft and equipment, including ordnance, spare parts, and accessories therefor; expansion of public plants, and not to exceed \$500,000 for expansion of private plants; procurement and installation of equipment in public or private plants; and departmental salaries necessary for the purposes of this appropriation, to remain available until expended, \$620,000,000, of which \$530,000,000 is for liquidation of obligations incurred under authority heretofore granted to enter into contracts for the foregoing purposes: Provided, That there is hereby established a 1951 aircraft procurement program (including all pur-*

poses and objects provided for under this head) in an amount of \$690,293,000, to be provided from (1) this appropriation, (2) the contract authority granted hereinafter, and (3) \$124,797,000 of the balance of the contract authority granted under this head in the "National Military Establishment Appropriation Act, 1950", but this proviso shall not be construed to prevent the use in the fiscal year 1951 of other unused contract authority heretofore granted for aircraft procurement: Provided further, That the Secretary of the Navy is authorized to enter into contracts for the purposes of this appropriation in an amount not to exceed \$475,496,000. (National Military Establishment Appropriation Act, 1950.)

Appropriated 1950, \$523,070,000 Estimate 1951, * \$620,000,000

* Includes \$42,798,000, for activities previously carried under appropriations as follows:
 "Aviation, Navy"..... \$26,650,000
 "Salaries, Bureau of Ordnance"..... 69,000
 "Ordnance and ordnance stores"..... 15,181,000
 "Transportation of things, Navy"..... 895,000
 The amounts obligated in 1949 and 1950 are shown in the schedule as comparative transfers.

PROGRAM AND PERFORMANCE

The basic purpose of this appropriation is to provide for the maintenance and operation of naval vessels of the active and inactive fleets (including floating drydocks and service craft). It also provides for that portion of the shore establishment under the management control of the Bureau of Ships (principally naval shipyards) devoted to the support of the fleet, and for a number of other supporting services.

1. *Maintenance and operation of active fleet.*—Provision is made for costs attributable to the maintenance and operation of ships in the active fleet (including vessels to be transferred to the Military Sea Transport Service in 1950) except fuel and procurement of electronics material. Included are costs of overhauls, voyage repairs, and normal maintenance, and operating requirements for supplies and equipage; salvage services; charter and hire of auxiliary vessels including lighters, tugs, and small craft; and the pay, subsistence, and incidental expenses of civilian crews employed on naval vessels. Only the costs of direct labor and material are financed under this activity.

SHIPS AND FACILITIES—Continued**Ships and Facilities, Navy—Continued**

The active fleet will consist of 652 ships by the end of 1950 and this level will be maintained through 1951. An increase in the provision for installation of electronic equipments will improve the antisubmarine warfare potential of the active fleet.

2. *Maintenance and preservation of reserve fleet.*—This provides for drydocking, inspection, and essential repairs on the underwater body of reserve fleet ships to insure watertight integrity, and for the consumable supplies required for their preservation. The 1951 plan substitutes a drydocking program for the previously scheduled 5-year overhaul program.

3. *Cataloging and standardization.*—This provides for the preparation and publication of the Bureau of Ships' section of the Catalog of Naval Material and for the Bureau's participation in the cataloging program of the Munitions Board. In addition, funds are included for the Navy Department's support of the Armed Services Electrostandards Agency program.

4. *Electronics.*—This activity covers the procurement and maintenance of electronic equipment (including repair parts and components) on ships, and in that portion of the shore establishment under the cognizance of the Bureau of Ships. Provision is made in 1951 for replacement of worn-out and unserviceable parts, and for an expansion of the antisubmarine warfare and air-defense programs.

5. *Research and development.*—This provides for the direct costs of research and development programs related to the improvement of ships and ship equipment.

6. *Maintenance and operation of shore facilities.*—This activity provides for the maintenance and operation of naval shipyards, other shore facilities for fleet support, and research and test laboratories. The estimate for 1951 covers the maintenance and operation of 10 shipyards and the maintenance costs of the Long Beach Naval Shipyard, which will be inactivated in 1950. The estimate for 1951 reflects the decrease in the number of vessels in the active fleet and the elimination of reserve fleet overhauls.

7. *Maintenance and operation of Naval Reserve vessels.*—Provision is made for all direct costs of labor and material, except electronics, for the maintenance and operation of vessels assigned to Naval Reserve training.

8. *Industrial mobilization.*—This provides for participation of the Bureau of Ships in the Department of Defense industrial mobilization program, as follows: Maintenance of plants and facilities remaining in Navy custody, and inspection of plants which have been leased or will be sold, or otherwise disposed of; acquisition, overhaul, preservation, and storage of machine tool and production equipment reserves; industrial preparedness measures designed to improve the wartime supply arrangements for essential military equipment; and planning within the Department of Defense to determine mobilization requirements for and scheduling of equipment. Provision is made in 1951 for the maintenance of facilities formerly financed by the appropriation "Increase and replacement of naval vessels, construction, and machinery."

9. *Fuel for ships.*—Fuel, water, and utility services for naval vessels are financed by this activity. The reduction in the estimate for 1951 is due primarily to a decrease in the number of vessels and a reduction in the price of fuel.

10. *Departmental administration.*—This activity provides for the salaries of civilian employees in the Bureau of Ships and related administrative expenses.

APPROPRIATION TEXT

For expenses necessary for design, maintenance, operation, and alteration of vessels; maintenance and operation of facilities; procurement of plant equipment, appliances, and machine tools, and installation thereof in public or private plants; procurement of equipment, supplies, special clothing and services, including subsistence and other expenses of civilian crews of vessels; installation, maintenance, and removal of ships' ordnance; lease of facilities and docks; charter and hire of vessels; relief of vessels in distress; maritime salvage services;

research and development; industrial mobilization; and departmental salaries, \$417,927,000.

Estimate 1951, * \$417,927,000

* Estimate is for activities previously carried under appropriations as follows:

"Maintenance, Bureau of Ships"	\$309,801,000
"Salaries, Bureau of Ships"	6,570,000
"Pay, Marine Corps"	2,000
"Medical Department, Navy"	49,000
"Fuel, Navy"	33,829,000
"Contingent expenses, Navy Department"	85,000
"Miscellaneous expenses, Navy"	51,000
"Ordnance and ordnance stores, Navy"	4,755,000
"Maintenance, Bureau of Supplies and Accounts"	6,102,000
"Aviation, Navy"	538,000
"Maintenance, Bureau of Yards and Docks"	55,033,000
"Transportation of things, Navy"	1,031,000
"Transportation and recruiting of naval personnel"	89,000

The amounts obligated in 1949 and 1950 are shown in the schedule as comparative transfers.

PROGRAM AND PERFORMANCE

This appropriation provides for the construction and procurement of hulls, machinery, and equipment for new naval vessels; for the conversion of existing naval vessels; and for the procurement of tools and equipment specifically necessary for construction and conversion of vessels under shipbuilding programs approved in 1948 and subsequent years; and for civilian personnel in the Bureau of Ships whose duties are directly concerned with the construction and conversion of ships.

The total cash appropriated under this title in 1950 was \$156,996,000 and is to be applied as follows: \$141,012,000 to liquidate contract authority heretofore authorized, \$12,284,000 for financing that part of the substitute shipbuilding program for 1949, and \$3,700,000 available as new obligating authority for the 1950 program. The \$76,400,000 requested for 1951 is entirely for liquidation of contract authority previously granted. Since no new shipbuilding program is planned in 1951, new obligating authority is not required.

APPROPRIATION TEXT

For expenses, not otherwise provided for, necessary for the construction and procurement of hulls, machinery, and equipment of vessels authorized by law and approved after July 17, 1947, in accordance therewith, including conversions and replacements, and tools and equipment for such construction in public and private plants, and personnel in the Bureau of Ships necessary for the purposes of this appropriation, \$157,104,000. For liquidation of obligations incurred pursuant to authority heretofore granted under this head, \$76,400,000, to remain available until expended; and, in addition, the Secretary is authorized to enter into contracts for the purposes of this appropriation for vessels approved during the current fiscal year in an amount not to exceed \$85,748,000, of which \$70,748,000 represents a transfer of contract authority granted under this head in the 1949 Department of the Navy Appropriation Act: *Provided*, That the total of obligations incurred for construction, conversion, or replacement approved during the current fiscal year shall not exceed \$101,732,000. (5 U. S. C. 429; 34 U. S. C. 489, 493c, 494, 498c-3, 498c-10, 498c-12; National Military Establishment Appropriation Act, 1950.)

Appropriated 1950, * \$156,996,000 Estimate 1951, \$76,400,000

* The appropriation was reduced to this amount by sec. 702 of the National Military Establishment Appropriation Act, 1950.

PROGRAM AND PERFORMANCE

This appropriation provides for the research and development, design, procurement, storage, maintenance, and supply of naval ordnance equipment, supplies, and ammunition, and for ordnance support of the Naval Reserve.

1. *Research and development.*—This activity finances the research and development of ordnance equipment and supplies, the procurement of experimental material, and the operation of research facilities.

2. *Procurement of ordnance and ammunition.*—Provision is made in 1951 for the procurement of new ordnance matériel, chiefly antisubmarine and antiaircraft equipment and ammunition, for the active fleet. The 1951 program provides for accelerated procurement of new types of combat ammunition.

3. *Maintenance of ordnance and ammunition.*—This activity provides for surveillance, and maintenance in a serviceable condition, of ordnance equipment and ammunition on ships and in depots.

4. *Maintenance and operation of facilities.*—The 1951 program will support 56 stations, compared with 60 maintained in 1950. Thirty-three stations will be actively operated, while the balance will be maintained in a reduced operational or nonoperational status.

5. *Improvements and alterations to facilities.*—Major repairs and nonrecurring alterations of an emergency nature (both not to exceed \$30,000 per project) and the replacement of nonpassenger carrying automotive, railroad, and materials-handling equipment, are provided for.

6. *Cataloging.*—This activity supports the compilation of the naval ordnance part of a uniform Department of Defense cataloging system and the normal Bureau of Ordnance cataloging program.

7. *Industrial mobilization.*—Activities financed under this program are the maintenance of reserve plants, machine tools, gages, and production equipment; the preparation of industry preparedness measures; and mobilization requirements planning as directed by the Munitions Board of the Department of Defense.

8. *Naval Reserve.*—This provides for the procurement, installation, and maintenance of ordnance equipment, and preparation of ammunition for the training of Naval Reserve personnel.

9. *Departmental administration.*—Centralized administration of the foregoing activities is financed by this activity.

PROGRAM AND PERFORMANCE

This appropriation provides for the manufacture and procurement of armor, armament, and ammunition required for shipbuilding programs approved in 1948 and subsequent years; and for hire of civilian personnel in the Bureau of Ordnance whose duties are directly related to these programs.

The total cash appropriated under this title in 1950 was \$62,128,000 and is to be applied as follows: \$58,351,000 to liquidate contract authority heretofore authorized; \$2,177,000 for financing that part of the substitute shipbuilding program for 1949; and \$1,600,000 available as new obligating authority for the 1950 program. The \$30,000,000 provided in 1951 is entirely for liquidation of obligations incurred under contract authority previously granted since no new program is planned.

Contract authorization in the amount of \$31,460,000 is available for rescission to reflect adjustments in the shipbuilding program and a reduction in requirements to be financed under this appropriation.

1. *Engineering for service application.*—This activity provides for the fabrication of equipment whose scientific feasibility has been proven but which must still be adapted to ships before final plans can be released for production. The major portion of this work is already under way and a marked decrease in requirements is anticipated in 1951.

2. *Production.*—Production activity in 1951 will be confined to furnishing approved ordnance for ships previously authorized. Although some new procurement will be initiated, the bulk of the orders have been placed.

3. *Fitting out.*—This activity provides for miscellaneous items required during the fitting out period of a vessel, such as ordnance alterations, minor repairs to equipment, inspection of wiring, tests and adjustments.

4. *Inspection.*—Ordnance items are inspected before acceptance to insure conformance with specifications. Procurement initiated in earlier years will reach the delivery stage in 1951, with a resulting increase of inspection activity.

5. *Equipment.*—Machine tools and production equipment in public and private plants are furnished as necessary to implement procurement.

6. *Departmental administration.*—This provides for administration of the activities of this appropriation in the Bureau of Ordnance, including travel and incidental expenses.

PROGRAM AND PERFORMANCE

This is a wartime appropriation providing for the construction and procurement of hulls, machinery, and equipment for new naval vessels; for the conversion of existing naval vessels; for the procurement of facilities, tools, and equipment specifically necessary for the construction and conversion of vessels; and for the hire of civilian personnel in the Bureau of Ships whose duties are directly concerned with the construction and conversion of ships.

No new obligating authority is requested for 1951. The request for 1951 represents the amount required for expenditure in 1951 to liquidate prior obligations for the few ships which still remain under construction and for expenditures incidental to the construction of ships which have been delivered.

PROGRAM AND PERFORMANCE

This is a wartime appropriation providing for the manufacture and procurement of armor, armament, and ammunition for ships constructed, converted, or acquired under the World War II program, and for the hire of civilian personnel in the Bureau of Ordnance whose duties are directly concerned with these programs. Some activity continues under this appropriation to complete or convert wartime-program ships, but, for the most part, the activity consists of bringing the wartime program to an end. The request for 1951 represents the amount required to permit liquidation of obligations in 1951. This appropriation will lapse for obligational purposes at the end of fiscal year 1951 and for expenditure purposes at the end of fiscal year 1952.

PROGRAM AND PERFORMANCE

This appropriation provides funds for medical care, including the maintenance and operation of medical centers, hospitals, medical supply depots, naval dispensaries and dental clinics, and such allied functions as instruction of medical personnel, medical research, care of the dead, and the procurement of medical supplies and equipment. This appropriation does not include the pay of military personnel or the cost of maintenance and nonmedical supplies, equipment, and services for medical facilities at stations and ships.

1. *Maintenance and operation of hospitals and dispensaries.*—Funds are provided in 1951 for civilian personnel, medical supplies and equipment, and other expenses for the maintenance and operation of 27 hospitals, with a capacity of 16,160 beds, 2 naval dispensaries, and 5 dental clinics. In those areas where facilities of the Army, Air Force, and Veterans Administration are inadequate, their patients are cared for in Navy hospitals at the interdepartmental reimbursement rate set by the Bureau of the Budget. Retired military personnel and dependents of military personnel are also provided medical and hospital care when facilities are available at rates established by Executive order or Navy regulations. The reduction in average daily patient load shown below results from the reduction in strength of the Navy and the opening of new Veterans Administration hospitals which reduces the number of Veterans patients. The reduction is partially offset by the increased utilization of Navy hospitals by Army and Air Force patients.

Type of patients in naval hospitals	1949 actual	1950 estimate	1951 estimate
Navy and Marine Corps.....	8,072	8,653	7,960
Veterans.....	3,646	3,100	2,110
Army and Air Force.....	135	400	950
Dependents.....	1,186	1,450	1,450
Retired military personnel and others.....	879	1,000	1,000
Total average daily patient load.....	13,918	14,603	13,470

2. *Medical supplies, equipment, and services on ships and stations.*—This activity covers medical civilian personnel, supplies, equipment, and services on ships and at station dispensaries and clinics which are under the management control of other bureaus of the Navy. The 187 station dispensaries provide civilian employee health services as well as furnishing medical care to naval personnel and dependents. In 1951 funds are included for 5 mobile photofluorographic buses, completing the current replacement program for this type of equipment, and for 18 stationary photofluorographic units as the initial step in a 3-year replacement program.

3. *Medical care in nonnaval facilities.*—This activity includes funds for reimbursing other Federal agencies and civilian institutions for the medical care and hospitalization of Navy and Marine Corps personnel in localities where Navy medical facilities are not available. The increase in the average daily patient load of Navy patients in Army hospitals shown below reflects further joint use of Armed Forces facilities.

Average daily patient load of Navy patients in—	1949 actual	1950 estimate	1951 estimate
Army hospitals.....	86	300	400
Other Federal hospitals.....	239	8	7
Non-Federal hospitals.....	28	37	36
Total.....	353	345	443

MEDICAL CARE—Continued**Medical Care, Navy—Continued**

4. *Care of the dead.*—Funeral expenses for Navy and Marine Corps personnel, including transportation of the dead to the place of burial, are provided for an estimated 1,411 deaths in 1951.

5. *Education and training.*—In 1951, an estimated 120 officers and 1,680 enlisted men will receive training in 8 Medical Department schools. These schools provide basic training for newly recruited hospital corpsmen, indoctrination training for new officers, and technical training in the various specialties. In addition, medical intern and resident training, and dental intern training is provided at nine of the larger naval hospitals. Civilian specialists are employed as professional consultants to supplement the regular staff of the hospitals in providing this training and in maintaining high professional standards in the care of patients. The tuition and related expenses for an estimated 597 Medical Department personnel receiving specialized training in civilian institutions are provided by the Navy in order to develop needed specialists and offer career opportunities which will attract and retain young physicians.

6. *Research and development.*—This research is directly related to medical practice and maintenance of health under conditions imposed during war. Over 90 percent of the 1951 funds are for research performed in Navy facilities; the remainder is for contracts with other Federal and non-Federal institutions. One-third of the cost of the development work of the Engineering Research Division of the Armed Forces Medical Procurement Agency is reimbursed to the Army.

7. *Medical supply system.*—The 1951 estimate anticipates a savings as a result of the expected unification of the Navy's two medical depots with the Army medical supply system. In 1949 the Navy's two overseas medical depots were closed. This activity also includes the costs of operating the medical material office of the Bureau of Medicine and Surgery and one-third of the operating expenses of the Armed Forces Medical Procurement Agency and the Armed Forces joint medical industrial mobilization and procurement planning.

8. *Initial supplies and equipment.*—In 1949 advance base components were outfitted under this activity. The 1951 estimate is for that part of the initial collateral equipment for the new hospital at St. Albans, N. Y., which has yet to be procured.

9. *Departmental administration.*—This activity covers the salaries of 370 civilian personnel and other expenses of the Bureau of Medicine and Surgery. The Bureau is responsible for maintaining the strength of the Navy at the highest possible peak of efficiency by reducing health hazards, applying disease-prevention measures, and providing medical care and hospitalization for sick and injured personnel. The Bureau has direct command and administration over the medical centers, hospitals, general dispensaries, medical depots, and Medical Department schools. It has professional supervision over the station dispensaries and medical facilities on board ship. Statistics are collected and analyzed on health and medical activities in the Navy. Medical research and development work and the training of Medical Department personnel are planned and supervised.

PROGRAM AND PERFORMANCE

This appropriation provides for the furnishing of civil engineering services and technical assistance for the entire shore establishment of the Navy including the Marine Corps, and for the procurement of all passenger motor vehicles for the Navy.

1. *Construction battalion support.*—Included herein are costs of maintaining and operating the advance base depot at Port Hueneme, Calif., the maintenance of material and equipment for construction battalions overseas use, equipment for construction battalion operating units numbering 2,650 men, the Naval School of Construction, 2 naval construction battalions, and 1 construction battalion mobile unit. Provision is made for partially replacing equipment used by the construction battalion operating units performing work overseas.

2. *District public works offices.*—Field engineering and technical services are provided for the naval shore establishment including inspection and reports on all existing public works and public utilities and planning, design, supervision, and inspection of new construction.

3. *Public works centers and logistic support.*—This estimate provides for the maintenance and operation of such facilities as public works centers at Guam and Norfolk, the construction battalion center at Port Hueneme, and other logistic support expenses. Provision is made in the 1951 program for the procurement of construction and utility prototype material and equipment.

4. *Defense housing.*—Provision is made for the maintenance and operation of over 100 separate housing developments containing more than 31,000 units rented to military and civilian personnel. At present, the cost of utilities for these units is paid by the tenants. Since it is planned that in 1951 military personnel who occupy these units will no longer receive a rental allowance, this project will provide, in addition to maintenance, for utilities and initial procurement of furniture for those units occupied by military personnel.

5. *Automotive procurement.*—Replacement of passenger-carrying vehicles for the Navy, and trucks for Bureau of Yards and Docks activities, are to be financed in 1951.

6. *Research and development.*—Research and development of construction and utility material and equipment

are conducted to meet current and prospective operational requirements, for improvements in amphibious operations and construction methods, and to determine transportation and operating requirements under all climatic and terrain conditions.

7. *Engineering research facilities.*—This activity provides for operating and maintaining the installations engaged in the civil engineering research and development program. These include such stations as the advance base proving ground, Port Hueneme, and the Arctic test station, Point Barrow, Alaska.

8. *Departmental administration.*—Provision is made for the salaries and related expenses of civilian personnel employed at the seat of the government for administration of the foregoing programs. In addition, provision is made for such other activities as cataloging, automotive administration, management engineering, and advance engineering planning.

APPROPRIATION TEXT

For expenses necessary for maintenance and operation of district public works offices, public works centers, advance base depots, construction battalion centers, defense housing projects, other civil engineering facilities, and shore activities not otherwise provided for; procurement of services, supplies and equipment for the foregoing activities; purchase (for replacement only) and hire of passenger motor vehicles; research and development; advance engineering planning; industrial mobilization; and departmental salaries; \$43,840,000.

Estimate 1951, • \$43,840,000

Estimate is for activities previously carried under appropriations as follows:	
“Maintenance, Bureau of Yards and Docks”.....	\$40,089,000
“Salaries, Bureau of Yards and Docks”.....	2,189,000
“Transportation of things, Navy”.....	189,000
“Medical Department, Navy”.....	8,000
“Transportation and recruiting naval personnel”.....	41,000
“Maintenance, Bureau of Supplies and Accounts”.....	1,105,000
“Miscellaneous expenses, Navy”.....	5,000
“Maintenance, Bureau of Ships”.....	121,000
“Aviation, Navy”.....	37,000
“Contingent expenses, Navy Department”.....	56,000

The amounts obligated in 1949 and 1950 are shown in the schedule as comparative transfers.

PROGRAM AND PERFORMANCE

Funds available under this account provide for the acquisition and construction of facilities for the naval shore establishment within the continental United States and overseas for programs initiated in 1948 and subsequent years. In the continental United States, these programs include the construction of such items as troop and family housing, research and development facilities, technical, operational, industrial, and fleet support facilities together with necessary utility systems and similar supporting requirements. Overseas programs include construction of a similar character in Hawaii, Newfoundland, Puerto Rico, and the Canal Zone, and for continuation of the postwar development of Guam and the Aleutian Islands.

No new funds have been provided in 1951, but the foregoing programs will continue and will be financed from funds appropriated in prior years. New public works construction in 1951 will be contingent upon the enactment of authorizing legislation.

APPROPRIATION TEXT

For construction, installation, and equipment of temporary or permanent public works, including public utilities and appurtenances, and necessary lands and interests therein, as authorized by the Act of June 10, 1941 (Public Law 109), as modified by the Act of June 25, 1948 (Public Law 778), the Act of February 6, 1942 (Public Law 438), and the Act of June 16, 1948 (Public Law 653), including personnel in the Bureau of Yards and Docks and other personal services necessary for the purposes of this appropriation; engineering and architectural services as authorized by section 3 of the Act of April 25, 1939 (34 U. S. C. 556); other necessary expenses; to remain available until expended, \$52,000,000, of which \$35,000,000 is for liquidation of obligations incurred under authority heretofore granted to enter into contracts for the foregoing purposes; and in addition, the Secretary of the Navy is authorized to enter into contracts for the purposes of this appropriation in an amount not exceeding \$20,000,000: *Provided*, That the fixed fee to be paid the contractor as a result of any construction contract entered into under this appropriation shall not exceed 4 per centum of the estimated cost of the construction contract, exclusive of the fee, as determined by the Secretary of the Navy: *Provided further*, That this appropriation and the appropriation under this head in the Second Deficiency Appropriation Act, 1948, shall be available hereafter for projects outside the continental United States as authorized by the aforesaid Act of June 16, 1948, without regard to the projects specified in, or the limitations of cost imposed thereon by, the Second Deficiency Appropriation Act, 1948.]

For an additional amount for "Public works", for carrying out the purposes of H. R. 6303, Eighty-first Congress, to remain available until expended, \$10,000,000; and, in addition, the Secretary of the Navy is authorized to enter into contracts for the purposes of this appropriation in an amount not to exceed \$15,414,000: *Provided*, That the same purposes applicable to this appropriation as contained in the National Military Establishment Appropriation Act, 1950, shall apply: *Provided further*, That this paragraph shall be effective only upon enactment into law, during the first session of the Eighty-first Congress, of H. R. 6303. (National Military Establishment Appropriation Act, 1950.)

Appropriated 1950, * \$61,876,000

* The appropriation was reduced from \$52,000,000 to \$51,876,000 by sec. 702 of the National Military Establishment Appropriation Act, 1950, and increased \$10,000,000 by the Second Supplemental Appropriation Act, 1950.

PROGRAM AND PERFORMANCE

This appropriation finances the planning and coordination of naval research; conduct of research and development supplemental to the research and development of naval technical bureaus; development, installation and maintenance of special devices; and administration of patent activities.

1. *Research and development.*—The Navy is engaged in an extensive program of scientific research in the physical and biological sciences. While the program covers problems of direct application to military needs, it also extends to research of a basic nature for the purpose of increasing the reservoir of scientific knowledge. It is carried on both in Navy laboratories and in universities, private research organizations, and industrial plants. Contracts for research with universities and similar institutions permit scientists to conduct research in their own laboratories while at the same time training the younger men upon whom the future scientific strength of the Nation will depend.

In addition to the cost of research contracts with universities and other institutions, this activity provides for the direct costs of research and development projects at the Naval Research Laboratory, the Special Devices Center, and the Underwater Sound Reference Laboratory. The Naval Research Laboratory undertakes both basic research and applied research leading to developments of interest to the Navy. The Special Devices Center conducts research in human engineering and develops devices to train personnel in the use of naval equipment under simulated operational and combat conditions. The Underwater Sound Reference Laboratory conducts research in the field of sound measurement, and develops acoustic standards for use in evaluating and calibrating sound devices.

2. *Maintenance of research facilities.*—This activity provides for the maintenance and administration of the Naval Research Laboratory, the Special Devices Center, and the Underwater Sound Reference Laboratory, and for the field administration of research performed under contract.

3. *Installation and maintenance of special devices.*—The installation and maintenance of training devices developed by the Special Devices Center and the procurement and stocking of the necessary specialized spare parts are provided by this activity. The inventory value of devices requiring maintenance in 1951 is estimated at approximately \$70,000,000, an increase of about 10 percent over 1950. In view of the decreased availability of ships and other operational equipment planned for 1951 and the resulting increase in the need for synthetic training, training devices will be maintained at a level that will permit them to be fully utilized.

4. *Patents.*—This activity provides for the field administration necessary to protect the interests of the Govern-

ment in connection with new patent disclosures arising from research and development activities of the Naval Establishment. The number of such disclosures is estimated at about 1,000 in both 1950 and 1951.

5. *Departmental administration.*—Departmental administration of the above programs is centralized in the Office of Naval Research. This activity includes salaries of the scientific, patent, and general administrative staffs and incidental departmental expenses.

PROGRAM AND PERFORMANCE

Service-wide supply and finance services and facilities, including intra-Navy transportation of things, are financed by this appropriation. Requirements are related to the size of the Navy, the operational plans for the budget year, and long-range plans for matériel availability.

1. *Operation of supply system.*—Service-wide supply services, including purchasing, custody, warehousing, and issue of supplies are provided for the logistic support of the fleet and the shore establishment. Supply centers, supply depots, storehouses, fueling facilities, purchasing offices, market offices, and related supply installations are operated to provide this logistic support. The supply system is responsive to the operational commands, and requirements are dependent upon the needs of the consuming activities and of the fleet.

2. *Maintenance of facilities.*—The maintenance of fiscal facilities and supply system installations is provided for in this program.

3. *Finance.*—Service-wide accounting and disbursing services are provided by regional accounts offices, accounts disbursing offices, small-craft accounting offices, and related service-wide fiscal offices.

The Cost Inspection Service performs auditing functions comparable to those performed by commercial public accounting firms. Savings to the Government from such services are estimated to have been nearly \$24,000,000 in 1949.

The field branch, Cleveland, is concerned primarily with disbursements authorized by naval personnel for personal allotments and savings bond allotments. It also maintains pay records of naval personnel and performs administrative examinations of financial returns of various naval disbursing officers.

4. *Material control.*—Inventory and distributive control is maintained to assure availability of supply system material as needed with the minimum essential inventory. Supply-demand control points are operated for the performance of the following functions: (1) Identification; (2) receipt, compilation, and analysis of periodic inventory reports; (3) maintenance of records of material on order and due under contract; (4) collection, analysis, and application of material usage data; (5) translation of operational overhaul maintenance programs into terms of material; (6) determination of pipe-line requirements; (7) periodic determination of material excesses or deficiencies, together with initiation of action to dispose, redistribute, or procure such material.

5. *Transportation of things.*—Intra-Navy commercial transportation costs, except Marine Corps transportation, but including all transportation of Navy stock fund and clothing and small stores fund material are financed by this activity. Provision is also made for the Navy's share of contractual costs (principally salaries and expenses of civilian crews) of the United States naval tanker program. These Navy-owned tankers are operated under Navy supervision by private concerns.

6. *Cataloging.*—The Navy catalog program has been established to develop and compare descriptions of items to eliminate duplicates and to publish a catalog of Navy material. These data are used to consolidate similar purchases and stores accounting categories. The Navy's responsibilities under the Munitions Board catalog program receive their principal support from this activity.

7. *Research and development.*—Research and development is conducted to improve naval material and related techniques.

8. *Industrial mobilization.*—Industrial mobilization is planned and studies are conducted in relation to general stores, ships' stores, material handling equipment, and other related operations for the furtherance of industrial mobilization preparedness.

9. *Other costs related to the operation of supply and finance.*—These are costs which cannot be allocated directly to any specific activity within the appropriation.

10. *Departmental administration.*—Administration of the foregoing activities is centralized in the Bureau of Supplies and Accounts. The estimate includes departmental salaries and the cost of incidental supplies and services.

PROGRAM AND PERFORMANCE

Financed under this appropriation are those service-wide functions which are not directly related to a single primary program and for which operation costs are not readily allocable to other programs. These functions support and facilitate the conduct of numerous phases of activity by providing the elements of military command support and services to the primary naval programs in the accomplishment of assigned objectives.

1. *Naval district headquarters, river commands, sea frontiers, and miscellaneous command headquarters.*—The 16 commandants of the naval districts and river commands represent the Secretary of the Navy and the Chief of Naval Operations in maintaining the standards of naval performance and discipline and exercising coordination control over cognizant naval activities. The five sea frontier commanders maintain plans for the defense of frontiers, harbors, and sea areas and exercise military command and coordination control of component naval districts, military command of reserve fleets and operational control of assigned Military Sea Transport Service vessels. Other programs within this activity include the area wage and classification offices and boards of civil-service examiners which perform a service-wide function.

2. *Naval bases, naval stations and naval operating bases.*—Funds are provided for those service-wide expenses

SERVICE-WIDE OPERATIONS—Continued**Service-Wide Operations, Navy—Continued**

at naval bases, naval stations, and naval operating bases, which are not readily allocable to the activities serviced, such as headquarters administration, integrated fire departments, common access roads, sewage plants, utilities, and motor transportation pools.

3. *Service-wide communications.*—Provision is made for the operation of naval communication stations and units, radio-photo-operating units, registered publications issuing offices, fleet post offices, required naval support of joint communication activities, communication and cryptographic publications and cryptographic aids related to service-wide communications, departmental salaries and incidental supplies and equipment, and other costs of interactivity communications.

4. *Naval records centers.*—Five records centers are maintained as intermediate depositories in which the inactive and semicurrent records of the Naval Establishment are cared for until they can be disposed of by transfer to the National Archives or otherwise.

5. *Hydrographic Office.*—A program is conducted for the maintenance of 5,358 charts and 186 publications, world-wide in scope, which reflect the latest nautical information essential for safe navigation of the Navy and merchant marine. It includes charts and publications required for naval aviation. A program also is conducted to provide hydrographic and oceanographic charts required to support tactical and strategic planning by the Joint Chiefs of Staff.

6. *Naval Observatory.*—The Observatory supplies the Nation's naval, air, and maritime services with astronomical data necessary for safe navigation. It determines accurate time and controls time signal transmissions for the entire Nation for all purposes. It also conducts continuous astronomical observations and research for the general advancement of navigation and astronomy.

7. *Inter-American affairs.*—The objective of this program is to foster good will between the United States and other American countries through such activities as special missions, tours, and official representation.

8. *Contingencies of the Navy.*—Funds are expended, on the approval of the Secretary of the Navy, for emergencies and extraordinary requirements.

9. *Departmental administration.*—The Office of the Secretary of the Navy is concerned with the general supervision and the business administration of the Navy; the Chief of Naval Operations commands the naval operating forces and is responsible for the formulation and execution of plans to assure the maintenance and readiness of the fleet, air, and shore establishments; the Judge Advocate General is the legal adviser to the Secretary and exercises cognizance over all matters of law arising in the administration of the Naval Establishment (except procurement legal matters). The estimate includes the costs of departmental salaries and incidental supplies, equipment, and services for these offices.

PROGRAM AND PERFORMANCE

The civil government of the trust territory of the Pacific islands under United Nations trusteeship to the United States and the civil government of American Samoa are administered by the Navy. Program objectives in these areas include the establishment of adequate systems of public health and education, training of native peoples in local self-government, and the development of local resources to provide the basis for a sound and self-supporting economy. Financing of the program is supplemented by local revenues.

1. *Civil government of American Samoa.*—Expenses of civil administration of American Samoa will be financed from local revenues.

2. *Civil government of the trust territory.*—Expenses of civil administration are provided for by this appropriation and by local revenues. The increase in appropriated funds estimated for 1951, which offsets anticipated reductions in local revenue, is provided to maintain the program at its present level. Because the local economy is primarily dependent on copra, its government's revenues have declined with the sharp reduction in the price of that commodity.

3. *Civil government of Guam.*—No appropriation is requested for 1951 for this program in view of the scheduled transfer of the civil government from the Navy to the Department of the Interior on July 1, 1950.

4. *Replacement of military personnel.*—This activity provides for the placement of civilians in positions presently occupied by military personnel in accordance with the plans for transfer of the civil governments of American Samoa and trust territory to the Department of the Interior on July 1, 1951.

PROGRAM AND PERFORMANCE

Four petroleum and three oil shale reserves have been set aside for the Navy by Executive order to provide an emergency source of oil for national defense. Exploration, development, and maintenance work are being conducted.

The development of Naval Petroleum Reserve No. 1, Elk Hills, Calif., will continue on a reduced scale in 1951 with the reduction in number of drilling rigs in operation from seven to five. Naval Petroleum Reserve No. 2, Buena Vista Hills, Calif., is entirely under lease. Royalty collections, paid into miscellaneous receipts of the Treasury, amounted to about \$1,700,000 in 1949, and a similar income is anticipated in 1950 and 1951. Naval Petroleum Reserve No. 3, Teapot Dome, Wyo., has been shut in

OPERATION AND CONSERVATION OF NAVAL PETROLEUM RESERVES—Continued

Operation and Conservation of Naval Petroleum Reserves—Con. since 1928, but exploration is being conducted with funds appropriated in 1950 to determine whether deeper pools exist.

The Navy is actively cooperating with the Bureau of Mines in that Bureau's research regarding the potentialities of oil shale as a source of petroleum.

PROGRAM AND PERFORMANCE

Exploration of Naval Petroleum Reserve No. 4, Alaska, was begun by Navy construction battalions in 1944 and was placed on a civilian contract basis in 1946 following demobilization. Sufficient knowledge has been obtained by geological and geophysical surveys, and by drilling, to enable the Navy to accelerate the program. Present plans call for completion of the project in the calendar year 1953.

[BUREAU OF NAVAL PERSONNEL]

[PAY AND ALLOWANCES]

For pay, allowances, and quarters prescribed by law for naval personnel, including reserves on active duty as follows:]

[Officers, active duty; midshipmen; enlisted personnel, active, including cash prizes for men for excellence in gunnery, target practice, communication, and engineering competition; men of the Fleet Reserve, inactive; nurses, female, active; six months' death gratuity, officers, nurses, and enlisted personnel; cash allowances for uniforms for officers; clothing furnished annually to enlisted personnel or cash in lieu thereof; civilian clothing, including an overcoat when necessary, the cost of all not to exceed \$30 per person to enlisted personnel given discharges for bad conduct, undesirability, unsuitability, or inaptitude; purchase of medals, crosses, bars, emblems, and other insignia; miscellaneous items, including interest on deposits by enlisted personnel; commuted rations; money allowances for subsistence and quarters of enlisted personnel when not furnished quarters or subsistence in kind, and for enlisted personnel absent from messes on temporary duty not

involving travel (during which time all other subsistence shall be stopped), \$1,076,629,000: *Provided*, That, except in the case of those who have specifically enlisted for such duty, those performing service in the quarters of female officers, and those performing service in the residence or quarters of naval attachés abroad as authorized by the Secretary, no appropriation contained in this title shall be available for the pay, allowances, or other expenses of any enlisted person or civilian employee performing service in the residence or quarters of an officer or officers on shore as a cook, waiter, or other work of a character performed by a household servant, but nothing herein shall be construed as preventing the voluntary employment in any such capacity of a retired enlisted man or a transferred member of the Fleet Reserve without additional expense to the Government, nor the sale of meals to officers by general messes on shore as regulated by detailed instructions from the Department of the Navy.] (National Military Establishment Appropriation Act, 1950.)

Appropriated 1950, \$1,039,871,000

* The appropriation was reduced to this amount by sec. 702 of the National Military Establishment Appropriation Act, 1950.

NOTE.—Estimate of \$1,002,772,000 for activities previously carried under this title has been transferred in the estimates to appropriations as follows:

APPROPRIATION TEXT

[BUREAU OF YARDS AND DOCKS]

[MAINTENANCE]

For the pay of employees in the field service, materials, supplies, and facilities necessary for the operation and general maintenance of activities and properties under the cognizance of the Bureau of Yards and Docks; purchase for replacement only (including two at a cost not exceeding \$3,000 each) and hire of passenger motor vehicles, \$153,000,000, of which \$5,113,000 is for expenses of operation and maintenance of housing projects maintained and operated as such by the Department of the Navy and developed under the provisions of the Acts of June 28, 1940 (42 U. S. C. 1501-1505); September 9, 1940 (54 Stat. 872); October 14, 1940 (42 U. S. C. 1521-1524, 1541-1553, 1571-1574); March 1, 1941 (55 Stat. 14); and December 17, 1941 (55 Stat. 810), including utilities, roads, walks, and accessories, and expenses found necessary

in the disposition of any such property or the removal of temporary housing: *Provided*, That none of these funds shall be used to pay for the maintenance or operation of any defense housing unit for any civilian employees of the Department of the Navy unless the rental rate charged for the civilian occupancy of any such defense housing unit shall be at such rate as may be prescribed by law or in pursuance of law for housing of similar character and size in the general geographical area where such defense housing may be located: *Provided further*, That this appropriation shall be available for any expenses incident to transferring offices of the Department of the Navy between buildings at the seat of government. (National Military Establishment Appropriation Act, 1950.)

Appropriated 1950, \$151,282,000

The appropriation was reduced to this amount by sec. 702 of the National Military Establishment Appropriation Act, 1950.

NOTE.—Estimate of \$138,000,000 for activities previously carried under this title has been transferred in the estimates to appropriations as follows:

Total obligations	74,446,972	20,000,000	10,000,000

PROGRAM AND PERFORMANCE

The clothing and small stores fund is a revolving fund which finances the procurement, by purchase and manufacture, of stocks of clothing and small-stores items necessary to military personnel of the Navy. Receipts to the fund are derived from sale of stock direct to naval personnel. Reimbursements to the fund are received from military personnel appropriations when stocks are withdrawn for issue to personnel in accordance with standard allowances. The fund also retains the net proceeds from sale of surplus clothing and small stores. Procurement activity will be low in 1951 because of present stock levels.

OBLIGATIONS BY ACTIVITIES

Description	1949 actual	1950 estimate	1951 estimate

PROGRAM AND PERFORMANCE

The Navy management fund was created under title IV of the National Security Act amendments of 1949 for the purpose of facilitating the economical and efficient conduct of operations which are financed by two or more appropriations within the Department of the Navy. The fund also will be used to facilitate the conduct of joint operations financed by one or more Navy appropriations and one or more appropriations of the other departments within the Department of Defense.

The corpus of the fund consists of the sum of \$1,000,000 transferred from the naval procurement fund pursuant to the act, together with balances in and obligations against accounts in the naval procurement fund, which were transferred on October 31, 1949.

Total obligations.....	682,276,853	609,500,000	592,397,848

PROGRAM AND PERFORMANCE

The Navy stock fund is a revolving fund which finances the procurement, by purchase and manufacture, of stocks of general stores material, subsistence items, fuel and lubricants, commissary and ships' stores stocks and certain special equipment and stores. The stocks procured are common supplies in general naval use, and are carried in inventory at naval establishments and aboard ships under the naval stock account, which expresses the dollar value of the inventories. Reimbursements to the fund are received from using appropriations as stocks are withdrawn for use; other receipts to the fund are derived from sale of stocks to authorized users. Obligations to be incurred for procurement of inventories are expected to decline gradually, reflecting reduced levels of Navy operations.

PROGRAM AND PERFORMANCE

Advance deposits are received from Government agencies outside the Navy, from foreign governments, and from private individuals for work or services to be rendered by the Navy. The fund is also credited with funds received from sale of surplus and condemned stores of the Navy. Charges to the fund are made for the expenses of work or services performed, expenses of selling condemned and surplus property, and refunds to bidders and depositors. Net proceeds of condemned and surplus sales are transferred to "Miscellaneous receipts of the Treasury."

PROGRAM AND PERFORMANCE

The Department of the Navy, in cooperation with the State Department, has furnished certain naval matériel to Greece and Turkey. Minimum logistic support requirements of the Greek Navy scheduled under this program have been met. Modern vessels, material, and training of Turkish naval personnel have been provided to increase the effectiveness of the Turkish Navy.

Prior year balance available	\$1,989,333	\$1,859,282	\$1,559,282
Balance available in subsequent year	-1,859,282	-1,559,282	-1,359,282
Total obligations	130,051	300,000	200,000

PROGRAM AND PERFORMANCE

The naval emergency fund provides for extraordinary expenses, not otherwise provided for, for local defense and fleet training schools and equipment and services therefor, fleet landings, navigational aids, and such other objects as the Secretary of the Navy may consider necessary to further the preparedness of the United States Navy (55 Stat. 814).

OBLIGATIONS BY ACTIVITIES

Special projects—1949, \$130,051; 1950, \$300,000; 1951, \$200,000.

OBLIGATIONS BY OBJECTS

07 Other contractual services—1949, \$130,051; 1950, \$300,000; 1951, \$200,000.

Overtime, Leave, and Holiday Compensation (Allocation to Navy)—

FUNDS AVAILABLE FOR OBLIGATION	1949 actual	1950 estimate	1951 estimate
Prior year balance available	\$58,398		
Transferred from "Overtime, leave, and holiday compensation"	30,000	\$10,000	
Total obligations	88,398	10,000	

PROGRAM AND PERFORMANCE

Provision is made for the payment of retroactive claims for overtime, leave, and holiday compensation, at night rates, for work performed in the United States Naval Establishment, which had been paid for at regular day rates prior to the enactment of the act of August 8, 1946, Public Law 663.

OBLIGATIONS BY ACTIVITIES

Claims—1949, \$88,398; 1950, \$10,000.

OBLIGATIONS BY OBJECTS

PROGRAM AND PERFORMANCE

Payment is made from this allotment for leave accumulated prior to September 1, 1946, by personnel of the Navy and Marine Corps. The payments in 1950 and 1951 include compensation for leave of officers who were deprived of leave credit as a result of being separated from the Naval or Marine Corps Reserve after September 8, 1938, to accept a commission in the Regular Navy or Marine Corps, and who were on active duty on September 1, 1946.

PROGRAM AND PERFORMANCE

Funds available under this heading were appropriated prior to 1948 to provide for the acquisition and construction of facilities for the naval shore establishment at installations in the continental United States and overseas. In the continental United States, this program included the construction of such items as housing, research and development facilities, technical, operational, and industrial facilities, and the necessary utility systems and similar supporting requirements. Overseas the program included construction of a like nature in the Hawaiian Islands and other prewar naval bases, and also included initial increments for the postwar development of Guam and the Aleutian Islands.

In 1951 the existing balance in this account will be entirely utilized and the program completed. This balance provides primarily for the completion of sewage disposal and hospital projects now under way in the continental United States, and provides for the completion of the original program of development on Guam, and in the Adak, Alaska, area.

Unobligated balance, estimated savings			-3,000,000
Total obligations		10,000,000	17,000,000

PROGRAM AND PERFORMANCE

Approximately 2,000,000 tons of navy stocks stored at continental and overseas issue depots or which were in transit at the conclusion of hostilities are in process of being identified, segregated and preserved for ultimate use, or for disposal. Authority for this program covers 1950 and 1951, and it is expected that about one-third will be completed in 1950 and the remainder substantially completed in 1951.

1. *Identification.*—The suitability of material is determined for retention and preservation, or for disposal as surplus or scrap. The identification and classification of material determines the utility of otherwise unknown stocks in fulfillment of immediate and long-range Navy requirements.

2. *Initial preservation.*—As stocks are identified, the usable material is preserved and stored to insure its future utility or sales value.

OBLIGATIONS BY ACTIVITIES

PROGRAM AND PERFORMANCE

The act of March 4, 1937, established the Office of Naval Records and Library fund to account for gifts or bequests made for the benefit of the Office of Naval Records and Library, Navy Department (5 U. S. C. 419b).

APPROPRIATION OR ESTIMATE

Appropriated (estimate) 1950, **\$3,000** Estimate 1951, **\$3,000**

Pay of Marine Corps, Deposit Fund—

FUNDS AVAILABLE FOR OBLIGATION: Appropriation or estimate—1949, \$1,284,141; 1950, \$803,560; 1951, \$741,000.

PROGRAM AND PERFORMANCE

Facilities are provided to enable enlisted personnel of the Marine Corps to deposit their savings with their paymaster wherever they may be stationed. Withdrawals may not be made until final payment on discharge. Obligations shown in the accompanying schedule cover estimated deposits. Total savings on deposit on June 30, 1949, amounted to \$2,885,440 (31 U. S. C. 725s (24); 34 U. S. C. 975).

OBLIGATIONS BY ACTIVITIES

Acceptance of deposits—1949, \$1,284,141; 1950, \$803,560; 1951, \$741,000.

OBLIGATIONS BY OBJECTS

13 Refunds, awards, and indemnities—1949, \$1,284,141; 1950, \$803,560; 1951, \$741,000.

APPROPRIATION OR ESTIMATE

Appropriated (estimate) 1950, **\$803,560** Estimate 1951, **\$741,000**

Pay of the Navy, Deposit Fund—

FUNDS AVAILABLE FOR OBLIGATION: Appropriation or estimate—1949, \$1,839,478; 1950, \$1,450,892; 1951, \$1,262,711.

PROGRAM AND PERFORMANCE

Facilities are provided to enable Navy enlisted personnel or appointed petty officers to deposit their savings with their paymaster wherever they may be stationed. Withdrawals may not be made until final payment on discharge. Obligations shown in the accompanying schedule cover estimated deposits (31 U. S. C. 725s (23); 34 U. S. C. 933, 934).

OBLIGATIONS BY ACTIVITIES

Acceptance of deposits—1949, \$1,839,478; 1950, \$1,450,892; 1951, \$1,262,711.

OBLIGATIONS BY OBJECTS

13 Refunds, awards, and indemnities—1949, \$1,839,478; 1950, \$1,450,892; 1951, \$1,262,711.

Total obligations.....	731,251,899	1,765,271,026	1,513,440,000

PROGRAM AND PERFORMANCE

This appropriation finances the procurement of new aircraft, electronics equipment, and guided missiles, together with such related activities as procurement personnel and industrial mobilization. The estimates contemplate that the requirements of \$1,511,440,000 for 1951 will be met in part through the use of \$726,151,000 of contract authority provided in 1950 which will not be obligated in the current year as a result of the President's determination not to expand the Air Force above the 48-group level. Funds available for obligation in 1950 include \$308,275,215 appropriated in prior years.

1. *Construction and procurement of aircraft and related material.*—Requirements for aircraft procurement are based on the planned size of the active air fleet, together with such factors as aircraft losses, obsolescence, first-line life, missions, and new developments. The estimate for 1951 provides 1,383 airplanes, weighing approximately 21.3 million air-frame pounds, as compared to 1,250 air-

planes in 1950 weighing approximately 23.5 million air-frame pounds. Under present procurement plans, it is estimated that approximately 2,000 airplanes weighing 36 million air-frame pounds will be delivered subsequent to June 30, 1951, from authorizations provided prior to that date. The procurement now planned both for 1950 and 1951 is keyed to a 48-group program and represents a further increment in the modernization of aircraft in this force. Included also are funds for personnel and other administrative and operating costs associated with procurement of aircraft and related material. The work load for personnel is related primarily to the number of active contracts, number of procurement contracts written, and material requiring inspection.

2. *Procurement—(a) Guided missiles.*—This activity provides for the procurement of guided missiles and aerial targets for military operational tests. The guided missiles to be procured for testing include both surface and air launched types, of which some are designed for use against land targets and others against air targets. The requirements under this activity are governed primarily by the rate at which new or improved missiles become available for testing as a result of progress in the research and development program.

(b) *Electronics.*—This provides the equipment necessary to implement new major electronics or communications systems which are Air Force-wide in scope. It provides for modernizing both ground and air installations, the individual modernization programs being phased over periods from 4 to 7 years.

3. *Industrial mobilization.*—This activity provides long-range preparedness plans for the entire Air Force, designed to achieve rapid mass-production of Air Force matériel in the event of war. The civilian personnel in this activity are engaged in the preparation of intradepartmental mobilization plans. Approximately 80 percent of the funds are devoted to industrial preparedness studies through contracts let to private industry.

Total obligations.....	28,422,063	121,625,000	147,900,000

PROGRAM AND PERFORMANCE

This appropriation includes the cost of initial procurement of supplies and equipment not otherwise provided to support aircraft operation, maintenance, and training in the 48-group program.

1. *Weapons and ammunition.*—This activity finances the procurement of all types of small arms and initial spare parts, excluding air-borne weapons and armament, and the procurement of all types of ammunition. The program for 1951 provides for full training allowances and for accelerated procurement of new combat ammunition.

2. *General purpose vehicles.*—This activity provides for the procurement of all vehicles, except special types such as fire trucks. The 1951 program will finance the second increment of a 7-year program of complete vehicle replacement. Approximately 11,700 commercial type vehicles are provided in 1950; 4,250 commercial and 2,550 tactical vehicles are provided in the 1951 program.

3. *Special Air Force equipment.*—This activity provides for procurement of newly developed items such as aerial photographic equipment, ground handling equipment, meteorological equipment, and laboratory and test equipment. Changing strategic and tactical concepts require the constant development of new high-speed, high-altitude and long-range aircraft. Accordingly, new equipment must be developed and procured to support these new types of aircraft as they are delivered and assigned to tactical organizations.

4. *Training aid equipment.*—Provided in this activity are funds for the initial procurement of major training aid equipment, excluding training aircraft. The use of these devices to simulate actual problems in the operation and maintenance of complex aircraft and electronics equipment is a valuable supplement to the training of combat and maintenance personnel with the actual equipment.

PROGRAM AND PERFORMANCE

Funds available under this heading provide for the acquisition of land and the acquisition and construction of facilities for Air Force installations within and without the continental United States. The funds available in 1950 will provide initial increments for the development of an aircraft control and warning system, a long-range proving ground for guided missiles, and an air engineering development center. In continental United States provision is also made for family housing, and overseas for a program of further development of installations in Alaska and on the island of Okinawa. This development includes troop and family housing, technical and operational facilities, and the necessary utility systems and similar supporting requirements. Under the heading of “Military construction, Army,” additional funds are available

in 1950 for continuing construction programs initiated prior to 1950 for the Department of the Air Force.

No new funds have been provided under this appropriation title in 1951 except for the liquidation of contract authority granted in 1950. A department-wide construction program for the Department of Defense is provided as a contingency item in 1951.

PROGRAM AND PERFORMANCE

The funds available in the foregoing schedule are used to finance the procurement of spare parts, fuel and oil, contractual services, materials, civilian personal services, and miscellaneous expenses necessary to keep the aircraft in an operating condition. Expenses of operating and maintaining the ground establishment required to support the Air Force also are included. Initial spares and spare parts procured with new aircraft and special equipment provided for elsewhere are excluded from this schedule.

1. *Operation of aircraft.*—This activity provides for materials, spares and spare parts, and aviation fuel and oil incident to the operation and maintenance of aircraft for the Regular Air Force only and does not include requirements for the Air Force Reserve and the Air National Guard. It also provides for modernization of aircraft in current inventories, contracts for specialized services incident to the operation of aircraft, and requirements for guarding or salvaging wrecked aircraft. The estimate for 1951 for supplies and equipment and for fuel and oil is based on an estimated total of 4.2 million flying hours. This compares with a total of 3.9 million flying hours for 1950 and 4.0 million flying hours flown during 1949. The requirements computed for 1951 will support a 48-group Air Force which is a continuation of the same number of air groups being supported in 1950.

2. *Depot maintenance and supply operations.*—Requirements under this category include funds for pay of civilian personnel, equipment and supplies, contractual services necessary to accomplish depot maintenance of aircraft, special purpose vehicles and equipment, central procurement of supplies and equipment for maintenance and operation of organizations and installations, requirements for modernization of ground equipment, and for expenses of commercial transportation incident to the distribution of matériel. Depot maintenance and supply operations are administered in the Air Force by air matériel area depots in the zone of interior and by theater commands overseas.

There are 12 area air depots and 6 specialized depots whose mission is to furnish supply support to the Air Force, world-wide, and to accomplish specialized work in connection with modernization and modification of aircraft and equipment. Each depot supports Air Force installations within assigned geographical areas. The 1951 budget provides for depot support for an average of 8,800 aircraft in the active inventory.

3. *Maintenance and operations, installations.*—Funds available are applicable for all local expenses incident to ground support of the Air Force throughout the world, except the depot maintenance and supply functions provided for above. Included are maintenance and preservation of real property, all types of housekeeping services, real property rentals, training activities, and engineering planning incident to the development and utilization of physical plant. In 1951, the Air Force will operate an average of 154 active and 55 inactive installations.

4. *Commercial communications system.*—This activity covers the rental of fixed wire communication systems, including weather teletype instruments and flight control interphone equipment. Examples of the types of facilities included are: Military air transport network, Air Force weather teletype network, Air Force weather facsimile map service network, Air Force military flight service communications system, Air Force command communica-

tions network, and aircraft control and warning system. Economies resulting from consolidation of the communication services within the armed forces permit a slight reduction in 1951.

5. *General expenses.*—This activity covers expenses not directly chargeable to other activities, such as expenses of courts-martial, patent fees, customs expenses, disposition of remains, aviation cadet recruitments, and mapping.

APPROPRIATION TEXT

For expenses necessary for the maintenance, operation, and modification of aircraft, and for maintenance, operation, repair, and other expenses necessary for Air Force facilities, including transportation of things; rents at the seat of government and elsewhere, and in administering the provisions of 43 U. S. C. 315q payments of rents may be made in advance; field printing plants; hire of passenger motor vehicles; training and instruction of military and civilian personnel of the Air Force, including tuition and related expenses; pay, allowances and travel expenses of contract surgeons; utility services for buildings erected at private cost as authorized by law (10 U. S. C. 1346), and buildings on military reservations authorized by Air Force regulations to be used for welfare and recreational purposes; rental of land or purchase of options to rent land without reference to section 3648, Revised Statutes, as amended, use or repair of private property, and other necessary expenses of combat maneuvers; expenses of courts, boards, and commissions; *organizational clothing and equipage*; civilian clothing and when necessary an overcoat, the cost of all not to exceed \$30, for persons discharged from military prisons, enlisted men discharged otherwise than honorably, enlisted men convicted by civil courts for offenses resulting in confinement in civil prisons, and

enlisted men interned, or discharged without internment, as alien enemies; payment of exchange fees and exchange losses incurred by Air Force disbursing officers or their agents; losses in the accounts of Air Force disbursing officers as authorized by law (31 U. S. C. 95a; 50 U. S. C. 1705-1707; Act of July 26, 1947, Public Law 248); burial of the dead as authorized by law (10 U. S. C. 916-916d; 5 U. S. C. 103a), including remains of personnel of the Air Force of the United States who die while on active duty, travel allowances of attendants accompanying remains, and acquisition by lease or otherwise of temporary burial sites; conduct of schoolrooms, service clubs, chapels, and other instructional, entertainment, and welfare expenses for enlisted men; expenses for Inter-American cooperation as authorized for the Navy by the Act of August 2, 1946 (5 U. S. C. 421f), for Latin-American cooperation; payments of deficiency judgments and interests thereon arising out of condemnation proceedings heretofore instituted; and special services by contract or otherwise, **[\$1,199,792,000] \$1,041,662,000.** (5 U. S. C. 43; 626, 626c, 627j-1, 901-902, 912, 921, 922; 10 U. S. C. 295, 296, 296a, 298, 298a, 298a-1, 298b, 306, 1334, 1341, 1342; Act of June 9, 1949, Public Law 92; Act of October 28, 1949, Public Law 429; National Military Establishment Appropriation Act, 1950.)

Appropriated 1950, ^a \$1,143,858,000

Estimate 1951, ^b \$1,041,662,000

* The appropriation was reduced to this amount by sec. 702 of the National Military Establishment Appropriation Act, 1950.
 † Includes \$23,992,275 for activities previously carried under appropriations as follows:
 "Construction of aircraft and related procurement, Department of the Air Force"..... \$308,000
 "Military personnel requirements, Department of the Air Force"..... 21,750,000
 "Salaries and expenses, administration, Department of the Air Force"..... 1,482,150
 "Finance service, Army," travel of the Army..... 2,000
 "Medical and hospital department, Army"..... 211,000
 "Engineer service, Army"..... 14,125
 "Medical department, Navy"..... 227,000
 Excludes \$15,707,700 for activities transferred in the estimates as follows:
 "Construction of aircraft and related procurement, Department of the Air Force"..... 444,100
 "Special procurement, Department of the Air Force"..... 11,000,000
 "Salaries and expenses, administration, Department of the Air Force"..... 4,263,600
 The amounts obligated in 1949 and 1950 are shown in the schedule as comparative transfers.

PROGRAM AND PERFORMANCE

This appropriation includes pay and allowances, travel, subsistence, and clothing for all military personnel on extended active duty who are engaged in Air Force activities. Also included are funds for payment of interest on soldiers' deposits, payment of insurance premiums for aviation cadets, expenses incident to the apprehension of

MILITARY PERSONNEL REQUIREMENTS—Con.**Military Personnel Requirements, Department of the Air Force—Continued**

deserters, and the payment of authorized donations to persons discharged for other than honorable reasons. The average strength in 1949 and the planned strengths for 1950 and 1951 are shown in the following table.

	AVERAGE NUMBER		
	1949 actual	1950 planned	1951 planned
Officers (excluding nurses).....	53,295	57,706	56,770
Nurses and Women's Medical Specialist Corps.....	611	1,181	1,325
Airmen.....	355,205	355,680	354,791
Aviation cadets.....	1,632	2,543	3,114
Total.....	410,743	417,110	416,000

Of the total strength, 111,690 officers and men will be stationed overseas. This is a decrease of approximately 6.6 percent from the number planned to be overseas in 1950. The 1951 program provides for 31,818 officers and 15,000 men to be on flying status, as compared with 33,920 and 15,223, respectively, in the 1950 program.

Increases in statutory pay rates authorized by the Career Compensation Act, which was effective October 1, 1949, are reflected in the requirements.

PROGRAM AND PERFORMANCE

For the successful conduct of its mission the Air Force must be equipped with aircraft, weapons and other equipment of quality and performance superior to those of any possible enemy. To maintain such superiority requires a continuous program of research and development to apply the latest scientific and technological advances to Air Force requirements and to stimulate scientific research likely to have useful applications in the Air Force. The research and development program of the Air Force is closely coordinated with the corresponding programs of the other military departments by the Research and Development Board of the Department of Defense. This appropriation provides the funds required for the direct costs of the Air Force research and development program except military pay and maintenance of research facilities.

1. *Research.*—The Air Force supports basic and applied research directly applicable to Air Force needs in fields which do not fall within the assigned responsibility of other agencies of the Government, such as the National Advisory Committee for Aeronautics and the Bureau of Standards. Most of the research is performed by private institutions under contract with the Air Force.

2. *Development.*—This activity covers the development of new aircraft and all other types of Air Force weapons and equipment. A substantial portion of the funds goes for the development of the large variety of components necessary for the successful operation of complete weapons systems. The development work is largely accomplished through contracts with industry.

3. *Operational engineering.*—Funds in this category provide for expenses incident to special operational tests of newly developed weapons.

4. *Management and operation.*—The funds under this head cover the salaries of civilian scientists and other employees engaged in research and development activities at Air Force laboratories and research stations, and for the supplies, equipment, and other operating expenses directly attributable to the research and development activities of the Air Force.

AIR FORCE RESERVE—Continued**Air Force Reserve, Department of the Air Force—Continued****PROGRAM AND PERFORMANCE**

The purpose of this appropriation is to provide funds to train qualified officers and airmen of the Air Force Reserve to meet requirements of an expanded United States Air Force in time of war or national emergency.

1. *Maintenance and operation.*—Included are all expenses incident to the maintenance and operation of both installations and aircraft required for execution of the program. The program will be operated at 23 Air Force Reserve training centers of which 5 will be located on regular Air Force bases and 18 operated on rented and leased facilities. Training will be conducted in 25 wings, with an average of 900 active aircraft. Pilots are authorized to fly an average of 80 hours during the year.

2. *Military personnel requirements.*—The training plan for 1951 provides, in general, for a continuation of the 1950 program. It includes funds for pay and allowances for Reserve duty drills, field training, and miscellaneous training, such as attendance at service schools.

Drill pay status is provided in 1951 for an aggregate strength of 68,627, as compared with 67,512 planned for in 1950. Active duty training of 15 days' duration is provided for 49,361 officers and airmen. Provision is also made for the attendance of 1,950 officers and 1,800 airmen at service schools for periods ranging from 30 to 90 days

Total obligations.....	5,700,000	8,667,000	9,600,000

PROGRAM AND PERFORMANCE

This appropriation provides funds for the training and instruction of the Air Reserve Officers' Training Corps which represents the largest and most promising source of junior officers for the Air Force and in addition, is expected to provide a substantial annual flow of graduates into the Air Force flying training program.

1. *Training at Air Force Reserve Officers' Training Corps institutions.*—The program is conducted at colleges and institutions as an elective course for students who desire to acquire knowledge of basic airmanship subjects, to develop qualities of leadership and other attributes essential for a commission and assignment in the Regular Air Force, Air Force Reserve, or the Air National Guard. Academic work for 53,000 students will be offered at 136 institutions, and will consist of a first- and second-year basic course and a first- and second-year advanced course. It is anticipated that the program will produce 5,797 graduates for commission in the Air Force of the United States during the fiscal year 1951.

2. *Training at Air Force Reserve Officers' Training Corps summer camps.*—It is contemplated that approximately 14,500 students will attend summer training camps. These camps are designed to afford practical training to members of the Air Reserve Officers' Training Corps and will enable the individual student to acquire intensive applied training in a specialized field. The 1951 estimate includes funds for the complete cost of the 6-week summer camp training course which extends into the following fiscal year. Accordingly, provision is made for the appropriation to remain available for obligation through the fiscal year 1952.

PROGRAM AND PERFORMANCE

This appropriation provides facilities, supplies and equipment, and pay and allowances essential for the training and maintenance of the Air National Guard. The 1950 program represents a continuation of the plans now in effect to make this force increasingly effective as a mobilization day integral part of the Department of the Air Force. The program for 1951 contemplates that there will be 535 federally recognized combat, air control and warning, and supporting type units, organized into 27 tactical groups. During 1951 the training of the Air National Guard will have as an objective the maintenance of a high degree of operational readiness. A training program will be implemented for airmen and officers to develop their military specialities. An aircraft modernization program is planned and organizational changes are projected to facilitate the mission of the Air National Guard.

1. *Maintenance and operation.*—The maintenance and operation of 113 Air National Guard installations, including the operation and maintenance of unit equipment and the procurement of supplies and matériel, will be required

in 1951 to carry out the program. An average of 2,500 aircraft will be operated to provide 420,060 flying hours. Tactical and support pilots will be authorized to fly an average of 110 and 80 hours respectively.

2. *Distribution of materials.*—Provision has been made for the transportation costs of supplies and equipment for use in the training and maintenance of Air National Guard units.

3. *Military personnel requirements.*—The plans provide for 7,167 officers and 42,333 airmen, for a total of 49,500, as compared with 45,500 planned in 1950, to be eligible for training pay. The program will consist of 48 inactive-duty training assemblies and 15 days' active duty field training. Service, technical schools, and on-the-job training are planned for 2,131 officers and 3,058 airmen. Funds for pay and allowances, uniforms, hospitalization, and burial expenses are also included.

4. *Construction of buildings, utilities, flying fields, and other facilities.*—Funds have been provided in 1950 for the construction of hangars, administration buildings, parking aprons, warehouses, motor maintenance shops, crash fire stations, air direction centers, air control centers, fuel storage systems, and for engineering, design, and inspection costs incidental to the construction program. No additional funds have been provided in 1951, however, as the program will continue with funds currently available.

PROGRAM AND PERFORMANCE

This appropriation provides funds for the management and administration of the Air Force, including policy, planning, executive direction, and inspection.

Funds in this appropriation are used to support the following organizations: The Office of the Secretary of the Air Force; Headquarters, United States Air Force; and major command headquarters in continental United States and abroad. Also included are funds for service-wide administrative functions such as printing, worldwide tabulating machine rentals, communication services, and supplies and equipment, and permanent change of station travel for all civilian employees of the Air Force.

Prior to 1949, many of the activities carried out under this appropriation were provided through Department of the Army appropriations. With the creation of the Air Force as a separate military department, each Air Force command and headquarters expanded during 1949 in order to carry out the responsibilities implied in the departmental status of the Air Force and assumed management of its own operations independently of the Army. By the end of 1949, sufficient progress in this direction had been made for the various commands to begin stabilizing their organization, procedures, and operations. Further progress is anticipated during 1950, and, as further experience accumulates, it is possible to plan for more efficient operations through improved management techniques during 1951.

OBLIGATIONS BY ACTIVITIES

APPROPRIATION TEXT

For expenses necessary for the administration of the Air Force at the seat of government and at headquarters of major commands, including personal services; transportation of things; hire of passenger motor vehicles; and travel expenses, transportation of depend-

ents, baggage, and household effects of civilian employees upon permanent change of station, **[\$58,425,000]** \$58,545,000. (5 U. S. C. 1, 43, 73, 73b-1, 626, 626a-c, 627j-1; 31 U. S. C. 588; Act of June 9, 1949, Public Law 92; Act of October 28, 1949, Public Law 429; National Military Establishment Appropriation Act, 1950.)

Appropriated 1950, **a \$57,242,000** Estimate 1951, **b \$58,545,000**

^a The appropriation was reduced to this amount by sec. 702 of the National Military Establishment Appropriation Act, 1950.

^b Includes \$4,332,040 for activities previously carried under appropriations as follows:

"Maintenance and operations, Department of the Air Force"..... \$4,263,600

"Salaries, Department of the Army," Office of the Secretary of the Army..... 68,440

Excludes \$4,143,650 for activities transferred in the estimates as follows:

"Construction of aircraft and related procurement, Department of the Air Force"..... 30,800

"Maintenance and operations, Department of the Air Force"..... 1,482,150

"Contingencies, Department of the Air Force"..... 2,630,700

The amounts obligated in 1949 and 1950 are shown in the schedule as comparative transfers.

Appropriated (estimate) 1950, **\$3,000** Estimate 1951, **\$3,000**

Estates of Deceased Personnel, Department of the Air Force—

FUNDS AVAILABLE FOR OBLIGATION: Appropriation or estimate—1949, \$2,201; 1950, \$3,000; 1951, \$3,000.

PROGRAM AND PERFORMANCE

Proceeds from sale of the estates and effects of deceased personnel are held in trust for the payment of claims (decision of Comptroller General, Apr. 3, 1931, A-35988; 31 U. S. C. 725s).

OBLIGATIONS BY ACTIVITIES

Payment of claims—1949, \$2,201; 1950, \$3,000; 1951, \$3,000.

OBLIGATIONS BY OBJECTS

13 Refunds, awards, and indemnities—1949, \$2,201; 1950, \$3,000; 1951, \$3,000.

APPROPRIATION OR ESTIMATE

Appropriated (estimate) 1950, **\$3,000** Estimate 1951, **\$3,000**

Estates of Deceased Soldiers, Regular Air Force—

FUNDS AVAILABLE FOR OBLIGATION: Appropriation or estimate—1949, \$60,207; 1950, \$60,000; 1951, \$60,000.

PROGRAM AND PERFORMANCE

Funds in the account are the net proceeds of the sales of unclaimed effects of deceased soldiers who died in military hospitals, including effects of deceased inmates of the United States Soldiers' Home. Funds are held in the account for three fiscal years subsequent to death of the soldier, and are available for settlement of claims of heirs or legal representatives of the deceased. Unclaimed balances of individual accounts are then transferred to "Soldiers' Home, permanent fund" (10 U. S. C. 1584-1584b; 31 U. S. C. 725s).

OBLIGATIONS BY ACTIVITIES

Settlement of claims—1949, \$60,207; 1950, \$60,000; 1951, \$60,000.

OBLIGATIONS BY OBJECTS

13 Refunds, awards, and indemnities—1949, \$60,207; 1950, \$60,000; 1951, \$60,000.

APPROPRIATION OR ESTIMATE

Appropriated (estimate) 1950, **\$60,000** Estimate 1951, **\$60,000**

Pay of the Air Force, Deposit Fund—

FUNDS AVAILABLE FOR OBLIGATION: Appropriation or estimate—1949, \$4,461,688; 1950, \$8,000,000; 1951, \$8,000,000.

PROGRAM AND PERFORMANCE

Deposits represent savings of enlisted men held in trust during the period of their enlistment. Repayments are made to the enlisted men upon discharge or to the heirs or representatives of deceased depositors. The account is exempt from liability for a soldier's debts; it is not subject to forfeiture by sentence of court martial, but is forfeited by desertion (10 U. S. C. 906; 31 U. S. C. 275s).

OBLIGATIONS BY ACTIVITIES

Repayment of deposits—1949, \$4,461,688; 1950, \$8,000,000; 1951, \$8,000,000.

OBLIGATIONS BY OBJECTS

13 Refunds, awards, and indemnities—1949, \$4,461,688; 1950, \$8,000,000; 1951, \$8,000,000.

APPROPRIATION OR ESTIMATE

Appropriated (est.) 1950, **\$8,000,000** Estimate 1951, **\$8,000,000**

Purchase of United States Savings Bonds, Overseas, Department of the Air Force—

FUNDS AVAILABLE FOR OBLIGATION: Appropriation or estimate—1949, \$161,498; 1950, \$175,000; 1951, \$175,000.

PROGRAM AND PERFORMANCE

Cash collections are received from military and civilian personnel overseas and from tactical organizations in the United States for the purchase of United States savings bonds (31 U. S. C. 725s).

OBLIGATIONS BY ACTIVITIES

Purchase of savings bonds—1949, \$161,498; 1950, \$175,000; 1951, \$175,000.

OBLIGATIONS BY OBJECTS

13 Refunds, awards, and indemnities—1949, \$161,498; 1950, \$175,000; 1951, \$175,000.

APPROPRIATION OR ESTIMATE

Appropriated (estimate) 1950, **\$175,000** Estimate 1951, **\$175,000**

Refund of Unapplied Balances of Class "A" Pay Reservations of Mentally Incompetent and Deceased Employees, United States Savings Bonds, Department of the Air Force—

FUNDS AVAILABLE FOR OBLIGATION: Appropriation or estimate—1949, \$450; 1950, \$1,000; 1951, \$1,000.

PROGRAM AND PERFORMANCE

These deposits represent the unapplied balances of pay reservations for United States savings bonds held by a disbursing officer for the account of mentally incompetent or deceased civilian employees of the Department of the Air Force (decision of Comptroller General, Aug. 11, 1943, A-51624; 31 U. S. C. 725s).

OBLIGATIONS BY ACTIVITIES

Refund of deposits—1949, \$450; 1950, \$1,000; 1951, \$1,000.

OBLIGATIONS BY OBJECTS

13 Refunds, awards, and indemnities—1949, \$450; 1950, \$1,000; 1951, \$1,000.

APPROPRIATION OR ESTIMATE

Appropriated (estimate) 1950, **\$1,000** Estimate 1951, **\$1,000**

GENERAL PROVISIONS—DEPARTMENT OF DEFENSE

APPROPRIATION TEXT

SEC. 601. During the current fiscal year, the Secretary of Defense and the Secretaries of the Air Force, Army, and Navy, respectively, if they should deem it advantageous to the national defense, and if in their opinions the existing facilities of the [National Military Establishment or the] Department [concerned] of Defense are inadequate, are authorized to procure services in accordance with section 15 of the Act of August 2, 1946 (5 U. S. C. 55a), but at rates for individuals not in excess of \$50 per day, and to pay in connection therewith travel expenses of individuals, including actual transportation and per diem in lieu of subsistence while traveling from their homes or places of business to official duty station and return as may be authorized [in travel orders or letters of appointment] by law.

SEC. 602. Section 3648, Revised Statutes, shall not apply, in the case of payments made from appropriations contained in this Act, (1) to payments made in compliance with the laws of foreign countries or their ministerial regulations, (2) to payments for rent in such countries for such periods as may be necessary to accord with local custom, or (3) to payments made for tuition.

SEC. 603. During the current fiscal year, provisions of law prohibiting the payment of compensation to, or employment of, any person not a citizen of the United States shall not apply to personnel of the [National Military Establishment] Department of Defense.

SEC. 604. The appropriations contained in this Act shall not be available for increased pay for flights by nonflying officers at a rate in excess of \$720 per annum, which shall be the legal maximum rate as to such officers, and such nonflying officers shall be entitled to such rate of increase by performing three or more flights of a total duration of not less than four hours within each ninety-day period, pursuant to orders of competent authority, without regard to the duration of each flight.]

SEC. [605] 604. The appropriations in this Act otherwise available for travel or transportation which are current on date of relief from duty station of personnel traveling under orders may be charged with all expenses in connection with such travel including transportation of dependents and household goods, regardless of time of arrival at destination of such personnel.

SEC. [606] 605. During the current fiscal year the dependents and household effects of such [military and] civilian personnel (without regard to [rank or] grade) of the [Air Force or Army] Department of Defense on duty at stations outside the continental limits of the United States, or in Alaska, as may be determined upon by the Secretary concerned, may, prior or subsequent to the issuance of orders for the relief of such personnel from their stations, [or subsequent to the discharge or release of such personnel from active military service,] be moved (including packing and unpacking of household effects) from such stations outside the continental limits of the United States, or in Alaska, to such locations as may be designated by such personnel (subject to the approval of the Secretary concerned), by the use of either Government or commercial means of transportation, and later from such locations to the duty stations to which such personnel may be ordered, and current appropriations available for travel and transportation may be used for this purpose, the decision of the Secretary concerned to be final as to the dependency of any individual sought to be affected by this provision except as to travel performed subsequent to arrival in the United States.

SEC. [607] 606. Appropriations contained in this Act available for travel shall be available for all expenses incident to attendance at meetings of technical, scientific, professional, or other similar organizations.

SEC. [608] 607. No part of any money appropriated herein or included under any contract authority herein granted shall be expended for the payment of any commission on any land purchase contract in excess of 2 per centum of the purchase price.

SEC. [609] 608. No part of any appropriation contained in this Act shall be used to pay the salary or wages of any person who engages in a strike against the Government of the United States or who is a member of an organization of Government employees that asserts the right to strike against the Government of the United States, or who advocates, or who is a member of an organization that advocates, the overthrow of the Government of the United States by force or violence: *Provided*, That for the purposes hereof an affidavit shall be considered prima facie evidence that the person making the affidavit has not, contrary to the provisions of this section, engaged in a strike against the Government of the United States, is not a member of an organization of Government employees that asserts the right to strike against the Government of the United States, or that such person does not advocate, and is not a member of an organization that advocates, the overthrow of the Government of the United States by force or violence: *Provided further*, That any person who engages in a strike against the Gov-

ernment of the United States or who is a member of an organization of Government employees that asserts the right to strike against the Government of the United States, or who advocates, or who is a member of an organization that advocates, the overthrow of the Government of the United States by force or violence and accepts employment the salary or wages for which are paid from any appropriation in this Act shall be guilty of a felony and, upon conviction, shall be fined not more than \$1,000 or imprisoned for not more than one year, or both: *And provided further*, That the above penalty clause shall be in addition to, and not in substitution for, any other provisions of existing law.

SEC. [610] 609. The appropriations in this Act shall not be available for the pay, allowances, or travel of any member of the Air National Guard, Air Force Reserve, Army National Guard, or the Organized Reserve Corps, for periods of active duty, drills, training, instruction, or other duty for which he may be entitled to receive compensation pursuant to any provisions of law, who may be drawing a pension, retirement pay, disability allowance, disability compensation, or retired pay (where retirement has been made on account of physical disability or age) from the Government of the United States: *Provided*, That nothing in this section or any other provision of law shall be so construed as to prevent the application of funds to the pay, allowances, or travel of any member of the Air National Guard, Air Force Reserve, Army National Guard, Organized Reserve Corps, Naval Reserve, or Marine Corps Reserve, who may waive or relinquish said pension, retirement pay, disability allowance, or disability compensation (where such disability is of such degree as not to prevent acceptance for active Federal duty) for the periods of active duty, field training, instruction, other duty, or drill, for which he may be entitled to receive compensation pursuant to law: *Provided further*, That adjutants general who may be drawing such emoluments may be continued in a federally recognized status without pay under this Act.

SEC. [611]. After June 30, 1949, paid occupancy of the hotel on the grounds of the United States Military Academy on a rental basis by personnel of the services mentioned in the title of the Pay Readjustment Act of 1942 or by their dependents shall not deprive such personnel of money allowances for rental of quarters.]

[The Act of June 30, 1949 (Public Law 154), as amended, making temporary appropriations for the fiscal year 1950 shall not be construed to have in any manner suspended the operation of the Act of July 2, 1945 (Public Law 120, Seventy-ninth Congress), authorizing military personnel to occupy certain Government housing facilities on a rental basis without loss of rental or quarters allowance] 610. *After June 30, 1950, no appropriation contained in this or any other Act shall be available for payment of basic allowances for quarters to personnel of the uniformed services, as defined in the Career Compensation Act of 1949, for any periods during which they occupy, with their dependents, if any, quarters under the jurisdiction (for rental purposes) of any such services: Provided, That this section shall not apply to the rental housing referred to in the Act of August 8, 1949 (Public Law 211), nor to the hotel on the grounds of the United States Military Academy.*

SEC. [612] 611. Such military and naval personnel as may be detailed for duty with agencies not a part of the [National Military Establishment] Department of Defense on a reimbursement basis may be employed in addition to the numbers otherwise authorized and appropriated for.

SEC. 613. No collection or reclamation shall be made by the United States on account of any money paid to assignees, transferees, or allottees, or to others for them, under assignments, transfers, or allotments of pay and allowances made under authority of law where liability might exist with respect to such assignments, transfers, or allotments or the use of such moneys, because of the death of assignors, transferors, or allottees.]

SEC. [614] 612. Appropriations contained in this Act shall be available for insurance of official motor vehicles in foreign countries, when required by laws of such countries; payments in advance of expenses determined by the investigating officer to be necessary and in accord with local custom for conducting investigations in foreign countries incident to matters relating to the activities of the department concerned; *reimbursement of General Services Administration for security guard services for protection of confidential files*; and all necessary expenses, at the seat of government of the United States of America or elsewhere, in connection with (1) instruction and training, including tuition, not otherwise provided for, of civilian employees, (2) printing and binding [communication and other services and supplies as may be necessary to carry out the purposes of this Act], and (3) health programs as authorized by law (5 U. S. C. 150).

SEC. [615] 613. The appropriations contained in this Act for the Air Force, Navy, and for the Army, which are available for the procurement or manufacture of supplies, materials, and equipment

of special or technical design may be used for the development and procurement of gages, dies, jigs, and other special aids and appliances, production studies, factory plans, and other production data, including specifications and detailed drawings, and for the purchase of copyrights and letters patent, applications therefor, and licenses thereunder pertaining to such supplies, equipment, and materials for which the appropriations are made.

SEC. [616] 614. Any appropriation available to the Air Force, Army, or the Navy may, under such regulations as the Secretary concerned may prescribe, be used for expenses incident to the maintenance, pay, and allowances of prisoners of war, other persons in Air Force, Army, or Navy custody whose status is determined by the Secretary concerned to be similar to prisoners of war, and persons detained in such custody pursuant to Presidential proclamation.

[SEC. 617. When personnel of the Air Force or Army are ordered to make any permanent change of station, motor vehicles owned by them for their personal use (not to exceed one vehicle per person) may be transported to their new posts of duty on Government-owned vessels.]

SEC. [618] 615. During the current fiscal year, without deposit to the credit of the Treasurer of the United States and withdrawal on money requisitions, receipts of public moneys from sales or other sources by officers of the [Air Force or the Army] *Department of Defense* on disbursing duty and charged in their official accounts, except receipts to be credited to river and harbor and flood-control appropriations, may be used by them as required for current expenditures, all necessary bookkeeping adjustments of appropriations, funds, and accounts to be made in the settlement of their disbursing accounts.

SEC. [619] 616. The *Secretary of the Army*, the Secretary of the Air Force, and the Secretary of the Navy are authorized to expend out of *Army*, Air Force or Navy appropriations available for construction or maintenance such amounts as may be required for minor construction (except living quarters), extensions to existing structures and improvements at facilities of the department concerned, but the cost of any project authorized under this section which is not otherwise authorized shall not exceed \$30,000 [except that, whenever in the judgment of the Secretary of Defense the interests of national defense so require, such appropriations shall be available for construction projects of a temporary nature without regard to such limitation, and the cost of any such temporary project authorized under this section which is not otherwise authorized shall not exceed \$100,000]; *Provided, That the cost limitations of this section shall not apply to the appropriations for "Contingencies of the Army", "Army National Guard", "Organized Reserves", and "Contingencies of the Air Force".*

SEC. [620. During the current fiscal year, appropriations contained in this Act (except those for liquidation of prior contract authorizations) shall not be obligated for construction of family quarters for personnel at a cost per family unit in excess of \$14,040 on housing units for generals; \$12,040 on housing units for majors, lieutenant colonels and colonels, or equivalent; \$11,040 on housing units for second lieutenants, lieutenants, captains, and warrant officers, or equivalent; or \$10,040 on housing units for enlisted personnel, except that when such units are constructed outside the continental United States or in Alaska, the average cost per unit of all such units shall not exceed \$25,850 and in no event shall the individual cost exceed \$35,000.] 617. The last proviso of section 3 of the Act of June 12, 1948 (Public Law 626), and the last proviso in the next to last paragraph of section 3 of the Act of June 16, 1948 (Public Law 653), shall not be applicable to appropriations [contained in this Act, in the Military Functions Appropriation Act, 1949, or in the Second Deficiency Appropriation Act, 1948] *made herein or heretofore to carry out such Acts*, in cases where the Secretary of the Department concerned determines that the erection of prefabricated family quarters will be more advantageous to the United States than multiple type dwellings of conventional construction.

[SEC. 621. After June 30, 1949, in the discretion of the head of the department or organization concerned, (1) services, work, supplies, materials, and equipment may be rendered or supplied by one department or organization within the National Military Establishment to another such department or organization without reimbursement or transfer of funds; and (2) the pay and allowances, including transportation of dependents and household goods on a reimbursable or other basis, as authorized by law, of military, naval, or civilian personnel of one department or organization of such establishment detailed or assigned to duty with another such department or organization, may be charged to the appropriations otherwise available for such purposes to the department or organization to which detailed or assigned.]

SEC. [622] 618. (a) All negotiated contracts for procurement in excess of \$1,000 entered into during the *current* fiscal year [1950] by or on behalf of the Department of Defense (including the Department of the Army, Department of the Navy, and Department

of the Air Force), and all subcontracts thereunder in excess of \$1,000, are hereby made subject to the Renegotiation Act of 1948 in the same manner and to the same extent as if such contracts and subcontracts were required by such Act to contain the renegotiation article prescribed in subsection (a) of such Act. Each contract and subcontract made subject to the Renegotiation Act of 1948 by this section shall contain an article stating that it is subject to the Renegotiation Act of 1948. In determining whether the amounts received or accrued to a contractor or subcontractor during his fiscal year from contracts and subcontracts subject to the Renegotiation Act of 1948 amount in the aggregate to \$100,000, receipts or accruals from contracts and subcontracts made subject to such Act by this section shall be added to receipts or accruals from all other contracts and subcontracts subject to such Act.

(b) Notwithstanding any agreement to the contrary, the profit limitation provisions of the Act of March 27, 1934 (48 Stat. 503, 505), as amended and supplemented, shall not apply to any contract or subcontract which is subject to the Renegotiation Act of 1948.

[SEC. 623. No funds shall be obligated by any department or agency of the National Military Establishment for research and development or for industrial mobilization except in accordance with such regulations as may be prescribed by the Secretary of Defense, and such regulations may provide for modification or termination of existing contracts for such purposes in accordance with the terms of such contracts.]

[SEC. 624. The appropriations in this Act under the headings "Quartermaster Service, Army", "Signal Service of the Army", "Medical and Hospital Department", "Engineer Service, Army", "Ordnance Service and Supplies", and "Chemical Service, Army", shall each be available for the pay and allowances, including travel allowances, of such Reserve officers as the President may, with their consent, order to active duty for such periods, not in excess of two years, as their service may be required in the procurement or production of equipment therein appropriated for.]

SEC. [625] 619. Appropriations for the Air Force and the Army for the current fiscal year shall be available for carrying out the purposes of Executive Order 9112 of March 26, 1942; for expenses in connection with the administration of occupied areas; for distribution of trophies and devices as authorized by law; for actual and necessary expenses or per diem in lieu thereof authorized by [section 12 of the Pay Readjustment Act of 1942, as amended] *law*; and for primary and secondary schooling for dependents of military and civilian personnel of the [National Military Establishment] *Department of Defense* residing on military installations or stationed in foreign countries, but in amounts not exceeding \$140 per child in the United States, when the Secretary of the department concerned finds that schools, if any, available in the locality, are unable to provide adequately for the education of such dependents; and appropriations for the Air Force for the current fiscal year shall be available for expenses of temporary duty travel of military personnel and for travel expenses of civilians (other than on permanent change of station) traveling in connection with the activities of the Air Force.

SEC. [626] 620. No part of any [Air Force or Army] appropriation made by this Act shall be used in any way to pay any [expense] *direct expenses (excluding overseas transportation of goods)* in connection with the maintenance, conduct, operation, or management of [any] *Navy exchanges, post [exchange] exchanges, branch [exchange] exchanges, or [subexchange within any State, Territory, or the District of Columbia, save and] subexchanges, or similar retail sales outlets, except [for real assistance and convenience] where reimbursement for such expenses is to be made to the appropriations concerned from the proceeds of sales in said activities* under such regulations as the Secretary of [the department concerned] *Defense* may [prescribe,] *approve*; *Provided, That sales at such activities may be made to such personnel as are now or may be hereafter authorized by law [and regulation] to purchase subsistence stores or other supplies and to civilians employed or serving at military posts [in supplying them with articles of small personal needs, not similar to those furnished by the Government: Provided, That the commanding officer of the post at which any such exchange is situated shall certify on the monthly report of the post-exchange council that such exchange was, during the period covered by such report, operated in compliance with this section: Provided further, That at posts isolated from a convenient market the Secretary of the department concerned may broaden the nature of the articles to be sold]: Provided further, That, under unusual or extraordinary circumstances, the cost of pay and allowances of military personnel may, in the discretion of the Secretary of Defense, be excluded from the reimbursement required under this section.*

[SEC. 627. Provisions of this Act granting authority to the Department of the Army or the Secretary of the Army, or referring to military or civilian personnel of the Department of the Army, shall be applicable to the Department of the Air Force, the Secretary of the Air Force, and military or civilian personnel of the Department of the Air Force with respect to funds allocated or otherwise made

available from Army appropriations to or for the Department of the Air Force or personnel thereof: *Provided*, That amounts transferred to the Department of the Air Force under section 306 of the National Security Act of 1947 (Public Law 253, approved July 26, 1947) shall be available for personal services at the seat of Government without regard to the availability of such funds for that purpose under applicable provisions and restrictions of this Act.]

SEC. 628. 621. Appropriations for the Navy for the current fiscal year shall be available for expenses in connection with the transfer to the United States of foreign vessels, including pay, subsistence, transportation, and repatriation of alien crews; expenses including those heretofore incurred incident to the operation by the Navy of private plants taken over at the direction of the President, and the Secretary of the Navy may designate any naval appropriation to be charged with such expenses, proper adjustment to be made on the basis of final costs between applicable appropriations; payment of rewards, as authorized by law, for information leading to the discovery of missing naval property or the recovery thereof, and contributions for the support of schools for dependents of military and civilian personnel of the [National Military Establishment] Department of Defense as authorized by section 13 of the Act of August 2, 1946 (5 U. S. C. 421d).

SEC. 629. No part of any appropriation contained in this Act shall be used directly or indirectly, except for temporary employment in case of emergency, for the payment of any civilian for services rendered by him on the Canal Zone while occupying a skilled, technical, clerical, administrative, executive, or supervisory position unless such person is a citizen of the United States of America or of the Republic of Panama: *Provided, however*, (1) That, notwithstanding 622. *Notwithstanding* the provision in the Act approved August 11, 1939 (53 Stat. 1409), limiting employment in [the above-mentioned] certain positions to citizens of the United States [from and after the date of approval of said Act], citizens of Panama may be employed in such positions; (2) that at no time shall the number of Panamanian citizens employed in the above-mentioned positions exceed the number of citizens of the United States so employed, if United States citizens are available in continental United States or on the Canal Zone; (3) that nothing in this Act shall prohibit the continued employment of any person who shall have rendered fifteen or more years of faithful and honorable service on the Canal Zone; (4) that in the selection of personnel for skilled, technical, administrative, clerical, supervisory, or executive positions, the controlling factors in filling these positions shall be efficiency, experience, training, and education; (5) that all citizens of Panama and the United States rendering skilled, technical, clerical, administrative, executive, or supervisory service on the Canal Zone under the terms of this Act (a) shall normally be employed not more than forty hours per week, (b) may receive as compensation equal rates of pay based upon rates paid for similar employment in continental United States plus 25 per centum; (6) this entire section shall apply only to persons employed in skilled, technical, clerical, administrative, executive, or supervisory positions on the Canal Zone directly or indirectly by any branch of the United States Government or by any corporation or company whose stock is owned wholly or in part by the United States Government: *Provided further*, That the President may suspend from time to time in whole or in part compliance with this section if he should deem such course to be in the public interest.]

SEC. 630. 623. The powers and duties vested in the Secretaries of the Army and the Navy with respect to civil-service employees of their Departments by section 3 of the Act of December 17, 1942 (56 Stat. 1053), shall, during the current fiscal year, be vested also in the Secretary of Defense with respect to civil-service employees of all agencies of the [National Military Establishment] Department of Defense other than the Department of the Army, Navy, and Air Force, and in the Secretary of the Air Force with respect to civil-service employees of the Department of the Air Force. The provisions of section 6 of the Act of August 24, 1912 (37 Stat. 555), shall not apply to any civil-service employees with regard to whom the powers granted in this section are exercised: *Provided*, That nothing in this section shall repeal or modify any existing powers and duties of the Secretary of Defense, the Secretary of the Navy, the Secretary of the Army or the Secretary of the Air Force under section 3 of the Act of December 17, 1942 (56 Stat. 1053).

[SEC. 631. No funds herein appropriated shall be available to pay for the services or support of personnel enlisted after enactment of this Appropriation Act under the provisions of section 4 (g) of the Selective Service Act of 1948 (Public Law 759, Eightieth Congress).]

SEC. 632. (a) 624. Insofar as practicable, the Secretary of Defense shall assist American small business to participate equitably in the furnishing of commodities and services financed with funds appropriated under this Act by making available or causing to be made available to suppliers in the United States, and particularly to small independent enterprises, information, as far in advance as possible, with respect to purchases proposed to be financed with

funds appropriated under this Act, and by making available or causing to be made available to purchasing and contracting agencies of the [National Military Establishment] Department of Defense information as to commodities and services produced and furnished by small independent enterprises in the United States, and by otherwise helping to give small business an opportunity to participate in the furnishing of commodities and services financed with funds appropriated by this Act.

[(b) The Secretary shall appoint or assign a special assistant to advise and assist him in carrying out the foregoing subsection (a). A report of all activities under this section shall be prepared and transmitted to the Congress as soon as practicable after June 30, 1950.]

[SEC. 633. In order to clarify the original intent of Congress, hereafter, section 2 and that part of section 3 (a) preceding the words "*Provided, however*," of title III of the Act of March 3, 1933 (47 Stat. 1520), shall be regarded as requiring the purchase, for public use within the United States, of articles, materials, or supplies manufactured in the United States in sufficient and reasonably available commercial quantities and of a satisfactory quality, unless the head of the department or independent establishment concerned shall determine their purchase to be inconsistent with the public interest or their cost to be unreasonable.]

SEC. 625. *During the current fiscal year, commuted rations for enlisted personnel of the uniformed services (as defined in the Career Compensation Act of 1949) on leave, or otherwise authorized to mess separately, shall be at the rate of \$0.90 per diem.*

SEC. 626. *No appropriation contained in this Act shall be available for expenses of operation of messes (other than organized messes which are financed principally from nonappropriated funds) at which meals are sold to officers or civilians except under regulations approved by the Secretary of Defense, which shall (except under unusual or extraordinary circumstances) establish rates for such meals sufficient to provide reimbursement of operating expenses and food costs to the appropriations concerned: Provided, That, for the purposes of this section, deductions for meals at the rates established hereunder may be made from the pay of civilian employees in lieu of the reimbursement otherwise required.*

SEC. 627. *No payment shall be made from appropriations in this Act to any officer on the retired lists of the Regular Army, Regular Navy, Regular Marine Corps, or Regular Air Force, who for himself, or for others, is engaged in the selling of, or contracting for the sale of, or negotiating for the sale of, to any agency of the Department of Defense, any war materials or supplies.*

SEC. 628. *No appropriation contained in this Act shall be available for any direct expense (including commercial transportation in the United States to the place of sale) in connection with the maintenance, conduct, operation, or management of sales commissaries or commissary stores of agencies of the Department of Defense, except where reimbursement for such expenses is to be made, in accordance with regulations approved by the Secretary of Defense, to the appropriations concerned from the proceeds of sales therein: Provided, That hereafter the proviso under the head "*Subsistence of the Army*," in the Army Appropriation Act, fiscal year 1885, shall not apply to sales by sales commissaries or commissary stores and such sales shall not be made at prices insufficient to cover the direct expenses of said activities and the cost of articles sold: Provided further, That, under unusual or extraordinary circumstances, the cost of pay and allowances of military personnel may, in the discretion of the Secretary of Defense, be excluded from the reimbursements required under this section.*

SEC. 629. *No part of any appropriation contained in this Act shall be available until expended unless expressly so provided elsewhere in this or some other appropriation Act.*

SEC. 630. *No appropriation contained in this or any other Act shall be available for the pay and allowances of a higher rank, for any officer of the Army, Navy, Marine Corps, or Air Force (including the Reserve components thereof) who is hereafter advanced or promoted to a higher rank, for any period prior to the date on which the orders, or other official notice, effecting the advancement or promotion are issued.*

SEC. 631. *No appropriation contained in this Act shall be available for the pay, allowances, or other expenses of any military personnel or civilian employees under the Department of Defense performing service in the residence or quarters or messes or clubs of an officer or officers except in the case of (1) those who have specifically enlisted for such duty and are serving on board ships, (2) those performing service in the residence or quarters of attachés abroad as authorized by the appropriate Secretary, and (3) those assigned in accordance with regulations approved by the Secretary of Defense, which shall establish uniform practices among the services relative to the assignment of personnel to perform such service, and may provide, in the discretion of the Secretary of Defense, for deposit by the officer, officers, or organization concerned, into miscellaneous receipts of the Treasury, of an amount equivalent to the pay and allowances of such personnel for the periods so assigned: Provided, That nothing herein shall be construed as preventing the voluntary employment in any such capacity of retired enlisted person-*

nel or transferred members of the Fleet Reserve without additional expense to the Government, nor the voluntary employment in any such capacity of enlisted personnel outside normal hours of duty without additional expense to the Government, nor the sale of meals to officers by troop messes, or general messes on shore, as regulated by instructions approved by the Secretary of Defense.

SEC. 632. No part of any appropriation contained in this Act shall be available for or on account of the supply or replacement of table linen, dishes, glassware, silver, and kitchen utensils for use in the residences or quarters of officers on shore (other than for field messes, messes temporarily set up on shore for bachelor officers and officers attached to seagoing or district defense vessels, to aviation units based on seagoing vessels, to the fleet air bases, to the submarine bases, or to landing forces and expeditions), except in accordance with regulations approved by the Secretary of Defense, which shall provide for uniform practices among all of the services.

SEC. 633. The provisions of the Act of February 9, 1946 (60 Stat. 3), shall be applicable to the appropriations of the Army and Air Force

for military pay for the fiscal year 1950 and the current fiscal year, upon certification by the appropriate agency of the Department concerned. (National Military Establishment Appropriation Act, 1950.)

REDUCTION IN APPROPRIATIONS

SEC. 701. The contract authorization granted under the head "Ordnance for New Construction," in title IV of the "National Military Establishment Appropriation Act, 1950," is reduced by the sum of \$31,460,000 and the amount of the limitation imposed by the proviso under said head on the total obligations to be incurred for armor, armament, and ammunition, for construction, conversion, or replacement approved during the fiscal year 1950, is also reduced by the sum of \$31,460,000.

PROPOSED LEGISLATION

St. Lawrence Seaway and Power project, Corps of Engineers, civil functions.—There is included in the Budget under proposed legislation \$6,000,000 for preliminary work preparatory to large-scale construction of the St. Lawrence Seaway and Power project.

Other.—In addition, estimated amounts of \$131,722,000 in appropriations and \$240,000,000 in contract authority are included for 1951, to cover items which may be authorized under new legislation for military programs, including \$300,000,000 for public works.

PROGRAM AND PERFORMANCE

1. *Departmental direction.*—This activity covers the secretarial offices (including the Secretary, Under Secretary, and Assistant Secretaries), the Division of Information, and the Suggestions Committee. The increase proposed for 1951 will provide for strengthening of the secretarial offices, some expansion of the information activities, and the expenses of the suggestions committee, which heretofore has been financed on a reimbursable basis.

2. *Program direction and coordination.*—Staff assistance is provided for the secretariat on matters of policy involving electric power, oil and gas, soil and moisture conservation, and other fields related to the domestic welfare and the conservation and development of our natural resources. The 1951 estimates contemplate some expansion and strengthening of the organizations engaged in this work.

3. *Administrative management services.*—The estimate for 1951 provides for staff to make more effective the

budget, finance, personnel, property, and management improvement operations of the Department.

4. *Legal services.*—The Solicitor's Office is responsible for providing legal advice to the Secretary and other departmental officers. The estimate for 1951 anticipates a small expansion in the existing organization and the re-opening of the branch office in Alaska to serve the several constituent units of the Department functioning in the Territory.

STANDARDIZATION OF GEOGRAPHIC NAMES

[Salaries and expenses, Board on Geographic Names:] For [necessary] expenses [to carry] necessary for carrying out the provisions of the Act of July 25, 1947 [(Public Law 242), establishing a central authority for standardizing geographic names] (43 U. S. C. 364), including personal services in the District of Columbia, stationery and office supplies, equipment, and printing and binding, [\$14,200] \$91,400. PROGRAM AND PERFORMANCE

State oil and gas conservation laws are supported by prohibiting the use of interstate facilities for the shipment of contraband oil, or that produced in excess of amounts permitted under State laws and regulations. Enforcement requires the regular inspection of oil fields and individual leases therein, interviewing persons affected by the operations conducted under State and Federal laws, and full cooperation with State authorities. More than 4,500 monthly reports, covering operations in approximately 600 separate oil fields and aggregating over 52,000 producing wells, are reviewed to detect irregularities which are investigated to determine appropriate action. Violations are detected from other sources as well. Strengthening of the staff is provided for in 1951 not only to meet the growing demand in those States with conservation laws of long standing but to extend operations to Mississippi, which has recently enacted an oil and gas conservation statute.

PROGRAM AND PERFORMANCE

The 1951 estimates propose the establishment of a working capital fund for certain central service functions such as reproduction, communications, supply, and library to be provided by the Secretary's Office for bureaus and offices of the Department and other agencies on a reimbursable basis. Heretofore, these operations have been financed from appropriations made to the Office of the Secretary for salaries and for contingent expenses, in addition to reimbursements for work not covered by such appropriations.

APPROPRIATION TEXT

WORKING CAPITAL FUND

For establishment of a working capital fund, to be available without fiscal year limitation, for expenses necessary for the maintenance and operation of (1) a central reproduction service; (2) communication services; (3) a central supply service for stationery, supplies, equipment, blank forms, and miscellaneous materials, for which adequate stocks

may be maintained to meet in whole or in part requirements of the bureaus and offices of the Department in the city of Washington and elsewhere; (4) a central library service; (5) health services; and (6) such other similar service functions as the Secretary determines may be performed more advantageously on a reimbursable basis; \$300,000. Said fund shall be reimbursed from available funds of bureaus, offices, and agencies for which services are performed at rates calculated to return in full all expenses of operation, including reserves for accrued annual leave and depreciation of equipment.

Estimate 1951, \$300,000

Operation and Maintenance, Southeastern Power Marketing Area—

FUNDS AVAILABLE FOR OBLIGATION: Appropriation or estimate—1950, \$70,000; 1951, \$175,000.

PROGRAM AND PERFORMANCE

The Secretary is responsible for the marketing of power generated at multiple-purpose projects constructed or to be constructed by the Corps of Engineers, Department of the Army, in Virginia, North Carolina, South Carolina, Georgia, Alabama, Florida, Tennessee, and Kentucky. By the end of 1953 eight projects are expected to be in operation, with an aggregate installation of 842,400 kilowatts. In 1951 it is proposed to make definite marketing plans for the four projects expected to begin operations in 1952 and 1953, as well as continue the marketing functions in connection with three projects in 1950 and one additional project in 1951. Definitive contracts for the sale of this power and energy must be negotiated and completed, and all arrangements made for the provision of the necessary transmission facilities. The preliminary work in connection with these functions will be performed by the small staff employed in 1950.

Total obligations	189,552	8,097,000	10,994,000

PROGRAM AND PERFORMANCE

The construction program of the Southwestern Power Administration has been planned to provide matching of transmission facilities with scheduled generation. During 1951 the Administration will carry forward construction of transmission facilities previously approved by Congress and continue negotiations with other utilities in the area in an effort to provide service to its customers in the most economical manner consistent with the provisions of section 5 of the Flood Control Act of 1944. In addition, marketing plans and engineering surveys will be made in connection with the marketing of power from other Corps of Engineers projects now under construction. The budget also provides for additional system electric facilities, necessary plant, and equipment for serving both construction and maintenance crews in order to provide such services on an economical basis.

APPROPRIATION TEXT

CONSTRUCTION, SOUTHWESTERN POWER ADMINISTRATION

For construction and acquisition of transmission lines, substations, and appurtenant facilities, and for administrative expenses connected therewith, in carrying out the provisions of section 5 of the Flood Control Act of 1944 (16 U. S. C. 825s), as applied to the southwestern power area, to remain available until expended, \$10,350,000, of which not to exceed \$5,000,000 is for liquidation of obligations incurred pursuant to authority previously granted; and, in addition, the Secretary is authorized to enter into contracts for the purposes of this appropriation in an amount not to exceed \$6,000,000: Provided, That the unexpended balances of funds appropriated under the head "Construction, operation, and maintenance, power transmission facilities" in the Interior Department Appropriation Act, 1950, for the foregoing purposes shall be transferred to and merged with this appropriation.

Estimate 1951, *\$10,350,000

* Estimate is for activities previously carried under "Construction, operation, and maintenance, power transmission facilities, southwestern power area." The amounts obligated in 1949 and 1950 are shown in the schedule as comparative transfers.

Operation and Maintenance, Southwestern Power Administration—

FUNDS AVAILABLE FOR OBLIGATION	1949 actual	1950 estimate	1951 estimate
Appropriation or estimate			\$785,000
Comparative transfer from—			
"Expenses, southwestern power transmission facilities"	\$92,077		
"Construction, operation and maintenance, power transmission facilities, southwestern power area"		\$525,000	
Total obligations	92,077	525,000	785,000

PROGRAM AND PERFORMANCE

The Southwestern Power Administration markets surplus power from multipurpose hydroelectric projects constructed by the Department of the Army in six Southwestern States. To perform these functions it must construct, operate, and maintain a system of high-voltage transmission lines and related facilities; contract for the use of transmission and appurtenant facilities of others; provide for the sale, purchase, and interchange of power; and negotiate and service contracts with wholesale customers.

1. *System operation and maintenance.*—The Administration is operating and maintaining 506 miles of high-voltage transmission lines and related facilities previously constructed for the marketing of power from the Norfolk and Denison projects. These two projects presently have 140,000 kilowatts of installed capacity, and there is scheduled for installation by the Corps of Engineers a 17,000-kilowatt unit at the Narrows project during October 1950. In 1951 it is anticipated that approximately 340 miles of additional transmission lines with the pertinent substations will be completed and ready for operation and maintenance.

2. *Power marketing.*—The Administration will be responsible for marketing power from an estimated 390,200 kilowatts of installed generating capacity by 1955. Co-operative and public bodies have preference rights to this power. It is necessary for the Administration to negotiate and service contracts to carry out this responsibility, including contracts with other utility systems for the interconnection and integration of their systems with the Government's system and provision for the interchange, sale, and purchase of power.

3. *General administration.*—Due to the expansion of the operation, maintenance, and marketing programs for 1951 over 1949 and 1950, additional funds are necessary for the general administration of the program. The estimate for administration is 10.8 percent of the total estimated costs of operation, maintenance, and marketing programs.

PROGRAM AND PERFORMANCE

The Department provides, with funds transferred from the Department of Agriculture, for the control of dangerous insects and diseases which may injure or destroy the forest resources on the public and Indian lands under its jurisdiction.

1. *White pine blister rust control.*—The control work against blister rust is to protect the commercially and scenically important white pines which are found on nearly 700,000 acres of public and Indian forest lands. As of December 31, 1948, 446,883 acres of white pine forest had received the first protective treatment. The control work will continue at its present level through 1951.

2. *Forest Pest Control Act.*—Under this heading, funds are available for forest insect and disease-control operations. Plans for actual control operations are perfected following surveys. Several highly effective operations have been carried out in valuable timber stands in the national parks and national monuments as well as on Oregon and California grant lands.

PROGRAM AND PERFORMANCE

The Department of the Interior assists the Department of State in carrying out the terms of the United States Information and Educational Act of 1948. At the request of the Department of State and with funds furnished by that Department, training and assistance in technical and scientific fields such as fishery resources; geologic investigations; mining, metallurgy, and fuels research; irrigation engineering, flood control and power development, and sanitation engineering are provided to suitable nationals of participating governments. This assistance is given in the United States and abroad.

Appropriated 1950, **\$12,000**Estimate 1951, **\$12,530**

BONNEVILLE POWER ADMINISTRATION

INTRODUCTORY STATEMENT

The Bonneville Power Administration has the responsibility for marketing the power generated at 15 existing and authorized Federal hydroelectric plants in the Pacific Northwest. The total ultimate capacity of these plants will be 6,090,000 kilowatts. Existing facilities, both generation and transmission, were inadequate to meet requirements in 1948, resulting in the curtailment of electric power to certain customers who were being provided service on an interruptible basis, plus a voluntary program of service curtailment. Although additional generation is scheduled for 1950 and 1951, it is estimated that the area will be faced with recurring shortages annually at least until 1953 when additional generation from the Hungry Horse, McNary, and Detroit projects will be available.

The total operating revenues in 1949 were \$27,821,000, and it is anticipated that these will be increased to \$30,250,000 for 1950 and \$32,350,000 for 1951. It is estimated that the net revenues shown above will exceed financial requirements for each of the above years.

Total obligations.....	32,014,503	33,625,466	46,805,000

PROGRAM AND PERFORMANCE

The construction program of the Bonneville Power Administration has been planned to provide matching of transmission facilities with scheduled generation. During 1951, the Administration will carry forward construction of transmission facilities previously approved by Congress and initiate construction of new facilities to conform with generation schedules as shown below:

Project	Jurisdiction	First generation	Maximum capacity (kilowatts)	
			Present or initial	Ultimate
Bonneville.....	Corps of Engineers.....	In operation.....	564,000	564,000
Grand Coulee.....	Bureau of Reclamation.....	do.....	1,440,000	2,172,000
Hungry Horse.....	do.....	1952.....	150,000	300,000
McNary.....	Corps of Engineers.....	1953.....	140,000	980,000
Detroit.....	do.....	1953.....	118,000	118,000

In addition, plans will be developed in connection with the marketing of power from Chief Joseph Dam under construction on the main stem of the Columbia River by the Army engineers and the series of authorized dams on the lower Snake River in Washington.

Between now and December 1953, three major new power plants at Hungry Horse, Detroit, and McNary dams will be added to the Federal system. The generation to be added by these plants, along with the generating capacity still to be added at Grand Coulee Dam, requires the additional transmission facilities provided for in the budget to carry the power from the source of generation to the principal load centers.

In addition to basic 230-kilovolt grid requirements, the budget provides facilities to supply power to adjacent areas and to connect customers with the transmission grid system at appropriate delivery voltages.

Also, provision has been made for additional system electrical facilities, necessary plant, and equipment for servicing both the construction and maintenance crews in order to provide such services on an economical basis.

APPROPRIATION TEXT

CONSTRUCTION

For construction and acquisition of transmission lines, substations, and appurtenant facilities, as authorized by law, to remain available until expended, \$42,000,000, of which not to exceed \$17,000,000 is for liquidation of obligations incurred pursuant to authority previously granted; and, in addition, the Administrator is authorized to enter into contracts for the purposes of this appropriation in an amount not to exceed \$21,750,000: Provided, That unexpended balances of prior year appropriations, including unused balances of related contract authorizations, for the foregoing purposes shall be transferred to and merged with this appropriation. (16 U. S. C. 832-832i; Executive Order 8526; 43 U. S. C. 593-A; 16 U. S. C. 825s; 59 Stat. 10, 21-22; The Interior Department Appropriation Act, 1950.)

Estimate 1951, * \$42,000,000

* Estimate is for activities previously carried under "Construction, operation, and maintenance, Bonneville power transmission system." The amounts obligated in 1949 and 1950 are shown in the schedule as comparative transfers.

Operation and Maintenance, Bonneville Power Transmission System—

FUNDS AVAILABLE FOR OBLIGATION	1949 actual	1950 estimate	1951 estimate
Appropriation or estimate.....			\$5,250,000
Comparative transfer from "Construction, operation, and maintenance, Bonneville power transmission system".....	\$3,520,960	\$4,035,000	
Total obligations.....	3,520,960	4,035,000	5,250,000

PROGRAM AND PERFORMANCE

The estimate for 1951 provides for management of the Administration's regional power network and for power marketing and administration in connection with the disposition of Federal power at wholesale from Bonneville and Grand Coulee Dams.

1. *Maintenance of the transmission system.*—The Federal transmission system in the Pacific Northwest is being expanded at a rate required to dispose of increased generating capacity from Federal hydroelectric projects. The following table indicates the facilities in use as of June 30, 1949, and those scheduled for operation as of June 30, 1950 and 1951.

	June 30, 1949	June 30, 1950	June 30, 1951
Circuit miles of transmission lines.....	3,455	4,000	4,412
Number of substations.....	93	108	122
Capacity of substations (kilovolt-amperes).....	2,964,341	3,458,208	3,853,258
Energy available in average water year (megawatt-hours).....	13,851,144	15,446,872	16,859,232

Extension of the Federal power system as indicated above requires the establishment of additional maintenance depots and additional crews.

2. *Operation of the transmission system.*—The growth of the transmission system and its extension into areas not

previously served by the Federal power system will increase the complexity and extent of this work in 1951. Standard manning of substations will be instituted, and apprentices will be assigned to provide for training of personnel to replace vacant operating positions and to man new substations. Power scheduling and dispatching activities will be increased to permit the management of the additional 3,000,000 megawatt-hours of energy available over that generated in 1949, and the addition of 10 customers and approximately 37 metering or delivery points between June 30, 1949, and June 30, 1951, as indicated in the following table:

	June 30, 1949	June 30, 1950	June 30, 1951
Number of customers.....	96	102	106
Number of metering points.....	203	230	240

These 10 new customers will extend service to 76,200 people, in addition to those now served from the Federal system.

3. *Power marketing.*—Major aspects of this work are related to the planning of transmission facilities, the engineering of potential transmission requirements based on load forecasts, and the economic feasibility of such additions. The integration of additional generating plants now under construction and those authorized for future construction with existing plants on the Columbia River requires detailed consideration of operating plans in order to achieve maximum benefits from the Federal Government's investment in power facilities.

4. *General administration.*—General administration includes policy development and program management activities, fiscal and administrative services, research activities, and other activities not specifically assignable to the operation and maintenance of the system. Increased estimates for these items reflect the increased responsibilities of the Administration.

OBLIGATIONS BY ACTIVITIES

BONNEVILLE POWER ADMINISTRATION—Con.

Operation and Maintenance, Bonneville Power Transmission System—Continued

APPROPRIATION TEXT

OPERATION AND MAINTENANCE

For necessary expenses of operation and maintenance of the Bonneville transmission system and of marketing electric power and energy, \$5,250,000. (16 U. S. C. 832-832l; Executive Order 8526; 43 U. S. C. 593-A; 16 U. S. C. 825s; 59 Stat. 10, 21-22; The Interior Department Appropriation Act, 1950.)

Estimate 1951, • \$5,250,000

* Estimate is for activities previously carried under "Construction, operation, and maintenance, Bonneville power transmission system." The amounts obligated in 1949 and 1950 are shown in the schedule as comparative transfers.

ADMINISTRATIVE PROVISIONS

Appropriations of the Bonneville Power Administration shall be available for personal services in the District of Columbia; purchase (not to exceed twenty-two) and hire of passenger motor vehicles; purchase (not to exceed two) of aircraft; and printing and binding. Appropriations made herein to the Bonneville Power Administration shall be available in one fund: Provided, That any unexpended balance remaining in the appropriation made herein for operation and maintenance shall lapse on July 1, 1953, in accordance with the Act of July 6, 1949 (Public Law 159). (16 U. S. C. 832-832l; Executive Order 8526; 43 U. S. C. 593-A; 16 U. S. C. 825s; 59 Stat. 10, 21-22; The Interior Department Appropriation Act, 1950.)

Columbia Basin Flood Repair, Department of Interior (transfer to Bonneville Power Administration)—

FUNDS AVAILABLE FOR OBLIGATION: Transferred from "Columbia Basin flood repair, Department of the Interior"—1949, \$59,592.

PROGRAM AND PERFORMANCE

This transfer was to reimburse the Bonneville Power Administration for funds used in providing emergency assistance during the flood that occurred in the Columbia Basin in the spring of 1948.

OBLIGATIONS BY ACTIVITIES

Emergency flood assistance—1949, \$59,592.

OBLIGATIONS BY OBJECTS

APPROPRIATION TEXT

Construction, operation, and maintenance, Bonneville power transmission system: To enable the Bonneville Power Administrator to carry out the duties imposed upon him pursuant to law, including the construction of transmission lines, substations, and appurtenant facilities; operation and maintenance of the Bonneville transmission system; marketing of electric power and energy; printing and binding; services as authorized by section 15 of the Act of August 2, 1946 (5 U. S. C. 55a); purchase (not to exceed ten, including one at not to exceed \$2,100, in the current fiscal year, for replacement only) and hire of passenger motor vehicles; and maintenance and operation of aircraft; \$30,284,500, including funds for construction of the Kerr-Anaconda transmission facilities, to be available until expended, of which amount not to exceed \$4,000,000 shall be available in the current fiscal year for operation and maintenance of the Bonneville transmission system, marketing of electric power and energy, and administrative expenses connected therewith, including \$30,000 for personal services in the District of Columbia: Provided, That in addition to this appropriation the Administrator is authorized to contract for materials, equipment and services, for power transmission facilities in an amount not in excess of \$16,239,500: Provided further, That not exceeding 12 per centum of any construction appropriations for the Bonneville Power Administration contained in this Act shall be available for construction work by force account, or on a hired-labor basis, except in case of emergencies, local in character, so declared by the Bonneville Power Administrator. (16 U. S. C. 832-832l; Executive Order 8526; 43 U. S. C. 593-A; 16 U. S. C. 825s; 59 Stat. 10, 21-22; The Interior Department Appropriation Act, 1950.)

Annual specific appropriation:

Appropriated 1950, \$30,284,500

NOTE.—Estimate of \$47,250,000 previously carried under this title has been transferred in the estimates to appropriations as follows:

Operation and maintenance, Bonneville power transmission system..... \$5,250,000
Construction, Bonneville power transmission system..... 42,000,000
The amounts obligated in 1949 and 1950 are shown in the schedule as comparative transfers.

PROGRAM AND PERFORMANCE

The Bureau's work under this appropriation is to administer 737,000,000 acres of public land in the United

States and Alaska in the interest of conserving forest, range, water, and mineral resources. The 1951 program is designed to afford more adequate administration, protection, and utilization of these resources.

1. *Lease and disposal of lands and mineral resources.*—An increase is proposed for 1951 to reduce the accumulated backlog of applications for leases, permits, land patents, and sale of lands; increased revenue will result. The figures are:

	1949 actual	1950 estimate	1951 estimate
Number of cases filed and reopened.....	37, 646	42, 500	47, 000
Number of cases completed.....	34, 217	47, 500	55, 000
Number of cases pending at end of year.....	48, 000	43, 000	35, 000
Treasury receipts from this source.....	\$32, 000, 000	\$33, 900, 000	\$38, 000, 000

2. *Land classification.*—Lands are examined to determine whether they are best adapted to agriculture, grazing, forestry, or other purposes. Specific information is lacking on more than 300 million acres of land in the United States and Alaska on which to base planning operations requiring classification before taking action. The 1951 program will reduce accumulated backlog, meet demands for agricultural settlement in Alaska, and provide for some additional classification work.

3. *Grazing administration.*—The Bureau in the budget year will continue its program for managing 170 million acres of public range lands, improving them, and protecting them from fires. Increased emphasis is proposed on control over the use of the land by the 30,000 users, protection of the range from fire and erosion, necessary surveys for issuing term permits instead of temporary licenses to users, for determining proper degree of stocking and prevention of overgrazing. Reseeding of badly denuded areas will be undertaken in cooperation with range users. Treasury receipts from the program are expected to increase from \$1,230,000 in 1949 to \$1,410,000 in 1951.

4. *Forest management.*—The Bureau manages 160 million acres of forest land (of which 125 million are in Alaska). Timber sales for 1951 are estimated at 550 million board feet, with receipts of \$3,400,000. The 1951 program also contemplates completing plans for sustained yields on 550,000 acres, inventorying resources on 400,000 acres, restocking 10,000 acres, and providing better fire protection.

5. *Cadastral surveys.*—There are over 116 million acres in the United States and over 360 million acres in Alaska unsurveyed for boundaries. The 1951 program will increase the 1950 survey level of approximately 700,000 acres in the United States to 880,000, and will also permit expansion in high priority fields such as special surveys of town sites, and other areas important to the development and land utilization program of Alaska.

6. *Soil and moisture conservation.*—Out of 76 million acres of public land in grazing districts in a state of severe to critical erosion, some work has been done on 16 million acres and in 1951 the work will be extended to an additional 1.5 million acres.

7. *Squaw Butte experiment station.*—The Bureau will continue experiments on methods for rehabilitating, stabilizing, and utilizing range lands.

8. *Fire suppression.*—A token amount is provided, to be supplemented later if needed, for putting out fires on or threatening lands under the Bureau's jurisdiction.

9. *General administration.*—The general supervision and business administration of the Bureau, including all

BUREAU OF LAND MANAGEMENT—Continued**Management of Lands and Resources—Continued**

organizational, legal, and general administrative services, is included in this activity. The 1951 program contemplates a material strengthening of the accounting staff and small additions to the group engaged in other business activities.

Total obligations		200,000	1,100,000

PROGRAM AND PERFORMANCE

The 1950 appropriation act provides a contract authorization for the first time to begin a program of constructing access roads to stands of valuable marketable timber in the Oregon and California grant lands. An increased amount is proposed for 1951 to permit a better utilization of this resource. Funds are also requested in 1951 for the construction of buildings essential to effective operations in Alaska.

OBLIGATIONS BY ACTIVITIES

APPROPRIATION TEXT**CONSTRUCTION**

For construction of access roads; acquisition of rights-of-way and of existing connecting roads; and for acquisition, construction, or reconstruction of buildings and appurtenant facilities; to remain available until expended, \$1,000,000, of which not to exceed \$200,000 is for liquidation of obligations incurred pursuant to authority granted under the head "Revested Oregon and California Railroad and reconveyed Coos Bay Wagon Road grant lands" in the Interior Department Appropriation Act, 1950; and, in addition, the Secretary is authorized to enter into contracts for the purposes of this appropriation in an amount not to exceed \$300,000: Provided, That the amounts of appropriation made or authorization granted herein for road construc-

tion shall be transferred to the Bureau of Public Roads, Department of Commerce. (50 Stat. 874; 16 U. S. C. 594; 43 U. S. C. 2.)

Estimate 1951 • \$1,000,000

* Estimate includes \$900,000 for activities previously carried under the appropriation "Revested Oregon and California Railroad and reconveyed Coos Bay Wagon Road grant lands, Oregon (reimbursable)." The amount obligated for 1950 is shown in the schedule as a comparative transfer.

ADMINISTRATIVE PROVISIONS

Appropriations for the Bureau of Land Management shall be available for personal services in the District of Columbia; purchase (not to exceed forty-three, of which twenty-eight shall be for replacement only) and hire of passenger motor vehicles; purchase of two aircraft; printing and binding; and alteration and maintenance of necessary buildings and appurtenant facilities.

Permanent indefinite appropriations, special accounts:

PROGRAM AND PERFORMANCE

Users of grazing land within grazing districts pay 2 cents per animal-unit month for improvements to the range. In addition 25 percent of receipts from lands outside of grazing districts is used for the same purpose. It is proposed to provide a permanent appropriation hereafter limiting expenditures to available receipts. The improvements consist principally of fences, wells, reservoirs, and trails (43 U. S. C. 315).

RANGE IMPROVEMENTS

Range improvements: For construction, purchase, and maintenance of range improvements on the public lands pursuant to the provisions of sections 3 and 10 of the Act of June 28, 1934 (43 U. S. C. 315b and 315i), as amended by the Act of August 6, 1947 (Public Law 376), in addition to contributions under section 9 of the Act of June 28, 1934 (43 U. S. C. 315h), \$350,000, to remain available until expended: *Provided*, That expenditures hereunder shall not exceed the amount of all moneys received as range-improvement fees under the provisions of section 3 of said Act and 25 per centum of all moneys received under the provisions of section 15 of said Act. The aggregate of all moneys received after June 30, 1950, as range improvement fees under the provisions of section 3 of the Act of June 28, 1934 (43 U. S. C. 315) and 25 per centum of all moneys received after June 30, 1950, under the provisions of section 15 of said Act (in addition to all moneys received during the fiscal year 1950 from either of such sources but not yet appropriated), shall be available until expended for construction, purchase, and maintenance of range improvements pursuant to the provisions of sections 3 and 10 of said Act. (The Interior Department Appropriation Act, 1950.)

PROGRAM AND PERFORMANCE

This is an indefinite appropriation for refunds of excess payments for timber and other receipts derived from the Oregon and California grant lands and deposited in a special fund in the Treasury (39 Stat. 218).

OBLIGATIONS BY ACTIVITIES

Refunds of excess payments—1949, \$7,298; 1950, \$14,724; 1951, \$10,000.

OBLIGATIONS BY OBJECTS

13 Refunds, awards, and indemnities—1949, \$7,298; 1950, \$14,724; 1951, \$10,000.

APPROPRIATION OR ESTIMATE

Appropriated (estimate) 1950, **\$10,000** Estimate 1951, **\$10,000**

Payment to Territory of Alaska, Income and Proceeds, Alaska School Lands—

FUNDS AVAILABLE FOR OBLIGATION: Appropriation or estimate—1949, \$492; 1950, \$500; 1951, \$500.

PROGRAM AND PERFORMANCE

This is an indefinite appropriation of the entire proceeds and income derived by the United States from sale of timber and disposition of the lands or the minerals therein from sections 16 and 36 in each township, to be paid to the Territorial treasurer for the support of common schools,

and the proceeds derived from section 33 in each township in the Tanana Valley for the support of a Territorial agricultural college and school of mines (48 U. S. C. 353).

OBLIGATIONS BY ACTIVITIES

Payments for support of common schools—1949, \$492; 1950, \$500; 1951, \$500.

OBLIGATIONS BY OBJECTS

11 Grants, subsidies, and contributions—1949, \$492; 1950, \$500; 1951, \$500.

APPROPRIATION OR ESTIMATE

Appropriated (estimate) 1950, **\$500** Estimate 1951, **\$500**

Payments to Coos and Douglas Counties, Oreg., in Lieu of Taxes on Coos Bay Wagon Road Grant Lands—

FUNDS AVAILABLE FOR OBLIGATION: Appropriation or estimate—1949, \$14,236; 1950 \$15,000; 1951, \$15,000

PROGRAM AND PERFORMANCE

This is an indefinite appropriation of not to exceed 75 percent of the receipts derived in any 1 year from the Coos Bay Wagon Road grant lands in Oregon and deposited in a special fund in the Treasury for payment annually, in lieu of taxes, to the treasurers of Coos and Douglas Counties according to the ratio that the total assessed valuation of the reconveyed Coos Bay Wagon Road grant lands, belonging to the United States, in each of said counties bears to the total assessed valuation of all said lands in those counties. Moneys are used for common schools, roads, highways, bridges, and port districts (40 Stat. 1179, 53 Stat. 753-754).

OBLIGATIONS BY ACTIVITIES

Payments in lieu of taxes—1949, \$14,236; 1950, \$15,000; 1951, \$15,000.

OBLIGATIONS BY OBJECTS

11 Grants, subsidies, and contributions—1949, \$14,236; 1950, \$15,000; 1951, \$15,000.

APPROPRIATION OR ESTIMATE

Appropriated (estimate) 1950, **\$15,000** Estimate 1951, **\$15,000**

Payments to Counties, Oregon and California Grant Lands—

FUNDS AVAILABLE FOR OBLIGATION: Appropriation or estimate—1950, \$1,766,394; 1951, \$1,000,000.

PROGRAM AND PERFORMANCE

This is an indefinite appropriation of 50 percent of all moneys deposited in the Treasury to the credit of the Oregon and California land grant fund for payment to the counties in which the lands revested under the act of June 9, 1916 (39 Stat. 218), are situated, to be payable annually to the counties in the proportion that the total assessed value of the Oregon and California grant lands in each of said counties for the year 1915 bears to the total assessed value of all of said lands, in the State of Oregon for said year, such moneys to be used as other county funds.

OBLIGATIONS BY ACTIVITIES

Payments to counties—1950, \$1,766,394; 1951, \$1,000,000.

OBLIGATIONS BY OBJECTS

11 Grants, subsidies, and contributions—1950, \$1,766,394; 1951, \$1,000,000.

APPROPRIATION OR ESTIMATE

Appropriated (est.) 1950, **\$1,766,394** Estimate 1951, **\$1,000,000**

BUREAU OF LAND MANAGEMENT—Continued

Permanent indefinite appropriations, special accounts—Continued

Payments to States From Grazing Receipts, Etc., Public Lands—

FUNDS AVAILABLE FOR OBLIGATION: Appropriation or estimate—1949, \$226,403.

PROGRAM AND PERFORMANCE

This is an indefinite appropriation of moneys received as grazing fees to be paid to the States by the Secretary of the Treasury. This account is discontinued and three new ones provided effective with the fiscal year 1950 (43 U. S. C. 8A).

OBLIGATIONS BY ACTIVITIES

Payments to States from grazing receipts—1949, \$226,403.

OBLIGATIONS BY OBJECTS

11 Grants, subsidies, and contributions—1949, \$226,403.

Payments to States From Grazing Receipts, Etc., Public Lands Outside Grazing Districts, Bureau of Land Management—

FUNDS AVAILABLE FOR OBLIGATION: Appropriation or estimate—1950, \$100,000; 1951, \$105,000.

PROGRAM AND PERFORMANCE

This is an indefinite appropriation of 50 percent of moneys received as grazing fees from outside grazing districts (43 U. S. C. 315m), to be paid to the States by the Secretary of the Treasury (43 U. S. C. 315i).

OBLIGATIONS BY ACTIVITIES

Payments to States from grazing receipts—1950, \$100,000; 1951, \$105,000.

OBLIGATIONS BY OBJECTS

11 Grants, subsidies, and contributions—1950, \$100,000; 1951, \$105,000.

BUREAU OF INDIAN AFFAIRS**INTRODUCTORY STATEMENT**

The United States has two major responsibilities toward the Indian people and the natives of Alaska. The most basic of these is the management of trust property including its protection and development; the second is to provide services which otherwise are not available to Indians and which are normally provided other citizens through government and private agencies. To discharge these responsibilities, it is necessary to provide health, education, and welfare services; manage, protect, and develop Indian resources; construct, operate, and maintain buildings and utilities, roads, and irrigation systems, and to provide credit to Indian tribes for the purpose of promoting the economic development of the tribes and of their members. The adequate discharge of these two major responsibilities will prepare the various Indian and native groups in the United States and Alaska to assume responsibility for their own affairs and eventually take their proper place in the social and economic life of the Nation.

PROGRAM AND PERFORMANCE

The Bureau's work under this appropriation is to promote health, education, and welfare among Indians in the continental United States and the natives of Alaska.

1. *Hospital, disease-preventive and curative services.*—The Bureau operates hospitals, sanatoriums, and clinics and provides other health services for approximately 400,000 beneficiaries. It is anticipated that the number of hospital patients will increase in 1951 due in part to the increased emphasis on preventive and curative health services.

2. *Educational assistance, facilities and services.*—During the budget year the Bureau will operate boarding and day schools for an enrollment of 29,575 Indian pupils where available public school facilities are inadequate or are nonexistent. Financial assistance will be extended to public school districts based on the attendance of 22,067 Indian children in public schools. The Bureau will also provide for the care of 1,423 Indian children in mission schools and for the education and care of a limited number of physically handicapped children of school age in non-Federal institutions. In 1951 it is proposed to extend educational opportunities to 2,487 additional pupils. A supplemental appropriation of \$300,000 is proposed in 1950 for the operation of Navajo schools.

3. *Welfare, guidance, and cooperative services.*—Programs under this activity consist of welfare services to Indian children and adults in need of assistance, employment and relocation services for Indian families from overpopulated reservations, technical and advisory services to governing bodies of Indian tribes, and limited cooperation with Latin-American countries having large Indian populations. The welfare program for 1951 contemplates an increased general assistance grant. Some expansion of the employment and relocation programs is planned in 1951 primarily for the benefit of the Navajo and Hopi Indians. A supplemental appropriation of \$800,000 is proposed in 1950 for the relief of indigent Indians.

4. *Maintaining law and order.*—Law enforcement officers and Indian judges are employed by the Bureau to maintain law and order on Indian reservations. Tribal courts are maintained to operate under departmental regulations or ordinances adopted by the Indian tribes. It is planned to improve law enforcement activities in some of the more critical areas in 1951.

5. *Vessel services, Alaska.*—Two vessels are operated by the Bureau to transport supplies, equipment, and personnel to its stations in Alaska. Many of these stations are remotely located and cannot be served by commercial vessels. One of the vessels is used for maritime training in connection with the operation of one of the larger boarding schools.

PROGRAM AND PERFORMANCE

The main objective of the programs under this appropriation is the economic rehabilitation of the Indians through the maximum utilization of their resources.

1. *Forest and range lands.*—This program embraces the management, protection, and utilization of Indian forest, range, range water, and wildlife resources on nearly 48 million acres of Indian lands in accordance with the principles of sustained yield and conservation. In 1949 approximately 450 million board feet of timber was cut on Indian lands, having a stumpage value in excess of \$2,500,000. It is proposed to increase timber cuts in 1950 and to continue at approximately the same rate in 1951. About 830,000 cow units of livestock were grazed on Indian lands in 1949. The grazing value of this use exceeded \$5,000,000. The development of new sources of range water and the rehabilitation of some of the existing range water units on the Navajo and Hopi Reservations are proposed in 1951.

2. *Fire suppression.*—A token sum is provided annually for the initial cost of suppression or emergency prevention of fires on or threatening Indian reservations. This token amount is supplemented when necessary by diversions from other funds available to the Bureau pending deficiency appropriations to meet the full cost of fire suppression.

3. *Agricultural and industrial assistance.*—Improved methods in farming, home-making, and the use of credit for agricultural and small business enterprises are taught Indians to enable them to improve their economic condition through their own efforts.

4. *Soil and moisture conservation.*—The purpose of this program is to aid in the economic rehabilitation of the

BUREAU OF INDIAN AFFAIRS—Continued

Resources Management, Indian Affairs—Continued

Indian people through the development of plans and initiation of practices that will permit a greater and more effective utilization of their soil and water resources. It is proposed to accelerate erosion and silt-control work on the Navajo and Hopi Reservations in 1951.

5. *Operation, repair, and maintenance of Indian irrigation systems.*—There are approximately 300 irrigation projects ranging in size from tracts of a few acres to major projects of 100,000 acres on various Indian reservations west of the Mississippi River. About 70 percent of the cost of operating these projects is financed from operation and maintenance collections. Funds provided under this activity are used to cover the balance of the cost which is either reimbursable and constitutes a lien against the lands benefited or represents obligations of the Government based on agreements with the Indians.

6. *Repair and maintenance of roads and trails.*—Over 20,000 miles of roads serve isolated Indian areas where local government road maintenance organizations usually do not exist. The 1951 estimate provides for routine maintenance and for repair of roads and bridges damaged by excessive wear, or unusual weather conditions.

7. *Development of Indian arts and crafts.*—The Indian Arts and Crafts Board was created by Congress in 1935 to stimulate production and marketing of products of Indian craftsmanship by organizing and assisting Indian production groups; establishing standards of quality and genuineness; conducting research in marketing, design, and production methods; and protecting Indian crafts from unfair competition. In 1951 the Board will continue its efforts to expand production of quality products and to accelerate training.

8. *Management of Indian trust property.*—The Bureau collects, disburses, and accounts for approximately \$55,295,000 of Indian trust funds, exclusive of about \$41,000,000 of tribal funds on deposit in the United States Treasury; maintains title to and jurisdiction over the purchase, sale, and lease of tribal lands, and is responsible for the safeguarding of Indian rights as related to Indian property and individual and tribal moneys.

9. *Repair and maintenance of buildings and utilities.*—The Bureau maintains hospital and school facilities; office and quarters buildings; warehouses, garages, and shops; water, sewage, heating, and electrical plants; and communication systems throughout the United States and in Alaska. Buildings maintained have an approximate floor area of 22,000,000 square feet. The estimate year provides for maintaining approximately 1,500,000 square feet of floor area added in 1950 plus some reduction in deferred maintenance.

PROGRAM AND PERFORMANCE

This appropriation is for construction of buildings and utilities, roads and trails, irrigation systems and for the acquisition of lands.

1. *Buildings and utilities.*—This program provides for the construction of hospitals, schools, school dormitories, quarters, office and other buildings; improvement to sewage and water works; major repairs and rehabilitation of existing buildings and utilities; preparation of plans; engineering, supervision, and surveys. A supplemental appropriation of \$100,000 is proposed in 1950 for the completion of a school and a sewer system. The 1951 program makes provision for initiating the construction of eight schools, two hospitals, and miscellaneous other supporting facilities for carrying out the Bureau's programs. Provision is also made for continuing and completing previously authorized projects.

2. *Roads and trails.*—The work proposed is principally the rebuilding of worn-out, unsafe, and low-standard roads and bridges on Indian reservations. The 1951 program contemplates the construction of about 146 miles of new roadbed and the replacement of approximately 1,760 running feet of bridging.

3. *Irrigation systems.*—This work consists of the construction, extension, and rehabilitation of irrigation systems and land subjugation on Indian reservations located in the arid and semiarid west. The 1951 program will consist primarily of extending canals and laterals, drainage systems, and subjugation work to provide additional areas for cropping. A major portion of the work will be performed on the Colorado River Reservation as part of the resettlement program for the Navajo and Hopi Indians.

4. *Land acquisition.*—These funds are used to acquire lands complicated by inheritance and lands belonging to

nonresident Indians which are essential to Indian farming and stock raising and for proper administration of forest lands. Most land purchases in 1951 will represent heirship interests belonging to old and indigent Indians.

APPROPRIATION TEXT

CONSTRUCTION

For construction, major repair, and improvement of irrigation and power systems, buildings, utilities, roads and trails, and other facilities; acquisition of lands and interests in lands; preparation of lands for farming; and architectural and engineering services by contract; to remain available until expended, \$26,602,400, of which not to exceed \$3,737,500 is for liquidation of obligations incurred pursuant to authority previously granted; and, in addition, the Secretary is authorized to enter into contracts for the purposes of this appropriation in an amount not to exceed \$8,000,000.

The unexpended balances of appropriations heretofore made, including unused balances of related contract authorizations, under the heads “Construction, and so forth, buildings and utilities, Indian Service,” “Construction, and so forth, irrigation systems, Indian Service,” “Roads, Indian Service,” “Navajo and Hopi construction and maintenance services,” and “Acquisition of lands for Indian tribes,” shall be transferred to and merged with this appropriation. (25 U. S. C. 13, 318b, 386, 465.)

Estimate 1951 * \$26,602,400

* Estimate of \$26,602,400 is for activities previously carried under appropriations as follows:

“Navajo and Hopi construction and maintenance services”	\$12,345,000
“Construction, buildings and utilities, Indian Service”	8,631,000
“Construction, irrigation systems, Indian Service (reimbursable)”	3,716,400
“Roads, Indian Service”	1,760,000
“Acquisition of lands for Indian tribes”	150,000

The amounts obligated in 1949 and 1950 are shown in the schedule as comparative transfers.

PROGRAM AND PERFORMANCE

This appropriation is used for expenses of over-all direction and to provide administrative and other facilitating services incident to program operations of the Bureau. Although some expansion of these services is planned in 1951, the proposed appropriation will represent only 4.76 percent of the total proposed appropriations (exclusive of trust and special funds) for the Bureau as compared with 5.5 percent in 1950.

Balance available in subsequent year	-97,823		
Total obligations	1,204,925	3,884,809	3,492,763

PROGRAM AND PERFORMANCE

This fund is used to assist Indians in acquiring livestock, farm and other equipment needed to establish themselves in productive activities, and establishing tribal enterprises. This fund, and miscellaneous tribal funds, provide the only source of loans for the great majority of Indians who cannot borrow from banks on personal notes or chattel mortgages, and cannot obtain loans from other credit sources because of the restricted nature of their property. The amount included for 1951 will bring the total appropriated to \$11,999,600, compared with the \$12,000,000 authorized, and will supply funds for a portion of the needs which could not be met because of lack of funds.

A statement of actual and anticipated operations follows:

	1949 actual	1950 estimate	1951 estimate
<i>Funds available</i>			
Appropriation or estimate		\$3,000,000	\$2,400,000

APPROPRIATION TEXT

REVOLVING FUND FOR LOANS

[Revolving fund for loans:] For an additional amount for **[the revolving fund established pursuant to section] loans as authorized by sections 10 and 11 of the Act of June 18, 1934 (25 U. S. C. 470, 471), [to be available for loans as authorized by said section,] as amended and supplemented, [and by section 11 of said Act (25 U. S. C. 471), \$3,000,000] \$2,400,000. (The Interior Department Appropriation Act, 1950.)**

Appropriated 1950, **\$3,000,000** Estimate 1951, **\$2,400,000**

ADMINISTRATIVE PROVISIONS

Appropriations for the Bureau of Indian Affairs (except the revolving fund for loans) shall be available for personal services in the District of Columbia; purchase (not to exceed three hundred and twenty-seven, of which two hundred and twenty shall be for replacement only) and hire of passenger motor vehicles, which may be used for the transportation of Indians; printing and binding, including illustrations and purchase of reprints; purchase of ice for official use of employees; services as authorized by section 15 of the Act of August 2, 1946 (5 U. S. C. 55a), at rates for individuals not in excess of \$100 per diem on irrigation and power matters, with the approval of the Secretary; and expenses required by continuing or permanent treaty provisions.

PROGRAM AND PERFORMANCE

Revenues collected from the sale of electrical energy by the Colorado River, Flathead, and San Carlos power generating and distribution systems are deposited to the credit of this account annually. An amount sufficient to operate these power systems is transferred to an operation and maintenance account.

APPROPRIATION TEXT**PROCEEDS FROM POWER**

[Proceeds from power: Not] After June 30, 1950, not to exceed the amount of power revenues covered into the Treasury to the credit of each of the power projects, including revenues credited prior to August 7, 1946, shall be available for the purposes authorized by section 3 of the Act of August 7, 1946 (Public Law 647), as amended, including printing and binding, in connection with the respective projects from which such revenues are derived. (*The Interior Department Appropriation Act, 1950.*)

Appropriated (est.) 1950, **\$1,835,000** Estimate 1951, **\$1,880,000**

Operation and Maintenance, Etc., Power Systems, Indian Irrigation Projects—

FUNDS AVAILABLE FOR OBLIGATION: Transferred from "Power revenues, Indian irrigation projects, holding account"—1949, \$1,272,513; 1950, \$1,436,000; 1951, \$1,380,000.

PROGRAM AND PERFORMANCE

Power revenues are transferred to this account for the operation and maintenance of the power systems.

PROGRAM AND PERFORMANCE

The funds deposited into the Treasury and held in trust for Indian tribes under the provisions of various acts are expended for or advanced to the tribes for the benefit of the Indians. The funds are used for expenses of tribal governments, administration of Indian tribal affairs, employment of tribal attorneys, establishment and operation of tribal enterprises, and relief of Indians. The tribes are encouraged to develop plans for the beneficial use of their funds.

BUREAU OF RECLAMATION

INTRODUCTORY STATEMENT

The Bureau of Reclamation is concerned with the conservation of land and water resources through the irrigation of arid lands and the provision of facilities for water supply, flood control, and hydroelectric power. Its responsibilities include the planning, construction, and operation of these multiple-purpose facilities and their coordination with existing facilities built or planned to be constructed by other agencies. These activities extend to the 17 Western States and include investigations in Alaska. Under reclamation law, the cost of construction, maintenance, and operation of irrigation and power facilities, including an equitable portion of multiple-purpose facilities is reimbursable by the water and power users. The cost of facilities or parts thereof to provide for flood control, navigation, and fish and wildlife conservation is nonreimbursable by law.

Under the revised appropriation structure adopted for the fiscal year 1951, it is proposed that appropriations for the Bureau of Reclamation, regardless of source, will be merged and expended under four appropriation heads: General Investigations, Construction and Rehabilitation, Operation and Maintenance, and General Administrative Expenses. The source of such funds is, principally, the general fund of the Treasury; in addition, funds will be derived from the reclamation fund, the Colorado River dam fund, and the Colorado River development fund.

The estimates of appropriation for 1951 are summarized by source in the following table:

SUMMARY OF 1951 ESTIMATES OF APPROPRIATION
 ANNUAL APPROPRIATIONS, GENERAL AND SPECIAL FUNDS

Annual appropriation	Total	General fund	Reclamation fund	Colorado River dam fund	Colorado River development fund
General investigations..	\$7, 800, 000	\$250, 000	\$7, 050, 000		\$500, 000
Construction and rehabilitation.....	320, 767, 100	294, 324, 300	26, 442, 800		
Operation and maintenance.....	17, 752, 000	1, 681, 600	14, 262, 400	\$1, 808, 000	
General administrative expenses.....	7, 800, 000		7, 800, 000		
Total.....	354, 119, 100	296, 255, 900	55, 555, 200	1, 808, 000	500, 000

BUREAU OF RECLAMATION—Continued

The reclamation fund, established by the Reclamation Act of June 17, 1902, is to be used in the examination and survey for and the construction and maintenance of irrigation works for the storage, diversion, and development of waters for the reclamation of arid and semiarid lands in the 17 Western States. This fund is derived from the receipts of moneys from the sale and disposal of public lands in the 17 Western States; sale of reserved lands and town lots in connection with reclamation projects; leases of potash deposits; certain leases issued by the Federal Power Commission for occupancy and use of national forests and public lands; certain sales, bonuses, royalties, and rentals under the Mineral Leasing Act; and repayments and other revenues from irrigation and power facilities.

The Colorado River dam fund is derived from the revenues received from the operation of the Boulder Canyon project. This fund is available for the payment of expenses of operation and maintenance of the project, pursuant to appropriation acts; repayment of amounts advanced by the Treasury for construction and other purposes; payment of interest on the amounts advanced; annual payments of \$300,000 to each of the States of Arizona and Nevada; and for transfer annually of \$500,000 to the Colorado River development fund as provided by the Boulder Canyon Project Act of December 21, 1928.

The Colorado River development fund (derived from an annual transfer of \$500,000 from the Colorado River dam fund) is available for investigations and construction of projects for the utilization of waters of the Colorado River system as authorized by the Boulder Canyon Project Adjustment Act of July 19, 1940.

APPROPRIATION TEXT

For carrying out the functions of the Bureau of Reclamation as provided in the Federal reclamation laws (Act of June 17, 1902, 32 Stat. 388, and Acts amendatory thereof or supplementary thereto) and other Acts applicable to that Bureau, as follows:

General Investigations, Bureau of Reclamation—

PROGRAM AND PERFORMANCE

The general investigations program includes preliminary surveys of river basins or reclamation projects to determine whether detailed investigations are justified; investigations and surveys of specific potential projects to determine feasibility; general engineering research; investigation of Alaskan water resources; the formulation of detailed plans for authorized projects prior to initiation of construction; and studies of existing projects pertaining to rehabilitation, extension, or financial adjustment. Investigations of all types are scheduled as follows:

Investigations	1949 actual	1950 estimate	1951 estimate
Completed.....	21	45	46
Continued.....	137	107	90
Initiated.....	15	29	33

1. *Engineering and economic investigations.*—This includes reconnaissance surveys to determine if detailed investigation of an area is justified; basin investigations to establish an efficient plan of development for an entire river basin or subbasin; and detailed investigations of potential projects, prior to authorization, including the preparation of reports as to feasibility. The program for 1951 provides for the completion of feasibility reports for some 25 potential projects.

An estimate of \$764,000 is included for general engineering research on problems such as lower cost canal lining, concrete studies, and weed control; also for studies of economic factors affecting the reclamation projects.

2. *Alaskan investigations.*—This covers engineering and economic investigations to be used as a basis for legislation, and for reports thereon to Congress, relating to projects for the development and utilization of the water resources of Alaska.

3. *Advance planning.*—This covers collection of detailed field data, the preparation of designs and specifications, the formulation of plans and the preparation of final planning reports, and the firming of repayment plans, for authorized projects or parts thereof prior to construction appropriations. Provision is made in the 1951 program for these activities on four authorized projects.

4. *Investigation of existing projects.*—This covers surveys, investigations, and other activities preliminary to the reconstruction, rehabilitation and betterment, financial adjustment, or extension of existing projects.

APPROPRIATION TEXT
GENERAL INVESTIGATIONS

For engineering and economic investigations of proposed Federal reclamation projects and studies of water conservation and development plans; engineering and economic investigations, as a basis for legislation, and for reports thereon to Congress, relating to projects for the development and utilization of the water resources of Alaska; formulating plans and preparing designs and specifications for authorized Federal reclamation projects or parts thereof prior to appropriations for construction of such projects or parts; and activities preliminary to the reconstruction, rehabilitation and betterment, financial adjustment, or extension of existing projects; to remain available until expended, \$7,800,000, of which \$7,050,000 shall be derived from the reclamation fund and \$500,000 shall be derived from the Colorado River development fund: Provided, That the expenditure of any sums from this appropriation for investigations of any nature requested by States, municipalities, or other interests shall be upon the basis of the State, municipality, or other interest advancing at least 50 per centum of the estimated cost of such investigations.

Estimate 1951, * \$7,800,000

* Estimate is for activities previously carried under appropriations as follows:
 "Reclamation fund, special fund":
 General investigations..... \$5,825,000
 Advance planning..... 1,225,000
 "General fund": Alaskan investigations..... 250,000
 "Colorado River dam fund": Colorado River development fund, investigations..... 500,000
 The amounts obligated in 1949 and 1950 are shown in the schedule as comparative transfers.

BUREAU OF RECLAMATION—Continued

Construction and Rehabilitation, Bureau of Reclamation—Continued
PROGRAM AND PERFORMANCE

Funds available under this appropriation are used for construction of authorized projects and the rehabilitation of existing projects.

1. *Construction.*—The 1951 program provides \$328.1 million for the continuation of construction on 32 projects which will require an additional \$3,178.3 million to complete; and \$1.6 million for the completion of 10 projects having a total cost of \$68.6 million. This program is financed by \$315.8 million from the 1951 construction appropriation and \$13.9 million from balances.

The total number of projects authorized is 91 of which 11 will be completed during 1950. The following table indicates their present status.

ESTIMATED COST OF AUTHORIZED PROJECTS (IN MILLIONS)

Status	Number of projects	Total estimated obligations	Obligations to June 30, 1949	Estimated obligations, 1950	Estimated obligations, 1951	Balance to complete
Completed	33	\$182.1	\$182.1			
Under way	53	5,218.9	1,360.6	\$348.7	\$329.7	\$3,178.3
Balance authorized	5	329.0	4.8	3.6		320.6

Construction completed provides water for over 5,000,000 acres of irrigable land and includes installed power capacity of nearly 2,758,000 kilowatts.

(a) *Major projects.*—Eighty-six percent of the total construction appropriation is designated for six major projects.

The allocation from the construction appropriation for the Central Valley project will be \$49,513,000. With this allotment and carry-over funds, the Friant-Kern canal and Tracy pumping plant will be completed and irrigation water will be made available for 221,000 additional acres. Work on other features will continue, construction will be initiated on the Delta steam plant, and preconstruction activities will be started on the recently authorized American River development features.

The allotment of \$21,700,000 to the Colorado-Big Thompson project is based on orderly continuation of construction activities to complete the Granby Dam, the Granby pumping plant, the Horsetooth Dam, the Poudre supply canal, and certain power facilities. Work on other features will continue at an economical rate, and water will be provided for the irrigation of 54,000 additional acres.

With the allocation of \$53,500,000 for the Columbia Basin project, work will be continued on project facilities so as to permit irrigation of 87,000 acres during 1952. Virtual completion of work on three units of the right powerhouse will place an additional 324,000 kilowatts of generating capacity in service, which will help meet Pacific Northwest power demands.

Construction of the Hungry Horse project, comprised of the dam, power plant, and switchyard, will be continued during 1951 with an allocation of \$30,500,000 on a schedule which will place two generators of 75,000 kilowatt maximum capacity in service by calendar year 1952.

Substantial completion of the Davis Dam project in 1951 will be attained under the allocation of \$14,320,000.

This will permit use of Davis Dam and power plant for river regulation and the initial development of 225,000 kilowatts of electric power. Parts of the main and interconnecting transmission lines will also be in service.

The major portion of the allotment estimate of \$102,057,300 for the Missouri River Basin project will be used to continue construction started during earlier years. The allocation will also permit completion of four dams and the irrigation facilities for three of the project units. Investigations and preconstruction on other units will continue. An additional 12,000 kilowatts of electrical generating capacity and irrigation water for 19,700 acres will be made available during the year.

(b) *Remaining projects.*—A total allocation of \$44,176,800 will be made to the remaining 36 projects to complete construction of 10 projects and to continue construction on the remainder. An increase in power-generating capacity of 13,500 kilowatts and in irrigated land of 35,000 acres will be realized during 1951.

2. *Rehabilitation and betterment.*—The rehabilitation of existing projects consists principally of the replacement of obsolete or deteriorated structures and fixed equipment in order to preserve the older projects in a satisfactory operating condition. The rehabilitation program for 1951, under an allocation of \$5,000,000, consists of 18 projects estimated to cost a total of \$26.2 million.

OBLIGATIONS BY ACTIVITIES

Description	1949 actual	1950 estimate	1951 estimate
1. Construction in progress:			
(a) Gila project, Arizona	\$1,187,609	\$5,943,705	\$6,476,720
(b) Parker Dam power project, Arizona-California	31,324	416,245

NOTE.—The detail of obligations under the foregoing allotments is shown under the respective offices and bureaus.

APPROPRIATION TEXT

CONSTRUCTION AND REHABILITATION

For construction and other authorized activities concurrent therewith in connection with reclamation projects or parts thereof (including power transmission facilities) and other authorized undertakings within the jurisdiction of the Bureau of Reclamation; and rehabilitation and betterment work pursuant to the Act of October 7, 1949 (Public Law 535), or in accordance with adjusted repayment contracts entered into under subsection (c) of section 7, as amended,

BUREAU OF RECLAMATION—Continued

Construction and Rehabilitation, Bureau of Reclamation—Continued

of the Reclamation Project Act of 1939 (43 U. S. C. 485f), including general and detailed planning and preparation of designs and specifications in connection with the foregoing categories of work in cases in which an appropriation therefor has herein or heretofore been made; to remain available until expended, \$320,767,100, of which \$26,442,800 shall be derived from the reclamation fund: Provided, That no expenditure of funds herein or hereafter appropriated in excess of the amount of the repayment obligation assumed by the Coachella Valley County Water District under repayment contract of December 22, 1947, shall be made for the distribution system therein described without supplemental repayment contract coverage: Provided further, That hereafter when funds appropriated under this head are transferred to the credit of the appropriate regional disbursing officer of the Treasury Department for expenditure in connection with Hoover Dam and related works, such funds, solely for the purpose of determining rates and charges for electrical energy under the Act of July 19, 1940 (43 U. S. C. 618), shall be considered as if advanced to the Colorado River dam fund.

Of the amount appropriated under the preceding paragraph, \$1,600,000 is for liquidation of the contract authority granted under the appropriation "Reclamation fund, special fund, construction, Santa Barbara County project, California, Cachuma unit," in the Interior Department Appropriation Act, 1949; \$225,700 is for partial liquidation of the contract authority granted under the appropriation "General fund, construction, advances to Colorado River dam fund, Boulder Canyon project (All-American Canal)" in the Interior Department Appropriation Act, 1950; \$1,000,000 is for liquidation of the contract authority provided under the appropriation "General fund, construction, Fort Sumner project, New Mexico," in the Interior Department Appropriation Act, 1950; and \$1,770,000 is for partial liquidation of the contract authority granted under the appropriation "General fund, construction, Missouri River Basin," in the Interior Department Appropriation Act, 1950.

Estimate 1951, * \$320,767,100

* Estimate is for activities previously carried under appropriations as follows:

"Reclamation fund, special fund":	
Construction	\$21,442,800
Rehabilitation and betterment	5,000,000
"General fund, construction":	
Gila project, Arizona	6,508,000
Boulder Canyon project, Arizona-Nevada	6,600,000
Davis Dam project, Arizona-Nevada	14,320,000
All-American Canal, California	4,662,000
Central Valley project, California	49,513,000
Colorado-Big Thompson project, Colorado	21,700,000
Fort Peck project, Montana	1,743,000
Hungry Horse project, Montana	30,500,000
Tucumcari project, New Mexico	174,000
Fort Sumner project, New Mexico	1,681,000
Columbia Basin project, Washington	53,500,000
Colorado River front work and levee system	1,000,000
Missouri River Basin project	102,057,300

The amounts obligated in 1949 and 1950 are shown in the schedule as comparative transfers. Also included are the following activities:

"General fund, construction":	
Buffalo Rapids project, Montana, first division	\$160,000
Eden project, Wyoming	206,000

PROGRAM AND PERFORMANCE

The Bureau has completed to an operating stage 65 reclamation projects, or divisions of projects, some of which have both irrigation and power generating and transmission facilities. Forty-five projects or portions of projects have been transferred to water users' organizations for operation and maintenance, for which appropriations are not required.

It is the policy of the Bureau of Reclamation to encourage water users to operate their own irrigation distribution systems as soon as they can adequately assume this responsibility. Arrangements with the irrigation districts generally provide for retention of the reservoir systems for operation by the United States, financed with funds advanced by the water users. Due to the highly technical problems involved in the operation of integrated power systems, including transmission plants, the Bureau operates and maintains these facilities.

1. *Project operations and maintenance.*—The Bureau irrigation facilities which will require operation and maintenance funds in 1951 will consist of 56 major dams, 35 smaller diversion dams, 80 pumping plants, 11,500 miles of irrigation canals and laterals, 3,500 miles of drains, 1,400 miles of telephone lines, and 5,600 miles of operating roads. The facilities operated and maintained by the Bureau irrigated 3,413,000 acres in 1949. It is

estimated 101,000 acres will be added in 1950 and 110,000 acres in 1951. The Bureau functions include release of water, operation and maintenance of canals, laterals, and structures, and supervision of the projects.

The Bureau will also operate, with 1951 operation and maintenance funds, power systems developed in connection with multiple-purpose projects, including 21 plants with an installed capacity of approximately 3,220,000 kilowatts (excluding the Fort Peck plant of 85,000 kilowatt capacity) and about 4,000 miles of high-voltage transmission lines.

Fiscal year	Energy sales in million kilowatt-hours	Revenues in dollars
1949	18,025	\$31,333,000
1950	18,450	36,546,000
1951	20,129	39,422,000

Increases in sales and revenue result from the addition of 462,100 kilowatts in fiscal year 1950 and 575,000 kilowatts in fiscal year 1951. Electric energy is used for project construction and irrigation pumping and the surplus is sold to wholesale customers, such as municipalities, Rural Electrification Administration cooperatives, private utilities, and other Government agencies.

2. *Soil and moisture conservation.*—In 1951 soil- and moisture-conservation operations, heretofore financed from a separate appropriation to the Department, are included in the estimates of the several bureaus. The sum requested by the Bureau of Reclamation will provide for continued surveys and investigations and for such action programs as revegetation of overgrazed or denuded lands, development of water-spreading structures, construction of check dams and water drops, removal of salt cedar growths, and such other soil- and moisture-conservation devices as needed to enable the Bureau to fulfill its obligations pursuant to law in connection with reclamation projects.

APPROPRIATION TEXT

OPERATION AND MAINTENANCE

For operation and maintenance of reclamation projects or parts thereof and of other authorized undertakings within the jurisdiction of the Bureau of Reclamation; and for a soil and moisture conservation program pursuant to law in connection with such projects or undertakings, \$17,752,000, of which \$14,262,400 shall be derived from the

BUREAU OF RECLAMATION—Continued**Operation and Maintenance, Bureau of Reclamation—Continued**

reclamation fund and \$1,808,000 shall be derived from the Colorado River dam fund.

Estimate 1951, * \$17,752,000

* Estimate is for activities previously carried under appropriations as follows:

"Reclamation fund, special fund," operation and maintenance:

Parker Dam power project, Arizona-California.....	\$2,999,600
Yuma project, Arizona-California.....	780,700
Central Valley project, California.....	2,058,500
Colorado-Big Thompson project, Colorado.....	608,500
Boise project, Idaho.....	333,700
Minidoka project, Idaho.....	473,100
Mirage Flats project, Nebraska.....	26,600
North Platte project, Nebraska-Wyoming.....	339,750
Rio Grande project, New Mexico.....	1,118,750
Deschutes project, Oregon.....	190,400
Klamath project, Oregon-California.....	544,600
Owyhee project, Oregon.....	381,600
Columbia Basin project, Washington.....	2,327,500
Yakima project, Washington.....	454,900
Kendrick project, Wyoming.....	591,700
Riverton project, Wyoming.....	294,450
Shoshone project, Wyoming.....	441,300

"Reclamation trust fund," operation and maintenance:

Orland project, California.....	83,200
Mancos project, Colorado.....	3,100
Pine River project, Colorado.....	6,100
Milk River project, Montana.....	81,850
Missoula Valley project, Montana, Big Flat unit.....	4,140
Carlsbad project, New Mexico.....	8,150
W. C. Austin project, Oklahoma.....	99,800
Umatilla project, Oregon.....	8,800
Vale project, Oregon.....	4,390
Belle Fourche project, South Dakota.....	6,140
Rapid Valley project, South Dakota.....	5,340
Balmorhea project, Texas.....	5,740

"General fund":

Colorado River front work and levee system.....	935,300
Soil and moisture conservation, Department of the Interior.....	746,300
"Colorado River Dam fund": Boulder Canyon project, Arizona-Nevada.....	1,808,000

The amounts obligated in 1949 and 1950 are shown in the schedule as comparative transfers.

PROGRAM AND PERFORMANCE

The costs of the Office of the Commissioner and, except for costs incurred on behalf of specific projects, of general investigations and of nonproject offices outside the District of Columbia are not reimbursable, under reclamation law.

The over-all administrative functions of the Bureau are provided for under this appropriation. These functions consist of: (1) the determination of policy and direction of the Bureau's programs; (2) general supervision and review of operations; and (3) central personnel, supply, finance, and similar administrative services above the project level.

1 (a). *Departmental and Denver offices.*—The appropriation under this heading provides funds for the salaries and expenses of the offices of the Commissioner of Reclamation located in Washington, D. C., and Denver, Colo., which establish policy and direct and review the entire reclamation program. Accordingly, under this heading are included certain positions in the Branch of Design and Construction and facilitating services in Denver which are concerned with the administration of functions applicable

to the entire program or to a number of projects and which formerly were financed from appropriations for construction and operation of projects. This accounts for the increase shown for 1951.

1 (b). *Regional offices.*—The appropriation also provides for personnel in the seven regional offices, which are considered as extensions of the Commissioner's office, concerned with general administrative functions. The work consists of administration and supervision of activities on a region-wide basis as distinguished from project supervision, together with centralized administrative services. The increase shown for 1951 provides for the financing of all such personnel from this appropriation rather than partially from appropriations for construction and operation of projects as formerly financed.

2. *Services to projects.*—Excluded from this head in 1951 are costs directly chargeable to specific projects but to be incurred by the Branch of Design and Construction and facilitating services in Denver. Although such charges will continue to be financed in 1951 from appropriations for construction and operation of projects, the appropriation text will not now provide that such project funds be transferred to and expended under this head.

APPROPRIATION TEXT**GENERAL ADMINISTRATIVE EXPENSES**

For necessary expenses of general administration and related functions in the offices of the Commissioner of Reclamation and in the

regional offices of the Bureau of Reclamation, \$7,800,000, to be derived from the reclamation fund.

Estimate, 1951,^a \$7,800,000

^a Estimate is for activities previously carried under "Reclamation fund, special fund, salaries and expenses (other than project offices)." The amounts obligated in 1949 and 1950 are shown in the schedule as comparative transfers.

APPROPRIATION TEXT

SPECIAL FUNDS

Sums herein referred to as being derived from the reclamation fund, the Colorado River dam fund, or the Colorado River development fund, are appropriated from the special funds in the Treasury created by the Act of June 17, 1902 (43 U. S. C. 391), the Act of December 21, 1928 (43 U. S. C. 617a), and the Act of July 19, 1940 (43 U. S. C. 618a), respectively. Such sums shall be transferred, upon request of the Secretary, to be merged with and expended under the heads herein specified; and the unexpended balances of sums transferred for expenditure under the heads "Operation and maintenance" and "General administrative expenses" shall revert and be credited to the special fund from which derived.

PRIOR YEAR APPROPRIATIONS

Except for the emergency fund established in the First Deficiency Appropriation Act, 1949, the unexpended balances on June 30, 1950, of sums heretofore appropriated for the Bureau of Reclamation which were made available until expended shall be classified under the corresponding heads herein established, shall be transferred to and merged with the amounts appropriated under those headings, and shall be available for the purposes therein specified.

APPROPRIATION OF MONEYS RECEIVED

There shall be covered into the reclamation fund or such other special fund as may be proper under law all moneys heretofore or hereafter advanced, contributed or paid to the Bureau of Reclamation (a) for the operation and maintenance of any project or part thereof under the jurisdiction of the Bureau of Reclamation, (b) for the purposes authorized by the Act of March 4, 1921 (43 U. S. C. 395), including moneys received for such purposes under contracts providing for reimbursement on a current basis or (c) in connection with the operation of camp commissaries and other community facilities. Moneys so received in excess of amounts appropriated herein under the head "Operation and maintenance" are hereby appropriated for the purposes for which advanced, contributed, or paid and may be expended directly or may be used to reimburse appropriations under the jurisdiction of the Bureau of Reclamation which shall have been expended for such purposes.

ADMINISTRATIVE PROVISIONS

Appropriations to the Bureau of Reclamation shall be available for personal services in the District of Columbia; purchase (not to exceed two hundred and forty-five, of which two hundred shall be for replacement only) and hire of passenger motor vehicles; purchase of not to exceed three aircraft; printing and binding; services as authorized by section 15 of the Act of August 2, 1946 (5 U. S. C. 55a), at rates for individuals not to exceed \$100 per day; payment of claims for damage to or loss of property, personal injury, or death arising out of activities of the Bureau of Reclamation; rewards for information or evidence concerning violations of law involving property under the jurisdiction of the Bureau of Reclamation; payments to school districts as authorized by law (43 U. S. C. 385a), including payments on account of dependents of employees in field offices in project areas engaged in construction and related activities; performance of the functions specified under the head "Operation and Maintenance Administration," Bureau of Reclamation, in the Interior Department Appropriation Act, 1945, to be reimbursable to the extent therein provided; preparation and dissemination of useful information including recordings, photographs, and photographic prints; payment, except as otherwise provided for, of compensation and expense of persons on the rolls of the Bureau of Reclamation appointed as authorized by law to represent the United States in the negotiation and administration of interstate compacts; and, without reimbursement or return under the reclamation laws, studies of recreational uses of reservoir areas and investigation and recovery of archaeological and paleontological remains in such areas in the same manner as provided for in the Act of August 21, 1935 (16 U. S. C. 461-467).

Allotments to the Missouri River Basin project from the appropriation under the head "Construction and rehabilitation" shall be available additionally for said project for those functions of the Bureau of Reclamation provided for under the head "General investigations" (but this authorization shall not preclude use of the appropriation under said head within that area), and for the continuation of investigations by agencies of the Department on a general plan for the development of the

Missouri River Basin. Such allotments may be expended through or in cooperation with State and other Federal agencies, and advances to such agencies are hereby authorized.

Sums appropriated herein which are expended in the performance of functions of the Bureau of Reclamation shall be reimbursable or returnable to the extent and in the manner provided by law.

Any agency of the United States Government having title thereto is authorized to transfer to the Bureau of Reclamation, without reimbursement, parts, equipment and supplies for aircraft excess to its needs.

No funds appropriated to the Bureau of Reclamation for operation and maintenance, except those derived from advances by water users, shall be used for the particular benefit of lands (a) within the boundaries of an irrigation district, (b) of any member of a water users' organization, or (c) of any individual, when such district, organization, or individual is in arrears for more than twelve months in the payment of charges due under a contract entered into with the United States pursuant to laws administered by the Bureau of Reclamation.

APPROPRIATION OF CERTAIN PAYMENTS

There are hereby appropriated from the reclamation fund such sums as may be necessary after June 30, 1950, to make payments, to the extent authorized by the Act of May 25, 1948 (62 Stat. 275), to the Farmers' Irrigation District on behalf of the Northport Irrigation District (North Platte project, Nebraska-Wyoming) for water carriage in accordance with contracts entered into pursuant to said Act.

REFUNDS AND RETURNS

There are hereby appropriated such amounts as may be necessary after June 30, 1950, for the Bureau of Reclamation to refund overcollections, and to return deposits in excess of amounts applied to the purposes for which the deposits were accepted, each such refund or return to be derived from the account into which such overcollection or deposit shall have been covered.

PROGRAM AND PERFORMANCE

There are deposited in the reclamation fund, to remain therein until expended for specific purposes pursuant to authorizations contained in appropriation acts, receipts from the following sources: (a) Moneys received from the sale and disposal of public lands in 17 named Western States, including certain fees and commissions (43 U. S. C. 391); (b) moneys received from the sale of reserve lands connected with reclamation projects (43 U. S. C. 375); (c) proceeds from sale of town lots reserved for town-site purposes in connection with reclamation projects (43 U. S. C. 562); (d) moneys received from the lease of potash deposits under the act of October 2, 1917 (30 U. S. C. 286); (e) 52½ percent of receipts from leases

BUREAU OF RECLAMATION—Continued

Special accounts—Continued

PROGRAM AND PERFORMANCE

All revenues received from the operations of the Boulder Canyon project are deposited to the credit of the Colorado River dam fund, to remain available until expended. The revenues are available for the payment of the expenses of operation and maintenance of the project, pursuant to appropriation acts; for the payment of amounts advanced by the Treasury for construction and for other purposes; for the payment of interest on the amounts advanced; for annual payments of \$300,000 to each of the States of Arizona and Nevada; and for transfer annually of \$500,000 to the Colorado River development fund, as provided by the Boulder Canyon Project Act of December 21, 1928, as amended (43 U. S. C., ch. 12A).

Permanent appropriations, special accounts:

Colorado River Dam Fund, Boulder Canyon Project, Payments to States of Arizona and Nevada—

FUNDS AVAILABLE FOR OBLIGATION: Appropriation or estimate—1949, \$600,000; 1950 \$600,000; 1951, \$600,000.

PROGRAM AND PERFORMANCE

Specific appropriation of \$300,000 per annum to each of the States of Arizona and Nevada, from revenues from the operations of the Boulder Canyon project, as provided in the Boulder Canyon Project Act of December 21, 1928, as amended (43 U. S. C., ch. 12A).

OBLIGATIONS BY OBJECTS

11 Grants, subsidies, and contributions—1949, \$600,000; 1950, \$600,000; 1951, \$600,000.

APPROPRIATION OR ESTIMATE

Appropriated 1950, **\$600,000** Estimate 1951, **\$600,000**

Repayment of Interest on Advances From the Treasury—

FUNDS AVAILABLE FOR OBLIGATION: Appropriation or estimate covered into Treasury as miscellaneous receipts—1949, \$3,500,000; 1950, \$4,000,000; 1951, \$4,000,000.

PROGRAM AND PERFORMANCE

Indefinite appropriation for payments of interest into miscellaneous receipts of the Treasury of moneys advanced for the construction of the Boulder Canyon project, as provided in the Boulder Canyon Project Act of December 21, 1928, as amended (43 U. S. C., ch. 12A).

APPROPRIATION OR ESTIMATE

Appropriated (est.) 1950, **\$4,000,000** Estimate 1951, **\$4,000,000**

APPROPRIATION TEXT

Administrative provisions: Sums appropriated in this Act for the Bureau of Reclamation shall be available for all expenditures authorized by the Act of June 17, 1902, and Acts amendatory thereof or supplementary thereto known as the reclamation law, and all other Acts under which expenditures are authorized, including personal services in the District of Columbia; disseminating useful information, photographing and making photographic prints and completing and distributing material, including recordings; examination of estimates for appropriations in the field; refunds of overcollections and deposits for other purposes; lithographing; engraving; printing and binding; purchase of not to exceed two hundred and

BUREAU OF RECLAMATION—Continued

thirty (including two hundred and one for replacement only) passenger motor vehicles in the current fiscal year, and hire of passenger motor vehicles; acquisition of not to exceed two in the current fiscal year, and hire, maintenance, and operation of aircraft; services as authorized by section 15 of the Act of August 2, 1946 (5 U. S. C. 55a), in an amount not to exceed \$100,000: *Provided*, That the rates for individuals shall not exceed \$100 per diem; for payment of claims for damage to or loss of property, personal injury, or death, arising out of the survey, construction, operation, or maintenance of works by the Bureau of Reclamation; payment for official telephone service in the field hereafter incurred in case of official telephones installed in private houses when authorized under regulations established by the Secretary; payment of rewards, when specifically authorized by the Secretary, for information leading to the apprehension and conviction of persons found guilty of the theft, damage, or destruction of public property; payments to school districts in accordance with the Act of June 29, 1948 (Public Law 835), including payments on account of dependents of employees in field offices in project areas engaged in construction and related activities: *Provided*, That no part of any sum provided for in this Act for operation and maintenance of any project or division of a project by the Bureau of Reclamation shall be used for the irrigation of any lands within the boundaries of an irrigation district which has contracted with the Bureau of Reclamation and is in arrears for more than twelve months in the payment of any charges due the United States, and no part of any sum provided for in this Act for such purpose shall be used for the irrigation of any lands which have contracted with the Bureau of Reclamation and are in arrears for more than twelve months in the payment of any charges due from said lands to the United States: *Provided further*, That funds appropriated for the Bureau of Reclamation shall be available for expenditure through the facilities of the National Park Service in amounts of not to exceed \$25,000 for any one reservoir area for studies of recreational areas and planning for their utilization, and funds so expended shall not be reimbursable or returnable under the reclamation law.]

[The following sums are appropriated out of the special fund in the Treasury of the United States created by the Act of June 17, 1902 (43 U. S. C. 391, 411), and therein designated "the reclamation fund," to be available immediately:] (*The Interior Department Appropriation Act, 1950.*)

APPROPRIATION TEXT

Salaries and expenses (other than project offices): For expenses necessary during the current fiscal year, including personal services in the District of Columbia, in the administration and performance by other than project offices of Bureau of Reclamation functions, \$4,300,000, to be available for the purposes, among others, specified under the head "Operation and maintenance administration", Bureau of Reclamation, in the Department of the Interior Appropriation Act, 1945, and reimbursable as to expenditures for operation and maintenance administration to the same extent as is provided under said head: *Provided*, That in addition to the foregoing amount there shall be available for expenditure under this appropriation any sums transferred thereto for work performed or to be performed for the benefit of specific projects or undertakings for which other funds or appropriations are available: *Provided further*, That not exceeding \$150,000 of funds available for expenditure under this appropriation shall be used for salaries and expenses in connection with informational work. (The Interior Department Appropriation Act, 1950.)

Appropriated 1950, \$4,300,000

NOTE.—Estimate of \$7,800,000 for activities previously carried under this title has been transferred in the estimates to "General administrative expenses, Bureau of Reclamation." The amounts obligated in 1949 and 1950 are shown in the schedule as comparative transfers.

APPROPRIATION TEXT

GENERAL INVESTIGATIONS

General investigations: For engineering and economic investigations of proposed Federal reclamation projects and surveys, investigations, and other activities relating to reconstruction, rehabilitation, extensions, or financial adjustments of existing projects, and studies of water conservation and development plans, such investigations, surveys, and studies to be carried on by said Bureau either independently, or in cooperation with State agencies and other Federal agencies, including the Corps of Engineers and the Federal Power Commission, \$3,700,000, to remain available until expended, which may be used to execute detailed surveys, and to prepare construction plans and specifications for specific projects or parts of projects until appropriations are available for construction thereof: *Provided*, That no part of this appropriation shall be available for the preparation of any comprehensive plan or project report the construction estimates for which are not based upon current construction prices and costs: *Provided further*, That the expenditure of any sums from this appropriation for investigations of any nature requested by States, municipalities, or other

interests shall be upon the basis of the State, municipality, or other interest advancing at least 50 per centum of the estimated cost of such investigations; (The Interior Department Appropriation Act, 1950.)

Appropriated 1950, \$3,700,000

NOTE.—Estimate of \$5,825,000 for activities previously carried under this title has been transferred in the estimates to "General investigations, Bureau of Reclamation." The amounts obligated in 1949 and 1950 are shown in the schedule as comparative transfers.

APPROPRIATION TEXT**[CONSTRUCTION]**

[Construction: For construction and continuation of construction of the following projects in not to exceed the following amounts, all to be reimbursable (except as otherwise provided by law) under the reclamation law, to remain available until expended for carrying out projects (including the construction of transmission lines) previously or herein authorized by Congress:]

[Santa Barbara County project, California, Cachuma Unit, \$5,185,000: Provided, That none of the funds appropriated herein shall be available for construction of physical works or the acquisition of rights-of-way until the condition contained in the contract between the United States and the Santa Barbara County Water Agency, executed September 12, 1949, concerning participation by member districts shall have been met, and the outcome of elections within the member districts shall have been favorable in sufficient number of districts to approve the disposition of the quantity of water as provided in said contract to make the same effective;]

[Boise project, Idaho, Anderson Ranch Dam, \$1,642,200; Payette division, \$2,520,625;]

[Lewiston Orchards project, Idaho, \$249,750;]

[Minidoka project, Idaho: The limitation on the amount available for surveys and preconstruction work in connection with the North Side pumping division stated in the Interior Department Appropriation Act, 1949, is increased from \$147,500 to \$725,000;]

[Palisades project, Idaho, \$189,625;]

[Milk River project, Montana, Fresno Dam division, \$64,240;]

[Rio Grande project, New Mexico-Texas, \$14,450;]

[W. C. Austin project, Oklahoma, \$255,000;]

[Deschutes project, Oregon, \$1,313,750, of which not to exceed \$35,150 shall be available toward emergency rehabilitation of the works of the Arnold irrigation district, to be repaid in full under conditions satisfactory to the Secretary of the Interior, not to exceed \$1,063,750 shall be available toward emergency reconstruction of Oehoco Dam subject to allocations under section 7 of the Reclamation Project Act of 1939, and repayment of reimbursable amounts under terms satisfactory to the water users and the Bureau of Reclamation, and not to exceed \$100,000 shall be available for emergency reconstruction of the northwest unit pipe line of the Grants Pass irrigation district;]

[Klamath project, Oregon-California, \$803,460;]

[Ogden River project, Utah, \$219,170;]

[Provo River project, Utah, including the south division of Utah Lake Distributing Company Canal, which is hereby authorized, \$4,150,000;]

[Yakima project, Washington, Roza division, \$397,833;]

[Kendrick project, Wyoming, \$1,327,910;]

[Riverton project, Wyoming, \$2,477,050, of which a part shall be available for a comprehensive and detailed survey of the Pavilion and Pilot Butte divisions;]

[Shoshone project, Wyoming, Power division, \$107,400; Willwood division, \$60,000.] (The Interior Department Appropriation Act, 1950.)

Appropriated 1950, \$20,977,463

NOTE.—Estimate of \$21,442,800 for activities previously carried under this title has been transferred in the estimates to "Construction and rehabilitation, Bureau of Reclamation." The amounts obligated in 1949 and 1950 are shown in the schedule as comparative transfers.

APPROPRIATION TEXT

【GENERAL PROVISIONS】

【Limitation of expenditures: Under the provisions of this Act no greater sum shall be expended, nor shall the United States be obligated to expend during the current fiscal year, on any reclamation project appropriated for herein under the reclamation fund, an amount in excess of the sum herein appropriated therefor, nor shall the whole expenditures or obligations incurred for all of such projects for the current fiscal year exceed the whole amount in the reclamation fund for the fiscal year;】

【Interchange of appropriations: Ten per centum of the foregoing amounts for operation and maintenance projects shall be available interchangeably for expenditures on the reclamation projects named; but not more than 10 per centum shall be added to the amount appropriated for any one of said projects, except that should existing works or the water supply for lands under cultivation be endangered by floods or other unusual conditions, an amount sufficient to make necessary emergency repairs shall become available for expenditure by further transfer of appropriation from any of said projects upon

approval of the Secretary.】 (*The Interior Department Appropriation Act, 1950.*)

APPROPRIATION TEXT

[COLORADO RIVER DAM FUND]

[Boulder Canyon project: For operation, maintenance, and replacements of the dam, power plant, and other facilities, of the Boulder Canyon project, \$1,600,000, payable from the Colorado River dam fund, including payments to the Boulder City school district in accordance with the provisions of Public Law 528, approved May 12, 1948: *Provided*, That not to exceed \$5,662.22 from the unobligated balance of the appropriation for operation, maintenance, and replacements of the dam, power plant, and other facilities of the Boulder Canyon project contained in the Interior Department Appropriation Act, 1948, may be utilized for additional payments to the Boulder City school district for the school year 1947-1948, to carry out the purposes of said Public Law 528. Said payments for dependents of those employees of the Bureau of Reclamation directly employed in the construction, operation, and maintenance of the project shall be deemed a part of the cost of operation and maintenance of said project under section 1 (a) of the Boulder Canyon Project Adjustment Act (Act of July 19, 1940, 54 Stat. 774). Other such payments shall be deemed nonproject costs. The Secretary shall submit to the Appropriations Committees annually a justification showing all investments and expenditures made or proposed out of the Colorado River dam fund, for the joint use of the project and of other Federal activities at or near Boulder City. In the proportion that such investments and expenditures were or shall be for the use of such other Federal activities and not related to the con-

struction, operation, or maintenance of the project they shall be deemed nonproject investments and expenditures. The obligation under the provision of section 2 of the said Act to repay to the United States Treasury advances and readvances to the Colorado River dam fund which obligation is made the basis for computation of rates under the provisions of section 1 of said Act, shall be diminished in the amount that nonproject investments or expenditures are or have been made from said fund and the rates computed pursuant to said section 1 of said Act shall reflect such diminution.] (*The Interior Department Appropriation Act, 1950.*)

Appropriated 1950, **\$1,600,000**

NOTE.—Estimate of \$1,808,000 for activities previously carried under this title has been transferred in the estimates to "Operation and maintenance, Bureau of Reclamation." The amounts obligated in 1949 and 1950 are shown in the schedule as comparative transfers.

APPROPRIATION TEXT

【Colorado River development fund (expenditure account): For investigations of projects for the utilization of waters of the Colorado River system in the four States of the upper division, as authorized by section 2 of the Boulder Canyon Project Adjustment Act, approved July 19, 1940 (54 Stat. 774), \$500,000 from the Colorado River development fund (holding account), to remain available until expended: *Provided*, That the existence of this appropriation item shall not preclude the use in any part of the States of the Colorado River Basin of funds appropriated for general investigations: *Provided further*, That no part of this appropriation shall be available for the preparation of any comprehensive plan or project report the construction estimates for which are not based upon current construction prices and costs.】 (The Interior Department Appropriation Act, 1950.)

Appropriated 1950, \$500,000

NOTE.—Estimate of \$500,000 for activities previously carried under this title has been transferred in the estimates to "General investigations, Bureau of Reclamation." The amounts obligated in 1949 and 1950 are shown in the schedule as comparative transfers.

PROGRAM AND PERFORMANCE

The funds advanced by water users' associations in 1949 and 1950 were used to operate and maintain, in part or whole, the projects providing water to those associations. Funds also advanced by State, city, or other local governments are used to make investigations requested by those governments, to provide municipal water, and similar work. Beginning in 1951 operation and maintenance services will be financed entirely from funds appropriated and transferred from the reclamation fund to the appropriation "Operation and maintenance" and the advances will be credited to the reclamation fund.

APPROPRIATION OR ESTIMATE

Appropriated (estimate) 1950, **\$1,938,625** Estimate 1951, **\$20,000**

APPROPRIATION TEXT

【No part of any appropriation for the Bureau of Reclamation, contained in this or any prior Act, which represents amounts earned under the terms of a contract but remaining unpaid, shall be obligated for any other purpose, regardless of when such amounts are to be paid: *Provided*, That the incurring of any obligation prohibited by this paragraph shall be deemed a violation of section 665 of title 31 of the United States Code.】

【Not exceeding 12 per centum of the construction appropriation for the Bureau of Reclamation for any project contained in this Act shall be available for construction work by force account and on a hired labor basis; except that not to exceed \$225,000 may on approval of the Commissioner be expended for construction work by force account on any one project when the work is unsuitable for contract or when excessive bids are received; and except in cases of emergencies local in character, so declared by the Commissioner.】

【The Departments of Air Force, Army, and Navy, the Civil Aeronautics Administration, and the War Assets Administration are authorized during the fiscal year 1950 to transfer to the Bureau of Reclamation aircraft engines, parts, accessories, and other aircraft equipment, materials and supplies, surplus to the needs of such agencies, as may be required by said Bureau of Reclamation, such transfers to be without charge therefor.】 (*The Interior Department Appropriation Act, 1950.*)

PROGRAM AND PERFORMANCE

The Geological Survey, in the United States and certain of its Territories, makes geologic investigations and conducts research in geologic and related chemical and physical problems; makes topographic, geologic, base, and other maps; investigates the quantity, distribution, mineral quality, availability, and utilization of surface and underground water supplies; classifies the public lands as to mineral and water values and provides technical data for public-land law administration; and supervises the technical phases of operations on public lands under leases, licenses, and permits. For 1951, increases are planned primarily for topographic surveys and mapping and water resources investigations.

1. *Topographic surveys and mapping.*—This activity covers the preparation of topographic maps of the United States, its Territories and possessions, and their distribution, with related data, to Government agencies and to the public. These maps provide accurate information essential to development and conservation projects, the design of public works, and the planning of military operations wherever a detailed knowledge of the terrain is required. They are general-purpose maps designed to satisfy a diversity of requirements and thus eliminate the need for many overlapping surveys. For 1951, an estimated 64,000 square miles of mapping will be performed, compared with 41,900 square miles in 1949 and 49,000 square miles in 1950. Only about 972,000 square miles, or slightly over one-fourth of the area of the United States and Alaska, is either adequately mapped or is covered by maps that can be raised to the level of standard accuracy by a small amount of revision.

2. *Geologic and mineral resource surveys and mapping.*—The program of geologic surveys is a long-range one of continuing geologic and related scientific activities for

providing an accurate appraisal of the Nation's mineral resources, exploring by scientific methods for additional mineral resources, and developing basic data on terrain and foundation conditions. The program consists of systematic geologic mapping aided by special investigations in supporting sciences such as geophysics, geochemistry, petrology, and paleontology. Increases in 1951 provide for exploratory reconnaissance surveys of promising regions in the West. In the field of mineral fuels, more emphasis will be placed on appraisal of coal resources of the Nation. Engineering geology will be increased in scope and intensity.

3. *Water resources investigations.*—The Survey's water resources investigations provide water facts required in the planning, design, construction, and operation of projects by which the water resources of the Nation are developed or utilized. This program includes the collection of records of flow, sediment discharge, chemical quality, temperature, and reservoir content of rivers, and records of discharge from underground basins, and related water levels, chemical quality, and temperatures. It also covers related investigations and research of the broad scope required in effective coverage. The results are made available to interested agencies and the public through appropriate reports and releases. Expansion of the program is planned in 1951 to meet the most critical deficiencies of water data that are essential to the sound planning and construction of Federal water development programs and to supplement the Federal-State cooperative work and specialized programs supported by transfers from other Federal agencies, in order to effect a better balance in the national program. Approximately 60 percent of the direct appropriation to this activity is matched by States and municipalities.

4. *Soil and moisture conservation.*—These funds are used for furnishing hydrologic and geologic information and advice to the land management bureaus in connection with the planning, surveys, and investigations preliminary to measures for soil and moisture conservation on land under the jurisdiction of the Department of the Interior.

5. *Classification of lands.*—This activity provides for investigations and classifications of the Federal lands with respect to mineral and water-power resources. No increase is proposed for this activity.

6. *Supervision of mining and oil and gas leases.*—The supervision of operations and activities concerned with the prospecting, development, and production of minerals under more than 28,000 leased properties is financed under this activity. During the past 9 years, there has been a fourfold increase in the value of the minerals produced and royalties earned from the supervised properties. For example, the value of production of oil and gas and other minerals increased from \$87,500,000 in 1940 to \$366,000,000 in 1948; comparable increases in the royalty returns from \$8,000,000 to \$34,000,000 are shown in the same period. There have also been substantial increases in the number of producing mines, producing wells, and leased properties during this period. A small increase is included for 1951, to provide for additional employees.

7. *General administration.*—Funds for the general business administration of the Geological Survey at the seat of government and in the field are included under this heading.

APPROPRIATION TEXT

SURVEYS, INVESTIGATIONS, AND RESEARCH

For expenses necessary for the Geological Survey to perform surveys, investigations, and research covering topography, geology, and the mineral and water resources of the United States, its territories and possessions; classify lands as to mineral character and water and power resources; give engineering supervision to power permits and Federal Power Commission licenses; enforce departmental regulations applicable to oil, gas, and other mining leases, permits, licenses, and operating contracts; and publish and disseminate data relative to the foregoing activities; \$20,000,000, of which \$3,200,000 shall be available only for cooperation with States or municipalities for water resources investigations: Provided, That the share of the Geological Survey in any topographic mapping or water resources investigations carried on in cooperation with any State or municipality shall not exceed 50 per centum of the cost thereof. (43 U. S. C. 31; The Interior Department Appropriation Act, 1950.)

Estimate 1951, * \$20,000,000

* Estimate of \$20,000,000 is for activities previously carried under appropriations as follows:

"Geological Survey":	
Salaries and expenses.....	\$354,000
Topographic surveys.....	7,845,000
Geologic surveys.....	3,925,000
Mineral resources of Alaska.....	515,000
Gaging streams.....	5,475,000
Classification of lands.....	330,000
Mineral leasing.....	790,000
Engraving and printing maps.....	703,000
"Contingent expenses, Department of the Interior"	22,000
"Salaries and expenses, soil and moisture conservation, Department of the Interior"	41,000

The amounts obligated in 1949 and 1950 are shown in the schedule as comparative transfers.

GEOLOGICAL SURVEY—Continued

APPROPRIATION TEXT

ADMINISTRATIVE PROVISIONS

The amount appropriated for the Geological Survey shall be available for personal services in the District of Columbia; purchase (not to exceed one hundred and twenty-nine, of which eighty-five shall be for replacement only) and hire of passenger motor vehicles; printing and binding, including purchase of reprints; reimbursement of the General Services Administration for security guard service for protection of confidential files; contracting for the furnishing of topographic maps and for the making of geophysical or other specialized surveys when it is administratively determined that such procedures are in the public interest; construction and maintenance of necessary buildings and appurtenant facilities; acquisition of lands for gaging stations; and payment of compensation and expenses (not to exceed \$10,000) of the person appointed by the President to participate as the representative of the United States in the administration of the compact consented to by the Act of May 31, 1949 (Public Law 82): *Provided, That notwithstanding the provisions of any other law, the President is authorized to appoint a retired officer as such representative, without prejudice to his status as a retired Army officer, and he shall receive such compensation and expenses in addition to his retired pay.*

Geological Survey—

For salaries and expenses necessary for the Geological Survey, including personal services in the District of Columbia; purchase (not to exceed one hundred and thirty-eight, of which ninety-three shall be for replacement only) and hire of passenger motor vehicles and the maintenance and operation of aircraft; exchange of un-serviceable passenger and freight vehicles as part payment for new freight vehicles; and printing and binding and the purchase of reprints; as follows: (The Interior Department Appropriation Act, 1950.)

PROGRAM AND PERFORMANCE

This revolving fund is for transfer each year to the appropriation "Surveys, investigations, and research," covering obligations arising from authorized reimbursable services, pending receipt of reimbursements from cooperating agencies. The amounts so transferred are returned to the revolving fund not later than 6 months after the close of each fiscal year (43 U. S. C. 48).

APPROPRIATION TEXT

【Revolving fund: The funds appropriated under the subhead "Cooperative advance, Geological Survey", in the Interior Department Appropriation Act, 1949, are hereby continued available for establishing a revolving fund which shall be available, without fiscal-year limitation, exclusively for transfer to the single fund appropriation for the Geological Survey to cover obligations arising from authorized reimbursable services, pending receipt of reimbursements from cooperating agencies: *Provided*, That amounts so transferred shall be returned to the revolving fund not later than six months after the close of the fiscal year in which transferred.】 (*The Interior Department Appropriation Act, 1950.*)

【During the current fiscal year the head of any department or independent establishment of the Government having funds available for scientific and technical investigations within the scope of the functions of the Geological Survey may, with the approval of the Secretary, transfer to the Geological Survey such sums as may be necessary therefor, which sums so transferred may be expended for the same objects and in the same manner as sums appropriated herein may be expended: *Provided*, That not to exceed 5 per centum of any of the appropriations for the Geological Survey may be transferred to any other of such appropriations, but no appropriation shall be increased more than 5 per centum thereby. Any such transfer shall be reported to Congress in the annual budget;】

【In the event that the Director of the Geological Survey deems it advantageous to the Government, the Geological Survey is authorized to contract for the furnishing of topographic maps made from aerial photographs, or for the making of geophysical or other specialized surveys: *Provided*, That the foregoing amounts for the Geological Survey shall be available in one fund.】

【The Geological Survey is hereby authorized to acquire by transfer without exchange of funds, for one year beginning July 1, 1949, from executive departments or independent establishments, equipment, materials, and supplies of all kinds, with an appraised value of not to exceed \$150,000 from the surplus stores of these agencies: *Provided*, That the authorization in this paragraph shall not be construed to deny to veterans the priority accorded to them in obtaining surplus property under Public Law 375, approved May 3, 1946.】 (*The Interior Department Appropriation Act, 1950.*)

Allotment to Geological Survey from "Missouri River Basin (reimbursable)," Bureau of Reclamation

NOTE.—The following schedules cover funds available, activities, and objects under allotment from the account "Missouri River Basin (reimbursable)," which is shown under the Bureau of Reclamation.

Transferred from "Colorado River front work and levee system," Bureau of Reclamation	\$18,000	7,500	
Total available for obligation	18,000	11,433	
Balance available in subsequent year	-3,933		
Total obligations	14,067	11,433	

PROGRAM AND PERFORMANCE

This transfer of funds from the Bureau of Reclamation is for the purpose of conducting a sedimentation survey of a section of the Colorado River at the head of Lake Mead to provide data vital to the operation of the Hoover Dam power plants and the regulation of outflow of water from Lake Mead.

OBLIGATIONS BY ACTIVITIES

Description	1949 actual	1950 estimate	1951 estimate
1. Water resources investigations for Bureau of Reclamation	\$14,067	\$11,233	
2. Pay increases		200

PROGRAM AND PERFORMANCE

The Military Geology Branch of the Survey's Geologic Division produces reports on such topics as terrain, permafrost, rocks, soils, construction materials, water supply, and bearing of geologic and related factors on military operational problems. Preparation of comprehensive intelligence reports is done chiefly in Washington. Field studies are conducted in Alaska, the Pacific Islands, and the United States. Activities of this branch in 1951 are expected to continue at about the 1950 level.

Balance available in subsequent year.....	-15,462		
Total obligations.....	176,538	268,072	230,000

PROGRAM AND PERFORMANCE

The Survey is responsible for all geologic phases of exploration for oil in Naval Petroleum Reserve No. 4, Alaska. Extensive field, laboratory, and office geologic investigations and related geophysical and photogrammetric studies are made prior to and concurrent with drilling. Information obtained is coordinated with explorations of other Government agencies and private contractors for evaluation of oil possibilities and recommendations on future explorations. Plans for 1951 involve a small reduction in field operations compared with 1950, with research and laboratory operations continuing at approximately the same level.

General Investigations, Bureau of Reclamation (Transfer to Geological Survey)—

FUNDS AVAILABLE FOR OBLIGATION: Transferred from "General investigations, Bureau of Reclamation"—1951, \$175,000.

PROGRAM AND PERFORMANCE

This transfer of funds from the Bureau of Reclamation is for the operation and maintenance of gaging stations, the determination of the chemical quality and sediment load of river waters, and the investigation of occurrence, availability, water levels, and chemical quality of ground waters in the 17 Western States in which the Bureau of Reclamation operates. In each case the work to be performed is specifically designated by this agency and is needed in connection with the planning, construction, and operation of reclamation projects. In general, these transferred funds supplement those of the cooperative programs with the States and municipalities or those operated by Federal program funds in order that all of the data required by the Bureau of Reclamation concerning water resources may be available.

Maintenance and Operations, Air Force (Transfer to Interior, Geological Survey)—

FUNDS AVAILABLE FOR OBLIGATION: Transferred from "Maintenance and operations, Air Force"—1950, \$500,000; 1951, \$500,000.

PROGRAM AND PERFORMANCE

This transfer finances a program of aeronautical-chart compilation for use of the Air Force. Included in this program are original photogrammetric chart compilations from aerial photography and the review and revision of previously compiled charts. Operations will be continued in 1951 at about the same level as in 1950. Current production figures indicate a yearly output of basic manuscripts of approximately 100 new chart areas.

Total obligations.....	100,839	115,400	118,000

PROGRAM AND PERFORMANCE

This transfer of funds from the Department of State is for special and technical investigations on international boundary rivers, United States and Canada, for the International Joint Commission.

The Commission (established in 1912) is authorized by the treaty of January 11, 1909, to examine and report upon facts and circumstances of particular questions and matters referred to it. An important phase of the Commission's work relates to water problems that are highly technical and require the collection of continuing basic water records and project investigations of water problems.

OBLIGATIONS BY ACTIVITIES

Description	1949 actual	1950 estimate	1951 estimate
1. Water resources investigations for the International Joint Commission.....	\$100,839	\$113,650	\$115,400

PROGRAM AND PERFORMANCE

The Geological Survey receives annually advances from other Federal agencies for work to be performed within the scope of its regular functions. Of the total advances, about 90 percent are for geologic and mineral resource surveys and mapping, principally the preparation of geologic reports on raw materials for the Atomic Energy Commission.

OBLIGATIONS BY ACTIVITIES			
Description	1949 actual	1950 estimate	1951 estimate
1. Topographic surveys and mapping	\$184,646	\$161,349	\$98,000

Total obligations	4,200		

Reclamation Fund, Special Fund (Transfer to Geological Survey)—

FUNDS AVAILABLE FOR OBLIGATION	1949 actual	1950 estimate	1951 estimate
Prior year balance available	\$24,537	\$27,155	
Transferred from "Reclamation fund, special fund," Bureau of Reclamation	167,785	175,000	
Total available for obligation	192,322	202,155	
Balance available in subsequent year	-27,155		
Total obligations	165,167	202,155	

PROGRAM AND PERFORMANCE

This transfer of funds from the Bureau of Reclamation is for the operation and maintenance of gaging stations, the determination of the chemical quality and sediment load of river waters, and the investigation of occurrence, availability, water levels, and chemical quality of ground waters in the 17 Western States in which the Bureau of Reclamation operates. In each case, the work to be performed is specifically designated by this agency and is needed in connection with the planning, construction, and operation of reclamation projects. In general, these transferred funds supplement those of the cooperative programs with the States and municipalities or those operated by Federal program funds in order that all of the data required by the Bureau of Reclamation concerning water resources may be available.

PROGRAM AND PERFORMANCE

This account is derived from the proceeds of the sale or other disposition of water from wells developed by the Secretary of the Interior when permittees and lessees, prospecting under the provisions of law (30 U. S. C. 221-229), strike water instead of oil and gas while drilling. The authority to use such funds in developing water wells is contained in the act approved June 16, 1934 (48 Stat. 977).

BUREAU OF MINES

INTRODUCTORY STATEMENT

The Bureau of Mines is engaged in scientific and technical research to (1) conserve minerals through increased efficiency in their mining, preparation, and use; (2) discover methods for the economical treatment of lower-grade ores; and (3) conserve human life through the adoption of safety practices in the mining and mineral industries.

PROGRAM AND PERFORMANCE

This appropriation provides for conserving, evaluating, and developing mineral resources.

1. *Fuels*—(a) *Coal*.—The Bureau conducts scientific research and engineering investigations and tests on the chemical and physical properties of coal, and its mining, preparation, combustion, carbonization, and gasification. It samples and analyzes coal; performs a fuel economy service for Government agencies; estimates coking coal reserves; evaluates efficiency of coal mining methods; studies methods for dewatering anthracite mines and improving the mechanized mining of anthracite; investigates problems of coal preparation, fuel combustion, and gas, coke, and byproduct properties of American coal; operates research laboratories; and performs economic and statistical studies.

The program for 1951 includes the determination of current losses in coal mining as the first step in a concentrated campaign to increase the percentage recovery of coal in mining. It provides for operation, upon a 12-month basis, of the lignite research laboratory at Grand Forks, N. Dak., scheduled for completion May 1, 1950, and the anthracite research laboratory at Schuylkill Haven, Pa., completed October 1, 1949.

(b) *Petroleum and natural gas*.—The program for petroleum and natural gas comprises seven projects as follows: (1) Engineering research on problems connected with the development and production of petroleum and natural gas, (2) scientific and technologic research on secondary recovery methods of producing petroleum, (3) studies dealing with transportation and storage problems, (4) scientific studies involving the chemistry and refining of petroleum and natural gas, (5) fundamental research to determine the thermodynamic properties of hydrocarbons, (6) administration, operation, and maintenance of a petroleum experiment station, and (7) statistical and economic studies of petroleum and natural gas. The increase for 1951 will permit more adequate coverage of the statistical phases of this activity.

(c) *Synthetic liquid fuels*.—Appropriations aggregating \$60,000,000 have been authorized to conduct laboratory research and to develop and operate demonstration plants

for the production of synthetic liquid fuels from coal, oil shale, and agricultural and forest products. The primary objective of this program is to conserve and increase the liquid fuel resources of the Nation. All major construction of demonstration plants will be completed during 1950. In the budget year these plants will be in full operation with research continuing in the laboratories.

(d) *Helium*.—The Bureau conducts a scientific and technologic research program on resources, production, storage, and utilization of helium on a large-scale basis. A total of 48,813,896 cubic feet of helium was supplied to Federal and non-Federal customers during 1949. Purchases by non-Federal users amounted to about 32.5 percent of this total.

2. *Minerals and metals*.—The Bureau also conducts investigations and research in the field of metals and other minerals. The program includes improving mining technology through laboratory research and field experimentation and testing; examining ore deposits and developing marginal and submarginal reserves; discovering and improving metallurgical processes to make better use of low-grade ores; investigating the recovery of waste metals and scrap; developing substitutes for scarce commodities; and collecting, analyzing, and disseminating statistical and economic information. Provision is made in 1951 for operation, upon a 12-month basis, of the Alaska mining experiment station, scheduled to open about May 1, 1950, and for increased statistical and economic coverage.

3. *Control of fires in inactive coal deposits*.—The Bureau is engaged in controlling or extinguishing fires on public lands or those in inactive or abandoned deposits on private property.

APPROPRIATION TEXT

CONSERVATION AND DEVELOPMENT OF MINERAL RESOURCES

For expenses necessary for promoting the conservation, exploration, development, production, and utilization of mineral resources, including fuels, in the United States, its Territories, and possessions; developing synthetics and substitutes; producing and distributing helium; and controlling fires in inactive coal deposits on public lands, and on private lands, with the consent of the owner; \$18,202,400: Provided, That the Secretary is authorized and directed to enter into contracts with owners of private property or with a State or its subdivisions for the payment during the current fiscal year of a sum equal to the amount of Federal expenditure in such year in each case for the control or extinguishment of mine fires, and no expenditure shall be made in any State or privately owned operating coal mine except for investigation and supervision. (30 U. S. C. 1-11, 321-325; 50 U. S. C. 161-166; The Interior Department Appropriation Act, 1950.)

Estimate 1951, * \$18,202,400

* Estimate is for activities previously carried under the following appropriations:

"Operating mine-rescue cars and stations and investigation of mine accidents, Bureau of Mines".....	\$22,525
"Control of fires in inactive coal deposits, Bureau of Mines".....	488,926
"Coal-mine inspections and investigations, Bureau of Mines".....	75,043

Total obligations.....	3,472,430	3,768,788	3,900,000

PROGRAM AND PERFORMANCE

The Bureau performs (1) investigations of accidents and rescue work in disasters affecting the minerals industries, (2) coal-mine inspections and investigations, and (3) explosives and explosions testing and research.

1. *Investigation of accidents and rescue work.*—Operations under this activity are designed to reduce working

hazards, safeguard the health of workers, and promote efficiency in the mineral industries. The Bureau encourages accident prevention through education and safety organizations, exhibits, and demonstrations; gives instruction in first-aid and mine-rescue methods; investigates explosions, fires, and other serious accidents in mines and mineral industry plants; investigates and develops safety devices for the mineral industries; tests equipment for use in mines and plants where explosive atmospheres may be encountered; and performs field and laboratory studies of ventilation of mines, methods of allaying mineral dusts, prevention of dust accumulations, effective use of rock dust to prevent widespread coal-dust explosions, and blasting practices. For 1951, the estimate will permit some reduction in the backlog of applications for approval of equipment designed for use in mines.

2. *Mine inspections and investigations.*—All coal mines employing 25 or more men and a great number employing less than 25 men are inspected one or more times annually. Every phase of mining activity is investigated, and reports are prepared covering the hazards observed, with recommendations to eliminate or alleviate the hazards. Copies of each report are sent to the mine management, State mining department, and local and national union headquarters (if an organized mine). In 1951, provision is made for full-year employment of a portion of the inspection staff financed for only a part of 1950.

COAL MINES INSPECTED DURING FISCAL YEAR 1949

	Underground mines employing—		Strip mines	Total
	Less than 25 men	25 and more men		
Number of coal mines in the United States.....	6,802	2,179	1,113	10,094
Number of individual coal mines inspected.....	2,031	2,073	270	4,374
Total number of Federal inspections of coal mines.....	2,620	3,740	314	6,674

3. *Explosives and explosions research and testing.*—The Bureau conducts research to discover causes of explosions in coal mines and to improve methods of preventing explosions. This program includes investigations of various phases of manufacture, transportation, storage, and use of explosives, as well as the causes and prevention of explosions of inflammable dusts, vapors, and gases, throughout the mineral industries. Tests are conducted continually on explosives and blasting devices to determine their permissibility for use in coal mines or their suitability for use in other mining operations and the conditions under which they can be used safely. Fundamental scientific research on the explosibility and flammability of gases and vapors is a continuing project. In many phases of this program, the Bureau cooperates with industry associations and scientific groups, particularly in the development of safer explosives and of safe procedures to minimize and eliminate disasters.

HEALTH AND SAFETY

For expenses necessary for promotion of health and safety in mines and in the minerals industries as authorized by law, \$3,900,000. (30 U. S. C. 1-11; The Interior Department Appropriation Act, 1950.)

Estimate 1951, * \$3,900,000

* Estimate is for activities previously carried under appropriations as follows:
 "Operating mine rescue cars and stations and investigation of mine accidents, Bureau of Mines" \$1,161,957
 "Coal-mine inspections and investigations, Bureau of Mines" 2,660,209
 "Economics of mineral industries, Bureau of Mines" 77,834
 The amounts obligated in 1949 and 1950 are shown in the schedule as comparative transfers.

Construction, Bureau of Mines—

FUNDS AVAILABLE FOR OBLIGATION	1949 actual	1950 estimate	1951 estimate
Appropriation or estimate			\$1,797,600
Applied to contract authorization			-550,000
Net appropriation available for obligation			1,247,600
Transferred from "Synthetic liquid fuels, Bureau of Mines" (contract authorization)			6,600,000
Total available for obligation			7,847,600
Balance available in subsequent year (contract authorization)			-6,600,000
Obligations incurred			1,247,600
Comparative transfer from—			
"Construction and equipment of lignite research laboratory, Grand Forks, N. Dak., Bureau of Mines"	\$44,090	\$705,910	
"Construction and equipment of anthracite research laboratory, Schuylkill Haven, Pa., Bureau of Mines"	1,370	300,000	
"Synthetic liquid fuels, Bureau of Mines"	3,280,000	1,671,079	
"Drainage tunnel, Leadville, Colo., Bureau of Mines (national defense)"	1,112	521,328	
"Care, etc., buildings and grounds, Bureau of Mines, Pittsburgh, Pa."		42,000	
Total obligations	3,326,572	3,240,317	1,247,600

PROGRAM AND PERFORMANCE

1. *New laboratory facilities.*—The funds included under this appropriation will complete the construction and equipment of the anthracite research laboratory at Schuylkill Haven, Pa., and will provide for a new coal grinding, processing, and storage plant at Bruceton, Pa.

2. *Drainage tunnel, Leadville, Colo.*—The 1951 program contemplates completion of the tunnel to the Pyrenees shaft, leaving 5,700 feet for future drilling, the estimated cost of which is \$775,000. It is anticipated that when the tunnel is completed, resultant benefits will accrue to the Government in the form of royalties, tolls, and a significant increase in readily available reserves principally of lead and zinc.

3. *Synthetic liquid fuels.*—The funds included under this appropriation will provide for minor construction resulting from process improvements in laboratories and pilot and demonstration plants.

CONSTRUCTION

For construction and improvement of facilities under the jurisdiction of the Bureau of Mines, to remain available until expended, \$1,797,600, of which not to exceed \$550,000 is for liquidation of obligations incurred pursuant to authority granted under the heads "Anthracite research laboratory" and "Drainage tunnel, Leadville, Colorado," in The Interior Department Appropriation Act, 1950: Provided, That unexpended balances of appropriations heretofore made, including unused balances of related contract authorizations, under the heads, "Synthetic liquid fuels," "Drainage tunnel, Leadville, Colorado," "Lignite research laboratory," and "Anthracite research laboratory" shall be transferred to and merged with this appropriation. (30 U. S. C. 1-11, 321-325; Act of Mar. 25, 1948, Public Law 454; Act of Dec. 18, 1942 (56 Stat. 1046); The Interior Department Appropriation Act, 1950.)

Estimate 1951, * \$1,797,600

* Estimate is for activities previously carried under the following appropriations:
 "Construction and equipment of anthracite research laboratory, Schuylkill Haven, Pa., Bureau of Mines" \$300,000
 "Synthetic liquid fuels, Bureau of Mines" 780,600
 "Drainage tunnel, Leadville, Colo., Bureau of Mines" 675,000
 "Care, etc., buildings and grounds, Pittsburgh, Pa., Bureau of Mines" 42,000
 The amounts obligated in 1949 and 1950 are shown in the estimate as comparative transfers.

“Economics of mineral industries, Bureau of Mines”.....	41,569
“Helium utilization and research, Bureau of Mines”.....	5,018
“Contingent expenses, Department of the Interior”.....	9,000

The amounts obligated in 1949 and 1950 are shown in the schedule as comparative transfers.

ADMINISTRATIVE PROVISIONS

Appropriations and funds available to the Bureau of Mines may be expended for personal services in the District of Columbia; purchase (not to exceed one hundred and fifty-five, of which one hundred and forty-five shall be for replacement only) and hire of passenger motor vehicles; printing and binding, including purchase of reprints; providing transportation services in isolated areas for employees, student dependents of employees, and other pupils, and such activities may be financed under cooperative arrangements; temporary and emergency contracts for personal services and employment of persons without regard to civil-service regulations as required in the conduct of programs for the control of fires in inactive coal deposits and flood prevention in anthracite mines; purchase and bestowal of certificates and trophies in connection with mine rescue and first-aid work: Provided, That the Director of the Bureau of Mines is authorized to accept lands, buildings, equipment and other contributions from public and private sources and to prosecute projects in cooperation with other agencies, Federal, State, or private: Provided further, That power produced in the operation of the power plant of the Bureau of Mines at Louisiana, Missouri, in excess of the Bureau's needs may be sold to non-Federal purchasers, but the expenses of the Bureau in the production and sale of such excess power shall not exceed the total amount of such sales, and expenditures for the production of excess power shall not be deemed a charge against the total appropriations authorized by the Synthetic Liquid Fuels Act, as amended: Provided further, That the sums made available for the current fiscal year in the Act making appropriations for the Departments of the Army, Navy, and Air Force for the acquisition of helium from the Bureau of Mines shall be transferred to the Bureau of Mines on July 1 of said fiscal year: Provided further, That the Bureau of Mines is authorized, during the current fiscal year, to sell directly or through any Government agency, including corporations, any metal or mineral product that may be manufactured in pilot plants operated by the Bureau of Mines, and the proceeds of such sales shall be covered into the Treasury as miscellaneous receipts.

The Veterans Administration is authorized to transfer to the Department of the Interior, for the use of the Bureau of Mines, without compensation therefor, full jurisdiction, possession, and control of a parcel of forty-three acres, more or less, within the boundaries of the Fort Snelling Government Reservation in Hennepin County, Minnesota. (The Interior Department Appropriation Act, 1950.)

APPROPRIATION TEXT

[Helium production and investigations: The sums made available for the current fiscal year in the Acts making appropriations for the Departments of the Air Force, Army, and Navy for the acquisition of helium from the Bureau of Mines shall be transferred to the Bureau of Mines on July 1 of said fiscal year, for operation and maintenance of the plants for the production of helium for military and naval purposes, including the purchase in the District of Columbia and elsewhere of items otherwise properly chargeable to the appropriation "Contingent expenses, Department of the Interior" (not exceeding \$5,000); printing and binding; and \$61,800 for personal services in the District of Columbia: *Provided*, That section 3709, Revised Statutes, as amended, shall not be construed to apply to this appropriation, or to the appropriation for development and operation of helium properties (special fund) in section 3 (c) of the Act of September 1, 1937 (50 U. S. C. 164): *Provided further*, That funds available for the production of helium and the development of helium properties may be utilized to provide transportation between helium plants and related facilities and communities that provide adequate living accommodations of persons engaged in the operation and maintenance of helium plants; and for transportation to and from schools of pupils who are dependents of such persons: *Provided further*, That pursuant to agreements approved by the Secretary, the transportation equipment available to the Bureau of Mines may be pooled with that of school districts and other local or Federal agencies for use in transporting persons engaged in operation and maintenance of helium plants, pupils who are dependents of such persons, and other pupils, and in the interest of economy the expenses of operating such equipment may be shared.]

[During the current fiscal year the head of any department or independent establishment of the Government having funds available for scientific investigations within the scope of the functions of the Bureau of Mines may, with the approval of the Secretary, transfer to the Bureau such sums as may be necessary therefor, which sums so transferred may be expended for the same objects and in the same manner as sums appropriated herein may be expended.]

[The Federal Security Administrator may detail medical officers of the Public Health Service for cooperative health, safety, or sanitation work with the Bureau of Mines, and the compensation and expenses of the officers so detailed may be paid from the applicable appropriations made herein for the Bureau of Mines.]

[The Bureau of Mines is authorized, during the current fiscal year, to sell directly or through any Government agency, including corporations, any metal or mineral product that may be manufactured in pilot plants operated from funds appropriated to the Bureau of Mines, and the proceeds of such sales shall be covered into the Treasury as miscellaneous receipts.]

[Appropriations in this Act to the Bureau of Mines shall be available for the purchase (not to exceed one hundred and fifty-one, of which one hundred and thirty-seven shall be for replacement only) and hire of passenger motor vehicles.]

[Not to exceed \$50,000 of any available funds of the Bureau of Mines may be expended for reconstruction, replacement, and repair of buildings and utilities, and equipment under the jurisdiction of the Bureau of Mines damaged or destroyed by fire, flood, storm, or other unavoidable causes.]

[The last paragraph under the head "Bureau of Mines" in the Interior Department Appropriation Act, 1949, is amended to read as follows: "The Department of the Army is authorized to transfer to the Department of the Interior, for the use of the Bureau of Mines, without compensation therefor, full jurisdiction, possession, and control of a parcel of ten acres, more or less, from that portion of Fort Douglas Military Reservation in the county of Salt Lake, State of Utah, which lies directly north and east of the site of the Bureau of Mines Intermountain Experiment Station and is described substantially as follows: All of that parcel of land bounded on the north by the southerly margin of Fort Douglas Boulevard; bounded on the west by the easterly margin of Fifteenth East Street extended and by a line running south from Monument Numbered 6, Fort Douglas Military Reservation, Utah, a distance of four hundred and eighty feet, to a point in line with the southerly margin of the five-acre tract at present occupied by the Department of the Interior, Bureau of Mines, bounded on the south by a line running east from said point in line with the southerly margin of said Bureau of Mines property, and by a line running west from Monument Numbered 6, Fort Douglas Military Reservation; and bounded on the east by a north and south line so located as to make the total enclosed area approximately ten acres."] (The Interior Departmental Appropriation Act, 1950.)

Allotment to Bureau of Mines from "Missouri River Basin (Reimbursable), Bureau of Reclamation (Bureau of Mines)"

NOTE.—The following schedules cover funds available, activities, and obligations under allotment from the account "Missouri River Basin (reimbursable), Bureau of Reclamation."

NATIONAL PARK SERVICE

INTRODUCTORY STATEMENT

The fundamental purpose of the National Park Service is to conserve the scenic, natural, and historic objects, and the wildlife in the National Park Service areas, and to provide for the enjoyment by the public of these areas in such manner as will leave them unimpaired for the use of future generations. The Service makes studies and plans of park, parkway, and recreational areas in cooperation with other Federal agencies, States, and localities; preserves for public benefit historic sites, buildings, and objects of national significance; and administers national recreational areas.

PROGRAM AND PERFORMANCE

1. *Management of park and other areas.*—The 1951 program contemplates the management of 181 areas, comprising approximately 23,789,000 acres located in 38 States, the District of Columbia, Alaska, Hawaii, and Puerto Rico; some expansion in the "on site" management, protection, and interpretation of the areas; and a permanent staff for comprehensive auditing of the records of 268 concessioners operating in 64 areas. Actual and estimated visitors to, and receipts from, the areas are as follows:

	1948 actual	1949 actual	1950 estimate	1951 estimate
Visitors	29,608,318	31,864,180	32,000,000	32,000,000
Revenues	\$3,303,328	\$3,467,607	\$3,700,000	\$3,700,000

2. *Forestry and fire control.*—The service protects over 6,500,000 acres of virgin forests and over 3,100,000 acres of brush and grasslands from fire and insect depredation. The 1951 program contemplates slight increases in general expenses and additional fire control services. A token amount of \$30,000, to be supplemented later, if needed, is included for fighting forest fires and meeting other unavoidable emergency needs.

3. *Soil and moisture conservation.*—No expansion is proposed for 1951. Corrective and preventive measures will be taken in 16 of approximately 70 problem areas.

4. *Plans and investigations.*—The Service investigates reservoir projects to determine recreational potentialities at project sites being developed by Federal agencies, and cooperates with States and their political subdivisions in planning for the development of recreational resources; studies and reports upon the feasibility of establishing parks and parkways; in cooperation with the Smithsonian

NATIONAL PARK SERVICE—Continued

Management and Protection, National Park Service—Continued

Institution, surveys archeological sites subject to destruction through dam construction or other causes, and excavates those sites of major importance to salvage archeological remains; conducts historical and archeological research in connection with established or proposed park or monument areas; and prepares master plans for ultimate development of these areas. The 1951 program contemplates a basin-wide recreational study of the Rogue River, Oreg.; a study of the recreational resources of Alaska; and an acceleration in the rate of master plan preparation.

APPROPRIATION TEXT

MANAGEMENT AND PROTECTION

For expenses necessary for the management and protection of the areas and facilities administered by the National Park Service, including protection of lands in process of condemnation; and for plans, investigations, and studies of the recreational resources (exclusive of preparation of detailed plans and working drawings) and archaeological values in river basins of the United States (except the Missouri River Basin); \$7,855,000: Provided, That the unexpended balance of the appropriation under the head "Mississippi River Parkway" in the Second Supplemental Appropriation Act, 1950, shall be transferred to and merged with this appropriation. (5 U. S. C. 124-132, 133t, note p. 90; 16 U. S. C. 1, 2-4, 17j-2, 21, 41, 46-48, 80, 81, 91, 111, 121, 141, 151, 156, 159, 161, 191, 201, 211, 214, 221-251, 341, 344, 347, 361, 391, 401-404, 406-408, 409, 410-410d, 422-423j, 424-430, 430f, 430i, 430t, 431-433, 446, 460, 461-467; 24 U. PROGRAM AND PERFORMANCE

1. *Roads and trails.*—As of July 1, 1949, the Service maintained 5,735 miles of roads and parkways and 7,157 miles of trails. Road maintenance estimated to cost \$592 per mile in 1950 will be reduced to about \$578 per mile during the budget year because of a slight increase in overall mileage, but primarily because of road improvements during the past year. This is approximately \$200 less per mile than the current national average cost.

2. *Buildings and utilities, etc.*—Buildings, utilities, and other improvements maintained and operated by the Service are conservatively valued at more than \$110,000,000. This includes all types of facilities available in metropolitan areas, such as sewer, water, electric, and communication systems, which serve approximately 32,000,000 visitors annually. Prehistoric ruins and memorials are preserved as well as thousands of invaluable historical, archeological, and other artifacts. The 1951 program contemplates increasing maintenance and opera-

tion costs from approximately 3 to 3½ percent of the value of the facilities, and makes provision for two additional areas.

PROGRAM AND PERFORMANCE

1. *Parkways.*—The estimated cost of completing construction of six authorized parkways, including roads, buildings, utilities, and other facilities, is shown in the following tabulation:

Parkways	Mileage (June 30, 1949)		Cost to complete
	Completed	Uncompleted	
1. Blue Ridge.....	333	144	\$44,808,000
2. Colonial.....	12	10	3,000,000
3. Foothills.....		77	20,300,000
4. George Washington Memorial.....	17	68	31,701,000
5. Natchez Trace.....	138	312	68,600,000
6. Suidland.....	9	9	2,500,000
Total.....	509	620	170,909,000

1 Includes 59 miles partially completed and requiring maintenance.

It is estimated that contracts will be awarded for construction of about 22 miles of parkways in 1950 and about 21 miles in 1951, reducing the uncompleted mileage from 620 to 577 miles.

2. *Roads and trails.*—There are 5,167 miles of roads (exclusive of parkways) in the areas administered by the Service. An additional 1,233 miles are needed to complete the road systems, and 1,967 miles need reconstructing. Approximately 68 miles are programed for 1950 and 55 miles in 1951.

3. *Buildings and utilities, etc.*—The 1951 estimate contemplates construction principally of those facilities needed to meet the more critical needs, such as housing for employees, extension of utilities to meet heavier public use loads, and extension of campground facilities.

4. *Acquisition of lands and water rights.*—There are approximately 600,000 acres of privately owned lands in

NATIONAL PARK SERVICE—Continued

Construction and Land Acquisition, National Park Service—Con.

about 3,000 parcels within the boundaries of 74 areas, with a prewar value of \$20,000,000. Many of the private holdings hinder proper management, protection, and development of the areas. The 1951 program contemplates acquisition of three tracts of land or property for which special appropriation authorization exists in the continuance of the program of acquiring privately owned lands and water rights, and the payment of prior year contractual authorization for acquisition of properties necessary to establish the Independence National Historical Park, Pa.

APPROPRIATION TEXT

CONSTRUCTION AND LAND ACQUISITION

For construction and improvement, without regard to the Act of August 24, 1912, as amended (16 U. S. C. 451), of roads, trails, parkways, buildings, utilities, and other physical facilities; and the acquisition of lands, interests therein, improvements, and water rights; to remain available until expended, \$22,767,000, of which not to exceed \$3,935,000 is for liquidation of obligations incurred pursuant to authority granted under the heads "Independence National Historical Park, Pennsylvania", "Parkways, National Park Service", and "Roads and Trails, National Park Service", in the Interior Department Appropriation Act, 1950: Provided, That the unexpended balances of prior year appropriations, including unused balances of related contract authorizations, for the foregoing purposes, shall be transferred to and merged with this appropriation. (16 U. S. C. 1-8, 17j-2, 17k-n, 81c, 403h-11, 460; Act of May 23, 1928 (45 Stat. 721); Act of May 29, 1930 (46 Stat. 482); Act of

Apr. 25, 1947 (61 Stat. 52); Act of June 28, 1948, Public Law 795; Act of Aug. 17, 1949, Public Law 242; Act of Aug. 24, 1949, Public Law 263; The Interior Department Appropriation Act, 1950.)

PROGRAM AND PERFORMANCE

1. *Departmental expenses.*—The 1951 program contemplates strengthening the divisions in the Washington office of the Service in which the work load cannot be kept current, and an increase in general expenses to cover higher travel and other costs.

2. *Regional office expenses.*—Nominal increases are proposed to strengthen the staffs of three of the four regional offices; to meet higher unit costs of supplies and contractual services; and the increased cost of office rent in the regional office, Richmond, Va.

APPROPRIATION TEXT

MISSISSIPPI RIVER PARKWAY

For expenses necessary for a survey to determine the feasibility of constructing a national parkway along the route of the Mississippi River, as authorized by the Act approved August 24, 1949 (Public Law 262), including personal services in the District of Columbia, purchase of not to exceed five passenger motor vehicles, and printing and binding, \$150,000, to remain available until June 30, 1951. (Second Supplemental Appropriation Act, 1950.)

Appropriated 1950, \$150,000

NOTE.—Estimate of \$100,000 for activities previously carried under this title has been transferred in the estimates to "Management and protection, National Park Service." The amount obligated in 1950 is shown in the schedule as a comparative transfer.

Appropriations herein made for the national parks, national monuments, and other reservations under the jurisdiction of the National Park Service, shall be available for the giving of educational lectures therein and vicinity; for the services of field employees in cooperation with such nonprofit scientific and historical societies engaged in educational work in the various parks and monuments as the Secretary may designate; for travel expenses of employees attending Government camps for training in forest-fire prevention and suppression and the Federal Bureau of Investigation National Police Academy, and attending Federal, State, or municipal schools for training in building fire prevention and suppression; for necessary local transportation and subsistence in kind of persons selected for employment or as cooperators, serving without other compensation while attending fire-protection training camps; and for official telephone service in the field in the case of official telephones installed in private houses when authorized under regulations established by the Secretary.

Appropriations herein made to the National Park Service for roads and trails shall be available for entering into contracts, without regard to section 3709 of the Revised Statutes (41 U. S. C. sec. 5), with States, political subdivisions, local governmental units, or agencies of the foregoing, for the performance of road construction or maintenance work or for furnishing materials, supplies, equipment, or services of any kind in connection with such work.

Appropriations available to the National Park Service shall be available for the purchase (not to exceed thirty-seven for replacement only) and hire of passenger motor vehicles.

Appropriations available to the National Park Service for the fiscal year 1950 shall be available for the purchase of five passenger motor vehicles in addition to the number specified in the Interior Department Appropriation Act, 1950. (The Interior Department Appropriation Act, 1950; Second Supplemental Appropriation Act, 1950.)

Allotment to National Park Service from "Missouri River Basin (reimbursable), Bureau of Reclamation"

NOTE.—The following schedules cover obligations under allotment from the appropriation "Missouri River Basin (reimbursable)," which is shown under Bureau of Reclamation.

OBLIGATIONS BY ACTIVITIES

Description	1949 actual	1950 estimate	1951 estimate
1. Recreational surveys and planning.....	\$123,590	\$152,267	\$154,583

PROGRAM AND PERFORMANCE

The advances by the Bureau of Reclamation and by Corps of Engineers of the War Department were for the purpose of making investigations and surveys of the recreational and archeological potentialities of their respective reservoir projects. An advance for reburial of World War II dead was made by the Quartermaster Corps of the War Department, and the Navy Department advanced funds for clean-up services in connection with improvements at the naval radio station, Acadia National Park, Maine.

PROGRAM AND PERFORMANCE

Jefferson National Expansion Memorial, Mo., was designated by Executive Order 7253 of December 21, 1935, which also authorized an allocation of \$7,500,000 from emergency relief funds (act of Apr. 8, 1935), to be matched by a contribution of \$2,500,000 by the city of St. Louis, Mo., to develop and preserve the area. A total of \$6,332,342 was expended from the allocation of Federal funds, and the city of St. Louis contributed \$2,250,000. The contribution will be fully obligated during 1950, and direct appropriation will be required for

1951 and thereafter. The memorial is operated pursuant to provisions of the Historic Sites Act of August 21, 1935 (49 Stat. 666).

PROGRAM AND PERFORMANCE

The National Park Trust Fund Board was established for the purpose of receiving, holding, and administering gifts or bequests of personal property for the benefit of, or in connection with, the National Park Service. The corpus of the fund is comprised of investments in United States Treasury bonds. Interest accruals are used for current needs, or reinvested. No obligations are anticipated during 1950 or 1951 (16 U. S. C. 6a, 19).

OBLIGATIONS BY ACTIVITIES

Acquisition of land—1949, \$500.

OBLIGATIONS BY OBJECTS

PROGRAM AND PERFORMANCE

Funds were advanced by the National Archives for the preparation of plans and installation of floor covering, steel stack equipment, and portable air-conditioning equipment to provide additional space for filing, stocking, and storage of archival materials at Franklin D. Roosevelt Library. The work was approximately 87 percent complete on June 30, 1949, and completion is anticipated during 1950.

FISH AND WILDLIFE SERVICE

INTRODUCTORY STATEMENT

The Service is responsible for the conservation and development of fish, bird, game, and other wildlife resources of the United States and Alaska. It maintains and operates fish cultural stations and wildlife refuges; enforces Federal conservation laws regarding fisheries and wildlife; protects salmon and other fisheries in Alaska and the fur seals on the Pribilof Islands; conducts technological and economic research designed to aid the fishing industry and the fur trade; and engages in cooperative programs for the control of predatory animals and injurious rodents.

PROGRAM AND PERFORMANCE

The Service, in cooperation with the States and Territories, seeks to conserve fish and wildlife resources.

1. *Administration of fish and game laws.*—The Service enforces Federal laws pertaining to birds, certain game mammals, interstate transportation of black bass or other game fish illegally taken or transported from a State in violation of its law, and fish and game in Alaska. Provisions of international treaties relating to the sockeye salmon of the Fraser River system and whaling are also carried out under this activity. Plans for 1951 provide for operations at a slightly higher level than in 1950, principally for enforcement activities relating to Alaska fisheries, Alaska game, and migratory birds.

2. *Propagation and distribution of food fishes.*—This activity includes the operation of 99 fish cultural stations in 42 States and involves more than 50 species, including more than a dozen of the most important commercial food

fishes and practically all of the more valuable game and pan species in the country. Production for the calendar year 1948 for the stocking of public and private waters included over 1 billion eggs, 653 million fry, 77 million fingerling, and 1,830,000 fish 6 inches or over in length. This activity also provides for the propagation of freshwater mussels in the Mississippi River and tributaries and the maintenance of fish screens on Federal areas in the West and other fish protective devices. Plans for 1951 contemplate an increase in the output of fish and eggs.

3. *Mammal and bird reservations.*—The Service operates 282 national wildlife refuges comprising over 18 million acres of land. These refuges are operated for (a) breeding, feeding, and wintering areas for migratory waterfowl; (b) protection and propagation of rare species such as trumpeter swan, mountain sheep, and wild turkey, through preservation and improvement of habitat; (c) preservation of remnant herds (under fence), such as buffalo and longhorn cattle in danger of becoming extinct; and (d) preservation of specific types of wildlife habitat peculiar to certain upland bird and mammal species.

4. *Pribilof Islands reservation and resources.*—These funds provide for (a) management of the Alaska fur seal herd which now numbers over 3½ million animals; (b) furnishing food, clothing, shelter, schooling, medical attention, and other necessities of life to approximately 500 natives of the islands; (c) operation of a byproducts plant for utilizing fur seal carcasses; and (d) maintenance and operation of a supply vessel which makes 5 annual trips from Seattle, Wash., to the islands, transporting personnel and supplies. In the 1949 season, a total of \$1,856,426 was covered into the Treasury as the United States share of the net proceeds from the sale of 70,891 fur seal skins and seal meal and oil produced from the carcasses. Only minor increases for equipment and for a trained dairyman to manage the 50-animal dairy herd are planned for 1951.

5. *River basin studies.*—The Service studies and surveys Federal water development projects sponsored by the Corps of Engineers, the Bureau of Reclamation, and other Federal agencies, to see that plans for fish and wildlife conservation and development are intelligently coordinated with water development plans for power, navigation, and irrigation. Studies and surveys are made of areas proposed for development to determine the maintenance of proper water levels, the best methods to insure adequate spawning, nursery, and rearing areas, correction of pollution, biological rehabilitation and development of areas for wildlife resulting from these projects, and practical means of protecting fish and wildlife from the hazards of such developments. It is proposed, in 1951, to reduce the backlog of authorized projects which have not been studied.

6. *Control of predatory animals and injurious rodents.*—This activity involves (a) control operations against coyotes, wolves, bobcats, and mountain lions to protect sheep, cattle, poultry, and game from destruction; (b) control operations against rats, ground squirrels, prairie dogs, jack rabbits, tree-girdling mice, pocket gophers, and other injurious rodents, to prevent destruction of cultivated crops, range forage, fruit crops, stored food and feed supplies, timber resources, and irrigation structures; and (c) the development and testing of improved methods for predator and rodent control that will not injure valuable and harmless forms of wildlife or domestic livestock. No increase is contemplated for 1951.

7. *Soil and moisture conservation.*—Nearly 1½ million acres of the 9 million acres of refuge lands are critically eroded. The Service has initiated a long-range program for developing a soil and moisture plan for each individual refuge as a means to a better land-utilization program. It is estimated that a period of 15 years will be required to complete this program.

MANAGEMENT OF RESOURCES

For expenses necessary for conservation, management, protection, and utilization of fish and wildlife resources in the United States, its Territories and possessions, and for the performance of other authorized functions related to such resources; operation of the industrial properties within the Crab Orchard National Wildlife Refuge (61 Stat. 770); control of predatory animals and injurious rodents; maintenance of the herd of long-horned cattle on the Wichita Mountains Wildlife Refuge; purchase or rent of land, and functions related to wildlife management in California (16 U. S. C. 695-695c); and not to exceed \$30,000 for payment, in the discretion of the Secretary, for information or evidence concerning violations of laws administered by the Fish and Wildlife Service; \$7,157,000. (5 U. S. C. 133t; 7 U. S. C. 426; 16 U. S. C. 590a-590f, 631a-631g, 659, 661-666c, 667-668d, 671-674d, 684-686, 690-691d, 695-695c, 701, 703-711, 715-715s, 718-718h, 721-731, 744-751, 755-757, 772-772i, 776-776f, 781-785, 811, 851-856, 901-915; 18 U. S. C. 41-44; 43 U. S. C. 315k; 48

U. S. C. 192-211, 220-248b; Act of May 21, 1930, 46 Stat. 371; The Interior Department Appropriation Act, 1950; Second Supplemental Appropriation Act, 1950.)

Estimate 1951, * \$7,157,000

* Estimate is for activities previously carried under appropriations as follows:

"Salaries and expenses, Fish and Wildlife Service":	\$2,000,983
Propagation of food fishes	76,744
Investigations respecting food fishes	471,814
Protection of Alaska fur seals	44,545
Enforcement of Black Bass, Whaling Treaty, and Sockeye Salmon Acts	24,680
Wildlife resources and management investigations	984,543
Control of predatory animals and injurious rodents	323,131
Protection of migratory birds	1,108,523
Alaska fisheries and game	1,546,603
Maintenance of mammal and bird reservations	212,500
River basin studies	250,134
California wildlife management areas	105,500
"Salaries and expenses, soil and moisture conservation"	7,300
"Contingent expenses, Department of the Interior"	

The amounts obligated in 1949 and 1950 are shown in the schedule as comparative transfers.

PROGRAM AND PERFORMANCE

This appropriation provides for research on fish and fisheries; exploration, development, and utilization of fishery resources; and research on birds and mammals.

1. *Research on fish and fisheries.*—The Service performs scientific research for (a) assessing current supplies of food fishes; (b) perfecting means of regulating the fisheries to assure efficient utilization and conservation of the supply; (c) improving methods of cultivation and artificial propagation; (d) altering the environment to improve natural production; and (e) designing, developing, testing, and improving fish protective devices. Plans for 1951 provide for a full 12 months' operation of scientific investigations, authorized by recent legislation, which were financed upon only a part-year basis in 1950, including research in the Gulf of Mexico, the Pacific Coast marine fisheries, Alaska, and on the high seas of the territories and island possessions of the United States in the tropical and subtropical Pacific Ocean.

2. *Exploration, development, and utilization of fishery resources.*—Plans for 1951 provide for operating this activity at a higher level than in 1950, principally for costs on a full-year basis of activities financed on only a part-year basis in 1950, including operation of two exploratory fishing vessels to determine the practicality of commercial

FISH AND WILDLIFE SERVICE—Continued

Investigations of Fish and Wildlife Resources—Continued

fishing operations in the tropical and subtropical Pacific Ocean and operation of an exploratory fishing vessel in the Gulf of Mexico. This activity involves the following services in connection with the commercial fishing industry: (a) Exploratory fishing and devising and demonstrating improved types of commercial fishing gear and fishing methods; (b) developing and demonstrating more efficient methods for handling, processing, storing, and marketing fishery products, and encouraging consumption; (c) collecting, compiling, and publishing commercial fishery statistics, including operation of seven fishery market news offices; and (d) collecting, interpreting, and disseminating data on the marketing of fishery products.

3. *Research on birds and mammals.*—This program provides for (a) determining the annual status of migratory wildlife to provide data for administering the Migratory Bird Treaty Act, including population and condition of nesting areas; (b) determining populations, causes of depletion, methods of increase, and methods of control of obnoxious birds and animals as a basis for improving management and conservation practices; and (c) operating 14 wildlife research units, in cooperation with States and universities, to give technical training in wildlife management, to carry on research, and to demonstrate management through extension services. A small expansion of this program is proposed for 1951 for bird banding activities.

PROGRAM AND PERFORMANCE

1. *Fish facilities.*—Projects proposed for 1951 are (a) continuation of the 3-year program, initiated in 1950, of construction and improvement of fish hatcheries; (b) construction of two boats for law-enforcement work in Alaska; (c) construction of five new houses for resident natives on the Pribilof Islands, Alaska, and replacement of a coal-storage house; and (d) improvement and extension of the fresh-water supply systems on St. George and St. Paul Islands, Alaska.

2. *Wildlife facilities.*—Projects proposed for 1951 are (a) construction of a residence at McGrath, Alaska, and a duplex residence and headquarters building at Kotzebue, Alaska, for the use of law-enforcement agents; (b) construction and development work on wildlife refuges, including water-control structures on the Lower Klamath National Wildlife Refuge, California, for regulation of the water level to guard against a recurrence of the serious loss of migratory waterfowl from botulism; and (c) construction of a sewage-disposal plant on the Patuxent Research Refuge near Laurel, Md.

PROGRAM AND PERFORMANCE

1. *Departmental expenses.*—The 1951 estimate for the salaries and expenses necessary for general administration at headquarters in Washington, D. C., provides for only a moderate increase to care for slightly larger work loads and for the replacement of a few typewriters, adding machines, and other items.

2. *Regional office expenses.*—The 1951 estimate provides for salaries and expenses necessary for general administration in the six regional offices at the same level as 1950.

PROGRAM AND PERFORMANCE

The Federal Aid in Wildlife Restoration Act of September 2, 1937, as amended, is designed to assist the States, Alaska, Hawaii, Puerto Rico, and the Virgin Islands in restoring wildlife and in working out better methods for its management. The act authorizes the appropriation of funds collected through the tax imposed on firearms, shells, and cartridges which is paid by the manufacturers and is covered into a special fund in the Treasury known as the "Federal aid to wildlife restoration fund." Under language proposed in 1951, permanent appropriation of these receipts is contemplated.

1. *Federal-aid payments to States for wildlife restoration projects.*—The Federal-aid payments to the States are made one-half in the ratio which the area of each State bears to the total area of all the States, and one-half in the ratio which the number of paid hunting-license holders of each State in the preceding fiscal year bears to the total number of paid hunting-license holders of all the States. The payments are for wildlife restoration projects and the construction of such works as may be necessary to make land or water areas available for such projects, including such research into the problems of wildlife management as may be necessary for efficient administration.

2. *Administration of Federal aid to States.*—Not to exceed 8 percent of the revenue covered into the Federal aid to wildlife restoration fund may be expended in the administration and execution of the Federal Aid in Wild-

life Restoration Act and the Migratory Bird Conservation Act. This activity covers expenses of examination of State plans, biological investigation of the areas to be acquired or developed, appraisal of lands where land purchases are involved, engineering studies of proposed developmental work, and the audit of State expenditures, including inspection of the progress of work to determine whether the projects are being conducted in accordance with standards and regulations of the Secretary and in harmony with approved project plans.

3. *Carrying out provisions of the Migratory Bird Conservation Act.*—The Federal Aid in Wildlife Restoration Act provides that funds shall be made available for expenditure by the States only until the close of the fiscal year following that for which the apportionment is made. If a State fails to act in accordance with these provisions, the funds apportioned such States are authorized to be made available for expenditure in carrying out the provisions of the Migratory Bird Conservation Act. The expenditures under this activity are principally for the salaries and expenses of law enforcement agents.

PROGRAM AND PERFORMANCE

Receipts from the sale of Federal hunting stamps are set aside in a special fund, the migratory bird conservation fund. The price of the stamps was raised in 1949 from \$1 to \$2 to provide additional funds for development and maintenance of bird refuges. Under language proposed in 1951, permanent appropriation of these receipts is contemplated.

1. *Enforcement of Migratory Bird Hunting Stamp and Migratory Bird Treaty Acts.*—This activity includes 10 per cent of the fund available, for expenses in enforcing the migratory bird acts, and for expenses of the Post Office Department for engraving, issuing, and accounting for the stamps.

2. *Acquisition, development, and maintenance of migratory bird refuges.*—Not less than 90 per cent of the appropriations from the migratory bird conservation fund shall be available for the acquisition and administration of areas for migratory bird sanctuaries, and for investigations on the highest utilization of refuges and the protection and increase of migratory waterfowl.

In 1951, 282 refuges will be administered.

MIGRATORY BIRD CONSERVATION FUND

For carrying into effect section 4 of the Act of March 16, 1934, as amended (16 U. S. C. 718-718h), an amount equal to the sum received during the current fiscal year from the proceeds from the sale of stamps, to be warranted monthly and to remain available until expended.

For carrying into effect section 4 of the Act of March 16, 1934, as amended (16 U. S. C. 718-718h), amounts equal to the sums received during the current year and each fiscal year thereafter from the proceeds from the sale of stamps, to be warranted monthly and to remain available until expended. (5 U. S. C. 133i; Act of Aug. 12, 1949, Public Law 222; The Interior Department Appropriation Act, 1950.)

Appropriated (est.) 1950, **\$3,000,000** Estimate 1951, **\$3,000,000**

PROGRAM AND PERFORMANCE

In 1948, receipts from the sale of surplus products from wildlife refuges amounting to \$388,377 were deposited in the United States Treasury. By law (16 U. S. C. 715s) 25 percent thereof is paid to the counties in which the refuges producing the products are located and 75 percent of the net proceeds is appropriated for the maintenance of refuges and for the enforcement of the Migratory Bird Treaty Act. Under language proposed in 1951, permanent appropriation of these receipts is contemplated.

1. *Refuge maintenance from refuge receipts.*—The work under this activity consists of the maintenance of refuges and the construction and repair of refuge improvements.

2. *Enforcement activities from refuge receipts.*—The expenditures contemplated under this activity are for enforcement of the Migratory Bird Treaty Act, including salaries of 16 enforcement agents and other expenses of enforcement.

APPROPRIATION TEXT

MANAGEMENT OF NATIONAL WILDLIFE REFUGES

For management of national wildlife refuges, including the construction, improvement, repair, and alteration of buildings, roads, and other facilities, and enforcement of the Migratory Bird Treaty Act of July 3, 1918, as amended (16 U. S. C. 703-711), amounts equal to 75 percent of the net proceeds received during the next preceding fiscal year and each fiscal year thereafter under the provisions of section 401 of the Act of June 15, 1935 (16 U. S. C. 715s), to remain available until expended.

Appropriated 1950, **\$265,256** Estimate 1951, **\$261,000**

ADMINISTRATIVE PROVISIONS

Appropriations for the Fish and Wildlife Service shall be available for personal services in the District of Columbia; purchase (not to exceed ninety, of which sixty shall be for replacement only) and hire of passenger motor vehicles; purchase (not to exceed ten, of which six shall be for replacement only) of aircraft; printing and binding, including purchase of reprints; publication and distribution of bulletins as authorized by law (7 U. S. C. 417); rations or commutation of rations for officers and crews of vessels at rates not to exceed \$2 per man per day; repair of damage to public roads within reservation areas caused by operations of the Fish and Wildlife Service; and options for the purchase of land at not to exceed \$1 for each option.

Payments to Counties Under Migratory Bird Conservation Act (Special Fund)—

FUNDS AVAILABLE FOR OBLIGATION: Appropriation or estimate—1949, \$97,094; 1950, \$88,418; 1951, \$87,000.

PROGRAM AND PERFORMANCE

This fund, representing 25 percent of the net proceeds from the sale of refuge products, is paid to the counties in which the refuges are located, for the benefit of the public schools and roads of the counties (16 U. S. C. 715s).

OBLIGATIONS BY ACTIVITIES

Payments to counties—1949, \$97,094; 1950, \$88,418; 1951, \$87,000.

OBLIGATIONS BY OBJECTS

11 Grants, subsidies, and contributions—1949, \$97,094; 1950, \$88,418; 1951, \$87,000.

APPROPRIATION TEXT

Of the funds appropriated in this Act for the Fish and Wildlife Service, not to exceed \$1,266,430 may be expended for departmental

personal services, including such services in the District of Columbia. Funds available for the work of the Fish and Wildlife Service shall be available for the purchase of not to exceed seventy-one passenger motor vehicles, of which sixty-four shall be for replacement only; purchase (not to exceed three), hire, maintenance, and operation of aircraft including, when purchasing aircraft and parts and accessories thereof, the exchange or sale of similar items and application of the exchange allowances or proceeds of sale in such cases in whole or in part payment therefor; the installation and operation of telephones in Government-owned residences, apartments, or quarters occupied by employees of the Fish and Wildlife Service; providing by purchase, construction, or otherwise, facilities incident to such public recreational uses of wildlife refuges as are not inconsistent with the primary purposes of such refuges; newspapers (not to exceed \$100), plans and specifications for vessels, or for contract personal services for the preparation thereof without regard to section 3709, Revised Statutes, as amended (41 U. S. C. 5); printing and binding, including the purchase of reprints of scientific and technical articles published in periodicals and journals and the publication of bulletins which shall be adapted to the interests of the people of the different sections of the country, an equal proportion of four-fifths of the bulletins to be delivered to or sent out under addressed franks furnished by the Senators, Representatives, and Delegates in Congress as they may direct; and rations for officers and crews of vessels or, in lieu thereof, commutation of rations at not to exceed \$2 per man per day; and for the expenditure from appropriations available for the purchase of lands of not to exceed \$1 for each option to purchase any tract of land. Reimbursements for the cost of supplies and materials and the transportation and handling thereof issued from central warehouses authorized to be established by the Act of June 24, 1936 (16 U. S. C. 667), may be credited to the appropriation current at the time supplies and materials are allotted, assigned, or issued, or at the time such reimbursements are received. Not to exceed 5 per centum of the foregoing amounts for expenses of the Fish and Wildlife Service shall be available interchangeably for expenditure on the objects included within the general expenses of said Service, but no more than 5 per centum shall be added to any one item or appropriation. The Departments of the Air Force, Army, and Navy, the Coast Guard, the Civil Aeronautics Administration, and disposal agencies are authorized to transfer to the Fish and Wildlife Service aircraft for replacement purposes only (but not necessarily of the same size or type or at the same locations), and such other equipment, materials, and supplies (with an appraised value of not to exceed \$500,000), surplus to the needs of such agencies, as may be required by said Service, such transfers to be without charge therefor; and in addition the Departments of the Army and Navy, the Coast Guard, and the Maritime Commission are authorized to transfer without charge therefor vessels for replacement purposes only (but not necessarily of the same size or type or at the same locations) marine engines, parts and accessories surplus to the needs of such agencies.] (The Interior Department Appropriation Act, 1950.)

Total, Fish and Wildlife Service, special accounts:

Appropriated 1950, \$13,762,212 Estimate 1951, \$10,878,000

Total, Fish and Wildlife Service, general and special appropriations:

Appropriated 1950, \$26,578,012 Estimate 1951, \$25,228,500

Allotment to Fish and Wildlife Service, river basin studies, from "Missouri River Basin (reimbursable), Bureau of Reclamation," allotment to Fish and Wildlife Service

NOTE.—The following schedules cover obligations under allotment from the account "Missouri River Basin (reimbursable), allotment, Bureau of Reclamation" (Fish and Wildlife Service). This allotment is for studies of effects on fish and wildlife of the Missouri River Basin program.

PROGRAM AND PERFORMANCE

1. *Territory of Alaska.*—The act establishing the government of Alaska provides that the salary of the Governor and the pay and travel expenses of the legislators, who meet biennially, shall be financed by Federal funds. The expenses of the Office of the Governor are also included in this item as is the cost of caring for the Alaskan mentally ill.

2. *Territory of Hawaii.*—The act establishing the government of Hawaii provides that the salary of the Governor and the expenses of his office, and the pay and travel expenses of the legislators, who meet every other year, shall be financed by Federal funds.

3. *Virgin Islands.*—The act establishing the government of the Virgin Islands provides that the salary of the Governor shall be financed by Federal funds and the expenses of his office are also included in this item. A grant is provided under this heading for the support of services essential to the public safety, health, and welfare of the municipalities of St. Thomas and St. John, and St. Croix which do not have a sufficiently developed economy to support completely these services through local revenues. This item also includes estimates for the operation of the agricultural station, the program of which includes agricultural extension services, veterinary services, and demonstrations in practical farming.

4. *Guam.*—Effective July 1, 1950, the administration of the island of Guam will be transferred from the Department of the Navy to the Department of the Interior. This activity provides for the salary of the Governor, the per diem for the legislators, the salary of the Chief Justice, and the expenses of the Office of the Governor and the Supreme Court. Guam does not presently have a sufficiently developed economy to support completely governmental services through local revenues. A grant is therefore provided for the support of services essential to the public safety, health, and welfare.

5. *General administration.*—The Division of Territories and Island Possessions observes and reports political and economic progress in the territorial areas; originates and implements Federal policy in the Territories; represents the governors in Washington; participates in foreign policy matters concerning or arising from our territorial interests, and supervises the Alaska Railroad, the Alaska Road Commission, care of Alaskan insane, and the Puerto Rico Reconstruction Administration, in addition to working with the president and board of directors of the Virgin Islands Corporation. These functions include responsibilities in the fields of administration, industrial operations, economic reporting, legislation, and international relations.

APPROPRIATION TEXT

ADMINISTRATION OF TERRITORIES AND POSSESSIONS

For expenses necessary for the administration of Territories and Possessions under the jurisdiction of the Department of the Interior, including expenses of the Offices of the Governors of Alaska, Hawaii, and Guam, and the Government of the Virgin Islands, including the agricultural station; compensation and mileage of members of the legislatures in Alaska and Hawaii; compensation of members of the Supreme Court and the legislature in Guam; care of insane as authorized by law for Alaska (48 U. S. C. 46-50); grants to the Virgin Islands and Guam for amounts required, in excess of current local revenues, for support of necessary governmental functions; personal services, household equipment and furnishings, and utilities necessary in the operation of the several Governors' houses; and personal services in the District of Columbia; \$4,052,600: Provided, That the territorial and local governments of the Virgin Islands and Guam are authorized to make purchases for their public institutions through the General Services Administration. (Executive Order 6726; 48 U. S. C. 46-50, 62, 63, 66-69, 72, 87, 89, 531, 536, 561-620, 1391, 1405a, 1405v.)

Estimate 1951, * \$4,052,600

* Includes \$2,052,600 for activities previously carried under:
 "Salaries and expenses, Governor and Secretary, Territory of Alaska"..... \$94,140
 "Legislative expenses, Territory of Alaska"..... 48,000
 "Care and custody of insane, Alaska"..... 463,541
 "Salaries and expenses, Governor and Secretary, Territory of Hawaii"..... 35,000

 "Salaries and expenses, agricultural station, Virgin Islands"..... 50,890
 "Salaries and expenses, Division of Territories and Island Possessions"..... 287,634
 The amounts obligated in 1949 and 1950 are shown in the schedule as comparative transfers.

Operation and Maintenance of Roads, Alaska—

FUNDS AVAILABLE FOR OBLIGATION	1949 actual	1950 estimate	1951 estimate
Appropriation or estimate.....			\$2,800,000
Comparative transfer from "Construction and maintenance of roads, bridges and trails, Alaska".....	\$1,691,300	\$1,841,300	
Total obligations.....	1,691,300	1,841,300	2,800,000

PROGRAM AND PERFORMANCE

The Alaska road system, which is being extended, consists at present of 934 miles of through roads, 571 miles of feeder roads, and 1,421 miles of local roads. Funds are provided for maintenance of the system and of facilities and equipment used in this work. Maintenance costs vary in accordance with the season and the type of road involved. Such costs include necessary snow removal. The increase proposed for 1951 is to provide minimum summer maintenance for all roads and to keep the principal roads open all year. It also provides maintenance funds for the additional mileage which will be completed during the fiscal year. The 1951 requirements are based on the following estimates:

Classification	Summer maintenance		Winter maintenance	
	Cost per mile	Number of miles	Cost per mile	Number of miles
Through roads.....	\$1,100	934	\$400	836
Feeder roads.....	800	571	300	227

PROGRAM AND PERFORMANCE

Budget estimates for 1951 total \$20,400,000 in cash and \$8,700,000 in contract authority. These sums will permit orderly progress at a rate commensurate with territorial needs.

1. *Preparation of plans.*—To provide continuity in extension and improvement of the Alaska road system, surveys are made and plans prepared for projects well in advance.

2. *Construction in progress.*—Work is continuing on the hard surfacing program for major roads and by the end of the fiscal year it is estimated that approximately 570 miles of the Richardson, Glenn, and Alaska Highways can be completed or contracted for. Funds estimated for 1951 will also permit the completion of a new road between Kenai Lake and Homer; the road from the Alaska Highway to Eagle will be advanced 30 miles; 30 miles of local farm and industrial roads will be built; the Turnagain Arm Road will be completed, and about 40 miles of the Richardson Highway-Mount McKinley Park Road will be constructed.

3. *Reconstruction.*—Improvement of the Tok Cutoff in preparation for hard surfacing is now in progress and the budget estimates include funds for the completion of this work. Other roads and bridges will be improved to bring them up to accepted standards and to remove dangerous bottlenecks now hampering their use.

4. *New construction.*—Hard surfacing of 65 miles of the Tok Cutoff, estimated to cost \$4,080,000, will be placed under contract for construction with a contract authorization of \$2,000,000 included in the budget estimate.

APPROPRIATION TEXT

CONSTRUCTION OF ROADS, ALASKA

For construction of roads, tramways, buildings, ferries, bridges, and trails, including surveys and plans for new road construction; acquisition of lands or interests in lands by purchase, donation, condemnation, or otherwise; to remain available until expended, \$20,400,000, of which not to exceed \$8,000,000 is for liquidation of obligations incurred pursuant to authority previously granted; and, in addition, the Secretary is authorized to enter into contracts for the purposes of this appropriation in an amount not to exceed \$8,700,000: Provided, That the unexpended balances of prior year appropriations, including unused balances of related contract authorizations, for the foregoing purposes, shall be transferred to and merged with this appropriation. (48 U. S. C. 321-327.)

Estimate 1951, • \$20,400,000

• Estimate is for activities previously carried under "Construction and maintenance of roads, bridges, and trails, Alaska." The amounts obligated in 1949 and 1950 are shown in the schedule as comparative transfers.

The total of the amounts appropriated for construction, operation and maintenance of roads in Alaska shall be available in one fund: Provided, That any unexpended balance remaining in the appropriation made herein for operation and maintenance shall lapse on July 1, 1953, in accordance with the Act of July 6, 1949 (Public Law 159).

Payment of Overtime Claims, Alaska Road Commission—

FUNDS AVAILABLE FOR OBLIGATION: Appropriation or estimate—1951, \$525,000.

PROGRAM AND PERFORMANCE

This item is to provide funds for payment of claims certified by the Comptroller General to be due employees of the Alaska Road Commission for overtime compensation earned in 1945 and prior fiscal years.

OBLIGATIONS BY ACTIVITIES

Liquidation of claims certified by Comptroller General—1951, \$525,000.

OBLIGATIONS BY OBJECTS

01 Personal services: Payment above basic rates—1951, \$525,000.

APPROPRIATION TEXT

CLAIMS, ALASKA ROAD COMMISSION

For payment of claims certified by the Comptroller General of the United States to be due for overtime compensation earned in 1945 and prior fiscal years under the provisions of section 23 of the Act of March 28, 1934 (48 Stat. 522), \$525,000, to remain available until June 30, 1952: Provided, That no part of the amount received by any claimant in excess of 10 per centum thereof shall be paid or delivered to or received by any agent or attorney on account of services rendered in connection with any such claim, and the same shall be unlawful, any contract to the contrary notwithstanding, and any person violating this provision shall be deemed guilty of a misdemeanor and upon conviction thereof shall be fined in any sum not exceeding \$1,000.

Estimate 1951, \$525,000

PROGRAM AND PERFORMANCE

1. *Operation and maintenance.*—The Alaska Railroad is authorized to use its revenues to meet maintenance charges and operating expenses. The basic purposes of the railroad are to facilitate national defense and aid in the development of the Territory.

It operates 470 miles of track between Seward and Fairbanks and approximately 65 miles of branch lines. Revenue tonnage over the 10-year period from 1937 to 1947 showed a gain of more than 400 percent. In 1949 the railroad carried a total of 763,267 tons of revenue freight a distance of 132,000,000 ton-miles. Hotels at McKinley National Park, Curry, and Healy are also operated and maintained by the railroad. During 1949 two river steamers plying between Nenana, Fort Yukon, and Marshall carried over 1,000 revenue tons more than the 4,200 tons hauled in 1948. Due to a longshoremen's strike in 1949, the railroad was authorized to transport critical materials to Alaska by oceangoing barges and realized a profit of \$48,100 from this operation.

The following table indicates the result of operations for 1949 and the estimates for 1950 and 1951:

OPERATING REVENUES AND EXPENSES

	1949 actual	1950 estimate	1951 estimate
Revenues:			
Rail line (including hotels and restaurants)	\$10,978,828	\$10,900,000	\$11,900,000
River boats	102,441	100,000	100,000
Oceangoing vessels	324,952		
Total revenues	11,406,221	11,000,000	12,000,000
Expenses:			
Rail line (including hotels and restaurants)	10,589,308	10,700,000	11,300,000
River boats	229,235	200,000	200,000
Oceangoing vessels	276,852		
Total expenses	11,095,395	10,900,000	11,500,000
Net earnings	310,826	100,000	500,000
Cumulative deficit from 1916	716,398	616,398	116,398

2. *Construction.*—A rehabilitation program for the Alaska Railroad was begun in 1948 and this estimate provides for the completion of a comprehensive program of construction, rehabilitation, and reequipment. As presently estimated, the total cost of the rehabilitation program will amount to \$74,011,629, of which \$43,011,629 has been made available. Of this amount \$38,000,000 has been provided in cash appropriations and \$5,011,629 from earnings of the railroad. An additional \$17,000,000 in contract authority has been authorized for 1950. The estimate for 1951 includes \$17,000,000 to liquidate contract authority and in addition \$14,000,000 to complete the rehabilitation program.

This program is planned to build the railroad to standards necessary for safe, economical operation, and to provide a line capable of meeting both present traffic requirements and increased demands which may be imposed upon it by military necessity and the anticipated requirements of the expanding civilian economy. The actual obligations prior to 1950 and the estimated obligations for 1950 and 1951 are as follows:

	Prior to 1950	1950	1951	Total
Roadway and track	\$16,529,168	\$13,249,000	\$6,600,000	\$36,378,168
Bridges, trestles, culverts, and tunnels	1,896,807	1,597,000	2,703,000	6,196,807
