PROGRAM AND PERFORMANCE

The establishment and operation of the Puerto Rico Reconstruction Administration was authorized under the Emergency Relief Appropriation Act of 1935, in order to provide relief and to increase employment by providing for useful projects. This activity is financed from allotments from the Puerto Rico revolving fund, established by Congress in 1936 and derives its income largely from rentals, collections on loans and mortgages, and lease and purchase contracts.

APPROPRIATION OR ESTIMATE

Appropriated (estimate) 1950, \$215,000 Estimate 1951, \$210,000

GENERAL PROVISIONS—DEPARTMENT OF THE INTERIOR

APPROPRIATION TEXT

SEC. 102. Appropriations herein made shall be available for the purchase of [vehicles generally known as quarter-ton or half-ton pick-up trucks, as suburban carry-all trucks, and as] station wagons without such vehicles being considered as passenger motor vehicles.

SEC. 103. Notwithstanding any provision of law to the contrary, aliens may be employed during the current fiscal year in the field service of the Department for periods of not more than thirty days in cases of emergency caused by fire, flood, storm, act of God, or sabotage.

SEC. 104. Appropriations in this title available for travel expenses shall be available, [when specifically authorized by the head of the bureau or office concerned,] under regulations prescribed by the Secretary, for expenses of attendance of officers and employees at meetings or conventions of members of societies or associations concerned with the work of the bureau or office for which the appropriation concerned is made.

SEC. 105. Appropriations herein made shall be available, with the approval of the Secretary, for the emergency reconstruction, replacement or repair of buildings, utilities, or other facilities or equipment damaged or destroyed by fire, flood, storm, or other unavoidable causes: Provided, That no funds shall be made available under this authority until funds specifically made available to the Department of the Interior for emergencies shall have been exhausted.

SEC. 106. The Secretary may authorize the use of any appropriation, in addition to the amounts included in the budget programs of the several agencies, for the suppression or emergency prevention of forest or range fires on or threatening lands under jurisdiction of the Department of the Interior: Provided, That appropriations herein made for fire suppression purposes shall be available for the payment of obligations incurred during the preceding fiscal year.

SEC. 107. Appropriations herein made shall be available for operation of warehouses, garages, shops, and similar facilities, wherever consolidation of activities will contribute to efficiency or economy, and said appropriations shall be reimbursed for services rendered to any other activity in the same manner as authorized by the Act of June 30, 1932 (31 U. S. C. 686): Provided, That reimbursements for cost of supplies, materials and equipment, and for services rendered may be credited to the appropriation current at the time such reimbursements are received.

SEC. 108. Appropriations herein made shall be available for services as authorized by section 15 of the Act of August 2, 1946 (5 U. S. C. 55a); maintenance and operation of aircraft; examination of estimates of appropriations in the field; payment for telephone service in private residences in the field, when authorized under regulations approved by the Secretary; health service programs as authorized by law (5 U. S. C. 150); payment of tort claims pursuant to law (28 U. S. C. 2672); and the payment of dues, when authorized by the Secretary, for library membership in societies or associations which issue publications to members only or at a price to members lower than to subscribers who are not members.

SEC. 109. During the current fiscal year the head of any Department or establishment of the Government having funds available for scientific and technical investigations within the scope of the functions of the Department of the Interior may, with the approval of the Secretary, transfer to the Department such sums as may be necessary therefor, which sums so transferred may be expended for the same objects and in the same manner as sums appropriated herein but without their limitations.

SEC. 110. Transfers to the Department of the Interior, pursuant to the Federal Property and Administrative Services Act of 1949, of equipment, material and supplies, excess to the needs of Federal agencies may be made at the request of the Secretary without reimbursement or transfer of funds when required by the Department for operations conducted in Territories and island possessions.

GENERAL PROVISIONS—DEPARTMENT OF THE INTERIOR—Continued

【Sec. 105. Limitations on amounts to be expended for personal services under appropriations in this title shall not apply to lump-sum leave payments pursuant to the Act of December 21, 1944 (5 U. S. C. 61b-d).】

【Sec. 106. Appropriations herein made shall be available for payment of dues, when authorized by the Secretary, for library membership in societies or associations which issue publications to members only or at a price to members lower than to subscribers who are not members.】

【Sec. 107. Appropriations in this title shall be available for health service programs as authorized by law (5 U. S. C. 150).】

【Sec. 108. Appropriations in this title shall be available for payment of claims pursuant to section 403 of the Federal Tort Claims Act (28 U. S. C. 2672).】

【Sec. 109. In purchasing lawbooks, books of reference, and periodicals, and in completing broken sets, the Secretary or his duly authorized representative may exchange similar items and apply the exchange allowances in such cases in whole or in part payment therefor.】

【Sec. 110. No part of any appropriation contained in this title shall be used directly or indirectly by way of wages, salaries, per diem or otherwise, for the performance of any new administrative function or the enforcement or issuance of any rule or regulation occasioned by the establishment of the Jackson Hole National Monument as described in Executive Proclamation Numbered 2578, dated March 15, 1943.】 (*The Interior Department Appropriation Act, 1950.*)

TITLE II—GENERAL PROVISIONS

APPROPRIATION TEXT

Sec. 201. No part of any appropriation contained in this Act, or of the funds available for expenditure by any corporation included in this Act, shall be used to pay the salary or wages of any person who engages in a strike against the Government of the United States or who is a member of an organization of Government employees that asserts the right to strike against the Government of the United States, or who advocates, or is a member of an organization that advocates, the overthrow of the Government of the United States by force or violence: *Provided*, That for the purposes hereof an affidavit shall be considered prima facie evidence that the person making the affidavit has not contrary to the provisions of this section engaged in a strike against the Government of the United States, is not a member of an organization of Government employees that asserts the right to strike against the Government of the United States, or that such person does not advocate, and is not a member of an organization that advocates, the overthrow of the Government of the United States by force or violence: *Provided further*, That any person who engages in a strike against the Government of the United States or who is a member of an organization of Government employees that asserts the right to strike against the Government of the United States, or who advocates, or who is a member of an organization that advocates, the overthrow of the Government of the United States by force or violence, and accepts employment the salary or wages for which are paid from any appropriation or fund contained in this Act shall be guilty of a felony and, upon conviction, shall be fined not more than \$1,000 or imprisoned for not more than one year, or both: *Provided further*, That the above penalty clause shall be in addition to, and not in substitution for, any other provisions of existing law: *Provided further*, That in cases of emergency, caused by fire, flood, storm, act of God, or sabotage, persons may be employed for periods of not more than thirty days and be paid salaries and wages without the necessity of inquiring into their membership in any organization. (*The Interior Department Appropriation Act, 1950.*)

VIRGIN ISLANDS CORPORATION

¹ Includes 2,394 tons of 1948 production.

² Includes 2,451 tons of 1949 production.

³ Includes depreciation of \$31,124.

⁴ Includes depreciation of \$154,600.

⁵ Includes depreciation of \$190,100.

PURPOSE AND FINANCIAL ORGANIZATION

The Virgin Islands Corporation was created by the Eighty-first Congress (Public Law 149) to promote the general welfare of the inhabitants of the Virgin Islands through their economic development. For this purpose, an appropriation not to exceed \$9,000,000 was authorized to be made to a revolving fund in the Treasury and advances to be made to the Corporation from the revolving fund when requested by the Corporation. The appropriation of additional funds as grants to finance non-revenue-producing activities and reimburse the Corporation for operating losses is also authorized by provisions of the charter.

At the same time, however, the Eighty-first Congress limited the total amount of funds to be appropriated for the fiscal years 1950 and 1951 to \$2,750,000. This limitation prevents the Corporation from engaging to any extent in new activities during the first 2 years. The principal changes in the 1951 budget are increased sugarcane and vegetable production. Marked progress in the growing and processing of sugarcane appears certain.

ANALYSIS OF BUDGET PROGRAMS

To accomplish the program as authorized by law during the first two fiscal years, the Corporation will carry out substantially the following activities: (1) Production and sale of sugar, including assistance to small farmers growing cane; (2) sale of rum and alcohol; (3) growing and sales of vegetables and assistance to private growers; and (4) rural electrification.

Production and sale of sugar, including assistance to small farmers growing cane.—This will be the main activity of the Corporation during 1951. During 1950, \$189,000 worth of agricultural equipment will be purchased, nearly all of which will be used in sugarcane production. While the principal purpose of the Corporation is to provide employment, in order to obtain better yields of sugarcane

it is necessary to mechanize more of the operations, and use commercial fertilizer and herbicides.

The purchase of additional tractors and other farm equipment which the Corporation will buy out of the \$189,000 appropriated by Congress will enable it to give more assistance to hundreds of small growers and homesteaders by renting them such units as their seasonal work demands. These small growers and homesteaders, for the last few years, have experienced great difficulty and hardship by not being able to get tractors and other farm equipment when needed. This has caused a number of them to become discouraged and leave the land.

Sale of rum and alcohol.—No rum or alcohol will be produced in 1951 since the Corporation is prohibited by Congress from engaging in the manufacture of rum or other alcoholic beverages. The Board of Directors has not had an opportunity to establish a policy as to the disposition of the rum inventory at the distillery. It is possible that the entire rum inventory may be liquidated during the current fiscal year or budget year if the Board of Directors should decide to lease or sell the distillery, bottling plant, and warehouses.

Growing and sales of vegetables and assistance to private growers.—The Corporation will continue to assist the St. Croix Fruit and Vegetable Company and any of the small growers taking part in the growing of tomatoes for the New York winter market. The Corporation will also grow 75 acres of tomatoes in order to insure adequate production for shipment.

Rural electrification.—The rural electrification project started in 1941, filled a great need by making electricity available to the rural areas. Conversion work is nearly completed in Frederiksted and more than 50 percent completed in Christiansted, enabling the two towns on the island to have alternating current also. A new 234-kilowatt generating unit was received in January 1949 and was installed shortly thereafter. Revenues will be increased and the division should show a profit in 1951, after having operated at a loss for several years.

PLANNING AND LIMITED DEVELOPMENT OF OTHER AUTHORIZED ACTIVITIES

There is nothing included under this heading in the budget statement as it does not appear at this time that funds will be available therefor. However, if funds should become available, through sale of the rum inventory or in any other manner, the Corporation would engage in activities such as making small loans, initiating work on water and soil conservation, and constructing limited recreation facilities.

ADMINISTRATIVE EXPENSES

During 1951 the Corporation is authorized to make expenditures, within the limits of funds available, and to make contracts and commitments without regard to fiscal-year limitations as provided by section 104 of the Government Corporation Control Act, as amended, as may be necessary in carrying out its programs as set forth in the 1951 budget estimate. Of the funds available to the Corporation it is proposed that a maximum of \$121,480 shall be for administrative expenses (to be computed on an accrual basis), covering the categories set forth in the 1951 budget estimate for such expenses of the Corporation.

FINANCIAL REVIEW

The Virgin Islands Corporation will have an estimated gross income of \$1,268,000 in 1950 and \$1,358,600 in 1951. This income is derived mainly from the sale of commodities. Raw sugar, which is the main commodity, will account for \$999,000 in 1950 and \$1,030,000 in 1951. The Corporation also sells several other commodities on a much smaller scale. The income from the Rural Electric Division is estimated at \$61,000 in 1950 and \$81,000 in 1951.

The total estimated expenses of the Corporation in 1950 is \$1,700,200 and in 1951, \$1,769,000. The estimated loss for the Corporation in 1950 is \$432,200 and in 1951, \$410,400. Pursuant to the Virgin Islands Corporation Act, interest expected to be paid on the investment will be \$45,600 in 1950 and 1951 at the going Treasury rate.

Under the new charter the Corporation has taken over the assets of the former Company, including all property that was operated by The Virgin Islands Company on behalf of the United States except that which was operated for the Department of the Interior under revocable permit from the Navy Department. The value of the property so transferred is fixed at the depreciated cost as of June 30, 1947, adjusted for all changes from that date to the date of transfer. The liabilities of the former Company have been assumed.

Bluebeard's Castle Hotel has been transferred to the Corporation from the Department of the Interior, the value of the property to be fixed at a figure approved by the Director of the Bureau of the Budget.

The Government's investment in the Corporation is expected to amount to \$2,789,000 at June 30, 1950, and \$2,852,600 at June 30, 1951, of which \$2,278,055 is interest-bearing.

NOTE.—The Virgin Islands Corporation also operates the Marine Corps facility and the naval submarine base at St. Thomas under a lease agreement. There is no income or expense estimated for the budget year. The Corporation may also find it necessary to engage in other activities authorized by the charter such as making small loans, initiating work on water and soil conservation, constructing limited recreation facilities, etc., the total of which expenditures will not exceed \$100,000 during the fiscal year. No amounts have been specifically estimated for these items as their initiation will depend on the relative desirability and need for these activities as compared with the expenditures as listed above or availability of additional income through sales of rum stocks or properties in excess of those anticipated in the budget estimates.

PROPOSED LEGISLATION

Research in utilization of salt water, Bureau of Reclamation.—Legislation is proposed to promote research and pilot plant installation for the use of salt water for irrigation, municipal, and other uses. An estimated supplemental appropriation for 1951 in the amount of \$500,000 is included in the budget for this purpose.

Baltimore-Washington Parkway, National Park Service.—Legislation is pending which provides for the devel-

opment, administration, and maintenance of the Baltimore-Washington Parkway, extending from the District of Columbia boundary to Fort Meade, Md. About \$15,000,000 will be required to complete the parkway, of which \$3,000,000 is included in the budget as an estimated 1951 supplemental appropriation.

ESTIMATES OF APPROPRIATION

INTRODUCTORY STATEMENT

The Department of Justice is primarily the law office of the Federal Government. Its officers and employees detect violations of the Federal criminal law, prosecute offenders before the courts, and maintain in prisons those who are sentenced. They proceed at civil law in upholding the authority and protecting the revenues of the Government. Legal counsel and opinions are provided the President and heads of executive agencies. Components of the Department, in addition to the law offices, include the Federal Bureau of Investigation, the Immigration and Naturalization Service, the Federal Prison System, and the Office of Alien Property.

PROGRAM AND PERFORMANCE

This appropriation provides funds for the executive management, administrative reviews and appeals, and housekeeping activities of the Department. During 1951 these activities will continue at approximately their current levels.

1. *Executive direction.*—The Attorney General, aided by the Assistant to the Attorney General, directs and supervises the programs and activities of the Department, including determination of the Department's position with respect to proposed or pending legislation and the conduct of the Department's public relations.

2. *Administrative reviews and appeals.*—Designated staff assisting the Attorney General review requests for pardon and act for the Attorney General in parole matters and in application of certain provisions of the immigration laws.

Authority to pardon persons convicted of law violation rests with the President, who is provided with the recom-

mendations of the Attorney General as prepared by the pardon attorney. Approximately 1,200 applications are considered each year.

The Board of Immigration Appeals reviews the recommendations of the Commissioner of Immigration and Naturalization affecting the admission, exclusion, and deportation of aliens. Approximately 5,000 appeals come before the Board each year.

The Board of Parole has sole authority to grant or revoke paroles of Federal prisoners; it considers about 12,000 requests for parole each year. It supervises approximately 5,400 persons to whom parole has been granted, as well as about 2,500 persons conditionally released after serving their minimum sentence.

3. *Administrative services.*—The Administrative Assistant to the Attorney General supervises the administrative service functions of the Department. Complete service is furnished for the smaller offices and divisions; coordination and general supervision are given the administrative service units of the larger divisions and bureaus, for which certain services of procurement and supply are also performed in instances where these functions can be more effectively performed centrally.

PROGRAM AND PERFORMANCE

This appropriation provides funds for the law offices of the Department, with the exception of the Antitrust Division and offices of the United States attorneys.

1. *Conduct of Supreme Court proceedings and coordination of appellate matters.*—The Solicitor General has charge of all appellate matters and represents the Government before the Supreme Court of the United States. Some 500 cases before the Supreme Court and about 900 determinations in appellate matters are handled in this office each year, a rate which is expected to continue during 1951.

2. *Preparation of legal opinions.*—The Assistant Solicitor General provides counsel and opinions to executive agencies, and reviews, as to form and legality, proposed executive orders and proclamations submitted by direction of the President. The 1951 budget is predicated on a continuation of the present level of work.

3. *General tax matters.*—The Tax Division is charged with the prosecution or defense in all cases arising out of the internal-revenue laws (except liquor tax law violations), enforcement of tax liens, and other matters relating to Federal taxes. Results of the intensified enforcement drive by the Department of the Treasury in collection of internal-revenue taxes are reflected in increased cases in the Tax Division, which obtains collections through court action or defends actions brought for tax refunds. Increasing work load, particularly in civil cases, will require additional staff during 1951.

4. *Criminal matters.*—The Criminal Division has charge of all actions in criminal law except those specially assigned to the Tax and Antitrust Divisions. Increased activities, including a substantial expansion in the civil rights program, are reflected in the 1951 estimate.

5. *Claims and general civil matters.*—The Claims Division is responsible for the prosecution or defense of all Federal civil suits and claims except those assigned to the Tax, Customs, and Lands Divisions, and the Office of Alien Property. The continuing high volume of cases and claims, involving more than \$4,000,000,000, and the growing backlog of cases in which the potential loss to the Government in interest alone amounts to many millions of dollars, accounts for the increase in this activity reflected in the 1951 estimate.

6. *Customs matters.*—The Customs Division protects the customs revenues by defending the decisions of collectors of customs against claims of importers for lower duties. An increase in cases filed, and the prospect of further increases in imports under recent trade agreements and currency devaluation, are reflected in a slightly enlarged staff estimated for 1951.

7. *Land matters.*—The Lands Division has charge of all civil suits and matters relating to title, possession, and use of Federal lands and natural resources. It also represents the United States in all civil litigation pertaining to Indians and Indian affairs. Pending work in this Division increased 24 percent during the year ending June 30, 1949, notwithstanding an increase of 54 percent in the number of cases closed. The 1951 budget proposes an increased allowance for fees of expert appraisers and witnesses to assist in establishing fair valuation of property and equities, and to expedite the closing of a greater number of pending cases.

PROGRAM AND PERFORMANCE

These funds are made available for the enforcement of antitrust and kindred laws. During 1951 the program for each activity will continue at current levels; increased effectiveness is expected to result as the recently augmented staff gains experience in antitrust activities.

1. *Litigation and legal review.*—The primary function of the Division is enforcement, involving the preparation of instructions for investigations to be performed by the Federal Bureau of Investigation, analysis of available evidence, and preparation and presentation of cases to grand juries and courts.

2. *Judgments and judgment enforcement.*—Staff negotiates, reviews, and interprets consent judgments, and obtains modifications and enforces compliance with such judgments when required.

3. *Antimonopoly clearance.*—Staff reviews proposed disposition of surplus Government properties when valued in excess of \$1,000,000, and properties vested from enemy alien ownership, for possible effects on competitive markets. It also reviews voluntary allocation plans proposed by industry.

4. *Small business assistance.*—Relief by negotiation is sought for individual complainants, notably in obtaining revisions of governmental specifications to permit small businesses to proffer bids to supply materials or commodities.

5. *Economic investigations.*—Staff furnishes advice on the economic aspects of antitrust actions planned.

6. *Executive direction.*—The Assistant Attorney General, with the assistance of his personal staff, determines the policies and procedures to be followed in antitrust matters.

7. *Administrative services.*—The housekeeping function of the Division includes a legal reference service as well as the usual administrative services.

PROGRAM AND PERFORMANCE

The Federal Government is represented in each of the 93 judicial districts by a United States attorney and a United States marshal, under the direction of the Attorney General. The United States attorney is responsible for the Government's interests at law in his district; co-ordination between districts and assistance in specific matters are provided by the several assistant attorneys general. The marshal is largely an officer serving the local Federal courts, responsible for the custody of prisoners and the service of process. He also serves as disbursing officer for activities of the Department and the Judiciary in his district.

1. *United States attorneys.*—The 1951 budget includes provision for 35 additional assistant United States attorneys and 18 clerks, with their attendant expenses, mostly to expedite preparation and trial of litigation before the courts, complementing the creation of 21 additional district judgeships by Public Law 205, approved August 3, 1949. Part of the additional staff is required because of the gradually increasing work load in these offices.

2. *United States marshals.*—Additional deputy marshals are anticipated for 1951, 42 to serve the 21 new judgeships, and 9 for service in Alaska. Increases are included for travel, purchase of automobiles for use in Alaska, and other equipment and office expenses.

APPROPRIATION TEXT

SALARIES AND EXPENSES, UNITED STATES ATTORNEYS AND MARSHALS

For necessary expenses of the offices of United States attorneys and marshals and United States district attorneys in Alaska, including purchase of not to exceed ten passenger motor vehicles (including eight for Alaska at not to exceed \$2,200 each, one van for replacement only at not to exceed \$2,500, and one bus at not to exceed \$15,000); services as authorized by section 15 of the Act of August 2, 1946 (5 U. S. C. 55a); expenses incident to the transfer of prisoners in the custody of United States marshals to narcotic farms; services in Alaska in collecting evidence for the United States when specifically directed by the Attorney General; meals and lodging for deputy marshals in attendance upon juries when ordered by the court; notarial fees or like

services; and firearms and ammunition; \$12,797,000, of which not to exceed \$50,000 shall be available for the employment of temporary deputy marshals in lieu of bailiffs at a rate not to exceed \$10 per day. (5 U. S. C. 320; 28 U. S. C. 501-510, 541-556, 1929; Departments of State, Justice, Commerce, and the Judiciary Appropriation Act, 1950.)

Estimate 1951, *\$12,797,000

* Estimate is for activities previously carried under appropriations as follows:
 "Salaries and expenses of district attorneys, etc., Department of Justice" -- \$6,186,380
 "Salaries and expenses of marshals, etc., Department of Justice"..... 6,326,960
 "Miscellaneous salaries and expenses, field, Department of Justice"..... 165,860
 "Contingent expenses, Department of Justice"..... 109,800
 "Salaries and expenses, miscellaneous legal activities, Department of Justice"..... 8,000
 The amounts obligated in 1949 and 1950 are shown in the schedule as comparative transfers.

PROGRAM AND PERFORMANCE

From this appropriation are paid the fees and expenses of witnesses who appear on behalf of the Government in all cases in which the United States is a party.

1. *Fact witnesses.*—These witnesses provide testimony to assist the Government in litigation. Fees and expenses are paid in accordance with the increased rates established by Public Law 59, approved May 10, 1949. The 1951 budget includes provision for approximately 77,500 witness days, slightly fewer than during 1950.

2. *Expert witnesses.*—Witnesses whose services in behalf of the Government entail the use of special training or information are compensated at rates individually negotiated. The estimate for 1951 is substantially the amount available in 1950.

whenever an employee of the United States performs travel in order to appear as a witness on behalf of the United States in any case involving the activity in connection with which such person is employed, his travel expenses in connection therewith shall be payable from the appropriation otherwise available for the travel expenses of such employee]. (28 U. S. C. 1821-1825; Departments of State, Justice, Commerce, and the Judiciary Appropriation Act, 1950.)

Appropriated 1950, ^a \$1,082,000 Estimate 1951, ^b \$1,100,000

^a Includes \$382,000 appropriated in the Third Deficiency Appropriation Act, 1949.
^b Includes \$65,000 previously carried under "Miscellaneous salaries and expenses, field, Department of Justice." The amounts obligated in 1949 and 1950 are shown in the schedule as comparative transfers.

Salaries and Expenses, Claims of Persons of Japanese Ancestry—

FUNDS AVAILABLE FOR OBLIGATION: Appropriation or estimate—1950, \$1,200,000; 1951, \$5,304,800.

PROGRAM AND PERFORMANCE

The Attorney General is authorized to adjudicate and pay loss or damage claims (to a limit of \$2,500 each) filed by Japanese and Nisei because of their forced removal from Hawaii, Alaska, and the far-western States as a military measure early in 1942. Awards in excess of \$2,500 are to be submitted to the Congress for payment by specific appropriation.

1. *Adjudication expenses.*—Staff review the records and interview claimants both in Washington and in the field. An office has been opened in Los Angeles; assignment of further staff to the field and general acceleration of this work is anticipated in the 1951 budget. An estimated 12,000 claims are expected by the closing date for filing (January 2, 1950); total amounts claimed may approximate \$50,000,000.

2. *Payment of claims.*—The estimate would provide for such awards as are likely to be made during 1951.

PROGRAM AND PERFORMANCE

The Federal Bureau of Investigation, as the investigative arm of the Department of Justice, obtains evidence for use in civil litigation and prosecution of violations of Federal law. By Executive order and statute it is also charged with primary responsibility in matters related to the national internal security.

1. *Security and criminal investigations.*—In addition to conducting investigations and maintaining appropriate records and communications systems, the Bureau coordinates and supervises broad investigative programs, particularly in internal security, and utilizes its laboratory in producing certain types of evidence. During 1949, 457,240 investigative matters of all types were referred to the Bureau; during 1951 it is expected that the number will exceed 500,000.

2. *Identification by fingerprints.*—The Identification Division acquires, classifies, and preserves criminal records (including fingerprints) and exchanges them with other duly authorized law-enforcement agencies. The fingerprint collection is expected to exceed 115,000,000 by the close of 1950. The 1951 budget includes additional amounts for servicing this collection and processing the expected acquisitions.

3. *Operation of criminal and scientific laboratory (for other law-enforcement agencies).*—Use of the laboratory in the Bureau's own activities—about 79 percent of total laboratory services—is included under "Security and criminal investigations" above. During 1949, scientific examinations made for agencies other than the Bureau numbered 21,158. The 1951 budget anticipates an increase of 10 percent over the volume for 1949.

4. *Training schools and inspectional services.*—The Bureau conducts instructional courses for its personnel and that of other law-enforcement agencies covering a comprehensive program to improve all aspects of law-

FEDERAL BUREAU OF INVESTIGATION—Con.

Salaries and Expenses, Federal Bureau of Investigation—Con.

enforcement activities, including management, administration, efficiency, and investigative techniques. Small increases in 1951 are anticipated in order to meet the demands for these services.

5. *Executive direction.*—The Director, under the direction of the Attorney General, is responsible for the overall supervision and management of the activities of the Bureau.

6. *Administrative services.*—Included within the scope of these services are all functions of an administrative character bearing upon Bureau operations. No significant change in this activity is expected during 1951.

7. *Emergencies in connection with kidnaping and bank robbery.*—A fund of \$100,000 is regularly included in the appropriation for this Bureau, to be held in reserve until released by the Attorney General for use in emergencies related to kidnaping, extortion, or bank robbery. In recent years the release of this reserve has been found necessary, and the 1951 budget continues the fund without change. Funds used in 1949 are distributed to the appropriate program activities.

PROGRAM AND PERFORMANCE

The Service administers and enforces the laws relating to immigration, naturalization, and registration of aliens. In spite of increasing work loads, the program will continue at approximately the present year's level.

1. *Inspection for admission into the United States.*—The Service maintains stations at border points, seaports, and airports to ascertain from all persons seeking to enter the United States whether they are citizens or aliens, and, if aliens, whether they are admissible under the immigration laws.

	1949 actual	1950 estimate	1951 estimate
Aliens admitted.....	735,000	800,000	825,000
Stowaways found.....	814	800	800
Citizens arrived.....	607,000	640,000	660,000
Alien seamen examined.....	960,099	975,000	985,000
Reentry permits issued or extended.....	60,975	67,500	74,000
Total entries over international borders.....	85,400,278	89,000,000	93,000,000

2. *Detention and deportation.*—Hearings are accorded aliens alleged to be in the United States unlawfully, warrants of arrest and deportation are issued and served, and detention facilities are operated and maintained, including the custody of persons held in detention.

WORK LOAD

	1949 actual	1950 estimate	1951 estimate
Hearings.....	30,049	30,000	30,000
Arrests.....	37,489	37,500	37,500
Aliens deported.....	20,040	20,100	20,100
Average number of aliens held in detention.....	2,105	2,100	2,100

3. *Naturalization.*—The Service conducts examinations of aliens to determine the qualifications for naturalization, including applicants for derivative citizenship. Representatives of the Service appear before naturalization courts to present facts and recommendations with respect to the applications of the aliens.

WORK LOAD

	1949 actual	1950 estimate	1951 estimate
Examinations.....	167,811	180,000	270,000
Court appearances.....	134,952	160,000	215,000

4. *Patrol for prevention and detection of illegal entry.*—A patrol is maintained by the Service for the prevention of smuggling and other unlawful entry of aliens into the United States, the apprehension of aliens guilty of such violations, the guarding of the international boundaries, and the operation and maintenance of facilities and equipment.

WORK LOAD

	1949 actual	1950 estimate	1951 estimate
Miles patrolled.....	10,901,478	11,000,000	12,000,000

Total obligations	197,543	529,000	399,900

PROGRAM AND PERFORMANCE

The Immigration and Naturalization Service pre-examines overseas applicants for admission into the United States under the Displaced Persons Act of 1948 to determine eligibility for admission.

The Service determines whether alien applicants for adjustment of immigration status under the Displaced Persons Act are qualified for the granting of status of permanent residence, and reports to the Congress all pertinent facts in each case where recommendation for adjustment of status is made.

PROGRAM AND PERFORMANCE

Amounts collected from transportation companies, owners and masters of vessels and agents to cover fines that may be imposed for unlawful entry of aliens and to secure the return of passage money (including head tax if paid by the alien as part of passage money) are deposited in the trust receipt account "Deposits to Secure Payment of Fines and Passage Money, Immigration and Naturalization Service." The portion of receipts representing fines, penalties, etc., is transferred monthly to miscellaneous-receipt account "Immigration Fines and Penalties." Such amounts as are required to make refunds to transportation companies and others in cases where no fine is imposed, and for payment to aliens of amounts due them are established from time to time in the appropriation account (31 U. S. C. 725r).

OBLIGATIONS BY ACTIVITIES

Return of deposits—1949, \$20,365; 1950, \$100,000; 1951, \$100,000.

FEDERAL PRISON SYSTEM

INTRODUCTORY STATEMENT

The Federal Prison System consists of the Bureau of Prisons and Federal Prison Industries, Inc. It operates the Federal prisons and supervises the maintenance of Federal prisoners confined in State and local institutions. Its functions include the establishment and conduct of industrial, farm, and other activities, and classification of prisoners to meet the needs for proper treatment, care, and rehabilitation of prisoners.

Total obligations.....	20,780,387	20,923,592	21,732,000

PROGRAM AND PERFORMANCE

1. *Custody, care, and treatment of prisoners in Federal institutions.*—The portion of the prison program related directly to the prisoners—including detention, support, rehabilitation, release—will continue during the budget year at the current level. The number of prisoners is expected to average 17,000 during 1950 and 1951. Additional costs will result principally because of within-grade promotions.

2. *Maintenance and operation of institutions.*—Increased amounts are included for long-deferred equipment replacements, major repairs, and certain alteration projects.

3. *Central supervision of field operations.*—Supervision of programs conducted in the institutions and inspection of non-Federal jails as to suitability for holding Federal prisoners are provided centrally.

4. *Executive direction.*—The executive function of the Bureau of Prisons includes the Director of Prisons, two assistants, and their secretarial staff.

5. *Departmental administrative service.*—Administrative services within the central office are increased in the 1951 budget to include staff for resuming the compilation and preparation for publication of an annual statistical report on prisoners in Federal and non-Federal prisons. This report prior to 1950 was compiled by the Department of Commerce but no funds are available in 1950 for this work.

APPROPRIATION TEXT

【Salaries and expenses, Bureau of Prisons: For salaries and travel expenses in the District of Columbia and elsewhere in connection with the supervision of the maintenance and care of United States prisoners, including printing and binding and the compilation of statistics relating to prisoners in Federal and non-Federal penal and correctional institutions, \$466,000: *Provided*, That not to exceed \$3,500 of this amount shall be available for expenses of attendance at meetings concerned with the work of the Bureau of Prisons when incurred on the written authorization of the Attorney General.】

SALARIES AND EXPENSES, BUREAU OF PRISONS

For expenses necessary for the administration, operation, and maintenance of Federal penal and correctional institutions, including not to exceed \$495,000 for departmental personal services; not to exceed \$15,000 for expenses of attendance at meetings of organizations concerned with the purposes of this appropriation; purchase of not to exceed nineteen passenger motor vehicles for replacement only, including two busses at not to exceed \$20,000 each; services as authorized by section 15 of the Act of August 2, 1946 (5 U. S. C. 55a); compilation of statistics relating to prisoners in Federal and non-Federal penal and correctional institutions; furnishing of insignia, uniforms, and other distinctive wearing apparel necessary for employees in the performance of their official duties; payment pursuant to law of claims of employees for loss, damage, or destruction of personal property (68 Stat. 167); firearms and ammunition; payment of rewards for the apprehension, or for information leading to the recapture, of escaped prisoners; purchase and exchange of farm products and livestock; construction of buildings at prison camps; and not to exceed \$35,000 for acquisition of land adjacent to any Federal penal or correctional institution when in the opinion of the Attorney General the additional land is essential for health or safety; \$22,230,000: *Provided*, That collections in cash for meals, laundry, barber service, uniform equipment, and any other items for which payment is made originally from appropriated funds may be deposited in the Treasury to the credit of this appropriation: *Provided further*, That there may be transferred to the Public Health Service such amounts as may be necessary, in the discretion of the Attorney General, for direct expenditure by that Service for medical relief for inmates of Federal penal and correctional institutions. (18 U. S. C. 4001, 4005, 4007, 4008, 4041, 4042, 4081, 4082, 4281; Departments of State, Justice, Commerce, and the Judiciary Appropriation Act, 1950.)

Appropriated 1950, \$466,000 Estimate 1951, \$22,230,000

* Includes \$21,722,492 for activities previously carried under appropriations as follows:
 "Salaries and expenses, penal and correctional institutions".....\$19,918,000
 "Medical and hospital service, penal institutions".....1,797,000
 "Contingent expenses, Department of Justice".....7,492
 The amounts obligated in 1949 and 1950 are shown in the schedule as comparative transfers.

PROGRAM AND PERFORMANCE

During the war years no funds were made available for construction except for certain farm buildings and low-cost housing for employee-veterans. After the war construction was again undertaken; all projects for which full appropriations have been made will be completed in 1950. Aside from the replacement of the Atlanta penitentiary power plant, emphasis in 1951 is on repair, improvement, and equipment replacement as provided in the estimate for salaries and expenses.

Total obligations.....	1,874,000	1,684,000	1,913,000

PROGRAM AND PERFORMANCE

The Bureau of Prisons contracts with suitable State and local jails for boarding Federal prisoners, and maintains seven jails in the Territory of Alaska. Detention in these jails is usually for short periods, such as before and during trial, pending transfer to a Federal prison following conviction, or during short sentences. An average of 2,800 offenders are boarded daily, an annual total of approximately 1,000,000 jail-days. For 1950 it appears that a supplemental appropriation of approximately \$225,000 will be required because of increased board rates; the 1951 rate is estimated to equal that for 1950.

Total obligations.....	932,064	914,409	1,006,137

PROGRAM AND PERFORMANCE

Commissaries operated in the Federal prisons sell their merchandise to prisoners only. Items thus made available are limited to less expensive nationally advertised brands, and include generally cigarettes, smoking tobaccos, packaged candies, toiletries, magazines, and certain hobby-craft materials. Operations are supported by profits from sales.

The total sales for the fiscal year 1949 were \$912,883, and profits totaled \$38,689, of which \$36,206 was allocated to recreational expense. From 1931 through the end of the fiscal year 1949, the commissary earned surplus was \$633,232. Of that amount \$59,428 has been distributed for benefits to prisoners in the form of certain equipment and expansion of the recreational program facilities.

PROGRAM AND PERFORMANCE

This fund represents contributions received for construction of a chapel at the Federal Industrial Institution for Women at Alderson, W. Va., under authority of the act of March 2, 1929 (45 Stat. 1509). The undertaking was abandoned by those sponsoring it, and since the balance is insufficient to carry out the purpose intended, and it being impracticable to attempt to return the moneys to the individual donors, it is proposed that the fund be carried to unappropriated trust receipts (31 U. S. C. 725s).

Total, Federal Prison System, trust appropriations:

PROGRAM AND PERFORMANCE

The Office of Alien Property is responsible for the vesting, controlling, and disposing of certain enemy-owned property in accordance with the provisions of the Trading With the Enemy Act. The Office operates under a limitation on administrative expenses from funds derived from the vested properties. Proceeds from such properties, after the payment of claims and taxes and the deduction of administrative expenses, are deposited in the War Claims Fund (50 U. S. C. App. 2012 (a)).

An increased program for 1951 is proposed to bring to an early conclusion the vesting program and to provide additional personnel to cope with the increasing backlog of cases pending in the litigation section.

1. *Vesting of certain enemy-owned property.*—The increase is to safeguard the Government's interest in unvested properties through early completion of the program.

VESTING ORDERS ISSUED

	1949 actual	1950 estimate	1951 estimate
Number.....	1,935	1,631	2,033
Value.....	\$20,882,000	\$16,170,000	\$22,825,000

2. *Management and liquidation.*—It is estimated that as of July 1, 1950, there will be 91 active business enterprises with assets of approximately \$206 million to be managed, supervised, and liquidated. Accounts established and maintained by the Office covering vested enemy assets have increased from 40,400, valued at \$233,052,000 in 1946, to 59,600 with a value of \$327,139,000 in fiscal year 1949. During 1950 and 1951 the Office will also be engaged in releasing or vesting approximately \$300 million of blocked assets.

3. *Administrative adjudication of claims.*—Claims filed against the Attorney General include claims for the return of property or for payment of debts due and owing against vested property. Most of the claims backlog involves debts against vested property.

CASE-LOAD

Number of claims	1949 actual	1950 estimate	1951 estimate
Received.....	9,657	2,500	2,500
Closed.....	1,991	3,000	6,600
Pending, end of fiscal year.....	43,398	42,898	38,798

4. *Litigation.*—The Office represents the United States and its officers in suits growing out of the administration of the Trading With the Enemy Act. Property involved in litigation has increased to approximately \$275 million.

5. *Executive direction.*—The Assistant Attorney General, his principal assistant and their immediate staff, supervise and direct the operations of the Office.

6. *Administrative services.*—The Office's administrative staff performs the usual functions of this nature, except for those services rendered by the administrative division of the Department of Justice under an advance of funds.

APPROPRIATION TEXT

SALARIES AND EXPENSES

[Office of Alien Property:] The Attorney General, or such officer as he may designate, is hereby authorized to pay out of any funds or other property or interest vested in him or transferred to him pursuant to or with respect to the Trading with the Enemy Act of October 6, 1917, as amended (50 U. S. C. App.), necessary expenses incurred in carrying out the powers and duties conferred on the Attorney General pursuant to said Act: *Provided*, That not to exceed **[\$4,000,000] \$4,480,000** shall be available in the current fiscal year for the general administrative expenses of the Office of Alien Property, including **[printing and binding;]** rent of private or Government-owned space in the District of Columbia; **[not to exceed \$70,000 for]** purchase of not to exceed three passenger motor vehicles; services as authorized by section 15 of the Act of August 2, 1946 (5 U. S. C. 55a); personal services in the District of Columbia; **[a health service program as authorized by law (5 U. S. C. 150), and traveling expenses, including]** and expenses of attendance at meetings of organizations concerned with the **[work of the Office]** purposes of this authorization: *Provided further*, That on or before

November 1 of the current fiscal year, the Attorney General shall make a report to the Appropriations Committees of the Senate and the House of Representatives giving detailed information on all administrative and nonadministrative expenses incurred during the next preceding fiscal year in connection with the activities of the Office of Alien Property: *Provided further*, That of the total amount herein authorized the amount of \$100,000 is to be transferred to the [Administrative Division] appropriation for "Salaries and expenses, general administration", Department of Justice. (*Departments of State, Justice, Commerce, and the Judiciary Appropriation Act, 1950.*)

NOTE.—Estimate includes \$14,700 for activities previously carried under "Contingent expenses, Department of Justice." The amounts obligated in 1949 and 1950 are shown in the schedule as comparative transfers.

GENERAL PROVISIONS—DEPARTMENT OF JUSTICE

SEC. 202. Not to exceed \$850,000 in the aggregate from the appropriations made in this title for general administration, general legal activities, and United States attorneys and marshals shall be available, without regard to the Classification Act of 1949, for compensation (not to exceed \$11,000 per annum) of special attorneys and special assistants to the Attorney General and to United States attorneys not otherwise provided for.

SEC. [202] 203. None of the funds appropriated by this title may be used to pay the compensation of any person hereafter employed as an attorney (except foreign counsel employed in special cases) unless such person shall be duly licensed and authorized to practice as an attorney under the laws of a State, Territory, or the District of Columbia.

SEC. [203] 204. Sixty per centum of the expenditures for the offices of the United States [district] attorney and the United States marshal for the District of Columbia from all appropriations in this title shall be reimbursed to the United States from any funds in the Treasury of the United States to the credit of the District of Columbia.

[SEC. 204. In the procurement of lawbooks, books of reference, and periodicals, the Department of Justice is authorized to exchange or sell similar items and apply the exchange allowances or proceeds of sales in such cases in whole or in part payment therefor.]

SEC. 205. Appropriations [under] and authorizations made in this title [available] for salaries and expenses shall be available for payment of tort claims pursuant to [section 403 of the Federal Tort Claims Act] law (28 U. S. C. 2672).

SEC. 206. Appropriations and authorizations made in this title for salaries and expenses shall be available for a health service program as authorized by law (5 U. S. C. 150).

SEC. 207. Appropriations and authorizations made in this title for salaries and expenses shall be available for printing and binding.

SEC. 208. Appropriations and authorizations made in this title which are available for expenses of attendance at meetings shall be expended for such purposes in accordance with regulations prescribed by the Attorney General. (*Departments of State, Justice, Commerce, and the Judiciary Appropriation Act, 1950.*)

Permanent indefinite appropriation, special account:

PROGRAM AND PERFORMANCE

Under the act of August 2, 1946, proceeds of sales of vehicles, equipment, accessories, and other items, the exchange of which is authorized by law, may be applied in whole or in part payment toward the purchase of similar items. Receipts from this source are set up in a special appropriation account and are available for the replacement of similar items to the end of the fiscal year following the year in which the sale is made; unused balances are adjusted to miscellaneous receipts (5 U. S. C. 118d-1).

PURPOSE AND FINANCIAL ORGANIZATION

The Corporation is authorized to (a) establish and operate industries in the United States prisons for the production of articles and commodities for use by the Federal Government, and (b) provide opportunities to inmates in prisons to acquire a knowledge and skill in trades and occupations to the end that inmates will be provided training which will assist them in earning a livelihood upon release (18 U. S. C. 4121-4128).

The Corporation was organized January 1, 1935, without capital stock. Its capital of \$4,176,040 was provided by the Industries Division of the Bureau of Prisons, Department of Justice. It has operated at a profit every year since its incorporation. The total earnings to June 30, 1949, from date of organization, amount to \$25,247,333, of which \$13,500,000 has been declared as dividends and paid into the general fund of the Treasury.

ANALYSIS OF BUDGET PROGRAMS

General.—The average population of the prisons in 1949 was 16,679 inmates, of whom 3,440 were provided full-time employment in the industrial shops; in addition, vocational training was provided for 9,220 others.

Industrial activities.—During the year 1949, 42 shops were operated in 23 lines of industries in 19 institutions. During the year the woolen mill at Terre Haute, Ind., the machine, die, and tool shop at El Reno, Okla., and the garment factory at Seagoville, Tex., were established and will be operating during the fiscal year 1950. Also, the furniture factory at Terre Haute, Ind., was discontinued and transferred to Ashland, Ky., where it will be operated in conjunction with the fiber furniture factory at that institution. Space and equipment have been provided for a new tobacco industry at Ashland, Ky., and it is expected to start operation before the close of the calendar year 1949. A new pallet industry was also established at McNeil Island, Wash., and is producing 500 warehouse pallets per day for the armed forces. During

FEDERAL PRISON INDUSTRIES, INC.—Continued

the present year a dental laboratory will be established at the Medical Center for Federal Prisoners, Springfield, Mo., for the production of dentures, where it is anticipated substantial amounts will be saved the Government in the cost of such dentures and at the same time effective training will be given to qualified inmates (18 U. S. C. 4122).

The Corporation has been authorized (18 U. S. C. 4121) to establish industries and vocational training programs in the military disciplinary barracks and several studies have been made of available space, personnel and industries, but the program has not as yet been accomplished to the extent of actual installation.

Vocational training.—The budget for the fiscal year 1949 anticipated the training of 8,500 inmates; training was actually provided for 9,220 inmates as indicated in the following tabulation:

Type of training	Number of training fields or shops	Number of enrollees without duplication	Number of inmates completing training
Agricultural.....	49	883	337
Industrial (on-the-job).....	112	2,167	1,138
Maintenance (on-the-job).....	203	4,189	1,268
Trade classes.....	41	1,313	445
Special.....	69	1,668	2,316
Total.....	474	9,220	5,504

¹ There were 3,279 additional enrollments in the various special classes, but they are accounted for in other groups.

The effectiveness of the training given is demonstrated by successful placement of the inmates, upon release from the institution, in jobs in which they are able to compete successfully with free labor and thus secure their position in their communities. During the year 1,120 placements were made by the five employment placement officers of the Corporation located at Atlanta, Ga.; Chillicothe, Ohio; Leavenworth, Kans.; McNeil Island, Wash.; and the National Training School, Washington, D. C. (18 U. S. C. 4123).

Administrative expense.—The central office in Washington, D. C., is charged with administrative responsibility for the operations of the Corporation and the technical staff required in connection therewith. Total expense for the past fiscal year was \$277,000 which, however, includes only \$19,775 for the cost of the 1948 audit by the General Accounting Office, the estimated cost of which is now \$25,000, some \$10,000 in excess of the amount originally expected. For the current fiscal year provisions were included for the establishment of 6 additional positions, including 3 engineers primarily for the purpose of extending industrial operations into the military disciplinary barracks. This increased personnel, together with anticipated increases in travel and other expenses, resulted in the increase of the limitation for the current fiscal year to \$330,000. The extension of activities into the military institutions has been slower than anticipated with the result that, after payment of additional costs under recent pay-increase legislation, savings of approximately \$6,000 will be effected during

the current fiscal year. The slower rate of integration of these activities will permit better utilization of personnel and thus make possible a reduction of \$3,000 in the limitation for 1951, despite increased costs of personal services and travel.

During the past year this Office prepared and processed the pay rolls for the Washington office, bond schedules, withholding taxes, leave and retirement records. Last year was the first full year in which the verification of the cash accounts in the hands of disbursing officers located throughout the United States was performed in this Office. It is also now necessary for the Corporation's traveling auditors to make more extensive checks of all vouchers, inasmuch as such vouchers are now maintained in the originating offices and are not subject to the individual post audit formerly performed in the Washington office of the General Accounting Office. These additional duties have been absorbed with a minimum addition of personnel by continuous review of procedures and records to increase the general efficiency of the Washington staff. As indicated previously this work will be continued and the additional work required for the extension of activities to the military disciplinary barracks will be performed with the addition of only four employees in lieu of the six available under the 1950 limitation on administrative expense.

FINANCIAL REVIEW

Income.—The net sales of commodities produced by the Corporation were \$18,031,637 in the fiscal year 1949, resulting in net earnings of \$2,630,878. The industrial earnings were approximately 17 percent of the sales, or a reduction of about 3 percent from the preceding year since few surplus materials were available during the year and because of the general narrowing of mark-ups in all industrial lines. The earnings of the Corporation in the fiscal year 1949 were greater than in any previous peacetime year. It is anticipated that the situation will change somewhat during the fiscal years 1950 and 1951 however, due to increased operating expenses. There will be revenue from new installations at Terre Haute, Ind., and El Reno, Okla., and it is anticipated that the resulting increase in sales will increase the estimated net income of \$2,253,000 in 1950 to \$2,270,300 in 1951.

Expenses.—No substantial changes are anticipated in the manufacturing expenses of the Corporation, but it is expected that cost of sales will be somewhat higher than during the past year. Consideration has been given not only to recent pay legislation, but to increased salaries due to within-grade promotions and to increased travel allowances. Close supervision is exercised to maintain the most economical manufacturing operations in order to keep a proper ratio between costs and selling prices.

Earned surplus.—During the past fiscal year earned surplus increased \$951,226 from \$10,796,107 to \$11,747,333. The credit to the earned surplus for the reduction in the reserve for inmate compensation and the reserve for the Atlanta power house, as well as the credit for the salvaged lumber at Terre Haute, Ind., were made in accordance with an understanding with officials of the Corporation Audits Division of the General Accounting Office.

Dividends.—The Corporation is limited in the payment of dividends to available cash. Therefore, consideration must be given to financing required in connection with the extension and replacement of plant and equipment. In accordance with policy adopted by the directors of the Corporation, a minimum cash balance of \$3,750,000 is maintained by the Corporation to properly carry out its functions. Therefore, from 1950 earnings there would remain available from cash on hand June 30, 1950, for dividend payments in 1951, \$2,150,000, after payment during the current year of a dividend in the amount of \$400,000. Also, it is expected cash will be available for dividends in the fiscal year 1952 of \$2,300,000 from earnings to June 30, 1951. These payments would make a total of \$18,350,000 in dividends derived from the earnings

of this Corporation from January 1, 1935, through June 30, 1951.

Capital expenditures.—The Corporation expended \$1,622,418 for expansion of plant and equipment during the fiscal year 1949, \$1,110,453 of which was spent at Terre Haute, Ind. It is anticipated that \$650,000 in fiscal year 1950 and \$350,000 in fiscal year 1951 will be used for expansion of existing facilities.

Investment of United States Government.—The Government's investment, which is all noninterest bearing, consists of contributed capital and retained earnings required to transact the Corporation's business. The net Government investment at June 30, 1949, was \$16,673,346 and is expected to increase to \$18,526,346 at June 30, 1950. The anticipated investment at June 30, 1951, is \$18,646,646.

APPROPRIATION TEXT

The following corporation is hereby authorized to make such expenditures, within the limits of funds and borrowing authority available to such corporation and in accord with law, and to make such contracts and commitments without regard to fiscal year limitations as provided by section 104 of the Government Corporation Control Act, as amended, as may be necessary in carrying out the programs set forth in the Budget for the fiscal year ending June 30, 1951, for such corporation, except as hereinafter provided:

Federal Prison Industries, Incorporated: Not to exceed **[\$330,000]** \$327,000 of the funds of the Corporation shall be available for its administrative expenses, and not to exceed **[\$400,000]** \$388,000 for the expenses of vocational training of prisoners, both amounts to be computed on an accrual basis and to be determined in accordance with the Corporation's prescribed accounting system in effect on July 1, 1946, and shall be exclusive of depreciation, payment of claims, expenditures which the said accounting system requires to be capitalized or charged to cost of commodities acquired or produced, including selling and shipping expenses, and expenses in connection with acquisition, construction, operation, maintenance, improvement, protection, or disposition of facilities and other

property belonging to the Corporation or in which it has an interest. (18 U. S. C. 4121-4128; Departments of State, Justice, Commerce, and the Judiciary Appropriation Act, 1950.)

Total, Department of Justice, general and special appropriations:

² Buses.

Statement of proposed obligations for purchase, maintenance, and operation of aircraft for the fiscal year 1951

DEPARTMENT OF JUSTICE

Appropriation	Aircraft to be purchased		Aircraft to be exchanged		Net cost of aircraft to be purchased	Old aircraft still to be used	Cost of maintenance and operation of aircraft	Public purpose and users
	Number	Gross cost	Number	Allowance (estimated)				
IMMIGRATION AND NATURALIZATION SERVICE								
Salaries and expenses, Immigration and Naturalization Service.	4	\$22,000	4	\$2,000	\$20,000	4	\$40,000	Used by border patrol pilots and patrol inspectors for maintaining air-ground liaison for prevention of illegal entries; pursuit of suspected violators; transfers of small task groups of patrol inspectors to points of emergency.

PROPOSED LEGISLATION

Civil rights program.—Provided legislation is enacted, additional appropriations for 1951 totaling \$800,000 will be requested to carry out an expanded civil rights program.

Legislation is pending before Congress in the form of S. 1725, entitled "To provide means of further securing and protecting the civil rights of persons within the jurisdiction of the United States."

The purpose of this legislation is to strengthen and secure the civil rights of the people of the United States

under the Constitution, and to protect the individual from discrimination based upon race, color, religion, or national origin.

Enactment of the legislation will require establishment of a Commission on Civil Rights, reorganization and expansion of the civil rights activities of the Department of Justice, and the creation of a Joint Congressional Committee on Civil Rights.

DEPARTMENT OF LABOR

Comparative Summary of Appropriations and Appropriation Estimates

Bureau or subdivision	Appropriations for 1950			Estimates of appropriation for 1951	Increase (+) or decrease (-), 1951 over 1950
	Presently available	Supplementals required (forecast)	Total		
GENERAL AND SPECIAL APPROPRIATIONS					
Annual definite appropriations:					
Office of the Secretary.....	\$3,160,800	\$357,900	\$3,518,700	\$4,436,000	+\$917,300

PROGRAM AND PERFORMANCE

The Office of the Secretary is responsible for the formulation of governmental policy in all matters affecting labor and for the administration and executive supervision of the various bureau programs or functions delegated to the Department by statute designed to serve not only workers but all of the people of the Nation.

1. *Executive direction and program coordination.*—The Secretary with the advice of his aides and assistants formu-

OFFICE OF THE SECRETARY—Continued

Salaries and Expenses, Office of Secretary of Labor—Continued

lates basic labor policy, and exercises general administration over all of the functions in which the Department is engaged to insure that bureau programs are basically sound and necessary, and are coordinated with one another.

2. *International labor affairs—direction of departmental programs and interagency coordination.*—The purpose of this activity is to direct, coordinate, and give policy guidance to the international activities of the Department and to coordinate the Department's relations on international matters with other agencies, trade unions, and management groups. Specifically, this includes collaboration with the Department of State on labor and manpower policies and programs in all areas of the world; primary responsibility, under over-all policy guidance of the Department of State, for United States participation in the activities of the International Labor Organization; participation in the formulation of policy for and in the operations of the United States Foreign Service, particularly the labor attachés; advice, assistance, and representation in connection with the activities of the United Nations, particularly the Economic and Social Council and its Commissions; collaboration with the Department of the Army in connection with labor and manpower matters in occupied areas under their direct jurisdiction; and participation in the Reciprocal Trade Agreements Program.

3. *Administrative services.*—This activity embraces a variety of staff services to the operating bureaus including library services, information, personnel administration, and business-management matters. The increase requested in 1951 is related to the expansion of the programs in the operating bureaus and for the replacement of obsolete and worn out equipment.

PROGRAM AND PERFORMANCE

The Office of the Solicitor serves as legal counsel to the Secretary of Labor and the Department, and has operating responsibility for legal aspects of programs administered by the Department.

1. *Interpretation, adjudication, and enforcement of regulatory labor laws.*—The major resources of the Solicitor's office are devoted to interpretation and enforcement of Federal wage, hour, and child-labor laws. Major amendments to the Fair Labor Standards Act, approved October 26, 1949, require many new and revised regulations, raise many questions of interpretation, and are expected to stimulate litigation primarily to determine the intent of the new provisions. Also, new litigation in the form of

suits by the Administrator to recover back wages for employees is authorized. For these reasons, substantially increased work loads are estimated for both 1950 and 1951. A 1950 supplemental appropriation of \$204,500 is forecast for Fair Labor Standards Act work which will enable the agency to handle current work loads and to attain 1951 levels during the current fiscal year. The 1951 estimate provides for full-year costs of activities initiated in 1950 and includes a small additional increase for completion of a program begun in 1950 for revision of minimum wage rate determinations under the Public Contracts Act.

2. *Predetermination of minimum wage rates for public construction and repair contracts.*—The Secretary of Labor is required by law to determine and set minimum prevailing rates for laborers and mechanics on Federal public construction contracts and for several grant-in-aid construction programs. Operating responsibility for this program has been delegated to the Solicitor's office. Wage predeterminations made in 1949 totaled 10,914; for 1950 and 1951 the volume is estimated at 15,500 and 17,800, respectively. Work loads are exceeding earlier estimates, in part because of the enactment of additional housing and hospital construction legislation which extends coverage of the prevailing wage statutes. For this reason a 1950 supplemental appropriation of \$40,000 is anticipated, and the 1951 estimate includes a small additional increase for this function.

3. *Advisory services on legislation affecting workers.*—As occasion requires, the Solicitor's office analyzes and interprets existing legislation and drafts proposed legislation which affects labor, and prepares such reports thereon as the circumstances indicate.

4. *Legal services on employment security matters.*—This activity relates to labor supply and employment security functions of the Department and involves interpretation of applicable laws, international agreements affecting temporary employment of foreign workers, and legal assistance to State agencies concerned with the employment security program.

5. *Legal services on international labor affairs.*—With the assistance of interested Bureaus, the Solicitor's office prepares reports of the United States Government on conventions and recommendations of the International Labor Organization. It also renders related advisory services.

6. *Other legal services to the Department and the public.*—This activity includes advisory services not included in other categories which are provided to the Department and the public in response to inquiries related to the Department's programs.

7. *Executive direction and management services.*—The immediate office of the Solicitor provides basic policy formulation and program supervision. Central services such as the legal library and the stenographic pool are also included in this activity.

PROGRAM AND PERFORMANCE

The Bureau of Labor Standards develops and encourages the adoption of sound labor standards and related

OFFICE OF THE SECRETARY—Continued

Salaries and Expenses, Bureau of Labor Standards, Department of Labor—Continued

administrative practices except when such matters relate exclusively to women. It designs and promotes programs aimed at the reduction of industrial accidents, serves as a clearing house for pertinent information, and administers the union registration functions of the Labor-Management Relations Act, 1947.

1. *Promotion and technological advisory services—industrial safety.*—Through cooperation with State labor departments, labor organizations, management, and other interested groups, the Bureau stimulates activities designed to minimize industrial accidents. Currently such accidents total about 2,000,000 annually, with resultant economic losses approximating \$4,000,000,000. Training courses are conducted for State factory safety inspectors and State agencies are assisted in planning industry-wide safety programs in especially hazardous industries. In 1949 the Bureau worked with 4 States on special industry programs only; one or both types of program will be carried on in 27 States in 1950 and in 22 States in 1951. Additional safety engineering studies will be made and hazardous occupation orders under the child labor provisions of the Fair Labor Standards Act will be issued. The Bureau provides service for the President's Conference on Industrial Safety and cooperates with State agencies on similar State-wide conferences.

2. *Assistance to States in developing sound labor laws and related administrative procedures.*—Through its publications and sponsorship of annual conferences, the Bureau provides a clearing house for information on all aspects of labor law and related administrative procedures except on matters relating solely to women, and assists the States in applying such data to their own problems. The Bureau also negotiates and services cooperative agreements under which the States make safety inspections under the Walsh-Healey Public Contracts Act and issues proof-of-age certificates under the Fair Labor Standards Act.

3. *Promotion of employment for physically handicapped workers.*—The Bureau provides services for the President's Committee on National Employ the Physically Handicapped Week. To obtain consideration for employment of physically handicapped workers on the basis of their abilities, the Committee stimulates cooperative action by governors of States, mayors of cities, private organizations, and employers.

4. *Labor standards services on international labor affairs.*—The Bureau participates in the preparation of reports on behalf of the United States Government to the International Labor Organization concerning compliance by the United States and the several States with that Organization's conventions and recommendations on desirable labor standards and practices. The Bureau also channels information to the States as to the content of such conventions and recommendations and methods for achieving compliance.

5. *Child labor and youth employment research.*—In order to discharge its functions under the child-labor provisions of the Fair Labor Standards Act, the Department through this Bureau conducts continuous research covering aspects of employment of young people. The recent amendments to this statute require immediate acceleration of this activity, particularly with respect to coverage of child labor in the maritime industry, the more restricted agricultural exemption, and the wider responsibility in the

hazardous occupations area. For this reason, a 1950 supplemental appropriation of \$19,000 is anticipated, and the 1951 estimates contemplate full-year operation at the higher level.

6. *Registration of union data.*—The Bureau maintains the file of union organizational and financial data required to be filed by the Labor-Management Relations Act, 1947, as a condition precedent to use of the facilities of the National Labor Relations Board. As of June 30, 1949, 20,698 labor organizations had completed one or more annual registrations. Activity for 1950 and 1951 is estimated at approximately 35,000 registrations per year.

7. *Executive direction and management services.*—The Director and his division chiefs provide general policy formulation and program direction for the Bureau. Central administrative services are also included under this head.

PROGRAM AND PERFORMANCE

1. *Administration of veterans' reemployment rights statutes.*—The Bureau assists veterans in the exercise of their reemployment rights under the two selective service laws and comparable statutes. The limited full-time organization is augmented by 5,500 volunteer reemployment rights committeemen at the State and local levels.

(a) *Direct assistance to veterans in establishing reemployment rights.*—On request, the Bureau assists individual veterans to establish their statutory reemployment rights through various means short of litigation. In addition to cases settled by local volunteer committeemen, the Bureau handled in 1949 about 6,000 more difficult cases, 94 percent of which were adjusted without referral to United States attorneys. Case loads are expected to continue at about the same level for 1950 and 1951. Approximately 70 percent of cases involve on-the-job rights rather than initial reinstatement.

(b) *Promotion of compliance.*—In order to minimize the number of individual cases requiring direct assistance or possible legal action, the Bureau carries on an educational program through its staff, committeemen, cooperating agencies, and publications designed to inform employers, veterans, and any others who may be affected, of the requirements of the law and their effect as interpreted by the courts.

These funds are received from the Department of State by transfer to enable the Department of Labor to carry

OFFICE OF THE SECRETARY—Continued

International Information and Educational Activities, Department of State (Transfer to Labor)—Continued

out cooperative scientific and technical projects under the international information and educational activities program. The purpose is to promote better understanding between the peoples of the United States and other countries, through the interchange of persons, knowledge, and skills and the rendering of technical and other services.

1. *Rendering of technical services to other countries through in-service training and assignment of specialists.*—Carefully selected foreign individuals are sent to this country to study and observe in specialized fields relating to labor functions which will contribute to the improvement of economic and social conditions in their respective countries. In other cases, American specialists in particular fields such as labor statistics or industrial safety are sent to assist other countries on projects requiring technical or expert knowledge.

2. *Program management and administration.*—This activity covers the planning and operation of the program, including such work as planning of specific projects, selection of trainees and arranging for technicians to assist other countries, supervision of program operations, follow-up with other countries after completion of projects, and administrative services.

PROGRAM AND PERFORMANCE

Funds for the two activities listed below are received from the Department of the Army and the Department of State, respectively, to carry out programs for these two agencies which are closely related to the work of the Department of Labor and which the Department is competent to administer efficiently.

1. *Cooperative program for German nationals in the field of labor.*—The purpose of this program is to bring to this country German nationals who are active in trade unions and key personnel in government positions relating to labor. Bringing these individuals to the United States for a period of study and observation of labor and related activities in this country and giving them an opportunity for first-hand contact with American workers on their jobs, in their unions, and in their homes, enables them to obtain knowledge and inspiration to rebuild and strengthen the democratic elements in the German trade-union movement.

2. *Cooperative program for Korean nationals in the practices and techniques of American industry.*—In the interest of raising the standards of industrial production in Korea, an opportunity is provided under this program to selected Koreans to observe in industrial establishments in the United States specific processes and methods in order that knowledge and techniques acquired may be applied in Korea. Korean personnel are studying and observing United States techniques and methods in chemical and mechanical engineering, and in the telephone, utilities, and textile industries.

PROGRAM AND PERFORMANCE

The program of this Bureau is directed toward the maintenance of an adequate and competent skilled labor force, compatible with the national security and the welfare of the individual worker. With the voluntary participation of management and labor, the Bureau and the comparable State agencies promulgate uniform standards designed to develop skills through planned job experience and related technical instruction.

1. *Development and promotion of national apprenticeship programs.*—To advance the national aspects of the apprenticeship system, the Bureau secures the adoption of apprenticeship policies by major industries and assists such industries in developing and applying standards to apprentice training programs. National policies on apprenticeship have been adopted and standards jointly promulgated by national management and labor groups for 16 trades and by either national management or labor organizations for 14 additional skilled trades or occupations. During 1950 and 1951, development of national apprenticeship policies and programs will be continued for apprenticeable occupations in additional industries including steel, transportation, and textiles.

As a basis for appraising the adequacy of existing apprentice training facilities in relation to national needs by occupation, statistical data are compiled, analyzed, and published, and apprenticeship programs are reviewed and registered in relation to compliance with established standards. At the end of 1949, 51,260 programs were registered with the Bureau or cooperating State agencies. These programs included 236,515 apprentices.

In 1951, statistical data regarding apprenticeship-training operations will be improved by the provision of greater assistance to States in developing operating statistics susceptible of meaningful consolidation with similar State and Federal data.

2. *Cooperation with States in formulation and promotion of apprenticeship standards.*—To advise and encourage the States in the development of sound apprenticeship programs, information on apprenticeship is compiled and distributed, assistance is provided interested groups in setting up State apprenticeship councils and in developing sound proposals for legislation on apprenticeship. In those States which have apprenticeship agencies, the Bureau attempts to work out jointly approved operations which avoid any duplication of effort by the Federal or State agencies. By 1950, 31 States and Territories had apprenticeship councils or agencies. In 20 States, 2 Territories, and the District of Columbia the apprenticeship program is authorized by law. The Bureau encourages the establishment of such councils in every State and it is estimated that during 1950 and 1951 five more States will set up similar councils or agencies for the promotion of apprenticeship, generally by enactment of legislation.

3. *Development and maintenance of local apprenticeship programs.*—Through field representatives, the Bureau assists in the voluntary development of apprenticeship programs at the local level. The programs are undertaken by employers, pursuant to established standards, and often in accordance with the terms of an agreement with a labor organization. After programs begin to operate, periodic contacts are made in an effort to keep them producing an adequate supply of skilled workers.

The skilled labor force of the United States is now estimated at 7,800,000 workers. Established apprenticeship facilities are training approximately 25 percent of the

BUREAU OF APPRENTICESHIP—Continued**Salaries and Expenses, Bureau of Apprenticeship, Department of Labor—Continued**

number of apprentices which would be necessary under present conditions to maintain the skilled labor force. These facilities represent about 31 percent of potential apprenticeship development.

For 1950 and 1951 the number of new apprenticeship programs developed and apprentices registered will continue at present levels. No substantial increase in the numbers of apprentices or programs can be expected because the program mortality rate will about offset new program development. Efforts will necessarily be centered on maintaining the current level of apprenticeship activity.

4. *Executive direction and management services.*—This activity includes the basic formulation of policies and standards and the provision of Federal leadership and administrative direction for the conduct of the national apprenticeship system on a sound basis of Federal-State cooperation. Much assistance is rendered by the advisory services of the Federal Council on Apprenticeship, which is composed of representatives of employers and labor organizations in industries dependent upon skilled workers.

PROGRAM AND PERFORMANCE

The Bureau of Employment Security carries out the Federal responsibilities in the administration and allocation of funds to the States for the Federal-State system of public employment services and unemployment insurance. A specialized veterans' placement service promotes employment for veterans, and particular services are rendered in connection with agricultural employment. The Bureau reviews and evaluates State unemployment insurance laws and the administration by the States of their unemployment insurance and employment service programs under those laws. It provides technical assistance to States in developing legislation and in administrative and procedural problems.

1. *Veterans' placement service.*—Under provisions of the Wagner-Peyser Act of 1933 and the Servicemen's Readjustment Act of 1944, veterans' employment representatives provide functional supervision to local employment offices in rendering suitable counseling and placement services to veterans and promote the interest of employers in employing veterans.

2. *Farm placement service.*—The Bureau provides a specialized farm placement service to employers and workers

engaged in agricultural and related activities by guiding and facilitating the orderly interstate movement of migratory workers to augment the farm placement services of the States. It certifies to the Immigration and Naturalization Service needs for importation of foreign labor when adequate supplies of domestic labor are not available, and arranges employment contracts for Mexican nationals under terms of an agreement between the United States and Mexico. Operations relating to interstate guidance of migratory workers and administration of the agreement with Mexico were initiated during 1950. The program is continued on a full-year basis for 1951.

3. *Interstate labor clearance.*—Operating through the employment services of the several States, the Bureau coordinates a Nation-wide labor clearance system for locating and referring workers from other States to jobs that cannot be filled locally.

4. *Collection and interpretation of labor market information.*—Facts and figures are reported and analyzed respecting (a) the administrative operations of the unemployment insurance and employment service programs; (b) labor market information by areas, industries, and occupations. These data are used for administrative and economic planning by the Director and Bureau staff, State employment offices, and others. Increased operations authorized during 1950 are provided on a full-year basis.

5. *Assistance to States in maintaining effective public employment services.*—To assure more effective service to employers and workers, the Bureau develops plans, procedures, and special materials, and renders direct assistance to the States leading to (a) improved organization and management of public employment services; (b) specialized counseling and testing service to veterans, handicapped workers, and others with problems of occupational adjustment; and (c) more effective employer contact programs designed to increase the use of the placement, occupational information, and other facilities of the employment offices.

6. *Determination of conformity with Federal act, and proper and efficient administration of State unemployment compensation laws.*—To assure that each State unemployment insurance law as interpreted and administered qualifies for tax offset and for grants of administrative funds under Federal law, the Bureau reviews State laws and interpretations. Through surveys of specific operations in the 51 jurisdictions administering unemployment insurance laws, the Bureau seeks to improve performance and reduce costs. It develops proposals for improving the program through amendments to existing statutes.

7. *Executive direction and management services.*—This includes the over-all planning and direction of the work of the Bureau, together with the necessary business management services.

APPROPRIATION TEXT

Salaries and expenses, Bureau of Employment Security: For expenses necessary for the general administration of the employment service and unemployment compensation programs, including personal services in the District of Columbia, \$4,675,000; temporary employment of persons, without regard to the civil service laws, for the farm placement migratory labor program; for cooperation with the United States Immigration and Naturalization Service and the Secretary of State in negotiating and carrying out agreements relating to the employment of foreign agricultural workers, subject to the immigration laws and when necessary to supplement the domestic labor force; and not to exceed \$10,000 for services as authorized by section 15 of the Act of August 2, 1946 (5 U. S. C. 55a); \$5,667,000, of which \$1,575,000 shall be for carrying into effect the provisions of title IV (except section 602) of the Servicemen's Readjustment Act of 1944.

For an additional amount for "Salaries and expenses, Bureau of Employment Security, 1950", \$340,000; and appropriations under this head shall be available for the temporary employment of persons, without regard to the civil service laws, for the farm placement migratory labor program and shall be available for cooperation with the United States Immigration and Naturalization Service and the Secretary of State in negotiating and carrying out agreements relating to the employment of foreign agricultural workers, subject to the immigration laws and when necessary to supplement the domestic labor force. (42 U. S. C. 501-503, 903; 29 U. S. C. 49-491; 38 U. S. C. 695-695a, 695c-695f; Reorganization Plan No. 3 of 1946, 3 C. F. R., 1946 Supp. 901; Labor-Federal Security Appropriation Act, 1950; Reorganization Plan No. 2 of 1949, 14 F. R. 5225; Third Deficiency Appropriation Act, 1949.)

Appropriated 1950, \$340,000 Estimate 1951, \$5,667,000

* Excludes \$48,185 for activities transferred in the estimates to "Salaries and expenses, Office of Secretary of Labor." The amounts obligated in 1949 and 1950 are shown in the schedule as comparative transfers.

NOTE.—Activities under this title were transferred pursuant to Reorganization Plan No. 2 of 1949 during fiscal year 1950, as follows:

"Salaries and expenses, Bureau of Employment Security, Social Security Administration, Federal Security Agency"	\$5,419,734
"Salaries and expenses, Office of Commissioner, Social Security Administration"	16,825
"Salaries, Office of Administrator, Federal Security Agency"	192,791
"Salaries and expenses, division of service operations, Federal Security Agency"	85,835

The amounts obligated in 1949 and 1950 are shown in the schedule as comparative transfers.

Total obligations	176,169,096	154,521,715	188,000,000

PROGRAM AND PERFORMANCE

These funds are granted to the several States by the Bureau of Employment Security for administration of the State unemployment compensation programs—designed to sustain the wage earner during limited periods of unemployment—and the employment service programs—designed to bring together workers and jobs.

1. *Unemployment compensation activities.*—To administer this program, the following operations are necessary: (a) Determining the tax liability of each employer, collecting the taxes and auditing the employer's records. The increases for 1951 will allow more time to be spent on checking delinquent accounts and auditing tax returns. This will result in increased collections into the trust fund. (b) Maintaining a record of each employee's wages from which the amount and length of his benefits can be computed. An increase for 1951 will permit verification work to be done to insure that wage records are more accurate, which will in turn be of assistance in the prompt and accurate payment of benefits. (c) Accepting initial claims for unemployment benefits from wage earners. Some increase in the average national time per unit of work will be devoted to this activity to impress upon the wage earner his responsibilities and to minimize fraudulent claims. (d) Processing the claim by determining the amount and duration of the benefits, as well as determining eligibility or ineligibility for reasons such as discharge for cause, inability to work, unavailability for work, or refusal of suitable work. (e) Taking continued claims from those determined as eligible for benefits. This requires periodic reporting by the wage earner to the local office and constant checking to ascertain whether or not his eligibility for benefits continues. Some increase in unit time will be devoted to this activity so as to assist to the extent possible in preventing payments to individuals who would be ineligible if all the facts were known. (f) Making benefit payments to the individual, encompassing all the bookkeeping and auditing operations required to insure proper payment to the entitled person and investigations involving fraudulent claims. Some increase in time will be spent in checking records to determine fraudulent claims. (g) Conducting hearings and making decisions on appeals filed by the claimant or the employer on the claimant's right to draw

benefits, or on appeals from an employer on his tax liability.

The basic work loads for the operations described above are given in the following table. A drop in the work-load figures for 1951 is anticipated for all but the first two operations. The 1950 figures include current estimates of work loads which will necessitate using the existing contingency appropriation and an additional amount out of the \$7,000,000 included as a proposed supplemental appropriation.

UNEMPLOYMENT COMPENSATION ACTIVITIES—WORK LOADS

Basic work load	1949 actual	1950 estimate	1951 estimate
Employer tax returns processed	5,913,000	6,000,000	6,000,000
Employee wage items recorded	157,000,000	158,000,000	158,000,000
Initial claims taken	14,524,000	17,500,000	16,400,000
Claims processed	8,008,000	10,000,000	9,350,000
Continued claims taken	71,759,000	100,000,000	90,000,000
Benefit payments made	61,233,000	85,500,000	77,000,000
Appeals		258,000	250,000

2. *Employment service activities.*—To administer this program the following operations are performed: (a) Taking applications, which reflect the occupational experience and qualifications of the applicant, so as to register those seeking work. Because of anticipated wider use in 1951 of self-filed applications, the unit time required for this activity in the local office should decline. A decline in the number of applicants is also anticipated. (b) Providing testing and counseling services to applicants having need of such services so as to increase their opportunities for placement. An increase in the number counseled and in the unit time required—to develop better vocational plans—is expected in 1951. (c) Developing job opportunities by collaborating with various State and local agencies and employers on community employment programs and by visiting employers to explain or emphasize the services offered by the local offices, to verify referrals of workers made by the local offices and to provide assistance to employers, including information on uses of job analysis, staffing schedules, and turnover analysis. (d) Making placements by screening the files of previously registered applicants or by interviewing applicants and selecting those suitably qualified for job openings and referring them to the employer. Some increase in the number of employer contacts to develop more job openings, and in the number of placements is expected in 1951.

The basic work loads for these employment service operations are given in the following table:

EMPLOYMENT SERVICE ACTIVITIES—WORK LOADS

Basic work load	1949 actual	1950 estimate	1951 estimate
Applications for work taken	7,622,000	8,500,000	8,250,000
Counseling given	899,000	1,325,000	1,500,000
Employer visits	1,928,000	2,150,000	2,250,000
Placements made:			
Nonfarm	4,892,000	5,200,000	5,500,000
Farm	7,544,000	8,000,000	8,000,000

3. *State administration.*—A slight increase in over-all State administration is anticipated for 1951. State administration includes leadership and planning of the local office unemployment compensation and employment service activities, legal, fiscal, personnel, training, research services, and all building maintenance services not provided in the rental costs.

4. *Retroactive retirement contributions.*—Payments were made to three State retirement systems in 1950 to cover

employees who served during the wartime period of Federal operation of the United States Employment Service. This service was recognized by the State retirement systems upon the return of the employment service to the States. No retroactive contributions are forecast for 1951.

5. *Contingency fund.*—The unemployment compensation program is extremely sensitive to economic fluctuations and it is impossible to estimate accurately in advance the number of claims that will be filed. Similarly it is impossible to forecast changes in salary rates or changes in the unemployment compensation laws which may be made by the States. Beginning with 1950 an indefinite appropriation, suitably limited to the uncontrollable cost factors, was made available to meet these contingent changes. The present situation indicates that the existing 1950 contingency fund of \$8,000,000, plus an additional \$7,000,000 will be needed to provide a further safeguard in accordance with the function of the contingency fund and to take care of current work loads. For 1951 the contingency fund is estimated at \$17,000,000, or about 10 percent of the basic appropriation.

OBLIGATIONS BY ACTIVITIES

Description	1949 actual	1950 estimate	1951 estimate
1. Unemployment compensation activities:			
(a) Tax collecting and auditing.....		\$18,341,300	\$19,631,200

APPROPRIATION TEXT

[SOCIAL SECURITY ADMINISTRATION]

Grants to States for unemployment compensation and employment service administration: For grants to the several States (including Alaska and Hawaii) in accordance with the provisions of the

Act of June 6, 1933, as amended (29 U. S. C. 49-491), for carrying into effect section 602 of the Servicemen's Readjustment Act of 1944, [and] for grants to the States as authorized in title III of the Social Security Act, as amended (42 U. S. C. 501-503), including, upon the request of any State, the purchase of equipment and the payment of rental for space made available to such State in lieu of grants for such purpose, [\$135,000,000, of which not to exceed \$675,000 shall be available to the Federal Security Administrator for necessary expenses in connection with the operation of employment office facilities and services in the District of Columbia and for use in carrying into effect section 602 of the Servicemen's Readjustment Act of 1944 in Puerto Rico: *Provided*, That during the period ending March 31, 1950, this appropriation may be apportioned and obligated at an annual rate not in excess of \$150,000,000 and, to the extent that the Federal Security Administrator, with the approval of the Director of the Budget, finds necessary to meet increased costs of administration resulting from change in a State law or increases in the numbers of claims filed and claims paid or salary costs over those upon which the original State's grant was based, such annual rate may be increased to not in excess of \$157,500,000] and for necessary expenses in connection with the operation of employment office facilities and services in the District of Columbia and for use in carrying into effect section 602 of the Servicemen's Readjustment Act of 1944 in Puerto Rico, \$188,000,000 of which \$17,000,000 shall be available only to the extent that the Secretary of Labor with the approval of the Director of the Bureau of the Budget, finds necessary to meet increased costs of administration resulting from changes in a State law or increases in the numbers of claims filed and claims paid or salary costs over those upon which the State's basic grant (or the allocation for the District of Columbia or Puerto Rico) was based, which increased costs of administration cannot be provided for by normal budgetary adjustments: *Provided* [further], That no State shall be required to make any appropriation as provided in section 5 (a) of said Act of June 6, 1933, prior to July 1, [1951] 1952: *Provided further*, That, notwithstanding any provision to the contrary in section 5 (a) or section 6 of the Act of June 6, 1933, or in section 302 (a) of the Social Security Act, as amended, the [Federal Security Administrator] Secretary of Labor shall from time to time certify to the Secretary of the Treasury for payment to each State found to be in compliance with the requirements of the Act of June 6, 1933, and with the provisions of section 303 of the Social Security Act, as amended, such amounts as he determines to be necessary for the proper and efficient administration of its unemployment compensation law and of its public employment offices: *Provided further*, That such amounts as may be agreed upon by the [Federal Security Agency] Department of Labor and the Post Office Department shall be used for the payment, in such manner as said parties may jointly determine, of postage for the transmission of official mail matter in connection with the administration of unemployment compensation systems and employment services by States receiving grants herefrom.

In carrying out the provisions of said Act of June 6, 1933, the provisions of section 303 (a) (1) of the Social Security Act, as amended, relating to the establishment and maintenance of personnel standards on a merit basis, shall apply.

Grants to States, next succeeding fiscal year: For making, after May 31 of the current fiscal year payments to States under title III of the Social Security Act, as amended, and under the Act of June 6, 1933, as amended, for the first quarter of the next succeeding fiscal year, such sums as may be necessary, the obligations incurred and the expenditures made thereunder for payments under such title and under such Act of June 6, 1933, to be charged to the appropriation therefor for that fiscal year.

[SOCIAL SECURITY ADMINISTRATION]

[Grants to States for Unemployment Compensation and Employment Service Administration]

[For an additional amount for the fiscal year 1950 for "Grants to States for unemployment compensation and employment service administration," \$25,000,000; the limitation of \$675,000 under this head in the Labor-Federal Security Appropriation Act, 1950, for necessary expenses in connection with the operation of employment office facilities and services in the District of Columbia, and so forth, is hereby repealed; and the first proviso under said head is amended to read as follows: "*Provided*, That in addition to this appropriation, the sum of \$8,000,000 is hereby made available to be used to the extent that the Federal Security Administrator, with the approval of the Director of the Bureau of the Budget, finds necessary to meet increased costs of administration resulting from change in a State law or increases in the numbers of claims filed and claims paid and salary costs over those upon which the State's basic grant (or the allocation for the District of Columbia or Puerto Rico) was based, which increased costs of administration cannot be provided for by normal budgetary adjustments.".] (42 U. S. C. 501-503;

BUREAU OF EMPLOYMENT SECURITY—Con.**Grants to States for Unemployment Compensation and Employment Service Administration, Bureau of Employment Security, Department of Labor—Continued**

88 U. S. C. 695b; Labor-Federal Security Appropriation Act, 1950; Third Deficiency Appropriation Act, 1949.)

Appropriated (est.) 1950, \$33,000,000 Estimate 1951, \$188,000,000

NOTE.—Activities under this title were transferred pursuant to Reorganization Plan No. 2 of 1949 from "Grants to States for unemployment compensation and employment service administration, Bureau of Employment Security, Social Security Administration, Federal Security Agency," during fiscal year 1950. The amounts obligated in 1949 and 1950 are shown in the schedule as comparative transfers.

PROGRAM AND PERFORMANCE

This is a temporary Federal program designed to pay unemployment insurance during the reconversion period to unemployed seamen. Federal funds are allotted to the States for the payment of benefits to unemployed seamen who qualify. With a much smaller number of workers eligible for payments, less will be used in 1950. Inasmuch as the law expires on June 30, 1950, no estimate is proposed for 1951.

OBLIGATIONS BY ACTIVITIES

Benefit payments—1949, \$2,326,284; 1950, \$393,716.

PROGRAM AND PERFORMANCE

The Bureau, a research and statistical organization, is the principal fact-finding agency of the Department. It develops a variety of economic data affecting labor, including basic industrial and economic facts, for use by the Department, the executive branch of the Government, and the Congress in public policy determinations, as well as for business, labor, and other public uses.

1. *Collection, analysis and publication of labor and economic statistics.*—A wide variety of purposes are served by the information obtained. Wage-rate and earnings data, cost-of-living figures, and summaries of provisions contained in collective-bargaining agreements are widely utilized in labor-management contract negotiations; statistics on prices, employment, hours of work and analyses of changes in the size and composition of the labor force indicate the state of health of the national economy; information on injury rates and the causes of accidents contribute to better industrial safety programs; construction statistics provide data on supply and demand for housing and value of Federal construction; and produc-

tivity rates indicate direction and rate of growth of industrial efficiency.

These purposes are served by making available: (a) statistics and analyses of employment, hours and earnings for the United States by industry, for States and major industrial cities, and of labor turn-over, and studies of employment trends; (b) the consumers' price indexes for moderate-income families in large cities—designed to measure changes in living costs of families of wage earners—indexes of rents and fuel costs and other retail and wholesale price data; (c) selected occupational wage rate information for major industrial cities, special studies of earnings and occupational rates in selected industries and of wage rate trends; (d) estimates of the number and value of public and private residential and non-residential structures and other construction, including new housing in selected urban areas; (e) data on numbers of work stoppages, employees involved and man-days lost, analyses of provisions in collective bargaining agreements; (f) statistics on productivity trends in a number of manufacturing and nonmanufacturing industries; (g) appraisal of employment trends and long-run outlook for many occupations; (h) injury frequency and severity rates for major manufacturing and nonmanufacturing industry groups, special studies of causes of industrial accidents and injuries; (i) basic statistical and developmental work on interindustry relationships, centering around industrial distribution of final product and interindustry purchase of goods and services; and (j) analyses of available data on labor conditions in foreign nations.

In 1951, the employment statistics program, in which the State employment security agencies or labor departments cooperate, will be further developed. A limited survey of labor requirements derived from different types of public works construction will be undertaken for use in advance planning. Occupational outlook studies, originally prepared for the Veterans Administration, will be currently reappraised and studies will be made of a few additional occupations. The coverage of injury statistics will be expanded to provide greater reliability of the injury and frequency rates, and State averages in additional detail for use by State agencies and industry for accident prevention purposes. Accident cause studies will be expanded from two to four industries. The inter-industry economics program, developed for the National Security Resources Board, will be maintained for economic and mobilization planning and for development of improved techniques.

2. *Advisory services to United States delegations to United Nations and other international organizations.*—The Bureau assists departmental representatives who participate in the work of international organizations or in the development of policy positions of this Government. Its officials occasionally serve as delegates or advisers to United States representatives to meetings of the International Labor Office.

3. *Executive direction and management services.*—Administrative and technical direction of the Bureau includes policy and program planning, over-all direction of activities, and the staff functions necessary to program management.

PROGRAM AND PERFORMANCE

The Consumers' Price Index for Moderate-Income Families in Large Cities, formerly known as the Cost-of-Living Index, measures average changes in retail prices of selected goods, rents, and services weighted by quantities

BUREAU OF LABOR STATISTICS—Continued

Revision of Consumers' Price Index, Bureau of Labor Statistics,
Department of Labor—Continued

bought in 1934-36 by families of wage earners and moderate-income workers in 34 large cities. A revision of the index is being undertaken based upon current patterns of consumer expenditures. It is intended to modernize the index to meet demands for its use in present-day domestic economic and industrial planning. Work was begun early in 1950 and completion is anticipated in 1952. During 1950 the Bureau will develop policy decisions and basic techniques, collect price data to be used in selecting items for inclusion in the revised Consumers' Price Index, will tabulate and analyze these data, conduct dwelling-unit surveys in a majority of the cities to be covered, and complete a pilot study of consumer expenditures.

In 1951, policy planning and analysis will continue, the dwelling-unit surveys and correction of the bias in the rent index will be completed, and the housing component of the revised index will be determined. In addition, the Bureau will conduct the field collection and begin tabulation of the consumer-expenditure surveys in 49 cities, and continue the collection, tabulation, and analysis of prices.

【REVISION OF CONSUMERS' PRICE INDEX】

Revision of consumers' price index: For expenses necessary [, fiscal year 1950,] to enable the Bureau of Labor Statistics to revise the Consumers' Price Index, including personal services in the District of Columbia; temporary employees at rates to be fixed by the Secretary of Labor without regard to the civil service and classification laws and the Federal Employees Pay Act of 1945, as amended; [travel expenses, including expenses of attendance at meetings concerned with such revision when specifically authorized by the Secretary of Labor; printing and binding;] services as authorized by section 15 of the Act of August 2, 1946 (5 U. S. C. 55a); and a health service program as authorized by law (5 U. S. C. 150); [\$1,126,000, of which \$126,000 shall be derived by transfer from the appropriation for salaries and expenses of the Bureau of Labor Statistics for the fiscal year 1950] \$2,123,000. (29 U. S. C. 2; Third Deficiency Appropriation Act, 1949)

PROGRAM AND PERFORMANCE

Technical services of the Bureau are frequently utilized by other Government agencies in accordance with the Economy Act of 1932. To this account are deposited all funds received in advance from other Federal agencies in payment for such services. During 1950 the Bureau will prepare occupational briefs for the Veterans Administration; tabulate employee earnings to determine employer liability and conduct special studies in connection with Walsh-Healey wage determinations for the Wage and Hour Division; conduct an interindustry economic relationship study for the National Security Resources Board; make cost-of-living studies of cities adjacent to Atomic Energy Commission installations; code and tabulate questionnaires on scientific and technical personnel and make a special study of mobility of scientists for the Office of Naval Research; collect and tabulate prices on specified food and textile items for the Bureau of Agricultural Economics; conduct special studies of productivity and prepare and maintain labor information handbooks on certain western European countries for the Economic Cooperation Administration; and prepare a report recommending methodology and techniques to be used in measuring territorial cost of living differentials for the Civil Service Commission.

PROGRAM AND PERFORMANCE

Upon request, the Bureau renders special services to private organizations. This account was established for deposit of funds received in advance from non-Federal sources to finance special statistical studies requested of the Bureau. During 1950 the Bureau will collect and analyze department store inventory prices for the American Retail Federation, and prepare a monthly tabulation of employment data from Ohio metropolitan areas for Ohio State University.

PROGRAM AND PERFORMANCE

The Women's Bureau investigates and reports on subjects which are pertinent to its basic responsibility: the formulation and promotion of sound labor standards and policies designed to promote the welfare of working women. Women—some 18,000,000—constitute almost one-third of the labor force of the United States.

1. *Investigating and reporting on conditions affecting women workers.*—The major resources of the Bureau are devoted to analysis and publication of basic economic information affecting women workers. The research program involves integration and comparative analysis of data collected by other Federal and State agencies; by management, labor, and other organizations; and by special surveys. Through this procedure, duplicate collection of data is avoided and comprehensive reports on trends in women's employment, employment opportunities, and working conditions can be made available through the limited resources of the Bureau.

2. *Promotion of standards and policies to advance the welfare of women workers.*—The Bureau works with and through State labor officials and representatives of employer, trade union, civic, women's and other groups toward the development and maintenance of sound standards and policies designed to protect working women. Through its staff and publications, information is disseminated concerning the Bureau's program respecting standards and objectives. The 1951 budget provides a small field staff to work with cooperating officials and groups.

3. *Advisory services on legislation affecting the welfare of women workers.*—On request, the Bureau furnishes limited technical services respecting the development and administration of laws and related administrative techniques which affect women workers. The Bureau sponsors an annual conference of State minimum-wage administrators to provide a forum for interchange of information in this field.

4. *Services concerned with the welfare of women workers in the international field.*—The Bureau participates in the preparation of statements of position and reports of the United States Government on matters relating to the United Nations and International Labor Organization which affect women workers. On occasion, the Bureau also supplies technical assistance to United States delegations to these organizations.

5. *Executive direction and management services.*—The Director and her assistants provide general direction and policy guidance for the Bureau's programs and the necessary housekeeping services.

PROGRAM AND PERFORMANCE

The Division administers the Fair Labor Standards Act, popularly known as the "Wage and Hour Law," and

the Walsh-Healey Public Contracts Act to obtain compliance with minimum labor standards respecting wages, hours, and other employment conditions in industries engaged in interstate commerce or the production of goods for commerce and in establishments furnishing goods to the Federal Government. Alleviation of labor conditions detrimental to the maintenance of the minimum standard of living necessary for health, efficiency, and general well-being of workers; the elimination of oppressive child labor; and the reduction of unfair competition among business establishments, of unfair marketing practices, and of labor disputes, are the objectives of these laws. The standards established by the recent amendments to the Fair Labor Standards Act include, with certain exemptions, a minimum wage of 75 cents; an overtime rate of one and a half times the regular rate of pay for work in excess of 8 hours a day and 40 hours a week; a direct prohibition of employment of children under 16 years of age; and the regulation of employment in certain other respects. The Public Contracts Act provides standards of employment in establishments manufacturing or furnishing goods in fulfillment of a Federal contract. The employment conditions regulated by the statute are minimum wages, which must conform to rates found by the Secretary of Labor to be prevailing for such work, hours in excess of 8 per day or 40 per week, and the safety of the work place as well as the minimum age of employees. Because of the effects of the 1949 amendments to the "Wage and Hour Law," a supplemental appropriation for 1950 and increased appropriations for 1951 are proposed to cover the additional work.

1. *Enforcement and compliance.*—To obtain an optimum degree of compliance, the Division: (a) utilizes informational media directed to an understanding by workers and employers of their rights and responsibilities under the law in order to minimize unintentional violations; and (b) inspects employing establishments in order to assist employers in meeting legal requirements, prevent continuance of conditions in violation of the law, and assist workers in recovering wages unlawfully withheld.

Exclusive of agricultural employers subject only to the child-labor provisions, there are an estimated 632,000 establishments whose employees are protected by the law. To utilize limited inspectional resources effectively, the agency formulates each year a national program of inspections by industry groups and geographical areas. Included in the program are investigations of valid complaints from employees and employers. The program is carried out by local investigators. The inspection program essentially is a means of promoting voluntary compliance with the law as well as disclosing willful violations. When court action appears warranted to achieve enforcement, however, the investigation may lead to enjoinder of continuing violations, suits in behalf of employees to recover back wages unlawfully withheld, prosecution under the criminal provisions of the statutes, or a combination of actions.

During 1949, of 32,013 establishments inspected, 53 percent were found to have violated overtime provisions, 5 percent the 40-cent minimum-wage requirement, and 6 percent the child-labor provisions. Back wages amounting to \$12,185,000 were found to be due employees. The volume of inspections proposed for 1951 exceeds 60,000. Major emphasis will be on obtaining compliance with the new minimum wage. A substantial portion of inspections, however, will be directed to industries and areas in which high rates of overtime violations have prevailed. Enforcement of the direct prohibition of child labor in

industry and agriculture will share in the inspection program.

2. *Wage determinations, regulations, and interpretations.*—Prevailing wage determinations under the Walsh-Healey Act are to be made during 1950 and 1951 for over 60 industries. Expanded activities for revision of regulations and interpretative bulletins are to be undertaken in 1950 and 1951 owing to the recent amendments of the Fair Labor Standards Act.

The establishment of wage standards applicable in Puerto Rico and the Virgin Islands is subject to determinations of rates which the economy of those islands can support but which will not result in competitive advantages to island industries over those on the mainland. Puerto Rican industries are to be reviewed by six industry committees during 1950 and 1951, as a basis for revision of legal minimum-wage rates.

3. *Preparation of regulations and issuance of permits for subminimum wages.*—On the basis of studies and experience, the Division formulates appropriate regulations governing the approval of subminimum wages for learners, apprentices, messengers, and handicapped workers. Under these regulations, employer petitions for industry regulations or exemptions or applications for subminimum certifications are acted upon after investigation, frequently including a show-cause hearing. The Administrator's advisory committee on sheltered workshops cooperates in determining policies and procedures for certifying such nonprofit rehabilitation workshops as eligible to pay wages below 75 cents an hour.

Because of the new higher minimum wage, regulations governing learner exemptions or use of subminimum rates will be revised. During 1950 and 1951, a large increase in industry regulation petitions and applications for exemptions will have to be processed in order to prevent curtailment of employment opportunities for new, untrained, or handicapped workers.

4. *Legislative analysis and research.*—The Administrator reports to the Congress each year on activities of the Division, and recommends such further legislation as may be desirable. During 1950 and 1951, administrative studies will be conducted to appraise the economic effects of the 75-cent-minimum wage; to determine on factual bases the validity of specific claims that the higher minimum wage resulted in closing of plants and curtailment of employment, and to indicate the problems involving coverage and exemption provisions which should be brought to the attention of the Congress. The proposed survey of the economic effects of the 75-cent-minimum wage, to be carried out over a 3-year period, will be carried out jointly with the Bureau of Labor Statistics, which will share responsibility for technical soundness of the study and report.

5. *Administrative direction and management services.*—This activity includes, besides planning, policy determination and administrative direction, the management services necessary to program administration.

APPROPRIATION TEXT

Salaries and expenses; For expenses necessary for performing the duties imposed by the Fair Labor Standards Act of 1938, as amended, and the Act to provide conditions for the purchase of supplies and the making of contracts by the United States, approved June 30, 1936 (41 U. S. C. 38), including personal services in the District of Columbia; reimbursement to State, Federal, and local agencies and their employees for inspection services rendered; and expenses of attendance of cooperating officials and consultants at conferences concerned with the work of the Wage and Hour Division when called by the Division with the written approval of the Secretary; **[\$5,252,000]** \$10,587,000. (29 U. S. C. 201-219, 251-262; 41 U. S. C. 35-45; Act of Oct. 29, 1949, Public Law 393; Labor-Federal Security Appropriation Act, 1950; Supplemental Appropriation Act, 1950; Second Supplemental Appropriation Act, 1950.)

Annual definite appropriation:

Appropriated 1950, * **\$5,339,300** Estimate 1951, **\$10,587,000**
 * Includes \$53,300 appropriated in the Supplemental Appropriation Act, 1950, and \$84,000 appropriated in the Second Supplemental Appropriation Act, 1950.

GENERAL PROVISIONS

SEC. 102. Appropriations under this title available for salaries and expenses shall be available, in accordance with regulations prescribed by the Secretary, for [travel expenses and, when specifically authorized by the Secretary, for] expenses of attendance at meetings concerned with the function or activity for which any such appropriation is made.

SEC. 103. Appropriations under this title available for salaries and expenses shall be available for stenographic reporting services as authorized by section 15 of the Act of August 2, 1946 (5 U. S. C. 55a).

SEC. 104. Appropriations under this title available for salaries and expenses shall be available for payment of tort claims pursuant to [section 403 of the Federal Tort Claims Act] law (28 U. S. C. 2672).

SEC. 105. Appropriations under this title available for salaries and expenses shall be available for printing and binding.

SEC. 106. The Secretary, if he finds it necessary for the practical and efficient operation of the Department, shall have the authority to transfer funds from any appropriation herein made available for salaries and expenses to any other such appropriation, but no appropriation shall be either increased or decreased more than 5 per centum by such transfers: *Provided*, That any such transfers shall not be used for the purpose of creating new functions within the Department. (Labor-Federal Security Appropriation Act, 1950.)

Total, Department of Labor, general and special appropriations:
 Appropriated 1950, **\$51,636,400** Estimate 1951, **\$220,014,700**

	Number	Gross cost	Number	Allowance (estimated)				
Office of the Secretary: Salaries and expenses.	2	\$2,800	2	200	\$2,600	5	-----	In the transaction of official business for the Department of Labor, used by the Secretary, Under Secretary, Assistant Secretaries, bureau chiefs, and other officials of the Department.

PROPOSED LEGISLATION

Industrial safety program.—This budget proposes enactment of legislation which would authorize a program for grants to States for the promotion of safe working conditions in industry. The program would be carried out through the State agencies which currently administer labor laws affecting safe working conditions. Appropriations for 1951 totaling \$6,000,000 are proposed to provide for the first year's operation. The estimates are predicated on a variable grant formula which would require matching of Federal funds by the States on a 50-percent average basis and assume somewhat less than full-year cost.

To extend and improve the unemployment insurance program.—It is proposed that existing laws providing for

the Federal-State system of unemployment compensation and employment service programs be amended to authorize Federal reinsurance of State unemployment trust funds in order to assure the financial solvency of these reserves; provide for extension of insurance coverage to employees of small firms; adjust the conformity standards respecting the minimum amount and duration of benefits, eligibility and disqualifications; and make the system applicable to employees of the Federal Government. Because action by the State legislatures is not expected before 1952, full annual cost of the expanded program would not occur in 1951. Supplemental estimates for this proposed legislation for 1951 total \$26,025,000.

INTRODUCTORY STATEMENT

The 1951 budget for the Post Office Department reflects a marked departure from previous budgets and the usual appropriation procedure. Heretofore some 58 appropriations for the Post Office Department including the postal field service, hereinafter referred to as the "postal service," have been made from postal revenues augmented by an authorization to withdraw additional money from the general fund of the Treasury for any deficiency in postal revenues. The 1951 budget provides for 4 appropriations in place of the present 58. The source of these appropriations is the aggregate of the postal revenues, plus an amount not in excess of that to be fixed by law, from the general fund of the Treasury. These changes are designed to provide greater latitude in the expenditure of funds to meet changing demands and to strengthen control over financial planning by limiting the amount to be withdrawn from the general fund of the Treasury.

In addition to the deficiency in postal revenues there are certain other financial transactions relating to postal operations which affect the general fund of the Treasury. These are (1) funds flowing into and out of the general fund as a result of procurement for the postal service by the General Services Administration; (2) advances to the postal service for services performed by it for other Government agencies; and (3) adjustments to the general fund for balances in grants for the deficiency in postal revenues for prior fiscal years. These transactions are shown in the statement of "Analysis of net changes in account with the general fund of the United States Treasury."

Because the information is basic to postal service budget estimates, an additional schedule is presented showing the volume of postal business in pieces and transactions, the total revenue produced by each service, and the revenue per piece or transaction.

Analysis of net changes in account with the general fund of the U. S. Treasury on account of all years

NOTE.—Appropriation or estimate for fiscal years 1949 and 1950 are shown for comparative purposes. Legislation is proposed to increase postal revenue in 1951 which would reduce the appropriation from the general fund of the Treasury for the postal deficiency. (See the statement on proposed legislation at the end of this chapter.)

PROGRAM AND PERFORMANCE

This account provides for all expenses of the postal service. It is an appropriation of total postal revenues as an indefinite amount plus a definite amount from the general fund of the Treasury equal to the estimated deficiency in postal revenues. In 1951, withdrawals from the Treasury will be limited to this appropriation from the general fund. Expenses of the postal service will be controlled by four appropriations fixing maximum amounts for specific purposes. The total of these appropriations equals the sum of the appropriation from the general fund and the estimated postal revenues.

The principal work-load measurement, as a basis for estimating the revenues and expenses of the postal service, is the volume of postal business represented by pieces of mail and special service transactions. A summary

statement relating revenues and expenses to the volume of business for the budget year and immediate prior years is presented in the following tabulation:

[In millions of dollars]

Postal Fund, Post Office Department—Continued

Mail volume and postal expenditures.—The fiscal years 1947, 1948, and 1949 showed large increases in postal volume. These increases reflected the rising trend of business activity and the transfer of a large part of parcel shipments to the postal service from railway express as a result of increased express rates. The increases in postal volume forecast for 1950 and 1951 reflect a continuation of good business conditions, but it is anticipated that the movement from express to parcel post has been completed under existing rates.

Postal expenditures are expected to increase in 1950 and 1951, principally as a result of recently enacted pay legislation. Additional amounts have been included in these estimates to provide for the cost of these pay acts. The estimates provide for operations at the higher level of postal volume and, in addition, include provision for additional supplies, equipment, and facilities which should contribute to a more efficient operation, subject to the limitations of available space which continues to be a pressing problem.

Deficiency in postal revenue.—The revised estimate for postal revenue for 1950 shows an anticipated increase of \$68,000,000 over 1949. This increase is attributable to the annualization of higher postal rates, provided for by the act of July 3, 1949 (Public Law 900), which were in effect for only 6 months of fiscal year 1949. The estimated \$1,640,000,000 of postal revenue will be insufficient to provide for total estimated expenditures for 1950. To finance this deficiency, an appropriation of \$543,462,799 will be required from the general fund of the Treasury.

An estimated increase of \$41,000,000 in postal revenue in 1951 over 1950 is expected to result entirely from the anticipated increase in volume of postal business. For that year, the estimated deficiency in postal revenue will require an appropriation of \$554,607,000 from the general fund of the Treasury.

About \$160,000,000 of the annual deficiency in postal revenue represents service costs, such as penalty mail and subsidies to air carriers, not properly chargeable to service furnished regular postal patrons. The remainder of these annual withdrawals from the Treasury represent subsidies to regular users of the mails and other postal services. To balance service charges with estimated costs and to provide for pending contingencies postal rates will need to be increased by something in excess of \$400,000,000. Legislation is being proposed to increase postal rates sufficiently to produce this amount of new revenue.

Management program.—Under the provisions of Reorganization Plan No. 3 of 1949, a Deputy Postmaster General has been appointed to handle the general management of the Department, an advisory board is being selected to assist in policy determinations, and the first steps in the reorganization of the Department by the Postmaster General for elimination of various legal restrictions pertaining to bureaus and officials of the Post Office Department have been taken. Under authority of the act of August 16, 1949 (Public Law 231), a research and development program was authorized, and a staff is being recruited. A number of studies are now being made in the service; and because many of them are extensive, results are not likely to materialize for some time. The application of portable conveyors to mail handling in large post offices and railway post-office terminals; development of standard containers for mail handling which can be carried directly from post office to post office in

mail cars; loading methods, utilization and control of returning movements of mail cars to get maximum value from railway transportation costs; and development of the application of standard practices in vehicle maintenance and operation, are examples of management problems for which the postal service is seeking solutions. Several mechanical mail-sorting machines designed to improve working conditions and expedite the handling of letter mail have been installed at one post office.

The provision of services at extremely low rates has created public demand for postal services beyond the efficient operational capacity of many available facilities. This especially applies to the handling of parcel post, magazines, and advertising mail. It is a problem that directly affects the operating efficiency of the employees and is one for which an early solution must be forthcoming.

APPROPRIATION TEXT

For administration and operation of the Post Office Department and the postal service, there is hereby appropriated the aggregate amount of postal revenues for the fiscal year ending June 30, 1951, as authorized by law (5 U. S. C. 880; 39 U. S. C. 786), together with an amount (not to exceed \$554,607,000) from any money in the Treasury not otherwise appropriated, equal to the difference between such revenues and the total of the appropriations hereinafter specified (which latter amount may be advanced to the Post Office Department upon requisition of the Postmaster General), for the following purposes, namely:

PROGRAM AND PERFORMANCE

General administration of the postal service, including relevant staff functions, is provided for under this appropriation for 1951. The comparative 1950 estimate includes a supplemental in the amount of \$419,983 allocated to several of the following activities:

1. *Coordination and control*—(a) *Executive direction and staff services*.—This activity includes the over-all direction of the postal service, and related staff services provided by the Advisory Board, the Office of Budget and Planning (including Research and Development), the departmental personnel office, and the Office of the Solicitor. The increases for this item in 1950 and 1951 over actual obligations for 1949 reflect the establishment of an Advisory Board and the Office of Deputy Postmaster General under Reorganization Plan No. 3 of 1949, and a research and development program as authorized by Public Law 231, approved August 16, 1949. They also reflect the transfer of the research and exploration portion of funds earmarked for the development, manufacture, and purchase of modern mechanical postal devices from a field appropriation.

(b) *Financial administration and accounting*.—The central staff of the Department supervises all financial transactions of the postal service, such as the distribution and sale of stamps, postal savings, the money-order and postal-note systems, and other special financial services; it maintains control records for appropriations, obligations, revenues, and expenditures; it administers the cost ascertainment system, the classification of mail matter, the second-class mailing privilege, the compilation of financial, accounting, and statistical reports for the postal service, the supervision and examination of records implementing the personnel retirement program, and the examination of postmasters' accounts. About \$18 billion in financial transactions, including receipts and payments of all types, flow through the postal service annually.

(c) *Inspection service*.—Serving as a staff arm of the Postmaster General, the inspection service makes periodic and special inspections of post offices, and performs various other services as directed. Through the inspection service the Postmaster General and his staff are furnished with information from which to determine the state of the efficiency and adequacy of the postal service, and are assured that postal funds and the mails are being properly protected. The inspection service makes investigations of complaints, claims, robberies, and depredations, and when requested by postal officials, makes management surveys and special investigations of any other matters pertaining to the postal service.

The work load of this service continues to increase. To meet this increase and to avoid increasing the staff above the presently authorized strength, the service has adopted and proposes to extend the use of simplified work procedures. The increase in obligations in 1950 and 1951 over those for 1949 will provide for raising the service to authorized strength, automatic promotions, and the increased per diem rate of travel under provisions of the Travel Expense Act of 1949 (Public Law 92).

2. *Direction of postal operations*—(a) *Mail services*.—This activity provides for the general direction of postal operations at 41,618 post offices, including the collection, dispatch, delivery, and local transportation of mails. It involves budgetary authorizations to post offices covering employment of more than 460,000 employees. Thousands of changes and requests for extensions in city and rural delivery services, to meet current local needs, are reviewed and authorized annually. Housing developments, especially in suburban areas, require continuous expansion of services.

(b) *Transportation of mails*.—This activity provides for the general administration of all matters relating to surface and air transportation of domestic and international mails, including negotiations of postal conventions and agreements with foreign countries, and administration of international postal services. It involves general supervision of an average of 34,600 railway postal clerks in handling mails in railway and highway post offices and terminals; approval of surface and air transportation contracts in continental United States and Territorial possessions; and assisting in the protection of the postal interests in transportation rate actions before the Civil Aeronautics Board and the Interstate Commerce Commission. The estimate for 1951 reflects a decrease in work load in connection with the railway mail pay case pending before the Interstate Commerce Commission.

(c) *General services*.—This activity provides for general administration over the maintenance of Government-owned post office buildings and the procurement of rented quarters; the procurement and maintenance of Government-owned motor vehicles; the negotiations in connection with rented motor vehicles and pneumatic-tube services; the manufacture and repair of mail bags and locks; the procurement, inspection, and distribution of supplies and equipment; the management of traffic involved in transportation of equipment, materials, and supplies; and the production and distribution of post route maps. It also provides for engineering services in the use of equipment and space. The estimate for 1951 includes a small increase for personal services.

APPROPRIATION TEXT
GENERAL ADMINISTRATION

For expenses necessary for general administration of the postal service, operation of the inspection service, and the conduct of a research and development program, including personal services in the District of Columbia and elsewhere; printing and binding; services as authorized by section 15 of the Act of August 2, 1946 (5 U. S. C. 55a); a health service program as authorized by law; \$250,000 to be available exclusively for procurement by contract of things and services related to design, development, and construction of equipment used in postal operations, and for contracts for management studies; rewards for information and services concerning violations of postal laws and regulations, current and prior fiscal years, in accordance with regulations of the Postmaster General in effect at the time the services are rendered or information furnished; and expenses of delegates designated by the Postmaster General to attend meetings and conventions for the purpose of making postal arrangements with foreign governments pursuant to law; \$16,172,000: Provided, That expenses of delegates provided for herein, and not to exceed \$20,000 for rewards as provided for herein, shall be paid in the discretion of the Postmaster General and accounted for solely on his certificate. (5 U. S. C. 22, 22a, 116a, 150, 361, 363, 364, 364a, 366, 369, 372, 374, 388; 31 U. S. C. 45; Treasury and Post Office Departments Appropriation Act, 1950.)

Estimate 1951, * \$16,172,000

* Estimate is for activities previously carried under the appropriations as follows:

"Salaries, Office of the Postmaster General"	\$498,600
"Salaries, Office of Budget and Administrative Planning"	136,400
"Salaries, Office of the First Assistant Postmaster General"	1,372,200
"Salaries, Office of the Second Assistant Postmaster General"	1,268,600
"Salaries, Office of the Third Assistant Postmaster General"	1,568,100
"Salaries, Office of the Fourth Assistant Postmaster General"	968,900
"Salaries, Office of the Solicitor"	318,500
"Salaries, Office of the Chief Inspector"	465,500
"Salaries, Office of the Purchasing Agent"	103,900
"Salaries, Bureau of Accounts"	612,000
"Advisory Board"	20,000
"Research and development program"	151,900
"Contingent expenses"	554,500
"Travel and miscellaneous expenses"	5,000
"Inspectors"	5,033,000
"Miscellaneous expenses, inspection services"	1,291,000
"Clerks, inspection service"	1,407,000
"Rewards"	70,000
"Miscellaneous items, first- and second-class offices"	10,600
"Railroad and messenger service"	4,000
"Foreign mail transportation"	7,905
"Amounts due foreign countries"	6,500
"Foreign air-mail service"	900
"Domestic air-mail service"	20,111
"Stamps and stamped paper"	4,000
"Supplies and equipment"	251,500
"Rent, fuel, and utility services"	500
"Vehicle service"	4,500
"Transportation of equipment and supplies"	12,353
"Supplies, public buildings"	2,060
"Equipment, public buildings"	1,971

The amounts obligated in 1949 and 1950 are shown in the schedule as comparative transfers.

PROGRAM AND PERFORMANCE

Authority is provided under this appropriation for all expenses necessary for the supervision and operation of post offices, including the collection, dispatch, local transportation and delivery of mail, and performance of special services, handling mail in transit; the leasing, and the operation and care of buildings and grounds used by the postal field service; and the procurement, manufacture, and repair of mail bags and locks. The comparative estimate for 1950 includes estimated supplementals totaling \$68,645,455 but excludes estimated savings of approximately \$5,836,000 not transferred from the present accounts.

1. *Administration of post-office operations.*—Local administration of post offices is the responsibility of postmasters and assistant postmasters whose salaries are the principal part of the cost of this activity. Every post office, pursuant to law, must have a postmaster or acting postmaster. Further, all first- and second-class post offices may have assistant postmasters. However, the Department has exercised this latter authority on the basis of a strict interpretation of need subject to availability of funds.

The salaries of postmasters and assistant postmasters are determined with reference to postal receipts of their respective post offices and are adjusted each fiscal year to reflect, where necessary, any change in such postal receipts of the calendar year just preceding. The increase for 1951 reflects estimated adjustments effective in that year.

CALENDAR YEAR POSTAL RECEIPTS AND POST OFFICES BY CLASSES

	1949 actual	1950 estimate	1951 estimate
Postal receipts (preceding calendar year) in millions ¹	\$1,282	\$1,414	\$1,565
Number of post offices on June 30:			
First class	2,323	2,520	2,711
Second class	5,640	5,791	5,936
Third class	12,957	12,802	12,615
Fourth class	20,687	20,491	20,356
Total post offices on June 30	41,607	41,604	41,618

¹ Gross postal receipts on which salaries of postmasters are determined.

Post offices of the fourth class are operated solely by the respective postmasters except under unusual conditions of short duration when clerical assistance is provided. Many have rural carriers operating from their post offices, but generally their administrative responsibilities are very light. However, at post offices of the third, second, and first class, postmasters have a progressively greater responsibility for administering the service and supervising personnel employed by their respective post offices. On June 30, 1949, there were assistant postmasters in nearly all of the first-class and about 20 percent of the second-class post offices.

AVERAGE EMPLOYMENT AT FIRST- AND SECOND-CLASS POST OFFICES

Year	Post masters	Assistant post-masters	Average number of personnel ¹	Administrative ratio
1947.....	8, 145	3, 462	309, 446	1:27
1948.....	7, 954	3, 415	322, 589	1:28
1949.....	7, 963	3, 377	349, 008	1:31
1950 estimate.....	8, 311	3, 571	343, 579	1:29
1951 estimate.....	8, 647	3, 611	345, 849	1:28

¹ Excludes rural carriers.

2. *Mail handling and window services at post offices.*—This activity includes all personnel employed in the internal operations of first-, second-, and third-class post offices for the handling of incoming and outgoing mail, window services to the public, and the performance of administrative services for post offices, including financial transactions and record work. Further, it includes the cost of printing, supplies, and equipment used in the operation of post offices. Except for administrative work, the total mail and special-service transactions handled by the postal service represent the work load of this activity.

An increase of about 1.3 percent in volume of postal business is expected in 1950 over 1949, and it is estimated that a 2.5-percent increase will occur in 1951 over 1950. Increasing efficiency is reflected by some improvement in the hourly production rate. However, the cost per productive man-hour has steadily increased.

COMPARISON OF AVERAGE EMPLOYMENT, PRODUCTIVE MAN-HOURS, AND WORK LOAD

Year	Average paid employment	Total productive man-hours (in thousands)	Work load (in millions)	Average units per man-hour	Average salary per productive man-hour
1947.....	186, 403	348, 060	38, 224. 3	110	\$1. 4635
1948.....	192, 678	359, 702	41, 147. 7	114	1. 4824
1949.....	206, 465	386, 533	44, 529. 2	115	1. 7311
1950 estimate.....	201, 777	376, 245	44, 892. 7	119	1. 7580
1951 estimate.....	203, 138	378, 780	46, 033. 3	122	1. 7794

¹ Excludes recently enacted pay increases.

3. *Mail collection and delivery—(a) Collection, delivery, and local transportation.*—This activity includes payments for city delivery services, mail and messenger service, truck fleet operation and maintenance, pneumatic-tube service, and the expense of supplies, services, and equipment necessary for these operations. Although there is no general work-load factor which is equally applicable to all the delivery services and local transportation, the volume of mail is the best single factor for measurement of need.

COMPARISON OF AVERAGE EMPLOYMENT, PRODUCTIVE MAN-HOURS, AND WORK LOAD

Year	Average paid employment	Total productive man-hours (in thousands)	Work load (in millions) ¹	Average units per man-hour	Average salary per productive man-hour
1947.....	111, 660	208, 830	37, 743. 1	181	\$1. 4615
1948.....	118, 409	221, 395	40, 624. 7	183	1. 4800
1949.....	130, 856	245, 198	43, 757. 3	178	1. 6976
1950 estimate.....	130, 122	242, 773	44, 327. 8	183	1. 7401
1951 estimate.....	130, 606	243, 681	45, 452. 8	187	1. 7465

¹ Work load consists of pieces of mail and the number of registered, insured, and collect-on-delivery transactions.
² Excludes recently enacted pay increases.

The increase for 1951 is to provide for handling the increased volume of mail and the purchase of additional equipment. The estimate includes \$7,013,000 for the purchase of 2,620 vehicles in 1951, as compared with \$5,631,000 for the purchase of 2,044 vehicles in 1950.

(b) *Special-delivery service.*—This activity includes the cost of special-delivery messenger salaries or fees and their vehicle allowances. About 92 percent of all special-delivery articles are delivered at first-class post offices by regular special-delivery carriers. Since July 1, 1945, regular carriers have been compensated on an annual salary basis and part-time carriers on an hourly basis. In addition, vehicle maintenance allowances are provided at 90 cents per hour. The increase in the estimate for 1951 provides for the projected increase in volume for this class of mail.

COMPARISON OF AVERAGE EMPLOYMENT, PRODUCTIVE MAN-HOURS, AND WORK LOAD

Year	Average paid employment	Total productive man-hours (in thousands)	Number of units delivered (in thousands) ¹	Average units per man-hour
1947.....	5, 171	9, 622	94, 685	9. 8
1948.....	5, 432	10, 112	107, 017	10. 6
1949.....	5, 098	9, 526	108, 096	11. 3
1950 estimate.....	5, 397	10, 061	108, 275	10. 8
1951 estimate.....	5, 402	10, 068	111, 925	11. 1

¹ Excludes units delivered at second-, third-, and fourth-class post offices on a fee basis.

(c) *Rural delivery service.*—The personal services and expenses incident to the collection and delivery of rural mail and performance of certain special services in connection therewith are provided for in this activity. A rural carrier's compensation is based on annual mileage plus years of service. The increase for 1951 is to provide for normal extensions of service.

COMPARISON OF ROUTES, MILES, AND PERFORMANCE

Year	Number of routes	Average miles per route	Average number of families per mile	Annual salary and equipment maintenance cost per route-mile	Annual average cost per family
1947.....	32, 249	44. 96	5. 5	\$89. 31	\$16. 14
1948.....	32, 412	45. 19	5. 5	90. 20	16. 31
1949.....	32, 559	45. 48	5. 5	103. 19	18. 65
1950 estimate.....	32, 519	45. 80	5. 6	102. 93	18. 38
1951 estimate.....	32, 469	46. 52	5. 7	102. 67	18. 01

¹ Excludes recently enacted pay increases.

4. *Mail handling in transit.*—Handling of mail by postal employees while in transit between post offices by railroad, electric car, and highway post offices is provided for by this activity. The increase in the 1951 estimate will provide additional personal services to care for the projected increase in the volume of nonlocal mail.

Postal Operations, Post Office Department—Continued

COMPARISON OF AVERAGE EMPLOYMENT, PRODUCTIVE MAN-HOURS, AND CUBIC FEET OF NONLOCAL MAIL

Year	Average paid employment	Total productive man-hours (in thousands)	Cubic feet of nonlocal mail (in thousands)	Average cubic feet per man-hour	Average salary per productive man-hour
1947	31,212	58,384	607,494	10.41	\$1.8020
1948	32,070	59,902	721,295	12.04	1.7740
1949	33,977	63,611	1,780,452	12.27	2.0047
1950 estimate	34,526	64,325	808,020	12.56	2.0050
1951 estimate	35,126	65,444	828,843	12.66	2.0017

¹ Estimate.
² Excludes recently enacted pay increases.

5. *General services—(a) Operation and care of buildings.*—This activity covers the operation of 3,262 Government-owned public buildings and 22,336 leased and rented buildings used for post-office operations in the field service. Many of the Government-owned buildings operated by post-office personnel are also occupied by Federal courts and other agencies of the Government. These buildings are located in each of the 48 States and in Alaska, Hawaii, Puerto Rico, and the Virgin Islands. The activity includes the operation, maintenance, and minor repairs of buildings, elevators, and conveyors and the procurement of furniture and equipment. The increase in the estimate for 1951 will provide for badly needed space for post offices, railway, and airport post-office terminals; for additional supplies and equipment for post-office buildings; and for additional custodial employees.

DATA RELATING TO GOVERNMENT-OWNED BUILDINGS

Year	Number of Government-owned buildings	Number of cubic feet (in millions)	Average salary payments per cubic foot (cents)	Average salary payments per building
1947	3,262	1,285	3.42	\$13,482
1948	3,262	1,285	3.43	13,493
1949	3,262	1,285	4.14	16,300
1950 estimate	3,262	1,285	4.11	16,186
1951 estimate	3,262	1,285	4.16	16,401

¹ Excludes recently enacted pay increases.

No significant work-load data concerning space or the number of custodial employees in rented or leased quarters are available. However, the size of this operation is indicated by the following:

NUMBER OF LEASED AND RENTED POST-OFFICE QUARTERS, INCLUDING GARAGES ¹

Year	Number	Rent	Average rent per unit
1947	20,932	\$14,423,500	\$689
1948	20,610	15,454,056	750
1949	20,000	16,456,289	784
1950 estimate	21,793	19,431,733	892
1951 estimate	22,336	21,415,039	959

¹ Excludes allowances and space occupied by fourth-class post offices, terminal space and the cost thereof.

(b) *Acquisition and repair of mail bags and locks.*—This activity includes the acquisition and repair of mail bags and the requisite locks needed for transportation of the mail. Mail bags are either purchased in finished form or manufactured in the Department's equipment shop. All locks are manufactured in the equipment shop.

UNITS AND OBLIGATIONS FOR MAIL BAGS AND LOCKS

Year	Procurement program			Manufacturing program		
	Number of bags	Obligations	Average per unit	Number of units ¹	Obligations	Average per unit
1947	1,439,036	\$543,586	\$0.3777	5,860,315	\$2,497,769	\$0.43
1948	2,118,755	3,768,221	1.7785	7,058,445	3,329,791	.47
1949	9,783,464	22,072,760	2.2561	7,210,765	3,906,617	.54
1950 estimate	4,329,800	9,434,490	2.1790	8,249,800	3,661,729	.41
1951 estimate	100,000	26,500	.2650	9,250,000	3,654,719	.40

¹ Does not include certain small items such as cord fasteners.
² Excludes recently enacted pay increases.

Due to the depletion of mail bags during the war and the subsequent rapid expansion of postal business, the Department adopted a purchase program which is now drawing to a close. In 1951, 100,000 lightweight mesh bags must be provided to care for the estimated volume of air mail.

A readjustment of programs resulting from a reduction in the demand of the postal service for foreign mail bags has made possible curtailment of the purchase of these bags, and a saving in the amount of \$5,816,000 is reported for 1950.

PRODUCTION DATA RELATING TO MAIL BAGS AND LOCKS

Year	Total productive man-hours	Mail bags		Locks manufactured	Total units	Units per productive man-hour
		Manufactured	Repaired			
1947	879,641	702,237	4,816,308	341,770	5,860,315	8.345

APPROPRIATION TEXT

POSTAL OPERATIONS

For expenses necessary for postal operations, not otherwise provided for, and for other activities conducted by the Post Office Department pursuant to law, including personal services in the District of Columbia and elsewhere; printing and binding; a health service program as authorized by law; \$500,000 to be available exclusively for manufacture and procurement of improved devices for postal operations and other activities; \$7,013,000 to be available exclusively for the purchase of trucks, tractors, and trailers; leasing of space, not exceeding a term of ten years, for the storage and care of vehicles; and repair of vehicles owned by, or under control of, units of the National Guard and departments and agencies of the Federal Government where repairs are made necessary because of utilization of such vehicles in the postal service; \$1,810,921,000. (5 U. S. C. 150; 39 U. S. C. 1-5, 11, 33, 64, 82, 83, 151, 152, 153, 155, 158, 159, 161, 169, 171, 192, 212, 351, 354, 356, 357, 358, 360, 387, 475, 481, 505, 667, 672, 673, 711, 712, 738a, 764, 826; Treasury and Post Office Departments Appropriation Act, 1950.)

Estimate 1951, * \$1,810,921,000

* Estimate is for activities previously carried under the following appropriations:

"Contingent expenses".....	\$2,445,500
"Postmasters".....	110,648,800
"Assistant postmasters".....	16,729,000
"Clerks, first- and second-class offices".....	679,674,300
"Contract station service".....	3,900,000
"Separating mails".....	181,500
"Unusual conditions".....	30,000
"Clerks, third-class offices".....	34,969,000
"Miscellaneous items, first- and second-class offices".....	4,985,900
"Village delivery service".....	179,500
"Carfare and bicycle allowance".....	3,750,000
"City delivery carriers".....	423,323,500
"Special delivery service".....	17,234,000
"Rural delivery service".....	163,884,000
"Railroad and messenger service".....	18,267,000
"Salaries, railway mail service".....	138,877,000
"Travel, railway mail service".....	8,180,000
"Miscellaneous expenses, railway mail service".....	784,000
"Electric car service".....	2,044
"Foreign mail transportation".....	650
"Domestic air mail service".....	121,090
"Stamps and stamped paper".....	11,998,100
"Supplies and equipment".....	13,616,700
"Equipment shops".....	3,827,000
"Rent, fuel, and utility services".....	19,499,500
"Pneumatic tube service".....	806,800
"Vehicle service".....	62,344,500
"Transportation of equipment and supplies".....	1,046,647
"Salaries, custodial service".....	57,612,000
"Supplies, public buildings".....	8,374,940
"Equipment, public buildings".....	3,628,029

The amounts obligated in 1949 and 1950 are shown in the schedule as comparative transfers.

PROGRAM AND PERFORMANCE

Authority is provided under this appropriation for all payments on contracts for transportation of the mails and for expenses, exclusive of personal services, necessary for operation of the Government-owned highway post-office transportation service. The comparative estimates for 1950 include anticipated supplementals in the amount of \$17,676,162. These estimates do not include, however, funds for pending transportation rate increases which, if approved, will increase requirements for 1951 and prior years back to and including 1947.

1. *Domestic transportation of mail.*—(a) *Transportation by powerboat.*—The powerboat service provides for the transportation of mail by boat to Alaska, Hawaii, and Puerto Rico and to post offices located on inland rivers, lakes, and bays of the continental and Territorial United States. This service is contracted and paid for either on a trip-mileage or pound-mile basis, the larger portion being at pound rates. The basis of individual contracts depends upon conditions applying to particular routes. The period of navigation being uncertain on account of ice conditions, the Alaska service is usually paid for on a trip-mileage basis. The service to and from Hawaii is usually contracted for on a pound-mile basis.

DATA RELATING TO TRANSPORTATION BY POWERBOAT ¹

Year	Mail carried at pound rates (to Hawaii and Alaska)			Mail carried at trip-mileage rates		
	Pounds (in thousands)	Payments	Average per pound (cents)	Miles of travel (in thousands)	Payments	Average per mile (cents)
1947.....	30,957	\$919,353	2.97	1,312	\$591,350	45.07
1948.....	29,121	1,476,685	5.07	1,357	764,077	56.31
1949.....	22,467	1,193,588	5.31	1,298	711,584	54.82
1950 estimate.....	32,797	1,659,782	5.06	1,306	852,218	65.25
1951 estimate.....	25,872	1,390,334	5.37	1,359	987,666	72.68

¹ Excludes Detroit River service.

The estimate for 1951 is less than 1950 because of heavy mailings to Hawaii during 1950 as a result of the longshoremen's strike.

(b) *Transportation by star routes.*—The star route service is maintained primarily for post offices not provided mail transportation by railroad or highway post offices and to provide supplemental service for a large number of offices which are not otherwise adequately served. Contracts to provide this service are generally awarded on a 4-year basis to the lowest responsible bidder tendering sufficient guaranties for faithful performance. Where conditions make surface transportation impracticable, service by airplane may be provided under contract. However, it is the Department's policy to use air star routes only where it is advantageous as to cost and/or exceedingly advantageous with respect to speed. The increase in the estimate for 1951 will provide for the establishment of new routes and increases in contract rates resulting primarily from contract readjustments authorized by Congress.

DATA RELATING TO TRANSPORTATION BY STAR ROUTE ¹

Year	Number of routes	Payments	Average per route
1947.....	11,328	\$21,485,705	\$1,897
1948.....	11,356	22,803,725	2,008
1949.....	11,437	27,865,431	2,436
1950 estimate.....	11,658	32,327,100	2,773
1951 estimate.....	11,892	34,565,600	2,907

¹ Although star route service, Alaska, was not combined with general star route service until 1949, for purposes of comparison it has been added in all years prior to 1949.

Transportation of Mails, Post Office Department—Continued

(c) *Transportation by railroad, electric car, and highway post offices.*—This activity includes transportation of mails between post offices by railroad, electric, car, and highway post offices. The increase in the estimate for 1951 will provide for the increased volume of mail and annualization of the cost of highway post offices placed in operation on a part-year basis during 1950.

Cubic-foot miles of nonlocal mail has been used in estimating the expense of railroad and electric car transportation because it measures the amount of service rendered by these carriers. The number of cubic-foot-miles has increased very rapidly since 1947 with the growth in both the number of pieces and size of parcel post following the increase in express rates. The difference between 1947 and 1948 in the average obligations per million cubic-foot-miles is caused by the full-year effect in 1948 of the 25-percent interim rate increase granted the railroads by the Interstate Commerce Commission effective on a part-year basis in 1947.

DATA RELATING TO TRANSPORTATION BY RAILROAD AND ELECTRIC CAR

Year	Cubic-foot miles of nonlocal mail (in millions) ¹	Obligations (in thousands)			Average per million cubic-foot-miles
		Railroad	Electric car	Total	
1947.....	315,755	\$136,905	\$217	\$137,122	\$433.27
1948.....	375,284	189,763	210	189,973	506.21
1949.....	437,387	221,096	272	221,368	506.11
1950 estimate.....	437,784	221,368	285	221,653	506.31
1951 estimate.....	449,070	226,914	292	227,206	505.95

¹ Excludes all air mail and incoming foreign mail.
² Estimated.

The highway post office service was operated on an experimental basis over three routes from 1941 to 1947. In 1949 and 1950, Government-operated highway post office and contract highway post office service have been expanded very rapidly. In some cases, highway post office service replaced discontinued local railroad service, resulting in some savings. In other cases, it has replaced star route service.

DATA RELATING TO HIGHWAY POST OFFICE SERVICE

Year	Government-operated highway post offices			Contract highway post offices		
	Miles	Operation and maintenance expense ¹	Average per mile (cents)	Number of contracts	Contract payments	Average per route
1947.....	411,777	\$31,209	7.58	1	\$24,513	\$24,513
1948.....	390,524	43,325	11.09	1	30,096	30,096
1949.....	2,253,349	231,923	10.29	3	44,569	14,856
1950 estimate.....	7,019,000	722,400	10.29	12	250,500	20,875
1951 estimate.....	8,097,000	833,400	10.29	12	380,000	31,667

¹ Excludes personal services, depreciation of equipment, and administrative expenses.

(d) *Domestic air mail.*—This activity includes the transportation of mail by air lines at rates of pay prescribed by the Civil Aeronautics Board. Rates of pay to carriers have been rising for the past few years and, moreover, estimates for the 5 years shown in the following table are still not firm. Except in a few instances the amounts included as obligations are for temporary rates on air-mail routes approved by the Civil Aeronautics Board pending the establishment of permanent rates.

DATA RELATING TO THE DOMESTIC AIR-MAIL SERVICE

Year	Pieces of mail (in thousands)	Payments to carriers	Average per piece (cents)
Estimate:			
1947.....	772,185	\$28,151,000	3.65
1948.....	796,448	47,434,000	5.96
1949.....	860,819	63,257,536	7.35
1950.....	916,490	64,008,542	6.98
1951.....	939,829	64,390,599	6.85

2. *Foreign transportation of mail.*—(a) *Surface transportation.*—This activity includes the transportation of mail by ocean vessels to foreign countries and to Puerto Rico and the Virgin Islands. The greater portion of this mail is transported by steamship on a pound-rate basis. This service is expected to remain at the same level in 1950 and 1951.

DATA RELATING TO SURFACE TRANSPORTATION TO FOREIGN COUNTRIES

Year	Number of pounds (in thousands)	Payments to carriers	Average per pound (cents)
1947.....	453,510	\$20,227,075	44.60
1948.....	577,646	27,887,138	48.28
1949.....	474,843	113,663,999	128.78
1950 estimate.....	455,310	112,658,445	127.80
1951 estimate.....	455,165	112,658,445	127.81

¹ The cost per pound decreased because the Post Office Department is being reimbursed for a portion of the cost by the Economic Cooperation Administration for gift parcels.

(b) *Amounts due foreign countries.*—This activity provides for the payment of amounts due foreign countries in accordance with international postal conventions or agreements for the transportation and handling by foreign postal services of mails of United States origin. Prior to 1950 the obligations reflected the net difference between the obligations of the United States to foreign countries and their obligations to the United States in connection with the exchange of international mail. Beginning with 1950 the estimated obligations will reflect all amounts due foreign countries from the United States postal service. All amounts due the United States postal service from foreign countries will be credited as revenue.

(c) *Foreign air mail.*—This activity provides for the payment of United States carriers for the transportation of air mail to and from foreign countries. Rates are fixed by the Civil Aeronautics Board for each route either on a pound-mile basis or on an airplane-mile basis, with provision for additional compensation on a pound-mile basis when the weight of mail exceeds specified load-weight limits. Rate increases affecting the 5 years shown in the following table are pending before the Civil Aeronautics Board. Temporary increases have been approved by the Board as an intermediate step. The amounts shown for 1947 through 1950 reflect these temporary determinations and estimated requirements for rate increase pending as of September 1, 1949. The amount shown for 1951 includes funds for existing temporary rates only and will need to be supplemented by an undetermined amount when a final determination is made on pending rate increases.

DATA RELATING TO THE FOREIGN AIR-MAIL SERVICE

Year	Pieces (in thousands)	Payments to carriers	Average per piece (cents)
Estimate:			
1947.....	97,089	\$29,678,000	30.57
1948.....	120,778	45,378,000	37.57

Total obligations.....	6,127,998	6,030,000	6,250,000

PROGRAM AND PERFORMANCE

This appropriation provides for the payment of personal and property damage claims against the Post Office Department; adjustments in the accounts of postmasters and others for losses; indemnities to postal users for losses of registered, insured, and collect-on-delivery mail, both domestic and foreign; and money orders invalid by reason of age. The comparative estimates for 1950 include anticipated supplementals in the amount of \$350,000.

1. *Personal and property damage claims.*—Claims under \$1,000 arising from the damage to persons and property by or through the operation of the Post Office Department are provided for under this activity. The 1951

estimate includes funds for an anticipated increase in the number of claims.

DATA RELATING TO PERSONAL AND PROPERTY DAMAGE CLAIMS

Year	Number of claims paid	Amount	Average amount per claim
1947.....	3,456	\$209,000	\$60
1948.....	3,773	270,000	72
1949.....	5,931	588,125	99
1950 estimate.....	6,049	540,000	89
1951 estimate.....	6,068	600,000	99

2. *Adjustments of losses in the accounts of postmasters and others.*—The Postmaster General is authorized to pay postmasters and others for the amount of public funds and stamp stock lost through burglary, fire, or other unavoidable casualty when the loss does not exceed \$10,000. Funds needed for this purpose depend upon unpredictable events, and, for this reason, the estimates for 1950 and 1951 are held at the level of requirements for 1949.

DATA RELATING TO CLAIMS FOR ADJUSTED LOSSES

Year	Number of claims paid	Amount	Average amount per claim
1947.....	400	\$80,121	\$200
1948.....	339	129,832	383
1949.....	214	75,000	350
1950 estimate.....	214	75,000	350
1951 estimate.....	214	75,000	350

3. *Indemnities for losses of registered, insured, and c. o. d. domestic mail.*—Indemnities are paid to postal users for damage or loss of paid registered, insured, or collect-on-delivery mail and failure on the part of the Post Office to remit collect-on-delivery charges. The increase in the estimate for 1951 reflects an anticipated increase in the number of claims resulting from the higher volume of mail.

DATA RELATING TO INDEMNITIES FOR LOSS OF, OR DAMAGE TO, DOMESTIC MAIL

Year	Registered, insured, and c. o. d. transactions (in thousands)	Claims per million transactions	Total amount paid for claims	Number of claims paid	Average amount per claim
1947.....	294,296	946	\$2,999,274	310,948	\$9.65
1948.....	321,575	810	3,520,073	396,884	8.87
1949.....	349,869	658	4,587,476	532,031	8.62
1950 estimate.....	357,789	670	4,600,000	534,147	8.61
1951 estimate.....	369,559	670	4,760,000	551,499	8.63

4. *Indemnities for losses of registered, insured, and c. o. d. international mail.*—Limited indemnities are paid for the loss or damage of international registered, insured, and c. o. d. mails as provided by convention, treaty, or agreement. It is expected that the number and size of claims will remain the same for 1950 and 1951.

DATA RELATING TO INDEMNITIES FOR LOSS OF, OR DAMAGE TO, INTERNATIONAL MAIL

Year	Number of claims paid	Amount	Average amount per claim
1947.....	1,103	\$11,577	\$10.50
1948.....	2,465	30,000	12.17
1949.....	3,257	41,371	12.70

PROGRAM AND PERFORMANCE

Under the provisions of the act of August 27, 1940 (49 U. S. C. 485b), the Post Office Department was authorized to make advance payments to United States air carriers for transportation of foreign-origin air mail pending the collection of amounts from foreign countries in payment therefor. Pursuant to the appropriation act of 1949 a revolving fund in the amount of \$5,000,000 was established as "Advances to air carriers, revolving fund."

OBLIGATIONS BY ACTIVITIES

[POST OFFICE DEPARTMENT—GENERAL PROVISIONS]

[SEC. 202. Unless otherwise provided, no part of any appropriation in this title for the field service shall be expended on account of

the departmental service: *Provided*, That necessary expenses of officials and employees of the departmental or field services traveling on official business may be paid from the appropriation for the service in connection with which the travel is performed: *Provided further*, That appropriations made in this title for the field service, except such as are exclusively for personal services, shall be available for examination of estimates of appropriations in the field.]

[SEC. 203. Appropriations made in this title for the departmental and field services shall be available for expenditures in connection with accident prevention in the respective services.]

[SEC. 204. Not to exceed 5 per centum of any appropriation for the field service may be transferred, with the approval of the Director of the Bureau of the Budget, to any other appropriation or appropriations under the field service, but no appropriation shall be increased more than 10 per centum by such transfers.]

[SEC. 205. Appropriations in this title available either for personal services or for necessary expenses or for miscellaneous supplies shall be available for printing and binding.]

[SEC. 206. Appropriations in this title for the purchase of fuel and the transportation thereof shall be immediately available.]

[SEC. 207. During the fiscal year 1950 the Postmaster General shall make quarterly reports to the Senate and House Committees on Appropriations, showing for each quarter the amount paid from each appropriation for overtime, the number of employees receiving such overtime, and the number of hours of overtime worked by such employees, together with a statement as to the necessity for such overtime work.]

PROPOSED LEGISLATION

Postal rate legislation.—Legislation is being proposed to increase postal rates by something in excess of \$400,000,000 to become effective by July 1, 1950. Enactment of this legislation will have the effect of reducing the amount budgeted for withdrawal from the general fund of the Treasury for the deficiency in postal revenues by \$395,-

000,000 and in addition will provide a small amount for contingencies. The remaining postal deficiency of \$159,-607,000 represents the estimated cost of services, such as penalty mail and subsidies to air carriers, not properly chargeable to regular postal patrons.

DEPARTMENT OF STATE

PROGRAM AND PERFORMANCE

The Department of State determines foreign policy within the framework of authority delegated by the President; conducts foreign relations in accordance with national policy; and provides measures for the protection of United States citizens and interests abroad. Although the 1951 budget is only slightly higher than that of 1950, program adjustments are anticipated which will permit the general strengthening of present Foreign Service posts, the opening

SALARIES AND EXPENSES—Continued

Salaries and Expenses, Department of State—Continued

of 13 new posts, and some expansion of staff training activities. Among these adjustments are certain State Department activities in support of United States occupation authorities in Germany which will be financed in 1951 from the appropriation "Government in Occupied Areas of Germany" rather than from "Salaries and expenses."

1. *Executive direction and policy formulation.*—The Secretary of State is assisted in the formulation of policy and the direction of the Department's activities by the Under Secretary and Assistant Secretaries. A slight increase is estimated for supporting staff which aids in policy planning with respect to the conduct of foreign affairs and in the development and execution of programs designed to give effect to those policies.

2. *Conduct of diplomatic relations with foreign countries.*—The United States conducts diplomatic relations with other nations through its missions and subordinate offices abroad. Five geographic bureaus are responsible for action in the Department relative to the conduct of diplomatic relations with the countries in their respective areas.

For 1950, provision has been made for a total of 254 Foreign Service posts; the estimates for 1951 provide for 13 additional posts.

Foreign Service personnel abroad conduct negotiations with foreign countries and gather information on all phases of foreign political and economic developments. This information is used by various Government agencies. The economic and trade information gathered is also used by American business and industry as an aid in locating and developing foreign markets.

3. *Consular services; economic and security controls.*—These activities, conducted both within the United States and abroad, consist of issuance and control of passports and visas; documentation of invoices covering merchandise exported to the United States; protection of American citizens and their property abroad; control of the export and import of arms, munitions, and other implements of war; registration of births and deaths of American citizens abroad; provision of services to American seamen in foreign ports; and establishment and control of security measures necessary for the protection of records and information of the Department of State.

During the first quarter of 1950 there was a sharp increase in number of passports issued over the same period of 1949. That experience, and an additional 50,000 passports which are expected to be issued for travel to the Holy Year ceremonies at the Vatican, accounts for the unusually large 1950 estimate of passport volume. Issuance of passports for Holy Year travel is expected to be completed in 1950.

	1947	1948	1949	1950 (esti- mated)	1951 (esti- mated)
Passports issued—					
In the United States	211, 126	209, 090	232, 561	350, 000	300, 000
In the field (estimated)	34, 500	35, 500	37, 300	40, 000	40, 000
Passports renewed—					
In the United States	6, 218	16, 041	28, 152	35, 000	45, 000
In the field (estimated)	21, 300	27, 500	47, 000	35, 000	35, 000
Visas issued—					
Field (all types, excluding in 1949 and 1950 quota visas issued pursuant to the Dis- placed Persons Act of 1948)	457, 587	475, 986	416, 430	441, 800	460, 000
Department (quota adjustments and cases of aliens charged against the quotas as a result of legislation for their admission under section 19 (c) of the Immigration Act of Feb. 5, 1917, as amended)	4, 416	3, 678	3, 866	3, 800	3, 800

During the fiscal year 1948, consular fees collected abroad amounted to \$3.9 million and passport fees collected in the United States to \$1.8 million, a total of \$5.7 million. Passport fees collected in the United States for 1949 total \$1.9 million, 5.2 percent over collections for 1948.

4. *Conduct of diplomatic relations with international organizations.*—This involves initiation and coordination of the Government-wide process of policy formulation with respect to United States participation in the United Nations, its specialized agencies, and other international organizations, to the end that the implications of United Nations affairs are considered in the development of United States foreign policy. In collaboration with other interested Government agencies, a United States position is developed on political and security issues arising in the United Nations, especially with respect to questions of human rights, freedom of information, dependent areas, international social welfare and health matters, refugees, and displaced persons. Provision is also made for carrying out arrangements for participation in international conferences, for representation by the United States on the governing bodies of international organizations, and for effecting payment of the quotas of the United States to international organizations. During 1949, the United States sent delegations to over 200 conferences, was continuously represented in some 9 international organizations, and made contributions to 45 such organizations.

5. *General governmental activities.*—These activities are concerned with the preparation of Federal laws for publication as "slip laws" and the compilation and publication of the United States Statutes at Large.

6. *Domestic public information and liaison.*—Through such media as the press, radio, motion pictures, television, and lectures, information is disseminated to the public on the foreign affairs of the United States. Provision is also made for analyzing and interpreting public sentiment for use in policy formulation.

7. *Central program services.*—These services are unique to the Department of State because of its world-wide operations. They consist of (1) providing cryptographic media for the safe transmission of telegraphic communications to all parts of the world; (2) maintaining translating and interpreting services for the Department, the White House, American missions to international conferences, and participants in international conferences to which this Government is host; (3) coordination of requests for politico-economic reports from Foreign Service posts and dissemination of information obtained from those reports; (4) the acquisition and management of physical properties of the United States abroad, consisting of 605 Government-owned units and 441 Government-leased units; (5) training of personnel of the Foreign Service, the Department, and other Government agencies to be stationed at posts abroad; and (6) activities of the Foreign Service Inspection Corps relating to the proper administration of the Foreign Service posts.

In 1949, 34,262 politico-economic and economic reports were requested from the Foreign Service by Washington agencies. Review and coordination of reporting activities for the same year resulted in the elimination of requests for 4,271 reports.

Included in this activity are also the transmittal and carrier costs of communications service between the Department and Foreign Service posts throughout the world. During 1949, approximately 73,000 air and sea pouches and approximately 50 million words and groups in telegrams were despatched to and from overseas posts. It is estimated that air pouch service will increase approxi-

mately 15 percent in 1951, as a result of both increased program activity and diversion of telegraphic communications to the more economical air pouch service. This diversion will largely offset an increase in telegraphic costs which would otherwise occur as a result of increased personnel and higher rates which are being charged in many countries.

8. *Administrative and staff activities.*—These largely relate to (1) central control of world-wide organizational, management, budgetary, and fiscal operations of the Department; (2) administration of a global communications system for all civilian activities of the Government; (3) purchase and distribution of administrative supplies and equipment; and (4) centralized control of personnel operations and personnel management for both domestic and foreign personnel. Some reduction in the permanent staff and operational costs is expected in 1951 as a result of both the termination of fiscal operations related to the disposal of surplus property abroad and the consolidation of Foreign Service and departmental personnel operations.

APPROPRIATION TEXT

For necessary expenses of the Department of State not otherwise provided for, including personal services in the District of Columbia; [salary of the Under Secretary of State, \$12,000;] expenses authorized by the Foreign Service Act of 1946, as amended (22 U. S. C. 801-1158), not otherwise provided for; expenses of the National Commission on Educational, Scientific, and Cultural Cooperation as authorized by sections 3, 5, and 6 of the Act of July 30, 1946 (22 U. S. C. 287o, 287q, 287r); expenses of attendance at meetings concerned with activities provided for under this appropriation; [purchase (two for Chiefs of Missions at not to exceed \$3,000 each) and] hire of passenger motor vehicles; maintenance and operation of aircraft outside the continental United States; printing and binding, including printing and binding outside the continental United States without regard to section 11 of the Act of March 1, 1919 (44 U. S. C. 111); [newspapers for departmental use (not to exceed \$15,000);] services as authorized by section 15 of the Act of August 2, 1946 (5 U. S. C. 55a); not to exceed \$1,000 for payment of tort claims pursuant to law (28 U. S. C. 2672); health service program as authorized by law; purchase of uniforms; insurance of official motor vehicles in foreign countries when required by law of such countries; dues for library membership in organizations which issue publications to members only, or to members at a price lower than to others; rental of tie lines and teletype equipment; employment of aliens, by contract, for services abroad; refund of fees erroneously charged and paid for passports; establishment, maintenance, and operation of passport and despatch agencies; examination of estimates of appropriations in the field; ice and drinking water for use abroad; excise taxes on negotiable instruments abroad; loss by exchange; radio communications; payment in advance for subscriptions to commercial information, telephone and similar services abroad; relief, protection, and burial of American seamen, and alien seamen in foreign countries and in the United States Territories and possessions; expenses incurred in acknowledging services of officers and crews of foreign vessels and aircraft in rescuing American seamen, airmen, or citizens from shipwreck or other catastrophe abroad; rent and expenses of maintaining in Egypt, [Ethiopia,] Morocco, and Muscat, institutions for American convicts and persons declared insane by any consular court, and care and transportation of prisoners and persons declared insane; expenses, as authorized by law (18 U. S. C. 3192), of bringing to the United States from foreign countries persons charged with crime; and procurement by contract or otherwise, [without regard to section 3709, Revised Statutes, as amended (41 U. S. C. 5),] of services, supplies, and facilities, as follows: (1) [stenographic reporting, (2)] translating, [(3)] analysis and tabulation of technical information, [(4)] preparation of special maps, globes, and geographic aids, [(5)] maintenance, improvement, and repair of diplomatic and consular properties in foreign countries, including minor construction on Government-owned properties, [(6)] not to exceed \$200,000 for maintenance and operation of commissary and mess services, [(7)] fuel and utilities for Government-owned or leased property abroad, [(8)] and (?) rental or lease, for periods not exceeding ten years, of offices, buildings, grounds, and living quarters for the use of the Foreign Service, for which payments may be made in advance, (9) electrical appliances, motor-driven equipment (other than motor vehicles), and household furniture and furnishings not otherwise provided for, for use abroad, and (10) household equipment to be loaned pursuant to law (22 U. S. C. 1137); \$76,652,100; \$78,731,000: Provided, That pursuant to section 8 of the Act of August 2, 1946 (5 U. S. C. 118d-1), passenger motor vehicles in possession of the Foreign Service abroad may be exchanged or sold and the exchange allowances or proceeds of such sales shall be available without fiscal year limitation for replacement of an equal number of such vehicles and the cost, including the exchange allowance, of each such replacement shall not exceed \$3,000 in the case of the chief of mission automobile at each diplomatic mission and \$1,400 in the case of all other such vehicles except station wagons, and such replacements shall not be charged against the numerical limitation hereinbefore set forth: Provided further, That of the amount appropriated herein, not to exceed \$30,000 shall be expended for carrying out the provisions of the Act of July 31, 1945 (5 U. S. C. 168d).

[For an additional amount for "Salaries and expenses", \$1,500,000; and funds appropriated under this head shall be available for retroactive salary increases for the fiscal year 1949, as authorized by the Act of July 6, 1949 (Public Law 160), to the extent that appropriations for said fiscal year are insufficient therefor.] (*Departments of State, Justice, Commerce, and the Judiciary Appropriation Act, 1950; Supplemental Appropriation Act, 1950.*)

Appropriated 1950, \$78,152,100 Estimate 1951, \$78,731,000

NOTE.—Whenever the Secretary of State, in his discretion, procures information on behalf of corporations, firms, and individuals, the expense of cablegrams and telephone service involved may be charged against the respective appropriations for the service utilized; and reimbursement therefor shall be required from those for whom the information was procured and, when made, be credited to the appropriation under which the expenditure was charged (5 U. S. C. 169).

REPRESENTATION ALLOWANCES

<i>Direct Obligations</i>			
Appropriation or estimate.....	\$650,000	\$650,000	\$979,200
<i>Reimbursable Obligations</i>			
Reimbursements for services performed.....	900	-----	-----
Total obligations.....	650,900	650,000	979,200

PROGRAM AND PERFORMANCE

Officers of the Foreign Service are reimbursed for expenses incurred at their posts of duty for such items as (1) entertainment offered on American holidays or on occasion of visits of prominent citizens or American vessels or aircraft; (2) entertainment necessary in the conduct of official duties; and (3) purchase of flowers, wreaths, and similar tokens for presentation in accordance with local custom on appropriate occasions. Allowances for official representation, together with other similar measures, are designed to remove the requirement of personal wealth as a virtual prerequisite to appointment in the Service.

The increased estimate for 1951 is required to provide relief to Foreign Service officers who, because of their assignments, still are in need of expending appreciable amounts of their personal funds for official representation.

OBLIGATIONS BY ACTIVITIES

FOREIGN SERVICE RETIREMENT AND DISABILITY FUND

Foreign Service Retirement and Disability Fund—

FUNDS AVAILABLE FOR OBLIGATION: Appropriation or estimate—1949, \$2,150,000; 1950, \$2,187,000; 1951, \$2,233,000.

PROGRAM AND PERFORMANCE

Funds made available by this appropriation are paid into the Foreign Service retirement and disability trust fund, established to provide annuities for Foreign Service officers.

OBLIGATIONS BY ACTIVITIES

United States contribution to the Foreign Service retirement and disability fund—1949, \$2,150,000; 1950, \$2,187,000; 1951, \$2,233,000.

OBLIGATIONS BY OBJECTS

11 Grants, subsidies, and contributions—1949, \$2,150,000; 1950, \$2,187,000; 1951, \$2,233,000.

APPROPRIATION TEXT

For financing the liability of the United States, created by the Foreign Service Act of 1946 (22 U. S. C. 1061-1116), **[\$2,187,000]** \$2,233,000, which amount shall be placed to the credit of the "Foreign Service retirement and disability fund." (*Departments of State, Justice, Commerce, and the Judiciary Appropriation Act, 1950.*)

Appropriated 1950, **\$2,187,000** Estimate 1951, **\$2,233,000**

Total obligations.....	25,629,366	23,984,662	16,016,205

PROGRAM AND PERFORMANCE

This appropriation is used for the acquisition abroad of property for use of the Foreign Service where purchase is more advantageous than leasing arrangements. Properties purchased include embassy and consulate office buildings, homes for ambassadors and ministers, and living quarters for American staff at posts where special housing problems exist.

The 1951 estimate contemplates property purchases and construction costs to be met through the use of foreign currency credits held by the United States and representing payments resulting from lend-lease and surplus property settlements.

	Government owned		
	June 30, 1949	June 30, 1950 (estimated)	June 30, 1951 (estimated)

APPROPRIATION TEXT

For carrying into effect the Act of July 25, 1946 (22 U. S. C. 295b), including the initial alterations, repair, and furnishing of buildings acquired under said Act, **[\$13,000,000]** \$12,000,000, which is exclusively for expenditure under the provisions of said Act which relate to payments representing the value of foreign property or credits: *Provided*, That, when specifically authorized by the Secretary of State or such Assistant Secretary as he may designate, section 6 of the Act of May 7, 1926, may be construed as including leaseholds of not less than ten years. (*Departments of State, Justice, Commerce, and the Judiciary Appropriation Act, 1950.*)

Appropriated 1950, **\$13,000,000** Estimate 1951, **\$12,000,000**

NOTE.—Collections from the sale of buildings and grounds are available as a credit to the Foreign Service buildings fund. The Secretary is required to report all transactions annually to the Congress with the budget estimates of the Department of State. There have been no such transactions during fiscal year 1949 (22 U. S. C. 300).

EMERGENCIES IN THE DIPLOMATIC AND CONSULAR SERVICE

Emergencies Arising in the Diplomatic and Consular Service—

Unobligated balance, estimated savings.....	-1,389,655		
Total obligations.....	8,360,345	11,400,000	10,700,000

PROGRAM AND PERFORMANCE

This is used for relief and repatriation loans to United States citizens abroad and for other emergencies of the Department.

OBLIGATIONS BY ACTIVITIES

Unforeseen emergencies—1949, \$8,360,345; 1950, \$11,400,000; 1951, \$10,700,000.

OBLIGATIONS BY OBJECTS

Unvouchered—1949, \$8,360,345; 1950, \$11,400,000; 1951, \$10,700,000.

APPROPRIATION TEXT

For expenses necessary to enable the Secretary of State to meet unforeseen emergencies arising in the Diplomatic and Consular Service, to be expended pursuant to the requirement of section 291 of the Revised Statutes (31 U. S. C. 107), including personal services in the District of Columbia, **[\$11,400,000] \$10,700,000: Provided,** That the Secretary of State may delegate to subordinate officials the authority vested in him by section 291 of the Revised Statutes pertaining to certification of expenditures. (*Departments of State, Justice, Commerce, and the Judiciary Appropriation Act, 1950.*)

Appropriated 1950, **\$11,400,000** Estimate 1951, **\$10,700,000**

CONTRIBUTIONS TO INTERNATIONAL ORGANIZATIONS

Contributions to International Organizations—

FUNDS AVAILABLE FOR OBLIGATION	1949 actual	1950 estimate	1951 estimate
Appropriation or estimate.....			\$52,275,703
Comparative transfer from "United States participation in international organizations".....	\$96,941,188	\$99,525,566	
Total obligations.....	96,941,188	99,525,566	52,275,703

PROGRAM AND PERFORMANCE

Funds are provided for the payment of the United States share of expenses of international organizations in which it participates.

Proposed legislation to raise existing ceilings on appropriations for several international organizations and to provide for United States adherence to the International Trade Organization and the Northwest Atlantic Fisheries Commission will, when enacted, make necessary a supplemental 1951 appropriation of \$2,485,000.

PROGRAM AND PERFORMANCE

The major portion of this contingent fund is used to pay the expenses of United States delegations to international conferences, of which the United States attended 201 in 1949. It also provides for missions and contributions to new or temporary international organizations and the expense of temporary missions on special assignments in the field of international affairs.

OBLIGATIONS BY ACTIVITIES

APPROPRIATION TEXT

For necessary expenses [, without regard to section 3709 of the Revised Statutes, as amended,] of participation by the United States upon approval by the Secretary of State, in international activities which arise from time to time in the conduct of foreign affairs and for which specific appropriations have not been provided pursuant to treaties, conventions, or special Acts of Congress, including personal services in the District of Columbia or elsewhere without regard to civil-service and classification laws; salaries, expenses and allowances of personnel and dependents as authorized by the Foreign Service Act of 1946, as amended (22 U. S. C. 801-1158); employment of aliens; travel expenses without regard to the Standardized Government Travel Regulations and without regard to the rates of per diem allowances in lieu of subsistence expenses under the [Subsistence Expense Act of 1926, as amended] Travel Expense Act of 1949; transportation of families and effects under such regulations as the Secretary of State may prescribe; not to exceed \$15 per diem in lieu of subsistence for persons serving without compensation in an advisory capacity while away from their homes or regular places of business; stenographic and other services; rent of quarters by contract or otherwise; hire of passenger motor vehicles; contributions for the share of the United States in expenses of international organizations; and printing and binding without regard to section 11 of the Act of March 1, 1919 (44 U. S. C. 111); [\$3,300,000] \$3,330,000, of which not to exceed a total of \$100,000 may be expended for representation allowances as authorized by section 901 (3) of the Act of August 13, 1946 (22 U. S. C. 1131) and for entertainment. (Departments of State, Justice, Commerce, and the Judiciary Appropriation Act, 1950.)

Appropriated 1950, \$3,300,000

Estimate 1951, \$3,330,000

INTERNATIONAL BOUNDARY AND WATER COMMISSION, UNITED STATES AND MEXICO

INTRODUCTORY STATEMENT

The International Boundary and Water Commission, United States and Mexico, consists of the United States Section with headquarters in El Paso, Tex., and the Mexican Section with headquarters in Ciudad Juarez, Mexico, and has the status of an international body. It was created in order to provide a practical solution of certain engineering problems arising on the boundary and requiring joint action of the two Governments.

APPROPRIATION TEXT

For expenses necessary to enable the United States to meet its obligations under the treaties of 1884, 1889, 1905, 1906, 1933, and 1944 between the United States and Mexico, and to comply with the Act approved August 19, 1935, as amended (22 U. S. C. 277-277d), including operation and maintenance of the Rio Grande rectification, canalization, flood control, bank protection, boundary fence, and sanitation projects; examinations, preliminary surveys, and investigations; detailed plan preparation and construction (including surveys and operation and maintenance and protection during construction); [and] Rio Grande emergency flood protection; construction and operation of gaging stations; purchase and exchange of map-reproduction machines and other equipment and machinery; personal services in the District of Columbia; services in accordance with section 15 of the Act of August 2, 1946 (5 U. S. C. 55a), at rates for individuals not in excess of \$100 per diem; travel expenses, including, in the discretion of the Commissioner, expenses (not to exceed \$500) of attendance at meetings of organizations concerned with the activities of the International Boundary and Water Commission which may be necessary for the efficient discharge of the responsibilities of the Commission; printing and binding; purchase of [(ten for replacement only)] sixteen passenger motor vehicles, of which eight shall be for replacement only; hire, with or without personal services, of work animals, and animal-drawn and motor-propelled vehicles and aircraft and equipment; acquisition by donation, purchase, or condemnation, of real and personal property, including expenses of abstracts and certificates of title; purchase of ice and drinking water; inspection of equipment, supplies, and materials by contract; drilling and testing of foundations and dam sites, by contract if deemed necessary, purchase of planographs and lithographs [, and]; leasing of private property to remove therefrom sand, gravel, stone, and other materials, without regard to section 3709 of the Revised Statutes, as amended (41 U. S. C. 5); payment of tort claims pursuant to [section 403 of the Federal Tort Claims Act] law (28 U. S. C. 2672), and the Act of August 27, 1935, as amended (22 U. S. C. 277e); and payment of official telephone service in the field in case of official telephones installed in private houses when authorized under regulations established by the Commissioner; as follows: (Departments of State, Justice, Commerce, and the Judiciary Appropriation Act, 1950.)

PROGRAM AND PERFORMANCE

This appropriation finances the activities of the United States Section, other than construction.

1. *General administration and engineering.*—This activity includes the administration of pertinent treaties and laws, studies of river boundary changes, stream flow measurement and water accounting, general supervision of all activities of the United States Section, and administrative service.

2. *Preliminary surveys and investigations.*—Specific studies are required as a result of physical problems along the boundary involving an engineering solution. During the current fiscal year, a joint study of the Calxico sanitation situation will be completed. There will be continued through fiscal year 1951, flood studies of the international portion of the Rio Grande, a survey of flood control on the Lower Colorado River, and studies toward the conservation of the waters of the Tijuana River and of the Santa Cruz River. The Mexican Section will undertake the necessary related work in Mexico.

3. *Operation and maintenance.*—In 1951 work will be continued on the completed portions of Rio Grande canalization project, the Rio Grande rectification project, the Lower Rio Grande flood control project, and the western land boundary fence. In addition, a portion of the Lower Rio Grande bank protection project will attain maintenance status and a rehabilitation program will be initiated for stream gaging stations of the United States Section, on the Rio Grande and its tributaries.

PROGRAM AND PERFORMANCE

Of the three principal dams authorized on the Rio Grande by the water treaty of February 3, 1944, the Falcon Dam is most urgently required by both countries. This is a multiple-purpose dam for irrigation, municipal water supply, flood control and power. It is estimated to cost approximately \$70,000,000, of which the United States share is \$40,332,000, based on conservation and power benefits. Treaty provisions require its completion by November 8, 1953. During the current fiscal year work continues on acquisition of portions of the site and on the construction of work camps. Construction of access roads and relocation of roads and public utilities will also be undertaken during fiscal year 1950. Construction on the dam proper is scheduled to start in the latter part of the fiscal year 1950 and will be continued through fiscal year 1951. Detailed geophysical studies will be undertaken during both years in connection with the proposed dam in the Big Bend area, the uppermost of the three dams authorized.

Work on the floodways and levees in the United States portion of the lower Rio Grande flood control project initiated in 1933, will be completed in fiscal year 1951. Construction of revetments to protect public property will be continued in 1951 on the Rio Grande bank protection project, authorized under act of April 25, 1945.

The western land boundary fence between the United States and Mexico is planned to extend 694 miles, from El Paso to the Pacific Ocean. Authorized by act of August 19, 1935, construction was suspended during the war and was resumed in fiscal year 1948. During fiscal year 1950, construction of 55 miles of fence is planned, leaving approximately 464 miles to be completed. The 1951 program contemplates prosecution of the project at a rate that will permit its completion within three more years.

Detail plans for projects not yet under construction include two projects specifically provided for in the water treaty of 1944, Lower Colorado River flood control and the Tijuana River development.

APPROPRIATION TEXT

CONSTRUCTION

For detail plan preparation and construction of projects authorized by the Convention concluded February 1, 1933, between the United States and Mexico, the Acts approved August 19, 1935, as amended (22 U. S. C. 277-277d), August 29, 1935 (Public Law 392), June 4, 1936 (Public Law 648), June 28, 1941 (22 U. S. C. 277f), and the projects stipulated in the treaty between the United States and Mexico signed at Washington on February 3, 1944, [\$900,000, to be immediately available, and] \$7,185,000 to remain available until expended: *Provided*, That no expenditures shall be made for the lower Rio Grande flood-control project for construction on any land, site, or easement in connection with this project except such as has been acquired by donation and the title thereto has been approved by the Attorney General of the United States: *Provided further*, That expenditures for the Rio Grande bank-protection project shall be subject to the provisions and conditions contained in the appropriation for said project as provided by the Act approved April 25, 1945 ([Public Law 40] 59 Stat. 89): *Provided further*, That unexpended balances of appropriations for construction under the International Boundary and Water Commission available for the next preceding fiscal year shall be merged with this appropriation and shall continue available until expended. (*Departments of State, Justice, Commerce, and the Judiciary Appropriation Act, 1950.*)

PROGRAM AND PERFORMANCE

This appropriation provides funds for use in emergencies which may be caused by floods affecting structures under the jurisdiction of the United States Section of the Commission. The total Federal investment in works in the vicinity of El Paso and in the lower Rio Grande Valley is approximately \$23,000,000. The works protect large areas of highly developed irrigated lands.

OBLIGATIONS BY ACTIVITIES

PROGRAM AND PERFORMANCE

Funds provided are used to finance the United States share of the expenses of (1) the International Joint Commission, United States and Canada; (2) the International Boundary Commission, United States, Alaska, and Canada; (3) the International Fisheries Commission, and (4) the International Pacific Salmon Fisheries Commission. These Commissions provide a means for cooperation and collaboration between the United States and Canada in the fields of sanitation, conservation of natural resources, boundary demarcation, and similar areas of mutual interest.

APPROPRIATION TEXT

[Salaries and expenses, American sections, international commissions, \$500,000, to be disbursed under the direction of the Secretary of State, as follows: For necessary expenses to enable the President to perform the obligations of the United States under certain treaties between the United States and Great Britain in respect to Canada, including personal services in the District of Columbia; stenographic reporting services by contract; printing and binding; and hire of passenger motor vehicles; as follows: For the International Joint Commission, United States and Canada, under the terms of the treaty between the United States and Great Britain signed January 11, 1909 (36 Stat. 2448), including the salary of one Commissioner on the part of the United States who shall serve at the pleasure of the President (the other Commissioners to serve in that capacity without compensation therefor); salaries of clerks and other employees appointed by the Commissioners on the part of the United States with the approval solely of the Secretary of State; travel expenses and compensation of witnesses in attending hearings of the Commission at such places in the United States and Canada as the Commission or the American Commissioners shall determine to be necessary, not to exceed \$47,900; for special and technical investigations in connection with matters falling within the jurisdiction of the International Joint Commission, United States and Canada, including the purchase for replacement only of one passenger automobile; and the Secretary of State is authorized to transfer to any department or independent establishment of the Government with the consent of the head thereof, any part of this amount for direct expenditure by such department or establishment for the purposes set forth in this clause, not to exceed \$144,000; for the International Boundary Commission, United States and Canada and Alaska, under the terms of the treaty between the United States and Great Britain in respect to Canada, signed February 24, 1925 (44 Stat. 2102), including the completion of such remaining work as may be required under the award of the Alaskan Boundary Tribunal and existing treaties between the United States and Great Britain; commutation of subsistence to employees while on field duty not to exceed \$4 per day each, but not to exceed \$3 per day each when a member of a field party and subsisting in camp; hire of freight and passenger motor vehicles from temporary field employees; and for payment for timber necessarily cut in keeping the boundary line clear, not to exceed \$73,300; for the share of the United States of the expenses of the International Fisheries Commission under the convention between the United States and Canada, concluded January 29, 1937 (50 Stat. 1351), not to exceed \$35,000; for the share of the United States of the expenses of the International Pacific Salmon Fisheries Commission, under the convention between the United States and Canada, concluded May 26, 1930 (50 Stat. 1355), not to exceed \$219,500, of which not to exceed

\$50,000 may be transferred to the appropriation for "Restoration of salmon runs, Fraser River system, International Pacific Salmon Fisheries Commission" contained in the First Deficiency Appropriation Act, 1944: *Provided*, That sums appropriated for the United States share of the expenses of the International Fisheries Commission and of the International Pacific Salmon Fisheries Commission may, except for the expenses of the members, be advanced to the respective Commissions for the expenses of said Commissions.]

For expenses necessary to enable the President to perform the obligations of the United States pursuant to conventions between the United States and Canada signed May 26, 1930 (50 Stat. 1355) and January 29, 1937 (50 Stat. 1351), and treaties between the United States and Great Britain, in respect to Canada, signed January 11, 1909 (36 Stat. 2448) and February 24, 1925 (44 Stat. 2102), including personal services in the District of Columbia; stenographic reporting services by contract; printing and binding; hire of passenger motor vehicles; the United States share of the expenses of the International Pacific Salmon Fisheries Commission and the International Fisheries Commission, which except for the expenses of the members, may be advanced to the respective Commissions; \$529,200, to be disbursed under the direction of the Secretary of State and to be available also for additional expenses of the American Sections, International Commissions, as hereinafter set forth:

International Joint Commission, United States and Canada, the salary of one Commissioner on the part of the United States who shall serve at the pleasure of the President (the other Commissioners to serve in that capacity without compensation therefor); salaries of clerks and other employees appointed by the Commissioners on the part of the United States with the approval solely of the Secretary of State; travel expenses and compensation of witnesses in attending hearings of the Commission at such places in the United States and Canada as the Commission or the American Commissioners shall determine to be necessary; and special and technical investigations in connection with matters falling within the Commission's jurisdiction, including purchase for replacement only of two passenger automobiles: *Provided*, That the Secretary of State is authorized to transfer to any department or independent establishment of the Government, with the consent of the head thereof, funds from this appropriation for direct expenditure by such department or establishment for such investigations.

International Boundary Commission, United States, Alaska, and Canada, the completion of such remaining work as may be required under the award of the Alaskan Boundary Tribunal and the existing treaties between the United States and Great Britain; commutation of subsistence to employees while on field duty, not to exceed \$6 per day each (but not to exceed \$3 per day each when a member of a field party and subsisting in camp); hire of freight and passenger motor vehicles from temporary field employees; and payment for timber necessarily cut in keeping the boundary line clear. (Departments of State, Justice, Commerce, and the Judiciary Appropriation Act, 1950; Second Deficiency Appropriation Act, 1949.)

PROGRAM AND PERFORMANCE

The objective of the International Information and Educational Exchange Program (USIE) is to promote the foreign policy of the United States through the creation of a better understanding abroad of this country, its peoples, and policies. This is accomplished through the dissemination abroad of information about the United States, its people, and its policies, and by conducting an educational exchange service to cooperate with other nations in the interchange of persons, knowledge, and skills. The 1951 program will be at about the same level as 1950, except for an increase in radio operations and a substantial decrease in funds required for construction of radio facilities.

In addition to the appropriation proposed for 1951, the 1951 Budget includes an anticipated supplemental of \$5,100,000 for contract authority in 1950 and a supplemental appropriation in 1951 in a like amount for the liquidation of such authority. These funds will provide for the purchase of a building and necessary new equipment which will permit the consolidation of information program activities operating in New York City which are presently widely dispersed and housed in inadequate quarters.

1. *Programming and coordination.*—A policy planning staff and a general manager plan and coordinate activities here and abroad and give over-all direction to the program. Funds are transferred to other appropriations of the Department for administrative costs resulting from the operation of the program.

2. *Direction of international information activities.*—Informational activities are directed by a small headquar-

ters staff, which includes the secretariat for the Advisory Commission on Information.

3. *Direction of educational exchange activities.*—The libraries and institute program and the exchange of persons program are directed by a small headquarters staff which includes the secretariat for the Advisory Commission on Educational Exchange.

4. *Direction of overseas mission activities.*—Public affairs staffs in the regional bureaus of the Department give policy and program guidance on area matters and administer the overseas program as conducted by 142 USIE missions employing 574 Americans and nearly 2,200 local employees. These missions conduct information and educational exchange programs adapted to local needs and conditions in 86 countries, using materials received from the United States and from local sources.

5. *Press and publications.*—The Department prepares press features and photo displays which are released by overseas missions, publishes the magazine *Amerika*, and issues daily news bulletins and semiweekly newsletters. These materials supplement the restricted news coverage provided overseas by news agencies and refute anti-American propaganda attacks. The news bulletin includes 7,000 words daily; 235 feature news items totaling 160,000 words are prepared and several hundred feature photos are distributed monthly.

6. *Motion pictures.*—The Department produces short films explaining the United States and its policies, purchases and adapts films produced by others; translates text and sound tracks into many languages; and distributes prints to overseas missions for their use throughout the world. In 1951, 100 reels of new subject materials will be recorded in an average of 17 languages. In addition, an average of 300 distribution prints per foreign language version will be produced and exhibited abroad to an estimated audience of 15,000,000 people, largely through nontheatrical channels, at USIE information centers and libraries, and to other audiences through the use of mobile motion picture projection units.

7. *Radio broadcasting.*—The Department develops, writes, narrates, and produces radio programs from studios in New York and Washington, D. C., and transmits these programs from points in the United States and overseas. The 1951 schedule is estimated at an average of 35 program hours of broadcasting per day in approximately 32 languages and dialects to a potential audience of over 282,000,000 persons. Transcriptions of programs originating in the Department's studios and special productions prepared specially for this purpose are shipped to USIE missions overseas for use on local radio stations. A substantial portion of the improved domestic and overseas radio transmitting facilities authorized by the 1950 supplemental appropriation will be in operation in 1951.

8. *Libraries and institutes.*—American publications in about 140 libraries and reading rooms abroad, including a total of nearly 500,000 books and numerous periodicals, provide a medium through which foreign nationals may acquire facts about our economic, political, and social institutions. The libraries also serve as an important facility for other activities of the program such as the display of posters, exhibits, film strips and motion pictures, and a distribution point for printed materials. The Department participates in the maintenance of 30 educational and cultural centers in key cities in other American Republics. Subscriptions to American periodicals are donated to influential institutions and individuals in 79 countries. The Department maintains a book translation service and a series of traveling United States book

exhibits. Fewer additional books and other materials will be required in 1951 than in 1950.

9. *Exchange of persons.*—Another means for furthering the objectives of this program is the exchange of persons who are influential in forming public opinion. Those persons include students, educators, leaders, and specialists. This exchange involves the bringing of nationals of foreign countries to the United States and the sending of Americans abroad. In addition to appropriated funds, there are available to this program foreign currencies held by the United States in certain countries as receipts from the sale of surplus war property. The Department also facilitates many exchanges financed entirely from private sources.

10. *Scientific and technical programs.*—Under the Smith-Mundt Act, technical assistance in various fields is given to other countries through advance of funds from the Department to other Federal agencies. Principal forms of assistance include the sending of technical missions to other countries and the training of foreign nationals in the United States.

APPROPRIATION TEXT

For expenses necessary to enable the Department of State to carry out international information and educational activities as authorized by the United States Information and Educational Exchange Act of 1948 ([Public Law 402, approved January 27, 1948] 22 U. S. C. 1431-1479) and the Act of August 9, 1939 (22 U. S. C. 501), and to administer the program authorized by section 32 (b)

(2) of the Surplus Property Act of 1944, as amended (50 U. S. C. App. 1641 (b)) and the program authorized by the Act of August 24, 1949 (Public Law 265), including personal services in the District of Columbia; employment, without regard to the civil-service and classification laws, of persons on a temporary basis (not to exceed \$60,000) and aliens within the United States; salaries, expenses, and allowances of personnel and dependents as authorized by the Foreign Service Act of 1946 (22 U. S. C. 801-1158); expenses of attendance at meetings concerned with activities provided for under this appropriation (not to exceed \$11,000); printing and binding; entertainment within the United States (not to exceed \$5,000); purchase (not to exceed three) and hire of passenger motor vehicles; services as authorized by section 15 of the Act of August 2, 1946 (5 U. S. C. 55a); advance of funds notwithstanding section 3648 of the Revised Statutes as amended; actual expenses of preparing and transporting to their former homes the remains of persons, not United States Government employees, who may die away from their homes while participating in activities authorized under this appropriation; establishment and operation of agricultural and other experiment and demonstration stations in other American countries, on land acquired by gift or lease, and construction of necessary buildings thereon; radio activities and acquisition and production of motion pictures and visual materials and purchase or rental of technical equipment and facilities therefor, narration and script-writing, by contract or otherwise, acquisition of printed materials, and purchase of objects for presentation to foreign governments, schools, or organizations, and information and educational activities outside the continental United States, all without regard to section 3709 of the Revised Statutes; \$34,000,000, of which \$1,000,000 shall be available for payment of obligations incurred under authority granted under this head in the Department of State Appropriation Act, 1949, to enter into contracts for construction of buildings and acquisition of land, and]; \$36,645,000, of which not to exceed [\$2,760,000] \$3,222,250 may be transferred to other appropriations of the Department of State: *Provided*, That, notwithstanding the provisions of section 3679 of the Revised Statutes (31 U. S. C. 665), the Department of State is authorized in making contracts for the use of the international short-wave radio stations and facilities, to agree on behalf of the United States to indemnify the owners and operators of said radio stations and facilities from such funds as may be hereafter appropriated for the purpose against loss or damage on account of injury to persons or property arising from such use of said radio stations and facilities: *Provided further*, That in the acquisition of leasehold interests payments may be made in advance for the entire term or any part thereof: *Provided further*, That funds herein appropriated shall not be used to purchase more than 75 per centum of the effective daily broadcasting time from any person or corporation holding an international shortwave broadcasting license from the Federal Communications Commission without the consent of such licensee: *Provided further*, That funds appropriated herein shall be available for payment to private organizations abroad in pursuance of contracts entered into for the processing and distribution of motion-picture films.

[For an additional amount for "International information and educational activities", \$11,500,000; and the limitation under this head in the Department of State Appropriation Act, 1950, on the amount available for transfer to other appropriations of the Department of State is increased by \$90,000: *Provided*, That funds appropriated under this head shall be available for retroactive salary increases for the fiscal year 1949, as authorized by the Act of July 6, 1949 (Public Law 160), to the extent that appropriations for said fiscal year are insufficient therefor: *Provided further*, That \$10,475,000 of this appropriation shall be available until expended, without regard to section 3709 of the Revised Statutes, exclusively for the purchase, construction, and improvement of buildings and facilities, purchase and installation of necessary equipment for radio transmission and reception, and the acquisition of land and interest in land by purchase, lease, rental, or otherwise: *Provided further*, That land may be acquired outside the continental United States without regard to section 355 of the Revised Statutes, and title to any land so acquired shall be approved by the Secretary of State.]

[For an additional amount during the fiscal year 1950 for "International information and educational activities," \$1,800,000; and the limitation under this head on the amount available for transfer to other appropriations of the Department of State is increased by \$312,250.] (*Departments of State, Justice, Commerce, and the Judiciary Appropriation Act, 1950; Third Deficiency Appropriation Act, 1949; Supplemental Appropriation Act, 1950.*)

Appropriated 1950, *\$47,300,000 Estimate 1951, \$36,645,000

* Includes \$1,800,000 appropriated in Third Deficiency Appropriation Act, 1949, and \$11,500,000 appropriated in Supplemental Appropriation Act, 1950.

PROGRAM AND PERFORMANCE

This appropriation provides for expenses of the United States in connection with the government, occupation, and control of western Germany. In addition, funds are provided for a public affairs program for Germany designed to further the democratization of the German people, to make available to the German people American information and viewpoints, and to counteract the effects of propaganda hostile to the interests of the United States.

Early in 1950 the President transferred responsibility for the occupation of Germany, other than purely military responsibilities, from the Department of the Army to the Department of State. Unobligated funds available in 1950 for this purpose are being transferred from the Department of the Army to the Department of State.

The transfer of responsibility to the Department of State and the reorganization of occupation machinery in Germany reflect major changes in the occupation policies of the United States, France, and the United Kingdom.

Organizational changes in the zones occupied by these three countries include (1) the replacement of military governors with civil high commissioners; (2) replacement of the Allied Control Council with the Allied High Commission; (3) replacement of military government with civil occupation administration; and (4) establishment of a decentralized Federal Republic of Germany to assume limited responsibility for national government in western Germany. Under the terms of the occupation statute promulgated by the Allied High Commission, certain powers were reserved by the High Commission to insure effective allied control over western Germany. To the extent possible, consistent with the maintenance of effective allied control, the German federal and state governments were given maximum authority in the field of internal government.

Major operational changes include (1) the substitution of negotiation and advice for allied directives and controls in all fields of authority other than those reserved to the Allied High Commission; and (2) increased emphasis on public affairs activities in Germany.

Conversion from directive and control to negotiation and advice has already been substantially completed. Although United States responsibilities in Germany will remain substantially unchanged until a peace treaty is ratified, a smaller staff will be required in 1951.

1. *Government in occupied areas of Germany.*—Funds under this activity support United States operations in connection with the government, occupation, and control of occupied areas of Germany, with the exception of the public affairs program and administrative activities in support of the total program.

Under the occupation statute, substantial authority is still retained by the occupying powers, including control of the development of the German economy, review of

German legislation for constitutionality under the new German constitution, protection of individual rights under that constitution, prevention of remilitarization or the use of industrial and scientific resources for military purposes, control of German foreign relations, and surveillance over German activities to insure conformance to the basic directives of the Allied High Commission. These funds also provide for United States participation in the Allied High Commission, the Military Security Board, the Combined Travel Board, the Civil Aviation Board, the steel and coal control organizations, and many other joint or tripartite organizations in Germany.

2. *Public affairs program.*—These funds will finance the public affairs program for Germany which consists of an information program and an education and cultural relations program, including the exchange of persons between Germany and the United States. The information program includes the operation of a major radio station, the publication of three editions of a daily newspaper in three German cities, the publication of four specialized magazines, and the dissemination of news, feature articles, photographs, movies, and radio materials for use by private German press, film, and radio facilities.

The education and cultural relations program includes the operation of information centers, reading rooms, mobile libraries, exhibits, discussion programs, educational film programs, and exchange of persons, including a series of special programs designed to reach teachers, government officials, labor leaders, political leaders, the legal profession, community groups, youth groups, and other influential groups in German society. In 1951 the exchange of persons program is being increased to bring a larger number of Germans to the United States to learn the ways of democracy and to spread democratic influence in Germany on their return. A small number of Americans are also sent to Germany to work with German organizations and groups, and exchanges between Germany and other European countries are provided.

These funds also cover the staffing and expenses of the Office of Public Affairs in the Office of the United States High Commissioner, and the staffing and expenses of comparable offices in Washington and New York, which provide policy direction, informational and educational materials, supplies and equipment for the program in Germany, and handle the exchange of persons program in the United States.

3. *Administration.*—These funds will cover administrative and staff work in the fields of communications, budget and finance, operating facilities, administrative services, and personnel administration. It includes the staffing and expenses of the Office of Administration in the Office of the United States High Commissioner for Germany and of related offices in the Department of State in Washington and New York City.

The appropriation text is substantially the same as that carried in the Department of the Army for the appropriation, "Government and relief in occupied areas," but has been modified to take account of the establishment of the Office of the High Commissioner. The funds in this appropriation do not cover all expenses of the United States in Germany in 1950 and 1951. Local currency expenses are met mainly from occupation cost charges on the German Government, and counterpart funds arising from United States aid programs in Germany. The expenses of the military occupation forces, the expenses of the Economic Cooperation Administration employees, the salaries of military personnel assigned to the Office of the High Commissioner, and the salaries of Department of

State consular staff and Foreign Service career employees will be met from the appropriations of their respective agencies. Relief supplies and materials in 1950 are paid from the appropriation "Government and relief in occupied areas," and recovery supplies are paid from "Foreign assistance, Executive Office of the President." Relief and recovery supplies and materials in 1951 will be supplied from the appropriations for "Foreign assistance, Executive Office of the President."

APPROPRIATION TEXT

For expenses, not otherwise provided for, necessary to meet the responsibilities and obligations of the United States in connection with the government, occupation, and control of occupied areas of Germany, under such regulations as the Secretary of State may prescribe, including personal services in the District of Columbia; one deputy to the United States High Commissioner for Germany at a salary of \$17,500; tuition, personal allowances (not to exceed \$10 per day), travel expenses (not to exceed those authorized by United States civilian personnel), health and accident insurance, and fees incident to instruction in the United States or elsewhere, of such persons as may be required to carry out the provisions of this appropriation; actual expenses of preparing and transporting to their former homes the remains of persons who may die away from their homes while participating in activities authorized under this appropriation; services as authorized by section 15 of the Act of August 2, 1946 (5 U. S. C. 55a), at rates not in excess of \$50 per diem for individuals; health service program as authorized by law (5 U. S. C. 150); payment of tort claims pursuant to law (28 U. S. C. 2672) and payment of tort claims in the manner authorized in the first paragraph of section 2672, as amended, of title 28 of the United States Code when such claims arise in foreign countries; expenses for translation and reproduction rights; acquisition, maintenance, operation, and distribution of educational, informational, reorientation, and rehabilitation materials and equipment for Germany, including grants; medical and health assistance for the civilian population of Germany; expenses incident to the operation of schools for American children who are dependents of Government personnel; expenses incident to maintaining discipline and order in occupied areas (including trial and punishment by courts established by or under authority of the President); printing and binding, including printing and binding outside continental United States without regard to section 11 of the Act of March 1, 1919 (44 U. S. C. 111); purchase, rental, operation, and maintenance of printing and binding machines, equipment, and devices abroad; purchase and hire of passenger motor vehicles; transportation to occupied Germany of property donated for the purposes of this appropriation; unforeseen contingencies (not to exceed \$100,000) for the United States High Commissioner for Germany, to be accounted for pursuant to the provisions of section 291

of the Revised Statutes (31 U. S. C. 107); and representation allowances (not to exceed \$20,000) similar to those authorized by section 901 (3) of the Foreign Service Act of 1946 (22 U. S. C. 1131); \$30,000,000: Provided, That provisions of law, including current appropriation acts, applicable to the Department of State shall be available for application to expenditures made from this appropriation: Provided further, That when section 601 of the Economy Act of 1932, as amended (31 U. S. C. 686), is employed to carry out the purposes of this appropriation the requisitioned agency may utilize the authority contained in this appropriation: Provided further, That expenditures from this appropriation may be made outside the continental United States, when necessary to carry out its purposes, without regard to sections 355 and 3648, Revised Statutes, as amended: Provided further, That the Department of State is authorized to utilize for carrying out the purposes of this appropriation, including unforeseen contingencies, without dollar reimbursement from this or any other appropriation (1) currencies deposited in Germany by the Federal Republic of Germany in accordance with section 115 (b) (6) of the Economic Cooperation Act of 1948, as amended, and which may be made available by the Economic Cooperation Administration, (2) currencies otherwise deposited in Germany by the Federal Republic of Germany and which become available for use of the Government of the United States, its representatives or agencies in Germany, in such quantities and under such terms and conditions as may be determined by the Secretary of State after consultation with the Administrator for Economic Cooperation, and (3) other currencies derived from activities carried on under this appropriation: Provided further, That civilian employees of the United States serving in Germany who received appointments in October 1949 to the Foreign Service of the United States for service in Germany shall, for the purposes of section 625 of the Foreign Service Act of 1946, be considered to have been in class on September 30, 1949: Provided further, That for the purposes of this appropriation appointments may be made to the Foreign Service Reserve without regard to the four-year limitation contained in section 522 of the Foreign Service Act of 1946: Provided further, That in the event the President assigns to the Department of State responsibilities and obligations of the United States in connection with the government, occupation, or control of foreign areas in addition to Germany, the authorities contained in this appropriation may be utilized by the Department of State in connection with such government, occupation, or control of such foreign areas: Provided further, That when the Department of the Army, under the authority of the Act of March 3, 1911, as amended (10 U. S. C. 1253), furnishes subsistence supplies to personnel of civilian agencies of the United States Government serving in Germany, payment therefor by such personnel shall be made at the same rate as is paid by civilian personnel of the Department of the Army serving in Germany. (Foreign Aid Appropriation Act, 1950.)

PROGRAM AND PERFORMANCE

Through the Philippine rehabilitation program the United States is aiding the Philippine Islands to recover from World War II damages. The program financed from this appropriation includes reconstruction of public facilities, rehabilitation of certain essential Government services, and training of Filipino nationals. It is carried on by various Government agencies and coordinated by the Department.

By June 30, 1950, public buildings, public health, maritime, aviation, weather, fisheries, and coast and geodetic projects will have been completed. In 1951, public roads and ports and harbors projects will be completed. Filipinos having commenced training prior to June 30, 1950, will continue their courses.

APPROPRIATION TEXT

For expenses necessary to carry out the provisions of titles III and V of the Philippine Rehabilitation Act of 1946 (50 U. S. C. App. 1781-1791, 1801), hereinafter called the Act, without regard, outside the United States, to section 3709 of the Revised Statutes, as amended, including personal services in the District of Columbia, and employment of personnel outside the continental United States without regard to civil-service and classification laws; temporary services as authorized by section 15 of the Act of August 2, 1946 (5 U. S. C. 55a); hire of passenger motor vehicles; hire, maintenance, operation, and repair of aircraft; purchase of health and accident insurance for trainees (for whom such benefits are not otherwise allowed) while in the United States in pursuance of training programs; actual expenses of preparing and transporting to their former homes the remains of trainees who may die away from their homes

while participating in activities authorized under this appropriation; advances of funds to trainees, such advancements to be deducted from allowances due to such trainees; not to exceed \$28,645 for a health-service program as authorized by law (5 U. S. C. 150); printing and binding without regard to section 11 of the Act of March 1, 1919 (44 U. S. C. 111); expenses of attendance at meetings of organizations concerned with the furtherance of the purposes hereof; compilation, printing, and distribution, in the Philippine Islands or the United States, of charts, reports, and publications pertaining to the various programs set forth in the Act; acquisition of sites for the construction of additional buildings, and furnishing and equipping of buildings acquired or constructed, under section 501 of the Act; and acquisition of quarters in the Philippines to house employees of the United States Government, including military personnel, by purchase, rental (without regard to section 322 of the Act of June 30, 1932, as amended (40 U. S. C. 278a)), lease, or construction and necessary repairs and alterations to and maintenance of such quarters; amounts as follows: (a) For carrying out the provisions of sections 302, 303, 304, and 305 of title III of the Act, \$14,789,850; and (b) for carrying out sections 306, 307, 308, 309, 310, and 311 of said title III, \$2,376,548; in all, \$17,166,398: *Provided*, That this appropriation, together with the limitations included herein, shall be consolidated with the appropriation and limitations under this head in the Department of State Appropriation Act, 1949: *Provided further*, That no part of this appropriation shall be available for engaging in any phase of activity or for undertaking any phase of activity authorized by the Philippine Rehabilitation Act of 1946 that would result in obligating the Government of the United States in any sense or respect to the future payment of amounts in excess of the amounts authorized to be appropriated in such Act, nor shall any part of this appropriation be available for expanding any public works project authorized by law to be replaced or rehabilitated beyond such as may be justified by sound engineering practice and which can be accomplished within the amount authorized to be appropriated: *Provided further*, That the total amount that may be obligated for the entire accomplishment of section 307 (a) of title III of such Act shall not exceed \$8,000,000: *Provided further*, That this appropriation shall be available to make contracts with nonprofit institutions in the United States and the Philippines in connection with training programs: *Provided further*, That sums from the foregoing applicable appropriations may be transferred directly to and merged with the appropriations contemplated in section 306 (b) of the Act to reimburse said latter appropriations for expenditures therefrom for the purpose hereof: *Provided further*, That the construction of diplomatic and consular establishments of the United States in the Philippine Islands shall be without regard to the proviso contained in title 22 of the United States Code, section 295a: *Provided further*, That the Secretary of State, or such official as he may designate, is authorized to transfer from any of the foregoing amounts to any department or independent establishment of the Government for participation in the foregoing programs, sums for expenditure by such department or establishment for the purposes hereof, and sums so transferred shall be available for expenditure in accordance with the provisions hereof and, to the extent determined by the Secretary of State, in accordance with the law governing expenditures of the department or establishment to which transferred: *Provided further*, That transfers of funds to participating agencies for the programs set forth in sections 302 to 305 of the Act shall be approved by the President prior to such transfer.]

For liquidation of obligations incurred pursuant to authority granted under this head in the Department of State Appropriation Act, 1949, \$13,000,000, to be consolidated with appropriations heretofore made under said head; and the unobligated balance of such consolidated appropriation shall remain available during the current fiscal year upon the terms and conditions specified under this head in the Department of State Appropriation Act, 1950, for carrying out the purposes of sections 302 (a) and 303 (a) of the Philippine Rehabilitation Act of 1946, as amended (50 U. S. C. App. 1782, 1783), as authorized by the Act of September 7, 1949 (Public Law 295), and for carrying out the purposes of section 311 of the Philippine Rehabilitation Act of 1946, as authorized by section 3 of the Act of July 2, 1948 (Public Law 882). (Departments of State, Justice, Commerce, and the Judiciary Appropriation Act, 1950.)

MISCELLANEOUS

Payment to Government of Finland—

FUNDS AVAILABLE FOR OBLIGATION: Appropriation or estimate—1950, \$5,574,740.

PROGRAM AND PERFORMANCE

An appropriation of \$5,500,000 was made for payment to the Government of Finland in settlement of claims arising

out of the requisitioning of Finnish vessels by the United States, together with interest at 4 percent from June 30, 1949, to date of payment. Payment was made November 1, 1949, the interest amounting to \$74,740.

OBLIGATIONS BY ACTIVITIES

Payment of claims—1950, \$5,574,740.

OBLIGATIONS BY OBJECTS

13 Refunds, awards, and indemnities—1950, \$5,574,740.

APPROPRIATION TEXT

[For payment to the Government of Finland in settlement of claims arising out of the requisitioning of Finnish vessels by the United States, \$5,500,000, together with interest thereon at 4 per centum per annum from June 30, 1949, to the date of payment: *Provided*, That the funds made available by this paragraph shall be subject to the agreement of the Government of Finland that such payment shall constitute full satisfaction of obligations of the United States incident to the requisitioning of the following-named Finnish vessels in 1941 and 1942: Aagot, Advance, Anja, Asta, Atlas II, Aurora, Delaware, Koura, Kurikka, Kuurtanes, Marisa Thorden, Olivia, Pandia, Saimaa, and Wipunen.] (*Second Supplemental Appropriation Act, 1950.*)

Appropriated 1950, * **\$5,574,740**

* Includes \$74,740 for interest at 4 percent from June 30, 1949, to the date of payment, Nov. 1, 1949.

Payment to Government of Great Britain—

FUNDS AVAILABLE FOR OBLIGATION: Appropriation or estimate—1950, \$15,005.

PROGRAM AND PERFORMANCE

This appropriation provides funds for payment of claims of the Government of Great Britain (a) for the death of J. D. Wiggins as a consequence of shots fired by a sentry aboard the U. S. S. *Carter Hall* at Shanghai, China, on November 23, 1945; and (b) for the United States share of the sum paid to the Government of Spain by the Government of Great Britain, as a consequence of damages caused in the bombing of a Spanish steamship at Sete, France, in an attack by joint air forces of the United States and Great Britain on June 25, 1944.

OBLIGATIONS BY ACTIVITIES

Payment of claims—1950, \$15,005.

OBLIGATIONS BY OBJECTS

13 Refunds, awards, and indemnities—1950, \$15,005.

PAYMENT TO GOVERNMENT OF GREAT BRITAIN

[(a) Claim of the Government of Great Britain in the sum of £3,000 (\$12,097.50) on behalf of the parents of the late J. D. Wiggins of the British vessel *Sambre*, arising out of the death of the latter as a consequence of shots fired by John B. Coyne, United States Navy, an armed sentry aboard the United States ship *Carter Hall* at Shanghai, China, on November 23, 1945;]

[(b) Claim of the Government of Great Britain for reimbursement in the sum of £721.0.5 (\$2,907.52), representing the pro rata share of the United States of the sum paid to the Government of Spain by the Government of Great Britain, as a consequence of damages caused in the bombing of the Spanish vessel steamship *Christina* at Sete, France, in an attack by joint air forces of the United States and Great Britain, respectively, on June 25, 1944; and] (*Public Law 132, approved July 25, 1949.*)

Appropriated 1950, **\$15,005**

Payment to Government of Norway—

FUNDS AVAILABLE FOR OBLIGATION: Appropriation or estimate—1950, \$5,355.

PROGRAM AND PERFORMANCE

This provides for the payment of a claim of the Government of Norway on behalf of Trygve Jorgensen, arising out of personal injuries sustained when the ship *Masbate* was attacked in the harbor of Macao by United States military aircraft on February 25, 1945.

MISCELLANEOUS—Continued

Payment to Government of Norway—Continued

OBLIGATIONS BY ACTIVITIES

Payment of claims—1950, \$5,355.

OBLIGATIONS BY OBJECTS

13 Refunds, awards, and indemnities—1950, \$5,355.

Restoration of Salmon Runs, Fraser River System, International Pacific Salmon Fisheries Commission—Continued

PROGRAM AND PERFORMANCE

The United States contributes to the International Pacific Salmon Fisheries Commission its share of the expenses incident to the work of improving facilities for sockeye salmon migration in the Fraser River system, under the terms of the convention between the United States and Canada concluded May 26, 1930.

Plans for this program during 1951 assume that the completion of the Hell's Gate and Farwell Canyon fishways during 1950 will permit greater emphasis on completion of projects for the improvement of spawning streams and for biological and engineering surveys of potential spawning areas now barren, with a view to restoration of their productivity, and the clearing of minor natural obstructions to salmon migration.

OBLIGATIONS BY ACTIVITIES

Description	1949 actual	1950 estimate	1951 estimate
1. Office administration	\$18,774	\$6,000	\$3,528

PROGRAM AND PERFORMANCE

Proceeds of sales of vehicles, equipment, accessories, and other items, the exchange of which is authorized by

law, may be applied in whole or in part payment for the purchase of similar items. Receipts from this source are set up in a special appropriation account and are available for the replacement of similar items to the end of the fiscal year following the year in which the sale is made; unused balances are adjusted to miscellaneous receipts (5 U. S. C. 118d-1).

Covered into miscellaneous receipts.....	-9,981		
Total obligations.....	114,494		

PROGRAM AND PERFORMANCE

The act of July 4, 1868 (15 Stat. 679), created a commission to provide for the adjustment of claims of citizens of Mexico against the United States Government and citizens of the United States against the Government of Mexico for injuries to their persons and property as the result of war. Provision for expenses of the Commission were made through fund advances, to be repaid from amounts deducted from claim payments. The act of February 1, 1869 (15 Stat. 684), authorized deductions for this purpose in amounts not exceeding 5 percent of total claims paid.

In 1949, \$114,494 was repaid to the Treasury to cover the repayment of funds previously advanced to the Commission. A balance of \$9,981, representing unpaid claims, has reverted to the Treasury.

OBLIGATIONS BY ACTIVITIES

Payment of claims—1949, \$114,494.

OBLIGATIONS BY OBJECTS

PROGRAM AND PERFORMANCE

Under an agreement with Turkey of October 25, 1934, that country agreed to pay to the United States Govern-

ment, in settlement of certain claims of American nationals against the Government of Turkey, the sum of \$1,300,000 in annual installments of \$100,000. The claims were adjudicated in the total amount of \$900,000, which upon payment by Turkey has been appropriated to this trust fund for payment to the claimants. It is anticipated that the small amount remaining in this fund will be obligated during the current fiscal year (49 Stat. 3670).

Total obligations.....	4,201,458	7,046,214	7,046,214

PROGRAM AND PERFORMANCE

Educational foundations authorized by the Fulbright Act have been established under 14 executive agreements for periods ranging from 1 to 20 years. Programs of educational exchange are under way in 13 countries, the China program now being inactive. Grants have been made to professors, research scholars, teachers, and students for study in the United States and abroad. It is anticipated that negotiations with six additional countries will be completed during the 1950 fiscal year.

The programs are financed by foreign currencies received for World War II surplus property, and earmarked for the use of this Government. The amounts of those currencies are shown in the accompanying schedules in dollar equivalents. The amounts shown as becoming available are the maximum which can be drawn down in any one year under the terms of the agreements. The dollar equivalents of the total foreign currency credits represented by the agreements which are expected to be concluded by 1951 are estimated to be \$67,031,214.

GENERAL PROVISIONS—DEPARTMENT OF STATE

SEC. 102. Contracts entered into in foreign countries involving expenditures from any of the appropriations under this title shall not be subject to the provisions of section 3741 of the Revised Statutes (41 U. S. C. 22).

SEC. 103. The provision of law prescribing the use of vessels of United States registry by any officer or employee of the United States (46 U. S. C. 1241) shall not apply to any travel or transportation of effects payable from funds appropriated, allocated, or transferred to the Secretary of State or the Department of State.

SEC. 104. Notwithstanding the provisions of section 6 of the Act of August 24, 1912 (37 Stat. 555), or the provisions of any other law, the Secretary of State may, in his absolute discretion, during the current fiscal year, terminate the employment of any officer or employee of the Department of State or of the Foreign Service of the United States whenever he shall deem such termination necessary or advisable in the interests of the United States.

GENERAL PROVISIONS—DEPARTMENT OF STATE—Continued

Sec. 105. The exchange of funds for payment of expenses in connection with the operation of diplomatic and consular establishments abroad shall not be subject to the provisions of section 3651 of the Revised Statutes (31 U. S. C. 543).

Sec. 106. Appropriations under this [Act] title available for expenses in connection with travel of personnel outside the continental United States, including travel of dependents and transportation of personal effects, household goods, or automobiles of such personnel, shall be available for such expenses when any part of such travel or transportation begins in the current fiscal year pursuant to travel orders issued in that year, notwithstanding the fact that such travel or transportation may not be completed during the current fiscal year.

Sec. 107. Notwithstanding the provisions of section 16a of the Act of August 2, 1946 ([Public Law 600] 5 U. S. C. 78 (a)), Government-owned vehicles may be used in foreign countries for transportation of United States Government employees from their residence to the office and return when public transportation facilities are unsafe or are not available: *Provided*, That each Chief of Mission shall have prior authority from the Secretary of State to approve such transportation.

Sec. 108. Appropriations under this title for "Salaries and expenses," "International contingencies," and "Missions to international organizations" are available for reimbursement of the General Services Administration for security guard services for protection of confidential files.

THE INSTITUTE OF INTER-AMERICAN AFFAIRS

[Submitted under the Government Corporation Control Act]

Cooperating governments.....	13,306	12,990	14,177
Number of cooperative programs.....	25	25	32

PURPOSE AND FINANCIAL ORGANIZATION

The broad objectives of The Institute of Inter-American Affairs are to further the general welfare of, and to strengthen friendship and understanding among, the peoples of the American Republics by carrying out with their governments technical cooperation programs in the fields of public health, agriculture, and education.

Funds are appropriated to carry on the activities of the Institute. Participating countries also contribute to the cooperative programs. The life of the Institute, which was incorporated on August 5, 1947 (22 U. S. C. 281), was recently extended until June 30, 1955. At the same time, Congress authorized additional appropriations up to \$35,000,000 and the making of 5-year contracts within the limits of available funds.

The major activities of the Corporation are conducted in accordance with the terms of agreements entered into with the governments of the other American Republics. These agreements provide for program operation by a cooperative service, which is a part of the appropriate ministry (health, agriculture, or education) of the host government and is headed by the chief of the Institute field party. Both the cooperating republic and the In-

stitute contribute funds, materials, services, and facilities.

The Institute coordinates its program with that of the Inter-Departmental Committee on Scientific and Cultural Cooperation and is participating in the planning of the "Point Four" program of technical assistance for the economic development of underdeveloped areas.

ANALYSIS OF BUDGET PROGRAMS

During fiscal year 1951, the current programs (14 health and sanitation, 4 agriculture, and 7 education) will be continued and at least 7 programs will be added. The number of participating countries will probably increase from 16 to 18.

The Institute's health work is primarily in the fields of preventive medicine and sanitation. Water supply systems, sewerage systems, wells, and privies will be constructed. Hospitals, nursing schools, laboratories, health centers, and clinics will be developed and their operation supervised until such time as local governments take over these activities completely. About 350 Latin Americans will receive in-service training; about 67 grants will be made for study in the United States; and organized campaigns for the education of the public will be carried on.

In the four countries with existing agriculture programs, cooperative services will operate 77 extension offices during 1951. This technique, patterned somewhat after the United States county agent system, will also be used in the new programs. In addition to extension work, 1951 activities will include establishment of machinery and equipment pools; assistance in the planning, construction, and operation of marketing and storage facilities; encouragement and assistance in the organization and management of rural credit programs; planning and construction of small irrigation projects and assistance in large-scale developments; and training of technicians both locally and in the United States.

Of the seven countries with existing education programs, elementary education activities will be carried on in four and vocational education activities in six during 1951. Similar programs will be extended to at least two more countries in that year. The Institute's work in education includes assistance in school administration; development of community-centered schools; introduction of improved curricula, teaching methods, and teaching materials; and training of teachers both locally and in the United States.

Administrative expenses of the Corporation include salaries of the Washington supervisory staff concerned with program operations, salaries of employees providing housekeeping services, cost of the required audit, rental and building maintenance costs, and incidental expenses, excepting FBI investigations.

FINANCIAL REVIEW

Expenditures, other than contributions from the other cooperating governments, represent expenditures of the United States Government. The Government's investment in the Corporation, all of which is noninterest bearing, consists of cumulative grants-in-aid from the Office of Inter-American Affairs and Department of State less expenditures attendant to program operations. It is expected that the cumulative total grants-in-aid at June 30, 1951, will be \$84,241,608.

Balance available in subsequent year.....	-3,936	-----	-----
Total obligations.....	13,804	3,936	-----

PROGRAM AND PERFORMANCE

The Settlement of War Claims Act of 1928 established the Mixed Claims Commission to adjudicate claims of American nationals against Germany. The act also provided for the transfer of certain funds under control of the Office of Alien Property. Payments to awardees are now being made as funds become available by virtue of transfers of funds from the Office of Alien Property.

OBLIGATIONS BY ACTIVITIES

Payment of claims—1949, \$13,804; 1950, \$3,936.

OBLIGATIONS BY OBJECTS

Balance available in subsequent year.....	-28,187	-24,533	-20,803
Total obligations.....	5,763	3,654	3,730

PROGRAM AND PERFORMANCE

Funds were received from the United States Railroad Administration when the Secretary of the Treasury was designated Director General of Railroads. Credits to the account consist of recoveries on judgments which have become very infrequent. Expenditures from the account cover compensation payments to former employees of the railroads who were injured during the period of Federal control and refunds to former employees of amounts representing partial subscriptions to Liberty bonds.

OBLIGATIONS BY ACTIVITIES

Compensation payments—1949, \$5,763; 1950, \$3,654; 1951, \$3,730.

Total obligations.....	-----	-----	-----

PROGRAM AND PERFORMANCE

Receipts, appropriated to this account, which include interest and dividends on securities and the proceeds of sales of securities are derived from funding agreements made by the Government with railroads at the termination of Federal control, as provided in section 207 of the Transportation Act of 1920, as amended. No expenditures are currently being made from the account (41 Stat. 462, 5 U. S. C. 133 (t); 40 U. S. C. 316).

Payment of Interest on Deposits of Public Moneys of Government of Philippine Islands—

FUNDS AVAILABLE FOR OBLIGATION: Appropriation or estimate—1949, \$3,765,761; 1950, \$2,642,283; 1951, \$1,900,000.

PROGRAM AND PERFORMANCE

Under the act of June 11, 1934, as amended, the Secretary of the Treasury is authorized to accept, until July 1, 1951, under terms and conditions prescribed by him, deposits of public moneys of the Government of the Philippine Republic. The act appropriates an amount sufficient to pay interest on any or all such deposits (except demand deposits) at such rate or rates, not in excess of 2 percent per annum, as the Secretary of the Treasury may prescribe (48 U. S. C. 1157; act of Aug. 7, 1946, Public Law 654).

OBLIGATIONS BY ACTIVITIES

Payment of interest—1949, \$3,765,761; 1950, \$2,642,283; 1951, \$1,900,000.

OBLIGATIONS BY OBJECTS

14 Interest—1949, \$3,765,761; 1950, \$2,642,283; 1951, \$1,900,000.

Unobligated balance, estimated savings.....	-68,707		
Total obligations.....	246,859	197,000	132,000

PROGRAM AND PERFORMANCE

Proceeds of sales of vehicles, equipment, accessories, and other items, the exchange of which is authorized by law, may be applied in whole or in part payment toward the purchase of similar items. Receipts from this source are set up in a special appropriation account, and are available for the replacement of similar items to the end of the fiscal year following the year in which the sale is

made; unused balances are adjusted to miscellaneous receipts (5 U. S. C. 118d-1).

OBLIGATIONS BY ACTIVITIES

Purchase of automotive equipment—1949, \$246,859; 1950, \$197,000; 1951, \$132,000.

OBLIGATIONS BY OBJECTS

Net investments during the year.....		6,421	
Total investments held at end of year.....	193,336	199,757	199,757

PROGRAM AND PERFORMANCE

The Secretary of the Treasury is authorized to invest and reinvest any part or all of the corpus of the Pershing Hall Memorial fund in interest-bearing United States bonds. The act appropriates fund earnings for payment to the national treasurer of the American Legion for use in the maintenance and perpetuation of Pershing Hall, a memorial in Paris, France (49 Stat. 426).

OBLIGATIONS BY ACTIVITIES

Payment of fund earnings—1949, \$5,083; 1950, \$9,829; 1951, \$4,995.

PROGRAM AND PERFORMANCE

Under the Federal old-age and survivors insurance system, workers and their employers make annual contributions in the form of taxes on wages toward the benefits which will be payable when the worker reaches 65 or when he dies. An amount equal to 100 percent of the annual contributions (including interest and penalties) is appropriated to this trust fund. Benefit payments are paid from the trust fund. Administrative expenses are also paid from the fund—in the form of transfers to the Bureau of Old-Age and Survivors Insurance, advances to certain other offices of the Federal Security Agency, and reimbursements to the general fund for related costs of the Treasury Department. The excess of income over outgo together with annual interest on invested funds are accumulated and invested in Government securities to provide for the future benefits being currently earned by workers.

OBLIGATIONS BY ACTIVITIES

Administration, investment, and benefit payments—1949, \$1,914,227,121; 1950, \$2,468,316,128; 1951, \$2,768,893,940.

PROGRAM AND PERFORMANCE

Under the provisions of section 904 of the Social Security Act, as amended, there was established in the Treasury of the United States a trust fund known as the "Unemployment trust fund" and the Secretary of the Treasury was authorized and directed to hold in the fund all moneys deposited therein by a State agency from a State unemployment fund or by the Railroad Retirement Board to the credit of the railroad unemployment insurance account; to invest such portion of the fund as is not required to meet current withdrawals by State agencies or the Railroad Retirement Board; and to credit the fund with interest on, and proceeds from the sale or redemption of, any obligations held in the fund (42 U. S. C. 1104).

PROGRAM AND PERFORMANCE

The General Counsel is the chief law officer of the Treasury Department. His office handles all legal matters in connection with broad financial and economic programs at the departmental level. It advises the Secretary on all technical and legal aspects of legislation in which the Department is interested. The office provides legal facilities and services for those bureaus and offices of the Department which do not maintain legal staffs and, in addition, performs a variety of legal duties which do not come within the operations of any bureau or office. For those bureaus which do maintain separate legal staffs, the office is responsible for supervising and coordinating the legal activities to harmonize with departmental policy.

PROGRAM AND PERFORMANCE

The funds requested are to pay the salaries of those employees engaged in performing general administrative services for the Department.

1. *Operation and maintenance of Treasury buildings.*—This activity covers the salaries of personnel charged with the operation and maintenance of certain buildings occupied by the Department in the District of Columbia, aggregating approximately a million and a half square feet.

2. *General administrative services.*—This activity includes the performance of general administrative services for the departmental headquarters, the control and assignment of space in Treasury buildings in the District of Columbia and in the field, and the operation of central services for the staff offices of the Secretary.

PROGRAM AND PERFORMANCE

This appropriation provides for the operating expenses of the Bureau of Accounts except the Division of Disbursement, which is included in a separate appropriation. The Bureau is responsible for a variety of fiscal functions among which are the maintenance of the central accounts of the Government including appropriations and covering of moneys into the Treasury; preparation of financial statements; supervision of Government depositaries; administration of the Government Losses in Shipment Act; approval of surety bonds; handling of investments for the Secretary of the Treasury; supervision of Treasury accounting systems; joint participation in accounting and reporting studies with the General Accounting Office and

the Bureau of the Budget; appraisal of the Commodity Credit Corporation; accounting and billing for lend-lease; and payment of international and other claims.

1. *Collection of withheld taxes through depositaries.*—The Bureau supervises the work of handling deposits of withheld income taxes under the Current Tax Payment Act and the Federal Insurance Contributions Act, which is performed by the Federal Reserve banks as fiscal agents of the Treasury Department on a reimbursable basis. The work load in 1951, in terms of items on depositary receipts, is estimated at 8,000,000 compared to 6,000,000 in 1950 and 3,922,399 in 1949. The program in 1951 anticipates expanding the system for collecting withheld income taxes to include also the collection of social-security taxes. This accounts for the increase in the budget requirements.

2. *Maintenance of the Government's central accounts.*—This activity consists of the maintenance of the central accounts of the Government, including issuance of warrants for appropriations made by the Congress except the postal service. The Bureau also maintains the receipt accounts of the Government and issues warrants covering moneys into the Treasury and authorizing its withdrawal therefrom. The work-load volume in 1951 is estimated at the same level as in 1950, namely, 1,010,000 items on warrants compared to 1,048,632 in 1949.

3. *Preparation of financial statements of the Government.*—These statements include the compilation and preparation of the Annual Combined Statement of Receipts, Expenditures and Balances of the United States Government; the Monthly Report of Appropriations, Expenditures and Balances published in the Daily Statement of the United States Treasury; certain tables and disbursement information for use in the Daily Treasury Statement; financial statements contained in the Secretary's annual report and certain other special financial statements for the Secretary of the Treasury, the Bureau of the Budget, and committees of Congress.

4. *Administration of reporting and accounting systems.*—The projects under this activity include (1) the review of existing procedures for the purpose of making improvements, (2) the development of new procedures to meet requirements of new laws or conditions, (3) the furnishing of technical assistance, (4) following up on revised and new installations, (5) the conduct of certain audits and appraisals, and (6) special management assignments. The 1951 program includes continuation of work on the joint accounting project in collaboration with the Bureau of the Budget and the General Accounting Office.

5. *Processing of claims and collections.*—Included under this activity are (a) claims received under the Government Losses in Shipment Act; (b) international claims under agreements with foreign governments, such as those of American nationals against the Governments of Mexico and Germany; (c) special accounts covering various collections for which numerous claims are made and processed; and (d) billing and collection of funds from foreign governments relating to lend-lease activities and certain surplus property sales. The work load in 1951 is estimated at the same level as 1950, namely, 175,000 transactions compared to 203,000 transactions in 1949.

6. *Supervision of Federal depositary system.*—These activities relate to the designation of depositaries throughout the United States and in foreign countries to take care of the receipt, disbursement, and safekeeping of Government funds and other essential Government business; the supervision of collateral requirements to secure the deposits and reviewing periodic reports from financial institutions.

DEPOSITARIES SUPERVISED

	1949 actual	1950 estimate	1951 estimate
Number of depositaries:			
General and bank draft.....	2,022	3,000	3,450
Limited.....	917	925	950
Social security.....	72	75	75
Banking facilities.....	95	100	100
Insular, Territorial, and foreign.....	213	210	200
Number of changes in depositaries.....	1,900	2,600	2,700

7. *Supervision and control of surety bonding.*—This activity covers (a) the review of financial statements submitted quarterly by surety companies authorized by the Secretary of the Treasury to do business with the United States to determine their underwriting qualifications to handle Government business; (b) examination where necessary into the financial condition of the companies; and (c) examination and approval of corporate or certain other fidelity and surety bonds running in favor of the United States. The number of bonds and agreements to be processed are estimated at 50,000 in 1950 and 1951 compared to 49,344 in 1949.

8. *Investment of trust and other funds.*—Under various provisions of the law certain Government trust and special funds are invested, such as the Federal old-age and survivors' insurance trust fund, the unemployment trust fund, veterans' insurance funds, and the various retirement funds of the Government. Processing of loans to Government corporations authorized to borrow from the Treasury, purchasing and disposing of securities for other Government agencies, and handling transactions in connection with the subscription to capital stock of specified Government corporations are also included under this activity.

9. *Executive direction.*—Management of the Bureau will continue at the present level.

Total obligations.....	11,212,896	12,136,749	11,476,148

PROGRAM AND PERFORMANCE

The Division of Disbursement is responsible for (a) making payments, receiving, and depositing collections for all executive departments except the postal service, United States marshals, the Panama Canal, the Department of Defense, and certain Government corporations; and (b) issuing United States savings bonds for Federal employees under the pay-roll savings plan.

The end products of the Division—that is, payments, checks and drafts, certificates of deposit, and bonds—are prepared by relatively similar processes for which unit costs are collected by classes of activities. Requirements of the Division are ascertained by applying the unit costs to the work volume.

The total estimated work loads of 194,732,000 items for the fiscal year 1950 and 179,781,000 items for 1951 are

based on estimates submitted by the agencies served. The estimates for 1951 anticipate the following changes: Veterans—Payments to students will decline but will be partially offset by a slight increase in disability compensation, pension, and insurance payments; special premium refunds under the national service life insurance program will be practically completed in 1950. Bureau of Internal Revenue—Income-tax refunds will remain at about the 1950 level. Social Security—Payments to beneficiaries will increase, as in the past, about 4,000,000 per year. Other activities—The work is expected to remain at substantially the same level as in 1950. The slight increase in unit cost for the fiscal year 1951 is due to salary increases under Public Law 429.

The work volume, unit costs, and total obligations for the fiscal years 1950 and 1951 are compared to the actual for 1949 in the following tables:

WORK VOLUME

APPROPRIATION TEXT

SALARIES AND EXPENSES, DIVISION OF DISBURSEMENT

For necessary expenses of the Division of Disbursement, including personal services in the District of Columbia, and printing and binding, **[\$10,830,000] \$10,848,000**: *Provided*, That with the approval of the Bureau of the Budget there may be transferred or advanced to this appropriation from Railroad Retirement Board, "Conservation and use of agricultural land resources, Department of Agriculture", and from available corporate funds of Government owned or controlled corporations, such sums as may be necessary to cover the expense incurred in performing the function of disbursement therefor. (5 U. S. C. 124-132, 133i, 133u; Treasury and Post Office Departments Appropriation Act, 1950.)

Appropriated 1950, ***\$11,467,900** Estimate 1951, **\$10,848,000**
 * Includes \$637,900 appropriated in the Third Deficiency Appropriation Act, 1949.

Relief of the Indigent, Alaska (Receipt Limitation)—

FUNDS AVAILABLE FOR OBLIGATION	1949 actual	1950 estimate	1951 estimate
Appropriation or estimate.....	\$18,000	\$20,000	\$4,000
Unobligated balance, estimated savings.....	-184		
Total appropriation or estimate.....	17,816	20,000	4,000

PROGRAM AND PERFORMANCE

This appropriation, to be expended by the four district judges in Alaska for relief of persons in Alaska, is based on 10 percent of the receipts from occupational or trade licenses outside of incorporated towns in the Territory of Alaska and was established by the act of March 3, 1913 (48 U. S. C. 41). The expenditures may not exceed the actual accumulated receipts. As a result of Public Law 300, September 7, 1949, receipts are appropriated direct to the Territory of Alaska and will no longer be deposited to this account.

OBLIGATIONS BY ACTIVITIES

Payments for relief of indigent persons in Alaska—1949, \$17,816; 1950, \$20,000; 1951, \$4,000.

OBLIGATIONS BY OBJECTS

11 Grants, subsidies, and contributions—1949, \$17,816; 1950, \$20,000; 1951, \$4,000.

APPROPRIATION TEXT

RELIEF OF THE INDIGENT, ALASKA

For relief of persons in Alaska (not to exceed 10 per centum of the receipts from licenses collected outside of incorporated towns in Alaska), as authorized by law (48 U. S. C. 41), **[\$20,000] \$4,000**. (31 U. S. C. 725 (c); Treasury and Post Office Departments Appropriation Act, 1950.)

Appropriated 1950, **\$20,000** Estimate 1951, **\$4,000**

Fund for Payment of Government Losses in Shipment (Revolving Fund)—

Total obligations.....	248,737	250,000	250,000

PROGRAM AND PERFORMANCE

The act of July 8, 1937 (5 U. S. C. 134), as amended, created a self-insurance plan to protect the shipment of Government valuables and established on the books of the Treasury Department a revolving fund to pay claims resulting from losses in shipment of valuable Government property, such as coin, currency, and securities. The fund permits the Treasury Department (1) to replace Government valuables lost in shipment; (2) to replace losses incurred by the Post Office Department, while acting as agent for the Treasury in sales of securities, internal revenue stamps, and other items; and (3) to replace losses by banking institutions resulting from erroneous redemption of savings bonds when the banks are not negligent.

OBLIGATIONS BY ACTIVITIES

Payment of claims—1949, \$248,737; 1950, \$250,000; 1951, \$250,000.

OBLIGATIONS BY OBJECTS

13 Refunds, awards, and indemnities—1949, \$248,737; 1950, \$250,000; 1951, \$250,000.

APPROPRIATION TEXT

GOVERNMENT LOSSES IN SHIPMENT

Fund for payment of Government losses in shipment (revolving fund): For the payment of losses in accordance with provisions of the Government Losses in Shipment Act, approved July 8, 1937 (50 Stat. 479-484), as amended, **[\$100,000] \$150,000**. (5 U. S. C. 134a-h; 31 U. S. C. 528, 738a, 757c (i); Treasury and Post Office Departments Appropriation Act, 1950.)

Appropriated, 1950, **\$100,000** Estimate 1951, **\$150,000**

Damage Claims, Judgments, and Private Relief Acts—

FUNDS AVAILABLE FOR OBLIGATION: Appropriation or estimate—1949, \$11,238,686; 1950, \$2,029,283.

PROGRAM AND PERFORMANCE

Appropriations are made by Congress as needed to pay certain claims for damages which cannot be charged directly to the appropriations for operation of the various agencies and judgments rendered against the United States by various Federal courts, together with interest thereon in some cases. In addition, various private laws

FISCAL SERVICE—Continued

Permanent definite appropriation:

Permanent Private Relief Acts—

FUNDS AVAILABLE FOR OBLIGATION: Appropriation or estimate—1949, \$2,228; 1950, \$1,620; 1951, \$1,620.

PROGRAM AND PERFORMANCE

This account covers private relief for Herman F. Krafft, formerly a professor at the United States Naval Academy, who, under the act of June 15, 1938, was awarded \$100 per month; and Sara E. Edge, who, under the act of June 27, 1930, was awarded the sum of \$35 per month on account of the death of her husband in an airplane accident at Langin Field, Moundsville, W. Va. (46 Stat. 1921, 52 Stat. 1334.)

OBLIGATIONS BY ACTIVITIES

Payment of awards—1949, \$2,228; 1950, \$1,620; 1951, \$1,620.

OBLIGATIONS BY OBJECTS

13 Refunds, awards, and indemnities—1949, \$2,228; 1950, \$1,620; 1951, \$1,620.

APPROPRIATION OR ESTIMATE

Appropriated 1950, **\$1,620**

Estimate 1951, **\$1,620**

Permanent indefinite appropriations:

Payment of Certified Claims Under \$500—

FUNDS AVAILABLE FOR OBLIGATION	1949 actual	1950 estimate	1951 estimate

Unobligated balance, estimated savings.....	-317,736	-----	-----
Total obligations.....	2,782,264	-----	-----

PROGRAM AND PERFORMANCE

This appropriation, in an indefinite amount, was to be used to pay claims of \$500 or less (certified by the General Accounting Office) chargeable to appropriations no longer available for expenditure purposes. This account has been superseded by the new account, "Payment of certified claims," from which such claims are now paid.

OBLIGATIONS BY ACTIVITIES

Payment of claims—1949, \$2,782,264.

OBLIGATIONS BY OBJECTS

13 Refunds, awards, and indemnities—1949, \$2,782,264.

APPROPRIATION TEXT

【PAYMENT OF CERTIFIED CLAIMS】

【For payment of claims (not to exceed \$500 in any case) which may be certified by the Comptroller General of the United States to be within the limits of, and chargeable against the balances of the respective appropriations which, after remaining unexpended, have been carried to the surplus fund, such amounts as hereafter may be necessary.】 (Treasury and Post Office Departments Appropriation Act, 1950).

Payment of Certified Claims—

PROGRAM AND PERFORMANCE

Appropriations usually expire for expenditure purposes 2 years after the end of the year or other period for which they are made. The act of July 6, 1949, provides that when such general fund appropriations expire the balances remaining will revert to Treasury and be established in a consolidated account, available for payment of claims (certified by General Accounting Office), which would be charged to the respective appropriations if they were still open. Any amounts in this account in excess of the sums probably needed for such claims are to be written off from time to time, upon determination of the General Accounting Office.

Under this procedure, which was put into effect as of June 30, 1949, it is no longer necessary for Congress to

make appropriations specifically for the payment of certified claims.

Estimated activity in the account is as follows:

	1950 estimate	1951 estimate
Credits from appropriations expiring at the end of the preceding year.....	\$300,000,000	\$300,000,000
Certified claims to be paid during the year.....	30,000,000	30,000,000

Recoinage of Danish West Indian Coins of Virgin Islands—

FUNDS AVAILABLE FOR OBLIGATION	1949 actual	1950 estimate	1951 estimate
Prior year balance available.....	\$417	\$417	\$417
Balance available in subsequent year.....	-417	-417	-417
Total obligations.....			

PROGRAM AND PERFORMANCE

This fund was appropriated to the Secretary of the Treasury to cover the expenses and losses in the recoinage into subsidiary and other coins of the United States of the Danish West Indian franc and fractional coins of the Virgin Islands of the United States.

Recoinage of Silver Coins—

FUNDS AVAILABLE FOR OBLIGATION	1949 actual	1950 estimate	1951 estimate
Appropriation or estimate:			
Annual definite.....	\$150,000	\$150,000	
Permanent indefinite.....			\$220,000
Unobligated balance, estimated savings.....	-1		
Total obligations.....	149,999	150,000	220,000

PROGRAM AND PERFORMANCE

This appropriation covers the difference between the face value of uncurrent silver coin, withdrawn from circulation, and the value when melted down. Withdrawn coins may not be melted until funds are available in this appropriation to reimburse the accounts of the Treasurer of the United States. The increase in the program for 1951 is to reduce a large backlog of withdrawn coins now on hand awaiting remelting.

OBLIGATIONS BY ACTIVITIES

Payment of losses from recoinage of silver coins—1949, \$149,999; 1950, \$150,000; 1951, \$220,000.

OBLIGATIONS BY OBJECTS

13 Refunds, awards, and indemnities—1949, \$149,999; 1950, \$150,000; 1951, \$220,000.

APPROPRIATION TEXT

RECOINAGE OF SILVER COINS

For reimbursement of the Treasurer of the United States for the difference between the face value of subsidiary silver coins of the United States and the amount the same will produce in new coins, **[\$150,000]** such amounts as hereafter may be necessary. (31 U. S. C. 320, 725a; Treasury and Post Office Departments Appropriation Act, 1950.)

Appropriated 1950, **\$150,000** Estimate 1951, **\$220,000**

Refund of Moneys Erroneously Received and Covered—

FUNDS AVAILABLE FOR OBLIGATION	1949 actual	1950 estimate	1951 estimate
Appropriation or estimate:			
Annual definite.....	\$1,500,000

PROGRAM AND PERFORMANCE

The Bureau of the Public Debt exercises general supervision over all public debt operations. The funds available in the foregoing schedule provide for the administration of the United States savings bonds program and for the conduct and direction of all transactions in regular Treasury issues of United States securities including the preparation of the offerings, the handling of subscriptions, and the maintenance of all security accounts. Reductions in the budget requirements for nearly all activities are anticipated for 1951. These reductions are attributable primarily to the liquidation of large quantities of unprocessed work and to various improvements in operating procedures and methods. Receipts of current work are expected to continue at about the same rate.

1. *Issuance of securities.*—This activity covers generally those phases of the operation having to do with the issuance of United States savings bonds and the other types of public debt issues, and includes specifically: (1) the cost of printing and manufacturing the securities, (2) the expenses incident to the receipt, custody, and shipments of stocks of securities, (3) the cost of issuing the securities to the bond-buying public, (4) the audit of the sales of all securities, and (5) the maintenance of records of the issuance of all registered securities.

VOLUME OF ISSUES OF SECURITIES (PIECES)

	1949 actual	1950 estimate	1951 estimate
United States savings bonds:			
Series E.....	64,272,240	65,000,000	65,000,000
Series F.....	252,372	400,000	400,000
Series G.....	1,183,284	1,400,000	1,400,000
All other issues.....	985,536	1,000,000	1,000,000
Total issues.....	66,693,432	67,800,000	67,800,000

2. *Servicing of the public debt.*—This activity includes the maintenance and servicing of the security accounts with each bond owner after the security has been sold to the public. It covers the maintenance of the individual registered security accounts and the payment of interest thereon when due, the handling of correspondence in connection with such accounts and the adjudication of claims for relief resulting from the loss, theft, destruction, or mutilation of securities.

SECURITIES (BY PIECES) ISSUED AND RETIRED THROUGH SERVICE TRANSACTIONS AND ACCOUNTS MAINTAINED WITH REGISTERED BONDHOLDERS

	1949 actual	1950 estimate	1951 estimate
United States savings bonds:			
Issues.....	2,834,940	2,800,000	2,800,000
Retirements.....	2,807,904	2,775,000	2,775,000
Interest accounts maintained.....	4,291,576	4,387,500	4,500,000
All other issues:			
Issues.....	1,035,420	1,000,000	1,000,000
Retirements.....	1,303,092	1,200,000	1,200,000
Interest accounts maintained.....	375,588	400,000	400,000

3. *Retirement of securities.*—This activity covers those operations involved in the retirement of securities and includes specifically the cost of processing and auditing bonds surrendered for either redemption or by prior redemption in exchange for a new offering, and the maintenance of necessary retirement records.

NUMBER OF SECURITIES REDEEMED OR EXCHANGED (PIECES)

	1949 actual	1950 estimate	1951 estimate
United States savings bonds.....	83,050,487	81,000,000	81,000,000
All other issues.....	2,233,896	3,000,000	3,000,000

FISCAL SERVICE—Continued

BUREAU OF THE PUBLIC DEBT—Continued

Administering the Public Debt—Continued

4. *Examination, custody, and issuance of distinctive fiber paper and retirement of United States currency.*—This activity covers generally two separate functions of the Bureau, one relating to paper used in the printing of securities and United States currency, and the other involving the verification and destruction of currency which is retired as unfit for further circulation.

WORK VOLUME

	1949 actual	1950 estimate	1951 estimate
Distinctive fiber paper received (number of sheets).....	108,780,000	122,343,000	137,125,000
United States currency received for redemption (number of pieces).....	1,286,640,000	1,345,380,000	1,380,000,000

5. *Maintenance and audit of public debt accounts.*—This activity embraces the maintenance of control accounts over all transactions in the public debt, including the outstanding debt, both as to principal and interest, and over currency and distinctive fiber paper, both in stock and in process.

6. *Promotion of the sale of savings bonds.*—This activity covers generally those operations having to do with the promotion of the sale of United States savings bonds. These promotional operations are carried out through periodic drives and through the continual use of press, radio, and other advertising media, and the maintenance of an organized sales and promotion group of volunteer and paid representatives. It includes the receipt, warehousing, assembling, and distribution of sales promotional literature and material.

7. *Executive direction.*—This activity covers the over-all administration and top supervision of all activities of the Bureau of the Public Debt, and includes the technical analyses of the security markets and the establishment of policies based thereon, the determination of the terms and the execution of new offerings of securities.

APPROPRIATION TEXT

ADMINISTERING THE PUBLIC DEBT

For necessary expenses connected with any public-debt operations authorized by the Second Liberty Bond Act, as amended (31 U. S. C. 760-762), and with the administration of any public debt or currency issues of the United States with which the Secretary of the Treasury is charged, including not to exceed **[\$4,415,000]** **\$5,020,000** for promoting the sale of savings bonds, **[\$52,000,000]** **\$51,105,000**, to be expended as the Secretary of the Treasury may direct, and the Secretary is authorized to accept services without compensation: *Provided*, That Federal Reserve banks and branches may be reimbursed for expenditures as fiscal agents of the United States on account of public-debt transactions for the account of the Secretary of the Treasury, and advances to the Postmaster General may be made in accordance with the provisions of section 22 (e) of the Second Liberty Bond Act, as amended (31 U. S. C. 757c (e)): *Provided further*, That the indefinite appropriation provided by section 10 of said Act, as amended, shall not be available for obligation during the current fiscal year. (*Treasury and Post Office Departments Appropriation Act, 1950.*)

PROGRAM AND PERFORMANCE

This appropriation is for the purchase of distinctive fiber paper used in the printing of United States currency. The paper is manufactured, under contract negotiated annually, under the supervision and control of a small force of Bureau employees stationed at the contractor's mill. The increase in the 1951 program is to build up

reserves of blank paper stock and printed currency for the replacement of currency no longer fit for circulation.

PROGRAM AND PERFORMANCE

The Office of the Treasurer of the United States is responsible for (a) the receipt, custody, and payment of public moneys; (b) the issue, transfer, and retirement of currency and coin; (c) the redemption of Government securities; (d) the maintenance of essential fiscal accounts; and (e) the preparation of related financial statements and reports.

1. *Processing checks, deposits, and claims.*—The major operations include the maintenance of checking accounts of Government disbursing officers, including the examination and clearance of all checks drawn on the Treasurer of the United States payable in Washington, accountability for all checks drawn on the Treasurer payable through the Federal Reserve banks as agents and the processing of claims arising in connection with the non-receipt, loss, or fraudulent negotiation of Government checks. The decrease in the 1951 program is attributable primarily to the special payment of national service life insurance dividend checks which is expected to be completed in 1950. Budgetary needs are determined primarily by the volume of Government disbursements which are based on estimates submitted by the departments and agencies as follows:

CHECK WORK LOAD BY DISBURSING AGENCY

	1949 actual	1950 estimate	1951 estimate
Disbursing agency:			
Treasury—Division of Disbursement.....	177, 051, 000	¹ 171, 146, 000	171, 806, 000

PROGRAM AND PERFORMANCE

This appropriation finances all the operations of the Bureau of Customs, including the appraisalment and

classification of imported merchandise, the assessment and collection of duties, the entrance and clearance of vessels, the inspection of all traffic entering the United States, and other related functions. The program for 1951 is based generally upon a projection of the rate of increase in work load experienced during the past and current fiscal years.

1. *Assessment and collection of duties, taxes, and fees.*—The principal functions performed under this activity are to classify imported merchandise; assess and collect duties; inspect all traffic entering the United States; administer certain marine statutes concerning the registry, licensing, etc., of vessels; and other related functions.

SUMMARY OF WORK-LOAD DATA

	1949 actual	1950 estimate	1951 estimate
Formal entries accepted.....	860,904	947,000	1,042,000
Carriers of persons and merchandise entering the United States.....	20,892,220	21,937,000	23,034,000
Persons entering the United States.....	83,702,906	85,377,000	87,085,000

2. *Appraisal of imported merchandise.*—The Customs appraisers of merchandise determine the dutiable value of imported merchandise, and establish that such merchandise has been properly invoiced.

SUMMARY OF WORK-LOAD DATA

	1949 actual	1950 estimate	1951 estimate
Packages examined at public stores.....	485,760	510,000	536,000
Invoices processed.....	1,105,648	1,161,000	1,219,000

3. *Investigations of violations of customs and related laws and regulations.*—The Customs Agency Service is the investigative arm of the Bureau of Customs. Its principal investigations concern (a) smuggling and other violations of Customs and related laws and regulations; (b) valuation, classification, and invoicing of imported merchandise; (c) draw-back; (d) thefts from Customs custody; and (e) alleged derelictions of Customs personnel. In the fiscal year 1949 a total of 16,640 investigations were made. The estimates for 1950 and 1951 are 17,000 and 18,000, respectively.

4. *Audit of collection and merchandise accounts.*—The comptrollers of customs are responsible for (1) establishing the accountability of collectors for the proper and complete collection of duties, taxes, and fees, and (2) accounting for the final disposition of all imported merchandise. Verification of collectors' liquidations of entries is the only measurable item of comptrollers' work load and represents approximately 50 percent of the total operation. The remaining 50 percent consists of audits of schedules, manifests, and accounts.

SUMMARY OF WORK-LOAD DATA

	1949 actual	1950 estimate	1951 estimate
Liquidations verified.....	2,042,917	2,100,000	2,200,000
Comptrollers' verification pending at close of year.....	102,475	100,000	100,000

5. *Analysis and identification of merchandise for tariff purposes.*—The Customs laboratories primarily serve the Customs Service by providing scientific analysis and identification of merchandise which is not susceptible to analysis by inspection. Samples tested in 1949 numbered 73,251 and it is estimated will increase to 80,000 in each of the fiscal years 1950 and 1951.

BUREAU OF CUSTOMS—Continued

Salaries and Expenses, Bureau of Customs—Continued

6. *Executive direction.*—This activity includes over-all management and direction of the Customs Service in Washington and the field and includes those operations in Washington concerned with budget, management, personnel, fiscal, and administrative services.

Total direct obligations	209,137,495	231,300,000	253,000,000

PROGRAM AND PERFORMANCE

The Bureau of Internal Revenue is responsible for the determination, assessment, and collection of all internal-revenue taxes; the enforcement of the internal-revenue laws; the refunding or crediting of any overpayment of tax or erroneous collection; and the preparation and distribution of tax instructions, regulations, forms, and stamps. It is also charged with certain duties under statutes that do not impose taxes, but which have a relationship to internal revenue. These statutes include the Federal Alcohol Administration Act, as amended, the Liquor Enforcement Act of 1936, and the Federal Firearms Act.

The scope and variety of the Bureau's activities are indicated by the content of the statutory mandate to enforce the internal-revenue laws. It reaches into every town and hamlet throughout the United States and directly affects the finances of some 65 million people in the form of one or more levies. It withdraws from the national income for use by the Federal Government close to one-fifth of the total income. The operation of the Code underlies a wide range of business decisions which in turn have tremendous impact upon the entire economy. These involve matters of employment, recapitalization, inventories, research and development projects, replacements of capital assets, and numerous other items which form the fabric of the national fiscal system. The administration of the Code from a management standpoint encompasses delegation of duties and assignments affecting some 55,000 employees and their deployment in such a manner as to obtain reasonably adequate compliance in respect to 79 separately classified tax levies on an equal and equitable basis geographically and economically.

These manifold specific duties and operations are classified and distributed among five activity headings. Each activity, therefore, represents a cluster of separate but related operations.

BUREAU OF INTERNAL REVENUE—Continued

Salaries and Expenses, Bureau of Internal Revenue—Continued

1. *Interpretative and ruling work.*—Personnel engaged in this activity interpret internal-revenue laws, analyze and report on proposed legislation, prepare and promulgate formal regulations, and prepare rulings on taxpayer cases or specific issues that involve questions of statutory interpretation or application.

ILLUSTRATIVE WORK-LOAD DATA

	1949 actual	1950 estimate	1951 estimate
Regulations and interpretative rulings.....	2,231	2,250	2,250
Taxpayer rulings.....	62,453	68,000	70,000

2. *Front-line enforcement work.*—Front-line enforcement includes all front-line investigations and audits, obtaining delinquent returns, uncovering evidence of fraud, collecting taxes not timely paid, serving warrants for distraint, and legal work involving criminal investigations. The program for 1951 anticipates a substantial strengthening of the enforcement of the internal-revenue laws by providing an increase of 2,956 new employees, and for projecting to a full year of employment the 2,325 persons appropriated for on a 6-month basis in 1950, all for front-line enforcement work. The direct monetary results of this work in the form of additional assessments during the fiscal year 1949 aggregated \$1,891,679,000. The direct monetary results of the warrant work aggregated \$347,000,000.

ILLUSTRATIVE WORK-LOAD DATA

	1949 actual	1950 estimate	1951 estimate
Returns investigated (field and office examinations).....	3,073,301	3,473,000	4,183,000
Distraint warrants closed.....	1,890,565	2,097,000	2,432,000
Fraud investigations.....	8,121	11,700	12,000
Plants and permittees supervised for alcohol tax compliance.....	497,456	500,000	502,700
Penal cases and reward claims (disposals).....	1,268	1,300	1,300

3. *Technical enforcement, taxpayer appeals, and related legal work.*—This activity includes all appellate work incident to investigations, preparation of cases for trial and trial work in noncriminal cases, specialized work incident to administration of technically complex provisions of the Internal Revenue Code, and departmental review work to insure uniformity of interpretations and administrative practices.

ILLUSTRATIVE WORK-LOAD DATA

	1949 actual	1950 estimate	1951 estimate
Legal work (case disposals).....	21,999	22,000	22,000
Taxpayer appeals (disposals).....	11,655	13,150	13,150
Section 722 claims (disposals).....	7,113	8,000	8,000
Post-review of income, profits, and estate tax returns (cases).....	953,906	962,000	978,000
Field conferences with taxpayers.....	45,588	47,000	54,000

4. *Processing and control of taxpayer returns, remittances, and claims.*—These routine operations involve the receiving, processing, recording, filing, and controlling of taxpayer returns, remittances, and claims, and related information documents. The decrease in budget requirements in 1951 in this activity is due to procedural and other improvements in operations. The decrease in the number of returns shown below, as anticipated for 1951, is due to combining the two separate employer's returns for

income tax withholding and the Federal Insurance Contributions Act into one employer's tax return. The two classes of tax must still be assessed and recorded separately.

ILLUSTRATIVE WORK-LOAD DATA

	1949 actual	1950 estimate	1951 estimate
Total returns filed.....	92,926,342	91,684,300	83,484,300
Prepayment documents matched.....	130,580,073	130,500,000	130,500,000

5. *Executive direction.*—Included in executive direction is the over-all management and planning of the Bureau.

PROGRAM AND PERFORMANCE

The Bureau of Narcotics is charged with the investigation, detection, and prevention of violations of Federal narcotic and marihuana laws, and of the Opium Poppy Control Acts and related statutes, including the administration of permissive features of the Narcotic Drugs Import and Export Act. The program in 1951 anticipates

an increase in the enforcement and control activities to counteract a rise in illicit traffic in drugs and narcotics.

1. *Investigations of violations of Federal narcotic laws.*—This activity includes two major fields of investigations, namely, (a) investigations concerned with illicit traffic in narcotics and (b) investigations concerned with the control of legitimate commercial transactions involving narcotics.

2. *Control of importation, exportation, and domestic distribution of narcotics for medical and scientific purposes.*—This activity covers the issuance of permits for the importation of crude narcotic drugs and for the exportation and in-transit movement of narcotic drugs and preparations, and the issuance of licenses and expenses incident to the discharge of national and international obligations concerning traffic in narcotic drugs.

3. *Executive direction.*—This activity covers over-all management and direction of the Bureau.

Total obligations	26,848,412	24,567,311	23,816,511

PROGRAM AND PERFORMANCE

The Bureau of Engraving and Printing designs, engraves, and prints currency, bonds, stamps, commissions, certificates, and various other forms of engraved documents, of which the printing of currency constitutes the major activity. Unit costs are determined for each of these items of manufacture. Substantial reductions in the unit costs for printing currency are anticipated in 1950 and 1951 due to the installation of labor-saving devices on the presses used to print the currency. The anticipated work volume is based on the estimated needs as submitted by the agencies served. The work volume, unit costs and total obligations by activity for the fiscal years 1949, 1950, and 1951 are shown in the following tables:

DELIVERIES (NUMBER OF SHEETS)

	1949 actual	1950 estimate	1951 estimate
1. Printing of currency (United States)	106,000,000	110,000,000	117,000,000

PROGRAM AND PERFORMANCE

The Secret Service Division is responsible for the protection of the President of the United States and members of his immediate family; the suppressing of counterfeiting, forging, and alteration of obligations and securities of the United States and foreign countries; and investigations of forged endorsements on, or the fraudulent negotiation of, United States Treasury checks and bonds, of loss of valuables in shipment by Government agencies, and of personnel, tort claims, and other noncriminal cases as directed by the Secretary of the Treasury.

1. *Suppressing counterfeiting and investigating check and bond forgeries.*—Two main types of investigations are conducted: (1) investigations in connection with suppressing counterfeiting and (2) investigations of fraud in connection with Government checks and securities. The increase in the program for 1951 is to provide additional strength to meet a rise in counterfeiting crimes and to speed up investigations of check and bond frauds.

Total obligations.....	5,489,020	4,913,600	4,165,000

PROGRAM AND PERFORMANCE

This appropriation finances the manufacture of coins; the receipt of deposits of gold and silver bullion; the safeguarding of the Government's holdings of monetary metals, including coins in processing stages until finished and issued; and the refining of gold and silver bullion. Coinage mints are located at Philadelphia, San Francisco, and Denver and assay offices are at New York and Seattle. A gold-bullion depository is located at Fort Knox and a silver-bullion depository, which operates as an adjunct of the New York Assay Office, is located at West Point.

1. *Manufacture of coins (domestic).*—This activity covers the manufacture of all United States coins and constitutes about 50 percent of the mint-service program. The mint service also manufactures coins for foreign governments on a reimbursable basis.

It is estimated that the demand for coin in 1951 will be at the same level as in 1950, namely, 750,000,000 pieces. Production in 1950, however, is being shifted from domestic coins to foreign coins since a substantial carry-over inventory of domestic coins exists. A savings resulting from this shift in the 1950 appropriations will be turned back to the Treasury.

The production volume by denomination, the unit cost per thousand pieces, and the total cost by denomination for the fiscal years 1949, 1950, and 1951 are shown in the following tables.

DOMESTIC COINAGE WORK LOAD

[By pieces]

Denomination	1949 actual	1950 estimate	1951 estimate
1 cent.....	497,800,000	273,000,000	380,000,000
5 cents.....	156,347,000	95,000,000	130,000,000
10 cents.....	179,925,000	95,000,000	146,000,000
25 cents.....	70,402,400	32,000,000	38,000,000
50 cents.....	6,782,826	5,000,000	6,000,000
Total.....	911,257,226	500,000,000	700,000,000

UNIT COSTS BY DENOMINATIONS

[Per 1,000 pieces]

Denomination	1949 actual	1950 estimate	1951 estimate
1 cent.....	\$1.89	\$1.89	\$1.85
5 cents.....	3.60	3.60	3.52
10 cents.....	3.00	3.00	2.93
25 cents.....	6.50	6.50	6.35
50 cents.....	10.47	10.47	10.23

TOTAL COSTS BY DENOMINATIONS

Denomination	1949 actual	1950 estimate	1951 estimate
1 cent.....	\$941,268	\$515,960	\$703,100
5 cents.....	563,042	342,000	457,640
10 cents.....	540,034	285,000	427,780
25 cents.....	457,648	208,000	241,300
50 cents.....	71,014	52,340	61,380
Additional equipment.....		250,000	
Total.....	2,573,006	1,653,300	1,891,200

2. *Processing deposits and issues of monetary metals and coins.*—This activity covers the cost of receiving, weighing, testing, and handling gold and silver bullion deposited with mints and assay offices and the cost of issuing these metals. The cost of receiving, counting, and reviewing uncurrent coin returned to the mints and the cost of enforcing the regulations issued under the acts relating to newly mined domestic silver and the Gold Reserve Act of 1934 are also included.

SELECTED UNITS OF MEASURABLE WORK LOAD

	1949 actual	1950 estimate	1951 estimate
Number of deposit transactions.....	12,618	15,000	15,000
Number of fine ounces of silver received (exclusive of Reconstruction Finance Corporation and trust deposits).....	38,278,316	40,000,000	40,000,000
Value of gold received.....	\$1,407,093,902	\$1,500,000,000	\$1,500,000,000

3. *Protection of monetary metals and coins.*—This activity covers the cost of protecting the Government's monetary assets with a value of approximately \$26,000,000,000 located at seven different mint institutions. It includes the purchase of arms and ammunition; the purchase and maintenance of uniforms and accessories for guards; procurement, operation, and maintenance of protective devices; and the training of employees in the use of firearms and protective devices.

4. *Refining gold and silver bullion.*—This activity covers the cost of refining gold and silver bullion deposited with the mint service. Charges are made against the depositors for refinery services; however, the fees collected are deposited as miscellaneous receipts and are not available for payment of refining costs.

During the fiscal year 1949 refining operations were carried on only at the San Francisco Mint; the refineries at Denver and New York were closed for repairs. During 1950 and 1951 the refineries at San Francisco and Denver will be in operation.

5. *Executive direction.*—This activity covers the over-all management of the mint service.

[PAY AND ALLOWANCES]

【For pay and allowances prescribed by law for commissioned officers, cadets, warrant officers, petty officers, and other enlisted personnel, on active duty, and six civilian instructors; not exceeding \$10,000 for cash prizes for men for excellence in boatmanship, gunnery, target practice, and engineering competitions; transportation of dependents of Coast Guard personnel on active duty and retired and Reserve officers and of retired and Reserve enlisted personnel, of grades entitled to transportation of dependents in the Regular Coast Guard, when ordered to active duty (other than training) and upon relief therefrom; carrying out the provisions of the Act of June 4, 1920 (34 U. S. C. 943); not to exceed \$32,200 for cost of instruction of officers at non-Federal institutions, including books, laboratory equipment and fees, school supplies, and maintenance of students; motion-picture and other equipment for instructional purposes; rations or commutation thereof for cadets, petty officers, other enlisted personnel, members of the Coast Guard Auxiliary when assigned specific duties under the provisions of section 8, Act of February 19, 1941, as amended (14 U. S. C. 267), working parties in the field, and officers and crews of light vessels and tenders (14 U. S. C. 135); mileage and expenses allowed by law for officers, including per diem rates of allowance, and the Secretary is hereby authorized to prescribe per diem rates of allowance for Public Health Service officers detailed to the Coast Guard as authorized for Coast Guard officers; traveling expenses of other persons traveling on duty under orders from the Treasury Department, including transportation of cadets, enlisted personnel, and applicants for enlistment, with subsistence and transfers en route, or cash in lieu thereof; transportation in kind and subsistence to discharged cadets; uniform clothing for enlisted men as provided by law (14 U. S. C. 13); clothing for enlisted personnel authorized by law; civilian clothing, including an overcoat when necessary, the cost of all not to exceed \$30 per person to enlisted personnel given discharges for bad conduct, undesirability, unsuitability, or inaptitude; reimbursement in kind or in cash as authorized by law to persons in the Coast Guard for personal property lost, destroyed, or damaged; actual expenses of officers and cadets and quarters and subsistence of enlisted personnel on shore patrol, emergency shore detail and other detached duty, or cash in lieu thereof; hire of quarters for officers serving with troops where sufficient quarters are not possessed by the United States to accommodate them; hire of quarters

for Coast Guard personnel comparable to quarters assignable on a capital ship of the Navy, as authorized by the Secretary to meet emergency conditions, including officers and men on sea duty at such times as they may be deprived of their quarters on board ship due to repairs or other conditions which may render them uninhabitable: *Provided*, That under this authorization no funds may be expended for the hire of quarters for occupancy by the dependents of officers or enlisted personnel; expenses of recruiting for the Coast Guard; advertising for and obtaining enlisted personnel and applicants for appointment as cadets; training of enlisted personnel, including textbooks, school supplies, and correspondence courses; transfer of household goods and effects of Coast Guard and Coast Guard Reserve personnel on active duty and when ordered to active duty and upon relief therefrom, and the transfer of household goods and effects of deceased Coast Guard and Coast Guard Reserve personnel who die while on active duty, as prescribed by law and regulations; purchase of provisions for sale to Coast Guard personnel at isolated stations, and the appropriation reimbursed; and including not to exceed \$190,000 for recreation, amusement, comfort, contentment, and health of the enlisted personnel of the Coast Guard, to be expended pursuant to regulations prescribed by the Secretary; apprehension and delivery of deserters and stragglers (14 U. S. C. 147); \$76,250,000: *Provided*, That no part of this appropriation shall be used (1) to pay any enlisted man of the Coast Guard while detailed for duty at Coast Guard headquarters if such detail increases above thirty the total number of enlisted men detailed to such duty at any time, or (2) for increased pay for making aerial flights by nonflying officers or observers at rates in excess of those prescribed by law for the Air Force, which shall be the legal maximum rates as to such nonflying officers or observers.】 (Title 14 U. S. C.; 34 U. S. C. 189; 37 U. S. C. 101-103, 105-110, 112, d, e, 114, 116, 117, a, a-1, 118, 201; Public Law 219, 80th Cong.; Treasury and Post Office Departments Appropriation Act, 1950.)

Appropriated 1950, \$76,250,000

NOTE.—Estimate of \$87,656,205 for activities previously carried under this title has been transferred in the estimates to "Operating expenses, Coast Guard." The amounts obligated in 1949 and 1950 are shown in the schedule as comparative transfers.

APPROPRIATION TEXT

[GENERAL EXPENSES]

【For expenses necessary for the operation and maintenance of the Coast Guard ashore and afloat, except as specifically provided for in other appropriations, including personal services; services as authorized by section 15 of the Act of August 2, 1946 (5 U. S. C. 55a); printing and binding; purchase of not to exceed thirty-one passenger motor vehicles for replacement only, and maintenance, operation, and repair of aircraft; improvement of property for Coast Guard purposes, including rental, purchase, or use of additional land where necessary and the purchase of land for beacons, daymarks, and fog signals; subsistence and clothing for shipwrecked and destitute persons, including reimbursement, under rules prescribed by the Secretary, of Coast Guard personnel who furnish from their personal stock subsistence and clothing to such persons (33 U. S. C. 749); for payment of claims authorized under the Act of December 28, 1945, as amended (31 U. S. C. 222g); examination of estimates of appropriations in the field; not to exceed \$2,500 for contingencies for the Superintendent, United States Coast Guard Academy, to be expended in his discretion (14 U. S. C. 15k); pay-

ment of rewards for the apprehension and conviction, or for information helpful therein, of persons found interfering in violation of law with aids to navigation maintained by the Coast Guard (14 U. S. C. 50c); \$39,400,000: *Provided*, That the number of aircraft on hand at any one time shall not exceed one hundred and ten exclusive of planes and parts stored to meet future attrition. (5 U. S. C. 133y-16; 14 U. S. C.; 33 U. S. C. 720, 720a, 731, 748a; 46 U. S. C. 1, 239 (f), 372, 520; *Treasury and Post Office Departments Appropriation Act, 1950.*)

Appropriated 1950, \$39,400,000

NOTE.—Estimate of \$43,106,344 for activities previously carried under this title has been transferred in the estimates to "Operating expenses, Coast Guard." The amounts obligated in 1949 and 1950 are shown in the schedule as comparative transfers.

PROGRAM AND PERFORMANCE

The functions of the Coast Guard embrace, in general terms, maritime-law enforcement, saving life and property, providing navigational aids to maritime commerce and to air commerce over the ocean, promoting the efficiency and safety of the American merchant marine, and military readiness to serve as a part of the Navy in time of war or national emergency.

1. *Search, rescue, and law enforcement.*—In the performance of this activity, the Coast Guard maintains vessels on patrol, rescue vessels, life-saving stations, and aircraft at strategic points along the coasts and inland waterways. During floods and hurricanes, boats and personnel are sent to inland areas to assist in rescue and relief operations. An international ice-patrol and ice-observation service is maintained in the North Atlantic Ocean, and ice breaking is performed to keep navigation open on inland lakes, rivers and canals, and in harbors on the Atlantic coast. Emergency medical aid is furnished to persons in distress at sea.

The Coast Guard enforces laws relating to navigation and merchant shipping and acts as an auxiliary enforcement agency in respect to laws relating to customs and revenue, immigration, quarantine, the protection of fish and game, and for other matters which are normally within the jurisdiction of other Federal agencies but which require marine personnel and facilities for effective enforcement. With respect to merchant vessels, the Coast Guard administers laws and issues regulations relating to inspection, safety equipment, licensing and certification of officers and crews, and reviews plans for construction or alteration of merchant vessels. It investigates marine casualties and accidents and holds hearings on disciplinary cases. The Coast Guard sponsors and promotes the Coast Guard Auxiliary, which is a voluntary organization of yacht and motorboat owners capable of assisting in time of distress. The Coast Guard also provides leadership by supplying instructions in the principles and practices of safe navigation.

The program for 1951 will continue substantially at the same level of operations. However, it is planned to increase the number of aircraft in operation from 73 to 95. Provision is also made to improve the state of repair and maintenance of air stations, lifeboat stations, and certain supporting shore units.

There is given below a table of selected work units for the purpose of measuring the predominant types of work volume included under this activity.

SUMMARY OF SELECTED WORK-LOAD DATA

	1949 actual	1950 estimate	1951 estimate
Assistance cases	9,594	11,000	11,000
Lives saved or persons rescued	5,423	6,000	6,000
Vessels boarded and papers examined	13,693	20,000	25,000
Vessels reported for violations	3,300	4,000	5,000
Vessels signed on and signed off	16,117	16,000	16,000
Number of marine officer licenses issued, new and renewals	30,312	30,000	30,000
Seamen documents and certificates issued	70,614	71,000	71,000
Marine casualty investigations	2,405	2,500	2,500
Vessels inspected, annual	6,630	7,000	7,000
Vessels reinspected	2,880	2,880	2,880
Drydock inspections	5,590	6,000	6,000
Vessel plans and blueprints reviewed and acted upon	14,196	12,000	12,000
Factory inspections conducted (items)	564,107	575,000	575,000
Vessels numbered by Coast Guard (in lieu of documents)	446,108	458,000	470,000

2. *Operation of aids to navigation.*—This activity covers the maintenance of buoys, lighthouses, lightships, fog signal stations, radio beacons, and loran stations. These aids are maintained in the navigable waters of the United

COAST GUARD—Continued

Operating Expenses, Coast Guard—Continued

States, its Territories and possessions, and military bases overseas. The 1951 program is essentially the same as that for 1950. The increase is required for maintenance of the additional aids which were installed in 1950 and to improve the state of repair and maintenance of other aids and supporting units.

SUMMARY OF SELECTED WORK-LOAD DATA

	1949 actual	1950 estimate	1951 estimate
Lightships (including relief lightships).....	37	37	37
Lights, radiobeacons, and fog signals (attended).....	519	520	521
Shore aids (unattended).....	14,650	14,813	15,034
Buoys.....	21,671	22,362	23,045
Loran transmitting stations.....	31	31	31

3. *Operation of ocean stations for meteorological and other services.*—Weather ships are maintained and operated at various specified locations in the Atlantic and Pacific Oceans in accordance with the terms of international agreements. These ships serve as platforms for Weather Bureau observations and provide communication facilities for transmitting weather reports. In addition, they serve as mobile aids to navigation by providing check points for aircraft flying transoceanic routes and offer potential rescue facilities for both aircraft and surface vessels while crossing the oceans.

APPROPRIATION TEXT

OPERATING EXPENSES

For expenses necessary for the operation and maintenance of the Coast Guard, not otherwise provided for, including personal services at the seat of government; pay and allowances, as authorized by law, for commissioned officers, cadets, warrant officers, and enlisted personnel, on active duty; services as authorized by section 15 of the Act of August 2, 1946 (5 U. S. C. 55a); printing and binding; purchase of not to exceed 66 passenger motor vehicles for replacement only; maintenance, operation, and repair of aircraft; not to exceed \$190,000 for recreation, amusement, comfort, and contentment of enlisted personnel of the Coast Guard, to be expended pursuant to regulations prescribed by the Secretary; and examinations of estimates of appropriations in the field; \$137,850,000: Provided, That the number of aircraft on hand at any one time shall not exceed one hundred and ten exclusive of planes and parts stored to meet future attrition: Provided further, That no part of this appropriation shall be used to pay any enlisted man of the Coast Guard while detailed for duty at Coast Guard headquarters if such detail increases above thirty the total number of enlisted men so detailed to duty at such time: Provided further, That (a) the unobligated balances of appropriations to the Coast Guard for the fiscal years 1949 and 1950 for "Salaries, Office of the Commandant," "Pay and allowances," "General expenses," and "Civilian employees" shall be transferred on July 1, 1950, to the account established by the Surplus Fund-Certified Claims Act of 1949 for payment of certified claims; (b) amounts equal to the unliquidated obligations against such prior year appropriations on July 1, 1950, shall be transferred to and merged with this appropriation, and such merged appropriation shall be available as one fund, except for accounting purposes of the Coast Guard, for the payment of obligations properly incurred against such prior year appropriations and against this appropriation, but on July 1, 1951, there shall be transferred from such merged appropriation to the appropriation for payment of certified claims (1) any remaining unexpended balance of the 1949 appropriations so transferred, and (2) any remaining unexpended balance of the 1950 appropriations so transferred which is in excess of the obligations then remaining unliquidated against such appropriations. (Title 14 U. S. C.; 5 U. S. C. 133y-16; 33 U. S. C. 748a; 34 U. S. C. 189, 943; 46 U. S. C. 1, 170 (12), 239 (f), 288, 362, 364, 366, 369, 372, 375, 381, 382 (b), 391, 392, 395, 404, 406, 408, 435, 520, 526, 545, 660, 672; Public Laws 143, 207, 81st Cong.; Treasury and Post Office Departments Appropriation Act, 1950.)

PROGRAM AND PERFORMANCE

The funds requested are for capital investment in Coast Guard operating facilities such as the establishment and improvement of aids to navigation, the acquisition of aircraft, the replacement or improvement of vessels, and the replacement or improvement of shore structures.

1. *Search, rescue, and law enforcement.*—This part of the program provides funds for purchase of aircraft and improvements or alterations at six lifeboat stations and six other supporting shore units. The principal increases in 1951 are to carry out an aircraft replacement program, for purchasing of additional aircraft, and for improvements in various supporting units.

2. *Ocean stations.*—This activity covers capital investments in ships and facilities used for ocean weather reporting. No new expenditure for projects of this character are anticipated in the 1951 program.

3. *Operation of aids to navigation.*—The program for 1951 provides funds for replacement of one of the overage light vessels; for improvements or changes in aids to navigation, a part of which is related to United States Army Engineer's channel or harbor improvement projects; for construction of a chain of three loran stations to provide loran service in the Gulf of Alaska; and for improvements or rebuilding at seven repair depots.

Total obligations.....	11,950,061	14,083,000	15,575,000

PROGRAM AND PERFORMANCE

The funds available in the foregoing schedule are for the payment of retired pay of the military personnel of the Coast Guard, members of the former Lifesaving Service, members of the former Lighthouse Service, and retired personnel of the Coast Guard Reserve. The increase in the 1951 program is due to an increase in retirement pay and an increase in the number of personnel on the retirement list.

PROPOSED LEGISLATION

Old-age and survivors insurance program.—The President's recommendation for the extension and improvement of the old-age and survivors insurance program and the addition of permanent and temporary disability insurance thereto, will involve additional pay-roll contributions to and higher benefit disbursements from the trust fund. This proposed legislation is more fully covered under the Federal Security chapter.

STATUTORY PUBLIC DEBT RETIREMENTS

Permanent indefinite appropriation:
Cumulative Sinking Fund—

Total obligations.....			

PROGRAM AND PERFORMANCE

This appropriation enables the Secretary of the Treasury to maintain the cumulative sinking fund in accordance with the terms of the Second Liberty Bond Act and various other enabling acts for the retirement of bonds and notes at maturity or for the redemption or purchase thereof before maturity by the Secretary of the Treasury at such prices and upon such terms and conditions as he shall prescribe, but in no case shall the average cost of the bonds and notes purchased exceed par and accrued interest (31 U. S. C. 767, 767 (a), 767 (b); 40 U. S. C. 410 (b)).

APPROPRIATION OR ESTIMATE

Appropriation (estimate) 1950, **\$619,641,600**
Estimate 1951, **\$619,641,600**

Balance available in subsequent year..	-1	-67	-208,067
Total obligations.....	178,200	260,600	

PROGRAM AND PERFORMANCE

The amounts paid as franchise taxes to the United States by Federal intermediate credit banks shall in the discretion of the Secretary of the Treasury be used to supplement the gold reserve held against outstanding United States notes or shall be applied to the reduction of the outstanding bonded indebtedness of the United States under regulations as prescribed by the act of August 19, 1937 (50 Stat. 715; 12 U. S. C. 1072).

OBLIGATIONS BY ACTIVITIES

Retirement of the public debt—1949, \$178,200; 1950, \$260,600.

OBLIGATIONS BY OBJECTS

15 Public debt retirement—1949, \$178,200; 1950, \$260,600.

APPROPRIATION OR ESTIMATE

Appropriated (estimate) 1950, **\$260,666** Estimate 1951, **\$208,000**

Redemption of Bonds, Etc., From Deposits of Excess Capital of Commodity Credit Corporation, Bureau of the Public Debt—

Total obligations.....		48,943,000	

PROGRAM AND PERFORMANCE

In the event that any appraisal shall establish that the net worth of the Commodity Credit Corporation is in excess of \$100,000,000, such excess shall, as soon as practicable after such appraisal, be deposited in the Treasury by the Commodity Credit Corporation and be credited to miscellaneous receipts. The Secretary of the Treasury is directed, as soon as practicable, to use any

amounts so deposited to retire an equivalent amount of the public debt, which amount shall be in addition to any other amount required for use for such purpose (act of Mar. 8, 1938, 52 Stat. 107; 15 U. S. C. 713a-2).

OBLIGATIONS BY ACTIVITIES

Retirement of the public debt—1950, \$48,943,000.

OBLIGATIONS BY OBJECTS

15 Public debt retirement—1950, \$48,943,000.

Special account:

Redemption of Bonds and Notes From War Damage Corporation Earnings—

EXPLANATORY STATEMENT

GENERAL STATEMENT

The District of Columbia constitutes a political entity in which are exercised not only municipal but also county and State functions, such as public education, administration of justice, maintenance of a unit of the National Guard, promotion of family welfare, care of the indigent, custody of mental defectives and delinquents, protection of the interests of labor, metropolitan area planning, etc. While the municipal functions are administered principally by the Board of Commissioners, District of Columbia, most of the county and State functions are carried on by other agencies, some local and some Federal in character.

In contrast to this diversity in the administration of District functions under the Constitution, Congress is empowered "to exercise exclusive legislation in all cases whatsoever" on behalf of the District of Columbia as the seat of government of the United States. Congress acts in municipal matters as a city council, and in dealing with the broader aspects of the local government, as a county board and a State legislature. In this connection, Congress enacts the District's revenue measures and appropriates the money thus raised to carry on the government of the District of Columbia. District revenues from all sources are covered into the United States Treasury and credited either to the general fund, the highway fund, the water fund, special funds, or a trust fund, and no expenditure can be made from any of these funds, other than special and trust funds, without specific appropriation by Congress.

Under the law, the District estimates of appropriation are submitted to the Bureau of the Budget for incorporation in the Budget of the United States. The Bureau, however, does not examine the estimates of the District in minute detail, but confines its attention more to matters of policy which concern the Federal Government and present and proposed revenue measures required to balance the District budget.

The estimates of revenues for the general, highway, water, and trust funds are found in supporting statement No. 1. Estimates of appropriations for the same funds are shown in supporting statement No. 2. Attention is also directed to the summary table at the beginning of this chapter.

GENERAL FUND

Revenues accruing to the general fund of the District of Columbia are used to finance the administrative offices, schools, libraries, health, recreation, sanitation, welfare, corrections, certain public works, and other operating activities. These revenues are realized from real, personal, and other property taxes; sales and gross receipts taxes on alcoholic beverages, cigarettes, insurance, motor vehicles, public utilities, gross sales, and other business; licenses and permits; individual and corporation income taxes; inheritance and estate taxes; certain earnings and miscellaneous revenues; and the Federal payment. The largest item of revenue in the general fund comes from realty and personal property taxes, which amounts to

approximately 42 percent of the total. The levy is based on an estimated assessed valuation of \$1,939,000,000, taxed at the rate of \$2.15 per \$100 for realty and \$2 per \$100 for personal property. The estimated valuation is \$68,000,000 higher in 1951 than for the current year. The Federal payment is estimated at \$12,000,000, which is the same amount as was appropriated in fiscal year 1950. Of this amount, \$11,000,000 is credited to the general fund and \$1,000,000 to the water fund.

The estimate of general-fund revenues on the present tax base for the fiscal year 1951, including the Federal payment of \$11,000,000 and a surplus of \$6,195,144 from 1950, totals \$106,105,144, which amount is \$2,224,469 greater than the estimated obligations for 1951. The revenue estimates for 1951 and the revised estimates for 1950 reflect the new income anticipated under the provisions of the "District of Columbia Act of 1949."

General-fund estimates of appropriation for 1951 show an over-all increase of approximately 9.4 percent over 1950 estimates. However, 4.4 percent of the increase is for capital outlay, leaving a 5-percent increase in operating expenses. The total increase is reflected largely in public schools, welfare and corrections, health, police, fire, policemen's and firemen's relief, and public works programs. In addition to regular appropriations, new contract authorizations amounting to \$8,082,150 are requested.

HIGHWAY FUND

Highway-fund revenues are realized from a gasoline tax, automotive registration and weight tax, motor-vehicle fees of various types, and paving assessments. The estimated revenues from these sources for the fiscal year 1951, plus available surpluses, total \$9,905,355, which will be \$7,155 in excess of the estimated obligations.

Estimates of appropriation chargeable to the highway fund for 1951 show an over-all increase of only 1.8 percent over 1950 estimates. This increase is reflected largely in the Department of Vehicles and Traffic and police control of highway traffic.

WATER FUND

Water-fund revenues are derived from the sale of water to residents of the District of Columbia and to Arlington County, Va., from the Federal payment of \$1,000,000 provided for under the District of Columbia Revenue Act of 1947; from water-main assessments; from interest on investments; and from miscellaneous receipts. Total revenues for the fiscal year 1951, including surplus funds and sales of investment securities, are estimated at \$6,262,000, which will be \$182,000 above the estimated obligations for 1951.

The estimates of appropriation for fiscal year 1951 from the water fund amount to \$6,080,000, which are \$375,312 below the estimates for the fiscal year 1950, or a decrease of approximately 5.8 percent.

Capital outlays amounting to \$2,233,000 account for 37 percent of the fiscal year 1951 estimates, as compared with 44 percent of the 1950 estimates. These capital outlay projects will provide important improvements in the District water distribution system and the Washington Aqueduct.

ESTIMATES OF APPROPRIATION

APPROPRIATION TEXT

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That there are appropriated for the District of Columbia for the fiscal year ending June 30, [1950] 1951, out of (1) the general fund of the District of Columbia, hereinafter known as the general fund, such fund being composed of the revenues of the District of Columbia other than those applied by law to special funds, and \$11,000,000, which is hereby appropriated for the purpose out of any money in the Treasury not otherwise appropriated (to be advanced July 1, [1949] 1950), (2) highway funds, established by law (D. C. Code, title 47, ch. 19), and (3) the water fund, established by law (D. C. Code, title 43, ch. 15) and \$1,000,000, which is hereby appropriated for the purpose out of any money in the Treasury not otherwise appropriated (to be advanced July 1, [1949] 1950), sums as follows:

From the general fund: All sums appropriated under the following heads: General administration, fiscal service, compensation and retirement fund expenses, *District debt service*, regulatory agencies, public schools, Public Library, Recreation Department, Metropolitan Police, Fire Department, policemen's and firemen's relief, Veterans' Services, courts, Health Department, Department of Corrections, public welfare, public works (excluding those items designated as payable from the highway and water funds), National Guard, National Capital Parks, National Capital Park and Planning Commission, and National Zoological Park;

From the highway fund: All sums appropriated under public works designated as payable from the highway fund; and

From the water fund: All sums appropriated under public works and Washington aqueduct, designated as payable from the water fund; namely:

【The unobligated balance of the \$60,000 contained in the District of Columbia Appropriation Act, 1948, for alterations and additions at the Central High School shall cease to be available for this purpose but is hereby made available for alterations at the Bell Vocational High School Building, and shall remain available until expended: *Provided*, That not to exceed \$2,000 of the balance may be transferred to the credit of the appropriation account "Office of Municipal Architect, construction services", and be available for the preparation of plans and specifications for said alterations;】

【The contract authorization for the Spingarn Senior High School specified in the District of Columbia Appropriation Act, 1948, is hereby increased to \$3,600,000;】

For beginning construction of an eight-room addition to the Bunker Hill Elementary School, including auditorium, lunchroom, physical education and recreation facilities, improvements and alterations of the present building, and treatment of grounds, \$300,000, and the Commissioners are authorized to enter into a contract or contracts for said construction at a total cost not to exceed \$650,000: Provided, That not to exceed \$22,750 of the amount herein appropriated may be transferred to the credit of the appropriation account "Office of Municipal Architect, construction services", and be available for the preparation of plans and specifications for said construction;

For improvements and alterations at Central Senior High School, \$70,000;

For beginning construction of an eight-room addition to the Davis Elementary School, including auditorium, improvements and alterations of the present building, and treatment of grounds, \$300,000, and the Commissioners are authorized to enter into a contract or contracts for said construction at a total cost not to exceed \$440,000;

For beginning construction of an eight-room addition to the Keene Elementary School, including auditorium, lunchroom, physical education and recreation facilities, improvements and alterations of the present building, and treatment of grounds, \$300,000, and the Commissioners are authorized to enter into a contract or contracts for said construction at a total cost not to exceed \$590,000: Provided, That not to exceed \$1,750 of the amount herein appropriated may be transferred to the credit of the appropriation account "Office of Municipal Architect, construction services", and be available for the preparation of plans and specifications for said construction;

For the construction of an extensible eight-room elementary-school building, including treatment of grounds, in the vicinity of River Terrace Northeast, \$317,000;

For the preparation of plans and specifications for a new sixteen-room elementary-school building, including auditorium, lunchroom, physical education and recreation facilities, to replace the present Seaton Elementary School, to be constructed on a site in the vicinity of Third and Eye Streets Northwest, \$20,000, which amount may be credited to the appropriation account "Office of Municipal Architect, construction services";

For beginning construction of an addition to the Francis Junior High School, including one gymnasium, new cafeteria, improvements and alterations of the present building, and treatment of grounds, \$200,000, and the Commissioners are authorized to enter into a contract or contracts for said construction at a total cost not to exceed \$380,000: Provided, That not to exceed \$2,500 of the amount herein appropriated may be transferred to the credit of the appropriation account "Office of Municipal Architect, construction services", and be available for the preparation of plans and specifications for said construction;

For beginning construction of a new extensible junior high-school building, including recreation facilities and treatment of grounds, to be constructed on a site in the vicinity of Pomeroy Road, Douglas Place, and Stanton Road Southeast, \$200,000, and the Commissioners are authorized to enter into a contract or contracts for said construction at a total cost not to exceed \$2,050,000: Provided, That not to exceed \$12,950 of the amount herein appropriated may be transferred to the credit of the appropriation account "Office of Municipal Architect, construction services", and be available for the preparation of plans and specifications for said construction;

For continuing construction of the Spingarn Senior High School, \$1,500,000;

For beginning construction of a new junior high-school building to replace the present Terrell Junior High School building, including recreation facilities and treatment of grounds, to be constructed on a site in the vicinity of First and Pierce Streets Northwest, \$900,000, and the Commissioners are authorized to enter into a contract or contracts for said construction at a total cost not to exceed \$1,870,000: Provided, That not to exceed \$6,650 of the amount herein appropriated may be transferred to the credit of the appropriation account "Office of Municipal Architect, construction services", and be available for the preparation of plans and specifications for said construction;

For completion of plans and specifications for a new senior high-school building to replace the present Armstrong Senior High School building, including recreation facilities and treatment of grounds, to be constructed on a site owned by the District of Columbia in Brentwood Park, \$75,000, which amount may be credited to the appropriation account "Office of Municipal Architect, construction services";

Not to exceed \$35,000 of the unexpended balance of the appropriation of \$517,440 for the construction of an elementary-school building in the vicinity of Good Hope and Naylor Roads Southeast, to replace the present Stanton permanent and temporary buildings, contained in the District of Columbia Appropriation Act, 1950, is hereby made available for the completion of the second floor of the east wing of the Burdick Vocational High School, including improvements and alterations of the present building, and shall remain available until expended;

PUBLIC SCHOOLS—Continued

Capital Outlay, Construction, Public Schools, District of Columbia—Continued

Not to exceed \$79,000 of the unexpended balance of the appropriation of \$625,000 for the construction of an elementary-school building in the vicinity of Oxon Run Southeast, contained in the District of Columbia Appropriation Act, 1950, is hereby made available for the completion of the second floor of the Slove Elementary School, including improvements and alterations of the present building, and improvements of grounds, and shall remain available until expended;

The appropriation of \$60,000 for the completion of the assembly hall-gymnasium and playroom at the Patterson Elementary School, contained in the District of Columbia Appropriation Act, 1949, is hereby made available also for improvements and alterations of the existing Patterson Elementary School building, and shall remain available until expended;

In all, for construction, including preparation of plans and specifications, **[\$2,075,250] \$4,182,000**, to be immediately available as one fund and to remain available until expended, to be disbursed and accounted for as "Capital outlay, construction, public schools, District of Columbia", and transfers may be made within the said fund between projects without regard to fiscal years and without reference to the established limitations of cost, or limitations on appropriations for public school construction specified in the District of Columbia Appropriation Act, 1946, except that the cost limitation for no one project may thereby be increased by more than 10 per centum.

For alterations and additions at the Bell Vocational High School building, \$225,000, to remain available until expended, and to be disbursed and accounted for as "Capital outlay, construction, public schools, District of Columbia". (District of Columbia Appropriation Act of 1950; Supplemental Appropriation Act, 1950.)

APPROPRIATION TEXT

Operating expenses, Health Department (excluding hospitals): For expenses necessary for the general administration, medical services, laboratories, and inspection services of the Health Department, including the enforcement of the Acts relating to the prevention of the spread of contagious and infectious diseases in the District of Columbia; the maintenance of tuberculosis and venereal-disease clinics and dispensaries; the conduct of hygiene and sanitation work in schools; the maintenance of a dental-health service; the maintenance of a maternal and child-health service; housekeeping assistance in cases of authentic indigent sick at salary rates to be fixed by the Commissioners; the maintenance of a service for the care of handicapped and crippled children; the maintenance of a cancer-control project; the maintenance of a public health engineering

service; the maintenance of a nursing service; the maintenance of a psychiatric service; the maintenance of an emergency ambulance service; the operation and maintenance of laboratories; out-patient relief of the poor, including medical and surgical supplies, artificial limbs [and pay of physicians at rates to be fixed by the Commissioners] and appliances, eyeglasses, and fees to physicians under contracts to be made by the Health Officer and approved by the Commissioners; and the enforcement of the Acts relating to the drainage of lots and abatement of nuisances in the District of Columbia, the Act relating to the adulteration of foods, drugs, and candy, the Act relating to the manufacture and sale of mattresses, the Act relating to the manufacture, sale, and transportation of adulterated or misbranded or poisonous or deleterious foods, drugs, medicines, and liquors, the Act relating to the licensing of undertakers, the Uniform Narcotic Drug Act, and the Act relating to the sale of milk, cream, and ice cream; such expenses to include [one physician at \$6,145 per annum to be appointed without regard to civil-service laws;] contract investigational service; services as authorized by section 15 of the Act of August 2, 1946 (5 U. S. C. 55a); uniforms; rent; [purchase of passenger motor vehicles;] manufacture of serum in indigent cases; and allowances for privately owned automobiles used for the performance of official duties [(not to exceed \$264 per annum for each automobile for employees other than] by dairy-farm inspectors [and] at the rate of 7 cents per mile but not more than \$840 per annum for each automobile [for dairy-farm inspectors); \$2,100,593]; \$2,504,000: *Provided*, That the Commissioners may, without creating any obligation for the payment of money on account thereof, accept such volunteer services as they may deem expedient in connection with the establishment and maintenance of the medical services herein provided for: *Provided further*, That not to exceed \$400 may be expended for special services in detecting adulteration of drugs and foods, including candy and milk and other products and services subject to inspection by the Health Department. (44 Stat. 208-211; 61 Stat. 711; District of Columbia Appropriation Act of 1950.)

APPROPRIATION TEXT

Agency services: For expenses necessary for certification of persons eligible for any public benefits which are or may become available as may be approved by the Commissioners, relief and rehabilitation for purposes of employment of indigent residents of the District of Columbia, to be expended under rules and regulations prescribed by the Commissioners or their designated agent or agency; vocational rehabilitation of disabled residents of the District of Columbia in accordance with the provisions of the Act of July 6, 1943 (57 Stat. 374); aid to dependent children in accordance with the provisions of the Act of June 14, 1944 (58 Stat. 277); assistance against old-age want, as authorized by law; aid for needy blind persons, as authorized by law; services for children in their own homes; distribution of surplus commodities and relief milk to public and charitable institutions; [\$131,871 for necessary expenses, including personal services without regard to the Classification Act of 1923, as amended,] \$133,047 for the carrying out, under regulations to be prescribed by the Commissioners of a "penny milk" program for the school children of the District, including the purchase and distribution of milk under agreement with the United States Department of Agriculture; maintenance pending transportation, and transportation, of indigent nonresident persons; transportation of other indigent persons, including veterans and their families; deportation of nonresident insane persons, as provided by law, including persons held in the psychopathic ward of the Gallinger Municipal Hospital; burial of indigent residents of the District of Columbia; for placing and visiting children; board and care of all children committed to the guardianship of the Board of Public Welfare by the courts of the District, including white girls committed to the National Training School for Girls and all children accepted by said Board for care as authorized by law; temporary care of children pending investigation or while being transferred from place to place, with authority to pay for the care of children in institutions under sectarian control; for continuous maintenance of foster homes for temporary or emergency board and care of nondelinquent children; care and maintenance of women and children under contracts to be made by the Board of

Public Welfare and approved by the Commissioners with the Florence Crittenton Home, Saint Ann's Infant Asylum and Maternity Hospital, the House of Mercy, and other institutions caring for unmarried mothers; and for burial of children dying while beneficiaries under this appropriation; including repair and upkeep of building; [\$3,849,790] \$4,164,000: *Provided*, That collections from the milk program shall be paid to the collector of taxes, District of Columbia, for deposit in the Treasury of the United States to the credit of the District: *Provided further*, That no part of this appropriation shall be used for the purpose of visiting any ward of the Board of Public Welfare placed outside of the District of Columbia and the States of Virginia and Maryland, and a ward placed outside said District and the States of Virginia and Maryland shall be visited not less than once a year by a voluntary agent or correspondent of said Board, and said Board shall have power to discharge from guardianship any child committed to its care: *Provided further*, That employees using privately owned automobiles for the deportation of nonresident insane, the transportation of indigent persons, or the placing of children may be reimbursed as authorized by [section 3 of] the Act of August 2, 1946 (60 Stat. 806) June 9, 1949 (Public Law 92, Eighty-first Congress), but not to exceed \$900 for any one individual. (49 Stat. 744, 747, 758-760; 55 Stat. 882; District of Columbia Appropriation Act of 1950.)

APPROPRIATION TEXT

Capital outlay, Street and Bridge Divisions (payable from highway fund): For expenses necessary for the grading, surfacing, paving, repaving, widening, altering, and otherwise improving streets, avenues, roads, and alleys, including curbing and gutters, directional and pedestrian islands at various intersections to permit of proper traffic-light control and channelization of traffic, drainage structures, culverts, suitable connections to storm-water sewer

system, retaining walls, replacement and relocation of sewers, water mains, fire hydrants, traffic lights, street lights, fire-alarm boxes, police-patrol boxes, and curb-line trees, when necessary, Federal-aid highway projects under section 1 (b) of the Federal Aid Highway Act of 1938, and highway structure projects financed wholly from the highway fund upon the approval of plans for such structures by the Commissioners; for carrying out the provisions of existing laws which authorize the Commissioners to open, extend, straighten, or widen streets, avenues, roads, or highways, in accordance with the plan of the permanent system of highways for the District of Columbia, and alleys and minor streets, and for the establishment of building lines in the District of Columbia, including the procurement of chains of title; and for assessment and permit work, paving of roadways under the permit system, and construction of sidewalks and curbs around public reservations and municipal and United States buildings, including purchase or condemnation of streets, roads, and alleys, and of areas less than two hundred and fifty square feet at the intersection of streets, avenues, or roads in the District of Columbia, to be selected by the Commissioners, **[\$5,125,000]** \$5,000,000, to remain available until June 30, **[1951]** 1952: *Provided*, That appropriations contained in this Act for highways, sewers, Division of Sanitation, and the Water Division shall be available for snow removal when ordered by the Commissioners in writing: *Provided further*, That in connection with the purchase and installation of a municipal asphalt plant on District-owned property the Commissioners are authorized to make expenditures from this appropriation in an amount not exceeding \$150,000 for the preparation of the site, including the construction of sea walls, dock facilities, and a railroad siding: *Provided further*, That in connection with the highway-planning survey, involving surveys, plans, engineering, and economic investigations of projects for future construction in the District of Columbia, as provided for under section 10 of the Federal Aid Highway Act of 1938, and in connection with the construction of Federal-aid highway projects under section 1 (b) of said Act, and highway-structure projects financed wholly from the highway fund, this appropriation shall be available for the employment of engineering or other professional services by contract or otherwise, and without regard to section 3709 of the Revised Statutes and the civil-service and classification laws, and section 15 of the Act of August 2, 1946 (5 U. S. C. 55a), and for engineering and incidental expenses: *Provided further*, That this appropriation and the appropriation "Operating expenses, Street and Bridge Divisions, highway fund," shall be available for the construction and repair of pavements of street railways, in accordance with the provisions of the Merger Act (47 Stat. 752), and the proportion of the amount thus expended which under the terms of the said Act is required to be paid by the street-railway company shall be collected, upon the neglect or the refusal of such street-railway company to make such payment, from the said street-railway company in the manner provided by section 5 of the Act of June 11, 1878, and shall be deposited to the credit of the appropriation for the fiscal year in which it is collected: *Provided further*, That assessments in accordance with existing law shall be made for paving and repaving roadways, alleys, and sidewalks where such roadways, alleys, and sidewalks are paved or repaved with funds herein appropriated: *Provided further*, That in connection with projects to be undertaken as Federal-aid projects under the provisions of the Federal Aid Highway Act of December 20, 1944, the Commissioners are authorized to enter into contract or contracts for those projects in such amounts as shall be approved by the Public Roads Administration, Federal Works Agency: *Provided further*, That **[this appropriation may be used for payment to contractors and for other expenses in connection with the expense of design, construction, and inspection of]** the Commissioners are hereby authorized to construct grade-crossing elimination and other construction projects authorized under section 8 of the Act of June 16, 1936 (49 Stat. 1521), and section 1 (b) of the Federal Aid Highway Act of 1938, as amended, in accordance with the provisions of said Acts, and this appropriation may be used for payment to contractors and other expenses in connection with the expenses of design, construction, and inspection pending reimbursement to the District of Columbia by the **[Public Roads Administration, Federal Works Agency]** Bureau of Public Roads, Department of Commerce, reimbursement to be credited to **[fund]** the appropriation from which payment was made: *Provided further*, That the Commissioners are authorized to fix or alter the respective widths of sidewalks and roadways (including tree spaces and parking) of all highways that may be improved under appropriations contained in this Act: *Provided further*, That no appropriation in this Act shall be available for repairing, resurfacing, or paving any street, avenue, or roadway by private contract unless the specifications for such work shall be so prepared as to permit of fair and open competition in paving materials as well as in price: *Provided further*, That in addition to the provision of existing law requiring contractors to keep new pavements in repair for a period of one year from the date of the

completion of the work, the Commissioners shall further require that where repairs are necessary during the four years following the said one-year period, due to inferior work or defective materials, such repairs shall be made at the expense of the contractor, and the bond furnished by the contractor shall be liable for such expense. (District of Columbia Appropriation Act of 1950.)

APPROPRIATION TEXT

Department of Vehicles and Traffic (payable from highway fund): For expenses necessary for the Department of Vehicles and Traffic, including purchase, installation, modification, operation, and maintenance of electric traffic lights, signals, controls, markers, and directional signs; purchase of motor-vehicle identification number plates; installation, operation, and maintenance of parking meters on the streets of the District of Columbia, \$20,000 for traffic safety education without reference to any other law; \$200 for membership in the American Association of Motor Vehicle Administrators; for all expenses necessary in carrying out the provisions of the District of Columbia Motor Vehicle Parking Facility Act of 1942, approved February 16, 1942 (56 Stat. 90), including personal services [(except a director)]; and uniforms for motor vehicle inspectors; [\$929,800] \$1,116,000: *Provided*, That no part of this or any other appropriation contained in this Act shall be expended for building, installing, and maintaining streetcar loading platforms and lights of any description employed to distinguish same, except that a permanent type of platform may be constructed from appropriations contained in this Act for street improvements when plans and

locations thereof are approved by the Public Utilities Commission and the Director of Vehicles and Traffic: *Provided further*, That the street-railway company shall after construction maintain, mark, and light the same at its expense: *Provided further*, That fees from parking meters shall be deposited to the credit of the highway fund, except that the Commissioners are authorized and empowered to pay the purchase price and the cost of installation of new meters or devices installed during the fiscal years [1949] 1950 and [1950] 1951 from fees collected from such new meters or devices, which fees are hereby appropriated for such purpose, until such time as contracts of purchase obligated during the fiscal years [1949] 1950 and [1950] 1951 have been paid, and thereafter such new meters or devices shall become the property of the Government of the District of Columbia and all fees collected from such new meters or devices shall be deposited to the credit of the highway fund; *Provided further*, That the Commissioners are authorized and directed to designate, reserve, and properly mark appropriate and sufficient parking spaces on the streets adjacent to all public buildings in the District for the use of Members of Congress engaged on public business: *Provided further*, That the incumbent on July 1, 1944, of the authorized position of Registrar of Titles and Tags, whose duties shall be as prescribed in the District of Columbia Appropriation Act, 1945, shall hereafter be continued for compensation purposes in grade 9 of the [clerical, administrative, and fiscal service] general schedule under the Classification Act of [1923, as amended] 1949. (District of Columbia Appropriation Act of 1950.)

Appropriated 1950, \$949,300 Estimate 1951, \$1,116,000

* Includes \$19,500 appropriated in the Supplemental Appropriation Act, 1950.

APPROPRIATION TEXT

GENERAL PROVISIONS

SEC. 2. Except as otherwise provided herein, all vouchers covering expenditures of appropriations contained in this Act shall be audited before payment by or under the jurisdiction only of the Auditor for the District of Columbia and the vouchers as approved shall be paid by checks issued by the Disbursing Officer without countersignature.

SEC. 3. No part of any appropriation contained in this Act or authorized hereby to be expended shall be used to pay the compensation of any officer or employee of the Government of the United States, or of the District of Columbia unless such person is a citizen of the United States, or a person in the service of the United States or the District of Columbia on the date of the approval of this Act who being eligible for citizenship had theretofore filed a declaration of intention to become a citizen or who owes allegiance to the United States. This section shall not apply to citizens of the Commonwealth of the Philippines or nationals of those countries allied with the United States in the prosecution of the war effort.

SEC. 4. No part of any appropriation contained in this Act shall be used to pay the salary or wages of any person who engages in a

GENERAL PROVISIONS—Continued

strike against the Government of the United States or the government of the District of Columbia, or who is a member of an organization of Government employees that asserts the right to strike against the Government of the United States or the government of the District of Columbia, or who advocates, or is a member of an organization that advocates, the overthrow of the Government of the United States by force or violence: *Provided*, That for the purposes hereof an affidavit shall be considered prima facie evidence that the person making the affidavit has not contrary to the provisions of this section engaged in a strike against the Government of the United States or the government of the District of Columbia, is not a member of an organization of Government employees that asserts the right to strike against the Government of the United States or the government of the District of Columbia, or that such person does not advocate, and is not a member of an organization that advocates, the overthrow of the Government of the United States by force or violence: *Provided further*, That any person who engages in a strike against the Government of the United States or the government of the District of Columbia or who is a member of an organization of Government employees that asserts the right to strike against the Government of the United States or the government of the District of Columbia, or who advocates, or who is a member of an organization that advocates, the overthrow of the Government of the United States by force or violence, and accepts employment the salary or wages for which are paid from any appropriation contained in this Act shall be guilty of a felony and, upon conviction, shall be fined not more than \$1,000 or imprisoned for not more than one year, or both: *Provided further*, That the above penalty clause shall be in addition to, and not in substitution for, any other provisions of existing law.

Sec. 5. Whenever in this Act an amount is specified within an appropriation for particular purposes or object of expenditure, such amount, unless otherwise specified, shall be considered as the maximum amount which may be expended for said purpose or object rather than an amount set apart exclusively therefor.

Sec. 6. Work performed for repairs and improvements under appropriations contained in this Act may be by contract or otherwise, as determined by the Commissioners; and the Commissioners are authorized to establish a working fund for such purposes without fiscal year limitation, said fund to be reimbursed for repairs and improvements performed under that fund from available appropriations contained in this Act, and transfers are authorized to be made to said fund in advance if required by the Director of Construction, subject to subsequent adjustment, from appropriations contained in this Act for repairs and improvements, and such working fund shall be available for necessary expenses including personal services, allowances for privately owned automobiles, and printing and binding.

Sec. 7. Appropriations in this Act shall be available, when authorized by the Commissioners, for allowances for privately owned automobiles used for the performance of official duties at 7 cents per mile but not to exceed \$264 per annum for each automobile, unless otherwise therein specifically provided: *Provided*, That the total expenditures for this purpose shall not exceed **[\$42,372] \$51,000**, excluding the automobile allowances for the deportation of non-resident insane, the transportation of indigent persons, and the placing of children by the Board of Public Welfare.

Sec. 8. Appropriations in this Act shall be available for the payment of dues and expenses of attendance at meetings of organizations concerned with the work of the District of Columbia government, when authorized by the Commissioners: *Provided*, That the total expenditures for this purpose shall not exceed **[\$13,700] \$14,000**.

Sec. 9. The Commissioners are hereby authorized in their discretion to invest and reinvest at any time in United States Government securities, with the approval of the Secretary of the Treasury, any part of the general fund, highway fund, water fund, or trust funds, of the District of Columbia, not needed to meet current expenses during the fiscal year, to deposit the interest accruing from such investments to the credit of the fund from which the investment was made, and the Secretary of the Treasury is authorized to sell or exchange such securities for other Government securities, and deposit the proceeds to the credit of the appropriate fund.

Sec. 10. Appropriations for necessary expenses shall be available for personal services and printing and binding and, when authorized by the Commissioners or by the purchasing officer and the auditor, acting for the Commissioners, printing and binding may be performed by the District of Columbia Division of Printing and Publications without reference to fiscal-year limitations.

Sec. 11. Appropriations in this Act shall be available, when authorized by the Commissioners, for stenographic reporting service as authorized by section 15 of the Act of August 2, 1946 (5 U. S. C. 55a). (*District of Columbia Appropriation Act of 1950.*)

PART III

SPECIAL ANALYSES AND TABLES

Explanation of the Estimates of Receipts
Analysis of Investment, Operating, and Other Budget Expenditures
Federal Activities in Civil and Defense Public Works
Federal Aid to State and Local Governments
Combined Statements of Budgets Submitted Under the Government Corporation
Control Act

1107

INTRODUCTION TO PART III

Part III of the Budget presents five special analyses, together with related tabular material. These analyses are separately listed and discussed below.

EXPLANATION OF THE ESTIMATES OF RECEIPTS

This statement, prepared by the Treasury Department, discusses the estimated Budget receipts from each of the principal sources for the fiscal years 1950 and 1951, in comparison with actual receipts for the fiscal year 1949.

ANALYSIS OF INVESTMENT, OPERATING, AND OTHER BUDGET EXPENDITURES

This special analysis presents a tentative new classification of Budget expenditures for the fiscal years 1949, 1950, and 1951. Its major purpose is to show, on the one hand, the amount of Federal expenditures to acquire assets or to give assistance which yield benefits beyond the current fiscal year, and, on the other hand, the amount of expenditures which provide current benefits or represent other operating expenses. The major categories of the classification are explained in the narrative statement. Also included in the narrative statement is a tabulation of expenditures on Federal assets according to their financial recoverability.

FEDERAL ACTIVITIES IN CIVIL PUBLIC WORKS AND NATIONAL DEFENSE CONSTRUCTION

This analysis deals with appropriations, other authorizations, and expenditures for public works in the fiscal years 1949, 1950, and 1951. Federal public works as used in this analysis include not only direct outlays on Federal projects or programs, but also Federal grants and loans to States and local public bodies, including cooperative organizations such as Rural Electrification Administration cooperatives and local public housing agencies. Assistance

for private construction is excluded. In general, the figures include only new construction and detailed planning of construction projects. However, in a few cases, they also include small amounts for related activities, such as surveys, maintenance, or land costs, where a single appropriation is used to finance both the new construction and the related activities. Expenditures from Government corporation checking accounts are shown on a gross basis in the tables but are adjusted to a net basis in the totals by deduction of collections.

FEDERAL AID TO STATE AND LOCAL GOVERNMENTS

Grants-in-aid and Federal revenues shared with the States and their subdivisions are set forth in a brief analysis. Like the article on Federal public works, this discussion is accompanied by a table of appropriations and expenditures for the fiscal years 1949, 1950, and 1951. Since some grants-in-aid are used to finance public works, certain items are included in both this analysis and the preceding one.

CONSOLIDATED STATEMENTS OF BUDGETS SUBMITTED UNDER THE GOVERNMENT CORPORATION CONTROL ACT

The primary financial statements in the business-type budgets which are submitted under the Government Corporation Control Act are summarized and interpreted in this section. The statement on source and application of funds and the list of amounts of net income or expense are for the fiscal years 1949, 1950, and 1951. The statement of condition is as of June 30, 1948, 1949, 1950, and 1951, the extra year being shown in order to provide the opening figures for the past fiscal year. The data shown here are taken from part II; they do not cover business-type budget statements contained therein which are not under the Government Corporation Control Act.

EXPLANATION OF THE ESTIMATES OF RECEIPTS

ON THE BASIS OF EXISTING LEGISLATION

The estimates of receipts from taxes and customs for the current and ensuing fiscal years under existing legislation are prepared in December each year by the Treasury Department. The estimates of miscellaneous receipts in general are prepared by the agency depositing the receipts in the Treasury.

TOTAL RECEIPTS

Total receipts (daily Treasury statement basis), before deductions for refunds and the appropriation to the Federal old-age and survivors insurance trust fund, are estimated in the amounts of \$42,185.3 million in the fiscal year 1950 and \$41,911.7 million in the fiscal year 1951, as compared with actual total receipts of \$42,773.5 million in 1949. Total receipts are therefore estimated to decline in the fiscal year 1950 by \$588.2 million from actual receipts in the fiscal year 1949 and by \$273.6 million in the fiscal year 1951 from the estimate for the fiscal year 1950.

The details of the estimated and actual receipts are shown in table 6, pages A11-A17. Throughout the tables shown in this exposition the figures are rounded and will not necessarily add to totals. This material utilizes the Budget classification of receipts.

Percentage distribution of total receipts by sources

Source ¹	Actual		Estimate	
	1948	1949	1950	1951
Direct taxes on individuals.....	47.5	43.8	44.2	45.2
Direct taxes on corporations.....	22.1	27.0	26.5	25.1
Excise taxes.....	16.0	17.7	18.1	18.2
Employment taxes.....	5.2	5.8	7.2	8.0
Customs.....	.9	.9	.9	.9
Miscellaneous receipts.....	8.3	4.8	3.1	2.6
Total receipts.....	100.0	100.0	100.0	100.0

¹ The Budget classification of taxes differs in several respects from the classification used by the Treasury Department in the daily Treasury statement. In the Budget classification, the Treasury "income tax" is divided into "direct taxes on individuals" and "direct taxes on corporations." The Budget classification removes from the Treasury "miscellaneous internal revenue," the estate and gift taxes, which are placed in "direct taxes on individuals." The Budget "excise taxes" consist of the Treasury "miscellaneous internal revenue" less estate and gift taxes. The Budget "employment taxes" consist of the Treasury "social security taxes," "taxes on carriers and their employees," and "railroad unemployment insurance contributions for administrative expenses."

Amounts shown for the individual income tax withheld are on the daily Treasury statement basis. Employment taxes, customs, and refunds of receipts are on the warrants issued basis. Detail concerning income taxes not withheld is on the warrants issued basis which, in the case of these taxes, is the same as the collections basis. The detail of excise taxes is on the collections basis and the detail of miscellaneous receipts is on the warrants issued basis. Receipts from the Railroad Unemployment Insurance Act are on the daily Treasury statement basis, which for this tax is the same as the warrants issued basis. Adjustment in all cases is to the daily Treasury statement basis, but since the Budget classification does not correspond exactly to the daily Treasury statement classification, it is necessary to allocate arbitrarily some of the adjustments to the daily Treasury statement basis. The adjustment from the collections basis to the daily Treasury statement basis for "miscellaneous internal revenue" is contained in "excise taxes," and the adjustment for "income tax other" (other than withheld by employers) is contained in "direct taxes on individuals."

Except for those tax groups where receipts are affected by changes in rates or methods of collection, the only significant changes estimated for the fiscal years 1950 and 1951 from actual receipts in the fiscal year 1949, are shown in receipts from direct taxes on corporations and miscellaneous receipts. Direct taxes on individuals remain virtually unchanged in each of the three fiscal years 1949 through 1951, reflecting relatively constant levels of

income, and continue to remain by far the most important source of revenue. Receipts from direct taxes on corporations are expected by 1951 to be considerably below the level of actual receipts for the fiscal year 1949, but remain the second most important source of revenue. Excise taxes in the fiscal years 1950 and 1951 are estimated at approximately the 1949 levels and are the third most important source of receipts. Receipts from employment taxes are estimated to increase sharply in the fiscal years 1950 and 1951 because of the changes in rates of tax and the method of collection in the case of the Federal Insurance Contributions Act. Miscellaneous receipts are expected to continue the decline commenced in the fiscal year 1948. For the fiscal year 1951 receipts from this source are estimated at \$1,095.8 million as compared with the record level of receipts of \$4,620.5 million in the fiscal year 1947. Customs receipts are estimated to be slightly lower in the fiscal years 1950 and 1951 than actual receipts in the fiscal year 1949.

FISCAL YEAR 1950

Actual receipts in the fiscal year 1949 and estimated receipts in the fiscal year 1950 are compared by major sources in the following table:

Budget receipts by sources

[In millions of dollars]

Source	1949 actual	1950 estimate	Increase (+) or decrease (-), 1950 over 1949
Direct taxes on individuals.....	18,725.2	18,668.0	-57.2
Direct taxes on corporations.....	11,553.7	11,175.0	-378.7
Excise taxes.....	7,551.5	7,631.0	+79.5
Employment taxes.....	2,486.7	3,047.7	+561.0
Customs.....	384.5	375.0	-9.5
Miscellaneous receipts.....	2,072.0	1,288.6	-783.4
Total receipts.....	42,773.5	42,185.3	-588.2
Deduct:			
(a) Appropriation to Federal old-age and survivors insurance trust fund.....	1,690.3	2,245.0	+554.7
(b) Refunds of receipts.....	2,837.5	2,177.0	-660.5
Budget receipts.....	38,245.7	37,763.2	-482.4

Budget receipts in the fiscal year 1950 are estimated to amount to \$37,763.2 million, a decrease of \$482.4 million from actual Budget receipts in the fiscal year 1949. The largest decline is attributable to miscellaneous receipts, which for the most part represent receipts from nontax sources. Net tax receipts increase as the decreases estimated from the tax sources "Direct taxes on corporations," "Direct taxes on individuals," and "Customs" are more than offset by a decrease in the deduction item "Refunds of receipts." The large increase estimated in receipts from employment taxes does not affect Budget receipts significantly as the entire amount collected under the Federal Insurance Contributions Act, which is responsible for nearly all of the increase in receipts from employment taxes, is transferred to the Federal old-age and survivors insurance trust fund.

Direct taxes on individuals.—The yields of direct taxes on individuals are shown in the following table:

[In millions of dollars]

Source	1949 actual	1950 estimate	Increase (+) or decrease (-), 1950 over 1949
Individual income tax:			
Withheld.....	9,841.5	9,839.0	-2.5
Not withheld.....	8,087.1	8,132.0	+44.9
Total individual income tax.....	17,928.6	17,971.0	+42.4
Estate tax.....	735.8	645.0	-90.8
Gift tax.....	60.8	52.0	-8.8
Total direct taxes on individuals.....	18,725.2	18,668.0	-57.2

The slight decrease in the yield from direct taxes on individuals is due to estimated decreases in collections from estate and gift taxes, reflecting the effect of the Revenue Act of 1948, which allows special treatment of transfers between spouses for both the estate and gift taxes. Estimated receipts from the individual income tax are slightly higher and remain relatively unchanged from actual receipts in the fiscal year 1949.

Direct taxes on corporations.—The yields of direct taxes on corporations are shown in the table below:

[In millions of dollars]

Source	1949 actual	1950 estimate	Increase (+) or decrease (-), 1950 over 1949
Income tax.....	11,342.6	11,075.0	-267.6
Excess-profits taxes.....	211.0	100.0	-111.0
Total direct taxes on corporations.....	11,553.7	11,175.0	-378.7

Corporation income-tax receipts in the fiscal year 1949 reflect incomes of calendar years 1947 and 1948, while receipts in the fiscal year 1950 reflect incomes of the calendar years 1948 and 1949. Decreased corporation profits in the calendar year 1949 are responsible for this decline in receipts. Excess-profits-tax collections, which in both 1949 and 1950 almost entirely represent back tax collections, are expected to decline in the fiscal year 1950.

Excise taxes.—Receipts from this source by major groups are listed in the following table:

[In millions of dollars]

Source	1949 actual	1950 estimate	Increase (+) or decrease (-), 1950 over 1949
Liquor taxes.....	2,210.6	2,247.0	+36.4
Tobacco taxes.....	1,321.9	1,338.0	+16.1
Stamp taxes.....	72.8	71.0	-1.8
Manufacturers' excise taxes.....	1,761.2	1,793.0	+31.8
Retailers' excise taxes.....	449.2	426.0	-23.2
Miscellaneous excise taxes.....	1,758.9	1,756.0	-2.9
Adjustment to daily Treasury statement basis.....	23.1	-----	+23.1
Total excise taxes.....	7,551.5	7,631.0	+79.5

The total increase of \$79.5 million in excise taxes is attributable to the large increase of \$104.2 million estimated in collections from the tax on passenger automobiles. Collections of this tax in 1950 represent the peak production period of the calendar year 1949 reached in the latter part of the year, as well as the high production period of the calendar year 1950, which is expected to be attained early in that year. Collections from the other important excise taxes show relatively small increases and decreases, reflecting current consumption trends.

Employment taxes.—The yields of the various employment taxes are shown below:

[In millions of dollars]

Source	1949 actual	1950 estimate	Increase (+) or decrease (-), 1950 over 1949
Federal Insurance Contributions Act.....	1,690.3	2,245.0	+554.7
Federal Unemployment Tax Act.....	222.8	223.0	+ .2
Railroad Retirement Tax Act.....	563.8	570.0	+6.2
Railroad Unemployment Insurance Act.....	9.7	9.7	-----
Total employment taxes.....	2,486.7	3,047.7	+561.0
Deduct appropriation to Federal old-age and survivors insurance trust fund.....	1,690.3	2,245.0	+554.7
Net employment taxes.....	796.4	802.7	+6.3

An increase in tax rate and a changed method of collection are responsible for most of the increase in receipts from employment taxes in the fiscal year 1950 as compared with the fiscal year 1949. The tax rate under the Federal Insurance Contributions Act increased from 1 percent each on employer and employee to 1½ percent effective January 1, 1950. Effective January 1, 1950, collections of this tax from certain employers are payable on a monthly instead of a quarterly basis. The change in the method of collection results in estimated receipts in the fiscal year 1950 somewhat in excess of 1 year's liabilities.

Customs.—Customs receipts are estimated to amount to \$375.0 million in the fiscal year 1950, a slight decrease from the \$384.5 million actual receipts for the fiscal year 1949.

Miscellaneous receipts.—Miscellaneous receipts are estimated to amount to \$1,288.6 million in the fiscal year 1950, a decrease of \$783.4 million from actual receipts in 1949. Receipts from sales of surplus property are expected to decline. In addition, certain receipts, notably for the Farmers' Home Administration and public housing programs, which were formerly deposited to miscellaneous receipts, are now deducted from the expenditures of the programs involved. These accounting changes, of course, have no effect on the surplus or deficit.

Refunds of receipts.—Refunds of receipts are estimated to amount to \$2,177.0 million in the fiscal year 1950 as compared with actual refunds of \$2,837.5 million in the fiscal year 1949. Refunds in the fiscal year 1949 were considerably above normal, principally because of the large overwithholding in the first 4 months of the calendar year 1948 prior to the passage of the Revenue Act of 1948, which decreased rates and increased exemptions retroactively to January 1, 1948.

FISCAL YEAR 1951

Estimated receipts in the fiscal years 1950 and 1951 are compared by major sources in the following table:

Budget receipts by source

[In millions of dollars]

Source	1950 estimate	1951 estimate	Increase (+) or decrease (-), 1951 over 1950
Direct taxes on individuals.....	18,668.0	18,938.0	+270.0
Direct taxes on corporations.....	11,175.0	10,518.0	-657.0
Excise taxes.....	7,631.0	7,642.0	+11.0
Employment taxes.....	3,047.7	3,342.9	+295.2
Customs.....	375.0	375.0	-----
Miscellaneous receipts.....	1,288.6	1,095.8	-192.8
Total receipts.....	42,185.3	41,911.7	-273.6
Deduct:			
(a) Appropriation to Federal old-age and survivors insurance trust fund.....	2,245.0	2,515.0	+270.0
(b) Refunds of receipts.....	2,177.0	2,151.1	-25.9
Budget receipts.....	37,763.2	37,245.6	-517.6

Budget receipts in the fiscal year 1951 are estimated to amount to \$37,245.6 million, a decrease of \$517.6 million from estimated budget receipts in the fiscal year 1950. The decrease in receipts from direct taxes on corporations is the principal factor in this decline. There is also a decrease indicated in miscellaneous receipts, but there are small increases estimated for direct taxes on individuals and excise taxes. The major portion of the increase estimated for employment taxes does not affect Budget receipts.

Direct taxes on individuals.—The yields of direct taxes on individuals are shown in the following table:

[In millions of dollars]

Source	1950 estimate	1951 estimate	Increase (+) or decrease (-), 1951 over 1950
Individual income tax:			
Withheld.....	9,839.0	10,075.0	+236.0
Not withheld.....	8,132.0	8,171.0	+39.0
Total individual income tax.....	17,971.0	18,246.0	+275.0
Estate tax.....	645.0	635.0	-10.0
Gift tax.....	52.0	57.0	+5.0
Total direct taxes on individuals.....	18,668.0	18,938.0	+270.0

Receipts from income tax withheld are primarily responsible for the increase in direct taxes on individuals. Receipts from the individual income tax not withheld are expected to increase slightly.

Direct taxes on corporations.—The yields of direct taxes on corporations are shown in the following table:

[In millions of dollars]

Source	1950 estimate	1951 estimate	Increase (+) or decrease (-), 1951 over 1950
Income tax.....	11,075.0	10,458.0	-617.0
Excess-profits taxes.....	100.0	60.0	-40.0
Total direct taxes on corporations.....	11,175.0	10,518.0	-657.0

The combined corporation incomes for the calendar years 1949 and 1950, which are reflected in receipts in the fiscal year 1951, are estimated to be less than the combined

incomes for the calendar years 1948 and 1949, which are reflected in receipts in the fiscal year 1950, and corporation income-tax receipts are estimated accordingly to be less in the fiscal year 1951.

Excise taxes.—Collections from this source by major groups are shown below:

[In millions of dollars]

Source	1950 estimate	1951 estimate	Increase (+) or decrease (-), 1951 over 1950
Liquor taxes.....	2,247.0	2,290.0	+43.0
Tobacco taxes.....	1,338.0	1,352.0	+14.0
Stamp taxes.....	71.0	68.0	-3.0
Manufacturers' excise taxes.....	1,793.0	1,705.0	-88.0
Retailers' excise taxes.....	426.0	431.0	+5.0
Miscellaneous excise taxes.....	1,756.0	1,796.0	+40.0
Total excise taxes.....	7,631.0	7,642.0	+11.0

Excise taxes are estimated to increase slightly in the fiscal year 1951 as compared with estimated receipts for 1950. Collections from most of the excise tax groups are expected to increase in 1951 but are partially offset by a decline in collections from the tax on passenger automobiles from the abnormally high level estimated in the fiscal year 1950.

Employment taxes.—Receipts from the various employment taxes are shown in the table below:

[In millions of dollars]

Source	1950 estimate	1951 estimate	Increase (+) or decrease (-), 1951 over 1950
Federal Insurance Contributions Act.....	2,245.0	2,515.0	+270.0
Federal Unemployment Tax Act.....	223.0	224.0	+1.0
Railroad Retirement Tax Act.....	570.0	594.0	+24.0
Railroad Unemployment Insurance Act.....	9.7	9.9	+2.2
Total employment taxes.....	3,047.7	3,342.9	+295.2
Deduct appropriation to Federal old-age and survivors insurance trust fund.....	2,245.0	2,515.0	+270.0
Net employment taxes.....	802.7	827.9	+25.2

Receipts from employment taxes are estimated to increase in the fiscal year 1951 as compared with the estimated receipts for the fiscal year 1950. Receipts under the Federal Insurance Contributions Act are responsible for the largest part of the increase. Receipts in the fiscal year 1951 will reflect a full year's liabilities under the higher rates effective January 1, 1950, whereas receipts in the fiscal year 1950 will reflect only a part-year effect. The effect of this rate increase would be greater were it not for the fact that receipts in the fiscal year 1950 will reflect more than 1 year's liabilities because of the changed method of collection effective January 1, 1950.

Customs.—Customs receipts are estimated to be \$375.0 million in the fiscal year 1951, continuing at the same level estimated for the fiscal year 1950.

Miscellaneous receipts.—Miscellaneous receipts, reflecting a continuation of the decline in receipts from sales of surplus property, are estimated to amount to \$1,095.8 million in the fiscal year 1951, as compared with estimated receipts of \$1,288.6 million in 1950.

Refunds of receipts.—Refunds of receipts in the fiscal year 1951 are estimated to be slightly less than refunds in the fiscal year 1950.

ANALYSIS OF INVESTMENT, OPERATING, AND OTHER BUDGET EXPENDITURES

This special analysis, appearing for the first time in the Budget Document, presents in broad outline a tentative new classification of Federal Budget expenditures. Its primary object is to show the extent to which assets are acquired or other assistance given yielding benefits over a longer period than the fiscal year in which the expenditure occurs. Thus, the tabulation shows, from the point of view of the Federal Government, whether expenditures are made for the acquisition or improvement of assets, for other broad developmental purposes, for aids to special groups, or for other current expenses of the Government.

The classification is necessarily experimental in character. There will not be complete agreement on the major categories selected or on the location of certain items. Further experience and improvement in governmental accounting will permit a refinement of the categories and a more satisfactory classification of particular items. At present, some programs which could not readily be divided among the relevant categories have been classified according to the dominant effect or the major intent of the Congress in providing authorizations.

The analysis is not a substitute for any of the existing Budget classifications. Rather, it provides an additional presentation of Federal expenditures to facilitate the overall appraisal of Government programs. Just as the functional classification of Federal expenditures brings together programs of various agencies to indicate the major purposes of the total Federal program, so the present classification views all Federal expenditures in terms of the duration and nature of the benefits flowing from such activities.

The purposes of this analysis and of a so-called capital budget are different. As generally used, the term "capital budget" refers to a separate accounting and often separate financing for capital outlays as distinct from expenditures for current operating expenses. For example,

traditionally in capital budgeting, allowance would be made in the current budget for all of the current costs of government, including depreciation and obsolescence on existing physical assets and anticipated losses on loan programs. In this analysis, no attempt has been made to indicate the amount of depreciation or obsolescence on existing assets of the Federal Government, particularly important for military equipment. Nor have all possible future losses on loans or other investments been shown.

Also, the classification of items has not been guided by their financial recoverability. Many expenditures of the Federal Government, such as grants to States for highways, are not expected to be specifically recovered by future repayments to the Treasury. Rather, they are intended to build up the productivity of the economy. Indirectly, of course, Federal tax revenues will expand as various investment and other developmental expenditures have the effect of increasing the wealth and income of the Nation.

The present analysis should throw more light on the nature of Federal programs and aid in the appraisal, by the Congress and by the public generally, of their long-range effects on the economy and on the fiscal position of the Federal Government. Other approaches are of course required, for example, to appraise the impact of the Budget on the current level of business activity.

SUMMARY

Additions to Federal assets and expenditures for other developmental purposes will be \$1.1 billion higher in fiscal 1951 than in 1950, while all other expenditures will be \$1.9 billion lower. The following tabulation shows not only the major categories for the fiscal years 1949, 1950, and 1951, but also the distribution of the 1951 expenditures among major functions.

INVESTMENT, OPERATING, AND OTHER BUDGET EXPENDITURES CLASSIFIED BY MAJOR FUNCTION

[Fiscal years. In millions]

	1949 actual, total	1950 estimate, total	1951 estimate				
			Total	National defense	International affairs and finance	Veterans' services and benefits	Other functions
Additions to Federal assets:

¹ Excludes Economic Cooperation Administration loans. The break-down between loans and other aids in fiscal 1951 is not available at this time.

^b Less than \$500,000.

In the fiscal year 1951, \$8.7 billion or 20 percent of total Federal expenditures will be additions to Federal assets. Of this amount \$1.9 billion are expected to be for loans and \$6.8 billion will be for acquisition, construction, or improvement of physical assets. The loan total is understated, since all 1951 expenditures for the Economic Cooperation Administration, including an undetermined amount of loans, are shown under current expenses for aids. Over half of the physical assets represent military equipment, additions to the military stockpile, and other defense assets.

In addition to expenditures on Federal assets, the Federal Budget in 1951 includes \$3.7 billion or 9 percent for other developmental purposes. This amount includes \$1.2 billion for construction and improvement of assets owned either by State and local governments or by private individuals, \$1.1 billion for research and development, and engineering and natural resource surveys, and \$1.5 billion for education, training, and health. A major part of the education expenditures fall in the veterans' function, and nearly two-thirds of the expenditures for research and development and surveys fall in the national defense function.

Of the remaining Budget expenditures in the fiscal year 1951, \$12.3 billion or 29 percent are estimated for current expenses for aids and special services to particular groups or to foreign countries; and \$16.8 billion or 40 percent represent other current operating expenses, mainly for repair, maintenance, and operation of physical assets, for pay and maintenance of military personnel, and for interest on the public debt.

Finally \$665 million or 2 percent of the Federal Budget represents noncost payments of the Federal Government. These include the proceeds of special taxes paid over to the railroad retirement trust fund and net purchases of Government securities by Government corporations and enterprises.

In the following discussion, the major categories of the special analysis are explained, and summary figures are shown for the fiscal years 1949, 1950, and 1951.

ADDITIONS TO FEDERAL ASSETS

Loans.—Most loan programs are shown in the Budget on a net basis; i. e., expenditures reflect new loans less collections on old loans. In the detailed table in this special analysis, loans are shown on a net basis. However, to show more clearly the total volume of loans, they are summarized here on a gross basis. Two columns are shown for each fiscal year. The first column shows gross loan disbursements during the year, and the second column shows repayments (including collections going directly to miscellaneous receipts of the Treasury) and other adjustments such as write-offs of old loans. The difference between these two columns then represents the net addition or reduction during the fiscal year in Federal loan assets. After this net total a one-line adjustment is added for repayments going directly to miscellaneous receipts, bringing the total expenditures for loans into line with the Budget expenditure concept. Write-offs of old loans, which are deducted to arrive at net additions to loans, are added as a positive expenditure under the appropriate subcategory of current expenses for aids and special services. No allowance is made, however, for other possible future losses or recoveries on loans.

GROSS LOANS AND REPAYMENTS

[Fiscal years. In millions]

	1949 actual		1950 estimate		1951 estimate	
	Disbursements	Repayments and adjustments	Disbursements	Repayments and adjustments	Disbursements	Repayments and adjustments

Adjustment for repayments going directly into miscellaneous receipts.....	178		37		93	
Total, Budget expenditures for loans.....	1,392		1,949		1,920	

¹ Includes collections going directly into miscellaneous receipts.

² Excludes Economic Cooperation Administration loans, since an estimate is not yet available for fiscal year 1951.

³ Less than \$500,000.

In fiscal 1951, gross loan disbursements are estimated at \$3.1 billion, and repayments are estimated at \$1.3 billion. Net Budget expenditures for loans are \$1.9 billion. In addition to direct loans, the Federal Government guarantees or insures private loans. These guarantees, of course, do not result in Budget expenditures until such time as the Government is called upon to take over the loans or to sustain losses on private loans. In 1951, it is estimated that the contingent liability of the Federal Government for loan guarantees and insurance of loans will increase by more than \$3.5 billion.

In this analysis of Federal expenditures on loans, price-support loans of the Commodity Credit Corporation have been excluded. These nonrecourse loans normally extend only for the duration of the marketing season, and if not redeemed by the farmer, the collateral is taken into Commodity Credit Corporation inventories at the time the loan matures. For this reason, such loans are regarded as intermediary to the acquisition of commodities, and the net change in loans has been included in the net change in major commodity inventories shown under Federal physical assets. Loans and repayments of the Federal intermediate credit banks have also been excluded, since their lending operations are carried on through private checking accounts and, therefore, are not shown in Budget expenditures. Gross loans of the banks in 1951 will amount to over \$1.8 billion, but repayments will offset all except \$48 million.

Federal physical assets.—Expenditures in this category include (1) the acquisition of sites and the direct construction of Federal public works projects both for national defense and civil purposes, (2) the net increase in commodity inventories for the military stockpile and for agricultural price support, (3) outlays for major equipment such as aircraft and ships, and (4) other expenditures for acquisition of land and improvement of physical assets which do not fall in the public works category. In this tabulation, Federal expenditures on physical assets, in the main, represent gross rather than net additions to the stock of existing assets. They do not allow for substantial collections going directly into miscellaneous receipts from the sale of surplus property and other Government property. They also do not allow for deprecia-

tion on existing physical assets. While the life of certain physical assets such as dams is very long and current depreciation small, in other cases, such as military equipment, it is quite probable that the depreciation and obsolescence on old equipment is as great as, or greater than, expenditures on new equipment.

EXPENDITURES FOR FEDERAL PHYSICAL ASSETS
[Fiscal years. In millions]

	1949 actual	1950 estimate	1951 estimate
Public works—sites and direct construction.....	\$1,470	\$2,169	\$2,540
Major commodity inventories—net change.....	1,808	1,501	1,271
Major equipment (national defense).....	1,723	2,375	2,832
Other physical assets—acquisition and improvement.....	174	161	179
Total, Federal physical assets.....	5,174	6,207	6,823

Federal expenditures for physical assets in fiscal 1951 are estimated at \$6.8 billion. More than half of these expenditures represent acquisition of military equipment and of commodity inventories for the military stockpile and for agricultural price support.

Recoverability of expenditures for Federal assets.—A substantial portion of Federal expenditures is financially recoverable in future years. Most of the amount returned to the Treasury comes from repayments on loan programs, from the sale of commodity inventories, from revenues from the sale of public power, or from amortization payments on other public works projects. Some additional collections arise from licenses and fees charged for various special services, and a part of the operating expenditures of certain programs are financed by the appropriation of special receipts from these programs.

It is, of course, difficult to determine the amount of future recoverability from Federal expenditures. The following tabulation is limited to expenditures for Federal assets. All loans are assumed to be recoverable, and expenditures for commodity inventories are classed as recoverable. In the case of Commodity Credit Corporation price support inventories, profits and losses are recognized at the time the commodities are sold. For the purpose of this special analysis, sales in any given year represent negative expenditures for physical assets in that year, and realized losses are charged as current expenses for aids and special services. Expenditures for public works projects have been classed as wholly or largely recoverable if 50 percent or more of the investment is expected to be repaid; if less than 50 percent, they are excluded.

EXPENDITURES FOR FEDERAL ASSETS ACCORDING TO
RECOVERABILITY
[Fiscal years. In millions]

	1949 actual		1950 estimate		1951 estimate	
	Wholly or largely recoverable	Other	Wholly or largely recoverable	Other	Wholly or largely recoverable	Other
Loans.....	\$1,392		\$1,949		\$1,920	
Physical assets:						
Public works.....	463	\$1,007	707	\$1,462	873	\$1,662
Major commodity inventories.....	1,808		1,501		1,271

Other.....		174		161		179
Total.....	3,663	2,904	4,157	3,998	4,069	4,673

In fiscal 1951, of \$8.7 billion expenditures for Federal assets, \$4.1 billion or 47 percent are classed as financially recoverable.

EXPENDITURES FOR OTHER DEVELOPMENTAL PURPOSES

Certain Federal expenditures which do not add to Federal assets do contribute to the physical assets and other resources of the Nation as a whole. Some of these expenditures are for assets owned by State and local governments to which the Federal Government contributes chiefly through grants-in-aid. Some expenditures are for improvement or development of assets held by private individuals, such as Federal programs assisting farmers in soil conservation. Some expenditures are for scientific research and development either carried on by the Federal Government or by Federal grants to States. And some, either as grants-in-aid or direct Federal expenditures, are to improve the health and education of citizens or to develop productive skills.

These expenditures have been set apart in a separate category because the duration of benefits goes beyond the current fiscal year. At the same time, the concept of what is developmental has been narrowly defined. Many other programs with some developmental aspects have been classified under current expenses for aids and special services or under other current operating expenses. Also, figures for developmental expenditures exclude, so far as feasible, expenditures to preserve or maintain existing assets or other resources.

EXPENDITURES FOR OTHER DEVELOPMENTAL PURPOSES
[Fiscal years. In millions]

	1949 actual	1950 estimate	1951 estimate
Physical assets:			
State and local.....	\$473	\$598	\$687
Private.....	248	400	437
Education, training, and health.....	1,186	1,214	1,523
Research and development.....	940	964	963
Engineering and natural resource surveys.....	58	75	95
Total, expenditures for other developmental purposes.....	2,905	3,251	3,705

Expenditures for other developmental purposes are estimated to be \$3.7 billion in fiscal 1951. Of this amount, \$1.2 billion is for construction or improvement of State and local and private physical assets and \$1.5 billion is for promotion and improvement of the education, training, and health of individuals, the largest part of which is for veterans' education. The figures included here for veterans' education represent payments for tuition, supplies and equipment and exclude the subsistence allowances which are classed as current expenses for aids and special services. Expenditures for research and development are predominantly for military and atomic energy research.

CURRENT EXPENSES FOR AIDS AND SPECIAL SERVICES

A large part of the expenditures of the Federal Government are primarily to benefit particular economic groups or individuals or to aid foreign countries. While these expenditures, of course, are necessarily current expenditures, they differ materially from operating expenses of a private business or general overhead expenses of the Government. For this reason, they have been set out separately as a major category, with subcategories according to the ultimate recipient of the aid or service. Most of these expenditures consist of transfer payments to individuals, grants to States for the benefit of individuals or economic groups, subsidies for various economic groups, payments for goods procured for aid programs, and expenses of performing special services. Also included are expenditures for operation and maintenance of those physical assets which provide aids or services to particular groups.

This category is not intended to cover all aids and services. Substantial benefits also accrue to various economic groups and private individuals from Federal expenditures for loans, for physical assets, and for other developmental purposes such as education and scientific research and development.

CURRENT EXPENSES FOR AIDS AND SPECIAL SERVICES

[Fiscal years. In millions]

	1949 actual	1950 estimate	1951 estimate
Agriculture.....	\$341	\$876	\$688
Business.....	773	825	521
Labor.....	175	199	217
Home owners and tenants.....	-11	8	42
Veterans.....	5,549	5,694	4,878
General aids.....	1,091	1,318	1,570
International aids:			
Relief, recovery, and economic development assistance.....	5,140	4,941	3,765
Military assistance.....	414	355	645
Total, current expenses for aids and special services.....	13,472	14,216	12,334

Of the total estimated expenditures of \$12.3 billion in the fiscal year 1951 for current expenses for aids and special services, 75 percent will be for international aids and aids to veterans. General aids of \$1.6 billion represent the next largest category. Current expenses for aids to agriculture, business, labor, and home owners and tenants total \$1.5 billion. The 1951 estimate of aids to business assumes adoption of the proposed increase in postal rates.

OTHER CURRENT OPERATING EXPENSES

Budget expenditures of \$16.8 billion are classified as other current operating expenses. These expenditures are chiefly for repair, maintenance, and operation of physical assets, including military equipment and national defense installations, for pay and maintenance of military personnel, and for interest on the public debt. Smaller amounts go for payments to Federal employees' retirement funds, for regulation and control, for international activities, for Federal financial management, and for general overhead expenses of the Government.

OTHER CURRENT OPERATING EXPENSES

[Fiscal years. In millions]

	1949 actual	1950 estimate	1951 estimate
Repair, maintenance, and operation of physical assets:			
Civil.....	\$388	\$410	\$400
National defense.....	3,411	3,147	3,247
Regulation and control.....	292	325	339
General operation and administration:			
Civil.....	1,155	1,265	1,240
National defense.....	5,574	6,026	5,859
Interest.....	5,444	5,822	5,729
Total, other current operating expenses.....	16,265	16,996	16,815

NONCOST PAYMENTS

Noncost payments included in Budget expenditures amount to \$665 million in 1951, \$626 million in 1950, and \$578 million in 1949. The largest part of these expenditures is for the payment of specific pay-roll taxes to the railroad retirement trust fund, and smaller amounts are for the net purchase of Government securities by Government corporations and enterprises. These items do not represent costs to the Government, nor do the receipts represent revenues available to the Government. Not

included here, however, are various other intragovernmental transfers such as payments to the civil-service retirement trust fund and to the veterans' insurance trust funds. These transfers represent real Budget costs and have therefore been included either as current expenses for aids and special services or as other operating expenses of the Government.

RELATIONSHIP TO OTHER SPECIAL ANALYSES

Business-type budgets.—Additional data on loans and other expenditures of Government corporations and enterprises are contained in a separate special summary of business-type budgets in part III of this Budget.

Treatment of public works.—In the present analysis, the public-works activities of the Federal Government do not appear in one category. Some expenditures for public works, such as Reconstruction Finance Corporation loans to public agencies, are included under Federal loans; other public works, largely acquisition of sites or direct Federal construction, are included under Federal physical assets; and still others, grants-in-aid to State and local governments, are included under expenditures for development of non-Federal physical assets. The details of all public works programs are brought together in a special analysis of "Federal activities in civil and defense public works," in part III of this Budget. The public-works figures both in this classification and in the special analysis of public works exclude, so far as feasible, expenditures for repair and maintenance, although, of course, these also entail the employment of construction workers.

Expenditures for public-works activities are summarized in the following tabulation according to the major categories of the present classification.

SUMMARY OF FEDERAL EXPENDITURES FOR CIVIL AND DEFENSE PUBLIC WORKS

[Fiscal years. In millions]

Expenditures for other developmental purposes:			
State and local physical assets.....	473	598	687
Total, public works.....	1,870	2,890	3,342

¹ Excludes proposed legislation.

Treatment of Federal aid to State and local governments.—Grants to States and shared revenues represent a method of payment, rather than a basic category of the present classification. Some grants are made for construction of physical assets; some are for aids to individuals or particular economic groups; and others are for operating expenses of specific programs. Because of the great interest in these and other intergovernmental payments, loans to State and local governments and grants-in-aid and shared revenues have been set out separately as subcategories in the various parts of this special analysis to which they relate. Federal aid to State and local governments is brought together in a separate special analysis in part III of this Budget.

The following tabulation summarizes the items of Federal aid to State and local governments according to the major categories of the present classification.

FEDERAL ACTIVITIES IN CIVIL AND DEFENSE PUBLIC WORKS

Federal public works are classified elsewhere in the Budget according to the function which they serve or the organizational unit responsible for the programs. Total Federal construction is significant from the standpoint of effect on total construction and economic activity. Therefore, this section provides an analysis of the volume and character of such programs. Details are shown for civil public works and summary data for national defense public works.

Construction by private cooperatives financed by Rural Electrification Administration loans is not now classified as public works and is excluded from all the tabulations in this section. Construction by the National Advisory Committee for Aeronautics is now classified as defense public works rather than as civil public works.

TOTAL PUBLIC WORKS OUTLAYS

The volume of Federal public works will continue to rise in fiscal year 1951. Expenditures for civil public works are estimated to increase by 22 percent over those in fiscal year 1950, whereas expenditures for national defense construction will show some decrease. The net result is an increase of \$452 million for total Federal public works outlays in fiscal year 1951 over fiscal year 1950, as compared with the larger increase of \$1,020 million in fiscal year 1950 over fiscal year 1949.

[Fiscal years. In millions]

Defense public works	177	345	1,231
Total	1,870	2,890	3,342

¹ Excludes proposed legislation.

CIVIL PUBLIC WORKS

The impact of Federal construction upon the construction industry as a whole is measured only in part by the total Federal outlays. Since the loan and grant programs for highway, hospital, education, airport, and public housing construction are matched or supplemented by State and local funds, the Federal contribution has a greater effect than the expenditures alone indicate. The magnitude of these federally aided construction activities is in the order of \$2 billion for 1951. Finally, the large volume of Government guarantees and insurance of private loans and of Government purchases of such loans makes a major contribution to private residential construction.

As a general policy, recommendations for civil public works in fiscal year 1951 allow only for the minimum efficient rate of progress, with due regard to logical order and timing of work. Projects involving the production and transmission of power in a few areas of extreme shortage are provided for at an economical rate which will meet the demand at the earliest possible date. Recommendations for new loan and grant commitments for

public works in fiscal year 1951 remain generally at the rate prevailing in fiscal year 1950.

SIZE AND NATURE OF FISCAL YEAR 1951 PROGRAM

Federal civil public works expenditures are estimated to reach \$3.1 billion in fiscal year 1951 as compared with an estimated \$2.5 billion in fiscal year 1950 and \$1.7 billion of actual expenditures in fiscal year 1949. The major portion of these expenditures in fiscal year 1951 will be for six large programs: Veterans' hospital construction; flood control, navigation, and power projects of the Corps of Engineers; irrigation and power projects of the Bureau of Reclamation; construction of facilities for the expanding atomic energy program; grants to States by the Bureau of Public Roads for highway construction; and loans by the Housing and Home Finance Agency for public housing. An estimated \$2,297 million, or about 75 percent of total civil works expenditures will be for these six programs. Of the remaining \$814 million, about \$472 million is for expenditures of the Public Health Service, Public Buildings Service, Civil Aeronautics Administration, and the Tennessee Valley Authority.

CONTINUING WORK AND NEW PROJECTS

A gross total of \$3,204 million, or about 95 percent of gross expenditures for civil public works in fiscal year 1951, is required to continue work in progress or to make payments on prior year commitments for public works loans and grants. The public works expenditure program for 1951 has thus been largely determined by appropriations and contract authorizations made for fiscal year 1950 and prior years.

² Loan authorization under 1949 Housing Act and Alaska Housing Act.

³ Proposed legislation.

Continuing work.—Expenditures for “continuing work” in fiscal year 1951 include (1) those required in fiscal year 1951 for direct Federal projects or features of projects started with obligational authority provided in prior years; and (2) those required in fiscal year 1951 to meet loan and grant commitments, such as Federal-aid highway grants, made in prior years.

An estimated \$2,148 million will be required for continuing work on Federal construction projects, and \$1,055 million will be needed for loan and grant commitments made under prior year authority. About one-half of these fiscal year 1951 expenditures for continuing work on Federal projects will be for river development work of the

Corps of Engineers and the Bureau of Reclamation. Another 12 percent will be for continued construction work on veterans’ hospitals. Large expenditures will also be made to continue work on facilities required by the Atomic Energy Commission. Most of the expenditures in fiscal year 1951 for prior year loan and grant commitments will be for payments to States under the postwar highway program and loans to public housing authorities for implementation of the 1949 Housing Act.

New projects, features, and commitments.—The term “new projects, features, and commitments” includes (1) those direct-Federal projects or project features on which construction will be started with appropriations and contract authorizations recommended for fiscal year 1951, and (2) new commitments recommended for fiscal year 1951 on loan and grant programs.

New power generation and transmission projects recommended in fiscal year 1951 are considered necessary to meet urgent power demands, particularly in the Tennessee Valley. A small appropriation for preliminary work is necessary for the St. Lawrence seaway and power development, upon its authorization by Congress.

Grant commitments recommended for Federal-aid hospital and airport construction are at or below the levels established in authorizing legislation and will provide only for the minimum requirements. New Federal-aid highway contract authorizations of \$500 million per year for fiscal years 1951 and 1952 are proposed in new legislation. Moderate amounts will also be required to meet initial commitments under the proposed program for emergency school construction in communities affected by Federal activities.

COMMITMENTS AFTER FISCAL YEAR 1951

About \$12 billion of expenditures will be required after fiscal year 1951 to complete the projects and to meet loan and grant commitments in the present civil public works program, including the new starts recommended for fiscal year 1951. This total is almost four times the estimated total expenditures for civil public works in fiscal year 1951. Although the major portion of these expenditures will be required in fiscal years 1952 and 1953, expenditures on some large projects will continue thereafter for a number of years.

New Federal projects recommended in fiscal year 1951 add \$849 million to the \$8.5 billion of expenditures required after fiscal year 1951 to complete projects started in prior years. Included is a small amount for the St. Lawrence seaway and power project for preparatory work in 1951, in the event this project is authorized. New loan and grant commitments recommended for fiscal year 1951 will add \$71 million to the \$2.5 billion of expenditures required after fiscal year 1951 to meet commitments made in prior years.

The largest volume of expenditures required after fiscal year 1951 is for completing large multiple-purpose river basin projects of the Corps of Engineers and Bureau of Reclamation, some of which may take a number of years after fiscal year 1951 to complete. Other large requirements are for completion of loan and grant programs for Federal-aid highways and hospitals and public housing.

The estimates of expenditures required after fiscal year 1951 to complete Federal projects are based largely upon current construction costs. Should construction costs change before the projects are completed, the required expenditures would differ from the estimates shown in table 2.

RESERVE OF FEDERAL PROJECTS

Authorized work.—Agency reports indicate that on the basis of present prices about \$10.8 billion of construction work, authorized either in general or specifically by Congress, is available for undertaking after fiscal year 1951. Two-thirds of this authorized work is included in the programs of the Corps of Engineers and the Bureau of Reclamation. Some of these programs extend over 10 to 20 years.

TABLE 3.—Reserve of authorized projects and programs for undertaking after fiscal year 1951

Agency and program:	Total cost of projects (billions)
Corps of Engineers:	
Rivers and harbors.....	\$1.4
Flood control.....	3.4
Bureau of Reclamation.....	2.3
Department of Agriculture, Forest Service.....	1.5
Other.....	2.2
Total.....	10.8

Programs not yet authorized.—In addition to authorized programs, Federal agencies report a total of \$20 billion of proposed construction which has not yet been authorized by Congress or recommended in the 1951 Budget. Among the larger programs are \$4.3 billion of multiple-purpose irrigation and power projects proposed by the Bureau of Reclamation and \$5 billion of multiple-purpose river and harbor and flood-control work recommended by the Corps of Engineers.

Planned projects.—The status of plans for Federal construction projects is constantly changing as projects are placed under contract and planning is started on others. Also, the status of plans varies among different Federal agencies. The Corps of Engineers has an estimated \$1,004 million of authorized projects planned to the stage where construction of the projects or initial features thereof can be undertaken; and advance planning is in various stages of completion on another \$1,753 million of authorized work. The Bureau of Reclamation has no large backlog of completed plans available in fiscal 1950 for later construction. Plans are now in process of preparation for \$329 million of projects, and additional planning will continue in 1951. Other Federal agencies, including Public Buildings Service, Atomic Energy Commission, Department of Agriculture, Tennessee Valley Authority, and Veterans Administration, have smaller but important quantities of planning under way.

The aggregate of planned direct Federal projects ready for construction is \$1.8 billion, with another \$2.6 billion of project plans in process of preparation. In addition to this category, States, local authorities, and cooperatives receiving Federal loans and grants have plans completed for a total of \$3.5 billion of projects, with another \$2.4 billion in preparation. Public Law 352 (1949) authorizing \$100 million of Federal loans to States and local authorities for advance planning of public works will further enlarge the national shelf of planned construction work. While the status of planning in this respect shows a marked improvement over previous years, there is still lacking an organized and flexible reserve to strengthen the construction industry should the need arise.

EXPENDITURES FOR BASIC SURVEYS AND DETAILED PLANS

The 1951 Budget provides appropriations for continuing the collection of basic data, the undertaking of preliminary examinations and surveys, and to a limited degree for the preparation of detailed plans and specifications for construction projects. Basic data, such as topographic maps and records of rainfall, run-off, and stream flow, are essential to the efficient and economical design and construction of many projects, particularly in the field of resource development. Similarly, well-conceived development projects require much preliminary investigation and survey work to determine their engineering and economic feasibility. Many Federal developments have been hampered in the past by inadequate examination of all of the problems involved before projects were authorized and construction was undertaken. Preparation of detailed project plans well in advance of construction provides for more orderly programming of project construction and prevents many expensive changes in project designs during the construction period.

Basic data.—A total of \$36.8 million is recommended for appropriation or allotment in fiscal year 1951 for topographic mapping and geodetic control surveys and for assembly of hydrologic data. This compares with a total of \$28.6 million for these purposes for fiscal year 1950. These data are essential not only for proper planning of construction projects but also to provide the necessary basis for the economical conservation and development of natural resources.

Preliminary surveys.—Appropriations and allotments totaling \$35.7 million are recommended for fiscal year 1951 for continuation of preliminary surveys on construction projects under investigation for possible future construction. Careful surveys are required in particular for the many and varied aspects of river-basin developments which involve the interests of many Federal agencies. Accordingly, the 1951 Budget includes funds, either through direct appropriation or by transfer, for river basin surveys by such agencies as the National Park Service, Fish and Wildlife Service, and the Public Health Service, as well as by the primary construction agencies.

Detailed plans.—For planning of authorized construction projects, a total of \$24.8 million of appropriations and allotments is recommended for fiscal year 1951. The major share of this total covers detailed plans for river basin projects of the Corps of Engineers and the Bureau of Reclamation and for the Public Buildings Service. In addition, substantial amounts for detailed plans will be available from construction appropriations for some agencies, including the Atomic Energy Commission.

PROGRAM BY MAJOR FUNCTIONS

Public works are required to some extent in most of the functional fields of Federal Government operations. The wide range of functions served by Federal public works is indicated in table 4, which shows civil public works classified according to major function and sub-function. The major share of Federal public works expenditures is for development of natural resources and for transportation and communication.

VETERANS' SERVICES AND BENEFITS

Veterans Administration hospitals.—During fiscal year 1951, work will continue on the large construction program for Veterans Administration hospitals, consisting of 76 hospital projects to provide 36,804 beds and the major alteration and renovation of existing hospitals and homes at a total estimated cost of \$871.6 million, including \$27 million for initial portable equipment, for the new projects.

In carrying out this program, the Veterans Administration is using the services of the Corps of Engineers for the planning and construction of 45 of the projects, providing 22,346 beds. The remaining 31 projects, providing

14,458 beds, together with the major alteration and renovation of existing hospitals and homes, will be constructed by the Veterans Administration.

It is estimated that, by the end of fiscal year 1951, 48 projects will be completed and the program as a whole will be over 75 percent completed.

SOCIAL WELFARE, HEALTH, AND SECURITY

Except for construction of some research facilities, the Federal Government's activities in this field are largely for assistance to State and local agencies for construction of hospital and health centers and for surveys and planning for water pollution control works.

Public Health Service.—The Federal-aid hospital construction program, authorized in 1947, originally provided a total of \$375 million of Federal grants over a 5-year period for non-Federal public and private non-profit hospitals and health facilities. The Eighty-first Congress authorized annual grants for this purpose of \$150 million in fiscal year 1950 and 5 years thereafter. The Federal share of the cost represented by the grants was also increased from 33½ percent to a permissible maximum of 66½ percent. A total of \$300 million in contract authorizations has been provided through fiscal year 1950, and an additional \$150 million is recommended for fiscal year 1951. Construction difficulties encountered during the initial stages of the program are being overcome, and it is expected that about 500 projects, most of them located in small towns and rural areas, will be started during fiscal year 1951 and each of the several succeeding fiscal years.

The Budget provides for the initiation of construction of buildings for the Public Health Service's research and investigation program in Alaska. The 1951 estimate provides \$6,325,000 in contract authority and \$975,000 in cash for transfer to the General Services Administration for this purpose.

An appropriation of \$15,125,000 is recommended for continuation of construction in 1951 of the Clinical Research Center and auxiliary buildings at Bethesda, Md. Construction is under the direction of the General Services Administration. Expenditures for construction are estimated at \$21.9 million in 1951.

The Water Pollution Control Act of 1948 authorized \$22.5 million per year in loans for construction of pollution-control facilities. This feature of the act has not yet been activated, and no expenditures for loans are shown for 1951. Expenditures by the Bureau of Community Facilities for grants to local governments for preparation of plans for pollution-control facilities total \$600,000. Expenditures by Public Health Service for grants to States for surveys in the field of pollution control, estimated at \$1 million, are not included in these totals.

HOUSING AND COMMUNITY DEVELOPMENT

Housing and Home Finance Agency.—Title III of the Housing Act of 1949 expanded the low-rent housing program by authorizing an additional 810,000 units over a 6-year period and a \$1,500 million revolving loan fund. Gross loans to local housing authorities under this and earlier programs are expected to aggregate \$212.5 million in 1950 and \$338 million in 1951. After repayments, the net loan expenditures are estimated at \$87.6 million and \$96.7 million, respectively. As a part of the program to develop the resources of Alaska, a \$15 million revolving fund was authorized by the Congress (Public Law 52,

81st Cong.), of which \$10 million was appropriated. Gross loans for this program are estimated at \$3.4 million in 1950 and \$8.9 million in 1951.

Title I of the Housing Act of 1949 authorized a slum-clearance and urban-redevelopment program involving \$1 billion of loans and \$500 million of grants over a 5-year period. Loans under this program are estimated at \$10.7 million in 1950 and \$59.6 million in 1951. Grant funds will not be required in either year. While not classified as civil public works, urban redevelopment programs facilitate the construction of public housing and community projects which would not otherwise be possible.

General Services Administration, Bureau of Community Facilities.—The program of advance planning of non-Federal public works was revived in fiscal 1950 under an authorization of \$100 million, of which \$8 million cash and \$17 million contract authority was made available for 1950. For 1951, \$35 million cash and \$40 million contract authority is recommended. These funds will be advanced to non-Federal agencies as interest free loans, to be repaid upon initiation of construction.

Under an authorization of \$70 million, a program of public works for Alaska is being inaugurated with an appropriation for 1950 of \$1 million cash and \$4 million contract authority. For 1951, \$12 million cash and \$13 million contract authority is recommended. This is a program in which the Federal Government will ultimately pay an average of 50 percent of construction costs.

Expenditures under these programs are estimated to increase from \$18.7 million in 1950 to \$49.3 million in 1951.

EDUCATION AND GENERAL RESEARCH

An appropriation to the Federal Security Agency of \$45 million is proposed for surveys and for emergency construction of elementary and secondary schools. Expenditures for construction are estimated at \$20 million for 1951 and at an additional \$20 million for the remainder of the program. A total of \$2 million is estimated for surveys in 1951 and \$3 million for later years. Expenditures of \$8.4 million under this function for fiscal year 1951 are for continuation of construction of buildings at Howard University, Washington, D. C.; for a geophysical institute at Fairbanks, Alaska; and for research facilities at the National Bureau of Standards.

AGRICULTURE AND AGRICULTURAL RESOURCES

The decrease in expenditures between 1950 and 1951 is largely attributable to a reduced level of construction for Commodity Credit Corporation storage facilities. The rural electrification and flood control programs have been omitted from the tables of this analysis because they aid primarily private rather than public construction.

NATURAL RESOURCES

The conservation and development of the Nation's natural resources involves a wide range of public works programs constituting a major element of total Federal public works activity. The function includes the multiple-purpose development of river basins for flood control, irrigation, hydroelectric power, and other purposes, and the conservation and development of land, forest, mineral, recreational, and fish and wildlife resources. The development of natural resources also requires certain capital outlays of a nonstructural nature which cannot be classed strictly as construction, such as range improvements, wildlife development, reforestation, and forest protection.

Such improvement work is not included herein as this section covers only work of a structural character.

Total expenditures for natural resources construction are estimated to rise from \$1,227 million in 1950 to \$1,523 million in 1951. These outlays will involve some increase for multiple-purpose projects involving hydroelectric power installations and related transmission lines in power shortage areas, in order to permit such projects to be carried on at a rate which will most efficiently meet power demands at earliest practicable dates. Expenditures for other natural resources projects started in fiscal year 1950 and prior years will also continue upward in fiscal year 1951, although the rate of progress on these projects will be held to a minimum consistent with logical order and timing of work. There are no recommendations for new projects in 1951, except for additional facilities in power shortage areas such as the Tennessee and Columbia Valleys.

Corps of Engineers.—The flood-control program of the Corps of Engineers is Nation-wide in scope and closely related to multiple-purpose river basin developments by other Federal and non-Federal agencies and private interests. It involves the provision of major storage reservoirs, usually for multiple purposes, construction of levees, and improvement of channels. The ultimate objective is to develop coordinated systems of flood-protection works as a part of the full development of the Nation's major river systems. In fiscal year 1951, emphasis will continue to be given to flood-control works throughout the Mississippi River Basin, including the Missouri and Ohio Basins. In addition, major projects are under construction in the South Atlantic States, California, and the Pacific Northwest. Expenditures for flood control are estimated to increase from \$459 million in fiscal year 1950 to \$534 million in fiscal year 1951 and will probably continue at that level in 1952 despite the fact that no new starts are contemplated in 1951.

The Corps of Engineers is continuing its investigations and surveys of river basins, in accordance with Congressional directives, to determine the engineering and economic feasibility of additional flood-control projects for possible future authorization and is preparing detailed plans for authorized projects to be started in later years.

Bureau of Reclamation.—Continuation of construction on many large irrigation and power projects started in prior years will characterize the major part of the Bureau's program in fiscal year 1951 for development of water resources in the 17 Western States. Eighty-six percent of the total 1951 construction appropriation is designated for six major developments: Central Valley project of California, Colorado-Big Thompson project in Colorado, Hungry Horse project in Montana, Davis Dam on the lower Colorado River, and the Missouri River and Columbia Basin projects. The remainder of the construction appropriation will be used for continuation of 36 other projects and for a comprehensive rehabilitation program on existing projects, consisting principally of replacement of obsolete or deteriorated structures and equipment.

The Bureau's program includes construction of transmission lines to principal load centers to carry electric power produced at reclamation projects and at related projects of the Corps of Engineers now under way. Funds are also included to enable the Bureau of Reclamation to continue its preliminary investigations and surveys in the river basins of the West and Alaska. Total expenditures for construction are estimated at \$354 million in fiscal year 1951, as compared with \$307 million in fiscal

year 1950. No new projects are recommended for 1951.

International Boundary and Water Commission.—Construction will continue in fiscal year 1951, in cooperation with the Mexican Government, on the Commission's principal current activity, the first of the multiple-purpose dams authorized on the Rio Grande by the treaty of February 3, 1944. Other activities, for which funds are provided, include flood-control and stream-rectification works along the Rio Grande. No new developments will be undertaken in fiscal year 1951. Expenditures in fiscal year 1951 are estimated at \$10.8 million, as compared with \$5 million in fiscal year 1950.

Bonneville Power Administration.—This agency is responsible for marketing power generated at federally owned dams in the Pacific Northwest. The recommended program for 1951, is to a large extent, a continuation of construction of previously authorized major grid transmission facilities required for the transmission of energy from Federal projects to principal load centers. Existing facilities, both generation and transmission, were inadequate to meet requirements in 1948, resulting in the curtailment of loads to certain customers who were being provided service on an interruptible basis, plus a voluntary program of service curtailment. Although additional generation is scheduled at the Grand Coulee project in 1951 and at the Hungry Horse project in 1952, it is estimated that the Pacific Northwest area will be faced with recurring shortages annually at least until 1953, when additional generation from the Hungry Horse, McNary, and Detroit projects is expected to be available.

Southwestern Power Administration.—This agency is responsible for marketing power generated at federally owned dams in six States in the southwestern area of the United States. Funds are recommended for continuation of construction of transmission facilities to match the generator installation schedules at Corps of Engineer projects, to integrate the power generated, and to provide service connections to cooperatives and municipalities in cases where satisfactory arrangements cannot be made with existing utilities for transfer of power. In fiscal year 1950, Congress approved a program of approximately \$30 million. Expenditures for construction, as well as for plans and engineering surveys, for contemplated future expansion of facilities are estimated at \$9 million in 1951.

Tennessee Valley Authority.—Most of the funds required for construction in fiscal year 1951 will be used to increase electric generating capacity and the capacity of the transmission network of the Tennessee Valley Authority power system. The program is designed to meet the steady growth in power loads in the Authority's service area, including a large increase in Atomic Energy Commission requirements at Oak Ridge. Construction will also be started on two dam and reservoir projects on the South Fork of the Holston River.

National Park Service.—Increases are recommended for construction of roads, trails, and physical improvements in national park areas. These increases provide the minimum to meet the improvements and additions to existing facilities required to serve the increasing number of visitors to national parks, monuments, and historic sites.

Bureau of Indian Affairs.—The 1951 program provides increased funds for the construction of irrigation systems, schools, hospitals, roads, and bridges to meet more adequately the urgent need for facilities for Indians.

Atomic Energy Commission, construction program.—Construction activity will show a substantial increase in 1951, due in large part to the recently announced program

for the expansion of production facilities. Expenditures for research facilities, including developmental reactors, will continue at approximately the 1950 level. Housing and community construction will decrease sharply in the three Atomic Energy Commission towns at Oak Ridge, Tenn.; Richland, Wash.; and Los Alamos, N. Mex.

TRANSPORTATION

Outlays for transportation consist largely of Federal aid for highways and airports and Federal construction of river and harbor projects and air navigation facilities. Estimated expenditures of \$826 million in fiscal year 1951 will comprise about 27 percent of total estimated expenditures for civil public works.

Corps of Engineers, rivers and harbors.—The rivers and harbors program of the Corps of Engineers is Nation-wide in scope and primarily involves dredging and rock removal operations in the ports and waterways of the Nation; the construction of locks and dams, including the installation of hydroelectric power facilities; and the maintenance and operation of completed works in the interest of navigation. In fiscal year 1951, the construction program contemplates the continuation of work on navigation improvements started in prior years in a number of the major harbors and approach channels thereto on the Atlantic, Gulf, and Pacific coasts and Great Lakes, and in many of the inland river basins, notably the Ohio, upper Mississippi, and Warrior. In addition, navigation projects involving hydroelectric power are under way in the Columbia and Apalachicola-Chattahoochee Basins. Expenditures for rivers and harbors are estimated to increase from \$126 million in fiscal year 1950 to \$157 million in fiscal year 1951 and probably will continue at a high level at least for another year even without starting any new projects in fiscal year 1951. In addition, an appropriation of \$6 million is recommended under pending legislation for fiscal year 1951 for preparatory work on the St. Lawrence seaway and power project.

The Corps of Engineers is continuing its investigation and survey program, as authorized by Congress, to determine the engineering and economic feasibility of additional improvements in the interest of navigation. Detailed plans are also being prepared for authorized projects to be started in later years.

The Panama Canal.—Construction will continue, in fiscal year 1951, of community facilities, including improvements to Gorgas Hospital, schools, prisons, roads, and streets. A sewage disposal system on the Pacific Ocean side of the Canal will be started. A supplemental estimate for \$4,000,000 will be submitted in fiscal year 1951 to initiate a comprehensive housing program.

Department of Commerce, Bureau of Public Roads.—The Federal-aid highway program, suspended during the war except for construction of highways in support of the war effort, was resumed 4 years ago. The Congress in 1944 authorized \$500,000,000 annually for the three successive postwar fiscal years, but shortages prevented the program from attaining the authorized rate. Subsequent authorizations by the Congress in 1948 for this program amounted to \$450,000,000 for each of the fiscal years 1949 and 1950. In addition to the postwar authorization for highway work, there was approximately \$100,000,000 remaining of the prewar authorization available for new work in the postwar period. Expenditures under the postwar programs in fiscal years 1950 and 1951 will approximate \$450 million per year. There will remain approximately \$666 million to be expended in future years under present

Federal-aid highway authorizations. New legislation to provide an annual Federal-aid authorization for the next 2 years of \$500 million is proposed.

Direct Federal construction under the supervision of the Bureau of Public Roads includes primarily the improvement of forest highways. Forest highway construction expenditures in the fiscal year 1951 are estimated to approximate \$25,000,000. A total of \$20,000,000 will be required in future years to liquidate the balance of \$90,000,000 authorized for this work in the Federal-Aid Highway Acts of 1944 and 1948.

The Federal-Aid Highway Act of 1944 recognized the need for early improvement to high standards of a limited mileage of direct arterial routes connecting principal metropolitan areas and industrial centers by providing for the designation of a national system of interstate highways. The system selected, comprising 37,800 miles, includes only 1 percent of the country's total mileage of roads and streets, but on its rural sections serves 20 percent of the traffic carried by all rural roads. The selected system is at present seriously deficient in many areas, particularly in its sight distances and in the width of its pavement, shoulders, and bridges. The estimated cost of improvements required now to adapt the system to the needs of present traffic is estimated by the Bureau of Public Roads as approximately \$11,266,000,000 on the basis of prices prevailing in 1948. It is proposed that increased emphasis be placed upon this system within the recommended Federal-aid authorization of \$500 million per year.

Contingent upon authorizing legislation, the Budget provides for augmenting forest highway construction in the Tongass National Forest of southeastern Alaska. The improvement of forest highways in this area will serve the present and potential traffic in the vicinity of established or proposed pulp-mill plants. The construction program is expected to extend over a 3-year period with expenditures of \$2,888,000 in fiscal year 1951 and \$4,364,000 in future years.

Road programs of other Federal agencies.—Other Federal road programs include the construction of highways and roads in the Territory of Alaska.

Civil Aeronautics Administration.—The Federal-aid airport program authorizes \$520 million to be appropriated over a 7-year period, concluding in fiscal year 1953. Through fiscal year 1950, \$157 million in cash and contract authorizations has been made available for airport grants to local public agencies and for administration, and an additional \$40 million is recommended for 1951, principally for larger-type airports of special importance to air commerce and national defense. Expenditures for fiscal years 1950 and 1951 are estimated at \$48 million and \$51 million, respectively, compared to \$30 million for 1949.

The recommended program for fiscal year 1951 for the establishment of air-navigation facilities will permit continued implementation of the Radio Technical Commission for Aeronautics' common transition system and modernization, and improvement of existing facilities on the Federal airways system. Estimated expenditures of \$23 million in fiscal year 1950 and of \$47 million in fiscal year 1951 compare with \$15 million for fiscal year 1949.

Alaska Railroad.—In fiscal year 1951, expenditures of \$27 million are estimated for continuation of the rehabilitation program started in fiscal year 1948 to restore and improve the Alaska Railroad in order to provide proper service to areas dependent upon the railroad and to promote the development of the Territory. The total program is now estimated to cost about \$74 million and is

being expedited in order to bring it to substantial completion in fiscal year 1951.

United States Coast Guard.—Expenditures for capital investment in Coast Guard operating facilities total \$7.1 million for the fiscal year 1951, of which \$4 million is required for the completion of projects initiated prior to 1951. The remaining \$3.1 million comprises expenditures in connection with projects recommended in the 1951 Budget request, which includes funds for improvements or alterations at six lifeboat stations and six other supporting shore units; for improvements or changes in aids to navigation, a part of which is related to United States Army engineers' channel or harbor improvement projects; for construction of a chain of three loran stations to provide loran service in the Gulf of Alaska; and for improvements or rebuilding at seven repair depots.

GENERAL GOVERNMENT

General Services Administration, Public Buildings Service.—In accordance with Budget policy on civil public works, no general public-buildings program is recommended. However, acquisition of sites and preparation of plans for such a program of building construction outside the District of Columbia are in process under an authorization of \$40 million, of which \$12 million was appropriated for 1950 and \$28 million recommended for 1951. Expenditures for the 2 years are estimated at \$5.2 million and \$29.5, respectively. This construction being planned is estimated to cost \$337 million. Other construction in 1951 will proceed only on a few buildings already started, and expenditures for these buildings are estimated to increase from \$15.4 million in 1950 to \$24.9 million for 1951.

NATIONAL DEFENSE PUBLIC WORKS

Large expenditures for public works construction arise from the national defense program. Some of this is undertaken overseas, and the effect on the domestic construction industry is difficult to assess. Nevertheless, it is important to include in this analysis the military programs of the Department of Defense and the construction expenditures of the National Advisory Committee for Aeronautics.

TABLE 5.—Total estimated cost of the 1951 defense public works program—Classified according to date of expenditure and whether continuing work or new projects, features, and commitments

[Fiscal years. In millions]

Program	Total estimated cost	Expenditures		
		Cumulative to June 30, 1950	Estimated, fiscal year 1951	Required to complete in later years
Continuing work, direct Federal construction:				
Department of Defense.....	\$900.5	\$489.7	\$203.3	\$207.5
National Advisory Committee for Aeronautics.....	92.8	31.6	18.5	42.7
Total, continuing work.....	993.3	521.3	221.8	250.2
New projects, features, and commitments, direct Federal construction:				
Department of Defense ¹	24.0	8.0	16.0
National Advisory Committee for Aeronautics.....	16.5	1.0	15.5
Total, new projects, features, and commitments recommended for 1951.....	40.5	9.0	31.5
Total, defense public works ¹	1,033.8	521.3	230.8	281.7

¹ Excludes proposed legislation.

Department of Defense.—Expenditures totaling \$203 million for national defense public works in fiscal year 1951 will provide for the continuation of the 1950 programs, consisting of top priority projects of troop and family housing; research and development facilities; and technical, operational, and industrial facilities within and without the continental United States. Included are such programs as the further development of Alaskan military installations, the improvement of military installations on the islands of Guam and Okinawa, and initial amounts for the development of an aircraft control and warning system, a long-range proving ground for guided missiles, and an air engineering development center. Expenditures for new projects for 1951 total only \$8 million.

The reserve of authorized projects and programs for undertaking in or after 1951 is \$310 million. Proposed

construction of at least \$660 million has not yet been authorized by Congress.

National Advisory Committee for Aeronautics.—The expenditures of this agency are primarily for defense purposes and have therefore been so classified in this Budget. Expenditures in 1951 for public-works construction are estimated at \$19.5 million. These funds will be expended for construction and modification of aeronautical research facilities at the Committee's laboratories and research stations at Langley Air Force Base, Va.; Wallops Island, Va.; Cleveland, Ohio; and Moffett Field, Calif. The estimate includes \$3.5 million of expenditures against supplemental estimates of appropriation which are expected to be recommended later in 1950 for the construction of supersonic wind tunnels authorized by the Unitary Wind Tunnel Plan Act of 1949. The total authorizations for wind tunnel construction by the National Advisory Committee for Aeronautics in this act are \$146 million.

BUDGET APPROPRIATIONS AND EXPENDITURES FOR CIVIL PUBLIC WORKS

BY MAJOR FUNCTION, SUBFUNCTION, AND AGENCY

NOTE.—Appropriations include appropriations to liquidate contract authorizations.

^{*}Includes only that part of the appropriation account used for construction.^aDeduct.¹ Excludes contract authorization of \$52,834,770. In addition \$50,000,000 in cash and/or contract authority may be transferred from other 1950 Air Force appropriations.² Excludes contract authorization of \$75,000,000 in 1949 and \$48,363,700 in 1950.³ Excludes contract authorization of \$35,414,000.⁴ Includes anticipated supplemental of \$5,000,000 in 1950; excludes contract authorization of \$18,200,000 in 1949, \$25,000,000 in 1950, and \$15,000,000 in 1951.⁵ Excludes tentative estimates for 1951 under proposed legislation of \$131,722,000 of appropriations, \$240,000,000 of contract authorizations, and \$70,000,000 of expenditures for Department of Defense military functions, largely defense public works.

FEDERAL AID TO STATE AND LOCAL GOVERNMENTS

Federal financial aid to State and local governments is given in a variety of forms, including grants-in-aid, loans and repayable advances, and shares in the revenue resulting from the sale of certain Federal Government property, products, and services. Of these forms, grants are the most important financially, although loans for housing and community development are substantial in amount. Grants and loans are employed as a device of intergovernmental cooperation in programs of national interest which can be effectively administered by State and local governments.

The rising importance of Federal-aid expenditures in the Federal Budget and in the finances of State and local governments is shown in the following table:

Fiscal year	Federal expenditures for aid to State and local governments ¹	Federal aid expenditures as percent of—	
		Total Federal expenditures	State-local revenues
1947	\$1,692,237,175	4	12
1948	1,656,672,123	5	10
1949	1,802,703,363	5	10
1950	2,420,013,553	6	12
1951	3,264,856,042	8	(2)

¹ Principal repayments on loans have been deducted in all cases in which such repayments are deducted from Budget expenditures in part I of the Budget. These repayments are estimated at \$251,493,725 for the fiscal year 1951.

² Preliminary estimate

³ Not available.

Of the Federal-aid expenditures of \$3,265 million estimated for the fiscal year 1951, \$2,999 million is for grants-in-aid, \$241 million for loans and repayable advances, and \$25 million for shared revenues. Expenditures under existing laws will amount to \$2,686 million, and \$579 million is estimated for proposed legislation recommended in this Budget. The individual programs are listed in the detailed tables which follow.

The largest grants are in the fields of social welfare, health, and security, transportation and communication, and education and general research. These three functions account for \$2,630 million or 88 percent of all Federal grant expenditures estimated for the fiscal year 1951, including grants under proposed legislation. The major programs in these three fields provide grants for public assistance, for the construction of hospitals, highways, and airports, and (under proposed legislation) for the current operating costs of elementary and secondary schools.

Federal loans and repayable advances to State and local governments are listed this year as a separate category of aid. These are chiefly for low-rent housing, slum clearance and urban redevelopment, and the advance planning of State and local public works. Gross disbursements for loans and repayable advances will, of course, be much larger than Budget expenditures, which are net of repayments received. Disbursements are estimated at \$492 million in 1951, against which will be credited repayments of \$251 million in that year. Certain repayments, esti-

ated at \$23 million in 1951, are part of "miscellaneous receipts" and are not deducted from gross disbursements in computing Budget expenditures.

Explanation of table.—This special analysis lists authorizations and expenditures for all the grants, shared revenues, and loans to State and local governments appearing in parts I and II of this Budget where they are reported as parts of the work programs of the responsible Federal agencies. For example, the \$1,762 million of grants-in-aid in the field of social welfare, health, and security in 1951, shown in this special analysis, is included in the total Budget expenditures of \$2,714 million reported for the same function in table 1 of part I.

Expenditures for grants or loans are made in some instances from an appropriation which also finances direct Federal operations or Federal administrative expenses. In such cases, objects of expenditure other than the actual grant or loan are excluded wherever possible and the amounts tabulated here as "appropriations" ordinarily represent only that part of the total appropriation approximating the amount available for the aid to State and local governments.

Legislation governing a few grant programs permits aid to private nonprofit agencies or institutions. Consequently, grants to some private nonprofit institutions are included in the totals—for instance, in the totals for the school-lunch program of the Department of Agriculture and the hospital-construction program of the Federal Security Agency. On the other hand, certain Federal programs which do not operate primarily through grants or loans to State or local governments involve incidental payments to particular governmental agencies—for example, research grants to medical schools, a few of which are State institutions. Such payments are not included in this tabulation.

Some Federal aid to State and local governments, included in the table, takes the form of grants-in-kind. For instance, the activity, "Purchases of agricultural commodities for distribution through authorized agencies," initially involves payments to farmers or producers, but the commodities purchased are distributed to State or local institutions or other agencies. Veterans' re-use housing also was given as a grant-in-kind.

Factors affecting aid expenditures and allocations.—The amounts expended for most programs of Federal aid are subject to periodic limitation in advance within comparatively narrow limits established in the basic authorizing laws. For some grants-in-aid the total amount of the Federal Government commitment for any year is not predetermined and is not limited to the amount appropriated in advance, so that they are "open-ended." The largest grant program, that for public assistance, is of this type. The estimates of the Federal appropriation and expenditure in any one year for this purpose are based on a statutory formula applied to the expected case loads and the individual benefit rates established by the several States. If the estimates prove insufficient, a deficiency may nevertheless be incurred within the formula fixed by the statute.

Statutory provisions governing the allocation and payment of aids, and the extent of supervision and control exercised by the administering Federal agency, vary widely among the several programs. The amount apportioned may be a flat sum for each State; it may be proportionate to a single specified factor, such as population or case load; or it may be based on consideration of several factors, such as need for the aided service and the financial ability of the recipient State or local government. A few Federal grant statutes provide for payments to the State or local governments with little or no supervisory discretion assigned to any Federal Government agency and with few requirements as to the conditions to be met in order to qualify for the grant. Other statutes establish conditions such as the matching of apportionments and conformity to specified standards of administration, service, and personnel; prescribe procedures relating to planning, reporting, and audits; and assign some supervisory responsibilities to Federal agencies. In the proposed program for general aid for the current operating expenses of elementary and secondary schools, the payments to the States are conditional on State and local effort to support education; this effort is measured by State-local expenditures as a percentage of the income of the population of each State.

Appropriations and other authorizations.—Except for the public works programs, appropriations for aid to State and local governments for any fiscal year are ordinarily paid out by the Federal Government within that year. The Budget recommendations for appropriations for Federal aid for the fiscal year 1951 total \$3,110 million, including \$675 million as an estimate of the amount that will be required under proposed legislation. This total includes \$604 million to liquidate contract authorizations. It does not include recommended new contract authorizations of \$827 million and public debt authorizations of \$225 million, also recommended in the Budget.

New obligational authority recommended for the fiscal year 1951 totals \$3,558 million, an increase of \$372 million over new obligational authority for 1950.

Other financial relationships.—Apart from grants, loans, and shared revenues, many other Federal expenditures and policies affect the finances of State and local govern-

ments. Types of transactions not covered in the tabulation of aids include the following:

(a) Reimbursements for various specific services, such as payments to public educational institutions for tuition of veterans and of students from the armed forces, and payments to local governments for care of Federal prisoners in local institutions.

(b) Contractual payments to public institutions for research and training in specified fields.

(c) The value of war surplus educational and hospital supplies, materials, and equipment, and of housing and military airports donated or sold at substantial discount to State and local agencies.

(d) Payment of State or local property taxes on properties owned by the Reconstruction Finance Corporation and certain other Federal corporations, and payments in lieu of property taxes on certain federally owned or leased property (excepting that such payments based on a percentage of revenues, as in the case of the Tennessee Valley Authority, are included in shared revenues).

Also, the table does not reflect indirect financial benefits accruing to State and local units, such as the lower interest rates which such governments enjoy because of exemption from Federal income tax of interest paid on State and local debt; the indirect Federal guaranty of municipal obligations issued for low-rent housing and slum clearance; deductions of State and local income, property, and other taxes from personal and corporate incomes in computing Federal income tax; services which may be rendered to other governmental units by Federal agencies in the ordinary course of their operations; and some programs administered cooperatively for the purposes of both the State and the Federal Governments, such as the National Guard or agricultural crop reporting. In the Analysis of Investment, Operating, and Other Budget Expenditures, Federal expenditures for National Guard construction are classified as additions to State or local physical assets.

Likewise the table does not record the reciprocal assistance in the form of services rendered or the occasional payments made to the Federal Government by the States or their subdivisions.

¹⁰ The Budget provides authorizations to expend from public debt receipts as follows: 1950, \$25,000,000; 1951, \$225,000,000. Expenditures shown here represent the net loan part of expenditures from a checking account under a business-type budget.

¹¹ Expenditures shown here represent the net loan part of expenditures from a checking account under a business-type budget.

¹² The Budget provides authorization to expend from public debt receipts as follows: 1950, \$700,000,000. Expenditures shown here represent the net loan part of expenditures from a checking account under a business-type budget.

¹³ The Budget includes also reappropriations as follows: 1949, \$713,069; 1950, \$350,000; 1951, \$250,000.

¹⁴ Includes appropriation to liquidate contract authorizations as follows: 1951, \$14,100,000. The Budget includes also contract authorizations as follows: 1950, \$17,000,000; 1951, \$40,000,000.

¹⁵ Repayments are made directly to "miscellaneous receipts."

COMBINED STATEMENTS OF BUDGETS SUBMITTED UNDER THE GOVERNMENT CORPORATION CONTROL ACT

The business-type budgets summarized in the combined statements cover the operations of all wholly-owned Government corporations and certain business-type activities of other Federal agencies. They include such major programs as the purchase and sale of agricultural commodities, the provision of a secondary market for home mortgages guaranteed or insured by the Federal Government, agricultural and business loans, generation and sale of electric power, and financing and operation of public housing projects.

Business-type budgets are submitted this year, for the first time, for two new programs—Alaska housing and slum clearance and urban redevelopment—as well as for several existing programs recently converted to a business-type presentation. There are several other important business-type operations of the Federal Government, such as the Post Office, for which business-type budgets are not yet available; such operations are not included in these combined statements.

SOURCES AND APPLICATION OF FUNDS

Exhibit A shows the flow of funds—i. e., expenditures and accruals requiring the application of funds, together with the sources of those funds. The sources and uses of funds are classified according to major categories, and amounts are shown for specific agencies whenever they exceed \$50 million in any one year.

FUNDS APPLIED

Loans.—Loan disbursements, totaling \$6.1 billion in the fiscal year 1951 represent the principal use of funds. Price-support loans by the Commodity Credit Corporation, including agent bank loans guaranteed by the Corporation, will be somewhat below 1949 and 1950 because of acreage allotments and marketing quotas. On the other hand, discounts of crop, livestock, and commodity loans for financial institutions by the Federal intermediate credit banks will continue to increase. Substantial mortgage purchases and business loans account for most of the disbursements by the Reconstruction Finance Corporation. The expanded United States Housing Act program is expected to involve substantial loans in 1950 and 1951 to cover planning, site acquisition, and part of the construction cost of local housing projects. Export-Import Bank loans will remain substantially below the level prevailing in the early postwar years.

Acquisition of other assets.—Investment in power and related facilities by the Tennessee Valley Authority and purchase of United States Government securities by the Federal Housing Administration and the Federal intermediate credit banks account for most of the disbursements for other assets.

Expenses.—Funds applied to commodities by the Commodity Credit Corporation in 1951 include \$754 million in purchases and \$285 million in carrying charges. They exclude acquisitions of collateral on price-support loans estimated at \$1.6 billion. Operating expenses and interest on borrowed capital are the other major items.

Retirement of borrowings, capital, and surplus, and cancellation of notes.—Repayments of short-term borrowing

will be particularly large in the case of the Commodity Credit Corporation and the Federal intermediate credit banks. Liquidation of assets, chiefly sales of public war housing, will permit continuing payments to general fund receipts by the Public Housing Administration. The Home Owners' Loan Corporation will complete retirement of both borrowing and capital stock by the end of 1951.

Cancellations of Commodity Credit Corporation notes, amounting to \$171 million in 1950 and \$511 million in 1951, will be required to restore capital impairment resulting from its price-support and other activities.

Increase of working capital.—With the exception of Commodity Credit Corporation, annual net changes in working capital are small. The increase of \$327 million in 1951 reflects a reduction in the Corporation's current liabilities as price-support loans by private lending institutions are repaid or the collateral taken over.

FUNDS PROVIDED

Repayment of loans.—Increased repayments of loans in 1951 reflect recent peak levels of new loans, especially short-term discounts by the Federal intermediate credit banks, and crop loans by the Commodity Credit Corporation. In the case of the Commodity Credit Corporation loans, many farmers probably will forfeit collateral rather than repay at maturity if, as expected, the market prices at that time are generally lower than the loan value of the collateral. Sales and amortization of mortgages account for roughly 60 percent of the repayments to the Reconstruction Finance Corporation. Complete disposition of mortgages held by the Home Owners' Loan Corporation by June 30, 1951, is anticipated as a result of the Corporation's accelerated liquidation program.

Income.—Of the \$1.5 billion for sales of commodities in 1951 by Commodity Credit Corporation, nearly \$1.3 billion will consist of commodities acquired by the Corporation through price-support operations. Other income and receipts consist primarily of interest earned on loans and investments, rents on public housing projects, and sales of power and other services.

Borrowings, capital and surplus subscriptions, and appropriations.—Provision of new capital, particularly by borrowing, substantially exceeds retirements in all 3 years. The excess of \$2.3 billion in 1951 provides a rough measure of the expansion in these programs. Most borrowing is from the United States Treasury, but a few corporations, notably the Federal intermediate credit banks, are authorized to borrow privately. Extensive new borrowing will be required to finance heavy mortgage purchases by the Reconstruction Finance Corporation and price-support loans by the Commodity Credit Corporation. On the other hand, the Federal intermediate credit banks borrow largely to refund their short-term debentures and notes.

EFFECT ON BUDGETARY EXPENDITURES

Checking account expenditures (excluding transfers of capital and surplus to the Treasury) comprise the bulk of the budgetary expenditures for programs covered by business-type budgets. Substantial expenditures from

general and special accounts also are made for annual contributions under the low-rent public housing program, investment in fixed assets of the Tennessee Valley Authority, and operating costs of noncorporate housing programs.

Net budgetary expenditures in 1951 for all these programs are estimated at \$2.2 billion, or \$419 million less than in 1950. The Reconstruction Finance Corporation and the Commodity Credit Corporation account for about 90 percent of this total. Although lending activity of the Federal intermediate credit banks will increase, there will be no impact on budgetary expenditures since the banks maintain their working balances with private banking institutions.

INCOME OR LOSS

Exhibit B, which summarizes the income or loss of Government enterprises, reflects the sharply varying character of the major programs. The Export-Import Bank, the Reconstruction Finance Corporation, and almost all other lending programs show substantial net income. Similarly, the insurance revenues of the Federal Housing Administration and the Federal Savings and Loan Insurance Corporation will not only meet all expenses but will add to reserves against possible future losses. In the case of the Tennessee Valley Authority, power demand will be substantially in excess of the capacity of the system's economical power facilities. Hence earnings from power operations will decline, but will still remain greater than the expenses of the other operations of the Authority.

In both 1950 and 1951, however, the Commodity Credit Corporation, in fulfilling the Government's commitment to support farm prices, will experience net losses considerably higher than in 1949. As liquidation of war and other emergency housing projects is accelerated in 1950 and 1951 a corresponding rise in realized losses will occur. Meanwhile expenditures of the low-rent public-housing

program, chiefly contributions to maintain low rents, will substantially exceed receipts.

FINANCIAL CONDITION

Assets.—The substantial net expenditures of Government enterprises during the period are reflected in the sharp increase in total assets, from \$9.3 billion on June 30, 1948, to \$14.2 billion on June 30, 1951 (Exhibit C). Of the outstanding net loans of \$7.9 billion at the close of 1951, guaranteed and insured mortgages and other loans of the Reconstruction Finance Corporation and Export-Import Bank loans, chiefly to foreign governments, account for \$5.9 billion. Investments, largely in United States Government securities, are estimated at \$682 million. Commodities, supplies, and materials—almost entirely farm commodities held by the Commodity Credit Corporation—will amount to \$2.7 billion, after providing for estimated losses. Plant and equipment of the Tennessee Valley Authority and public-housing projects account for almost all of the \$2.2 billion in land, structures, and equipment.

Liabilities.—The most sizable liabilities (excluding investment of the U. S. Government) are the outstanding obligations of the Federal intermediate credit banks. Commitments of the Commodity Credit Corporation and the Export-Import Bank to reimburse agent banks for disbursements on guaranteed loans have counterbalancing assets.

Investment of United States Government.—Of the total Government investment, \$8.2 billion, or roughly two-thirds, is interest bearing, generally at rates set by the Secretary of the Treasury in accordance with rates paid on comparable direct Treasury borrowing in the market. The remaining \$4.1 billion represents chiefly expended appropriations for war and emergency public housing construction and for investment in the Tennessee Valley Authority, as well as capital stock of the Export-Import Bank.

APPENDIXES

- Appendix 1. Unexpended Balances of Budget Accounts as of June 30, 1949, and Appropriations for the Fiscal Year 1950.
- Appendix 2. Permanent and Indefinite Budget Appropriations.
- Appendix 3. Special Account Receipts.
- Appendix 4. Expenditures From Funds Appropriated to the President (by Spending Organization Unit).
- Appendix 5. Comparison of Budget Receipts and Expenditures by Function, Fiscal Years 1939 and 1943 Through 1951.

INTRODUCTION TO THE APPENDIXES

Appendix 1, "Unexpended balances of budget accounts as of June 30, 1949, and appropriations for the fiscal year 1950," shows, by organization unit, the unexpended balances of general and special accounts and of corporation checking accounts with the United States Treasurer at the end of the fiscal year 1949. The balances exclude the unexercised portion of authorizations to expend from public debt receipts. This appendix also shows appropriations for the fiscal year 1950 made available by action of Congress prior to November 1, 1949. Part of these appropriations were made immediately available and were expended in the preceding fiscal year or are included in the June 30 balances. After deducting for the immediately available items, the balances and appropriations are added together to show the "total available" for expenditure to each organization unit.

Appendix 2, "Special account receipts," shows for the fiscal years 1949, 1950, and 1951 the receipts which belong to the Government but are earmarked by law for certain purposes. These receipts are included in tables 1 and 6 of part I, but are not separately identified there.

Appendix 3, "Permanent and indefinite budget appropriations," is in two parts. The first part shows the permanent appropriations for the fiscal years 1949, 1950, and 1951. These appropriations are set up in the accounts from year to year under standing legislation, without new

action by Congress. The second part of the appendix shows the nonpermanent appropriations which are indefinite in amount, contained in current acts of Congress. Trust appropriations, most of which are permanent, are omitted from the appendix.

Appendix 4, "Expenditures from funds appropriated to the President," shows the actual expenditures in the fiscal year 1949 and estimated expenditures in fiscal years 1950 and 1951 from "Funds appropriated to the President." Expenditures from presently available appropriations for economic cooperation, mutual defense assistance, assistance to the Republic of Korea, and assistance to economically underdeveloped areas are shown in table 8 of part I under "Funds appropriated to the President." However, expenditures from other funds are shown in table 8 under the agency responsible for the payment. For convenience, this appendix brings together in a single place the expenditures by all agencies from all "Funds appropriated to the President."

Appendix 5, "Budget receipts and expenditures by function," presents an historical comparison of Budget receipts and expenditures for the fiscal year 1939, the past 7 fiscal years, the current fiscal year 1950, and the budget year 1951. The receipts are classified by source as in tables 1 and 6 of part I. The expenditures are classified by function as in tables 1 and 7.

APPENDIX 1

UNEXPENDED BALANCES OF BUDGET ACCOUNTS AS OF JUNE 30, 1949, AND APPROPRIATIONS FOR THE FISCAL YEAR 1950

Organization unit	Unexpended balances, June 30, 1949		Appropriations for fiscal year 1950			Total available

* See memorandum section at the end of table 8 for detail.

Changes in the functional classification from 1950 to 1951 Budget

[Carried back through all years in the table for comparative purposes]

Classification used in 1950 Budget	Description of change	Classification used in 1951 Budget
International affairs and finance: 151. Foreign relations 154. Membership in various international organizations	Membership in international organizations (except direct relief or other operating programs) moved to subfunction 151	International affairs and finance: 151. Conduct of foreign affairs
152 Foreign relief 153. International reconstruction, development, and monetary stabilization	Combination of two subfunctions, except for activities relating to economic development and military assistance	152. International recovery and relief
	New subfunction covering programs concerned with long-range development rather than immediate repair of damage or postwar chaos	153. Foreign economic development
	New subfunction covering military assistance programs	154. Foreign military assistance
Social welfare, health and security: 203. Assistance to the aged and other special groups 205. Social Security Administration	Combination of two subfunctions	Social welfare, health and security: 203. Assistance to the aged and other special groups
Housing and community facilities: 253. Other housing services and administration	Title of function changed, and new subfunction added to reflect new program on urban development	Housing and community development: 255. Urban development and redevelopment
	Title changed to reflect broadened scope of research activities	253. Research and other general housing aids
Labor: 551. Mediation and regulation of employment conditions 553. Training of workers	Labor standards activities moved from subfunction 551 to 553; subfunctions retitled accordingly	Labor: 551. Mediation and regulation of labor relations 553. Labor standards and training
General government: 610. Other general government	Activities in the subfunction "Other general government" representing central services have been segregated in a new subfunction	General government: 605. Other central services 610. Other general government
605. Interest on refunds of receipts	Renumbered	607. Interest on refunds of receipts

In addition to the changes outlined above, the following major changes in the classification of individual items have been made:

Appropriations for the National Advisory Committee for Aeronautics have been reclassified from 454 (Promotion of aviation, including provision of airways and airports) to 055 (Activities supporting defense). This change is carried back historically.

Reconstruction Finance Corporation transportation loans and housing loans, formerly contained in 504 (Business loans and guarantees) have been reclassified to 456 (Other services to transportation) and 252 (Aids to private housing), respectively. These changes are not carried back before 1949.

Retired pay for the Department of Defense, formerly included under 052 (Air force defense), 053 (Army defense) and 054 (Naval defense), has been reclassified to 055 (Activities supporting defense) due to a change in appropriation structure. This change is carried back only through 1950.

The functional classification of many activities under the Department of the Interior has been changed due to a consolidation of the appropriation structure. These changes are not carried back historically except in the case of the Bureau of Indian Affairs.
