Monthly BUSINESS STATISTICS

THE STATISTICS here are a continuation of the data published in Business Statistics, the 1951 Statistical Supplement to the Survey of Current Business. That volume (price \$1.50) contains monthly data for the years 1947 to 1950, and monthly averages for earlier years back to 1935 insofar as available; it also provides a description of each series and references to sources of monthly figures prior to 1947. Series added or revised since publication of the 1951 Supplement are indicated by an asterisk (*) and a dagger (†), respectively, the accompanying footnote indicating where historical data and a descriptive note may be found. The terms "unadjusted" and "adjusted" used to designate index numbers and dollar values refer to adjustment of monthly figures for seasonal variation.

Data subsequent to January 1952 for selected series will be found in the Weekly Supplement to the Survey.

r Revised. ¹ Estimates based on anticipated capital expenditures of business. ² Quarterly average.

d'Includes inventory valuation adjustment. § Personal saving is excess of disposable income over personal consumption expenditures shown as a component of gross national product above. ♀ Derived by deducting employee contributions for social insurance from total wage and salary disbursements. ○ Data through 1951 represent employee contributions only; thereafter, personal contributions of self-employed persons are also included. ↓ Revised beginning 1945. For revised annual data for 1945–51, see p. 5 of the January 1952 Survey; and for quarterly data beginning 1947 for manufacturing, p. 20 of the December 1951 issue.
