ing any spasm in the money market. It is also claimed that at the outbreak of the Ketchum panic, things were in such a train that a loan of fifty millions on terms such as we have stated was on the eve of being announced; and would have been speedily followed, if successful, by a second loan of equal or greater amount.

Now we do not wish to give too much credit to these vague rumors; but as they have produced a certain impression in Wall street, and have raised the prices of compound interest notes while depressing the price of the tenforties, we propose to enquire how far such a loan as the one proposed is required by the National Treasury, conducive to the best interests of the country, and agreeable to the laws of sound government finance.

Now it is obvious that the general principle is a good one of converting a portion of the shorter obligations of the government into bonds having a longer time to run. But on the other hand we cannot believe that any government negotiation of ten-forties is desirable at 93 or 94, which is their present market price without interest. The 172 millions of these five per cent gold bearing bonds which are now out were taken last year as a war loan at par, and it would be equally mischievous to the public credit, and unjust to the patriotic subscribers, if, with peace restored, we offered to sell similar bonds at so much lower a rate. When the numerous forms of our federal securities become consolidated, it is probable that these very ten-forty bonds now so unpopular and so much depressed below their relative value, will be the most widely held, and will form the nucleus of the permanent funded debt of this country. However this may be, it is believed that the whole National Debt will event. ually be funded at a rate of interest not above 5 per cent, and that a long 5 per cent bond of the United States will again be worth par, even after we have resumed specie payments. The necessity ought to be very clear and imperative which, in face of these facts, would justify Mr. McCulloch in offering ten-forties at 6@7 per cent discount. But there is no immediate pressure on the Treasury nor any anticipated embarrassment from these compound interest notes. Of the 212 millions outstanding none have, run half their term, and the greater part will not mature for almost two years. Hence no trouble can at present arise from them. And judging from the immense popularity of our federal securities both at home and abroad, we shall be in a position before two years have passed, to fund these notes on better terms than if we exchanged them now, either for five per cent or six per cent bonds. So far, then, the project of funding these compound interest notes does not seem necessary

GENERAL SUBSCRIPTION AGENT FOR THE U.S.

# THE PROPOSED NEW LOAN.

1.3

THE rumor is current that a new fifty million loan is about to be offered for public subscription. Influential persons have certainly urged such a loan on the Secretary of the Treasury, but as he is not in immediate want of funds, and is supplied by the Internal Revenue with more than one million of dollars a day, it seems doubtful whether he could be induced to yield to the pressure, even were there no special difficulties in the way. We understand the proposal is to issue fifty millions of ten-forty five per cent bonds, and to receive in payment at par and interest the compound interest legal tender notes. The arguments in favor of this project are that it would convert a short government obligation into a long one; that more ten-forties are wanted by the national banks as a security for the circulation; that the payment in compound interest notes would diminish the currency and check inflation; and that the loan could be negotiated without product

[August 26, 1856.

or desirable. Let us now enquire whether, as is claimed, the project would conduce to a contraction of the currency.

It is no doubt true that fifty or one hundred millions of compound interest notes could be withdrawn from the hands of the public without creating much derangement in the currency or trouble in the money market. For the older notes to the extent of 150 millions of dollars have almost ceased to pass as money, and are held for investment at a premium. Now so far as they do not perform the functions of a circu. lating medium, these notes do not exert any influence to inflate prices. And as they gradually lose the attributes of paper money and become transmuted into an interest-bearing investment, they tend to produce a contraction of the volume of the circulation. Indeed this very power of contracting the currency by gentle imperceptible degrees was one of the chief reasons why compound interest legal tenders were authorized in the loan acts of 3rd March, 1863, and 30th June, 1864. It was then claimed that as the interest on the notes accumulated, they would withdraw from active circulation, and would be locked up in the vaults of the banks or in the coffers of individuals. Coming out in cases of stringency only, they were to act as a safeguard against sudden spasms and panies during our slow, painful and difficult progress towards a healthy currency and a resumption of specie payments. This skilfully contrived machinery for contracting the volume of paper money, it was supposed, would be sufficiently elastic and powerful in its operations to meet all the trying and deli cate exigencies of the case. And, it must be confessed, that up to the present moment the plan seems to be working admirably. The late fall in gold, though largely due to other causes, was in part produced and continued by the fact that one hundred and fifty millions of our paper currency have gradually ceased to perform many of their functions as paper money, and are almost as inoperative to inflate prices or to promote undue speculation as the funded debt itself. If Mr. Chase, urged on by the pressure of necessity, left us an in-Hated currency as a monument of his administration, it must be remembered that he also left us this powerful and exquisitely contrived financial machinery for so calling in our redundant currency as to avert many of the mischiefs with which, in other countries, all former methods of contraction have invariably been attended.

Moreover, it is easy to see that by calling in this transmuted currency, and placing it in the Treasury, we should not only fail to diminish the amount of active currency afloat, but we should probably increase it. For the loan act of 3d March, 1865, allows the issue of compound interest notes to an amount equal to those withdrawn. On the very first exigency, the National Treasury would avail itself of blockade maintained by our cruisers, forbade, and with the this privilege. New legal tenders would be issued, and the new notes, though bearing interest, would of course act for some time as active currency. To absorb fifty millions of inert compound interest notes would, therefore, make room for the early addition of fifty millions to the active circulation of the country; and the result would therefore be an aggravation of the evils of our paper money, instead of a remedy for those evils. We conclude, therefore, that it is undesirable at present to attempt to fund the compound interest notes, and especially undesirable to exchange them for the ten-forty five per cent bonds. When Mr. McCulloch wants means, he could with ease negotiate fifty millions of certificates of indebtedness, which are scarce and wanted. But if the National banks want bonds as security for their notes, there are six hundred millions of five-twenties, which are the bonds originally intended for the purpose, and are much the best adapted to give the requisite security to the public.

r FRASER

## THE SUPPLY OF COTTON.

THE interruption to the normal movements of cotton, and the changes in the extent of its culture, occasioned by the late war, have upset all the calculations of business men as to the probable supply of that staple. Enormous speculations have in consequence been induced, and many have lost, and many gained large fortunes by them. On the 1st of March last the price of cotton in this market was 90 cents. On the 15th it had fallen to 55 cents. This, of course, was the result of the brilliant victories near Richmond, then both achieved and anticipated. The price of cotton continued to maintain itself at about this figure until it became known in official circles that the President intended to publish a proclamation removing all existing restrictions upon its sale and transfer, when it slowly fell, until the publication of the proclamation itself. It then fell quickly, and at one time touched 40 certs.

That these great mutations in price have not been owing to corresponding changes in the value of the currency is a fact evident to every body; for since the date of Lee's surrender (April 7) the premium on gold has scarcely changed at all. Temporary fluctuations have at times occurred, it is true, but as these fluctuations were not accompanied by corresponding changes in the price of cotton, it is fair to infer that they had little or no effect upon it. On the 7th of April, after the news of Lee's surrender had been received, the price of gold was 147 3-4. It has ranged during the present week, from 143 to 144 1-2. During the same period the fluctuation in cotton has been enormous.

These fluctuations are, therefore, to be mainly attributed to the actual or anticipated supply of the article itself, the demand always being a matter of very easy and safe calculation as regards American cotton.

The supply of cotton is, therefore, the question to be examined.

In 1850 the total amount of ginned cotton raised in the United States was 2,445,793 bales of 400 pounds each.

In 1860 the total amount of ginned cotton raised in the United States was 5,387,052 bales of 400 lbs. each, or 2,154,820,800 pounds. This was the yearly crop. As the war did not begin until the following spring it is fair to infer that the crop of 1861 exceeded that of the previous year in accordance with the ratio of increase which had existed from 1850 to 1860. This would have made the crop of 1861 in round numbers about 6,500,000 bales.

From this time forward each successive crop steadily diminished. The Southerners could not carry on the war with cotton unless they could exchange it for other things-muni. tions of war, clothing and provisions. But this, the effective exception of the comparatively few cargoes run out by small and swift blockade runners, and the further exception of such of the staple as managed to find its way into Mexico or up the Mississippi, or through the military lines in the border states, the great crop of the South was obliged to remain stored at home. This, of course, gradually put a stop to its further production, while as a further consequence it became necessary for the Southerners to turn their attention to the cultivation of commodities more immediately needed, and capable of being directly used by their people. The cotton crop of 1864 is estimated at 1,500,000 bales. If this be accepted as true, the crop of 1862 and 1863 must have been respectively about 4,800,000 and 3,100,000 bales, We have thus the following total product during the war: Product of 1861. 6,500,000 bales.

••	1862	*******************	4,800,000 "

THE CHRONICLE.

Now, how much of this found its way out of the South, or was desroyed, it is impossible to say. Undoubtedly a very large portion. Enough, however, remains, we think, to keep the markets of the world supplied for some time. If it be denied that the crop of 1864 amounted to 1,500,000 bales, then let us assume that it amounted to nothing at all. In that case, according to the law of progression the total product during the war, would sum up as follows:

Product	of	1861	6,500,000 bales.
<b>66</b>	"	1862	4,300,000 "
66	66	1853	2,200,000 "
"	66	1864	

Total product during the war..... 13,000,000 bales.

Assuming that the whole product of 1860 was successfully exported before the blockade was enforced; and allowing for the most liberal estimates of shipments, both open and secret, by sea and by land during the war, a considerable portion, perhaps an entire fourth of these aggregated crops of cotton must yet lie hidden in remote places, or remained buried in underground *caches* throughout the South.

The following statistics of stock on hand, importations and consumption of American cotton in Europe during the years 1862, 1863 and 1864, will furnish a practical guide to the reader of the amounts that escaped one way or another durthose years from the South :

Stock on hand Jan. 1 Bales	1862 <b>434,000</b>	1863 88,000	1864 42,000
Imported to 31st Dec. into:	B Barrison and States	2	
Great Britain	72,000	132,000	198,000
France	24,000	8,000	15,000
Holland	11,000	10,000	9,000
Belgium	1,000		1,000
Germany	5,000	11,000	6,000
Trieste			
Genoa	1,000	1,000	
Spain	18,000	6,000	12,000
	132,000	168,000	241,000
Deduct internal shipments	38,000	19,000	21,000
0			
Total imports into Europe	94,000	149,000	220,000
Add stock from above	434,000	88,000	42,000
m + 1 1			
Total supply	528,000	237,000	262,000
Deduct stock 31st Dec	88,000	42,000	24,000

Total deliveries..... 440,000

Turning from the consideration of what crop of cotton remains now on hand throughout the South, to the consideration of the probable future crop, candor compels us to avow that the prospect looks anything but flattering. Involved in this question is the much debated theme of negro labor, and this we have neither space nor inclination to enter upon. But we apprehend that the culture of cotton in this country, unless revolutionized by the introduction of suitable labor-saving machinery, will not soon be as extensive as it has been.

195,000

238,000

began to find its way to market in abundance. This unlookedfor supply was swelled by the large seizures of cotton made at Savannah, Charleston, &c., by Gen. Sherman, and the outgoing ports soon began to be filled with cotton awaiting shipment.

The following is a summary of late exports foreign and coastwise from New Orleans:

For the	weel	k end	ling	<u>o</u> r									<u></u>		Bales.
June	16, 1	1865		•••								 			3,718
46	23,	"													4,340
"	30,	"													5,015
July	7,	"	••			· • •					••	 			8,618
6.	14,	"	••	• •		•••		• •				 			10,366
"	21,	66	• •					••	• • •		••	 			8,843
66	28,							-1							12,952
Aug.	4,	"	••			• `•	••					 			10,910
",	11,	66	• •	••	••	•••		•••		••	• • •	 •.• •			8,810
	<sup>†</sup> Tot	al fo	or i	nin	e v	veel	ks.	••			•••	 		•	72,572

The following table exhibits the exports from New York during the months of May, June and July:

Exports of	cotton,	bales	June, '65. 4,912	
	1.0		 	

The stock on hand in New Orleans at successive dates was as follows :

Date. June 16, 1865 July 6, " 20, "	17,259 24,968	Date. July, 26, 1865 Aug. 1, " " 17, "	Bales. 53,845 57,505 88,000
--	------------------	---	--------------------------------------

At the latest dates this accumulation was increasing, for limited as are the means of conveyance from the interior of the South to the shipping ports, the means of conveyance from the latter to the north and to Europe are still more limited. The stocks at the various shipping ports stood thus at a recent date:

At "	New Orleans, on hand and on shipboard Mobile, """""	Bales. 88,000	
	Mobile, " " "	65,000 85,000	
"	Other ports, stock	45,000	
	Total	283 000	

It is looked upon by some as significant of future large crops of cotton that the stock at a recent date on hand and on shipboard at New Orleans should have been greater than it has ever been before at a corresponding period of the year. For example the stock on hand and on shipboard at New Orleans August 10 was as follows:

	-			Bales.
186	ð		 	81,568
186	1		 	9,865
186	0		 	54,158
185	9		 	31,411
185	7		 	34,584
		<ul> <li>A:</li> </ul>		

But this means nothing more than that after being pent up for four years by blockade, war and other restrictions, cotton is now coming to market at an unusual rate. The necessities of the southerners compel them to sell, but that they will not sell after the most pressing of these necessities

The present ample supply of cotton would, therefore, appear to be but a temporary one, and the heavy arrivals we have lately witnessed, would seem destined, sooner or later, to fall off very seriously.

Before the executive proclamations of last May and June, removing all restrictions from cotton and cotton traffic were promulgated, the supply of cotton at New Orleans, the great receiving and shipping port of the South, was limited to a few thousand bales. Cotton found in the hands of "disloyal" persons was not only liable to immediate confiscation, but it had to be sold to, and repurchased from, government agents before it could make its way to market. In addition to this it was liable to a heavy export duty, levied by military order, and to hospital fees, and a variety of other charges, which alone amounted to as much as the staple was worth before the war.

All these forfeitures and restrictions were abolished by President Johnson, and cotton for the first time since 1860

are relieved, unless they obtain a price for their staple commensurate with the prevailing fears that cotton culture is for the most part ended in this country, is an opinion entertained by very many persons.

The southern goose is now apparently laying the last of its golden eggs, and a combination of capitalists wealthy enough to buy them all, and hold them for a time, would undoubtedly realize a large profit from the operation.

SOUTHERN RECONSTRUCTION AND THE NATIONAL COMMERCE. THE COMMERCIAL AND FINANCIAL CHRONICLE has, and can have nothing to do with political questions, in any of their partisan or sectional aspects. It is only where the movements and the policy of parties are directly connected with, and have a positive and vital bearing upon the great permanent material interests of the country that it becomes our duty to consider them, and to point out their tendencies to evil or to good, according to the best light that is in us.

Were it possible, therefore, now to regard the political re-adjustments of Southern society as less than vitally important to the material prosperity of the whole nation, we should be content to keep ourselves clear of the battle of opinions and passions over these re-adjustments. But this it is not possible to do.

The way in which the Southern communities shall be dealt with by the Federal government will exert a direct and decisive influence upon the immediate financial and commercial future of the republic. Our national finances have been strained, we will not say, to their extreme point of tension, but painfully near to that point, by the war. The system of taxation adopted by the late Congress is admitted on all hands to be inadequate to our necessities, and illadapted to the genius and condition of our people. Our national currency is in such a condition that prudent commercial men cannot venture to undertake the revival of our commerce on a scale such as prevailed before the war, until the elements of fresh enterprise shall be clearly seen to be coming into existence and to be not remotely available.

The question, therefore, which, as practical men, the administrators of our public affairs have to settle, at this moment, as it seems to us, is not the ideally desirable in the way of reconstructing Southern society, but the really practicable in the way of remitting the Southern communities at the earliest possible day to their normal relations of production and consumption with the rest of the republic.

That a protracted military occupation of the South, and sweeping measures of confiscation are necessary to keep the public peace in that region of the country we cannot easily believe; nor, indeed, does it seem to be pretended that this is the case, even by those who most eagerly urge upon the President a modification of the very opposite policy which he is well understood to favor.

The Southern people would be unlike every other people in the world if, after their crushing defeat in such a war as they have just waged, and the complete disbanding of their organized forces, they could really be planning any other policy just now than a policy of recuperation. It is, we think, plain that if they are suffered to reorganize socially, the Southern States will, for some time to come, treat purely political questions as secondary merely, and will devote themselves to economical and industrial issues. A very general disposition seems to exist among them to accept the extinction of slavery by the war as a "fixed fact," or, as Earl Russell phrases it, a "finality." As for the right of secession that has been settled beyond peradventure, and no man really meaning that his words shall have weight, either at the North or at the South, so much as wastes his time over it.

would eventually result from interference with these limi. tations.

The negroes being free, and making so considerable a part as they do of Southern society, it will be impossible for the Southern people to deal unfairly or injudiciously by them without serious losses and grave social disorders bearing directly and retributively upon the whole fabric of Southern industry and wealth. The power of the Union having broken down the false relation of master and slave, the true relations of the negro with the white citizen must be left to adjust themselves, for no external force whatever can possibly adjust them on any permanent reciprocally advantageous and really equitable basis.

Meanwhile, whatever tends to revive the flow of capital and to develop the markets of industry at the South will tend immediately to advance the real self-adjustment of all social questions at the South. Whatever, on the other hand, tends to retard this return of health to the financial and commercial systems of the South, will tend inevitably to retard also this real self-adjustment of all social questions.

The objections, therefore, which a just concern for the financial and commercial interests of both sections of the country suggests, to the policy of a continued military domination, and of a sweeping confiscation at the South, apply quite as strongly to that policy when viewed from its strictly politie al or philanthropic aspects.

There can be no way so sure to make the late rebels of the South loyal men and good citizens as to turn their energies to the pursuits of peace, and the accumulation of wealth. And no one who cares for the future of the negro race can devise any plan for their protection and improvement at all comparable to the legitimate action of the liberated interests of the section in which they live.

### COMMERCIAL FACILITIES WITH THE WEST-CANALS VS. BALL ROADS.

THE recent Commercial Convention at Detroit, manifestly, has rendered incidentally, at least, great public service. Its convocation was itself an evidence that our men of business were aroused to the importance of improved facilities of transportation. The four hundred delegates of the Boards of Trade, and other commercial organizations of the United States and British Provinces, who assembled in July, were possessed of invaluable experience, the results of which they had come thither to share with each other. The require ments of the West, and of the States on the seaboard, the obtaining of stable markets, and of access to them, constituted the topics of their discussion. Of the transactions of the Convention itself, we have less need to speak. They were more formal, and at the same time, less conclusive than the unrecorded utterances of the members. The speech of the eloquent and statesmanlike President, General Hiram Walbridge, delivered at the close of the proceedings, indicated this. The convention, he de earnestness of purpose which characterised the delegates, promised auspiciously for the future of our country. The policy of the State of New York, it must be insisted, West. Waiving that most wholesome principle that inter

clared, had accomplished much that was gratifying, and the has always been to promote the trade and interests of the nal improvements are not within the province of govern ment, the Legislature in 1817 entered upon the canal policy; but the time has gone by for the State of New York or the United States, to construct works of internal improvement for purely commercial purposes. Whatever good reasons existed half a century ago, when private wealth was less able to engage in these enterprises, have certainly been since obviated. Experience has shown that such undertakings are

### [August 26, 1865.

What objections, then, can be reasonably made to the President's well-understood projects of speedy conciliation, to be advanced and attended by the return of the conciliated States to their place in the legislation of the Union?

So far as we have yet been informed, the most powerful plea urged against these projects is the assertion that the Southern people are not fairly disposed towards the negro population, which we have emancipated without their assent, and by force of arms. It is undoubtedly proper that the National government should prevent, so far as in it lies, the infliction of injustice by one class of citizens in a State upon another. But the limitations, both of the right and of the power of the National government in this direction, are clear and well-defined; they were established not hastily, but after grave consideration by the founders of the republic; and it seems to us that there is nothing, either in the history of our country or in the principles of progressive economical science, to warrant the expectation that anything but evil

more useful and remunerative when in the hands of individuals. Important as the trade of the West is to the commercial metropolis of New York the people of the State will never consent to pay a tax of two or three millions of dollars a year to retain it and support the canals. The relief, if any is required, must come, we insist, from private enterprise.

The canals already in existence in this State and the British Provinces are ample for many times the amount of transportation required of them. The favorite idea of some business men that a ship canal is required, with capacity of bearing ships of fifteen hundred tons burthen, is chimerical. Only for a part of the year would such a canal be navigable. It would fail of the very proper transporting commodities between the Western States and Europe without breaking bulk. That season of the year when there is the most occasion for hastening produce to market, canals, lakes and rivers are closed with ice. We cannot expect government to expend resources in this direction; inevitable failure will be the reward of such endeavors to divert trade from its legitimate outlets.

Besides, commerce demands sure and rapid agencies for transportation. It also must be permitted to follow its more natural avenues, and our railway corporations must give the matter attention. The New York Central Railroad Company has already taken the initiative, with their usual sagacity and energy, proposing to open a continuous line of travel and transportation between the cities of New York and Cincinati. A western journal gives the following details of the project:

"On Monday, the 18th of August, the leading officers of the New York Central Railroad Company, with a number of Eastern Capitalists passed through Urbana for Dayton and Cincinnati, with a view to select a route for a through line West, connecting at Buffalo with the Central. We are informed that the result of this visit has been the selection of the Lake Shore, Cleveland and Toledo, Sandusky, Dayton and Cincinnati, from Clyde to Dayton, and the new Air Line Roads, from Dayton to Cincinnati. The latter is to be constructed under the auspices of the New York Central Company, and operations will be commenced soon. It will be several miles shorter than the Hamilton Road, reaching Cincinnati by tunnel through Walnut Hills. The Mad River Road will be relaid and brought out as good as new. This new route east, which will be known generally as the 'narrow gauge," will be a direct one and tokes in a majority of the best cities in the States of Ohio. and New York—Cincinnati, Dayton, Springfield, Urbana, Tiffin, Sandusky, Cleveland, Buffalo, Syracuse, Albany and New York.

A line of railroad from Cincinnati to New York, taking so many important places in its way, thus allowing freight trains to run by a continuous route without breaking bulk or being liable to detention by winter or summer, will afford advantages to forwarders and others, far transcending those to be derived from ship canals and other internal improvements that pertain properly to a former state of things. Our men of business cannot fail to perceive this; and if this experiment of the New York Central Railroad shall be successful, as we have no doubt it will be, it will, evidently, lead to the formation of similar connections with other roads leading to the different commercial cities of the West. The other companies will establish similar continuous lines of transportation, so that the products of the West can reach the Atlantic seaboard in far less time than they can be conveyed by water, without breaking bulk. It is also announced, we notice, that the Baltimore and Ohio Railroad Company, to attract commerce by their route, have established a line of ocean steamers to run between Baltimore and Liverpool, and have purchased four propellers for that purpose; also that the Pennsylvania Central Railroad Company have in contemplation the establishment of a line between Philadelphia and Liverpool, or London, and are to be assisted in the undertaking by the corporation of Philadelphia. These enterprises have our most cordial wishes. In the event that they are warranted by a reasonable prospect of success, we may be sure that the Railway Lords

of the Empire State will be no way behindhand in enterprise. The City of New York is destined to remain the emporium of commerce, and capitalists will not be backward in establishing all the lines of steamships necessary for the carrying trade, to ply between this place and the other principal parts of the world.

The present Comptroller of this State, Hon. Lucius Robinson, when a member of the Assembly, in his celebrated speech against the pro-rata freight bill of 1860, enunciated the true doctrine in relation to this matter. "Legislate as much as we may," said he, "the trade will go where it can go the quickest and cheapest. In doing so it obeys the laws of trade, which are higher than any that we can make. Let us not forget that we live in a progressive and fast age and country. Commercial enterprise is running its competing lines all over the globe. RAILWAYS ARE SUPPLANTING CANALS. Perhaps the brain is even now at work which is to invent some power to take the place of railways. We can no more stop or regulate these things than we can change the course of the planets."

Whatever may have been the feeling entertained by the men that controlled the action of the late convention at Detroit, we are of the opinion that the managers of our principal railroads were impelled by it to redouble their energy and efforts to provide the increased facilities for transportation which were so authoritatively demanded. The stimulus thus given to trade, and thereby to productive industry, will be too beneficial to warrant any resentment, for whatever unpleasant feeling may have existed and found utterance in the speecher and resolutions of that convention. The result of their deliberations will be manifest in the correction of all misunderstandings, and the practical accomplishment of the objects for which the covention was held.

# REVIVAL OF SOUTHERN MANUFACTURES.

THE reappearance in our market of manufactured products from the Southern States, calls forth remark. It indicates that industry is reviving, and that there is ground for hope that with the rehabilitation of government there, prosperity will also return. This intelligence will be received everywhere in the North with gratification.

Before the civil war, considerable attention had been paid in the South to manufacturing. The physical geography indicated that part of the country would at some day rival New England in that department of industry. The numerous streams issuing from the mountains extending from Pennsylvania to the southwest furnish water-power to an unlimited extent. Every other natural facility is possessed there in abundance.

In 1860 there were 350 woolen mills in the Southern States,

as follows: in Maryland, 25; in Delaware, 6; in Virginia, 69; in North Carolina, 22; in South Carolina, 8; in Georgia, 28; in Alabama, 15; in Mississippi, 9; in Texas, 9; in Arkansas, 8; in Tennessee, 59; in Kentucky, 92; in Missouri, 99. Capital invested \$2,861,825; wool manufactured, 8,-065,622 pounds; value of annual product \$5,596,094.

In the manufacture of cotton goods there were 180 mills running in 1860; in Delaware 11, in Maryland 19, in Virginia 13, in North Carolina 36, in South Carolina 17, in Georgia 32; in Florida 1, in Alabama 11, in Louisiana 2, in Texas 1, in Mississippi 4, in Arkansas 1, in Tennesee 25, in Missouri 8, in Kentucky 4. Amount of capital invested \$12,362,400; cotton manufactured 55,367,122 pounds; value of raw material \$7,223,859; value of annual product \$11,285,775.

But these are by no means the only staples which the Southern States produced in manufactury. In steam machinery their product was valued in 1860 at \$7,620,467; their

iron manufacture \$5,486,158; lumber \$4,830,122; flour and meal \$54,664,326; leather \$6,905,601, and in the four States of Virginia, Louisiana, Tennessee and Georgia, the value of boots and shoes manufactured was \$2,729,327.

The total statistics of Southern manufacture in 1860. approximated the following aggregates:

Number of manufacturing establishments, 27,954; capiital invested, \$181,538,000; value of raw material, \$158, 065,000; help employed, 168,038 males, and 34,417 females; value of annual product, \$283,188,000.

These amounts show a flattering increase over the returns of the census of 1850. The revival of manufacturing will now increase at a greatly accelerated ratio. There will be a greater demand for labor and for the products of manufacture; and we shall add in this connection, that already the factories of the South, many of them, are changing owners. Northern men accustomed to the business have gone South, and will give a new impetus. The field is large and remunerative. The general desire of Southern men is that more mechanics and capitalists should emigrate to that part of the country.

There is no good reason why the manufactures of the South should not in future take a leading place among the products of the United States. It is an event to be de-The progress of the mechanical arts indicates the sired. refinement and culture of a people. The importance of their further development in those States where civil war has had its ravages cannot be over estimated; and we hail with pleasure the promise which has been already afforded.

# THE EXAMPLE OF OHIO\_HER DEBTS AND TAXATION.

An instructive lesson is to be gathered from the statistics furnished below concerning the State debt and taxation of Ohio. It was not until 1803 that the State was admitted into the Union, (with a population of 100,000 souls,) yet in 1860 she possessed a population of two millions and a half, from whom she raised local taxes amounting to nearly eleven millions of dollars, or over four dollars per capita. But it is from the statistics of her public debt that the best evidence of the excellent management which has been bestowed upon her finances is to be gathered. In 1825 the debt of the State was but \$400,000. From this it grew to be \$4,520,000 in 1836, mainly under that policy of building public works at the public expense, which at that time was practiced very generally all over the country, and which, were it barren of any other consequences than the unquestioned benefits in the shape of railroads, canals, &c., which have done so much to populate and enrich the nation, could only be in the highest sense commendable. In 1837 the great financial revolution occurred. The public work system and the credit system had been pushed to their last degree of endurance. Vast enterprises only benefitting the capital and resources of old and wealthy nations were on foot in every direction; bank money was poised in enormous sums upon extremely limited resources; commercial credit was piled up to a great height, while its base was confined to a small hoard of available capital. The inevitable result was a grand toppling over. The circulation of all the banks in the United States in 1837 was \$149,185,890, while the specie was but \$37,915,340. In 1844 the circulation was reduced to \$75,167,646, and the specie increased to \$49,898,269. In 1837 the discounts were \$525,115,702, while six years later, in 1843, they fell to \$254,544,937.

eighteen millions of debt represented all her old score of go-aheadativeness and of folly, of unnatural activity and reactional paralysis; and from the moment Ohio fully realized this fact she inaugurated a career of retrenchment and reform, of cautious progress and sufficient taxation, which to her very great advantage she has continued to this day. She was one of the very few states that did not suspend payment of the interest on her debt. Mississippi, Indiana, Illinois, Michigan, Louisiána, Floride, Arkansas, Maryland, and Pennsylvania-all these states either "repudiated" or suspended payment. But Ohio stood firm, and by means of rigorous taxation and rigid economy emerged safely from the storm, with tattered sails, it is true, but with hull as sound and watertight as could be wished.

Ten years later, and the debt of Ohio is seen to have diminished to \$15,218,980. This was in 1854, the year which marks the final recovery of the country from the disastrous effects of 1837, as is evidenced by the banking capital and discount line, by the market prices of commodities, and by the reinstatement of foreign capital in former employments and enterprises. At this time the valuation of taxable property in Ohio, in proportion to her population per capita, was greater than it has ever been since. This Faluation was \$421.18; in other words, it was estimated that each inhabitant of the State possessed an average of \$421:18 worth of taxable property. Of course this is not understood to be literally true, because if all the capital at that time belonging to capitalists in other states of the Union and in foreign countries, which is included in this estimate, had been taken out of it, no doubt but that the valuation of native taxable property per capita in the State of Ohio would have dwindled down to a much smaller sum. But whether the property of native or foreigner, it was alike subject to taxation, and this was sufficient for the purpose. Out of this \$421.18 the insignificant sum of  $10\frac{1}{4}$  mills per dollar sufficed to pay State, county, and local taxation, which embraced not only the budget of current expenditures, but a gradual sinking of the entire debt outstanding.

From \$15,218,980, or \$7 54 per head in 1854, the State debt receded under good management to \$14,016,446, or \$6 45 per head in 1856, and in the face of the panic of 1857, fell by the end of that year, to \$13,985,786, or \$6 35 per head. In 1860 it was \$14,250,233, or \$6 07 per head.

This brings us to the commencement of hostilities in the South. The reader will, therefore, be prepared to find the debt of Ohio enormously increase with each successive year of the war. She was one of the first of the States to answer the National call to arms, and she stinted neither men nor money to support the government until the very end of the struggle was reached, and the Federal authority fully reinstated all over the country. But instead of perceiving an increase of debt since 1861, it will be found to have actually decreased, so that last year it amouted to but \$13,500,751, or \$5 54 per head. This triumph of financial skill is well worthy of closer inspection. In 1854 the valuation of taxable property to population per capita was \$421 18. In 1856 it was \$377 94, and maintained about this average until 1864, when, under the influence of an expanded currency, it rose to \$413 50. Upon these amounts  $10\frac{1}{4}$  mills per dollar was levied in taxes in 1854;  $11_{\frac{6}{10}}$  in 1858;  $13_{\frac{06}{100}}$  in 1861;  $11_{\frac{4}{10}}$  in 1862; and  $16_{1\overline{0}\overline{0}}^{48}$  in 1864; so that the tax on capital is seen to have been, with little exception, constantly increased. The same result attended the tax per capita. In 1854 the total yearly tax paid by each inhabitant of the State was \$4 31. This fell to \$3 69 in 1856, and rose to \$4 93 in 1861. It fell to \$4 25 in 1862, and in 1864 had again risen to \$6 84. losses sustained by the State during the great crisis. These Under this treatment not only has the total amount of

### [August 26, 1865.

 $\mathbf{262}$ 

It is not to be supposed that Ohio passed unscathed through these exhausting vicissitudes. From \$4,520,000 in 1836, her State debt increased to \$18,004,526 in 1844. This was mainly for improvements in progress prior to 1837, and for

fized for FRASER

THE CHRONICLE.

indebtedness steadily fallen, but the proportion of debt to population has fallen also. In 1854 it was \$7 54 per head, and in 1864 but \$5 54 per head, so that if each person pays as much this year as he did last, and the tax per head to cover the expenditures of the current year does not exceed \$1 30, the whole debt can be extinguished by the termination of the fiscal year 1865. The present population of Ohio being about 2,500,000 this amounts to saying: if the State expenditures for the current year do not exceed the sum of \$3,250,000, and her people pay as much per capita in the form of State taxation as they did last year, that the entire State indebtedness of \$13,500,751 will be paid off and extinguished.

The following table furnishes the precise proportional results to which reference has been made:

1863 1864	388 47 413 51	1 85 2 19	1 11 1 22	1 73 3 29	4 92 6 84	5.05 5.30	2.89 2.96	4.46 7.96	$\begin{array}{c} 12.66\\ 16.48 \end{array}$	5 58 5 54	$1.44 \\ 1.34$

Of course, in view of the extra heavy burdens which her people are now called upon to shoulder in order that the Federal debt may be carried, it is not to be apprehended that the financiers of the State government of Ohio will put them to this great task without better reason for it than the mere satisfaction of balancing her books a few years in advance of the appointed time; but the hypothesis is entertained in order to show in the strongest possible light the extraordinary resources of the Buckeye State in wealth and yield of taxes, that capitalists should not fail to bear them in mind when opportunities offer for investments in Ohio.

Had the Federal government followed the example of Ohio in the management of its debt, not only would its sum total have been at this day but a mere vulgar fraction of

what it is, but much of the popular dissatisfaction which now prevails upon this head might have been prevented. While the people would have been called upon to pay but a small yearly addition per capita, vast sums in the aggregate would have been saved. The expenditures of the general government since the beginning of the war have been as follows:

Fiscal	Fiscal
Year. Amount	Year. Amount.
1862 Actual \$474,744,7	8 1864 Estimated \$865,234,087
1863 " 714,709,9	5 1865 " 895,729,135

	Year.	Total Taxes.	Taxes per Capita.
	1862	\$ 51,935,720 actual	\$ 2 59
	1863	111,399,760 "	5 56
	1864	260,632,717 estimated	13 03
• }	1865	344,512,389 "	17 22
<b>)</b>			

But the truth is that the estimates for 1864 and 1865 are much above the mark. The taxes of the fiscal year just closed do not much exceed \$200,000,000, while those of the current year may not be much greater. And again, the population has increased, not only in the loyal states but by the accretion this year of the entire population of the South. To state the actual truth then, the tax per capita which has been raised, and which will be raised this year by the Federal Government, is as follows:

99			5				
4	Year.	Populatio	n.		Ti	ar p	er Capita.
34	1862	20,000,000	Loyal	st'tes only	\$2	59	actual.
	1863	20,500,000		"	5	43	
r	1864	21,000,000		"	10	00	estimated.
е	1865	83,000,000	All	"	6	66	. 66

Now, if this taxation had been the same in the other years as it was in 1864, or ten dollars per capita, the result would have been that at the termination of the current fiscal year, our debt would not much exceed \$2,000,000,000, and had it been twenty dollars per capita the debt would scarcely exceed \$1,200,000,000,—perhaps, if the waste and extravagance be taken into account, not even so much.

"Pay as you go" has always been found to be the best motto for the merchant, and as Ohio has taught us, it is the best also for the financier; and the surprising results of this excellent policy can be no better illustrated than by the tables now presented to the reader:

# PUBLIC DEBT OF THE STATE OF OHIO. Statement showing the amount of Foreign and Domestic Debt of the State of Ohio, as it existed on the 1st of January, 1844, and thereafter yearly on the 15th Nouember, 1845-64. ### GREAT BRITAIN.

### LONDON AND LIVERPOOL DATES TO AUG. 12.

Monetary and commercial affairs continue to be characterized by more than the usual dullness that marks this period of the year. The diminuition in the specie at the Bank of England, and the advance in interest, added to the very unfavorable reports of the grain harvest, have tended to great caution, and a decline in nearly all kinds of securities consols show a decline of three quarters of a cent during the week. The reduction in other securities has been proportionate, although there is an entire absence of anything like agitation.

The prospects of an extra demand for money to pay for foreign breadstuffs, in consequence of the deficient harvests, is regarded unfavorably in view of the narrow bullion margins in the Bank of England. It is generally considered that any fresh demand for money is likely to advance the rates of interest still more. The demand for discounts in London continues brisk with large supplies of money, but no tendency to do business at less than four per cent, except in the case of first class paper at short dates, which is occasionally quoted at three and a half.

The advance in wheat during the week amounts to nine cents per bushel. This movement in the grain market added to the high prices of butcher's meat indicates a scarcity of supplies, and a firm if not stringent money market.

The suspension has been announced of Mr. Baldwin Von Bartels, of Pinner's-court, London, in consequence of the stoppage of Messrs Brandt, Sohn & Co., of Buenos Ayres and Montevideo, in which house he is a partner. The liabilities are estimated at  $\pounds70,000$ , and the assets are almost exclusevely in Buneos Ayres and Montevideo. The report thence by the last mail shows a dividend on the claims of about 70 per cent.

The shares of Overend, Gurney and Co, limited, are quoted at 2<sup>1</sup>/<sub>2</sub> per cent.

The reports of the half-yearly meetings of the London Joint Stock Banking Companies show the extraordinary progress and good standing of these institutions. The liabilities of the ten principal metropolitan banks amounted in round numbers to £85,000,-000, nearly the whole of which is represented by deposits. The assets on June 30th amounted to £99.904 912, showing an apparent balance of assets over liabilities of nearly £15,000,000; but this sum will have to be diminished by about £4.630,000, on account of securities for acceptances and preliminary expenses, so that the actual surplus will be rather more than £10,000,000, an ample guarantee for the security of the depositors. Taking the means of these banks in the aggregate, they have in cash rather more than 13 per cent of their liabilities; and of governmenl securities which can be realised at any moment, 8 per cent in addition. The dividends that have been declared at the late meetings have been among the highest that have ever been realised in ordinary times, and are satisfactory, considering that the bank rate of discount in the past six months has averaged rather less than 41 per cent. In the corresponding six months of the past year the average was 7 per cent, and consequently the returns would be more favorable. Still on the present occasion there is one or two cases an increase. Annexed is a statement of the dividends paid during the two periods:

The traffic receipts of railways in the United Kingdom amounted for the week ending the 5th of August, on 12,154 miles, to 766,2851, and for the corresponding week of last year on 11,801 miles, to 742,2051, showing an increase of 353 miles, and of 24,0821. that the agents here have no money in hand to meet the amount due on the 1st of September next, nor is there the slightest reason to suppose that they will in future have any remittances for the purpose or for the sinking fund.

Letters from Bombay state that it is difficult for one who is not on the spot to picture the blank dismay and the universal distrust which prevail in the Western capital, and still more so to trace the evil to its causes. The lowest sum at which we can fairly take the extra profits made by Bombay in cotton during the four years of the American war is fifty millions. The popular estimate on the spot I found to be eighty, but that includes the price usually paid for cotton to the extent of seven or eight millions, and the sums said to have been sent into the city from the interior by those who had previously hoarded. But the ablest merchant in Bombay, who has travelled much in the agricultural districts, and speaks the language of the people, assures me that no hoards were sent into Bombay. From the 50 millions which were available for other purposes than legitimate trading we must deduct 10 as the amount of extra profit kept by the peasantry and middle men in the interior. This will leave 40 millions for speculation in the island of Bombay. What has become of it? At least five have been sunk, for the moment unproductively, in the various land reclamation companies, including Port Canning to a slight extent; and I believe that five more have been taken to England by Scotch merchants. This leaves 30 millions, of which at least ten have been lost in redrafts for cotton. That is, in 1864, in full trust that the American war would continue, Bombay merchants sent 600,000 bales, each containing 400lb., to Eugland at a loss of 8d per lb., but drawing against the cotton at the high prices which prevailed when it was shipped. The failures which are now going on are partly due to the return of these bills. We are thus reduced to 20 millions, the debris, as it were, of the ruin now taking place. The local estimates of the liabilities of Bombay speculators for shares alone vary from 16 millions to 30 millions. That is, one part of the community has paid, or promised to pay to the other for shares in barren companies at least 16 millions more than these shares are worth at par. These 20 millions are still in Bombay, and will be available for legitimate trade, and the completion of the best of the reclamation works when the crisis is over. At present they have simply changed hands-changed, too, from a large number of small capitalists to half-a-dozen large millionaires. Six men may come out of the crash now going on with very heavy purses; all the rest of the island is insolvent. Strange disclosures are made at the meetings of creditors, most of whom know that their turn of insolvency is coming. I regret to say that these disclosures are not at all flattering to either Parsee or Hindoo, and I trust that no English merchant will be led to the same sort of repudiation, concealment, and immoral struggling to be free of disagreeable engagements which some of the highest men in these communities are guilty of. The Bank of Bombay has been allowed by Government to receive assistance from the Bank of Bengal.

### THE CONTINENT.

### PARIS DATES TO AUGUST 12.

The Bourse has been very dull during the week, the majority of the speculators being absent in the country. Business, however, has been active, with a continued steadiness in prices. The trade of Paris is good, and favorable accounts are received from the provinces.

M. Hastron, a banker of Poictiers, and formerly mayor of the city, has suspended payment and fled. His liabilities amount to nearly two million francs, the chief sufferers being petty tradesmen and poor people.

The official returns of French imports and exports for the first six months of the current year have been published. The value of goods taken out of bond was 1,261,161.000f., whilst in the corresponding period of 1864 it was 1,182,415,000f.; of 1863, 1,144,-066,000f.; and of 1862, 1,080,160,000f.; and they show, likewise, that the value of exports of French productions was 1,382,904,000f.; in the same period of 1864, 1,452,636,000f.; of 1863, 1,208,274,-000f."; and of 1862, 1,052,953,000f. It appears from these returns that the silver exported during the first six months of the last two years exceeded the amount imported by 26,250 kilogrammes, while the silver imported during the first six months of the present year exceeded that exported by 336 597 kilogrammes. The gold imported amounts to 235,491 kilogrammes, and that exported to only 171,392 kilogrammes. The export of wrought silk has been naturally affected by the high price of the raw material, and to this circumstance must be attributed the low amount of 164,000,000f, the value of the raw silk exported during the first six months of the present year, against 220,000,000f in the corresponding period of 1864; 180,000,000f in 1863. The quantity of foreign wool imported continues to increase. It amounted to 108,000,000f during the first six months of the present year, against from 72,000.000f to 89,000,000f during the corresponding period of the four preceding years. The export of woollen cloth has increased rapidly since 1861. It amounted during the first six months of that year to 83,000,000f, in 1862 to 91,000,000f in 1863 to 123,000.000f, in 1864 to 163,000,000f, There has been a slight falling off this year to 151,000,000f.

The prospectus has been issued of the London (City) Baths, Laundries, and Dwellings Company, with a capital of 50,000l in 10l shares. It is also proposed to raise 10,000l in debentures. The company has been formed for the purpose of purchasing substantial and commodious buildings recently erected in Golden-lane, containing numerous baths, laundries, a spacious dining or lecture hall, and dwellings for 80 families embracing all modern improvements. The locality in which these are situated is one that has hitherto been perhaps the most neglected in the metropolis, and where the yresent accommodation is therefore more essentially needed.

A prospectus has been issued of the London Jute Works, with a capital of £200,000, half to be first subscribed in shares of £10. The object is to spin and weave jute by steam power in London, an alleged advantage of 13 per cent existing in favour of London against Dundee in the saving of expenses in the carriage of raw material, insurances, &c.

It is understood that negotiations have already been opened in London for the contemplated new Brazilian Loan of  $\pounds 4,000,000$ .

There appears to be no prospect of any further dividends being paid upon the stock of the Confederate Loan, it being duderstood

The value of the cotton cloth exported has likewise increased.

THE CHRONICLE.

It amounted during the first six months of the present year to 48,000,000f, nearly double what it was previous to the cotton famine. It must not be forgotten, however, that the price of cotton cloth increases with that of the raw material, so that in reality the sum of 48,000,000f does not represent a quantity of merchandise greater than that exported in the year 1860.

The Royal Sardinian Railway Company have invited subscriptions for 314,450*l*, in 10 per cent preference shares, being the balance of 600,000*l* authorised to be raised in that manner.

The profits of the National Bank of Belgium for the first six months of the present year amounted to 2,196,466f; in the same period last year the profits were 3,152,700f.

At Manchester the week opened with prices in favor of buyers, and some irregularity. The uncertainty respecting the supply of cotton from America rendered purchasers very timed, until the receipt of American advices induced more confidence, and gave a fresh impulse to the market. Producers were therefore led to advance their quotations slightly, but the operation at once checked this demand, leaving a feeling of disappointment at the evanescent nature of an improvement that could be checked so easily. During the week there has been transacted a fair amount of business, induced mainly by the disposition of spinners and manufacturers to meet the demand which had set in, although at unremunerative prices.

At Nottingham there is a reasonable amount of business doing in the lace trade; and in hosiery both branches are fully employed.

At Birmingham the hardware and metal trades exhibit increased vitality, and the orders coming, in both on home and foreign account are better. As regards the home markets there are more encouraging reports at hand from all quarters, except the purely agricultural districts, and the demand for hardwares for shipment is quite an average. The South Staffordshire iron trade is more cheerful in tone, and pig iron remains firm in price.

The cutlery branches at Sheffield are so much improved of late that the workmen are generally agitating for an increase of wages, that is likely to be conceded. The advances, however, will not be upon the prices paid in former good periods, but on the reduced wages paid since the late depression. The silver plating and Brittania trade is languid, but all other branches are moderately active. The demand for the American market is languid.

# COMMERCIAL AND MISCELLANEOUS NEWS.

The following are the imports at New York for the week ending (for dry goods) August 17th, and for the week ending (for general merchandise) August 18th:

FUNDED DEBT OF RHODE ISLAND.—The following is an official statement of the funded debt of this State, with the date of the passage of the authorizing act, the rate of interest, time of payment, &c. The whole has been accumulated for war purposes:

Date of act.	Amount Authorized.	of debt	Rate.	-Interest	Principal
August, 1861	\$500,000	\$500,000	6	May & Nov.	payable. Oct. 1, 1871
August, 1862	1,200,000	1,200,000	6	Mar & Sep.	Sept 1, 1871
January,1863	300,000	300,000	6	Apr & Oct.	Apr. 1, 1883
June, 1863	1,000,000	1,000,000	6	Jan & July	
May, 1864	1,000,000	1,000,000	6	Feb & Aug.	
January,1865	1,000,000	none	.6	Feb & Aug.	Feb. 1, 1895

There is no probability of any of the last million being issued. The Hon. Samuel A Parker, General Treasurer, through whose attention we received the above, remarks : "There has been no regular sinking fund provided for the extinction of the debt, but from a law passed by the General Assembly, authorizing any surplus money in the Treasury to be used for the purchase of the bonds, it is thought, and there is no doubt of it, that after another year the State will be in the market as a purchaser, and that before the time expires for the payment of them they will all be retired,"

GERMAN RAILROAD DIVIDENDS;—The following statement is of interest as showing the annual dividends paid in 1865 upon railroad capital in the German States:

mayence-maninentit 91-5   Rottous railroad 21-6	Nurnberg Furth	Per cent. Breslau-Schweidnig

50	Brooklyn and Coney Island Bank	711

The following statement is interesting as showing the character of the emigrants from Great Britain to this country :

Of the 208.900 emigrants who left Great Britain last year, no fewer than 8,371 were infants, 14,780 were female children under 12 years of age, and 15,805 male children under 12 years of age. Of the female adult emigrants 25,990 could not be classified in respect to occupation, 326 were set down as "mechanics," 10 were shopwomen, 24.435 were married women, 1,126 were milliners, dressmakers, and needle-women, 950 were gentlewomen and governesses, and 14,250 were domestic and farm servants, nurses, &c. Of the male adult emigrants 10,251 could not be classified in respect to occupation, but the remainder may be described as follows :- Agricultural laborers, gardeners, carters, &c., 2,213; bakers 272, blacksmiths and ferriers 251; bookbinders and stationers 30; boot and shoe makers 355; braziers, tinsmiths, &c. 194; blick makers. potters, &c., 59; bricklayers, masons, plasterers, slaters, &c., 1,049; builders, 60; outchers, poulterers, &c., 146; cabinet makers and upholsterers, 70; carpenters and joiners, 1,337; carvers and guilders, 25, clerks, 784; clock and watchmakers, 79; coach makers and trimmers, 12; coal miners, 46; coopers, 120; cutlers, 47; domestic servants, 399, dvers 18; engravers, 31, engineers, 212; farmers, 7,245; gentlemen, professional men, merchants, &c., 5,842; jewelers and silversmiths, 54; general laborers, 57,997; locksmiths, gunsmiths, &c, 14; millers, 0 maltsters, &c., 101; millwrights, 19; miners and quarrymen, 3,266; painters, paperhangers, plumbers and glaziers, 337; pensioners, 45: printers, 138; ropemakers, 12; saddlers and harness makers, 61; sail-makers, 10; sawyers, 42; seamen, 379; shipwrights, 26; shopkeepers, 797, general smiths, 768, spinners and weavers, 1,157; sugar makers, boilers, &c., 31. surveyors, 17; tailors, 1,547, tallow chanders and soap-makers, 2; tanners and curriers, 74; turners, 18; wheelwright, 74; and woolcomber, 1.

In the commercial department will be found the official detailed statements of the imports and exports for the week :

The following will show the exports of specie from the port of New York for the week ending August 19, 1865:

MICHIGAN LUMBER TRADE.—The number of saw-mills returned in Michigan in May, 1864, was 1,073, being an addition of 151 since 1864. Saw-mills operated by water power have decreased 95 in number in the last decenium, while steam saw-mills have nearly doubled in number. The number of feet of lumber sawed the past year, as returned by 194 mills, is 621,478,904, being 58.2 per cent. more than in 1854. Giving to 99 saw-mills making no returns, the average amount sawed by those which were returned in May, 1864, the production of Michigan lumber in 1864 would be 684,646,636 feet, or in round numbers 700,000,0000 feet. But this is short of the real quantity. Nearly half of the 99 mills not returning the

number of feet sawed are located at the pineries, having gangs of saws and manufacturing and shipping annually millions of feet. The annual amount of lumber sawed in Michigan is probably not less than 800,000,000 feet.

THE CENSUS OF LARGE CITIES -The various States are now taking a census. The following is a list of all the cities thus far reported which have a population of 10,000 or upwards :

IRON.-The extension of our iron manufacture, and the increasing development of iron ore-producing districts is strikingly shown by these returns. Last year we obtained 10,064,890 tons of iron ore from our own rocks. Even this large quantity was insufficient for our wants, and we imported 75,194 tons more. This was employed to feed 612 blast furnaces, which produced of pig iron-

In England In Wales	tons	2,620,472 988,729	
In Scotland	• • • • • • • • • • • • • • • • • • • •	1,158,750	
The total make	of the Kingdom being	  1,767,950	

Of pig iron we exported 565,951 tons; all the rest was converted into merchant iron. This was effected at 127 iron works, where 6,262 puddling furnaces were in activity, and 718 rolling mills perform their Herculean labors of producing bars and rails.

GOLD .- During 1864 this precious metal was obtained from five mines in Merionethshire; 2,336 tons of auriferous quartz were crushed and treated by the amalgamating processes. From this the adventurers obtained 2.887 ounces of gold, the value of which was  $\pounds 9.991$ . By an improvement in the process of amalgamation, the discovery of Mr. William Crookes, F.R.S., the well-known discoverer of the new metal thalium, it is expected that the production of British gold will be considerably increased during the current year.

TIN--The tin obtained from the mines of Cornwall and Devonshire in 1864 was certainly in excess of that ever before procured, although the tin mines and stream works of this, our only stanniferous districts, have been diligently worked for more than 2,000 years. 15,211 tons of tin ore were raised by the miners, the largest quan. tity from very deep mines. This produced of metallic tin 10,108 tons. The price of tin during 1864 was lower than it has been during any year since 1853, and more than £14 a ton below the price of 1859. The system of mining which prevails renders it imperative on the managers of mines to use every effort to satisfy the shareholders by the regular payment of dividends, or, at all events, in depreciation in the value of the shares by avoiding "call." To ob-tain this end tin ore has been raised, "dressed," and also in an already glutted market at whatever price the smelter could offer. Hence the value of the ore sold,  $\pounds 925,069$ , which was upwards of  $\pounds 38,000$  less than the money value of the block tin sold in 1863.

COPPER.-From 192 mines in South-western England, and about 30 distributed over other parts of the United Kingdom, 214,604 tons of copper ore, producing 13,302 tons 13 cwt. of metallic copper, were obtained. In addition to this our smelters imported 67,-283 tons of ore. 26,081 of copper regulus, 10,015 tons of bricks and pigs, and 14 924 tons of copper bars, &c., from our own colonies and other countries.

LEAD AND SILVER .-- There was an increase in our production of lead in 1864; 94,433 tons of lead ore, principally galena, were dressed, sold, and smelted. This produced 91,283 tons of lead, and gave us 641,088oz. of silver.

OF ZINC ORES, nearly all being the sulphide of zinc (commonly called black jack), 15,047 tons were mined, producing 4,040 tons of metal.

The total value, at the place of production, of the minerals obtained in 1864 (exclusive of building stones, bricks, and the like) was  $\pounds 31,604,047$ . The value of the metal smelted from the metalliferous ores was £15.281,869, so that if we add to this the value of our coals at the pit's mouth, £23,197,968, and £1,500 000, the estimated value of the other earthly minerals, of which returns are given in the "Mineral Statistics." we have as the aggregate value of mineral treasures £39,979,837.

## The Rankers' Basetto

The following facts concerning the products of mines and collieries in Great Britain from records kept by Mr. Hunt in the Museum of Practical Geology are extremely interesting :

COAL .- There were at work during 1864 no less than 3,268 collieries in Great Britain and Ireland. In 1853 there appear to have been only 2,397. The quantity of coal raised, sold and used during last year from all these works was 92,787,873 tons. The largest quanties were produced from the following coal fields :

Durham and Northumberland	Tons. 23,248,367
Scotland	12,400,000
Lancashire	11,530,000
Staffordshire and Woscestershire	11,425,350
South Wales and Monmouthshire	10,976,500
Yorkshire	8,809,600

There was an increase in our exportations of coal to foreign ports in 1864 of 525.208 tons, the quantity exported in 1863 being 8,275,212 tons against 8,800,420 tons in 1864. From the coalfields shipping coal the quantities sent to ports in the United Kingdom amounted to 10,588,132 tons in 1863, and in 1864 they had risen to 10,970,711 tons, the quantities of coal brought by railway and sea, within the London district, during the last three years, being as follows :

We give in our BULLETIN from day to day lists of bonds, &c., lost and the dividends declared, with times of opening and closing books. These tables will be continued daily, and on Saturday morning, such as have been published through the week in the BULLETIN, will be collected and published in the CHRONICLE. Below will be found those published the last week in the BULLETIN.

# THE CHRONICLE.

### FRIDAY, AUGUST 25, 1865, P.M.

THE MONEY MARKET.-The feverish caution excited by the great defalcations of last week has subsided, and the market has now fully recovered its wonted tone. Money is superabundant, and the strict rate of interest about 2 per cent lower. The large accumulation in the Treasury at the beginning of the month has been since distributed, and since the 15th inst. about \$10,000,000 has been paid as interest on Seven-thirty notes. Several millions have also been withdrawn from the temporary deposits at the Sub-Treasury. From these conjoint sources there has been probably wellnigh eighty millions of currency thrown into action or circulation within the last twenty days; and the natural result is that the supply largely exceeds the demand, and the rates of interest has fallen to the point at which it stood before the Secretary of the Treasury withdrew the amount of \$80,000,000 of currency into the Treasury. For the last two or three days money has been literally hawked around the "Street" at 4 and 5 per cent; and considerable amounts have been returned to the Sub-Treasury on Temporary loan.

The discount market is quiet. There is no important amount of bills offering for sale; all good names are taken readily by the banks at 7 per cent; some of the private bankers are discounting strictly first class names at  $6\frac{1}{2}$  per cent; lower grades range at 8 a 10 per cent. We quote:

RAILROAD AND MISCELLANEOUS STOCKS.—The stock mar. ket has shown a general recovery from the depressing effect of the fraud excitement.

The brokers exhibit a commendable disposition to conduct their business in a conservative manner; one evidence of which is apparent in the adoption of resolutions by the Stock Exchange and the Public Board of Brokers, to expel from their respective associations any member who directly or indirectly transacts business at the Evening Exchange.

The recovery of confidence, and the abundance and cheap-.ness of money, have promoted a general increase of activity, resulting in an advance of prices throughout the list. There is no general speculative movement, many of the leading operators being out of town; but combinations exist for supporting certain leading stocks, with a view to extensive speculative movements after the summer season. Erie, Reading, and Cleveland & Pittsburg are under control of this kind. Erie has advanced, during the week, from 827 to 871; Reading from  $102\frac{7}{8}$  to  $105\frac{3}{4}$ , and Cleveland & Pittsburg from 67 to 71<sup>1</sup>/<sub>5</sub>. The increased earnings of Milwaukee & Prairie du Chien have created a speculative demand for the stock, producing an advance from  $49\frac{3}{4}$  to  $45\frac{1}{2}$ . Michigan Southern, usually a favorite with speculators, is neglected, but the price has advanced 15. Quicksilver has advanced 33, during the week, and closes firm at  $55\frac{1}{4}$ ; the prospects of the company are considered unusually satisfactory.

UNITED STATES SECURITIES .- Government stocks have exhibited more firmness during the week. The successive quotations showing a decline in 5-20's at London and Frank fort have had little effect upon the price here, owing to the fact that the old issue has become quite scarce, and has been in demand from parties disposed to hold them in expectation of a rally in the foreign quotations; the price has advanced from  $106\frac{1}{4}$  to  $106\frac{3}{4}$ . The new issue has been correspondingly firm, and closes at 1044. Ten-Forties are again in active demand, and have advanced from 97 to  $97\frac{3}{4}$ . Seven-Thirties, notwithstanding that at the present price of gold their interest is much more valuable than that of the gold interest bonds, continue firm and active; there is reason, however, for believing that the price is kept up by the operations of a wealthy outside banker, largely interested in sustaining the current quotations. A cotemporary gives the following comparison of the ratio of interest to principal, on the leading securities, which exhibits the great disparity between the price of Seven-Thirties and other stocks :----

1 very Core nomine	Prico	rice withou interest.		F	ate of in	terest.

GOLD MARKET.—Gold has been unusually steady during the week. The demand for customs has been very large; but the upward tendency arising therefrom has been checked by the sales of the Treasury Department from its surplus coin. The partial reaction in foreign exchange, disappointing the expectation that there would have been an important export of specie this week, has also tended to keep down the premium; and, to-day, this tendency is strengthened by the arrival of \$955,000 of gold from Aspinwall. There has not been so little speculation in gold as at present, at any period of the last three years; and the premium is regulated almost exclusively by considerations of supply and demand.

The following have been the highest and lowest quotations for gold on each of the last six days :

Highest. Lowest.Highest. Lowest.Aug. 19 $144\frac{1}{8}$ $143\frac{2}{8}$ Aug. 22 $143\frac{2}{8}$ Aug. 20 $144\frac{1}{8}$ $143\frac{2}{8}$ $143\frac{2}{8}$ $143\frac{2}{8}$		t			•		-

tations, but have had few buyers, and, in some cases, have sold much under current asking rates. The large accumulation of cotton at ports North and South produces an expectation of a steady and large increase of cotton bills, and keeps the rates below the point at which specie can be shipped at a profit.

NATIONAL BANKS .- There is now scarcely one National Bank per day authorized by the Comptroller of the Currency; and a Washington dispatch says:

"No more applications for new banks will be entertained until Congress makes some provision for increasing the amount of the currency, which is now restricted to three hundred millions.

The total amount of circulation issued to the National

Banks during the week ending Aug. 19 ..... \$3,065,500 169,598,960 Previously issued.....

\$172,684,460 Total amounts issued ..... The whole number of banks authorized to Aug. 19th was 1,530, with

a total capital of \$890,000,000."

The following national banks were authorized August **22**nd :

1829. The First National Bank of Independence, Jackson County, Missouri. Capital \$50,000.

1530. The Merchants' National Bank of West Virginia, Clarksburg, Harrison County, West Virginia. \$100,000.

1531. The Hungerford National Bank, of Adams, Jefferson County, New York. \$125,000.

1532. The National Bank of Rhode Island, Newport, Rhode Island. \$100,000.

1533. The Peoples National' Bank, of Jackson, Michigan. \$100,000.

1534. The National Exchange Bank, of Lansingburg, New York.

The First National Bank of Morristown, New Jersey, has been designated by the Secretary of the Treasury as an additional depository of public money.

The following comparison shows the progress of the

The deviations from the returns of the previous week are

as follows:

Dec. \$4.631,761 | Circulation......Dec. \$410,786 .....Dec. 663,656 | Net Deposits.....Dec. 1,145,159 Loans.... Specie.

Legal Tenders.....Inc. 2,577,560 1 The principal feature of the return is the decrease of \$4,-631,761 in loans; which is chiefly the result of the contraction consequent upon the discovery of the Ketchum frauds. The legal tenders show an increase of 2,577,560, partially the result of the payment of interest upon Seven-Thirty

notes.

For the corresponding period of the last three years the same items compare as follows:

		Circula-	σ .

# The Commercial Times.

# COMMERCIAL EPITOME.

FRIDAY NIGHT, August 25th. THE tone of the market is decidedly speculative. On all sides, there is a plethora of money seeking investment; and in the speculations that are entered upon, simple mercantile considerations are lost sight of. Demand and Supply are given little heed. With a general disposition to operate for a rise, it is only necessary to purchase a few days in succession, when a speculative furore springs up, and prices advance as if by magic. The principal support to this state of things, continues to be derived from inland towns-New York and the Atlantic Cities of the Eastern and Middle States still place very little faith in these enterprises; and, as for several weeks, the moment "outside" support is withdrawn, prices begin to decline. But each decline has been followed by a new and stronger movement for a rise; and it must be observed that confidence in these speculative prices is increasing ; the whirlpool of speculation is felt each day in new branches of trade, so that the more thoughtful look forward with increased alarm to the period when a collapse must come.

The speculation in Breadstuff's shows no signs of abatement, and begins to receive some support in this market. In Cotton all buoyancy is wanting, but it is impossible to seriously depress prices

Provisions, with less speculation, show great firmness; it is believed the Cattle disease in Europe will lead to a greatly increased demand for cured meats from this side; "hog products" are too high to expect any great export demand at present, a large decline (in gold prices at least) must take place before any important shipments can take place; but beef is relatively low, and in cheese an advance has already been produced.

The grocery trade has been active; and prices have mostly advanced. In Coffee the sales foot up some 25,000 bags, and prime Rio advanced a half cent in gold. Sugars have also been active, and we estimate the sales of the week at 14,000 hhds, 5,000 bxs and 17,000 bags. Molasses has been active, and closes at some advance on prime grades. The sales amount to about 1,800 hhds. Rice has advanced one cent per pound for Carolina, and Rangcon is more active and firmer. Teas and spices have done better.

Metals have been without essential change, except an advance in Zinc. Hides and Leather have been active and firmer. Petroleum has been more active for refined with limited supplies. Whiskey has been active.

Fruits rule very firm. A partial failure of the apple crop has become apparent, and at the West much speculative excitement has sprung up relative thereto, with a large advance in prices. All foreign fruits have brought full and rather hardening prices. Fish has been without essential change. East India goods have been very firm, and Calcutta Linseed has advanced ten cents in gold per bashel. This is owing to reports of the partial failure of the crop of domestic flaxseed.

Naval stores continue to come forward freely, and Spirits of Turpentine has declined, but Rosin and Tar are very firm and wanted.

The following are detailed statements of the exports and imports

272

anted:

The auction sales of wool have barely supported prices, and have not called out so much demand as was anticipated. A sale of 1,200 bales is announced for next week, which will probably settle the market.

There has been renewed excitement in Crude Whale and Sperm Oils, in consequence of the depredations of the Sheuandoah. Stocks are mostly withdrawn and held for extreme prices.

Freights have not been active, but to the leading British ports rates for cotton and grain are firm, especially by packet.

At to day's markets the speculative feeling we have noticed was without abatement, but only in wheat and corn was any material advance established.

We give below a comparative statement, showing the receipts of a few leading articles, per all routes, for the week, since Jan. 1st, and for the same period last year:

BECEIPTS AT NEW YORK OF DOMESTIC PRODUCE FOR THE WEEK, AND SINCE JAN. 1, FOR TWO YEARS.

LONDON TRADE .- A London circular of Friday the 11th August reports :

Cocoa--950 bags Trinidad at auction were realised from 68s a 76s for mid to good red, with fine to superior from 81s 6 a 111s.

COFFEE meets with less enquiry at a decline of 6d a 1s. The sales have been 1,079 casks 161 barrels 169 bags Plantation Ceylon at 76s 6d a 78s 6 for fine, fine ord, 79s 6 a 84s for low mid to mid, and 84s 6d a 85s 6d for mid colory; 371 casks 2,179 bags native Ceylon at 65s 6 a 66s 6d for good ord in the casks, and 67s a 68s in bags; 124 bags Cannon's Mysore at 93s 6d a 99s; 115 bags Neilgherry at 79s 6d a 82s 6d; 100 bags Calicut at 74s 6d; 31 casks 27 barrels 18 bags Jamaica at 64s a 72s for good to fine ord, and 77s a 87s for low mid to good mid. Of floating cargoes the following have been sold, one Santos 1.700 bags at 56s 9d, fully in sured, for a near port; and three Rio, 2.927 bags channel firsts at 52s, 2,680 bags very erd at 45s 6d, both for a near port, and 2,200 bags good firsts at 59s 11d for the Mediterranean.

COPPER quiet --- Tough cake and tile £86, best selected £89, sheath ing £91, Y. M. sheathing 81d.

CORN--With a continuance of unfavorable weather, the price for English wheat has advanced 2s per qr, though the business has been moderate. Foreign is 1s a 2s dearer. Average price of English wheat for the week ending 5th inst was 42s 6d on 54864 qrs returnel. White American wheat 43s a 46s; winter red 41s a 44s; spring 41s a 43s per qr; American flour 20s a 27s per barrel. SPELTER £22 2s 6d, cash.

HEMP firm. 850 bales Manila have changed hands at £32 5s. for good current and Sorsogan quality. Of 270 bales Sunn twothirds sold from £19 15s. a £20 15s. for good common to fair.

JUTE-Of 16150 bales, about half sold, the fair to good qualities at steady prices, £11 a £21 15s. for common to good, with fine at £23 5s., and rejections at £10 15s.

IRON-Welsh quiet; Rails and Bars £7, f. o. b., in Wales. Scotch Pigs 543. 6d, cash, for mixed Nos. on Clyde.

LINSEED-Import for the week amounts to 29.309 qrs., all from the East Indics. A good business has been done in Calcutta on the spot at 56s. 6d. a 56s. 3d., and for Bombay 58s. has been accepted. For arrival about 2,000 tons Calcutta, chiefly May and June shipments, have been sold at 57s., sound bags, and a June shipment of Black Sea at 57s. 6d. Imports since 1st January 339,340 qrs., against 317,222 qrs last year.

LINSEED CAKES dull. Best New York, in bags, is sold at £9 17s. 6d., ex-ship, and in barrels at £10 2s. 6d.

Molasses-Previous prices are maintained. 45 puns. Antigua brought 16s., and 10 Dominica 14s. 6d.

NAVAL STORES-French Spirits Turpentine have declined to 46s. 6d. on the spot, and 44s. 6d. for this month's shipment. Petroleum-23. 7d has been paid for American Refined Pennsylvania now ready for delivery ; for delivery during the months of October to December next there are buyers at 2s. 4d., and sellers at 2s. 5d. Crude Pennsylvania £20.

OILS-Fish : There is more inquiry for Sperm at £89, but no

2 363 bags Mauritius were mostly disposed of at 6d per cwt decline; 26s 6d a 28s 6d for low to mid brown, 29s for good ditto, and 33s 6d a 35s 6d for low to mid yellow semi-crystalised. 261 bags Ben. gal sold at 33s 6d a 36s for low to good white Benares. 7,166 bags Madras were realised at 24s a 26s 6d for brown and yellow date, 25s a 25s 6d for common Jaggery, and 26s 6d for grainy ditto. 2,249 bags Penang were withdrawn. 4,080 bags Mozambique were about half placed at 30s a 31s for good brown to low yellow, and 32s 6d a 35s 6d for low mid to good yellow. Privately 3,000 bags Mauritius have been sold at 36s 6d a 36s for mid to good yellow semi-crystalised, and 40s 6d for fine ditto, and 200 bags good yellow Gurpattah Date Bengal at 34s. Afloat five cargoes have been bought, two Havana, 3,500 boxes No. 121 at 25s, 1,100 boxes stg. No. 12 at 25s, both fully insured ; three Cuba Muscovado, together 1,455 hhds 401 barrels 111 tierces 92 boxes at 22s landing weights. and all for U. K.

In TALLOW a considerable business has been done at stiff prices. We quote St. Petersburg Y. C. 42s 6d on the spot, and 43s 9d for the last three months.

TEA market quiet, with but little business doing, except in green teas suitable for America, for which there is a good demand at extreme prices. Good common Congou 11d a 1s per lb.

TIN--Blocks 93s. Bars 94s. Refined 96s. Foreign : Straits 89s 6d; Banca 94s.

HAVANA MARKETS .--- A circular of Aug. 19th report :

SUGAR (clayed) .- The general tone of the market has not changed much since our previous report. The pretensions of holders a large number of whom are speculators, do not in any way correspond to the views of buyers.

We may almost say that our European houses have entirely with. drawn from the market, which is solely supported by the moderate but improving demand existing for the American market, this, however, chiefly embraces the lower grades for refining purposes.

The market closes with additional firmness, on the part of holders, at our previous quotations. No. 12 at 8<sup>§</sup>/<sub>4</sub> rials per arrobe, 40s. Freight and 15 per cent premium of Exchange=27s 3d stg. per cwt free on board; and fcs. 31.25 ems per 50 kilos (without freight), exchange on Paris at 3 per cent P.

Last year at this date No. 12 being at 91 rs, freight 52s 6d and exch. 11 per cent-stood in at 30s per cwt. f. o. b.

Of the actual stock here, scarcely 70 m. boxes are in first hands. The quantity still to arrive from the country is estimated at about 20 m. boxes.

The total export from Havana and Matanzas, from 1st of Jan. to date compare thus:

	1865	1864	1863	
United States	315,795	116.161	63,857	
Great Britain	376,182	502,406	455,908	
North Europe	63,346	46,082	72,121	
France	200,938	178,740	146,145	
Spain	227,663	195,327	218,868	
South Europe	17 074	15,316	15,935	
Other Parts	24,508	24,498	23,389	
	1,227,506	1,078,530	998,223	
Stocks in—	1865	1864	1863	
Havana	205,111	253,656	209,470	5
Matanzas	24,476	29,304	27,854	
Bxs	229,987	282,960	237,324	

MOLASSES.-A purchase has been made among different dealers of a cargo of clayed for New Orleans, at 31 a 4 rs. Muscovado is very scarce and held at 5 rs. In Mantanzas and Cardenas the stocks are very small. Prices are likely to be well sustained.

Rum-is scarce-of 210 in chestnut casks it is held at \$28 per pipe. HONEY.—There being no stock on hand, the price is nominal at

sellers under £90 ; pale Southern quiet at £44, pale Seal £40 ; Cod £50. Linsced steady at 32s. Rape very firm, foreign brown is in demand at £44 10s, Refined £47 low ready for delivery. Olive is inquired for at £48 for Mogadore, £49 10s a £50 for Seville, £51 for Malaga, and £54 for Gallipoli. Cocoa Nut-A fair amount of business passing in Ceylon at 43s, and Cochin at 45s. Palm firm at 37s.

RICE is very firm, and 14.000 bags have been sold at 93 3d a 9s 9d for Necranzie, and 93 6d a 9s 9d for Rangoon. and 16s for fine white Bengal of new crop. A floating cargo Arracan, 1,054 tons, has also been bought at 10s 6d for the Continent.

RUM steady. The sales have been 300 puncheons West India at 1s 8d for Leewards, 1s 81d a 1s 10d for good middling to fine Demerara, 3s 4d a 4d for Jamaica; 160 hhds Mauritius at 1s 7d a 1s 71d, and 40 puncheons Penang at 1s 61d.

SALTPETRE flat. 50 tons Bengal now landing have been placed at 24s unrefracted.

Spices -- Black Pepper: market quiet: 2,300 bags Singapore were only partly realized at 31d; 130 bags shot Malabar were held for 44d. White: 170 bags Singapore sold from 58d a 51d. Ginger: 400 bbls Jamaica sold steadily from 62s a 78s for ord to mid, with good mid from 80s a 83s; 150 bags African were held for 37s. 220 cases Cassia Lignea brought 83s a 84s for seconds.

SUGAR-With a dull market on the spet, the quantity offering has been moderate, and the transactions have been at a decline of about 6d per cwt. Of British West India 2,280 hhds have been sold. 41 rs. per gallon.

TOBACCO .- The stock of desirable sorts being very small, the sales have been confined to 3 a 400 bales of partido and 2nd class Vuelta Abajo on reserved terms, supposed to be on the average basis of 20 a \$35 per bale, according to class, quality and weight. The demand for choice is pretty active, but common and middling are entirely neglected, in fact they are almost unsaleable. We hear of no transactions in fillers.

SEGARS .--- There is little enquiry for common and medium sorts. Conchas, Londres, &c, of 2nd and 3rd rate factories can be had at easier rates, but first class brands are held firm at previous prices. Several factories have stopped working, old tobacco being in arrear, and new not yet in a fit state to manufacture.

### COTTON.

The market has been excited and feverish throughout the week. With unexpectedly favorable intelligence from Liverpool, on Monday an advance to 46c for middling was realized, and this advance was partially supported until Wednesday, when a decline of one cent took place under the heavy receipts. The spinning and export demand have been pretty good, throughout the various fluctuations of the market; but the confidence of speculative holders was rather weakened, and on each rise they have offered freely. On Thursday morning, with a telegram advising an advance in New

THE CHRONICLE.

Orleans, and private reports of a slight falling off in the receipts at that market, there was renewed activity, and the market ruled firm, without quotable advance. Domestic cotton goods have been doing better, and spinners have bought with more confidence. The deliveries at this market from New Orleans are less liberal, but from the Atlantic ports they are increasing, so that the large estimates for August are thus far fully realized. Holders, however, are confident that they will not be compelled to make any material concession in price. It is asserted that the deliveries at the ports will rapidly fall off after September, but the probability is that the southern railroads will then be more serviceable than now.

The sales for the week have been about 14,000 bales. The market to-day steady, with a good general demand, and sales of 2,300 bales. The following are closing quotations :

We now estimate the stock of c	otton on th	e market	t as foll	ows:
At Nom Youl	• •		Bales	3.
At New York			85,40	00
At New Orleans			85,00	00 • .
At Mobile			40,60	30
At other markets			40,00	00
<b>m</b> ( )			-	
Total	••••••		250,00	00 - 1

The receipts at the same markets are about 45,000 bales weekly, and the shipments for Europe now amount to about 20,000 bales weekly; so that, deducting 10,000 bales weekly for home consump tion, the stock is increasing about 10,000 bales weekly, and on the first of October next will exceed 300,000 bales. The course of the market from that date, will be subject to many considerations, res pecting which judgments vary, and information is contradictory.

Our mail dates from New Orleans are to the morning of the 17th. (We had telegraphic intelligence, last week, one day later than this.) The stock of cotton continued to accumulate. The stock on Saturday, was 83,740 bales. The receipts for four days were 11,023 bales. Stock Aug. 16th, 86,149. The telegram of the evening of the 17th gave the stock at 88,000 bales. The latest although holders evinced more disposition to concede to the brokers, we heard of no sales. Tuesday some new lots changed hands at 38 a 39 for middling, but the transactions were very limited, and were not reported until the next day. Wednesday, holders being willing to meet the demands of buyers for still further concessions. The market was entered more freely, and considerable business was done on the basis of 36 a 38c. for middling. The sales of the two days summed up 700 bales. Prices were somewhat irregular Thursday, but the demand still continued, and we heard of sales of 600 bales.

To day the market was still further depressed, in consequence of unfavorable accounts from New York. The bulk of the sales which reached only 300 bales, were made at 35 a 36 for middling. The lower grades are, and have been, almost entirely neglected throughout the week, and are hardly quotable. The market closes quiet at the following quotations: Ordinary 23 a 32c, Low Middling 32 a 33; Middling 35 a 36; Strict Middling 37 a 38; Good Middling nominal.

The sales of the week have been 1800 bales.

A Savannah date of the 18th says :

Since our last issue, the Upland Cotton market has sustained a further decline of 1 to 2 cents. All stocks of good Cotton for sale on the merchants' floors were withdrawn on Saturday and yesterday Sea Islands are dull, and we have not heard of any material transaction that would give a basis for quotations. The following are the quotations for upland: Ordinary 23 a 30; Middlings 34 a 36; Good Middlings 38 a 40.

### LIVERPOOL, August 11th.

The market was dull in the early part of the week, and a decline generally submitted to, as the sales were small; spinners and exporters keeping out of the market, expecting larger shipments from America, and probably lower prices there; in the latter they have, for the moment at all events, been disappointed; on and after the arrivation of the steamers, with dates to 29th ult from New York, quoting middling upwards 48c they entered the market more freely, sales averaging 10 to 12,000 bales per day at former rates.

telegram from New Orleans is to the 22d, and quotes middling 42 a 43c.

A New Orleans paper says :

"The first bale of new crop cotton from Texas was received yesterday, and sold on Gravier street at 511 cents per pound, classing middling fair.

"The weather continues favorable for picking the opening cotton on the Mississippi river. We may expect several bales this and the next week; and after the first of September, no doubt, it will be received by hundreds of bales.

"Cotton continues to go freely from Vicksburg up the river for Cairo and other points. Boats take from 300 to 500 and 800 bales frequently."

The following denotes the course of the Mobile market for the week ending the 12th :

COTTON.—The receipts during the past week have been 7,930 bales as follows: From the Alabama river 4,703 bales, from Bigbee 755, Warrior 607, and by Railroad, 1.865. The exports have been 6,715, viz.: To New York 5,856, and to New Orleans 859 bales. The stock on hand and on shipboard not cleared is 34,424 bales.

Our last report left the cotton market quiet at 40c for middling. Saturday the same dullness prevailed, and 200 bales only were sold, but without change in prices. Monday was still more dull, and

### BREADSTUFFS.

The speculative movement' noted last week has continued throughout this, and has been attended with a further advance in prices. The basis of the movement is, however, somewhat changed. The assertion of short crops at the West is very much modified—in the extreme Northwest the crop of Spring Wheat is proved to be good, far better than last year; but the advance in the Liverpool market, and the progress of the cattle disease in Europe, have given renewed stimulus to speculation. At the Western markets the advance has been much more decided than at this market; and prices at Chicago, Milwaukee, Toledo, Buffalo, and Oswego, are uniformly above this market. The Eastward movement of the crops is pretty large; but such is the case of the Money market, that little difficulty is experienced in supporting prices. The accumulation of Flour and Wheat at this market is very large for the season; say 100,000 bbls shipping Flour and

1,000,000 bushels Wheat, and prices are so high as to almost stop shipments, but we can discover very little desire to sell; in fact, it is evident that, with a slight decline, speculators will again become free purchasers. Corn and Oats have been in large consumptive demand, and prices have improved, leading to some speculative feeling. Rye has been in demand for the Continent, and the market has ruled firm.

At to-day's market there was a further general advance, with a large speculative business in Wheat.

THE LONDON MARKET .- A circular of the 11th August, reports :

The weather this week has been on the whole favorable for harvest work. On Monday morning a good deal of rain fell, but about midday it cleared up and has been warm and bright since, up to yesterday.

At Monday's market considerable excitement was manifested in the trade owing to the unsettled state of the weather and the reported injury to the wheat crop from the late heavy rains. English wheat was in good demand at an advance of 2s to 3s per quarter, from the prices of this day se'nnight. In American and Canadian a fair business was done at an improvement of 2s from last Monday.

Flour. Barrels are in good consumptive request at an advance of 6d to 1s.

The floating grain cargo trade. Wheat has been in active request at the extreme advance of last week. For forward shipment a large business has again been done at fully late rates, 40s per 492 lbs being paid for Odessa Ghirka. Maize is firm at the decline of last week, at which buyers are more numerous. Ibrail has been sold at 28s per 480 lbs, and Galatz at 29s 3d per 492 lbs.

At to day's market the trade was rather excited owing to the heavy rain since yesterday, and factors ask 1s to 2s per qr. advance on Monday's prices for English and American wheat.

At Glasgow. on the 11th. a very large business was done at 21s 3d to 21s 6d, for choice amber spring wheat. Flour sold freely at 23s 6d for prime extra State, and 24s to 24s 6d for superfine Canadian. Indian corn also found ready buyers at 17s 6d ex ship. At Liverpool, same date, the unfavorable change in the weather

caused some excitement, and an extensive business was done in wheat at an advance of 4d per cental on Tuesday's quotations. A large trade was also done in French flour at an improvement of 1s to 1s 6d per sack, and barrels were 6d to 1s dearer. There was more inquiry for Indian corn, at prices rather in favor of sellers. The farmers deliveries of wheat for the week were 54,804 quarters, at 43s 6d, against 44s 1d same time last year.

the fact that the season was well advanced, has caused this activity.

The market was, however, so bare of goods that the semi panie which has prevailed the past week, has cleared it of almost all leading and standard kinds of domestics, while the market has folly recovered the concession in prices made a week ago.

Prices are at the old figures and goods scarce, with a great probability that the demand will be beyond the supply for the present, It is understood generally that the cost of manufacture is much less than the present prices, and that every available means is taking to increase the present product, a fact which will materially lessen the price of all domestics in a few weeks at most. Some houses go so far as to predict the crash which is to follow.

The agents report "no goods " in almost every instance, and consequently no prices. Certain it is that the activity among the jobbing houses cannot long continue without sweeping off all goods in first hand, though the principal activity has been with the Jobbers thus far.

BROWN SHEETINGS and SHIRTINGS have been quite active, and the supply of fine qualities is very limited. They are taken from the agents as fast as received, at an advance of from 1c a 2c from last week in most cases. Stark A, Indian Head, Lawrence C, Appleton A, and Indian Orchard, are held by agents at 32; 44 Graniteville 28; # do 27; 4 4 Augusta Factory 31, # do 28; Ap pletons 39 for B, an advance of 1c, 28 for C, and 29 for D, and each higher; Newmarket R R 33, do A 32, and 33 in do 281;44 Medford 30; Massachusetts A 29, do B 31, and 4-4 Nashua extra 31.

BLEACHED SHEETINGS and SHIRTINGS are still very scarce and sold ahead of supply. With the present excited state of the market it is next to an impossibility to give exact prices, as  $\frac{1}{2}$  a cent or 1 cent a yard would be of no consequence if the goods were to be had. Prices are 1c a 2c above last week, and advancing. Wamsutta 4-4 are delivered at 46, 9-8 do 54, 5-4 do 58; York Mills 49. Wauregan water twist are held at 46, do X X 41, Forestdale 42, Masonville 421, do X 44, Slaterville 7-8 at 34, Bartlette 40 for 44, 37 for 7-8, and 38 for 33-inch; Lonsdale sell at 43, White Rock 44.

DRILLS are scarce and prices advancing, as is the case with all domestic goods of fine qualities. Laconia sells at 35, India and Pepperell 33, Stark H 28, and Augusta 32.

CORSET JEANS are in better demand, and prices stiffening, though without perceptible change in figures. Indian Orchard, Bates, and Androscoggin sell at 25c for bleached and colored; Naumkeag 35, and Satteens 36.

CANTON FLANNELS are in fair demand, and prices firm, although there is less activity in these goods. There is a good supply on hand. The Nashua and Conestoga sell for 39 a 40c; Naumkeag and Manchester 43 for brown; Slatersville 45, and Good Hope 35.

STRIPES AND CHECKS are in moderate demand at last weeks prices. Haymaker's medal 45; Whittenton 35 for C, 371 for B. B., 55 for A. A., and 45 for A.

DENIMS AND COTTONADES are more active, and prices are firm. Amoskeag denims sell at 671; Sprague's and Haymaker's medal 521; and Providence 28. New York mills double and twist cot. tonades bring 75, and Indigo blue camlet jeans 50.

### THE DRY GOODS TRADE.

The past week has been one of unusual activity in the Dry Boods trade. The fall trade commenced with great briskness during the last days of last week, and has kept up with increased vigor to the present time. The slight concessions, and above all

PRINT CLOTHS have been moderately active at firm prices. The sales at Providence for the past week foot up a total of 87,000 pieces at following terms: 10,000 pieces 64 x 64, 131c, up to January; 17,000 do. 64 x 64, 19c, up to January ; 14,000 do. 64 x 64, 20c, to be made; 15,000 do. 64 x 64, 201c, to be made; 1,000 do. 60 x 64, 21ge, on band; 5,000 do. 64 x 64, 22c, on hand; 13,000 do. 64 x 64, 221c, on hand; 12,000 do. 64 x 64, 23c, on hand.

PRINTS have been very active, and the market is nearly bare of goods, while prices have again advanced to those of ten days ago. Agents have few or no goods on hand, and it is becoming more a question of goods than prices. The reduction of last week was the signal tor large calls from country merchants and Western buyers, and the demand is still great, although prices are much above the actual cost of production. The small supply held by the jobbersis almost wholly distributed, and with the present briskness of trade and searcity of goods prices are likely to be further advanced. There has been less advance in prices by agents than by the jobbers, as in some instances jobbers were selling below agents prices. Merrimack now sells by agents at 32 for W, 30 for D, and 32 for frocks; American Print Works are quoted at 29; Sprague's 29 regular for

# THE CHRONICLE.

fancies; 30 for pinks, purples, and shirtings; 30 for blue and white; 31 for blue and orange; national 24½ for light; mourning 28; Allen's 27 net for fancy; 29 for pink and purple, and 28 for frock; Arnold's 27 regular. Richmond 28 net for fancy, 29 for pink and purple, and 27 for mourning. Garner's are 31, Amoskeag 30 for pinks, 29 for purple, 28 for fancy and shirting, 27½ for mourning, Dutchess B 26, Lowell 26½, Wamsutta 25, and dusters 25.

GINGHAMS are scarce and in good demand, at an advance of 1c a 2c per yard. Glasgow sells at 33. Lancaster at 34.

MOUSLIN DE LAINES are in active demand at firm prices. Standard styles are  $\frac{1}{2}$  a 1c higher, selling at 33 a 34c.

WOOLEN GOODS are hardly so active, although prices remain steady and firm. Fur cloths, Utica all wool beavers bring \$3.25; cetton warp No. 1, \$2,65. For Cassimeres, Dightons \$2 50; Mil. ville, all wool \$2.75 a \$3.00; Satihets, Tip Top No. 1, \$1 30, and Lower Valley \$1.25.

KENTUCKY JEANS are in active demand and sell quickly at firm prices. Washingtons are held at 65c; Richmonds 60c; Common Standard 30c; and Union and Laurel Glen 624c.

FLANNELS AND BLANKETS are in active request, but prices nominally the same as last week.

LINENS are in steady demand, with no variation in prices to note.

FOREIGN GOODS are in increased demand, and firm notwithstand ing very large importations. The market sympathises to a considerable extent with the activity in domestics, but the changes from last week are not material. There have been a number of sales at auction since our last. On Tuesday Messrs. Haggerty & Co. sold a catalogue of silks, dress goods, &c., &c. The principal feature of the sale was a large assortment of Saxony dress goods, of the manufacture and importation of Messrs. Chas. F. Schmeider & Co. The offering was very attractive, and the competition among the bidders for these desirable frabrics was quite active, and prices were well sustained, many choice styles bringing an advance on the earlier quotations of the season. 20 inch bleached linen toweling brought 17 a 24c; 16 in. fine Russia crash 22c; 26 in. fine linen grass cloth 23c; 7.4 bleached damask 39c; 334 bird's eye diaper 39 a 44c; 8-4 damask table cloths, all linen, \$2 a \$2.70; 9-11 brown do \$1.40; huckabuck towels 23c; 'do larger and finer 26 a 341c; damask towels 60c; extra large huck do, all linen, 31 a 35c, extra size and quality blue bordered do 45 a 50c; 8-4 brown damask 60 a  $62\frac{1}{2}c$ ; 10 4 do 73 a 82c; fine all wool filling high colored Alambras, 34gc; neat plaid Luzeas 331c, do Corrinnas, 33c; do poil de chevres, 34 a 35c; do poil de chevres, black and white check, 40<sup>1</sup>/<sub>2</sub>c; do Cornelias 33 a 35c; poplin satanella in plaids and checks, 39c; satin stripped flora raye, 56gc; lama quality Eugenias, 431; Scotch Firalda, 44c; satin stripe Valadoras, 371c; plaid Olgas 381c; Cleopatra Traye, 401c; silk plaid Alexandria a soie, 484c; silk plaid Orpheas a soie, 514c; silk pamette plaids, and silk broche dots, 501c; silk stripes Granada a soie, 55c; silk broche stripes Camelia a soie, 72c; Turkish silk do, double width, 841c; red and black all wool check, 64c; new Scotch do 60 a 61c; super do in black and white checks, 80c; French silk and wool pop lins, 55 a 69c; plaid mourning do 60c; silk striped do 421 a 63c; double fold do, 84c; silk crepe check 381 a 63c; all wool French white merino, 89c; black Coburgs, 35 a 40c; colored English do 44 a 56c; double fold black craps, 451c; mohair figured alpaca, 60c; black alpacas, 351 a 42c; figured plaid mohairs, 321c; col\_ ored baratheas, 35c; gross grain silks, \$1.971 a \$2.10, better do \$2.15 a \$2.25; 26 inch Lyons black taffetas, \$1.95 a \$2; army blankets \$2.05 per pair.

1,000,000 bushels Wheat, and prices are so high as to almost stop shipments, but we can discover very little desire to sell; in fact, it is evident that, with a slight decline, speculators will again become free purchasers. Corn and Oats have been in large consumptive demand, and prices have improved, leading to some speculative feeling. Rye has been in demand for the Continent, and the market has ruled firm.

At to-day's market there was a further general advance, with a large speculative business in Wheat.

THE LONDON MARKET .- A circular of the 11th August, reports :

The weather this week has been on the whole favorable for harvest work. On Monday morning a good deal of rain fell, but about midday it cleared up and has been warm and bright since, up to yesterday.

At Monday's market considerable excitement was manifested in the trade owing to the unsettled state of the weather and the reported injury to the wheat crop from the late heavy rains. English wheat was in good demand at an advance of 2s to 3s per quarter, from the prices of this day se'nnight. In American and Canadian a fair business was done at an improvement of 2s from last Monday.

Flour. Barrels are in good consumptive request at an advance of 6d to 1s.

The floating grain cargo trade. Wheat has been in active request at the extreme advance of last week. For forward shipment a large business has again been done at fully late rates, 40s per 492 lbs being paid for Odessa Ghirka. Maiže is firm at the decline of last week, at which buyers are more numerous. Ibrail has been sold at 28s per 480 lbs, and Galatz at 29s 3d per 492 lbs.

At to day's market the trade was rather excited owing to the heavy rain since yesterday, and factors ask 1s to 2s per qr. advance on Monday's prices for English and American wheat.

At Glasgow, on the 11th, a very large business was done at 21s 3d to 21s 6d, for choice amber spring wheat. Flour sold freely at 23s 6d for prime extra State, and 24s to 24s 6d for superfine Canadian. Indian corn also found ready buyers at 17s 6d ex ship.

At Liverpool, same date, the unfavorable change in the weather caused some excitement, and an extensive business was done in wheat at an advance of 4d per cental on Tuesday's quotations. A large trade was also done in French flour at an improvement of 1s to 1s 6d per sack, and barrels were 6d to 1s dearer. There was more inquiry for Indian corn, at prices rather in favor of sellers. The farmers deliveries of wheat for the week were 54,804 quarters, at 43s 6d, against 44s 1d same time last year.

the fact that the season was well advanced, has caused this activity.

The market was, however, so bare of goods that the semi panie which has prevailed the past week, has cleared it of almost all leading and standard kinds of domestics, while the market has fully recovered the concession in prices made a week ago.

Prices are at the old figures and goods scarce, with a great prob. ability that the demand will be beyond the supply for the present, It is understood generally that the cost of manufacture is much less than the present prices, and that every available means is taking to increase the present product, a fact which will materially lessen the price of all domestics in a few weeks at most. Some houses go so far as to predict the crash which is to follow.

The agents report "no goods" in almost every instance, and consequently no prices. Certain it is that the activity among the jobbing houses cannot long continue without sweeping off all goods in first hand, though the principal activity has been with the Jobbers thus far.

BROWN SHEETINGS and SHIRTINGS have been quite active, and the supply of fine qualities is very limited. They are taken from the agents as fast as received, at an advance, of from 1c a 2c from last week in most cases. Stark A, Indian Head, Lawrence C. Appleton A, and Indian Orchard, are held by agents at 32; 44 Graniteville 28; # do 27; 4.4 Augusta Factory 31, # do 28; Ap. pletons 39 for B, an advance of 1c, 28 for C, and 29 for D, a to each higher; Newmarket R R 33, do A 32, and 33 in do 281;44 Medford 30; Massachusetts A 29, do B 31, and 4-4 Nashua extra 31.

BLEACHED SHEETINGS and SHIRTINGS are still very scarce and sold ahead of supply. With the present excited state of the mar. ket it is next to an impossibility to give exact prices, as  $\frac{1}{2}$  a cent or 1 cent a yard would be of no consequence if the goods were to be had, Prices are 1c a 2c above last week, and advancing. Wamsutta 4-4 are delivered at 46, 9-8 do 54, 5-4 do 58; York Mills 49. Wauregan water twist are held at 46, do X X 41, Forestdale 42, Masonville 421, do X 44, Slaterville 7-8 at 34, Bartlette 40 for 44, 37 for 7-8, and 38 for 33-inch; Lonsdale sell at 43, White Rock 44.

DRILLS are scarce and prices advancing, as is the case with all domestic goods of fine qualities. Laconia sells at 35, India and Pepperell 33, Stark H 28, and Augusta 32.

CORSET JEANS are in better demand, and prices stiffening, though without perceptible change in figures. Indian Orchard, Bates, and Androscoggin sell at 25c for bleached and colored; Naumkeag 35, and Satteens 36.

CANTON FLANNELS are in fair demand, and prices firm, although there is less activity in these goods. There is a good supply on hand. The Nashua and Conestoga sell for 39 a 40c; Naumkeag and Manchester 43 for brown; Slatersville 45, and Good Hope 35.

STRIPES AND CHECKS are in moderate demand at last weeks prices. Haymaker's medal 45; Whittenton 35 for C, 371 for B. B., 55 for A. A., and 45 for A.

DENIMS AND COTTONADES are more active, and prices are firm. Amoskeag denims sell at 671; Sprague's and Haymaker's medal 521; and Providence 28. New York mills double and twist cottonades bring 75, and Indigo blue camlet jeans 50.

### THE DRY GOODS TRADE.

The past week has been one of unusual activity in the Dry Boods trade. The fall trade commenced with great briskness during the last days of last week, and has kept up with increased vigor to the present time. The slight concessions, and above all

tized for FRASER

PRINT CLOTHS have been moderately active at firm prices. The sales at Providence for the past week foot up a total of 87,000 pieces at following terms: 10,000 pieces 64 x 64, 131c, up to January; 17,000 do. 64 x 64, 19c, up to January; 14,000 do. 64 x 64, 20c, to be made; 15,000 do. 64 x 64, 204c, to be made; 1.000 do. 60 x 64, 21<sup>2</sup>/<sub>4</sub>c, on band; 5,000 do. 64 x 64, 22c, on hand; 13,000 do. 64 x 64, 221c, on hand; 12,000 do. 64 x 64, 23c, on hand.

PRINTS have been very active, and the market is nearly bare of goods, while prices have again advanced to those of ten days aga Agents have few or no goods on hand, and it is becoming more a question of goods than prices. The reduction of last week was the signal for large calls from country merchants and Western buyers, and the demand is still great, although prices are much above the actual cost of production. The small supply held by the jobbersis almost wholly distributed, and with the present briskness of trade and scarcity of goods prices are likely to be further advanced. There has been less advance in prices by agents than by the jobbers, as in some instances jobbers were selling below agents prices. Merrimack now sells by agents at 32 for W, 30 for D, and 32 for frocks; American Print Works are quoted at 29; Sprague's 29 regular for

# THE CHRONICLE.

fancies; 30 for pinks, purples, and shirtings; 30 for blue and white; 31 for blue and orange; national 24½ for light; mourning 28; Allen's 27 net for fancy; 29 for pink and purple, and 28 for frock; Arnold's 27 regular. Richmond 28 net for fancy, 29 for pink and purple, and 27 for mourning. Garner's are 31, Amoskeag 30 for pinks, 29 for purple, 28 for fancy and shirting, 27½ for mourning, Dutchess B 26, Lowell 26½, Wamsutta 25, and dusters 25.

GINGHAMS are scarce and in good demand, at an advance of 1c a 2c per yard. Glasgow sells at 33. Lancaster at 34.

MOUSLIN DE LAINES are in active demand at firm prices. Standard styles are  $\frac{1}{2}$  a 1c higher, selling at 33 a 34c.

WOOLEN GOODS are hardly so active, although prices remain steady and firm. Fur cloths, Utica all wool beavers bring \$3.25; cotton warp No. 1, \$2,65. For Cassimeres, Dightons \$2.50; Mil. ville, all wool \$2.75 a \$3.00; Satinets, Tip Top No. 1, \$1.30, and Lower Valley \$1.25.

KENTUCKY JEANS are in active demand and sell quickly at firm prices. Washingtons are held at 65c; Richmonds 60c; Common Standard 30c; and Union and Laurel Glen 62<sup>1</sup>/<sub>2</sub>c.

FLANNELS AND BLANKETS are in active request, but prices nominally the same as last week.

LINENS are in steady demand, with no variation in prices to pote.

FOREIGN GOODS are in increased demand, and firm notwithstanding very large importations. The market sympathises to a considerable extent with the activity in domestics, but the changes from last week are not material. There have been a number of sales at auction since our last. On Tuesday Messrs. Haggerty & Co. sold a catalogue of silks, dress goods, &c., &c. The principal feature of the sale was a large assortment of Saxony dress goods, of the manufacture and importation of Messrs. Chas. F. Schmeider & Co. The offering was very attractive, and the competition among the bidders for these desirable frabrics was quite active, and prices were well sustained, many choice styles bringing an advance on the earlier quotations of the season. 20 inch bleached linen toweling brought 17 a 24c; 16 in. fine Russia crash 22c; 26 in. fine linen grass cloth 23c; 7 4 bleached damask 39c; 3-4 bird's eye diaper 39 a 44c; 8-4 damask table cloths, all linen, \$2 a \$2.70; 9-11 brown do \$1.40; huckabuck towels 23c; 'do larger and finer 26 a 344c; damask towels 60c; extra large huck do, all linen, 31 a 35c, extra size and quality blue bordered do 45 a 50c; 8-4 brown dam. ask 60 a 62±c; 10 4 do 73 a 82c; fine all wool filling high colored Alambras, 34gc; neat plaid Luzeas 334c, do Corrinnas, 33c; do poil de chevres, 34 a 35c; do poil de chevres, black and white check, 401c; do Cornelias 33 a 35c; poplin satanella in plaids and checks, 39c; satin stripped flora raye, 56gc; lama quality Eugenias, 431; Scotch Firalda, 44c; satin stripe Valadoras, 371c; plaid Olgas 38½c; Cleopatra raye, 40½c; silk plaid Alexandria a soie, 484c; silk plaid Orpheas a soie, 514c; silk pamette plaids, and sifk broche dots, 501c; silk stripes Granada a soie, 55c; silk broche stripes Camelia a soie, 72c; Turkish silk do, double width, 844c; red and black all wool check, 64c; new Scotch do 60 a 61c; super do in black and white checks, 80c; French silk and wool pop lins, 55 a 69c; plaid mourning do 60c; silk striped do 421 a 63c; double fold do, 84c; silk crepe check 381 a 63c; all wool French white merino, 89c; black Coburgs, 35 a 40c; colored English do 44 a 56c; double fold black craps, 451c; mohair figured alpaca, 60c; black alpacas, 351 a 42c; figured plaid mohairs, 321c; col ored baratheas, 35c; gross grain silks, \$1.971 a \$2.10, better do \$2.15 a \$2.25; 26 inch Lyons black taffetas, \$1.95 a \$2; army blankets \$2.05 per pair. Another sale of cloths, cassimers, &c., was well attended, and prices quite satisfactory.

# August 26, 1865.]

# The Railway Monitor.

UNION PACIFIC RAILROAD, E. D. —It is stated that the Pennsylvania Railroad Company, in connection with other interested corporations, have purchased a one-half interest in the Union Pacific Railroad Company, E. D., leading from Wyandotte, Kansas, through Lawrence towards the west. The object is to secure a through connection between the Union Pacific Railroad, *ria* the Pacific and Messenaw, the Ohio and Mississippi, the Little Miami, the Columbus and Pittsburg, and the Pennsylvania railroads to Philadelphia.

FOREIGN CONNECTIONS.—The Baltimore and Ohio Railroad Company have established a line of ocean steamers to run between Baltimore and Liverpool, and have already purchased four propellers for the enterprise. The Pennsylvania Company have in contemplation the establishment of a line between Philadelphia and Liverpool or London, and are to be assissted in the undertaking by the corporation of Philadelphia. We are not aware that any of the railroad companies having their seaboard terminus at New York propose to impress ocean steam navigation in their service, nor, indeed is it desirable that they should attempt competition with the many lines already in existence.

INDIANAPOLIS AND CINNCINATI RAILROAD.—This company is pushing its line up the White Water Valley towards Brookville. It is also surveying for a line along the Ohio River to Louisville. Its depot arrangements in Cinncinati are rapidly approaching com pletion, and in a few months they will be the city entrance to some five or six other lines.

ITHACA AND TOWANDA RAILROAD.—The company formed to construct a railroad from Ithaca, N. Y., to Towanda, Pa., was organized on Tuesday, 15th inst, and the construction is at once to be commenced. This road will be about 50 miles in length, and will open to Western New York new and rich fields of coal, particularly the same bituminous or steam coal, so much desired for railroads, steamboats and manufacturing purposes.

RAILROADS IN TEXAS.—The railroads already constructed and now in running order in this State are the Houston & Texas Central Railroad, from Houston to Millican, distance 80 miles. Washington County Railroad, from Hempstead to Brenham, distance 30 miles. Buffalo Bayou, Brazos and Colorado Railroad from Harrisburg to Alleyton, distance 80 miles. Houston Tap and Brazoria Railroad, from Houston to Columbia, distance 45 miles. Galveston Houston and Henderson Railroad, from Galveston to Houston, distance 50 miles. Texas and New Orleans Railroad, from Houston to Beaumont, distance 65 miles. Besides these, there is a railroad in running order from Shreveport, La., to Marshall, Texas, distance 40 miles. A railroad is now being built from Brazos Santiago to Brownville, distance about 30 miles, and one from Indianola to Victoria, distance 40 miles.

FEEDING ON THE ROAD .- A gentleman travelling on the continent sends to the London Times a note regarding a plan adopted at Vesoui, a railway station in France, which he recommends to the restaurants at British stations, and which might, perhaps, be copied with advantage in this country. Trains do not stop long at Vesoui, but "M, M. the travellers " are informed by plentiful advertisements that if they wish either to breakfast or dine they will find hot meals in baskets at the buffet. The meals are composed of three dishes, half a bottle of wine, bread. and desert. The passengers leave the empty basket and dishes half an hour later at the next station, and pay two francs fifty centimes, or about fifty cents in American currency, for their leisurely and comfortable repast. The number of cases of dyspepsia which would be avoided by the adoption of some such plan in this country can scarcely be computed. On through trains on a few of our railroads there are refreshment cars, which enable travelers to satisfy their appetites without franctic haste, but such institutions cannot always be made to "pay." On a few great lines, such as the Pennsylvania Central Railroad, ample time is given for nicals, and every traveller who has stopped at Altoona ren embers the fact with gratitude, but as a general thing the eating arrangements on most of our great routes of travel are wofully deficient.

ROME AND OSWEGO RAILROAD.—Operations on this line have been in progress for several months, and track laying has already reached Pulaski, to which place trains will commence running immediately.

RAILROAD EARNINGS.—The August earnings of railroads continue to exhibit the same increase over last year as the previous month of 1865 have shown. They are quite in excess of the calculations of their managers, who, in many cases, are surprised to see such steady and large gains upon the heavy traffic of last season. The reason for this is obvious; the war is over and the country is again free to pursue its development and industry without fear of drawbacks. Had the case been otherwise, railroad stocks which have stood so firmly under the recent perturbations of Wall street must have failen to a very low figure.

# COMPARATIVE MONTHLY EARNINGS OF PRINCIPAL RAILROADS.

prepared statement of the amount of insurance, alleged loss, and sums paid. There are also references to special cases of interest.

The impression so common, that the number of incendiary fires has much increased of late, is incorrect. During the last half year there have been in all one hundred and seventy-six fires, of which eighty-two were of incendiary origin—eight less than occurred in the corresponding six Months of 1864. There were during the same time thirty-nine arrests of persons on charges of arson, or attempts to commit that crime. Of this number two were indicted, tried, and convicted of arson; six discharged by the Grand Jury; eleven discharged by police magistrates; six indicted, and now awaiting trial; four held to bail; (two of whom have fled the city, and forfeited their bail, ten thousand dollars;) two discharged on their own recognizances; one held as a witness, and seven committed pending an examination.

As stated above, the total number of fires is one hundred and seventy six, being nineteen less than occurred during the corresponding six months of 1864, and seven less than during the previous half year. The aggregate of losses, however, is much heavier, there having been several very destructive fires during the period. The destruction of property on storage in the South and Water Street stores, which caught fire from the heat of a burning cooper's building on the opposite side of the street, entailed the largest loss.

With regard to the new Paid Fire Department, the Marshal says that "it is curious to note that while we are resorting to the English plan of paid fire brigades, there is a disposition on the part of the English to imitate our volunteer system. In London even the heir apparent, and the leading members of the aristocracy; make it their pride to run with the engine. At the recent fire at Marlborough House, the Prince of Wales distinguished himself by the successful exertions that he made in his new vocation."

The monthly statement of fires, losses and insurances is as fol-

	No. of	Alleged.		Amount
Month.	fiires.	loss.	Insurance.	paid.
December, 1864	<b>36</b>	\$791,445	\$1,738,050	\$713,168
January, 1865	29	321,156	1,993,525	263,131
February, "	25	210,002	232,800	112,487
March "	.31	217,862	7,04,450	180,086
April, "	37	2,322,674	2,954,900	155,906
May, "	17	~ 189,604	477,100	147,077
Totals	176	\$4,052,643	\$8,100,825	\$1,571,855

The great difference between the amount of alleged loss and the amount of insurance paid, is partly accounted for by the fact that a claim for \$1,786.456 on bonded goods burned or damaged at the fire in April, in the warehouses Nos. 549 and 555 Water street, has not yet been settled.
