The Chronicle.

THE COMMERCIAL AND FINANCIAL CHRONICLE is issued every Saturday morning by the publishers of Hunt's Merchants' Magazine with the latest news by mail and telegraph up to midnight of Friday. A DAILY BULLETIN is issued every morning with all the Commercial and Financial news of the previous day up to the hour of publication.

TERMS OF SUBSCRIPTION-PAYABLE IN ADVANCE.

Agents make no Collections out of New York City. Money paid to them will be at the risk of the person paying it.

WILLIAM B. DANA & CO., Publishers, 60 William Street, New York.

Neat Files for holding the Chronicle can be had at the Office. Price \$1 75.

MONETARY EASE AND MR. SHERMAN'S LOAN BILL.

Among the questions which seem at present to attract the most attention among financial men, one of the chief is whether the existing ease in money will continue. And the general opinion seems to be that no interruption need be seriously apprehended of the smooth operation of financial affairs. The reasons for this opinion are that there is an increasing accumulation of idle capital in the financial centres, and that no sudden contraction of the currency will be made by the government, inasmuch as it is an indispensable condition for the realizing of Mr. McCulloch's plans of consolidating the debt that the money market should be kept in an easy, tranquil condition. Moreover, the dullness of business at this season of the year renders it probable that no sudden demand

for money will arise to cause any strain on our financial ma chinery.

Some apprehension seems to prevail lest the new funding bill introduced into the Senate by Mr. Sherman on Wednesday should have the effect of causing a certain degree of stringency. But it is easy to see that the effect of that mear sure should it become a law will be to impart increased ease to monetary affairs for the bill only authorizes the negotia, tion of the consolidated government bonds at par, and it is very evident that it would be practically impossible to negotiate a large loan at five per cent if the slightest pressure or stringency prevailed.

It is true, as has been said, that the proposed loan is not to be floated by the issue of more currency. This course is inadmissible, and would defeat its own purpose. But, in every point of view, it is certain that, whatever other objections may be urged against Mr. Sherman's funding scheme, as at present developed, the supposition that it may tend to cause derangement or stringency in the money market is without foundation.

THE MAY REPORT OF THE NATIONAL DEBT.

Ir has been urged, as an argument against the withdrawal of part of our redundant paper money, so as to restore the currency to a healthier condition, that such a withdrawal must of necessity produce stringency in the money market. If any of our readers hold this incorrect opinion they will do well to look at the debt statement which we publish else. where. It will there be seen that during the month of April last the legal tender notes in circulation were diminished fifteen millions, half the cancelled notes being greenbacks. the loan market continues easy, and no monetary pinch of even the slightest and most temporary violence has supervened. The same principle was illustrated in a still more remarkable manner, and on a much greater scale, during the last fiscal year, when, although loans were negotiated by Mr. McCulloch to the amount of 1,475 millions of dollars; still during the very same period the active currency of the country was diminished, by means of the compound interest notes, to the extent of considerably more than 100 millions.

This lesson, familiar to financial statesmanship, that the currency can be controlled, under certain conditions, without tightening the money market, is also, as we have said, very clearly illustrated by the May statement of the debt; and to this cardinal principle we have a very significant and gratifying corollary at the present moment, in the fact that when a great funding loan act is passing through Congress, Mr. McCulloch is inaugurating the great movement of consolidating the debt, by taking steps to bring our paper money into a sounder and less redundant condition. The truth is, that there are periods of the year when a very small dimunition of the volume of the currency would cause much mischief, while at other seasons, as now, a very considerable depletion of the channels of the circulation is not only harmless, but easily accomplished. Mr. McCulloch's practical knowledge and sagacity has enabled him to seize on the right moment, and to withdraw his currency in the right way.

But there are other matters of interest in the national debt statement just issued. We ventured last month to say that the purchase of ten-forty five per cent bonds, which took place on behalf of the Government in March, was a special case, and would not be repeated. We now find that our information was correct. No change whatever has taken place in the outstanding aggregate of ten-forties. The five-twenties of 1865, however, have increased by the sale of \$5,828,000, and the sixes of 1881 \$29,500. Of seven-thirties about half a million more have been brought up, and of the compound interest notes five millions.

In regard to the compound notes, the aggregate of which is now \$167,072,141, some persons are of the opinion that the interest ought to be added on to the principal in the report. A morning paper advocates this view as follows:

"In making up the statement of the public debt, it seems to us that there is one item which is not correctly put. If a merchant were asked for a statement of his accounts, accrued interest would necessary figure as a part of the sum eventually to be paid. There are one hundred and sixty seven millions of compound interest notes. If we assume that one year's interest is due on them, the public debt is nearly ten millions greater than it sums up by the Treasury statement; if more than one year's interest, so much more must be added; if less than one year, so much must be deducted. Whatever the amount of interest actually accrued, that sum, or an approximation to it, ought to be furnished in the statement. In the case of other interest-bearing securities this is not necessary, because the interest is a payable interest, can be calculated by the public, and is extinguished at fixed intervals; but in compound interest notes, the silent growth of principal is constantly going on. When these notes mature they will represent not one hundred and sixty-seven millions, but over two hundred millions, and they at this present writing really represent a larger sum than they indicate. It makes very little difference whether the debt is twenty millions more or less, but it does make a great difference whether or not the Federal Government should be regarded as perfectly frank and even scrupulously honorable in its official statements."

If, however, the plan here advocated could be adopted, the public would never know what might be the real aggregate of outstanding notes at any given time, or how much of the reported sum was principal and how much interest. Besides, it is contrary to the ordinary usage to report in the manner proposed an amount of interest which is not yet due. The interest on the compound notes cannot very well be reported till it is due and actually paid. For these reasons then, if there were no others, we think that Mr. McCnlloch's method, though open to some objection, is, on the whole, the best.

We must not omit to notice the diminution of the amount of the debt. Eight months ago the aggregate was 2,757 millions, and now it is only 2,689 millions. We have sixty-eight millions of debt less on this showing than we had on our Treasury books on the 31st August. We do not wish to lay undue stress on this fact, and only cite it in this place to confirm the statement we ventured some time ago, that in all probability our national debt has reached its highest point, and that all future government loans will have as their object the simple conversion of one class of security into another.

TAX LEGISLATION IN CONGRESS.

WE hear from Washington that the Ways and Means Committee favor some amendments and important modifications of the Tax Bill which was recently introduced into their burdens and discriminating against the poor.

the House. This measure is in many respects a great improvement on former tax laws, but it contains two provisions in which we trust a change will be made. The first has reference to the proposed increase of the tax on cotton. No person conversant with the facts can doubt that in British India and elsewhere, an extraordinary impulse has been given to the production of cotton, and that this country will not easily regain its old monopoly in this important branch of business. Now, to increase the tax on cotton is really to give a premium to our foreign rivals; to discriminate against the southern producer; and to legislate to the prejudice of our own national interests. It is our wisest policy to set free from all unnecessary burdens this important branch of trade on which depends the recuperation of that part of our country which has suffered the most from the desolating ravages of the war. And from obvious causes the raising of cotton will be attended with so much of incertitude during the next year or two; and will probably in so many cases disappoint the just expectations of those, who, under auspices apparently promising, have gone south and invested their capital; that at present we ought rather to diminish the pressure of taxation than to increase it. Even were the country placed in such an emergency that new taxes must be laid, and laid anywhere and anyhow, so that we might raise a revenue and replenish an exhausted exchequer, cotton is one of the last things which a farseeing financial statesman would touch. But at present when the Treasury is full; when we are about to lessen the weight of taxation; in an act which contemplates the remission of some 75 millions of the fiscal burdens which oppress our national industry; it would surely be a great mistake, an egregious blunder, if we put a heavier burden on cotton which is already too much taxed, while we are relieving the fiscal pressure and making it lighter every where else. On national grounds then, and as an act of justice to our fellowcitizens engaged in the cotton business, we hope the tax will not be increased as is proposed, until time has been given for the trade to resuscitate and to develop itself. We do not claim a permanent exemption from heavier taxation. The time will come, and perhaps earlier than is in some quarters anticipated, when we shall derive a very large revenue from a wisely imposed duty on cotton. And this very productive tax, when the proper time arrives, may take the place of a multitude of galling imposts, which we shall be glad to get rid of. To tax cotton too heavily now, would be to put off indefinitely, or, at least, to retard for a considerable time, the realization of that desirable movement. In a year or two probably, these objections will no longer hold, but till then, we had better not try to increase the tax; for if we do, we shall assuredly give a check to business, and thus derive less revenue to the Treasury, besides inflicting evils of no small magnitude on vast interests connected with our commerce and trade.

The second point to which we referred arises out of the attempted changes in the income tax. The new bill proposes, first, to exempt \$1,000 from duty in all cases, instead of \$600 as at present; and secondly, it would charge large incomes of rich citizens five per cent instead of ten per cent, which is the rate under the old law. Both these changes in the law we think are ill-advised. The first would exempt from the tax a vast multitude of persons who ought to pay it; and the second would relieve those in affluent circumstances from bearing their fair equitable share of the public burdens. These two charges, if made, would very materially curtail the amount of the Treasury receipts from the income tax, and would introduce the intolerable principle, happily unknown as yet to our fiscal legislation, of relieving the rich of their burdens and discriminating against the poor.

THE WALL STREET FORGERIES.

The reign of paper money is always fertile in fraud, peculation, embezzlement, as well as in prodigality and extravagance. But since the excitement relative to the Ketchum frauds, nothing has produced in financial circles a more profound impression than the discovery on Wednesday evening of the forgeries by which John Ross has defrauded a number of banks and private individuals of various sums, amounting in the aggregate to little less than half a million of dollars. The criminal has been known in Wall street for more than a year, and has been ostensibly engaged in business as a gold broker. Of his antecedents little is known, and as his connections and manners, unlike those of young Ketchum, were not calculated to inspire special confidence, it is somewhat of a mystery how he, though almost a stranger, contrived to get into his hands so large an amount of funds at any one time. How long he has been engaged in such nefarious transactions is not known, nor has it transpired whether he had any accomplices. It is not easy, however, to believe that projects of so complicated a character could have been devised and carried into execution by one man, however experienced and accomplished an adept he might be in the arts and appliances of counterfeiting.

Three distinct kinds of fraud are charged against the criminal. First, the forgery of four cheques, two of them purporting to be drawn by Howes & Macy for \$54,000 each, and two by Alfred Speyer for \$64,800 each. The names and certifications on these cheques were forgeries, and the whole were executed with such skill as to show that they were from the hand of an expert counterfeiter. The cheques were deposited in the bank, and drawn against before the fraud was discovered.

Two other cheques were drawn by him in his own name and the certification marks of the Continental and Union banks were forged thereon. Of these cheques one was for \$63,125 and the other for \$63,062 50. They were duly paid away by him to respectable firms from whom he had bought gold, and were detected after passing through the Clearing House.

The third species of fraud was, if possible, of a still more dangerous character, and consisted of the forging of bonds of the Michigan Central Railroad. We have examined some of these alleged forgeries and they certainly are so well executed that without the use of a powerful lens no one would for a moment think of challenging or suspecting their genu ineness. Of this fact no further proof need be sought than is offered by the fact that not only the Union Bank but also the eminent firm of Groesbeck & Co. were induced to accept some of these bonds as collaterals for a loan. It is, however, worthy of note that the forger had the adroitness to lull suspicion asleep by first purchasing through the last-named firm some genuine bonds bearing precisely the same numbers which he subsequently impressed on his fictitious ones.

Such is a general view of the astounding series of crimes with which John Ross is charged. He is still, we believe, at large and is reported to have converted the proceeds of his crimes into compound interest notes. It is not very complimentary to our detective police system that he still continues to elude its vigilance.

Some very irritating controversies have arisen out of this case among the losing creditors of the absconding criminal, which will probably be adjudicated in the courts of law. Into these we of course forbear at present to enter. There is, however, one general caution which is obviously suggested by the facts of this case; namely, that the present system of certifying checks in this city needs improvement. In the hurry of a business so extended and so rapidly increasing as s that of many of our principal brokers too much care can

not be taken that the goodness of a check should be attested by some safeguard, which shall not be open to such frauds as those we have been contemplating. Several methods of accomplishing the object have been proposed for this purpose, and one immediate result of the Ross frauds will, no doubt, be to give an adequate protection to the recipient of checks purporting to be certified as good by the banks on which they are drawn.

THE SPANIARDS AT VALPARAISO.

It is perfectly natural that the news of the bombardment of Valparaiso by the Spanish fleet, under imperative orders from Madrid, should have been received in this country with a deep feeling of indignation, and there can be but little doubt that if Commodore Rodgers, commanding our own squadron in the harbor of Valparaiso, had taken upon himself the responsibility of interfering by force to prevent the consummation of the Spanish Admiral's purpose, he would at once have become a popular hero in the United States.

As we understand the Commodore's own report of the transaction made to the Secretary of the Navy, the chief consideration which restrained him from thus interfering was the fact that the British interests imperilled in Valparaiso were enormously larger than the American. "I had no intention," he writes, "of becoming a catspaw to draw European chesnuts out of the fire, and then have the power I served, laughing at my singed paws, while they enjoyed the fruits of my temerity." There is a certain inconsistency between this ground of forbearance and the theory upon which Commodore Rodgers originally proposed to the English Admiral to take joint action in preventing the bombardment; an inconsistency concerning which it is worth while for us, in the interests of commerce and of international law, to utter a timely word.

The belligerent right of the Spaniards to bombard Val paraiso is contested by Commodore Rodgers in his report, upon the theory that as "the mode of warfare proposed by Spain seemed to him (Commodore Rodgers) such as would provoke private animosity rather than coerce national will, it was not directed to its legitimate end, and consequently might be resisted." Now, putting aside all question as to the abstract decency or indecency of the Spanish action against Valparaiso, in regard to which no question will probably be raised outside of Spain itself, it is certainly most fortunate that Commodore Rodgers' practical second thought occurred to him in time to arrest the putting into effect of his theoretical first intention.

It is a lamentable thing that in the latter half of the nineteenth century a Power which is seeking, like Spain, to recover something of its long-lost prestige among the nations of Christendom, should sully its flag by such a military policy as the government of Isabella II. has seen fit to adopt towards the Republic of Chile. But it would be a thing still more lamentable, that the authority to plunge great nations like the United States and England into war should be vested in naval commanders on distant stations, acting upon their own opinion of the probable moral effect of belligerent measures adopted by one of two belligerent parties, in whose vicinity the said commanders might happen to be cruising. The emotional satisfaction which the American people might have derived from hearing that a Spanish fleet had been sunk by the guns of our squadron defending the harbor and city of Valparaiso, would have been dearly purchased by the establishment of a precedent more than likely to work serious harm and embarrassment to ourselves at some future time.

burry of a business so extended and so rapidly increasing as a that of many of our principal brokers, too much care can-

place by Commander Hollins, would have been justified in opening his batteries upon the American vessel engaged in that act. Upon the same theory, too, France or England would have been justified in declaring war against the Union for the purpose of breaking the blockade of Charleston, it having been abundantly published to the world at the beginning of our late civil strife that the leading statesmen of those countries looked upon that blockade as calculated to "provoke private animosity rather than coerce national will."

Logical and moral consistency would have forbidden Commodore Rodgers to abandon his purpose of saving Valparaiso, conceived as a lofty duty of humanity and international law, out of any regard either to his own personal and professional safety in the premises, or to the relative importance of the British and the American interests put in jeopardy by the Spanish fleet. But it is very satisfactory, we repeat, that our high-spirited and sympathetic sailor should have been thus logically and morally inconsistent.

We think, however, that the government at Washington will lose no time in taking such decisive action in concert with the powers most largely interested in the South Pacific commerce, to bring this senseless and dangerous quarrel between Spain and the South American States to a close. That both parties to the quarrel are in the wrong is palpably apparent, and it is by no means clear that the Chilians, who seem to have been originally the less responsible of the two for the outbreak of hostilities, are not to-day, to say the least, quite as much to blame as the Spaniards for the continuance of these hostilities.

In the present temper of civilization small and weak States are in less danger than ever they were in before, of suffering injury at the hands of stronger communities; but precisely for this reason, small States are much more sorely tempted than they ever before were, to inflict injury upon and offer insult to their more powerful neighbors. This is especially true of such small States as the Spanish-American republics, which enjoy an extensive commerce with the rest of the world, carried on chiefly by foreign enterprise, and sustained by foreign capital. In the case of Valparaiso, for example it is admitted that the damage done by the recent bombardment, fell in an overwhelming proportion upon the French, English, German, and American property; and it needs but a slight knowledge of human nature, to make one understand how much more easy and agreeable it must be for a Chilian Congress to pass patriotic resolutions, and for a Chilian executive to exhort his people to bear calamity with courage, when the charges of executing these resolutions and the burden of that calamity are mainly to fall, not upon Chilian, but upon foreign shoulders.

The United States already have a very extended system of intercourse with States situated as Chili is, in respect to their foreign relations of commerce and finance. Our geographical position in the world, and the peculiar genius of our people, make it certain that this system of intercourse with such States must be still further, and, indeed, indefinitely developed; and while we are heartily ready to join with the civilized world, in reprobating whatever of atrocity or outrage may mark the course of Spain towards Chili or any other power, we owe it to ourselves not to be over-hasty in interposing precedents of American origin between the power of the Union and the many possible or probable rites, to which American honor and American interests are now, or may be hereafter exposed, at any one or another point in the vast circumference of our commercial relations with the rest of mankind.

THE STATE TAX ON SALES.

The commercial public are taken by surprise with the discovery that, at the late session of the Legislature, a bill was

passed imposing heavy taxes upon transactions of brokers and auctioneers. The measure was smuggled through with a secresy which indicates that its promoters were afraid to have it submitted to the test of public opinion, and with a suddenness which shows that it was deemed unsafe to admit the discussion of its merits. The main features of the bill consist in the imposition of the following rates of duty upon the sales of brokers and auctioneers:

First-All wines and ardent spirits, foreign or domestic, at the rate of \$1 on every \$100.

Second—All goods, wares, merchandise and effects imported from any place beyond the Cape of Good Hope, at the rate of fifty cents on every \$100.

Third—All other goods, wares, merchandise or effects which are the production of any foreign country, at the rate of seventy-five cents on every \$100.

Probably the sales and resales at New York of the classes of commodities here subjected to tax will not aggregate below \$600,000,000 per annum. On a large proportion of the products the wholesale profits are very light; so that a tax of $\frac{1}{2}$ @1 per cent amounts to a serious drawback upon the gains of the merchant. The duty would, of course, have to be charged by the agent upon the buyer or seller. If upon the seller, he would find it unremunerative to continue his business, and would either remove to some place where he could supply his customers free from the tax, or employ his capital in some other manner. If upon the buyer, he would prefer making his purchases at Boston or Philadelphia, where commerce is free from such imposts. In either case, the trade of New York would inevitably be seriously damaged. A duty of 1@1 per cent upon wholesale transactions is quite sufficient to render an important proportion of the trade of this city unprofitable; and having that effect, its ultimate result would be to banish a large amount of our business to other cities. For years, Boston held a comparative monopoly of the trade in Eastern products; the municipal authorities imposed a tax of 1 per cent upon sales of teas, and ever since, that important trade has been held by New York merchants. The policy of our own Legislature is to drive that branch of commerce, and other branches along with it, back again to Boston, by the imposition of a duty double that which banished it from thence. In the foreign wool trade there has always been a close competition between this city and Boston. The New England metropolis has an important advantage in being nearer to the manufacturers of that section than New York, and it has been only by dint of superior enterprise that the wool brokers of this city have been able to secure the lion's share of this important branch of commerce. The Eastern manufacturers, aware that they must pay 12@1 per cent more here than at Boston, may, of course, be expected to give the preference to the Boston market. There are mills in New England which give their half million orders for wool; can those buyers be expected to come into this market when they are aware that, upon their purchase, they must pay to the State three or four thousand dollars? In this city there is sold, annually, not less than \$25,000,000 of dry goods at public auction. By the removal of these goods to Philadelphia or Boston for sale, the importers could save about \$200,000 of duty; is it to be supposed that such an important economy would not induce the selling of a large amount of dry goods at those cities? And would not the increase of auctions at those places, tend to divert thither much of the private trade in foreign dry goods of which we have now almost an exclusive advantage? The new duties may be shown to operate similarly in the case of all the leading branches of our foreign commerce. These allusions serve to show that the enforcement of this law must result in incalculable injury to the commerce of this port. Indeed, had the problem before the Legislature been, how to banish trade from New York ers

to the competing cities of New England and Pennsylvania, no better solution could have been given than this very $m \in \mathbf{a}$ sure.

We are at a loss to conceive what motive can have led to the adoption of this suicidal act. If it be supposed that the aim was simply revenue, then it is difficult to conceive that a body of men, undertaking to legislate for the largest and wealthiest State on the Continent, could be so utterly ignorant as not to perceive that the measure is fraught with the most serious danger to our commerce. If we assume that the object sought was the multiplication of lucrative offices for politicians; then we are compelled to admit that legislative corruption has gained an ascendancy utterly incompatible with commercial prosperity. Some regard the measure as instigated by a few merchants, who desire to get rid of the mediation of brokers and auctioneers. This supposition would seem to be countenanced by the fact, that the duty is imposed upon the transactions of these parties only; and that a bond of \$5,000, with two sureties, is required from them by the law. The middlemen are no doubt a thorn in the side of merchants who would prefer coming into direct contact with buyers. The auctions, too, are regarded as a nuisance by a class of importers who prefer doing their business at private sale. The broker and the auctioneer, however, perform important services to both buyers and sellers, for a very moderate charge; and no stronger evidence of their value to the community could be given, than the fact they are so extensively employed. They supply the brain and energy of our exchanges; and we could no more dispense with their functions, than the jobber could conduct his business without buyers or salesmen.

Serious doubts are entertained of the constitutionality of the law; and the question will probably be tested at an early day before the courts. The bill has the serious defect in construction that it imposes a tax without specifying the object to which the proceeds shall be applied; while Art. VII, § 13 of the State constitution provides that—

"Every law which imposes, continues or revives a tax, shall distinctly state the tax, and the object to which it shall be applied; and it shall not be sufficient to refer to any other law to fix such tax or object."

It would seem probable that, upon this ground at least, the law may be pronounced unconstitutional.

We have rarely seen the mercantile community so exasperated under a sense of legislative outrage. All feel that their interests are gravely threatened, and that an immediate remedy must be found. We cannot but hope that the authorities will hold the execution of the law in abeyance until either the courts have declared it unconstitutional, or the legislature has cancelled the wrong.

THE NIAGARA SHIP CANAL.

THE bill to incorporate the Niagara Ship Canal Company, and make an appropriation in aid of the enterprise, passed the House of Representatives at Washington on Wednesday. It is now under the consideration of the Committee on Commerce of the Senate, and will probably be reported favorably. Public opinion has rapidly matured in its favor, and it has in former years attracted attention in Congress. Lincoln, it is well known, was always ardent and positive in the expressions of his opinion in its favor. The last Congress repeatedly debated the matter; and now we find it again under consideration. It is claimed that it falls legiti mately within the scope of the powers to regulate commerce, and therefore is within the sphere of Congressional legislation. Boston and New England have, perhaps, as much interest in the matter as the city and State of New York; and the efforts put forth by Eastern capitalists to secure railway communication with Lake Ontario and Canada show they are not indifferent. Whatever may be the result of the present agitation, it may be regarded as certain, that if the Legislature of the State of New York will not, at an early day, authorize the commencing of this work, the Western producers will find an outlet to the possible detriment of the commerce of the State.

A bill to incorporate the Niagara Ship Canal Company had already passed both Houses of Legislature at Albany, and was signed by the Governor on Tuesday of last week. It empowers the company to construct a canal of sufficient dimensions to carry shipping from Lake Erie to Lake Ontario; reserving the right to the State at a future day of purchasing and operating it as a part of the canal system. The Senate, however, attached to the bill the extraordinary proviso, that the company should not begin the work till the Erie Canal shall have been enlarged to a capacity enabling it to carry boats of a size capable of holding twenty-five thousand bushels of corn. The friends of the measure were obliged to accede to this, and remain content with a law which recognizes the principle they had in view, although leaving it to future legislation to allow it to be put into practice. The folly, as well as absurdity of this measure of the admirers of the canal, has been demonstrated at a very early period, by this action of Congress overriding and promising to supersede the dilatory proceeding of the Legislature of the State.

We do not share in the apprehension which have been put forth, that the construction of the Niagara Ship Canal would both reduce the revenues of the Canal Fund, and divert a large part of the Western commerce from its present channels. Every increase of the means of transportation on this continent will add to the volume and profits of business. We have everything to gain, and nothing to lose by the adoption of a liberal policy. The matter of revenue to the State, even if it should be diminished, is a minor consideration. It is not a wise or statesmanlike policy to construct public works for the sake of income. The province of Government is to promote the public welfare, and for doing this it is entitled to a support from taxation. When private enterprise is restricted because it threatens to come into competition with public works, then the Government is assuming the prerogatives of a despot, and overstepping its legitimate sphere. If the canals of the State are not operated so as to produce a revenue sufficiently ample to pay their experses, it must be be evident that their management is too costly, or that they have become inadequate for the requirement of commerce. This is an age when rapidity of movement is often of the utmost importance.

Then, again, it is a violation of the comity existing between the States and districts of our country, for New York to interpose barriers to commerce, on the pretext that her revenues are in danger. The policy is unjustifiable as well as short-sighted. New York cannot prosper except the other parts of the Union are also prospering. Indeed, the commanding position, in point of wealth, &c., of this commonwealth, her advancement from a fourth to the first rank in the sisterhood of States, is owing almost entirely to the liberal character of her policy in commercial matters. It is no time now to hesitate; the same generous liberality should be continued, and then we may rely confidently upon the operation of the laws which govern commerce to assure our prosperity.

We have no dread of the formation of a new outlet for the trade of the West through the St. Lawrence river. Experience has shown that this is hardly practicable. Vessels to cross the ocean require deep keels and sharp bottoms; whereas, owing to the shallowness of the harbors of the Western lakes, only broad flat-bottomed shipping can enter them. This makes it necessary to break bulk at an intermediate point; a necessity which favors incalculably the continuance of trade in its present channels. Besides, half the year, the river is bound with ice, at the period when the requirements of western commerce for an open route to the seaboard are most imperative. Indeed, it is almost as hazardous to navigate the St. Lawrence as to double Cape Horn. Hence, so far, every endeavor to open trade with Europe through that river, has been abandoned.

Besides we have a competition, more formidable than the St. Lawrence, and a hundred millions of Canadian capital to be invested in Canada. The termination of the war has given the Mississippi to the West and the restoration of commerce down that river, has already affected the carrying business. This was to have been expected, and not to be deprecated. But the desire to maintain our own supremacy should induce our people to ask and grant the construction of a new route eastward, which will enable the products of the west to come eastward with less hindrance.

We have no doubt that this view will be ultimately adopted by the great majority of our citizens. When the ship-canal bill was introduced into the Assembly, it did not have thirty supporters, and yet so thoroughly convinced were the members by the discussion, able on both sides and exhaustive of the subject, that it received a large majority. If it had been canvassed and debated as ably and fully in the Senate, the proviso which we have mentioned would never have been appended. But the measure has only been postponed. The Legislature of 1866 has given it acknowledgment, and another one will, we trust, remove the impediments; if the Senate of the United States should hesitate to carry out to carry out to maturity the action initiated by the House of Representatives.

IMPORTS OF FOREIGN DRY GOODS AT NEW YORK.

We give below our usual monthly review of the imports of foreign dry goods at New York. The total for the month shows a decrease over the other mon hs of the year, as we stated would be the case in our reviews for February and March. Still the total for the month is much larger than the same periods of any other year given below, and the figures for the four months are very greatly in excess of the previous years, being \$55,706,357 this year, against \$15,268,630 for 1865, and \$35,477,140 for 1863. While we are importing so extensively, it is gratifying to know that our exports are also unusually large. The total cotton exported from the whole country since September has, as will be seen in our cotton report in this number of the Chronicle, reached now a little over 1,250,000 bales, thus giving the United States a credit abroad of about \$200,000,000. The following is the movement of foreign dry goods at New York for April:,

IMPORTS OF FOREIGN DRY GOODS AT NEW YORK FOR THE MONTH OF APRIL.

[From our own Correspondent.]

London, Saturday, April 21, 1866. The most prominent feature in this week's financial news, is the sudden and unexpected announcement of the suspension of Barned's Bank,

ank,

ing Company at Liverpool. This bank was founded in the year 1809 and the business was carried on as a private undertaking under the title of Messrs. Barned & Co. until July last year, when it was organized on the basis of a joint-stock company under the Limited Liability Act. The purchase money for the business was fixed at £160,000, and the amount of capital authorized was two millions sterling, in forty thousand shares of fifty pounds each. Up to the present time, £10 per share has been called up, thus leaving the proprietors of the bank, who are said to number 600, responsible for £40 per share. The announcement was made on Wednesday last, and at that time the suspension was attributed to the withdrawal of facilities by the London agents of the Bank. At present, the public is unacquainted with the details of the affair, but the matter will soon be placed in competent hands, and it is hoped the position of the shareholders will prove less unfavorable than was at one time anticipated. The total liabilities are said to be £3,250,000. This suspension has necessarily operated prejudicially on the market for banking and financial companies' shares, more especially on the latter. The fall in prices, however, is not heavy, the effect of the present failure being by no means so great as that caused by the revelations as to the mode of conducting the business of the Joint Stock Discount Company. Nevertheless, the quotations have, in many instances, given way, and at times considerable depression has been apparent. The affairs of the Joint-Stock Discount Company are now seldom talked of, but several of the directors, who held office at the boards of other undertakings, have been compelled to resign their positions.

On the other hand, the consol market has become firmer, chiefly from two causes, viz., the more pacific intelligence respecting the relations of Austria and Prussia; and, secondly, from increased investments on the part of the public. The quotations, however, are still low, but are about one-half per cent above the late lowest point. The highest prices on the days enumerated were:

FOR THE WEEK ENDING APRIL 21.

| | Monday. | Tuesday. | Wed'day | Thur'day | Friday. | Sat'day. | |
|---------|---------|----------|---------|----------|---------|----------|--|
| Consols | | 8639 | 861/2 | 87 | 871/4 | 871% | |

The demand for money for commercial purposes during the week has been decidedly limited. In the open market the quotations have given way, money being obtainable at 1 to, in some instances, 1 per cent below the bank rate, so far as the best paper is concerned. The directors of the Bank of England have not made any change in their minimum rate of discount, and, from the nature of the bank return, it was certainly impossible for them to have altered their limit for accommodation. The statement, indeed, exhibits a falling off in the demand for discount, the decrease in "securities" being to the extent of £406,000; but, on the other hand, the reserve of notes and coin has been largely diminished, whilst there is a diminution of £345,000 in the supply of bullion. In some respects, however, the position of the money market is satisfactory, and there is a tendency to lower rates thereby engendered; but still the large shipments of cotton from Bombay, and the possibility, therefore, of a drain of silver to the East in payment of the material exported to this country, will cause the directors of the bank to act with caution. The latest news from Bombay shows a favorable movement in the exchange, so far as this country is concerned, the quotation on London being 2s 11d per rupee; but, as the par of exchange is 1s 11ad, the rate is far from satisfactory. The last sale of bills on India by the India Council showed, however, that the demand for remittance to the East has fallen off, but considerable quantities of gold have recently been withdrawn for shipment to France, evidently for the purchase of silver for export from Marseilles; and the silver market, though quiet, exhibits firmness. The quotations for accommodation in the open market are as follows:

| 30 days' bills | 5%@ % | 4 months' bills | 61/0 |
|-----------------|-------|------------------------|------|
| 3 months' bills | 5%@ | 6&4 months' bank paper | 6 6 |

On the Continent there have been several changes: at Frankfort, an advance; at Hamburg, a decline in the rate of discount. At Turin the rate is very uncertain, so that no reliable quotation can be given:

| At Paris | Bank rate. \$\psi c. | Open market. # c. 31/2 | | Bank rate. \$\pi c. | Open market. \$\pi\$ c. |

| Frankfort. Amsterdam. | K | 5% | Hamburg. St. Petersburg | 51% | 5¾ 6½-7 |

There have been considerably extensive dealings in United States 5-20 bonds, at fluctuating, but at improving prices. Other American securities have been in but moderate request, and prices have, in some instances, had a drooping tendency. The highest prices on the days mentioned were as under:

| For week ending April 21. | | Tues. | Wed. | Thur. | Fri. | Sa |

The recent heavy fall in the value of cotton has necessarily created an uneasy feeling in commercial circles. Already are several failures spoken of as likely to be announced during the next few weeks, some few houses, transacting business in a large way, being represented as in a very unsatisfactory position. The decline in cotton is now heavy, and as the present and prospective supplies are large—much larger than was enticipated a few months since by even the most sanguine—it does not seem possible that any recovery is likely to take place. The decline of the present week is not the result of any want of buyers, for the sales both for home consumption and for export have been quite up to the average. The fall, therefore, is to be attributed to the abundance of the supply. The extent of this supply will be seen in the annexed statement of the amount of stock at and afloat for Liverpool and London at this date:

| , a | 1865. | 1866. |
|------------------------|----------|---------|
| Stools of Timesses | bales. | bales. |
| Stock at Liverpool | 575,480 | 819,890 |
| " in London | 70,607 | 120,258 |
| American cotton afloat | 30,000 | 100,000 |
| Indian cotton afioat | 348,400 | 551,150 |
| Total | 1 004 40 | |

From the above it will be seen that our supplies are now almost 600,-000 bales in excess of last year, and the total supply actually on hand, including the quantity affoat, is equal to the wants of spinners and exporters—estimating these requirements at 60,000 bales weekly—for a period of 26 weeks. The following comparison shows the extent of the decline in the value of cotton since the first of April:

| | Mar. 31. | Apr. 21. | Fall |

Arrangements have recently been completed for stowing the new cable on board the Great Eastern steamship. Two hundred miles of cable have already been conveyed to the ship from the works of the Telegraph Construction and Maintenance Company. According to present arrangements, the Great Eastern will start on her new voyage at the end of June, or at the beginning of July.

Considerable anxiety has been felt as to the safety of the Inman Steamship City of Washington, which left New York for Liverpool on the 31st of March. The City of Baltimore, which left New York on the 6th of April, has arrived, but has brought no tidings of the missing vessels. Twenty guineas premium have been paid at Lloyd's to effect past insurances.

COMMERCIAL AND MISCELLANEOUS NEWS.

IMPORTS AND EXPORTS FOR THE WEEK.—The imports this week are less both in general merchandise and dry goods, being \$6,229,635 against \$7,624,164 last week. | | ACT TO FUND THE NATIONAL DERY.—The following bill to authorize |

ACT TO FUND THE NATIONAL DEBT.—The following bill to authorize a thirty year five per cent loan was introduced into the Schate on Wed nesday by Mr Sherman and referred to the Finance Committee:

An Act to reduce the rate of interest on the National Debt, and for funding the

same.

Be it enacted by the Senate and House of Representatives of the United States in Congress assembled, That the Secretary of the Treasury is hereby authorized, if he shall deem it expedient for the purpose of funding the National Debt and representatives of the course house of the ducing the rate of interest thereon, to issue registered or coupon bonds of the United States in such form and of such denominations as he may prescribe, payable, principal and interest, in coin, and bearing interest at the rate of not exceeding five per cent per annum, payable semi-annually, such bonds to be made payable in not over thirty years from date, to be issued to an amount sufficient to cover all outstanding or existing obligations of the United States, and to be disposed of in such manner and on such terms, not less than pare the to be disposed of in such manner and on such terms, not less than par, as the Secretary of the Treasury may deem most conducive to the interests of the Government. *Provided*, That the expense of preparing, issuing, and disposing of such bonds shall not exceed two per cent of the amount disposed of; and provided, also, that the said bonds and the proceeds thereof shall be executively used in paying up or retiring the obligations or indebtedness of the United States other than United States notes.

SEC. 2. And be it further enacted, That the bonds issued under this act shall be known as the "consolidated debt of the United States," and the same shall be exempt from taxation in any form by or under State, municipal or local authority, and in consideration of the reduction of the rate of interest effected by the negotiation of said bonds, the same and the interest thereon and the income therefrom shall be exempt from the payment of all taxes or duties to the United

SEC. 3. And be it further enacted, That the amount of interest sayed by substitution of five per cent bonds for other Government securities shall be applied to the payment of the principal of the national debt; and that for the purpose of insuring the payment thereof, and in lieu of the sinking fund contemplated by the act of February 25, 1862, the sum of at least \$30,000,000, including the saving of interest aforesaid out of any moneys in the Treasury not otherwise appropriated, shall be annually applied to the reduction or extinguishment of said debt, in such manner as may be determined by the Secretary of the Treasury,

or as Congress may hereafter direct.
Sec. 4. And be it further enacted, That, for the purpose of enabling the Secretary of the Treasury to prepare for the funding or payment of the outstanding Treasury notes bearing interest at the rate of seven and three-tenths per cent per annum, holders of such notes are hereby required to advise the Secretary of the Treasury, in such manner as he may prescribe, at least six months before the maturity of such notes, whether they elect that such notes shall be paid at maturity or shall be converted into bonds of the United States, commonly designated as "Five-twenty Bonds," and the right on the part of such holders of converting such Treasury notes into bonds shall be deemed and taken to be waived as to each and every note in relation to which notice shall be given as above prescribed, and the same shall be paid at maturity in lawful money of the United

LAWS OF NEW YORK TAXING AUCTION AND BROKERS' SALES,-The following is an official copy of the law just passed by the New York Legislature, taxing sales of merchandise made by auctioneers or brokers: LAWS OF NEW YORK BY AUTHORITY. CHAP. 547.

An Act to amend chapter sixty-two of the laws of eighteen hundred and fortysix, and other acts additional to the same.

Passed April 13, 1866.

The people of the State of New York, represented in Senate and Assembly, do enact

Section 1. Section 1, chapter sixty-two, of the laws of eighteen hundred and forty-six, is hereby amended so as to read as follows:

All goods, wares and merchandise, and other species of personal property, which at any time shall be exposed to sale by public auction, or offered for sale by sample or otherwise by brokers, with the exceptions mentioned in the second section of this act, and in the fifth section of title one, chapter seventeen, of part one of the Revised Statutes, shall be subject, each and every time that they shall be sold, to fees or duties at the following rates, namely:

1. All wines and ardent spirits, foreign or donestic, at the rate of one dollar

on every one hundred dollars.

2. All goods, wares, merchandise and effects, imported from any place beyond the Cape of Good Hope, at the rate of fifty cents on every hundred dollars.

3. All other goods, wares, merchandise or effects, which are the production of any foreign country, at the rate of seventy-five cents on every one hundred dollars.

These fees shall be calculated on the sums for which the goods so exposed or offered for sale shall be struck off or sold, and shall in all cases be made by the person making the sale; and the account, to be made in writing, as directed by section twenty-seven of title one of chapter seventeen of part one of the Revised Statutes, shall be made by every auctioneer and broker under oath, on the first Monday in July and January in each year, subject to the penalties for non-compliance imposed upon auctioneers in said title. One-half of the fees or duties to which damaged goods are now subject shall be paid into the treasury of the State.

Sec. 2. Section two of chapter three hundred and ninety-nine of the laws of

Sec. 2. Section two of chapter three hundred and ninety-nine of the laws of eighteen hundred and forty-nine is hereby amended so as to read as follows:

The Comptroller is hereby authorized to employ an agent or agents, whose duty it shall be to carry this act into effect, who shall examine, as often as twice in each year, and whenever the comptroller deem it necessary, the books and accounts of sales kept by the auctioneers, who shall have given bonds for the payment of fees or duties on goods sold at public auction, and of brokers who shall have given bonds for the payment of fees or duties on goods vended by them, as su ceified by law. The compensation of such agents shall be fixed by the Comptroller; and such agent or agents shall have full power to administer an oath to each auctioneer or broker, and to require such information as may be necessary to ascertain the true amount of goods sold by such broker or auctioneer.

SEC. 3. No person authorized to exercise the office of an auctioneer shall execute the duties of such office, and no broker engaged in selling goods, wares, merchandise or effects, subject to fees or duties by the laws of this State, shall engage in such business until such broker or auctioneer shall have entered into engage in such business until such broker or auctioneer shall have entered into a bond to the people of this State, with two sufficient freeholders as his sureties, in the penalty of five thousand dollars each, conditioned for the faithful performance of the duties of his office, and for the payment of the fees or duties that are or shall be imposed by law, and that shall accrue on sales made by him or under his direction, by virtue of his office. Such bond shall be taken and approved by the agent appointed by the Comptroller, in pursuance of chapter three bundred and ninety-nine of the laws of eighteen hundred and forty-nine; but if executed in a city where there is no such agent, it shall be taken and approved by the mayor or recorder of such city; and if executed by an auctioneer appointed for a county, shall be approved by a judge of the county court for such county; such bond when executed shall be transmitted to the Comptroller, within ten days after such execution, and a copy paced on file in the office of the agent, or where there is no agent, in the office of the county clerk of the county in which the same shall have been taken and approved. The clerk of the county in which the same shall have been taken and approved. The fees to be paid to the agent approving such bonds shall be five dollars; and for approval of the returns to be made of sales, three dollars; and for figing the dusplioted copy of the aforesaid bond, fifty cents; every broker or auctioneer who shall sell any goods, wares, merchandise or effects, as specified in this act, without having filed the bonds required by law, or who shall neglect to make or render the accounts, or pay over the duties required by law, shall be deemed guilty of a misdeancanor, and punished by imprisonment not exceeding one year, or by fine not exceeding one thousand dollars, or by both such fine and imprisonment. STATE OF NEW YORK,

Office of the Secretary of State. I have compared the preceding with the original law on file in this office, and do here y certify that the same is a correct transcript therefrom and of the whole of said original law.

. Secretary of State.

The Bankers' Gazette.

We give in our Bulletin from day to day lists of bonds, &c., lost, and dividends declared. These tables will be continued daily, and on Saturday morning, such as have been published through the week in the Bulletin will be collected and published in the Curonicle. Below will be found those published the last week in the BULLETIN.

FRIDAY, May 4, P. M.

THE MONEY MARKET.—The course of financial affairs during the week has tended toward a steady increase of ease. The week opened with a bank statement showing an increase of \$5,909,996 on deposits, and an addition of \$2,985,334 to the legal tenders, with a disproportionate increase in loans and discounts. The banks continue to receive currency from the interior; and their surplus balances have been offered to brokers, for fixed periods, at 3@4 per cent, and in some instances without success. There has been more inquiry for money for stock speculation; but the demand has been readily met at 5 per cent, and in some instances at 4 per cent.

The announcement of the Secretary of the Treasury, that no more monies will be received on temporary loan, except upon Clearing. House certificates, and that after May 15 the rate of interest on the 6 per cent temporary loan will be reduced to 5 per cent, has had the effect of adding to the ease of the market; although the full effect will probably not be felt until the reduced rate of interest goes into operation.

The Ross forgeries, involving losses to the amount of nearly \$400,000, have temporarily disturbed the market, by showing the facility with which false collaterals may be negotiated, and the liability to heavy loss from fraudulent loans.

Discounts are comparatively quiet. The opening of navigation has not been attended with the increase of produce bills usual at this season of the year. There is a very active demand for prime paper, with a strictly moderate supply. Prime names range mostly at 6a7 per cent, with exceptions at 51 per cent. The extreme abundance of money has partially relaxed the cau ion as to names which prevailed earlier in the season, and second class paper is more easily negotiated.

| | Per cent. | and the same of th | Per cent. |

UNITED STATES SECURITIES.—The week opened with a general weakness in Government securities, the result of a reaction from speculative activity of last week. Five-twenties declined 2al per cent, and Ten-forties reacted from 96%, the highest price of last week, to 941. Wednesday it was announced that Senator Sherman had introduced into Congress a bill authorizing a 5 per cent loan, running thirty years, with principal and interest payable in gold, and exempt from taxation. This had the effect of renewing speculation on the gold-bearing bonds, and especially on the Tenforties, which steadily advanced to 961, yesterday, but have since declined, and close at 95%.

The steamship Scotia brought an amount of Five-twenty bonds, variously estimated at \$1,500,000 to \$2,500,000 from Europe; but the bonds are readily absorbed, without any apparent effect upon the market.

The statement of the Public Debt of May 1st has had a favorable effect upon Governments. The return shows that \$5,828,000 of Five-Twenty bonds have been issued in exchange for short date loans. The Compound Notes have been reduced during the month of April \$5,000,000. These notes are in active demand at 1 per cent above par, with simple interest.

Certificates of Indebtedness are scarce, being generally held out of the market; the correct quotation is 100\falle100\falle1.

The interest on all the issues of Five-twenties matured on the 1st inst. The following are the closing quotations for each issue, ex coupon:—issue of 1862, 102a102; do of 1864, 1017a102; do of 1865, 102.

The subjoined closing quotations for leading Government securities, will show the difference in prices as compared with previous

RAILROAD AND MISCELLANEOUS SECURITIES.—The week opened with a lull in the speculative activity; apparently a matter of design on the part of the speculators for higher prices, intended to draw out sellers' options upon which the market might be ultimately put up. A partial fall in prices had the result of drawing out a considerable amount of short sales; but no sooner were these contracts made than prices immediately strengthened. Upon the average, however, prices stand about the same as one week ago.

The low price of Erie stock has a depressing effect upon prices generally. It is understood that stock is largely oversold, and there is a strong effort on the part of those on the "short" interest to keep the price down. To day a considerable amount of stock was thrown upon the market for speculative effect, the result being a decline from 74½ at the opening of the market to 73¾ at the close. Other stocks sympathised with this tendency on Erie, and closed lower than at the opening of business.

The prevailing opinion appears to be, that the speculative holders of stocks cannot afford to unload at present prices, and that a strong effort will be made to put up prices before the close of the spring campaign. The great ease in the money market favors any operations of this character, and it would appear quite probable that such will be the policy of the "long side" of the street.

The most important movement has been in Michigan Southern, of which a large amount of stock has been thrown upon the market, putting down the price from 82\frac{1}{2} a week ago, to 77\frac{1}{2} yesterday. To-day the price opened at 78\frac{1}{2}, and closes at 78\frac{1}{2}.

Chicago and Northwestern continues strong, under clique manipulation, closing at 61½ for preferred, and 29 for the common stock. The comparatively low prices of some of the minor railroad stocks has induced a speculation which has brought up the price 2@ 3 per cent; Milwaukee and St. Paul preferred has advanced about 5 per cent.

The market closes active but unsettled.

The following are the closing quotations for leading stocks, compared with those of previous weeks:

The Gold Market.—Gold has been active and fluctuating during the week. On the 30th, in anticipation of the payment of the May interest on Five-Twenties, the price declined to 125\frac{1}{3}, and on the morning of the 1st inst. the price opened at 125\frac{1}{3}. It soon became apparent, however, that a large amount of "short" contracts were maturing, which had to be provided for by the disbursements of the Sub-Treasury: and the demand for this purpose caused an advance of 1\frac{1}{3} before the close of business. The importers were also large buyers on account of exchange. The improved supply has caused a fall in the rate of interest on gold loans to about 6 per cent per annum; but the price has not been materially reduced by the disbursements of interest,. To day the quotation has ranged at 127\frac{1}{2}a127\frac{2}{3}, and closes at 127\frac{2}{3}. The payments at the Sub-Treasury, on account of interest, up to the close of to-day, amount to about \$6,000,000.

The debt statement for May 1 shows an increase of \$14,606,707 in the amount of coin in the Treasury during April.

The steamship Costa Rica, from Aspinwall, brought \$1,318,270 in specie and bullion.

The export of specie on Saturday amounted to \$53,880. The Persia took out on Wednesday \$126,000 in specie.

The following have been the highest and lowest quotations for gold, on each of the last six days:

| Anull | 00 | Highest. 1 | Lowest. | | Highest. L | owest |
|-------|----------|------------|----------------------|---------|---------------|-----------------------------------|
| | 28 80 | 1273/8 | 128¼ May 125% May | 2, 3 | 1283/8 128 | $126\frac{3}{8}$ $127\frac{1}{2}$ |
| May | I | 127 | 1251/8 | 4 | 12734 | 12714 |

The transactions for last week at the Custom House and Sub-Treasury were as follows:

| Trompara, Mere as Intioms: | | | |

The changes indicate a continuance of extreme monetary ease, while the increase in loans shows a partial improvement in the activity of business.

The several items compare as follows with the returns of previous weeks:

The Commercial Times.

COMMERCIAL EPITOME.

FRIDAY NIGHT, May 4.

The course of trade has been interrupted the past week by peculiar circumstances. The "removals" among active business men have been unusually numercus. The current season has witnessed the transfer of two important branches of trade to entirely different quarters of the city. The wool trade has nearly deserted Pine street for lower Broadway and Beaver street, while there has been a pretty general movement of the fur trade up town. The other circumstance that has proved an obstacle to trade is the consternation that exists among brokers in consequence of the law passed by the Legislature of New York at the recent session respecting the tax to be levied upon their sales. This tax is regarded as oppressive and ruinous, and the brokers have been in daily consultation with reference to the measures that can be adopted to avoid its burdens.

The following is a statement of stocks of leading articles of foreign and domestic merchandise at this market:

| | 186 | 66. | 1865. |
|------------------------------|----------|---------|----------------|
| | April 1. | May 1. | May 1. |
| Beef, barrels and tierces | 27,361 | 24,874 | 77,474 |

| | , | 20,300 | 20,000 |

Cotton has recovered from the depression prevailing at our last report, but has been without activity.

Breadstuffs have experienced further speculative advance in flour and wheat, but coarse grains have been rather dull and heavy.

Provisions show no new feature of importance. The speculative excitement in Pork has run very high, and the fluctuations in prices unusually sharp, with a somewhat higher range. The operators for a rise are a Western clique; and on Wednesday sales of new crop were made as high as \$29.62\frac{1}{2}, cash, and \$30, buyer June, while the lowest price yesterday was \$28.37\frac{1}{2}. The stock is large, but the receipts are very light, and the Western markets relatively higher than this, with a Southern demand for all this surplus. Lard has been firm but dull. Bacon has done a little better towards the close, with some revival of shipments to Liverpool, stimulated by extreme low freights and the advance in Exchange. Beef has remained very firm with a light stock, small receipts, and steady demand. Butter is drooping under increasing supplies, cheese is nearly nominal.

Groceries have been firm, but with a very moderate trade, mainly owing, no doubt, to the circumstances above detailed.

Naval stores have been more active. The demand for spirits turpentine and rosin has been large, and some improvement in the prices has taken place. Tar, also, is rather firmer.

There has been more doing in petroleum, and yet no marked activity. Prices have had an upward tendency through the firmness of holders, and diminished receipts, but buyers do not take hold freely.

In oils, we notice a decline in crude whale, and an advance in linseed oil, with large sales of both. Other oils quiet but firm.

There has been a slight improvement in South American dry hides within the past three days, but the trade remains rather quiet, with a large stock. Leather has ceased to decline, and closes more active.

Metals have again become dull, and have pretty uniformly a downward tendency, although no important changes are made in quotations.

Tobacco has been quiet; Tallow has been active and advancing; also Stearine.

Wool has been in good demand, and the sales have been large.

There is a partial revival of freights, but at low rates. The shipments by steamer to Liverpool to-day were at 3d. per bushel for Corn, and §d. per lb. for cotton.

LATEST.—To-day's markets show a large advance in Flour and Wheat, and a considerable decline in Corn. Pork recovered the decline of yesterday, and the closing sale this afternoon was 1,000 bbls. new crop at \$29 50. Lard was higher at the close. Coffee and Teas were more active, but on private terms. Raw Sugars were active and advancing—fair to good refining 10½@10§c., with sales 1,000 hhds., and 3,500 boxes. Refined sugars were advanced §c—best crushed 15%c.

Spirits Turpentine was higher and active—selected white selling at 92½c., and Common Rosin closed at \$3 50. Late this afternoon there was a sale of 1,000 slabs Malacca Tin at 20c., gold.

The receipts of domestic produce for the week ending May 4, since Jan. 1, and for the same time in 1865, have been as follows:

London, 20th April—Baring's Circular reports as follows:

Coffee very firm at full prices. At the Dutch Trading Company's sale of \$6,000 bags Java and Padang, held at Amsterdam, prices ruled 1/2 cent lower for ood ord; blue sorts steady, but green lower; good ord quoted 44 cents.

Copper very flat-Tough cake and tile £91, best selected £94, sheathing £96, Y. M. sheathing 9d.

Corn-There has been some improvement in the market this week, and prices

Corn—There has been some improvement in the market this week, and prices of wheat show generally an advance of about 1s & qr.

Hemp—Of 1,000 bales Manila at public sale hearly the whole realized from £42 10s@£45 10s for ord to good current quality. £17@£48 for fair to good Sorsogan, and £52 15s@£53 for good Boluzan, being about 20s & ton lower. Of 170 bales Sunn about 90 bales sold at £19 for fair to good, being again easier.

JUTE—There was a fair demand at the public sales, and of 4.800 bales offered about two-thirds realized previous prices, viz. from £1615s@£25 for common to good quality. Privately during the week 5.000 bales sold from £17@£25; 4,000 bales cuttings sold privately from £65s@£610, being 5s & ton dearer Saltpetre dull—1,200 bags Bengal sold at 23s for 5 to 2½ & cent refraction. Indigo—The quantity declared for the sale of East India to commence Sth May so far amounts to 8.786 chests.

Iron—Welsh quiet; Rails and bars £6 10s f. o. b. in Wales. Scotch pigs ad-

IRON-Welsh quiet; Rails and bars £6 10s f. o. b. in Wales. Scotch pigs advanced early in the week to 80s, but have since receded to 78s cash for mixed Nos. on the Clyde.

LEAD firm-Common pig £21@ £21 10s. LINSEED—Import for the week 10,292 qrs. Prices are 6d@1s lower in all positions, and hardly any business passing. Calcutta on the spot retails at 71s for ord, and 72s for Mirzapore and Patna. Bombay is worth 72s 6d. For arrival we hear of no transactions. There are sellers of Black Sea for summer shipment at 63s. Import into London since 1st January 98,809 qrs against 153,795 last year. vear. According to last advices the quantity affort from the East Indies was as follows: Calcutta to London 13.559 qrs agai st 154.300 qrs in 1865, Calcutta to Liverpool 2.946 qrs against 13.551 qrs in 1865, Calcutta to Hull —— qrs against 35,193 qrs in 1865, Bombay to London 10.948 qrs against 13,562 qrs in 1865, and Bombay to Liverpool 5.800 qrs against 10.522 qrs in 1865.

Linseed Cakes continue in good demand without alteration in price. New York in barrels £11 5s.

York in barrels £11 5s.

York in barrels £11 5s.

NAVAL STORES—Spirits turpentine are lower, and 4Ss sellers French. Petroleum 2s 3d refined, spirits 1s 5d.

OLLS—Fish: Sperm is firmly held, and £121@125 now demanded; a sale of fine Colonial has been made at the latter price; pide Southern £50; pale seal £51@52; cod £48. Linseed has been very quiet throughout the week, and closes dull at 39s@39s 3d on the spot.

TIN—Engli-h dull; blocks 91s. bars 92s, refined 94s, straits 80s@80s 6d.

RICE—14,000 bags sold at 3d@6d decline: Rangoon 10s 3d, Bassein 10s 6d, and Necranzie 11s 3d. 2.3 0 bags Madagascar from Mauritius were bought in at 19s @22s. A cargo of 1,800 tons Rangoon sold at 10s-6d for the Continent.

RUM—170 puns Berbice sold at 1s 5½d, 50 puns Demerara at 1s 6d for good, 1s 7½d for fine, and 60 hlids Mauritius at 1s 4½d.

18 7%d for fine, and 60 hlids Mauritius at 18 4%d.

Spices—Pepper: Black: 2.500 bags Penang were bought in from 3¼d@3%d, and 200 bags Singapore white at 6%d. 500 bags Pimento were chiefly withdrawn from 2\\$d@3\d for common to good. Of 150 bbls ginger part sold from 67s @70s for ord, with mid to fine from 82s@95s. SPELTER dull at £24 5s.

SPELTER dull at £24 5s.

SUGAR—The market continues dull, and in the few sales made rather lower prices have been submitted to.

TALLOW flat. St. Petersburg Y C declined to 46s 6d on the spot and up to June, and 48s October to December.

TEA market dull, but prices are without material change. Good common Congou 1s 1½d \$\frac{1}{2}\$ fb. 15.860 pkgs tea sold at public sale this week, and by private contract 5,000 pkgs uncolored Japans have been sold at 61½ \$\frac{1}{2}\$ fb.

LIVERPOOL Provision Market, April 21.—Our own correspondent writes: The provision market during the past week has shown generally a dull and languid demand. There has been very little enquiry for bacon, and where sales were pressed a slight decline has been submitted to. The same remarks may be applied to hams. The stock of cheese has been reduced to so small a compass that quotations are nominal. There are no fine qualities of American and Canadian butter left on the market, and middling sorts are pressed off by holders at, in some cases, exceedingly low figures. No change noticeable in lard, sales being only in retail at previous prices. The demand for both beef and pork is limited to a consumptive enquiry.

COTTON.

FRIDAY, P. M., May 4.

During the week the receipts have reached about 33,000 bales, and the exports about 40,000 bales. Below we give our table of the movement of cotton at all the ports since September 1, showing at a glance the total receipts, exports, stocks, &c.:

RECEIPTS AND EXPORTS OF COTTON (BALES) SINCE SEPT. 1, AND STOCKS AT DATES MENTIONED.

^{*} By Railroad, Canal and River.

Our advices are not so favorable with regard to the coming crop. In the Southwest rain and frost are said to have destroyed the plant in many instances, while complaints of the seed there and elsewhere are frequently heard. Should it become necessary from these causes, or any other, to replant to any extent, the present low prices at Liverpool, and the five cent tax proposed by Congress, would probably have the effect of discouraging planters and leading them to substitute corn or wheat as a more profitable crop. For if, to the cost of raising cotton in olden times, the extra expense the planter is put to now, besides this five cent. tax be added, we will find there is very little margin left for profit, in case the cotton must be laid down at Liverpool at the present price, 14d.@15d. Under these circumstances does it not become our legislators to consider well whether by this increased taxation they are not killing the goose that lays the golden egg. The theory of this five cent tax rested on the supposition that the United States had a monoply of the cotton trade, and that the sources of supply would very decidedly fall off as soon as the American product could be sent to market. This supply has fallen off in two or three instances, but still the aggregate receipts this season from new sources exceeds thus far the to al for the same period of any previous year, and the result is the prices named. We thus see that the United States has not a monoply of the cotton trade, and the sooner this is understood the better it will be for the country. She may regain it, but only after the most eareful nursing. The patient is too reduced to be able to bear severe bleeding.

During the week the market has been very dull, but prices have recovered fully two cents of the decline of last week, Holders are not offering their stocks, and look with confidence for further reaction. The late heavy shipments have materially reduced stocks at all points, and the total at the principal ports of the United States does not now exceed 440,000 bales.

The sales of the past week are about 9,000 bales, and the market closes quiet at the following quotations:

| 1 | | N. Orleans | | | | |
|---|------------------|----------------------|----------|----------|--|--|

EUROPEAN COTTON MARKET.—Our own correspondent, under date of April 21, gives the following review of the Liverpool and London Cotton markets:

The Liverpool Cotton Market has been subject to numerous fluctuations dur ing the week. At the commencement the demand was decidedly active, and considerable business was transacted, at an average advance in prices of 15d to 1d per lb. With continued heavy arrivals, coupled with the announcement of the suspension of Barned's Banking Company, the trade on Wednesday and Thursday was very heavy, and the whole of the above improvement in the quotations was not only entirely lost, but holders had to submit to a further reduction. Yesterday, as compared with Friday week, the quotations showed a reduction of 1d to 2½d per lb, the heaviest fail being in Egyptian qualities. American cotton has fallen 1½d to 2d per lb. The aggregate transactions of the week are tolerably large, being 67,840 bales, viz.: 39,850 bales to the trade, 19,280 for export, and 8,710 bales on speculation. The prices current are now as under:

| | Ordinary & | Fair and Good | Go | & bo |

BOMBAY, April 14. The fortnight's shipments of cotton have been large, viz: 70,000 bales. Owing to unfavorable intelligence from Liverpool, the trade is greatly depressed, and prices are lower. Dhollerah is quoted at 14½d; Broach 14½; Oomrawuttee 14½; and Comptah 14½ per lb.

BREADSTUFFS.

FRIDAY, May 4, 1866, P. M.

The deficiency in the supply of flour continues, and for some days prices have been experiencing a moderate but steady advance, until the sales to-day show the highest figures of the current crop year. There is, however, much irregularity in the market, different helders offering the same brand 50c apart. There are very few ground extras to be had under \$9, and the better grades of spring wheat flours bring from \$10 50 to \$11 per bbl. No increase in the supply can be expected until supplies of wheat reach Black Rock and Oswego, from which flour may be made and shipped thence by canal to this market. This will be about the first of June. In the meantime, it remains to be seen what will be the effect upon this market of the anticipation of these increased supplies, and the check to the demand which extreme prices will probably impose. At the same time, it must be remembered that prices are relatively much higher throughout the West than in this market, just as we are higher than Liverpool.

Wheat has also materially advanced, and to day Amber Club was generally held at \$2 and upward, while the finer grades of white wheat were firm at \$2 75@\$3. The stock in store is pretty full for the season, but no supplies are expected till late in June. Speculative holders are consequently able to force their views upon buyers. But millers buy very sparingly. There is some wheat on the Lakes for Buff lo and Oswego; but this fact has little influence here, because it is believed that none of the earlier shipments will reach this city.

Corn has materially declined. There are large quantities on the way, and no encouragement for holders to longer attempt to support prices. The decline to-day was sufficient to permit the renewal of Liverpool shipments. Oats have been drooping. Rye active and firm. Barley dull and heavy.

The following are closing quotations:

LIVERPOOL, 21st April.—Since our last there has been a steady consumptive demand for wheat and flour at a rather improving prices. Indian corn has also been in fair request, partly on Irish account. Tuesday's market was well attended by millers, who seemed disposed to purchase wheat more freely than of late, and a fair amount of business was done at an improvement of 2d per cental. Flour also met a more ready sale, and 6d to 1s per sack dearer. Transactions in Indian corn were more numerous than extensive, and prices were rather against buyers. At to-day's market there was buy at later dance of buyers, and the trade in wheat and flour was slow at Tuesday's prices. Indian corn was in moderate request, without change in value.

THE DRY GOODS TRADE.

Same time 1865.....

FRIDAY, P. M., May 4, 1866.

30,891

Domestic Goods have been generally more animated during the week although with a strong downward tendency. The accumulating stocks and the low price for cotton make holders willing to dispose of goods at such concessions, from day to day, as the market demands. The stock of cotton in the hands of manufacturers is now small, and they are able to replace at a far lower figure. The decline is not so much like a panic as it was at one time last week, but is steadily keeping pace with the general return to lower prices. This is accelerated in some measure by the operations of certain leading jobbers, who are continually placing goods upon their floors at from two to five per cent below what it is believed they paid for them. The low price of brown goods admits of some export demand, and there has been about \$80,000 exported during the past week, principally to China.

Brown Sheetings and Shirtings are not as active as most other goods, although more so than last week. Prices have declined 5@10

per cent during the week, and standards are now quoted at 211@221, although sales are made by outside parties at 20 cents. Nashua X X is quoted at 221. Amory 37 inch 221, Indian Head A 37 inch 221, do B 30 inch 18, do E 48 inch 32½, Nashua extra A 36 inch 20. do fine C 40 inch 20, do fine D 36 inch 17, Wachusetts 22, Indian Orchard W 33 inch 18, do B B 33 inch 19, do C 37 inch 21, do N 36 inch 22, do A 40 in. 24, Atlantic heavy A 37 in. 22, do P A 37 in. 21, do A H 37 in. 21.

BLEACHED SHEETINGS and SHIRTINGS are in considerable demand there being a great many goods taken at the extreme low prices at which they are now offered. Many leading makes which have heretofore been held above the market are now reduced 5@10 per cent. New York Mills are now held at 47½. Wamsutta 42½, and Lonsdale 32½, Canoe 27 inch 111. Grafton 3-4 13, do 7-8 14, Methun 3-4 12. Aquidnecks 4-4 19, do 7-8 18, White Rock 36 inch 35, Waltham L 72 inch 70,1 do X 33 inch 42, do W 42 inch 30, do M 81 inch 95, do N 90 inch 106.

DRILLS are in some demand especially for heavy goods. Globe Steam Mills 19, Park do 18, Pepperill and Indian each 25, Boote 26, Stark Standard 24.

CORSET JEANS are quite active at still lower figures, holders pressing sales in many instances at nominal figures. Indina Orchard are quoted at 16, Andrascoggin and Bates 16, Newmarket 161, Naumkeag 21 and Satteen 27.

STRIPES and Ticks are moderately active at the decline of 5@10 per cent. Connecticut Stripes 20, do 63 21, Albany 3-3 15, do 6x3 131. Albany Ticks 13, American 20, Amoskeag A C A are quoted at 621, A 50, B 45, C 40, D 35, but these are extreme rates.

DENIMS and COTTONADES are in good request for the better makes, but there is no firmness in quotations. Wauregan 27 inch 22, Albany 17½, Amoskeag 50, Manchester 34, York 50.

Printing Cloths are dull and declining. 101 cents is offered while holders ask 111, with nothing of moment doing

PRINTS are more steady and the demand is fair. There is little change in price from last week. Garners 20, Amoskeag pink 19, do purple 18, do shirting 16, do dark 16, do light 16, do mourning 16 Swiss Ruby 15, Lowell dark 15, do light 15, Wamsutta 15, Dusters 15, Columbia full madders 141, Concord madders 15, do purples 15, Glen, Cove full madders 12½, Wauregan fancies 16½. do rubies 17½, do pinks 17½, do purples 17½, Merrimac W 20, D 19, Arnolds 15, American 17, National (Spragues) 161, do madders, green, blue and white and blue

and orage 181, canary 171, solid colors 18, mourning 16. GINGHAMS are in some demand, and as the supply is not large prices

are more steady. Lancaster 25, Glasgow 23 nett, and sold ahead.

Lawns are quiet, with little change in prices. Dunnell Manufacturing Co.'s 1,400 quality sell at 26 regular; Lodi fancy, mourning and plain solid colors, 23 nett, do 1,400 quality 25, do 1,600 do 271, and Pacific Co.'s fancy 261

JACCONETS are quiet but steady. White Rock 21 for high colors, and 19 for plain.

SILECIAS are in fair demand, and prices are about the same for small parcels. Large lots command a reduction. Social Mills 271@321.

CAMBRICS are steady, with fair demand for good makes; poorer grades are in abundance and dull. Monville 14 for black, 15 for plain, and 17 for pink.

Mouslin De Laines still sell at steady rates. Manchester, Pacific, and Hamilton 23, all wool 40, Challies 26.

BALMORAL SKIRTS are in fair demand for leading makes. Pontoosuc Spring colors \$40 per doz, Gilberts, black and white, \$36, do four X fancy \$39, and Park Mills high colors \$37.

CLOTHS are in more demand, especially for finer qualities, while poorer grades are dull, and pressed at great sacrifice. Prices are nominal. Cotton warps sell at \$1.95 for No 1, \$1.85 for No 2, and \$1.75 for No 3; 6-4 Conshohocken do \$2,25@\$2.75; 6-4 all wool black doeskins \$3.25@\$3.75; Leicester ladies' cloths \$1.65.

Cassimeres are in better request for the new makes and prices are remunerative. Millville # fancy cassimeres \$1 371@\$2, silk mixed do \$1 50, Evans, Seagrave & Co's \(\frac{1}{2} \) fancy \(\frac{1}{2} \) \(\frac{1}{2} \) \(\frac{1}{2} \), F. M. Ballou & Co's do \(\frac{1}{2} \) \(25 \) \(\frac{1}{2} \), S. & H. Sayles, do \(\frac{1}{2} \) \(25 \) \(\frac{1}{2} \) \(1 \) 50, Babcock & Moss, \$1 50@\$2, Campbell & Co's do \$1 371@\$2, Mechanicsville Co's do \$1 37½@\$2, plough, loom and anvil 50c, Dighton's silk mixtures \$1 62½ @\$2 12½, Farmer's A Union cassimeres 47½ cents, Carolina mills fancy do \$1 00@\$1 25, tan mixture \$1 62½@\$2, Peacedale fancy do \$1 25, do black and white check 85c, American mills fancy \$1 621 for 3, and \$3 50@\$4 for 6-4, East Windsor Woolen Co's \ \$1 25@\$1 75, Granville mills & fancy \$1 25.

CARPETS are without change in price while the demand is fair. Lowell Co's Ingrain sell at \$1 60 for superfine, \$1 75 for extra super, and \$2 15 for three-ply, Hartford Co's \$1 60 for medium superfine, \$1 75 for superfine, \$2 071 for Imperial three-ply and \$2 25 for extra threeply. Brussels \$2 45 for 3 fr. \$2 55 for 4 fr. and \$2 65 fo 5 fr.

LINEN is in steady request at 12@16 for Hucabuck, 21 for bleached

and 20 for unbleached.

Foreign Goods are somewhat irregular as yet, but generally more animated than last week. The stocks now in hands of importers are unusually large and operates to depress prices of both foreign and domestic, while the decline in cotton and unsettled condition of the market for domestic goods give buyers less confidence. Some leading styles of dress goods are still quite steady while other makes are dull and declining.

MANCHESTER DRY GOODS MARKET .- Our own correspondent under date of Saturday, April 7, writes;

At Manchester business in yarns and cloth has revived, in consequence of the improvement in the raw material at Liverpool. The aggregate business transacted, however, is by no means extensive; nevertheless, prices are slightly higher than at the close of last week. For yarns the demand has been limited, and it is only in certain departments that even moderate transactions are heard of. The disturbed state of German politics still excites uneasiness and apprehension among the continental buyers, and except the execution of current orders, which in general are of trifling magnitude, nothing appears to have been done for Germany, nor for the other markets of the continent. For mule yarns there has been rather more inquiry for the East, leading to some business at prices which show a decline since Friday of about 1d per lb. Water twist from 16s upwards, although steadier, is not in active request, but some fair transac. tions are reported for China in some of the better qualities at prices which in dicate a decline similar to that quoted above on mule. The lower counts of water twist, although far from being in active request, still maintain their value with comparative steadiness, and appear to have given way to a less extent than anything else. Twist and pin crops, from 60's downwards, which at the close of last week showed extreme heaviness, and were almost unsaleable, have, to some extent, recovered their steadiness; and, at about 1d. per lb. below the rates of Friday, some moderate transactions are reported. For two-fold yarns, below 100, the demand remains languid, but during the last two days they exhibit more firmness; and although, in the absence of business, prices are difficult of quotation, they appear to be slightly steadier. The finer counts of single and two-fold yarns remain tolerably firm so far as quotations go, but the demand for them is less active, and sellers looking for orders could no longer realize the prices of last week.

A very similar state of affairs prevails in the cloth market, and beyond some improvement in tone, and a sufficiency of business to afford some test of what prices really are, very little change is observable. Some transactions are reported (in all cases at very low prices) in printers, shirtings and jacconets, but in no instance have the quantities been large. For the heavier classes of goods the inquiry, although more general, is at prices so extremely low that hardly any business has resulted, and it is difficult to ascertain the actual value of domestics, T cloths, L cloths, &c.

The leading quotations are as under:

PRICES CURRENT.

WHOLESALE.

All goods deposited in public stores or bonded warehouses must be withdrawn therefrom, or the duties thereon paid within one year from the date of duties thereon paid within one year from the date of the original importation, but may be withdrawn by the owner for exportation to Foreign Countries, or may be transhipped to any port of the Pacific, or West-ern Coast of the United States, at any time before the expiration of three years from the date of the original importation, such goods on arrival at a Pacific or Western port, to be subject to the same rules and regulations as if originally imported there; any goods remaining in public store or bonded warehouse be-yond three years shall be regarded as abandoned to the Government, and sold under such regulations as the Secretary of the Treasury may prescribe. Merthe Secretary of the Treasury may prescribe. Merchandise upon which duties have been paid may remain in warehouse in custody of the officers of the enstoms at the expense and risk of the owners of said merchandise, and if exported directly from said custody to a Foreign Country within three years, shall be entitled to return duties, proper evidence of such merchandise having been landed abroad to be furnish-

merchandise having been landed abroad to be furnished to the collector by the importer, one per centum of said duties to be retained by the Government.

If addition to the duties noted below, a discriminating duty of 10 per cent. ad val. is levied on all imports under flags that have no reciprocal treaties with the United States.

On all goods, wares, and merchandise, of the growth or produce of Countries East of the Cape of Good Hope, when imported from places this side of the Cape of Good Hope, a duty of 10 por cent. ad val. is levied in addition to the duties imposed on any such articles when imported directly from the place or places of their growth or production; Raw Cotton and Raw Silk excepted. Silk excepted.

The tor in all cases to be 2,240 lb.

The Railway Monitor.

Mississippi and Missouri Railroad.—In November last the stock and bondholders of the Mississippi and Missouri Railroad Company held a meeting and appointed a committee to ratify the sale of their roads, equipments and lands to the Chicago and Rock Island Railroad Company for the sum of \$5.500,000, payable chiefly in the bonds of that company. This has now been consummated, and the bonds will be distributed among the holders of the M. & M. securities. The stock is put in at 16 per cent, land grant bonds at 70, and the 1st mortgage bonds of the eastern division at par and accrued interest. The other securities get from 32 to 70. This gives the Rock Island Company nearly half a million acres of land, besides the road, etc. at much less than the original cost.

NEW YORK RAILROAD MATTERS.—The Governor has vetced the Albany and Susquehama and Whitehall and Plattsburg bills, recently passed by the State Legislature—the first appropriating \$500,000, and the other \$450,000 from the State treasury to aid in their construction. The bill authorizing the Central Company to modify their charges passed both branches of the Legislature, but was also returned without approval by the Governor.

CEDAR VALLEY AND MINNESOTA RAILROAD.—It is reported that the Chicago and Northwestern Railroad Company have purchased this road, which extends from Cedar Rapids to the Minnesota State line, and intend to complete it forthwith. If this be correct, the Northwestern Company have acquired a property that will prove very valuable as a feeder to their Iowa line.

Chien, and the Milwaukee and St. Paul Railroad Companies have agreed to consolidate their earnings. The first puts in 235 miles of road, and shares in the proportion of 46 per cent of the earnings: the latter puts in 275 miles of road, and shares 54 per cent of the

earnings. This plan of operating the roads will be of great value to the companies, by preventing competition, and enabling them to operate at lower charges with greater profit. It is, of course, immaterial over which road the business is carried; the result will the same.

EXPRESS CONSOLIDATION.—The National Bankers' Express Company, on the 1st of May paid over to the Adams, American, and United States Express companies, three-quarters of the \$5,000,000 which the first named company obliged itself to contribute to the respective capitals of the two other companies, under the arrangement entered into on the 1st of January, by which the National Bankers' Company will be merged into the old companies. The arrangement will be completed by payment of the remaining fourth on the 1st of June.

MISSISSIPPI AND LAKE MICHIGAN SHIP CANAL.—On the 1st of May a bill was introduced into the House of Representatives by Mr. Ross, of Illinois, authorizing the construction of a ship canal, for the passage of armed and naval vessels from the Mississippi River to Lake Michigan, which was favorably received, read twice, and referred to the Committee on Roads and Canals.

NIAGARA SHIP CANAL.—the bill authorizing the construction of this canal passed the House of Representatives on the 1st of May, by a vote of 85 to 32.

Russian Railroads.—An official statement, recently published, gives the length and cost of the railroads owned by the several Russian companies, as follows:

| · · | Length. | Cost, roul | bles |
|-----------------|-----------|-------------|----------|
| COMPANIES. | versts. | Total. | Per mile |
| Great Russian | 1,617 | 169,183,920 | 104,628 |
| Riga-Dunaborg | 264 | 13,561,231 | 66,976 |
| Moscow-Rjazan | 185 | 15,000,000 | 81,081 |
| Volga-Dou f | 73 | 4,591,748 | 62,240 |
| Moscow-Jaraslof | 66 | 4,173,881 | 62,240 |
| • | - | | |
| Total | 2,005 | 206,410,780 | 102,948 |
| | • 1 | | |

The verst is about two-thirds of a mile, and the rouble about 79 cents.

PERMANENT POLICIES

METROPOLITAN

INSURANCE COMPANY,

108 AND 110 BROADWAY, NEW YORK.

CASH CAPITAL, \$1,000,000 00 1,645,984 98 Assets, Jan. 1, 1866, -

The Metropolitan Insurance Company of New York, being convinced of the great convenience and safety of the system of Deposit Insurance, so long and successfully practised in Europe, and in some of the other States of the Union, has decided to adopt the same in its own business, whenever it may be desired by the party seeking insurance.

This mode of insuring will be confined to dwelling houses exclusively,

And will be conducted on the following plan;

The assured is required, on the issuing of the policy, to deposit with the Company such sum as may be agreed on, not to exceed the aggregate of ten annual premiums, which

REMAINS AS A PERMANENT DEPOSIT

so long as the property stands and the party desires to continue the insurance. If the property be sold, it is provided that the insurance shall still hold good for sixty days longer in order to give time to make the necessary change in the policy.

Whenever the assured shall elect to terminate the insurance, or the same shall be terminated by sale as above mentioned, the assured will be entitled to receive back the whole sum deposited, less five per cent, which, with the interest, constitutes the premium reserved by the Company.

The Company reserves to itself, as heretofore, the right to cancel any risk, on due notice, in which case the whole deposit, without any deduction, will be returned to the assured. This right can be waived by the Company when parties going abroad desire to secure against change.

An example of the practical working of this system is here presented:

Mr. Smith has a house which he desires to insure for \$5,000, the annual premium on that sum \$1250, ten years' premium is \$125; this sum, deposited with the Company, makes the insurance perpetual, without further payment of any kind.

When the property is sold, or the assured desires to abondon the insurance, he applies to the Company and receives back \$118.75 of the \$125. If the Company elects to cancel he receives his whole \$125, and the bargain is at an end.

The advantages of this method of insuring, in the case of dwellings, where permanent security is especially desirable, rendering unnecessary the constant watchfulness now required, in order to prevent a policy from lapsing, at an unlucky moment, cannot fail to be perceived and appreciated here, even more than elsewhere. The immense amount of dwelling property in this city, forming, in many cases, the bulk of great estates, must find this system especially valuable for its permanency and safety.

When insurance must be renewed from year to year, the best memories may sometimes fail, and then property on which families depend for their sole support may disappear in an hour—once made, insurance by deposit need never to be remembered again, except where circumstances call for its discontinuance.

It keeps alive without watching. Insurance by this method is obviously cheaper as well as more secure. Thus, \$5,000 costs, say \$1250 per annum, on a first class dwelling; while on \$125 (the amount to be deposited) the interest at seven per cent. is but \$875. If the risk runs in this way ten years, the Company gets \$875 per annum for insuring \$5,000, and at the end \$6 25 more, being five per cent, retained when the deposit is reclaimed—making the average annual premium \$937.

We have no doubt that as fast as this simple and convenient system becomes understood, it will so fully commend itself to all insurers of dwellings that few will think of protecting them on any other plan.

Full explanations of the working of this plan, under every variety of circumstances, will be furnished on application to the Company.

This work is by far the most complete and reliable guide in credit transactions ever issued.

Commercial & Financial

CHRONICLE

Is published early every Saturday morning contain ing the latest news up to Friday night. It is

First-Exclusively devoted in its Editorial Columns to the discussion of subjects relating to the interests of Finance and Commerce, to the exclusion of politics and other general topics.

Second-Furnishes the most accurate information to the Merchant and Banker on all matters relating to their occupations—by means of thorough and well prepared reports and full statistical tables.

Third—Affords a weekly record, of convenient form to be kept on file, and bound at the end of each volume, (half-yearly) and so furnish a complete history of Commercial and Financial transactions.

To accomplish these objects THE CHRONICLE is modeled after the well known English paper "The Economist," and is essentially unlike any other paper published in this country.

CONTENTS.

THE CHRONICLE is divided into heads or departments, under which the contents of each number are arranged. They are as follows:

1st. EDITORIAL ARTICLES—prepare with great care by competent writers, upon subjects relating to Finance, Commerce, and other questions of general interest to busi-

2d. LITERATURE -- Notices of new books.

3d. FOREIGN NEWS-It is with great pleasure we are able to announce that we have secured the services of one of the editors of the leading London journal—The Economist—who will, in a weekly letter, report the foreign markets specially for THE CHRONICLE, furnishing the freshest and most reliable information with regard to commercial and financial affairs.

4th. COMMERCIAL & MISCELLANE-OUS NEWS.

5th. THE BANKERS GAZETTE-Giving a list of all Dividends Declared and Bonds lost or stolen for the week; a review of the Money Market, Stock, Gotd, and Foreign Exchange Markets for the week; Bank Statements for the week, with comparative statements for the golding of National Statements and condition of National Statements. tive statements; progress and condition of Na-tional Banks, Foreign Banking, and a Bank Stock List.

6th. A TABLE OF SALE PRICES, on each day of the week, at the New York Stock Exchange of Stocks and Securities sold.

7th. A TABLE OF NATIONAL, STATE AND CITY SECURITIES.

8th. THE COMMERCIAL TIMES-Containing an epitome of the movements of trade for the week; complete tables of the Total Receipts of Domestic Produce for the week and since Jan. 1. Also, of Exports and Imports for the week and year of all leading articles of commerce, with a comparative statement of the previous year.

A special Report on Cotton, acknowledged to be the best and most complete published in the United States.

A special Report on Breadstuffs.

A Dry Goods Report.

9th. WHOLESALE PRICES CUR" RENT, containing full quotations of the prices on Friday, of all leading articles of Commerce in the New York Market.

10th. THE RAILWAY MONITOR.

11th. A TABLE OF RAILWAY, CA-12th. A TABLE OF RAILWAY, CANAL AND MISCELLANEOUS STOCKS.

13th. THE INSURANCE AND MINING JOURNAL.

A DAILY BULLETIN

And Price Current is published every morning and served by carriers in New York, and mailed oall other subscribers.

THE BULLETIN CONTAINS,

- A list of Bonds Lost and Dividends Declared
- 2. Prices of Bonds, Stocks and Securities.
 3. Prices of Gold and Foreign Exchange.
 4. Full Price Current of the General Markets and Receipts of Domestic Produce.
- 5. Jobbers Prices of Dry Goods for the day.

THE DAILY BULLETIN

WILL BE ISSUED TO MERCHANTS IN LARGE NUMBERS, AS A PRICE CURRENT, WITH THEIR CARDS PROMI-NENTLY INSERTED AT THE HEAD.

The Mercantile Mutual

INSURANCE COMPANY. OFFICE No. 35 WALL STREET, NEW YORK.

Assets, Jan. 1st, 1866......\$1,366,699

ORGANIZED APRIL, 1844.

The Company has paid to its Customers, up to the present time, Losses amounting to over EIGHTEEN MILLIONS OF DOLLARS.

For the past nine years the cash dividends paid to Stockholders, made from ONE-THIRD of the net profits, have amounted in the aggregate to

One Hundred and Twenty-one and a half per cent.

Instead of issuing a scrip dividend to dealers, based on the principle that all classes of risks are equally profitable, this Company will hereafter make such cash abatement or discount from the current rates, when premiums are paid, as the general experience of underwriters will warrant, and the nett profits remaining at the close of the year, will be divided to the stockholders.

This Company continues to make Insurance on Marine and Inland Navigation and Transportation Risks, on the most favorable terms, including Risks on Merchandise of all kinds, Hulls, and Freight.

Policies issued making loss payable in Gold or Currency, at the Office in New York, or in Sterling, at the Office of Rathbone, Bros. & Co., in Liver-
