# The Chronicle.

THE COMMERCIAL AND FINANCIAL CHRONICLE is issued every Saturday morning by the publishers of Hunt's Merchants' Magazine, with the latest news by mail and telegraph up to midnight of Friday. A DAILY BULLETIN is issued every morning with all the Commercial and Financial news of the previous day up to the hour of publication.

TERMS OF SUBSCRIPTION-PAYABLE IN ADVANCE. 10 00 5 00 Canvassing Agents have no authority to collect money. Postage is paid by subscribers at their own post-office. It is, on the CHRONI-CLE, 20 cents per year, and on the DAILY BULLETIN \$1 20 in advance. WILLIAM B. DANA & CO, Publishers, 60 William Street, New York.

to give greater stability both at home and abroad to our national credit.

& Minanria

Moreover, it is pleasant to find that those parts of our debt have been selected for payment which threatened embarrassment to the Treasury. We refer to the short date securities, the temporary loans and the certificates of indebtedness. Both these classes of short loans were at times the cause of trouble, inasmuch as at frequent intervals the holders drew large amounts of greenbacks from the Treasury, and thus the volume of our floating currency was liable to receive a sudden increase, to the injury of business and to the disturbance of general prices.

The only other points of special interest in the statement before us, are the issue of nearly \$22,000,000 of Fivetwenties, and the calling in of \$25,500,000 of Seven-thirties. Some \$86,000,000 of these three-year Seven-thirty notes have been withdrawn since the beginning of Mr. McCulloch's negotiations in regard to them. The progress is indeed slow, but it is very satisfactory as far as it has gone; for, contrary to the predictions of many persons, the prices of Government securities have not been at all depressed, but, on the contrary, they are considerably higher now than when the purchases of the Seven-thirties were first started.

We observe that the Treasury balance now comprises \$14,000,000 less of currency than on the 1st September, together with \$14,000,000 more of coin, if we make allowance for the gold certificates, which amount to \$11,000,000 now. against \$15,000,000 the previous month. Altogether, the October statement of the debt may be regarded as, in all important respects, one of the most satisfactory that has ever proceeded from the Treasury. It is reported that Mr. McCulloch is buying up the gold bearing sixes of 1867 and 1868. We see from the report that the rumor is without foundation, except, indeed, there be some small amount which has not yet been put through the books of the Department. We are assured that just now no purchases whatever of these bonds are making on the part of the Government.

Neat Files for holding the Chronicle or Bulletin can be had at the Office. Price \$1 50.

THE OCTOBER STATEMENT OF THE PUBLIC DEBT.

The sixty millions of dollars which have been gathered into the Treasury during the past two months, on account of the income tax, seem to have been employed almost exclusively in paying off the principal of our National Debt. On the 1st August the aggregate of the debt was 2,633 millions of dollars, and the amount now is 2,573 millions, showing a reduction during the sixty days of just sixty millions, or an average of one million a day. Of course it would be puerile to expect that we shall go on paying our debt during the remaining months of the fiscal year with the same continuous rapidity; but the fact that the receipts from income tax during the first year after the close of the war have been exclusively devoted to the liquidation of the principal of the debt is extremely gratifying, and will tend |

### MONETABY TOPICS.

The Clearing House last Tuesday, at its annual meeting, did a very creditable thing in deciding by an almost unanimous vote that National Bank notes shall not be used instead of greenbacks in making the daily settlements between the Associated Banks. These settlements should be made in cash. It is demanded both by the Constitution of the Association and by the exigencies of the cases that nothing but "money" should settle these daily balances. Now

National bank notes, as has been well observed, are not money, they are only promises to pay it on demand. Once permit any bank to settle its Clearing House engagements by its "promises to pay," or by the " promises" of other banks weaker perhaps than itself, and you would introduce an element of disorganization into the financial system which must eventually prove its sure destruction. This would be the case were the value of National Bank notes protected by metropolitan redemption. But while this redemption is not provided for the proposition is absurd, and the wonder is that any one could be found outside of the circle of those that pursue private benefit instead of the benefit of the country, who would so far risk his reputation for wisdom and financial perspicacity as to propose a change so fatal, so revolutionary, so compromising to the permanence of our National banking system. Consequently, although we do not impugn the motives of the very small minority who expressed themselves in its favor, we do rejoice that there is so great a preponderance of influential opinion, and so resistless a force of intelligent determination, in favor of the principles and the practice of sound banking.

Another topic which attracts even more attention than the one we have mentioned is the prevailing ease in money. It has been anticipated that, as has been usual in former years, we should see the development this fall of considerable activity in the loan market, followed by an increase in the rate of interest, if not by some occasional spasm of temporary stringency. Whoever has carefully watched the ebb and flow of the bank loans and deposits, as indicated by the annual and weekly returns of the Clearing House, must have noticed a remarkable coincidence of movement at the fall of the year. The loans usually reach their highest expansion about the months of August or September, when the aggregate gradually sinks, till, in November or December, the decline is checked and an upward turn takes place. Another falling-off usually begins in March or April, preliminary to the uniform expansion which culminates in August. There is thus a spring tide and a neap tide in the current of bank loans, with, of course, a corresponding series of movements in the volume of the deposits. Judging from analogy, therefore, it has been anticipated that we should have an active money market, a calling-in of loans, a depletion of the deposits, and a commensurate abridgement of the power of the banks and lending institutions to give to their customers monetary accommodation.

From various circumstances, that which was thus expected has not as yet happened. The money market is still plethoric with idle capital, and disappointing to lenders, who have at times no small difficulty in finding remunerative safe employment for their surplus balances. As to how long this anomalous state of things is likely to continue, there are, as might have been expected, conflicting opinions. Without discussing these, we content ourselves with simply pointing out the exceptional, irregular character of the monetary ease which, though it now prevails, may, for aught we positively know, be suddenly disturbed. Another prominent topic of discussion is the mania for speculation which seems all at once to have seized the com-Inflation of the currency is one of the numerous muni causes of expansion of credit, and expansion of credit is the parent of prodigality, extravagance, and a thousand expensive luxuries which tempt men to fraud. It is an oft-repeated opinion that not a few of our manufacturers, merchants and professional men find their legitimate business insufficiently remunerative to bear their large private expenditures. Without moral courage to economize, to change visibly their ostentatious style of living, and to challenge the invidiuos comments of the so. ciety in which they move, they are tempted to repair to some

ized for FRASER

outside method of getting money. Disdaining the gambling table they find a less odious substitute at the Stock Exchange. The same taste for extravagant living produces like results in the less opulent parts of society, and men of all classes are found in Wall street, where rapid upward and downward movements in prices cause large fotrunes to be sometimes made or lost in a day. To this large influx of speculators in Wall street is in part due the violent speculative excitement which has prevailed during the last week. Other causes are the adroit movements of rich cliques of gambling operators But we think that the chief mischief is due, as we said, to the expansion of credit, for which the banks are in no smaldegree to blame. One aspect of this opinion is well expressed in a morning journal, as follows:

In addition to these substantial reasons for higher prices in railway securities since the collapse of the rebellion, there is now entering into them a speculation based upon an enormous accumulation of surplus funds in the banks and great money centres, which legitimate trading cannot employ. This speculation, which is just beginning to develop itself, differs essentially from that which took place in 1863 and 1864, during the rebellion. The speculation in 1863 and 1864 was based upon currency inflation, and subsided when the prices of commodities and the cost of living advanced sufficiently to absorb the redundancy of paper money issues. The present speculation is based upon bank expansion of loans, and is similar to that which took place in 1835, culminating in the high prices of 1836, when the currency was at a specie standard. The present speculation, based on bank expansion of loans, has been repressed since the peace by the popular notion that government would contract the currency, and bring it nearer to a specie standard without delay

Congress, at its last session, limited the contraction of the currency to \$10,000,000 for the first six months, and \$4,000,000 per month thereafter, or a total of \$48,000,0000 for the year 1867. According to their last weekly statement, the New York banks hold about \$96,000,000 of legal tender currency, besides \$25,000,000 of greenbacks on call in the Assistant-Treasury, represented by Clearing House certificates, making a total of \$121,000,000 of legal tender, or specie money by law, in the hands of the banks, for which they can find no employment. If Government were to take from the New York banks and destroy at once the whole \$48,000,000 authorized to be withdrawn during the whole year of 1867; the New York banks would still hold double the amount of lawful money they ever held in specie, and for which they can find no employment. The bull cliques themselves do not realize the immense power that is steadily forcing upward the prices of railway securities from the ability of the banks to expend their loans on the accumulation of surplus lawful money in their vaults. The history of the years 1835 and 1886 shows plainly that speculation based on expansion of bank loans, with a specie standard for currency, can carry prices higher than those based on inflation of the currency during the rebellion.

To the banks, then, we must look for a check to the evils of inordinate speculation which they have in part been instrumental in fostering, and it can scarcely be doubted that in presence of the dull state of business, with the resulting limitation of the field for the employment of the surplus capital, these institutions have been prompted to lend too freely and too easily to speculators in consequence of the vicious and too prevalent practice into which they have fallen of paying interest on deposits.

# PROPOSED IMPORTATION OF COOLIES INTO THE UNITED STATES.

Within a short time past, applications have been made to

two of the transportation companies of the city of New York, to ascertain the conditions on which they would undertake the conveying of laborers from the Eastern Continent to New Orleans. The passengers thus to be provided for, are coolies from Asia; and several well-known capitalists have associated together in the enterprise. It is in contemplation to employ them in the sugar and cotton plantations of Louisiana and Texas; and afterwards if the undertaking shall prove successful, to take them into other States.

At the present moment laborers constitute the first want of the South. So immense a portion of the soil is unoccupied and running to waste, that the surplus population of every country can find there room and employment. No State has an over-supply even now; while the majority of them have also a large area to be reclaimed from the native forest. In a word the crops of the South would have been double or threefold what they are this year, but for the want of laborers.

Under such circumstances, the importation of laborers very naturally engages attention.

We have, on previous occasions, repeatedly referred to this subject, and shown how extensive is the field thus thrown open to the emigrant, and how entirely dependent the future prosperity of the South is upon the right solution of this question. Nevertheless, we are compelled to remark that the introduction of another race of human beings into this country is quite a different matter, demanding the most serious consideration. We have had experience already with the aboriginal tribes and the negro population; attended by the destruction of the former, and the enslavement of the latter. And ever now, there is no fixed purpose or policy on the part of any class of our citizens as to the political status to be accorded to the freedmen. They cannot be excluded from citizenship, yet it is, and perhaps will long be an undetermined question and an occasion of strife, what boons and rights that citizenship will be understood as conferring. It would appear to us that the importation of a Turanian population would be likely to create additional perplexities, if it should not be followed by the opening of new controversies as hard to adjust as any that have perplexed us heretofore. Alien in race and diverse in social customs, and at the same time as prolific almost as the lower orders of animals, they would require all the energy and statesmanship which our Government is likely to exhibit to settle the questions which would be likely to arise.

But we are aware that these speculations are too finely spun to be regarded by our adventurous fellow-citizens. With more than two hundred millions of acres of arable land demanding laborers as well as capital for their occupation and profitable cultivation, there will be no long delay in taking measures to supply the defects. In spite of the poli tical controversies now existing in this country, all parties concur in the acknowledgement that somehow the restoration of the Southern States to normal relations with the General Government is sure to take place shortly. It is palpable that the freedmen cannot, if they would, supply the demand for labor. Emigration must therefore be relied upon to meet the exigency.

Europe will, if proper measures are adopted, contribute many millions of her best inhabitants. The new German policy, of which so many states, before sovereign, are to be absorbed by a single Government, will naturally tend to drive their populations to seek new homes. The recent Danish war had that effect; and there are other districts ready to add their quota. The Danube as well as the Rhine and Vistula would contribute settlers for the United States of a character that would speedily be welcomed to citizenship. We trust that these arteries of colonisation will be tapped

Totten, the Chief Engineer of the Panama Railroad Company, states that that the experiment of employing coolies in the construction of that road proved remarkably unfortunate. White men from Canada, and negroes from Jamaica, endured the labor, the climate, and the miasmas with little mortality or sickness; but coolies and Chinamen suffered terribly. They became despondent, and, after a little while, scores of them committed suicide to escape from the melancholy by which they were tortured. Similar results have been observed elsewhere.

Such occurrences, common humanity dictates, should be prevented. The civilization and religious sentiment of the age, have condemned the horrors of the African slave trade, and should now be equally considerate in relation to the barbarous treatment of the Turanian races. There are ways to mitigate the inconveniences and peril incident to the transportation of passengers on the coolie ships. The shameful neglect which has made so many European emigrant vessels the nurseries and hotbeds of pestilence, should not be imitated, nor should any false economy be tolerated which involves recklessness of human life. The simple beings should be sheltered carefully, and supplied with wholesome provisions as nearly as possible like the diet to which they have been accustomed. In this way the terrible mortality which has been heretofore incident to their conveyance on shipboard, would be to a great degree obviated.

Nostalgia or home-sickness is often a source of intense suffering to persons separated from their native country. In many instances it has been known to be as deadly almost as The Swiss, it is notorious, pine for their the cholera. mountains; the Greenlanders suffer agony when away from the scenes and luxuries of their Arctic home; and the coolies, having constitutionally less love and tenacity of life, become melancholy, and are seized with an irresistible propensity for suicide. Hence their separation from their homes should be accompanied by as many mitigating circumstances as possible. We are confident that this deadly homesickness, which often rages so violently among them, would be greatly alleviated if they were not separated from their families. We insist that the whole families should be taken, and not a part of them left. Let parents and children come here together, and bring the wife with the husband. The disregard of the social and domestic relations, from whatever cause, is "a wurfare against human nature" itself. Whereas, it would speedily be ascertained to be actual economy to bring away the families entire. The comfort of these simple beings would be furthered, adding to their term of life, their effectiveness and value; and, besides, the wife generally would share the labor of the husband in the field, often, as is now the case at home, outstripping him in those tasks which re-

419

and made to yield their products of colonists before resorting to the half-civilized regions of Eastern Asia.

But it may be urged that the work of transporting coolies has already begun. The British dependencies, several of them, have already resorted to this expedient to obtain laborers. In Cuba, also, they have for some time been employed. If other countries, then, adopt these measures, it cannot be long, in the event of a successful result in increasing and cheapening production, before coolies will be made in some way a part of the laboring population of the United States. We must consider the subject therefore almost, if not quite, as an accomplished fact.

This leads us to make an appeal on the score of humanity. The transportation of coolies thus far has been inhumane and cruel. The barbarities of the slave trade seem to have been emulated. Fully one-tenth of all who take passage from Asia perish before reaching their place of destination; and a large part of those that arrive die before many months. Colonel

quire dexterity rather than physical strength. The children would assist their parents, and at an early period take their places at the daily labors. Thus, the now appalling deathrates would be reduced, conserving, and, at the same time, increasing the available force. Humanity and religion will thus be subserved, as well as cupidity and enterprise. There would be fewer suicides and less crime.

It is probable that there are other advantages to be secured by the adoption of this proposed policy. The simple wants of the coolie laborers would be supplanted by the more complicated ones of our Aryan population. This would lead them to incur larger personal expenditures, thus adding to the demand for production and manufacture, and opening to us additional avenues of wealth. But these are subordinate considerations, and should only be taken into account when the other more humane conditions shall have been met.

### UNIFORM COINAGE IN WESTERN EUROPE.

A step has been taken, under the authority of the leading governments of Western Europe, the effects of which will be felt beneficially throughout financial circles.

A monetary convention has been concluded between France, Belgium, Italy, and the Swiss Republic, the first article of which constitutes those countries a union, as respects the weights, values, form, and currency of their respective coinage in gold and silver. The high contracting parties agree to coin only gold moneys of the denominations of 100 florins, 50 francs, 20 francs, 10 francs, and 5 francs, the denomination of which shall be respectively of 35, 28, 21, 19, and 17 millimetres, and the weight of each denomination identical in the several countries. The silver pieces are to be as follows : 5 francs containing 25 grammes, 2 francs, 1 franc, 50 centimes, and 20 centimes, of proportionate weight, and the diameters respectively of 37, 27, 23, 18, and 16 millimetres.

The governments obligate themselves to receive the new coinage into their treasuries, only excluding those worn or defaced. Those must be recoined. The silver coins are made legal tender between private individuals in the countries where they have been manufactured, to the extent of fifty francs in a single payment. The government making them must accept them without limit; but, in the case of coins issued in another country, is required only to accept them to the amount of one hundred francs. The Swiss franc and two franc pieces, coined under the law of 1860, are included under this provision of the treaty. The silver coinage of each country is limited to the average of six francs to every inhab. itant, and, accordingly, the convention prescribes for Belgium 32,000,000 francs, for France 239,000,000, for Italy 141,000,-000, and for Switzerland 17,000,000. The contracting gov. ernments must communicate to each other annually the total amount of their issues in gold and silver coins, their position as to the withdrawal and remelting of the old coinage, and all facts which concern the reciprocal circulation of their gold and silver moneys.

The right of acceding to this Convention is reserved to any other Government which shall accept its obligations and adopt the monetary system of the Union as it shall relate to gold and silver specie. Every Government undertakes to retire its previous coinage, and to exchange it for the new, but the amount of one hundred francs must be offered for exchange at once. The duration of this Convention is fixed till 1880. If one year prior to that time notice shall not have been given to terminate it, a further period of fifteen years shall be added, and in like manner, for additional periods of fifteen years, in the absence of such notice.

An arrangement of this character has been strongly urged

ment have become to a great degree identical; and it foreshadows a period, which is perhaps not so far distant, when similarity will be the rule with the institutions of the different countries. When countries were smaller, and the repugnance between governments and peoples was more intense, the right of coining money was regarded with a jealousy which one can hardly now understand. Even in our own country there was some reluctance in several of the States to approve that section of the Federal Constitution which invested the General Government with the exclusive right of coining money and emitting bills of credit.

But this view is no longer taken. The principle of utility transcends all other ideas, and is coming to be the regulator of the whole subject. Public men are learning that the precious metals are the measures rather than the representatives of values; and experience has verified this by the fact that in every instance of a debasement of the coinage prices of commodities rise to a correspondingly higher amount. With the acceptance of this conclusion, it is easy to take the view that the office of a government is not to fix the legal value of money, but only to authorize the coining of it in denominations which will enable it to subserve the convenience of the people. The stamp is only a verification. This being the case, there is no good reason for a distinct set of coins in every country. Every government may stamp and verify its coinage, because this will establish its credit with the citizens; but all governments may and should use the like denominations, weights and qualities.

We anticipate, therefore, that it will not be many years before the other countries of Europe, those at least that have a hope to have much commerce, will accede to the conditions of the late Monetary Convention. The States of Germany and Denmark, and Sweden, and perhaps even Russia and Austria will descry the advantages of the uniform coinage, and adopt it for their own people. The Spanish peninsular will be slower to appreciate the matter, unless some renovating agency shall take place to electrify the people with new enterprise and activity. England will be likely to be the last to accept the innovation. With its immense colonial possessions, it would do more than all Europe combined to initiate the change, if it would consent to its adoption.

It has been rightly surmised, we believe, that the United States will be prompt to join in such a movement which is so manifestly convenient, and in which so many other countries have combined. With the adoption of Mr. Kasson's bill for uniform weights and measures, the introduction of this coinage would seem to be well timed. Perhaps there should have been more endeavor to perfect the system before establishing it; but now that a mighty step has been taken, we may look to see a general falling-into line among the civilized nations, and perhaps a generation will not have passed away before the universal establishment of just weights and measures, and the adoption of the franc as the measure of value throughout the world.

by publicists for many years. The bars set up in the way of commerce by the divers weights and standards, have become formidable by reason of the prodigious increase of labor imposed upon those engaged in financial transactions, and must be intolerable before a much longer period of time. This new system will probably effect their removal. The denomination of a franc is over-small for the unit of value, but this difficulty will not be a serious impediment. The simplification of exchange transactions is an advantage which will counterbalance the matter. As a result we look for a national increase in the trade of the countries embraced in the new Monetary Union.

This treaty is a characteristic peculiarity of our time. It is the result of that progress which has long been going on to unite nations into a single commonwealth for commercial purposes. The adoption of a uniform coinage indicates that the wants of the several peoples joining in the new arrange-

ed for FRASER

### REVIEW OF THE MONTH.

The course of trade during September has been of a generally satisfactory character. The fears entertained by some, at the opening of the Fall business, that the markets would prove to be over-supplied with goods have not been realised. On the contrary, the large representation of buyers trom all sections of the country have proved to have wants fully equal to the supply of merchandise; and, with a steady, healthy demand, the course of prices has been even and satisfactory to holders. Although the Fall season is by no means closed, yet the markets are bare of many leading classes of

goods, and on some kinds of domestic manufactures prices show an upward tendency, partly induced by scarcity.

The South has required a large amount of merchandise; but it is deserving of note that the class of goods taken for that market now includes less of the fine, costly descriptions bought before the war, and also a much smaller proportion of the very common materials which in former times were required for clothing the slaves, the wealthy classes now buying less costly goods, and the negroes being able to clothe themselves with better fabrics. Southern merchants have shown some anxiety to open credits, alleging as a reason that it must be late before their people can realise upon the cotton crop; as a rule, however, our merchants have not deemed it prudent to extend credit to that section until political affairs become more settled.

Trade with the West has not been so extensive as might have been expected from the anticipation of large crops. A conservative spirit appears to pervade the trade of that section; and, as their collections have not proved very satisfactory in some districts, there is a disposition to confine credits within moderate limits. The injury to the corn crop has had a depressing effect upon the trade of Illinois and Ohio; which, however, during the last few days, has been counteracted by the reports of injury to the grain crops of Great Britain, warranting the expectation of a large demand for our cereals for export.

In some quarters, there have been symptoms of a disposition to extend credit operations; but, as a rule, our jobbers are disinclined to encourage time transactions, and it may perhaps be safely affirmed that there has been but little departure from the strictly conservative terms upon which business has been conducted since the beginning of the war. The limited amount of credit transactions, however, is perhaps attributable to the extreme abundance of currency as much as to the indisposition of traders to do business upon time.

The usual flow of currency from the East to the West for moving the crops has not made its appearance until the close of September, a period somewhat later than in former years; and, owing to the extreme abundance of money idle in the banks, the demand has not had its usual effect upon the money market, the rate remaining, through the month, steady at 4 per cent. on call. The most pointed indication of the extreme ease of the money market is in the fact that, on the Treasury notifying the banks to present \$12,500,000 of Clearing House certificates for redemption on the 25th ult., the banks allowed the currency to remain in the Sub-Treasury, free of interest, simply to retain the use of the certificates in Clearing House settlements, a plain acknow-

The price of gold has fluctuated during the month between  $147\frac{1}{5}$  and  $143\frac{1}{2}$ —a fraction above the price for the corresponding month of last year, as will appear from the following quotations for each day of the month:

		COURS	SE OF	GOLD	FOR SEPTEMBER	• • • • •		·····	•

United States securities have shown much firmness in the foreign markets. Five-twenties have sold at London as high as  $73\frac{1}{4}$ , and as low as  $71\frac{1}{2}$ , notwithstanding the very large amount received from this side. It is significant that one of the first impulses of the reaction from a great panic should be to invest largely in the bonds of the United States Government. Other American securities have also exhibited increased firmness at London. Illinois Central has ranged at  $77\frac{1}{2}$  to 80, and Erie at  $44\frac{1}{2}$  to 48. We append the daily quotations for Consols and American Securities at London for September, as reported by the cable:

COURSE OF CONSOLS AND AMERICAN SECURITIES AT LONDON-SEPTEMBER, 1866.

ledgement that they could find no use for the money.

The course of the gold market has been comparatively steady. The demand for customs has been large, but has been very nearly met by the importations from California and Europe; and speculative movements, to force up the premium, have consequently made no progress. The receipts of gold from California for the month amount to \$2,884,432. Since January 1st, we have received from that source \$30, 500,000, which exceeds the receipts for the corresponding months of any of the last seven years. It is important, however, to remember that eight millions of the receipts was The transatlantic receipts destined for the Sub-Treasury. for the month have not been officially reported, but are estimated at the unusually high figure of \$7,500,000. These importations appear to be due, on the one hand, to our having remitted to Europe during the panic in London in excess of our actual liabilities; and, on the other, to the subsequent large exportation of Five-twenties,

The causes indicated above, as having induced a return current of specie, have also produced a severe depression in the rates of foreign exchange. At the beginning of the month prime bankers' sterling 60 days' bills sold as low as 106<sup>1</sup>/<sub>4</sub>, or about 3 per cent. below the par of exchange. Subsequently, the purchase of large amounts of bills on speculation and the curtailment of the supply of cotton bills, produced a sudden advance in quotations, and at the close of the month prime 60 days' sterling bankers' bills were held at  $108\frac{1}{4}@\frac{1}{2}$ .

\*The Arizona which arrived from Aspinwall on the 1st Cctober brought \$1,137,149, of which \$1,109,537 was from California. This is properly due to the September account, and if added to the actual September receipts makes the total supply from California for that month \$3,993,969, † Estimated.

\* No report for Baturday, September 89, came to hand,

There has been no demand of importance for Five-twenties for export, the foreign market having been supplied abundantly, perhaps to excess, by the shipments of August. The price of bonds and of Treasury notes has, however, declined but a fraction from the average quotations of Augnst; the demand from domestic sources, for employing large idle balances having helped to sustain prices. The amount of transactions in Government securities, State, city and railroad bonds, at the stock boards for last month is given below; the sales at the boards, however, represent but a small portion of the aggregate operations in Governments, and are an imperfect criterion of the business really done:

### SALE OF BONDS-SEPTEMBER.

 U. S. Bonds......
 \$6,451,300
 Railroad Bonds......
 \$879,200

 U. S. Notes.....
 2,425,350
 Total Bonds and Notes...
 \$12,739,850

The course of stock speculation since the middle of the month has been steadily upward. Under the purchases of wealthy firms prices have advanced above anything realised since the wild operations of 1864.

The following statement shows the prices of leading shares at the close of the month, compared with the highest and lowest figures in 1864:

### MONETARY CONVENTION BETWEEN FRANCE, BELGIUM, ETC.

The following is a translation of the Monetary Convention recently concluded between France, Belgium, Italy, and Switzerland :

### PREAMBLE.

His Majesty the King of the Felgians, His Majesty the Emperor of the French, His Majesty the King of Italy, and the Swiss Confederation, being equally desirous of establishing a more complete harmony between their monetary legislation, to remedy the inconveniences which press upon the communications and transactions between the inhabitants of their respective States in consequence of the diverse values of their coined moneys, and to contribute, by the formation of a Monetary Union, to the progress of uniformity in weights, measures, and currency, have resolved to conclude a convention to that effect, and have named as

their Commissioners-Plenipotentiary as follows: His Majesty the King of the Belgians-M. Frederic Fortamps, Di-rector of the Bank of Belgium, &c., and M. Kreglinger; His Majesty the Emperor of the French-M. Marie Louis Felix:

Esquiron de Parieu, Vice President of the Council of State, &c., and M. K. J. Pelouze, President of the Coinage Commission ;

His Majesty the King of Italy—M. Isaac Arton, Councillor of Lega-tion at Paris, and M. V. Pratolongo; The Swiss Confederation—M. Kern, Envoy Extraordinary to Eis-Majesty the Emperor of the French, and M. Feer-Herzog;

Who, after mutually exhibiting their respective full powers in good and due form, have agreed upon the following Articles :

ART. 1. Belgium, France, Italy, and Switzerland are constituted a Union as respects the weights, values, form, and currency of their respective comage in gold and silver. No change is made at present in the legislation relating to the copper money of each of the States.

ART. 2. The high contracting parties engage not to coin, nor allow to be coined, bearing their impressions and designs, any gold moneys in any other forms than those of gold pieces of 100f, 50f, 20f, 10f, and 5f, fixed as to weights, values, allowance for loss, and diameter as follows :

Nature of Pieces. Francs.	Full weight. Grammes.	Allowance in weight at home and abroad. Thousand parts.	Standard Thousand parts.	Allowance from Standard. Thousand parts. Mi	
100 50 20 10 5	32,258.06 16,129.30 6,451.61 3,225.80 1,614.90	$\left\{\begin{array}{c}1\\2\\3\end{array}\right\}$	900	2	35 28 21 19 19 17

They shall receive without distinction into their public treasuries gold pieces coined according to the foregoing conditions in the or other of the four States, with the reservation, nevertheless, of excluding all coins whose weight shall have been reduced by wear to the extent of  $\frac{1}{2}$  per cent. below the allowances mentioned above, or where the stamped impressions shall have become effaced.

ART. 3. The contracting Governments bind themselves not to make, nor allow to be made, silver pieces of 5f, except according to the conweight, standard, allowance, and diameter fixed ditions or

Michigan Central...114 157 Michigan Southern. 57 118 115 Rock Island ..... 8514 149% 112 118% Fort Wayne..... 823/ 1523/ 108 87

The total transactions in stocks at both boards, for September, aggregate 1,427,014 shares, against 1,241,075 shares in August.

### PUBLIC DEBT OF THE UNITED STATES.

Abstract statement, as appears from the books and Treasurers' returns in the Treasury Department, on the 1st of August, the 1st of September and the 1st of October, 1866, comparatively :

### DEBT BEARING COIN INTEREST.

5 per cent. bonds 6 " of 1867 and 1868 6 " of 1881 6 " 5.20's Navy Pension Fund	283,734,100 742,829,650	18,323,592 283,734,800 773,422,800 11,750,000	18,323,592 283,738,750 798,162,250 11,750,000

¢	\$1,147,222,226	\$1,079,668,960	\$930,930,190

Full Standard. Allowance. Diameter. Full Weight. Allowance. 37 millimetres 3,000ths 900,000ths 2,000ths 25 grammes They shall mutually receive the said coined pieces into their public treasuries, with the right of excluding those which shall have lost weight by wear to a greater extent than one per cent. below the allowance above mentioned, or where the stamped impression shall have become effaced

ABT 4. The high contracting parties henceforth shall not manufacture silver pieces of 2f, 1f, 50c, and 20c, except according to the conditions of weight, standard, allowance and diameter as follows :

Descrip- tion.	Full weight.	Allowance in weight. Thousand	Full standard. Thousand	Allowance. Thousand	Diameter.
Francs.	Grammes.	parts.	parts.	parts.	Millimetres,
1 0.50 0.20	5 00 } 2.50 1.00	5 7 10	835	3	23 18 16

These pieces shall be recast by the Governments that issued them when they shall have become reduced by wear to the extent of five per cent. below the above mentioned allowance, or when their stamped impressions shall have become effaced.

ART. 5. The silver pieces of 21, of 1f., of 50c., and of 20c. manufactured otherwise than according to the various conditions specified in the foregoing article shall be withdrawn from circulation before January 1, 1869. This period is extended to January 1, 1878, in respect of pieces of 2f. and 1f. issued in Switzerland by virtue of the law of January 31, 1860,

ART.6. Silver pieces manufactured according to the condition of Article 4 shall have legal currency among private individuals in the State which has manufactured them to the extent of 50f. in a single payment. The State which has issued them shall receive them from its own countrymen without any limit of quantity.

ART. 7. The public treasuries of each of the four countries shall accept silver moneys coined by one or several of the other contracting States, in conformity with Article 4 to the extent of 100f. in each single payment to such mentioned treasuries.

The goveruments of Belgium, France, and Italy shall receive upon the same terms until January 1, 1878, the Swiss pieces of 2f. and of 1f. issued by virtue of the law of the 31st of January, 1860, and which are assimilated in all respects during the same period to pieces manufactured in accordance with the conditions of Article 4. The reservation in respect of wear mentioned in Article 4 applies in all cases.

ART. 8. Each of the contracting Governments undertakes to receive back from individuals or from the public treasuries of the other States the old coinage which it has issued, and to exchange it for an equal value in current coin (gold pieces for five-franc pieces in silver), upon conditions that the sum presented for exchange shall not be less than 100f. This obligation shall be prolonged for a period of two years from the date of the date of the expiration of the present treaty.

ART. 9. The high contracting parties shall not issue silver pieces of 2f, of 1f, of 50c, and of 20c, struck according to the conditions mentioned in Article 4 beyond the ratio of 6f in value for each inhabitant. This amount upon the basis of the last census in each State, and reckoning the presumed increase of population until the expiration of the present treaty, is fixed thus:

	c.	Francs.
For Belgi	1m	32,000,000
	20	
		4 11 000 000
For Switz	erland	17,000,000

Taken on account of the sums above mentioned, which the governments have the right to stamp of the values already issued :

By France, in virtue of the law of the 25th of May, 1864, in pieces of 50c and 20c for about 16 millions.

By Italy, in virtue of the law of the 24th of August, 1862, in pieces of 2f, of 1f, of 50c, and of 20c, for about 100 millions.

By Switzerland, in virtue of the law of the 31st of January, 1860, in pieces of 2f and 1f for 105,000f.

ABT. 10. The date of coinage shall hereafter, be stamped upon pieces of gold and silver struck in any of the four States.

ART. 11. The contracting Governments shall communicate to each other annually the total amount of their issues of gold and silver coins, their position as to the withdrawal and remelting of the old coinage : all the arrangements and all the administrative documents relating to coinages.

They shall also give to each other information of all facts which concern the reciprocal circulation of their gold and silver moneys.

ART. 12. The right of acceding to this Convention is reserved to any other State which shall accept its obligations, and which shall adopt the monetary system of the union whatever relates to gold and silver specie.

ART. 13. The execution of the mutual engagements contained in the present Convention is subject, as far as may be necessary, to the fulfilment of formalities and regulations prescribed by the Constitutional laws of those of the high contracting parties which have determined to obtain their application, and which they bind themselves to do with the least possible delay.

ART. 14. The present Convention shall remain in force until the 1st of January, 1880. If, one year prior to that date, notice to determine it shall not have been given (*denoncee*), it shall remain obligatory in full force for a fu ther period of 15 years, and, in like manner, for further periods of fifteen years in the absence of denunciation.

ART. 15. The present Convention shall be ratified, and the ratifications thereof shall be exchanged at Paris within the space of six months, or sooner if possible.

In faith of which the respective Commissioners-Plenipotentaries have signed the present Convention, and have affixed to it the seal of their arms.

Made in four parts at Paris, December 23, 1865.

limits in 1865 there were found 754,732 inhabitants. The suc cessive steps towards this development have been as follows:

1000 (State General)	10,351   1850 (U. S. Census)	192,214
1836 (State Census) 1838 (do do)		. 221,718
1840 (U. S. Ceusus)	49 1 9 1851 (do do)	320,014
1844 (State Census)	71,650   1856 (do do)	. 509,414
1846 (do do)	78,988 1859 (do do)	
1847 (do do)	116,204 1860 (U. S. Census)	
1849 (do do)	130,945   1865 (State Census)	

Here we find a population beginning at 10,000 multiply its number by nearly eight in ten years; in the next ten years the population of 1846 was multiplied by more than six and in the nine years ending with 1865 it increased thirty-three per centum. The increase from 1860 to 1865, covering a period of civil war, has been somewhat retarded, but with highly satisfactory results a<sup>8</sup> shown in the tables which follow:

### POPULATION BY COUNTIES.

Hardın	5,440	6,813	Wayne	6,409	6,327
Harrison	3,621	4,265	Webster		3,772
Henry	18,701	17,816	Winnebago	168	298
Howard	3,168	3,871	Winnesheik	13,942	15,421
Humboldt		606	Woodbury	1,119	1,295
	10		Worth		1,143
Ida		10.258	Wright		908
Iowa		19,097			
Jackson		12,095	Total, 1860	-674.913	
Jasper	15 000 -	14,772	Total, 1865		754,732
Jefferson	15,038	14,112	1 2000	-	

From the above, it appears that five counties made returns in 1860 that did not report in 1865. These are Buena Vista, Clay, Ida, O'Brien and Sioux, which together gave, in the first named year, the insignificant population of 170. Leaving these out of the reckoning, the census of 1860 gave a total for the State of \$674,743, and that of 1865 a total of 754,732, showing that in the quinquennial period there has been an increase of 79,989, or 11.85 to every hundred at its commencement.

Census Returns of the different Counties of the State of Iowa as returned in the year 1865, Gc., Gc. Printed by authority of the CENSUS BOARD (State officers). Des Moines : F. W. PAL-MER, State Printer; 1865, 8vo. pp. 167.

The census of Iowa for 1865 bas been transmitted to us by His Excellency William M. Stone, Governor of the State. Besides the population by townships the volume contains the agricultural statistics for the same year and miscellaneous returns of schools, &c. As a mark in the progress of the State it is an important document.

Iowa is one of those States which has sprung up from the West ern wilderness in a very few years. Thirty years ago, its inhabited portion was confined to the vicinity of Dubuque. In 1838, it was taken from Missouri and erected into a separate territory and in 1845 had so far advanced in population as to entitle it to admission into the Union. The first recorded census was taken in 1836, in which year there were within the limits of the territory govering the present State 10,351 inhabitants. Within the same

The third column, headed thus\*, shows the population of cities within the proper corporate limits. The two first columns give the population of the township, including the city. This arrangement has been adopted because, in the Federal census of 1860, the city population is not distinguished from that of the township, and hence, in order to compare the two censuses, the population of the whole territory occupied by township and city is necessarily given for both

years,

### It appears from this table that Iowa has now three cities of upwards of 10,000 inhabitants; three of less than 10,000, and more than 5,000; eight of less than 5,000 and more than 2,000, and thirteen of less than 2,000 and more than 1,000, and a number of cities, towns and villages of inferior population. In this enumera-tion city population alone is included. Comparing the township and city population of the principal places in 1860 and 1865, the following results are obtained :

3 " of less than 10,000 and more than 5,000 8 " of less than 5,000 and more than 2,000	$1860. \\ 30,973 \\ 14,503 \\ 19,122 \\ 17,843$	$1865. \\ 42,785 \\ 18,100 \\ 24,760 \\ 22,155 \\ 1865 \\ 22,155 \\ 186$	Inc. 11.812 3.597 5.638 4,812
Total, 26 cities, &c	81,941	107,800	25,859

-showing an increase of 31 57 per cent. for the guinguennial period. This is nearly three times the general average of the whole State. The rate of increase of the three first-class cities was 3814 per cent.; of the three second-class cities, 24.80 per cent., of the eight cities of 5,000 to 2.000, 29.52 per cent ; and of the twelve cities of 2,000 to 1.000, 27.81 per cent.

### [From our own Correspondent.]

LONDON, Saturday, Sept. 22, 1866.

Both as regards trade and finance, business in all departments has been extremely limited, and, it may be said, the week just concluded has been the quietest of the present year. Very few changes have taken place in any department, and the utmost caution seems to have been shown in effecting sales in produce or manufactures; whilst, as regards the Stock Exchange, transactions, whether of a speculative or legitimate character, have been exceedingly limited in extent. Commercially, the the position of affairs is certainly satisfactory, notwithstanding that business is so contracted.

America has bought largely of us since the close of the war, and the New York market appears to be well stocked with British goods. It is said these goods have not been sold at any considerable profit, and it may therefore be expected the import trade in British goods at New York will in future be conducted with more caution during the ensuing twelve months. On the other hand, we shall require all in the way of cotton, wheat and flour that America can send; and although cotton is not likely to command the high price current during the last few years, the value secured is certain to be remunerative.

The amount of business transacted in the Consol Market during the week is extremely limited. The prices of Consols on the days enumerated are subjoined :

Three days ending Sept. 22.	Thursday.	Friday.	Sat'day.
Consols for money	89% 14	8914	89%

The demand for American securities has fallen off. Prices have had a drooping tendency, but the fall is of no great importance. Towards the close of the week Erie Railway shares have shown rather more firmness; but as regards other descriptions business closes with a very quiet tone. In Illinois Central Railway shares very little business has been done.

The prices of American Securities for three days ending S pt. 22d are subjoined :

The minimum rate of discount at the Bank of England was reduced on the 27th to  $4\frac{1}{2}$  per centum,

The Liverpool markets have exhibited an increased activity, and prices have generally tended upwards.

Since the 22d ult. cotton has been extremely active, with large sales, and at higher rates. Beginning at 131d, the price gradually rose, un til, on the 2d inst., it had attained to 15d, at which it closed quiet on the 4th inst.

The quotations for money are now as under:

Bank minimum Open market rates: 30 to 60 days' bills	1	3 months' bills 6 & 4 months' bills 6 & 4 months' bank bills	4400 -
	1/2 0	10 ce 4 moutins bank bills	5 @53

On the Continent the principal change during the week is an advance in the rates at Hamburg, to the extent of one-half per cent. In other respects very few alterations of importance have taken pluce. Annexed are the quotations from the principal cities :

	Bank rate. % c.	Open market. % c.		rate.	Open market.
At Paris. Vienna. Berlin. Frankfort. Amsterdam	$3 \\ 5 \\ 5 \\ 5 \\ 5 \\ 4$	2@.2% 5% 11s 5	Turin. Brussels Madrid. Hamburg. St. Petersburg	. 3	₩ c. 23⁄4 4 7-10

On Tuesday, the rates of exchange were somewhat firmer; but at yesterday's market the tendency was less favorable to this country. Only £50,000 have been taken out of the bank this week for export to New York. For silver there has been a good demand, and fine bars have realized by id, per ounce,

Breadstuffs remained quiet but firm to the 24th ult., on which date Western mixed corn was at 28s. On the 25th the market became excited, and a general rise in prices was make-corn 9d, wheat 3d, and flour 2s. By the 28th Western mixed corn had reached 30s. On Tuesday, however, the market was easier, and Western mixed corn receded to 29s 6d.

The reports of the provision and produce markets are meagre. Beef has advanced. Pork continues inactive. Cheese and bacon are slightly ower, and tallow easier.

### COMMERCIAL AND MISCELLANEOUS NEWS.

IMPORTS AND EXPORTS FOR THE WEEK .- The imports are less this week both in general merchandise and in dry goods, being in the aggregate only \$4,575,966, against \$5,490,912 last week, and \$6,170,509 the previous week. The exports are \$2,042,566 this week, against \$3,-335,610 last week, and \$2,782,215 the previous week. The exports of cotton the past week were only 2,772 bales, against 6,245 bales last week. Included in the exports were 10,309 bbls. flour, 2,648 bbls. corn meal, 238,695 bushels corn, 1,000 bushels oats, 588 ics, and bbls, beef 570 bbls, pork, 1,096, 1991bs, lard, 10,082, 100lbs, chocee, 176 100lbs

butter, 52 bales hops, 4,017 bbls rosin, 221 bbls, spirits turpentine, 450 bbls. tar, 1,624 pkgs. tobacco, 83,256 lbs. tobacco.

The following are the imports at New York for week ending (for dry-goods) Sept. 28, and for the week ending (for general merchandise) Sept. 29:

FOREIGN IMPORTS AT NEW YORK FOR THE WEEK.

STATEMENT OF ASSIST	TANT-TREASURER FOR SEPTE	MBERW	e are in-

ion on the following point: Whether the laws imposing a tax on cotton and providing for its collection so restrict the executive authorities as to forbid the arranging of the cotton States into a single cotton district for the purpose of collecting the tax on cotton, having reference to the cotton tax only, and without necessarily involving any change of districts which may be most convenient for the collection of other taxes. I am clearly of opinion that such a consolidation of the cotton-growing States as is described by the terms of the foregoing inquiry, into a single collection district for the purpose of levying and collecting the duties imposed by the Internal Revenue laws upon cotton, cannot lawfully be effected under the existing provisions of those laws. The authority conferred upon the President by the act of June 30, 1864, Section 7, to alter the respective collection districts as the public interest may require, enables him only to modify from time to time, as may be required, existing arrangements of the several districts designated by him for the levying and collection of all the duties and taxes pre-scribed and imposed by the acts of Congress relating to internal revenue. By the original act of July 11, 1862, the President was empowered simply to divide respectively the States and Territories of the United States, and the District of Columbia, into convenient collection districts. Soon after the passage of this act a question arose as to the authority of the President to alter the arrangement of collection district made and established by him in pursuance of this provision of law That question was carefully considered by my predecessor, Attorney-General Bates, who gave his opinion that the President when he made the original division of the States into collection districts exhausted his

powor in the premises, this was held on the general principle that where an act of Congress establishing a general system confers on the President the authority to do a specific act for the purpose of perfecting the means by which the system shall be carried into effect. The act of the President, when performed according to the terms of the statute, have all the validity and authority of the statute itself. (U.S. Opin., Bates, A. G., p. 384.)

This view of the law | aving been adopted by the Treasury Department, Congress was applied to for additional legislation conferring the authority, which was not contained in the original act. The 7th section of the act of June 30, 1864, was accordingly enacted to remedy the particular defect which was found to exist in the statute of 1862. It is too clear to admit of doubt that "collection districts," within the meaning of the act, are those districts respectively in which the internal duties and taxes imposed by law upon all the subjects of taxation are collected in the manner and by the officers designated in the statute. The districts cannot be established or arranged with reference to the duties imposed on particular subjects. That is not the plan upon which the interzal revenue laws proceed. Such an arrangement as is proposed in the memorials which you have submitted to me should not be carried into effect with the machinery established by existing law for the collecting of internal duties. The President has no power to appoint a special collector for the tax imposed on the particular article of cotton, nor could he designate any one of the district collectors as the officer who should proceed throughout the entire cotton territory and collect the tax on that article wherever found. The mischiefs of the present system complained of by the Cham ers of Commerce of Mobile and New Orleans can only be remedied by Congress.

The act of July 13, 1866, to which reference is made by the memorialist, contains all the exceptional provisions as to the tax on cotton which Congress deemed to be necessary, and those provisions, instead of giving authority to make the additional exception now requested, seem to me wholly inconsistent with it.

I have the honor to be, &c.,

HENRY STANBEREY, Attorney General.

We call attention to the advertisement in our pages of Mr. Geo Butler, Banker and Commission Merchant in Galveston, Texas. The references of Mr. Butler are to houses of the very first standing in business.

FRIDAY, P. M., Oct. 5.

THE MONEY MARKET.-Monetary affairs still exhibit a condition of extreme ease, the banks holding large balances, which even a four per cent. rate of interest fails to tempt into employment. There has been, however, a somewhat active drain of currency toward the Western centres, to meet the wants of produce merchants. The unusual excitement in stock circles, involving the constant changing of heavy loans, and a very material advance in the prices of stocks, causing an increased amount of loans for operations, have produced a much greater activity in the loan market. Yesterday and to-day loans have not been quite so easily obtainable at four per cent., and the exceptions at five per cent. are more numerous. To day some lenders have refused to lend, with a view to strengthening the market and effecting an improvement in the rate of interest. The speculative activity in the cotton market has also produced a more active demand for loans. Under these circumstances it would seem that the extreme ease of the market is effecting its own cure, by the usual method of inducing a speculation which makes the loan market more active, and induces an advance in the rate of interest. Discounts are moderately active; but dealers in paper complain

The transactions in shares weekly since the 25th of May are shown in the following statement :

of the merely nominal supply as compared with former years. There is rather more long date paper offering, but chiefly of the commission class.

According to the statement of the Public Debt for October 1. the amount of currency in the Treasury is \$41,953,858, against \$56,297,749 on the 1st of September. This reduction of nearly \$15,000,000 is principally due to the liquidation of \$22,500,000 of Temporary Loan during the month.

The following are the quotations for loans of various classes :

Per cent.		Per cent.

UNITED STATES SECURITIES .- The demand for Governments has been more active throughout the week. The large amount of unemployed means and the low rates of interest on loans naturally induce a demand for this class of securities. Beside which, there has been, during the latter half of the week, a very brisk demand for Five-twenties of '62 on speculation. Foreign bankers have bought heavy amounts upon supposition that, after the amounts recently

exported to Europe have been distributed, there will be a renewed demand from that source at advanced prices. It is reported to be a part of the scheme of these parties to promote also an advance in gold, which would tend to force up the price of bonds. Under the demand from this source, old Five-twenties have advanced  $\frac{2}{3}$  per cent. Other bonds have sympathised with these operations. Fivetwenties of '64 and '65 bring  $\frac{4}{3}$  higher; Ten-forties,  $\frac{1}{3}$ ; and Sixes of '81,  $\frac{4}{3}$ .

The statement of the Public Debt for the 1st inst. shows an increase in the bonds of 1865 amounting to \$21,740,450; and a decrease of \$25,522,850 in Seven thirty notes; the change being attributable to the conversion of the latter into the former. The discrepancy in the amounts is probably owing to the fact that, on the 1st inst. the Treasury was holding a certain amount of Seventhirties intended for conversion until the new Five-twenties, with coupons payable July and January, were ready for delivery.

The following are the closing prices of leading securities, compared with preceding weeks:

RAILROAD AND MISCELLANEOUS STOCKS .- The past week has witnessed the culmination of the speculation for higher prices in stocks which we have for some weeks past noted as in process of preparation. The amount of transactions for the week has, perhaps, never been equalled by any corresponding period in the history of Wall street speculation. On Monday the sales aggregated 168,900 shares, and on Thursday 172,500 shares, both days being in excess of any daily transactions ever before witnessed. The total operations for the week amount to 840,876 shares, against 444,222 shares for the preceding week. Immense amounts of the leading stocks are held by wealthy cliques, who have loaned out certificates liberally to parties short, and are waiting a favorable chance for calling in the loaned stock as the means of still further forcing up prices. Yesterday a sharp decline in Erie (from 953 to 901), had the effect of somewhat demoralizing the market, and there was a general decline of 11a3 per cent. in prices. Some of the "shorts" seized the opportunity for covering their contracts; but the temporary break had the effect of drawing out a large line of new sellers' options, and has therefore placed the market in a more favorable condition for a further advance. It is useless to attempt to account for the advance in any of the stocks from reasons intrinsic to the stocks themselves; the whole movement is a game of speculation in which stock certificates are the cards and shrewd brokers the players, the parties supplying the stakes being the gullible "outside public."

The subjoined comparison of prices will afford some idea of the changes in quotations.

The amounts of some of the leading shares sold during the last six days are as follows :

Rock Island	Erie Michigan Southern Cleveland and Pittsburg	119,324 79,582 66,700	Reading Ohio and Mississippi Pittsburg, Ft. Wayne & Chic. Western Union Telegraph	31,512 30,865
-------------	--	-----------------------------	--	---------------

The following are the closing quotations of to day, compared with those of the six preceding weeks:

cent. per diem. Indications appear to point to a probability that attempts will be made to force up the premium still further previous to the 15th inst.; after which the anticipation of the November interest will be likely to depress the market.

To-day, the Saxonia, from Hamburg and Southampton, brought in specie \$4,000, £69 804, and 100,000f. On Monday, the Aspinwall steamer brought \$1,109,536 in California gold. The export of specie last week amounted to \$33,240.

The following have been the highest and lowest quotations for gold on each of the last six days:

		Highest.		Low'st	Highest

THE GOLD MARKET.—The scarcity of gold has again been indee the occasion of a speculative movement for forcing up the premium. The apparent weakness at the close of last week drew out a considerable *short* interest, which at the beginning of this week was used for forcing up the premium to  $148\frac{2}{5}$ , gold being at the same time loaned at high rates. Subsequently, the premium was allowed to decline, drawing out a new line of shorts, upon which gold has been loaned, yesterday and to-day, at rates varying from  $\frac{1}{5}$  to  $\frac{1}{5}$  per

### COMMERCIAL EPITOME.

FRIDAY NIGHT, Oct. 5.

The markets have an unsettled aspect, notwithstanding the advance in gold, which has taken place in the past two or three days. This is due, in a great measure, to the culmination of sundry speculative movements in leading staples. Confidence is not strong in the high figures that have been reached by nearly all descriptions of merchandise.

The following is a statement of the stocks of leading articles of merchandise;

Oct. 1. 42,510 86,485 5,304 Oct. 1. Sept. 1. 11,296 9,625 Beef, tierces and barrels..... Beef, tierces and parrels.... Pork, barrels. Tobacco, foreign, bales... Tobacco, domestic, hogsheads... Coffee, Rio, bags... Coffee, other, bags... Coffee, Java, mats... Sugar, hogsheads... Sugar, boxes 61,858 7,263 47,665 5,243 27,367 35,082 29,698 65,157 33,493 37,576 61,067 61,736 32,000 70,479 85,866 Sugar, hoxes. Sugar, bags. Melado, hogsheads. Molasses, hogsheads. Molasses, barrels. 60,486 74,552 26 40,485 69,975 1,799 78,698 118,571 32 16,962 9,740 265 226,300  $138,300 \\ 29,358 \\ 62,265 \\ 0.000 \\$ 155,500 Hides, No.... Petroleum, crude, barrels.... Petroleum, refined, barrels..... 17,682 38,410 18,524 Cotton, bales..... Rosin, barrels 110,000 75,000 42,003 703 41,508 86 Crude turpentine, barrels. Spirits turpentine, barrels..... Tar, barrels..... 4,732 1,814 4,948 10 471 5,800 9,600 3,413 11,211 

 Tar, barrens:

 Rice, E. I., cleaned, bags.

 Rice, E. I., uncleaned, bags.

 Gunny Cloth, bales.

 Gunny Bags, bales.

 Linseed, bags.

 5,000 13,850 12,300 10,350 none. 38,300 none. 44,700 Saltpetre, bags..... 9,805 33,187  $13,720 \\ 22,400$ 

Cotton has declined materially, and Breadstuffs slightly from the highest figures reached.

In Provisions, great irregularity has prevailed. The stock of Pork on the 1st inst. was not so large as expected, and prices advanced 50c. per bbl., a portion of which has since been lost. Speculation is now looking to the next crop, and sales of mess for January delivery, have been made at \$27 75c@\$28 per bbl.

Groceries have been irregular. Coffee has been very firm, with sales of five or six cargoes of Rio, and a fair business in other descriptions. Sugar is in large stock, and has been quiet until to-day, when sales were 2,500 hhds., 3,400 boxes, and 9,400 bags. Molasses is again in demand for distilling, and prices are more steady. Rice has been more active, and new Carolina sold at 15c.

East India goods have been rather drooping in gold quotations, but without important change.

Petroleum, in spite of the advance in gold, and good shipping demand, has been barely supported. The receipts have been large.

Wool has been firmer, in sympathy with gold. Foreign wools are less freely offered. The medium grades of fleece

Early in the week and up to Tuesday evening the market was active and excited. The continued unfavorable Southern advices, and an advance in Liverpool, added to the light receipts, served the purposes of speculators, and carried the price up to 42@13 cents for middling uplands, the sales on Tuesday amounting to over 6,000 bales. On Wednesday, with larger receipts and less general confidence in the lowest estimates from the South, there was less demand, and the sales were smaller. On Thursday buyers kept out of the market, and the price declined one cent., and to-day there was a still further decline, with so wide a margin between the views of buyers and sellers as to prevent any transactions of moment. Sales took place as low as 39 cents for middling uplands. Spinners will probably keep out of the market until speculators are compelled to unload themselves. The sales for the week are about 20,900 bales, and the market closes dull at the following nominal quotations :

				I. Orleans
Ordinary	10 31 34 38 39½	Florida. 31 34 38 40 43	Mobile. 31 35 38 41 44	& Texas 32 36 39 42 45

Exports of Cotton from New York the past week have amounted to only 2,525 bales as follows:

To Liverpool per steamers: England, 1,271; City of London, 260; Pal-	2,290
To Liverpool per steamers: England, 1,271; City of London, 200; 147 myra, 757. Total bales To Havre per steamer: Fulton, 15. Per Barque: St.Vincent de Paul, 129. Total bales	144
To Barcel na per ship: Etna, 16, Total bales. To Hamburg per steamer: Boussia, 75. Total bales	10
To Hamburg per steamer: Dolussia, io. Total Salos	1

Below we give our table showing the exports of Cotton from New York, and their direction for each of the last four weeks; also the total exports and direction since September 1, 1866; and in the last column the total for the same period of the previous year:

### COTTON.

### FRIDAY, Oct. 5, P. M.

The receipts the past week show a further increase, having reached 9,950 bales, against 7691 bales the previous week, making the total receipts at all the ports since September 1st 27,423 bales. The exports for this week from all the ports only amount to 2,905 bales, the foreign movement being checked by the unfavorable crop reports, and the consequent rise in prices on this side without a corresponding movement at Liverpool. Of the exports for the week 2,438 bales were to Liverpool, 144 bales to Havre, 75 bales to Hamburg, 232 bales to Gibraltar, and 16 bales to Barcelona, as follows:

The total exports of Cotton from these three cities during the past week was: From Boston, 128 bales per steamship Cuba to Liverpool; 232 bales per barque Mary Edson to Gibraltar. Total from Boston, bales 360. From Philadelphia, 20 bales per steamship Bosphorous to Liverpool.

THE GROWING CROP. -We have endeavored from week to week to keep our readers informed with regard to the con dition and prospects of the coming crop. A few weeks since we also furnished an estimate (the result of a careful enquiry) of the probable product, with fair fall weather, of each State. At about that time the South, after a long drought was visited with a warm rain continuing with little intermission up to almost the present time, and the worm which the condition of the atmosphere helped to multiply, began its work of de. struction. These agencies have undoubtedly served to cut short the yield of several of the States, and the estimate we gave, must therefore be modified. No reliable statement can, of course, as yet be given, as to the extent of the damage done. The tendency is certainly in all such cases to overstate it, and still there can be no doubt but that the crop has been materially injured. One correspondent writing to us with regard to Texas, says:

Although we do not endorse these figures, still they serve to indicate the most favorable views prevalent at this moment in that section of the country. At present we have reports of very favorable weather again all over the South, and if this continues, and the frosts are late, some of the injury done

New Orleans, leaving the stock on hand and on shipboard, not cleared, of 23,155 bales. The following are the weekly receipts, sales, and exports, for a series of weeks, and the stock, price of middling, rates of freight to Liverpool and New York, and price of gold at the close of each week:

### BREADSTUFFS.

### FRIDAY, P. M., Oct. 5.

There is a general subsidence of the speculation, which the advance in gold to day has not been sufficient to revive. There is a dispositionapparent to realize the late advance, so that, even in corn and oats, of which very light receipts are expected for the next fortnight, the demand is very freely met. In flour the supplies are still but little in excess of the wants of the market : but a considerable increase is promised at an early day. Receivers have taken advantage of the strong feeling prevailing in this market to sell for future delivery, and we hear of regular shipping extra State being placed at \$10 50 for all November, and \$11 for the last half of October. The prices for gurrent delivery are 25@50c, lower than last week the decline being most decided in the medium grades.

[October 6, 1866.

In wheat there has been very little change, but on the whole, prices have not been well supported. The arrivals have been more liberal in the last day or two, but having been mostly sold previously, very little has come upon the market; and the demand being reduced by the same cause, the close is nearly nominal.

Corn has been very irregular. Last Tuesday shippers for Great Britain took about 150,000 bushels mixed Western at  $95\frac{1}{2}@96c$ . Since then the business has been dull, and prices lower and drooping. Shippers have done little or nothing, owing to the non-arrival of the Persia with later mail dates. The movement in corn at Western markets, and towards tidewater, has been greatly reduced, and a material reduction in the current supply may be expected for the balance of the coming month; but the receipts may again be largely increased, though not sufficient to justify expectations of so large a stock as we had last year at the close of navigation.

EASTWARD MOVEMENT BY						

### THE DRY GOODS TRADE.

FRIDAY, Oct. 5, 1866, P. M.

1

The Dry Goods Trade has been very much excited during the entire week, on account of the heavy advance in cotton here and in Liverpool, and the reports of a very much lighter crop than was expected. The leading makes of goods are sold closely up to production, and necessarily sympathise with the price of cotton. An advance of from three to seven per cent. has therefore been rendered necessary. This has materially checked trade for the last day or two, especially as the market for cotton has become dull and less active. Almost all makes of goods which were desirable were taken early in the week, while less desirable goods have continued more steady in price, and there is a fair trade doing.

BROWN SHEETINGS AND SHIRTINGS have chiefly felt the advance in cotton, and the prices of these goods have been advanced some 5@7 per cent from last week's quotations, and are now very scarce, and only sold at value. The best sales of standard makes were at  $23@23\frac{1}{2}$ , and are now held in very small lots at 24 cents. Indian Head A were last sold at  $25\frac{1}{2}$  cents, Indian Head B are held at 19, do E 34, Nashua XX 23, do fine D 21, Waltham F 28, Wachusetts 4-4 23, Atlantic A 24, do P A, A H and P H  $23\frac{1}{2}$ , do A V heavy shirtings 19, do fine shirting 23, Massachusetts A 20, do B  $22\frac{1}{2}$ , Medford  $22\frac{1}{2}$ , Newmarket Mf. Co 36-inch  $22\frac{1}{2}$ , do heavy do 24, Appleton A  $23\frac{1}{2}$ .

BLEACHED SHEETINGS AND SHIRTINGS have met with less change, and prices are quite uniform. The demand has been good, and leading makes are sold closely up. Lonsdale is sold at 34c, Rockdales are active at 31 cents. York Mills are sold up at 45, Wamsutta 40, Washington 7.8, Hallowell  $\frac{3}{4}$ , 14, Caupe 27 inch 13 Grafton  $\frac{3}{4}$ . 14, do 7-8, 15, Auburnville 4.4 27½, Aquidnecks 4-4 21. do 7-8 19½, White Rock 36 inch 33, O J Rathbun 7.8 19, Social Mill Co., N. Y. 4-4, 21, 30, do C 7-8 18, Manville R 24, do XX 4-4, 26, Boston 18 inch, Kent River 3-4 12, Rockdale B 4-4, 31, Gold Medal 4-4, 26, Harvard 35 inch 22, Montemaire, 7-8, 21, Uxbridge imperial 4.4 27½, Waltham L 72 inch 62½, do X 33 inch 23, do W 42 inch 30, do M 81 inch 77½, do N 90 inch 85, Bartlett Steam Mills 33 inch 24, do 7-8 22½, do 4-4,  $30\frac{1}{2}$ , Newmarket 33 inch 22, do 36 inch 25.

DRILLS are quite steady and for some leading heavy makes prices are firm. Massachusetts fine sell at 20 cents, do heavy 25, Indian Drills 25.

CANTON FLANNELS are still dull and notwithstanding the season there seems to be little disposition to operate in these goods. Prices are not very firm. Globe A A sell at 27, Columbia 26, Mount Vernon  $25\frac{1}{2}$ , Nashua A  $27\frac{1}{2}$ , Young America 24, Clay 22, Excelsior 22, Eagle 22.

COBSET JEANS are fairly active and where no advance is asked goods are readily taken. Indian Orchard sell at 16 cents, Canoe River 15, Hallowell 15, Uncas 15, Newmarket colored 17, and Silver Lake brown 20.

STRIPES AND CHECKS are only moderately active. Some holders have attempted to advance prices which checks business. Hamilton Stripes sell at 31 cents, Willow Brook Checks 221, Wauregan 3x3 23, do 6x3 24, Albany 3x3 13, do 6x3 14, Louisiana plaids 221, Ringgold fast plaids 201, Simpson's Chambrays 22, Philadelphia 16.

Ticks are less active than last week. There is no advance in prices but the present demand seems to have been supplied. Willow Brook Ticks 47<sup>1</sup>/<sub>2</sub>, Farmer's and Miners 52<sup>1</sup>/<sub>2</sub>, Albany 13<sup>1</sup>/<sub>2</sub>. American 20, Glen Allen 3 4 13, Chattanooga <sup>2</sup>/<sub>4</sub> 16, Concord 4-4 22, Pacific Extra <sup>7</sup>/<sub>8</sub> 30, Paific 4-4 40c, Willow Grove 30 Sacondale <sup>3</sup>/<sub>4</sub> 13, West, Branch 4-4 32<sup>1</sup>/<sub>3</sub>, do No. 2 <sup>7</sup>/<sub>8</sub> 25, Windsor <sup>7</sup>/<sub>8</sub> 21, Henry Clay 3-4 19, Suwanee 4-4 23.

DENIMS AND COTTONADES are moderately active for denims, but rather dull for cottonades. Some goods have been advanced, thus checking trade. Ashton Glenn brown Denims sell at 20 cents, do blue 21 Homestead brown 21, do blue 22, Peabody blue  $17\frac{1}{2}$ , Woodland 16, Burlington  $14\frac{1}{2}$ , Madison brown 19, Providence blue 19, Charter Oak 31, Albury  $17\frac{1}{2}$ , and Wautegan 22, Yantie 21, Arlington 25.

PRINT CLOTHS are active, and prices have advanced from  $13\frac{1}{2}@13\frac{3}{2}$ last week to  $14\frac{3}{4}@15c$  for 64x64 square cloth.

PRINTS are in lively demand, but the scarcity of leading makes has materially interfered with business during the week. But a few cases are arriving daily, and these are quickly taken at  $\frac{1}{2}$  (advance from last week. Arnolds were last sold at 171c. Merrimac W 22, D 20, Garner's 22, Amoskeag pink 21, do purple 20, do shirting 19, do dark 19, Swiss ruby 20, Dutchess B 17, Lowell dark 18, do light 18, Naumkeag 161, York Mourning 171, Spring Valley 131, Wamsutta dark 16, light 16, Dusters 16, Hamilton purple 20, do Chocolates 19, Sprague's fancy styles 261, Double purples 261, Shirtings 261, Solid colors 19, Canaries 19, do Chintz 19, Orange polkas 20, Indigo black and green 20, do green and yellow 21, do blue, green and yellow 20, Madder rubies 19, Shirting 214, pink frocks 21, Purple do 20, Staple style light colors 194, do dark colors 20, German plaids 194, Fancy style light colors 194. Columbia, full madders 164, Concord madders 17, do purples 18, do pinks 18, do plain shades 18, Glen Cove full madders 131, Wauregan fancies 18, do rubies 19, do pinks 19, do purples 19.

JACCONETS are unchanged. The demand is moderate. White Rcck, high colors 20, do plain 21.

GINGHAMS are inactive, although no advance has been made. Glasgow sell at 26, Roanoke 19, and Lancaster 27.

SILESIAS are only in moderate demand, and prices remain the same.

CAMBRICS are steady. Saratoga  $10\frac{1}{2}$ , Milton Mills  $12\frac{1}{2}$ , Hallowell  $14\frac{1}{2}$ , Pacific 14, and Adriatic 14.

MOUSLIN DE LAINES are sold close up to production, and prices are rather firmer. Pacific and Manchester are sold at 28, Pacific armuers

or FRASER er.stlouisfed.o

# THE CHRONICLE.

30, do Robes de Chambre 821@35, Pacific and Manchester all Wool

LINSEYS are active and some makes are sold ahead. Prices are steady. 42]. MinersFlannels 45, Stillman & Co's 351, C. S & Co's 32, Black Hawk 321, Saco 40, S. C. Carr & Co's 80, Saxony Mills, all wool, 401, Wool Filling, 32, Laurel Dale, 311, White Rock 321.

CLOTHS are in very is regular demand. The leading styles of seasonable goods are in request, but less desirable grades are dull and nominal.

CASSIMERS AND SATINETS are in some request for particular makes, but generally the market is dull and prices nominal.

FLANNELS move very freely and prices are more steady. White Standard Flanels sell at 85 for No. 3 and 771 for No. 4. Plain Scarlet and Orange range from 371 to 65 cents.

SHAWLS have been in good demand, and some advance has been made for leading styles.

BALMOBAL SKIETS are dull, and with the lateness of the season prices are lower.

HOOP SKIRTS are sold as fast as produced, especially for leading makes, at steady prices.

AMERICAN LINEN is steady at former prices. Crash bleached 15c, do unbleached 16c, Huckabuck bleached 20c, do unbleached 21c.

FOREIGN GOODS have been uniformly steady in demand and prices. The leading styles of dress goods, Scotch plaids, and goods for seasonable wear are fairly active.

WOOLEN GOODS are less active, and prices are only maintained for the more desirable styles of cloakings, coatings, &c. Lace goods, velvets and trimmings are in request and good prices are paid.

MANCHESTER COTTON YARN AND COTTON GOODS' MARKET, LONDON

WOOL SALES, ETC .- Respecting these markets, our own correspondent in London, writes as follows:

MANCHESTER SEPT. 19 .- The result of this week's business has rather created disappointment. As the Liverpool Cotton Market has exhibited considerable animation, whilst prices have improved, it was anticipated that more favorable terms would have been obtained for Yarns and Cloth. The quotations, indeed, are somewhat higher than at the close of last week; but it was perceived that, had manufacturers persisted in demanding any considerable advance, very little business would have been transacted. Yarns are considered 1d @ld. per lb. dearer, but the aggregate transactions are on a very moderate scale. Cloth may be considered the turn dearer; and at last week's prices, in some instances, a slight advance, the dealings have been rather numerous.

LONDON WOOL SALES .- These sales are now approaching their termination. Up to the present time, about 122,000 bales have been disposed of, and the biddings have been somewhat spirited. The advance in the value of good and fine Wools averages 1d. per lb. Recently, German buyers have operated more freely, and a fair business has been

THE CHRONICLE.

# The Railway Monitor.

OGDENSBURG AND LAKE CHAMPLAIN RAILROAD.—The holders of the first mortgage bonds of the Northern (now O. & L. C.) Railroad Company have the offer to exchange \$500,000 into 5,000 shares of 8 per cent guaranteed preferred Stock free from U. S. tax, to be exchanged at par without interest. Already \$356,400 have been so exchanged on which the first semi-annual dividend of 4 per cent is payable this current month. It is intended thus to absorb the whole amount of the funded debt of \$1,500,000. The second mortgage \$3,077,000 has already been converted into common stock.

IRON MOUNTAIN RAILROAD — The sale of the Iron Mountain Railroad took place the 27th ult. D. W. Swager, Esq; one of the present directors of the road made the first bid. offering \$2,000,000. Mr. R. A. Watts followed for the State, doubling Mr. D. S., and offering \$4.000,000. No other bids appearing, the contest was continued between Dwyer and Watts, the bids going up by \$10,000 an offer, until the road was knocked down to Mr. T. A. Watts, representing the State of Missouri, for the sum of \$1.700,000.

OHIO AND MISSISSIPPI RAILROAD.—The sale of the O. & M.RR has been postponed and the transferred books will not be closed until the 16th inst. A special meeting of the certificate holders will be held at the office of the trustees on the 1st prox., to consider on a plan of reorganization. The agreement under which the trust was formed requires the presence and voting of three fourths of the certificates to act on the question.

HUDSON RIVER RAILROAD.—The Hudson River Railroad Company, says the *Tribune*, have put upon their track, south of Manhattanville, several thousand tons of steel rails. The bed has been relaid and five ties put in where four were taken up. The new rail is laid with long chairs extending from tie to tie and instead of the rails being pounded by ever-passing wheels, a smooth

surface is presented, which reduces the motion of the cars and the wear and tear of the rolling stock to a degree which will tell largely on the cost of repairs. These same steel rails are already in extensive use on the great lines of England and will eventually, from their ultimate cheapness, be adopted on the leading lines of this country to the exclusion of iron rails.

WESTERN PACIFIC RAILROAD.—Twenty miles of the Western Pacific railroad extending from San Jose to Vallejos canon were completed on the 2d inst.

SOUTHERN ITEMS.—The Gulf Railroad in Florida is being pushed forward. Thirty-one and a half miles of iron have already been laid. As the whole distance from the Gulf road to Live Oak on the Pensacola and Georgia road is but 47 miles, there remain but  $15\frac{1}{2}$  miles to be laid to complete the connection between the Florida system of roads and those of Georgia. If the iron arrives in time (every rail of which, it is said, has been purchased) the work will be finished early in October.

Trains have commenced running on the Alexandria, Loudon of Hampshire Railroad to Belmont Station, five miles from Leesburg.

Work on the Manassas Gap Railroad is progressing favorably, and it is confidently expected that the rails will be re-laid and the cars again running as far as Piedmont by November or December next.

The surveys are completed for the proposed railroad from Baltimore to Aquia Creek, there to connect with the railroad to Richmond and the South. The shortest time between Baltimore and Richmond is now eleven hours. By this project, the time will be reduced to five hours—a sufficient gain to warrant the enterprise.

The Charleston and Savannah Railroad is to be sold at auction, under the direction of Trustees, at Charleston, S. C., on the 20th of November, 1866.

The railroad bridge over the Chattahoochee, at Columbus, Ga., is finished, completing the connection between the Georgia and Alabama systems of railroads.

BANK NOTES

D

### SOUTHERN FIRST MORTGAGE BONDS

OF THE

# CENTRAL PACIFIC RAILROAD CO.

### OF CALIFORNIA.

Interest at the rate of Six per Cent. per annum, payable Semi-Annually, on the First days of January and July.

Principal and Interest payable in U.S. Gold Coin in the City of New York.

Amount of Issue, \$7,336,000. In Coupon Bonds of \$1,000 each.

The Bonds have Thirty Years to run, and are secured by a First Mortgage, constituting an absolute prior lien on that portion of the Road, Equipments, Franchises, and Entire Property of the Central Pacific Railroad Company, located in the State of California, and extending from Sacramento City to the California State Line, forming a part of the GREAT PACIFIC **RAILROAD ROUTE**, adopted and aided by the UNITED STATES GOVERN-MENT.

The amount of these First Mortgage Bonds to be issued per mile, is limited by law to the amount of United States Bonds allowed and issued to aid the construction of the Road, and the Mortgage by which they are secured is declared by Act of Congress to constitute a lien prior and superior to that of the United States Goverement.

The aid received from the Government (in amount equal to this First Mortgage) is economically and judiciously applied to the construction and equipment of the road, together with nearly \$7,000,000, received from Stock Subscriptions and other sources. The First Mortgage therefore amounts to but about 35 per cent. of the actual cost and value of the Property which it covers.

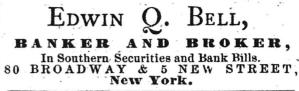

The road is now completed, equipped and running from Sacramento City to Alta, a distance of 73 miles, and the earnings for the three months ending August 1st, were as follows, viz.:

July	66	IN GOLD.	85,000	00
June	\$6		67,429	78
May.	186	6	\$65,115	83

The earnings are steadily increasing, and are estimated at over \$100,000 in gold for the month of August-the official report for that month not having been received at this date.

The construction of the road is going vigorously forward—24 miles additional being nearly ready for the cars-and it will probably be in full operation to the California State Line-156 miles from Sacramento City-during the summer of 1867, when its earnings must be very large, as the entire trade of Nevada, and a large proportion of that of Utzh, Idaho, and Montana must pass over its line. It has been shown by reliable statistics that in 1863 over \$13,000,000 in Gold was paid for freighting goods from California to Nevada alone.

This part of the Great Pacific Railroad Route is destined to be one of the most profitable lines of railroad in the world, and its First Mortgage Bonds are among the best secured and most desirable investments ever offered.

# STATE OF GEORGIA 20 YEARS 7 PER CENT. COUPON BONDS.

SECURED BY MORTGAGE OF THE WESTERN AND ATLANTIC RAILROAD.

The undersigned, Agent of the State of Georgia, offers for sale a limited amount of the above named Bonds, having twenty years to run; coupons pay-able in this city January 1st and July 1st in each year. These Bonds are issued in sums of one thou-sand dollars, with interest at the rate of seven per cent. per annum

cent. per annum. The State of Georgla, besides pledging its faith for the redemption of these Bonds and payment of the interest, has executed to three Trustees. George B. Carhart and Robert H. Lowry, of the city of New York, and Jeremiah Beall, of the city of Milledge-ville. State of Georgia, a first and only mortgage upon the Western and Atlantic Railroad as a Corporation. On failure of the State to r deem said Bonds at ma-turity, or in case default shall be made in the pay-ment of any half year's interest on any of the afore-said Bonds, and such default shall continue for the period of six months after the said coupons shall beperiod of six months after the said coupons shall be-come due and payable, then and thereupon the prin-cipal of all the Bonds secured thereby shall become

cipal of all the Bonds secured thereby shall become immediately due and payable, and the said Trustees may proceed to foreclose and enforce said mortgage lien at the request of the holders of said Bonds. The Western and Atlantic Railroad is 137 miles long, running from Atlanta, Ga., to Chattanooga, Tenn., making close connections with other rail-roads to the Southern Atlantic cities, the Northern and Eastern cities, Gulf of Mexico, Mississippi and Ohio Rivers, thus rendering it an exceedingly val-nable and productive property. For many and im-portant reasons these bonds commend themselves to investors and capitalists as a certain and reliable security. security.

Circulars containing full particulars will be furnish-ed, and inquiries will be answered at the National Bank of the Republic, in this city, by T. W. CHICHESTER,

Agent of the State of Georgia. NEW YORK, August 31, 1866.

THE STATE OF GEORGIA proposed to fund its past due bonded debt on the following basis, viz.: It will exchange its new Seven per cent Bonds, dated July 1st, 1866, for its matured Bonds and Coupon, interest on the new bonds from that date accruing to holders of Bonds and Coupons so funded. Due notice will be given of time and place of exchange. JOHN JONES,

Treasurer of the State of Georgia. New York, Aug. 31, 1869.

City of Keokuk New 8

Over \$1,000,000 has already been expended in grading beyond the point to which the road is now running, and the iron is bought and paid for sufficient to lay the track the entire distance to the State line.

The Road has been completed and equipped thus far without the sale of a single dollar of its First Mortgage Bonds, and they are now offered to the public for the first time, after the earnings of the Road have reached the sum of \$100,000 per month in Gold, only about twenty-five per cent. of which is required for operating expenses.

The Bonds are offered at 95 per cent. and accrued interest from July 1st, in Currency. Orders may be forwarded to us direct, or through the principal Banks and Bankers in all parts of the country.

Remittances may be made in drafts on New York, or in Legal Tender Notes, National Bank Notes, or other funds current in this city, and the Bonds will be forwarded to any address by Express, free of charge. Inquiries for further particulars, by mail or otherwise, will receive punctual attention.

FISK & HATCH, Bankers,
