WE OFFER FOR SALE

A LIMITED AMOUNT OF

City of Louisville, 7 Per Cent Ronds

HAVING TWENTY YEARS TO RUN, interest pay-able Semi-annually, on the first day of April and October, at the

BANK OF AMERICA, in this City,

A Special Tax has been levied to meet the interest upon these Bonds, and the Sinking Fund for retiring the indebtedn ss of the City amounts to about two hundred thousand dollars per annum. The compara-tively smill debt, and the conservative policy which has always marked the management of the finances of the flourishing City of Louisville, make these Bonds one of the safest and most desirable invest-ment securities now offered in the market. Any fur-ther particulars can be had on application at our office. office

WILLIAM ALEXANDER SMITH & CO., 40 WALL STREET.

No Loss can occur at its Vaults.

The Public (including Ladies), are invited to call and examine its system.

FRANCIS W, JENKS,

PRESIDENT.

The Hope Fire Insurance COMPANY, OFFICE NO. 92 BROADWAY.

The advantages offered by this Company are fully EQUAL TO any now offered by other reliable companies, comprising a liberal commission to brokers. placing entire lines of insurance, with its customary rebate, to assured and prompt settlement of losses.

The Chronicle.

THE COMMERCIAL AND FINANCIAL CHRONICLE is issued every Satur day morning by the publishers of Hunt's Merchants' Magazine, with the latest news up to midnight of Friday.

TERMS OF SUBSCRIPTION—PAYABLE IN ADVANCE.

WILLIAM B. DANA, JOHN G. FLOYD, JR.	WILLIAM B. DANA & CO., Publishers.
For One Year For Six Months	\$10 00 6 00 ill be sent to subscribers until ordered discontinued by letter. year, and is paid by the subscriber at his own post-office.
to city subscribe	LAND FINANCIAL CHRONICLE, delivered by carrier ors, and mailed to all others, (exclusive of postage,)

Remittances should invariably be made by drafts or Pos, Office Money Orders.

REDEMPTION OF BANK NOTES.

We have often had occasion to defend the National Banking system against the attacks of persons who exaggerated its defects, and overlooked the vast benefits which it has conferred, or is capable of conferring in the financial, industrial and commercial progress of the country. In pleading the cause of the banks, however, we should carefully remember that the system is by no means perfect, and that much remains to be done for its improvement. Of this, we have lately had a striking proof in the spasms which have invaded the money market, and in the exorbitant rates of interest which have been paid in Wall street. That these troubles are caused, in part, by movements over which the banks can exert little direct control, we freely admit. But still, neither the manoeuvers of speculators, the locking up of greenbacks, the absorption of currency in the South, the over-rapid conversion of floating capital into fixed capital, nor the hoarding of money in the Government vaults, would have produced so profound and convulsive a stringency had the banks kept themselves strong, and had our currency been elastic and responsive to the wants of business. It is very enables the bank to borrow money without interest. While evident that the monetary troubles of the past three months human nature is as it is, every bank will put out and will have been due to defects in our financial machinery rather keep out all the currency it can. And the only way to make

than to any lack of capital. Which ever way we look proofs multiply on every side that our people are growing in wealth and in all the chief conditions of material prosperity. What is wanting, however, is a corresponding elasticity in the financial machinery of the country. Speculators and cliques of capitalists dam up the fertilizing streams of the national wealth and prevent their flowing equally and freely and gently over the whole field of the national industry. We are suffering not because we cannot produce wealth but because our machinery for distributing that wealth is out of order, inelastic, and not sufficiently responsive to the changing pressure upon it and to the varied demands of different seasons of the year.

These facts all point to the currency of the banks as the weakest part of the National system. When the cliques would make trouble in the loan market they always attack the currency and their ingenious devices for locking up currency, and so depleting the current of the active circulation have been often exposed. Why have no such plans ever been set in operation in Paris or in London? The speculators there are as keen, as bold and as shrewd, and wield larger masses of capital. Why do they never resort to the expedient of locking up currency. The reason is obvious. The currency of France and of Great Britain is elastic, and enlarges or contracts with the seasons with the activity of business and with the greater or less demand for money. Our currency, on the contrary, remains rigidly fixed in amount all the year round. It consists first of some four hundred millions of greenbacks and fractional currency, the amount of which was not intended to fluctuate, and secondly of national bank notes, the outstanding amount of which ought to vary from two hundred millions as the minimum, to three hundred millions as the extreme amount authorized by law. The issue of currency is so profitable to the banks that they try to keep afloat all the law allows. If the notes of a bank come back to it they are immediately reissued, and as there is no effective arrangement for redeeming the bank notes, the whole three hundred millions are kept constantly afloat, winter and summer, spring and fall, whether the amount is in excess of the requirements of the country or not. In no other banking system ever established in Europe or in this country, have private corporations been invested with so much power over the volume of the currency. To say that they should not abuse this power, is nothing to the purpose. The banks are 1,600 independent institutions, spread over the various States, and anxious each to make large profits for its shareholders. The issue of currency is one of the most lucrative parts of the banking business, as it

sure that the volume of bank notes shall increase when they are needed for business and shall diminish when the want has passed away, is to make it impossible for the banks to keep out their notes in excess. This is easily to be done. Banking experience has supplied an effective safeguard. It is the safeguard of metropolitan redemption. Let the banks be compelled to redeem their notes at the metropolis, where in time of plethora the notes are sure to accumulate, and we have the best remedy for inelasticity of the currency, which the nature of the case seems to admit.

An unreasonable opposition has been aroused among some of the banks, against any more effective means of redemption than one in use at present. We trust, however, this will pass away. The existing arrangements for redemption are notoriously imperfect and unsatisfactory. This circumstance offers a powerful weapon to the enemies of the banking system, which they are not slow to use. In Congress a large power is known to be arrayed against the banks. Surely it is the part of wisdom for these institutions to correct every abuse, and to strengthen and reform themselves as much as possible. The banks must show to the country that they are not a set of speculative institutions, intent on money-making and greedy of gain, but that they are depositories and trustees of important powers over the currency of the country, and that they do not receive the rich endowments of that trust without doing their best to fulfil its duties. One of the strongest arguments against the banks would be deprived of its force and one of the most threatening dangers which await them in Congress would be removed, if they would voluntarily combine together this summer and organize some effective scheme for central redemption. It is matter for regret that the recent convention in this city did not give more attention to a reform which is infinitely more for the true interests of the banks than almost any other topic, which was prominently discussed.

OUR IMPORTS AND EXPORTS.

We cannot sympathize with the disposition shown in some quarters to underrate the importance of our foreign trade returns, as an index of the balance of accounts between our own and foreign countries. The trade statistics of the country are now placed in charge of a special bureau, and appear to be compiled with the greatest attainable accuracy. It is true, the official returns necessarily omit some items of importance in our account with foreign nations; such, for instance, as the movement in bonds and other securities, the arrivals of gold by immigrants, and the amounts taken out by travelers to Europe, the interest payable upon foreign capital employed here and the ocean freights upon our importations. Our comparative ignorance of these items, however, affords no reason for rejecting information upon the more important movements which constitute four fifths of our whole transactions with other nations. Some weeks ago, we took occasion to indicate that, while our imports were gaining largely, there was an important decrease in our exports. This tendency toward an adverse trade balance was continued up to about the close of May; when our exports were enlarged by free shipments of breadstuffs and our imports began to exhibit a moderate decline. Returns just issued by Mr. Francis A. Walker, in charge of the Bureau of Statistics, enable us now to form a close approximate estimate of the course of the foreign trade for the first nine months of the past fiscal year, i. e., from July 1, 1868, to March 31, 1869.

sure that the volume of bank notes shall increase when they (1.) IMPORTS AND EXPORTS OF THE UNITED STATES (SPECIE INCLUDED)

ł	FOR THE NINE MONTHS ENDING M	TARCH 31, 1869.

	Add rc-exports	\$227,938,591 15,919,463 \$213,858,154 \$213,858,154

Later reports bring the movement down to the close of April. The imports for that month, are stated at \$52,176,-828, and the exports at \$12,607,311 in mixed currency, while the re-exports are given at \$2,980,351, principally in gold value. Reducing the exports for this month to gold value we should have the following as the trade movement for the ten months ending April 30, 1869:

(2.) IMPORTS AND EXPORTS OF UNITED STATES FOR TEN MONTHS ENDING APRIL 30, 1869. Imports, specie included. For nine months ending Murch 31, 1869..... \$303,598,503 For month of April, 1869.... 52,176 828 \$356,775,331 Total imports—ten montks..... Exports and re-exp-rts, specie included. For nine months ending March 31, 1869.... For month of April, 1869 \$213,858,154 85,905,000 \$279,763,154 Total exports-ten months..... (3.) RECAPITULATION. \$356,775,831 279,763,154 \$77,012,177 Excess of imports, gold value..... 4. Import and Exports for ten months ending April 20, 1868. \$304,306,000 304,995,009 I mports, specie included, gold value..... Exports, specie inc uded, gold value..... Excess of exports, gold value..... \$689,000

The statistical results here presented are not such as could have been desired; and but for the large increase in the imports at our own port and a proportionate decrease in the exports both of produce and specie, for some months past, we should have been disposed to question the accuracy of the official returns. It appears that while the imports for the ten months have reached \$356,700,000, the exports have been only \$279,700,000, showing an adverse balance, upon the trading account, of \$77,000,000 in gold.

This result is the more remarkable from the fact that the period covers the export of nearly our whole surplus of cotton, which this year realized very high prices, and the shipments of which, for nine months out of the ten, amounted to 497,500,000 pounds. In nearly every other article of export there has been a material decrease, the net result being that, for the ten months, the exports are \$25,232,000 in gold value less than for the same period of last year; while, on the other hand, the imports for the same period, are \$52,469,000 higher. The trade movement for the corresponding months of 1867-8 shows an almost even balance, the exports, as will be seen from table 4, being \$689,000 in excess of the imports. There are, however, other items which require to be added to the debtor side of the account. Our interest account has now become a weighty one. It is very generally estimated that over \$900,000,000 of United States bonds are now held in Europe; on which the annual interest amounts to about \$55,-000,000 in gold; while, upon other miscellaneous stocks and bonds held abroad, the interest and dividends cannot amount to less than \$10,000,000 in gold, making a total of interest payments to Europe of \$65,000,000 per annum. Adding the proportion of this item, say \$52,000,000 for the ten months, to the adverse commercial balance, we are found to stand

July 10, 1869.

38

We present the following statements, compiled from the official returns, including specie in both the imports and exports, the exports being reduced to gold value in the Government statement so as to compare upon even terms with the imports, which are always entered in specie values :

July 10, 1869]

THE CHRONICLE.

debtor to other countries about \$129,000,000 on the ten months' transactions. The freight account upon our imports and exports is by no means unimportant, as two thirds of our trade is done in foreign bottoms; but this is an item too indefinite to admit of estimate.

The main contribution toward the liquidation of this balance consists of shipments of securities. As, however, there is no other record of these remittances than such as exists in the private accounts of the shippers, it is impossible to present any accurate statement of this movement. We have taken some pains to ascertain the views of prominent foreign bankers upon the amount of this item, and as those firms are accustomed to compare estimates, their opinions possess considerable weight, and may be regarded as very nearly correct. The average estimate of these parties does not exceed \$100,000,000, for, the ten months under review representing about \$72,500,000 in gold. This, too, is probably an extreme estimate; and it is proper to remark that it exceeds the figures suggested by firms who have sont out a large proportion of the whole exports of securities.

Scme allowances should be made for the fact that a certain amount of our imports are consigned here on foreign account, and that the remittances against such consignments, after allowing for losses and charges, are sometimes considerably below the value at which the goods were entered at the Custom House. But, on the other hand, it is to be considered that, in some cases, the amount realized upon this class of importations exceeds their invoiced value; and, indeed, it is reasonable to suppose that the consignments would not be continued from year to year were there not, upon the average, a profit to the consignors. Nor is it to be overlooked that there is a certain extent of under-invoicing importations, in order to reduce the aggregate duties upon them; in which cases, the remit tances exceed the value entered at the Custom House. But again, on the other hand, there is an average profit upon our consignments of products to other countries, which may be taken as setting off the profits upon foreign consignments to our own ports. Upon the whole, then, it would appear that the only items really necessary to be taken into the account are the imports and exports of produce and specie, the indebtedness accruing in the way of interest upon foreign capital invested here, and the shipments of securities. Above, we have presented the figures representing each of these items; and, if the estimate of the exports of securities can be accepted as approximating the truth, it would follow that, at the close of the ten months, there was a net balance against the country of about \$60,000,000 in gold. This may seem a very undesirable, not to say dangerous, condition of accounts. It is not, however, the first time, within the last four or five years, that we have found ourselves in such a position. For the first two years after the close of the war, our imports ran constantly very largely in excess of our exports; yet we then found it practicable to settle our balances by remittances of securities. Assuming that the European money markets are open to receive our bonds to as large an extent as during late years of over trading, there would seem to be nothing in this adverse balance to cause immediate uneasiness. Under the circumstances, however, it is impossible not to feel some soli. citude as to the present disposition of European capitalists to increase their investments in our securities. The latest advices from Frankfort represent a reaction as having set in upon the Continental Bourses from the late speculative excitement, and that the markets are well supplied with our bonds; how far this may prove to be temporary, remains to be seen. During the remaining two months of the fiscal year it is likely that this adverse balance will be decreased somewhat through increased exports of breadstuffs, as our imports are now on a reduced scale.

THE WESTERN GRANARY AND ITS OUTLET.

It is within the memory of many men now living that the centre of the wheat production of the United States was east of Lake Erie. In the earlier part of this century the counties on the Hudson River and along the Mohawk were large producers of wheat. Then the Genesee Valley came into notice, and for many years was the granary of the East. The wheat and flour of this valley have not yet lost their celebrity, despite the competition of Ohio, St. Louis and California. For many years the insect destroyed the crop there, but its productiveness has been now partially restored, and at no time was there a complete failure. "Extra Genesee," though often merely a name, was still a brand in the market through all viscissitudes. The Erie Canal opened the way to the West and made the farther shores of the great lakes as accessible to market as Western New York had been. So the wheat-growing moved westward to Ohio, Michigan, Indiana and Illinois. Another impulse was needed. Railroads were built from the Lakes to the Mississippi, from the Mississippi to the Missouri and farther West, and again the "granary" receded to the Westward, until to day it is found beyond the Mississippi; and Iowa, Minnesota and California are, in proportion to population and in the yield to the acrethe greatest wheat-growing States of the Union. In 1848 and in 1859 the wheat product of several States was as follows:

1849.	1859.
15,367,691	13,012,165
14,487,351	15, 119,047
13,121,498	8 681,105
9,414,575	23,837,023
6,214,458	16,848,267
4,925,889	8,336,363
	15,367,691 14,487,351 13,121,498 9,414,575 6,214,458

Such were the figures for 1848 and 1859. But in 1866 a further change took place. For instance, Wisconsin, which reports 4,000,000 bushels in 1848 and 15,600,000 in 1859, reports in 1866 20,367,920 bushels, at a valuation of \$33,-914,226—a five-fold increase in crop in 18 years and a ninefold increase in value. Other States named above present the following aggregates :

	18%6.	Value.
Pennsylvan'abush.	10,519,660	\$28,087,492
Ohio	19,208,854	25,726,312
New York	12,526,406	33,525,604
Illinois	28,551,421	55,104,243
Indiana	9,114,562	21,966,094
Michigan	14,740,639	87,588,630

Pennsylvania, in the interval from 1859 to 1866, fell off; New York, recovering from the devastations of the weevil, gained; Ohio fell off largely, considering her increase in population; Indiana also produced less, while Illinois and Michigan increased. Iowa now enters the lists with a pro duction of 8,000,000 bushels; California shows a produc! tion in 1866 of 14,000,000 bushels, having a currency value of some \$20,000,000; Minnesota, which in 1857 imported breadstuffs, had 10,000,000 bushels for export ten years later and kept 4,000,000 for home consumption. Twenty years ago the wheat product of New York and Pennsylvania was four or five bushels per head to the population; now it is but two or three. Of course these States and their Eastern neighbors look to these great Western granaries for supplies; and their confidence will not be misplaced. Directly west of Iowa and Missouri, and within the limits of Kansas and Nebraska, the wheat region virtually ends; but it will expand into immense dimensions on the vast areas of the Northwest. There will be a granary never to be drawn down. There is a lesson of importance to be derived from this statement we have given. These wheat areas of the East, and in this term we include all the regions east of the Mississippi, are by no means exhausted. They need but cul ture to reach the highest promise they ever gave. The wheat crop of New York fell from 13 millions in 1848, to 8 millions in 1859, and rose then to 12 millions in 1866.

40

[July 10, 1869.

The prime cause of this was the renewal of wheat culture after years and years of disease. The farmers could not contend with the insect and they yielded. The insect disappeared, and again the fields returned productive crops. If land is higher in price in these Eastern States, the farmers are nearer a market and they can compete, to a certain extent, with the West. In Ohio, Michigan, Indiana and Illinois, there has been a falling off in the average yield per acre, showing a careless cultivation, for these wild lands are yet unexhausted.

An examination of the breadstuffs trade of Chicago for a series of years, also indicates the growth of the West and the tendency of the centre of cereal production in that direction. In 1854 the receipts of flour at Chicago were 234,575 bbls., in 1868 they were 2,276,335 (a tenfold increase) and Chicago which, in 1860, manufactured but 282,-000 bbls. manufactured last year 747,932. In 1854 the receipts of wheat were 3 millions of bushels, and in 1868 they were 15 millions. Corn grew from 7 millions in 1854 to 25 millions in 1868. Chicago shipped last year 24,800,-000 bushels of wheat and flour reduced to wheat. The five lake ports together sent out 53,000,000 bushels, and it is estimated that 18,000,000 of bushels went on the railroads.

The promise of an increased crop this present year is very good. Illinois has recently suffered so severely from the rains that the corn crop is considered to be in danger, all other sections of the country report good progress and warrant the belief that the avenues of transportation will be crowded with the products of Agriculture. For the great granary beyond the Mississippi, of which we have spoken, the competition of transporting interests is lively. St. Louis has an agent in New York to engage a steamship to proceed to that city and bring a crop of grain directly to this port; Iowa and Minnesota are pushing railroads into the interior; Chicago reduces her charge for handling and storing grain. Freights by rail on competing roads go down and the great battle between the rail and the water route assumes new and more interesting proportions. Some of the experiments induced by this rivalry between different routes are on an extensive scale. This steamship from New York to St. Louis and return, involves a long voyage. It is 3,000 miles of water against 1,000 by land. It is an ocean voyage, a gulf passage and a long and sinuous river with all its opposing currents and unknown obstructions. It passes by the Mississippi cities, whose hopes have been of "Direct Trade" with Europe, and it has for its St. Louis guarantors the enterprise, and capital and pluck of a strong and vigorous city. As one attempt to solve this problem of transportation it is interesting to all observers. The world at large which takes many million bushels of wheat, corn and flour from the United States, and the army of consumers in the non-producing States no less than producers are all directly interested, for to them it is a question of cheaper food.

[From our own Correspondent.]

LONDON, Saturday, June 26, 1869.

Notwithstanding the cheapness of money and the finer weather which has prevailed towards the close of the week, busicess remains exceedingly quiet, with scarcely a department to be pointed at in which any marked activity exists. The position of the iron trade is, indeed, good, the demand for railway descriptions for Russia and the United States being still active. The raw cotton trade has also beent firm, and buyers have effected large purchases, owing to the somewh & discouraging accounts from the Southern States. Other departments of trade, however, are decidedly quiet, although, at the same time, prices appear to be tolerably firm. Merchante, in fact, are operating with unusual caution, and, as a consequence, not in excess of their actual wants. At Manchester higher prices have been demanded for yarns and goods, owing to the upward movement in prices at Liverpool; but business has, in consequence, been checked. At Leeds Bradford, Leicester and Huddersfield, wool has been rather more in request, the demand for qualities suited to the requirements of the autumn and winter trade having been more active. In metals a fair degree of firmness has prevailed ; and at the quarterly meeting of the iron-mastere, just held, it has been determined to make no change in the price of finished iron.

According to a Parliamentary return just published, it appears that the imports of cotton into the United King lom, which were 887,-333,149 lbs. in 1854, amounted to 1,328,084,016 lbs. in 1868, being an increase of 440,750,867 lbs. The exports, which were 125,826,112 lbs. 1a 1854, were 322,620,480 lbs. in 1868, or an increase of 119,294,368 lbs. The exports of cotton yarn increased from 147,128,498 lbs. to 174,537,970 lbs., being to the extent of 27,409,472 lbs., and of cotton manufactures from 1,692,899,192 yards to 2,966,706,542 yards, or to the extent of 1,273,807,350 yards. To meet, therefore, the largely augmented demand for goods on the part of foreign buyers, there is a net increase in the available supply of cotton of only 214,047,027 lbs. As the home demand for goods has also materially increased since 1854 the result has been that Middling Orleans cotton, which was quoted at 6d per lb. in the first week of 1854, was worth 11d per lb. at the commencement of 1869. The largest import of cotton was in the year 1860, when we received 1,390,938,752 lbs. The largest export was 388,952,368 lbs. in 1866. In 1860 there was an export of 2,776,218,427 yards of goods, but in 1868, with a diminution of 60,000,000 lbs. in the import of the raw material, as compared with 1860, the shipments had increased to as much as 2,966,706,542 yards. There was, however, a diminution of nearly 23,000,000 lbs. in the export of yarn. From South Wales it is stated that all the great iron masters are of opinion that prices of railway iron must advance before long, as the requirements of the United States and Russia are known to be large, and, as at the same time, there is little, if any, competition with Belg um aud other Continental markets. Considerable activity is evinced in the shipment of rails at the local ports of South Wales for the United States and the Southwest coast of America, and it is expected that with fine weather large quantities will be sent away. As compared with last year the increase in the shipments will be very important.

Total	\$843,855	13

-The Portland, Saco and P rtsmouth Railroad's stockholders at their meeting lately discussed the contract between this road and the Boston and Maine and Eastern railroads. The latter were thereby bound to pay their rent in gold and silver coin, but have for six years availed themselves of the Legal Tender act to pay in greenbacks. The lessors think that under a recent decision of the United States Supreme Court, they have a right to recover back rent according to the contract's terms, which would amount to \$194,658 in gold, or \$323,600 in currency. The directors were accordingly instructed to take action to recover for the past and enforce for the future according to those terms.

for FRASER

In consequence of the unsettled weather which prevailed up to Monday night, the wheat trade was very excited on Monday, and prices rose to a considerable extent. Good English wheat advanced 4s and inferior qualities 2s and 3s per quarter, while in foreign produce

July 10, 1869.]

THE CHRONICLE.

a similar improvement took place. Since then, however, the temperature has been higher, but, at the same time, up to Thursday night there was much of the appearance of unsettled weather. The late advance in prices, therefore, is supported. The accounts from the agricultural districts are contradictory. Still, it is quite certain that the harvest will be late, and that it will vary considerably. There is, therefore, the probability that good dry wheat will command a good price in the approaching season. The following acc unt of the crops has been published in one of the principal agricultural journals:

Sitting before a good fire, with the room door shut to keep out the cold, and with rain streaming down the window panes, varied by the occasional rattling of large hallstones—and this, too, in the third week of June—we might discount our "pros pect of the crops" beforehand, and say, before writing our report, that harvest will be late and wheat below an average. A blazing July may come and modify such a conclusion, but present appearances do not favor the expectation. The wheats in the north and east are certainly not first-rate. From North Yorkshire we learn that there is a thin and defective plant on the heavy soils, and in the West Riding the crop cannot be an average. In North Lincolnshire the wheats are reported to promise less than an average, and in South Lincolnshire and the Great Fen Level the crop may be an average, but will certainly be late. In Cambridgeshire wheat looks tolerably well; the same is true in Norfolk and Suffolk, and in Essex the crop is good upon heavy land, but on the light lands poor. In the southern counties the wheat is earing three weeks later than last year, and it is reported doubtful if a full aver age can be attained; and the midlaud counties do not promise more than an average wheat crop, even with the best of weather. The prospects of barley are equally unsatisfactory, the weather having been too cold for producing heavy crops. In Norfelk and Suffolk the barley looks well on the highly farmed lands, but on thin soils are defective, backward and yellow. Oats, beans and peas tell a more favor able tale. Potatoes come up irregularly, and have to some extent thrown out supertubers, instead of putting up a vigorous top. As far as probabilities strike us now, we anticipate a rather late harvest—that is, three weeks or a month later than last year—and a yield of wheat and barley somewhat below an average; an average, however, being possible if we should have a sunny, settled July.

An agricultural report from Ireland states :

The cold and ungenial weather which marked the early days of the present season greatly retarded vegetation, and gave such an appearance to the face of the country that in the first week of last month many fields looked as bleak and bare as they had done two months before. Spring labor, however, was then well forward, and more than usual attention had been paid to the preparation of the soil for general crops. A great improvement has taken place in every part of the country since the commencement of this month, especially in grass lands. The importance of having ample food for cattle and sheep in a country which, in proportion to its area, produces a larger number than any other part of Europe, cannot be too highly estimated. Ireland's cattle herds, taking a'l gges, cannot at present be under four millions, and the flocks would amount to about five millions. These figures show how very important it is to the nation, as well as to individual graziers and sheepowners, that the pasturage should be in good coudition. A proof of this was seen in the decline of value which took place in the cattle markets about the middle of last month, when, in consequence of the unfavorable appearance of stock farms, a fall of 10s to 15s a head was current for all varieties of young cattle. Since then a considerable improvement has been experienced, and, with the present favorable weather, still further recovery may be looked for. We may report a very gratifying course that has been pursued by some of the leading graziers in course of the spring months. Tanks have been made for the purpose of guarding against scarcity of water should a dry season set in, and more care is being taken to provide field shelter for the cattle in wet or stormy weather. The wheat lands in those sections of Ulster most celebrated for the growth of that

The wheat lands in those sections of Ulster most celebrated for the growth of that grain have rarely appeared so luxuriant or so well forward as they do at present. Throughout the counties of Down, Antrim and Armagh, which produces two-thirds of all the wheat that is annually raised in the province, the prospects of an ple yield are exceedinglg favorable. No complaints are heard of the oat crop, which was got in at a good time and is now doing well. Potato lands present the finest appearance. An old farmer has reported to us that since 1842 there has not beeu seen such a healthy growth of young potato plants as may be seen in every direction. Not a word is heard of "missed" sets, nor, so far as we have heard, is there any appearance of "curi" either in the early or later planted lands. No correct estimate can be formed of the total breadth of soil under potatoes this senson, but it is pretty certain to be much in excess of that of last year. Mangold wurtzel and Swedish turnips have also been largely sown. The turnip crop in Ireland was an almost general failure in 1863. Many farmers made ample provision for this loss of spring feeding by sowing vetches, which, coming into play in the end of March, proved most valuable for sheep and lambs, as well as for dairy cattle.

In Scotland the crops are being retarded by the ungenial weather, which is a serious matter for that country, owing to the high latitude in which it is placed.

Advices from Lower Styria and Austria state that the ha vest prospect is encouraging, and it was expected that the crop would be equal to that of last year, which was unprecedentedly large. The accounts fron Hungary are also encouraging; but rain is said to be wanted in some districts.

In Russia the crop appears to have been retarded by a severe

oats in England and Wales for the week ending June 9, compared with the four previous years :

	20 D	1869.	1868.	1867.	1866.	1865.
	What	46 2	66 1	65 8	48 5	41 8
	Barley	32 2	39 2	35 0	34 4	27 5
t	Oats	27 8	29 3	27 7	26 7	23 8

It may be observed as the week closes that fine warm weather has set in, and that there appears to be a prospect of the crops ripening in good time, and also being secured in good condition. The opinion secms to be general that the crop will vary very much, and will be of less quantity and less superior quality than that of last year. Rapid progress is being made with the hay crop, which is, on the whole, abundant and is now being harvested well.

Money has again fallen in price, and the minimum rate of discount is now $2\frac{1}{2}$ per cent. In the open market there is no activity, and choice bills are discounted at 3, 31 and 31 per cent. There is abundance of unemployed money in a'l quarters, and the bankers find much difficulty in disposing of their surplus balances. The fact would seem to be that business has been materially checke I by the late rise to 41 per cent, which it is admittel in all quarters, disturbed the commercial mind to a serious degree. It is, no doubt, agreeable to find that partly through the great caution exercised by commercial men, the money market has again righted itself, and if it be not disturbed by large financial operations, money will undoubtedly remain cheap. It was thought so, however, in the early part of April last; but a demand suddenly arose towards the latter en l of that month, and the resu't was that the rates of discount advanced rapidly to $4\frac{1}{2}$ per cent. It is now beginning to be the impression that a similar change may come over our market. With cheap money, speculation will revive, and the foreign loans now in abeyance, will probably be brought forward; while, with fine weather, and with the prospect of a good agricultural year, business is likely to improve. The uncertainty which has characterized the money market of late May, however, tend to caution on all sides, and, if so, money will of course remain extremely easy. Rapidity of communication tends very materially to effect rapid changes, and if the bank minimum should again decline to 3 per cent, something of the sime character which so decidedly affected the money market in April last may influence it again before very long. We must, in fact, be prepared for speedier action, for the times have, as it were, quickened during the last few years. The following are the prices of money:

				-
	1868.	1869.	1868.	1869.
20. 	Per cent.	Per cent.	Per cent.	Per cent.

Money on the Continent remains easy, the tendency being towar's lower rates. The commercial inquiry continues limited, and the fin: ncial establishments appear to be borrowing to a very moderate ex'ent. Annex d are the quotations at the leading cities :

-B'k rate	Op. m'kt-	-B'k rat	eOp. m'kt-

The exchanges, in consequence of the lower rates for money on this side, are again lower, but the Paris exchange is still at a point which prohibits the export of gold. All the supplies which are coming in from Australia and elsewhere are likely, therefore, to be retained here. The last telegram from New York quotes the exchange on London at 1093. In the bullion market there is no important feature. Silver and dollars, however, are in moderate request for export to the Eas'. The consol market has been rather flat, owing to some considerable sales of money stocks, in anticipation, it is believed, of the approaching money bill for the purchase of the telegraph companies. Towards the close of the week prices have been firm, owing to the much finer weather which prevails. Five Twenty bonds have been in steady demand f r investment at about previous quotations. American railway shares have been dull. Annexed are the highest and lowest prices of Consols, and of the principal American securities on each day of the week :

drought; but at the latest date rain had fallen, and the prospect had materially improved. From Salonica we learn that the harvest, which had been threatened by a continuance of dry weather, was likely to prove abundant, a considerable quantity of rain h ving recently fallen. 6. Our imports of wheat continue to diminish, but, in consequence of the recent excitement in the trale, large orders have been sent out to the Black Sea and to New York for the purchase of additional sup plies. For the present season our imports a e 8,460,0 0 cwt. less than they were in 1867-8. Annexed is the statement of imports and exports.

Lord Chief Justice Cockburn, on the application of Mr. Henry George Gordon, one of the directors, has ordered the trial of the directors of Overend, Gurney & Co., to be commence I on the 22 I of July. Mr. Tho:n, the prosecutor, however, appears to be in an unenviable position, for not having collected a sufficient sum of money to meet the large expenses which will necessarily be entailed in employing counsel, he is likely either to withdraw from the case or else bear the greater part of the expense himself. In addition to this he has been bound over by the Lord Mayor in the sum of £5,000 to prosecute at the Sessions. Mr. Thorn has recently applied to the Treasury for funds to meet the expenses of the prosecution, but has been refused, notwithstanding that some years ago the Treasury advanced £38,000 to aid the prosecution of the directors of the Royal British Bank. The application, therefore, is not without a without a precedent. He has also asked to conduct the prosecution himself, without incurring the expense of counsel; but the Lord Chief Justice has intimated that it is not the practice of the court to allow prosecutors to conduct their own cases. The trial of the accused directors is likely, therefore, either to break down from the nonappearance of the prosecutor or to be only a farce, from the fact that all the leading counsel of the bar have been engage I for the defence. Some clever juniors should volunteer to support Mr. Thorn, so as to make themselves known.

The President of the Board of Trade received a deputation on Thursday of the committee of promoters of the scheme for a submarine tunnel betweer England and France. Lord Richard Grosvenor M. P., the chairman, stated that they asked the governments of England and France each to guarantee $2\frac{1}{2}$ per cent on £2,000,000, being the sum to be applied to driving two driftways from shore to shore. The French government are said to be waiting to see what the English government will do in the matter. Mr. Bright has promised to bring the matter before his colleagues.

A report from Manchester states :

Prices are unchanged since Tuesday, but the tone of the market has een quieter, and producers are rather more easy to deal with than they were in the beginning of the week, although they adhere very firmly to their quotations. The upward movement, however, has been checked. On Monday and Tuesday there was some excitement in the cotton market, which compelled spinners to put up their prices, and some were indifferent about giving quotations. When it was found that merchants here would not support the upward movement, spinners gave over buying cotton in excess of their wants, and a quieter feeling came over the cotton market. The general feeling, however, is that the position of cotton is inherently very strong, and that the market is liable to speculative movement any day. Consequently producers are chary about selling a long way in advance, being apprehensive that a possible rise in the raw material might put them in even a worse plight than they are in at present.

Liverpool Breadstuffs Market.—This market has experienced an unusually active week, with a general advance throughout the list, amounting to 1s 6d in Flour, 7d in Red Western Wheat, 8d in White California Wheat, 2d in Oats, and 9d in Peas. The market closes firm, with a prospect of a still further advance.

COMMERCIAL AND MISCELLANEOUS NEWS.

IMPORTS AND EXPORTS FOR THE WEEK.—The imports this week are about the same in dry goods, but show a considerable decrease in general merchandise, the total being \$4,842,459, against \$5,204,934 last week, and \$6,355,731 the previous week. The exports are \$4,431,637 this week, against \$3,634,936 last week, and \$4,427,531 the previous week. The exports of cotton the past week were 990 bales, against 152 bales last week. The following are the imports at New York for week ending (for dry goods) July 2, and for the week ending (for general merchandise) July 3:

······································	-	· • • •	£

General merchandise,.	1,789,317	2, 225, 329	2,959,811	3,679,682
l'otal for the week	¢2 000 400	\$3,971,793	\$3,850,662	\$4,842,459
Providely reported	155 455 014	198 565 055	190 745 027	157 594 510

In the early part of the week there were rumors of failures, which gave some uneasiness, but they appear to have been only idle reports, and any effects which they have produced have passed away. The reduction of the Bank rate of interest is a favorable feature in maintaining the stability of prices, but it has had no perceptible influence here. Buyers resolutely set their faces against higher prices; and, unless better advices arrive from abroad to stimulate things here, it is probable they may desist from buying until producers hold more stocks than they do at present.

English Market Reports-Per Cable.

The daily closing quotations in the markets of London and Liver pool for the past week, have been reported by submarine telegraph as shown in the following summary:

London Money and Stock Market.—Consols have, on the whole ruled at better prices than those current last week, closing, however, if per cent lower than the highest point of the week. United States bonds have experienced a fair amount of activity during the week, but at the close were easier. Railway stocks closed quiet. United States bonds at Frankfort have been firm, an i close higher than last week.

PARTIAL REDEMPTION OF THE INDIANA STATE DEBT .- The Board of State Debt Sinking Fund Commissioners, consisting of the Governor, Auditor, Treasurer and Agent of State, have had a meeting, and upon examination ascertained that the State will be able to redeem about \$800,000 of the principal of the Indiana five per cent State stocks at the office of the Agent of State in New York, on and after the 1st day of July next. The amount necessary to pay the semi-annual interest has also been transmitted to New York. This will leave about \$1,600,-000 of the principal of the five per cent stocks still unpaid, supposing the holders should consent to give up the stocks to the amount proposed, of which there is some doubt, as it is still optional with them, and they find the investment one entirely satisfactory to them, so long as they can draw the interest. They are almost as popular as the war loan bonds, which the State expressed a readiness, through her officers, to redeem in full, in May last, but the agent has only been able 't) get hold of about \$2,000,000 of them, leaving some \$200,000 still unpaid, because, not yet having matured, the State cannot stop the six per cent interest upon them. These, with the still outstanding five per cents, will leave the State debt at about \$1,800,000, whereas it was fully seven millions but five years ago.-Indianapolis Journal.

NEW ADVERTISEMENTS .- A very full list of the bonds stolen from the Ocean Bank on Sunday, June 27, will be found on pages 3 and 4 of the CHRONICLE. Captain John S. Young, formerly of the Detective Police, and now of the Detective Bureau, No. 61 Broadway, has charge of the business of recovering the bonds, and it will be observed on reference to the advertisement that the reward offered is very liberal. The reputation of Captain Young as a detective is unequalled in this country, and it is more than probable that a part or all of the stolen securities will be recovered.

-The Illinois Central Railroad advertises the usual semi-ai nua dividend of five per cent.

-The Germania Insurance Company gives notice of a semi-ann al d.vidend of five per cent.

-The Safe Deposit Company informs the public, through their advertisement on page 2, that bonds are safe in their vaults, corner of Broadway and Liberty street.

-Messrs. Theodore Polhemus & Co., long known to the trade as the principal dealers in cotton duck in this city, have removed from their old well known store on the corner of Beaver and Broad streets, to Nos. 13 and 15 Lispenard street.

The Bankers' Gazette.

WINA WY MANTOR B ATTOR	l of the stringency in mon	ey noted in	our last. The	disbursements

43

[July 10, 1869.

Land of the

of about \$3,500,000 in currency, by the Government, against purchases of bonds on Saturday last, produced no perceptible relief. The money was evidently taken off the market and held out of use by parties engaged in gold and stock speculations. The absence of relief from this source, upon which great expectations had been placed, produced a feeling of disappointment, and borrowers being more than ever at the mercy of landers, rates were exacted ranging from 1 to 2 per cent per day additional to 7 per cent per annum. This condition of things continued until the middle of the week, when it was learned that the Government would purchase \$3,0: 0,000 more Five-Twenties on Friday, the 9th. This action of the Government, being construed as indicating a purpose to meet the wantof the money market, appears to have discouraged the efforts of the speculators to force a stringency in money. About the same time it became known that the District Attorney was taking steps to expose the general violation of the usury laws, and in pu suance of this purpose several bankers and brokers were yesterday summoned to appear before the Grand Jury to-day to testify upon the matter. There can be little doubt that these circumstances have caused the abandonment of the "locking up" of money, the results being that, to-day, the most general rate has been 7 per cent, with exceptions at 7 per cent gold and 1-32 per day.

Later information respecting the currency balance of the Treasury throws additional light upon the causes o. the late extreme stringency. Later reports from national bank depositories carry up the amount of the currency balance on July 1st to \$40,000,000; beside which there stood at that date, to the credit of disbaring officers, \$7,500,000 at the New York Sub-Treasury alone; so that o July 1st somewhere near \$50,000,000 of currency must have been held out of circulation by the Government. Within the past seven days the Government has paid out nearly \$7,000,000 upon special purchases of bonds, while it has received \$1,350,00 upon siles of gold; leaving a net gain to the market on these transactions of \$5,500,000 currency. These movements, together with the suspension of artificial interference, can hardly fail to conduce to a much easier future condition of the market. The currency movement with the interior has been about even until within the last wo days, when some moderate amounts have been received from the West; the expectation of receipts of n oney from New Orleans, based upon the fact of Exchange on New York, being there at a 1 per cent premium, has thus far not been real zed.

From the circumstances at present affecting the market, it would seem that the stringency which stands almost unequalled in the history of Wall street, has passed its climax. Whether the severity of the pressure will be followed by a reaction to the opposite extreme, remains to be seen; perhaps the rule by which such a result ordinarily follow may be in this case modified, by the com paratively near approach of the period when mo ey is required for moving the grain crop?.

Discount operations have been confined almost entirely to the accommodations of the commercial banks to their customers. On the street there has been no market for the best paper at (ven 1) to 12 per cent. The banks have been unable to discount grain paper, with much consequent inconvenience to the West; and paper sent here in coasiderable amounts from Boston has been returned as unsaleable. UNITED STATES BONDS .- The bond market has been irregular, though more active than last week. The monetary pressure extending throughout the country has brought an unusually large amount of bonds from the interior; while, from the same cause, there has not been the demand for the reinvestment of July interest usual at this season. These influences, together with the high rates paid for money, have naturally tended to depress the market Values, however, have been sustained by the large purchases of the Government; so that at the close prices are from 1 to 11 higher upon all the issues, except Sixty-Twos, Eighty-Ons and Tea-Forties, than a week ago. The Treasury purchases of last Saturday and to-day aggregate \$6,000,000; and, at the close of the week, there are indications of a comparative scarcity of most of the issues. It must be remembered, howeverer, that usually at the beginning of July there is a foreign demand for bonds for the reinvestment of the July interest; owing to the over-supplied coldition of the Frankfort m rket, that demand is not this y a: forthcoming ; so that the Government purchases simply substitute for what ordinarily comes from other sources. Nothing is known as to whether the Secretary of the Treasury purposes continuing Fort Way

his special pure ases of bonds. As, however, the last two purchases have not been made for the sinking furd, but subject to the approval of Congress, Mr. Boutwell may; quite probably, feel cautious about assuming the responsibility of further transactions of such a character; and the more so as the now relieved condition of the money market removes the necessity for this departure from the ordinary use of the Treasury surplus.

The following are the closing prices of leading government securities, compared with preceding weeks :

STATE LONDS - In this class of recurities speculation has been generally in favor of lower quotations. The Tennessees and North Carolinas have generally been the especial stocks aimed at, and the former have dropped to $60\frac{1}{2}$ for old, and 57 for new, chiefly on reports that martial law is be proclaimed throughout the S ate, and troops to be called out to preserve order. This has the effect of discouraging investors. The North Carolinas on the rumored extra issue of eight millions of bonds, in aid of additional State railroads, dropped to $46\frac{1}{2}$ for the new bonds under a heavy pressure of sales, and 54 for the old. The Missouri sixes have also been weak, dec ining to $87\frac{1}{2}$ The Virginias have been steldy and withoat notable feature. The Louisiana bonds have shown great firmess, selling at 69 for the old sixes and $67\frac{1}{2}$ for the levee sixes. Other Southern bonds have be n neglected.

The following are the closing quotations compared with last

RAI ROAD AND MISCELLANEOUS STOCKS .--- The we a very unsettled and weak feeling, in con equence of the failure of Saturday's purchase of bonds by the Treasury to afford relief to the money market Brokers very generally advised their cast mers that they must p y the current rates for money for carrying their stocks; and as this amounted to from 1 to 8 per cent per day, with a prospect of such charges (ontinuing, there was a very general realizing by outs de holders of stocks, with the result of a decline in prices of 21 to 71 per cent. New York Central declined to 1881 Hudson River to 1591, Rock Island 1147, Michigan Southern 1061, Pittsburg to 101 and Northwest common to 79. The bulk of stocks, howev r, appear to be in the hands of strong cliques, who hope herea ter, upon various schemes, to market them at high figures; and these parties having come into the market to arrest the decline, there was, about the middle of the week, a recovery of confidence, and prices have since steadily advanced, New York Central having sold at 1967, Hudson River 1652, Rock Island 119, Pittsburg 108% and Michigan Southern at 110%. Pacific Mail also has advanced to $92\frac{1}{2}$, against 88 early in the week. The market at present follows the lead of the Vanderbilt stocks. Negotiations between the Hudson River and New York Central Compan'es, tor a consolidation of interests, are in progress; some of the cetails of the scheme have not yet been-arrang-d, and thirty or forty days must elapse before the p'an can be formally ratified according to law; it is probable, however, that within the present month arrangements may be so far informally agreed upon as to suffice as the basis of an active speculation in the stocks, in which event a more active market generally would probably be realized. The following were the closing quotations of the regular board compared with those of the six preceding weeks :

Sev Sta Ann Co Br Co Me Pee No Ha Ir Mo Sta Si CC CC CO THE GOLD MARKET .- The stringen y in money, involving the payment of 1-16 to § per cent for having gold carried, caused a large amount of gold to be thrown upon the market during the first half of the week, with the result of a decline from 1375 on Friday last to 134 on Wednesday. The decline, however, afforded a favorable opportunity for the purchase of Foreign Exchange; and the rates of sterling bills having consequently advanced to a point which leaves a profit on the shipment of specie, there was a reaction of 11 to. 23 from the lowest figures, the market closing to-day at 1354. To morrow's steamers will take out about \$1,000,000 in specie; which, from present indications, appears, to be the beginning of the usual sum ner exports of the precious metals. In addition to the ordinary tr de remittances, several millions have to be sent out in payment of July interest upon United States bonds and other securities; and as the exports of cotton are now rapidly declining, specie will naturally be sent out in settlement of maturing obligations. The break in the market appears to have enlisted a considerable "short" interest, and hence the charge for carrying gold has fallen at the close of the week to 9 per cent to 1-32 per day.

The fluctuations in the gold market, and the business at the Gold Board during the week closing with Friday, are shown in the fol-

lowing table :

"JOINT COMPANIES" OF NEW JERSEY .- With the view to procure funds for the improvement of the canal and railroads of the united companies, the stockholders of the New Jersey Railroad and Transportation Company, the Delaware and Raritan Canal Company, the Camden and Amboy Railroad and Transportation Company, and the Philadelphia and Trenton Railroad Company, are entitled to subscribe at par for 15 per cent of the amount of stock which shall stand in their names on the books of the said companies, collectively, on the 11th day of July next, at the commencement of the day; the stock thus subscribed for to be stock of the said three first-named companies, and to be contributed by them in proportion to the present amount of capital stock of each company; and each stockholder entitled to a fractional part of a share shall be allowed to subscribe theref r a full share ; but no fractional subscription received. The subscriptions will close August 10th. Every stockholder holding less than seven shares will be entitled to subscribe for one share. The installments on account of the new stock shall be paid in cash, in two installments f 50 per cent each, as follows : First-Fifty dollars a share at the time of subscription-between the 22d day of July and the 10th day of August, 1869. Second-Fifty dollars a share between the 22d day of January and the 10th day of February, 1870. Stockholders failing to subscribe within the time mentione t. or neglecting to pay the installments when due, will forfeit their right to the new stock.

OIL CREEK AND ALLEGHANY RIVER BAILKOAD COMPANY .- This Company gives notice that the Commissioners of its Sinking Fund will purchase for investment, on and after August 2d, from the several stockholders at par, five per cent of the capital of the stock as it may stand on the books of the Company on the 1st of July, 1869. Those who elect to sell that amount of their stock at par for cash, must notify the Commissioners of the fact, and present their certificates before the 20th of July. The transfer books of the Company are to be removed to Pittsburg after the 1st proximo.

-A bill has passed the Senate of Florida in aid of the railroads in that State. It is proposed to issue bonds to the amount of \$14,000 a mile, to aid in extending the Pensacola and Georgia road to Mobile, all the bonds to be issued at the same time. The second proposition is for the State to endorse to the extent of \$14,000 a mile the bonds of any company undertaking to build a road from Gainsville to Tampa. The indorsed bonds to be issued as sections of five miles are completed.

For other railroad items see "COMMERCIAL AND MISCELLANEOUS NEWS" on a previous page.

THE CHRONICLE.

The Commercial Times.

COMMERCIAL EPITOME.

FRIDAY NIGHT, July 9.

The general markets the past week have been quiet, as is usual during the few days which immediately follow the National Holiday. The stringency of the money market, and the fluctuations in gold, have also produced an unfavorable effect.

The following is a statement of the stocks of leading articles of foreign and domestic merchandise at dates given :

		69	1868.
· · ·	July 1.	June 1,	July 1.
Beef, tierces and barrels	28,839	39.547	04 AMC
I UIK. DAFFEIS.			24,478
Tobacco, foreign, bales.	44,431	50,772	75,469

	700	700	500
Lead, tons	1,600	1,700	4,200
	-,	-1.00	

Hides have remained dull, although foreign have been somewhat favored by the decline in gold. Leather and skins have been quiet.

Naval stores have shown but little variations, the demand being fair for both spirits turpentine and rosin, the latter being taken considerably for export, notwithstanding the high rates current for ocean freights. Oils have been without essential change and little doing. Petroleum has rather favored holders. The effort to depress prices has been so long continued that there is some natural reaction.

East India goods remain quiet, but rule very firm. Metals are without movement of consequence, except Ingot Copper, which closes a little firmer.

Fish are dull and fruits less active. Building materials are active at the reduced prices now current. Hops are in large export demand and prices firm. Hay also rules steady. Tallow is in demand for export, and firm. Whiskey is doing rather better, but is not active.

Exports of Leading Articles from New York.

The following table, compiled from Custom House returns, shows the exports of leading articles of commerce from the port of New York since January 1, 1869. The export of each article to the everal ports for the past week can be obtained by deducting the amount in the last number of the CHRONICLE from that here given.

Freights have been rather dull, though improving towards the close, both in business done and rates. But the speculation in Wheat checks, and any marked increase of tonnage would probably result in a decline in rates.

Provisions have been irregular. Western Hog Products have been drooping, but latterly a better demand has sprung up for city Lard and ice-cured Bacon, but prices are generally slightly lower than last week. Pork remains very quiet, but held with much firmness. Butter has arrived freely, but at some decline, closes steady. Cheese, having declined about one-third of the opening prices in June, is selling very freely to the export and local trades, and prices closed at a slight improvement.

Wool is unsettled. The new clip is now arriving freely, but prices are not yet opened for the season. The regular auction is postponed until the 15th, when, doubtless, some indications will be afforded of the actual relation between supply and demand.

COTTON.

FRIDAY, P. M., July 9, 1869.

[July 10, 1869.

The exports for the week ending this evening reach a total of 5,383 bales, of which 3,802 were to Great Britain, and 1,581 bales to the Continent, while the stocks at all the ports as made up this evening, are now 47,154 bales. Below we give the exports and stocks for the week, and also for the corresponding week of last season, as telegraphed to us by our own correspondents at the various ports to-night:

				1 1 1 1 A L & F.	4 5 6		
Week ending July 9. New Orleans Mobile		ed to Contin't. 1,103	Total Sa this week. 1,103 1,579	1805.	Sto 1869. 11,384 4,241	1868. 6,883 6,232 5,314	•
Charleston Savannah	1,980	 	1,980	447	1,949 479 208	4,129 1,011	
New York Other ports	213	478	721	871 10	17,510 11,383	57.431 20,170	
Total		1,581	5,383	3,529	47,154	101,175	

From the foregoing statement it will be seen that, compared with the corresponding week of last season, there is an increase in the exports this week of 1,854 bales, while the stocks tonight are 54,021 bales less than they were at this time a year ago. 'The following is our usual table showing the movement of cotton at all the ports since Sept. 1, a coroing to the latest mail returns. We do not include our telegrams to night, as we cannot insure the accuracy or obtain the detail necessary by telegraph.

Receipts and Exports of Cotton (bales) since Scpt. 1, and Stocks at Dates Mentioned.

*Under this head we have added the overland shipments direct to manufacturers to April 24, as follows: for the present year 241,000 bales, and for last year 175,000

The market the past week has been entirely without inters est. Very few buyers have shown themselves, and yet stockare reduced to so low a point that holders have manifested little disposition to make concessions. Continued favorable accounts with regard to the growing crop, the fair stocks now held by our mills and the failure of the goods market to respond to the late advance in the raw material, have for the time at least checked the purchases of spinners and made speculators less confident. For these reasons the market has been very quiet, and yet prices have been maintained until to day, when, under the continued influence of the money stringency and an entire absence of buyers, quotations fell off slightly, middling uplands being quoted at the close at 344@ 341c., an I the market dull and heavy. For forward delivery there has been considerable doing, the sales reaching 2,720 bales (all low middling, or on the basis of low middling), of which 1,600 bales were for December at 26c; 100 January also 26c; 200 November and December, and 100 December 10th and January 10th, at same price; also 100 November at 26³/₄c; 100 July, 33¹/₄c, and 100 same mouth at 33¹/₂c; 100 for December, 200 October and December, 120 November, all on private terms. The total sales for immediate delivery this week foot up 7,891 bales (including 192 bales to arrive), of which 6,454 bales were taken by spinners, 490 bales on speculation, 946 bales for export, and the following are the closing quotations:

By special telegrams received by us to-night from each of the Southern ports we are in possession of the returns showing the receipts, exports, &c., of cotton for the week ending this evening, July 9. From the figures thus obtained it appears that the total receipts for the seven days have reached 4,643 bales, (against 5,200 bales last week, 9,440 bales the previous week, and 11,536 bales three weeks since,) making the aggregate receipts since September 1, 1868, up to this date, 2,320,545 bales (of which 241,000 bales are overland shipments direct to the mills), against 2,340,187 bales (of which 175,000 bales are overland shipments), for the same period in 1867, being an excess last season over this season o 19,642 bales. The details of the receipts for this week (as per telegraph) and the corresponding week of 1868 are as follows: ts.-

THE CHRONICLE.

which have reached us are extremely hopeful. Planters are in high spirits in view of the present good prospect of a fair crop and high prices. THE COTTON SUPPLY OF OUR MILLS -During the past week the Cotton Manufacturers' Association have issued an estimate of the probable wants of our mills during the remainder of the year, reaching precisely the same result given in our estimate of the 26th of June Their figures are as follows : ... 2,100,000 95,000- 1,497 000 Stocks in ports..... 603,000 Taken from the ports by Northern spinners..... A dd receipts overland to mills to April 24 Add receipts overland to mills, April 24 to June 18 (estimated).... 6,000 Total taken from this cr p by Notthern spinners since Sept. 1, 1868.. 850,000

According to this statement the Northern mills have taken 850,0 0 bales since September 1st; and, as the consumption for the whole year is estimated at 900,000 bales, only 50,000 bales more (if it could be evenly distributed, are needed to provide for the balance of the year. The figures we gave on the 26th of June showed that the mills had already tal en: 849,000 bales, and would, therefore, need 51,000 bales more. Of course, however, some mills have more stock than others, so that we think about 20,000 bales should be allowed to cover this unequal distribution, making the total requirements of the mills 71,000 bales between June 18 and September 1st if they continue to run during all the summer months. Or if there is a general stop during August, as some of the leading manufacturers now propose, this supply would take them into October.

The exports of cetton this week from New York show an increase over last week, the sotal reaching 990 bales, against 152 bales last week. Below we give our table showing the exports of cotton from New York, and their direction for each of the last fou weeks; also the total exports and direction since September 1, 1868; and in the last column the total for the same period of the previous year:

Cotton (bales) from New York since Sept. 1, 188

EUROPEAN AND INDIAN COTTON MARKETS .- ID reference to these markets, our correspondent in London, writing under the date of June 26, states:

LIVERPOOL, June 26.-A large business has been transacted in cotton this week, and on Monday and Tuesday the market, owing to somewhat discouraging reports from the Southern States, was very active. Since then, however, business has been quieter, but prices have ruled firm. American cotton has risen & to td; Brazilian & to td, and East Indian also i to id per lb. In the value of Egyptian cotton no advance can be quoted. The sales of the week amount to 85,060 bales, of which 12,370 bales are on speculation; 15,690 bales are declared for export, leaving 57,000 bales to the trade.

In cotton to arrive the business has been large; the latest quotations

FRASER

Since the commencement of the year the transactions on speculation and for export have been to the following extent :

The tobacco market has been more active the past week. In Kentucky leaf, the demand has been active for export at very full prices. Holders of Government contracts are the principle thuyers. The sales since Friday last amount to about 2,300 hhds., of which 1,000 hhds. yesterday-prices varying from 8 to 13c for common to good.

The market for seed leaf has been more active but mainly for for domestic consumption, and prices rule firm. There are some out-of-town buyers in market, and the sales of the week are: 42 cases old Connecticut cut fillers 94c; 42 cases old Connecticut and Ohio fillers, 94c; 50 cases State, private terms; 103 cases Connecticut wrappers, 1867 crop, private terms; 100 cases new Pennsylvania, private terms; 25 cases Connecticut wrappers, 1867 crop, 38e; 25 cases Connecticut wrappers, in small lots, 45@78c. The sales of the previous week (accidentally omitted from our last) were 40 cases old Connecticut, seconds, 19c; 42 cases new do, 22c; 150 cases State fillers, in three lots of 50 cases each, at 10c, $10\frac{1}{2}c$; 80 cases old Connecticut, private terms; 97 cases New Connecticut, part at 33c.

Spanish tobacco has been in more demand; sales 400 bales Yara, private terms, and 250 do Havana, 921@110c.

Manufactured tobacco is without especial activity, though in rather more demand, both for consumptiou and export.

The receipts of tobacco at New York this week, and since Nov. 1 have been as follows:

BREADSTUFFS.

FRIDAY, July 9, 1869, P. M.

The market for Breadstuffs the past week has been active, and prices tending upward. The receipts of Flour at this market continue on a moderate scale as compared with the exports and the wants of the local trade, and with some speculation, prices of the low grades show an advance for the week of an average of 25c per bbl, with an upward tendency, stimulated by the advance in Liverpool. The contracts for Flour to be delivered this month are yet mostly to be executed. Good lines of Extra State closed to day at \$6 65@ 6 79.

Wheat has been in liberal supply, but with firmer foreign markets and higher gold, the demand has been active and prices of Spring are five or seven cents higher, with Winter Wheats showing some improvements. The demand, however, has been mainly speculative, and the export business embraces large quantities of Winter Wheat, which is relatively cheaper than Spring. The receipts at the Western markets have fallen off to about 100,000 bushels per day. The accounts from the growing crop are generally favorable. Winter Wheat, now nearly ready for the harvest in the middle latitudes, is especially promising. Some New Wheat from the Southern States has been received at market. The quality is excellent. No. 2 Spring closed at \$1 53@1 54, and dull.

Corn has had a large advance, mainly speculative, based on the backward state of the growing crop throughout the West and Northwest. It appears certain that warmer weather is immediately required to secure us against a partial failure of this crop.

Oats have come forward sparingly, and have also attracted the attention of speculators, resulting in a considerable advance. Other grains are entirely nominal.

The following are closing quotations:

GROCERIES.

FRIDAY EVENING, July 9, 1869.

Our review of the week shows but little change in the general markets for groceries, and except in the items o sugar and molasses, no improvement. To the usual quiet o the season has been added this week the relaxation o business which usually accompanies the celebration of the Fourth, while a descending scale in the price of gold ha further contributed to the quiet which has prevailed. Raw Sugars, though showing a loss of 1c during the week, which they have not yet recovered, close with a marked increase o inquiry and activity, and a firmer market. Refined are also more active and better. Molasses has been generally inactive and but little sought for, such inquiry as there was being directed to the refining grades, but there is a better demand at the close and firmer prices. Coffee has been very quiet, and prices sustained mainly through the firmness of holders. Teas, with some improvement in firmness in the irregular prices prevailing, are still inactive.

Imports of the week have included more than an average quantity of Coffee and considerable receipts of Molasses, but only a few packages of Tea by steamers, and comparatively small quantities of Sugar. In the receipts of Coffee are included some five cargoes of Rio, one of Ceylon, one of Maracaibo, and sundry other lots.

The imports at New York for the week, and at the several ports since January 1, are given below under the respective heads. The totals are as follows:

I			Total at	
I	At 1	N. York.	- From Jan	1 to date-
		s Week.	1869.	1868.

	Molasses, New Orleans bbls.		17,497	10,925
	TEA.	×		

There has been rather more firmness in prices, and although they are somewhat irregular, they nevertheless show an improvement as contrasted with the rates current a few weeks ago. The sales are very light and principally in greens, to which the attention of buyers has been mostly directed. Sales include 3,058 hf chests of Greens, 2,470

Black Green Japan	1868-9. 12,155,376	1867-5. 13.278,303 12.921,570 7,102,769	1869. 9,837,236 14,436,872 6,503,351	1868. 11 879,195 13,039,349 5,619,648
Total	41,778,903	33,302,647	33,228,814	30,528,248

The indirect importations since Jan. 1 now reach 16,587 pkgs, again 6.057 last year.

COFFEE.

With a light demand for both Rio and West Indian, the market has been inactive throughout the week. Prices have been maintained through the firmness of holders, but they are above the ideas of most buyers, and the latter are consequently holding off. Sales include 5,918 bags of Rio and and 125 do of Laguayra.

Imports of the week have been considerable, including of Rio Coffee, by the "Garron," 3,979 bags; "Julie," 3,950 bags; "Freya," 4,153 bags; "Lebanon," 3,000 bags, and by Green Olive," 4,000 bags. Of other sorts the receipts have been 2,886 bags of Maracaibo, per "Ilva,' 6,587 bags of Ceylon, per Hyacinth : 1,229 bags of Hayti, per "Oliver Cutts," and 389 bags of sundries.

The stock of Rio July 8, and imports since Jan. 1, are as follows :

In Bage.	New York.	Phila- del.	Balti- more.	Orleans.			Total.
Stock. Bame date 1868. Imports in 1868.	159,993 146,401 413,781	7,740 8,200 5,836	34,500 57,00 157,817 137,135	17,600 11,300 74,068 56,071	8,500 2,200 19,666 9,711	2,800 2,800	218,093 224,601 706,365 583,589

Of other sorts the stock at New York July 8 and the imports at the several ports since Jan. 1 were as follows:

* Includes mats, &c., reduced to bags. † Also 66,691 mats.

SUGAR.

The receipts of raw Sugars continue liberal and the a cumulation of stocks gradually increases. During all the earlier part of the week the market was very dull, purchasers declining to buy except in a very mall way as compelled to; and in this way a reduction of $\frac{1}{2}$ er lb was obtained. At this concession, however, buyers seemed more willing to operate, and for the last three days a fair business has been done, closing to-day with a more active inquiry from refiners and free sales, including some 2,700 boxes. The market has apparently acquired more strength and the future wears a more encouraging look. Refined Sugars were also dull, and in the first of the week declined $\frac{1}{2}$ and $\frac{1}{2}$, but subsequently rallied and close active and firm with the loss recovered. Sales of raw Sugars include 3,854 hhds of Cubas, 128 do St. Croix, 140 do Demerara, 10 do Porto Rico, 3,719 boxes of Havana and 600 bags of St. Domingo.

Imports for the week at New York, and stock on hand July 8, were as follows:

	Cuba, bxs.	Cuba, *hhds.	P. Rico, *hhds.	*hhds.	bgs.	Manila, bgs.

MOLASSES.

The few transactions which have taken place since our last have have been altogether in the refining grades, in which holders have made sufficient concession to induce refiners to purchase; the sales have been light however, and our scale of prices, which we do not chaoge, is hardly more than nominal. The grocery grades, though scarce, have met with no domand except for the finest. Distilling

FRUITS.

In foreign dried there has been but little business. Ruisins are steady. Turkish Prunes rather less active, but without any decline. There is a considerable amount of old citron, in broken lots, upon the market, and, in consequence, a little less firmness in this description. New is unchanged. Domestic dried fruits have been neglected. Apples are dull, though we notice an exceptional sale of very fine Southern during the week at 14c. Unpeeled half Peaches are not wanted, and quarter do are dull at 7 g 8c. The receipts of Me literranean green fruit have been more restricted, and, as usual, very much of it has been in such poor c ndition as to realize very little. In and from the store are selling at \$8 per box for Palermo Mountain Oranges, and the same for Lemons. We notice that some Menton Lemons sold at auction from the pier, to-day, brought from \$7 121 27 25 per box. In West Indian with the exception of Pineap les, there is not much doing. Bananas are selling at \$1 50 72 00 per bunch; Cicoanuts at \$35 per M for Barracoa to \$65@70 for Carthagena. Havana Pineapples bring from \$10@10 50 per C. Cat Island Sugar L af do \$12@14.

We annex ruling quotations in first hands :

THE DRY GOODS TRADE.
4 FRIDAY, P. M., July 9, 1869.
The usual quiet which follows the occurrence of a close
holiday has been observable in the market during the past
week. Comparatively little business has been done, and prices remain quite firm at nearly the same quotations made
in our last report.

July 10, 1869.]

Under the existing circumstances there is no class of persons interested in dry goods who feel inclined to much activity. Commission men are not anxious to dispose of the goods which they have on hand, as the same could hardly be replaced now and sold at current prices. Jobbers are very cautious about putting more goods into their houses than they see a chance of distributing while cotton remains at high figures; and retailers, although one step further removed from the direct influence of the fluctuations on the raw material, are still very reluctant to buy goods at an advance of 10 or 20 per cent on the ruling prices of the first four months of the year.

The tone of the market continues to be strong and healthy; and should the position of affairs remain unchanged during the balance of the month, it seems probable that a good Fall trade will be opened at remunerative prices. Manufacturers are in some cases curtailing production, and the stock of goods on the market is not in such excess as it was two months ago. This fact contributes to the firmness and generally healthy feeling in the trade.

The exports of dry goods for the past week, and since January 1, 1868, and the total for the same time in 1867 and 1860 are shown in the following table:

		-FROM NE	W YORK		FROM BC	STON

						1 A S. 1

We annex a few particulars of leading articles of domestic manufacture, our prices quoted being those of the leading jobbers:

BROWN SHEETINGS AND SHIRTINGS .- There is no accumulation of the e goods either in first or second hands, and prices remain very fi m, though no general change has occurred since last week. There is no special movement at present in these goods, and in several instances small lots have been disposed of by jobters at rates below those of agents. Agawam F 36 inches 13, Amoskeag A 36 161, do B 36 16, Atlantic A 36 17, do H 36 $16\frac{1}{2}$, do P 36 $13\frac{1}{2}$, do L 36 $14\frac{1}{2}$, do V 33 134, Appleton A 36 164, Augusta 36 154, do 30 13, Bedford R 30 104, Boott H 27 114, do O 34 124, do S 40 14, do W 45 18, Common-wealth O 27 8, Grafton A 27 94, Graniteville AA 36 154, do EE 36 15, Great Falls M 36 131, do S 83 121, Indian Head 36 17, do 30 131, Indian Orchard A 40 151, do C 36 14, do BB 36 13, do W 34 12, do NN 36 15, Laconia O 39 141, do B 37 14, do E 36 181, Lawrence A 36 131, do E 36 141, do F 86 14, do G 34 121, do H 27 111, do LL 36 131, Lyman C 36 14, do E 36 17, Massachusetts BB 36 14, do J 30 121, Medford 36 151, Nashua fine 33 14, do 36 16, do E 39 18, Newmarket A 131, Pacific extra 36 161, do H 36 161, do L 36 141, Pepperell 6-4 —, do 7-4 30, do 8-4 371, do 9-4 45, do 10-4 521, do 11-4 571. opinion expressed by a party well informed in the trade, that Prints will not go into consumption at higher prices than $12\frac{1}{2}$ cents for Gloucester, L neaster and similar goods. Others feel very confident that higher prices will be made for these goods within a few weeks. Allens $12\frac{1}{2}$, American 13, Amoskeag $12\frac{1}{2}$, Arnolds 10, Cocheco 14, Conestoga $12\frac{1}{2}$, Dunnell's $12\frac{1}{2}$, Freeman 10, Gloucester $12\frac{1}{2}$, Hamilton 13, Home 8, Lancaster $12\frac{1}{2}$, London mourning 12, Mallory 12, Manchester 12, Merrimac D $2\frac{1}{2}-13\frac{1}{2}$, do pink and purple —, do W 15, Oriental $12\frac{1}{2}$, Pacific $12\frac{1}{2}-13$, Richmond's $12\frac{1}{2}$ 13, Simpson Mourning 12, Sprague's purple and pink $13\frac{1}{2}-14$, do blue $13\frac{1}{2}$, do shirtings $13\frac{1}{2}$. Wamsutta $9\frac{1}{3}$.

PRINT CLOTHS are reported as follows by the Providence Journal: The market for Prit cloths is steady and firm. The relative prices of Prints and gray cloths makes no incentive to printers to buy heavily The following are the sales for the past week: 8,0 0 pieces $56 \times 60,7$; 10,000 do $56 \times 60,7$; 6, heavy; 5,000 do $60 \times 64, 8$; 50,000 do $64 \times 64,$ 8; 7, extras; 25,000 do $64 \times 64, 9$, extras. Total 78,000 pieces. Most sales of cloths are now made on a credit of thirty days.

GINGHAMS remain firm, without change in prices. Allamance plaid 18, Caledonia 14, Earlston 221-25, Glasgow 16, Hampden 16, Lancaster 17, Manchester 131.

MUSLIN DELAINES.—Prices for these goods have not yet been made, and the sales which take place are at prices to be fixed hereafter Hamilton 15-20, Lowell 15-20, Pacific Armures 2), do Alpacas 3-4 25, do 6 4 26, Pekins $22\frac{1}{2}$, Oriental Lustres 18.

TICKINGS are in fair request at firm prices. Albany 11, American 14¹/₂, Amoskeag A C A 36, do A 30, do B 25, do C 23. do D 21, Blackstone River 16¹/₂, Conestoga 26, do extra 31, Cordis AAA $3^{1}/_{2}$, do BB 17¹/₂, Hamilton 26, do D 21, Lewiston 36 35, 40 32 30, do 30 25, Mecs. and W'km's 29, Pearl River 33, Pemberton A A 2⁶, do E 18, Swift River 17, Thorndike 18, Whittenden A 22¹/₂, Willow Brook 28¹/₂, York 30 27, do 32 33¹/₂.

STRIPES are not much in demand, and seem to be slow of sale at present prices. Albany 10¹/₂, American 14-15, Amoskeag 23-24, Boston 15, Everett 13¹/₂, Hamilton 22, Haymaker 16, Sheridan A 14¹/₂, do G 15¹/₃, Uncasville A 16, do B 15, Whittenton AA 22¹/₂, do A 20, do BB 17, do C 15, York 22¹/₂.

DENIMS remain firm, and meet with a fair demand at unchanged rates. Albay y $12\frac{1}{2}$, Amoskeag 31, Blue Hill $13\frac{1}{2}$, Beaver Cr. blue $26\frac{1}{2}$, do CC 19, Columbian heavy 31, Haymaker Bro 18, Manchester 20, Otis AXA $28\frac{1}{2}$, do BB 26, do CC 21, Pearl River 30, Thorndike 19, Fremont 19.

Conset JEANS have sold fairly and remain firm, as they have been for most of the season. Amoskeag 15½. Androscoggin 13, Bates 12½, Everetts 15½, Indian Orch. Imp 13½, Laconia 15½, Naumkeag 15½, Newmarket 14, Washington satteen 17½.

CAMBRICS are sold ahead by agents at the present p ices. Amoskeag 10, Portland $7\frac{1}{2}$, Pequot $10\frac{1}{2}$, Victory H $9\frac{1}{2}$ do A 1..., Washington 10.

COTTON BAGS continue to be very firm, although prices are not further advanced. American \$45, Androscoggin \$45, Arkwright A \$45, Great Falls A \$45, Lewiston \$47, Ludlow AA \$47, Ontarioe \$47 50, Stark A \$47 50, do C 3 bush \$65, Union A \$30.

COTTON YARNS AND BATTS are unchanged. Best Georgia Cotton Yarns Nos. 6 to 12 38¹/₂, Best South Carolina small skeins 40.

SPOOL COTTON has advanced on most of the low priced brands. Quotations are now as follows: Brook's per doz. 200 yards 90, J. & P. Coat's 90, Clark, John, Jr. & Co. 90. Clark's Geo. A. 90, Willimantic 3 cord 52, do 6 cord 80, Stafford Brothers 45, Green & Daniels 47¹/₂, Parker Bros 3 cord 42¹/₂, Glasgow 45, Hadley 76, Holyoke 47¹/₂, Orr & McNaught 85, Pitchers 42.

WOOLENS.—Flannels are quiet, with the exception of a few lots bought on speculation. Prices on most makes are 5 to 10 per cent lower than they were at this time last year. Blankets are dull. Fore gn Cassimeres are sold up close; but for domestic manufacture the demand is less than the accumulation of stock, and business is dull.

FOREIGN DRESS GOODS.—There is very little doing in this department, as it is too early f r the general opening of new stock; and jobbers and retailers are no longer buying light labrics on account of the lateness of the season.

IMPORTATIONS OF DRY GOODS AT THE PORT OF NEW YORK.

The importations of dry goods at this port for the week ending July

BROWN DEILLS are rather scarce in the market, and continue to be very firm in both jobbers and agents hands. Amoskeag $17\frac{1}{2}$, Boott $17\frac{1}{2}$, Graniteville D 16 $\frac{1}{2}$, Laconia 17 $\frac{1}{2}$ Pepperel 17 $\frac{1}{2}$, Stark A 17 $\frac{1}{2}$, do H 15 $\frac{1}{2}$.

PRINTS.—There is nothing new in this line, We have heard the

8, 1869, and the corresponding weeks of i867 and 1868, have been as follows:

ENTERED FOR CONSUMPTION FOR THE WEEK ENDING JULY 8, 1869.

HARVEY FISK.

Office of FISK & HATCH,

A. S. HATCH.

Bankers & Dealers in Gov't Securities, No. 5 Nassau Street, New York.

Opposite U. S. Sub Treasury.

We receive the accounts of Banks. Bankers, Corporations, and others, subject to check at sight, and allow interest on balances. We make collections on all points in the United States and Canada, and issue Certificates of Deposit available in all parts of the Union.

We buy and sell, at current rates, all classes of Government Securities,

the Bonds of the Central Pacific Railroad Company; also Gold and Silver coin and Gold coupons.

We buy and sell at the Stock Exchange miscellaneous Stocks and Bonds, on commission, for cash.

We offer also the United States Sixper-cent. Thirty Year Currency Bonds. issued in aid of the Pacific Railroad, which are widely esteemed by moneyed corporations, as the longest Six-per cent. Government Bond in the market.

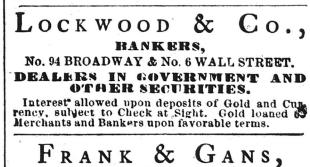

Communications and inquiries by Mail or Telegraph will receive attention.
