
(For Imuediate trey ease) August 8, 1958 MEMBER BANK EARNINGS, FIRST HALF OF 1958

A preliminary tabulation of menber bank earnings indicates that net profits after taxes and profit and loss adjustments amounted to $\$ 838$ million for tae first half of 1958. This was an increase of $\$ 269$ million over the corresponding period of 1957 and it reflects, for the most part, larger profits on sales of socurities. On an annual basjs the ratio of net profits to the average of total capital accounts was 11.3 per cent compared with 8.2 per cent for the first six months of 1957.

A rise of $\$ 254$ million in gross operating earnings was largely offset by a concurrent rise in operating expenses of $\$ 218$ million. Net current earnings befor income taxes wore $\$ 1,275$ million in the first half of the year, up $\$ 36$ million over the comparable period in 1957. Earnings on loans and earnings on U. S. Government securities advanced $\$ 106$ million and $\$ 62$ million, respectively, from the first half of 1957 levels as a result of larger average holdings and higher average rates of return on both. However, the average rates of return on both categories were slightly lower than in the second half of 1957.

The net effect of security transactions, other profit and loss adjustments and changes in valuation reserves resulted in an addition to member bank profits of $\$ 255$ million in contrast to a loss of $\$ 179$ million in the first half of last year. The last time member banks reported a net gain from this source was in the first half of 19.54 when they amounted to $\$ 104$ million.

The larger profits resulted in larger provisions for income taxes which amounted to $\$ 692$ million, $\$ 200$ million higher than in the corresponding period last year.

Cash dividends declared amounted to $\$ 306$ million in the first half of 1858 , representing a distribution of 37 per cent of net profits after taxes and an approxim mate vield of 4.1 per cent on average total capital accounts on an annual basis.
