### BOARD OF GOVERNORS OF THE FEDERAL RESERVE SYSTEM

January 7, 1946 R&S dsc - 58 G.17.3

# DEPARTMENT STORE CREDIT

# NOVEMBER 1945

Instalment accounts outstanding at department stores increased by somewhat more than the customary seasonal amount in November, and continued above the year-ago level. Collections on instalment accounts increased eight per cent, resulting in a collection ratio of 39 per cent as compared with 40 per cent in the preceding menth. Instalment accounts were collected in about four menths, approximately the same length of time as in November 1944.

Charge accounts receivable showed more than usual seasonal increase in November, and were 11 per cent higher than in the corresponding month last year. Collections increased considerably and the collection ratio rose to 67 per cent, one point higher than in October. The average period charge accounts were outstanding was approximately 45 days, about the same average as for November a year ago.

Gash and credit sales showed substantial gains over the October volume, as is usual in Movember. Cash sales, amounting to more than three-fifths of the total, were up 11 per cent over the year-period. Charge-account sales also were about one-tenth greater than a year ago, while instalment sales rose 7 per cent.
