DEPARTMENT STORE CREDIT

AUGUST 1947

Instalment accounts outstanding at department stores rose slightly during August, and at the end of the month were around three-fourths above the year-ago level. Collections on instalment accounts were down one per cent, and the ratio of collections to instalment accounts outstanding on the first of August was unchanged at 28 per cent. At the current rate of repayment instalment accounts would be outstanding, on the average, about six months.

Charge accounts receivable remained at the level of the preceding month, and were 15 per cent larger than at the end of August 1946. Collections on charge accounts were reduced substantially, and the August collection ratio of 51 per cent was two points lower than in July. The average repayment period for charge accounts outstanding in August was nearly two months.

Both cash and credit sales showed less than the usual expansion from July to August. Cash sales, accounting for 56 per cent of the total, were 16 per cent less than a year earlier. Instalment sales showed a year-to-year gain of 31 per cent, while charge-account sales fell below the year-ago volume for the first time since June 1944.
