

H.14

June 30, 1958.

#### CAPITAL MARKET DEVELOPMENTS

Large public security issues for new capital during the week ending June 27 totaled \$75 million for corporations, \$25 million for State and local governments, and \$50 million for foreign governments. Another corporate issue -- Standard Oil Company of California's \$150 million debentures-- scheduled for sale last week was postponed indefinitely because of market conditions. The calendar of large issues during this holiday-shortened week includes only two corporate issues totaling \$50 million. No large state and local government issues are expected.

Bond yields - Yields increased last week for all categories of outstanding bonds. The increase was slight for yields on corporate Baa's, but substantial for other types of bonds.

Yields on new corporate issues also increased last week. An Aa-rated first mortgage electric utility bond issue was offered to investors at a yield of 3.95 per cent -- 13 basis points above that for a comparable issue offered a week earlier.

July security volume - The July volume of corporate issues for new capital is expected to total about \$1,150 million, two-fifths greater than the revised estimate of the volume in June, and 15 per cent larger than the offerings in July of last year. Large public issues are expected to total over \$750 million, including a \$300 million debenture issue of United States Steel Corporation.

State and local government security issues are currently estimated at \$525 million. This volume would be 10 per cent greater than in June and about the same as the volume in July 1957.

Stock prices - Stock prices, as measured by Standard and Poor's index of 500 common stocks, increased slightly last week, closing a 44.90 on June 27. The volume of trading again averaged 2.7 million shares a day.

More detailed information concerning recent capital market developments is presented in the attached exhibits.

Capital Markets Section,  
Division of Research and Statistics,  
Board of Governors of the Federal Reserve System.

n.a.--Not available. p/ Preliminary.

1/ Standard and Poor's composite index of 500 common stocks, weekly closing prices, 1941-43=10. Monthly data are averages of daily figures rather than of Fridays' only. Highs and lows are for Friday's data only.

2/ Averages of daily trading volume on the New York Stock Exchange.

3/ Standard and Poor's composite stock yield based on Wednesday data converted to weekly closing prices by Federal Reserve.

4/ End of month figures for member firms of the New York Stock Exchange which carry margin accounts; excludes balances secured by U. S. Government obligations.

5/ Wednesday figures for weekly reporting member banks. Excludes loans for purchasing or carrying U. S. Government securities at banks in New York and Chicago. Weekly reporting banks account for about 70 per cent of loans to others. For further detail see Bulletin.

Note.--Highs and lows are for individual series and may be on different dates for different series.

\*--Single observation, not an average.

1/ Covers only 30-year first mortgage bonds, as reported in Moody's Bond Survey. Except where indicated, the actual yield figure and the amount above seasoned yields are averages of offerings during the indicated period and of the differences between these new offering yields and yields on seasoned issues of similar quality for the same day. Average maturity for the seasoned issues varies from 26 to 28 years.

2/ Provides for a 5-year period during which issue may not be called for refunding at a lower coupon rate. Monthly averages so marked include one or more issues with such a provision. Other issues have no such provision.
