

H.14

February 9, 1959

CAPITAL MARKET DEVELOPMENTS

New public security financing continues to be substantial. During the week ending February 6, corporations sold large issues totaling \$118 million and State and local governments sold issues with aggregate proceeds of \$98 million. A foreign government issue for \$20 million was also offered last week. This week, large corporate issues, including expiration of subscription rights, are expected to total \$130 million. Large State and local government bond issues amounting to \$70 million are also scheduled for sale. This State and local government financing total does not include a \$120 million revenue bond issue for Chicago-O'Hare International Airport, which may be sold this week by negotiation.

Bond yields - Yields on outstanding bonds showed little change last week. Yields on U. S. Government and high-grade corporate bonds declined slightly, while those on State and local government and lower-grade corporate bonds remained stable at their peak levels for this year.

Stock prices - Common stock prices and trading volume declined last week. Standard and Poor's index of 500 common stocks closed at 54.37 on February 6, the lowest level reached since before Christmas. Trading activity averaged 3.2 million shares a day.

More detailed information concerning recent capital market developments is presented in the attached exhibits.

Capital Markets Section,  
Division of Research and Statistics,  
Board of Governors of the Federal Reserve System.

Feb. 6 p/	54.37	3.2	3.33	n.a.	n.a.	n.a.

n.a. --Not available. p/ Preliminary.

1/ Standard and Poor's composite index of 500 common stocks, weekly closing prices, 1941-43=10. Monthly data are averages of daily figures rather than of Fridays' only. Highs and lows are for Friday's data only.

2/ Averages of daily trading volume on the New York Stock Exchange.

3/ Standard and Poor's composite stock yield based on Wednesday data converted to weekly closing prices by Federal Reserve. Yields shown are for dates on which price index reached its high or low.

4/ End of month figures for member firms of the New York Stock Exchange which carry margin accounts; excludes balances secured by U. S. Government obligations.

5/ Wednesday figures for weekly reporting member banks. Excludes loans for purchasing or carrying U. S. Government securities at banks in New York and Chicago. Weekly reporting banks account for about 70 per cent of loans to others. For further detail see Bulletin.

Note.--Highs and lows are for individual series and may be on different dates for different series.

\*--Single observation, not an average.

1/ Covers only 30-year first mortgage bonds, as reported in Moody's Bond Survey. Except where indicated, the actual yield figure and the amount above seasoned yields are averages of offerings during the indicated period and of the differences between these new offering yields and yields on seasoned issues of similar quality for the same day. Average maturity for the seasoned issues varies from 26 to 28 years.

2/ Provides for a 5-year period during which issue may not be called for refunding at a lower coupon rate. Monthly averages so marked include one or more issues with such a provision. Other issues have no such provision.
