NOTE: Series are seasonally adjusted except those series that appear to contain no seasonal movement. Unadjusted series are indicated by ⓤ. Current high values are indicated by B; for series that move counter to movements in general business activity (series 3, 5, 14, 39, 40, 43, 44, 45, and 93), current low values are indicated by B. Series numbers are for identification only and do not reflect series relationships or order. Complete titles and sources are shown at the back of the book. Series preceded by an asterisk (*) are included in the 1966 NBER "short list" of indicators (chart B8). The "r" indicates revised; "p", preliminary; "e", estimated; "a", anticipated; and "NA", not available.

[1] Reverse trend adjusted index of 12 leaders contains the same trend as the index of 5 coincident indicators. For historical data prior to reverse trend adjustment, see series 811 in Appendix C of this issue.

[2] Series that reached their high values prior to 1967 are as follows: Series 813, high value (109.4) reached in March 1966; Series 815, high value (110.1) reached in March 1966; Series 816, high value (120.1) reached in February 1966.
