<sup>1</sup> Excludes construction expenditures for crude petroleum and natural-gas drilling, and, therefore does not agree with the new construction expenditures in the gross national product.

<sup>2</sup> 1939 and subsequent years are not comparable to nonfarm residential construction in table C-3 since this series excludes certain outlays incident to construction which have been included in gross private domestic investment.

<sup>3</sup> Excludes farm and public utility; for 1929-32 includes negligible amount of public industrial and commercial building not segregable.

<sup>4</sup> Estimates based on incomplete data.

Sources: Department of Commerce and Department of Labor.

<sup>1</sup> Excludes construction expenditures for crude petroleum and natural-gas drilling, and therefore does not agree with the new construction expenditures included in the gross national product.

<sup>2</sup> Includes public utility, farm and other private construction, not separately shown.

<sup>3</sup> Includes residential, sewer and water, miscellaneous public service enterprises, conservation and development, and all other public construction not separately shown.

<sup>4</sup> Estimates based on incomplete data.

NOTE.—Series revised to include architectural and engineering fees, land development costs and profits on land development, operative builders' margins, additions and alterations, dormitories and other shelter in "private residential building"; privately-owned sewage disposal and water supply facilities, and privately-owned toll bridges and roads, parks, playgrounds, race tracks, stadiums, swimming pools, and similar recreational facilities, in "other private construction"; and construction of atomic energy facilities in "public construction." For detail see *Construction and Construction Materials, Statistical Supplement, May 1950*.
