the BUSINESS SITUATION

CHART 1

GNP increased further in the second quarter of 1965...

U.S. Department of Commerce, Office of Business Economics

65-7-1

BUSINESS activity continued to rise in June. Industrial production showed another modest gain, employment in most nonfarm industries was higher, and payrolls made a good-sized advance. Retail sales held close to the peak rate reached the month before, and unit sales of new automobiles improved considerably over the high but somewhat reduced rates of April and May.

The June advance rounded out another quarter of expansion in total output and sales, as indicated below in our presentation of preliminary second quarter GNP. At midyear, the principal stimulating factors in the economy were rising business fixed investment and increasing government (chiefly State and local) outlays. It appears likely that the favorable influence of these factors will continue in the summer months and will be buttressed by the effects of the excise tax cuts and the pending increase in Social Security benefits.

Swing in stock prices

Stock prices, which began to decline in mid-May, continued their downward movement through most of June and then recovered partially. Measured by Standard and Poor's index of 500 common stocks, stock prices decreased 9 percent from their May peak to the low reached on June 28. The setback was the largest since the first half of 1962, when prices dropped by more

Revisions of the national income and product estimates will appear in the August issue of the SURVEY. In addition to the revisions of the estimates for the last 3 years usually made in July to take into account primary data mainly from the Internal Revenue Service and the State unemployment insurance programs, the forthcoming series will incorporate also other data sources—principally the 1958 economic censuses which provide final benchmarks for many of the components of the income and product flow. Improvements in definitions and estimating techniques will also be reflected in the new estimates.

than one-fourth over a period of 6 months. Since late June, prices have recovered nearly half of the decline, and as of mid-July, the Standard and Poor's index was back to approximately its mid-February 1965 level.

Personal income up

Personal income in June showed a large increase as a result of a good-sized advance in payrolls, another spurt in farm proprietors' income, and a step-up in dividend payments. The total for

the month rose to a seasonally adjusted annual rate of \$524 billion, up \$4 billion from May. Payrolls increased in most industries and in total advanced almost \$2 billion in June.

The most striking aspect of last month's increase in personal income was the sharp \$1.4 billion rise in income of farm proprietors; this followed an even larger increase the month before. The improvement in recent months has been attributable mainly to the unusually large increase in livestock prices, which have been advancing since the first of the year. The physical volume of farm marketings has changed comparatively little so far this year. Prices received by farmers for meat animals rose 10 percent in May and 8 percent in June, to a point almost one-third above the level a year ago.

Employment higher

Last month's payroll increase reflected a seasonally adjusted advance of about 200,000 in nonfarm employment and further modest increases in average hourly earnings, which were in part offset by a small reduction in average hours worked per week. All of the major industry divisions showed employment increases over the month and, except for contract construction and mining, reached new peaks. Manufacturing employment was up almost 100,000, with most of the gain in durable goods.

Overtime work continues to be important and the length of the workweek in manufacturing relatively high, although average hours have been cut back somewhat from those reached early this year. In June, weekly hours of production workers averaged 41.0, down 0.1 hour from May and somewhat more from the first quarter average. Except for the early part of this year, the workweek was higher than at any other time in the postwar period.

The unemployment picture did not change much in June, as the seasonally adjusted unemployment rate edged up to 4.7 percent from 4.6 percent the month before. The rate for married men, at 2.4 percent, was the lowest so far this year.

Industrial production advances

Industrial production showed another modest increase in June, with widespread but small advances in most of the major industry groups.

Steel production was maintained at a very high rate. Ingot production totaled 11.6 million tons, down a little from the 12.0 million rate in April and May but somewhat higher on a seasonally adjusted basis.

Steel consumption continues to be very strong and steel inventories are still being accumulated, although the pattern of accumulation has changed. In May, for example, steel consumers in manufacturing industries and steel warehouses added only 400,000 tons to their stocks, the smallest increase since last October and far below the additions of about 1.3 million tons in each of the 2 preceding months. On the other hand, producing mills increased their stocks by 700,000 in May, after a sharp reduction in mill stocks from February through April; some further increase is expected in June. The mills apparently drew their inventories down to exceptionally low levels before the original May 1 strike deadline in an effort to satisfy customer demands.

Supported by brisk consumer purchasing, the auto industry continues to produce at a fast pace. More than 1 million passenger cars and trucks rolled off the assembly lines in June, the fourth consecutive month that completions reached or exceeded 1 million. After seasonal adjustment, June output was little changed from May. With the model changeover season coming about 2 weeks later this year—roughly

the end of July as compared with about mid-July in 1964—auto producers plan to turn out the largest number of cars for any July on record.

Prices up a little

Although wholesale prices of industrial commodities have continued to move up in recent months, the overall rate of advance has not shown any acceleration. In June, industrial prices rose 0.1 percent above May. Since last December, they have advanced 0.6 percent, as compared with a rise of 0.9 percent in the second half of 1964.

Price increases continue to be selective rather than widespread. Prices of nonferrous metals, which fell back in the early weeks of this year after their rapid 1964 climb, increased quite sharply again in the second quarter. Some resistance to the higher quotations has been evident in early July, however, and a few reductions have taken place. Prices of machinery continue to be quite firm, reflecting mainly the strong demand for business capital equipment.

Other price increases of significance in recent months include those for hides and skins, tires, selected paper products, and gasoline. On the other hand, prices of household appliances have been lowered further, and reductions have been posted for manmade textile fiber products and softwood plywood.

In contrast with the slow upward drift in industrial prices, wholesale prices of farm and food products have been increasing fairly sharply since the beginning of 1965. Both groups registered sizable increases in June. Farm products were 8.2 percent above their December level and processed foods, 5.1 percent higher.

These increases have been reflected in higher quotations at retail this spring. Food prices rose about 1½ percent from February to May and have accounted for a large part of the overall rise of 0.6 percent in the BLS Consumer Price Index over this period.

^p Preliminary.

Second Quarter Gross National Product

THE Nation's longest postwar business expansion continued through the second quarter as gross national product increased \$9 billion to a seasonally adjusted annual rate of \$658 billion, according to preliminary estimates. A gain of \$5 billion in personal consumption expenditures paced the advance, which included increases in most of the major markets. Government purchases rose by \$2½ billion, net exports by \$2 billion, and fixed investment by almost \$1 billion. Business continued to add to inventories during the second quarter but the rate of accumulation was about \$1 billion lower than in the first.

The 1½ percent rise in GNP reflected an increase of about 1 percent in physical volume and a rise in overall prices that was slightly more than the average quarterly rise over the past year. The expansion in production was accompanied by a 600,000 increase in employment, which averaged nearly 72 million during the quarter. The unemployment rate remained under 5 percent for the second consecutive quarter and, at 4.7 percent, was slightly lower than the average rate from January through March.

The second quarter expansion was a sizable one, even though it did not match the extraordinary first quarter gain, which reflected the recovery in auto sales and production from the strikes last fall. It was not very different from the average increase of the first three quarters of 1964.

Auto GNP in the second quarter of this year declined approximately \$2½ billion following a rise of \$9 billion in the first quarter of 1965 and a drop of about \$4 billion in the fourth quarter of 1964. Nonauto GNP in the second quarter of this year showed a larger increase than in any other quarter of the current expansion except the final

quarter of 1961. However, the increase in nonauto GNP for the first half of 1965 has been a little lower than the half-yearly increases since mid-1963.

Personal income up \$8 billion

Personal income rose by \$8 billion to an annual rate of nearly \$520 billion, with a \$5 billion increase in wages and salaries and a \$2 billion advance in farm proprietors' income. Business

and professional proprietors' income, dividends, and personal interest income continued to rise. Government transfer payments to persons were slightly below the first quarter level, which included advanced 1965 dividend payments to veterans holding Government life insurance.

The gains in wages and salaries were fairly widespread by industry, reflecting sizable increases in employment. Average hourly earnings rose slightly during the quarter, and in the important manufacturing sector average hours worked per week by production workers fell to 41 hours from the first quarter's postwar record of 41.4.

The rise in farm proprietors' income was one of the largest quarterly increases on record and was attributable to the sharp rise in prices received by farmers during the quarter while the volume of marketings was maintained.

Consumer demand continues strong

Consumer demand in the second quarter continued strong as expenditures for all major types of products, except automobiles, advanced. Expenditures for nondurable goods rose by \$3½ billion, for services by \$3 billion, and for durable goods excluding autos and parts by \$½ billion.

Consumer purchases of autos and parts fell by \$2 billion from the unusually high \$28½ billion rate of the first quarter. At \$26½ billion, however, expenditures on autos and parts were almost \$1 billion above the previous peak reached last summer.

Sales of new domestically produced cars were at a seasonally adjusted annual rate of about 8½ million in the spring months, down from the first quarter's record of 9¼ million but still considerably more than the 7½ million cars sold last year. Sales were at a rate of about 8 million in April and May

and jumped to almost 9 million in June. The June pickup may have reflected the influence of the reduction in the excise tax on new cars from 10 percent to 7 percent of the manufacturer's price. The tax reduction, covering a broad range of goods and services, was signed into law on June 22, 1965, but in the case of autos and room air conditioners, it was made retroactive to May 15. While the legislation was under consideration in Congress, the automobile manufacturers announced that all purchasers of new cars from May 15 until the date the bill was signed would receive from the manufacturers refunds equal to the tax cut.

Net exports rise after strikes

Based upon incomplete data, net exports of goods and services appear to have increased by \$2 billion in the second quarter. There was a drop of about the same size in the first quarter when strikes occurred at east and gulf coast ports. Both exports and imports rose in the more recent period,

and the excess of exports, at a \$7 billion annual rate, was the same as for the full year 1964.

Fixed investment continues rise

Business fixed investment rose by \$½ billion as businessmen continued to make substantial outlays for expansion and replacement. The rise was held back somewhat by the reduced rate of automobile purchases. The latest OBE-SEC survey indicates that plant and equipment expenditures are expected to rise further in the second half of the year.

Residential construction, which declined through most of 1964 and increased in the first quarter of 1965, was little changed in the second quarter. Although private nonfarm housing

65-7-4

starts in April and May were a little above the first quarter average, they were still below the peaks reached in late 1963 and early 1964. At the present time, new starts appear to be lagging because of the existence of relatively high vacancy rates in apartment houses in a number of large metropolitan areas.

Government purchases advance

Federal government purchases of goods and services, which had been essentially unchanged for the past three quarters, advanced by about \$1½ billion in the second quarter. Even so, these outlays were a little below the level of a year ago. State and local purchases continued their long-term upward trend, reaching a seasonally adjusted annual rate of almost \$67 billion in the second quarter. This represented a rise of \$1 billion from the opening quarter of 1965 and of \$4½ billion over the second quarter of last year.

Personal Income by States and Regions in 1964

Nonagricultural Incomes at Record Dollar Volume in All Regions

CONSUMER incomes rose to a record dollar volume in nearly every State in 1964, under the continuing impetus of the expansionary forces that have operated since early 1961 and the special influence of the income tax reductions.

For the Nation, total personal income amounted to \$491 billion last year, an increase of \$29 billion or 6½ percent over 1963. Per capita personal incomes also reached new highs in 1964. At \$2,566, the all-State average was more than \$100 or 5 percent above the previous year's figure.

These sizable 1964 gains in total and per capita personal income represented mainly increases in real purchasing power since consumer prices advanced approximately 1½ percent over the period.

Among regions, the largest dollar increases in total income were in the Midwest (\$7.3 billion), the Great Lakes (\$6.4 billion), the Southeast (\$5.5 billion), and the Far West (\$4.5 billion). The fact that the largest dollar gains last year were in these four areas reflects chiefly their economic size; together, they account for more than three-fourths of all personal income in the Nation.

In relative terms, the largest gains last year were in the Southeast, the Far West, the Great Lakes, and New England, where individuals' incomes expanded 7 percent. In the Southeast and Far West, the above-average economic expansion appears to have been mainly a continuation of the long-term income uptrend in these regions. In the Great Lakes, the better-than-average increase in 1964 reflected the

continued high rate of motor vehicle production throughout 1964.

The Mideast and Southwest matched the income gain of the Nation as a whole, with the economy of the Southwest benefiting significantly from growth in the aerospace and electronic manufacturing industries.

Only in the agricultural Plains and Rocky Mountain regions did personal income advance at below-average rates. In both, declines in farm income held the 1963-64 rise in aggregate income to 3 percent. Nonfarm income gains in the Plains and Rocky Mountain regions were closer to the national rate, although the indirect impact of the dip in agricultural income was apparent.

Per capita personal income

A significant portion of the State and regional differences in rates of change in aggregate income in a given year stems from differences in domestic migration rates in the various sections of the country. As a result of this migration, State differences in rates of change are generally less for per capita personal income than for total personal income. The 1964 changes conformed to this expected pattern.

In 30 States, the 1963-64 change in per capita income was within 1 percentage point of the average for all States. If the range is widened to 2 percentage points, an additional seven States are included. In a given year, most of the changes that differ substantially from the national rate are attributable to special economic factors, such as a sharp fluctuation in farm income in the agricultural States or a

cyclical downturn or recovery in industrialized areas.

Although rates of change in average incomes tend to be quite uniform from State to State, there are wide differences in income levels. In 1964, per capita incomes ranged from \$1,438 in Mississippi to \$3,460 in Delaware. It should be noted, however, that these dollar figures are not adjusted for regional differences in cost of living, size of family, or other factors that may affect standards of living. Accordingly, differences may be less in real terms than in current dollars.

Extremes in average income appear to show a distinct geographic pattern. Of the nine States (including the District of Columbia) with per capita incomes above \$3,000, all except one—Illinois—are located in the Northeast or Far West. Conversely, of the 11 States with incomes below \$2,000, all except 1—South Dakota—are located in the Southeast.

For the 31 States whose average incomes fall between these two groups, level of income appears to be principally associated with industrial structure. That is, the 13 States with per capita incomes ranging from \$2,450 to \$3,000 are generally the more industrialized States, while those States with incomes ranging from \$2,000 to \$2,450 rely to a large extent on agriculture and/or mining as major components of their economic base. Although some geographic pattern is evident, it is much less clear cut than the pattern shown by the first groups with the highest and lowest average incomes.

Scope of this report

This report, which measures State

Per Capita Income, 1964

SURVEY OF CURRENT BUSINESS

July 1965

U.S. Department of Commerce, Office of Business Economics

changes in the flow of personal income, continues the annual series, initiated in 1938, on State income payments to individuals. Preliminary estimates of personal income in 1964 were presented in the April 1965 issue of the *SURVEY*. That issue also contained a new State series: disposable personal income measured in both current and constant dollars.

Although the disposable income measure serves a number of purposes, it should be noted that trends in total and per capita disposable and real disposable income are practically identical with those in total and per capita current dollar personal income.

The 1964 income estimates in the April *SURVEY* were based on prelimi-

nary and incomplete information. In particular, wage and salary data from State unemployment insurance (UI) programs, which provide the major statistical underpinning for the State series, were available for only three quarters of 1964. The figures in this report reflect UI data reported for the full year.

Table 1 shows total personal income by States from 1954 through 1964. Table 2 presents annual estimates of per capita income from 1950 forward. Comparable figures for earlier years back to 1929 may be found in "Personal Income by State Since 1929," a 1956 supplement to the *SURVEY*, which is available in libraries and which may

still be purchased from the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C., 20402, or from the nearest U.S. Department of Commerce Field Office at \$1.50 per copy.

Tables 4 through 62a present a breakdown of personal income in each State and region by major source for the period 1962-64. This detail includes wage and salary disbursements classified into about 25 separate industries, proprietors' income subdivided into farm and nonfarm components, and totals for each of the other main types of personal income. Comparable data for 1929-53 are contained in the Personal Income supplement noted above.

CHART 6

Percent Changes in Personal Income, Per Capita Income, and Population, by Regions,—1961-64

Relative changes in total income and population since 1961 show a continuation of postwar trends, with the Southeast and Far West advancing faster than Northeastern regions

Figures for 1954-56 may be found in the August 1959 issue of the SURVEY; for 1957 in the August 1960 SURVEY; and so on through the August 1964 issue, which contains estimates for 1961.

Because of the numerous requests for breakdowns of State personal income by industrial source, this report includes estimates of the industrial sources of income in each State in 1957 and 1961.

These are shown in tables 63 and 70, along with figures for 1964. Comparable information for 1929, 1933, 1940, 1946, 1948, and 1950 may be found in the Personal Income supplement.

1. Total includes Alaska and Hawaii 1960-64 but not in earlier years.

As noted on page 1 of this issue, the August SURVEY will contain the results of a major revision of the national income and product accounts. Because of timing, the revisions have not been incorporated into the State estimates;

this will be done later this year. A similar situation applies also to the State estimates of farm income that are furnished each year by the U.S. Department of Agriculture. The 1964 estimates contained in this report represent

a continuation of the unrevised series. Accordingly, they differ somewhat from the figures that will appear in the supplement to the July issue of the "Farm Income Situation" of the U.S. Department of Agriculture.

Footnotes to table 63:

1. Consists of net income of farm proprietors, farm wages, and farm "other" labor income, less personal contributions under the OASI program.

2. Consists of income disbursed directly to persons by the Federal and State and local governments. Comprises wages and salaries (net of employee contributions for Social Insurance), other labor income, interest and transfer payments.

3. Equals total personal income less farm income and government income disbursements.

NOTE.—U.S. totals include Alaska and Hawaii.

Footnotes to table 70:

1. Consists of wage and salary disbursements, other labor income, and proprietors' income.

2. Does not include earnings of military personnel.

3. Less than \$500,000.

NOTE.—U.S. totals include Alaska and Hawaii.

Table 63.—Broad Industrial Sources of Personal Income, by States and Regions, 1961

Table 70.—Industrial Sources of Civilian Income Received by Persons for Participation in Current Production, by States and Regions, 1961¹

Footnotes to table 63:

1. Consists of net income of farm proprietors, farm wages, and farm "other" labor income, less personal contributions under the OASI program.

2. Consists of income disbursed directly to persons by the Federal and State and local governments. Comprises wages and salaries (net of employee contributions for Social Insurance), other labor income, interest and transfer payments.

3. Equals total personal income less farm income and government income disbursements.

NOTE.—U.S. totals include Alaska and Hawaii.

Footnotes to table 70:

1. Consists of wage and salary disbursements, other labor income, and proprietors' income.

2. Does not include earnings of military personnel.

3. Less than \$500,000.

NOTE.—U.S. totals include Alaska and Hawaii.

CURRENT BUSINESS STATISTICS

THE STATISTICS here update series published in the 1963 edition of BUSINESS STATISTICS, biennial Statistical Supplement to the SURVEY OF CURRENT BUSINESS. That volume (price \$2.00) contains data by months, or quarters, for the years 1959 through 1962 (1951-62, for major quarterly series) and averages of monthly or quarterly data for all years back to 1939; it also provides a description of each series and references to sources of earlier figures. Series added or significantly revised after the 1963 BUSINESS STATISTICS went to press are indicated by an asterisk (*) and a dagger (†), respectively; certain revisions for 1962 issued too late for inclusion in the aforementioned volume appear in the monthly SURVEY beginning with the August 1963 issue. Also, unless otherwise noted, revised monthly data (for periods not shown herein) corresponding to revised monthly averages are available upon request.

Statistics originating in Government agencies are not copyrighted and may be reprinted freely. Data from private sources are provided through the courtesy of the compilers, and are subject to their copyrights.

Unless otherwise stated, statistics through 1962 and descriptive notes are shown in the 1963 edition of BUSINESS STATISTICS	1962	1963	1964	1962			1963				1964				1965

[†] Revised. ¹ Index as of July 1, 1965: Building, 119.1; construction, 128.6.

² Annual average based on quarterly data. ³ End of year.

⁴ Copyrighted data; see last paragraph of headnote, p. S-1.

⁵ Revisions for 1961—Apr. 1964 will be shown later.

⁹ Includes data for items not shown separately.

○ Monthly data prior to 1963 are on p. 20 of the Feb. 1965 SURVEY.

§ Data include guaranteed direct loans sold; these became sizable after 1962.

† Data revised beginning 1961; revisions prior to Mar. 1964 will be shown later.

‡ Revised series. Data revised beginning 1st qtr. 1963 to reflect net time costs (including talent, production, and rights); figures for 1st qtr. 1963—1st qtr. 1964 will be shown later.

Unless otherwise stated, statistics through 1962 and descriptive notes are shown in the 1963 edition of BUSINESS STATISTICS	1963	1964	1964								1965

* Revised. † Preliminary. ‡ Calendar year total.

§ Number of stocks represents number currently used; the change in number does not affect continuity of the series. ¶ Includes data not shown separately. † Revised series; former series covered fire insurance only. ‡ Revisions for various periods prior to Feb. 1963 will be shown later. ○ Beginning Jan. 1965, data reflect adoption of revised export schedule;

in some instances, because of regrouping of commodities and release of some "special category" items from the restricted list, data for commodities and countries may not be comparable with those for earlier periods. ¶ Includes grant-aid shipments under the Dept. of Defense Military Assistance Program, as well as economic aid shipments under other programs. Δ Excludes "special category" shipments. ○ Country designation established Jan. 1964.

Unless otherwise stated, statistics through 1962 and descriptive notes are shown in the 1963 edition of BUSINESS STATISTICS	1963	1964	1964								1965

* Revised. † Preliminary. ‡ Effective Sept. 1963, data reflect adoption of U.S. Tariff Schedules and are not entirely comparable with earlier figures; also, beginning Sept. 1963, certain uranium bearing materials, formerly shown under crude materials, are included with semimanufactures (monthly averages reflect this change beginning Jan. 1963). Beginning Jan. 1964, data for furs and mfrs. and petroleum and products reflect further changes in USTS.
 2 Quarterly average. 3 Number of carriers filing complete reports for 1963 and 1964.

4 Reflects substitution of data for one or two intra-Alaskan carriers. † See similar note on p. S-21. ‡ Includes data not shown separately. * New series. Data for periods not shown may be obtained from Bu. of Census reports. † Revised to exclude military grant-aid shipments; comparable earlier data will be shown later. ‡ Excludes "special category" shipments and all commodities exported under foreign-aid programs as Department of Defense controlled cargo. † See similar note on p. S-21.

Unless otherwise stated, statistics through 1962 and descriptive notes are shown in the 1963 edition of BUSINESS STATISTICS

† Revised. ‡ Annual index. § Number of carriers filing complete reports for 1963.
 ¶ Data cover 5 weeks; other periods, 4 weeks. † Based on unadjusted data. ‡ Quarterly average. § See note "C." ¶ Based on revised total; monthly revisions not available.
 † Quarterly total.
 ‡ Revisions for 1962 are in the Aug. 1963 SURVEY. § Includes data not shown.

¶ Beginning Jan. 1965, visits to Canyonlands Natl. Park are included; such 1st qtr. 1965 visits totaled less than 500.

‡ Effective Sept. 1964, ocean-cable and radiotelegraph carriers have been classified by FCC as "international" telegraph carriers; data for month of Sept. 1964 and quarterly data beginning 4th qtr. 1964 cover operations for this group.

Unless otherwise stated, statistics through 1962 and descriptive notes are shown in the 1963 edition of BUSINESS STATISTICS	1963	1964	1964								1965

* Revised. ¹ Beginning Jan. 1965, data include Alaska and Hawaii.

○ Revisions for months of 1962 appear on p. 24 of the Mar. 1964 SURVEY; those for the months of 1963 on p. 28 of the Apr. 1965 SURVEY.

\$ Data are not wholly comparable on year to year basis because of changes from one size classification to another.

² The averages shown for gas are quarterly averages.

† Revised data for 1st and 2d qtrs. of 1962 appear in the Sept. 1963 SURVEY; those for 1st and 2d qtrs. of 1963 will be shown later.

‡ Includes data not shown separately.

Unless otherwise stated, statistics through 1962 and descriptive notes are shown in the 1963 edition of BUSINESS STATISTICS	1963	1964	1964								1965

† Revised. * Preliminary. † See note "O" for p. S-21.

‡ Crop estimate for the year. § Quarterly average.

¶ Old crop only; new crop not reported until beginning of new crop year (July for barley, oats, rye, and wheat; Oct. for corn. † Less than 50,000 bu.

‡ Revisions are available upon request as follows: Jan. 1961-June 1962 and Jan.-May 1963 for cheese and nonfat dry milk; Jan.-June 1962 and Jan.-May 1963 for butter and condensed, evaporated, and dry whole milk.

‡ Revised series; data reflect inclusion of creamed cottage cheese and frozen products (formerly excluded). Revisions for 1946 and 1952-58 (former series) and 1958-62 (revised series) appear on p. 24 of the Mar. 1964 Survey.

§ Excludes a small amount of pearl barley.

† Revised series (for No. 2; formerly, for No. 3).

¶ Bags of 100 lb.

¹ Revised. ² Preliminary. ³ Beginning Jan. 1963, includes data for Alaska and Hawaii.
⁴ Quarterly average. ⁵ See note "C" for p. S-21. ⁶ Effective Sept. 1963, includes small amounts of refined sugar, tintured, colored, or adulterated. ⁷ Data beginning Jan. 1964 not entirely comparable with those for earlier periods. ⁸ Beginning 1962 on annual basis and Jan. 1964 monthly, data are not comparable with those for earlier periods; consumption for feed now based on renderers' shipments instead of feed mill reports. ⁹ Beginning March

1963, includes General Services Administration stocks no longer required for the strategic stockpile. ¹⁰ Based on corrected annual total; months not corrected. ¹¹ Corrected.
¹² Cases of 30 dozen. ¹³ Bags of 132.276 lb.
¹⁴ Includes data not shown separately; see also note "S." ¹⁵ Monthly data reflect cumulative revisions for prior periods.
¹⁶ For data on lard, see p. S-28.
¹⁷ Revisions for Jan.-June 1962 appear in the Sept. 1963 SURVEY.

Unless otherwise stated, statistics through 1962 and descriptive notes are shown in the 1963 edition of BUSINESS STATISTICS	1963	1964	1964								1965

† Revised. ‡ Preliminary. † Beginning Jan. 1963, data for the indicated items exclude certain oils which have been reclassified as petrochemical feedstocks.

‡ Effective Jan. 1963, "screenings, etc." included with "defibrated or exploded."

‡ Effective Jan. 1963, excludes stocks of "own pulp" at paper and board mills.

‡ See note 5 for p. S-35. ‡ See note "O" for p. S-21.

† Revised monthly data for 1962 for petroleum products appear on p. 28 of the June 1964 SURVEY; revisions for 1962 and 1963 for asphalt and tar products appear on p. 32 of the Apr. 1964 SURVEY.

Unless otherwise stated, statistics through 1962 and descriptive notes are shown in the 1963 edition of BUSINESS STATISTICS	1963	1964	1964								1965

* Revised. † Preliminary. ‡ Weekly average for year. § See note "O" for p. S-21.
 ¶ Revisions for 1961 are available upon request.
 † Monthly averages for 1962 for new orders, production, and shipments reflect revisions to adjusted annual totals; revisions by months not available.
 § As reported by publishers accounting for about 74 percent of total newsprint consumption

in 1963 and 75 percent in 1964 and 1965.
 § Revised to reflect weekly averages for new orders, production, and percent activity (on basis of 6.5 days per week); comparable data prior to 1962 will be shown later. © Revisions by months for 1962-Feb. 1963 will be shown later.

Unless otherwise stated, statistics through 1962 and descriptive notes are shown in the 1963 edition of BUSINESS STATISTICS	1963	1964	1964								1965

Consuming establishments.....do.	12,818	14,290	12,820	11,932	10,916	11,058	12,341	15,754	17,354	18,706	18,115	17,464	16,021	15,080	14,099	
Foreign cotton, total.....do.	1,361	1,317	1,448	1,271	1,120	887	853	946	1,234	1,456	1,640	1,762	1,824	1,784	1,753	
	128	114	95	80	72	135	134	125	120	112	107	104	95	88	80	

† Revised. † Data cover 5 weeks; other months, 4 weeks. † Total crop for year.

‡ Ginnings to Dec. 13. ‡ Ginnings to Jan. 15. ‡ Beginning Jan. 1965, excludes finished, used in prepared masonry cement (128,000 bbls. in Dec. 1964).

§ Comprises sheathing, formboard, and laminated board.

¶ Effective Feb. 1965 Survey, monthly data (back to 1960) reflect adjustment to benchmarks and other basic changes; see Census report: "Woven Fabrics, M22A (64)-Supplement 1." Beginning Jan. 1964, data for total cloth are not comparable with those for earlier periods; manmade fabrics classifications were revised and drapery fabrics included.

♂ Stocks (owned by weaving mills and billed and held for others) exclude bedsheeting, toweling, and blanketing, and billed and held denims; small quantities of finished fabrics are included. ¶ Unfilled orders cover cotton fabrics (gray and finished, except bedsheeting, blankets, and toweling) and manmade fiber fabrics (gray, except blanketing).

Δ Total ginnings to end of month indicated, except as noted. ○ Revisions for Aug. 1962-Dec. 1963 are available; for stocks, monthly averages also reflect cotton released by GSA from the cotton stockpile (beginning July 1962).

INDEX TO CURRENT BUSINESS STATISTICS, Pages S1-S40

SECTIONS

General:

Business indicators	1-7
Commodity prices	7, 8
Construction and real estate	9, 10
Domestic trade	10-12
Employment and population	12-16
Finance	16-21
Foreign trade of the United States	21-23
Transportation and communications	23, 24

Industry:

Chemicals and allied products	25
Electric power and gas	26
Food and kindred products; tobacco	26-30
Leather and products	30, 31
Lumber and products	31
Metals and manufactures	32-34
Petroleum, coal, and products	35, 36
Pulp, paper, and paper products	36, 37
Rubber and rubber products	37
Stone, clay, and glass products	38
Textile products	38-40
Transportation equipment	40
