# *the* BUSINESS SITUATION

**REVISED** GNP figures show a small increase in output in the second quarter. On a revised basis, real GNP increased 1½ percent, compared with a ¼ percent decline in the preliminary figures a month ago. The rate of price increase remained about the same as in the preliminary figures. The rate for the GNP chain price index was revised from 5¼ percent to 5½ percent.

Most of the upward revision in real GNP was in net exports and in change in business inventories. Other components were little changed. The revision in net exports reflects both a smaller decline in merchandise exports and a larger decline in merchandise imports than had been estimated initially. The revision in change in business inventories reflects less inventory decumulation in wholesale and retail trade than had been estimated initially. The new estimates incorporate the June data on book value inventories for manufacturing and trade, which showed that trade book values increased for the first time since December 1974 and that manufacturing book values declined again. The June data tend to confirm the judgment made last month that decumulation in manufacturing would continue longer than the adjustment in trade.

## *Corporate profits*

The preliminary estimate of profits from current production, the measure included in the national income and product accounts (NIPA's), increased \$6 billion from the first quarter. The increase was in domestic earnings. Profits in manufacturing were up \$5 billion, with most industries showing

gains. The largest gains were in petroleum refining, chemicals, and non-electrical machinery, and in motor vehicles, which registered a considerably smaller loss than in the first quarter. Earnings in primary metals were down. In nonmanufacturing, earnings were up in transportation and communications.

The preliminary estimate of before-tax book profits rose \$7½ billion from the first quarter. In addition to the increase in profits from current production, inventory profits were up \$1½ billion. In the NIPA's, inventory profits are measured by the inventory valuation adjustment (with its sign reversed) and are defined as the excess of replacement cost of goods taken out of inventory over the cost at which these goods are charged to production. Inventory profits in most industries declined from the first to second quarter as the rate of price increase slackened or prices turned down. These declines, however, were more than offset by a swing from an inventory loss to an inventory profit in food retailing, wholesaling, and manufacturing. The swing was caused by a turnabout in the prices of farm products and processed food—prices had declined in the first quarter and increased in the second.

## *Federal sector of NIPA's in the second quarter*

Tax cuts and expenditure increases provided for in the Tax Reduction Act of 1975 largely accounted for a substantial increase in the second-quarter Federal deficit as measured in the NIPA's. Provisions of the act resulted in a \$40.5 billion decline in receipts and a \$7.2 billion increase in expenditures

(table 1, and see the April 1975 *SURVEY* for a detailed discussion of the act). The deficit amounted to \$104.6 billion at a seasonally adjusted rate, nearly double the \$54.4 billion deficit recorded in the first quarter. The deficit will decline in the third quarter, however, since some of the major provisions of the act—such as income tax rebates and the \$50 payment to social security and adult welfare recipients—are of a one-time nature.

The large decline in receipts attributable to the Tax Reduction Act was concentrated in personal tax payments, which fell sharply due to the tax rebate and to a reduction in withholding rates

**Table 1.—Second-Quarter 1975 Changes in Federal Government Receipts and Expenditures, NIPA's Basis**

[Billions of dollars]

	Change from previous quarter		
	Total	Tax Reduction Act	Other

7. Equals: Consumer Price Index (percent change at annual rate).....	12.7	7.9	5.9

that became effective May 1. Partly offsetting these factors was an increase in tax payments that largely resulted from higher wages and salaries. Corporate tax liabilities recovered strongly in the second quarter, after a substantial decline in the first.

Indirect business taxes continued to advance; increases in import duties on petroleum offset decreases in other in-

direct taxes. The duty on petroleum imports increased from \$0.8 billion in the first quarter to \$2.0 billion in the second, as a result of: (1) the full-quarter effect of the \$1 import duty on crude petroleum, effective February 1; (2) an increase in the duty to \$2, effective June 1; and (3) a 60-cent duty on petroleum products, also effective June 1.

Approximately 75 percent of the second-quarter increase in expenditures was due to the impact of the Tax Reduction Act, "automatic stabilizers," and new antirecession programs, which were mainly reflected in transfer payments and grants-in-aid to State and local governments.

The increase in transfer payments accounted for nearly 70 percent of the advance in total expenditures and resulted mainly from the one-time \$50 payment to social security and adult welfare recipients and from higher unemployment benefits. Grants continued to advance strongly as spending for new public employment programs increased. (Over 300,000 persons were employed in public service jobs by the end of the quarter.) Nondefense purchases advanced strongly as a result of heavy buying of agricultural products by the Commodity Credit Corporation; defense purchases were essentially unchanged. Net interest paid increased sharply in the second quarter, after remaining flat in the first. Subsidies (less the current surplus of government enterprises) increased moderately, and foreign transfer payments were unchanged.

### Special tables

Reconciliations of the implicit price deflator for personal consumption expenditures with the Consumer Price Index and of compensation per hour with average hourly earnings are shown in tables 2 and 3.

**Table 3.—Reconciliation of Changes in Compensation Per Hour and Average Hourly Earnings, Private Nonfarm Economy, Seasonally Adjusted**

	1975		
	IV	I	II
1. Compensation per hour <sup>1</sup> of all persons (percent change at annual rate).....	10.3	8.6	7.8
2. Less: Contribution of supplements.....	.4	2.1	.5
3. Less: Contribution of employees of private households and government enterprises and self-employed and unpaid family workers.....	.7	-.4	-.2
4. Equals: Wages and salaries per hour, all employees except private household and government enterprises (percent change at annual rate).....	9.2	6.9	7.5
5. Less: Contribution of supervisory and non-production workers, non-BLS data, and detailed weighting, total.....	.1	1.9	2.2
Commodity-producing industries.....	.9	.8	.7
Manufacturing.....	1.5	.4	.6
Distributive industries.....	-.1	.8	.5
Service industries.....	-.7	.3	1.0
6. Equals: Average hourly earnings, production and nonsupervisory workers, obtained from seasonally adjusted industry components (percent change at annual rate).....	9.1	5.0	5.3
7. Less: Contribution of seasonal adjustments by industry.....	.1	.3	.1
8. Equals: Average hourly earnings, production and nonsupervisory workers (percent change at annual rate).....	9.0	4.7	5.2

1. These data differ from the series published by BLS because hours have been adjusted to make them comparable to those implicit in the compensation series. The BLS figures for the fourth, first, and second quarters are 9.4, 9.4, and 7.8, respectively.

## HISTORICAL STATISTICS

THE national income and product data for 1929-63 are in *The National Income and Product Accounts of the United States, 1929-1965, Statistical Tables* (available at \$1 from Commerce Department District Office or the Superintendent of Documents; see addresses inside front cover). The July 1974 SURVEY has data for 1970-73. Prior July issues have fully revised data as follows: 1969-70, July 1973; 1968-69, July 1972; 1967-68, July 1971; 1966-67, July 1970; 1965-66, July 1969; 1964-65, July 1968. BEA will provide on request a reprint of the fully revised data for the years 1964-69.

\*Second quarter corporate profits (and related components and totals) are preliminary and subject to revision next month.

1. The gross auto product total includes government purchases.

2. Differs from the gross auto product total by the markup on both used cars and foreign cars.

3. Quarterly inventories are end of quarter; annual inventories are average of fourth quarter of prior year and four quarters of current year.

\*See footnotes on page 4.

1. Excludes gross product originating in the rest of the world.

2. This is equal to the deflator for gross product of nonfinancial corporations, with the decimal point shifted two places to the left.

3. Personal saving as a percentage of disposable personal income.

4. On February 18, 1974, the U.S. Government granted to India \$2,015 million (quarterly rate) in rupees under provisions of the Agricultural Trade Development and Adjustment Act. Tentatively, this transaction is being treated as capital grants paid to foreigners in the national income and product accounts but as current unilateral transfers in the balance of payments accounts. Accordingly, this transaction is excluded from Federal Government transfers to foreigners and related totals shown in tables 13, 14, and 16, and is included in the first quarter of 1974 as —\$8.1 billion (annual rate) in capital grants received by the U.S. shown in tables 13 and 16.

5. Title has been changed to include a new temporary Federal program of unemployed who are not insured under existing programs.

CHART 1

Percent Change in Nonfarm Personal Income, 1973-74

U.S. Department of Commerce, Bureau of Economic Analysis

# State Personal Income, 1973-74

**T**OTAL personal income in current dollars rose in 47 States and the District of Columbia and fell in 3 States from 1973 to 1974. In 32 States and the District of Columbia, however, the change in current-dollar income was well under the rise in consumer prices, and real income was down substantially. Nationally, current-dollar income rose 9¼ percent, and consumer prices (as measured by the implicit price deflator for personal consumption expenditures) rose 11½ percent; thus, real income was off 2¼ percent.

Gains in current-dollar income exceeded the national rise in consumer prices in only 10 States—Alaska, Idaho, Washington, Wyoming, Florida, Oregon, South Carolina, Louisiana, Arizona, and Kentucky—where advances ranged from 21½ to 11¼ percent. Nearly all of these States registered large increases in labor and proprietors' income in manufacturing, mining, construction, and a variety of service-type industries. In eight States—Maine, California, Hawaii, Virginia, North Carolina, Texas, Colorado, and Utah—gains in income ranged from 11½ to 10¼ percent, about the same as, or only slightly less than, the rise in prices. In 29 States and the District of Columbia, gains ranged from 2½ to 10 percent. In the remaining three States—Iowa, North Dakota, and South Dakota—

NOTE.—State and regional income estimates were prepared in the Regional Economic Measurement Division under the direction of Lowell D. Ashby. Staff members participating were Wallace Bailey, Jr., Linda Barnes, Kenneth Berkman, Joan Bolyard, Robert Brown, Vivian Conklin, Q. Francis Dallavalle, Dennis Drinka, Linnea Hazen, Eunice James, Robert Klear, Gordon Lester, Jr., Myles Levin, Paul Levit, Richard McCarthy, Judith Meckley, Alan Millican, Susan Mullaney, Robert O'Bannon, Virginia Olin, Elizabeth Queen, William Reid, Jr., Katharine Richardson, Victor Sahadachny, Austin Schmitt, Rodney Thorn, and Patricia Wood. Estimates of State total tax and nontax payments were prepared by Steven Tzaneff under the supervision of Kenneth Berkman. Data processing assistance in the preparation of disposable personal income estimates was provided by Ronald G. Reel. Robert B. Bretzfelder of the Regional Economic Analysis Division prepared the discussion of the estimates.

This report presents revised estimates of annual regional and State personal income and disposable personal income for 1959 and 1967-74. These estimates replace those published for the same years in the April 1975 and earlier issues of the SURVEY OF CURRENT BUSINESS. The revisions in the estimates for 1972-74 incorporate revised national totals and improvements in the State data.

The publication schedule of the State disposable personal income estimates has been changed. In the past, estimates of State disposable personal income were published infrequently and irregularly. The publication of preliminary disposable personal income in the April 1975 SURVEY, together with publication of revised estimates in this issue, begins an annual update and revision of the series.

Estimates of total and per capita personal income and disposable personal income are shown for 1959 and for 1967-74 in tables 1 and 2. Estimates for 1929, 1940, and 1948-57, together with definitions of personal income and disposable personal income, can be found in the April 1969 SURVEY. Estimates for 1958 and 1960-66 that incorporate revisions in the residence adjustment for selected States are available from the Regional Economic Measurement Division, Bureau of Economic Analysis, U.S. Department of Commerce, Washington, D.C. 20230. Also available from the division is table 3, which shows the related Bureau of Census population estimates for each year as of July 1.

Estimates of personal income by major source are presented for 1972-74 in tables 4-63. These estimates are shown in greater industry detail for labor and proprietors' income than in prior publications. Similar detail for 1958-71 is available from the division.

current-dollar income declined from ½ to 4¼ percent, and real income was down sharply. In these three States, which are heavily dependent on farming, farm income declined 25 percent or more, compared with a 17 percent decline in the Nation.

However, farm income, both nationally and in the States where it is an important source of income, often changes fairly independently of national business cycles, and these changes—frequently sharp and erratic—obscure current cyclical developments. Thus, a clearer picture of the effects that the national business conditions are having on States can be seen in the changes in nonfarm income.

## Nonfarm Income

Nationally, nonfarm income grew 10¼ percent from 1973 to 1974, with increases in the States ranging from 6¼ percent in Rhode Island to 21½ percent in Alaska. The effects of the current national recession on nonfarm income were concentrated in the North and East and were least apparent in the South and West (table A and map). Below-average gains in nonfarm income were registered in 11 States and the District of Columbia (where current-

dollar income increased from 6¼ to 9½ percent); gains approximately equaled the average in 12 States (up 9¼ to 10¼ percent) and were above the average in 27 States (up 11 to 21½ percent). The mean nonfarm income gain was 8¼ percent among the 11 below-average States, and 12½ percent among the 27 above-average States. (Table A lists the States in each of the three groups. The States are ranked according to percent change in nonfarm income.)

Manufacturing, mining, and Federal Government payrolls accounted for most of the State differentials in nonfarm income changes. Sharp increases or decreases in these sources of income explained the fast or slow expansion in State economies. Sharp advances in unemployment compensation payments cushioned the weakness in other sources.

Manufacturing payrolls (up 8¼ percent) expanded at a somewhat lower rate than nonfarm personal income, but the rates of change varied among industries. Auto payrolls were little changed (up one-half percent); this held the gains in nonfarm income in many Great Lakes and Mideast States to low levels. On the other hand, a rise in aerospace payrolls helped to stimulate

(Continued on page 38)

# Sales by Majority-Owned Foreign Affiliates of U.S. Companies, 1973

**S**ALES by majority-owned foreign affiliates of U.S. companies rose 37 percent, to \$291.5 billion, in 1973.<sup>1</sup> The growth rate was more than double that of any other year since this series began in 1966, and increases were widespread across all major industries and areas (chart 2 and table 1).

The share of affiliate sales exported to the United States, 7 percent, was about the same as in 1972, although the value of such exports rose 39 percent, to \$20.0 billion. As shares of total sales, exports to other countries increased, and local sales decreased; this primarily reflected shifts in petroleum sales (table 2).

Several factors contributed to the record rise in affiliate sales in 1973. Accelerated economic expansion in most developed countries raised aggregate demand and capacity utilization to high levels. This expansion was accompanied by increased rates of inflation. Since the sales estimates are in current dollars, part of the sales rise reflects the impact of inflation. No attempt has been made to quantify that impact.

Inflation was intensified by petroleum developments. During 1973, the price of most foreign crude oil doubled; the posted price of benchmark light Arabian crude oil rose from approximately \$2.60 to approximately \$5.00 a barrel. (Posted prices are set by governments of some host countries and are used by producing affiliates to compute tax and royalty payments to these governments; in some cases, the affiliates are legally required to use these prices in keeping

their books.) Most of the rise in petroleum prices occurred late in the year. The rise had a direct effect on the value of sales by petroleum affiliates, particularly those engaged in extracting crude oil. Also, higher fuel costs were indirectly reflected in higher prices charged by many nonpetroleum affiliates.

There was also a significant increase in crude oil production by many affiliates in response to higher demand

in developed countries. (Foreign crude oil production was higher in 1973 than in 1972 despite the Arab oil embargo and production cutbacks near the end of 1973.) The higher prices and increased production resulted in a doubling of sales by petroleum affiliates in the Middle East and in substantial increases in sales by affiliates in other extracting areas.

NOTE.—Estimates were prepared under the supervision of David H. Galler.

CHART 2

Sales by Majority-Owned Foreign Affiliates of U.S. Companies, 1966-73

U.S. Department of Commerce, Bureau of Economic Analysis

75-8-2

<sup>1</sup> The technical note discusses coverage and definition of these sales estimates and revisions to the previously published estimates for 1967-72.

The devaluation of the U.S. dollar in February 1973 and the dollar's further depreciation vis-a-vis several major currencies in the remainder of the year also contributed to the increase in sales. To the extent that sales on affiliates' books were recorded in foreign currencies that appreciated against the dollar, the translation of the sales to dollars at the new exchange rates would have increased their dollar value. The impact of devaluation varied, depending on the change in the dollar's value relative to the currency of the country where the affiliate was located. For example, the value of the U.S. dollar changed little against either the Canadian dollar or the British pound; this partly accounts for the fact that sales increases in Canada and the United Kingdom, while substantial, were below those in countries such as West Germany and Japan, whose currencies appreciated substantially against the U.S. dollar.

Table 1 shows total affiliate sales in 1966-73 by industry and by major area where the affiliate was located, and tables 5A-H cross-classify sales by industry by country. Tables 2, 3, and 4 disaggregate sales by destination to show the amounts sold locally, exported to the United States, and exported to other foreign countries. Table 2 shows sales to each destination in 1972 and 1973 by industry and by major area. Sales to each destination in 1966-73 are cross-classified by area by major industry in table 3, and by area by selected manufacturing industry in table 4.<sup>2</sup>

### Sales by Industry and Area

#### Petroleum

Sales by petroleum affiliates rose 53 percent, to \$90.9 billion, in 1973. Increases were most rapid for affiliates in developing areas, primarily those

engaged in extraction, and for international shipping affiliates. Affiliates in developed areas, primarily those engaged in refining and marketing in Europe, also had strong increases.

The sharp increase in the posted prices of crude oil by the Organization of Petroleum Exporting Countries (OPEC) was an important factor in the increase in sales.<sup>3</sup> Also, there were significant increases in production, which resulted from heavy demand in developed countries, particularly in Europe. For example, in Saudi Arabia—the largest oil producing country in OPEC—1973 production was 26 percent above the 1972 level.

Sales in the Middle East more than

2. Tables showing local sales, exports to the United States, and exports to other foreign countries further disaggregated by area and by industry of affiliate (43 countries by 13 industries) for 1966-73 are available from the Bureau of Economic Analysis, U.S. Department of Commerce, Washington, D.C. 20230.

3. In 1973, OPEC consisted of Algeria, Ecuador, Indonesia, Iran, Iraq, Kuwait, Libya, Nigeria, Qatar, Saudi Arabia, Venezuela, and the United Arab Emirates.

European Economic Community (9) <sup>4</sup> .....									107.0							

1. Estimates for 1967-72 have been revised. See technical note for a discussion of the revisions.

2. Consists of Belgium, France, Germany, Italy, Luxembourg, and the Netherlands.

3. The United Arab Republic (Egypt) is included in "Other Africa."

4. Consists of the European Economic Community (6), Denmark, Ireland, and the United Kingdom.

NOTE.—Details may not add to totals because of rounding.

doubled, to \$21.3 billion (tables 5G and 5H). Sales increases in Canada, Venezuela, Nigeria, and Indonesia—other major extracting areas—ranged from 45 to 64 percent. In Libya, where production slackened during the year, sales grew only 23 percent.

Sales in continental Western Europe rose 39 percent, led by a sharp increase by German affiliates. In the United Kingdom, on the other hand, there was only a small increase, as decreased sales by several marketing affiliates largely offset increases by other affiliates.

Sales by affiliates in the "international and unallocated" category, consisting largely of revenues of tanker affiliates, rose 76 percent, to \$7.6 billion. Strong growth in tanker revenues resulted from both an increase in shipments associated with the rise

in demand for petroleum in developed countries, and a sharp rise in tanker rates.

By destination, petroleum affiliates increased exports to other foreign countries more rapidly than local sales or exports to the United States. Exports to other foreign countries, at \$30.7 billion, were 34 percent of total petroleum sales in 1973, compared with 30 percent in 1972. Most of the increase was accounted for by Middle Eastern affiliates, whose primary market is Europe.

In 1973, exports to the United States were \$6.8 billion, compared with \$3.9 billion in 1972, and accounted for 7 percent of total petroleum sales, unchanged from 1972. Venezuelan affiliates increased exports to the United States 71 percent, to \$1.5 billion (table 3). In Canada, where crude oil prices rose much less than in OPEC countries,

exports to the United States rose approximately 40 percent, to \$1.4 billion. Exports to the United States from Middle Eastern affiliates doubled, to \$1.1 billion, despite the Arab embargo from October through the end of the year.

Petroleum affiliates' sales by destination should be interpreted carefully. Producing affiliates, located mainly in developing areas near crude oil sources, sell primarily to refining affiliates, located mainly in developed areas near final markets. Thus, sales by producing affiliates are largely exports and those by refining affiliates are largely to local customers.

Moreover, sales by producing affiliates to refining affiliates give rise to some duplication in the sales data. Sales of crude oil are reported by producing affiliates, and sales of refined

Table 2.—Distribution of Sales by Majority-Owned Foreign Affiliates of U.S. Companies, by Destination, 1972<sup>1</sup> and 1973

NOTE.—Details may not add to totals because of rounding.

products made from that crude oil are reported by refining affiliates.

### **Manufacturing**

Sales rose 31 percent, to \$140.9 billion, in 1973; all manufacturing industries registered substantial gains.

Sales by chemical affiliates expanded most rapidly—up 43 percent, to \$25.5 billion—due to a strong increase in demand for basic industrial supplies. In addition, because petroleum is a primary production input of many chemical affiliates, increases in petroleum prices had a stronger impact on chemical prices than on prices of other manufactured products.

Sales increases in other manufacturing industries ranged from 23 to 33 percent. The increases in paper and allied products and in food products partly reflected supply shortages in consuming areas.

Sales by manufacturing affiliates in developed countries rose 30 percent, to \$121.2 billion. Affiliates in Canada and in the United Kingdom increased sales 19 and 23 percent, respectively. As mentioned previously, the exchange rates of these countries' currencies against the U.S. dollar did not change significantly. Sales by affiliates in the six original member countries of the European Economic Community (EEC (6)) rose 36 percent, to \$47.8 billion, reflecting the strong rise in industrial production in that area. Sales by French affiliates rose 41 percent, to \$11.8 billion; chemicals, electrical machinery, and transportation equipment sales were particularly strong. In West Germany, affiliates increased sales 34 percent, to \$19.3 billion.

Sales by Japanese affiliates rose 74 percent, to \$4.4 billion—the most rapid rate of increase among major developed countries. The rise was due to strong economic expansion, substantial appreciation of the yen against the dollar, and liberalization of government controls on foreign direct investment. Most of the rise was in chemicals, and resulted from sales by affiliates established in 1973, as well as from large sales increases by existing affiliates.

In developing countries, affiliates increased sales 38 percent, to \$19.7

billion. Most of the increase was concentrated in Latin America, particularly in Brazil where sales in chemicals, food products, and transportation equipment were strong.

The distribution of sales *by destination* for all manufacturing affiliates combined was unchanged in 1973 from 1972. Local sales, at \$109.1 billion, accounted for 77 percent of the total; this reflected the fact that most foreign manufacturing affiliates are established to serve local markets.

Exports to the United States rose 22 percent, to \$9.5 billion, and their share of total manufacturing sales, little changed since 1968, was just below 7 percent (table 4). As in past years, a large part of these exports to the United States was accounted for by transportation equipment affiliates in Canada. This reflected the impact of the 1965 U.S.-Canadian automotive agreement, which encouraged U.S. companies to produce automobiles and related parts in Canada for sale in the U.S. market. In 1973, these affiliates' exports to the United States totaled \$4.5 billion, but were up only 12 percent from 1972; local sales grew more rapidly, by 26 percent.

Exports to the United States by all other manufacturing affiliates combined rose 33 percent, to \$5.0 billion. Canadian affiliates manufacturing paper and allied products had a particularly strong increase; this in part reflected supply shortages in the United States.

### **Mining, trade, and other industries**

Sales by mining affiliates rose 25 percent, to \$4.0 billion, in 1973; this rise followed declines in the preceding 2 years. Copper, iron ore, and zinc mining affiliates in Canada and copper mining affiliates in Peru accounted for most of the rise. Partly offsetting this rise was the exclusion from the sales estimates of an affiliate in Australia in which U.S. equity fell below 50 percent in 1973. Sales by trade affiliates rose 29 percent, to \$38.9 billion. Increases were particularly strong in Australia, the Netherlands, and West Germany. Affiliates in all other industries combined—including agriculture, public utilities, transportation, con-

struction, finance, and other services—increased sales 38 percent, to \$16.9 billion.

*By destination*, more than half of the worldwide increase in mining sales was in exports to the United States, where demand for primary metals was strong. These exports accounted for 36 percent of total mining sales in 1973, compared with 32 percent in 1972. The destination of sales by affiliates in trade and in "other industries" did not shift significantly from 1972.

## **Technical Note**

### **Coverage and definitions**

The universe estimates of sales by majority-owned foreign affiliates of U.S. companies are derived from data collected in an annual sample survey and benchmarked to BEA's 1966 census of U.S. direct investment abroad. Majority-owned foreign affiliates are those in which U.S. equity interest—both directly and indirectly held—is at least 50 percent. An indirectly owned affiliate is one that is directly owned by another foreign affiliate of the U.S. parent, rather than by the U.S. parent itself.

Sales data are based on affiliates' books; however, sales recorded on affiliates' books in foreign currencies are translated into U.S. dollars before being reported to BEA. The data generally exclude receipts of sales, excise, or consumption taxes, but include a significant amount of inter-company sales. No adjustments have been made to reflect possible differences in valuation between sales to affiliated and unaffiliated customers. See Part II of the August 1974 SURVEY OF CURRENT BUSINESS for a more complete discussion of the estimates.

Estimates of sales by destination show the amounts sold locally (that is, to customers in the country where the affiliate is located), exported to the United States, and exported to other foreign countries. Where estimates for affiliates in individual countries were aggregated into broader area groups, such as the EEC (6) in tables 2-4, sales to a given destination are summa-

tions of the sales to that destination for each country in the group. *Local sales* by EEC (6) affiliates therefore refers only to the sum of sales by each of these affiliates in its own country; it excludes the value of their export sales to other EEC (6) countries. The

latter are classified as *exports to other foreign countries*. Thus, *local* refers only to the affiliate's own country, not to an area group.

#### Revisions of 1967-72 estimates

Estimates for 1973 are published for

the first time. Those for 1967-72, previously published in Part II of the August 1974 SURVEY, have been revised. The sales data for these years were reviewed and revised concurrent with the processing of sample data on affiliate sources and uses of funds,

Table 5A.—Total Sales by Majority-Owned Foreign Affiliates of U.S. Companies, by Country and Industry, 1966

[Millions of dollars]

which were collected in the same survey as the sales data.

Data for petroleum affiliates classified in "international and unallocated" were particularly affected by the revisions. Most of these affiliates are en-

gaged in tanker operations. To conform to the treatment in the 1966 benchmark survey, all 1967-73 sales not reported as exports to the United States by international tanker affiliates have been classified as local sales, even if they had

been reported originally as exports to other foreign countries.

Other revisions resulted from a comparison of sales data from the annual sample survey for 1970 to sales data separately reported in BEA's 1970

<sup>D</sup> Suppressed to avoid disclosure of data of individual reporters.

1. Estimates for the year have been revised. See technical note for a discussion of the revisions.

2. The United Arab Republic (Egypt) is included in "Other Africa."

NOTE.—Details may not add to totals because of rounding.

Special Survey of U.S. Multinational Companies. In this comparison, certain affiliates that had been treated as established or acquired in 1971 were found to have been reported in the special survey in 1970. In such cases, data for 1970

were added to the annual sample for 1970, and the affiliates were treated as additions to the sample in that year rather than in 1971.

Another revision involved two large Canadian companies in which total

U.S. ownership had exceeded 50 percent and in which no one U.S. person owned 10 percent or more; these two companies were eliminated from the sample when their U.S. ownership fell below 50 percent. One company, a

D Suppressed to avoid disclosure of data of individual reporters.

1. Estimates for the year have been revised. See technical note for a discussion of the revisions.

2. The United Arab Republic (Egypt) is included in "Other Africa."

NOTE.—Details may not add to totals because of rounding.

manufacturer of primary and fabricated metals, was eliminated beginning in 1971; the other, a mining company, was eliminated beginning in 1972.

Revised estimates for 1967-72 are shown in tables 5B-G. (The 1966

benchmark data, shown in table 5A, have not been changed.) The revised estimates for total sales for 1967-70 differ from the previously published estimates by less than 1 percent; for 1971 and 1972, the revised estimates

are lower by 3 and 4 percent, respectively. For detail by area, industry, or destination, the differences are, in some cases, substantially larger than those for total sales.

(Continued from page 8)

nonfarm income in the Far West. Coal mining payrolls expanded more than 20 percent, with gains particularly important in several Rocky Mountain, Southeast, and Southwest States. Nationally, Federal payrolls expanded at a slightly lower rate than nonfarm income, but in several New England States, they were off sharply. In the District of Columbia, a meager gain in Federal payrolls held back the overall gain in nonfarm income. Service-type industries followed the pattern in the basic sources of income in nearly all of the relatively slow- and fast-gaining States. Finally, vigorous gains in unemployment compensation payments offset some of the weakness in nonfarm personal income, especially in the States where manufacturing was weakest.

**States well below average**

Ten of the eleven States where nonfarm income grew at rates well below

the national average are located in the three usually slow-growing regions in the East and North: New England, Midwest, and Great Lakes. The 10 States are Rhode Island, Michigan, New York, Indiana, Delaware, Massachusetts, Ohio, New Jersey, Vermont, and Illinois. In addition, income in the District of Columbia expanded slowly. The remaining State with a gain well below average, Missouri, although not located in the Great Lakes Region, is adjacent to, and has many characteristics in common with, that region.

**States well above average**

Of the 27 States where nonfarm income grew at a pace well above the national average, all but 2 States—Alaska and Hawaii—are located in the regions of the South and West, which have usually grown faster than the national average (table A and map). The 32 States constituting the five regions of

the South and West (Southeast, Southwest, Plains, Rocky Mountain, and Far West) include only 6 States (California, Minnesota, Colorado, Nevada, West Virginia, and Georgia) where nonfarm income grew at near-average rates and 1 State (Missouri) where it grew at a below-average rate.

Among the fast-growing States, sharp gains in mining were registered in Alaska, Wyoming, New Mexico, Montana, Kentucky, Texas, and Tennessee. In these States, mining either is an important source of income or is rapidly growing in importance.

In Florida, Arizona, and New Mexico, large gains occurred in service-type industries because the States continued to attract new residents and vacationers. These States have been among the fastest growing in the Nation since the late 1960's or earlier. (See "State Nonfarm Income: Recent Growth Patterns," SURVEY OF CURRENT BUSINESS, April 1975.)

**Summary of Budget Receipts and Expenditures of the Federal Government, 1913-1975**

# CURRENT BUSINESS STATISTICS

THE STATISTICS here update series published in the 1973 edition of BUSINESS STATISTICS, biennial statistical supplement to the SURVEY OF CURRENT BUSINESS. That volume (available from the Superintendent of Documents for \$5.15) provides a description of each series, references to sources of earlier figures, and historical data as follows: For all series, monthly or quarterly, 1969 through 1972 (1962-72 for major quarterly series), annually, 1947-72; for selected series, monthly or quarterly, 1947-72 (where available). Series added or significantly revised after the 1973 BUSINESS STATISTICS went to press are indicated by an asterisk (\*) and a dagger (†), respectively; certain revisions for 1972 issued too late for inclusion in the 1973 volume appear in the monthly SURVEY beginning with the August 1973 issue. Also, unless otherwise noted, revised monthly data for periods not shown herein corresponding to revised annual data are available upon request.

The sources of the data are given in the 1973 edition of BUSINESS STATISTICS; they appear in the main descriptive note for each series, and are also listed alphabetically on pages 189-90. Statistics originating in Government agencies are not copyrighted and may be reprinted freely. Data from private sources are provided through the courtesy of the compilers, and are subject to their copyrights.

† Revised. ‡ Preliminary. † Revised series. Estimates of national income and product and personal income have been revised back to 1971 (see p. 11 ff. of the July 1974 SURVEY); revisions prior to May 1973 for personal income appear on pp. 22-23 of the July 1974 SURVEY.

Revised data for national income and product and personal income customarily published in July issues of the SURVEY will be postponed until later; see box note on p. 11 of the July 1975 SURVEY. † Includes data not shown separately.

Unless otherwise stated in footnotes below, data through 1972 and descriptive notes are as shown in the 1973 edition of BUSINESS STATISTICS	1972	1973	1974	1972		1973				1974				1975

† Revised. ‡ Preliminary. § Estimates (corrected for systematic biases) for Apr.-June and July-Sept. 1975 based on expected capital expenditures of business. Expected expenditures for the year 1975 appear on p. 17 of the June 1975 SURVEY. ¶ Includes communication. † See corresponding note on p. S-1. ¶ Includes inventory valuation

adjustment. ⊕ Personal outlays comprise personal consumption expenditures, interest paid by consumers, and personal transfer payments to foreigners.

§ Personal savings is excess of disposable income over personal outlays.

¶ Data for individual durable and nondurable goods industries components appear in the Mar., June, Sept., and Dec. issues of the SURVEY.

Unless otherwise stated in footnotes below, data through 1972 and descriptive notes are as shown in the 1973 edition of BUSINESS STATISTICS	1972	1973	1974	1972			1973				1974				1975 <sup>p</sup>

Revised. † Preliminary. ‡ Computed from cumulative valuation total. ‡ Data for new construction have been revised back to 1958; those for housing starts and permits, back to 1959. The revised data are available from the Bureau of the Census, Washington, D.C. 20233. ○ Data for Aug. 1973 for nonresidential building and nonbuilding construction appearing in the Oct. 1974 SURVEY were transposed; they should have read (mil. \$): Nonresidential building, 3,167; non-building construction, 2,453. ♀ Data for Aug. and Oct. 1971 and Jan. and May 1975 are for 5 weeks; other months, 4 weeks. ○ Includes data for items not shown separately. ◊ Corrected.

Unless otherwise stated in footnotes below, data through 1972 and descriptive notes are as shown in the 1973 edition of BUSINESS STATISTICS	1973	1974	1974							1975

† Revised. ‡ Preliminary.  
 § Average for year. ¶ Daily average. †† Beginning Jan. 1973, data reflect changes in sample and weighting. ††† Beginning June 30, 1974, data revised to include one large mutual savings bank that merged with a nonmember commercial bank. Total loans and investments were increased by about \$600 million of which \$500 million were in loans and \$100 million in "other securities."  
 †††† Beginning Aug. 28, 1974, loans sold outright to banks' affiliates reflect a new definition of the group of affiliates included, and a somewhat different group of reporting banks; total loans were \$500 million less than they would have been on the old basis. ⊙ A1-adjusted to exclude interbank loans. § For bond yields, see p. S-21. ††††† Beginning Jan. 1973, monthly data have been revised to reflect new seasonal factors and a justifying to benchmarks for the latest call date (June 30, 1973). Revisions are in the Nov. 1973 Federal Reserve Bulletin.

Unless otherwise stated in footnotes below, data through 1972 and descriptive notes are as shown in the 1973 edition of BUSINESS STATISTICS	1973	1974	1974							1975

<sup>1</sup> Revised. <sup>2</sup> Preliminary. <sup>3</sup> End of year. <sup>4</sup> Beginning fourth quarter 1973, because of changes in method of consolidation (to minimize the effect of foreign operations of multinational enterprises), data are not comparable with those for earlier periods. The effect of the change can be assessed by comparing the data as originally published for the fourth quarter 1973 (June 1974 Survey) with the revised data. <sup>5</sup> Prior to fourth quarter 1973, for petroleum refining only; data are not comparable with those for earlier periods. <sup>6</sup> Beginning Jan. 1974, does not include noncorporate bonds and notes formerly included. <sup>7</sup> Effective February 1974 SURVEY, data revised to reflect: Annual review of seasonal

factors: regular benchmark adjustment; effect of changes in check collection procedures (Regulation J); and adjustments to include new figures from internationally oriented banking institutions. Monthly revisions back to 1971 are in the Feb. 1974 Federal Reserve Bulletin. <sup>8</sup> At all commercial banks.

⊕ Total SMSA's include some cities and counties not designated as SMSA's. <sup>9</sup> Includes Boston, Philadelphia, Chicago, Detroit, San Francisco-Oakland and Los Angeles-Long Beach. <sup>10</sup> Includes data not shown separately.

Unless otherwise stated in footnotes below, data through 1972 and descriptive notes are as shown in the 1973 edition of BUSINESS STATISTICS	1973	1974	1974						1975

<sup>\*</sup> Revised. <sup>†</sup> Preliminary. <sup>‡</sup> Before extraordinary and prior period items. <sup>§</sup> Comparison with year-ago data may be affected by the change in reporting actual tonnage carried instead of billed tonnage, per the ICC Uniform System of Accounts (1/1/74). <sup>¶</sup> Annual total; monthly data not revised. <sup>||</sup> See corresponding note on p. S-23. <sup>∞</sup> Includes data not shown separately. <sup>∞</sup> Applies to passengers, baggage, cargo, and mail carried. <sup>∞</sup> Passenger-miles as a percent of available seat-miles in revenue service reflects proportion of seating capacity actually sold and utilized. <sup>∞</sup> Total revenues, expenses, and income for all groups of carriers also reflect nonscheduled service. <sup>\*</sup> New series. Source: ICC (not comparable data prior to 1972). <sup>∞</sup> Indexes are comparable for the identical quarter of each year (and from year to year); see <sup>†</sup>. <sup>∞</sup> Natl. Railroad Pass. Corp. (Amtrak), not included in AAR data above, operations for 1973 and 1974 (mil. dol.): operating revenues, 202; 257; operating expenses, 328; 463; net income, -159; -273 (ICC). <sup>∞</sup> See corresponding note, bottom of p. S-25. <sup>∞</sup> See corresponding note, bottom of p. S-25. <sup>∞</sup> For 1st qtr. 1974.

Unless otherwise stated in footnotes below, data through 1972 and descriptive notes are as shown in the 1973 edition of BUSINESS STATISTICS	1973	1974	1974						1975

Revised. Preliminary.  
 1 Annual total; revisions not distributed to the monthly or quarterly data. 2 For six months ending in month shown. 3 For month shown. \*See note "A" p. S-22.  
 †Effective May 1975 SURVEY, series restated to shift index to the 1967 base month and to show separately operations for hotels and for motor-hotels; comparable data back to May 1971 are available. Revised May 1974 (order as above), 129; \$25.19; 64; \$18.96; 69.  
 \*Refers to average daily rent per occupied room, not to scheduled rates.  
 ‡ Includes data not shown separately.  
 § Monthly revisions back to 1971 are available upon request.  
 ¶ In the footnote of the 1973 BUSINESS STATISTICS a distinction is made between "gross weight" and "sulfur content." However, because the difference is so minute, the Bureau of Mines no longer makes this distinction.

NOTES FOR P.S.-24—Beginning 1975 (and restated year-ago period), data reflect changes in accounting to include provision for deferred taxes and other changes. For general comparison under former accounting method, net railway operating income for 1st qtr. 1975 is about \$18 mil. lower (and for 1st qtr. 1974, about \$38 mil. lower); for motor carriers, net income for 1st qtr. 1975 is about \$3.2 mil. lower (and for 1st qtr. 1974, about \$1.8 mil. lower).  
 \* Effective 1974, comparison of operating revenues and expenses with prior periods is affected by revised reporting regulations. Beginning 1974, other transport-related revenues and expenses are reported gross in operating revenues and in expenses rather than as net in operating revenues. For the year 1974, for total certificated route carriers, this reporting change had the effect of increasing operating revenues by 2.5% and expenses by 2.7%.

Unless otherwise stated in footnotes below, data through 1972 and descriptive notes are as shown in the 1973 edition of BUSINESS STATISTICS	1973	1974	1974							1975

† Revised. † Reported annual total; revisions are not distributed to the monthly data.  
 § Data are not wholly comparable on a year to year basis because of changes from one classification to another. ♂ Data are reported on the basis of 100 percent content of the specified material unless otherwise indicated. ‡ Monthly revisions back to 1971 are avail-

able upon request. Ⓞ In the 1973 BUSINESS STATISTICS the unit reads "millions of gallons"; it should read "thousands of gallons." † Monthly revisions for 1973 will be shown later. † Corrected.

Unless otherwise stated in footnotes below, data through 1972 and descriptive notes are as shown in the 1973 edition of BUSINESS STATISTICS	1973	1974	1974							1975

$\uparrow$  Revised.  $\uparrow$  Preliminary.  $\uparrow$  Annual data; monthly or quarterly revisions are not available.  $\uparrow$  For month shown.

$\uparrow$  Effective May 1973 SURVEY, prices are in terms of dollars per short ton.

$\uparrow$  Revised series. Beginning in the Nov. 1974 SURVEY, steel mill inventories at service centers

reflect (beginning 1967) new sample panel for the Census "Wholesale Trade Report" and (beginning 1962), revised unit prices for converting value of merchant wholesalers' iron, steel, etc., inventories to tonnage equivalent. Monthly revisions for 1962-72 are on p. S-32, June 1975 SURVEY.

Unless otherwise stated in footnotes below, data through 1972 and descriptive notes are as shown in the 1973 edition of BUSINESS STATISTICS	1973	1974	1974							1975

\* Revised. † Preliminary. ‡ Annual data; monthly revisions are not available.  
 ‡ Less than 50 tons.  
 Δ Effective Jan. 1974 includes items not covered in earlier periods: Aluminum—pipes, tubes, blanks, etc.; copper—imports of alloyed refined, and exports of ores, concentrates, blister, etc. § All data (except annual production figures) reflect GSA remelted zinc and zinc purchased for direct shipment.  
 † Includes secondary smelters' lead stocks in refinery shapes and in copper-base scrap.  
 ‡ Effective with the Aug. 1974 SURVEY, data revised to omit exports of wrought tin and tin alloys. † Producers' stocks elsewhere, end of July 1975, 23,800 tons.  
 ‡ Revisions for Jan.-May 1974 (order and units as above): Jan., 1,299.1; 989.4; 537.5; Feb., 1,202.5; 897.8; 480.5; Mar., 1,308.5; 999.1; 541.1; Apr., 1,361.5; 971.4; 518.7; May, 1,240.7; 982.5; 525.2.

Unless otherwise stated in footnotes below, data through 1972 and descriptive notes are as shown in the 1973 edition of BUSINESS STATISTICS	1973	1974	1974						1975

Revised. Preliminary. Annual data; monthly or quarterly revisions not avail.  
 Excludes figures for rubber-tired dozers. For month shown. Data cover 5 weeks; other periods, 4 weeks. Beginning 1st qtr. 1974, tractor shovel-loader class excludes shipments of tractor shovel-loader/backhoes (front engine mount); of this type, data for the tractor chassis only are now included in the wheel tractor class (year 1974 data, 22,235 units valued at \$153.1 mil.). Data are for 6 weeks. Reflects unusually large cancellations for Nov. 1974, mostly in the automotive industry. Effective Jan. 1975 (and for corresponding restated year-ago month), the total includes shipments of trash compactors; data for compactors are not included in annual totals or in figures for other months of 1974. Jan.-Apr. Effective June 1973 SURVEY, index revised back to 1970.  
 Revised data for Jan. 1971-Apr. 1973 are in the Jan. 1975 SURVEY. Subsequent revisions (beginning Jan. 1974), effective Aug. 1975 SURVEY, incorporate gross new orders from all reporting groups, comparable with data prior to 1974. Revised indexes, Jan.-May 1974 (1967=100): 208.1; 204.3; 199.3; 213.5; 207.0.  
 Effective Jan. 1973, data reflect total market as follows: Sets produced in the United States, imports by U.S. manufacturers for sale under their brand name and, beginning 1973, sets imported directly for resale. Includes data not shown separately.  
 Price index (Nat'l. and Southern Industrial Distributors Associations), based on U.S. Dept. Labor prices of 10 industrial supply/equipment prod. groups weighted according to survey of Assn. members' distributors sales (series avail. back to 1967). Appliances (Assn. of Home Appliance Manufacturers). Monthly revisions back to 1972 will be shown later.

Unless otherwise stated in footnotes below, data through 1972 and descriptive notes are as shown in the 1973 edition of BUSINESS STATISTICS	1973	1974	1974							1975

\* Revised. † Less than 50 thousand barrels. ‡ Reflects revisions not available by months. § Beginning Jan. 1974, data may reflect input of lease condensate, natural gas plant liquids, unfinished oils, and other hydrocarbons which are processed through the crude oil distillation facilities. No comparable data for earlier periods are available. ¶ Beginning Dec. 1974, stocks reflect data from approximately 100 additional bulk terminals and are not comparable with those for earlier periods. No earlier data are available for these terminals. † Adjustments affecting supply and demand data will be available from Bureau of Mines at a later date. ‡ Not comparable with earlier periods; see note 4 for this page. § Includes data not shown separately. ¶ Includes nonmarketable catalytic coke.

‡ Includes small amounts of "other hydrocarbons and hydrogen refinery input," not shown separately. † Monthly revisions back to 1972 will be shown later. § Beginning March 1974 SURVEY, data are restated to account for processing gain and crude losses not previously included; comparable data for earlier periods will be shown later. ¶ Effective with Jan. 1974 data, series known as "Gross input to crude oil distillation units"; see note 3 for this page. † New Series. The source has discontinued prices for the former specification. Comparable indexes for earlier periods will be shown later. For gasoline and kerosene see also similar note on p. S-36. ‡ Beginning June 1975 SURVEY, the prices for all months have been transferred forward (i.e., Dec. price moved into Jan. period) since they are for "mid-month" instead of "1st of month" as formerly.

Unless otherwise stated in footnotes below, data through 1972 and descriptive notes are as shown in the 1973 edition of BUSINESS STATISTICS	1973	1974 <sup>p</sup>	1974						1975

<sup>r</sup> Revised. <sup>p</sup> Preliminary. <sup>c</sup> Corrected.  
<sup>1</sup> Reported annual total; revisions not allocated to the months. <sup>2</sup> Less than 50 thousand barrels. <sup>3</sup> Beginning with January 1975, data for soda combined with those for sulphate; not comparable with data for earlier periods. <sup>4</sup> See note 4 for p. S-35.  
<sup>5</sup> Beginning March 1975, data for defibrated or exploded, screenings etc., not available; not comparable with those for earlier periods.  
<sup>6</sup> Monthly revisions back to 1971 will be shown later.  
<sup>7</sup> New series. The Bureau of Labor Statistics has revised its pricing program and discon-

tinued prices for the former specification. The index shown is developed from revenue and volume data collected directly from petroleum companies. The pricing formerly was based on spot quotations in trade journals, which over the past year have come to represent a decreasing portion of domestic transactions. Because of the time required to collect the new data there will be a one-month lag in pricing; e.g. the May 1974 index reflects changes in prices from Mar. to Apr. Except for gasoline, (p. S-35) comparable data prior to April 1973 are available upon request.

Unless otherwise stated in footnotes below, data through 1972 and descriptive notes are as shown in the 1973 edition of BUSINESS STATISTICS	1973	1974	1974							1975

<sup>†</sup> Revised. <sup>‡</sup> Preliminary. <sup>§</sup> Reported annual total; revisions not allocated to months.  
<sup>¶</sup> Publication of monthly rubber statistics was discontinued by the Census Bureau effective with the Dec. 1972 report (Series M30A). Data beginning Jan. 1973 are from the Rubber Manufacturers Association and are not strictly comparable with earlier data. <sup>‡</sup> Beginning January 1974, data reflect reduction in basis weight of newsprint from 32 to 30 lbs. for 500 sheets measuring 24" x 36"; data for January 1974 on 32-lb. basis (thous. short tons): Canada—production, 840; shipments, 815; stocks, 222; United States—production, 289; shipments, 285; mill stocks, 29; consumption by publishers, 586; stocks at and in transit, 676. <sup>§</sup> Beginning Feb. 1975, data reflect indexes in lieu of dollar amounts formerly shown. <sup>¶</sup> Metric tons (thous.) beginning Jan. 1975.  
<sup>†</sup> Represents the sum of uncoated book paper and writing and related papers (including thin paper) formerly shown separately; data for new orders no longer available for the individual items.  
<sup>‡</sup> As reported by publishers accounting for about 75 percent of total newsprint consumption.  
<sup>§</sup> Monthly data are averages for the 4-week period ending on Saturday nearest the end of the month; annual data are as of Dec. 31.

Unless otherwise stated in footnotes below, data through 1972 and descriptive notes are as shown in the 1973 edition of BUSINESS STATISTICS	1973	1974	1974						1975

\* Revised. † Annual total; revisions not allocated to the months or quarters. ‡ Data cover 5 weeks; other months, 4 weeks. § Crop for the year 1973. ¶ Crop for the year 1974. †† Aug. 1 estimate of the 1975 crop. ‡‡ Bales of 480 lbs. ¶¶ New series. Source: BuCensus. Data cover warp and weft knit yard goods and knit garment lengths, trimmings, and collars; no quarterly data prior to 1974 are available. ¶¶¶ Monthly revisions (1970-72) appear in "Woven Fabrics: Production, Stocks, and Unfilled Orders," M22A—Supplement 3 (Aug. 1973), Bureau of the Census. ¶¶¶¶ Includes data not shown separately.

§ Stocks (owned by weaving mills and billed and held for others) exclude bedsheeting, toweling, and blanketing, and billed and held stocks of denims. ¶ Unfilled orders cover wool apparel (including polyester-wool) finished fabrics; production and stocks exclude figures for such finished fabrics. Orders also exclude bedsheeting, toweling, and blanketing. † Cumulative ginnings to end of month indicated. ‡ Includes by-product gypsum.

\* Revised. 1 Season average. 2 For 5 weeks; other months, 4 weeks. 3 As of Aug. 1, 1974, Atlanta, Ga., deleted from average. 4 Price not directly comparable with earlier data. 5 Average price to Apr. 1, 1975. 6 Annual total calculated independently. 7 Revised 1st quarter 1974. 8 Monthly average. 9 New series. Cotton market price (U.S. Dept. of Agriculture) available monthly back to 1947. Manmade fiber gray goods (owned by weaving mills) ratio from Amer. Textile Manufacturers Institute, based on BuCensus data; manmade fiber manufactures exports

and imports from U.S. Dept. of Agriculture (ERS), based on BuCensus data—available back to 1960. Exports and imports, originally reported in varying units, are converted into approximate quantities of manmade fiber consumed in their manufacture (including an adjustment for waste). Not included are raw (unmanufactured) fibers and imports of certain textured yarns. Carpet shipments (BuCensus) revised quarterly data back to 1968 are available. 9 Includes data not shown separately. (D) Net-weight (480-lb.) bales.

Unless otherwise stated in footnotes below, data through 1972 and descriptive notes are as shown in the 1973 edition of BUSINESS STATISTICS	1973	1974	1974							1975
