SURVEY of CURRENT BUSINESS

SURVEY OF CURRENT BUSINESS (ISSN 0039-6222). Published monthly by the Bureau of Economic Analysis of the U.S. Department of Commerce. Editorial correspondence should be addressed to the Editor-in-Chief, Survey of Current Business, Bureau of Economic Analysis, Department of Commerce, Washington, DC 20230.

Subscriptions to the Survey of Current Business are maintained, and their prices set, by the Government Printing Office, an agency of the U.S. Congress. Postmaster: Send address changes to:

Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.

The GPO order desk number is (202) 512-1800. The subscription complaint desk number is (202) 512-1806.

Subscription and single-copy prices:

Periodicals:

\$35.00 domestic,

First-class mail:

\$43.75 foreign.

Single copy:

\$69.00.

\$11.00 domestic, \$13.75 foreign.

Make checks payable to the Superintendent of Documents.

Periodicals postage paid at Washington, DC and at additional mailing offices. (USPS 337-790).

The Secretary of Commerce has determined that the publication of this periodical is necessary in the transaction of the public business required by law of this Department.

THIS ISSUE of the SURVEY went to the printer on January 12, 1998. It incorporates data from the following monthly BEA news releases: U.S. International Trade in Goods and Services (December 18), Gross Domestic Product (December 23), and Personal Income and Outlays (December 24).

TABLE OF CONTENTS

Regular features

1 Business Situation

Real GDP increased 3.1 percent in the third quarter of 1997 after increasing 3.3 percent in the second quarter, and the price index for gross domestic purchases increased 1.3 percent after increasing 0.8 percent. Corporate profits increased \$32.2 billion in the third quarter after increasing \$15.5 billion in the second, reflecting a step-up in the profits of domestic nonfinancial corporations.

7 U.S. International Transactions, Third Quarter 1997

The U.S. current-account deficit increased to \$42.2 billion in the third quarter of 1997 from \$37.9 billion in the second quarter. The increase was accounted for by an increase in the deficit on goods; changes in the other principal components of the current account were small. In the capital account, outflows for U.S. assets abroad increased \$101.6 billion after increasing \$90.9 billion, and inflows for foreign assets in the United States increased \$169.5 billion after increasing \$143.0 billion.

BUSINESS SITUATION

Larry R. Moran prepared the first section of this article, and Daniel Larkins prepared the section on corporate profits. R EAL GROSS domestic product (GDP) increased 3.1 percent in the third quarter of 1997, according to the "final" estimates of the national income and product accounts (NIPA's).¹ The third-quarter increase in GDP was about the same as the 3.3-percent increase in the second quarter (chart 1). Accelerations in consumer spending and in business fixed investment nearly offset a sharp downturn in business inventory investment, a larger decrease in net exports in the third quarter than in the second, and decelerations in residential investment and in government spending (table 1).

The "final" estimate of the change in real GDP is 0.2 percentage point lower than the 3.3-percent increase indicated by the "preliminary"

estimate reported in the December "Business Situation" (table 2). The revision is slightly less than the average revision—0.3 percentage-point, without regard to sign—from the preliminary to the final estimate for 1981–96. Revisions to the components of GDP were small. Downward revisions to nonfarm business inventory investment, consumer spending, and net exports more than offset an upward revision to business fixed investment. The revision to business inventory investment was primarily to manufacturers' durable goods inventories and reflected the incorporation of revised data on inventory book values for September. In consumer spending, the largest revision was to services and primarily reflected the incorporation of newly available data on hospital expenses. In net exports, the incorporation of revised data on trade in goods and services resulted in a larger upward revision to imports than to exports. In business fixed investment, the

NOTE.—Chained (1992) dollar series are calculated as the product of the chain-type quantity index and the 1992 current-dollar value of the corresponding series, divided by 100. Because the formula for the chain-type quantity indexes uses weights of more than one period, the corresponding chained-dollar estimates usually are not additive. Chained (1992) dollar levels and residuals,

which measure the extent of nonadditivity in each table, are found in NIPA tables 1.2, 1.4, and 1.6. Percent changes are calculated from unrounded data. Percent changes in major aggregates are found in NIPA table 8.1.

^{1.} Quarterly estimates in the NIPA's are expressed at seasonally adjusted annual rates unless otherwise specified. Quarter-to-quarter dollar changes are differences between published estimates. Quarter-to-quarter percent changes are annualized and are calculated from unrounded data. Real estimates are expressed in chained (1992) dollars, and price indexes are chain-type indexes.

upward revision was to structures and reflected the incorporation of revised data on the value of nonresidential construction put in place for September.

Real final sales of domestic product increased 4.7 percent in the third quarter, 0.2 percentage point less than the preliminary estimate.² The revision was the same as that to GDP because the revision to change in business inventories was small.

Real gross domestic purchases increased 4.3 percent, 0.2 percentage point less than the preliminary estimate. The revision was the same as that to GDP because the revision to net exports was small.

Addenda: Final sales of domestic product	4.9 1.3 1.5	4.7 1.3 1.4	2 0 1	-1.8

^{1.} Based on chained-type annual (1992) weights.

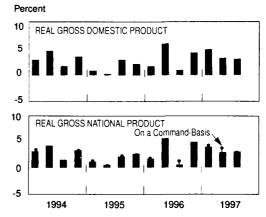

The price index for gross domestic purchases increased 1.3 percent, the same as the preliminary estimate, and the price index for GDP increased 1.4 percent, 0.1 percentage point less than the preliminary estimate.

Real disposable personal income increased 2.6 percent, 0.1 percentage point less than the preliminary estimate; the revision was primarily to personal interest income and reflected newly available flow-of-funds data and data on interest received and paid by commercial banks. The personal saving rate was 3.5 percent, the same as the preliminary estimate.

Gross national product (GNP).—Real GNP increased 3.1 percent in the third quarter, the same as real GDP (chart 1 and table 3).3 Receipts of factor income from the rest of the world and payments of factor income to the rest of the world increased about the same amount; interest income accounted for more than two-thirds of the increase in receipts and about three-fifths of the increase in payments. The revised estimate of the third-quarter growth in real GNP is 0.5 percentage point higher than the preliminary estimate, reflecting an upward revision to profits from the rest of the world (see the discussion about revisions in the section on "Corporate Profits").

CHART 1

Selected Product Measures: Change From Preceding Quarter

Note.—Percent change at annual rate from preceding quarter based on seasonally adjusted estimates.

^{2.} Final sales of domestic product equals GDP less change in business

NoTE.—The final estimates for the third quarter of 1997 incorporate the following revised or additional major source data that were not available when the preliminary estimates were prepared.

Personal consumption expenditures: Revised retail sales for September and newly available data on used auto sales and stocks

Personal consumption expenditures: Revised retail sales for September and newly available data on used auto sales and stocks for August and September.

Nonresidential fixed investment: Revised construction put in place for August and September and revised manufacturers' shipments of machinery and equipment for September.

Residential fixed investment: Revised construction put in place for August and September.

Change in business inventories: Revised manufacturing and trade inventories for September.

Exports and imports of goods and services: Revised data on exports and imports of goods for September and revised balance-of-payments data on exports and imports of services for the second and third quarters.

Government consumption expenditures and gross investment: Revised State and local construction put in place for August and September.

Wages and salaries: Revised employment, average hourly earnings, and average weekly hours for September.

GDP prices: Revised export and import prices for July through September and revised prices of single-family homes under construction for the third quarter.

^{3.} GNP—goods and services produced by labor and property supplied by U.S. residents—equals GDP plus receipts of factor income from the rest of the world less payments of factor income to the rest of the world.

U.S. Department of Commerce, Bureau of Economic Analysis

Ratio of the implicit price deflator for the sum of exports of goods and services and of receipts of factor income to the corresponding implicit price deflator for imports with the decimal point shifted two places to the right.

NOTE.-Levels of these series are found in NIPA tables 1.10 and 1.11.

Real GNP on a command basis increased slightly more than real GNP in the third quarter-3.2 percent, compared with 3.1 percent—reflecting a slight improvement in the terms of trade.4 In the second quarter, command-basis GNP increased considerably more than real GNP-4.0 percent, compared with 3.0 percent-reflecting a substantial improvement in the terms of trade.

Corporate Profits

Profits from current production increased \$32.2 billion in the third quarter after increasing \$15.5 billion in the second (table 4).5 Profits of

domestic industries increased \$33.1 billion after increasing \$12.2 billion. Profits of domestic nonfinancial corporations increased much more in the third quarter than in the second; the thirdquarter increase reflected increases both in real output and in unit profits. Profits of domestic financial corporations increased slightly in both quarters. Profits from the rest of the world decreased \$0.9 billion after increasing \$3.4 billion; receipts slowed much more than payments.⁶

Cash flow from current production, a profitsrelated measure of internally generated funds available for investment, increased \$17.7 billion after increasing \$11.3 billion. The ratio of cash flow to nonresidential fixed investment, an indicator of the share of the current level of investment that

^{4.} In the estimation of command-basis GNP-a measure of the goods and services produced by the U.S. economy in terms of their purchasing powerthe current-dollar value of the sum of exports of goods and services and of receipts of factor income is deflated by the implicit price deflator for the sum of imports of goods and services and of payments of factor income.

The terms of trade is a measure of the relationship between the prices that are received by U.S. producers for exports of goods and services and the prices that are paid by U.S. purchasers for imports of goods and services. It is measured by the following ratio, with the decimal point shifted two places to the right: In the numerator, the implicit price deflator for the sum of exports of goods and services and of receipts of factor income; in the denominator, the implicit price deflator for the sum of imports of goods and services and of payments of factor income. Changes in the terms of trade reflect the interaction of several factors, including movements in exchange rates, changes in the composition of the traded goods and services, and changes in producers' profit margins. For example, if the U.S. dollar depreciates against a foreign currency, a foreign manufacturer may choose to absorb this cost by reducing the profit margin on the product it sells to the United States, or it may choose to raise the price of the product and risk a loss in market

^{5.} Profits from current production is estimated as the sum of profits before tax, the inventory valuation adjustment, and the capital consumption

adjustment; it is shown in NIPA tables 1.9, 1.14, 1.16, and 6.16C (which are part of the "Selected NIPA Tables" that begin on page D-2 of this issue) as corporate profits with inventory valuation and capital consumption adjustments.

^{6.} Profits from the rest of the world is calculated as (1) receipts by U.S. residents of earnings from their foreign affiliates plus dividends received by U.S. residents from unaffiliated foreign corporations minus (2) payments by U.S. affiliates of earnings to their foreign parents plus dividends paid by U.S. corporations to unaffiliated foreign residents. These estimates are derived from BEA's international transactions accounts.

could be financed by internally generated funds, decreased to 81.2 percent from 82.5 percent. The third-quarter ratio is in the lower part of the range in which the ratio has fluctuated during most of this decade.

Industry profits.—Industry profits increased \$31.4 billion after increasing \$13.8 billion.⁷ Profits of domestic financial corporations increased slightly, as they had in the second quarter. Profits of domestic nonfinancial corporations increased almost three times as much as in the second quarter. All of the major industry groups contributed to the step-up. In manufacturing, profits in motor vehicle manufacturing and in petroleum turned up. Profits both in wholesale and in retail trade increased after little change, and profits both in "other" nonfinancial corporations and in "transportation and utilities" increased after a decrease.

Related measures.—Profits before tax (PBT) increased \$33.6 billion after increasing \$11.4 billion.

The difference between the \$22.2 billion step-up in PBT and the \$16.7 billion step-up in profits from current production was mainly accounted for by inventory profits, which increased after decreasing.⁸

Revisions.—The "final" estimate of a \$32.2 billion increase in profits from current production in the third quarter is \$11.1 billion more than the "preliminary" estimate released last month. This large revision was mostly accounted for by profits from the rest of the world—mainly receipts of profits from foreign affiliates of U.S. corporations—and was based on revised source data from the U.S. balance of payments accounts. In domestic profits, upward revisions to the profits of the transportation and utilities group and to profits of wholesale and retail trade were largely offset by a downward revision to profits of manufacturing industries.

^{7.} Industry profits are estimated as the sum of corporate profits before tax and the inventory valuation adjustment; they are shown in NIPA table 6.16C (on page D-16 of this issue). Estimates of the capital consumption adjustment do not exist at a detailed industry level; they are available only for total financial and total nonfinancial industries.

^{8.} As prices change, companies that value inventory withdrawals at original acquisition (historical) costs may realize inventory profits or losses. Inventory profits—a capital-gains-like element in profits—result from an increase in inventory prices, and inventory losses—a capital-loss-like element in profits—result from a decrease in inventory prices. In the NIPA's, inventory profits or losses are shown as adjustments to business income (corporate profits and proprietors' income); they are shown as the inventory valuation adjustment with the sign reversed.

Real Inventories, Sales, and Inventory-Sales Ratios for Manufacturing and Trade

Tables 1, 2, and 3 show quarterly and monthly estimates of real inventories, sales, and inventory-sales ratios, respectively. Real manufacturing inventories by stage of fabrication are shown in table 4. Real estimates are in chained (1992) dollars.

Data availability

Quarterly estimates for 1977-95 of real manufacturing and trade inventories, sales, and inventory-sales ratios and of real manufacturing inventories by stage of fabrication were published in the May 1996 SURVEY OF CURRENT BUSINESS.

Preliminary.

Estimates for 1967 forward are available electronically to subscribers to STAT-USA'S Economic Bulletin Board or Internet services. For information, call 202-482-1986.

The estimates for 1959-96 are also available from BEA on the underlying NIPA historical data diskette: Product number NDN-0162, price \$60.00. To order using Visa or MasterCard, call the BEA Order Desk at 1-800-704-0415 (outside the United States, 202-606-9666). To order by mail, send a check made payable to "Bureau of Economic Analysis, BE-53" to BEA Order Desk (BE-53), Bureau of Economic Analysis, U.S. Department of Commerce, Washington, DC 20230.

Preliminary.

^{*} reviseor

1. Includes lumber and wood products; furniture and fixtures; stone, clay, and glass products; instruments and lated products; and miscellaneous manufacturing industries.

2. Includes tobacco manufacturers; textile mill products; apparel products; printing and publishing; and leather

and leather products.

3. Prior to 1981, inventories and sales of auto and home supply stores are included in motor vehicle dealers. Beginning with 1981, these inventories are included in "other durable goods".

Note.—Manufacturing inventories are classified by the type of product produced by the establishment holding the inventory. Trade inventories are classified by the type of product sold by the establishment holding the inventory. Chained (1992) dollar inventory series are calculated as the product of the chain-type quantity index and the average of the end-of-year fixed-weighted inventories for 1991 and 1992, divided by 100. Because the formula for the chain-type quantity indexes uses weights of more than one period, the corresponding chained-dollar estimates are usually not additive.

Preliminary.

Revised

1. Includes lumber and wood products; furniture and fixtures; stone, clay, and glass products; instruments and related products; and miscellaneous manufacturing industries.

2. Includes tobacco manufacturers; textile mill products; apparel products; printing and publishing; and leather and leather products.

3. Prior to 1981, inventories and sales of auto and home supply stores are included in motor vehicle dealers. Beginning with 1981, these inventories are included in "other durable goods".

NOTE.—Manufacturing inventories are classified by the type of product produced by the establishment holding the inventory. Trade inventories are classified by the type of product sold by the establishment holding the inventory. Chained (1992) dollar series are calculated as the product of the chain-type quantity index and the 1992 current-dollar value of the corresponding series, divided by 100. Because the formula for the chain-type quantity indexes uses weights of more than one period, the corresponding chained-dollar estimates are usually not additive.

P Preliminary.
Revised
1. Incudes lumber and wood products; furniture and fixtures; stone, clay, and glass products; instruments and related products; and miscellaneous manufacturing industries.
2. Includes tobacco manufacturers; textile mill products; apparel products; printing and publishing; and leather and leather products.
3. Prior to 1981, inventories and sales of auto and home supply stores are included in motor vehicle dealers. Beginning with 1981, these inventories are included in "other durable goods".

P Preliminary.

Revised

1. Includes lumber and wood products; furniture and fixtures; stone, clay, and glass products; instruments and related products; and miscellaneous manufacturing industries.

2. Includes tobacco manufacturers; textile mill products; apparel products; printing and publishing; and leather and leather products.

NOTE.—Manufacturing inventories are classified by the type of product produced by the establishment holding the inventory. Trade inventory series are classified by the type of product sold by the establishment holding the inventory. Chained (1992) dollar inventory series are calculated as the product of the chain-type quantity index and the average of the end-of-year fixed-weighted inventories for 1991 and 1992, divided by 100. Because the formula for the chain-type quantity indexes uses weights of more than one period, the corresponding chained-dollar estimates are usually not additive.

U.S. International Transactions, Third Quarter 1997

By Harlan W. King and Christopher L. Bach

THE U.S. current-account deficit increased to \$42.2 billion in the third quarter of 1997 from \$37.9 billion (revised) in the second quarter (table A, chart 1). An increase in the deficit on goods more than accounted for the increase. Only small, nearly offsetting changes occurred in the services, income, and net unilateral transfers components of the current account.

In the capital account, outflows for U.S. assets abroad increased \$101.6 billion in the third quarter, up from an increase of \$90.9 billion in the second, mostly as a result of larger net U.S. purchases of foreign securities. Capital inflows for foreign assets in the United States increased \$169.5 billion, up from an increase of \$143.0 billion; a shift to foreign official inflows more than

accounted for the step-up. Net inflows were \$68.0 billion, up from \$52.1 billion.

The statistical discrepancy—errors and omissions in recorded transactions—was a negative \$25.8 billion in the third quarter, compared with a negative \$14.2 billion in the second.

The following are highlights for the third quarter:

- The deficit on goods increased as a result of lower exports and higher imports.
- The deficit on investment income continued to rise, but not as rapidly as in recent quarters.
- Capital outflows for net U.S. purchases of foreign securities increased sharply, while outflows for U.S. direct investment abroad and for U.S. claims reported by banks slowed.
- Capital inflows for net foreign private purchases of U.S. securities other than

r Revised.
P Preliminary.

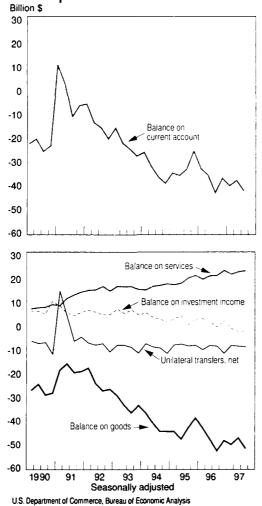

Quarterly estimates of U.S. current- and capital-account components are seasonally adjusted when statistically significant seasonal patterns are present. The accompanying tables present both adjusted and unadjusted estimates.

Pereliminary

U.S. Treasury securities reached a second successive quarterly record, while net foreign private purchases of U.S. Treasury securities slowed.

CHART 1

U.S. Current-Account Balance and Its Components

U.S. dollar in exchange markets

The U.S. dollar appreciated 3 percent on a trade-weighted quarterly average basis against the currencies of 10 industrial countries (table B, chart 2). Against the German mark, the dollar appreciated 5 percent, largely as growth and inflation in the United States remained moderate while U.S. long-term interest rates declined. Concerns early in the quarter over the possible future weakness of the European Currency Unit may have also contributed to the decline of the German mark. As a partial offset to these factors, German interest rates rose, and data released late in the quarter indicated that German economic growth had strengthened.

The U.S. dollar depreciated 1 percent against the Japanese yen on a quarterly average basis, but it appreciated considerably within the quarter, as additional evidence of weak Japanese economic expansion and difficulties at Japanese financial institutions accumulated.

Southeast Asian currencies depreciated sharply against the dollar, following several decisions to abandon fixed exchange rates. The central bank of Thailand was the first to abandon its fixed rate, followed by central banks in Indonesia, Malaysia, and the Philippines. On a quarterly average basis, the dollar's appreciation ranged from 11 to 26 percent against several of these currencies. However, the dollar's appreciation within the third quarter was even larger: From the end of June to the end of September, it appreciated 43 percent against the Thai baht, 35 percent against the Indonesian rupiah, 30 percent against the Philippine peso, and 29 percent against the Malaysian ringgit. Against other Asian currencies, the dollar appreciated considerably less—7 percent against the Singapore dollar, 3 percent against the Taiwan dollar, and 3 percent against the South Korean

Data: Federal Reserve Board and The Wall Street Journal U.S. Department of Commerce, Bureau of Economic Analysis won. The U.S. dollar was unchanged against the Hong Kong dollar.

Current Account

Goods and services

The deficit on goods and services increased to \$29.6 billion in the third quarter from \$25.6 billion in the second. The deficit on goods increased to \$51.5 billion from \$47.1 billion, and the surplus on services increased to \$21.9 billion from \$21.5 billion.

Goods.—The deficit on goods increased to \$51.5 billion in the third quarter from \$47.1 billion The increase resulted from in the second. a combination of lower exports and higher imports.

Exports.—Exports decreased \$0.8 billion, or less than 1 percent, to \$170.6 billion in the third quarter. Quantity, measured in chained (1992) dollars, increased less than 1 percent, and prices decreased 1 percent (table C).

Nonagricultural exports decreased \$1.3 billion, or 1 percent, to \$156.0 billion; the decrease more than accounted for the decrease in total exports. Quantity was unchanged, and prices decreased 1 percent. In value, nearly all of the decrease in nonagricultural exports was accounted for by industrial supplies and materials and resulted from a decrease in nonmonetary gold. Excluding nonmonetary gold, nonagricultural industrial supplies and materials increased, largely because of an increase in energy products. Both durable and nondurable consumer goods declined slightly. Automotive products were virtually unchanged, as a decrease in exports to Canada and Western Europe offset an increase in exports to Mexico. Capital goods, except autos, increased slightly but were held down

^{1.} Because chain indexes use weights of more than one period, the corresponding chained dollar estimates are

by a sharp drop in deliveries of civilian aircraft, largely to the United Kingdom; shortages of aircraft parts at a major U.S. manufacturer were responsible for the drop. Among other capital goods, high-technology commodities increased significantly. Computers, peripherals, and parts reflected growth in the personal computer market; shipments of computers to Canada and of parts and accessories to the Netherlands were particularly strong in the quarter. Semiconductors continued to rebound from sluggish growth in 1996, reflecting increased exports to Mexico, Singapore, Canada, and Malaysia. Telecommunications equipment also increased; shipments to Japan accounted for over one-half of the increase. Shipments of agricultural, industrial, and service industry machinery also continued to rise.

Agricultural exports increased \$0.4 billion, or 3 percent, to \$14.5 billion. Quantity increased 5 percent, and prices decreased 2 percent. Lower prices for bulk products pulled down the value for all agricultural exports. In value, wheat increased \$0.6 billion and more than accounted for the increase in agricultural exports; exports to Egypt were particularly high. Cotton also increased. These increases were partly offset by decreases in exports of soybeans, mainly to Japan, and of tobacco, mainly to Japan and Western Europe.

Imports.—Imports increased \$3.6 billion, or 2 percent, to \$222.1 billion in the third quarter. Quantity, measured in chained (1992) dollars, increased 2 percent, and prices decreased 1 percent (table C).

Nonpetroleum imports rose \$3.8 billion, or 2 percent, to \$204.6 billion and more than accounted for the increase in total imports. Quantity increased 3 percent, and prices decreased 1 percent. In value, capital goods, except autos, accounted for over two-thirds of the increase. Civilian aircraft, engines, and parts accounted for nearly one-third of the increase in capital goods, primarily reflecting stronger imports from France and the United Kingdom. The increase in capital goods also reflected increases in computers, peripherals, and parts and in semiconductors, largely from Japan, Taiwan, the Philippines, China, Malaysia, Singapore, and Mexico. Automotive products rebounded from a decline in the second quarter, reflecting increased imports of cars from Japan and of trucks and parts from Canada. Consumer goods increased moderately, largely reflecting stronger purchases of textile apparel and household goods from China and Hong Kong. The increases in these major commodity categories were offset by a decrease in nonpetroleum industrial supplies and materials; the decrease, like that in exports, was more than accounted for by a large drop in nonmonetary gold. Excluding nonmonetary gold, nonpetroleum industrial supplies and materials rose moderately; chemicals accounted for more than one-half of the increase.

Petroleum imports fell for the third consecutive quarter, to \$17.5 billion from \$17.7 billion. The average number of barrels imported daily increased to 10.93 million from 10.80 million, but the average price per barrel decreased to \$17.57 from \$18.00. Domestic consumption and inventories rose, while production was virtually unchanged.

Balances by area.—As noted earlier, the deficit on goods increased to \$51.5 billion in the third quarter from \$47.1 billion in the second. The deficit with the developing countries in Asia increased to \$28.2 billion from \$19.9 billion, more than accounting for the rise in the global deficit. The deficit with China accounted for most of the increase, rising \$3.4 billion to \$15.1 billion. The deficit with the newly industrialized countries in Asia (Hong Kong, the Republic of Korea, Singapore, and Taiwan) rose \$2.0 billion, to \$3.6 billion. For the remaining countries in Asia (including Thailand, Indonesia, Malaysia, and the Philippines), the deficit rose \$2.9 billion, to \$9.5 billion.

The deficit with the industrial countries decreased to \$21.0 billion from \$21.7 billion. An increase in the deficit with Japan was more than offset by a decrease in the deficit with Canada; the deficit with Western Europe changed little.

Services.—The surplus on services increased to \$21.9 billion in the third quarter from \$21.5 billion in the second, as exports increased more than imports.

Foreign visitors to the United States spent \$19.0 billion, up from \$18.6 billion; receipts from overseas visitors (excluding visitors from Canada and Mexico) accounted for nearly all of the increase. U.S. residents spent \$13.1 billion abroad, up slightly from \$13.0 billion; expenditures by travelers overseas (excluding travelers to Canada and Mexico) more than accounted for the increase.

Passenger fare receipts increased slightly to \$5.6 billion, and passenger fare payments increased slightly to \$4.3 billion.

"Other" transportation receipts increased slightly to \$7.1 billion, as port expenditure receipts increased. "Other" transportation payments decreased slightly to \$7.5 billion; freight payments

and port expenditure payments changed by only small amounts.

"Other" private service receipts increased to \$21.2 billion from \$20.6 billion; among unaffiliated services, much of the increase was attributable to business, professional, and technical services and to financial services. "Other" private service payments increased to \$12.3 billion from \$11.9 billion, mostly as a result of an increase in affiliated services.

Transfers under U.S. military sales contracts increased slightly to \$3.7 billion. Direct defense expenditures abroad increased slightly to \$2.7 billion.

Investment income

The deficit on investment income increased to \$3.3 billion in the third quarter from \$3.2 billion in the second, a much smaller increase than in recent quarters, as payments increased more than receipts.

Direct investment income.—Receipts of income on U.S. direct investment abroad edged up to a record \$28.1 billion in the third quarter from \$28.0 billion in the second. Earnings from most geographic areas remained at a high level. By industry, an increase in manufacturing was virtually offset by a decrease in "other" industries. Net interest receipts were unchanged.

Payments of income on foreign direct investment in the United States increased to a record \$10.7 billion from \$10.2 billion. Earnings of affiliates of Japanese and Western European parents, in particular, continued to rise; much of the increase was in "other" industries (mainly wholesale trade). Net interest payments decreased.

Portfolio investment income.—"Other" private income receipts increased to \$31.6 billion in the third quarter from \$30.2 billion in the second. Receipts on securities holdings accounted for much of the increase, but receipts on bank claims and nonbank claims also rose.

"Other" private income payments increased to \$29.8 billion from \$29.3 billion. A decline in interest rates held down the increase in payments on securities holdings, and payments on bank liabilities and nonbank liabilities changed little. U.S. Government income payments increased to \$23.5 billion from \$22.8 billion.

Unilateral transfers

Net unilateral transfers were \$9.2 billion in the third quarter, up from \$9.0 billion in the second.

Capital Account

Capital inflows for foreign assets in the United States accelerated more rapidly than capital outflows for U.S. assets abroad. Net capital inflows were \$68.0 billion in the third quarter, up from \$52.1 billion in the second.

U.S. assets abroad

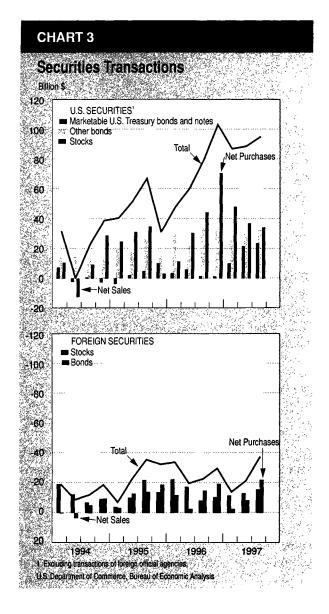

U.S. assets abroad increased \$101.6 billion in the third quarter, following an increase of \$90.9 billion in the second. Net U.S. purchases of foreign securities increased sharply, while increases in U.S. direct investment abroad and in U.S. bank claims slowed.

U.S. official reserve assets.—U.S. official reserve assets increased \$0.7 billion in the third quarter, following a \$0.2 billion increase in the second (table D). The increase in the third quarter was mostly accounted for by an increase in the U.S. reserve position in the International Monetary Fund; in addition, there were smaller increases in U.S. holdings of special drawing rights and in U.S. holdings of foreign currencies.

Claims reported by banks.—U.S. claims on foreigners reported by U.S. banks increased \$22.8 billion in the third quarter, following an increase of \$27.9 billion in the second. Banks' own claims slowed, while banks' customers' claims rose.

Banks' own claims payable in dollars increased \$4.4 billion, following an increase of \$15.0 billion. Foreign-owned banks sharply curtailed their international lending in the third quarter. These banks had apparently been shifting the booking of international loans from overseas to their U.S. offices in earlier quarters, but this trend was reversed in the third quarter. The reversal occured mostly with banks in Canada, the Caribbean, and Japan. The decrease in claims on foreign-owned banks was more than offset by a large increase in claims on other foreigners, largely claims by U.S. brokers and dealers to finance securities transactions of international bond mutual funds located in the Caribbean, likely in the form of resale agreements.

Banks' own claims payable in foreign currencies increased \$6.6 billion, following an increase of \$11.3 billion. Most of the increase in the third

quarter was in lending to Caribbean banking centers, Canada, and Japan.

Banks' domestic customers' claims payable in dollars increased \$12.9 billion, following a small second-quarter decrease. The reversal was more than accounted for by a substantial increase in deposits abroad and purchases of foreign commercial paper in the third quarter, mostly with Caribbean banking centers and Western Europe.

Foreign securities.—Net U.S. purchases of foreign securities were \$38.0 billion in the third quarter, up from \$21.8 billion in the second (chart 3). Net U.S. purchases of foreign bonds were \$22.3 billion, up from \$8.6 billion, and net U.S. purchases of foreign stocks were \$15.7 billion, up from \$13.3

Net U.S. purchases of foreign bonds were bolstered by record foreign new issues in the United States. Corporate borrowers from all areas—but especially from Latin America, the Caribbean, and Asia excluding Japan—accounted for most of the foreign new issues. Borrowers were attracted to the U.S. bond market as long-term yields declined in the third quarter (chart 4) and as U.S. investors favored dollar-denominated fixed-income assets over equities of several of the emerging market countries, particularly those in which currency and stock market prices declined (chart 5). Net trading in outstanding foreign bonds shifted to large net U.S. purchases, particularly from the United Kingdom, where bond yields remained substantially above U.S. bond yields.

The increase in net U.S. purchases of foreign stocks was more than accounted for by sharply higher purchases from Western Europe, nearly all from the United Kingdom, where continued

economic growth and strong stock price appreciation attracted U.S. portfolio investment. Net U.S. purchases from France remained strong, while net U.S. investment in German stocks shifted to net purchases from net sales. In contrast, net U.S. purchases from Japan slowed sharply, as Japanese stock prices declined in reaction to domestic financial difficulties and re-

CHART 4

Long-term Government Bond Yields

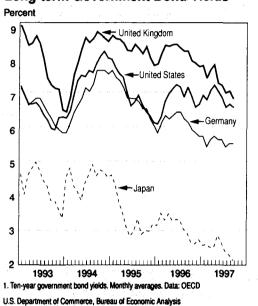

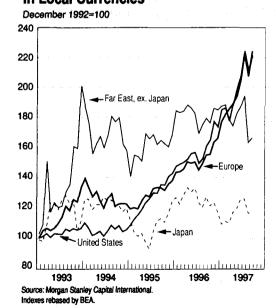

CHART 5

gional currency concerns. Net purchases from other Asian countries and from Latin America increased.

Direct investment.—Net capital outflows for U.S. direct investment abroad were \$24.7 billion in the third quarter, down from \$36.7 billion in the second. Net intercompany debt shifted to net inflows from exceptionally large net outflows; the shift was more than accounted for by inflows from finance affiliates in the United Kingdom. Debt transactions by finance affiliates have exhibited exceptionally wide swings over the past several quarters that appear to be related to transactions in financial markets abroad. Reinvested earnings declined slightly, but remained strong. Net equity capital outflows strengthened, reflecting a few large acquisitions in Western Europe, Latin America, and Canada and a shift to outflows to affiliates in Asia.

Foreign assets in the United States

Foreign assets in the United States increased \$169.5 billion in the third quarter, following an increase of \$143.0 billion in the second. Capital inflows for net foreign private purchases of U.S. securities other than Treasury securities strengthened, while capital inflows for net foreign private purchases of U.S. Treasury securities slowed. Capital inflows for U.S. bank liabilities and for foreign direct investment in the United States also slowed. Foreign official assets shifted to a net inflow.

Foreign official assets.—Foreign official assets in the United States increased \$22.5 billion in the third quarter, following a decrease of \$5.4 billion in the second (table D). Much of the increase in the third quarter was accounted for by a few non-opec developing countries. Assets of industrial countries also increased in the third quarter but less than in the second.

Liabilities reported by banks.—U.S. liabilities reported by U.S. banks, excluding U.S. Treasury securities, increased \$14.1 billion in the third quarter, following an increase of \$28.1 billion in the second. The slowdown was mostly accounted for by a deceleration in banks' own liabilities.

Banks' own liabilities payable in dollars decreased \$12.9 billion, following a \$12.3 billion increase. The decrease was more than accounted for by a \$13.9 billion decrease in foreign-owned banks' liabilities to their own foreign offices abroad and to unaffiliated foreign banks; sizable borrowings during the first half of the year were

partly repaid, and foreign-owned banks reversed the recent booking of international loans at their U.S. offices, mostly by repaying borrowings from branches in the Caribbean, Canada, and Japan. An increase of \$1.4 billion in U.S.-owned banks' own liabilities payable in dollars, following an increase of \$8.9 billion in the second quarter, also was associated with the reduction in international lending.

Banks' own liabilities payable in foreign currencies increased \$13.4 billion, following a decrease of \$0.9 billion. Most inflows were from Asia, the Caribbean, and Western Europe.

Banks' custody liabilities increased \$13.6 billion, following an increase of \$16.7 billion. Strong inflows from Caribbean banking centers, Canada, and the United Kingdom continued.

U.S. Treasury securities.—Net foreign purchases of U.S. Treasury securities were \$36.9 billion in the third quarter, down from \$45.1 billion in the second (chart 3). Net foreign purchases of long-term marketable U.S. Treasury bonds were \$34.4 billion, down from \$37.1 billion. A sharp reversal to net sales of U.S. Treasury bonds by Japan was mostly offset by a substantial step-up to record net purchases from Western Europe. Japanese investors sold U.S. Treasury bonds, despite a large spread in yields that favored U.S. bonds (chart 4), perhaps to offset some of the losses associated with domestic Japanese financial and real estate market difficulties. Record net purchases from Western Europe, particularly from the United Kingdom and Germany, were prompted by a large yield spread favoring U.S. bonds over most European bonds and possibly by investors' concerns that requirements for entrance into the European Monetary Union would be loosely interpreted, thus weakening the value of the European Currency Unit. Net sales of U.S. Treasury bonds by international mutual bond funds in the Caribbean continued.

Net foreign purchases of U.S. Treasury bills were \$3.0 billion, down from \$8.0 billion.

U.S. currency.—Net U.S. currency flows to foreigners were \$6.6 billion in the third quarter, up from \$4.8 billion in the second.

Other U.S. securities.—Net foreign purchases of U.S. securities other than U.S. Treasury securities were a record \$60.8 billion in the third quarter, up from the previous record of \$51.7 billion in the second (chart 3).

Net foreign purchases of U.S. corporate and other bonds were a record \$37.3 billion, up from \$30.0 billion. Net foreign purchases of U.S. bonds were boosted by the third consecutive quarterly record for new issues sold abroad by U.S. corporations. In the third quarter, U.S. corporate demand for funds by banks and industrial firms, partly to finance mergers and acquisitions, was particularly strong. From an investor perspective, U.S. corporate issues provided higher yields than those available in most major capital markets except the United Kingdom; continued strength of the U.S. dollar was an additional incentive to purchase these issues. Net foreign purchases of U.S. federally sponsored agency/bonds also increased.

Net foreign purchases of U.S. stocks were a record \$23.5 billion, up from the previous record of \$21.7 billion. The increase partly reflected the attractiveness to foreign investors of the continued rise in U.S. stock prices and the appreciation of the U.S. dollar, both of which bolstered their gains. Net purchases increased from Western Europe and the Caribbean, but these increases were partly offset by a sharp decline in net purchases from Japan and by a shift to net sales by Canada.

Direct investment.—Net capital inflows for foreign direct investment in the United States were \$21.1 billion in the third quarter, down from \$26.6 billion in the second. Net intercompany debt inflows fell sharply after two consecutive quarters of exceptionally large inflows, mainly as a result of a large shift to outflows to Western European and Canadian parents. Net equity capital inflows increased, mostly from Japan, Australia, and the United Kingdom. Reinvested earnings also increased.

Tables 1 through 10 follow.

FOOTNOTES TO U.S. INTERNATIONAL TRANSACTIONS TABLES 1-10

General notes for all tables: p Preliminary. r Revised. *Less than \$500,000 (\pm)

Table 1:

1. Credits, +: Exports of goods, services, and income; unilateral transfers to United States; capital inflows (increase in foreign assets (U.S. liabilities) or decrease in U.S. assets); decrease in U.S. official reserve assets; increase in foreign official assets in the United States.

| Continued to the United States | Continued States | Cont

official assets in the United States.

Debits, —: Imports of goods, services, and income; unilateral transfers to foreigners; capital outflows (decrease in foreign assets (U.S. liabilities) or increase in U.S. assets); increase in U.S. official reserve assets; decrease in foreign offical assets in the United States.

Excludes exports of goods under U.S. military agency sales contracts identified in Census export documents, excludes imports of goods under direct defense expenditures identified in Census import documents, and reflects various other adjustments (for valuation, coverage, and timing) of Census statistics to balance of payments basis; see table 2.

3. Includes some goods: Mainly military equipment in line 4; major equipment, other materials, supplies, and petroleum control of the processor of the pro

products purchased abroad by U.S. military agencies in line 18; and fuels purchased by airline and steamship operators in lines 7 and 21

lines 7 and 21.
4. Includes transfers of goods and services under U.S. military grant programs.
5. Beginning in 1982, these lines are presented on a gross basis. The definition of exports is revised to exclude U.S. parents' payments to foreign affiliates and to include U.S. affiliates' receipts from foreign parents. The definition of imports revised to include U.S. perents' payments to foreign affiliates and exclude U.S. affiliates' receipts from foreign parents.
6. Beginning in 1982, the "other transfers" component includes taxes paid by U.S. private residents to foreign governments and taxes paid by private nonresidents to the U.S. Government.
7. For all areas, amounts outstanding September 30, 1997, were as follows in millions of dollars: Line 34, 67,148; line 35, 11,050; line 36, 9,997; line 37, 14,042; line 38, 32,059. Data are preliminary.
8. Includes sales of freign childrights to toreign services.

- Includes sales of foreign obligations to foreigners.
 Consists of bills, certificates, marketable bonds and notes, and nonmarketable convertible and nonconvertible bonds and notes
- 10. Consists of U.S. Treasury and Export-Import Bank obligations, not included elsewhere, and of debt securities of
- Consists of U.S. Ireasury and Export-import bank congations, not included eisewhere, and or debt securities of
 Includes, primarily, U.S. Government liabilities associated with military agency sales contracts and other transactions arranged with or through foreign official agencies; see table 4.
 Consists of investments in U.S. corporate stocks and in debt securities of private corporations and State and local

governments.

13. Conceptually, the sum of lines 70 and 62 is equal to "net foreign investment" in the national income and product accounts (NIPA's). However, the foreign transactions account in the NIPA's (a) includes adjustments to the international transactions accounts for the treatment of gold, (b) includes adjustments for the different geographical treatment of transactions with U.S. territories and Puerto Rico, and (c) includes services furnished without payment by financial pension plans except life insurance carriers and private noninsured pension plans. A reconcilitation of the belance on goods and services from the international accounts and the NIPA net exports appears in the "Reconcilitation and Other Special Tables" section in this issue of the Survey or Current Public (NIPI) that a qualify it is the August Issue of the Survey or Current Public (NIPI) that a qualify it is the August Issue of the Survey.

section in this issue of the SURVEY or CURRENT BUSINESS. A reconcliation of the other foreign transactions in the two sets of accounts appears in table 4.5 of the full set of NIPIA tables (published annually in the August issue of the SURVEY).

Additional footnotes for historical data in June issues of the SURVEY:

14. For 1974, includes extraordinary U.S. Government transactions with India. See "Special U.S. Government Transactions," June 1974 SURVEY, p. 27.

15. For 1978–93, includes foreign currency-denominated notes sold to private residents abroad.

16. Break in series. See Technical Notes in the June 1989, June 1990, June 1992, June 1993, June 1995, July 1996, and labit 1997 issues of the Survey.

and July 1997 issues of the Survey.

Table 2:

1. Exports, Census basis, represent transactions values, f.a.s. U.S. port of exportation, for all years; imports, Census basis, represent Customs values (see Technical Notes in the June 1982 Survey), except for 1974–81, when they represent transactions values, f.a.s. foreign port of exportation (see June issues of the Survey for historical data). From 1983 forward, both unadjusted and seasonally adjusted data have been prepared by BEA from "actual" and "revised statistical" month data supplied by the Census Bureau (see Technical Notes in the December 1985 Survey). Seasonally adjusted data reflect the application of seasonal factors developed jointly by Census and BEA. The seasonally adjusted data are the sum of seasonally adjusted five-digit end-use categories (see Technical Notes in the June 1980 Survey, in the June 1988 Survey, and in the June 1991 Survey). Prior to 1983, annual data are as published by the Census Bureau, except that for 1975–80 published Census data are adjusted to include trade between the U.S. Virgin Islands and foreign countries. Islands and foreign countries.

Islands and foreign countries.

2. Beginning in 1990, the Census Bureau replaced its compiled export statistics with counterpart Canadian import statistics. Similarly, Statistics Canada replaced its compiled export statistics with counterpart U.S. import statistics. This exchange of data has eliminated the need for the inland freight adjustment on U.S. exports, but not on U.S. imports.

3. Adjustments in lines A5 and A13, B12, B47, and B82 reflect the Census Bureau'rs reconciliation of discrepancies between the goods statistics published by the United States and the counterpart statistics published in Canada. These adjustments are distributed to the affected end-use categories in section C. Beginning in 1986, estimates for undocumented exports to Canada, the largest item in the U.S.-Canadian reconciliation, are included in Census basis data shown in line

At.

At. Exports of canada, the targest rem in the U.S.-variacian reconciliation, are included in Lensus basis data snown in line At.

At. Exports of military equipment under U.S. military agency sales contracts with foreign governments (line A6), and direct imports by the Department of Defense and the Coast Guard (line A14), to the extent such trade is identifiable from Customs declarations. The exports are included in tables 1 and 10, line 18 (direct defense expenditures).

5. Addition of electrical energy; deduction of exposed motion picture film for rental rather than sale; net change in stock of U.S.-owned grains in storage in Canada; coverage adjustments for special situations in which shipments were omitted from Census data; deduction of the value of repairs and atterations to foreign-owned equipment shipped to the United States for repair; and the inclusion of fish exported outside of U.S. customs area. Also includes deduction of exports to the Panama Canal Zone before October 1, 1979, and for 1975–82, net timing adjustments for goods recorded in Census data in one period but found to have been shipped in another (see June issues of the Survey for historical data).

6. Deduction of foreign charges for repair of U.S. vessels abroad, which are included in tables 1 and 10, line 21 (other transportation); coverage adjustments for special situations in which shipments were omitted from Census data; and the deduction of the value of repairs and alterations to U.S.-owned equipment shipped abroad for repair. Also includes addition of understatement of inland freight in f.a.s values of U.S. imports of goods from Canada in 1974–81; deduction of imports from the Panama Canal Zone before October 1, 1979, and for 1975–82, net timing adjustments goods recorded in Census data in one period but found to have been shipped in another (see June issues of the Survey for historical data).

7. For 1988–89, correction for the understatement of crude petroleum imports from Canada.

7. For 1988–89, correction for the understatement of crude petroleum imports from Canada.

8. Annual and unadjusted quarterly data shown in this table correspond to country and area data in table 10, lines 2 and 16. Trade with international organizations includes purchases of nonmonetary gold from the International Monetary Fund, transfers of tin to the International Tin Council (ITC), and seles of satellities to Intelsat. The memoranda are defined as follows: Industrial countries: Western Europe, Canada, Japan, Australia, New Zealand, and Nath Africa; Members of OPEC: Venezuela, Ecuador, Iraq, Iran, Kuwait, Saudi Arabia, Qatar, United Arab Emirates, Indonesia, Algeria, Libya, Nigeria, and Gabon (beginning in January 1993, excludes Ecuador); Other countries: Eastern Europe, Latin America and Other Western Hemisphere, and other countries in Asia and Africa, less OPEC. Before 1984, contelle geographic area detail was not available for some balance of payments adjustments. Therefore, the detail shown does not always sum to the values shown for the area aggregates. For all years, "Asia" and "Africa" exclude certain Pacific Islands and unidentified countries included in "Other countries in Asia and Africa."

Jincludes the former German Democratic Republic (East Germany) beginning in fourth quarter of 1990. In earlier periods, the German Democratic Republic was included in Eastern Europe.

periods, the German Democratic Republic was included in Eastern Europe.

10. Beginning in 1986, New Zealand and South Africa are included in "Other countries in Asia and Africa," with New Zealand included as part of "Asia" and South Africa as part of "Africa."

Includes nuclear fuel materials and fuels.

Table 3:

- Patented techniques, processes, and formulas and other intangible property rights that are used in goods production.
 Copyrights, trademarks, franchises, rights to broadcast live events, and other intangible property rights.
 Other unaffiliated services receipts (exports) include mainly expenditures of foreign governments and international organizations in the United States. Payments (imports) include mainly wages of foreign residents temporarily employed in the United States and Canadian and Mexican commuters in U.S. border areas.

- Table 4:

 1. Expenditures to release foreign governments from their contractual liabilities to pay for military goods and services purchased through military sales contracts—first authorized (for Israel) under Public Law 93–199, section 4, and subsequently authorized (for many recipients) under similar legislation—are included in line A3. Deliveries against these military sales contracts are included in line C10; see footnote 2. Of the line A3 it tems, part of these military expenditures is applied in lines A40 and A43 to reduce short-term assets previously recorded in lines A38 and C8; this application of funds is excluded from lines C3 and C4. A second part of line A3 expenditures finances future deliverior under military sales contracts for the recipient countries and is applied directly to lines A39 and C9. A third part of line A3, disbursed directly to finance purchases by recipient countries from commercial suppliers in the United States, is included in line A45.

 2. Tracescriptors under military sales contracts are those in which the Denartment of Defense sells and tracefore.
- Transactions under military sales contracts are those in which the Department of Defense sells and transfers
 military goods and services to a foreign purchaser, on a cash or credit basis. Purchases by foreigners directly from
 commercial suppliers are not included as transactions under military sales contracts. The entries for the several categories transactions related to military sales contracts in this and other tables are partly estimated. The entires are transactions related to military sales contracts in this and other tables are partly estimated from incomplete data.

 3. The identification of transactions involving direct dollar outflows from the United States is made in reports by each

3. The identification of transactions involving unless decisions as the Additional Contracts of transactions involving unless decisions.

4. Line A35 includes foreign currency collected as interest and line A40 includes foreign currency collected as principal, as recorded in lines A13 and A14, respectively.

5. Includes (a) advance payments to the Department of Defense (on military sales contracts) financed by loans extended to foreigners by U.S. Government agencies and (b) the contraentry for the part of line C10 that was delivered without prepayment by the foreign purchaser. Also includes expenditures of appropriations available to release foreign purchasers from liability to make repayment.

6. Includes purchases of loans from U.S. banks and exporters and payments by the U.S. Government under commercial export credit and investment guarantee programs.

7. Excludes liabilities associated with military sales contracts financed by U.S. Government grants and credits and included in line C2.

Table 5:

- 1. Beginning with 1991, payments and receipts of interest related to interest rate and foreign currency swaps between affiliates and parents are netted and are shown as either net payments or net receipts. Receipts and payments of other types of interest are shown on a gross basis.
- types or interest are snown on a gross basis.

 2. Petroleum includes, and manufacturing and "other" industries exclude, the exploration, development, and production of crude oil and gas, and the transportation, refining, and marketing of petroleum products, exclusive of petrochemicals. "Other" industries includes wholesale trade; banking; finance (except banking), insurance, and real estate; services; and other industries—agriculture, forestry, and fishing; mining; construction; transportation, communication, and public utilities; and retail trade. and retail trade.
- Acquisition of equity holdings in existing and newly established companies, capital contributions, capitalization of intercompany debt, and other equity contributions.
- 4. Sales (total and partial), liquidations, returns of capital contributions, and other dispositions of equity holdings.

Table 6:

Primarily provincial, regional, and municipal.

- Largely transactions by International Bank for Reconstruction and Development (iBRD), International Development ment Association (iDA), International Finance Corporation (iFC), Asian Development Bank (ADB), and Inter-American Development Bank (IDB).
- Estimate for scheduled redemptions and identifiable early retirements. Includes estimates based on Canadian statistics for redemptions of Canadian issues held in the United States, Unidentified and nonscheduled retirements appear in line A30.

- 1. Estimates of transactions other than those with U.S. banks' Caribbean branches are not available.
- 2. Deposits (line A5) include other financial claims (line A6) for some countries due to the commingling of these categories in foreign source data.
 - Primarily mortgages, loans, and bills and notes drawn on foreigners.
 Western Europe, Canada, Japan, Australia, New Zealand, and South Africa.
- Baharnas, British West Indies (Cayman Islands), Netherlands Antilles, and Panama.
 Based on data for Ecuador, Venezuela, Indonesia, and other Asian and African oif-exporting countries. Beginning in January 1993, excludes Ecuador.

Table 8:

1. Includes central governments and their agencies and corporations; state, provincial, and local governments and their agencies and corporations; and international and regional organizations.

2. U.S.-owned banks are mainly U.S.-chartered banks and Edge Act subsidiaries. U.S. brokers' and dealers' accounts may be commingled in some categories. Foreign-owned banks include U.S. branches and agencies of foreign banks and majority-owned bank subsidiaries in the United States.

3. Commercial paper issued in the U.S. market by foreign incorporated entities; excludes commercial paper issued through foreign direct investment affiliates in the United States.

4. Neorgiable and receible trensferable instruments other than commercial paper, payable in dollars; consists largely of

4. Negotiable and readily transferable instruments other than commercial paper, payable in dollars; consists largely of negotiable certificates of deposit.

So. Western Europe, Canada, Japan, Australia, New Zealand, and South Africa.

6. Bahamas, British West Indies (Cayman Islands), Netherlands Antilles, and Panama.

7. Based on data for Ecuador, Venezuela, Indonesia, and other Asian and African oil-exporting countries. Beginning

Includes Eastern Europe and international and regional organizations.

- Negotiable certificates of deposit issued by banks in the United States are included in banks' custody liabilities and separately identified in memorandum line 8. Nonnegotiable certificates of deposit are included in time deposits.
 Includes borrowing under Federal funds or repurchase arrangements, deferred credits, and liabilities other than

- deposits.

 3. Mainly negotiable and readily transferable instruments, excluding U.S. Treasury securities.

 4. Mainly negotiable and readily transferable instruments, excluding U.S. Treasury securities.

 4. Mainly International Bank for Reconstruction and Development (IBRD), International Development Association (IDA), International Finance Corporation (IFC), Asian Development Bank (ADB), Inter-American Development Bank (IDB), and the Trust Fund of the International Monetary Fund.

 5. U.S. -owned banks are mainly U.S. -chartered banks and Edge Act subsidiaries. U.S. brokers' and dealers' liabilities may be commingled in some categories. Foreign-owned banks are U.S. branches and agencies of foreign banks and majority-owned bank subsidiaries in the United States.

 5. U.S. -owned banks are great including because an experience of the great production because an experience of the great production because and control of the great production because and control of the great production because and control of the great production because and control of the great production because and control of the great production because and control of the great production because and control of the great production because and control of the great production because and control of the great production o
- S. U.S. currency flows are not included, because no geographic data are available.
 Western Europe, Canada, Japan, Australia, New Zealand, and South Africa.
 Bahamas, British West Indies (Cayman Islands), Netherlands Antilles, and Panama.
 Based on data for Ecuador, Venezuela, Indonesia, and other Asian and African oil-exporting countries. Beginning in January 1993, excludes Ecuador.
- 10. Includes Eastern Europe and international and regional organizations.

Table 10: For footnotes 1-13, see table 1.

14. The "European Union" includes the "European Union (6)," United Kingdom, Denmark, Ireland, Greece, Spain, and Portugal. Beginning with the first quarter of 1995, the 'European Union' also includes Austria, Finland, and Sweden.

- Portugal. Beginning with the first quarter of 1995, the 'European Union' also includes Austria, Finland, and Sweden.

 15. The 'European Union' (6)" includes Belgium, France, Germany (includes the former German Democratic Republic (East Germany) beginning in the fourth quarter of 1990), Italy, Luxembourg, Netherlands, European Atomic Energy Community, European Coal and Steel Community, and European Investment Bank.

 16. Includes, as part of international and unallocated, the estimated direct investment in foreign affiliates engaged in international shipping, in operating oil and gas drilling equipment internationally, and in petroleum trading. Also includes taxes withheld; current-cost adjustments associated with U.S. and foreign direct investment; small transactions in business services that are not reported by country; and net U.S. currency flows, for which geographic source data are not evaluable.

 17. Details not shown separately; see totals in lines 49 and 56.

 - 18. Details not shown separately are included in line 61.

BEA CURRENT AND HISTORICAL DATA

National, International, and Regional Estimates

This section presents an extensive selection of economic statistics prepared by the Bureau of Economic Analysis (BEA) and a much briefer selection of collateral statistics prepared by other Government agencies and private organizations. Series originating in Government agencies are not copyrighted and may be reprinted freely. Series from private sources are provided through the courtesy of the compilers and are subject to their copyrights.

BEA makes its economic information available on three World Wide Web sites. The BEA Web site http://www.bea.doc.gov contains data, articles, and news releases from BEA's national, international, and regional programs. The Federal Statistical Briefing Room (FSBR) on the White House Web site http://www.whitehouse.gov/fsbr provides summary statistics for GDP and a handful of other NIPA aggregates. The Commerce Department's STAT-USA Web site http://www.stat-usa.gov provides detailed databases and news releases from BEA and from other Federal Government agencies by subscription; information about STAT-USA's Economic Bulletin Board (EBB) and Internet services may be obtained at the Web site or by calling 202–482–1986.

The tables listed below present annual, quarterly, and monthly estimates, indicated as follows: [A] Annual estimates only; [Q] quarterly estimates only; [QA] quarterly and annual estimates; [MA] monthly and annual estimates.

National Data

A. Selected NIPA Tables

The tables in this section include the most recent estimates of gross domestic product and its components; these estimates were released on December 23, 1997 and include the "final" estimates for the third quarter of 1997.

The selected set of NIPA tables shown in this section presents quarterly estimates, which are updated monthly. In most tables, the annual estimates are also shown. Most of the "annual only" NIPA tables were presented in the August 1997 Survey of Current Business; tables 8.20-8.26 were presented in the September 1997 Survey; and the remaining "annual only" tables—tables 3.15-3.20 and 9.1-9.6—were presented in the October 1997 SURVEY.

The selected NIPA tables are available on printouts or diskettes from BEA. To order NIPA subscription products using Visa or MasterCard, call the BEA Order Desk at 1-800-704-0415 (outside the United States,

The news release on gross domestic product (GDP) is available at the time of release, and the selected NIPA tables are available later that day, on STAT-USA'S Economic Bulletin Board and Internet services; for information, call STAT-USA on 202-482-1986. In addition, the GDP news release is available the afternoon of the day of the release, and the selected NIPA tables are available about two weeks later (when the SURVEY is sent to the printer), on BEA's Internet site http://www.bea.doc.gov.

Net exports of goods and services	-98.8	-114.4	_112.6	-138.9	-105.6	-126.3	-136.6	-164.1
Exports	791.2 573.9 218.0 890.1 749.2 141.2	628.4 229.9 971.5 823.1	229.3 960.0 811.7	623.0 229.4 990.2	666.2 236.8 1,006.6 857.5	238.9 1,048.9 891.3	240.8 1,099.1 938.4	245.0 1,137.1 972.7
Government consumption expenditures and gross investment	1,251.9	1,257.9	1,265.1	1,261.5	1,261.8	1,260.5	1,270.1	1,273.4
Federal	470.3 322.6 147.5 781.6	317.8 146.1	323.2		145.7	303.9 148.5	309.4	310.3
Residual	.6	-1.6	9	-2.4	-3.8	-2.9	-3.9	-4.6

Note.—Chained (1992) dollar series are calculated as the product of the chain-type quantity index and the 1992 current-dollar value of the corresponding series, divided by 100. Because the formula for the chain-type quantity indexes uses weights of more than one period, the corresponding chained-dollar estimates are usually not additive. The residual line is the difference between the first line and the sum of the most detailed lines. Percent changes from preceding period for selected items in this table are shown in table 8.1; contributions to the percent change in real gross domestic product are shown in table 8.2.

General government ²	780.3	775.9	778.9	778.1	776.6	777.7	778.8	781.1
FederalState and local	248.1 532.2							
Residual	- .2	- 1.5	-1.3	-1.6	-2.1	-2.7	-3.0	-3.8

Gross domestic business product equals gross domestic product less gross product of households and institutions and of general government. Nonfarm product equals gross domestic business product less gross farm product.
 Equals compensation of general government employees plus general government consumption of fixed capital as shown in table 3.8.

NOTE.—Chained (1992) dollar series are calculated as the product of the chain-type quantity index and the 1992 current-dollar value of the corresponding series, divided by 100. Because the formula for the chain-type quantity indexes uses weights of more than one period, the corresponding chained-dollar estimates are usually not additive. The residual line is the difference between the first line and the sum of the most detailed lines.

Addendum: Terms of trade ²	101.4	101.8	101.8	102.2	101.4	102.1	103.6	103.8

Gross domestic income deflated by the implicit price deflator for gross domestic product.
 Gross national income deflated by the implicit price deflator for gross national product.
 NoTE.—Except as noted in footnotes 1 and 2, chained (1992) dollar series are calculated as the product of the chain-type quantity index and the 1992 current-dollar value of the corresponding series, divided by 100. Because the formula for the chain-type quantity indexes uses weights of more than one period, the corresponding chained-dollar estimates are usually not additive.

Exports of goods and services and receipts of factor income deflated by the implicit price deflator for imports of goods and services and payments of factor income.
 Ratio of the implicit price deflator for exports of goods and services and receipts of factor income to the corresponding implicit price deflator for imports with the decimal point shifted two places to the right.

NOTE.—Chained (1992) dollar series are calculated as the product of the chain-type quantity index and the 1992 current-dollar value of the corresponding series, divided by 100. Because the formula for the chain-type quantity indexes uses weights of more than one period, the corresponding chained-dollar estimates are usually not additive. Percent changes from preceding period for selected items in this table are shown in table 8.1.

Chained-dollar gross domestic product of nonfinancial corporate business equals the current-dollar product deflated by the implicit price deflator for goods and structures in gross domestic product.
 Chained-dollar consumption of fixed capital of nonfinancial corporate business is calculated as the product of the chain-type quantity index and the 1992 current-dollar value of the corresponding series, divided by 100.
 Chained-dollar net domestic product of nonfinancial corporate business is the difference between the gross product and the consumption of fixed capital.

Personal saving as a percentage of disposable personal income	4.8						4.2		
									

Consists of aid to families with dependent children and, beginning with 1996, assistance programs operating under the Personal Responsibility and Work Opportunity Reconciliation Act of 1996.
 Equals disposable personal income deflated by the implicit price deflator for personal consumption expenditure.

Residual	-2.9	-5.1	-5.5	- 5.7	-6.0	- 7.7	- 7.5	-8.9

NoTE.—Chained (1992) dollar series are calculated as the product of the chain-type quantity index and the 1992 current-dollar value of the corresponding series, divided by 100. Because the formula for the chain-type quantity indexes uses weights of more than one period, the corresponding chained-dollar estimates are usually not additive. The residual line is the difference between the first line and the sum of the most detailed lines.

NOTE. —Percent changes from preceding period for selected items in this table are shown in table 8.1.

NOTE.—Chained (1992) dollar series are calculated as the product of the chain-type quantity index and the 1992 current-dollar value of the corresponding series, divided by 100. Because the formula for the chain-type quantity indexes uses weights of more than one period, the corresponding chained-dollar estimates are usually not additive. The residual line is the difference between the first line and the sum of the most detailed lines, excluding the lines in the addenda.

See footnotes to table 3.7.

^{1.} Gross government investment consists of general government and government enterprise expenditures for fixed assets; inventory investment is included in government consumption expenditures.

2. Consumption expenditures for durable goods excludes expenditures classified as investment, except for goods transferred to foreign countries by the Federal Government.

3. Compensation of government employees engaged in new force-account construction and related expenditures for goods and services are classified as investment in structures. The compensation of all general government employees is shown in the addenda.

4. Consumption of fixed capital, or depreciation, is included in government consumption expenditures as a partial measure of the value of the services of general government fixed assets; use of depreciation assumes a zero net return on these assets.

NOTE.—Chained (1992) dollar series are calculated as the product of the chain-type quantity index and the 1992 current-dollar value of the corresponding series, divided by 100. Because the formula for the chain-type quantity indexes uses weights of more than one period, the corresponding chained-dollar estimates are usually not additive. The residual line is the difference between the first line and the sum of the most detailed lines, excluding the line in the addendum.

See footnotes to table 3.10.

^{1.} Gross government investment consists of general government and government enterprise expenditures for fixed assets; inventory investment is included in government consumption expenditures.
2. Consumption expenditures for durable goods excludes expenditures classified as investment, except for goods transferred to foreign countries.
3. Compensation of government employees engaged in new force-account construction and related expenditures for goods and services are classified as investment in structures. The compensation of all general government employees is shown in the addendum.
4. Consumption of fixed capital, or depreciation, is included in government consumption expenditures as a partial measure of the value of the services of general government fixed assets; use of depreciation assumes a zero net return on these assets.

4. Foreign Transactions_

Exports and imports of certain goods, primarily military equipment purchased and sold by the Federal Government, are included in services. Beginning with 1986, repairs and alterations of equipment are reclassified from goods to services.
 Includes parts of foods, feeds, and beverages; of nondurable industrial supplies and materials; and of nondurable nonautomotive consumer goods.

imports or nonpetroleum goods	000.0	1,01.0	1	112.0	182.1	028.1	0/0.3	500.7

NOTE.—Chained (1992) dollar series are calculated as the product of the chain-type quantity index and the 1992 current-dollar value of the corresponding series, divided by 100. Because the formula for the chain-type quantity indexes uses weights of more than one period, the corresponding chained-dollar estimates are usually not additive. The residual line following the detail for exports is the difference between the aggregate "corporated and services" and the sum of the detailed lines for exports of goods and export of services. The residual line following the detail for imports is the difference between the aggregate "imports of goods and services" and the detailed lines for imports of goods and imports of services.

See footnotes to table 4.3.

NoTE.—Estimates for nonfarm industries other than manufacturing and trade for 1986 and earlier periods are based on the 1972 Standard Industrial Classification (SIC). Manufacturing estimates for 1981 and earlier periods and trade estimates for 1968 and and earlier periods are based on the 1972 SIC; later estimates for these industries are based on the 1987 SIC. The resulting discontinuities are small.

NOTE.—Chained (1992) dollar series for real change in business inventories are calculated as the period-to-period change in chained-dollar end-of-period inventories. Quarterly changes in end-of-period inventories are stated at annual rates. Because the formula for the chain-type quantity indexes uses weights of more than one period, the corresponding chained-dollar estimates are usually not additive. The residual line is the difference between the first line and the sum of the most detailed lines. See note to table 5.10.

Nonfarm inventories to final sales of goods and	i .						
structures	4.11	4.13	4.11	4.08	4.09	4.07	

^{1.} Inventories are as of the end of the quarter. The quarter-to-quarter change in inventories calculated from current-dollar inventories in this table is not the current-dollar change in business inventories (OBI) component of GDP. The former is the difference between two inventory stocks, each valued at their respective end-of-quarter prices. The latter is the change in the physical volume of inventories valued at average prices of the quarter. In addition, changes calculated from this table are at quarterly rates; whereas, CBI is stated at annual rates.

2. Quarterly totals at monthly rates. Final sales of domestic business equals final sales of domestic product less gross product of households and institutions and of general government and includes a small amount of final sales by farm.

Table 5.13.—Real Inventories and Real Domestic Final Sales of Business by industry

Nonfarm inventories to final sales of goods and structures	4.07	4.10	4.07	4.08	4.13	4.10		

^{1.} Inventories are as of the end of the quarter. Quarter-to-quarter changes calculated from this table are at quarterly rates, whereas, the change in the business inventories component of GDP is stated at annual rates.

2. Quarterly totals at monthly rates. Final sales of domestic business equals final sales of domestic product less gross product of households and institutions and of general government and includes a small amount of final sales by farm.

NOTE.—Chained (1992) dollar inventory series are calculated as the product of the chain-type quantity index and the average of the end-of-year fixed-weighted inventories for 1991 and 1992, divided by 100. Chained (1992) dollar final sales series are calculated as the product of the chain-type index and the 1992 current-dollar value of the corresponding series, divided by 100. Because the formula for the chain-type quantity indexes uses weights of more than one period, the corresponding chained-dollar estimates are usually not additive. The residual line is the difference between the first line and the sum of the most detailed lines for inventories.

NOTE.— Chain-type quantity and price indexes are calculated from weighted averages of the detailed output and prices used to prepare each aggregate and component. Implicit price deflators are weighted averages of the detailed price indexes used to prepare each aggregate and component and are calculated as the ratio of current- to chained-

dollar output multiplied by 100.

Percent changes from preceding period for items in this table are shown in table 8.1.

ment.

NOTE.—Chained (1992) dollar series are calculated as the product of the chain-type quantity index and the 1992 current-dollar value of the corresponding series, divided by 100. Because the formula for the chain-type quantity indexes uses weights of more than one period, the corresponding chained-dollar estimates are usually not additive. The residual line is the difference between the first line and the sum of the most detailed lines, excluding the lines in the addenda.

^{1.} Includes new trucks only.

NOTE.—Chained (1992) dollar series are calculated as the product of the chain-type quantity index and the 1992 current-dollar value of the corresponding series, divided by 100. Because the formula for the chain-type quantity indexes uses weights of more than one period, the corresponding chained-dollar estimates are usually not additive. The residual line is the difference between the first line and the sum of the most detailed lines.

B. Other NIPA and NIPA-Related Tables_

Monthly Estimates:

Tables B.1 and B.2 include the most recent estimates of personal income and its components; these estimates were released on December 24, 1997 and include "preliminary" estimates for November 1997 and "revised" estimates for July through October.

Table B.1.—Personal Income [Billions of dollars; monthly estimates seasonally adjusted at annual rates]

Disposable personal income in chained (1992) dollars equals the current-dollar figure divided by the implicit
price deflator for personal consumption expenditures.
 Monthly estimates equal personal saving for the month as a percentage of disposable personal income for
that month.

^{1.} The current-dollar statistical discrepancy equals gross domestic product (GDP) measured as the sum of expenditures less gross domestic income—that is, GDP measured as the costs incurred and profits earned in domestic production. The chained (1992) dollar statistical discrepancy equals the current-dollar discrepancy deflated by the implicit price deflator for gross domestic product.

2. Equals GDP in chained (1992) dollars less the statistical discrepancy and the sum of GPO of the detailed industries.

NOTE—Estimates are based on the 1987 Standard Industrial Classification. The table is derived from tables 7 and 10 in "Gross Product by Industry, 1947–96" in the November 1997 SURVEY OF CURRENT BUSINESS.

- Consists of purchases (including tips) of meals and beverages from retail, service, and amusement establishments, hotels, dining and buffet cars, schools, school fraternities, institutions, clubs, and industrial lunchrooms. Includes meals and beverages consumed both on-and off-premise.
 Includes luggage.
 Consists of watch, clock, and jewelry repairs, costume and dress suit rental, and miscellaneous personal serv-
- 3. Consists of watch, clock, and jewelry repairs, costume and dress suit rental, and miscellaneous personal services.

 4. Consists of rent for space and for heating and plumbing facilities, water heaters, lighting fixtures, kitchen cabinets, lincleum, storm windows and doors, window screens, and screen doors, but excludes rent for appliances and furniture and purchases of fuel and electricity.

 5. Consists of space rent (see footnote 4) and rent for appliances, furnishings, and furniture.

 6. Consists of transient hotels, motels, clubs, schools, and other group housing.

 7. Consists of refrigerators and freezers, cooking ranges, dishwashers, laundry equipment, stoves, room air conditioners, sewing machines, vacuum cleaners, and other appliances.

 8. Includes such house furnishings as floor coverings, comforters, quilts, blankets, pillows, picture frames, mirrors, art products, portable lamps, and clocks. Also includes writing equipment and hand, power, and garden tools.

 9. Consists largely of textile house furnishings, including piece goods allocated to house furnishing use. Also includes lamp shades, brooms, and brushes.

 10. Consists of maintenance services for appliances and house furnishings, moving and warehouse expenses, postage and express charges, premiums for fire and theft insurance on personal property less benefits and dividends, and miscellaneous household operation services.

 11. Excludes drug preparations and related products dispensed by physicians, hospitals, and other medical serv-

- 11. Excludes drug preparations and related products dispensed by physicians, hospitals, and other medical serv-

- 11. Excludes drug preparavoris and related products depositions, chiropodists, podiatrists, and others proceeding health and allied services, not elsewhere classified.

 13. Consists of (1) current expenditures (including consumption of fixed capital) of nonprofit hospitals and nursing homes, and (2) payments by patients to proprietary and government hospitals and nursing homes.

 14. Consists of (1) premiums, less benefits and dividends, for health, hospitalization, and accidental death and dismemberment insurance provided by commercial insurance carriers, and (2) administrative expenses (including consumption of fixed capital) of Blue Cross and Blue Shield plans and of other independent prepaid and self-insured health plans.
- Sumption of fixed capitally of blue cross and pure sinetic plants and of other independent prepare and seminated health plans.

 15. Consists of premiums, less benefits and dividends, for income loss insurance.

 16. Consists of premiums, less benefits and dividends, for privately administered workers' compensation.

 17. Consists of (1) operating expenses of life insurance carriers and private noninsured pension plans, and (2) premiums, less benefits and dividends, of fraternal benefit societies. Excludes expenses allocated by commercial
- premiums, less benefits and dividends, of traternal penerit societies. Excludes expenses allocated by commercial carriers to accident and health insurance.

 18. Consists of current expenditures (including consumption of fixed capital) of trade unions and professional associations, employment agency fees, money order fees, spending for classified advertisements, tax return preparation services, and other personal business services.

 19. Consists of premiums, less benefits and dividends, for motor vehicle insurance.

 20. Consists of baggage charges, coastal and inland waterway fares, travel agents' fees, and airport bus fares.

 21. Consists of admissions to professional and amateur athletic events and to racetracks.

- 22. Consists of dues and fees excluding insurance premiums.
- 23. Consists of uses and rees excluding insurance premiums.

 23. Consists of billiard parlors; bowling alleys; dancing, riding, shooting, skating, and swimming places; amusement devices and parks; golf courses; sightseeing buses and guides; private flying operations; casino gambling; and other commercial participant amusements.

 24. Consists of net receipts of lotteries and expenditures for purchases of pets and pet care services, cable TV, film processing, photographic studies, sporting and recreation camps, video cassette rentals, and recreational services, not elsewhere classified.
- services, not elsewhere classified.

 25. For private institutions, equals current expenditures (including consumption of fixed capital) less receipts—such as those from meals, rooms, and entertainments—accounted for separately in consumer expenditures, and less expenditures for research and development financed under contracts or grants. For government institutions, equals student payments of truition.

 26. For private institutions, equals current expenditures (including consumption of fixed capital) less receipts—such as those from meals, rooms, and entertainments—accounted for separately in consumer expenditures. For government institutions, equals student payments of truition. Excludes child day care services, which are included in religious and welfare activities.

 27. Consists of (1) fees paid to commercial, business, trade, and correspondence schools and for educational services, not elsewhere classified, and (2) current expenditures (including consumption of fixed capital) by research organizations and foundations for education and research.

 28. For nonorofit institutions, equals current expenditures (including consumption of fixed capital) of religious, so-
- organizations and roundations for education and research.

 28. For nonprofit institutions, equals current expenditures (including consumption of fixed capital) of religious, social welfare, foreign relief, and political organizations, museums, libraries, and foundations. The expenditures are net of receipts—such as those from meals, rooms, and entertainments—accounted for separately in consumer expenditures, and excludes relief payments within the United States and expenditures by foundations for education and research. For proprietary and government institutions, equals receipts from users.

NOTES.—Consumer durable goods are designated (d.), nondurable goods (n.d.), and services (s.).

Estimates of foreign travel by U. S. residents (line 108) expenditures were \$0.3 billion in 1981. Beginning with 1984, estimates of foreign travel by U. S. residents include substantially improved estimates of U. S. residents foreign travel and passenger fare expenditures. Estimates of expenditures in the United States by nonresidents (line 110) include, beginning with 1981, nonresidents' student and medical care expenditures in the United States. Student expenditures were \$2.2 billion, and medical expenditures were \$0.4 billion in 1981. Beginning with 1984, estimates of expenditures in the United States by nonresidents expenditures in the United States by nonresidents are subtracted from total personal consumption expenditures. Expenditures in the United States by nonresidents are subtracted from total personal consumption expenditures. (line 110) because they are included in detailed type of expenditure estimates elsewhere in personal consumption expenditures.

penditures (line 110) because they are included in detailed type of expenditure estimates elsewhere in personal consumption expenditures.

Chained (1992) dollar series are calculated as the product of the chain-type quantity index and the 1992 current-dollar value of the corresponding series, divided by 100. Because the formula for the chain-type quantity indexes uses weights of more than one period, the corresponding chained-dollar estimates are usually not additive. The residual line is the difference between the first line and the sum of the most detailed lines.

^{1.} Includes new computers and peripheral equipment only.

Consists of stores, restaurants, garages, service statuons, warehouses, mobile structures, and other buildings used for commercial purposes.
 Consists of hotels and motels, buildings used primarily for social and recreational activities, and buildings not elsewhere classified, such as passenger terminals, greenhouses, and animal hospitals.
 Consists primarily of streets, dams and reservoirs, sewer and water facilities, parks, and airfields.
 Consists primarily of dormitories, fraternity and sorority houses, and nurses' homes.

Note: Chained (1992) dollar series are calculated as the product of the chain-type quantity index and the 1992 current-dollar value of the corresponding series, divided by 100. Because the formula for the chain-type quantity indexes uses weights of more than one period, the corresponding chained-dollar estimates are usually not additive. The residual line is the difference between the first line and the sum of the most detailed lines.

^{1.} Includes new computers and peripheral equipment only. NoTE. Chained (1992) dollar series are calculated as the product of the chain-type quantity index and the 1992 current-dollar value of the corresponding series, divided by 100. Because the formula for the chain-type quantity indexes uses weights of more than one period, the corresponding chained-dollar estimates are usually not additive. The residual line is the difference between the first line and the sum of the most detailed lines.
n.e.c. Not elsewhere classified.

Consists of museums, botanical, zoological gardens; engineering and management services; and services, not elsewhere classified.
 Includes Coast Guard.
 Beginning with 1993, includes estimates of foreign professional workers and undocumented Mexican migratory

workers employed temporarily in the United States.

NOTE.—Estimates in this table are based on the 1987 Standard Industrial Classification (SIC).

Compensation equals wage and salary accruals plus supplements to wages and salaries. "Supplements" are listed in table 8.15 of the August 1997 SURVEY OF CURRENT BUSINESS.

Equals the number of full-time equivalent employees (table 6.5) plus the number of self-employed persons (table 6.7). Unpaid family workers are not included.
 Consists of museums, botanical, zoological gardens; engineering and management services; and services, not elsewhere classified.

NOTE.—Estimates in this table are based on the 1987 Standard Industrial Classification (SIC).

Includes Coast Guard.
 Beginning with 1993, includes estimates of foreign professional workers and undocumented Mexican migratory workers employed temporarily in the United States.

Full-time equivalent employees equals the number of employees on full-time schedules plus the number of employees on part-time schedules converted to a full-time basis. The number of full-time equivalent employees in each industry is the product of the total number of employees and the ratio of average weekly hours per employee or full-time schedules.
 Consists of museums, botanical, zoological gardens; engineering and management services; and services, not

elsewhere classified.
3. Includes Coast Guard.
4. Beginning with 1993, includes estimates of foreign professional workers and undocumented Mexican migratory workers employed temporarily in the United States.

NOTE.-Estimates in this table are based on the 1987 Standard Industrial Classification (SIC).

n.e.c. Not elsewhere classified.

Consists of office buildings, except those occupied by electric and gas utility companies.
 Consists primarily of stores, restaurants, garages, service stations, warehouses, and other buildings used for commercial purposes.
 Consists of buildings not elsewhere classified, such as passenger terminals, greenhouses, and animal hospitals.
 Consists primarily of streets, dams, reservoirs, sewer and water facilities, parks, and airfields.
 Consists primarily of dormitories, fraternity and sorority houses, and nurses' homes.

C. Historical Tables_

The tables in this section are derived from the "Summary National Income and Product Series" tables that were published in the August 1997 issue of the Survey of Current Business. (Changes in prices are calculated from indexes expressed to three decimal places.)

Table C.1.—Historical Measures of Real Gross Domestic Product, Real Gross National Product, and Real Gross Domestic Purchases

NOTE.—In these triangles, the growth rate from one year to any other year can be found at the intersection of the column for the earlier year and the row for the later year; thus, growth rates from one year to the next are shown on the main diagonal. For example, from 1985 to 1995, real gross domestic product grew at an average annual rate of 2.4 percent; from 1984 to 1985, it grew 3.6 percent.

International Data

F. Transactions Tables

Table F.1 includes the most recent estimates of U.S. international trade in goods and services; the estimates were released on December 18, 1997 and include "preliminary" estimates for October 1997 and "revised" estimates for April through September. The sources for the other tables in this section are as noted.

P Preliminary.

'Revised.

1. Credits, +: Exports of goods, services, and income; unliateral transfers to United States; capital inflows (increase in foreign assets (U.S. liabilities) or decrease in U.S. assets); decrease in U.S. official reserve assets; increase in foreign official assets in the United States.

Debits, -: Imports of goods, services, and income; unliateral transfers to foreigners; capital outflows (decrease in foreign assets (U.S. liabilities) or increase in U.S. assets); increase in U.S. official reserve assets; decrease in foreign official assets in the United States.

2. Excludes exports of goods under fuel. S. military agency sales contracts identified in Census export documents, excludes imports of goods under direct defense expenditures identified in Census import documents, and reflects various other adjustments (for valuation, coverage, and timing) of Census statistics to balance of payments basis; see table 2 in "U.S. International Transactions, Third Quarter 1997" in this issue of the Survey.

^{3.} Includes some goods: Mainly military equipment in line 4; major equipment, other materials, supplies, and petroleum products purchased abroad by U.S. military agencies in line 18; and fuels purchased by airline and steamship operators in lines 7 and 21.

4. Includes transfers of goods and services under U.S. military grant programs.

5. Beginning in 1982, these lines are presented on a gross basis. The definition of exports is revised to exclude U.S. parents' payments to foreign affiliates and to include U.S. affiliates' receipts from foreign parents. The definition of imports is revised to include U.S. parents' payments to foreign affiliates and to exclude U.S. affiliates' receipts from foreign parents.

6. Beginning in 1982, the "other transfers" component includes taxes paid by U.S. private residents to foreign governments and taxes paid by private nonresidents to the U.S. Government.

7. For all areas, amounts outstanding September 30, 1997, were as follows in millions of dollars: Line 34, 67,148; line 35, 11,050, line 36, 9,997; line 37, 14,042; line 38, 32,059. Data are preliminary.

^{8.} Includes sales of foreign obligations to foreigners.
9. Consists of bills, certificates, marketable bonds and notes, and nonmarketable convertible and nonconvertible bonds and notes.
10. Consists of U.S. Treasury and Export-Import Bank obligations, not included elsewhere, and of debt securities of U.S. Government corporations and agencies.
11. Includes, primarily, U.S. Government liabilities associated with military agency sales contracts and other transactions arranged with or through foreign official agencies; see table 4.
12. Consists of investments in U.S. corporate stocks and in debt securities of private corporations and State and local governments.

^{13.} Conceptually, the sum of lines 70 and 62 is equal to "net toreign investment" in the national income and product accounts (NIPA's). However, the foreign transactions account in the NIPA's (a) includes adjustments to the international transactions accounts for the treatment of gold, (b) includes adjustments for the different geographical treatment of transactions with U.S. territories and Puerlo Rico, and (c) includes services from de without payment by financial pension plans except life insurance carriers and private noninsured pension plans. A reconciliation of the balance on goods and services from the international accounts and the NIPA net exports appears in Appendix A of this section of the SURVEY OF CURRENT BUSINESS. A reconciliation of the other foreign transactions in the two sets of accounts appears in table 4.5 of the full set of NIPA tables (published annually in the August issue of the SURVEY).

^{14.} The "European Union" includes the "European Union (6)," United Kingdom, Denmark, Ireland, Greece, Spain, and Portugal. Beginning with the first quarter of 1995, the "European Union" also includes Austria, Finland, and Sweden.

includes taxes withheld; current-cost adjustments associated with U.S. and foreign direct investment; small trans-actions in business services that are not reported by country; and net U.S. currency flows, for which geographic source data are not available. 17. Details not shown separately; see totals in lines 49 and 56. 18. Details not shown separately are included in line 61.

Sweden.

15. The "European Union (6)" includes Belgium, France, Germany (includes the former German Democratic Republic (East Germany) beginning in the fourth quarter of 1990), Italy, Luxembourg, Netherlands, European Atomic Energy Community, European Coal and Steel Community, and European Investment Bank.

16. Includes, as part of international and unallocated, the estimated direct investment in foreign affiliates engaged in international shipping, in operating oil and gas drilling equipment internationally, and in petroleum trading. Also

NOTE.—The data in tables F.2 and F.3 are from tables 1 and 10 in "U.S. International Transactions, Third Quarter 1997" in this issue of the SURVEY OF CURRENT BUSINESS, which presents the most recent estimates from the balance of payments accounts.

Table F.4.—Private Service Transactions

(Millions of dollars)

P Preliminary.

amounts of miscellaneous claims that have been settled through international agreements to be payable to the U.S. Government over periods in excess of 1 year. Excludes World War I debts that are not being serviced.

5. Includes indebtedness that the borrower may contractually, or at its option, repay with its currency, with a third country's currency, or by delivery of materials or transfer of services.

6. Primarily U.S. Government liabilities associated with military sales contracts and other transactions arranged with or through foreign official agencies.

NOTE.—The data in this table are from table 1 in "International Investment Position of the United States in 1996" in the July 1997 issue of the SURVEY OF CURRENT BUSINESS.

Revised.
 Represents gains or losses on foreign-currency-denominated assets due to their revaluation at current exchange rates.
 Includes changes in coverage, statistical discrepancies, and other adjustments to the value of assets.

^{3.} Reflects changes in the value of the official gold stock due to fluctuations in the market price of gold.

4. Also includes paid-in capital subscriptions to international financial institutions and outstanding

NoTE.—In this table, unlike in the international transactions accounts, income and capital outflows are shown without a current-cost adjustment, and income is shown net of withholding taxes. In addition, unlike in the international investment position, the direct investment position is valued at historical cost.

The data in this table are from tables 17 and 18 in "U.S. Direct Investment Abroad: Detail for Historical-Cost Position and Related Capital and Income Flows, 1996" in the September 1997 SURVEY OF CURRENT BUSINESS.

Note.—In this table, unlike in the international transactions accounts, income and capital inflows are shown without a current-cost adjustment, and income is shown net of withholding taxes. In addition, unlike in the international investment position, the direct investment position is valued at historical cost.

The data in this table are from tables 16 and 17 in "Foreign Direct Investment in the United States: Detail for Historical-Cost Position and Related Capital and Income Flows, 1996" in the September 1997 SURVEY OF CURRENT BUSINESS.

^{1.} Index of weighted average exchange value of U.S. dollar against currencies of other G-10 countries. March 1973-100. Weights are 1972-76 global trade of each of the 10 countries. Series revised as of August 1978. For description and back data, see: "Index of the weighted-average exchange value of the U.S. dollar: Revision" on page 700 of the August 1978 Federal Reserve Bulletin.

NOTE.—All exchange rates are from the Board of Governors of the Federal Reserve System. U.S. interest rates, unemployment rates, and GDP growth rates are from the Federal Reserve, the Bureau of Labor Statistics, and BEA, respectively. All other data (including U.S. consumer prices and U.S. share prices, both of which have been rebased to 1990 to facilitate comparison) are © OECD, December 1997, OECD Main Economic Indicators and are reproduced with permission of the OECD.

I. Charts_

Regional Data

J. State and Regional Tables.

The tables in this section include the most recent estimates of State personal income and gross state product. The sources of these estimates are noted.

The quarterly and annual State personal income estimates and the gross state product estimates are available on diskettes or CD-ROM. For information on personal income, including information on the recent release of estimates for 1929-57, e-mail reis.remd@bea.doc.gov; write to the Regional Economic Information System, BE-55, Bureau of Economic Analysis, U.S. Department of Commerce, Washington, DC 20230; or call 202-606-5360. For information on gross state product, e-mail gspread@bea.doc.gov; write to the Regional Economic Analysis Division, BE-61, Bureau of Economic Analysis, U.S. Department of Commerce, Washington, DC 20230; or call 202-606-5340.

^{1.} Percent changes are expressed at quarterly rates and are calculated from seasonally-adjusted unrounded data. NOTE.—The personal income level shown for the United States is derived as the sum of the State estimates. It differs from the national income and product accounts (NIPA) estimate of personal income because, by definition, it omits the earnings of Federal civilian and military personnel stationed abroad and of U.S. residents employed

abroad temporarily by private U.S. firms. It can also differ from the NIPA estimate because of different data sources and revision schedules.

Percent change was calculated from unrounded data.

NOTE.—The personal income level shown for the United States is derived as the sum of the State estimates. It differs from the national income and product accounts (NIPA) estimate of personal income because, by definition, it omits the earnings of Federal civilian and military personnel.

stationed abroad and of U.S. residents employed abroad temporarily by private U.S. firms. It can also differ from the NIPA estimate because of different data sources and revision schedules.

Per capita personal income and per capita disposable personal income were computed using midyear population estimates of the Bureau of the Census.

Note.—The personal income level shown for the United States is derived as the sum of the State estimates, it differs from the national income and product accounts (NIPA) estimate of per-

sonal income because, by definition, it omits the earnings of Federal civilian and military personnel stationed abroad and of U.S. residents employed abroad temporarily by private U.S. firms. It can also differ from the NIPA estimate because of different data sources and revision schedules. Source: Tables 2 and 4 in "State Personal Income, Revised Estimates for 1958–96" in the October 1997 SURVEY OF CURRENT BUSINESS.

NoTE.—Totals shown for the United States differ from the NIPA estimates of gross domestic product (GDP) because State data exclude the statistical discrepancy (the difference between GDP and gross domestic income), the compensation of Faderal civilian and military personnel stationed abroad, and government consumption of fixed capital for military structures located abroad and for military equipment, except office equipment; they may also differ from the GDP estimates because of differences in revision schedules.

The personal income level shown for the United States is derived as the sum of the county estimates; it differs from the national income and product accounts (NIPA) estimate of personal income because, by definition, it omits the earnings of Federal civilian and military personnel stationed abroad and of U.S. residents employed abroad temporarily by private U.S. firms. It can also differ from the NIPA estimate because of different data sources and revision schedules.

2. Percent change was calculated from unrounded data.

3. Per capita personal income was computed using Census Bureau midyear population estimates. Estimates for

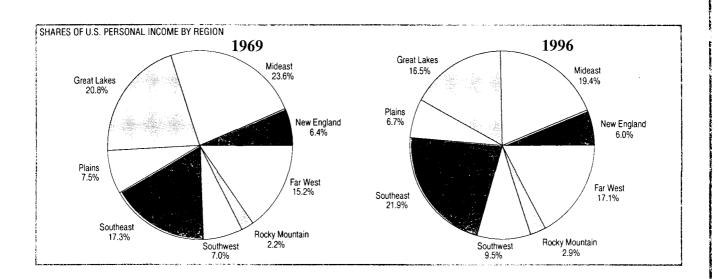

¹⁹⁹³⁻⁹⁵ reflect county population estimates available as of March 1997.

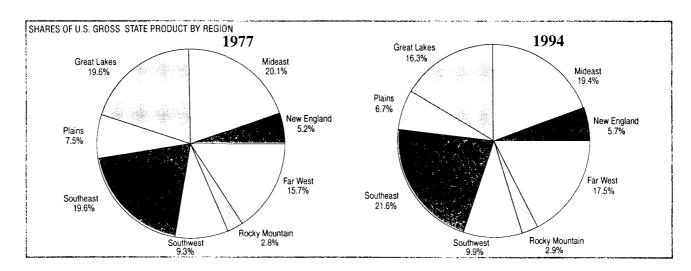

4. Includes Metropolitan Statistical Areas, Primary Metropolitan Statistical Areas (PMSA's designated by *), and New England County Metropolitan Areas (NECMA's). The New Haven-Bridgeport-Stamford-Danbury-Waterbury, CT NECMA is presented as a PMSA (part of the New York CMSA).

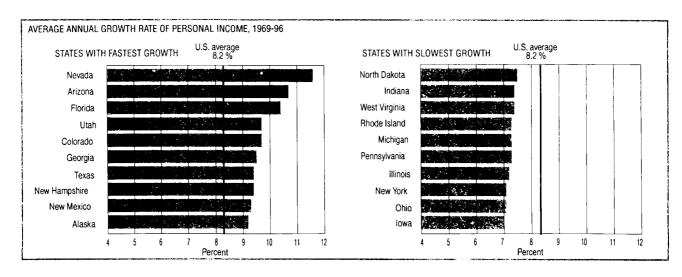

Source: Table 1 in "Comprehensive Revision of Local Area Personal Income, 1969-95" in the September 1997 SURVEY OF CURRENT BUSINESS.

Additional Information About BEA's NIPA Estimates

Statistical Conventions

Changes in current-dollar GDP measure changes in the market value of goods and services produced in the economy in a particular period. For many purposes, it is necessary to decompose these changes into quantity and price components. To compute the quantity indexes, changes in the quantities of individual goods and services are weighted by their prices. (Quantity changes for GDP are often referred to as changes in "real GDP.") For the price indexes, changes in the prices for individual goods and services are weighted by quantities produced. (In practice, the current-dollar value and price indexes for most GDP components are determined largely using data from Federal Government surveys, and the real values of these components are calculated by deflation at the most detailed level for which all the required data are

Except for the most recent period, the annual and quarterly changes in real GDP and prices are "chaintype" measures that are both based on the "Fisher Ideal" formula that incorporates weights from two adjacent years. For example, the 1992–93 percent change in real GDP uses prices for 1992 and 1993 as weights, and the 1992–93 percent change in price uses quantities for 1992 and 1993 as weights. Because the quantity and price index numbers calculated in this way are symmetric, the product of the index of real GDP and the index of prices equals the index of current-dollar GDP.

In the most recent period, a variant of the formula is used because only 1 year's information is available for computing the index number weights. Accordingly, BEA uses the prices and quantities from the two adjacent quarters as weights to calculate Fisher chaintype measures for those estimates. For example, the 1996:II-1996:III percent change in real GDP uses prices for 1996:III and 1996:III as weights, and the 1996:II-1996:III percent change in the GDP price index uses quantities for 1996:III and 1996:III as weights.

BEA also presents another measure, known as the "implicit price deflator," in the NIPA tables. The implicit price deflator is calculated as the ratio of current-dollar value to the corresponding chained-dollar value multiplied by 100.

In addition, BEA prepares measures of real GDP and its components in a dollar-denominated form, designated "chained (1992) dollar estimates." These estimates are computed by multiplying the 1992 current-dollar value of GDP, or of a GDP component, by the corresponding quantity index number. For example, if a current-dollar GDP component equaled \$100 in

1992 and if real output for this component increased by 10 percent in 1993, then the "chained (1992) dollar" value of this component in 1993 would be \$110 (\$100 \times 1.10). Note that percentage changes in the chained (1992) dollar estimates and the percentage changes calculated from the quantity indexes are identical, except for small differences due to rounding.

Because of the formula used for calculating real GDP, the chained (1992) dollar estimates for detailed GDP components do not add to the chained-dollar value of GDP or to any intermediate aggregates. A "residual" line is shown as the difference between GDP and the sum of the most detailed components shown in each table. The residual generally is small close to the base period but tends to become larger as one moves further from it. In cases where the residual is large, the table of contributions of the major components to the change in real GDP provides a better basis for determining the composition of GDP growth than the chained-dollar estimates.

For quarters and months, the estimates are presented at annual rates, which show the value that would be registered if the rate of activity measured for a quarter or a month were maintained for a full year. Annual rates are used so that time periods of different lengths—for example, quarters and years—may be compared easily. These annual rates are determined simply by multiplying the estimated rate of activity by 4 (for quarterly data) or 12 (for monthly data).

Percent changes in the estimates are also expressed at annual rates. Calculating these changes requires a variant of the compound interest formula:

$$r = \left[\left(\frac{X_t}{X_o} \right)^{m/n} - 1 \right] \times 100,$$

where r is the percent change at an annual rate;

 X_t is the level of activity in the later period; X_o is the level of activity in the earlier period;

m is the yearly periodicity of the data (for example, 1 for annual data, 4 for quarterly, or 12 for monthly); and

n is the number of periods between the earlier and later periods (that is, t - o).

Quarterly and monthly NIPA estimates are seasonally adjusted, if necessary. Seasonal adjustment removes from the time series the average impact of variations that normally occur at about the same time and in about the same magnitude each year—for example, weather, holidays, and tax payment dates. After seasonal adjustment, cyclical and other short-term changes in the economy stand out more clearly.

Reconciliation Tables

Table 1.—Reconciliation of Changes in BEA-Derived Compensation Per Hour With BLS Average Hourly Earnings [Percent change from preceding period]

Consists of statistical revisions in the NIPA's that have not yet been incorporated into the BPA's (1997:III) and statistical revisions in the BPA's that have not yet been incorporated in the NIPA's (1997:I-1997:III).

r Revised.

1. Includes BEA use of non-BLS data and differences in detailed weighting. Annual estimates also include differences in BEA and BLS benchmark procedures; quarterly estimates also include

differences in seasonal adjustment procedures.
2. These estimates differ from the BEA-derived estimates (first line) because the BLS estimates include compensation and hours of tenant-occupied housing.

Appendix B Suggested Reading

Mid-Decade Strategic Plan

BEA has published the following articles in the Survey of Current Business on the development and implementation of its strategic plan for improving the accuracy, reliability, and relevance of the national, regional, and international accounts.

"Mid-Decade Strategic Review of BEA's Economic Accounts: Maintaining and Improving Their Performance" (February 1995)*

"Mid-Decade Strategic Review of BEA's Economic Accounts: An Update" (April 1995)*

"BEA'S Mid-Decade Strategic Plan: A Progress Report" (June 1996)*

Mid-Decade Strategic Review of BEA's Economic Accounts: Background Papers (1995) presents seven background papers that evaluate the state of the U.S. economic accounts and that identify the problems and the prospects for improving the accounts.

Methodology

BEA has published a wealth of information about the methodology used to prepare its national, regional, and international estimates.

National

National income and product accounts (NIPA's)

NIPA Methodology Papers: This series documents the conceptual framework of the NIPA's and the methodology used to prepare the estimates.

An Introduction to National Economic Accounting (NIPA Methodology Paper No. 1, 1985) [Also appeared in the March 1985 issue of the SURVEY] Corporate Profits: Profits Before Tax, Profits Tax Liability, and Dividends (NIPA Methodology Paper No. 2, 1985)

Foreign Transactions (NIPA Methodology Paper No. 3, 1987)

GNP: An Overview of Source Data and Estimating Methods (NIPA Methodology Paper No. 4, 1987) [Also appeared in the July 1987 issue of the SURVEY]

Government Transactions (NIPA Methodology Paper No. 5, 1988)*

Personal Consumption Expenditures (NIPA Methodology Paper No. 6, 1990)

The methodologies described in these papers are subject to periodic improvements that are typically introduced as part of the annual and comprehensive revisions of the NIPA's; these improvements are described in the SURVEY articles that cover these revisions.

"Annual Revision of the U.S. National Income and Product Accounts": This series of Survey articles, the latest of which was published in the August 1997 issue,* describes the annual NIPA revisions and the improvements in methodology.

The most recent comprehensive revision of the NIPA's is described in the following series of SURVEY articles.

"Preview of the Comprehensive Revision of the National Income and Product Accounts: BEA'S New Featured Measures of Output and Prices" (July 1995)*

"Preview of the Comprehensive Revision of the National Income and Product Accounts: Recognition of Government Investment and Incorporation of a New Methodology for Calculating Depreciation" (September 1995)*

"Preview of the Comprehensive Revision of the National Income and Product Accounts: New and Redesigned Tables" (October 1995)*

"Improved Estimates of the National Income and Product Accounts for 1959–95: Results of the Comprehensive Revision" (January/February 1996)*

"Completion of the Comprehensive Revision of the National Income and Product Accounts, 1929–96" (May 1997)*

"Updated Summary NIPA Methodologies" (September 1997 SURVEY)* identifies the principal source data and estimating methods that are used to prepare the estimates of gross domestic product (GDP).

Availability

For the availability of some of these publications, see the inside back cover of this issue. See also the *User's Guide to BEA Information*: To request a copy, write to the Public Information Office, BE-53, Bureau of Economic Analysis, U.S. Department of Commerce, Washington DC 20230, call 202-606-9900, or visit BEA'S Internet site at http://www.bea.doc.gov>.

^{*} Items with an asterisk can be found on Bea's Internet site at http://www.bea.doc.gov>.

Information on the sources and methods used to prepare the national estimates of personal income, which provide the basis for the State estimates of personal income, can be found in *State Personal Income*, 1929–93 (1995).*

"Gross Domestic Product as a Measure of U.S. Production" (August 1991 SURVEY) briefly explains the difference between GDP and gross national product.

The conceptual basis for the chain-type measures of real output and prices used in the NIPA's is described in the following SURVEY articles.

"Alternative Measures of Change in Real Output and Prices" (April 1992)*

"Economic Theory and BEA's Alternative Quantity and Price Indexes" (April 1992)*

"Alternative Measures of Change in Real Output and Prices, Quarterly Estimates for 1959–92" (March 1993)*

"Preview of the Comprehensive Revision of the National Income and Product Accounts: BEA's New Featured Measures of Output and Prices" (July 1995)*

"BEA's Chain Indexes, Time Series, and Measures of Long-Term Economic Growth" (May 1997)*

"Reliability and Accuracy of the Quarterly Estimates of GDP" (October 1993 SURVEY)* evaluates GDP estimates by examining the record of revisions in the quarterly estimates.

"A Look at How BEA Presents the NIPA'S" (May 1996 SURVEY)* explains how to locate the NIPA estimates and some of the conventions used in their presentation.

Wealth and related estimates

"Improved Estimates of Fixed Reproducible Tangible Wealth, 1929–95" (May 1997 SURVEY)* describes the most recent revision of the estimates of fixed reproducible tangible wealth.

Gross product by industry

"Improved Estimates of Gross Product by Industry, 1959–94" (August 1996 Survey)* describes the most recent comprehensive revision of the estimates of gross product by industry.

"Gross Product by Industry, 1947–96" (November 1997 SURVEY)* presents the most recent revision to the estimates of gross product by industry and briefly describes changes in methodology.

Input-output accounts

"Benchmark Input-Output Accounts for the U.S. Economy, 1992" (November 1997 SURVEY)* describes the preparation of the 1992 input-output accounts and the concepts and methods underlying the U.S. input-output accounts.

International

Balance of payments accounts (BPA's)

The Balance of Payments of the United States: Concepts, Data Sources, and Estimating Procedures (1990) describes the methodologies used in preparing the estimates in the BPA's and of the international investment position of the United States. These methodologies are subject to periodic improvements that are typically introduced as part of the annual revisions of the BPA's.

"U.S. International Transactions, Revised Estimates": This series of Survey articles, the latest of which was published in the July 1997 issue,* describes the annual BPA revisions and the improvements in methodology.

Direct investment

The coverage, concepts, definitions, and classifications used in the benchmark surveys of U.S. direct investment abroad and of foreign direct investment in the United States are presented in the publications of the final results of the following benchmark surveys.

U.S. Direct Investment Abroad: 1989 Benchmark Survey, Final Results (1992)*

Foreign Direct Investment in the United States: 1992 Benchmark Survey, Final Results (1995)*

The types of data on direct investment that are collected and published by BEA and the clarifications of the differences between the data sets are presented in the following Survey articles.

"A Guide to BEA Statistics on U.S. Multinational Companies" (March 1995)*

"A Guide to BEA Statistics on Foreign Direct Investment in the United States" (February 1990)*

Regional

Personal income

State Personal Income, 1929–93 (1995)* includes a description of the methodology used to prepare the estimates of State personal income. [Also available on the CD-ROM "State Personal Income, 1958–96"]

Local Area Personal Income, 1969–92 (1994)* includes a description of the methodology used to prepare the estimates of local area personal income. [Also available on the CD-ROM "Regional Economic Information System, 1969–95"]

Gross state product

"Comprehensive Revision of Gross State Product by Industry, 1977–94" (June 1997 SURVEY)* summarizes the sources and methods for BEA's estimates of gross state product.

BEA INFORMATION

The economic information prepared by the Bureau of Economic Analysis (BEA) is available in news releases, in publications, on computer diskettes, on CD-ROM's, and on the Internet. For a description of these products in the free *User's Guide to BEA Information*, write to the Public Information Office, BE-53, Bureau of Economic Analysis, U.S. Department of Commerce, Washington, DC 20230, or call (202) 606-9900. The *User's Guide* and other information are also available on BEA's home page at http://www.bea.doc.gov.

In addition, the following publications are available from the Superintendent of Documents of the Government Printing Office (GPO). To order, write to Superintendent of Documents, P.O. Box 371954, Pittsburgh, PA 15250-7954, call (202) 512-1800 or fax (202) 512-2250. Pay by check to the Superintendent of Documents or charge to a GPO deposit account, to VISA, or to MasterCard.

Benchmark Input-Output Accounts of the United States, 1987. (1994) Presents summary and detailed make and use tables for industries and commodities; tables showing commodity- and industry-output-require-ments per dollar of commodity demanded; and tables showing the input-output (1-0) commodity composition of personal consumption expenditures and producers' durable equipment expenditures in the national income and product accounts. Presents concepts and methods used in the 1987 benchmark accounts; concordance beween 1-0 and 1987 Standard Industrial Classification codes; description of the components of the measures of output, intermediate inputs, and value added; and mathematical derivation of total requirements tables. (468 pages) \$29.00, stock no. 003-010-00251-4.

Regional Multipliers: A User Handbook for the Regional Input- Output Modeling System (RIMS II), Third Edition. (1997) This handbook describes the five types of RIMS II multipliers that are available for nearly 500 industries and for any county or for any group of counties. It details the information that the users need in order to effectively use the RIMS II multipliers to analyze the economic and industrial impact of public and private projects and programs on State and local areas. The handbook also includes case studies that illustrate the uses of the RIMS II multipliers and a description of the methodology that the Bureau of Economic Analysis uses to estimate the multipliers. (63 pages) \$6.00, stock no. 003–010–00264–6.

State Personal Income, 1929–93. (1995) Presents detailed annual estimates for States and regions of personal income for 1929–93, including estimates of per capita personal income, personal income by major source, and earnings by industry. Also presents annual estimates of disposable personal income and per capita disposable personal income for 1948–93 and quarterly estimates of personal income for 1969–93. Provides information about the sources and methods used to prepare the estimates for 1987–93 and samples of all the detailed tables of personal income and employment that are available for regions, States, counties, and metropolitan areas. (444 pages) \$27.00, stock no. 003–010–00257–3.

Foreign Direct Investment in the United States: 1992 Benchmark Survey, Final Results. (1995) Presents detailed data on the financial structure and operations of U.S. affiliates of foreign direct investors, on the foreign direct investment position in the United States, and on the balance-of-payments transactions between U.S. affiliates and their foreign parent companies in 1992. Includes data for items, such as employment covered by collective bargaining agreements and merchandise trade by product and country of destination and origin, that are only collected in benchmark surveys. Benchmark surveys are conducted every 5 years and are BEA's most comprehensive surveys in terms of both the number of companies covered and the amount of information gathered. The data are classified by industry of affiliate and by country of ultimate beneficial owner, and selected data are classified by State. Provides information about the coverage, the concepts and definitions, and the

classifications used in the survey. (312 pages) \$20.00, stock no. 003-010-00259-0.

Foreign Direct Investment in the United States: Operations of U.S. Affiliates of Foreign Companies. (1997) Two publications: One presents the revised estimates for 1994, and the other, the preliminary estimates for 1995 from BBA's annual surveys of the financial structure and operations of nonbank U.S. affiliates of foreign direct investors. The estimates are presented by industry of the U.S. affiliate and by country of the ultimate beneficial owner (UBO) and for selected estimates, by industry of UBO and by State. Preliminary 1995 Estimates (108 pages) \$8.50, stock no. 003-010-00268-9; Revised 1994 Estimates (108 pages) \$8.50, stock no. 003-010-00267-1.

Foreign Direct Investment in the United States: Establishment Data for 1992. (1997) This publication, which presents the results of a project by BEA and the Bureau of the Census, provides the most recently available data on the number, employment, payroll, and shipments or sales of foreign-owned U.S. establishments in more than 800 industries at the Standard Industrial Classification four-digit level and by State and by country of owner. Presents additional information—such as data on value added, employee benefits, hourly wage rates of production workers, and expenditures for plant and equipment—for manufacturing establishments. (364 pages) \$28.00, stock no. 003-010-00265-4.

Foreign Direct Investment in the United States: Establishment Data for Manufacturing, 1991. (1994) A joint effort by BEA and the Bureau of the Census. Presents the most recently available data for foreign-owned U.S. manufacturing establishments (plants) by detailed industry (up to 459 industries), by State, and by country of investor. Includes data on the number of plants, value added, shipments, employment, total employee compensation, employee benefits, the hourly wage rates of production workers, the cost of materials and energy used, inventories by stage of fabrication, and expenditures for new plant and equipment. (220 pages) \$14.00, stock no. 003-010-00250-6.

U.S. Direct Investment Abroad: 1994 Benchmark Survey, Preliminary Results. (1997) Presents preliminary results from the latest benchmark survey of the worldwide operations of U.S. multinational companies. Contains detailed 1994 data on the operations of U.S. parent companies and their foreign affiliates in 103 tables organized by country and by industry. (140 pages) \$14.00, stock no. 003-010-00263-8.

U.S. Direct Investment Abroad: Operations of U.S. Parent Companies and Their Foreign Affiliates, Preliminary 1995 Estimates. (1997) Provides revised results for 1995 from BEA's annual survey of the worldwide operations of U.S. multinational companies. Contains information on the financial structure and operations of U.S. parent companies and their foreign affiliates. Data are classified by country and industry of affiliate and by industry of U.S. parent. (116 pages) \$9.00, stock no. 003-010-00270-1.
