REPORT

OF THE

COMPTROLLER OF THE CURRENCY

TREASURY DEPARTMENT,
OFFICE OF THE COMPTROLLER OF THE CURRENCY,
Washington, December 10, 1926.

DEAR SIR: I have the honor to submit the following annual report, in accordance with the provision of section 333, of the United States Revised Statutes, covering activities of the Currency Bureau, in the year ended October 31, 1926. This is the sixty-fourth report made to the Congress since the organization of the bureau.

LEGISLATION RECOMMENDED

For the past three years the Comptroller of the Currency has urgently recommended the enactment of legislation for improving the charter powers of national banks. The substance of these recommendations are now embodied in H. R. 2, which has passed both Houses of Congress and which is now in the hands of the committee of conference. I take this occasion to repeat my most urgent recommendation for the prompt enactment of this legislation.

It is understood that while the House has technically disagreed to all of the Senate amendments and has instructed its conferees to abide by the language of the bill as it passed the House, the real and only serious difference of opinion between the conferees is over the so-called Hull amendment. My position with reference to this amendment is stated in my letter of June 2, 1926, to Chairman McFadden, which reads as follows:

HON. L. T. McFADDEN,
*Chairman Committee on Banking and Currency,
House of Representatives, Washington, D. C.*

MY DEAR CONGRESSMAN: I beg to acknowledge receipt of your letter of June 1, in which you inform me that the only serious obstacle to the enactment of the bank bill (H. R. 2) is a disagreement between the House and Senate conferees over the so-called Hull amendments and with reference to which you ask my opinion and recommendation.

As I understand it, the bill without the Hull amendments, and in the form in which it passed both the House and the Senate, would have the effect of denying both to national and State member banks of the Federal reserve system in every State the right to establish branches outside of the home city of the parent bank. The Hull amendments are, therefore, not involved in this question of the restriction of State-wide branch banking, and I take it there is no disagreement between the House and the Senate on this point.

In addition to the foregoing restrictions on what may be termed "branch banking" proper, the bill without the Hull amendments, and in the form in which it passed both the House and the Senate, further denies to national banks the right to have home city branches in any State which denies that right to the State banks.

The immediate effect of the bill, therefore, regardless of the Hull amendments, would be to prohibit in every state the further spread of State-wide branch banking within the Federal reserve system and, in addition, to prohibit national banks from having branches in the 26 nonbranch banking States.

The Hull amendments would add a third restriction, which would deny both to national and to State member banks the future right to have home city branches in any of the 26 nonbranch banking States which may hereafter permit home city branch banking. In such an event only nonmember State banks could establish such branches.

Neither my predecessor in office, Mr. Dawes, nor I have heretofore made any recommendation to Congress with reference to the Hull amendments. In my opinion they are not of sufficient importance to cause a serious controversy. I should regard it no less than a calamity to our banking system if this important bank bill is made to suffer defeat on account of an insistence upon the enactment of the Hull amendments.

Yours very respectfully,

J. W. McINTOSH,
Comptroller.

On June 3, 1926, my predecessor, Mr. Henry M. Dawes, wrote a letter to Chairman McFadden (see Daily Congressional Record, June 22, 1926, p. 11783) in which he reviewed at length the history of the inception of the Hull amendment, from which I quote the following paragraph:

I would like, therefore, to make it clear to you, since my name has been used in the debate, that the comptroller's office under my administration was not responsible in any degree for the Hull amendment, and never gave it its indorsement.

Since the last adjournment of Congress numerous groups of bankers and commercial organizations, including the American Bankers' Association, have withdrawn their support of the Hull amendment and have recommended the enactment of the bill with the amendment eliminated. The principle of the Hull amendment is foreign to the bill as originally recommended by the comptroller. It found its way into the bill largely through the support and advocacy of the American Bankers' Association. Now that upon maturer study the association has rejected the amendment, it is earnestly hoped that there will be no further cause for delay in the enactment of the bill.

Last year I directed your attention to the fact that for the period from October 21, 1923, to October 17, 1925, 166 national banks left the national system to engage in the banking business under State charter, carrying with them aggregate resources of \$566,600,000. It is with regret that I must now report that from October 17, 1925, to October 1, 1926, 87 national banks went into the State systems with aggregate resources of about \$560,000,000. During the same period 29 State banks nationalized with aggregate resources of about \$235,000,000.

A comparison of the defections from the national system with the additions to it from the State systems does not, however, present an adequate view of the situation. Each time a national bank abandons its charter the Federal Government loses an instrumentality through which it maintains a direct control over banking policy and banking operations. Each withdrawal constitutes the loss of a unit in the basic membership of the Federal reserve system. These widespread desertions from the national system are clearly indicative of the difficulty which national banks find in operating under their present charter powers. The fact that a greater or less number of State banks for one reason or another take out national charters in no way

compensates for the loss of national banks. The national banking system should be adequate to meet all of the requirements for modern banking; and no national bank ought to be put in the position of being forced to yield its charter in order to carry on legitimate and necessary banking operations.

My predecessor in his statement before the House Committee on Banking and Currency, April 9, 1924, showed that in the five decades preceding 1924 the aggregate resources of the national banks had dropped from a predominating control over commercial banking resources to only about 48 per cent thereof. This rate of decline has been accelerated during the past two years, the national banks to-day holding only about 46 per cent of the total commercial banking resources in the United States. This is true notwithstanding the fact that there has been year by year an actual increase in the aggregate resources of the national banks, the figure standing at the present time around \$25,000,000,000.

The steady decline in the relative strength of the national banking system is accounted for by the more rapid growth of commercial banking under State charter, the total resources of the State commercial banks being at the present time about \$29,000,000,000. This rapid increase of State banking resources is due primarily to the operation of State laws more favorable to modern banking than is the national bank act. It arises in part from accretions from the national system but more largely from the normal banking operations. The aggregate resources of the State savings banks of about \$10,600,000,000 are not included in the above statement of resources of the State commercial banks. As compared with the combined resources of all State banks, commercial and savings, the national banks hold about 39 per cent of the banking resources of the country.

The above statements of fact show that the Federal Government is gradually losing its positive and immediate control over the instrumentalities of commercial credit and over the membership in the Federal reserve system. The greater volume of commercial banking has already passed under the policy control of the State legislatures. The enactment of the legislation now embodied in H. R. 2 would be a step in the direction of the resuscitation of the system of national banks.

NATIONAL BANK FAILURES

Ninety-one national banks, with aggregate capital of \$5,412,500, were placed in charge of receivers during the year ended October 31, 1926. The date that each bank was authorized to commence business, date of appointment of the receiver, the capital stock, and the circulation outstanding at date of failure are shown in the appendix of this report.

From date of the first failure of a national bank in 1865 to October 31, 1926, the number of banks placed in charge of receivers was 1,038. Of this number, however, 63 were subsequently restored to solvency and permitted to resume business. The total capital of these banks at date of failure was \$124,713,420, while the book or nominal value of the assets administered by receivers under the supervision of the comptroller aggregated \$673,482,428 and the total cash thus far realized from the liquidation of these assets amounted to \$314,444,878.

In addition to this amount there has been realized from assessments

levied against shareholders the sum of \$34,379,270, making the total cash collections from all sources \$348,824,148, which have been disbursed as follows:

In dividends to creditors on claims proved, amounting to \$363,- 418,731, the sum of	\$208, 032, 742
In payment of secured and preferred liabilities	98, 468, 046
In payment of legal expenses incurred in the administration of such receiverships	7, 441, 046
In payment of receivers' salaries and other expenses of receiver- ships	17, 524, 022
There has been returned to shareholders in cash	4, 149, 031
Leaving a balance with the comptroller and the receivers of	13, 209, 261

Assets have been returned to agents for shareholders, to be liquidated for their benefit, having a nominal value of \$16,085,691.

The book value of the assets of the 378 national banks that are still in charge of receivers amount to \$261,310,078. The receivers had realized from these assets at the close of business on October 31, 1926, the sum of \$102,424,977 and had collected from the shareholders on account of assessments levied against them to cover deficiencies in assets the further sum of \$8,943,350, making the total collections from all sources in the liquidation of active receiverships the sum of \$111,368,327, which amount has been distributed as follows:

Dividends to creditors (to Sept. 30, 1926)	\$42, 101, 330
Secured and preferred liabilities paid	48, 549, 197
Legal expenses	1, 270, 969
Receivers' salaries and all other expenses of administration	5, 887, 570
Amount returned to shareholders in cash	350, 000
Leaving a balance with the comptroller and the receivers of	13, 209, 261

Receiverships of 31 national banks were closed during the year, making a total of 660 closed receiverships.

Collections from the assets of the 660 national banks, the affairs of which have been finally closed, amounted to \$212,019,901 and together with the collections of \$25,435,920 from assessments levied against the shareholders, make a total of \$237,455,821, from which on claims aggregating \$215,751,406 dividends were paid amounting to \$165,931,412.

Average rate of dividends paid on claims proved was 76.91 per cent, but including offsets allowed, loans paid, and other disbursements with dividends, creditors received on an average 83.55 per cent.

Expenses incident to the administration of these 660 trusts—that is, receivers' salaries and legal and other expenses—amounted to \$17,806,529, or 4.32 per cent of the nominal value of the assets and 7.49 per cent of the collections from assets and from shareholders. The outstanding circulation of these banks at the date of failure was \$32,121,513, which was secured by United States bonds on deposit in the Treasury of the face value of \$34,540,600. The assessments against shareholders averaged 52.70 per cent of their holdings, while the collections from the assessments levied were 48.79 per cent of the amount assessed. The total amount disbursed in dividends during the current year to the creditors of insolvent banks was \$19,896,992.46.

In the table following is summarized the condition of all insolvent national banks, the closed and active receiverships being shown separately:

BANK FAILURES OTHER THAN NATIONAL

Information furnished by the banking departments of the several States discloses that during the fiscal year ended June 30, 1926, there were 496 failures of State and private banks, with total liabilities aggregating \$147,823,000, an increase of 56 failures over the previous year, and also an increase of \$29,095,000 in liabilities.

Tables showing the number of failures and liabilities of banks other than national and national banks in each State during the year ended June 30, 1926, and for years ended June 30, 1914 to 1926, are published in the appendix of this report.

PUBLIC DEBT, UNITED STATES BONDS, NATIONAL BANK, AND OTHER CIRCULATION

By reference to the following, and also to the corresponding statement for the year ended June 30, 1925, it appears that, while a reduction in the interest-bearing debt of the United States from \$20,210,906,251.35 to \$19,383,770,860.05, a reduction in the sum of \$827,135,391.30, was effected in the year, there was no change in the volume of bonds eligible as security for the national-bank circulation, the aggregate standing at \$674,625,630. To this amount is now limited the volume of national-bank circulation issuable. The

eligible bonds consist of \$599,724,050 consols of 1930, \$48,954,180 Panama Canal 2 per cent bonds of 1916-1936, and \$25,947,400 Panama Canal 2 per cent bonds of 1918-1938. On June 30 the Treasurer held in trust as security for national-bank circulation all but \$597,780 of the Panama Canal 2's, and all the consols except \$8,411,400. The Treasurer also holds in trust as security for public deposits \$429,500 of these two classes of bonds, and \$202,700 to secure postal-savings funds.

Outstanding circulation of national banks on June 30 last aggregated \$702,669,244, of which \$660,986,560 was secured by bonds, and \$41,682,684 by lawful money deposited by banks retiring their circulation and on account of associations in liquidation. In the year there was a net decrease in national-bank circulation of some \$30,696,830, mainly on account of redemptions charged to lawful money deposit account.

The stock of money in the country on July 1, 1926, had risen to \$8,372,981,468, of which gold coin and bullion amounted to \$4,500,324,107, or nearly 54 per cent of the stock; silver dollars and subsidiary silver \$822,388,253, about 9 per cent; United States notes, Federal reserve bank issues, and national-bank circulation, \$3,050,269,108, over 36 per cent. Considering the volume of various issues of paper currency, it is noted that the Federal reserve bank issues compose 24 per cent of the stock of the circulating medium; United States notes, 4 per cent, and national-bank circulation, 8 per cent.

On the date in question the paid-in capital of national banks was \$1,418,504,876, and, as the amount of bonds eligible as security for national-bank circulation has been reduced to \$674,625,630, it is evident that the circulation issue privilege has been reduced to approximately 47.5 per cent of the maximum amount issuable under the law—that is, the paid-in capital stock of the banks.

With the withdrawal of bonds and consequent retirement of the circulation during the last 2 years, banks issuing circulation have been reduced from 90 per cent in 1924 to 83 per cent in 1926.

Statements herein referred to relating to the public debt and securities held in trust by the Treasurer of the United States are as follows:

REDEMPTION OF NATIONAL AND FEDERAL RESERVE BANK CIRCULATION

In the year ended June 30, 1926, national-bank notes, Federal reserve notes, and Federal reserve bank notes aggregating \$1,831,-069,055 were redeemed at the United States Treasury at a total expense of \$548,569.

These redemptions included Federal reserve notes amounting to \$1,301,738,530; Federal reserve bank notes received from all sources, including Federal reserve banks and branches, \$1,462,885; and national-bank notes aggregating \$527,867,640, the latter sum including \$52,937,972.50 redeemed on retirement account.

National-bank notes were redeemed at an average cost of \$0.94 per \$1,000; Federal reserve notes received from sources other than Federal reserve banks \$0.77 per 1,000 notes; canceled and other Federal reserve notes received direct from Federal reserve banks and branches \$0.34 per 1,000 notes redeemed, and redemptions on account of Federal reserve bank notes at the rate of \$3.61 per 1,000 notes.

Statements showing the amount of national-bank notes, Federal reserve notes, and Federal reserve bank notes received monthly for redemption in the year ended June 30, 1926, the source from which received, and the classification of redemptions, together with the rate per \$1,000 of national-bank notes redeemed and the rate per 1,000 notes of Federal reserve and Federal reserve bank notes redeemed, are published in the appendix of this report.

NATIONAL BANKS OF ISSUE

On December 31, 1925, when there were 8,054 reporting national banks, with paid-in capital stock aggregating \$1,379,101,000, all but 1,330 banks, with capital of \$284,325,000, were exercising the privilege of issuing circulating notes collateraled by the deposit of United States bonds. The 6,724 banks of issue had a circulating note liability of \$648,461,000, or an average of \$96,439.77 per bank.

Tables disclosing the number of national banks issuing circulation, their capital, amount of circulation outstanding, together with the number of associations not issuing circulation and their capital in each State and Federal reserve district on December 31, 1925, with corresponding data as of December 31, 1924, are published in the appendix of this report.

PROFIT ON NATIONAL BANK CIRCULATION

The profit on circulation issued by national banks, as disclosed in computations by the actuary of the Treasury, based on the deposit of \$100,000 consols of 1930, showed a slight increase in the percentage over the year previous. In February, 1926, when bonds were at the highest point in the year, the cost of 100,000 consols was \$102,977. Interest on this amount of bonds deposited with the Treasurer to secure a like amount of circulation amounted to \$2,000, and interest on the amount of notes received, less the 5 per cent redemption fund, was \$5,700, or gross receipts in the amount of \$7,700. Deducting from the latter sum taxes on circulation, \$500, expense of maintenance, \$62.50, and sinking fund of \$641.44 to provide for liquidation of the premium paid for the bonds, a total of \$1,203.94, the net receipts amounted to \$6,496.06. Interest on the cost of the bonds invested otherwise at 6 per cent would net \$6,178.62, or \$317.44 less than the net receipts if invested in circulation bonds; hence, the profit on circulation in excess of 6 per cent on the investment in the month referred to was 0.308 per cent. Consols purchased in October of 1926, when the cost was at the lowest point during the year, resulted in a larger profit, or 0.446 per cent.

One hundred thousand dollars of Panama 2's in November, 1925, sold at a premium of \$946, then the lowest figure in the year, and resulted in a profit slightly in excess of 1 per cent to banks exercising the privilege of circulation secured by these bonds. In February of the current year, however, when this class of bonds were at the highest figure, profit on circulation amounted to 0.94 per cent.

Elsewhere in this report appear tables showing, by months, the profit on national bank circulation based upon a deposit of \$100,000 United States consols of 1930, and Panama Canal bonds at the average net price during the year ended October 31, 1926. These

tables are supplemented by others showing the investment value of circulation bonds quarterly, and the monthly range of prices in New York in the year ended October, 1926.

ORGANIZATION AND LIQUIDATION OF NATIONAL BANKS

Up to and including October 31, 1926, there have been authorized to begin business 13,001 national banking associations, of which 4,018 were voluntarily closed to discontinue business or amalgamated with other banks, State or national, including those consolidated with other national banking associations under authority of the act of November 7, 1918. Exclusive of banks which failed but were subsequently restored to solvency the loss to the system by banks liquidated through receiverships was 975, the number of these receiverships being a fraction less than 7.5 per cent of the total number of banks organized. As a result of liquidations and failures the number of national banking associations in existence at the close of the current year stood at 8,008.

In November, 1914, there were in existence 7,578 national banks with capital of \$1,072,500,000. Since that date the net increase in the number of banks was 430 and an increase in capital of \$349,600,000. The capital of the banks in existence on October 31, 1926, was roundly \$1,422,132,000. In this 12-year period 2,349 banks were chartered with capital of \$246,705,300. During this period, however, 1,919 associations were closed voluntarily or otherwise.

Applications to organize national banks and to convert State banks into national banking associations were received in the current year to the number of 301, with proposed capital stock of \$47,155,000. Of the applications pending 157 were approved, 122 rejected, and 43 abandoned. National banking associations to the number of 160, with capital of \$29,705,000, were authorized to begin business, of which 5 were located in the New England States, 58 in the Eastern, 37 in the Southern, 30 in the Middle Western, 15 in the Western, and 15 in the Pacific States. The greatest activity as indicated by the number of banks organized was in the following States: New York, 24 banks; New Jersey, 22; Pennsylvania, 11; Florida, 8; Texas, 16; Michigan, 8; Minnesota, 8; and California, 14. In other States the number ranged from 1 to 6 banks. It further appears that of the total number of charters issued 29 were the result of conversions of State banks, 7 reorganizations of State or national banks, and 124 primary organizations. In this connection it is of interest to note that the organization of 19 banks was incident to the reorganization of liquidated national banking associations; 2 to succeed failed national banks, acquiring incidentally their assets and assuming the liabilities to depositors and other creditors, and 11 organized in localities where failures had occurred, to enable the communities to have necessary banking facilities.

In the year in question 60 national banking associations were consolidated into 30 under authority of the act of November 7, 1918, the capital of the consolidated banks being \$137,350,010. In some instances there were reductions in capital and in others increases, but the net result by reason of consolidations was an increase in capital stock of \$7,919,990.

The voluntary liquidation of 153 associations represented a capital of \$28,668,300, while the capital of the 91 insolvent banks was \$5,412,500. The net result of the changes hereinbefore mentioned was a decrease for the year in the number of active banks by 110, and an increase in authorized capital stock of \$40,154,190. It appears that during the year 210 banks increased their capital in the aggregate sum of \$49,440,000. Of this number 67 banks effected the increase by stock dividends, the amount of the increase in this manner being \$8,846,400.

DISCOUNT RATES PREVAILING IN FEDERAL RESERVE BANK AND BRANCH CITIES

The table following, prepared by the Federal Reserve Board and published in the Federal Reserve Bulletin for November, 1926, shows the prevailing rates charged customers on various classes of loans as reported by representative banks in Federal reserve bank and branch cities during weeks ended October 15, 1925, and August, September, and October 15, 1926. In connection with the table, the Federal Reserve Board called attention to the fact that the rates shown are not averages but are those rates at which the bulk of the loans of each class are made by reporting banks. Since the publication of the rates for May, the forms used in making the reports on which the table is based have been modified and certain classifications have been omitted:

NOTE.—60 and 90 day paper no longer quoted, as little or no paper of these short maturities is now being made. As rates previously, however, for 60 to 90 days paper were identical with those for 4 to 6 months paper, present rates are properly comparable with previous rates, the standard for all recent years being 4 to 6 months paper. There is no distinction now between single name and double name paper. The practice is to quote simply the very best names, and then the next best.

PRIVATE BANKS

The returns from 495 reporting private banks show resources aggregating \$174,152,000, an increase of \$18,929,000 over the resources of 523 reporting private banks on June 30, 1925. In the States of Texas, Michigan, and Iowa private banks are not under State supervision and figures for the current year were obtained from but 122 of approximately 395 banks of this class operating in the States mentioned.

Loans and discounts of the reporting banks were \$92,559,000, as compared with \$79,667,000 in June of 1925. Overdrafts, \$520,000, were reduced \$310,000 and investments in United States and other miscellaneous bonds and securities, \$35,506,000, were \$351,000 more than in the preceding year.

Banking house, furniture and fixtures showed a reduction from \$4,895,000 to \$4,850,000, while other real estate increased from \$5,307,000 to \$8,135,000. Amounts due from banks, \$20,894,000, were \$1,588,000 higher than in the preceding year; lawful reserve was reduced \$291,000; checks and other cash items reduced \$40,000, and exchanges for clearing house was reduced \$126,000. Cash on hand showed an increase from \$3,832,000 to \$4,139,000. Other resources were likewise increased in the sum of \$1,775,000.

Capital of \$9,895,000 showed a reduction of \$908,000 and is probably accounted for, in part, to the fact that 28 fewer banks reported in 1926 than in June of the previous year. The surplus funds and undivided profits, however, increased in the sums of \$2,403,000 and \$76,000, respectively.

The total deposit liabilities were increased from \$127,479,000 to \$133,249,000, the largest increase being shown in individual deposits, which rose from \$126,236,000 to \$131,763,000.

Balances due to banks and bankers increased \$185,000, and certified checks and cashiers' checks outstanding increased \$58,000.

Notes and bills rediscounted showed a reduction of \$279,000, but bills payable increased \$3,497,000. Other liabilities showed an increase of \$3,370,000.

Summary of the resources and liabilities of these banks follows:

* Revised figures.

¹ Includes United States paper currency in circulation in foreign countries and the amount held by the Cuban agencies of the Federal reserve banks.

² Does not include gold bullion or foreign coin outside of vaults of the Treasury, Federal reserve banks, and Federal reserve agents.

³ These amounts are not included in the total since the money held in trust against gold and silver certificates and Treasury notes of 1890 is included under gold coin and bullion and standard silver dollars, respectively.

⁴ The amount of money held in trust against gold and silver certificates and Treasury notes of 1890 should be deducted from this total before combining it with total money outside of the Treasury to arrive at the stock of money in the United States.

⁵ This total includes \$18,406,917 of notes in process of redemption, \$151,662,551 of gold deposited for redemption of Federal reserve notes, \$8,633,934 deposited for redemption of national bank notes, \$4,065 deposited for retirement of additional circulation (act of May 30, 1908), and \$6,001,496 deposited as a reserve against postal savings deposits.

⁶ Includes money held by the Cuban agencies of the Federal reserve banks of Boston and Atlanta.

NOTE.—Gold certificates are secured dollar for dollar by gold held in the Treasury for their redemption; silver certificates are secured dollar for dollar by standard silver dollars held in the Treasury for their redemption; United States notes are secured by a gold reserve of \$154,188,886 held in the Treasury. This reserve fund may also be used for the redemption of Treasury notes of 1890, which are also secured dollar for dollar by standard silver dollars held in the Treasury. Federal reserve notes are obligations of the United States and a first lien on all the assets of the issuing Federal reserve bank. Federal reserve notes are secured by the deposit with Federal reserve agents of a like amount of gold or of gold and such discounted or purchased paper as is eligible under the terms of the Federal reserve act. Federal reserve banks must maintain a gold reserve of at least 40 per cent, including the gold redemption fund which must be deposited with the United States Treasurer, against Federal reserve notes in actual circulation. Lawful money has been deposited with the Treasurer of the United States for retirement of all outstanding Federal reserve bank notes. National bank notes are secured by United States bonds except where lawful money has been deposited with the Treasurer of the United States for their retirement. A 5 per cent fund is also maintained in lawful money with the Treasurer of the United States for the redemption of national bank notes secured by Government bonds.

FAILURES OF BUILDING AND LOAN ASSOCIATIONS, 1920-1925

In the year 1925 there were 26 failures of building and loan associations in the United States, involving a loss of approximately a half million dollars. Of these failures 22 were in Pennsylvania, 1 in North Carolina, 1 in Utah, and 2 in Minnesota. Seventeen of the associations which failed in Pennsylvania were located in Philadelphia and closed by the State banking department in July of 1925. They had combined assets of about \$2,000,000, were controlled by the same persons, and their failure was due to mismanagement.

The following is a summary of building and loan association failures and losses each year from 1920 to 1925, inclusive, together with a statement of the total number and total resources of these associations for each year and the annual per cent of loss to total resources:

Since the last report to Congress, two national agricultural credit corporations were established under authority of the agricultural credit act of 1923—namely, the National Agricultural Credit Corporation of Fort Dodge, Iowa, and the National Agricultural Credit Corporation of Des Moines, Iowa. Each of these corporations was incorporated with the minimum capital, \$250,000. These two corporations, with the Pacific National Agricultural Credit Corporation of Fresno, Calif., established in 1925, are the only corporations which have been organized under authority of the act in question.

By reference to the statement following, it will be noted that the combined capital of these three corporations is \$1,000,000, and total liabilities \$2,308,577.29. Loans and discounts, comprising the principal asset, aggregated \$2,024,215.29; and investments in United States bonds and securities \$253,428.73.

In the statement following is shown in detail for each corporation the character and amount of their assets and liabilities at the close of business on June 30, 1926:

LIQUIDATION OF THE IOWA NATIONAL AGRICULTURAL CREDIT CORPORATIONS

The national agricultural credit corporations of Fort Dodge and Des Moines, Iowa, were organized to serve a temporary need in extending credit to farmers with agricultural product security, through the medium of warehouse receipts or chattel mortgages. Having accomplished, to the extent possible, the purpose for which incorporated, meetings of the shareholders were held in the respective cities on October 25, when, by the necessary vote, the corporations were placed in voluntary liquidation. At the date of liquidation, practically the only liability of the corporations was that to their shareholders.

The closing of these two corporations leaves but one in active operation—namely, the Pacific National Agricultural Credit Corporation of Fresno, Calif.

UNITED STATES POSTAL SAVINGS SYSTEM

The total resources of United States Postal Savings System as of June 30, 1926, obtained through the courtesy of the Third Assistant Postmaster General, under whose supervision the system operates, aggregated \$141,811,911.52, which is an increase of \$3,540,291.70 over June 30, 1925. The total number of depositors was 399,305 and the average amount on deposit per depositor was \$336.03.

Balances in depository banks and with postmasters increased by \$3,300,551.22 and investments in postal savings and Liberty loan bonds from \$32,973,800.36 to \$33,224,160.36. The remaining increases occurred in miscellaneous (working) funds deposited with the Treasurer of the United States, and in accounts receivable, represented by accrued interest on bond investments. A decrease of \$38,650, however, is noted in the special reserve fund placed with the Treasurer of the United States.

In liabilities the amount due depositors was \$134,178,558.00, which exceeded by \$2,005,347.00 this liability on June 30, 1925. The surplus funds, consisting of interest and undistributed earnings subject to future allocation of maturing interest charges, showed a reduction of nearly \$7,500.

The statement of credit and debit items, on account of interest and profits, for the fiscal year ended June 30, 1926, showed an excess of income amounting to \$104,546.64 over that of a year ago.

Comparative statements in relation to the operation of the Postal Savings System for the years ended June 30, 1925, and 1926, follow:
