Data for July 1994

The *CPI Detailed Report*—(ISSN 0161-7311) is a monthly report on consumer price movements, including statistical tables and technical notes. The report covers two indexes, the Consumer Price Index for All Urban Consumers (CPI-U) and the Consumer Price Index for Wage Earners and Clerical Workers (CPI-W). The indexes reflect data for the U.S. city average and selected areas.

A subscription may be ordered for 1 or 2 years from: New Orders, Superintendent of Documents, P.O. Box 371954, Pittsburgh, PA 15250-7954 or by calling (202) 783-3238, Visa or Mastercard accepted. FAX (202) 512-2233. Subscription price per year: \$23 domestic, \$28.75 foreign. Single copy domestic, \$7.50; foreign, \$9.38. Prices are subject to change by the U.S. Government Printing Office.

Send correspondence on subscription matters, including address changes and missing issues, to the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402, or telephone (202) 512-1806. POSTMASTER: Send address changes to CPI Detailed Report, U.S. Government Printing Office, Washington, DC 20402.

For Technical information call the CPI Information and Analysis Office at (202) 606-7000, or write to Consumer Price Indexes, 2 Massachusetts Avenue, NE, Room 3615, Washington, DC 20212-0001.

CPI MAILGRAM provides selected U. S. City Average data for CPI-U and CPI-W within 24 hours of release. Order from: National Technical Information Service, 5285 Port Royal Road, Springfield, Virginia 22161. Subscription rates: \$145 in contiguous U.S. and Hawaii; \$160 in Alaska and Canada.

Information in this publication will be made available to sensory impaired individuals upon request. Voice phone: (202) 606-STAT; TDD phone: (202) 606-5897; TDD message referral phone: 1-800-326-2577. This material is in the public domain and, with appropriate credit, may be reproduced without permission. Second-class postage paid at Washington, DC and at additional mailing offices.

Price Movements

July 1994

The Consumer Price Index for All Urban Consumers (CPI-U) rose 0.3 percent before seasonal adjustment in July to a level of 148.4 (1982-84=100). For the 12-month period ended in July, the

CPI-U increased 2.8 percent.

The Consumer Price Index for Urban Wage Earners and Clerical Workers (CPI-W) also increased 0.3 percent in July, prior to seasonal adjustment. The July 1994 CPI-W level of 145.8 was 2.6 percent higher than the index in July 1993.

CPI for All Urban Consumers (CPI-U)

On a seasonally adjusted basis, the CPI-U rose 0.3 percent in July, the same as in June. The food and energy indexes, which had a moderating effect on the CPI-U during the first half of 1994, increased 0.5 and 1.8 percent, respectively, in July. Within the food component, increases in prices for fresh fruits and vegetables and coffee were partially offset by price declines for meats and dairy products. A sharp increase in prices for motor fuels—up 3.8 percent after seasonal adjustment—accounted for nearly 90 percent of the advance in the energy index. The CPI-U excluding food and energy rose 0.2 percent in July, following increases of 0.3 percent in each of the preceding 2 months. A

downturn in the index for apparel and upkeep was responsible for the moderation.

During the first 7 months of 1994, the CPI-U rose at a 2.7-percent seasonally adjusted annual rate (SAAR). In 1993, the CPI-U increased 2.7 percent. The food index increased at an annual rate of 1.6 percent and energy costs at a 3.0-percent rate. The index for all items less food and energy rose at an annual rate of 2.9 percent during the first 7 months. This follows a 3.2-percent increase in 1993 and continues the moderating pattern evident in this component since 1990.

The food and beverage index rose 0.5 percent in July. Grocery store food prices increased 0.8 percent, their largest advance in more than a year. A sharp rise in coffee prices and another substantial one in the index for fresh fruits and vegetables were largely responsible for the increase. Coffee prices rose 22.4 percent, accounting for over four-fifths of the 2.3 percent increase in the index for other food at home. The index for fruits and vegetables registered its third consecutive large monthly increase—up 2.5 percent in July. The index for fresh fruits and vegetables rose 3.4 percent and that for processed fruits and vegetables, 0.7 percent. The index for cereal and bakery products increased 0.2 percent. Partially offsetting these increases were declines in the indexes for dairy products and

for meats, poultry, fish, and eggs—down 0.3 and 0.7 percent, respectively. Beef prices fell 1.2 percent in July and were 2.2 percent lower than a year earlier. The index for pork fell 1.2 percent, reflecting smaller than usual price increases in July. Poultry prices rose 0.3 percent. The other two components of the food and beverage index—restaurant meals and alcoholic beverages—continued to show little change.

The housing component, which rose 0.1 percent in June, increased 0.2 percent in July. Shelter costs increased 0.3 percent, following a 0.1-percent rise in June. Within shelter, homeowners' costs increased 0.4 percent, while renters' costs declined 0.1 percent and maintenance and repair costs fell 0.2 percent. The decrease in renters' costs reflects a 1.1-percent decline in the index for lodging while out of town; residential rents advanced 0.3 percent. The index for fuel and other utilities turned up in July, following declines in each of the 3 preceding months. The index for household fuels rose 0.4 percent, as increases in the indexes for fuel oil and electricity—up 1.1 and 0.6 percent, respectively—more than offset a 0.1-percent decline in the index for natural gas. The index for other utilities and public services was unchanged in July. The index for household furnishings and operation was also unchanged in July.

Transportation costs rose 1.0 percent, primarily reflecting a sharp increase in the index for motor fuels. The index for gasoline rose 3.5 percent in July. (Prior to seasonal adjustment, gasoline prices rose 2.6 percent.) As of July, the gasoline index was 2.4 percent higher than a year earlier. Automobile purchase costs continued to advance in July. The index for new vehicles rose 0.4 percent in July and has advanced at a 4.8-percent seasonally adjusted annual rate thus far in 1994. Automobile finance charges, which advanced 1.8 percent in July, have increased 11.7 percent in the past 4 months. The index for used cars rose 0.9 percent.

Public transportation costs increased 0.9 percent. Airline fares rose 1.3 percent in July and have now risen 4.4 percent after registering a record 5.4 percent decline in May.

The index for apparel and upkeep declined 0.4 percent in July, after advancing 0.4 and 0.6 percent in the 2 preceding months. Price decreases, reflecting seasonal sales of spring-summer wear, were slightly larger than usual and, coupled with the slower than usual introduction of fall-winter wear, resulted in the downturn in July. (Prior to seasonal adjustment, prices for apparel and upkeep fell 2.2 percent in July, following declines of 0.6 and 1.3 percent in May and June, respectively.)

Medical care costs rose 0.4 percent in July, to a level 4.6 percent above a year earlier. The index for medical care commodities—prescription drugs, nonprescription drugs, and medical supplies—rose 0.4 percent in July. The index for medical care services also rose 0.4 percent in July. Charges for professional services and hospital and related services increased 0.3 and 0.4 percent, respectively.

Entertainment costs increased 0.3 percent in July, following a 0.1-percent decline in June. Over three-fourths of the July advance resulted from price increases in the indexes for admissions to movies, theaters, concerts, and sporting events and for newspapers—up 1.0 and 0.9 percent, respectively.

The index for other goods and services rose 0.4 percent in July, the same as in June. Increases in the indexes for educational expenses and for tobacco and smoking products accounted for about four-fifths of the July advance in this major group.

CPI for Urban Wage Earners and Clerical Workers (CPI-W)

On a seasonally adjusted basis, the CPI for Urban Wage Earners and Clerical Workers rose 0.4 percent in July.

CPI-U 12-month changes, 1985 to present

¹ Foods, fuels, and several other items priced every month in all areas; most other goods and services priced as indicated:

M - Every month.

1 - January, March, May, July, September, and November.

2 - February, April, June, August, October, and December.

² Regions defined as the four Census regions. See map in technical notes.

³ Indexes on a December 1986=100 base.

⁴ In addition, the following metropolitan areas are published semiannually and appear in tables 34 and 39 of the January and July issues of the CPI Detailed Report: Anchorage, AK; Atlanta, GA; Buffalo-Niagara Falls, NY; Cincinnati-Hamilton, OH-KY-IN; Denver-Boulder, CO; Honolulu, HI;

Kansas City, MO-KS; Milwaukee, WI; Minneapolis-St. Paul, MN-WI; Portland-Vancouver, OR-WA; San Diego, CA; and Seattle-Tacoma, WA.

The following metropolitan areas are published annually and appear in tables 16A and 23A of the January issue of the CPI Detailed Report: New Orleans, LA and Tampa-St. Petersburg-Clearwater, FL.

- Data not available.

NOTE: Local area CPI indexes are byproducts of the national CPI program. Each local index has a smaller sample size than the national index and is, therefore, subject to substantially more sampling and other measurement error. As a result, local area indexes show greater volatility than the national index, although their long-term trends are similar. Therefore, the Bureau of Labor Statistics strongly urges users to consider adopting the national average CPI for use in their escalator clauses.

¹ Foods, fuels, and several other items priced every month in all areas; most other goods and services priced as indicated:

M - Every month.

1 - January, March, May, July, September, and November.

2 - February, April, June, August, October, and December.

² Regions defined as the four Census regions. See map in technical notes.

³ Indexes on a December 1986=100 base.

⁴ In addition, the following metropolitan areas are published semiannually and appear in tables 34 and 39 of the January and July issues of the CPI Detailed Report: Anchorage, AK; Atlanta, GA; Buffalo-Niagara Falls, NY; Cincinnati-Hamilton, OH-KY-IN; Denver-Boulder, CO; Honolulu, HI;

Kansas City, MO-KS; Milwaukee, WI; Minneapolis-St. Paul, MN-WI; Portland-Vancouver, OR-WA; San Diego, CA; and Seattle-Tacoma, WA.

The following metropolitan areas are published annually and appear in tables 16A and 23A of the January issue of the CPI Detailed Report: New Orleans, LA and Tampa-St. Petersburg-Clearwater, FL.

- Data not available.

NOTE: Local area CPI indexes are byproducts of the national CPI program. Each local index has a smaller sample size than the national index and is, therefore, subject to substantially more sampling and other measurement error. As a result, local area indexes show greater volatility than the national index, although their long-term trends are similar. Therefore, the Bureau of Labor Statistics strongly urges users to consider adopting the national average CPI for use in their escalator clauses.

Shortening, vegetable oil blends, per lb. (453.6 gm)865	.867	1.044	1.050	.892	.895	.803	.801	.792	.791
Peanut butter, creamy, all sizes, per lb. (453.6 gm)	1.877	1.898	1.936	2.017	1.774	1.771	NA	NA	NA	NA
Nonalcoholic beverages:										
Cola, nondiet, cans, 72 oz. 6 pk., per 16 oz. (473.2 ml) ²	NA	NA	NA	NA	NA	NA	NA	NA	NA	NA
Coffee, 100%, ground roast, all sizes, per lb. (453.6 gm)	2.598	3.341	2.863	3.505	2.538	3.268	2.475	3.121	2.496	3.391
Coffee, 100%, ground roast, 13.1-20 oz. can, per lb. (453.6 gm)	NA	NA	NA	NA	NA	NA	NA	NA	NA	NA
Other prepared foods:										
Potato chips, per 16 oz. (453.6 gm)	2.968	2.902	2.979	3.005	2.794	2.799	3.072	3.037	3.022	2.764

¹ Regions defined as the four Census regions. See map in technical notes.

² Deposit may be included in price.

^{NA} Data not adequate for publication.

Technical Notes

Brief Explanation of the CPI

The Consumer Price Index (CPI) is a measure of the average change in prices over time in a fixed market basket of goods and services. The Bureau of Labor Statistics publishes CPI's for two population groups: (1) a CPI for All Urban Consumers (CPI-U) which covers approximately 80 percent of the total population and (2), a CPI for Urban Wage Earners and Clerical Workers (CPI-W) which covers 32 percent of the total population. The CPI-U includes, in addition to wage earners and clerical workers, groups such as professional, managerial, and technical workers, the self-employed, short-term workers, the unemployed, and retirees and others not in the labor force.

The CPI is based on prices of food, clothing, shelter, fuels, transportation fares, charges for doctors' and dentists' services, medicine, and the other goods that people buy for day-to-day living. Prices are collected in 85 urban areas across the country from about 57,000 housing units and approximately 19,000 retail establishments—department stores, supermarkets, hospitals, gasoline stations and other types of stores and services establishments. All taxes directly associated with the purchase and use of items are included in the index. Prices of food, fuel, and a few other items are obtained every month in all 85 locations. Prices of most other commodities and services are collected every month in the five largest geographic areas and every other month in other areas. Prices of most goods and services are obtained by either personal visits or telephone calls from the Bureau's trained representatives. Some data, such as used car prices, are obtained from secondary sources.

In calculating the index, price changes for the various items in each location are averaged together with weights which represent their importance in the spending of the appropriate population group. Local data are then combined to obtain a U.S. city average. Separate indexes are also published by size of city, by region of country, for cross-classifications of regions and population-size classes, and for 29 local areas. Area indexes do not measure differences in the level of prices among cities, they only measure the average change in prices for each area since the base period.

The indexes measure price change from a designated reference date, usually 1982-84, which equals 100.0. An increase of 7 percent, for example, is shown as 107.0. This change can also be expressed in dollars as follows: the price of a base period "market basket" of goods and services in the CPI has risen from \$100 in 1982-84 to \$107.

For further details see *BLS Handbook of Methods*, BLS Bulletin 2414, September 1992.

Calculating Index Changes

Movements of the indexes from one month to another are usually expressed as percent changes rather than changes in index points, because index point changes are affected by the level of the index in relation to its base period while percent changes are not. The example in the accompanying box illustrates the computation of index point and percent changes.

Percent changes for 3-month and 6-month periods are expressed as annual rates and are computed according to the standard formula for compound growth rates. These data indicate what the percent change would be if the current rate were maintained for a 12-month period.

<i>Index point change</i>	
CPI	112.5
Less previous index	108.5
Equals index point change	4.0
<i>Percent change</i>	
Index point difference	4.0
Divided by the previous index	108.5
Equals	0.037
Results multiplied by one hundred	0.037 x 100
Equals percent change	3.7

Energy Prices

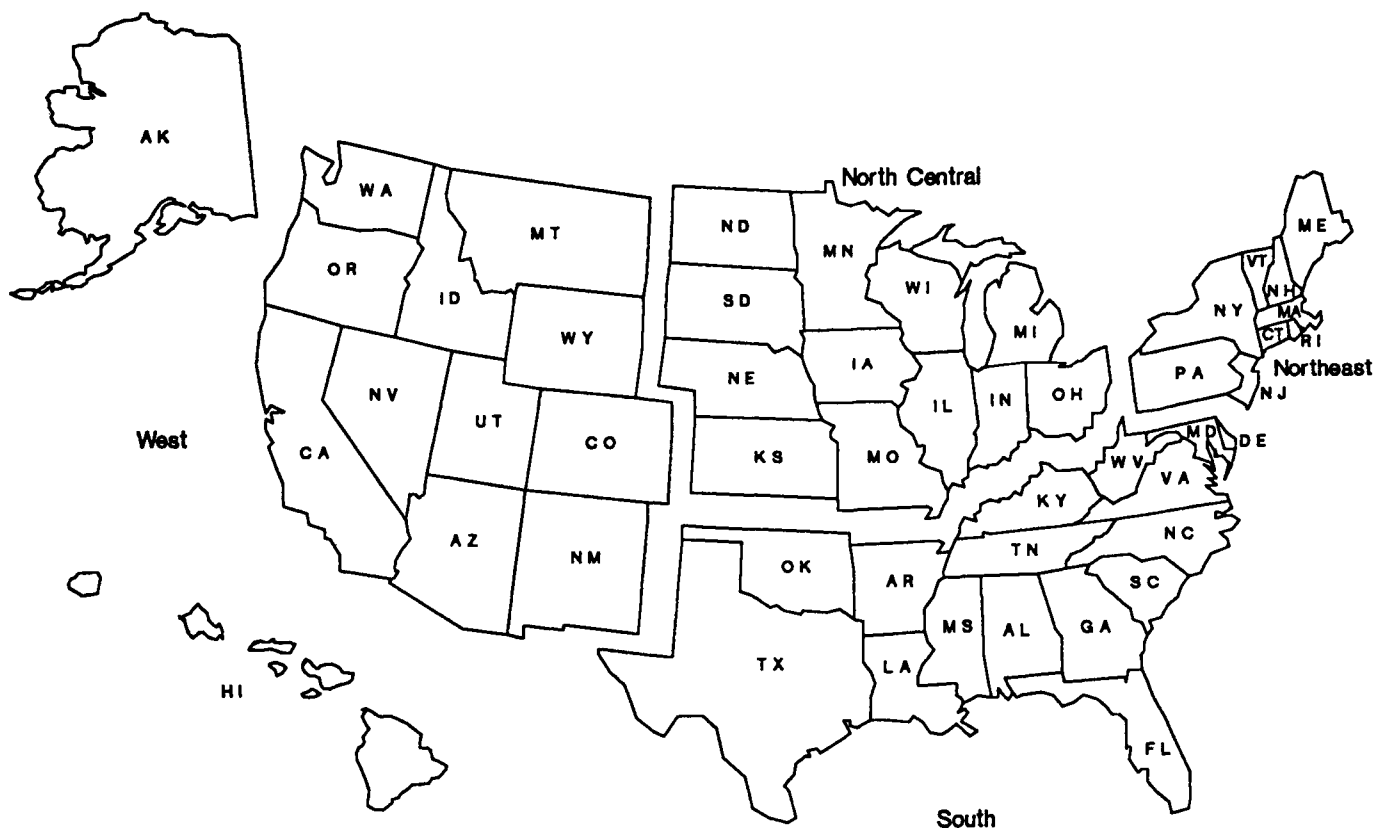

Prices are usually available for the U.S. city average, 15 large metropolitan areas, the four census regions, four size classifications, and 13 areas reflecting the four Census regions cross-classified by the four population sizes. However, not all energy commodities and services are used in every area of the country. Fuel oil, for example, is not a common heating fuel in some urban areas, particularly in the South and West. Where no average prices are available, the designation NA appears. This designation also appears if the data sufficiency criteria have not been met in any given month. For example, if there are fewer than five usable fuel oil prices for a published city or region size class, no fuel oil prices for the area will be published.

All prices are collected monthly by BLS representatives in the urban areas priced for the CPI. Prices for natural gas and electricity include fuel and purchased gas adjustments and all applicable taxes. Fuel oil and gasoline prices include applicable Federal, State, and local taxes.

Natural gas and electricity. Natural gas prices are reported in therms, which are a measure of heating value. Electricity prices are given in kilowatt hours (kwh). For both utility services, the consumption ranges specified in table P2 are the upper and lower limits of the bill sizes priced for the Consumer Price Index. The average prices per therm and per kilowatt hour are calculated from bills priced within these ranges. It should be noted that bills priced for the CPI are not only for different consumption amounts, but may also be calculated from different types of residential rate schedules. *The average price per therm and per kilowatt hour are not, therefore, generally suitable for use in place-to-place price comparisons.*

The average prices for 40 and 100 therms of natural gas for 500 kilowatt hours of electricity (table P1) are calculated from a special price collection program. They are not used in the calculation of the CPI. Since heating and air-conditioning requirements vary by geographic location, climate, and weather conditions, it cannot be inferred that these consumption amounts represent those used by a typical residen-

Census Regions

tial consumer. These bills are used merely to track price changes over time for constant amounts of consumption, and to provide continuity with prices of natural gas and electricity formerly published in conjunction with the unrevised Consumer Price Index.

Fuel oil. Only #2 fuel oil (home heating oil) is priced. Prices are collected, in most cases, for quantities greater than one gallon. These prices are converted to a gallon price for this program. Fuel oil prices reflect discounts for quantity and/or quick payment.

Gasoline. Gasoline prices are collected at the pump from a sample of full service, mini-service, and self-serve gas stations.

Approximate British Thermal Unit (BTU) values for some energy items are as follows, according to the source indicated:

1 therm = 100,000 BTU's (U.S. Department of Energy).

1 kwh = 3,412 BTU'S (Edison Electric Institute).

1 gallon #2 fuel oil = 140,000 BTU'S (U.S. Department of Energy).

Food Prices

In the revised CPI, actual weighted average prices are calculated each month at the national level and for the four Census geographic regions. As a result of changes in price collection methodology and sample sizes, average prices for individual cities cannot in general be produced. It is hoped however, that regional average prices will help satisfy the need for local area data. It should be noted that the average prices for food in this report reflect variations in brand, quality, and size among geographic areas. Users of average food prices should be aware that these differences exist.

Because a number of food commodities are not available in all areas on a year-round basis, prices will not appear in some months for some regions or for the U.S. city average. In other instances, sufficient prices may not be available due to temporary disruptions in supplies. Where no average prices are available, the designation NA appears. When a price is not available from an individual store in any month, as estimated price will be calculated for the missing item and used in computing the average price. In cases where the proportion of estimated prices used to calculate the average is considered too high, the average price is not published and NA appears for that item in the table.

Because of space limitations in the table, the description for each item is abbreviated. More detailed specifications are available from the BLS regional offices or from the Washington office upon request.

Adjustment of Shelter Indexes for Aging Effects

Beginning with January 1988 CPI, the Bureau of Labor Statistics adjusts the monthly CPI shelter indexes for the

change in quality resulting from the effect of aging on rental housing. In January 1987, the Bureau announced its intention to begin making such adjustments, assuming that further research substantiated the need to do so. The decision to implement the adjustment was based on extensive BLS research, in which alternative adjustment methods were explored and tested. Evaluation of the research indicates that an aging effect exists, and that the chosen method is operationally feasible.¹ The adjustment affect CPI shelter indexes, which would have been raised by 0.2 percent for the year 1987 had an aging adjustment been applied.

The quality of housing unit decreases as the unit ages. Existing BLS methods are used to correct for relatively easily measured quality changes such as the addition of an extra bedroom, but such methods are inadequate to correct for deterioration in the condition of housing unit.²

The aging adjustment method was specifically designed to correct for quality changes associated with this deterioration. The BLS used hedonic regression methods to estimate the aging effect.

The estimates were then used to correct the CPI rent and rental equivalence indexes. Hedonic regressions are statistical functions that relate the price of a good to its attributes or characteristics. For example, a hedonic regression relates a housing unit's rent to its size, age, location, etc. By using BLS housing survey data from 1987 and Census data from 1980, hedonic regression methods provided estimates of the relationship between a housing unit's rent and age while other housing unit characteristics were held constant. The estimated relationship was then used to construct the aging adjustment. Estimates will be recomputed annually by using the previous year's BLS housing survey data and the most recently available Census data.

Seasonally Adjusted and Unadjusted Data

Because price data are used for different purposes by different groups, the Bureau of Labor Statistics publishes seasonally adjusted as well as unadjusted changes each month. For analyzing general price trends in the economy, seasonally adjusted changes are usually preferred since they eliminate the effect of changes that normally occur at the same time and in about the same magnitude every year—such as price movements resulting from changing climatic conditions, production cycles, model changeovers, holidays, and sales.

¹ A complete technical presentation of BLS research on this subject is available in William C. Randolph, "Housing Depreciation and Aging Bias in the Consumer Price Index," BLS Working Paper No. 166, April 1987, and *Journal of Business and Economic Statistics*, Vol. 6, No. 3, July 1988, pp. 359-71 and in William C. Randolph, "Estimation of Housing Depreciation: Short Term Quality Change and Long Term Vintage Effects," BLS Working Paper No. 160, April 1986, and *Journal of Urban Economics*, Vol. 23, March 1988, 162-78. These papers are available from the BLS on request.

² For detail on existing quality adjustment methods, see *BLS Handbook of Methods*, chapter 19 (BLS Bulletin 2414).

The unadjusted data are of primary interest to consumers concerned about the prices they actually pay. Unadjusted data also are used extensively for escalation purposes. Many collective bargaining contract agreements and pension plans, for example, tie compensation changes to the Consumer Price Index unadjusted for seasonal variation.

In most cases, seasonal factors used in computing the seasonally adjusted indexes are derived by the X-11-ARIMA Seasonal Adjustment Method. The updated seasonal data at the end of 1977 replaced data from 1967 through 1977. Subsequent annual updates have replaced 5 years of seasonal data, for example, data from 1987 through 1991 were replaced at the end of 1991. The seasonal movement of all items and 47 other aggregations is derived by combining the seasonal movement of 60 selected components. Each year the seasonal status of every series is reevaluated based upon certain statistical criteria. Occasionally, a component changes its seasonal adjustment status from seasonally adjusted to not seasonally adjusted. When this occurs, not seasonally adjusted data are used for the last 5 years, but before that period the seasonally adjusted indexes remain in calculations of higher-level seasonally adjusted indexes.

Effective with the calculation of the seasonal factors for 1990, the Bureau of Labor Statistics has used an enhanced seasonal adjustment procedure called intervention analysis in conjunction with X-11-ARIMA for some CPI series. Intervention analysis allows for better estimates of seasonally adjusted data. Extreme values and/or sharp movements which might distort the seasonal pattern are removed from the data prior to calculation of seasonal factors in X-11-ARIMA.

For the fuel oil and the motor fuels indexes, this procedure was used to offset the effects that extreme price volatility would otherwise have had on the estimates of seasonally adjusted data for those series. For some women's apparel indexes and the girls' apparel index, the procedure was used to offset the effects of changes in pricing methodology; and for new cars, new trucks, and new vehicles, this procedure was used to offset the effects of changes in marketing strategies and the introduction of new models. For the tobacco and smoking products index, this procedure was used to offset the effects of increases in excise taxes and wholesale tobacco prices. For some alcoholic beverage series, intervention was used to offset the effects of excise tax increases.

An alternative to the intervention-adjusted X-11-ARIMA procedure is the state space model-based seasonal adjustment method. This method adjusts simultaneously for interventions and seasonal effects, rather than sequentially as in the X-11-ARIMA methodology, using structural statistical models with explanatory variables. The state space structural model-based method of seasonal adjustment was introduced in 1992 for the adjustment of January 1991-December 1991 indexes for three women's apparel series: Dresses, separates and sportswear, and suits.

A description of intervention analysis, including a list of

events treated as interventions and the seasonal factors for these items may be obtained by writing the Bureau of Labor Statistics, Division of Consumer Prices and Price Indexes, Room 3615, Washington, DC 20212-0001 or by calling Claire McAnaw at (202) 606-6968.

Metropolitan Areas

BLS publishes five major metropolitan areas monthly:

Chicago-Gary-Lake County, IL-IN-WI
 Los Angeles-Anaheim-Riverside, CA
 New York-Northern NJ-Long Island, NY-NJ-CT
 Philadelphia-Wilmington-Trenton PA-NJ-DE-MD
 San Francisco-Oakland-San Jose, CA

Data for additional 10 metropolitan areas are published every other month [on an odd (January, March, etc.) or even (February, April etc.) month schedule] for the following areas:

Baltimore, MD	-odd
Boston-Lawrence—Salem, MA-NH	-odd
Cleveland-Akron—Lorain, OH	-odd
Dallas-Fort Worth, TX	-even
Detroit-Ann Arbor, MI	-even
Houston, TX	-even
Miami-Fort Lauderdale, FL	-odd
Pittsburgh-Beaver Valley, PA	-even
St. Louis-East St. Louis, MO-IL	-odd
Washington, DC-MD-VA	-odd

(Note: The designation even or odd refers to the month during which the area's price change is measured. Due to the time needed for processing, data are released 2 to 3 weeks in to the following month.)

Data are published for another group of 12 metropolitan areas on a semiannual basis. These indexes, which refer to the arithmetic average for the 6-month periods from January through June and July through December, are published with release of the CPI for July and January, respectively, in August and February for:

Anchorage, AK	Kansas City, MO-KS
Atlanta, GA	Milwaukee, WI
Buffalo-Niagara Falls, NY	Minneapolis-St. Paul MN-WI
Cincinnati-Hamilton, OH-KY-IN	Portland-Vancouver, OR-WA
Denver-Boulder, CO	San Diego, CA
Honolulu, HI	Seattle-Tacoma, WA

Finally, BLS recently began publication of CPI's for two metropolitan areas on an annual basis. These indexes represent the arithmetic averages for the 12-monthly period from January through December of each year. They are published with the release of the CPI for January, i.e., in February. These areas are:

New Orleans, LA
 Tampa-St. Petersburg-Clearwater, FL

CPI on Electronic Bulletin Board

A limited amount of CPI information is currently available via the Department of Labor's electronic bulletin board system (BBS). The data are accessible for downloading free of charge at virtually anytime to any person who has a personal computer with a modem and communications software. The phone number for the BBS is (202) 219-4784.

Included on the *Labor News* BBS are all items indexes for the CPI-U and CPI-W for both the U.S. city average and the Washington, D.C. area from 1980 to the present. Also included on the BBS are average prices for the U.S. from 1990 to the present for natural gas, electricity, fuel oil, and gasoline (all types, unleaded regular, and unleaded premium). More indexes or average prices may be added in the future.

The BBS is set to use the most common personal computer parameters. Users should set their communication software to the following:

BAUD RATE:	300-14,400 bps
DATA BITS:	8
STOP BITS:	1

PARITY: NONE
FULL DUPLEX
TERMINAL TYPE: ANSI, VT100, or ANSI-BBS

The *Labor News* BBS is divided into different sections, or "Libraries," with the one containing CPI information being CPIINFO.

Labor News is a menu-driven BBS. Users can select among choices presented on the screen to access the information desired. Typing a "?" will bring up a "Help" screen for on-line assistance. It is also possible to download a users manual for the BBS.

Please note that the BBS shuts down for maintenance every day from 3:00 A.M. to 3:15 A.M. (Eastern time), and Mondays from 7:30 A.M. to 8:00 A.M.

The system operator of the *Labor News* BBS, Don Berry, may be reached at (202) 219-7343. The system operator of the CPI Library, Joe Chelena, may be reached at (202) 606-6982 or via E-mail through the BBS under the name JOEC.
