The *CPI Detailed Report* (ISSN 0095-926X; USPS 485-030) is a monthly report on consumer price movements, including statistical tables and technical notes. The report covers two indexes—the Consumer Price Index for All Urban Consumers (CPI-U) and the Consumer Price Index for Wage Earners and Clerical Workers (CPI-W). The indexes reflect data for the U.S. city average and selected areas.

A subscription may be ordered for 1 or 2 years from: New Orders, Superintendent of Documents, P.O. Box 371954, Pittsburgh, PA 15250-7954 or by calling (202) 512-1800. Visa or MasterCard accepted. Fax (202) 512-2233. Subscription price per year: \$25 domestic, \$31.25 foreign. Single copy domestic, \$11.00; foreign, \$13.75. Prices are subject to change by the U.S. Government Printing Office.

Send correspondence on subscription matters, including address changes and missing issues, to the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402, or telephone (202) 512-1806. POSTMASTER: Send address changes to *CPI Detailed Report*, U.S. Government Printing Office, Washington, DC 20402.

For technical information, call the CPI Information and Analysis Office at (202) 606-7000, or write to Consumer Price Indexes, 2 Massachusetts Avenue, NE, Room 3615, Washington, DC 20212-0001.

CPI MAILGRAM provides selected U.S. City Average data for CPI-U and CPI-W within 24 hours of release. Order from: National Technical Information Service, 5285 Port Royal Road, Springfield, VA 22161. Subscription rates: \$145 in contiguous U.S. and Hawaii; \$160 in Alaska and Canada.

Information in this publication will be made available to sensory impaired individuals upon request. Voice phone: (202) 606-STAT; TDD phone: (202) 606-5897; TDD message referral phone: 1-800-326-2577. Data on the CPI can also be accessed through the CPI homepage (<http://stats.bls.gov/cpihome.htm>). This material is in the public domain and, with appropriate credit, may be reproduced without permission. Periodicals postage paid at Washington, DC and at additional mailing offices.

Price Movements

March 1998

The Consumer Price Index for All Urban Consumers (CPI-U) rose 0.2 percent in March before seasonal adjustment to a level of 162.2 (1982-84=100). For the 12-month period ended in March, the CPI-U has increased 1.4 percent.

The Consumer Price Index for Urban Wage Earners and Clerical Workers (CPI-W) rose 0.1 percent in March, prior to seasonal adjustment. The March 1998 CPI-W level of 158.7 was 1.1 percent higher than the index in March 1997.

CPI for All Urban Consumers (CPI-U)

On a seasonally adjusted basis, the CPI-U was unchanged in March, following a 0.1-percent rise in February. The food index was unchanged for the second consecutive month. Grocery store food prices decreased 0.1 percent in March, the same as in February, reflecting declines in the indexes for fruits and vegetables, for meats, poultry, fish, and eggs, and for nonalcoholic beverages. The energy index declined sharply for the fourth consecutive month—down 1.2 percent in March. The index for petroleum-based energy decreased 3.1 percent, while the index for energy services increased 0.2 percent. Excluding food and energy, the CPI-U rose 0.1 percent,

following an increase of 0.3 percent in February. Declines in the indexes for apparel and for tobacco, coupled with a smaller increase in shelter costs, were largely responsible for the deceleration.

For the first 3-months of 1998, the CPI-U advanced at a 0.2-percent seasonally adjusted annual rate (SAAR). This compares with an increase of 1.7 percent in all of 1997. Falling energy prices were responsible for the deceleration in the first quarter of 1998. The energy index, which decreased 3.4 percent in 1997, declined at a 21.1-percent SAAR in the first three months of 1998. Petroleum-based energy costs fell at a 33.3-percent SAAR, while charges for energy services decreased at a 9.4-percent annual rate. The food index rose at a 1.3-percent SAAR thus far in 1998, following a 1.5-percent increase in 1997. Grocery store food prices increased at a 0.5-percent SAAR in the first 3 months, as the declines in the indexes for meats, poultry, fish, and eggs and for nonalcoholic beverages were more than offset by increases in the four other major grocery store food groups. The CPI-U excluding food and energy advanced at a 2.4-percent SAAR in the first 3 months of 1998, following a 2.2-percent rise for all of 1997, which was the smallest annual increase in this index since a 1.5 percent-rise in

In March, the food and beverages index was unchanged for the second consecutive month. The index for grocery store food prices declined 0.1 percent in March, the same as in February. Decreases in the indexes for fruits and vegetables, for meats, poultry, fish, and eggs, and for nonalcoholic beverages more than offset moderate increases in the other major grocery store food groups. The index for fruits

and vegetables declined 1.0 percent in March, reflecting decreases in the indexes for both fresh fruits—down 2.6 percent—and fresh vegetables—down 0.3 percent. The index for processed fruits and vegetables rose 0.8 percent. The index for meats, poultry, fish, and eggs declined for the fourth consecutive month—down 0.4 percent in March. The index for beef increased 0.3 percent in March, as beef prices registered their first increase since September. This increase was more than offset by price declines for pork, poultry, fish, and eggs. The index for nonalcoholic beverages decreased 0.3 percent. On the other hand, the other three major groups—dairy and related products, cereal and bakery products, and other food at home—increased 0.5, 0.4 and 0.3 percent, respectively. The other two components of the food and beverage index—food away from home and alcoholic beverages—rose 0.2 and declined 0.1 percent, respectively.

The housing component rose 0.2 percent in March, following increases of 0.1 percent in each of the first two months of the year. Shelter costs rose 0.2 percent. Within shelter, the index for rent rose 0.4 percent, owners' equivalent rent increased 0.2 percent, and the cost of lodging away from home decreased 0.4 percent. (Prior to seasonal adjustment, the latter index rose 1.7 percent.) The index for fuels and utilities, which registered declines in each of the three preceding months, increased 0.3 percent in March. The index for household fuels rose 0.4 percent; the index for natural gas increased 2.3 percent, the index for fuel oil was unchanged, and the index for electricity declined 0.5 percent. (Prior to seasonal adjustment, prices for fuel oil fell 1.5 percent; and charges for natural gas and electricity declined 0.3 and 0.2 percent, respectively.) The index for household furnishings and operation increased 0.1 percent in March.

The transportation component declined for the fifth

- Data not available.

consecutive month, down 0.6 percent in March. For the third consecutive month, a sharp drop in the index for motor fuels more than offset a large increase in the index for airline fares. The index for gasoline fell 3.5 percent in March and has declined 14.0 percent in the last six months. As of March, gasoline prices were 24.0 percent lower than their peak level of November 1990. The index for new and used vehicle prices declined 0.2 percent; a decline of 1.5 percent in used car and truck prices more than offset a 0.1-percent rise in the index for new vehicles. Public transportation costs rose 0.4 percent in March. The index for airline fares increased substantially for the third consecutive month, up 2.0 percent in March, following increases of 2.7 and 3.2 percent in January and February, respectively.

The index for apparel declined 0.2 percent in March, following a 0.2-percent increase in February. (Prior to seasonal adjustment, apparel prices rose 2.3 percent, reflecting the introduction of higher priced spring-summer wear.)

Medical care costs rose 0.3 percent in March to a level 2.7 percent above a year ago. The index for medical care commodities—prescription drugs, nonprescription drugs, and medical supplies—was virtually unchanged. The index for medical care services rose 0.3 percent. Charges for professional services and for hospital and related services increased 0.4 and 0.2 percent, respectively.

Recreation costs rose 0.4 percent in March, following increases of 0.3 percent in both January and February. Recreational services costs rose 0.9 percent, reflecting increases of 1.2 percent in the index for admissions to movies, theaters, and concerts and 0.9 percent in the index for club membership dues and fees for participant sports.

The index for education and communication increased 0.3 percent in March after declining 0.1 percent in February, reflecting an upturn in the index for communication costs. Within the communication category, increases in local and long distance telephone charges—up 0.7 and 0.2 percent, respectively—more than offset declines in the indexes for personal computers and peripheral equipment and for cellular telephone services—down 2.8 and 0.7 percent, respectively.

The index for other goods and services declined 0.3 percent in March, following a 0.8-percent rise in February. The index for tobacco and smoking products, which rose 2.9 percent in February, declined 2.6 percent in March.

CPI for Urban Wage Earners and Clerical Workers (CPI-W)

On a seasonally adjusted basis, the CPI for Urban Wage Earners and Clerical Workers declined 0.1 percent in March.

CPI (old series)

For the first 6 months of 1998, BLS also will calculate old series CPI-U and old Series CPI-W based on the 1982-84 expenditure pattern used in the CPI from 1987 through

1997. These old series data are contained in tables 1(OS)-4(OS). From February to March, the old series CPI-U and the old series CPI-W each rose 0.1 percent. (Note: These series are not seasonally adjusted.)

Overview of Publication Changes

In January 1998, the Bureau of Labor Statistics (BLS) introduced a new geographic area sample, a revised item structure, and updated expenditure weights into the Consumer Price Index (CPI). Approximately every 10 years, the CPI undertakes this type of revision, in order to keep the index up-to-date. Since World War II, revisions of the CPI (besides this one) have been introduced in 1953, 1964, 1978, and 1987.

Because the changes the CPI undergoes during each revision can have a major impact on our users, special steps were taken, in order to ameliorate the effects of these changes. Beginning with the release of the January 1997 index, data series that were to be changed or dropped from publication have been footnoted in all BLS published tables. This provided an early warning for users to reconsider their use of those indexes and provided time for them to make changes in their use. The 1998 CPI Revision contains substantial changes in both the items being presented and the frequency of local area index publication.

Changes to item structure

Effective in 1998, there are considerable changes to both the items being priced and the manner in which they are being aggregated in the CPI. The most notable change in presentation is a reconstruction of several major groups, with a resulting change from the formerly available seven major groups to the new total of eight.

Previously, the major groups were: Food and beverages, housing, apparel and upkeep, transportation, medical care, entertainment, and other goods and services. Three of these groups—food and beverages, transportation, and medical care remained the same. The apparel group was modified to exclude apparel upkeep products and services. The entertainment group has been slightly redefined into a major group called recreation; and a new major group, education and communication, has been formed from past subelements of the housing, entertainment, and other goods and services groups.

Other important changes in the item structure at lower levels are an expansion of the food away from home index, a reorientation of the car and truck indexes to a vehicle index, and the expansion of the information processing equipment index.

Changes to geographic structure

In each revision, the CPI geographic sample is selected to be representative of current demographics of the United States. The 1998 revision uses the 1990 Census of Population. The CPI developed an updated area sample

design, decided on new local area indexes, and changed the frequency of publication for local area indexes, in order to better reflect these new demographics.

In addition to the national index, BLS formerly published indexes for 29 metropolitan areas. In 1998, it continues to publish indexes for all but two of these areas—Buffalo-Niagara Falls, NY, and New Orleans, LA. Due to the revised Metropolitan Area (MA) definitions issued by the Office of Management and Budget (OMB), two other areas, Washington, DC, and Baltimore, MD, which the BLS formerly published separately, constitute a new Consolidated Metropolitan Statistical Area. A single index is now published for this consolidated area.

The new publication plan for local area indexes that began with the index for January 1998 is summarized below:

- Monthly indexes are now published for the three largest metropolitan areas. Because of sample design considerations, indexes for the Philadelphia and San Francisco areas, both formerly published monthly, are now published every other month, following the release of the December 1997 index.
- Bimonthly indexes are published for the next 11 largest areas, including Atlanta and Seattle. (These cities used to have semiannual average indexes.)
- Semiannual average indexes are now published for 12 additional areas, including Pittsburgh and St. Louis. (These cities formerly had bimonthly indexes.)
- BLS continues to publish separate indexes for the four census regions of the United States. However, beginning in 1998, there are only two area size classes for metropolitan areas, instead of the former three: Size A—areas with population greater than 1.5 million; and Size B/C—areas with less than 1.5 million population. This cutoff of 1.5 million in population reflects a rise from the former cutoff of 1.2 million and is important, since cities in size class A are those for which the Bureau publishes city level indexes. The B/C size class is a combination of the old Size B and Size C metropolitan areas. In addition to the two metropolitan area size indexes for each region, separate Size D indexes for urban non-metropolitan areas continue to be published for both the Midwest and the South. (Separate indexes for Northeast and West urban nonmetropolitan areas were discontinued in 1987.)

The following is the full list of areas for which indexes are currently published, since January 1998:

Metropolitan areas for which a local index is published monthly:

Chicago-Gary-Kenosha, IL-IN-WI
Los Angeles-Riverside-Orange County, CA
New York-Northern New Jersey-Long Island,
NY-NJ-CT-PA

Metropolitan areas for which a local index is published bimonthly:

In odd months (i.e., January, March, etc.)

Boston-Brockton-Nashua, MA-NH-ME-CT
Cleveland-Akron, OH
Dallas-Fort Worth, TX
Washington-Baltimore, DC-MD-VA-WV

In even months (i.e., February, April, etc.)

Atlanta, GA
Detroit-Ann Arbor-Flint, MI
Houston-Galveston-Brazoria, TX
Miami-Fort Lauderdale, FL
Philadelphia-Wilmington-Atlantic City, PA-NJ-DE-MD
San Francisco-Oakland-San Jose, CA
Seattle-Tacoma-Bremerton, WA

Metropolitan areas for which a local index is published semiannually (January and July):

Anchorage, AK
Cincinnati-Hamilton, OH-KY-IN
Denver-Boulder-Greeley, CO
Pittsburgh, PA
Honolulu, HI
Kansas City, MO-KS
Milwaukee-Racine, WI
Minneapolis-St. Paul, MN-WI
Portland-Salem, OR-WA
San Diego, CA
St. Louis, MO-IL
Tampa-St. Petersburg-Clearwater, FL

A note on seasonally adjusted data

Since the release of seasonal adjustment factors for 1997 in February 1998, seasonal adjustment is performed using X-12-ARIMA. X-12-ARIMA is a seasonal adjustment software package developed by the U.S. Department of Commerce, Bureau of the Census. The X-12-ARIMA seasonal adjustment program is an enhanced version of the X-11 Variant of the Census Method II seasonal adjustment program. The enhancements include a variety of new diagnostics and modeling tools, to help the user detect and remedy any inadequacies in the seasonal adjustments obtained under the program options selected.

In addition, seasonally adjusted data for some index series

have been affected by changes to the CPI publication structure introduced with data for January 1998.

BLS to maintain current reference base of 1982-84=100 for most CPI Index series

The Bureau of Labor Statistics previously indicated its intention to change the numerical reference base for both the Consumer Price Index for All Urban Consumers (CPI-U) and the Consumer Price Index for Urban Wage Earners and Clerical Workers (CPI-W) from their present 1982-84=100 base to a 1993-95=100 base, effective with release of the January 1999 index in February 1999. BLS also indicated that the alternate, or 1967=100 base, will be discontinued in 1999, as well. This plan was initially described in the December 1996 *Monthly Labor Review*, which contained several articles that dealt with the 1998 CPI revision.

BLS has now decided not to implement this rebasing plan. Instead, the Bureau will maintain the reference base of 1982-84=100 used for most items. In addition, the 1967=100 reference base will continue to be the alternate base for the All Items indexes. This decision is based, in part, on the fact that historical data have less precision after rebasing. Rebasing is simply an arithmetic transformation that does not substantively affect the index. Because rebased index values are smaller than before the rebasing took place, however, the loss of precision due to rounding is serious. In addition, retaining the old index reference base will spare users the inconvenience associated with conversion.

Changes in the numerical reference base should not be confused with the plans by BLS to update the market basket of the CPI. Since the release of the January CPI in February 1998, the expenditure weights applied to CPI categories are based on consumer spending patterns for 1993-95.

¹ Foods, fuels, and several other items priced every month in all areas; most other goods and services priced as indicated:

M - Every month.

1 - January, March, May, July, September, and November.

2 - February, April, June, August, October, and December.

² Regions defined as the four Census regions. See map in technical notes.

³ Indexes on a December 1996=100 base.

⁴ The 'North Central' region has been renamed the 'Midwest' region by the Census Bureau. It is composed of the same geographic entities.

⁵ Indexes on a December 1986=100 base.

⁶ In addition, the following metropolitan areas are published semiannually and appear in Tables 34 and 39 of the January and July issues of the CPI Detailed Report: Anchorage, AK; Cincinnati-Hamilton, OH-KY-IN; Denver-Boulder-Greeley, CO; Honolulu, HI; Kansas City, MO-KS;

Milwaukee-Racine, WI; Minneapolis-St. Paul, MN-WI; Pittsburgh, PA; Portland-Salem, OR-WA; St. Louis, MO-IL; San Diego, CA; Tampa-St. Petersburg-Clearwater, FL.

⁷ Indexes on a November 1996=100 base.

- Data not available.

NOTE: Local area indexes are byproducts of the national CPI program. Each local index has a smaller sample size than the national index and is, therefore, subject to substantially more sampling and other measurement error. As a result, local area indexes show greater volatility than the national index, although their long-term trends are similar. Therefore, the Bureau of Labor Statistics strongly urges users to consider adopting the national average CPI for use in their escalator clauses.

NOTE: Index applies to a month as a whole, not to any specific date.

1 Foods, fuels, and several other items priced every month in all areas; most other goods and services priced as indicated:
M - Every month.

1 - January, March, May, July, September, and November.

2 - February, April, June, August, October, and December.

2 Regions defined as the four Census regions. See map in technical notes.

3 Indexes on a December 1996=100 base.

4 The 'North Central' region has been renamed the 'Midwest' region by the Census Bureau. It is composed of the same geographic entities.

5 Indexes on a December 1986=100 base.

6 In addition, the following metropolitan areas are published semiannually and appear in Tables 34 and 39 of the January and July issues of the CPI Detailed Report: Anchorage, AK; Cincinnati-Hamilton, OH-KY-IN; Denver-Boulder-Greeley, CO; Honolulu, HI; Kansas City, MO-KS;

Milwaukee-Racine, WI; Minneapolis-St. Paul, MN-WI; Pittsburgh, PA; Portland-Salem, OR-WA; St. Louis, MO-IL; San Diego, CA; Tampa-St. Petersburg-Clearwater, FL.

7 Indexes on a November 1996=100 base.

- Data not available.

NOTE: Local area indexes are byproducts of the national CPI program. Each local index has a smaller sample size than the national index and is, therefore, subject to substantially more sampling and other measurement error. As a result, local area indexes show greater volatility than the national index, although their long-term trends are similar. Therefore, the Bureau of Labor Statistics strongly urges users to consider adopting the national average CPI for use in their escalator clauses.

NOTE: Index applies to a month as a whole, not to any specific date.

Technical Notes

Brief Explanation of the CPI

The Consumer Price Index (CPI) is a measure of the average change in prices over time in a fixed market basket of goods and services. The Bureau of Labor Statistics publishes CPI's for two population groups: (1) a CPI for All Urban Consumers (CPI-U) which covers approximately 87 percent of the total population and (2) a CPI for Urban Wage Earners and Clerical Workers (CPI-W) which covers 32 percent of the total population. The CPI-U includes, in addition to wage earners and clerical workers, groups such as professional, managerial, and technical workers, the self-employed, short-term workers, the unemployed, and retirees and others not in the labor force.

The CPI is based on prices of food, clothing, shelter, and fuels, transportation fares, charges for physicians' and dentists' services, drugs, and other goods and services that people buy for day-to-day living. Prices are collected in 87 urban areas across the country from about 50,000 housing units and approximately 23,000 retail establishments—department stores, supermarkets, hospitals, filling stations, and other types of stores and service establishments. All taxes directly associated with the purchase and use of items are included in the index. Prices of fuels and a few other items are obtained every month in all 87 locations. Prices of most other commodities and services are collected every month in the three largest metropolitan areas and every other month in other areas. Prices of most goods and services are obtained by personal visits or telephone calls by the Bureau's trained representatives.

In calculating this index, price changes for the various items in each location are averaged together with weights that represent their importance in the spending of the appropriate population group. Local data are then combined to obtain a U.S. city average. Separate indexes are also published by size of city, by region of the country, for cross-classifications of regions and population-size classes, and for 26 local areas. Area indexes do not measure differences in the level of prices among cities; they only measure the average change in prices for each area since the base period.

The index measures price change from a designed reference date—1982-84, which equals 100.0. An increase of 16.5 percent, for example, is shown as 116.5. This change can also be expressed in dollars as follows: the price of a base

period market basket of goods and services in the CPI has risen from \$10 in 1982-84 to \$11.65.

For further details, see *BLS Handbook of Methods*, Chapter 17, the Consumer Price Index, Bulletin 2490, April 1997.

Calculating Index Changes

Movements of indexes from one month to another are usually expressed as percent changes, rather than changes in index points, because index point changes are affected by the level of the index in relation to its base period, while percent changes are not. The example below illustrates the computation of index point and percent changes.

Percent changes for 3-month and 6-month periods are expressed as annual rates and are computed according to the standard formula for compound growth rates. These data indicate what the percent change would be, if the current rate were maintained for a 12-month period.

<i>Index point change</i>	
CPI	115.7
Less previous index	111.2
Equals index point change	4.5
<i>Percent change</i>	
Index point difference	4.5
Divided by the previous index	111.2
Equals	0.040
Results multiplied by one hundred	0.040x100
Equals percent change	4.0

Energy Prices

Prices are usually available for the U.S. city average, 13 large metropolitan areas, the 4 census regions, 3 size classifications, and 10 areas reflecting the 4 census regions cross-classified by the 3 population sizes. However, not all energy commodities and services are used in every area of the country. Fuel oil, for example, is not a common heating fuel in some urban areas, particularly in the South and West. Where

no average prices are available, the designation NA appears. This designation also appears, if the data sufficiency criteria have not been met in any given month. For example, if there are fewer than five usable fuel oil prices for a published city or region size class, no fuel oil prices for the area will be published.

All prices are collected monthly by BLS representatives in the urban areas priced for the CPI. Prices for natural gas and electricity include fuel and purchased gas adjustments and all applicable taxes. Fuel oil and gasoline prices include applicable Federal, State, and local taxes.

Natural gas and electricity. Natural gas prices are reported in therms, which are a measure of heating value. Electricity prices are given in kilowatt hours (kwh). For both utility services, the consumption ranges specified in table P2 are the upper and lower limits of bills priced for the CPI. The average prices per therm and per kilowatt hour are calculated from bills priced within these ranges. It should be noted that bills priced for the CPI are not only for different consumption amounts, but may also be calculated from different types of residential rate schedules. *The average price per therm and per kilowatt hour are not, therefore, generally suitable for use in place-to-place price comparisons.*

The average prices for 40 and 100 therms of natural gas and for 500-kilowatt hours of electricity (shown in table P1) are calculated from a special price collection program. These

average prices are not used in the calculation of the CPI. Since heating and air-conditioning requirements vary by geographic location, climate, and weather conditions, it cannot be inferred that these consumption amounts represent those used by a typical residential consumer. These bills are used merely to track price changes over time for constant amounts of consumption and to provide continuity with prices of natural gas and electricity, formerly published in conjunction with the unrevised CPI.

Fuel oil. Only #2 fuel oil (home heating oil) is priced. (See table P1.) Prices are collected, in most cases, for quantities greater than one gallon. These prices are converted to a gallon price for this program. Fuel oil prices reflect discounts for quantity and/or quick payment.

Gasoline and automotive diesel fuel. Gasoline and diesel prices, shown in table P3, are collected at the pump from a sample of full service, mini-service, and self-service gas stations.

Approximate British thermal unit (Btu) values for some energy items are as follows, according to the source indicated:

1 therm = 100,000 Btu's (U.S. Department of Energy)

1 kWh = 3,412 Btu's (Edison Electric Institute)

1 gallon #2 fuel oil = 140,000 Btu's (U.S. Department of Energy).

Food and Beverage Prices

Actual weighted average prices for food and beverages are calculated each month at the national level and for the four census geographic regions, as shown in table P4. As a result of changes in price collection methodology and sample sizes, average prices for individual cities cannot, in general, be produced. It is hoped, however, that regional average prices will help satisfy the need for local area data. It should be noted that average prices for food in this report reflect variations in brand, quality, and size among geographic areas. Users of average food prices should be aware that these differences exist.

Because a number of food commodities are not available in all areas on a year-round basis, prices will not appear in some months for some regions or for the U.S. city average. In other instances, sufficient prices may not be available, due to temporary disruptions in supplies. Where no average prices are available, the designation NA appears. When a price is not available from an individual store in any month, an estimated price will be calculated for the missing item and used in computing the average price. In cases where the proportion of estimated prices used to calculate the average is considered too high, the average price is not published and NA appears for that item in the table.

Because of space limitations in the table, the description for each item is abbreviated. More detailed specifications are available from BLS regional offices or from the Washington office upon request.

Seasonally Adjusted and Unadjusted Data

Because price data are used for different purposes by different groups, the Bureau of Labor Statistics publishes seasonally adjusted, as well as unadjusted changes, each month.

For analyzing general price trends in the economy, seasonally adjusted changes are usually preferred, since they eliminate the effect of changes that normally occur at the same time and in about the same magnitude every year—such as price movements resulting from changing climatic conditions, production cycles, model changeovers, holidays, and sales.

The unadjusted data are of primary interest to consumers concerned about the prices they actually pay. Unadjusted data also are used extensively for escalation purposes. Many collective bargaining contract agreements and pension plans, for example, tie compensation changes to the Consumer Price Index unadjusted for seasonal variation.

Seasonal factors used in computing seasonally adjusted indexes are derived by the X-12-ARIMA Seasonal Adjustment Method. The updated seasonal data at the end of 1977 replaced data from 1967 through 1977. Subsequent annual updates have replaced 5 years of seasonal data, e.g., data from 1993 through 1997 were replaced at the end of 1997. The seasonal movement of all items and 54 other aggregations is derived by combining the seasonal movement of 73 selected components. Each year, the seasonal status of every series is

reevaluated, based on certain statistical criteria. If any of the 73 components change their seasonal adjustment status from seasonally adjusted to not seasonally adjusted, not seasonally adjusted data will be used for the last 5 years; but the seasonally adjusted indexes will be used before that period.

Effective with the calculation of the seasonal factors for 1990, the Bureau of Labor Statistics has used an enhanced seasonal adjustment procedure called intervention analysis seasonal adjustment for some CPI series. Intervention analysis seasonal adjustment allows for better estimates of seasonally adjusted data. Extreme values and/or sharp movements, which might distort the seasonal pattern, are estimated and removed from the data, prior to calculation of seasonal factors. Beginning with the calculation of seasonal factors for 1996, X-12-ARIMA software was used for intervention analysis seasonal adjustment.

For the fuel oil and the motor fuels indexes, this procedure was used to offset the effects that extreme price volatility would otherwise have had on the estimates of seasonally adjusted data for those series. For some women's apparel indexes and the girls' apparel index, the procedure was used to offset the effects of changes in pricing methodology. For the tobacco and smoking products index, this procedure was used to offset the effects of increases in excise taxes and wholesale tobacco prices. For some alcoholic beverage series, intervention analysis seasonal adjustment was used to offset the effects of excise tax increases. For the nonalcoholic beverages index, the procedure was used to offset the effects of a large increase in coffee prices, due to adverse weather. For the water and sewerage maintenance index, the procedure was used to account for a data collection anomaly.

A description of intervention analysis seasonal adjustment, as well as a list of unusual events modeled and seasonal factors for these items, may be obtained by writing to the Bureau of Labor Statistics, Division of Consumer Prices and Price Indexes, Washington, DC 20212 or by calling Claire McAnaw Gallagher at (202) 606-6968 or e-mailing her (gallagher_c@bls.gov).

Beginning with the release of seasonal adjustment factors for 1997, in February 1998, seasonal adjustment will be performed using X-12-ARIMA. X-12-ARIMA is a new seasonal adjustment software package developed by the U.S. Department of Commerce, Bureau of the Census. The X-12-ARIMA seasonal adjustment program is an enhanced version of the X-11 Variant of the Census Method II seasonal adjustment program. The enhancements include a variety of new diagnostics and modeling tools to help the user detect and remedy any inadequacies in the seasonal adjustments obtained under the program options selected.

Metropolitan Areas

BLS publishes three major metropolitan areas monthly:

New York-Northern New Jersey-Long Island, NY-NJ-CT-PA
Chicago-Gary-Kenosha, IL-IN-WI
Los Angeles-Riverside-Orange County, CA

Data for additional 11 metropolitan areas are published every other month [on an odd (January, March, etc.) or even (February, April, etc.) month schedule] for the following areas:

Atlanta, GA	-even
Boston-Brockton-Nashua, MA-NH-ME-CT	-odd
Cleveland-Akron, OH	-odd
Dallas-Fort Worth, TX	-odd
Detroit-Ann Arbor-Flint, MI	-even
Houston-Galveston-Brazoria, TX	-even
Miami-Fort Lauderdale, FL	
PA-NJ-DE-MD	-even
Philadelphia-Wilmington-Atlantic City,	-even
San Francisco-Oakland-San Jose, CA	-even
Seattle-Tacoma-Bremerton, WA	-even
Washington-Baltimore, DC-MD-VA-WV	-odd

(Note: The designation even or odd refers to the month during which the area's price change is measured. Due to the time needed for processing, data are released two to three weeks into the following month.)

Data are published for an additional group of 12 metropolitan areas on a semiannual basis. These indexes, which refer to the arithmetic average for the 6-month periods from January through June and July through December, are published with release of the CPI for July and January, respectively, in August and February for:

Anchorage, AK
 Cincinnati-Hamilton, OH-KY-IN
 Denver-Boulder-Greeley, CO
 Honolulu, HI
 Kansas City, MO-KS
 Milwaukee-Racine, WI
 Minneapolis-St. Paul, MN-WI
 Pittsburgh, PA
 Portland-Salem, OR-WA
 San Diego, CA
 St. Louis, MO-IL
 Tampa-St. Petersburg-Clearwater, FL

How to Obtain Consumer Price Index Information

Consumer Price Index (CPI) information is available from the Bureau of Labor Statistics (BLS) electronically, through publication subscriptions, and via telephone and fax through automated recordings. Information specialists are also available in the national and regional offices, to provide help and to respond to questions.

Electronic access to CPI data

BLS on the Internet. Through the Internet, BLS provides free, continuous access to published CPI data and press re-

leases. The most recent month's CPI is made available immediately at the time of release. Additionally, a database called LABSTAT, containing current and historical data for the CPI is accessible. Data and press releases from other BLS surveys are also available. The BLS site is accessible via the World Wide Web (WWW), Gopher, and File Transfer Protocol (FTP), as described below. Send e-mail to labstat.helpdesk@bls.gov for help using any of these systems.

World Wide Web. BLS maintains a Web site (<http://stats.bls.gov>). This BLS homepage provides access to LABSTAT, as well as links to program-specific homepages. The CPI homepage <http://stats.bls.gov/cpihome.htm> provides other CPI information, as well as indexes. This includes a brief explanation of methodology, frequently asked questions and answers, contacts for further information, and explanations of how the CPI handles special items, like medical care and housing. In addition, CPI press releases and historical data for metropolitan areas can be accessed by linking to regional office homepages from the main BLS Web site listed above.

FTP and Gopher. These tools provide access to CPI LABSTAT data, as well as documentation and press release files organized in hierarchical directories. Connect to stats.bls.gov using FTP or Gopher. Log on as "anonymous," and use your complete Internet e-mail address as the password.

Subscriptions to CPI publications

Summary data. Free, monthly, 2-page publication containing 1- and 12-month percent changes for selected U.S. city average Consumer Price Index for All Urban Consumers (CPI-U) and Consumer Price Index for Urban Wage Earners and Clerical Workers (CPI-W) index series. The All Items index data for each local area are also included. To be added to the mailing list, write to: Office of Publications, Bureau of Labor Statistics, 2 Massachusetts Avenue, NE., Room 2850, Washington, DC 20212-0001, or call (202) 606-7828 or any of the BLS regional offices listed below.

CPI Detailed Report. Most comprehensive report of the Consumer Price Index. This publication may be ordered by writing to: New Orders, Superintendent of Documents, P.O. Box 371954, Pittsburgh, PA, 15250-7954 or by calling (202) 512-1800. Subscriptions cost \$25 per year.

Monthly Labor Review (MLR). The MLR provides selected CPI data included in a monthly summary of BLS data and occasional articles and methodological descriptions too extensive for inclusion in the *CPI Detailed Report*. The MLR costs \$29 per year. This publication may be ordered by writing to: New Orders, Superintendent of Documents, P.O. Box 371954, Pittsburgh, PA, 15250-7954 or by calling (202) 512-1800.

Recorded CPI data

Summary CPI data are provided on 24-hour recorded messages. Detailed CPI information is available by calling (202) 606-STAT. A touch-tone telephone is recommended, as this system allows the user to select specific indexes from lists of available data.

Recorded summaries of CPI are also available by calling any one of the metropolitan area CPI hot lines listed below. These hotline summaries typically include data for the U.S. city average, as well as the specified area. These recordings are approximately 3 minutes in length, do not require a touch-tone telephone, and are available 24 hours a day, 7 days a week.

Area	Hotline Number
Anchorage	(907) 271-2770
Atlanta	(404) 347-3702
Baltimore	(410) 962-4898
Boston	(617) 565-2325/2327
Chicago	(312) 353-1883
Cincinnati	(513) 684-2349
Cleveland	(216) 522-3852
Dallas	(214) 767-6971
Denver	(303) 844-1735
Detroit	(313) 226-7558
Honolulu	(808) 541-2808
Houston	(713) 718-3753
Indianapolis	(317) 226-7885
Kansas City	(816) 426-2372
Los Angeles	(310) 235-6884
Milwaukee	(414) 276-2579
Minneapolis-St. Paul	(612) 290-3996
New York	(212) 337-2406/2408
Philadelphia	(215) 596-1156
Pittsburgh	(412) 644-2900
Portland	(503) 231-2045
Salt Lake City	(801) 485-6582
San Diego	(619) 557-6538
San Francisco	(415) 975-4406
Seattle	(206) 553-0645
St. Louis	(314) 539-3527
Washington, DC	(202) 606-6994/7828

Other sources of CPI data

Technical information is available during normal working hours, Monday through Friday, by calling (202) 606-7000 or any of the regional offices listed below.

Fax-on-Demand. A wide variety of BLS information and data,

including CPI, are available from the BLS *Ready Facts* catalog, via fax-on-demand. CPI documents from *Ready Facts* that are available around the clock include the monthly CPI press release, selected national, regional and metropolitan area historical summaries, and some technical information. The latest CPI information is posted during the morning of release day. Call (202) 606-6325. Then, follow the instructions to have the latest *Ready Facts* catalog sent to you. Each regional office also has a fax system in place; their systems include all information available from the national catalog, in addition to region-specific information on the CPI. Phone and fax-on-demand numbers for the eight regional offices are:

Office	Fax-on-Demand	Telephone
Atlanta	(404) 562-2545	(404) 562-2463
Boston	(617) 515-9167	(617) 565-2327
Chicago	(312) 987-9288	(312) 353-1880
Dallas	(214) 767-9613	(214) 767-6970
Kansas City	(816) 426-3152	(816) 426-2481
New York	(212) 337-2412	(212) 337-2400
Philadelphia	(215) 596-4160	(215) 596-1154
San Francisco	(415) 975-4567	(415) 975-4350
Washington, DC	(202) 606-6325	(202) 606-7000

Historical tables. These include all published indexes for each of the detailed CPI components. These tables are available via the Internet, by calling (202) 606-7000 in the national office, or by contacting any of the regional offices listed above.

Descriptive publications. These publications describe the CPI and ways to use it. They include simple fact sheets discussing specific topics about the CPI, a broader, non-technical overview of the CPI in a question and answer format, and a technical and thorough description of the CPI and its methodology. These publications are available upon request by calling (202) 606-7000, and many are included on the CPI homepage on the Internet.

Special publications. Also available are various special publications, such as *Relative Importance of Components in the Consumer Price Index* and materials describing the annual revisions of seasonally adjusted CPI data. For more information, call (202) 606-7000.

Further information may be obtained from the Office of Prices and Living Conditions, Bureau of Labor Statistics, 2 Massachusetts Avenue, NE., Room 3615, Washington, DC, 20212-0001, telephone (202) 606-7000 or by calling any of the regional offices listed above.
