The *CPI Detailed Report* (ISSN 0095-926X; USPS 485-030) is a monthly report on consumer price movements, including statistical tables and technical notes. The report covers two indexes—the Consumer Price Index for All Urban Consumers (CPI-U) and the Consumer Price Index for Wage Earners and Clerical Workers (CPI-W). The indexes reflect data for the U.S. city average and selected areas.

A subscription may be ordered for 1 or 2 years from: New Orders, Superintendent of Documents, P.O. Box 371954, Pittsburgh, PA 15250-7954 or by calling (202) 512-1800. Visa or MasterCard accepted. Fax (202) 512-2233. Subscription price per year: \$25 domestic, \$31.25 foreign. Single copy domestic, \$11.00; foreign, \$13.75. Prices are subject to change by the U.S. Government Printing Office.

Send correspondence on subscription matters, including address changes and missing issues, to the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402, or telephone (202) 512-1806. POSTMASTER: Send address changes to *CPI Detailed Report*, U.S. Government Printing Office, Washington, DC 20402.

For technical information, call the CPI Information and Analysis Office at (202) 606-7000, or write to Consumer Price Indexes, 2 Massachusetts Avenue, NE, Room 3615, Washington, DC 20212-0001.

CPI MAILGRAM provides selected U.S. City Average data for CPI-U and CPI-W within 24 hours of release. Order from: National Technical Information Service, 5285 Port Royal Road, Springfield, VA 22161. Subscription rates: \$145 in contiguous U.S. and Hawaii; \$160 in Alaska and Canada.

Information in this publication will be made available to sensory impaired individuals upon request. Voice phone: (202) 606-STAT; TDD phone: (202) 606-5897; TDD message referral phone: 1-800-326-2577. Data on the CPI can also be accessed through the CPI homepage (<http://stats.bls.gov/cpihome.htm>). This material is in the public domain and, with appropriate credit, may be reproduced without permission. Periodicals postage paid at Washington, DC and at additional mailing offices.

Price Movements

August 1998

The Consumer Price Index for All Urban Consumers (CPI-U) rose 0.1 percent in August, before seasonal adjustment, to a level of 163.4 (1982-84=100). For the 12-month period ended in August, the CPI-U has increased 1.6 percent.

The Consumer Price Index for Urban Wage Earners and Clerical Workers (CPI-W) also rose 0.1 percent in August, prior to seasonal adjustment. The August 1998 CPI-W level of 160.0 was 1.4 percent higher than the index in August 1997.

CPI for All Urban Consumers (CPI-U)

On a seasonally adjusted basis, the CPI-U rose 0.2 percent in August, the same as in July. In August the food index increased 0.2 percent for the second consecutive month. Prices for food at home advanced 0.3 percent, as a sharp increase in prices for dairy products was partially offset by a decline in the index for fruits and vegetables. The energy index, which was unchanged in July, declined 1.0 percent in August. The index for petroleum-based energy decreased 1.4 percent, and the index for energy services fell 0.4 percent. Excluding food and energy, the CPI-U increased 0.2 percent in August, the same as in July. An upturn in the index for apparel, reflecting the introduction of fall-winter wear, was largely offset by smaller increases

in the indexes for cigarettes and airline fares, coupled with a decline in the index for telephone services.

During the first eight months of 1998, the CPI-U rose at a 1.6-percent seasonally adjusted annual rate (SAAR). This compares with an increase of 1.7 percent for all of 1997. Declines in energy costs have continued to act as a moderating influence on overall consumer price index movements thus far in 1998, decreasing at a 10.5-percent annual rate after declining 3.4 percent in all of 1997. Food costs, which rose 1.5 percent in 1997, have risen at a 2.4-percent SAAR in the first eight months of 1998. Excluding food and energy, the CPI-U has advanced at a 2.5-percent rate thus far in 1998, compared with a 2.2-percent rise for all of 1997.

The food and beverages index rose 0.3 percent in August. The index for food at home increased 0.3 percent in August, the same as in July. A 1.6-percent increase in the index for dairy products accounted for almost half of the August food at home advance. The indexes for other food at home—reflecting a 5.3-percent increase in butter prices—and cereal and bakery products rose 0.7 and 0.5 percent, respectively. On the other hand, prices for fruits and vegetables and for non-alcoholic beverages turned down in August; and the index for meats, poultry, fish, and eggs

moderated. The index for fruits and vegetables, which rose 0.3 percent in July, declined 0.4 percent in August. The indexes for fresh fruits and for fresh vegetables declined 0.5 and 1.0 percent, respectively, more than offsetting a 0.5-percent increase in the index for processed fruits and vegetables. (Prior to seasonal adjustment, prices for fresh fruits rose 0.5 percent, while fresh vegetable prices fell 3.9 percent.) The index for meats, poultry, fish, and eggs rose 0.3 percent in August, following a 0.5-percent increase in July. A 0.3-percent decline in meat prices was more than offset by increases in prices for poultry, eggs, and fish and seafood. Prices for poultry and for fish and seafood rose 1.5 and 1.2 percent, respectively, and the index for eggs rose 1.0 percent. The other two components of the food and beverage index—food away from home and alcoholic beverages—rose 0.2 percent and were unchanged, respectively.

The housing component rose 0.1 percent in August. Shelter costs rose 0.3 percent, following increases of 0.2 percent in each of the preceding two months. Within shelter, the index for rent rose 0.3 percent; owners' equivalent rent, 0.2 percent; and the cost of lodging away from home, 0.7 percent. The index for fuels and utilities, which was unchanged in July, declined 0.4 percent in August. The indexes for electricity and for fuel oil each declined 0.9 percent, more than offsetting a 0.4-percent rise in the index for natural gas. (Prior to seasonal adjustment, charges for natural gas declined 0.5 percent.) The index for household furnishings and operations declined 0.2 percent in August.

The transportation component was unchanged in August, following a 0.3-percent rise in July. The index for motor fuel, which was unchanged in July, declined 1.6 percent in August. Gasoline prices have fallen 10.1 percent

thus far in 1998 and are 23.3 percent lower than their peak level in November 1990. The index for new and used vehicle prices rose 0.2 percent. The index for new vehicles, which increased 0.5 percent in July, rose 0.3 percent in August. (Prior to seasonal adjustment, new vehicle prices rose 0.1 percent.) The index for used cars and trucks fell 0.1 percent. Public transportation costs increased 2.2 percent in August. The index for airline fares, which typically declines in August, increased 0.2 percent.

The index for apparel rose 1.1 percent in August, following a 0.3-percent decline in July. (Prior to seasonal adjustment, apparel prices rose 1.5 percent, reflecting the introduction of higher priced fall-winter wear.)

Medical care costs rose 0.4 percent in August to a level 3.5 percent above a year ago. The index for medical care commodities—prescription drugs, nonprescription drugs, and medical supplies—increased 0.6 percent. The index for medical care services rose 0.3 percent. Charges for professional services and for hospital and related services each increased 0.3 percent.

The index for recreation costs rose 0.1 percent in August. Increases in the indexes for admissions to sporting events, for club membership dues and fees for participant sports, and for books were partially offset by declines in the indexes for sporting goods and for other recreational goods.

The index for education and communication declined 0.5 percent in August. A 0.4-percent increase in education costs was more than offset by a decline in the index for information processing costs. Within the latter group, the indexes for telephone services and for personal computers and peripheral equipment declined 1.1 and 5.5 percent, respectively.

Table B. Percent changes in CPI for Urban Wage Earners and Clerical Workers (CPI-W)

Expenditure category	Seasonally adjusted							Compound annual rate, 3 months ended August 1998	Unadjusted 12 months ended August 1998
	Changes from preceding month								
	1998								
	February	March	April	May	June	July	August		
All items	0	-0.1	0.3	0.3	0.1	0.2	0.1	1.3	1.4
Food and beverages	0	0	0	.6	.1	.3	.2	2.5	2.0
Housing	.1	.3	.3	.3	.1	.2	.1	1.5	2.3
Apparel	-.2	-.5	.2	.3	.3	-.4	.9	3.4	.4
Transportation	-.4	-.6	0	.1	-.1	.2	-.1	-.3	-2.2
Medical care	.2	.3	.4	.3	.5	.2	.3	4.1	3.5
Recreation	.3	.3	.1	-.2	.1	-.1	.2	.8	1.0
Education and communication	0	.4	.2	.4	.1	.1	-.5	-1.2	1.8
Other goods and services	1.1	-.6	1.4	.8	-.1	.9	.2	3.6	6.3
Special indexes									
Energy	-2.1	-1.3	-.2	.3	-.6	-.1	-1.1	-6.8	-8.3
Food	-.1	0	.1	.6	.1	.3	.3	2.8	2.1
All items less food and energy	.2	.1	.4	.2	.1	.2	.2	2.1	2.3

The index for other goods and services, which rose 0.7 percent in July, increased 0.1 percent in August. The deceleration largely was attributable to moderation in the index for tobacco and smoking products, which rose 0.1 percent in August after increasing 2.6 percent in July.

CPI for Urban Wage Earners and Clerical Workers (CPI-W)

On a seasonally adjusted basis, the CPI for Urban Wage Earners and Clerical Workers increased 0.1 percent in August.

Planned Change in the Consumer Price Index Formula

On April 16, 1998, the Bureau of Labor Statistics announced its decision to use a new formula for calculating the basic components of the Consumer Price Index for all Urban Consumers (CPI-U) and the Consumer Price Index for Urban Wage Earners and Clerical Workers (CPI-W). This change will become effective with data for January 1999.

The new formula, the geometric mean estimator, will be used in index categories that comprise approximately 61 percent of total consumer spending represented by the CPI-U. The remaining index categories, which are shown in the table below, will continue to be calculated as they are currently. Based upon BLS research, it is expected that planned use of this new formula will reduce the annual rate of increase in the CPI by approximately 0.2 percentage point per year.

The geometric mean estimator will be introduced in both the CPI-U and the CPI-W, effective with data for January 1999, in accordance with the past practice of introducing methodological changes at the beginning of a calendar year. BLS will continue to publish "overlap" CPI-U and CPI-W series, using the current calculation method for the first six months of 1999. These indexes will not be published regularly for months subsequent to June 1999, but will be available upon request.

Additional information on this change was published in the April 1998 CPI Detailed Report and is available on the Internet (<http://stats.bls.gov/cpihome.htm>). This information may also be obtained by writing to the Bureau of Labor

Statistics, Division of Consumer Prices and Price Indexes, 2 Massachusetts Ave. NE, Room 3615, Washington, DC 20212 or by calling (202) 606-7000.

Components retaining the arithmetic mean (Laspeyres) formula:

Selected shelter services

- Rent of primary residence
- Owners' equivalent rent of primary residence
- Housing at school, excluding board

Selected utilities and government charges

- Electricity
- Utility natural gas service
- Residential water and sewerage maintenance
- State and local registration, license, and motor vehicle property tax
- Telephone services, local charges
- Cable television

Selected medical care services

- Physicians' services
- Dental services
- Eyeglasses and eye care
- Services by other medical professionals
- Hospital services
- Nursing homes and adult daycare

Improvements to CPI Procedures for Handling Utility Refunds

Effective with the calculation of the index for January 1999, the Consumer Price Index (CPI) will change its treatment of refunds for electricity, utility natural gas service, or other similar services when the refunds are based on earlier periods' utility consumption amounts. (Other services potentially affected by this change include garbage and trash collection, local telephone charges, water and sewerage maintenance, and cable television.) This change will affect both price indexes and average prices computed by the CPI.

On occasion, utility companies or their regulators (usually called public utility commissions) determine that companies have overcharged customers in the past. This may occur, for example, when a regulator grants a utility company a temporary rate increase while an application for a permanent increase is pending. If the regulator subsequently denies the increase, it may require the company to repay its customers for excess payments made during this temporary period. Other situations when companies may issue refunds based on earlier-period usage result from lower-than-anticipated energy costs or from reevaluations of past rates compared to actual costs.

To compensate for past excess charges, utility companies usually credit their customers' current period bills. Under present CPI practice, utility indexes use the total refunded amount that the company credits to its customer's accounts during the month(s) refunds occur. When the refund is greater than the monthly charge, the CPI shows the remainder of the refund in subsequent months' bills. Consequently, the price used in the CPI may be as low as zero and remain at zero (or a low level) until the customer recoups the full refund. This practice has disadvantages. Utility indexes can be volatile and may not reflect actual current-period charges (for example, what new customers pay for electricity).

Under the new procedure, the CPI will disregard any refund for past excess charges when this refund appears on residential customer bills as a *separate refund credit* that is subtracted from current-period charges. CPI utility indexes will be based only on current rates—including temporary rates—that are in effect each month. The movement of utility indexes will reflect all changes in rates—usually in the month they are effective. Rate changes may be permanent, temporary, or as a rescission of temporary rate increases. However, the movement of utility indexes will no longer reflect refunds resulting from such rescissions (or similar causes). This change in procedure should reduce the month-to-month volatility of the utility indexes and enable them to more accurately reflect current prices and price trends.

This change will only apply to *rebates of past excess charges* that appear as separate refunds on customer bills. CPI utility indexes will continue to reflect current period credits that are based on current period consumption. (The most common credits are purchased gas and fuel adjustments.)

The change will have no effect on the long-run movement of the CPI or its component indexes. It is expected to remove short-term variability in the CPI utility indexes and, to a lesser degree, in higher CPI aggregates, such as the housing index. However, annual average index levels may be slightly higher as a result of this change, depending on the frequency and size of refunds.

For additional information on this change, write to the Bureau of Labor Statistics, Division of Consumer Prices and Price Indexes, 2 Massachusetts Ave. NE, Room 3615, Washington, DC 20212-0001; telephone Bob Adkins at (202) 606-6985; or e-mail Mr. Adkins (adkins_b@bls.gov).

Using a Hedonic Model to Adjust Television Prices in the Consumer Price Index for Changes in Quality

Effective with the release of the Consumer Price Index (CPI) for January 1999, the Bureau of Labor Statistics (BLS) will introduce an improvement in the way in which it calculates the television stratum of the CPI.

As of December 1997, televisions constituted 0.215 percent in the Consumer Price Index for all Urban Consumers (the CPI-U) and 0.256 percent in the Consumer Price Index for Urban Wage Earners and Clerical Workers (the CPI-W). Bureau of Labor Statistics researches developed a regression procedure, called a hedonic model, that decomposes the price of television sets into implicit prices for each important feature and component.¹ This model uses television observations collected for the CPI and provides an estimate of the value of each of the significant features and components of the sets for which prices are collected. This yields a mechanism for

replacing obsolete televisions in the CPI sample with current ones, allowing the CPI to capture the price change that may occur as new models replace old ones in the market place without counting the value of quality improvements as price increases.

The CPI has used similar hedonic methods to adjust apparel prices for many years. In January 1998, the CPI began using a similar approach for personal computers. In the coming years, BLS plans to extend this method to additional CPI items.

Starting with the CPI for January 1999, when a television model in the CPI sample improves in some way, the value of that change, as derived from the regression estimates, will be deducted from the observed price change for that product. (Conversely, if a model deteriorates, the value of the difference will be added to the price.)

For additional information on these changes, write to the Bureau of Labor Statistics, Division of Consumer Prices and Price Indexes, 2 Massachusetts Ave. NE, Room 3260, Washington, DC 20212; telephone Tim LaFleur at (202) 606-6982 ext. 253; or e-mail him (lafleur_t@bls.gov).

¹ Brent R. Moulton, Timothy J. LaFleur, and Karin E. Moses, "Research on Improved Quality Adjustment in the CPI: The Case of Televisions," presented to the Conference of the Ottawa Group, April 1998.

BLS to maintain current reference base of 1982-84=100 for most CPI series

The Bureau of Labor Statistics previously indicated its intention to change the numerical reference base for both the Consumer Price Index for All Urban Consumers (CPI-U) and the Consumer Price Index for Urban Wage Earners and Clerical Workers (CPI-W) from their present 1982-84=100 base to a 1993-95=100 base, effective with release of the January 1999 index in February 1999. BLS also indicated that the alternate, or 1967=100 base, would be discontinued in 1999 as well. This plan was initially described in the December 1996 *Monthly Labor Review*, which contains several articles that dealt with the 1998 CPI Revision.

BLS has now decided not to implement this rebasing plan. Instead, the Bureau will maintain the reference base of 1982-84=100 used for most items. In addition, the 1967=100

reference base will continue to be the alternate base for the All Items indexes. This decision is based, in part, on the fact that historical data have less precision after rebasing. Rebasing is simply an arithmetic transformation that does not substantially impact the index. Because the rebased index values are smaller, however, the loss of precision due to rounding is more serious. In addition, retaining the old index reference bases would spare users the inconvenience associated with conversion.

Changes in the numerical reference base should not be confused with plans by BLS to update the market basket of the CPI. Since release of the January CPI in February 1998, the expenditure weights applied to CPI categories have been based on consumer spending patterns for 1993-95.

Table 1. Consumer Price Index for All Urban Consumers (CPI-U): U.S. city average, by expenditure category and commodity and service group

(1982-84=100, unless otherwise noted)

¹ Foods, fuels, and several other items priced every month in all areas; most other goods and services priced as indicated:
M - Every month.

1 - January, March, May, July, September, and November.

2 - February, April, June, August, October, and December.

² Regions defined as the four Census regions. See map in technical notes.

³ Indexes on a December 1996=100 base.

⁴ The 'North Central' region has been renamed the 'Midwest' region by the Census Bureau. It is composed of the same geographic entities.

⁵ Indexes on a December 1986=100 base.

⁶ In addition, the following metropolitan areas are published semiannually and appear in Tables 34 and 39 of the January and July issues of the CPI Detailed Report: Anchorage, AK; Cincinnati-Hamilton, OH-KY-IN; Denver-Boulder-Greeley, CO; Honolulu, HI; Kansas City, MO-KS;

Milwaukee-Racine, WI; Minneapolis-St. Paul, MN-WI; Pittsburgh, PA; Portland-Salem, OR-WA; St. Louis, MO-IL; San Diego, CA; Tampa-St. Petersburg-Clearwater, FL.

⁷ Indexes on a November 1996=100 base.

- Data not available.

NOTE: Index applies to a month as a whole, not to any specific date.

NOTE: Local area indexes are byproducts of the national CPI program. Each local index has a smaller sample size than the national index and is, therefore, subject to substantially more sampling and other measurement error. As a result, local area indexes show greater volatility than the national index, although their long-term trends are similar. Therefore, the Bureau of Labor Statistics strongly urges users to consider adopting the national average CPI for use in their escalator clauses.

¹ Foods, fuels, and several other items priced every month in all areas; most other goods and services priced as indicated:

M - Every month.

1 - January, March, May, July, September, and November.

2 - February, April, June, August, October, and December.

² Regions defined as the four Census regions. See map in technical notes.

³ Indexes on a December 1996=100 base.

⁴ The 'North Central' region has been renamed the 'Midwest' region by the Census Bureau. It is composed of the same geographic entities.

⁵ Indexes on a December 1986=100 base.

⁶ In addition, the following metropolitan areas are published semiannually and appear in Tables 34 and 39 of the January and July issues of the CPI Detailed Report: Anchorage, AK; Cincinnati-Hamilton, OH-KY-IN; Denver-Boulder-Greeley, CO; Honolulu, HI; Kansas City, MO-KS;

Milwaukee-Racine, WI; Minneapolis-St. Paul, MN-WI; Pittsburgh, PA; Portland-Salem, OR-WA; St. Louis, MO-IL; San Diego, CA; Tampa-St. Petersburg-Clearwater, FL.

⁷ Indexes on a November 1996=100 base.

- Data not available.

NOTE: Index applies to a month as a whole, not to any specific date.

NOTE: Local area indexes are byproducts of the national CPI program. Each local index has a smaller sample size than the national index and is, therefore, subject to substantially more sampling and other measurement error. As a result, local area indexes show greater volatility than the national index, although their long-term trends are similar. Therefore, the Bureau of Labor Statistics strongly urges users to consider adopting the national average CPI for use in their escalator clauses.

Education and communication ⁷	103.6	-	2.9	102.7	-	-.2
Other goods and services ²	243.3	4.7	-.1	242.7	-	2.5
Commodity and service group						
All items	162.7	2.9	.6	163.8	-	.6
Commodities	142.7	.6	.0	147.9	-	.6
Commodities less food and beverages	126.8	-1.7	-.2	139.5	-	.3
Nondurables less food and beverages	126.7	-2.5	.0	138.9	-	2.1
Durables	125.0	-.4	-.6	140.0	-	-1.6
Services	182.8	4.6	1.1	181.2	-	.7
Special aggregate indexes						
All items less medical care ²	160.3	3.0	.6	160.6	-	.6
All items less shelter	152.9	.9	.3	159.5	-	.6
Commodities less food	128.3	-1.7	-.2	140.1	-	.3
Nondurables	147.7	1.0	.1	151.1	-	1.6
Nondurables less food	128.7	-2.3	.0	139.9	-	2.0
Services less rent of shelter ⁴	160.9	1.3	.9	169.7	-	.5
Services less medical care services	180.3	4.8	1.1	176.9	-	.7
Energy ²	114.6	-8.8	-1.9	110.5	-	-.8
All items less energy	168.6	3.7	.7	169.9	-	.7
All items less food and energy ²	168.9	3.7	.8	171.1	-	.6

¹ Areas on pricing schedule 1 (see Table 10) will appear next month.

² For Washington-Baltimore, index is on a November 1996=100 base.

³ For Washington-Baltimore, index is on a November 1997=100 base.

⁴ Indexes on a December 1984=100 base

⁵ Special index based on a substantially smaller sample.

⁶ Indexes on a December 1993=100 base.

⁷ Indexes on a December 1997=100 base.

NA Data not adequate for publication.

- Data not available.

NOTE: Index applies to a month as a whole, not to any specific date.

¹ The 'North Central' region has been renamed the 'Midwest' region by the Census Bureau. It is composed of the same geographic entities.

² Deposit may be included in price.

NA Data not adequate for publication.

Technical Note

Brief Explanation of the CPI

The Consumer Price Index (CPI) is a measure of the average change in prices over time in a fixed market basket of goods and services. The Bureau of Labor Statistics publishes CPI's for two population groups: (1) a CPI for All Urban Consumers (CPI-U) which covers approximately 87 percent of the total population and (2) a CPI for Urban Wage Earners and Clerical Workers (CPI-W) which covers 32 percent of the total population. The CPI-U includes, in addition to wage earners and clerical workers, groups such as professional, managerial, and technical workers, the self-employed, short-term workers, the unemployed, and retirees and others not in the labor force.

The CPI is based on prices of food, clothing, shelter, and fuels, transportation fares, charges for physicians' and dentists' services, drugs, and other goods and services that people buy for day-to-day living. Prices are collected in 87 urban areas across the country from about 50,000 housing units and approximately 23,000 retail establishments—department stores, supermarkets, hospitals, filling stations, and other types of stores and service establishments. All taxes directly associated with the purchase and use of items are included in the index. Prices of fuels and a few other items are obtained every month in all 87 locations. Prices of most other commodities and services are collected every month in the three largest metropolitan areas and every other month in other areas. Prices of most goods and services are obtained by personal visits or telephone calls by the Bureau's trained representatives.

In calculating this index, price changes for the various items in each location are averaged together with weights that represent their importance in the spending of the appropriate population group. Local data are then combined to obtain a U.S. city average. Separate indexes are also published by size of city, by region of the country, for cross-classifications of regions and population-size classes, and for 26 local areas. Area indexes do not measure differences in the level of prices among cities; they only measure the average change in prices for each area since the base period.

The index measures price change from a designed reference date—1982-84, which equals 100.0. An increase of 16.5 percent, for example, is shown as 116.5. This change can also be expressed in dollars as follows: the price of a base period market basket of goods and services in the CPI has risen from \$10 in 1982-84 to \$11.65.

For further details, see *BLS Handbook of Methods*, Chapter 17, the Consumer Price Index, Bulletin 2490, April 1997.

Calculating index changes

Movements of indexes from one month to another are usually expressed as percent changes, rather than changes in index points, because index point changes are affected by the level of the index in relation to its base period, while percent changes are not. The example below illustrates the computation of index point and percent changes.

Percent changes for 3-month and 6-month periods are expressed as annual rates and are computed according to the standard formula for compound growth rates. These data indicate what the percent change would be, if the current rate were maintained for a 12-month period.

<i>Index point change</i>	
CPI	115.7
Less previous index	111.2
Equals index point change	4.5
<i>Percent change</i>	
Index point difference	4.5
Divided by the previous index	111.2
Equals	0.040
Results multiplied by one hundred	0.040x100
Equals percent change	4.0

Energy prices

Prices are usually available for the U.S. city average, 13 large metropolitan areas, the 4 census regions, 3 size classifications, and 10 areas reflecting the 4 census regions cross-classified by the 3 population sizes. However, not all energy commodities and services are used in every area of the country. Fuel oil, for example, is not a common heating fuel in some urban areas, particularly in the South and West. Where no average prices are available, the designation NA appears. This designation also appears, if the data sufficiency criteria have not been met in any given month. For example, if there are fewer than five usable fuel oil prices for a published city or region size class, no fuel oil prices for the area will be published.

All prices are collected monthly by BLS representatives in the urban areas priced for the CPI. Prices for natural gas and electricity include fuel and purchased gas adjustments and

all applicable taxes. Fuel oil and gasoline prices include applicable Federal, State, and local taxes.

Natural gas and electricity. Natural gas prices are reported in therms, which are a measure of heating value. Electricity prices are given in kilowatt hours (kwh). For both utility services, the consumption ranges specified in table P2 are the upper and lower limits of bills priced for the CPI. The average prices per therm and per kilowatt hour are calculated from bills priced within these ranges. It should be noted that bills priced for the CPI are not only for different consumption amounts, but may also be calculated from different types of residential rate schedules. *The average price per therm and per kilowatt hour are not, therefore, generally suitable for use in place-to-place price comparisons.*

The average prices for 40 and 100 therms of natural gas and for 500-kilowatt hours of electricity (shown in table P1) are calculated from a special price collection program. These average prices are not used in the calculation of the CPI. Since heating and air-conditioning requirements vary by geographic location, climate, and weather conditions, it cannot be inferred that these consumption amounts represent those used by a typical residential consumer. These bills are used merely to track price changes over time for constant amounts of consumption and to provide continuity with prices of natural gas and electricity, formerly published in conjunction with the unrevised CPI.

Fuel oil. Only #2 fuel oil (home heating oil) is priced. (See table P1.) Prices are collected, in most cases, for quantities greater than one gallon. These prices are converted to a gallon price for this program. Fuel oil prices reflect discounts for quantity and/or quick payment.

Gasoline and automotive diesel fuel. Gasoline and diesel prices, shown in table P3, are collected at the pump from a sample of full service, mini-service, and self-service gas stations.

Approximate British thermal unit (Btu) values for some energy items are as follows, according to the source indicated:

1 therm = 100,000 Btu's (U.S. Department of Energy)

1 kWh = 3,412 Btu's (Edison Electric Institute)

1 gallon #2 fuel oil = 140,000 Btu's (U.S. Department of Energy).

Food and beverage prices

Actual weighted average prices for food and beverages are calculated each month at the national level and for the four census geographic regions, as shown in table P4. As a result of changes in price collection methodology and sample sizes, average prices for individual cities cannot, in general, be produced. It is hoped, however, that regional average prices will help satisfy the need for local area data. It should be noted

that average prices for food in this report reflect variations in brand, quality, and size among geographic areas. Users of average food prices should be aware that these differences exist.

Because a number of food commodities are not available in all areas on a year-round basis, prices will not appear in some months for some regions or for the U.S. city average. In other instances, sufficient prices may not be available, due to temporary disruptions in supplies. Where no average prices are available, the designation NA appears. When a price is not available from an individual store in any month, an estimated price will be calculated for the missing item and used in computing the average price. In cases where the proportion of estimated prices used to calculate the average is considered too high, the average price is not published and NA appears for that item in the table.

Because of space limitations in the table, the description for each item is abbreviated. More detailed specifications are available from BLS regional offices or from the Washington office upon request.

Seasonally adjusted data and unadjusted data

Because price data are used for different purposes by different groups, the Bureau of Labor Statistics publishes seasonally adjusted, as well as unadjusted changes, each month.

For analyzing general price trends in the economy, seasonally adjusted changes are usually preferred, since they eliminate the effect of changes that normally occur at the same time and in about the same magnitude every year—such as price movements resulting from changing climatic conditions, production cycles, model changeovers, holidays, and sales.

The unadjusted data are of primary interest to consumers concerned about the prices they actually pay. Unadjusted data also are used extensively for escalation purposes. Many collective bargaining contract agreements and pension plans, for example, tie compensation changes to the Consumer Price Index unadjusted for seasonal variation.

Seasonal factors used in computing seasonally adjusted indexes are derived by the X-12-ARIMA Seasonal Adjustment Method. The updated seasonal data at the end of 1977 replaced data from 1967 through 1977. Subsequent annual updates have replaced 5 years of seasonal data, e.g., data from 1993 through 1997 were replaced at the end of 1997. The seasonal movement of all items and 54 other aggregations is derived by combining the seasonal movement of 73 selected components. Each year, the seasonal status of every series is reevaluated, based on certain statistical criteria. If any of the 73 components change their seasonal adjustment status from seasonally adjusted to not seasonally adjusted, not seasonally adjusted data will be used for the last 5 years; but the seasonally adjusted indexes will be used before that period.

Seasonally adjusted data, including the All items index levels, are subject to revision for up to five years after their original release. For this reason, BLS advises against the use of these data in escalation agreements.

Effective with the calculation of the seasonal factors for 1990 the Bureau of Labor Statistics has used an enhanced

seasonal adjustment procedure called intervention analysis seasonal adjustment for some CPI series. Intervention analysis seasonal adjustment allows for better estimates of seasonally adjusted data. Extreme values and/or sharp movements, which might distort the seasonal pattern, are estimated and removed from the data, prior to calculation of seasonal factors. Beginning with the calculation of seasonal factors for 1996, X-12-ARIMA software was used for intervention analysis seasonal adjustment.

For the fuel oil and the motor fuels indexes, this procedure is used to offset the effects that extreme price volatility would otherwise have had on the estimates of seasonally adjusted data for those series. For some women's apparel indexes and the girls' apparel index, the procedure is used to offset the effects of changes in pricing methodology. For the tobacco and smoking products index, this procedure is used to offset the effects of increases in excise taxes and wholesale tobacco prices. For some alcoholic beverage series, intervention analysis seasonal adjustment is used to offset the effects of excise tax increases. For the nonalcoholic beverages index, the procedure is used to offset the effects of a large increase in coffee prices, due to adverse weather. For the water and sewerage maintenance index, the procedure is used to account for a data collection anomaly.

A description of intervention analysis seasonal adjustment, as well as a list of unusual events modeled and seasonal factors for these items, may be obtained by writing to the Bureau of Labor Statistics, Division of Consumer Prices and Price Indexes, Washington, DC 20212, by calling Claire McAnaw Gallagher at (202) 606-6968, or e-mailing her (gallagher_c@bls.gov).

Since the release of seasonal adjustment factors for 1997, in February 1998, seasonal adjustment is performed using X-12-ARIMA. X-12-ARIMA is a new seasonal adjustment software package developed by the U.S. Department of Commerce, Bureau of the Census. The X-12-ARIMA seasonal adjustment program is an enhanced version of the X-11 Variant of the Census Method II seasonal adjustment program. The enhancements include a variety of new diagnostics and modeling tools to help the user detect and remedy any inadequacies in the seasonal adjustments obtained under the program options selected.

Metropolitan areas

BLS publishes three major metropolitan areas monthly:

Chicago-Gary-Kenosha, IL-IN-WI
Los Angeles-Riverside-Orange County, CA
New York-Northern New Jersey-Long Island,
NY-NJ-CT-PA

Data for additional 11 metropolitan areas are published every other month [on an odd (January, March, etc.) or even (February, April, etc.) month schedule] for the following areas:

Atlanta, GA	-even
Boston-Brockton-Nashua, MA-NH-ME-CT	-odd

Cleveland-Akron, OH	-odd
Dallas-Fort Worth, TX	-odd
Detroit-Ann Arbor-Flint, MI	-even
Houston-Galveston-Brazoria, TX	-even
Miami-Fort Lauderdale, FL	
PA-NJ-DE-MD	-even
Philadelphia-Wilmington-Atlantic City,	-even
San Francisco-Oakland-San Jose, CA	-even
Seattle-Tacoma-Bremerton, WA	-even
Washington-Baltimore, DC-MD-VA-WV	-odd

(Note: The designation even or odd refers to the month during which the area's price change is measured. Due to the time needed for processing, data are released two to three weeks into the following month.)

Data are published for an additional group of 12 metropolitan areas on a semiannual basis. These indexes, which refer to the arithmetic average for the 6-month periods from January through June and July through December, are published with release of the CPI for July and January, respectively, in August and February for:

Anchorage, AK
 Cincinnati-Hamilton, OH-KY-IN
 Denver-Boulder-Greeley, CO
 Honolulu, HI
 Kansas City, MO-KS
 Milwaukee-Racine, WI
 Minneapolis-St. Paul, MN-WI
 Pittsburgh, PA
 Portland-Salem, OR-WA
 San Diego, CA
 St. Louis, MO-IL
 Tampa-St. Petersburg-Clearwater, FL

How to Obtain Consumer Price Index Information

Consumer Price Index (CPI) information is available from the Bureau of Labor Statistics (BLS) electronically, through publication subscriptions, and via telephone and fax through automated recordings. Information specialists are also available in the national and regional offices, to provide help and to respond to questions.

Electronic access to CPI data

BLS on the Internet. Through the Internet, BLS provides free, continuous access to published CPI data and press releases. The most recent month's CPI is made available immediately at the time of release. Additionally, a database called LABSTAT, containing current and historical data for the CPI is accessible. Data and press releases from other BLS surveys are also available. The BLS site is accessible via the World Wide Web (WWW), Gopher, and File Transfer Protocol (FTP), as described below. Send e-mail to labstat.helpdesk@bls.gov for help using any of these systems.

World Wide Web. BLS maintains a Web site (<http://stats.bls.gov>). This BLS homepage provides access to LABSTAT, as well as links to program-specific homepages. The CPI homepage <http://stats.bls.gov/cpihome.htm> provides other CPI information, as well as indexes. This includes a brief explanation of methodology, frequently asked questions and answers, contacts for further information, and explanations of how the CPI handles special items, like medical care and housing. In addition, CPI press releases and historical data for metropolitan areas can be accessed by linking to regional office homepages from the main BLS Web site listed above.

FTP and Gopher. These tools provide access to CPI LABSTAT data, as well as documentation and press release files organized in hierarchical directories. Connect to stats.bls.gov using FTP or Gopher. Log on as "anonymous," and use your complete Internet e-mail address as the password.

Subscriptions to CPI publications

Summary data. Free, monthly, 2-page publication containing 1- and 12-month percent changes for selected U.S. city average Consumer Price Index for All Urban Consumers (CPI-U) and Consumer Price Index for Urban Wage Earners and Clerical Workers (CPI-W) index series. The All Items index data for each local area are also included. To be added to the mailing list, write to: Office of Publications, Bureau of Labor Statistics, 2 Massachusetts Avenue, NE, Room 2850, Washington, DC 20212-0001, or call (202) 606-7828 or any of the BLS regional offices listed below.

CPI Detailed Report. Most comprehensive report of the Consumer Price Index. This publication may be ordered by writing to: New Orders, Superintendent of Documents, P.O. Box 371954, Pittsburgh, PA, 15250-7954 or by calling (202) 512-1800. Subscriptions cost \$25 per year.

Monthly Labor Review (MLR). The MLR provides selected CPI data included in a monthly summary of BLS data and occasional articles and methodological descriptions too extensive for inclusion in the *CPI Detailed Report*. The MLR costs \$29 per year. This publication may be ordered by writing to: New Orders, Superintendent of Documents, P.O. Box 371954, Pittsburgh, PA 15250-7954 or by calling (202) 512-1800.

Recorded CPI data

Summary CPI data are provided on 24-hour recorded messages. Detailed CPI information is available by calling (202) 606-STAT. A touch-tone telephone is recommended, as this system allows the user to select specific indexes from lists of available data.

Recorded summaries of CPI are also available by calling any one of the metropolitan area CPI hot lines listed below.

These hotline summaries typically include data for the U.S. city average, as well as the specified area. These recordings are approximately 3 minutes in length, do not require a touch-tone telephone, and are available 24 hours a day, 7 days a week.

Area	Hotline Number
Anchorage	(907) 271-2770
Atlanta	(404) 331-3415
Baltimore	(410) 962-4898
Boston	(617) 565-2325/2327
Chicago	(312) 353-1880
Cincinnati	(513) 684-2349
Cleveland	(216) 522-3852
Dallas	(214) 767-6970
Denver	(303) 844-1726
Detroit	(313) 226-7558
Honolulu	(808) 541-2808
Houston	(713) 718-3753
Indianapolis	(317) 226-7885
Kansas City	(816) 426-2481
Los Angeles	(310) 235-6884
Milwaukee	(414) 276-2579
Minneapolis-St. Paul	(612) 290-3996
New York	(212) 337-2404/2408
Philadelphia	(215) 596-1156
Pittsburgh	(412) 644-2900
Portland	(503) 231-2045
San Diego	(619) 557-6538
San Francisco	(415) 975-4350
Seattle	(206) 553-0645
St. Louis	(314) 539-3581
Washington, DC	(202) 606-6994/7828

Other sources of CPI data

Technical information is available during normal working hours, Monday through Friday, by calling (202) 606-7000 or any of the regional offices listed below.

Fax-on-Demand. A wide variety of BLS information and data, including the CPI, are available from the BLS *Ready Facts* catalog, via fax-on-demand. CPI documents from *Ready Facts* that are available around the clock include the monthly CPI press release, selected national, regional and metropolitan area historical summaries, and some technical information. The latest CPI information is posted during the morn-

ing of release day. Call (202) 606-6325 and follow instructions to have the latest *Ready Facts* catalog sent to you. Each regional office also has a fax system in place; their systems include all information available from the national catalog, in addition to region-specific information on the CPI. Phone and fax-on-demand numbers for the eight regional offices are:

Office	Fax-on-Demand	Telephone
Atlanta	(404) 331-3403	(404) 331-3415
Boston	(617) 565-9167	(617) 565-2327
Chicago	(312) 353-1880	(312) 353-1880
Dallas	(214) 767-9613	(214) 767-6970
Kansas City	(816) 426-3152	(816) 426-2481
New York	(212) 337-2412	(212) 337-2400
Philadelphia	(215) 596-4160	(215) 596-1154
San Francisco	(415) 975-4567	(415) 975-4350
Washington, DC	(202) 606-6325	(202) 606-7000

Historical tables. These include all published indexes for each of the detailed CPI components. These tables are available via the Internet, by calling (202) 606-7000 in the national office, or by contacting any of the regional offices listed above.

Descriptive publications. These publications describe the CPI and ways to use it. They include simple fact sheets discussing specific topics about the CPI, a broader, non-technical overview of the CPI in a question and answer format, and a technical and thorough description of the CPI and its methodology. These publications are available upon request by calling (202) 606-7000, and many are included on the CPI homepage on the Internet.

Special publications. Also available are various special publications, such as *Relative Importance of Components in the Consumer Price Index* and materials describing the annual revisions of seasonally adjusted CPI data. For more information, call (202) 606-7000.

Further information may be obtained from the Office of Prices and Living Conditions, Bureau of Labor Statistics, 2 Massachusetts Avenue, NE, Room 3615, Washington, DC, 20212-0001, telephone (202) 606-7000 or by calling any of the regional offices listed above.
