The *CPI Detailed Report* (ISSN 0095-926X; USPS 485-030) is a monthly report on consumer price movements, including statistical tables and technical notes. The report covers two indexes—the Consumer Price Index for All Urban Consumers (CPI-U) and the Consumer Price Index for Wage Earners and Clerical Workers (CPI-W). The indexes reflect data for the U.S. city average and selected areas.

A subscription may be ordered for 1 or 2 years from: New Orders, Superintendent of Documents, P.O. Box 371954, Pittsburgh, PA 15250-7954 or by calling (202) 512-1800. Visa or MasterCard accepted. Fax (202) 512-2233. Subscription price per year: \$31 domestic, \$38.75 foreign. Single copy domestic, \$14.00; foreign, \$17.50. Prices are subject to change by the U.S. Government Printing Office.

Send correspondence on subscription matters, including address changes and missing issues, to the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402, or telephone (202) 512-1806. POSTMASTER: Send address changes to *CPI Detailed Report*, U.S. Government Printing Office, Washington, DC 20402.

For technical information, call the CPI Information and Analysis Office at (202) 691-7000, or write to Consumer Price Indexes, 2 Massachusetts Avenue, NE, Room 3615, Washington, DC 20212-0001.

CPI MAILGRAM provides selected U.S. City Average data for CPI-U and CPI-W within 24 hours of release. Order from: National Technical Information Service, 5285 Port Royal Road, Springfield, VA 22161. Subscription rates: \$145 in contiguous U.S. and Hawaii; \$160 in Alaska and Canada.

Material in this publication is in the public domain and, with appropriate credit, may be reproduced without permission. This information is available to sensory impaired individuals upon request. Voice phone: (202) 691-STAT; Federal Relay Service: 1-800-877-8339. Data on the CPI can also be accessed at <http://stats.bls.gov/cpihome.htm> through the CPI homepage. Periodicals postage paid at Washington, DC and at additional mailing offices.

Price Movements January 2000

The Consumer Price Index for All Urban Consumers (CPI-U) increased 0.2 percent in January, before seasonal adjustment, to a level of 168.7 (1982-84=100). For the 12-month period ended in January, the CPI-U increased 2.7 percent.

The Consumer Price Index for Urban Wage Earners and Clerical Workers (CPI-W) also rose 0.2 percent in January, prior to seasonal adjustment. The January level of 165.5 was 2.8 percent higher than the index in January 1999.

CPI for All Urban Consumers (CPI-U)

On a seasonally adjusted basis, the CPI-U rose 0.2 percent in January, the same as in each of the preceding 3 months. The food index declined 0.1 percent in January after registering small increases throughout most of 1999. The energy index continued to advance, up 1.0 percent in January. The index for petroleum-based energy increased 1.9 percent and the index for energy services rose 0.1 percent. Excluding food and energy, the CPI-U rose 0.2 percent in January, following an increase of 0.1 percent in December. The January advance reflects larger increases in shelter costs and educational books, coupled with an upturn in the price of cigarettes.

Note: Seasonal factors have been recalculated to reflect

developments during 1999. For this reason, some of the seasonally adjusted figures above and elsewhere in this report differ from those previously published.

See page 4 for a note on the use of hedonic models to adjust prices of audio and video products in the CPI for changes in quality.

The food and beverages index was unchanged in January. The index for food at home declined 0.2 percent, reflecting decreases in the indexes for fruits and vegetables, for dairy products, and for cereal and bakery products. The index for fruits and vegetables, which increased 0.4 percent in December, declined 1.1 percent in January. Within the fruits and vegetables group, the indexes for fresh fruits and for fresh vegetables declined 1.1 and 2.8 percent, respectively. (Prior to seasonal adjustment, fresh vegetable prices rose 4.2 percent.) Prices for processed fruits and vegetables rose 1.9 percent, following declines in each of the preceding 2 months. The index for dairy products registered its second consecutive decline—down 1.0 percent in January—largely because of a 2.6-percent decrease in the price of milk. The index for cereal and bakery products fell 0.5 percent, reflecting a decline in prices for breakfast cereal. On the other hand, the indexes for nonalcoholic beverages and for meats, poultry, fish, and eggs

Table A. Percent changes in CPI for All Urban Consumers (CPI-U)

Expenditure category	Seasonally adjusted							Compound annual rate, 3 months ended January 2000	Unadjusted 12 months ended January 2000
	Changes from preceding month								
	1999						2000		
	July	August	September	October	November	December	January		
All items	0.3	0.3	0.4	0.2	0.2	0.2	0.2	2.4	2.7

Special indexes:									
Energy	1.8	2.3	1.8	0	.1	1.8	1.0	12.1	14.7
Food1	.2	.3	.2	.2	.1	-.1	1.0	1.5
All items less food and energy2	.1	.3	.2	.2	.1	.2	1.8	1.9

increased 0.7 and 0.3 percent, respectively, while the index for other food at home was unchanged. Increases in prices for coffee and carbonated beverages were responsible for the increase in the index for nonalcoholic beverages. Within the index for meats, poultry, fish, and eggs, increases in prices for poultry and eggs more than offset a decline in meat prices. The other two components of the food and beverages index—food away from home and alcoholic beverages—each increased 0.2 percent.

The index for housing rose 0.3 percent in January, following an increase of 0.1 percent in December. Each of the three major housing groups—shelter, fuels and utilities, and household furnishings and operations—contributed to the acceleration. Shelter costs, which increased 0.1 percent in December, advanced 0.3 percent in January. Within shelter, the indexes for rent and for owners' equivalent rent each increased 0.3 percent, and the index for lodging away from home rose 0.6 percent. The index for fuels and utilities turned up in January, advancing 0.5 percent after registering a 0.5-percent decrease in December. The index for natural gas, which declined 4.0 percent in December, increased 1.4 percent in January. This upturn more than offset a 0.4-percent downturn in the index for electricity, which had risen 0.2 percent in December. Fuel oil prices, which increased 30.9 percent in all of 1999, continued upwards in January, advancing 7.9 percent. The index for household furnishings and operations increased 0.3 percent in January, following a 0.1-percent rise in December.

The transportation component rose 0.1 percent in January after increasing 0.8 percent in December. Gasoline prices continued to advance, but by less than in December. The index for gasoline increased 1.6 percent in

January, bringing the increase over the last 12 months to 32.4 percent. The index for new vehicles, which was unchanged in December, declined 0.3 percent in January. (As of January, about 82 percent of the new vehicle sample was represented by 2000 models. The 2000 models will continue to be phased in, with appropriate adjustments for quality change, over the next several months, as new models replace old models at dealerships. For a report on quality changes for the 2000 vehicles represented in the Producer Price Index sample, see news release USDL-99-324, dated November 10, 1999.) The index for used cars and trucks declined for the third consecutive month, falling 0.7 percent in January. The index for public transportation declined 0.8 percent, largely because of a 1.4-percent drop in airline fares.

The index for apparel decreased 1.1 percent in January, after registering no change in December. (Prior to seasonal adjustment, apparel prices fell 2.5 percent, reflecting post-holiday discounting.)

Medical care costs rose 0.3 percent in January to a level 3.6 percent higher than a year ago. In January, the index for medical care commodities—prescription drugs, non-prescription drugs, and medical supplies—increased 0.3 percent. The index for medical care services also rose 0.3 percent in January. Charges for physicians' services and for hospital and related services increased 0.5 and 0.3 percent, respectively.

The index for recreation costs increased 0.2 percent in January, the same as in each of the preceding 2 months. Most recreation categories registered small price increases in January; an exception was the index for photography, which declined 0.8 percent.

The index for education and communication increased

Table B. Percent changes in CPI for Urban Wage Earners and Clerical Workers (CPI-W)

Special indexes:									
Energy	1.9	2.7	1.9	-.2	.2	2.1	1.0	13.7	16.0
Food1	.2	.3	.2	.2	.1	-.1	1.0	1.6
All items less food and energy2	.1	.4	.2	.2	.1	.1	1.6	1.9

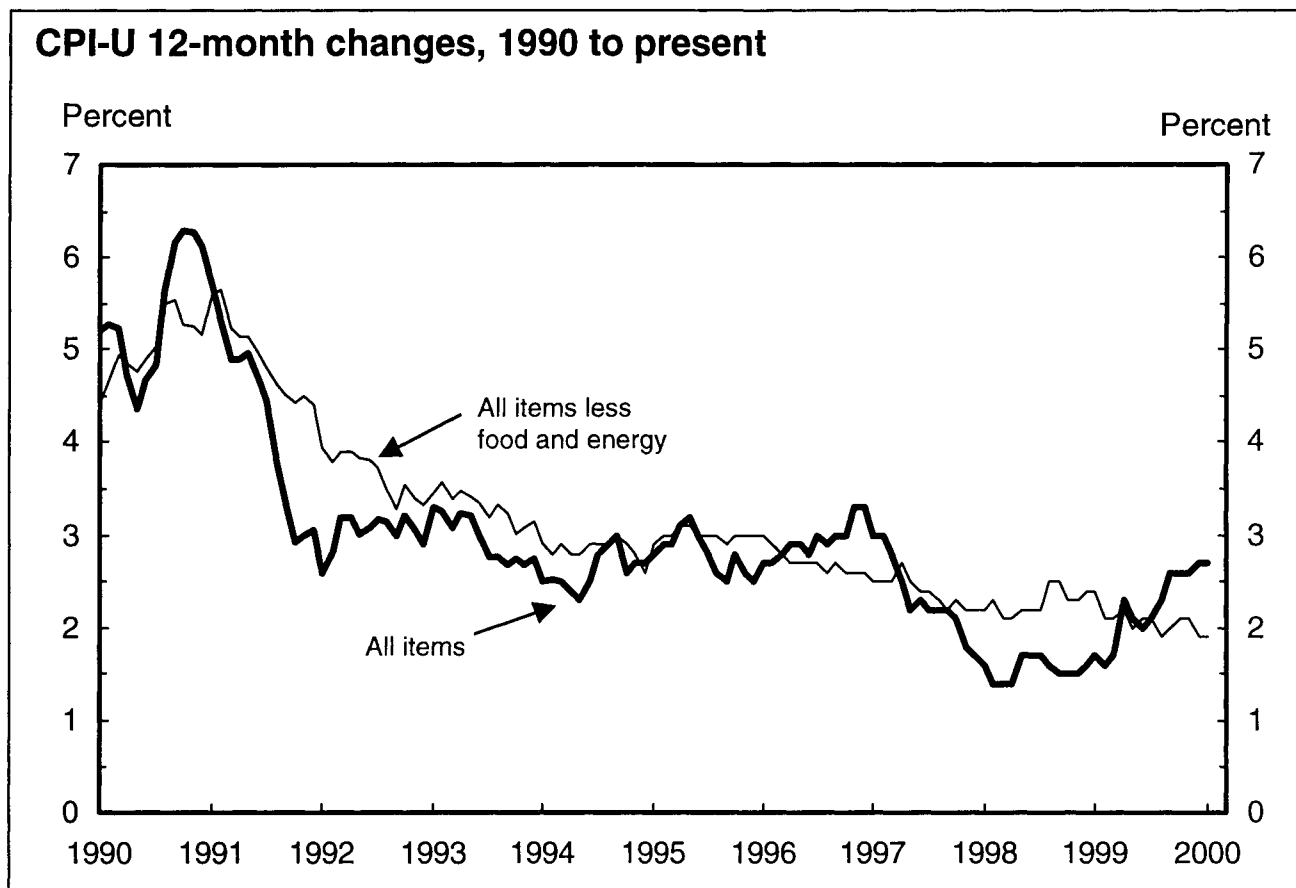

0.5 percent in January. Educational costs rose 0.8 percent, reflecting a 6.0-percent increase in educational books and supplies. The index for communication advanced 0.1 percent; a 0.5-percent increase in charges for local telephone services more than offset a 1.7-percent decrease in the index for personal computers and peripheral equipment.

The index for other goods and services advanced 0.6 percent in January, after registering no change in December. The index for cigarettes, which declined in each

of the preceding 3 months, increased 1.7 percent in January, reflecting in part a 13-cents, per pack, increase in the wholesale price introduced in mid-January.

CPI for Urban Wage Earners and Clerical Workers (CPI-W)

On a seasonally adjusted basis, the CPI for Urban Wage Earners and Clerical Workers rose 0.2 percent in January.

Extending the use of hedonic models to adjust prices for changes in quality

As previously announced, the Bureau of Labor Statistics (BLS) is extending the use in the Consumer Price Index (CPI) of quality adjustments derived from hedonic models. A hedonic model decomposes the price of a consumer product into implicit prices for each of its important features and components, thereby providing an estimate of the value of each feature and component. The Bureau plans to extend this method to additional items in the CPI. As BLS does so, it will give CPI users notice at least 3 months before the first use of hedonic quality adjustment for each additional item, and will have detailed background papers on the models to be employed available by the time of first use.

As first announced at the time of the October 1999 CPI release, hedonic quality adjustments for 12 audio products and for video cameras are being incorporated into the index effective with the January 2000 CPI. Audio products are in the *audio equipment* item stratum and video cameras are in the *other video equipment*, which contains video equipment other than televisions. Papers describing these adjustments are on the CPI website (<http://stats.bls.gov/cpihome.htm>).

Effective with the CPI for April 2000, BLS will extend hedonic quality adjustment to video cassette recorders (VCRs) and digital versatile disc (DVD) players, two other items in the *other video equipment* item stratum. The relative importance (share of weight), as of December 1999, of this stratum was 0.062 percent in the CPI for all Urban

Consumers (CPI-U) and 0.071 percent in the CPI for Urban Wage Earners and Clerical Workers (CPI-W). Within *other video equipment*, VCRs are estimated to represent 46 percent of the weight and DVD players about 6 percent. Camcorders represent about 30 percent. The remaining items in this stratum—those that will not be subject to hedonic quality adjustment at this time—include satellite dishes and some miscellaneous video equipment.

The hedonic models that BLS analysts developed for VCRs and for DVD players use observations collected for the CPI, supplemented with additional observations collected specifically for this purpose. Papers describing this work are in preparation and will be available before release of the April 2000 CPI.

(Additional work on hedonic quality adjustment for telephones, microwave ovens, refrigerator/freezers, and washers and dryers is under way at BLS.)

Response Rates for Consumer Price Indexes, 1999

This article and the accompanying tables update articles previously published on response rates in the *CPI Detailed Report* for March 1991 and in the January issues of 1992 through 1999.

In an effort to measure the outcome of data collection for the CPI, the Bureau calculates response rates. Response rates measure the proportion of completed surveys to those issued and help measure the accuracy of the CPI. Failure of a data unit to respond at either the data collection stage or estimation stage represents a loss of statistical information that dilutes the accuracy of the sample. BLS publishes response rates annually to assist the data user in judging the accuracy of CPI data.

BLS calculates response rates for the CPI-U at the data collection phase for initiation and pricing and at the data estimation phase for pricing. The response rate at the data collection phase is the number of responding sample units divided by the number of eligible sample units. A sample unit is eligible if it belongs to the defined target population, and if it provides information for one or more items. The response rate at estimation is defined as the number of sample units used in estimation divided by the number of eligible sample units.

Response rates for 1999 are presented in tables R-1 through R-15. Table R-1 shows response rates for all data included in the CPI-U, U.S. city average, by major group, for all of 1999. Tables R-2 through R-15 show rates for current data collection in selected areas for which indexes are published monthly and bimonthly.

The response rates in tables R-1 through R-15 are sepa-

rated into commodities and services and the shelter portion of housing. Commodities and services are further broken down into outlets and quotes. An *outlet* is a generic term that designates the place where prices are collected. A *quote* is a specific item to be priced in a specific outlet. There may be from 1 to more than 50 quotes priced in each outlet.

In table R-1, it is important to note the relatively low percentages of quotes reported, collected, and used in estimation for apparel. Low rates for these items can be partially attributed to the design of the apparel sample. Because seasonal apparel items commonly are in stores only during certain times of the year, most of the apparel sample is doubled, with each half of the sample designated for pricing during part of the year. Thus, at any particular time of the year, a large number of apparel quotes, although eligible, are designated out of season and are not collected.

The response rates at the data collection phase for shelter are separated into three categories. If useable information is obtained, the unit is designated *data reported*. If the assigned unit is located but is unoccupied, the unit is designated *found vacant*. In instances where the unit is eligible but no data are available (for example, refusals or no one at home) the unit is designated *other*.

For additional information on response rates, write to the Bureau of Labor Statistics, Division of Consumer Prices and Price Indexes, Room 3615, 2 Massachusetts Avenue, NE, Washington, DC 20212-0001, or call Doris L. Johnson at (202) 691-7000. Ms. Johnson may also be reached at johnson_dl@bls.gov by electronic mail.

Intervention Analysis in Seasonal Adjustment

In some Consumer Price Index (CPI) series, a process known as seasonal adjustment is used to identify and factor out seasonal movement of prices for goods or services. This process permits analysis of nonseasonal price movements. The CPI uses the Bureau of the Census X-12-ARIMA software to calculate factors for seasonal adjustment of both historical and current series. Some CPI series are adjusted using intervention analysis seasonal adjustment techniques.

Intervention analysis seasonal adjustment allows nonseasonal economic phenomena, such as outliers and level shifts, to be factored out of indexes before calculation of seasonal adjustment factors. (An *outlier* is an extreme value for a particular month. A *level shift* is a change or shift in the price level of a CPI series caused by an event, such as a sales tax increase or oil embargo, occurring over 1 or several months.) The result is an adjustment based on a representation of the series with the seasonal pattern emphasized. Intervention analysis seasonal adjustment also makes it possible to account for seasonal shifts, resulting in a better seasonal adjustment in the periods before and after the shift occurred. Not all CPI series are adjusted using intervention analysis seasonal adjustment techniques. However, for affected series, the resulting seasonal factors better represent the true seasonal pattern than factors calculated without these techniques. The seasonal factors are applied to the original unadjusted series. Level shifts and outliers, removed for the calculation of seasonal factors, are present in the seasonally adjusted series.

When X-12-ARIMA is used to perform intervention analysis seasonal adjustment, unusual events are modeled as part of the seasonal adjustment process. X-12-ARIMA's built-in regression variables are used for directly estimating the effects of sudden level changes and other disruptions and removing those effects before calculation of the seasonal factors. For a comprehensive discussion of X-12-ARIMA and intervention analysis seasonal adjustment, see "Improvements to CPI Procedures for Intervention Analysis Seasonal Adjustment" in the December 1996 issue of the *CPI Detailed Report*.

In January 2000, BLS adjusted the series listed below, using intervention analysis seasonal adjustment techniques.

BLS examined these series, using the 8-year span from January 1992 through December 1999, with the exception of *gasoline, unleaded midgrade*, which was adjusted using data from December 1993 through December 1999.

- Alcoholic beverages
- Alcoholic beverages at home
- Beer, ale, and other malt beverages at home
- Breakfast cereal
- Educational books and supplies
- Fats and oils
- Fuel oil
- Fuel oil and other fuels
- Gasoline, all types
- Gasoline, unleaded midgrade
- Gasoline, unleaded premium
- Gasoline, unleaded regular
- Girls' apparel
- Motor fuel
- New cars
- New trucks
- New vehicles
- Nonalcoholic beverages and beverage materials
- Other household fuels
- Utility natural gas service
- Water and sewerage maintenance
- Whiskey at home
- Women's dresses
- Women's outerwear

For each series that was seasonally adjusted using X-12-ARIMA intervention analysis seasonal adjustment, a list of level shifts is provided in the table below, along with the identified causes (events). Outliers are also included in the list.

For further information, write to the Bureau of Labor Statistics, Division of Consumer Prices and Price Indexes, 2 Massachusetts Avenue, NE, Room 3615, Washington, DC 20212-0001, or call Claire McAnaw Gallagher at (202) 691-6969. Ms. Gallagher may also be reached at gallagher_c@bls.gov by e-mail.

Consumer Price Index series — Intervention analysis seasonal adjustment

Series	Level shift period(s)	Event	Outliers
Alcoholic beverages	None	Not applicable	8/95, 2/99, 10/99
Alcoholic beverages at home	1/92-3/92	Increase in beer, ale, and other malt beverages at home, due to increases in brewers' costs	None
Beer, ale, and other malt beverages at home	1/92-3/92 1/96-2/96	Increase in brewers' costs Increased demand for specialty beers	7/92, 2/93, 7/94
Breakfast cereal	4/96-8/96	Price cutting among manufacturers	None
Educational books and supplies	11/99	Greater than normal sale on educational reference books	None
Fats and oils	6/98-10/98 11/98-1/99 11/99	Response to declining domestic butter output and stocks Increased domestic and imported oil supply exceeded demand Anticipation of larger-than-normal soybean and other crops	None
Fuel oil	10/96 9/99	Suppliers' policy of keeping limited inventories on hand, coupled with consumer expectations of a cold winter, resulted in price increases OPEC supply reductions, Y2K demand, and expectations of a colder-than-normal winter	1/96, 4/96, 5/96, 12/99
Fuel oil and other fuels	10/96 9/99	Suppliers' policy of keeping limited inventories on hand, coupled with consumer expectation of a cold winter, resulted in price increases OPEC supply reductions, Y2K demand, and expectations of a colder-than-normal winter	1/94, 1/96, 4/96, 5/96, 12/99
Gasoline, all types	10/93 4/99 6/99-9/99	Increase in Federal motor fuel tax Anticipated cutback of crude oil production by OPEC and other countries Realized effects of a decrease in supply of crude oil by OPEC and other countries	5/96, 7/97, 12/99
Gasoline, unleaded midgrade	4/99 6/99-9/99	Anticipated cutback of crude oil production by OPEC and other countries Realized effects of a decrease in supply of crude oil by OPEC and other countries	5/96, 7/97, 12/99
Gasoline, unleaded premium	10/93 4/99 6/99-9/99	Increase in Federal motor fuel tax Anticipated cutback of crude oil production by OPEC and other countries Realized effects of a decrease in supply of crude oil by OPEC and other countries	5/96, 7/97, 12/99
Gasoline, unleaded regular	10/93 4/99 6/99-9/99	Increase in Federal motor fuel tax Anticipated cutback of crude oil production by OPEC and other countries Realized effects of a decrease in supply of crude oil by OPEC and other countries	5/96, 7/97, 12/99
Girls' apparel	None	Not applicable	6/92

Consumer Price Index series — intervention analysis seasonal adjustment—continued

Series	Level shift period(s)	Event	Outliers
Motor fuel	10/93 4/99 6/99-9/99	Increase in Federal motor fuel tax Anticipated cutback of crude oil production by OPEC and other countries Realized effects of a decrease in supply of crude oil by OPEC and other countries	5/96,7/97 12/99
New cars	None	Not applicable	5/98, 6/98 8/98
New trucks	5/98	Price drop in trucks, resulting from <i>loyalty rebates</i> offered by American auto makers	6/98
New vehicles	None	Not applicable	5/98, 6/98 8/98
Nonalcoholic beverages and beverage materials	6/94-8/94 3/97-7/97	Coffee price increase due primarily to two freezes in Brazil in July 1994 that combined the effects of a poor crop in Latin America and cartel restrictions Coffee price increases due to labor problems in Columbia and supply problems in Brazil	9/93
Other household fuels	9/96-12/96 1/97-5/97	Demand increase in anticipation of a cold winter, declining supply due to a cold European winter, new inventory policies, and increased instability in the Middle East Declining demand for residential oil heat due to a warm spring season	None
Utility natural gas service	1/97 4/97	High purchased gas adjustments in the Midwest Low purchased gas adjustments in the Midwest	2/97, 5/97 12/99
Water and sewerage maintenance	3/96 7/96	Incorrect service priced; price increase erroneously attributed to environmental clean-up charge passed on to consumers. Return to pricing of correct service	None
Whiskey at home	None	Not applicable	10/98
Women's dresses	None	Not applicable	3/93, 3/98, 6/98
Women's outerwear	None	Not applicable	6/92, 7/92 10/93,11/93

¹ Foods, fuels, and several other items priced every month in all areas; most other goods and services priced as indicated:

M - Every month.
1 - January, March, May, July, September, and November.
2 - February, April, June, August, October, and December.

² Regions defined as the four Census regions. See map in technical notes.

³ Indexes on a December 1996=100 base.

⁴ Indexes on a December 1986=100 base.

⁵ In addition, the following metropolitan areas are published semiannually and appear in Tables 34 and 39 of the January and July issues of the CPI Detailed Report: Anchorage, AK; Cincinnati-Hamilton, OH-KY-IN; Denver-Boulder-Greeley, CO; Honolulu, HI; Kansas City, MO-KS; Milwaukee-Racine, WI; Minneapolis-St. Paul, MN-WI; Pittsburgh, PA;

Portland-Salem, OR-WA; St. Louis, MO-IL; San Diego, CA; Tampa-St. Petersburg-Clearwater, FL.

⁶ Indexes on a November 1996=100 base.

- Data not available.

NOTE: Index applies to a month as a whole, not to any specific date.

NOTE: Local area indexes are byproducts of the national CPI program. Each local index has a smaller sample size than the national index and is, therefore, subject to substantially more sampling and other measurement error. As a result, local area indexes show greater volatility than the national index, although their long-term trends are similar. Therefore, the Bureau of Labor Statistics strongly urges users to consider adopting the national average CPI for use in their escalator clauses.

¹ See region and area size on Table 10 for information about cross classifications.

² Indexes on a December 1997=100 base.

³ The 'All items' index size B/C is on a December 1996=100 base.

⁴ This index series was calculated using a Laspeyres estimator. All other item stratum index series converted to a geometric means estimator

in January, 1999.

⁵ Indexes on a December 1982=100 base.

⁶ Special index based on a substantially smaller sample.

⁷ Indexes on a December 1993=100 base.

- Data not available.

NOTE: Index applies to a month as a whole, not to any specific date.

¹ Foods, fuels, and several other items priced every month in all areas; most other goods and services priced as indicated:

M - Every month.

1 - January, March, May, July, September, and November.

2 - February, April, June, August, October, and December.

² Regions defined as the four Census regions. See map in technical notes.

³ Indexes on a December 1996=100 base.

⁴ Indexes on a December 1986=100 base.

⁵ In addition, the following metropolitan areas are published semiannually and appear in Tables 34 and 39 of the January and July issues of the CPI Detailed Report: Anchorage, AK; Cincinnati-Hamilton, OH-KY-IN; Denver-Boulder-Greeley, CO; Honolulu, HI; Kansas City, MO-KS; Milwaukee-Racine, WI; Minneapolis-St. Paul, MN-WI; Pittsburgh, PA;

Portland-Salem, OR-WA; St. Louis, MO-IL; San Diego, CA; Tampa-St. Petersburg-Clearwater, FL.

⁶ Indexes on a November 1996=100 base.

- Data not available.

NOTE: Index applies to a month as a whole, not to any specific date.

NOTE: Local area indexes are byproducts of the national CPI program. Each local index has a smaller sample size than the national index and is, therefore, subject to substantially more sampling and other measurement error. As a result, local area indexes show greater volatility than the national index, although their long-term trends are similar. Therefore, the Bureau of Labor Statistics strongly urges users to consider adopting the national average CPI for use in their escalator clauses.

¹ See region and area size on Table 10 for information about population size classes.

² Indexes on a December 1986=100 base.

³ Indexes on a December 1997=100 base.

⁴ The 'All items' index size B/C is on a December 1996=100 base.

⁵ This index series was calculated using a Laspeyres estimator. All other item stratum index series converted to a geometric means estimator

in January, 1999.

⁶ Indexes on a December 1984=100 base

⁷ Special index based on a substantially smaller sample.

⁸ Indexes on a December 1993=100 base.

- Data not available.

NOTE: Index applies to a month as a whole, not to any specific date.

¹ Areas on pricing schedule 2 (see Table 10) will appear next month.
² For Washington-Baltimore, indexes are on a December 1997=100 base unless otherwise noted.
³ For Washington-Baltimore, index is on a November 1996=100 base.
⁴ For Washington-Baltimore, index is on a November 1997=100 base.
⁵ This index series was calculated using a Laspeyres estimator. All other item stratum index series converted to a geometric means estimator in January, 1999.

⁶ Indexes on a December 1984=100 base
⁷ Special index based on a substantially smaller sample.
⁸ Indexes on a December 1993=100 base.
⁹ Indexes on a December 1997=100 base.
 - Data not available.
 NOTE: Index applies to a month as a whole, not to any specific date.

¹ Regions defined as the four Census regions. See map in technical notes.

² Indexes are on a December 1977=100 base except for the U.S. which is on a 1967=100 base.

³ Indexes on a December 1984=100 base

⁴ Indexes on a December 1997=100 base.

⁵ Special index based on a substantially smaller sample.

⁶ Indexes on a December 1993=100 base.

- Data not available.

¹ Indexes on a 1987=100 base.

² For Washington-Baltimore, indexes are on a December 1997=100 base unless otherwise noted.

³ For Washington-Baltimore, index is on a November 1996=100 base.

⁴ Index is on a November 1977=100 base in Miami and an October 1967=100 base in Anchorage.

⁵ For Washington-Baltimore, index is on a November 1997=100 base.

⁶ Indexes are on a November 1984=100 base in Anchorage, Boston, Cincinnati,

Denver, Miami, Milwaukee, Portland, St. Louis, San Diego, and Seattle. Indexes are on a December 1984=100 base in Atlanta, Chicago, Cleveland, Dallas, Detroit, Honolulu, Houston, Kansas City, Los Angeles, Minneapolis, New York, Philadelphia, Pittsburgh, and San Francisco.

⁷ Special index based on a substantially smaller sample.

⁸ Indexes on a December 1993=100 base.

⁹ Indexes on a December 1997=100 base.

Technical Note

Brief Explanation of the CPI

The Consumer Price Index (CPI) is a measure of the average change in prices over time in a fixed market basket of goods and services. The Bureau of Labor Statistics publishes CPIs for two population groups: a CPI for All Urban Consumers (CPI-U), which covers approximately 87 percent of the total population and a CPI for Urban Wage Earners and Clerical Workers (CPI-W), which covers 32 percent of the total population. The CPI-U includes, in addition to wage earners and clerical workers, groups such as professional, managerial, and technical workers, the self-employed, short-term workers, the unemployed, and retirees and others not in the labor force.

The CPI is based on prices of food, clothing, shelter, and fuels, transportation fares, charges for physicians' and dentists' services, drugs, and other goods and services that people buy for day-to-day living. Prices are collected in 87 urban areas across the country from about 50,000 housing units and approximately 23,000 retail establishments—department stores, supermarkets, hospitals, filling stations, and other types of stores and service establishments. All taxes directly associated with the purchase and use of items are included in the index. Prices of fuels and a few other items are obtained every month in all 87 locations. Prices of most other commodities and services are collected every month in the three largest metropolitan areas and every other month in other areas. Prices of most goods and services are obtained by personal visits or telephone calls of the Bureau's trained representatives.

In calculating the index, price changes for the various items in each location are averaged together with weights which represent their importance in the spending of the appropriate population group. Local data are then combined to obtain a U.S. city average. Separate indexes are also published by size of city, by region of the country, for cross-classifications of regions and population-size classes, and for 26 local areas. Area indexes do not measure differences in the level of prices among cities; they only measure the average change in prices for each area since the base period.

The index measures price change from a designed reference date—1982-84 which equals 100.0. An increase of 16.5 percent, for example, is shown as 116.5. This change can also be expressed in dollars as follows: the price of a base period market basket of goods and services in the CPI has risen from \$10 in 1982-84 to \$11.65.

For further details see *BLS Handbook of Methods*, Chapter 17, the Consumer Price Index, Bulletin 2490, April 1997.

Calculating Index Changes

Movements of the indexes from one month to another are usually expressed as percent changes, rather than changes in index points, because index point changes are affected by the level of the index in relation to its base period, whereas percent changes are not. The example below illustrates the computation of index point and percent changes.

Percent changes for 3-month and 6-month periods are expressed as annual rates and are computed according to the standard formula for compound growth rates. These data indicate what the percent change would be, if the current rate were maintained for a 12-month period.

<i>Index point change</i>	
CPI	115.7
Less previous index	111.2
Equals index point change	4.5
<i>Percent change</i>	
Index point difference	4.5
Divided by the previous index	111.2
Equals	0.040
Results multiplied by one hundred	0.040x100
Equals percent change	4.0

Energy Prices

Prices are usually available for the U.S. city average, 13 large metropolitan areas, the 4 census regions, 3 size classifications, and 10 areas reflecting the 4 Census regions cross-classified by the 3 population sizes. However, not all energy commodities and services are used in every area of the country. Fuel oil, for example, is not a common heating fuel in some urban areas, particularly in the South and West. Where no average prices are available, the designation NA appears. This designation also appears, if the data sufficiency criteria have not been met in any given month. For example, if there are fewer than five usable fuel oil prices for a published city or region size class, no fuel oil prices for the area will be published.

All prices are collected monthly by BLS representatives in the urban areas priced for the CPI. Prices for natural gas

and electricity include fuel and purchased gas adjustments and all applicable taxes. Fuel oil and gasoline prices include applicable Federal, State, and local taxes.

Natural gas and electricity. Natural gas prices are reported in therms, which are a measure of heating value. Electricity prices are given in kilowatt hours (kWh). For both utility services, the consumption ranges specified in table P2 are the upper and lower limits of the bill sizes priced for the CPI. The average prices per therm and per kilowatt hour are calculated from bills priced within these ranges. It should be noted that bills priced for the CPI are not only for different consumption amounts, but may also be calculated from different types of residential rate schedules. *The average price per therm and per kilowatt hour are not, therefore, generally suitable for use in place-to-place price comparisons.*

The average prices for 40 and 100 therms of natural gas, and for 500 kilowatt hours of electricity (shown in table P1) are calculated from a special price collection program. They are not used in the calculation of the CPI. Since heating and air-conditioning requirements vary by geographic location, climate, and weather conditions, it cannot be inferred that these consumption amounts represent those used by a typical residential consumer. These bills are used merely to track price changes over time for constant amounts of consumption, and to provide continuity with prices of natural gas and

electricity formerly published in conjunction with the unrevised CPI.

Fuel oil. Only #2 fuel oil (home heating oil) is priced. (See table P1.) Prices are collected, in most cases, for quantities greater than one gallon. These prices are converted to a gallon price for this program. Fuel oil prices reflect discounts for quantity or quick payment.

Gasoline and automotive diesel fuel. Gasoline and diesel prices, shown in table P3, are collected at the pump from a sample of full service, mini-service, and self-service gas stations.

Approximate British Thermal Unit (Btu) values for some energy items are as follows, according to the source indicated:

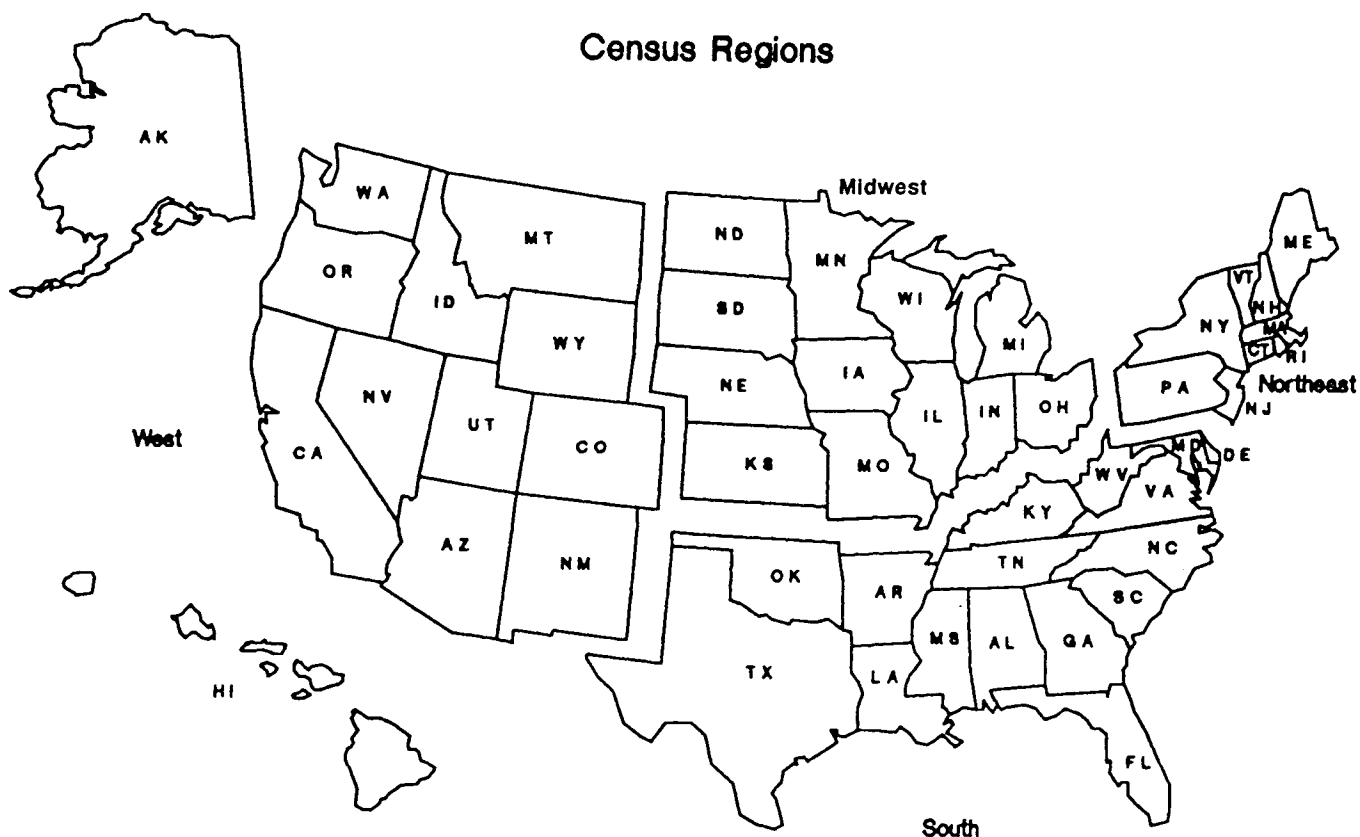

1 therm = 100,000 Btu's (U.S. Department of Energy)

1 kWh = 3,412 Btu's (Edison Electric Institute)

1 gallon #2 fuel oil = 140,000 Btu's (U.S. Department of Energy)

Food and Beverage Prices

Actual weighted average prices for food and beverages are calculated each month at the national level and for the four Census geographic regions, as shown in table P4. As a result of changes in price collection methodology and sample

sizes, average prices for individual cities cannot, in general, be produced. It is hoped, however, that regional average prices will help satisfy the need for local area data. It should be noted that the average prices for food in this report reflect variations in brand, quality, and size among geographic areas. Users of average food prices should be aware that these differences exist.

Because a number of food commodities are not available in all areas on a year-round basis, prices will not appear in some months for some regions or for the U.S. city average. In other instances, sufficient prices may not be available, due to temporary disruptions in supplies. Where no average prices are available, the designation NA appears. When a price is not available from an individual store in any month, an estimated price will be calculated for the missing item and used in computing the average price. In cases where the proportion of estimated prices used to calculate the average is considered too high, the average price is not published and NA appears for that item in the table.

Because of space limitations in the table, the description for each item is abbreviated. More detailed specifications are available from BLS regional offices or from the Washington office upon request.

Seasonally Adjusted and Unadjusted Data

Because different groups use price data for different purposes, the Bureau of Labor Statistics publishes seasonally adjusted, as well as unadjusted changes each month.

For analyzing general price trends in the economy, seasonally adjusted changes are usually preferred, since they eliminate the effect of changes that normally occur at the same time and in about the same magnitude every year—such as price movements resulting from changing climatic conditions, production cycles, model changeovers, holidays, and sales.

The unadjusted data are of primary interest to consumers concerned about the prices they actually pay. Unadjusted data also are used extensively for escalation purposes. Many collective bargaining contract agreements and pension plans, for example, tie compensation changes to the Consumer Price Index unadjusted for seasonal variation.

Seasonal factors used in computing the seasonally adjusted indexes are derived by the X-12-ARIMA Seasonal Adjustment Method. The updated seasonal data at the end of 1977 replaced data from 1967 through 1977. Subsequent annual updates have replaced 5 years of seasonal data, e.g., data from 1995 through 1999 were replaced at the end of 1999. The seasonal movement of all items and 54 other aggregations is derived by combining the seasonal movement of 73 selected components. Each year, the seasonal status of every series is reevaluated based upon certain statistical criteria. If any of the 73 components change their seasonal adjustment status from seasonally adjusted to not seasonally adjusted, not seasonally adjusted data will be used for the last 5 years; but the seasonally adjusted indexes will be used before that period.

Seasonally adjusted data, including the *all items* index levels, are subject to revision for up to 5 years after their origi-

nal release. For this reason, BLS advises against the use of these data in escalation agreements.

Effective with the calculation of the seasonal factors for 1990, the Bureau of Labor Statistics has used an enhanced seasonal adjustment procedure called Intervention Analysis Seasonal Adjustment for some CPI series. Intervention Analysis Seasonal Adjustment allows for better estimates of seasonally adjusted data. Extreme values or sharp movements, which might distort the seasonal pattern are estimated and removed from the data before calculation of seasonal factors. Since the calculation of seasonal factors for 1996, X-12-ARIMA software has been used for Intervention Analysis Seasonal Adjustment.

For the fuel oil and the motor fuels indexes, this procedure is used to offset the effects that extreme price volatility would otherwise have had on the estimates of seasonally adjusted data for those series. For the breakfast cereal index, the procedure is used to offset the effects of price-cutting among cereal manufacturers. For the educational books and supplies index, the procedure is used to account for greater-than-normal sale prices on educational reference books. For some alcoholic beverage series, Intervention Analysis Seasonal Adjustment is used to offset the effects of increased brewer's costs, along with increased demand for specialty beers. For the nonalcoholic beverages index, the procedure is used to offset the effects of a large increase in coffee prices due to adverse weather. For the fats and oils series, the procedure is used to account for lower domestic butter stocks, lower cold storage supplies, and anticipation of a bumper soybean crop. For the new trucks index, the procedure is applied to account for loyalty rebates offered to customers by American automakers. For the water and sewerage maintenance index, the procedure is used to account for a data collection anomaly.

A description of Intervention Analysis Seasonal Adjustment, as well as a list of unusual events modeled and seasonal factors for these items, may be obtained by writing the Bureau of Labor Statistics, Division of Consumer Prices and Price Indexes, Washington, DC 20212 or by calling Claire McAnaw Gallagher on (202) 691-6968. Ms. Gallagher may also be reached at gallagher_c@bls.gov by e-mail.

Metropolitan Areas

BLS publishes three major metropolitan areas monthly:

Chicago-Gary-Kenosha, IL-IN-WI
Los Angeles-Riverside-Orange County, CA
New York-Northern New Jersey-Long Island,
NY-NJ-CT-PA

Data for additional 11 metropolitan areas are published every other month [on an odd (January, March, etc.) or even (February, April, etc.) month schedule] for the following areas:

Atlanta, GA	-even
Boston-Brockton-Nashua, MA-NH-ME-CT	-odd
Cleveland-Akron, OH	-odd
Dallas-Fort Worth, TX	-odd

Detroit-Ann Arbor-Flint, MI	-even
Houston-Galveston-Brazoria, TX	-even
Miami-Fort Lauderdale, FL	
PA-NJ-DE-MD	-even
Philadelphia-Wilmington-Atlantic City,	-even
San Francisco-Oakland-San Jose, CA	-even
Seattle-Tacoma-Bremerton, WA	-even
Washington-Baltimore, DC-MD-VA-WV	-odd

(Note: The designation even or odd refers to the month during which the area's price change is measured. Due to the time needed for processing, data are released 2 to 3 weeks into the following month.)

Data are published for another group of 12 metropolitan areas on a semiannual basis. These indexes, which refer to the arithmetic average for the 6-month periods from January through June and July through December, are published with release of the CPI for July and January, respectively, in August and February for:

Anchorage, AK
 Cincinnati-Hamilton, OH-KY-IN
 Denver-Boulder-Greeley, CO
 Honolulu, HI
 Kansas City, MO-KS
 Milwaukee-Racine, WI
 Minneapolis-St. Paul, MN-WI
 Pittsburgh, PA
 Portland-Salem, OR-WA
 San Diego, CA
 St. Louis, MO-IL
 Tampa-St. Petersburg-Clearwater, FL

Note: The designation even or odd refers to the month during which the area's price change is measured. Due to the time needed for processing, data are released 2 to 3 weeks into the following month.)

Data are published for another group of 12 metropolitan areas on a semiannual basis. These indexes, which refer to the arithmetic average for the 6-month periods from January through June and July through December, are published with release of the CPI for July and January, respectively, in August and February for:

Anchorage, AK
 Cincinnati-Hamilton, OH-KY-IN
 Denver-Boulder-Greeley, CO
 Honolulu, HI
 Kansas City, MO-KS
 Milwaukee-Racine, WI
 Minneapolis-St. Paul, MN-WI
 Pittsburgh, PA
 Portland-Salem, OR-WA
 San Diego, CA
 St. Louis, MO-IL
 Tampa-St. Petersburg-Clearwater, FL

How to Obtain Consumer Price Index Information

Consumer Price Index (CPI) information is available from the Bureau of Labor Statistics (BLS) electronically, through publication subscriptions, and via telephone and fax through automated recordings. Information specialists are also available in the national and regional offices, to provide help and to respond to questions.

Electronic access to CPI data

BLS on the Internet. Through the Internet, BLS provides free, continuous access to published CPI data and press releases. The most recent month's CPI is made available immediately at the time of release. Additionally, a database called LABSTAT, containing current and historical data for the CPI is accessible. Data and press releases from other BLS surveys are also available. The BLS site is accessible via the World Wide Web (WWW), Gopher, and File Transfer Protocol (FTP), as described below. Send e-mail to labstat.helpdesk@bls.gov for help using any of these systems.

World Wide Web. BLS maintains a Web site <http://stats.bls.gov> on the Internet. This BLS homepage provides access to LABSTAT, as well as links to program-specific homepages. The CPI homepage <http://stats.bls.gov/cpihome.htm> provides other CPI information, as well as indexes. This includes a brief explanation of methodology, frequently asked questions and answers, contacts for further information, and explanations of how the CPI handles special items, like medical care and housing. In addition, CPI press releases and historical data for metropolitan areas can be accessed by linking to regional office homepages from the main BLS Web site listed above.

FTP and Gopher. These tools provide access to CPI LABSTAT data, as well as documentation and press release files organized in hierarchical directories. Connect to stats.bls.gov using FTP or Gopher. Log on as "anonymous," and use your complete Internet e-mail address as the password.

Subscriptions to CPI publications

Summary data. Free, monthly, 2-page publication containing 1- and 12-month percent changes for selected U.S. city average Consumer Price Index for All Urban Consumers (CPI-U) and Consumer Price Index for Urban Wage Earners and Clerical Workers (CPI-W) index series. The all items index data for each local area are also included. To be added to the mailing list, write to: Office of Publications, Bureau of Labor Statistics, 2 Massachusetts Avenue, NE, Room 2850, Washington, DC 20212-0001, or call (202) 606-7828 or any of the BLS regional offices listed below.

CPI Detailed Report. Most comprehensive report of the Consumer Price Index. This publication may be ordered by writing to: New Orders, Superintendent of Documents, P.O.

Box 371954, Pittsburgh, PA 15250-7954 or by calling (202) 512-1800. Subscriptions cost \$27 per year.

Monthly Labor Review (MLR). The *MLR* provides selected CPI data included in a monthly summary of BLS data and occasional articles and methodological descriptions too extensive for inclusion in the *CPI Detailed Report*. The *MLR* costs \$27 per year. This publication may be ordered by writing to: New Orders, Superintendent of Documents, P.O. Box 371954, Pittsburgh, PA 15250-7954 or by calling (202) 512-1800.

Recorded CPI data

Summary CPI data are provided on 24-hour recorded messages. Detailed CPI information is available by calling (202) 606-STAT. A touch-tone telephone is recommended, as this system allows the user to select specific indexes from lists of available data.

Recorded summaries of CPI are also available by calling any one of the metropolitan area CPI hot lines listed below. These hotline summaries typically include data for the U.S. city average, as well as the specified area. These recordings are approximately 3 minutes in length, do not require a touch-tone telephone, and are available 24 hours a day, 7 days a week.

Area	Hotline Number
Anchorage	(907) 271-2770
Atlanta	(404) 331-3415
Baltimore	(410) 962-4898
Boston	(617) 565-2325/2327
Chicago	(312) 353-1880
Cincinnati	(513) 684-2349
Cleveland	(216) 522-3852
Dallas	(214) 767-6970
Denver	(303) 844-1726
Detroit	(313) 226-7558
Honolulu	(808) 541-2808
Houston	(713) 718-3753
Indianapolis	(317) 226-7885
Kansas City	(816) 426-2481
Los Angeles	(310) 235-6884
Milwaukee	(414) 276-2579
Minneapolis-St. Paul	(612) 290-3996
New York	(212) 337-2404/2408
Philadelphia	(215) 596-1156
Pittsburgh	(412) 644-2900
Portland	(503) 231-2045
San Diego	(619) 557-6538
San Francisco	(415) 975-4350
Seattle	(206) 553-0645
St. Louis	(314) 539-3581
Washington, DC	(202) 691-6994

Other sources of CPI data

Technical information is available during normal working hours, Monday through Friday, by calling (202) 691-7000 or any of the regional offices listed below.

Fax-on-Demand. A wide variety of BLS information and data, including the CPI, are available from the BLS *Ready Facts* catalog, via fax-on-demand. CPI documents from *Ready Facts* that are available around the clock include the monthly CPI press release, selected national, regional and metropolitan area historical summaries, and some technical information. The latest CPI information is posted during the morning of release day. Call (202) 606-6325 and follow instructions to have the latest *Ready Facts* catalog sent to you. Each regional office also has a fax system in place; their systems include all information available from the national catalog, in addition to region-specific information on the CPI. Phone and fax-on-demand numbers for the eight regional offices are:

Office	Fax-on-Demand	Telephone
Atlanta	(404) 331-3403	(404) 331-3415
Boston	(617) 565-9167	(617) 565-2327
Chicago	(312) 353-1880	(312) 353-1880
Dallas	(214) 767-9613	(214) 767-6970
Kansas City	(816) 426-3152	(816) 426-2481
New York	(212) 337-2412	(212) 337-2400
Philadelphia	(215) 596-4160	(215) 596-1154
San Francisco	(415) 975-4567	(415) 975-4350
Washington, DC	(202) 606-6325	(202) 691-7000

Historical tables. These include all published indexes for each of the detailed CPI components. These tables are available via the Internet, by calling (202) 691-7000 in the national office, or by contacting any of the regional offices listed above.

Descriptive publications. These publications describe the CPI and ways to use it. They include simple fact sheets discussing specific topics about the CPI, a broader, non-technical overview of the CPI in a question and answer format, and a technical and thorough description of the CPI and its methodology. These publications are available upon request by calling (202) 691-7000, and many are included on the CPI homepage on the Internet.

Special publications. Also available are various special publications, such as *Relative Importance of Components in the Consumer Price Index* and materials describing the annual revisions of seasonally adjusted CPI data. For more information, call (202) 691-7000.

Further information can be obtained from the Office of Prices and Living Conditions, Bureau of Labor Statistics, 2 Massachusetts Avenue, NE., Room 3615, Washington, DC, 20212-0001, telephone (202) 691-7000 or by calling any of the regional offices listed above.
