The *CPI Detailed Report* (ISSN 0095-926X; USPS 485-030) is a monthly report on consumer price movements, including statistical tables and technical notes. The report covers two indexes—the Consumer Price Index for All Urban Consumers (CPI-U) and the Consumer Price Index for Wage Earners and Clerical Workers (CPI-W). The indexes reflect data for the U.S. city average and selected areas.

A subscription may be ordered for 1 or 2 years from: New Orders, Superintendent of Documents, P.O. Box 371954, Pittsburgh, PA 15250-7954 or by calling (202) 512-1800. Visa or MasterCard accepted. Fax (202) 512-2233. Subscription price per year: \$45 domestic, \$56.25 foreign. Single copy domestic, \$15.00; foreign, \$18.75. Prices are subject to change by the U.S. Government Printing Office.

Send correspondence on subscription matters, including address changes and missing issues, to the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402, or telephone (202) 512-1806. POSTMASTER: Send address changes to *CPI Detailed Report*, U.S. Government Printing Office, Washington, DC 20402.

For technical information, call the CPI Information and Analysis Office at (202) 691-7000, or write to Consumer Price Indexes, 2 Massachusetts Avenue, NE, Room 3615, Washington, DC 20212-0001.

CPI MAILGRAM provides selected U.S. City Average data for CPI-U and CPI-W within 24 hours of release. Order from: National Technical Information Service, 5285 Port Royal Road, Springfield, VA 22161. Subscription rates: \$145 in contiguous U.S. and Hawaii; \$160 in Alaska and Canada.

Material in this publication is in the public domain and, with appropriate credit, may be reproduced without permission. This information is available to sensory impaired individuals upon request. Voice phone: (202) 691-STAT; Federal Relay Service: 1-800-877-8339. Data on the CPI can also be accessed at <http://stats.bls.gov/cpihome.htm> through the CPI homepage. Periodicals postage paid at Washington, DC and at additional mailing offices.

Price Movements

December 2000

The Consumer Price Index for All Urban Consumers (CPI-U) declined 0.1 percent in December, before seasonal adjustment, to a level of 174.0 (1982-84=100). For the 12-month period ended in December, the CPI-U increased 3.4 percent.

The Consumer Price Index for Urban Wage Earners and Clerical Workers (CPI-W) also declined 0.1 percent in December, prior to seasonal adjustment. The December level of 170.7 was 3.4 percent higher than the index in December 1999.

CPI for All Urban Consumers (CPI-U)

On a seasonally adjusted basis, the CPI-U rose 0.2 percent in December, the same as in each of the preceding 2 months. The food index advanced 0.5 percent in December, following a 0.1-percent increase in October and no change in November. The energy index rose 0.2 percent in December, following increases of 0.2 and 0.1 percent in October and November, respectively. In December, the index for petroleum-based energy declined 1.4 percent, while the index for energy services advanced 1.8 percent. Excluding food and energy, the CPI-U rose 0.1 percent in December after advancing 0.2 percent in

October and 0.3 percent in November. A sharp downturn in the tobacco index and a smaller increase in shelter costs were responsible for the smaller advance in December than in November.

Consumer prices rose at a seasonally adjusted annual rate (SAAR) of 2.1 percent in the fourth quarter. This followed increases in the first three quarters at rates of 6.1, 2.6, and 2.8 percent, respectively. For the 12-month period ended in December, the CPI-U rose 3.4 percent. This compares with an increase of 2.7 percent for all of 1999 and was the largest annual advance since a 6.1-percent rise in 1990. Each of the three special index groups—food, energy, and all items less food and energy—contributed to the acceleration in 2000. The energy index, which had turned up sharply in 1999 after declining in 1998, increased 14.2 percent in 2000. Petroleum-based energy costs continued to advance sharply—up 15.7 percent—but only about half as much as in 1999. Charges for energy services, which rose 1.2 percent in 1999, surged in 2000, advancing 12.7 percent. Charges for natural gas increased 36.7 percent and those for electricity rose 2.6 percent. The food index, which rose 1.9 percent in 1999, increased 2.8 percent in 2000. Grocery store food prices increased 2.9

All items less food and energy	.2	.2	.2	.3	.2	.3	.1	2.0	2.6

percent, following a 1.7-percent rise in 1999. Larger increases in the indexes for meats, poultry, fish, and eggs and for fruits and vegetables were primarily responsible for the acceleration.

Excluding food and energy, the CPI-U advanced at a 2.0-percent SAAR in the fourth quarter, following increases at rates of 3.4, 2.2, and 2.7 percent, respectively, in the first three quarters of 2000. The 2.6-percent rise in 2000 compares with a 1.9-percent rise in 1999. The rising cost of shelter—up 3.4 percent in 2000 compared with 2.5 percent in 1999—was the principal factor accounting for this acceleration. Also contributing to the acceleration in 2000 were large, but still moderate, increases in the indexes for household furnishings and operations and for recreation, coupled with a substantial rise in the index for hospital and related services. The rates for selected groups for the last 7 years are shown below.

The food and beverages index rose 0.5 percent in December. The index for food at home increased 0.8 percent, the largest monthly advance since October 1998, when it also rose 0.8 percent. In December, the index for fruits and vegetables advanced 2.6 percent. Within the fruits and vegetables group, the index for fresh fruits increased 0.1 percent; and the index for fresh vegetables rose 6.2 percent. (Prior to seasonal adjustment, fresh fruit prices increased 2.4 percent, and fresh vegetable prices rose 6.9 percent.) The index for processed fruits and vegetables rose 0.8 percent, following a 2.0-percent decline in November. For the 12-month period ended in December, fresh fruit prices have risen 0.8 percent and fresh vegetable prices, 12.2 percent. The indexes for meats, poultry, fish, and eggs and for cereal and bakery products turned up in December, each advancing 0.8 percent. Within the former group, the indexes for poultry, beef and pork increased 2.2, 1.0, and 0.7 percent, respectively, in December. Poultry, beef, and

pork prices have advanced 2.0, 5.5, and 5.8 percent, respectively, in the last 12 months. In December, the indexes for dairy products and for other food at home each increased 0.1 percent, while the index for non-alcoholic beverages declined 0.4 percent. The other two components of the food and beverages index—food away from home and alcoholic beverages—increased 0.2 and declined 0.1 percent, respectively, in December and rose 2.4 and 2.7 percent in all of 2000.

The index for housing rose 0.2 percent in December, the same as in November. Shelter costs, which advanced 0.3 percent in November, increased 0.1 percent in December. Within shelter, the indexes for rent and for owners' equivalent rent increased 0.4 and 0.3 percent,

respectively, while the index for lodging away from home declined 2.7 percent. The index for fuels and utilities increased 1.5 percent in December, following a 0.1-percent rise in November. The index for natural gas, which declined 0.7 percent in November, increased 4.4 percent in December and 36.7 percent in all of 2000. In December, the indexes for fuel oil and for electricity rose 2.5 and 0.5 percent, respectively. Fuel oil prices, which increased 30.9 percent in 1999, advanced 40.5 percent in 2000. Charges for electricity rose 2.6 percent over the past 12 months. The index for household furnishings and operations declined 0.2 percent in December, but rose 1.7 percent in 2000 after declining 0.2 percent in 1999.

The transportation component declined 0.1 percent in December, reflecting a 1.7-percent decrease in the index for gasoline. (Prior to seasonal adjustment, gasoline prices fell 3.9 percent in December.) Despite the December decline, gasoline prices registered a 13.9-percent increase during the last 12 months, after advancing 30.1 percent in all of 1999. The index for new vehicles increased 0.4 percent in December but was unchanged over the last 12 months. (As of December, about two-thirds of the new vehicle sample was represented by 2001 models. The 2001 models will continue to be phased in, with appropriate adjustments for quality change, over the next several months, as they replace old models at dealerships. For a report on quality changes for the 2001 vehicles represented in the Producer Price Index sample, see news release USDL-00-331, dated November 9, 2000.) The index for used cars and trucks advanced 0.6 percent in December and 3.4 percent in all of 2000. The index for public transportation rose 0.2 percent in December. Airline fares increased 0.1 percent in December and 5.9 percent during the last 12 months.

The index for apparel declined 0.4 percent in December. (Prior to seasonal adjustment, apparel prices fell 3.0 percent, reflecting preholiday discounting.) During the 12-month period ended in December, apparel prices fell 1.8 percent, their third consecutive annual decline.

Medical care costs rose 0.3 percent in December to a level 4.2 percent higher than a year ago. In December, the index for medical care commodities—prescription drugs, nonprescription drugs, and medical supplies—increased

0.3 percent, with the index for prescription drugs up 0.5 percent. Prescription drug prices rose 3.6 percent in all of 2000. The index for medical care services rose 0.3 percent in December. Charges for professional services and hospital and related services increased 0.4 and 0.1 percent, respectively, in December and 3.7 and 6.2 percent in 2000.

The index for recreation costs increased 0.1 percent in December and 1.7 percent in 2000. During the last 12 months, increases in recreation services—admissions to movies, theaters, concerts, and sporting events, club membership dues, and fees for lesson or instructions—rose 3.8 percent, accounting for about 70 percent of the overall change in this major group.

The index for education and communication increased 0.6 percent in December and 1.3 percent in all of 2000. During the 12 months ended in December, education costs rose 5.7 percent, while communication costs declined 3.0 percent. In December, educational costs increased 0.4 percent; and the index for communication rose 0.8 percent. Within the latter group, the index for telephone services increased 0.9 percent, reflecting a 2.6-percent rise in long-distance charges. Local telephone charges declined 0.3 percent in December. During the 12-month period ended in December, however, local charges rose 5.5 percent, while long-distance charges declined 9.2 percent. The index for personal computers and peripheral equipment declined 2.1 percent in December and 22.7 percent over the past 12 months.

The index for other goods and services declined 0.8 percent in December, reflecting a 3.5-percent decline in prices for tobacco and smoking products. The index for cigarettes declined 3.8 percent in December—reflecting discounting of selected major brands. During the past 12 months, however, cigarette prices have risen 7.6 percent. This compares with increases of 33.7 percent in 1998 and 11.5 percent in 1999.

CPI for Urban Wage Earners and Clerical Workers (CPI-W)

On a seasonally adjusted basis, the CPI for Urban Wage Earners and Clerical Workers rose 0.2 percent in December.

CPI-U 12-month changes, 1990 to present

Recalculated Seasonally Adjusted Indexes to be Available on February 16, 2001

Each year with the release of the January CPI, seasonal adjustment factors are recalculated, to reflect price movements from the just-completed calendar year. This routine annual recalculation may result in revisions to seasonally adjusted indexes for the previous 5 years. BLS will make available recalculated seasonally adjusted indexes, as well as recalculated seasonal adjustment factors, for the period January 1996 through December 2000, on Friday, February 16, 2001. This date is two working days before

the scheduled release of the January 2000 CPI on Wednesday February 21, 2001. The revised indexes and seasonal factors will be available on the Internet. Address: **<http://stats.bls.gov>** Select Data, then select FTP Site, then select special requests, then select cpi. The revised seasonal data will be in the file REVSEAS_2000CPI.TXT.

For further information, contact Richard Kerr at Kerr_R@bls.gov or at (202) 691-6970.

Report on Quality Changes for 2001 Model Vehicles

Passenger Cars

The value of quality changes for a sample of eighteen 2001 model year domestic passenger cars included in the Producer Price Index (PPI) for October averaged \$184.83, according to estimates by the Bureau of Labor Statistics (BLS) of the U.S. Department of Labor. This change represents 40.7 percent of the average \$454.24 increase in producers' prices for this year's models as compared with last year's models.

The retail equivalent value of these quality changes averaged \$212.67, representing 50.3 percent of the average \$422.51 over-the-year increase in manufacturers' suggested list prices.

- The \$212.67 estimated retail value of quality change breaks down as follows:
- \$67.65 for changes in accordance with 1990 Clean Air Act Amendments;
- \$1.92 for safety changes for internal trunk releases in accordance with Federal Motor Vehicle Safety Standard 401;
- \$23.24 for other federally mandated safety improvements such as child seat tethers and head impact protection in accordance with Federal Motor Vehicle Safety Standards 210 and 201;
- \$119.86 for nonmandated quality changes such as powertrain improvements, theft protection, safety improvements, and changes in levels of standard or optional equipment.

Light Trucks

The value of quality changes for a sample of twenty 2001 model year domestic light trucks included in the PPI for

October averaged \$251.64. This change represents 62.8 percent of the average \$400.40 increase in producers' prices for this year's models as compared with last year's models.

The retail equivalent value of quality changes for domestic light trucks averaged \$298.62, representing 66.3 percent of the average \$450.30 over-the-year increase in manufacturer's suggested list prices.

The \$298.62 estimated retail value of quality change breaks down as follows:

- \$90.78 for changes in accordance with 1990 Clean Air Act Amendments;
- \$9.42 for other federally mandated safety improvements such as child seat tethers and head impact protection in accordance with Federal Motor Vehicle Safety Standards 210 and 201;
- \$198.42 for nonmandated quality changes such as powertrain improvements, theft protection, safety improvements, and changes in levels of standard or optional equipment.

Estimates of the value of quality change are based on a review by the BLS of data supplied by producers for similarly equipped 2000 and 2001 domestic models priced for the Producer Price Index. Most of the estimates of quality changes in this release are derived from information supplied for the Producer Price Index for October. These data also form the basis of the new vehicle quality adjustment for the Consumer Price Index (CPI). However, it should be noted that, effective with the release of data for January 1999, changes made solely for the purpose of meeting air pollution standards are no longer considered quality improvements for CPI calculation purposes.

¹ Not seasonally adjusted.

² Indexes on a December 1997=100 base.

³ This index series was calculated using a Laspeyres estimator. All other item stratum index series converted to a geometric means estimator in January, 1999.

⁴ Indexes on a December 1984=100 base

⁵ Indexes on a December 1986=100 base.

⁶ Indexes on a December 1983=100 base.

⁷ Indexes on a December 1990=100 base.

⁸ Special index based on a substantially smaller sample.

⁹ Indexes on a December 1993=100 base.

¹⁰ Indexes on a December 1996=100 base.

¹¹ Indexes on a December 1988=100 base.

- Data not available.

NOTE: Index applies to a month as a whole, not to any specific date.

¹ Foods, fuels, and several other items priced every month in all areas; most other goods and services priced as indicated:

M - Every month.

1 - January, March, May, July, September, and November.

2 - February, April, June, August, October, and December.

² Regions defined as the four Census regions. See map in technical notes.

³ Indexes on a December 1996=100 base.

⁴ Indexes on a December 1986=100 base.

⁵ In addition, the following metropolitan areas are published semiannually and appear in Tables 34 and 39 of the January and July issues of the CPI Detailed Report: Anchorage, AK; Cincinnati-Hamilton, OH-KY-IN; Denver-Boulder-Greeley, CO; Honolulu, HI; Kansas City, MO-KS; Milwaukee-Racine, WI; Minneapolis-St. Paul, MN-WI; Pittsburgh, PA;

Portland-Salem, OR-WA; St. Louis, MO-IL; San Diego, CA; Tampa-St. Petersburg-Clearwater, FL.

⁶ Indexes on a November 1996=100 base.

- Data not available.

NOTE: Local area indexes are byproducts of the national CPI program. Each local index has a smaller sample size than the national index and is, therefore, subject to substantially more sampling and other measurement error. As a result, local area indexes show greater volatility than the national index, although their long-term trends are similar. Therefore, the Bureau of Labor Statistics strongly urges users to consider adopting the national average CPI for use in their escalator clauses.

NOTE: Index applies to a month as a whole, not to any specific date.

¹ This index series was calculated using a Laspeyres estimator. All other item
stratum index series converted to a geometric means estimator in January, 1999.

² Indexes on a December 1982=100 base.

³ Special index based on a substantially smaller sample.

⁴ Indexes on a December 1993=100 base.

⁵ Indexes on a December 1997=100 base.

- Data not available.

NOTE: Index applies to a month as a whole, not to any specific date.

¹ Foods, fuels, and several other items priced every month in all areas; most other goods and services priced as indicated:

M - Every month.

1 - January, March, May, July, September, and November.

2 - February, April, June, August, October, and December.

² Regions defined as the four Census regions. See map in technical notes.

³ Indexes on a December 1996=100 base.

⁴ Indexes on a December 1986=100 base.

⁵ In addition, the following metropolitan areas are published semiannually and appear in Tables 34 and 39 of the January and July issues of the CPI Detailed Report: Anchorage, AK; Cincinnati-Hamilton, OH-KY-IN; Denver-Boulder-Greeley, CO; Honolulu, HI; Kansas City, MO-KS; Milwaukee-Racine, WI; Minneapolis-St. Paul, MN-WI; Pittsburgh, PA;

Portland-Salem, OR-WA; St. Louis, MO-IL; San Diego, CA; Tampa-St. Petersburg-Clearwater, FL.

⁶ Indexes on a November 1996=100 base.

- Data not available.

NOTE: Local area indexes are byproducts of the national CPI program. Each local index has a smaller sample size than the national index and is, therefore, subject to substantially more sampling and other measurement error. As a result, local area indexes show greater volatility than the national index, although their long-term trends are similar. Therefore, the Bureau of Labor Statistics strongly urges users to consider adopting the national average CPI for use in their escalator clauses.

NOTE: Index applies to a month as a whole, not to any specific date.

¹ Areas on pricing schedule 1 (see Table 10) will appear next month.

² Index on a November 1977=100 base in Miami.

³ This index series was calculated using a Laspeyres estimator. All other item stratum index series converted to a geometric means estimator in January, 1999.

⁴ Indexes on a December 1984=100 base

⁵ Special index based on a substantially smaller sample.

⁶ Indexes on a December 1993=100 base.

⁷ Indexes on a December 1997=100 base.

- Data not available.

NOTE: Index applies to a month as a whole, not to any specific date.

Technical Note

Brief Explanation of the CPI

The Consumer Price Index (CPI) is a measure of the average change in prices over time in a market basket of goods and services. The Bureau of Labor Statistics publishes CPIs for two population groups: (1) a CPI for All Urban Consumers (CPI-U), which covers approximately 87 percent of the total population, and (2) a CPI for Urban Wage Earners and Clerical Workers (CPI-W), which covers 32 percent of the total population. The CPI-U includes, in addition to wage earners and clerical workers, groups such as professional, managerial, and technical workers, the self-employed, short-term workers, the unemployed, and retirees and others not in the labor force.

The CPI is based on prices of food, clothing, shelter, and fuels, transportation fares, charges for physicians' and dentists' services, drugs, and other goods and services that people buy for day-to-day living. Prices are collected in 87 urban areas across the country from about 50,000 housing units and approximately 23,000 retail establishments—department stores, supermarkets, hospitals, filling stations, and other types of stores and service establishments. All taxes directly associated with the purchase and use of items are included in the index. Prices of fuels and a few other items are obtained every month in all 87 locations. Prices of most other commodities and services are collected every month in the three largest metropolitan areas and every other month in other areas. Prices of most goods and services are obtained by personal visits or telephone calls of the Bureau's trained representatives.

In calculating the index, price changes for the various items in each location are averaged together with weights that represent their importance in the spending of the appropriate population group. Local data are then combined to obtain a U.S. city average. Separate indexes are also published by size of city, by region of the country, for cross-classifications of regions and population-size classes, and for 26 local areas. Area indexes do not measure differences in the level of prices among cities; they measure only the average change in prices for each area since the base period.

The index measures price change from a designed reference date—1982-84, which equals 100.0. An increase of 16.5 percent, for example, is shown as 116.5. This change can also be expressed in dollars as follows: the price of a base period market basket of goods and services in the CPI has risen from \$10 in 1982-84 to \$11.65.

For further details see *BLS Handbook of Methods*, Chapter 17, the Consumer Price Index, Bulletin 2490, April 1997.

Calculating Index Changes

Movements of the indexes from one month to another are usually expressed as percent changes, rather than changes in index points, because index point changes are affected by the level of the index in relation to its base period, whereas percent changes are not. The example below illustrates the computation of index point and percent changes.

Percent changes for 3-month and 6-month periods are expressed as annual rates and are computed according to the standard formula for compound growth rates. These data indicate what the percent change would be if the current rate were maintained for a 12-month period.

<i>Index point change</i>	
CPI	115.7
Less previous index	111.2
Equals index point change	4.5
<i>Percent change</i>	
Index point difference	4.5
Divided by the previous index	111.2
Equals	0.040
Results multiplied by 100	0.040x100
Equals percent change	4.0

Energy Prices

Prices are usually available for the U.S. city average, 13 large metropolitan areas, the 4 census regions, 3 size classifications, and 10 areas reflecting the 4 Census regions cross-classified by the 3 population sizes. However, not all energy commodities and services are used in every area of the country. Fuel oil, for example, is not a common heating fuel in some urban areas, particularly in the South and West. Where no average prices are available, the designation NA appears. This designation also appears if the data sufficiency criteria have not been met in any given month. For example, if there are fewer than five usable fuel oil prices for a published city or region size class, no fuel oil prices for the area will be published.

All prices are collected monthly by BLS representatives in the urban areas priced for the CPI. Prices for natural gas and electricity include fuel and purchased gas adjustments and all applicable taxes. Fuel oil and gasoline prices include applicable Federal, State, and local taxes.

Natural gas and electricity. Natural gas prices are reported in therms, which are a measure of heating value. Electricity prices are given in kilowatt hours (kwh). For both utility services, the consumption ranges specified in table P2 are the upper and lower limits of the bill sizes priced for the CPI. The average prices per therm and per kilowatt hour are calculated from bills priced within these ranges. It should be noted that bills priced for the CPI are not only for different consumption amounts, but may also be calculated from different types of residential rate schedules. *The average prices per therm and per kilowatt hour are not, therefore, generally suitable for use in place-to-place price comparisons.*

The average prices for 40 and 100 therms of natural gas, and for 500 kilowatt hours of electricity (shown in table P1) are calculated from a special price collection program. They are not used in the calculation of the CPI. Because heating and air-conditioning requirements vary by geographic location, climate, and weather conditions, it cannot be inferred that these consumption amounts represent those used by a typical residential consumer. These bills are used merely to track price changes over time for constant amounts of consumption, and to provide continuity with prices of natural gas and electricity formerly published in conjunction with the unrevised CPI.

Fuel oil. Only #2 fuel oil (home heating oil) is priced. (See

table P1.) Prices are collected, in most cases, for quantities greater than one gallon. These prices are converted to a gallon price for this program. Fuel oil prices reflect discounts for quantity or quick payment.

Gasoline and automotive diesel fuel. Gasoline and diesel prices, shown in table P3, are collected at the pump from a sample of full service, mini-service, and self-service gas stations.

Approximate British Thermal Unit (BTU) values for some energy items are as follows, according to the source indicated:

1 therm = 100,000 BTU's (U.S. Department of Energy)

1 kwh = 3,412 BTU's (Edison Electric Institute)

1 gallon #2 fuel oil = 140,000 BTU's (U.S. Department of Energy)

Food and Beverage Prices

Actual weighted average prices for food and beverages are calculated each month at the national level and for the four Census geographic regions, as shown in table P4. As a result of changes in price collection methodology and sample sizes, average prices for individual cities cannot, in general, be produced. It is hoped, however, that regional average prices will help satisfy the need for local area data. It should be noted that the average prices for food in this report reflect

Census Regions

variations in brand, quality, and size among geographic areas. Users of average food prices should be aware that these differences exist.

Because a number of food commodities are not available in all areas on a year-round basis, prices will not appear in some months for some regions or for the U.S. city average. In other instances, sufficient prices may not be available due to temporary disruptions in supplies. Where no average prices are available, the designation NA appears. When a price is not available from an individual store in any month, an estimated price will be calculated for the missing item and used in computing the average price. In cases where the proportion of estimated prices used to calculate the average is considered too high, the average price is not published and NA appears for that item in the table.

Because of space limitations in the table, the description for each item is abbreviated. More detailed specifications are available from BLS information offices or from the Washington office upon request.

Seasonally Adjusted and Unadjusted Data

Because different groups use price data for different purposes, the Bureau of Labor Statistics publishes seasonally adjusted, as well as unadjusted, changes each month.

For analyzing general price trends in the economy, seasonally adjusted changes are usually preferred, because they eliminate the effect of changes that normally occur at the same time and in about the same magnitude every year—such as price movements resulting from changing climatic conditions, production cycles, model changeovers, holidays, and sales.

The unadjusted data are of primary interest to consumers concerned about the prices they actually pay. Unadjusted data also are used extensively for escalation purposes. Many collective bargaining contract agreements and pension plans, for example, tie compensation changes to the Consumer Price Index unadjusted for seasonal variation.

Seasonal factors used in computing the seasonally adjusted indexes are derived by the X-12-ARIMA Seasonal Adjustment Method. The updated seasonal data at the end of 1977 replaced data from 1967 through 1977. Subsequent annual updates have replaced 5 years of seasonal data, e.g., data from 1995 through 1999 were replaced at the end of 1999. The seasonal movement of all items and 54 other aggregations is derived by combining the seasonal movement of 73 selected components. Each year, the seasonal status of every series is reevaluated based upon certain statistical criteria. If any of the 73 components change their seasonal adjustment status from seasonally adjusted to not seasonally adjusted, not seasonally adjusted data will be used for the last 5 years; but the seasonally adjusted indexes will be used before that period.

Seasonally adjusted data, including the *all items* index levels, are subject to revision for up to 5 years after their original release. For this reason, BLS advises against the use of these data in escalation agreements.

Effective with the calculation of the seasonal factors for 1990, the Bureau of Labor Statistics has used an enhanced

seasonal adjustment procedure called Intervention Analysis Seasonal Adjustment for some CPI series. Intervention Analysis Seasonal Adjustment allows for better estimates of seasonally adjusted data. Extreme values or sharp movements that might distort the seasonal pattern are estimated and removed from the data before calculation of seasonal factors. Since the calculation of seasonal factors for 1996, X-12-ARIMA software has been used for Intervention Analysis Seasonal Adjustment.

For the fuel oil and the motor fuels indexes, this procedure is used to offset the effects that extreme price volatility would otherwise have had on the estimates of seasonally adjusted data for those series. For the breakfast cereal index, the procedure is used to offset the effects of price-cutting among cereal manufacturers. For the educational books and supplies index, the procedure is used to account for greater-than-normal sale prices on educational reference books. For some alcoholic beverage series, Intervention Analysis Seasonal Adjustment is used to offset the effects of increased brewer's costs, along with increased demand for specialty beers. For the nonalcoholic beverages index, the procedure is used to offset the effects of a large increase in coffee prices due to adverse weather. For the fats and oils series, the procedure is used to account for lower domestic butter stocks, lower cold storage supplies, and anticipation of a bumper soybean crop. For the new trucks index, the procedure is applied to account for loyalty rebates offered to customers by American automakers. For the water and sewerage maintenance index, the procedure is used to account for a data collection anomaly.

A description of Intervention Analysis Seasonal Adjustment, as well as a list of unusual events modeled and seasonal factors for these items, may be obtained by writing the Bureau of Labor Statistics, Division of Consumer Prices and Price Indexes, Washington, DC 20212, or by calling Claire McAnaw Gallagher on (202) 691-6968. Ms. Gallagher may also be reached at gallagher_c@bls.gov by e-mail.

Metropolitan Areas

BLS publishes price indexes for three major metropolitan areas monthly:

Chicago-Gary-Kenosha, IL-IN-WI
Los Angeles-Riverside-Orange County, CA
New York-Northern New Jersey-Long Island,
NY-NJ-CT-PA

Data for additional 11 metropolitan areas are published every other month [on an odd (January, March, etc.) or even (February, April, etc.) month schedule] for the following areas:

Atlanta, GA	-even
Boston-Brockton-Nashua, MA-NH-ME-CT	-odd
Cleveland-Akron, OH	-odd
Dallas-Fort Worth, TX	-odd
Detroit-Ann Arbor-Flint, MI	-even
Houston-Galveston-Brazoria, TX	-even
Miami-Fort Lauderdale, FL	-even

Philadelphia-Wilmington-Atlantic City, PA-NJ-DE-MD	-even
San Francisco-Oakland-San Jose, CA	-even
Seattle-Tacoma-Bremerton, WA	-even
Washington-Baltimore, DC-MD-VA-WV	-odd

(Note: The designation even or odd refers to the month during which the area's price change is measured. Due to the time needed for processing, data are released 2 to 3 weeks into the following month.)

Data are published for another group of 12 metropolitan areas on a semiannual basis. These indexes, which refer to the arithmetic average for the 6-month periods from January through June and July through December, are published with release of the CPI for July and January, respectively, in August and February for:

Anchorage, AK
Cincinnati-Hamilton, OH-KY-IN
Denver-Boulder-Greeley, CO
Honolulu, HI
Kansas City, MO-KS
Milwaukee-Racine, WI
Minneapolis-St. Paul, MN-WI
Pittsburgh, PA

How to Obtain Consumer Price Index Information

Consumer Price Index (CPI) information is available from the Bureau of Labor Statistics (BLS) electronically, through publication subscriptions, and via telephone and fax through automated recordings. Information specialists are also available in the national and information offices, to provide help and to respond to questions.

Electronic access to CPI data

BLS on the Internet. Through the Internet, BLS provides free, continuous access to published CPI data and press releases. The most recent month's CPI is made available immediately at the time of release. Additionally, a database called LABSTAT, containing current and historical data for the CPI, is accessible. Data and press releases from other BLS surveys are also available. The BLS site is accessible via the World Wide Web (WWW), Gopher, and File Transfer Protocol (FTP), as described below. Send e-mail to labstat.helpdesk@bls.gov for help using any of these systems.

World Wide Web. BLS maintains a Web site <http://stats.bls.gov> on the Internet. This BLS homepage provides access to LABSTAT, as well as links to program-specific homepages. The CPI homepage <http://stats.bls.gov/>

cpihome.htm provides other CPI information, as well as indexes. This includes a brief explanation of methodology, frequently asked questions and answers, contacts for further information, and explanations of how the CPI handles special items, like medical care and housing. In addition, CPI press releases and historical data for metropolitan areas can be accessed by linking to information office homepages from the main BLS Web site listed above.

FTP and Gopher. These tools provide access to CPI LABSTAT data, as well as documentation and press release files organized in hierarchical directories. Connect to stats.bls.gov using FTP or Gopher. Log on as *anonymous*, and use your complete Internet e-mail address as the password.

Subscriptions to CPI publications

Summary data. Free, monthly, 2-page publication containing 1- and 12-month percent changes for selected U.S. city average Consumer Price Index for All Urban Consumers (CPI-U) and Consumer Price Index for Urban Wage Earners and Clerical Workers (CPI-W) index series. The all items index data for each local area are also included. To be added to the mailing list, write to: Office of Publications, Bureau of Labor Statistics, 2 Massachusetts Avenue, NE, Room 2850, Washington, DC 20212-0001, or call (202) 691-5200 or any of the BLS information offices listed below.

CPI Detailed Report. This is the most comprehensive report on the Consumer Price Index. This publication may be ordered by writing to: New Orders, Superintendent of Documents, P.O. Box 371954, Pittsburgh, PA 15250-7954 or by calling (202) 512-1800. Subscriptions cost \$27 per year.

Monthly Labor Review (MLR). The MLR provides selected CPI data included in a monthly summary of BLS data and occasional articles and methodological descriptions too extensive for inclusion in the *CPI Detailed Report*. The MLR costs \$27 per year. This publication may be ordered by writing to: New Orders, Superintendent of Documents, P.O. Box 371954, Pittsburgh, PA 15250-7954 or by calling (202) 512-1800.

Recorded CPI data

Summary CPI data are provided on 24-hour recorded messages. Detailed CPI information is available by calling (202) 691-5200. A touch-tone telephone is recommended, as this system allows the user to select specific indexes from lists of available data.

Recorded summaries of CPI data are also available by calling any one of the metropolitan area CPI hot lines listed below. These hot line summaries typically include data for the U.S. city average, as well as for the specified area. These recordings are approximately 3 minutes in length, do not require a touch-tone telephone, and are available 24 hours a day, 7 days a week.

Area	Hotline Number
Anchorage	(907) 271-2770
Atlanta	(404) 331-3415
Baltimore	(410) 962-4898
Boston	(617) 565-2325/2327
Chicago	(312) 353-1880
Cincinnati	(513) 684-2349
Cleveland	(216) 522-3852
Dallas	(214) 767-6970
Denver	(303) 844-1726
Detroit	(313) 226-7558
Honolulu	(808) 541-2808
Houston	(713) 718-3753

Washington, DC	(202) 691-6994

Other sources of CPI data

Technical information is available during normal working hours, Monday through Friday, by calling (202) 691-7000 or any of the information offices listed below.

Fax-on-Demand. A wide variety of BLS information and data, including the CPI, are available from the BLS *Ready Facts* catalog, via fax-on-demand. CPI documents from *Ready Facts* that are available around the clock include the monthly CPI press release, selected national, regional and metropolitan area historical summaries, and some technical information. The latest CPI information is posted during the morning of release day. Call (202) 691-6325 and follow instructions to have the latest *Ready Facts* catalog sent to you. All information offices also have fax systems in place; their systems include all information available from the national

catalog, in addition to region-specific information on the CPI. Phone and fax-on-demand numbers for the information offices are:

<i>Office</i>	<i>Fax-on-Demand</i>	<i>Telephone</i>
Atlanta	(404) 331-3403	(404) 331-3415
Boston	(617) 565-9167	(617) 565-2327
Chicago	(312) 353-1880	(312) 353-1880
Dallas	(214) 767-9613	(214) 767-6970
Kansas City	(816) 426-3152	(816) 426-2481
New York	(212) 337-2412	(212) 337-2400
Philadelphia	(215) 597-4153	(215) 597-3282
San Francisco	(415) 975-4567	(415) 975-4350
Washington, DC	(202) 691-6325	(202) 691-7000

Historical tables. These include all published indexes for each of the detailed CPI components. These tables are available via the Internet, by calling (202) 691-7000 in the national office, or by contacting any of the information offices listed above.

Descriptive publications. These publications describe the CPI and ways to use it. They include simple fact sheets discussing specific topics about the CPI, a broader, nontechnical overview of the CPI in a question and answer format, and a technical and thorough description of the CPI and its methodology. These publications are available upon request by calling (202) 691-7000, and many are included on the CPI homepage on the Internet.

Special publications. Also available are various special publications, such as *Relative Importance of Components in the Consumer Price Index* and materials describing the annual revisions of seasonally adjusted CPI data. For more information, call (202) 691-7000.

Further information can be obtained from the Office of Prices and Living Conditions, Bureau of Labor Statistics, 2 Massachusetts Avenue, NE., Room 3615, Washington, DC 20212-0001, telephone (202) 691-7000 or by calling any of the information offices listed above.
