¹ Preliminary estimates by Council of Economic Advisers.

² Less Government sales.

³ Includes expenditures for military services, international security and foreign relations (except foreign loans), development and control of atomic energy, promotion of the merchant marine, promotion of defense production and economic stabilization, and civil defense. For further details, see *Economic Report of the President*, January 1955 (p. 137), and *National Income, 1954 Edition* (p. 148).

These expenditures are not comparable with the "major national security" category in *The Budget of the United States Government for the Fiscal Year Ending June 30, 1959*, and shown on p. 31 of *Economic Indicators*.

NOTE.—Detail will not necessarily add to totals because of rounding.

¹ Cash receipts from farm marketings, value of farm products consumed in farm households, gross rental value of farm dwellings, and Government payments to farmers.

² Realized gross farm income less farm production expenses. Excludes farm wages paid to workers living on farms and any income to farm people from non-farm sources, which in 1957 amounted to \$1.8 billion and \$6.3 billion, respectively.

³ Data prior to 1946 differ from farm proprietors' income on pages 3 and 4 because of revisions by the Department of Agriculture not yet incorporated into the national income accounts of the Department of Commerce.

⁴ Dollar estimates in current prices divided by the index of prices paid by farmers for items used in family living on a 1957 base.

EXPENDITURES FOR NEW PLANT AND EQUIPMENT

The July-August survey of business expenditures on plant and equipment indicated that anticipated capital outlays in the third quarter would be \$30.3 billion (seasonally adjusted annual rate), the same as expenditures in the second quarter. A moderate rise to \$31.0 billion in the last quarter of the year was expected.

² Commercial and other includes trade, service, finance, communications, and construction.

³ Estimates based on anticipated capital expenditures as reported by business in late July and August 1958.

NOTE.—Annual total is the sum of unadjusted expenditures; it does not necessarily coincide with the average of seasonally adjusted figures, which include

adjustments, when necessary, for systematic tendencies in anticipatory data. These figures do not agree with the totals included in the gross national product estimates of the Department of Commerce, principally because the latter cover agricultural investment and also certain equipment and construction outlays charged to current expense.
