¹ Cash receipts from farm marketings, value of farm products consumed in farm households, gross rental value of farm dwellings, and Government payments to farmers.

² Realized gross farm income less farm production expenses. Excludes farm wages paid to workers living on farms and any income to farm people from non-farm sources, which in 1957 amounted to \$1.8 billion and \$6.3 billion, respectively.

³ Data prior to 1948 differ from farm proprietors' income on pages 3 and 4 because of revisions by the Department of Agriculture not yet incorporated into the national income accounts of the Department of Commerce.

⁴ Dollar estimates in current prices divided by the index of prices paid by farmers for items used in family living on a 1957 base.

EXPENDITURES FOR NEW PLANT AND EQUIPMENT

The October-December survey of business expenditures on plant and equipment indicated that anticipated capital outlays in the fourth quarter would be \$29.9 billion (seasonally adjusted annual rate), slightly higher than expenditures in the third quarter. A further moderate rise to \$30.5 billion in the first quarter of 1959 was indicated.

¹ Excludes agriculture.

² Commercial and other includes trade, service, finance, communications, and construction.

³ Estimates based on anticipated capital expenditures as reported by business between late October and early December 1958.

NOTE.—Annual total is the sum of unadjusted expenditures; it does not necessarily coincide with the average of seasonally adjusted figures, which include

adjustments, when necessary, for systematic tendencies in anticipatory data. These figures do not agree with the totals included in the gross national product estimates of the Department of Commerce, principally because the latter cover agricultural investment and also certain equipment and construction outlays charged to current expense.

Detail will not necessarily add to totals because of rounding.
