² Commercial and other includes trade, service, finance, communications, and construction.

³ Estimates based on anticipated capital expenditures as reported by business in May 1962. Includes adjustments when necessary for systematic tendencies in anticipatory data.

NOTE.—Beginning 1959 all quarterly data are rounded to nearest \$50 million. Annual total is the sum of unadjusted expenditures; it does not necessarily coincide with the average of seasonally adjusted figures.

These figures do not agree with the totals included in the gross national product estimates of the Department of Commerce, principally because the latter cover agricultural investment and also certain equipment and construction outlays charged to current expense.

WEEKLY INDICATORS OF PRODUCTION

Weekly indicators of production were adversely affected in July by the July 4 holiday and vacation periods. Car and truck assemblies were unchanged. Although steel output declined for the month, it picked up some strength towards the end of the month. Most other indicators also declined.
