Economic Indicators

DECEMBER 1962

*Prepared for the Joint Economic Committee by the
Council of Economic Advisers*

The November 1962 issue of *Economic Indicators* introduces a number of revisions resulting from the recent review of the needs of the Joint Economic Committee and other users of the publication. The revised *Indicators* incorporates expanded detail on some topics such as unemployment, the balance of payments, and housing, and new information such as liquid assets and Federal budget, national income accounts basis.

The 1962 revised edition of the *Historical and Descriptive Supplement to Economic Indicators*, which describes each series and gives annual data for years not shown in the monthly issues, will be available shortly from the Superintendent of Documents, Government Printing Office.

DISPOSITION OF PERSONAL INCOME

Personal consumption expenditures (seasonally adjusted) increased slightly more than disposable income in the third quarter. As a result, there was a drop in the saving rate.

EXPENDITURES FOR NEW PLANT AND EQUIPMENT

According to the November survey, business firms are planning to spend \$37.4 billion on new plant and equipment in 1962, about 9 percent more than in 1961. This total is \$200 million above that reported in the August survey. Expenditures (seasonally adjusted) increased 3.8 percent in the third quarter, a larger gain than anticipated earlier. They are expected to remain unchanged in the fourth quarter, and to decline by 1.7 percent in the first quarter of next year.

¹ Excludes agriculture.

² Commercial and other includes trade, service, finance, communications, and construction.

³ Estimates based on anticipated capital expenditures as reported by business in November 1962. Includes adjustments when necessary for systematic tendencies in anticipatory data.

NOTE.—Beginning 1959 all quarterly data are rounded to nearest \$50 million.

Annual total is the sum of unadjusted expenditures; it does not necessarily coincide with the average of seasonally adjusted figures.

These figures do not agree with the totals included in the gross national product estimates of the Department of Commerce, principally because the latter cover agricultural investment and also certain equipment and construction outlays charged to current expense.

¹ Married men living with their wives.

² Assumes unemployed persons lost 37.5 hours a week; those on part-time for economic reasons lost difference between 37.5 hours and actual number of hours worked.

³ Differs from total nonagricultural employment (p. 13), which includes persons with jobs but not at work for such reasons as vacation, illness, bad weather, and industrial disputes.

⁴ Includes persons who worked part-time because of slack work, material shortages or repairs, new job started, or job terminated.

⁵ Primarily includes persons who could find only part-time work.

⁶ Average hours worked: usually full-time, 24.0; usually part-time, 17.4.

¹ Includes all full- and part-time wage and salary workers in nonagricultural establishments who worked during or received pay for any part of the pay period ending nearest the 15th of the month. Excludes proprietors, self-employed persons, domestic servants, and personnel of the armed forces. Total derived from this table not comparable with estimates of nonagricultural employment of the civilian labor force, shown on p. 10, which include proprietors, self-employed persons, and domestic servants; which count persons as employed when they

are not at work because of industrial disputes; and which are based on an enumeration of population, whereas the estimates in this table are based on reports from employing establishments.

MANUFACTURERS' SALES, INVENTORIES, AND NEW ORDERS

Manufacturers' new orders for durable goods rose 3½ percent in October on a seasonally adjusted basis. Sales of durable goods fell slightly and new orders exceeded sales for the first month since February. Sales and new orders for nondurable goods both declined. Manufacturers' inventories rose slightly. Preliminary data indicate that new orders for durable goods changed little in November.

¹ Other than liquid funds.

² Equals changes in U.S. gold and convertible currencies and liquid liabilities to foreigners. Remittances and pensions, not shown separately in this table, are included in over-all balance and amounted to \$578 million in 1961.

³ Minus indicates increase in liabilities.

⁴ To International Monetary Fund (IMF) and foreign central banks and governments.

⁵ To foreign commercial banks and other international and regional institutions not listed in footnote 4, and other foreigners.

⁶ Preliminary.

⁷ Total at end of third quarter was \$16,531 million, of which \$16,081 million was U.S. gold stock. The decline in gold stock during quarter was \$446 million.

NOTE.—Data exclude military aid and U.S. subscriptions to IMF.

PRICES

CONSUMER PRICES

Consumer prices fell 0.1 percent in October. A fall in food prices more than outweighed a rise in the prices of other commodities. The price of services failed to rise for the second straight month.
