GROSS PRIVATE DOMESTIC INVESTMENT

Gross private domestic investment was down $4½ billion (seasonally adjusted annual rate) in the first quarter, largely due to a decline of almost $5 billion in the rate of inventory investment. The small rise in business fixed investment was almost offset by a decline in residential structures.

[3] Estimates based on anticipated capital expenditures as reported by business in late January and February 1970. Includes adjustments when necessary for systematic tendencies in anticipatory data.

NOTE.—Revised series beginning 1947. For detail, see *Survey of Current Business, January 1970.*

Annual total is the sum of unadjusted expenditures; it does not necessarily coincide with the average of seasonally adjusted figures.

These figures do not agree with the totals included in the gross national product estimates of the Department of Commerce, principally because the latter cover agricultural investment and also certain equipment and construction outlays charged to current expense.
