¹Excludes agricultural business; real estate operators; medical, legal, educational, and cultural service; and nonprofit organizations.

²Includes trade, service, finance, communications, insurance, and construction.

³Estimates based on anticipated capital expenditures as reported by business in late July and August 1970. Includes adjustments when necessary for systematic tendencies in anticipatory data.

NOTE.—Annual total is the sum of unadjusted expenditures; it does not

necessarily coincide with the average of seasonally adjusted figures.

These figures do not agree with the totals included in the gross national product estimates of the Department of Commerce, principally because the latter cover agricultural investment and also certain equipment and construction outlays charged to current expense.

¹Includes all full- and part-time wage and salary workers in nonagricultural establishments who worked during or received pay for any part of the pay period which includes the 12th of the month. Excludes proprietors, self-employed persons, domestic servants, and personnel of the armed forces. Total derived from this table not comparable with estimates of nonagricultural employment of the civilian labor force, shown on p. 10, which include proprietors, self-employed

persons, and domestic servants; which count persons as employed when they are not at work because of industrial disputes; and which are based on an enumeration of population, whereas the estimates in this table are based on reports from employing establishments.

NOTE.—Beginning 1959, data include Alaska and Hawaii.

WEEKLY HOURS OF WORK - SELECTED INDUSTRIES

The average workweek for private nonfarm production workers (seasonally adjusted) declined by 0.4 hours to 36.8 hours in September. The decline in the average workweek reflects the presence of Labor Day in the survey week, and its effect was most marked in contract construction where a decline of 2.6 hours occurred.

FEDERAL SECTOR, NATIONAL INCOME ACCOUNTS BASIS

According to current estimates, Federal receipts in the second quarter rose less than \$1 billion (seasonally adjusted annual rate) and expenditures increased \$13 billion, resulting in a deficit of \$14 billion. The Federal pay raise and increased social security benefits, both with retroactive features, accounted for the sharp rise in expenditures. Preliminary figures for the third quarter indicate a drop in both receipts and expenditures.
