SOURCES OF PERSONAL INCOME

Personal income rose \$11.4 billion (annual rate) in January, following a \$20.2 billion increase in December. The January increase was affected by three special factors: The increase in the minimum wage added almost \$2.0 billion to wages and salaries; government payments of special energy allowances to SSI recipients added about \$4.6 billion to transfer payments; and an increase in the social security wage base added about \$2.5 billion to personal contributions for social insurance.

These figures do not agree precisely with the nonresidential fixed investment data in gross national product estimates, mainly because those data include investment by farmers, professionals, nonprofit institutions, and real estate firms, and certain outlays charged to current account.

² Includes trade, service, construction, finance, and insurance.

³ Starts are estimated by adding changes in carryover to expenditures during given period.
