DISPOSITION OF PERSONAL INCOME

According to preliminary estimates, disposable personal income fell \$13.9 billion (annual rate) in the third quarter compared with a rise of \$71.7 billion in the second quarter. If there had been no delay in the payment of Federal income tax refunds from the first quarter to the second quarter, disposable personal income would have increased \$13.7 billion in the third quarter and \$16.6 billion in the second quarter.

² Annual changes are from December to December and monthly changes are from 6 months earlier at a seasonally adjusted annual rate.

NOTE.—The nontransactions portion of M2 is seasonally adjusted as a whole to reduce distortions

caused by substantial portfolio shifts arising from regulatory and financial changes in recent years, especially shifts to MMDAs in 1983. A similar procedure is used to seasonally adjust the remaining nontransactions balances in M3.

¹ Data are prorated averages of Wednesday figures for domestically chartered banks and averages of month-end data for foreign-related institutions.

² Excludes loans to commercial banks in the United States.

³ Data are averages of daily figures.

⁴ Beginning September 26, 1984 a transfer of loans from Continental Illinois National Bank to the FDIC reduced total loans and securities and total loans by \$1.9 billion, commercial and industrial loans by \$1.4 billion, and real estate loans (not shown here) by \$0.4 billion.

NOTE.—Series for all commercial banks beginning January 1984 are not strictly comparable with data for earlier periods, largely because beginning January 1984 certain obligations of States and political subdivisions are included in loans rather than in other securities.
