## SOURCES OF PERSONAL INCOME

Personal income increased \$10.7 billion (annual rate) in November, following an increase of \$58.3 billion in October. The November increase was reduced by a large decrease in subsidy payments to farm proprietors and by several other special factors—bonus payments to employees in the motor vehicle industry, restitution payments to Japanese-Americans, and retirement incentive payments to U.S. Postal Service employees—that had boosted October personal income. October personal income was also boosted by a rebound in rental income of persons from the effects of Hurricane Iniki. Excluding these special factors, personal income increased \$40.7 billion in November and \$26.0 billion in October; the larger increase in November was more than accounted for by a step-up in wages and salaries.

<sup>1</sup> Data are prorated averages of Wednesday figures for domestically chartered banks and averages of month-end data for foreign-related institutions. Data beginning January 1984 are not strictly comparable with data for earlier periods, largely because beginning January 1984 certain obligations of States and political subdivisions are included in loans rather than in other securities.

<sup>2</sup> Excludes loans to commercial banks in the United States.
