[1] Data from the establishment survey. Includes all full- and part-time wage and salary workers in nonagricultural establishments who received pay for any part of the pay period that includes the 12th of the month. Excludes proprietors, self-employed persons, unpaid family workers, and private household workers. Data from the household survey shown on p. 11 include those workers and also count persons as employed when they are not at work because of industrial disputes, bad weather, etc., even if they are not paid for the time off. In the series shown here, persons who work at more than one job are counted each time they appear on a payroll, in contrast to the series shown on p. 11 where persons are counted only once—as employed, unemployed, or not in the labor force. See Employment and Earnings for details.

[2] Includes natural resources and mining, not shown separately.

[3] Includes wholesale trade, transportation and warehousing, and utilities, not shown separately.

NOTE.—Data classified by industry based on the 2007 North American Industry Classification System (NAICS). For details see Employment and Earnings.

[1] Employer costs for employee benefits.

NOTE.—The employment cost index is a measure of the change in the cost of labor, free from the influence of employment shifts among occupations and industries.

Data exclude farm and household workers.

Data beginning 2001 are based on the 2002 North American Industry Classifi (NAICS); data prior to 2001 are based on the Standard Industrial Classification details on industry classification and other details see Employment Cost Index, April 28, 2006.

[1] Output refers to real gross domestic product originating in the sector.
[2] Hours of all persons engaged in the sector, including hours of proprietors and unpaid family workers. Estimates based primarily on establishment data.
[3] Wages and salaries of employees plus employers' contributions for social insurance and private benefit plans. Also includes an estimate of wages, salaries, and supplemental payments for the self-employed.
[4] Hourly compensation divided by the consumer price index for all urban consumers (CPI-U) for recent quarters. The trend from 1978–2008 is based on the consumer price index research series (CPI-U-RS).
[5] Current dollar gross domestic output divided by the output index.

NOTE.—Data relate to all persons engaged in the sector.

Percent changes are from preceding period and are based on original data; they may differ slightly from percent changes based on indexes shown here.

[1] Annual data are averages of monthly not seasonally adjusted figures; monthly data are seasonally adjusted totals for month. Shipments are the same as sales.

[2] Seasonally adjusted, end of period.

[3] Annual data are averages of seasonally adjusted monthly ratios.

NOTE.—Manufacturers' nondurable new orders (not shown) are the same as nondurable shipments. Also, there are no unfilled nondurable orders; data shown for total unfilled orders are durable unfilled orders.

Total and durable shipments and inventories include data on semiconductors; new and unfilled orders do not.
