OFFICE OF PRICES
AND LIVING CONDITIONS
W. John Layng, Assistant Commissioner

Producer Prices and Price Indexes is a monthly report on primary market price movements including statistical tables and technical notes. It may be ordered from the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

Subscription Price:
 \$16 a year domestic (includes
 one supplement)
 \$4 additional foreign

Single copy \$1.80.
Supplement \$2.70.

December 1978

The Secretary of Labor has determined that the publication of this periodical is necessary in the transaction of the public business required by law of this Department. Use of funds for printing this periodical has been approved by the Director of the Office of Management and Budget through July 1983. Controlled circulation postage paid at Washington, D.C. Material in this publication is in the public domain and may be reproduced without permission of the Federal Government. Please credit the Bureau of Labor Statistics.

6. Producer prices and price indexes for commodity groupings and individual items	15		

Price Movements

October 1978

Summary

The Producer Price Index for Finished Goods moved up 0.9 percent from September to October on a seasonally adjusted basis. The October advance followed an increase of the same size in September and a 0.1 percent decline in August (table A). Prices for both intermediate (semi-finished) goods and crude goods rose substantially more than in recent months, as increases for nonfood as well as food-related materials accelerated.

Among finished goods, prices for consumer foods rose sharply for the second consecutive month, following falling prices in August and July and generally large increases in the first 6 months of 1978. Consumer nondurables other than foods advanced much more than in any other month so far this year (table B). On the other hand, the index for consumer durables was unchanged after rising rapidly during most of the year to date; a seasonally adjusted decline in passenger car prices offset increases for other consumer durables. Capital equipment prices continued to increase about as much as in most other recent months.

Before seasonal adjustment, the Producer Price Index for Finished Goods increased 1.4 percent to 199.7 (1967=100). Over the year, the Finished Goods Price Index rose 8.6 percent. The finished consumer foods index was up 11.9 percent from October 1977 to October 1978, the index for finished consumer goods other than foods increased 7.5 percent, and the capital equipment index was 7.5 percent higher than a year ago. The Producer Price Index for intermediate goods rose 8.0 percent over the year, and crude material prices advanced 20.4 percent.

Finished goods

Finished consumer goods. The Producer Price Index for finished consumer goods (those eventually sold to retailers) rose 1.0 percent from September to October after seasonal adjustment, about the same as in September. This index had declined in August. In October, prices for consumer foods rose at the same rapid rate as in September (1.7 percent). Before that, the finished consumer foods index had declined for 2 months. Prices rose in October for most

Table A. Percent changes from preceding month in selected stage-of-processing price indexes, seasonally adjusted¹

Month	Finished goods			Intermediate goods			Crude goods

in this report may differ from those previously reported. All data are subject to revision 4 months after original publication.
r= revised.

finished consumer foods, including pork, fish, beef and veal, fresh and dried fruits, packaged cocoa, milled rice, eggs, refined sugar in consumer-size packages, processed fruits and vegetables, and dairy products. Prices declined for processed poultry, fresh and dried vegetables, and confectionery end products.

Price increases accelerated for consumer nondurable goods other than foods, after rising moderately in most other months so far this year. The 1.1 percent advance in October was the largest in 4 years. The acceleration from September to October was mainly due to larger price increases for gasoline, home heating oil, and tires and tubes. Advances were also recorded for soaps and synthetic detergents, leather footwear, nonalcoholic and alcoholic beverages, and apparel.

Prices for consumer durable goods were unchanged over the month, the first time since October 1976 that they did not rise. Decreases for passenger cars balanced increases for metal household containers, household flatware, jewelry, dinnerware, and mobile homes. (Prices for 1979 model-year automobiles were reflected for the first time in October. See USDL news release 78-921 titled "Report on Quality Changes for 1979 Model Passenger Cars," issued on November 3.) The decrease for the passenger car index over the month after seasonal adjustment reflected the decision by domestic automobile manufacturers to institute price changes throughout the model year rather than wait until the fall when new models are usually introduced. Automobile producers had raised prices across the board this past spring and therefore did not increase prices of new models as much as they would have under

the former pricing policy. Over the year, passenger car prices were up 6.2 percent.

Capital equipment. The Producer Price Index for capital equipment rose 0.6 percent in October, the same as the average monthly advance recorded in the first 9 months of the year. Smaller price increases than in September were registered for some kinds of capital goods, such as agricultural machinery, motor trucks, railroad equipment, and photographic equipment. These slowdowns were offset by an acceleration in price increases for several other types of capital equipment, including construction machinery, special industry machinery, and power-driven hand tools. Prices for most other capital goods continued to rise about as much as in recent months.

Intermediate materials

The Producer Price Index for intermediate materials, supplies, and components advanced 1.2 percent in October, seasonally adjusted, the largest monthly increase since November 1974. The acceleration was caused primarily by the index for intermediate materials excluding foods and feeds, which advanced 1.1 percent in October after rising 0.6 and 0.7 percent in September and August, respectively.

Price indexes for durable manufacturing materials and construction materials both rose much more than in September. Among durable manufacturing materials, sharply higher prices were recorded for nonferrous metals. Plywood, lumber, asphalt roofing, cement, and building paper and board led the advance for construction materials. Large increases in prices for motor vehicle parts and electronic components accounted for much of the acceleration

in the manufacturing components index. Among processed fuels and lubricants, prices for diesel fuel rose substantially more than in most recent months, but residual fuel and coke prices turned down. Increases for nondurable manufacturing materials such as leather, gray fabrics, and paperboard were not as large as in September but were generally larger than those in many other recent months.

The intermediate foods and feeds index moved up 2.8 percent over the month, following a 2.2 percent increase in September and a 3.4 percent decline in August. Prices for manufactured animal feeds turned sharply higher after falling during the 2 preceding months. Refined sugar for food manufacturing was also up, but prices for animal fats and oils, crude vegetable oils, and flour decreased.

Crude materials

The Producer Price Index for crude materials for further processing advanced 3.0 percent seasonally adjusted in October, following a 1.6 percent increase in September and

a 1.3 percent decrease in August. The index for crude foodstuffs and feedstuffs moved up 3.6 percent over the month after rising 1.9 percent in September. The acceleration in October was due to two factors: First, an upturn in prices for fresh and dried fruits, grains, and raw cane sugar, all of which had moved down in the previous month; and second, larger price increases than in September for hogs and oilseeds. Cattle prices continued to rise rapidly. In contrast, prices were lower for live poultry, green coffee, and cocoa beans following September advances.

The index for crude nonfood materials also rose considerably more in October (2.1 percent) than in the preceding month (1.0 percent). Prices rose much more than in September for nonferrous scrap, plant and animal fibers, and crude natural rubber; in addition, prices for iron and steel scrap and wastepaper turned up after falling in September. Prices were also higher in October for most other crude nonfood materials, including hides and skins, iron ore, natural gas, and crude petroleum.

¹ Commodities at the subproduct class (6-digit) level are assigned to stage-of-processing (SOP) indexes according to the amount of processing, manufacturing, or assembling to which those commodities are subjected before they enter the market. The weight of each subproduct class is allocated among the various SOP indexes in accordance with the relative proportion of output consumed at each level of processing. SOP allocations are placed within parentheses for those commodity groupings whose subproduct classes

are not uniformly divided among different stage-of-processing categories. Such figures indicate the weighted average allocated to a particular stage-of-processing category as of December 1977.

² Not seasonally adjusted.

³ Not available.

Table 3. Producer price indexes and percent changes for selected stage-of-processing groupings, seasonally adjusted

Grouping	Indexes				Percent change at annual rate for—

¹ Data for June 1978 have been revised to reflect the availability of late reports and corrections by respondents.

² Seasonal commodity—no price available this month.

³ Some of the titles of the individual commodity price indexes included in this grouping are not shown.

⁴ Not available.

⁵ Prices for some items in this grouping are lagged 1 month.

⁶ Regional price indexes for bituminous coal, industrial sizes, contract are presented in table 8

of this report.

⁷ Prices for natural gas (05-31) are lagged 1 month.

⁸ Includes only domestic production.

⁹ Prices for gasoline (05-71), light distillate (05-72), middle distillate (05-73), and residual fuels (05-74) are lagged 1 month.

¹⁰ Regional refined petroleum product prices and price indexes are presented in table 7 of this report.

¹¹ Some prices for industrial chemicals (06-1) are lagged 1 month.

Table 7. Producer prices and price indexes for refined petroleum products by region¹

¹ Data for June 1978 have been revised to reflect the availability of late reports and corrections by respondents. All data are subject to revision 4 months after original publication. All prices have been lagged 1 month since February 1973.

² Caution should be used in interpreting month-to-month changes, because of low response

rates from the sample of reporters which ranged from 30 to 60 percent for these particular indexes.

³ Not available.

Table 8. Producer price indexes for bituminous coal by region¹

(June 1979=100)

Code No.	Commodity	1978			Code No.	Commodity	1978		
		June	Sept.	Oct.			June	Sept.	Oct.
0512 03	Bituminous coal, industrial sizes				0302	Manufacturing	(3)	114.9	114.9
	contract	120.5	123.2	123.5	02	South Appalachia	(3)	(3)	(3)

¹ Data for June 1978 have been revised to reflect the availability of late reports and corrections by respondents. All data are subject to revision 4 months after original publication.

² Not available.

NOTE: These indexes are designed to measure changes in the price of coal sold in contract sales transactions (excluding captive production) in various domestic mining regions. Prices are reported by coal operators or sales agents, f.o.b. mine, per net short ton.

Table 9. Producer price indexes for special commodity groupings^{1 2}

(1967=100 unless otherwise indicated)

Commodity grouping	1977		1978		
	Annual average	Oct.	June	Sept.	Oct.
All commodities, less farm products	193.7	196.8	208.1	211.3	213.6
All foods	186.8	187.2	208.9	209.7	213.2
Processed foods	186.9	188.2	209.3	210.5	213.5
Industrial commodities, less fuels and power	183.6	187.1	196.4	200.0	202.3
Selected textile mill products (Dec. 1975=100)	106.7	107.7	108.5	109.4	109.7
Hosiery	107.1	104.9	105.7	104.6	104.9
Underwear and nightwear	152.2	155.2	158.8	160.1	160.2
Chemicals and allied products, including synthetic rubber and synthetic fibers and yarns	185.0	186.4	190.5	191.4	192.6
Pharmaceutical preparations	133.4	134.6	140.0	142.1	142.8

Farm and garden tractors, less parts	201.5	206.6	211.9	222.1	222.5
Agricultural machinery excluding tractors, less parts	198.8	201.2	213.9	219.5	220.8

¹ These indexes are calculated by combining the indexes listed below by commodity code after each special commodity grouping (titles in table 6). The weights are those used for the comprehensive All Commodities Index.

² Data for June 1978 have been revised to reflect the availability of late reports and corrections by respondents. All data are subject to revision 4 months after original publication.

All commodities, less farm products: 02 through 15

All foods: 01-1, 01-7, and 02 less 02-61, 02-62, and 02-9

Processed foods: 02 less 02-9, 02-61, and 02-62

Industrial commodities, less fuels and power: 03, 04, and 06 through 15

Selected textile mill products: 03-27, 03-37-01-06, 03-37-01-07, 03-37-01-08, 03-37-01-11, 03-37-03-42, 03-4, 03-81-01-65, 03-81-01-72, 03-81-01-73, 03-81-02-38, 03-81-02-72, 03-81-02-74, 03-81-03-62, 03-81-03-64, 03-82-02-12, 03-83-03-22, and 12-31

Hosiery: 03-81-01-72, 03-81-01-73, 03-81-02-74, 03-81-03-64

Underwear and nightwear: 03-81-01-74, 03-81-01-75, 03-81-01-76, 03-81-01-77, 03-81-01-78, 03-81-02-74, 03-81-02-75, 03-81-02-78, and 03-81-03-62

Chemicals and allied products, including synthetic rubber and synthetic fibers: 03-1, 07-11-02 and 08 less 08-4

Pharmaceutical preparations: 06-35 and 06-36

Lumber and wood products, excluding millwork and other wood products: 08-1 and 08-3

Special metals and metal products: 10, 11-1, and 14-1

Fabricated metal products: 10-3, 10-4, 10-5, 10-6, 10-7, and 10-8

Copper and copper products: 10-22-01-06, 10-22-01-08, 10-22-01-13, 10-23-01, 10-24-01-06, 10-25-02, and 10-26-01

Machinery and motive products: 11 and 14

Machinery and equipment, except electrical: 11-1, 11-2, 11-3, 11-4, 11-6, 11-9

Agricultural machinery, including tractors: 11-11, 11-12 less 11-11-51 and 11-12-51

Metalworking machinery: 11-32, 11-33-04, 11-37, and 11-38

Numerically controlled machine tools: 11-37-11-11, 11-37-11-12, 11-37-14-11, and 11-37-16

Total tractors: 11-11 and 11-28 less 11-11-51

Industrial valves: 11-49-01-01 through 11-49-01-06, 11-49-01-16 through 11-49-01-19, 11-49-01-21 through 11-49-01-27

Industrial fittings: 11-49-01-11 through 11-49-01-14

Abrasive grinding wheels: 11-36-11, 11-36-12, 11-36-13, 11-36-14, 11-36-15

Agricultural machinery and equipment, less parts (old commodity code 11-1): 11-1 less 11-11-51 and 11-12-51

Farm and garden tractors, less parts (old commodity code 11-11): 11-11 less 11-11-51

Agricultural machinery excluding tractors, less parts (old commodity code 11-12): 11-12 less 11-12-51

Construction materials: 06-21, 07-21, 08-11, 08-12-01-01, 08-12-01-02, 08-12-01-31, 08-12-01-71, 08-2, 08-3, 08-2, 10-13-02-39, 10-13-02-48, 10-13-02-55, 10-13-02-63, 10-13-02-69, 10-13-02-71, 10-13-02-89, 10-13-02-91, 10-16-01-31, 10-16-01-63, 10-16-01-33, 10-26-01-01, 10-26-01-03, 10-26-01-04, 10-26-01-06, 10-26-01-17, 10-26-01-18, 10-26-01-19, 10-26-01-21, 10-26-01-23, 10-26-02-51, 10-26-02-62, 10-26-19-93, 10-26-01-06, 10-26-01-07, 10-26-01-09, 10-26-01-11, 10-26-02-87, 10-26-02-71, 10-41-01, 10-4, 10-6, 10-7, 10-73-01-01, 10-73-01-06, 10-73-01-11, 10-73-01-12, 10-73-01-13, 10-73-01-14, 10-73-01-15, 10-73-01-55, 10-73-01-67, 10-74-01-01, 10-74-01-31, 10-74-01-81, 10-74-01-82, 10-74-01-87, 10-74-01-91, 10-74-01-95, 10-81-01-46, 10-83-01-01, 10-83-01-03, 10-83-01-06, 10-83-01-07, 10-83-01-09, 10-83-01-11, 10-83-01-21, 10-83-01-23, 10-83-01-31, 10-83-01-33, 10-83-01-35, 10-83-01-37, 10-83-01-41, 10-83-01-46, 10-83-01-48, 10-89-01-26, 10-89-01-33, 10-89-01-51, 11-42, 11-47, 11-49-01-02, 11-49-01-06, 11-49-01-08, 11-49-01-12, 11-49-01-15, 11-71-01-01, 11-71-01-02, 11-71-01-03, 11-71-01-04, 11-71-02-65, 11-71-02-71, 11-71-02-73, 12-11-01-06, 12-32, 13-11-01-01, 13-11-02-07, 13-2, 13-3, 13-4, 13-8, 13-7, 13-91, 13-92, 13-93

Table 10. Producer price indexes: Changes in commodity specifications, October 1978

Commodity code	New specification	Old specification
03-42-02-21	70-100% wool/balance nylon women' s woolen sports-wear fabric, 10-14 ounces/linear yard, 58"-60", yarn or piece or stock dyed; manufacturer to manufacturer, 80 yards or more, f.o.b. mill or freight allowed, yard.	70-80% wool/balance nylon women' s woolen sports-wear fabric, 10-14 ounces/linear yard, 58"-60", yarn or piece or stock dyed; manufacturer to manufacturer, 80 yards or more, f.o.b. mill or freight allowed, yard.
10-89-01-03	Collapsible tube, aluminum, 1 1/4" diameter x 7" long, standard threaded no. 28 neck, round orifice, plain shoulder, decorated, without interior or exterior protective lacquer, with cap, assembled, in 1,000 gross lots; manufacturer to other manufacturer, f.o.b. plant or f.o.b. plant with freight allowed on shipments of a specified amount, gross.	Collapsible tube, aluminum, 1 1/4" diameter x 7" long, standard threaded no. 28 neck, round orifice, plain shoulder, decorated, without interior or exterior protective lacquer, red, moulded, phenolic cap, assembled, in 1,000 gross lots; manufacturer to other manufacturer, f.o.b. plant or f.o.b. plant with freight allowed on shipments of a specified amount, gross.

Table 11. Producer price indexes for the output of selected SIC industries¹

¹ Standard Transportation Commodity Code.

² The price index for total railroad freight also includes STCC groups not shown separately.

NOTE: The index is designed to measure changes in the prices of shipping goods by rail in

the United States. The representative prices and sample used for the index reflect the railroads' prices for shipping a fixed set of commodities under specified and unchanging conditions. The index is not intended to measure changes in railroad revenue or in shipper costs that result from changes in services or mode.

Technical Note: Test Data for Producer Price Index Revision

Test data from the pilot survey for the Producer Price Index (PPI) revision have been developed for the period beginning January 1978 and are published each month in table 14, "Producer price indexes for the net output of selected industries and products," in this report. The revision is being undertaken as a comprehensive effort to make major improvements in the measurement of price changes by domestic producers of goods and services. The data now available are from a pilot survey conducted to test the methods and procedures for the comprehensive revision. The revision will be conducted on an industry-by-industry basis. The results for the first industries in the full-scale survey will be available in the fall of 1979. Coverage of all mining and manufacturing industries is scheduled for completion in 1984.

The four industries covered in the pilot survey are: Soybean oil mills (SIC 2075), newspaper printing and publishing (SIC 2711), concrete products other than block and brick (SIC 3272), and household laundry equipment (SIC 3633). These industries were selected because they offered a wide range of pricing problems on which to test the new techniques. Indexes covering some of these same industries will continue to be calculated under the old program. The new indexes will not begin replacing the old ones in the Producer Price Index until early 1980.

These pilot survey indexes differ from indexes in the current Producer Price Index in a number of important respects:

- (1) They are *industry-based* indexes. The entire output of each industry is sampled, including secondary production and miscellaneous receipts. The current Producer Price Indexes are based on a sample of major products. Even the Industry-Sector Price Indexes (ISPI's) are derived from these product indexes. The current ISPI's do not price miscellaneous receipts, and the prices for primary and secondary production are obtained from any producer of the product even if that producer does not belong to the industry. The newly published pilot survey indexes are derived from prices supplied strictly by producers within the industry. As a result, the pilot product indexes apply only to the production within the industry. After all mining and manufacturing industries are covered by the revision, product indexes will be constructed covering all production of the product.
- (2) These new indexes are classified in accordance

with the *Standard Industrial Classification* (SIC) system and incorporate most features of the Census of Manufactures product code extensions of the SIC. The coding will make the data easier to use in conjunction with other industry-oriented economic data.

- (3) *Net output values of shipments* are used as weights in preparing the index. Net output values refer to the value of shipments leaving the industry. In contrast, the weights used in the current PPI's and ISPI's are gross shipment values, which include shipments *within* an industry. The resulting multiple counting of price changes is one of the major defects of the current indexes. The current stage-of-processing indexes partially correct this defect, but the new indexes consistently correct it at all levels.
- (4) Increased emphasis is being given to obtaining actual *transaction prices at the time of shipment*. Although it has been a general objective of the current program to obtain transaction prices, they have not been obtained for significant portions of the index. In addition, some products in the current PPI intentionally have been priced at order prices rather than shipment prices.
- (5) *Probability sampling* was used to select the firms to be asked to report prices. As a result, firms of all sizes are included in the sample. In addition, within the firm, the individual items to be priced and the terms of the transaction were chosen using probability techniques. In the current PPI, major companies selected on a judgment basis are asked to report prices for volume-selling items under "typical" transaction terms.

Since this is a pilot survey, a number of changes will be introduced as the full-scale survey is put in place. These changes include the following:

- (1) Greater product detail will generally be available because of larger sample sizes and increased capabilities to combine product areas that are not publishable by themselves. The 5-digit product class indexes, which cannot now be calculated, will be produced.
- (2) Ultimately, the survey will cover all shipments by all 493 industries in mining and manufacturing. The present PPI's cover only about 50 percent of this value; the pilot survey covers about 2 percent of it.

(3) Improved calculation techniques will be introduced, including the use of Census of Manufactures shipment data to weight the 7-digit product indexes to higher levels. The pilot indexes rely on the estimated relative importance of products based on shipment data derived from the survey itself.

(4) Estimates of sampling error will be published.

For further information on the underlying concepts and methodology of the Producer Price Index revision, see "Improving the Measurement of Producer Price Change," by John F. Early, in the April 1978 issue of the *Monthly Labor Review*. Reprints are available from the Bureau of Labor Statistics upon request.

Brief Explanation of Producer Price Indexes

Producer Price Indexes measure average changes in prices received in primary markets of the United States by producers of commodities in all stages of processing. These data were previously presented as the Wholesale Price Index. The name "Producer Price Indexes" is now being used to reflect more accurately the coverage of the data. The sample used for calculating these indexes continues to contain nearly 2,800 commodities and about 10,000 quotations selected to represent the movement of prices of all commodities produced in the manufacturing, agriculture, forestry, fishing, mining, gas and electricity, and public utilities sectors. The universe includes all commodities produced or imported for sale in commercial transactions in primary markets in the United States.

Producer Price Indexes can be organized by stage of processing or by commodity. The stage of processing structure organizes products by degree of fabrication (i.e., finished goods, intermediate or semifinished goods, and crude materials). The commodity structure organizes products by similarity of end-use or material composition.

Finished goods are commodities that will not undergo further processing and are ready for sale to the ultimate user, either an individual consumer or a business firm. Capital equipment (formerly called producer finished goods) includes commodities such as motor trucks, farm equipment, and machine tools. Finished consumer goods include foods and other types of goods eventually purchased by retailers and used by consumers. Consumer foods include unprocessed foods such as eggs and fresh vegetables, as well

as processed foods such as bakery products and meats. Other finished consumer goods include durables such as automobiles, household furniture, and jewelry, and non-durables such as apparel and gasoline.

Intermediate materials, supplies, and components are commodities that have been processed but require further processing before they become finished goods. Examples of such semifinished goods include flour, cotton yarns, steel mill products, belts and belting, lumber, liquefied petroleum gas, paper boxes, and motor vehicle parts.

Crude materials for further processing include products entering the market for the first time which have not been manufactured or fabricated but will be processed before becoming finished goods. Scrap materials are also included. Crude foodstuffs and feedstuffs include items such as grains and livestock. Examples of crude nonfood materials include raw cotton, crude petroleum, natural gas, hides and skins, and iron and steel scrap.

For analysis of general price trends, stage of processing indexes are more useful than commodity grouping indexes. This is because commodity grouping indexes sometimes produce exaggerated or misleading signals of price changes by reflecting the same price movement through various stages of processing. For example, suppose that a price rise for steel scrap results in an increase in the price of steel sheet and then an advance in prices of automobiles produced from that steel. The All Commodities Wholesale Price Index and the Industrial Commodities Price Index

would reflect the same price movement three times—once for the steel scrap, once for the steel sheet, and once for the automobiles. This multiple counting occurs because the weighting structure for the All Commodities WPI uses the total shipment values for all commodities at all stages of processing. On the other hand, the Finished Goods Price Index would reflect the change in automobile prices, the Intermediate Materials Price Index would reflect the steel sheet price change, and the Crude Materials Price Index would reflect the rise in the price of steel scrap. (See illustration.)

To the extent possible, prices used in calculating Producer Price Indexes apply to the first significant commercial transaction in the United States, from the production or central marketing point. Price data are generally collected monthly, primarily by mail questionnaire. Respondents are asked to provide net prices or to provide all applicable discounts. BLS attempts to base Producer Price Indexes on actual transaction prices; however, list or book prices are used if transaction prices are not available. Most prices are obtained directly from pro-

ducing companies on a voluntary and confidential basis, but some prices are taken from trade publications or from other Government agencies. Prices generally are reported for the Tuesday of the week containing the 13th day of the month.

In calculating Producer Price Indexes, price changes for the various commodities are averaged together with weights representing their importance in the total net selling value of all commodities as of 1972. The detailed data are aggregated to obtain indexes for stage of processing groupings, commodity groupings, durability of product groupings, and a number of special composite groupings. Each index measures price changes from a reference period which equals 100.0 (usually 1967, as designated by the Office of Management and Budget). An increase of 85 percent from the reference period in the Finished Goods Price Index, for example, is shown as 185.0. This change can also be expressed in dollars, as follows: "The price of a representative sample of finished goods sold in primary markets in the United States has risen from \$100 in 1967 to \$185."

A Note about Calculating Index Changes

Movements of price indexes from one month to another are usually expressed as percent changes rather than changes in index points because index point changes are affected by the level of the index in relation to its base period, while percent changes are not. The following example illustrates the computation of index point and percent changes. (See box.)

Percent changes for 3-month and 6-month periods are expressed as annual rates that are computed according to the standard formula for compound growth rates. These data indicate what the percent change would be if the current rate were maintained for a 12-month period.

<i>Index Point Change</i>	
Finished Goods Price Index	185.5
less previous index	<u>184.5</u>
equals index point change	1.0
<i>Index Percent Change</i>	
Index point change	1.0
divided by the previous index	<u>184.5</u>
equals	0.005
result multiplied by 100	0.005 x 100
equals index percent change	0.5

A Note on Seasonally Adjusted Data

Because price data are used for different purposes by different groups, the Bureau of Labor Statistics publishes seasonally adjusted as well as unadjusted changes each month.

For analyzing general price trends in the economy, seasonally adjusted data usually are preferred because they eliminate the effect of changes that normally occur at about the same time and in about the same magnitude every year—such as price movements resulting from normal weather patterns, regular production and marketing cycles, model changeovers, seasonal discounts, and holidays.

For this reason, seasonally adjusted data more clearly reveal the underlying cyclical trends. Seasonally adjusted data are subject to revision when seasonal factors are revised each year.

The unadjusted data are of primary interest to users who need information which can be related to the actual dollar values of transactions. Individuals requiring this information include marketing specialists, purchasing agents, budget and cost analysts, contract specialists, and commodity traders. Unadjusted data generally are used in escalating contracts such as purchase agreements or real estate leases.
